- Accreditation
- George Mason University Foundation

Vision for the New Century
George Mason University will be the university needed by a region and a world driven by new social, economic, and technological realities.

We are in the right place: The nation’s capital region is the epicenter of the world’s political web, its information and communications network, and its new economy.

We are ready: In an age that demands originality and imagination, Mason is among the nation’s most innovative universities.

Mason will

- Be a magnet for outstanding faculty who will devise new ways to approach problems, invent new ways to teach, and develop new knowledge for the benefit of the region and nation.
- Attract inventive, industrious students of all ages and cultures, and produce citizens who are intellectually and technologically literate—people who will lead by the force of their ideas.
- Transform into knowledge and wisdom the vast amounts of information now accessible through new technologies.
- Build strong alliances that bring the know-how of business and the community into the university and take the knowledge of the university into the workplace and the larger society.
- Be a center of inquiry, knowledge, and professional expertise in fields with vital implications for human needs and opportunities in the future.
- Remain innovative, resourceful, and responsive while drawing on the intellectual and cultural heritage of the classical university.

Alan G. Merten
President, George Mason University

Faculty and Students
The university’s more than 1,000 full-time instructional and research faculty members are experts in a broad range of fields. They have published widely, contributed to major research findings, and consulted with government and business officials. Faculty members have received grants and awards from the Guggenheim Foundation, the Templeton Foundation, the National Science Foundation, the National Endowment for the Arts, and the National Endowment for the Humanities, and have won Fulbright Scholar grants and Mellon Fellowships.

Of particular interest to undergraduates are the Robinson Professors, outstanding scholars in the liberal arts and sciences who have come to Mason from prestigious positions elsewhere. They are concerned with broad and fundamental intellectual issues and are dedicated to undergraduate teaching. Each semester's Schedule of Classes provides details about courses taught by Robinson Professors.

The majority of the university’s more than 30,000 students are from Virginia; however, all 50 states and Washington, D.C., as well as 130 countries, are represented in the student body.
While full-time undergraduates, 18 to 24 years in age, make up the largest student group, part-time graduate and undergraduate students account for nearly half of the student population. Mason welcomes qualified students with a wide range of interests and backgrounds.

**Distributed University**

Mason is a distributed university, with campuses in Fairfax, Arlington, and Prince William counties, and satellite sites in Loudoun County, Herndon, Reston, and Front Royal. Each Mason campus has a distinctive academic focus that plays a critical role in the economy of its surrounding region. At each campus, students and faculty have access to all the university’s resources, while the duplication of programs and support services is minimized through the use of technology.

**Fairfax Campus**

Situated on 677 acres of wooded land, the Fairfax Campus offers a wealth of opportunities beyond the numerous academic programs and continues to be the principal center for undergraduate residence and life. The resident student population is expected to grow to more than 5,800 during the next five years as new residential units are constructed.

The George W. Johnson Center, the first building of its kind in the country, fosters university-wide learning by integrating students’ curricular and extracurricular activities and strengthening relationships among university communities.

The Center for the Arts and the Patriot Center offer numerous opportunities to experience the arts, as well as sports and other entertainment. Professional artistic events presented on campus include music and dance from around the world; Theater of the First Amendment, Mason’s professional theater company; and regional, national, and international visual art exhibitions. Free tickets are available to these events for full-time Mason students.

The Aquatic and Fitness Center provides state-of-the-art exercise equipment, and competitive and recreational swimming to the university community and outside teams.

**Arlington Campus**

The Arlington Campus is located near Washington, D.C., on 5.2 acres of land. Mason's most urban location, the Arlington Campus offers convenient access via Metro and key transportation routes. It currently comprises three buildings: the Original Building, formerly known as the Kann's Department Store; Hazel Hall, which is home to the School of Law; and 3330 Washington Boulevard, a leased facility. The George Mason University Foundation also supports the Arlington Campus with a building that includes parking; 192,000 square feet of leased office space; and 13,000 square feet of retail space.

The newest structure being erected on this campus is Founders Hall, part of a three-phase plan to develop the overall site. Founders Hall will provide 256,000 square feet of space that will include the new home for the School of Public Policy, and space for the School of Law, as well as academic and student support services. In addition, the building will feature a 300-seat auditorium, a public plaza, a large multipurpose room, and three levels of underground parking, which will provide 443 parking spaces. Occupancy is anticipated for fall 2010. This additional space will enable the university to highlight and showcase much of the exciting work taking place at the Arlington Campus—as well as throughout the university—through the hosting of conferences, meetings, and other events. Once complete, the Arlington Campus will include 750,000 square feet of space and many new facilities to accommodate its projected 8,000 undergraduate, graduate, and professional students.

The Arlington Campus is also home to the Institute for Conflict Analysis and Resolution, as well as programs in social work, nonprofit management, arts management, business administration, and Initiatives in Educational Transformation. The Volgenau School of Information Technology and Engineering offers special certification courses in information technology through its TechAdvance Program through the Office of Continuing Professional Education. Additional continuing and professional education classes are also available on site. While most of the programs offered on the Arlington Campus are on the graduate and professional levels, some undergraduate courses are available.
The Mercatus Center, the James M. Buchanan Center for Political Economy, and the Institute for Humane Studies—independent initiatives affiliated with the university—can also be found on the Arlington Campus. The Center for Global Studies; Center for Justice, Law, and Society; Critical Infrastructure Protection Program; Interdisciplinary Center for Economic Science; and Interdisciplinary Center for Regional Economic Competitiveness are also located there.

Prince William Campus

The Prince William Campus is located on 124 acres in Manassas, near the intersection of I-66 and the Prince William Parkway. The campus serves all of Northern Virginia and offers convenient access to the university for citizens of Prince William, Fauquier, and western Fairfax counties; the cities of Manassas and Manassas Park; and adjoining areas to the west and south. The campus comprises four buildings: a research facility, two academic buildings, and a recreation and fitness center.

Through mutually beneficial partnerships with local government and area businesses, the campus has positioned itself to tap into the unique assets of the surrounding community while providing access to university resources and programs for students and citizens.

A major focus of the campus is research and academic programs in the life sciences, including biodefense and infectious diseases, cancer proteomics, genomics, and bioinformatics.

Construction is under way on the university’s Biomedical Research Laboratory, a regional biocontainment facility funded in part by the National Institute of Allergy and Infectious Diseases. The laboratory will house research on emerging infectious diseases and those caused by biological threat agents.

Programs in nursing, teacher education, administration of justice, business, information technology, health and fitness, recreation, exercise science, health promotion, parks and outdoor recreation, sport management, therapeutic recreation, tourism and events management, and athletic training also are offered on the campus. Professional certificate programs are available through the Office of Continuing Professional Education.

Campus resources available to all university students, faculty, and staff include a full-service library, a large drop-in computer lab, an information center, University Police, a university bookstore, dining services, student lounge space, an intercampus shuttle bus between the Fairfax and Prince William Campuses, and a full complement of student and academic services. In addition, there are numerous opportunities to get involved in campus life through a variety of cocurricular and extracurricular activities.

Many campus facilities and services are available to serve university and community needs. The 300-seat Verizon Auditorium boasts innovative audiovisual technologies suitable for presentations, meetings, and ceremonies, along with lobby space for receptions and displays.

The 110,000-square-foot Freedom Aquatic and Fitness Center offers state-of-the-art exercise equipment, group fitness programs, a full gymnasium with elevated track, and recreational and instructional swimming in a 50-meter competition pool. It is also home to Mason’s human performance lab, classrooms, and other meeting space.

The Mason Enterprise Center, part of the university’s network of enterprise centers, has played a major role in enhancing commerce and developing new programs in support of small businesses throughout Virginia. The center brings this experience and diversity of services to support growing businesses and entrepreneurs in the Manassas and Prince William County areas. It also offers a telework center for low-cost telecommuting in a professional office environment.

Prince William County, the City of Manassas, and Mason, along with the private sector, have joined to create the region’s first state-of-the-art performing arts center, which will be completed in 2010. The Hylton Performing Arts Center will educate, entertain, and enrich the community by providing world-class venues and resources for community arts groups; business, civic, and service organizations in the region; Prince William County and Manassas school students and teachers; Mason students and faculty; and outstanding professional performances by artists from around the world.

Mason in Loudoun
Mason’s new Loudoun County operation—Mason in Loudoun—aims to connect students and businesses in one of the nation’s fastest-growing areas to one of the commonwealth’s premier universities. The goal of Mason in Loudoun is to provide courses that will introduce the Loudoun area workforce and residents to study in a number of exciting areas, while offering current students a local option toward completion of degree program requirements.

Mason in Loudoun offers course work in nursing, health science, education, information technology, and management, along with undergraduate general education courses. Full programs are available in several fields. The operation will rapidly expand its range of courses as student demand and opportunities suggest. Students enrolled in Loudoun enjoy the same rights, privileges, and access as those on Mason’s Fairfax, Arlington, and Prince William Campuses.

**Satellite Sites**

The Office of Continuing Professional Education’s Herndon Training Center, located off the Dulles Toll Road and Route 28, provides a wide range of yearly open-enrollment seminars and workshops in its meeting facilities. The Center for Innovative Technology (CIT) classrooms are fully electronic and include a groupware platform. The School of Management’s Executive MBA Program and the Volgenau School of Information Technology and Engineering’s TechAdvance Program are located here.

Each spring the university offers a Smithsonian Mason Semester at the National Zoo’s Conservation and Research Center in Front Royal, Virginia. Students live on site at one of the most significant conservation facilities in the world and work with prominent research scientists, educators, and conservation practitioners in a unique learning community.

**George Mason, the Man**

When George Mason (1725–92) wrote the Virginia Declaration of Rights in 1776, he gave America the noble concept that the rights of the individual must be protected against the power of government. By placing in Virginia’s first constitution a list of rights that could never be taken away from citizens, George Mason sought to ensure a society in which government could not become all-powerful.

As a result of his influence, the first 10 amendments, which we know as the Bill of Rights, were added to the U.S. Constitution. The universal significance of this action made the American Revolution much more than a war for independence from Great Britain; it enshrined in our most important public document the principle that a government must always respect the rights of the people.

George Mason, a slave owner, did not recognize that those rights extended to slaves. Nevertheless, his words were later used to demonstrate that slavery could not exist in a country that proclaimed its belief in human rights. While we as a country have not always adhered to George Mason’s great ideas, they remain the measure of the best in our national life.

**University History**

The university’s growing reputation as an innovative educational leader is rooted in Virginia’s strong educational tradition. By emphasizing high technology, public policy, and the fine and performing arts, Mason has created a curriculum and mission to meet the needs of Northern Virginia’s extraordinary cosmopolitan constituency.

The idea for George Mason University was born in 1949 when the Northern Virginia University Center, essentially an adult-education extension of the University of Virginia at Charlottesville, opened under the direction of John Norville Gibson Finley. In 1955 and again in 1956, the Board of Visitors of the University of Virginia and Virginia legislature authorized the establishment of a two-year branch college to serve Northern Virginia.

The university’s formal history began in 1957 as University College, the Northern Virginia branch of the University of Virginia, offering courses in engineering and the liberal arts. It opened in a renovated elementary school in the Bailey’s Crossroads area with an enrollment of 17 students.

Eager to support the fledgling institution, the Town (now City) of Fairfax purchased 150 acres in 1958 and donated the land to the University of Virginia for a permanent branch campus. The following year, the University of Virginia Board of Visitors
selected the name George Mason College. Construction of the campus’ first four buildings was completed in 1964. In September of that year, 356 students began their studies in the new classrooms.

In March 1966, the General Assembly authorized the expansion of George Mason College into a four-year, degree-granting institution and gave it the long-range mandate to expand into a major regional university. The first senior class received degrees in June 1968. Graduate programs began in September 1970, with the first master’s degrees conferred in June 1971. The George Mason College Board of Control, supported by citizens of the cities of Alexandria and Falls Church, and Arlington and Fairfax counties, acquired an additional 422 acres. By the end of 1970, the college’s Fairfax Campus reached 572 acres; it is now 677 acres.

In 1972, the Board of Visitors of the University of Virginia recommended that the college separate from its parent institution. On April 7 of that year, the governor signed the General Assembly legislation that established George Mason University as an independent member of Virginia’s system of colleges and universities.

Since 1972, the university’s development has been marked by rapid growth and innovative planning. In 29 years, enrollment has risen from 4,166 to more than 30,000 students. In 1979, Mason was given the authority to grant doctoral degrees and began offering programs at this level. In the same year, the university acquired what became George Mason University School of Law, located on the Arlington Campus.

In 1984, the first Robinson Professors, a group of outstanding scholars committed to undergraduate teaching and interdisciplinary scholarship, joined the faculty as the result of a generous bequest from the estate of Clarence J. Robinson.

Drawing prominent scholars from all fields, Mason’s outstanding faculty includes Pulitzer Prize winners, a Nobel laureate, Institute of Electrical and Electronics Engineers Centennial Medalists, and recipients of numerous Fulbright, National Science Foundation, and National Endowment of the Arts grants and awards, among others. More than 30 endowed chairs at the university have also brought many international renowned artists and scholars to campus.

In 1985, Mason partnered with area businesses to develop an engineering program geared toward the emerging information technology field and started what is now the Volgenau School of Information Technology and Engineering. With the Volgenau School, Mason was the first institution in the country to offer a doctoral degree in information technology.

The establishment in 1990 of the Institute of the Arts, which became the College of Visual and Performing Arts in 2001, solidified the university’s commitment to make the arts an integral part of students’ lives. The Center for the Arts and the arts complex, which includes art galleries, studio and rehearsal space, and performing venues such as Harris Theater and TheaterSpace, are all components of the college.

On the Fairfax Campus, the innovative George W. Johnson Center was dedicated in April 1996. By combining student life resources with educational support facilities such as an interactive library, Mason created the learning workspace of the future. Educational administrators from around the world have toured the center.

The university’s facilities continue to grow. Innovation Hall on the Fairfax Campus was completed in 2003 and holds state-of-the-art electronic classrooms and a television studio. In 2006, the university opened its first facility dedicated to research. Research I contains an observatory and laboratories for a number of campus research centers. Plans for Research II are already under way. New academic buildings supporting the Volgenau School of Information Technology Engineering and the Department of Art and Visual Technology will open in 2009–10.

The university has achieved national distinction in many areas. Its reputation continues to grow as Mason provides educational, cultural, and economic resources for not only the people of Virginia, but also the nation and the world.

**University’s Mission**

George Mason University is innovative and entrepreneurial in spirit and uses its multicampus organization and location near our nation’s capital to attract outstanding faculty, staff, and students. Mason will

Educate the new generation of leaders for the 21st century—men and women capable of shaping a global community with vision, justice, and clarity.
Encourage freedom of thought, speech, and inquiry in a tolerant, respectful academic setting that values diversity.

Provide innovative and interdisciplinary undergraduate, graduate, and professional courses of study that enable students to exercise analytical and imaginative thinking and make well-founded ethical decisions.

Nurture and support a highly qualified and entrepreneurial faculty that is excellent at teaching, active in pure and applied research, capable of providing a broad range of intellectual and cultural insights, and is responsive to the needs of students and their communities.

Maintain an international reputation for superior education and public service that affirms its role as the intellectual and cultural nexus among Northern Virginia, the nation, and the world.

Accreditation

Mason is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor’s, master’s, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for information about the accreditation of George Mason University.

The university is a member of the Council of Graduate Schools in the United States.

George Mason University Foundation

Established in 1966, the George Mason University Foundation Inc. works to advance the aims and purposes of the university. It is a 501(c)(3) nonprofit foundation organized and operated exclusively for the benefit of the university.

The foundation assists Mason in generating private support and manages, invests, and administers private gifts, including endowment and real property. The foundation is governed by a volunteer Board of Trustees that is led by a chair. The foundation president and chief financial officer report to the Executive Committee of the Foundation Board and work with the vice president of development and alumni affairs to support the private resource needs of the university.
Admission

- Undergraduate Admission Policies
- Graduate Admission Policies
- Admission of International Students
- Nondegree Enrollment
- Academic Testing

Office of Admissions
4400 University Drive, MS 3A4
Fairfax, VA 22030
Phone: 703-993-2400
Fax: 703-993-4622
Web: admissions.gmu.edu

Undergraduate Admission Policies

Admission is competitive because the number of qualified candidates exceeds the number of new students who can be accommodated. Each candidate who presents sufficient admission qualifications is reviewed in the context of other qualified applicants. An offer of admission is valid only for the semester for which the student applied. Programs with limited space or special requirements may need a second review process for admission.

Applying for Admission

Application for undergraduate admission should be made to the Office of Admissions. Applications are available at admissions.gmu.edu/applynow. A nonrefundable and nontransferable fee must accompany the application.

Application Deadlines for Freshmen and Transfer Students

The application deadline for fall admission is January 15 for freshman applicants and April 1 for transfer applicants. The application deadline for the spring semester is October 15. Mason encourages early applications from prospective freshmen who wish to be considered for academic scholarships. Applications received after published deadlines will be considered on a space-available basis. The university reserves the right to close applications before published deadlines if conditions so warrant. Admission is contingent on satisfactory completion of in-progress course work and graduation from high school or community college, if relevant.

Early Admission

High school juniors who have completed high school graduation requirements except for senior English and government courses may, with the approval of their high school guidance counselor or principal, apply for admission and thereby enter the university as degree-seeking students one year early. Applicants should present exceptional grades, Scholastic Assessment Test (SAT) or American College Test (ACT) scores, and a high school course of study demonstrating rigorous academic preparation for university-level work. Candidates for this program must arrange an interview with the dean or director of admissions.

Freshman Requirements

The following factors are considered when reviewing freshman applications for admission:

- Cumulative high school grade point average (GPA) for course work completed in grades 9 through 12
Level of difficulty of course work elected throughout the high school years, particularly in English, mathematics, laboratory science, social science, and foreign language

Scores from SAT I or ACT (see exceptions under Score Optional Consideration below)

For all non-native English speakers, scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam.

Essay(s)

List of extracurricular activities

Teacher and guidance counselor recommendations

Fall semester applicants whose applications are complete by the application deadline are notified of decisions by April 1. All other applicants are notified on a space-available basis.

The following table specifies the minimum units of college preparatory work required for admission, as well as the minimum units recommended. The recommended units reflect the typical high school program of students who have succeeded in competing for admission in recent years.

In the following chart, column (1) refers to students applying for a bachelor of arts, excluding those in column (3), bachelor of fine arts, bachelor of music program, or with an undeclared major. Column (2) refers to students applying to a bachelor of science degree program, excluding those in column (3). Column (3) refers to applicants who intend to major in prebusiness, chemistry, computer science, engineering, geology, mathematics, or physics. Note that one unit equals one academic year of study.

</table>

*Selected from algebra I, algebra II, geometry, trigonometry, analytic geometry, functions, math analysis, or calculus

**Selected from biology, chemistry, physics, or other advanced lab science

**Freshman Score Optional Consideration**

Score optional review provides an opportunity for applicants to be considered for admission without submitting or in disregard of standardized test scores. Admission to Mason remains a highly competitive process, and score optional candidates are considered on their own merits. **Qualifying for score optional review does not guarantee admission to Mason.** Qualifications for score optional consideration can be found at admissions.gmu.edu/scoreoptional.

**Acceptance of Freshman Admission Offer**
Mason complies with the national freshman candidate reply date of May 1. Students confirm by completing the enrollment confirmation form in the admission packet and submitting it to the university with an enrollment deposit. The deposit is nonrefundable after May 1.

**Transfer Requirements**

Application for admission as a transfer student is competitive. Transfer applicants must submit official transcripts from each collegiate institution attended. Transfer applicants with fewer than 30 transferable credits must also submit a copy of their secondary school record and test scores. All non-native English speakers are also required to submit a TOEFL or IELTS score or acceptable grades (C or better) in at least two English composition or literature classes taken at another U.S. university or college.

Students on active social or academic probation, suspension, or dismissal are not eligible for transfer admission.

Transfer applicants who have been out of school for a semester or longer, excluding summers and school-designated breaks, must provide the Admissions Office with a statement describing activities during this period. A résumé may be submitted in lieu of a statement.

**Transfer Credit**

A student transferring to Mason receives a formal evaluation of transfer credit after admission and receipt of enrollment confirmation by the Office of Admissions. The student is responsible for seeing that the Office of Admissions receives official final transcripts of all course work taken elsewhere.

In general, credits are accepted from regionally accredited institutions, provided that a grade of C or better has been earned in the course and the course content is equal to that offered at Mason. Note that only credits, not grades, are transferred; grades for transferred courses will not become part of a student’s GPA at Mason. Transfer credit is not granted for study in unaccredited institutions. Course work from institutions not included in the admission application will not be eligible for transfer credit.

A minimum of 30 credits must be completed in residence at Mason and 45 credits of upper-level course work must be completed to qualify for graduation. While lower-level courses taken at previously attended institutions may meet the content requirement of some upper-level courses, they do not reduce the 45-credit upper-level requirement, and courses from other institutions do not reduce the 30-credit residency requirement.

Students enrolled on a campus of the Virginia Community College System (VCCS) may access credit equivalency and articulation information at admissions.gmu.edu/TransferGuide.

Students accepted into a degree program at Mason are usually not expected to pursue simultaneous course work elsewhere. For more information, go to the Credit to Be Earned at Other Institutions section in the Academic Policies chapter of this catalog.

**Application for a Second Bachelor’s Degree**

Those holding one or more bachelor's degrees may earn an additional bachelor's degree at Mason in another discipline. Application for a second bachelor’s degree after conferral of a first degree from any accredited institution must be conducted through the Office of Admissions. After admission, students work with the appropriate academic program to develop an approved contract or course of study of at least 30 credits beyond the first degree, taken after admission to the second degree, to meet university residency requirements. Some units will have more stringent requirements. While this contract will detail college-level and major requirements to be met, these students do not have to meet Mason’s university General Education requirements.

**Enrollment after Previous Attendance**
Students in good academic standing who have missed two or more consecutive semesters of enrollment (excluding summer term) at Mason and do not meet any of the excluded categories listed below under Readmission after Previous Attendance may re-enter by completing a re-enrollment form available through the Registrar’s Office or at registrar.gmu.edu/forms/index.html. For graduate students and some undergraduate programs, academic department approval is also required.

Readmission after Previous Attendance

Students who have missed two or more consecutive semesters of enrollment (excluding summer term) at Mason must apply for readmission through the Office of Admissions if any of the following conditions are true:

- The student has not been enrolled at Mason for five years or more.
- The student is an undergraduate returning after any absence during which he or she studied at another institution without prior written permission of his or her school or college. Such students must reapply as transfer students.
- The student is international with F-1 or J-1 immigration status.
- The student was suspended or dismissed from any college or university for nonacademic reasons.
- The student was academically dismissed from Mason.
- The student was ever convicted of a felony.

Right to Withdraw Offer

Mason reserves the right to withdraw offers of admission if applicants fail to satisfy all requirements or it is determined that admission was obtained through the use of incomplete, falsified, altered, or embellished information. In the case of withdrawal of admission from a matriculated student, credit earned at Mason may be withheld.

Graduate Admission Policies

Admission to graduate programs is competitive. Selection criteria differ by program and are established by departmental faculty. Applicants are evaluated on the strength of their academic background, results of standardized exams (if required by the program), work experience, and any additional evidence of potential success in the program. Each year, departmental faculty members determine the number of admission offers they may extend by the university resources available for their program.

Admission Standards

To be considered for degree status, the general university graduate admission requirements are as follows:

- An earned baccalaureate degree from a regionally accredited institution of higher education or international equivalent must be verified from official transcripts. (For details, see Admission of International Students section.)
- A 3.00 GPA on a 4.00 scale or better in baccalaureate study. The GPA requirement may be higher for some graduate programs. For students with postbaccalaureate credits, a separate GPA is calculated for each institution. Note: The difficulty of the baccalaureate degree and work experience may be considered in assessing the requirements for admission.

Provisional Admission

A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may, at the discretion of the college or department, be offered provisional admission if sufficient evidence is presented to suggest the applicant has the ability to pursue graduate work. As a first priority when starting the graduate program, a provisionally admitted student must satisfy the conditions of admission. Once the student has satisfied the conditions specified in the offer of admission and submitted all admission credentials, the provisional qualifier will be removed from the student’s record. Written confirmation indicating the removal will be sent to the student from the college, school, or institute dean or director.
If the student does not meet the conditions within the first 12 credits (or a more restricted time frame specified by the department in the offer of provisional admission), the student will be terminated from the program. All applicants admitted provisionally are in degree-seeking status, and course work taken appears as part of their graduate-level transcript. Students in provisional status may not take courses in the consortium or elsewhere or transfer graduate course work into their program until the provisions of admission have been met.

**Graduate Application Requirements**

For full consideration for graduate admission, applicants must submit the following:

- Completed Application for Graduate Study
- Nonrefundable application fee
- Application for Virginia In-State Tuition Rates, if claiming entitlement to these rates
- Two official transcripts from all institutions attended for each program applied to unless the programs are in the same college or school
- Goals statement
- Letters of recommendation as required by the program
- Official exam scores, such as GRE or GMAT, reported directly from the appropriate testing service, as required by the program
- Other materials specified by the program, including departmental forms, portfolio, or interview

International applicants should read the Admission of International Students section for more information. Specific departmental admission requirements for degree-seeking students are listed in this catalog under the relevant discipline.

**Graduate Applications**

Applicants are strongly encouraged to apply online at admissions.gmu.edu. Applications for the School of Law can be found at www.law.gmu.edu. Applying online saves students time and money. In addition, students should collect all supplementary materials and submit them to the appropriate graduate processing center listed below.

**Application Processing Centers**

The graduate admissions process is decentralized at Mason. Applicants should send their applications and support documents directly to the Graduate Admissions Application Processing Center assigned to their program. Specific mailing instructions are listed in the Application for Graduate Study, as well as below. Once a graduate application is complete and ready to be evaluated for admission, the graduate application file is sent to the academic department for review by the Faculty Admissions Committee. An applicant is notified by mail of the admission decision.

Below is a list of the Graduate Admissions Application Processing Centers with contact information. Graduate admission questions may be directed to the specific center assigned to an applicant’s program by school, college, or institute.

Graduate Admission Exams

Most graduate programs use test scores as an additional measurement of an applicant’s qualifications. For departmental admissions test requirements, consult the table at admissions.gmu.edu/grad.

Information and registration bulletins for all national graduate admissions exams are available at the university Admissions Office.

The GRE may be taken in two forms: the general exam and subject exam. Some departments require official scores for both types of exams. Students may schedule the computer-based GRE general exam by calling 800-473-2255. Students may register for the GRE subject exam online at www.gre.org. To have GRE scores sent to Mason, please use school code 5827.

The GMAT is required of all applicants seeking admission to any SOM degree program. Students may schedule the computer-based GMAT online at www.mba.com. The various programs at Mason all have separate GMAT codes. For the appropriate code for your program of interest, go to www.mba.com.

The GMAT is also permitted for some programs in the Volgenau School of Information Technology and Engineering. Be sure to send your score to Mason by using the correct program code.

The Miller Analogies Test (MAT) is a test of 100 analogies and may substitute for the GRE in some graduate programs. To have official MAT scores sent to Mason, use Mason’s MAT code 1768. For information about scheduling the MAT, call 800-622-3231 or go to www.tpcweb.com.

The Praxis I is required by the College of Education and Human Development for graduate applicants to initial teacher licensure programs. Students may schedule the Praxis I by calling 800-853-6773. Passing scores on both Praxis I and Praxis II exams are required for program completion.

The TOEFL is required of all applicants whose native language is not English and who have not received a degree from a university in the United States, Canada, United Kingdom, Australia, or New Zealand. To have TOEFL scores sent to Mason, use school code 5827.

The IELTS may be substituted for the TOEFL. Please see this chapter for additional information on English language testing requirements. Further information can be found at www.toefl.org and www.ielts.org.

Foreign Language Requirements
Certain graduate programs require students to demonstrate foreign language proficiency at a specified level. Students entering programs that require intermediate-level proficiency can demonstrate that proficiency via previous course work that is equivalent to Mason's foreign language course numbered 210 or, in some programs, by passing an exam. Contact the academic program for information on how to demonstrate language proficiency.

Admission of Graduate Degree Holders

Those holding one or more graduate degrees may earn an additional graduate degree in another discipline. For admission to a second graduate degree program, students should submit an application, transcripts, and other documents as required by the second degree program. Course credits used to satisfy the degree requirements for the first graduate degree may not be used to satisfy the degree requirements for the second graduate degree. In programs with overlapping or similar requirements, students will be advised in the subsequent degree program regarding appropriate course substitutions for subjects already covered.

Offer of Admission

The written offer of admission specifies the effective date of admission, category of admission offered, and name of the faculty advisor assigned to the applicant. This offer is good only for the semester for which the applicant applies. The offer must be accepted by returning an Intent to Enroll form and a deposit, if required by the school or college. Those whose offer of admission has lapsed must submit a new application and fee to be reconsidered for admission at a later date. Students may simultaneously apply to more than one graduate program, but if they are admitted to more than one program, they may accept only one offer and pursue only one degree program at a time.

Right to Withdraw Offer

Mason reserves the right to withdraw offers of admission if applicants fail to satisfy all requirements or it is determined that admission was obtained through the use of incomplete, falsified, altered, or embellished information. In the case of withdrawal of admission from a matriculated student, credit earned at Mason may be withheld.

Reactivation of Deferred Applications

Applicants are notified when action on an application has been deferred pending completion of courses that are prerequisite to graduate study in a chosen field. Applicants are encouraged to notify their program’s Graduate Admissions Processing Center in writing as soon as prerequisites have been met. Applicants are responsible for furnishing official transcripts confirming that prerequisite courses have been satisfactorily completed. An admission decision cannot be made until these grades are received.

Change in Field of Graduate Study

Admission for graduate study is admission to a specific program. Therefore, a student is not free to change graduate programs at will. Students seeking to change from one graduate program to another (at the same level and within the same college) need the approval of their dean and should contact their dean's office for the appropriate form and instructions. Note that residency requirements must be met after the change to the new program, and no new time limit is given. For students seeking a change between two colleges, a new application, application fee, official transcripts, and proof of degree from prior institutions are required. Previous acceptance into one graduate program does not guarantee acceptance into another.

Graduate Study during Summer Term

Applicants planning to begin graduate work in a summer term must complete a standard application for graduate admission and be formally admitted before registering for classes. Note: Not all graduate programs admit for summer term; however, students
accepted for the fall semester are considered admitted students and some graduate programs may allow students to take courses during the preceding summer.

**Records Maintenance and Disposal**

All admission documents, including academic records sent from other institutions, become part of the official university file and cannot be returned nor duplicated for any purpose. Students should maintain copies of official credentials for other personal use.

Admission credentials are retained for only 12 months. They are subsequently destroyed if applicants do not register for courses within the period for which the offer of admission is valid; have been denied admission; do not respond to requests for additional information; or fail to submit complete applications, including all official transcripts and test results.

**Admission of International Students**

**General Requirements**

Application for admission by international students holding or seeking F-1 or J-1 visas should be made directly to the Office of Admissions. Deadlines for the fall semester are before January 1 for undergraduates and February 15 for graduates. For the spring semester, the deadline for all applicants is October 1. These deadlines ensure adequate time to process applications and prepare immigration documents. All international applications must be accompanied by a nonrefundable application fee. Items that must be submitted with the application form are official transcripts and degree certificates (in original language and, if applicable, certified English translation); evidence of English proficiency (via official score reports from the TOEFL or IELTS exam); the International Student Information Form; financial support documents; copy of passport identification page; and for those present in the United States, copies of immigration documents verifying current nonimmigrant status. Please visit admissions.gmu.edu for full details on items required and deadlines.

Applications from international students are reviewed with all other applications. Admission to the university is competitive; therefore, while minimum standards ensure that an application will be considered, they do not guarantee admission. The number of applicants, qualifications of the applicant pool, and the amount of available space determine the number of admission offers that Mason can make. In addition to overall admission requirements, some schools and colleges have individual requirements for acceptance into the major. For more information, see school or college admission requirements.

Applicants who are accepted to a program will receive a written offer of admission. Most students come to the United States on an F-1 visa, but students who are sponsored by the U.S. government, their home government, or another organization may be required to enter the United States on a J-1 Exchange Visitor’s Visa. To be issued an immigration document (Form I-20 for F-1 status or Form DS2019 for J-1 status), students must prove they have sufficient financial support to cover their expenses while at Mason. If the documentation submitted is satisfactory, the university will issue Form I-20 for F-1 status or Form DS2019 for J-1 status and mail it to the address indicated on the International Student Information Form.

International students outside the United States must take the immigration document to the U.S. embassy or consulate nearest their place of residence and apply for an F-1 or J-1 student visa. The basic requirements for obtaining a student visa are a letter of admission, evidence of financial support, an immigration document issued by the school they wish to attend, a valid passport, and proof of strong ties to the home country. For more information about the visa application process, check with the nearest U.S. embassy or consulate, or go to the Department of State’s web site: www.state.gov.

Students in a nonimmigrant visa category other than F-1 or J-1 may submit the International Student Information Form and copies of immigration documents indicating their immigration status. They do not need to submit financial support documents unless they plan to change to a student visa. For more information pertaining to immigration status, contact the Office of International Programs and Services (OIPS) at 703-993-2970. Additional information is available on the OIPS web site: oips.gmu.edu.

**Freshman and Transfer Requirements**
A transfer student is one who has completed course work at a college or university after graduating from high school. In addition to the requirements defined for all applicants, international students must meet the following standards:

- Freshman applicants must submit certified official copies of all secondary or high school transcripts in the original language along with an English translation, if applicable. Results of any exit certificates or university entrance exams also must be submitted.
- All freshman applicants are required to submit satisfactory scores on the SAT I or ACT.
- Applicants must demonstrate English proficiency. Applicants whose native language is not English are required to submit TOEFL or IELTS exam results. To be considered for admission, applicants must have scored at least 230 on the computer-based TOEFL, 88 on the Internet-based TOEFL, 570 on the paper-based TOEFL and 4.5 on the TOEFL essay, or must have received a score of 6.5 or higher on the IELTS exam. Official test scores must be sent directly from the Educational Testing Service or IELTS. For more information, contact the Educational Testing Service, CN 6151, Princeton, NJ 08541-6151, USA; phone: 609-921-9000; web site: www.toefl.org, or the IELTS web site at www.ielts.org.
- All transcripts from colleges or universities outside the United States must be translated into English and evaluated by a recognized U.S. evaluation service before an admission decision can be made. Applicants are responsible for the timely translation and evaluation of documents and all costs and fees associated with these services. A list of suggested evaluation agencies is available in the Admissions Office or at www.naces.org.
- International students already in the United States with F-1 status must complete immigration transfer procedures within 15 days of the program start date. For processing of immigration transfers, contact OIPS at 703-993-2970 or oips.gmu.edu.

**Graduate Requirements**

International students interested in pursuing graduate study must meet the following requirements:

- Applicants must complete the Application for U.S. Graduate Study.
- Applicants must demonstrate English proficiency. Applicants whose native language is not English are required to submit TOEFL or IELTS exam results. To be considered for admission, applicants must have scored at least 230 on the computer-based TOEFL, 88 on the Internet-based TOEFL (with a minimum score of 20 in each section), or 570 on the paper-based TOEFL and 4.5 on the TOEFL essay. A TOEFL score of at least 250 (computer-based) or 600 (paper-based) is required to qualify for a teaching or research assistantship. Official test scores must be sent to the admissions office directly from the Educational Testing Service. In addition, students may substitute the IELTS exam in lieu of the TOEFL. The IELTS total score must be 6.5 or higher.
- All transcripts from colleges or universities outside the United States must be translated into English, if applicable, and submitted for evaluation to the graduate school to which the applicant is applying. Mason will provide evaluation service free of charge for all international transcripts. Because of volume, more time may be needed to process applications requiring a Mason evaluation. For expedited service, students can submit their documents to a recognized U.S. evaluation service at their own expense. A list of recognized evaluation services is available in Mason’s Admissions Office or at www.naces.org.
- Graduate students’ documents should show the award of either a bachelor’s degree or equivalent, or a graduate degree.

**Special Conditions for International Applicants**

In addition to the academic requirements listed above, international students must meet the following conditions:

- Federal regulations prohibit students on visitor visas (B-1 and B-2) from enrolling in school. Students who entered the United States on a visitor visa should not plan to study. For more information, contact OIPS.
- Federal regulations prohibit F-2 spouses of F-1 students from engaging in full-time study, and F-2 children may engage in full-time study only from kindergarten through 12th grade. F-2 dependents may engage in study that is avocational.
or recreational in nature. F-2 dependents seeking to pursue full-time or degree study in the United States must change their status to F-1. For more information, contact OIPS.

- Students enrolled at the university on F-1 or J-1 nonimmigrant status must maintain full-time enrollment each semester (12 credits for undergraduate, usually 9 credits for graduate), excluding summer term. Because of this requirement, F-1 or J-1 international students do not qualify for part-time programs nor can they begin their program in the summer.

- Prospective students who seek to enter the United States on F-1 or J-1 immigration status, or seek to transfer to Mason if already in the United States must complete the International Student Information Form, which can be downloaded from admissions.gmu.edu. The form and financial support documents must be submitted to the Admissions Office along with the application.

- For students already in the United States, copies of immigration documents verifying current nonimmigrant status must be submitted with the application form.

- To be issued an immigration document, sufficient evidence of financial support, including an original bank statement, scholarship letter, sponsor’s salary statement, or graduate assistantship offer letter, must be provided to cover the first year of study. Students must also demonstrate the source of financial support for all subsequent years of the program. The International Student Information Form gives an estimate of annual expenses, including tuition, living expenses, and health insurance. Students may not submit statements of stocks, bonds, or company assets. Financial support statements must show available cash and not be more than six months old.

- All new students at the university must submit an Immunization Record Form Card signed by a health professional. The form, available at shs.gmu.edu/immunizations verifies that immunizations are current. The immunizations required are measles/mumps/rubella and tetanus/diphtheria. Hepatitis B (series of three) and meningococcal vaccines are encouraged. A tuberculosis screening is required of students from high-risk countries as determined by the Centers for Disease Control and Prevention.

- Financial sponsors who wish to be billed directly must provide a U.S. billing address. Mason does not bill third parties overseas. It is the student’s responsibility to make sure tuition and fees are paid on time.

**International Student Health Insurance**

University policy requires all F-1 and J-1 visa students to have health insurance. Federal law requires all students on a J-1 visa to have health insurance that includes coverage for medical evacuation and repatriation. Medical evacuation coverage pays for returning a seriously ill student to his or her home country. Repatriation coverage pays for returning a student’s remains to his or her home country.

Mason offers health insurance for students on J-1 and F-1 visas. When international students register for classes, the cost of this coverage is automatically billed to their account by the Office of Student Accounts. This fee is due by the tuition payment due date. Failure to pay this insurance fee or successfully obtain an exemption may result in the cancellation of class registration. Late fees may be assessed if charges are not paid by the deadline established by the Cash Office.

International students are required to purchase insurance for the entire year. If a student graduates or terminates enrollment after the fall semester, has not submitted any claims and will leave the United States, the student may apply for a spring refund. The student must submit a written refund request to the Student Health Insurance Office. The refund request will be sent to the insurance company. Submission of a request does not guarantee that a refund will be issued. Refunds are granted by the insurance company, not George Mason University. For more information, please contact the Mason Student Health Insurance Office.

**Exemption from the International Student Health Insurance**

International students are automatically enrolled in the Mason Student Health Insurance Plan. International students with health insurance coverage from the following list may request an exemption from the Mason Student Health Insurance Plan. Submission of a request does not guarantee that a waiver will be granted. The Student Health Insurance Office reserves the right to review a student’s health insurance policy to verify coverage.

Students may apply for an exemption:
1. If they have a scholarship or government-sponsored program that provides insurance for them that meets or exceeds the Mason Student Health Insurance Plan.

2. If they or their spouse or parent have a United States employer who provides health insurance for them that meets or exceeds the Mason Student Health Insurance Plan.

Each fall, continuing F-1 and J-1 visa students are required to either pay for the Mason Student Health Insurance or successfully obtain an exemption. Exemptions must be obtained no later than one week after the last day to add/drop classes.

For more information and exemption form, please visit shs.gmu.edu/insurance.

Nondegree Enrollment

Nondegree Status

Nondegree status enables students who have no immediate degree objective or may need to satisfy prerequisites for admission to a degree program to enroll in courses for which they are qualified without seeking formal admission to a degree program. Enrollment in specific courses is based on eligibility criteria and availability of space in courses; in high-demand fields, enrollment may be restricted or prohibited.

All nondegree applicants must complete a nondegree online application for admission and supply official transcripts from all postsecondary institutions they have attended. High school guest matriculant applicants must submit an official high school transcript, as well as SAT or ACT scores. Secondary school reports and a written recommendation from their guidance counselor are also preferred.

Nondegree applications and their established deadlines are available online at admissions.gmu.edu.

Standards for Admission

Admission to Mason as a nondegree student is competitive and based on space availability. Nondegree admission is not automatically granted, and nondegree admission does not guarantee enrollment in any specific course or any future degree programs. Nondegree applicants must meet the standards for admission that would apply to the equivalent degree-seeking status.

Graduate Nondegree

Applicants seeking to take graduate-level courses or graduate prerequisite courses must meet graduate admission standards. These students will be considered graduate level even if they are taking undergraduate courses. Individual units and majors may have additional requirements for nondegree graduate status (see below). A student cannot graduate or receive a degree while in nondegree status. All master’s programs require at least 18 credits to be completed in degree status at Mason to be considered for graduation, and some graduate programs allow a maximum of 6 credits to be transferred from nondegree status. Students who plan to seek a degree from Mason are strongly encouraged to apply for degree status admission as soon as possible.

Nondegree students are expected to meet the same academic standards as degree-seeking students. See Academic Termination in the Graduate Policies section of the Academic Policies chapter in this catalog.

Undergraduate Nondegree

Applicants who do not have a bachelor’s degree but have graduated from high school or received a GED and have earned a minimum of 24 transferable credits may apply for nondegree admission. Transcripts from all colleges attended are required. High school transcripts and SAT or ACT scores may be requested.
Applicants with a bachelor’s degree seeking to take undergraduate courses toward a second bachelor’s degree or for personal development must meet the standards for admission for a bachelor’s degree. These students will be considered undergraduate students and are not eligible to take graduate courses or receive graduate academic advising. Students who later seek to enroll in graduate courses or wish to receive graduate academic advising must submit a new nondegree graduate application and be reconsidered for admission.

Nondegree studies students are allowed to register for a maximum of 10 credits per semester. A maximum of 18 undergraduate credits may be applied to an undergraduate degree program on approval of the undergraduate program’s dean.

All undergraduate nondegree students are subject to the academic standing regulations and sanctions described in the Requirements for Retention section in the Academic Policies chapter of this catalog.

High School Guest Matriculants

High school juniors or seniors who are currently enrolled in good standing in high school but have not yet graduated from high school and do not have a GED may be considered for admission as high school guest matriculants. These applicants will be evaluated based on their academic performance in high school. Recent SAT I or ACT scores and recommendations from guidance counselors and teachers may also be requested. Only students who have excelled in high school and demonstrate the preparation and maturity indicative of the potential to succeed in Mason’s competitive course work will be admitted. Mason cannot guarantee that courses will fulfill high school graduation requirements or that courses taken while a high school guest matriculant will transfer to other institutions.

Academic Advising

On initial enrollment, nondegree students are assigned to one of the colleges, schools, or institutes at Mason according to their original course selection and level (graduate or undergraduate). Once assigned, the academic unit is responsible for advising and handling requests that require a dean’s permission.

Grades earned through nondegree studies remain a part of the student’s permanent nondegree record and are recorded on the standard university nondegree transcript. They will not appear on the degree transcript unless the student is accepted to a degree program and permission is given by the dean to apply the nondegree credit to the degree program.

Senior Citizens

Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents 60 years of age or older, with a taxable income not exceeding $15,000, are entitled to enroll in courses offered for academic credit on a space available basis without paying tuition and enrollment fees. Senior citizens who meet the income eligibility requirement and have completed a minimum of 75 percent of degree requirements may enroll in a degree program during normal registration periods without paying tuition and enrollment fees. The admissions application fee cannot be waived, but students who qualify to have all tuition and fees waived will have the application fee reimbursed.

Citizens who wish to take advantage of this act must complete the online nondegree or degree application found at admissions.gmu.edu. On approval of their admissions application, senior citizens can request a waiver of tuition and enrollment fees by completing the Senior Citizen Tuition Waiver Form, available from the Registrar’s Office or online at registrar.gmu.edu/forms/index.html. To facilitate processing, senior citizens should provide their Mason student identification number on the waiver form.

In addition, the act allows senior citizens to audit courses (no academic credit is received) and enroll in up to three noncredit courses per semester without paying tuition and enrollment fees, regardless of the taxable income level. Students seeking to audit a class must notify the Registrar’s Office when registering for classes. Students seeking to enroll in noncredit courses should call the Office of Continuing Professional Education at 703-993-2109. Fees for course materials may apply to senior citizen enrollees, and tuition may be charged for courses designed exclusively for senior citizen groups. Senior citizens must adhere to all
registration policies and follow normal procedures to add and drop courses within the deadline dates outlined in each semester’s academic calendar.

Graduate Nondegree Status

The Volgenau School of Information Technology and Engineering

Admission for nondegree graduate study is suitable for those individuals who do not want to pursue a degree but are interested in taking graduate courses from the Volgenau School of Information Technology and Engineering. The Volgenau School nondegree graduate application forms are available at admissions.gmu.edu. The following application materials should be submitted for consideration:

- The Volgenau School online nondegree application
- Official transcripts indicating confirmation of bachelor’s degree
- Nonrefundable application fee

Approval for nondegree status does not guarantee admission to a degree program at a later date. Up to 12 credits taken in nondegree status may be transferred to a Volgenau School degree or certificate program, subject to the general rules for transfer of graduate credit. Students who do not register for the term for which they are accepted may have their enrollment postponed for one semester on written request to the Admissions Office. More information about the Volgenau School programs and course offerings may be obtained from the Volgenau School departmental offices or the Volgenau School Graduate Admissions Office, Science and Technology II, Room 133, 703-993-1512.

College of Science (COS)

Nondegree status is available for professionals who are interested in taking a limited number of courses without committing to a degree or certificate program. Up to 12 credits taken in nondegree status may be transferred to one of the COS academic programs at a later date. Approval for nondegree status does not guarantee admission into an academic program. For admission into nondegree status, the student should have a 3.00 GPA or higher and a BS degree in mathematics, computer science, engineering, natural science, or a related field. Exceptions are reviewed on an individual basis.

The following application materials should be submitted for consideration:

- COS nondegree application
- Official transcripts
- A nonrefundable application fee
- Résumé

The COS nondegree application can be downloaded from cos.gmu.edu.

School of Public Policy (SPP)

Students are welcome to apply for nondegree study in SPP for fall and spring semesters only. To apply, students should complete the nondegree application online at admissions.gmu.edu/applynow. In addition to completing the online application, students are required to submit official transcripts from all institutions attended. Non-native English speakers must present a minimum TOEFL score of 230 on the computer-based exam or 570 on the paper version. For more information, call the SPP Admissions Office at 703-993-8099.

Summer Term
Summer enrollment provides an opportunity for eligible undergraduate, graduate, and nondegree students to begin or continue the pursuit of their academic goals. Courses are offered in intensive five- to eight-week sessions, as daytime and evening classes and as distance education courses. Many academic departments take advantage of the unique summer term opportunities to schedule innovative programming focusing on raising community awareness and involvement.

Summer registration for current Mason students begins in mid-March while registration for nondegree students begins in late March to early April. Students who are new to Mason are required to apply and may do so at admissions.gmu.edu/applynow.

Academic Testing

Advanced Placement and Credit by Exam

Academic departments frequently revise information regarding credit by exam. The most current information can be found at admissions.gmu.edu/exams.

Mason Departmental Exams

Proficiency exams are offered in a number of courses usually taken during the first two years. Credit is recorded for grades of C or above, which does not affect the student’s GPA. Students may not earn credit by exam for courses in which they are currently enrolled beyond the time allotted to add courses in that semester, or for courses already audited or failed at the university. Transfer students may not earn by exam any part of the 30 credits that must be completed at Mason to earn a degree.

English 101 Proficiency Exam

Students who pass the English 101 Proficiency Exam will receive 3 credits for English 101. The three-hour essay is based on a choice of topics. The exam is scheduled periodically during the semester. For more information, go to the English Department’s proficiency exam web site composition.gmu.edu/students/exemptions/engl101.php.

English 302 Advanced Composition Exam

Students seeking exemption from English 302 may submit a written portfolio to the English Department. To qualify, the written portfolio must demonstrate proficiency equal to that of students who have successfully completed English 302. The prerequisite for taking the English 302 advanced composition exam is completion of 45 credits, completion of English 100 or 101, and completion of the literature requirement for the major. The English Department will accept a portfolio between September 1 and April 8. Additional information regarding the English 302 exam can be found at composition.gmu.edu/students/exemptions/engl302.php.

Foreign Language Placement

The College Board SAT II test in a foreign language is used for placement in Chinese, French, German, classical Greek, Italian, Latin, Russian, and Spanish. Freshman applicants who wish to receive the appropriate foreign language placement should take this exam during their senior year in high school. Students who have not taken the SAT II in a foreign language may take it in the foreign language lab once they are on campus. The SAT II exam is mandatory for anyone who has studied one of these languages for at least two years, has no previous college credit in the language, and seeks to continue study of the same language at Mason. Transfer students receiving credit for college-level foreign language study completed at other colleges usually do not need a placement test, but they must consult the Department of Modern and Classical Languages to determine correct placement.
It is the student’s responsibility to take a placement exam and obtain results before enrolling in a foreign language course. The placement exam is given in conjunction with orientation. The schedule can be found online at mcl.gmu.edu/resources/placement_testing.html. Specific information on interpreting test scores can be obtained from the Department of Modern and Classical Languages.

Students may not enroll for credit in a course at a level lower than the one in which they are placed. Students and instructors should attempt to identify and resolve cases of inappropriate placement during the first days of each course. For students whose degree program contains a foreign language requirement, the placement determines the maximum number of credits, if any, that will be needed to fulfill the requirement.

A foreign language placement is not required of international students who present evidence of having studied for four or more years in an educational institution where the primary language of instruction was other than English. These students will be considered to have fulfilled the foreign language requirement, but they are not eligible for credit for course work below the 300 level.

If through transfer credit, a placement test score, or Mason course work, a student meets the prerequisite for a lower-division foreign language course that is not offered during a particular semester, the dean usually grants permission to continue the foreign language sequence by allowing the student to take courses at another college or university.

**Math Placement Exam**

The Math Placement Exam is a computer-based test to help assess a student’s proficiency. Entering students are required to complete the exam successfully during orientation unless they have received AP credit or transfer credit. The web address for the math placement test schedule is cos.gmu.edu/academics/undergraduate/math_placement_testing.
Tuition, Expenses, and Financial Aid

- Tuition and Fees
  - Refund Policies
- Expenses
- Financial Aid

North Chesapeake Module, Room 11

Fax: 703-993-2490

Tuition and Fees

General Guidelines

- Students are responsible for maintaining current addresses via Patriot Web (patriotweb.gmu.edu) and activating and checking their George Mason University e-mail accounts to receive official university communications.

- By registering for classes, students accept responsibility for the semester charges. Students are responsible for dropping, by the dates listed in the Academic Calendar, all classes (including waitlisted classes) they do not plan to complete. Students must follow the drop and withdrawal procedures published in the electronic Guide to Registration. Full or partial tuition liability may apply.

- Refer to the Payment Schedule and the Academic Calendar on the Student Accounts Office web site for payment due dates and tuition penalties for dropping classes after the start of the semester.

- Failure to receive a reminder bill confirming charges does not waive the requirement for payment when due. Balances may be verified and paid via Patriot Web (patriotweb.gmu.edu).

- Payments are due in the Cash Office, Student Union Building I, Room 104, on or before 4:30 p.m. on due dates, regardless of postmark if mailed. Check and credit payments made on Patriot Web must be completed by 10:30 p.m. to be considered in that day’s business.

- Students who have not completed the financial aid process must be prepared to pay for their courses by the tuition due date or a late payment fee will be charged. The amount of financial aid accepted and processed will be reflected in your account balance. If the amount of aid awarded is less than the charges, the difference must be paid by the tuition due date. Federal loan borrowers must submit a completed promissory note at least four weeks before the payment due date to the Financial Aid Office (South Chesapeake Module) for these funds to be considered in your balance. Federal work-study awards cannot be deducted from your balance. Financial aid recipients must also notify their financial aid counselor if they drop courses below the minimum required credits for their financial aid award.

- Out-of-state students with pending domicile requests are responsible for payment at the out-of-state rate. Students who are later determined to be in-state can request reimbursement for the difference in tuition rates.

- Payments not received by the due date will be assessed a late payment fee, which is 10 percent of the balance due up to $125.

- Students who add their first class on the first day of the semester or after are assessed a $125 late registration fee. The fee does not apply to students already registered prior to the start of classes who make schedule adjustments. Waitlisted
classes are not considered class registration.

- Financial Good Standing: No Holds on Record – Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including but not limited to transcript issuance, diploma release, and class registration (add, drop, withdrawal etc.) will not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include unpaid telephone charges, fines owed from traffic or parking violations, incomplete immunization records, fines owed to the Mason or Washington Research Library Consortium libraries, and other administrative holds.

- Nonreturning students are responsible for dropping courses for the semester and ensuring they do not have an outstanding balance on their account. Any documentation or intent made to the Admissions Office that you are not returning does not withdraw you from the registered courses. Please drop courses and check your account status via Patriot Web.

- Students enrolling in Mason off-campus courses are assessed tuition and fees at the same rates as those for on-campus courses.

- A few Mason degree programs include academic credits that students must earn at other academic institutions. Students enrolling for such credits assume all financial responsibility with the other institutions.

2009–10 Semester Tuition Charges (subject to change)

Approved tuition rates are available June 1. For more information, call Student Accounts at 703-993-2484 or go to studentaccounts.gmu.edu. Also, students are charged tuition rates according to their academic level; graduate rates vary.

Related Fees

These are applicable to all students and are subject to change:

- Application Fee, Undergraduate | $50
- Application Fee, Graduate | $70
- Lab Fee | $25
- AVT Arts Bus Fee | $55
AVT, SOM Course Fee (per credit) $20
VSITE, CVPA, SCS Course Fee (per credit) $10

Orientation/Undergraduate

New Student Fee $160 (nonrefundable)
Graduate New Student Fee $60 (nonrefundable)
International Student Health Insurance Fee $1,366

Note: The new student fees are mandatory, nonrefundable, one-time fees. Fees are charged to the account of every newly admitted, degree-seeking student when registered for classes regardless of orientation attendance or enrollment status.

Payment Information

Payment Deadline

Payment is due the first day of the semester. Payments received at the Cash Office by 4:30 p.m. Monday to Friday will be considered in that day’s business. Check and credit payments made on Patriot Web must be completed by 10:30 p.m. to be considered in that day’s business. To confirm receipt of payment and balance due on account, go to patriotweb.gmu.edu. Allow ample time for processing payments.

Methods of Payment

Cash: At window only, Cash Office, SUB I, Room 104

Check: Payable to George Mason University, with student ID number written on front. Third-party checks are not accepted. Checks must be payable in U.S. dollars.

Credit Card: Payments are accepted online through Patriot Web.

Delivery Methods

Web: Patriot Web, patriotweb.gmu.edu online checks, or credit cards

Window: Cash Office, SUB I, Room 104, Monday through Friday 9 a.m. to 4:30 p.m.

Drop Box: Outside Cash Office, SUB I, Room 104

U.S. Mail: George Mason University, Cash Office, 4400 University Drive, MS 2E1, Fairfax, VA 22030. Postmarks are not considered proof-of-payment date.

Semester Payment Plan

The Mason semester payment plan is available for students who need to budget a minimum of $500 and wish to make two payments. Payments for Study Abroad, Global Education, and International Student Health Insurance cannot be deferred. A payment contract, available on the Student Accounts web site, must be submitted to the Cash Office with a down payment of one-half of the contract amount plus fee. The contract fee is $25 and nonrefundable. Failure to pay the outstanding balance will result in a financial hold, a late fee up to $125, and normal university collection activity. Failure to pay may prevent students
from being eligible to use this contract in future semesters. Please refer to studentaccounts.gmu.edu for up-to-date payment plan options.

**Third-Party Billing Authorizations**

Students using a third-party billing authorization will be charged a $25 processing fee. Students must provide the third-party authorization or government training voucher to the Student Accounts Office, North Chesapeake Module, Room 11, or fax it to 703-993-2460 before the payment due date. Students are ultimately responsible for any defaults in payments by the sponsoring agency. Call 703-993-2484 for a copy of third-party billing requirements, or check the web at studentaccounts.gmu.edu.

**Penalties**

A late registration fee of $125 is automatically assessed to students who add their first class for the semester on the first day of classes or after. It does not apply to students already enrolled prior to the start of classes who make schedule adjustments. Late registration fees are nonrefundable and will not be removed, regardless of enrollment status.

Failure to make any payment on or before the due date results in a late payment fee that is 10 percent of the balance due up to $125.

Registrations will not be canceled for nonpayment. Students must drop classes they do not plan to complete by the payment due date to avoid the late payment fee on those classes.

**Returned Checks**

A $25 returned check fee will be charged for each unpaid check returned by the bank. If the returned check results in an unpaid account, an additional late fee up to $125 may be charged and financial suspension will result.

**Financial Good Standing; No Holds on Record**

Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including but not limited to transcript issuance, diploma release, and class registration (add, drop, withdrawal, etc.) will not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include unpaid telephone charges, fines owed for traffic or parking violations, incomplete immunization records, fines owed to the Mason or Washington Research Library Consortium libraries, and other administrative holds.

**Collections**

Failure to meet financial obligations to the university may result in the delinquent account being placed with a collection agency, the withholding of money from tax returns, and other collection procedures. Students are responsible for costs incurred by the university to collect delinquent accounts.

**Dropped Courses**

Students are required to pay full or partial tuition for courses they drop after the last day to drop with full tuition refund, including drops to change from one section of a course to another section. For more information, see the tuition liability dates in the Academic Calendar.

**Refund Policies**

Refund for Credit Balances
In cases where tuition liability is less than the payments on the student's account, a refund of the overpayment may be requested. To initiate the refund process, a Refund Request form is completed and submitted to the Student Accounts Office. Refund will be processed according to the method of payment received:

- Cash payments are sent in the form of a check, without a waiting period.
- Payments made by check require a five day waiting period. The waiting period may be waived if proof of check clearance is presented, such as a canceled check copy or bank statement showing the check cleared the account.
- Credit card payments are credited back to the credit card that was most recently used for payment.

Refund checks are made payable to the student and are mailed to the permanent address listed in the student record. In person, check pick up is not available due to negotiable item security and the large number of checks processed.

**Direct Deposit Refunds**

The option to have check refunds sent electronically is available by submitting a Direct Deposit Authorization form, which can be found on the Student Accounts Office web site. A checking account is necessary for this refund option. Direct deposit refunds are not available for Parent PLUS loans.

**Financial Aid Refunds**

Credit balances from financial aid awards will automatically generate a refund check, which will be mailed to the address on file with the university or sent via direct deposit if authorized by the student. A refund request form is not needed for financial aid disbursement refunds.

**Special Registration**

Students not enrolled in a credit-bearing course, but whose academic department certifies that they are pursuing an activity related to Mason matriculation, can retain active status by having the Registrar’s Office process a registration for the Special Registration course (ZREG 200). A $45 fee is charged for this course, and students must pay this fee before the Registrar’s Office will process the registration. Written approval of the student’s advisor or instructor and the academic department chair is required. This special registration allows students to retain their library and computer privileges, receive a student ID, and buy a parking decal. Students must have active status to apply for or receive a degree, take an exam, or participate in cooperative education. Students pursuing a master’s or doctoral degree must maintain continuous enrollment. For more information, see the Graduate Policies section in the Academic Policies chapter.

**International Student Health Insurance**

Health insurance is required for all F-1 and J-1 visa holders, and nonpayment may result in class cancellation. The health insurance fee is deducted from all payments received by the university before funds are applied to tuition or other charges. For more information, see the Admission of International Students section in the Admissions chapter.

**Music Instruction**

Private music instruction is arranged through the Department of Music on a fee-paying basis. A half-hour lesson (1 credit) is $164.50; an hour lesson (2 or 3 credits) is $329. Note that this fee is subject to change.

**In-State Tuition**

To be eligible for in-state tuition, a student must have been domiciled in Virginia for at least one full year before the semester for which in-state tuition is sought or qualify through statutory exception. A person establishes domicile by demonstrating physical presence and the intention to remain indefinitely in accordance with Virginia domicile guidelines. Copies of the guidelines and other applicable state laws are available from the Office of the Registrar or at registrar.gmu.edu/students/domicile.
Domicile Change

Domicile classification is determined at the time of a student’s admission. To be considered for in-state status when applying to the university, students must file an application for in-state rates.

New and currently enrolled students classified as out-of-state who believe they qualify for in-state tuition after being admitted must file a domicile appeal form with the Office of the Registrar no later than the first day of classes for the semester in which in-state rates are sought. Appeal forms are available from the Office of the Registrar and at registrar.gmu.edu/students/domicile.

Students whose appeals are denied have the right to seek further review of their status by the Office of the Registrar or the Third Level Domicile Appeals Committee. These requests must be filed in a timely manner as stated in denial letters. Forms are available from the Registrar’s Office and the web site. In addition, students should be aware that university procedures for appealing domicile decisions have been established pursuant to state law and are subject to change. Out-of-state students with an appeal pending at the time of tuition billing are responsible for payment at that rate. Students subsequently determined to be in-state may request reimbursement of overpayment from the Office of Student Accounts. Also, any student who fraudulently or knowingly provides false information in an attempt to evade payment of out-of-state tuition will be charged out-of-state tuition for each term or semester attended and may be subject to dismissal from the institution.

For more information regarding in-state eligibility, contact Domicile Administration in the Registrar’s Office in North Chesapeake Module, Room 8; phone: 703-993-2464; e-mail: domicile@gmu.edu.

Tuition Surcharge: 125 Percent of Degree

Undergraduate students who have established Virginia domicile and eligibility for in-state tuition will be subject to a surcharge if they exceed 125 percent of the credits required to complete a degree. The surcharge will be determined by the State Council for Higher Education in Virginia.

The following courses and credit hours shall be excluded in calculating the 125 percent credit threshold: remedial courses; transfer credits from another college or university that do not meet degree requirements for general education courses or the student’s chosen program of study; advanced placement or international baccalaureate credits that were obtained while in high school or another secondary school program; and dual enrollment, college-level credits obtained by the student prior to receiving a high school diploma.

Expenses

Housing

Office of Housing and Residence Life
Ground floor of Potomac Heights
Phone: 703-993-2720
Web: housing.gmu.edu

The university offers a variety of housing options to meet the diverse needs of students living on campus. Upper-class students may choose from traditional-style residence halls, suites, apartments, and townhouses. Most freshmen live in traditional-style residence hall rooms that accommodate two, three, and four students. Room rates are subject to approval on an annual basis by the Board of Visitors. Rates for the 2009–10 academic year have been approved. Please refer to the Housing and Residence Life web site for rate information. All students in housing must provide a prepayment, which is applied to the spring semester rent. Housing assignments, including single rooms, are made on a priority and space-available basis. The web site provides extensive information about housing programs and services and includes floor plans for student rooms.

Students living on campus are required to sign an academic year contract. Releases from the contract are only granted when Housing and Residence Life determines that a significant unforeseen hardship exists. For more information, contact the Office of
Housing and Residence Life, located on the ground floor of Potomac Heights in the wing closest to the Aquatic and Fitness Center.

**Dining Services**

Mason Dining
Southside Dining Hall, First Floor
Phone: 703-993-3300
Web: dining.gmu.edu

Mason Dining provides a wide variety of dining options for the Mason community on the Fairfax, Arlington, and Prince William Campuses. The Fairfax Campus has food courts in SUB I and the Johnson Center that include Burger King, Chik-fil-A, Taco Bell Express, Sangam's, Jazzman's Cafe, Mein Bowl, and Damon's Restaurant. In fall 2008, the Fairfax Campus opened Southside, a dining location with six stations offering fresh, healthy meals prepared by our chefs. Check our web site for information on dining options on the Arlington and Prince William Campuses and for a full listing of our options and service times.

For the 2009–10 academic year, a variety of meal-plan options are available for resident students, off-campus students, faculty, and staff. Check the web site for details.

**Dining Plan Changes**

Meal Plan Office
SUB II, Lower Level, Room 1013
Phone: 703-993-2870
Web: www2.gmu.edu/dpt/allunivcard/mealplans/index.html

Increases in meal plans may be made at any time; however, the last day to decrease mandatory meal plans coincides with the last day to add classes. Seniors with 90 credits or students living in the townhouses, apartments, Liberty Square, or Potomac Heights are not required to have a meal plan. Changes must be made at the Meal Plan Office, located on the lower level in SUB II, 703-993-2870.

**Parking Services**

Fairfax Campus, Sandy Creek Parking Office
Phone: 703-993-2710

Arlington Campus, 104 Original Office Building
Phone: 703-993-8146

Prince William Campus, 112 Occoquan Building Office
Phone: 703-993-4808

Web: parking.gmu.edu

Students who park their vehicles on university property must register them with Parking Services and pay a fee for a parking permit. Permits are available on an annual, semester, or summer basis. For permit sales, fine payments, special requests, or problems, go to any Parking Services Office. Some services are available online at parking.gmu.edu. The Fairfax Campus Sandy Creek Parking Office hours are 8:30 a.m. to 5 p.m. on Monday, Wednesday, Thursday, and Friday, and 8:30 a.m. to 7 p.m. on Tuesday. For more information, read the Parking Policy section in the General Policies chapter of this catalog, or go to parking.gmu.edu for current information and rates.
Financial Aid
Office of Student Financial Aid
South Chesapeake Module
E-mail: finaid@gmu.edu
Phone: 703-993-2353
Fax: 703-993-2350
Web: financialaid.gmu.edu

The Office of Student Financial Aid provides a variety of services to help students finance their education. They include counseling, referral and information resources, and financial assistance. Student financial aid awards consist of grants, loans, and work-study. Awards are based primarily on financial need, although there are some alternative resources available for those who may not qualify for need-based aid.

The office has a comprehensive listing of various scholarship opportunities for students to research on the Student Financial Aid web page. Students are encouraged to review the scholarship information early and frequently to meet deadlines since the listings are updated often.

Located in South Chesapeake Module, the office is open 9 a.m. to 5 p.m., Monday through Friday. Financial aid counselors are assigned to students alphabetically based on students’ last names and are available daily by appointment.

To apply for financial aid, each year new and currently enrolled students must complete a Free Application for Federal Student Aid (FAFSA). George Mason’s federal school code for the FAFSA is 003749. Priority consideration for all sources of financial aid is given to those students whose financial aid applications are on file with the Office of Student Financial Aid by March 1. To meet this priority filing date, students should file the FAFSA as soon as possible after January 1. The FAFSA can be filed online at www.fafsa.ed.gov, or a paper copy can be obtained from the office.

Financial aid for summer is generally limited to students who have remaining Federal Pell Grant or federal loan eligibility. Contact the Office of Student Financial Aid for specifics regarding eligibility. The summer aid application is available online and in the office on April 1.

All students receiving financial aid must be enrolled in an eligible degree or certificate program for at least half time in any given semester; maintain satisfactory academic progress as defined by the Office of Student Financial Aid, in accordance with federal guidelines (see below); and be a U.S. citizen or eligible noncitizen as defined by the U.S. Department of Education.

All aid recipients are responsible for becoming familiar and complying with applicable federal and state laws, university regulations, Mason student aid information resources, and the student aid satisfactory academic progress policy. This policy is detailed in the glossary section of the home page of financialaid.gmu.edu and in the Office of Student Financial Aid.

Academic Progress Standards

Federal legislation governing the administration of federal programs requires colleges and universities to define and enforce standards of progress for students receiving or applying for financial aid. To comply with this legislation, the Office of Student Financial Aid has established a formal satisfactory academic progress policy. For detailed information, go to the Student Financial Aid home page at financialaid.gmu.edu or contact the Office of Student Financial Aid.

Aid Programs

The university administers the following federal, state, and other aid programs:

- **Federal programs:** These include the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), Federal Work-Study (FWS), Federal Perkins Loan Program, Federal Subsidized Stafford Loans, Federal Unsubsidized Stafford Loans, and Federal Parent Loans for Undergraduate Students (FPLUS). For more information,
refer to the **Student Guide for Federal Financial Aid**, which is available in the Office of Student Financial Aid, or go to the Student Financial Aid home page at [financialaid.gmu.edu](http://financialaid.gmu.edu).

- **State programs for undergraduate Virginia residents**: Eligibility for all state programs is based on results received from the FAFSA. State grant funds are limited, so adherence to the March 1 priority filing date is critical.

- **Virginia Commonwealth Award**: This program is open to undergraduate students who have demonstrated financial need, are enrolled at least half time, and are domiciliary residents of Virginia.

- **Virginia Guaranteed Assistance Program (VGAP)**: This program is a component of the Virginia Commonwealth Award Program that is open to students who demonstrated academic achievement in high school. VGAP awards are renewable for up to four years.

- **College Scholarship Assistance Program (CSAP) Grant**: This program uses a combination of federal and state funds to provide additional assistance to students who are enrolled at least half time, are Virginia residents, and who demonstrate significant financial need.

- **Graduate student assistance**: Assistantships, fellowships, and scholarships exclusive of the federal financial aid programs identified earlier are administered by the individual graduate programs. Students interested in pursuing graduate assistantships, fellowships, or scholarships should contact their graduate program.

### Emergency Loan Programs

- **Mary E. Ferguson Emergency Loan Program**: Currently enrolled students may borrow funds for legitimate emergencies, excluding tuition, fees, books, and supplies. Emergency loans must be repaid within 30 days; overdue payments result in a late charge of $5 for each 30 days past due. Failure to repay the loan within 30 days without requesting an extension for a reasonable justification will result in financial suspension. Students financially suspended for nonpayment of an emergency loan are ineligible for any future emergency loans. Application is made through the Office of Student Financial Aid.

- **Doug Beaman Emergency Loan Program**: The George Mason University Alumni Association established an emergency loan fund through which students may borrow up to $100 with repayment due within 30 days. The program is available to all students, with priority given to children of alumni. Application is made through the Office of Student Financial Aid.

- **Lisa Kenaga Memorial Student Emergency Loan Fund**: The Office of Student Financial Aid has established an emergency loan fund through which currently enrolled students may borrow funds for legitimate emergencies, excluding tuition and fees. Emergency loans must be repaid within 30 days with a $10 processing fee; overdue payment results in a late charge of $5 for each 30 days past due. Failure to repay the loan within 30 days without requesting an extension for a reasonable justification results in financial suspension. Students financially suspended for nonpayment of an emergency loan are ineligible for future emergency loans. Application is made through the Office of Student Financial Aid.

### ROTC Scholarships

Please see the Reserve Officer Training Corps section in the Academic Programs and Resources chapter.
Academic Policies

- Undergraduate Policies
  (student classification; academic advising; requirements and categories for good standing and retention; academic suspension and dismissal; academic period and performance)
- Undergraduate Requirements for Programs
  (undergraduate academic program; declaration of major; change of academic program; credit for more than one major; requirements for minors, certificates, bachelor's degrees, second bachelor's degrees; honors)
- Graduate Policies

- Combined Bachelor's and Accelerated Master's Degrees
- Final Exams
- Degree Application, Conferral and Commencement

Academic Calendar

The academic calendar may be accessed at registrar.gmu.edu/. Mason runs on a semester schedule, including an active summer term.

Research

Human Subjects Research

All research activities involving human subjects or data regarding human subjects that are directed by faculty, staff, or students or that involve faculty, staff, or students as participants must be submitted to the Office of Research Subject Protections for review and approval. The form for submission can be found at www.gmu.edu/research/ORSP/HumanSubjects.html. All research activities will be reviewed by the Human Subjects Review Board prior to implementation of the activity. Separate approval by the vice provost for academic affairs is required if contact information for Mason students is needed to conduct the research. All student research must be supervised by a faculty member. The faculty member will serve as the principal investigator for the research and will assume responsibility for the legal and ethical conduct of the work.

Animal Use in Research

All work with live animals, whether for research, teaching, or testing, must be approved by the Institutional Animal Care and Use Committee (IACUC) prior to initiation of the work. All care and use of animals at Mason must be carried out under the supervision of a faculty member who is qualified and experienced in the work being conducted and assumes responsibility for
Registration and Attendance

Registration for the next semester or summer term begins after mid-semester of fall or spring semesters, and is opened to various groups according to priority (graduate students, seniors, juniors, and so on). The Registrar’s Office assigns each student a time ticket, which is a specific date and time after which a student may register. The time ticket is based on the number of credits earned. Thus, the time ticket will not be the same for all students within a particular priority group. Students should consult the Schedule of Classes and Patriot Web for information about their registration date and time.

Financial Good Standing; No Holds on Record

Financial good standing and a university record clear of holds are required for students to receive academic services. Services, including, but not limited to, transcript issuance, diploma release, and class registration (add, drop, withdrawal, and such) will not be provided to students with a financial balance due or a hold of any kind on their record. Holds are based on outstanding obligations and may be financial. Examples include fines owed for traffic or parking violations, incomplete immunization records, fines owed to the Mason or consortium libraries, and other administrative holds.

Registration Procedure

The Schedule of Classes, made available by the Registrar’s Office before priority registration each semester, contains written instructions for registration. Courses listed in the Schedule of Classes may be canceled for insufficient enrollment. Mason reserves the right to change the class schedule and adjust the individual section enrollment as necessary.

Registration is usually accomplished using Patriot Web; however, if a section is closed or registration into a selected section is controlled, permission to enroll must be obtained from the academic program offering the course. Various schools and departments have their own processes for granting this permission. For some courses, the student must submit a completed and signed course permit form in person to the Registrar’s Office.

Students must be present at the first meeting of every laboratory course (lecture and laboratory) to validate their registration. If students cannot attend the first meeting, they must notify the instructor beforehand if they intend to continue in that section. Otherwise, their name may be removed from the class roll in both lecture and lab.

Students are responsible for registering properly and paying by the deadline. Students should confirm the correctness of their enrollments (including drop and add) via Patriot Web. Incorrect enrollments may result in academic and financial penalties.

Students are responsible for tuition payments and grades received for all courses in which they are registered unless registration is canceled administratively because of suspension, dismissal, or termination; the section is canceled; or the course is dropped before the tuition liability begins. See the Schedule of Classes for deadlines.

Changing Registration

Registration changes must be completed within the schedule adjustment period defined below and indicated in the Schedule of Classes. Changes to registration are usually made via Patriot Web.

The last day for adding a 14-week course is two calendar weeks after and including the first day of classes. The last day for dropping a 14-week course is five calendar weeks after the first day of classes (including the first day). Courses meeting for fewer than 14 weeks have add, drop, and tuition-liability dates proportional to their length. These dates are published on the registrar’s web site each semester. Students who drop all courses during the drop period will have no entry on their transcript for that semester and will not be considered an enrolled student for that semester. If it is the student’s first semester, the student will not have a Mason transcript and must contact Admissions regarding enrollment in a future semester.
All students are expected to complete their initial enrollment before the first day of classes for the semester. Any additions to that enrollment must be processed by the end of the add period through official registration procedures. Students will not receive credit for courses unless their names are on the official class rosters and final grade sheets. **Retroactive credits will not be awarded to students who report that they attended classes but were not on the official rosters.** After the date listed in the Schedule of Classes for adding courses, students will not be added to courses except in unusual circumstances beyond the student’s control; such actions require approval by the chair of the academic department offering the course.

All students are expected to drop (by the end of the drop period) those courses they do not intend to continue. Registration is not canceled for failure to drop courses properly. Furthermore, registration is not canceled for failure to attend classes unless stated otherwise in the Schedule of Classes. **All classes in which a student is enrolled past the drop deadline will remain part of the official academic record.** For more information, see the Additional Grade Notations—Administrative Failure section of this chapter. After the date listed in the Schedule of Classes for dropping courses, withdrawal approval is granted only for nonacademic reasons by the student’s academic dean. This approval is typically given for all courses at once, constituting withdrawal from a semester. For more information, see the Withdrawal from a Semester section of this chapter.

No change of registration transaction is complete until it is processed by the Office of Student Accounts and the Office of the Registrar.

**Students will not receive written confirmation of schedule changes and are responsible for checking their schedules via Patriot Web before the end of the add or drop period to verify that their schedules are correct and they are properly enrolled. Students will not be allowed to remain in classes unless they are properly enrolled. Students are responsible, both financially and academically, for all courses in which they remain officially enrolled.**

**Canceling Registration**

Students who cannot attend classes during the semester for which they have registered should cancel registration using Patriot Web prior to the first day of classes for the semester.

Refunds of tuition on and after the first day of classes are made according to the tuition-liability dates published in this catalog and the Schedule of Classes.

**Selective Withdrawal for Undergraduates**

Undergraduates enrolled in degree programs are eligible to withdraw from a limited number of classes without the dean’s approval and at the student’s own discretion. Students may process a maximum of three such selective withdrawals during their entire undergraduate career at Mason. The three classes may have any number of credits. The academic calendar for each semester will include an open withdrawal period beginning the day following the last day to drop the class and extending through the ninth week. For classes shorter than a semester (14 weeks), the period will be set in proportion to the length of the class. Procedures are published in the Schedule of Classes.

**Course Withdrawal with Dean Approval**

For graduate and nondegree students, withdrawal after the last day for dropping a course requires approval by the student’s academic dean, and is permitted only for nonacademic reasons that prevent course completion. For undergraduate students, withdrawal after the open withdrawal period, for cause within the period, or after a student has used all three selective withdrawals, requires approval by the student’s academic dean and is typically permitted only for nonacademic reasons that prevent course completion.

**Semester Withdrawal with Dean Approval**

Undergraduates taking three or fewer classes may use the selective withdrawal for all courses for a semester; see the Selective Withdrawal for Undergraduates section of this chapter. Otherwise, students may withdraw from a semester after the end of the
drop period without academic penalty only for nonacademic reasons with the approval of the academic dean. Withdrawal forms are available at the appropriate academic dean’s office. Students who stop attending all classes without the dean’s approval and without processing selective withdrawals, if eligible, will receive a grade of F in all courses.

Effects of Course or Semester Withdrawal

Approved or selective withdrawal results in a grade of W on the student’s transcript for the withdrawn course(s). While a grade of W does not affect the GPA, undergraduate students should note that withdrawn courses are part of “attempted credit hours,” which serve as the basis for the student’s credit level. In the university’s undergraduate retention system, GPA standards increase according to credit level. See the section on Requirements for Retention.

Academic Load

The minimum full-time load for undergraduate students is 12 credits per semester. For graduate full-time load, see the Graduate Policies section below. For planning purposes, applicants for admission are asked to indicate their preference for full- or part-time status, and day or evening classes; however, they may freely choose between evening and day sections of courses and may change their full- or part-time status.

Although many students must work to meet living expenses, employment must not take priority over academic responsibilities. Students employed more than 20 hours a week are strongly urged not to attempt a full-time academic load. Students employed more than 40 hours a week should attempt no more than 6 credits per semester. Students who fail to observe these guidelines may expect no special consideration for academic problems arising from the pressures of employment.

Although 12 credits per semester represent a minimum full-time undergraduate load, students planning to graduate in four years need to carry an average of at least 15 credits per semester. Written approval must be submitted to the Registrar’s Office before students can register for more than the maximum allowable credits. The Overload Permission Chart declares maximum credits and approval authority for all categories of students; it is published in the Schedule of Classes each semester.

Course Prerequisites, Corequisites

Course prerequisites or corequisites state requirements for student entry into courses and reflect necessary preparation for attempting the course. It is the student’s responsibility to be aware of these as stated in the catalog and have taken prerequisites recently enough to be of value. The administrator of the academic unit in which the course is taught or the instructor of the course may summarily drop students who have enrolled in a course for which they have not met the prerequisites. Graduate course prerequisites are normally met with a grade of B- or better; undergraduate course prerequisites are normally met with a grade of C or better. Questions should be addressed to the academic department or course instructor.

Repeating a Course

Some courses are annotated in the catalog as “repeatable for credit.” These are courses in which students receive additional credit for more than one taking of the same course, up to a maximum number of credits specified in the catalog. Special topics and independent study courses are examples. For all other courses, the following conditions apply:

- Graduate students who have passed a course with a grade of B- or better are not permitted to repeat the course for credit. Also, they must obtain permission from the offering department to repeat a course in which a grade of C or below has been earned. Each department establishes procedures for granting such permission. Duplicate credit is not earned. When a course is repeated, all credits attempted are used to determine warning, termination, or dismissal; the transcript shows grades for all courses attempted; and only one grade per course may be presented on the degree application.
- Some courses, such as special topics courses, are repeatable for a limited number of additional credits. As long as students do not exceed the maximum allowable credits for repeatable courses, all takings of the course count for credit
and in the student’s GPA. In cases where the student has exceeded allowable credits in a repeatable class, the transcript
will exclude the grade and credits of the earliest taking of the class.

- For undergraduate classes not repeatable for credit, undergraduate degree students may repeat courses for which they
seek a higher grade. Academic programs may restrict repeats of certain departmental or college courses in the major.
Excessive repeats may result in termination from the major by a student's dean. A grade received in a repeated course
will replace a grade in prior takings of the same course in the calculation of the cumulative GPA, even if the more
recent grade is lower. Duplicate credit is not given. Repeat rules apply to taking the same course and courses
designated in the catalog as equivalent. Repeat rules apply throughout a student’s academic history. All instances of
courses and their grades remain part of the student’s transcript. No adjustment to the cumulative GPA will be made
when the grade in the repeated course is W. A grade in a Mason course will not be excluded from the cumulative GPA
based on a subsequent taking of an equivalent course at a transfer institution. The exclusion of earlier grades of
repeated courses will not change the academic standing or dean’s list notations for the earlier semester. Note that
individual programs may disallow students from retaking certain high-demand courses simply for the purpose of
improving their grade. Programs may also require departmental permission for students to repeat certain department,
school, or college courses.

Advisor’s Permission to Register

All newly admitted students, undeclared undergraduates on academic warning or academic probation, and undergraduates
returning from suspension, are required to obtain an advisor’s approval for registration. All students are strongly encouraged to
consult with their advisors concerning course registration each semester.

Credit to Be Earned at Other Institutions

Students who apply for admission to Mason usually do not seek simultaneous enrollment at another collegiate institution. In
those unique situations when a student does seek concurrent enrollment, the student must obtain advance written approval from
the appropriate Mason dean. This process permits a student to enroll elsewhere in a suitable course unavailable at Mason. Catalog
numbers and descriptions of courses to be taken elsewhere must be submitted with the request for approval. Students must submit
an official transcript for all such course work to the Registrar’s Office. Note that while credit may be approved for transfer and a
minimum grade must be achieved, grades themselves do not compute into any Mason GPA. Students who enroll elsewhere
without advance written permission while enrolled at Mason may not receive transfer credit for course work taken at other
institutions.

Permission to Register as Graduate Student

Registration for courses in a graduate program is permitted only after the student has been notified of admission. Students
admitted to degree programs are given preference over nondegree students through the registration process. Dual registration (for
example, as a graduate student and nondegree enrollee) is not permitted. The graduate student is responsible for being properly
registered and aware of all regulations and procedures required by a program of study. Regulations and degree requirements are
not waived nor are exceptions granted because of ignorance of any regulations. Registration in graduate-level courses is restricted
to admitted graduate degree students and nondegree graduate students (unless excluded by program). Undergraduate degree
students may register for graduate courses only with special approval (see section below). Nondegree undergraduate students
may not enroll in courses numbered 500 or above. Courses numbered 800 and above are available only to admitted graduate
degree students.

Graduate Course Enrollment by Undergraduates

Courses numbered 700 and above are closed to undergraduates. Undergraduates in degree programs may enroll in graduate-level
courses 500 to 699 only with written permission, which must be obtained before registration. Forms are available at the Office of
the Registrar. Written permission is waived for undergraduate students admitted to combined bachelor’s and accelerated master’s
programs.
To enroll in graduate courses for credit applicable to an undergraduate degree, undergraduates must have completed all course prerequisites, have exhausted all upper-level undergraduate courses relevant to their educational objectives, and be able to demonstrate the level of maturity required for graduate courses.

Approval to register for reserve graduate credit (earned credit held in reserve to apply later toward a graduate degree) is given only to Mason seniors within 15 credits of completing undergraduate study who have successfully completed all course prerequisites. In addition, this privilege is normally extended only to seniors who have completed at least 12 credits at the university, have a cumulative GPA of 3.00 or better, and have a major in the department offering the course. Approval for reserve graduate credit is limited to 6 credits and does not imply approval for admission into a Mason graduate program or that credit so earned will be accepted at another graduate school.

Undergraduates enrolled in graduate courses are eligible to receive only those letter grades applicable to graduate grading. For more information, see the Grading System section below. Credit for the same course may not be applied to both graduate and undergraduate degrees.

**Special Registration for Nonenrolled Students**

Degree-seeking students not enrolled in a credit-bearing course but whose academic department certifies that they are pursuing an activity related to their Mason enrolled program can retain active status by registering for Special Registration (ZREG 200) for a $45 fee. Written approval from the student’s advisor and the academic department chair is required. Special registration allows students to retain library and computer privileges, receive a student ID, and buy a parking decal. Students must have active status to apply for or receive a degree, take an exam, or participate in cooperative education.

**Enrolling for Credit Without Grade Points**

Courses normally graded as satisfactory/no credit (S/NC) are annotated in the catalog, but students may elect to take credit without grade points. Undergraduates may take up to 6 credits to be graded S/NC; this option applies only to electives outside the field of the major, concentration, minor, general education requirement, or certificate program. Graduate students may elect the S/NC grade option only for courses that do not apply to the degree or certificate requirements. S/NC grading will also be used for courses numbered 998 and 999. For more information, see the Additional Grade Notations section below.

**Auditing a Course**

Auditing a course requires the instructor’s permission. Audit forms are available at the Registrar’s Office. A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status nor from audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

**Academic Common Market**

The Academic Common Market (ACM) is a cooperative tuition-reduction program agreement among 16 states, including Virginia, which compose the Southern Regional Education Board. Students who are not legal residents of Virginia but wish to pursue a degree in a selected Mason program that is not available in their home state may be able to participate in the ACM and thereby attend Mason without incurring out-of-state tuition charges. Likewise, legal residents of Virginia may take advantage of programs in other states. More information about this program is available at the Office of the Registrar or at registrar.gmu.edu/students/domicile/nonresidents.html.

**University Consortium**
Mason is a member of the Consortium of Universities of the Washington Metropolitan Area, which includes American University, Catholic University of America, Corcoran College of Art and Design, Gallaudet University, George Washington University, Georgetown University, Howard University, Marymount University, Southeastern University, Trinity College, the University of the District of Columbia, and the University of Maryland-College Park. Eligible Mason students may enroll in courses at any of the consortium institutions. The consortium’s cross-registration arrangement permits students enrolled in eligible degree programs at one member institution to take a course at another member institution.

Participation in consortium cross registration is available to degree-seeking juniors, seniors, and graduate students in good standing and currently enrolled at Mason. Participation is limited to courses that are approved by the student’s department chair and dean, apply to the student’s program of study, are not offered during that semester at Mason, and have space available at the visited institution. Additional restrictions apply. Students may take one consortium course per semester, with a career maximum of 6 credits for undergraduates (9–12 if foreign language study is approved) and 6 credits for graduate students. Credit earned through the consortium is considered resident credit, so grades count in the Mason GPA.

Information and regulations, including restricted and excluded courses, for both outgoing and incoming Mason consortium students are available in the Schedule of Classes and on the web at registrar.gmu.edu/students/consortium/index.html. Information pertaining to all member institutions is available at www.consortium.org/main.asp. For more information, call the consortium coordinator in the Office of the Registrar at 703-993-2436.

**Attendance Policies**

Students are expected to attend the class periods of the courses for which they register. In-class participation is important not only to the individual student, but also to the class as a whole. Because class participation may be a factor in grading, instructors may use absence, tardiness, or early departure as de facto evidence of nonparticipation. Students who miss an exam with an acceptable excuse may be penalized according to the individual instructor’s grading policy, as stated in the course syllabus.

**Absence for Religious Observances or Participation in University Activities**

Mason encourages its faculty to make a reasonable effort to allow students to observe their religious holidays or to participate in university-sponsored activities (e.g., intercollegiate athletics, forensics team, dance company, etc.) without academic penalty. Absence from classes or exams for these reasons does not relieve students from responsibility for any part of the course work required during the absence. Students who miss classes, exams, or other assignments as a consequence of their religious observance or for participation in a university activity will be provided a reasonable alternative opportunity, consistent with class attendance policies stated in the syllabus, to make up the missed work. It is the obligation of students to provide faculty, within the first two weeks of the semester, with the dates of major religious holidays on which they will be absent, and the dates for which they are requesting an excused absence for participation in any university-sponsored activity scheduled prior to the start of the semester, and as soon as possible otherwise. Students requesting an excused absence for participation in a university-sponsored activity must provide their instructor with a letter from a university official stating the dates and times that participation in the activity would result in the student missing class. Faculty members are encouraged to take religious observances into consideration when constructing class schedules and syllabi.

**Combined Bachelor’s and Accelerated Master’s Degrees**

The university offers a number of combined bachelor’s and accelerated master’s degree programs for academically strong Mason undergraduates with a commitment to research or graduate or professional studies. Students admitted into these programs may take a number of graduate courses in their field of study (with permission from their undergraduate and graduate advisors) after achieving 90 undergraduate credits and fulfilling all prerequisites. A maximum of 6 graduate credits completed with a 3.00 GPA or better in each course will apply to the undergraduate degree and give the student advanced placement in the related Mason master’s program. A maximum of 6 graduate credits may also be taken as reserve graduate credit and only applied to the master’s. See Graduate Course Enrollment by Undergraduates section above.

Students in an accelerated degree program must fulfill all university requirements for the master’s degree, including a minimum of 18 applicable graduate credits taken after the bachelor’s degree has been completed and posted to the student’s academic
Final Exams

Final exams are usually given at the end of undergraduate courses. Except in predominantly laboratory courses, exams may not be given during the last week of classes. Exams may not exceed the scheduled length of two hours, 45 minutes. Changes in location or time of in-class final exams must be approved by the appropriate department chair and dean. A professor who is considering assigning a take-home exam or significant end-of-semester paper or project should inform the students at the beginning of the semester. Such assignments should be distributed by the beginning of the last week of classes so that students can coordinate them with preparation for other exams. Students must not be required to submit exams before the date of the regularly scheduled exam for a course. Retaking final exams is not permitted.

Absences

Absences from final exams will not be excused except for sickness on the day of the exam or other cause approved by the student’s academic dean or director. The effect of an unexcused absence from an undergraduate final exam shall be determined by the weighted value of the exam as stated in the course syllabus provided by the instructor. If absence from a graduate final exam is unexcused, the grade for the course is entered as F. See the Additional Grade Notations section below for information on being absent with permission.

Grading System

University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation or not fewer than two hours per week of laboratory work throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. For grades applicable to graduate courses, see the Graduate Academic Standards, Grades section of this chapter.

The university-wide system for undergraduate grading is as follows:

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Grade</th>
<th>Points</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
<td>Passing</td>
<td></td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>Passing</td>
<td></td>
</tr>
</tbody>
</table>
No credit toward graduation accrues from a failing grade or a grade that is replaced by a retaken course. For more information, see the Registration and Attendance section of this chapter.

### Additional Grade Notations

**Satisfactory/No Credit (S/NC):** An S grade reflects satisfactory work (C or better for undergraduate students, B- or better for graduate students); otherwise, the student receives no credit (NC). S and NC have no effect on the student’s GPA. Entire courses normally graded S/NC are annotated in the catalog. Students may also elect to take credit without grade. For more information, see the Registration and Attendance section of this chapter.

**A/B/C/NC:** Students who successfully complete English Composition and Introduction to Literature (ENGL 101) or Composition for Non-Native Speakers of English (ENGL 100) are graded A, A-, B+, B, B-, or C. Students who do not attain at least a C in these courses receive no credit (NC). NC has no effect on the GPA.

**Incomplete (IN):** This grade may be given to students who are passing a course but who may be unable to complete scheduled course work for a cause beyond reasonable control. Unless the faculty member has specified an earlier deadline, the student must then complete all the requirements by the end of the ninth week of the next semester, not including summer term, and the instructor must turn in the final grade by the end of the 10th week. Faculty members who choose to require an earlier incomplete deadline will be required to file an [Incomplete Grade Contract](#) with the local academic unit's office, detailing the work that remains to be done, the general reason for the incomplete, and the student's grade at the point of receiving the incomplete. Unless an explicit written extension is filed with the Registrar’s Office by the faculty deadline, the grade of IN is changed by the registrar to an F. The maximum IN extension is to the end of the same semester in which it was originally due. Students who have filed their intent to graduate have only six weeks from the date of degree conferral to resolve any incomplete grades and have the final grades recorded by the Registrar’s Office.

While a grade of IN remains on the transcript, it is treated as an unsatisfactory grade in determining probation, suspension, termination, or dismissal. Removal of INs from the transcript may result in retroactive elimination of probation, suspension, termination, or dismissal.

**Incomplete, extended (IX):** IX is given by the Registrar’s Office after receiving an Incomplete Extension form signed by the instructor and the appropriate dean. The extension gives students additional time to complete work; the amount of time is specified by the instructor. The final grade must be submitted to the Registrar’s Office before final exams for the semester in which the IN grade was originally due. A grade of IX affects the academic record in the same way as does a grade of IN.

**In Progress (IP):** This grade may be given in selected courses, including graduate theses, dissertations, practica, and internships. IP may also be used when the work of BIS 490 or a course that is graded S/NC or A/B/C/NC is not completed within one semester. IP has no effect on the GPA. With the exception of BIS 490, IP remains on the record until the work is completed and a final grade is assigned. An IP in BIS 490 not changed to a final grade by the last day of classes of the next semester, not including summer term, is changed by the registrar to an F. IP grades will also be awarded in courses numbered 998 and 999 until successful completion, and then they will be changed to S/NC. Upon successful completion of 998 or 999 and submission of the final grade, grades for all prior sections will be changed to S/NC.

**Absent with permission (AB):** A student who has received permission from the academic dean or director to be absent from a final exam for cause beyond reasonable control may receive a temporary grade of AB. A rescheduled exam must be administered within 10 business days of the original exam date, or the AB will automatically become an F. Final determination of academic status is not complete while the AB remains on the transcript.
Special Provision (SP): The grade of SP may be given by a dean to students who are unable to complete the course requirements because of extraordinary long-term circumstances, such as major illness or military deployment. SP has no effect on the GPA and remains on the transcript until the work is completed and a final grade is assigned.

Midterm Reports

Midterm progress is reported for all full-semester 100- and 200-level classes, and for 300- and 400-level classes at the discretion of the professor. The reporting period extends from the fifth through the eighth week of the semester, allowing flexibility to individual faculty in providing reports for their classes. Students should check with their instructors as to when reports will be complete and available for viewing through Patriot Web. These progress reports, which appear in Patriot Web as “Midterm Grades,” do not become part of the student’s official record. They are not calculated in any GPA, and they do not appear on any official or unofficial transcript.

Final Grades

Semester grade reports are available through Patriot Web. Students may print a grade report for their own records or to issue to a third party. Official semester grade reports for tuition reimbursement may be obtained through the Office of the Registrar. Students may also order an official transcript through the Registrar’s Office.

Transcripts

Official transcripts include all credit course work attempted at the university. Official transcripts will not be issued when unsatisfied financial obligations to the university exist. Unofficial transcripts may be printed by the student from Patriot Web. See registrar.gmu.edu for information and instructions on requesting official transcripts.

GPA

Quality point values are assigned to letter grades as indicated in the grading system table. A quality point score is computed by multiplying the value of a letter grade by the number of credits for the course. For example, a student receiving an A (4.00) in a 3-credit course earns 12 quality points. The GPA is computed by dividing the quality points earned by the number of credits graded A+ through F (GPA hours).

For undergraduates, the GPA computed for the current term gives the current GPA, which is the measure of academic performance in one semester and affects eligibility for the dean’s list. The GPA computed for all institutional credit gives the cumulative GPA, which is the basis for the university’s retention policies, including good standing, warning, probation, suspension, and dismissal. Cumulative GPA also determines students’ eligibility to graduate and have university honors posted to their record at graduation.

Current GPA and cumulative GPA do not apply to graduate students. A notation of academic warning is entered on the transcript of a graduate student who receives a grade of C, or a grade of F in a graduate course or while a grade of IN or IX is in effect. A degree GPA is computed for graduate students based on graded courses completed at the university and applied toward the degree. For more information, see the Graduate Policies section of this chapter.

Change of Grade

The conditions and time limits for changes from the temporary grades IN, IP, AB, and SP to final grades appear in the Additional Grade Notations section.

Once a final grade has been recorded by the Office of the Registrar, it can be changed only in cases of computational or recording error, or pursuant to a successful appeal of the grade as described below. Additional work of any type submitted to improve a grade after the final grade has been assigned and sent to the Office of the Registrar is never accepted.
All changes of final grades must be initiated, approved, and recorded by the last day of classes of the next regular semester (spring for fall grades, and fall for spring and summer term grades).

**Grade Appeals**

Although faculty members are generally the best judges of student performance, there may be times when a student believes a grade is unfair. In such cases, the student should ask the faculty member to reconsider the grade. If the student is not satisfied, an appeal may be made to the head of the unit offering the course (the department chair, institute director, or designee). The recipient of the appeal should ask the student to return to the faculty member who assigned the grade for further consultation.

If the instructor is no longer associated with the university, the local administrator of the unit offering the course will appoint a faculty surrogate, who will assume magisterial authority of the instructor of record at this level of appeal.

If a mutually satisfactory agreement is not reached, the student may request that the chair form a committee of three faculty peers of the faculty member who assigned the grade. If the chair believes the student’s complaint is not legitimate, this reservation is reported to the chair’s supervisor, usually the dean. No review is conducted unless the dean believes the complaint has merit.

The faculty member or the student may challenge and have replaced one of the three members of the committee without giving a reason for the challenge. The committee meets separately with the faculty member and the student to explore the full particulars of the case. A nonparticipating observer of the student’s choice may attend the meeting. Every effort is made to avoid an adversarial relationship.

After the committee has reviewed the case thoroughly, it issues to the chair (with a copy to the faculty member) a written recommendation that includes the reasons for its findings. At this time, the faculty member has an opportunity to take the recommended action, if any. If the matter is not resolved at this point, the chair considers the committee recommendation and makes a recommendation to the dean. The decision of the dean is not subject to further appeal. If the dean decides that a change of grade is appropriate and the faculty member refuses to make the change, then the dean may direct the registrar to do so.

Grade appeals are not accepted after the last day of classes of the following semester (spring for fall grades, fall for spring and summer grades).

**Pending Grade Appeal for Students in Academic Difficulty**

A student may request a delay from the dean in imposing academic suspension because of a pending grade appeal that could change the student’s status. An approved delay allows the student to register.

If the grade appeal is successful, the official transcript is corrected and the student continues in classes as a student in good academic standing, on probation or on warning. If the grade appeal is not successful, the student is required to stop attending all classes immediately. No record of registration for the academic period appears on a transcript and the student receives the appropriate refund as of the decision date.

**Degree Application, Conferral and Commencement**

**Application for Degree**

In the semester prior to the expected completion of degree requirements, students must confirm their intent to graduate through Patriot Web. The deadline to file the intent to graduate is generally six to seven months prior to the conferral date. Specific deadlines are published on the registrar’s web site registrar.gmu.edu. Some graduate programs require a paper application. Applications are available on the registrar’s web site as well as complete instructions and deadlines regarding graduation. Separate applications for each graduate degree or certificate are required.
For a degree to be conferred, all course work must be completed, even if the course work is not being applied to the degree. Master’s degree students must complete non-course degree requirements including credit-by-exam, oral exams, theses, scholarly papers, and comprehensive exams prior to the conferral (graduation) date. Master’s theses and doctoral dissertations are due in the library well before the conferral date. For more information, go to thesis.gmu.edu.

Students must have active registration status in the semester or summer term of graduation. Students not registered for course work in the term of graduation must obtain a special registration. (For more information, see the Registration and Attendance section of this chapter.) Degree applications will not be automatically extended if graduation is postponed; students must reapply for each conferral date.

Degree Conferral

Mason awards degrees and certificates in programs and at levels authorized by the State Council of Higher Education for Virginia (SCHEV). The university confers degrees at the bachelor’s, master’s, and doctoral levels. An academic program may include a degree program and additional majors, minors, or certificates. The university offers no certificate program below the bachelor level; some post baccalaureate certificates, however, may be awarded concurrently with the bachelor’s degree. For more information, see the Programs of Study listings.

Definitions of Degree Components

- **Degree program, major, or field**: A program of study that normally requires at least 30 credits of course work in the specified field. The primary program name (degree and major or field) appears on the diploma for bachelor’s and master’s degrees. Only the degree name appears for doctoral degrees. An undergraduate who desires to graduate with a BA or BS degree in two or more subjects must meet departmental requirements for the major in each field. For each major, at least 18 credits used to fulfill its requirements must be applied only to that major, i.e., cannot be used to fulfill the requirements of another major, a concentration, a minor, or an undergraduate certificate.

- **Concentration**: A second-order component of a degree program or a component of a track. A concentration consists of at least 12 hours that are not applied to any other concentration. Undergraduate concentrations are approved by the unit at the undergraduate level or by the Graduate Council at the graduate level.

- **Certificate**: A nondegree program complementary to a degree that requires at least 24 undergraduate or 15 graduate credits. Certificates are approved by the school or college at the undergraduate level and by the Graduate Council at the graduate level. The name of a completed certificate program appears on the transcript after the conferral of an undergraduate degree. For each undergraduate certificate, at least 15 credits used to fulfill its requirements cannot be used to fulfill the requirements of a major, a concentration, a minor, or another undergraduate certificate.

- **Minor**: A complement to a bachelor’s degree program or major normally requiring at least 15 credits in a field other than the student’s major. Of the courses presented for a minor, at least 8 credits must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor.

- **Option**: The choice of a thesis or nonthesis path in graduate programs.

Catalog Requirements for Degrees

Catalog year refers to the setting of course and non-course requirements within academic programs as stated in the school and college section of a specific catalog. Catalog year does not set academic policies other than program requirements in place, however. For more information, see the Knowledge of University Policies section of the Student Rights and Responsibilities section. Not all programs and degree components are available in all catalogs. For any one degree, all requirements must be met as stated in a single catalog.
Bachelor’s degree candidates who have been continuously enrolled (allowing absences from summer terms or single semesters) may choose to graduate under the terms of any catalog in effect at or after their admission. Students who have been inactive for five or more years or who have attended another institution without prior approval from their academic dean or director must graduate under a catalog in effect at or after their re-admission.

Master’s and doctoral degree candidates who have been continuously enrolled may choose to graduate under the terms of any catalog in effect at or after their admission. Students who have been inactive more than one year, however, must graduate under a catalog in effect after they have been granted permission to re-enroll, or they must petition their unit dean or director to graduate under an earlier catalog. The final decision rests with the unit dean or director.

**Commencement**

Commencement provides an opportunity for students and their families to share in the conferral of academic degrees. Students who wish to participate should check the web site at [events.gmu.edu](http://events.gmu.edu) for current information about all Commencement details including tickets, regalia, and schedules. Bachelor’s and master’s degree candidates who declare their intent to graduate in August but who have not yet completed all degree requirements may participate in the commencement ceremony in anticipation of degree completion. Their names are marked with an asterisk identifying them as candidates pending completion of all requirements. Doctoral students may participate only if they have successfully completed all degree requirements, including defending and submitting a signed, final copy of their dissertation by the deadline.

**Undergraduate Policies**

**Student Classification**

Admitted undergraduates are classified as follows: freshman, 0–29 credits completed; sophomore, 30–59 credits completed; junior, 60–89 credits completed; and senior, 90 or more credits completed. Full-time undergraduates are classified as those students enrolled in 12 or more credits per semester. Please note that different criteria for full-time status may apply for tuition, verification, and financial aid purposes. For more information, contact the offices of Student Accounts, Registrar, and Student Financial Aid, respectively.

**Academic Advising**

The mission of academic advising at Mason parallels the university’s mission by providing resources and programs to mentor, teach, and guide students in their decision making as they develop their educational and career goals. Admitted undergraduate students should meet regularly with an academic advisor to discuss academic programs, educational goals, and career plans. With their advisors, students plan academic programs to meet the general university degree requirements and specific requirements within their major fields. It is the student’s responsibility to read the catalog and know and fulfill the requirements of a specific baccalaureate degree. To assist in the advising process, Mason provides a computerized degree evaluation. Students may access their individualized reports through Patriot Web.

Individual departments establish their own advising processes; students should check with their departments for the appropriate procedures. During their freshman and sophomore years, students in the Honors College plan their schedules with honors advisors. Every department coordinates advising of its honors students through the Honors College.

Some departments require that students be advised prior to registration each semester. For the categories of students (regardless of major) who may not register until they have seen an advisor, see the Registration and Attendance section of this chapter.

**Academic Advising Center**

Student Union Building I, Room 304, MS 2E6  
Phone: 703-993-2470  
Fax: 703-993-2478
Admitted students who have not yet declared a major or are considering a change of major are assisted in the Academic Advising Center. Students are encouraged to make an appointment for information about general education requirements, programs, policies, procedures, and other academic concerns. The center also provides information and guidance for students who are interested in preprofessional programs in the health fields. Advising is available by appointment Monday through Friday, 9 a.m. until 5 p.m., and Tuesday until 8 p.m. when classes are in session.

Student Academic Affairs
Johnson Center, Room 245, MS 2C4
Phone: 703-993-9082
Fax: 703-993-9008
Web: www.gmu.edu/departments/saa

Student Academic Affairs is the umbrella unit for the Freshman Center, Transfer Center, and the University Transitions Office and also rules on all academic actions submitted by students not in a declared major.

Advising upon Entrance into Upper Division (Junior Standing)

Upon entrance into the upper division, every student should meet with an advisor to adopt a program of study. This meeting should cover the following:

- Review of requirements for the degree and major the student has chosen
- Review of the student’s record including any deficiencies which must be corrected
- Discussion of career or graduate study options open to the student enrolled in such a program
- Opportunities for departmental faculty to evaluate the student’s suitability to major in the chosen discipline.

This advising session occurs in the semester in which the student will have completed 60 or more acceptable credits. The results are a matter of record, with any approved modifications being entered into the student’s computerized degree plan.

Although an upper-division student who has filed an approved program of study is usually not required to consult again with an academic advisor, it is good practice to seek periodic academic and career advising. It remains the student’s responsibility to seek approval for any program change so that the computerized degree plan may be kept current. In particular, once a student has completed 60 credits, a change of major requires an extended session with an advisor in the new major and approval of a new program of study before the change is complete.

A student in lower-division status may change majors by filing a Change/Declaration of Academic Program Form with the registrar. These are minimal advising procedures to be followed in all undergraduate segments of the university; individual units may require additional advising sessions.

Health Professions Advising and the Medical Sciences Advisory Committee
Phone: 703-993-9305
Web: prehealth.gmu.edu

Students are responsible for educating themselves about a career in the health professions (e.g., dentistry, medicine, pharmacy, optometry, podiatry, or veterinary medicine) and should become familiar with the relevant graduate/professional admissions process. The health professions advisor coordinates academic and career advising for Mason students and alumni as the chair of the Medical Sciences Advisory Committee. The committee reviews all qualified candidates for admission to health profession programs in dentistry, podiatry, veterinary, allopathic, and osteopathic medicine to create a composite letter of evaluation for the applicant. The committee comprises university faculty and professional advising staff. For more information, consult the advising web site or contact the health professions advisor, 209 Science and Technology I, 4400 University Drive, MS 2C4, Fairfax, Virginia 22030.
Requirements for Retention

The following system of academic progress became effective in fall 2004 and applies to all undergraduate degree and nondegree students at Mason, including those formerly categorized as extended studies students.

Academic retention is based solely on the cumulative GPA. The cumulative GPA required for retention varies according to the credit level or attempted credit hours, which is a combination of all credits attempted at the university plus credits transferred from other institutions or obtained by testing.

Dean’s List

Students in degree status who take at least 6 credits in a semester and earn a semester GPA of 3.50 or higher merit placement on the Dean’s List. Courses subsequently repeated and excluded will not retroactively affect Dean’s List status. This notation will be placed on the individual’s permanent record.

Good Academic Standing

Students are in good academic standing unless they are academically dismissed, suspended, or on probation. Students on academic warning are still considered to be in good academic standing.

Student Retention Categories

The university’s minimum standard for satisfactory academic achievement is 2.00 on a 4.00 scale. Students with at least 7 attempted credits and a cumulative GPA of less than 2.00 fall into one of three categories: warning, probation, and suspension. All notations of academic standing are included in a student’s permanent record. The cumulative GPA range that defines each of the categories varies according to the credit level, as noted below:

<table>
<thead>
<tr>
<th>Credit Level</th>
<th>Warning</th>
<th>Probation</th>
<th>Suspension</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attempted</td>
<td>Cumulative GPA Range</td>
<td>Cumulative GPA Range</td>

</tr>
</tbody>
</table>

Exception for Freshmen and Transfer Students

Freshmen and transfer students in their first semester of study at Mason will receive probation as the strongest academic sanction. GPA retention levels, as stated above, will apply in all subsequent semesters. Students in this category should be on notice that they must make up ground in order to avoid suspension in future semesters; in particular they should consult their advisors and consider repeating courses in order to achieve academic good standing.
Termination from the Major

Undergraduate students in any retention category may be reviewed for possible termination by their dean. Termination from a major—or from all majors in a college—may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward completion of the major. Students must be informed a semester in advance and given a chance to meet the standard or appeal. Once a termination decision has been made, a letter of termination is sent to the student by the dean or director of the school, college, or institute, and notification of termination from the major is affixed to the student’s academic record. Students who are terminated are no longer eligible to pursue that major, but may transfer to a different major within the university to complete their undergraduate degree.

Periods of Academic Suspension

Students in degree status who incur a first suspension following a spring semester or summer term serve a period of suspension through the next fall semester. Students who incur a first suspension following a fall semester serve a period of suspension through the next summer term. A second suspension is for one calendar year: two semesters and a summer term. Students returning from suspension are on probation for one academic period. Course credits earned at other colleges during the period of suspension from Mason (for academic or nonacademic reasons) are not accepted for the degree program.

Nondegree undergraduate students placed on suspension have no specified rights of return to the university. Nondegree students who have been suspended and wish to resume their studies after a period of absence must qualify for readmission through the Office of Admissions.

Academic Dismissal

A third suspension results in academic dismissal, a status that is usually permanent. In exceptional cases, students who have been dismissed may apply for readmission after a minimum absence of three calendar years from the university, but only if they meet one or more of the following conditions after having been dismissed:

- Demonstrate academic success (2.50 GPA or better) in at least 18 credits of classes taken during the period of dismissal at an accredited two- or four-year college or university. Such credits may be considered for transfer back to Mason, but there is no guarantee of acceptance of the credit.
- Provide other evidence of a renewed ability to achieve academic success.
- Provide evidence that all degree requirements will be met once an additional 12 or fewer credits are complete. Meeting the above requirements does not guarantee a return. The Office of Admissions and the appropriate school or college dean will make individual decisions in the best academic interests of the student and the university. For students seeking readmission to a new school or college, the new dean will make the decision in consultation with the former dean and the Office of Admissions. For more information, see the Academic Clemency section of this chapter.

Academic Period

Academic period refers to fall semester, spring semester, or summer term. For determining the duration of academic warning, probation, and suspension, an academic period is defined as follows:

Each academic period begins on the 15th day following the last scheduled day of final exams for the previous period. Each academic period ends on the 14th day after the last scheduled day of final exams. For example, assume that the last scheduled day of final exams for a semester is Monday, December 23. That period then ends on Monday, January 6. The next period begins on Tuesday, January 7.

Academic Performance and Credit Limit
Undergraduate students on warning, probation, or returning from suspension are limited to a maximum of 13 credits for following semesters until they achieve good standing. Students registered for 14 or more credits are responsible for seeking academic advisement and adjusting their enrollment to a maximum of 13 credits.

Academic Standing and Student Activities

Only students in good academic standing are eligible to hold or run for elective or appointive office in any organization or activity associated with Mason, compete in any athletic or other activity representing Mason on either an intercollegiate or a club level, or serve as a working staff member of any student organization. Note that students on warning are considered to be in good standing. Some organizations and activities may impose stricter academic criteria for participation.

A student whose eligibility for an activity requires the completion of a semester will have fulfilled that requirement when the student’s publicly scheduled exams are over, unless continued eligibility depends on the grades received. In the latter case, the student will not become eligible until the end of the semester as defined in the Academic Period section of this chapter.

Academic Clemency

Undergraduate students returning to Mason after a separation of a minimum of three calendar years may petition their academic dean to have up to 16 previous credits earned at Mason removed from the calculation of their cumulative GPA. Courses and grades so removed will not count toward graduation requirements. Note that the courses, with their original grades and the notation “Academic Clemency,” will remain listed on the student’s transcript permanently. The petition for clemency must be filed in the first semester of returning to Mason; approval may depend on successful completion of that semester. Approval of the request is neither automatic nor guaranteed.

Undergraduate Requirements for Programs

Undergraduate Academic Program, Declaration of Major

To plan a sound academic program, undergraduates should select a degree and major as soon as it is practical but no later than four weeks before the end of the sophomore year. To declare a major, students should confer with the appropriate advisor in the new major program. Students approaching the recommended point for declaring a major, but still uncertain of their choice, should consult the Academic Advising Center, Student Union Building I, Room 304, advisor@gmu.edu.

Change of Academic Program

Students considering a change in their academic program (major or degree) are encouraged to see an advisor in the Academic Advising Center or a faculty advisor in their prospective discipline. Departmental chapters of this catalog describe requirements for acceptance. Students not meeting the requirements may appeal to the department chair for an exception.

Once a student has completed 60 credits, a change of major requires a meeting with an advisor in the new major before the change is complete. To file a change of major, signatures of advisors or designates in both the new and former major programs must be obtained on the Change/Declaration of Academic Program Form.

Credit for More than One Undergraduate Major

Students seeking to graduate with a BA or BS degree in two or more subjects must meet departmental requirements for the major in each field. For each major, at least 18 credits used to fulfill its requirements cannot be used to fulfill the requirements of another major, a concentration, a minor, or an undergraduate certificate.
Students pursuing two or more concurrent majors must complete the Declaration of Second Major section of the Change/Declaration of Academic Program form, available in the Registrar’s Office or at registrar.gmu.edu/forms. The applicant must present a detailed program of study for both majors and obtain the authorizing signature from the chair or director of the second program and from the dean or director, if required by the college, school, or institute. When required by a specific academic unit, department chairs and deans or directors must also approve all changes to the programs of study. Students may begin a program at any time that permits completion before the anticipated graduation date.

**Minors**

Students may elect minor programs of study in addition to major fields by completing the Declaration or Change of Minor section of the Change/Declaration of Academic Program Form. Minors usually require between 15 and 21 credits of study, at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student’s major, concentration, an undergraduate certificate, or another minor. Students must complete at least 6 credits in their minor at Mason and achieve a minimum 2.00 GPA in courses applied to the minor. Students interested in a minor should consult the appropriate departmental chapters in this catalog.

**Undergraduate Certificates**

Students may elect undergraduate certificate programs of study in addition to major fields by completing the Change/Declaration of Academic Program Form. Students pursuing undergraduate certificates must be admitted to Mason in degree-seeking status. Undergraduate certificate programs require at least 24 credits, 15 of which may not also be used to fulfill the requirements of a major, a concentration, a minor, or another undergraduate certificate. More than half of the credit hours for an undergraduate certificate must be taken at Mason, and more than half must be taken in degree-seeking status. Students must achieve at least a 2.00 GPA in courses applied to the certificate. Students with a previous bachelor’s degree, who are admitted to an undergraduate certificate program alone, have four years to complete certificate requirements. A completed undergraduate certificate may be posted to the transcript only after completion of a bachelor’s degree. Note that these are university minimum requirements; individual programs may have higher standards and/or more restrictive requirements.

**Requirements for Bachelor's Degrees**

- **Admission.** Candidates must have been officially admitted into degree-seeking status.
- **Residency.** At least one-fourth of the total credits applied to the degree must be completed at Mason and include at least 12 upper-level credits (courses numbered 300 or above) in the major program. A maximum of 18 credits earned in non-degree status at Mason can be applied toward a bachelor's degree.
- **Credit Hours.** Students must complete at least 120 credits that count toward graduation and fulfill all degree requirements. A few programs require more than the minimum 120 credits.
- **Quality.** Candidates must achieve a cumulative GPA of 2.00 or higher, and must meet all higher standards for grades allowable in majors, minors, or certificates. The Mason cumulative GPA does not include transfer courses.
- **Upper Level.** Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.
- **University General Education.** Candidates must complete general education requirements as described for their catalog year. This includes satisfying the requirement of two semesters of English composition (ENGL 101 and ENGL 302) with a grade of C or better.
- **College/Department General Education.** Students must satisfy additional general education requirements for specific degree programs, as described in the college section of the catalog.
- **Major.** Students must satisfy all requirements for their major and degree program, as described in the college section of the catalog, and as detailed in the degree evaluation for their catalog year.

**English Composition Requirement**
Mason requires students to complete at least two semesters of English composition. Students enrolled in the Honors College or New Century College learning communities complete the English composition requirement as specified in those programs. All other students, unless they have received equivalent credit through transfer or proficiency exam, must enroll in ENGL 101 (or 100) upon admission and, after meeting its prerequisites, ENGL 302. Students must attain a minimum grade of C in composition courses to fulfill degree requirements.

**Writing-Intensive Course Requirement**

In addition to English composition and as part of the university’s commitment to literacy in all programs, at least one course in each major has been designated “writing intensive.” While other courses in the major may require written projects, writing-intensive courses emphasize the process of drafting and revision. Faculty members give constructive comments on drafts of at least one course project. Students then revise and resubmit, or use for future submissions. Writing-intensive courses are numbered 300 and above. See the description of each major for the specific courses that fulfill the requirement.

**Second Bachelor’s Degree**

A second bachelor’s degree may be earned, either concurrently or sequentially. To graduate with two degrees, students must present at least 30 Mason credits beyond those required by either degree alone. For sequential awarding of degrees, students must be readmitted for the second degree through the Office of Admissions and complete a minimum of 30 credit hours after that point to have fulfilled the residency requirement for that degree.

Students who are concurrently pursuing two bachelor’s degrees at Mason must present a detailed program of study for both degrees and obtain authorizing signatures from the chair or director of each degree program and the dean or director, if required by the college, school, or institute. Students may declare the second concurrent degree by completing the Declaration of Second Bachelor’s Degree section of the Change/Declaration of Academic Program Form. Students pursuing concurrent degrees should apply to graduate when both degrees are complete, or be prepared to meet the requirements noted above for sequential awarding of degrees.

**University Honors**

A student graduates with distinction from the university when at least 60 credits applied toward graduation are earned at Mason, and the student’s cumulative GPA is at least equal to one of three values: 3.90, summa cum laude; 3.70, magna cum laude; or 3.50, cum laude.

A student graduates with recognition from the university when between 45 and 59 (inclusive) credits applied toward graduation are earned at Mason, and the student’s cumulative GPA is at least 3.80.

**Graduate Policies**

**Graduate Council**

The Graduate Council is the governing body for all graduate academic policies and procedures. The council approves all new graduate programs; authorizes all graduate course work, policies, and degrees conferred by the university; and sets minimum standards for admission to and graduation from any graduate program. These are minimum standards that all programs must meet; individual programs may set and enforce higher standards. The Office of the Provost administers university graduate policies for the Graduate Council.

**Graduate Faculty**
The graduate faculty consists of all tenured and tenure-track faculty members and other faculty members appointed to the graduate faculty by the provost.

**Academic Programs**

At the graduate level, Mason offers certificates and master’s and doctoral degrees. There are also a number of combined bachelor’s and accelerated master’s degree programs for academically strong undergraduates with a commitment to research. For more information, see the Registration and Attendance section of this chapter.

**Student Status**

Students may access graduate classes and programs according to their status as nondegree or enrolled degree students. For more information, see the Admission chapter of this catalog.

**Full-Time Classification**

Graduate students are considered full time if they are enrolled in at least 9 graduate credits per semester or hold a full-time assistantship (20 hours a week) and are enrolled in at least 6 graduate credits per semester. Graduate students who are enrolled in dissertation credits (either 998 or 999) are considered full time if they are enrolled in at least 6 credits per semester, regardless of whether they hold an assistantship. Graduate students who have completed the minimum number of credits required by their degree program, including the minimum number of credits of 998 and 999 required by the university and their degree program, are considered full time if they are registered for at least 1 credit of 999 and their advisors and department chairs certify each semester that they are working full time on the dissertation. Note that different criteria for full-time status may apply for tuition, verification, loan deferral, and financial aid. Contact Student Accounts, the Registrar’s Office, and Student Financial Aid, respectively, for more information.

**Change from Nondegree Status**

A student admitted for graduate study in nondegree status may request a change to degree status within the same program. All admission requirements (as usually defined by the student’s program for degree status) must be met, including official transcripts and letters of recommendation. If the student intends to use credits earned in nondegree status toward a degree, the credits must be approved on the Graduate Transfer of Credit Request form. The credit must have been earned within six years prior to first enrollment as an admitted student in the specific certificate or degree program, and a minimum grade of B (3.00) must have been earned. There is a limit on the number of credits that can be transferred when changing from nondegree to degree status; please see the applicable degree program for specific information.

**Removing Provisional Qualifier**

For policies concerning students admitted provisionally, see the Graduate Admission Policies section in the Admission chapter of this catalog.

**Permission to Re-Enroll**

Permission to re-enroll in a program must be obtained by all master’s and doctoral degree students who have failed to enroll in at least 1 credit of course work for two or more consecutive semesters at Mason. A program may allow a student to petition to graduate under any catalog in effect while the student was enrolled. The final decision rests with the unit dean or director. Forms are available from the Office of the Registrar at registrar.gmu.edu/forms.
Voluntary Resignation from Graduate Academic Program

Degree-seeking students may officially resign from their academic program with the approval of their department or program chair and their dean. The Voluntary Resignation form must be approved by the student’s program and Student Accounts, then submitted to the Registrar’s Office for notation on the transcript. Resignations after the drop period will result in grades of W on the student’s transcript for that semester, and removal from any future registered courses. Program resignation is final. Students who have been granted a resignation will not be able to register for any courses unless admitted to another degree program or nondegree status in a different program.

Academic Advising

When a student is admitted to graduate study, the student is assigned a faculty advisor by the academic program responsible for the student’s program of study. Registration for newly admitted graduate students, as well as continuing students, begins with a visit to the student’s academic advisor. There, the student can obtain information about specific courses and degree requirements and develop an individual program of study. Progress in an approved program of study is the shared responsibility of the student and the advisor. The graduate student is responsible for compliance with the policies and procedures of the college, school, or institute, and all applicable departmental requirements that govern the individual program of study. Students should consult with their advisors before registration each semester.

Transfer of Credit

Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred into the program and applied to the certificate or degree. Transfer of credit requires the approval of the program director and dean or director of the school, college, or institute. They will determine whether the credit is eligible for transfer and applicable to the specific certificate or degree program. Note that credits accepted for transfer do not compute into any Mason GPA. Limits on the number of credits that can be transferred derive from the degree requirements given below.

Credit is usually considered for transfer at the student’s request at the time of initial registration as a degree-seeking student. Students must supply official transcripts. For transcripts from outside the United States, students must supply an official transcript evaluation and an official translation for transcripts not in English if these documents were not supplied in the admission process. Credit transfer requests from students who are admitted provisionally are not considered until they have fulfilled the conditions of their admission and the provisional qualifier has been removed from their records.

To be eligible for transfer credit, the credit must be graduate credit earned at another accredited university, earned at another institution and recommended for graduate credit in the American Council on Education guidebook, or earned at Mason while in a nondegree status or enrolled through extended studies. The credit must have been earned within six years prior to first enrollment as an admitted student in the specific certificate or degree program, and a minimum grade of B (3.00) must have been earned. The course must be applicable toward a degree at the institution offering the course. Extension and in-service courses that are not intended by the institution offering the courses to be applied to a degree program are not eligible for transfer credit to Mason. The credits cannot have been previously applied toward a degree at another institution or Mason; however, up to 3 credits previously applied to a degree program at another institution may be transferred into a certificate program at Mason.

Reduction of Credit

The number of credits required by a doctoral, master of fine arts, or master’s program of more than 39 credits may be reduced on the basis of a previously earned master’s degree. Reduction of credit requires the approval of the program director and the dean or director of the school, college, or institute. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced. Reduction of credit is limited to a maximum of 30 credits in a doctoral program, 20 in an MFA program, and 18 in the MA in psychology concentration in school psychology, and derive from the degree requirements given below.
Students requesting a reduction of credit must supply official transcripts. For transcripts from outside the United States, students must supply an official transcript evaluation and an official translation for transcripts not in English if these documents were not supplied in the admission process. Reduction-of-credit requests from students who are admitted provisionally are not considered until the students have fulfilled the conditions of their admission and had the provisional qualifier removed from their records.

Credits used in reduction of credit are not subject to time limits, and the credits must have been applied to a previous degree. All the other conditions given above for eligibility of transfer of credit apply also to reduction of credits.

Credit by External Exam

Degree credit for satisfactory completion of an external exam is limited to those exams and achievement levels specifically approved by the Graduate Council.

Credit from Other Institutions

Students enrolled in a degree program may take graduate courses at another accredited institution and apply these credits to a master’s or doctoral degree with prior approval. Approval must be secured in writing from the director of the graduate program and the dean or director of the school, college, or institute, and submitted to Mason’s Office of the Registrar before registering at the other institution. Upon completion of the course, students must arrange for an official transcript to be submitted to Mason so that the credits may be transferred into their Mason degree program. These credits are subject to all the other conditions given above for transfer credit, including limits on numbers of credits that can be taken elsewhere. Note that credits accepted for transfer do not compute into any Mason GPA. Permission to take a course elsewhere does not exempt a graduate student from satisfying the degree requirements given below.

Enrolled, degree-seeking graduate students may be eligible to take a limited number of courses through the Consortium of Universities of the Washington Metropolitan Area. See the University Consortium section. Credits earned through the consortium are considered resident, not transfer, credits, and are therefore not subject to transfer of credit conditions or limitations.

Graduate Academic Standards, Grades

University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation, or not fewer than two hours per week of laboratory work, throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. The university-wide system for grading graduate courses is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
<th>Graduate Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
<td>Satisfactory/Passing</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
<td>Satisfactory*/Passing</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
<td>Unsatisfactory/Passing</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
<td>Unsatisfactory/Failing</td>
</tr>
</tbody>
</table>
* Although a B- is a satisfactory grade for a course, students must maintain a 3.00 average in their degree program and present a 3.00 GPA on the courses listed on the graduation application.

**Academic Warning**

A notation of academic warning is entered on the transcript of a graduate student who receives a grade of C or F in a graduate course or while a grade of IN is in effect.

**Academic Termination**

Graduate students who are admitted provisionally may be terminated from their academic programs if they fail to meet the conditions of their admission within the time limits set at admission. Students admitted provisionally and nondegree graduate students may be terminated upon accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. Provisionally admitted students who accumulate 12 credits of unsatisfactory grades in undergraduate courses will also be terminated. (For students admitted provisionally, graduate and undergraduate grades are not combined in the calculation of unsatisfactory credits leading toward termination.) Although the university will make every effort to notify students when their performance reaches the threshold for termination, each student is responsible for knowing the termination criteria for non-degree students at Mason, for knowing when their grades have met the standard, and for initiating any appeal to their dean. Students may be terminated if they fail to achieve satisfactory progress toward their degree. A letter of termination is sent by the dean or director of the school, college, or institute, and notification of academic termination is affixed to the graduate student’s official record. Students who are terminated are no longer eligible to take courses in the program but may apply to another degree program or take courses in other programs through nondegree studies.

**Academic Dismissal**

A degree-seeking graduate student is dismissed after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. These are minimum standards of academic performance; some programs have higher standards. Although the university will make every effort to notify students when their performance reaches the threshold for dismissal, each student is responsible for knowing the dismissal criteria for degree-seeking graduate students at Mason, for knowing when their grades have met the standard, and for initiating any appeal to their dean. A student may also be dismissed for failure to meet other program requirements such as doctoral competence exams. The notation of academic dismissal is affixed to the graduate student’s official record. A student who is dismissed may not take additional course work at Mason.

**Graduate Requirements for Programs**

**Requirements for Graduate Certificates**

Candidates must satisfy all applicable university requirements and all requirements established by the graduate certificate program faculty. Individual departmental graduate certificate requirements are listed under their academic departments in this catalog. Note that the following are university minimum requirements; individual programs may have higher standards and/or more restrictive requirements.

- Graduate certificate programs require a minimum of 15 graduate credits.
- Only graduate courses may apply toward the graduate certificate.
- A maximum of 3 graduate credits taken at another institution can be transferred into a graduate certificate program. See Transfer of Credit section.
- Candidates must have a minimum GPA of 3.00 in course work presented on the certificate application, which may include no more than 3 credits of C. (Grades of C+, C-, and D do not apply to graduate courses.) The GPA calculation excludes transfer credits.
Certificate students are subject to graduate termination and dismissal policies.

Students in Master’s or Doctoral Programs also Pursuing Graduate Certificates

Admission
Students must be admitted to the master’s or doctoral program in degree status. They must also be admitted to the graduate certificate program at least one semester before completion of certificate requirements.

Course Work in Degree Status
More than half of the credits required for the certificate program must be taken in degree status for the master’s or doctoral degree.

Time Limits
The time limits coincide with the six-year time limit for master’s degrees or the six-year time limit for advancement to candidacy in a doctoral degree. Master’s and doctoral time limit rules apply.

Multiple Programs
Students may be enrolled in one or two graduate certificate programs while they pursue a master’s and/or doctoral degree. Students who have completed a graduate certificate may subsequently be approved to apply many of those credit hours to a master’s degree. Courses applying to the master’s or doctoral program may also apply to up to two graduate certificate programs. When such sharing of credits between graduate certificates and graduate degrees has occurred, a maximum of two graduate certificates may be conferred.

Students in Graduate Certificate Programs Only

Admission
Students must be admitted to the graduate certificate program.

Course Work After Admission
More than half of the credits required for the graduate certificate program must be taken after admission to that program.

Time Limits
The time limit for completion is six years from the date of admission to the graduate certificate program. The time limit is not extended because of an absence and subsequent re-enrollment into the graduate certificate program. Failure to meet the time limit or to secure an extension request may result in termination from the program.

Multiple Programs
Students may be admitted to two graduate certificate programs at the same time. The graduation application for each graduate certificate must include a minimum of 12 credits that apply only to that certificate and not to another.

Requirements for Master’s Degrees

Candidates must satisfy all applicable university degree requirements and all requirements established by the master’s program faculty. Individual departmental degree requirements are listed under the respective master’s programs in this catalog. Programs may impose more stringent requirements.

- Admission. Candidates must have been officially admitted into degree status.
- Credit Hours. Candidates must earn a minimum of 30 graduate credits.
- Credit Level. Only graduate courses may apply toward the degree.
- Institutional Credit. The majority of the credits applied to the degree must be earned at Mason or, in the case of programs offered through joint, cooperative, or consortial arrangements, at the participating institutions.
- Residency. A minimum of 18 credits must be taken in degree status, after admission to the degree program.
Thesis/Project Limits. A maximum of 6 credits of master’s thesis research (799) or master’s project may be applied to the degree.

Quality. Candidates must have a minimum GPA of 3.00 in course work presented on the degree application, which may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason nondegree studies credits not formally approved for the degree.)

Thesis Options

Requirements regarding a thesis vary with the degree program. A number of master’s programs offer both thesis and nonthesis options. The same quality of work is expected of students regardless of their chosen option. For more information, consult the section on degree requirements under each degree program.

Time Limit

Master’s degree students have six years from the time of first enrollment as a degree-seeking student to complete their degrees. Individual master’s programs may have stricter time limits, which are published in this catalog. International students attending in F-1 or J-1 status also have more restrictive time limits; contact the Office of International Programs and Services for information. Students who are given permission to re-enroll following an absence from Mason may not count the six-year time limit as beginning on the date of re-enrollment. Students who will not meet published time limits because of circumstances beyond their control may petition for an extension. Failure to meet the time limits or to secure approval of an extension request may result in termination from the program.

Master’s Thesis

When a thesis proposal has been approved by the appropriate department, the department chair sends the collegiate dean or director a copy of the thesis proposal, including the approval signatures of the master’s thesis committee members. Students may enroll in thesis research (799) at the beginning of the next semester. Students must register for a minimum of three credit hours in their first semester of 799. After that semester, students may enroll for one credit of 799 per semester and be considered full time, if the following requirement is met: the student, advisor and department chair must certify each semester that the student is working full time on the thesis. Please note: Master’s students must maintain continuous enrollment in 799 while writing and submitting a thesis. Graduation candidates who miss the library deadline for thesis submission, but do submit officially before the next semester begins, do not have to register for 799 in that next semester, but must stay active to graduate.

The master’s thesis committee is named by the candidate’s department chair, who designates a member of the graduate faculty from that department as the thesis committee chair. The committee is appointed after consulting with the candidate and advisor and consists of at least three people. Two must be members of the graduate faculty from the candidate’s department, while one may come from outside the department.

The thesis committee chair is primarily responsible for directing the candidate’s research and writing activities. The student is responsible for keeping all committee members informed of the scope, plan, and progress of the research as well as the writing of the thesis.

Students selecting the thesis option should obtain a copy of Mason’s Thesis, Dissertation, or Project Guide, which is available at thesis.gmu.edu. Students may register in 799 only after their thesis proposal has been submitted and approved as prescribed in the guide. Any student not in attendance at Mason who is preparing a thesis under the active supervision of a member of the faculty or wishes to take an exam must maintain continuous registration in 799 for at least 1 credit per semester.

Thesis Submission

The university has a policy on the dissemination of scholarly works created by graduate students. The Electronic Thesis and Dissertation (ETDs) program encourages masters-level graduate students to submit an electronic copy of their thesis for broad scholarly dissemination through the Mason Archival Repository Service (MARS). Student participation in the ETDs program is
strongly encouraged, but not mandatory. All students choosing to participate in this program will be required to sign the MARS
Author/Contributor Permission Agreement.

On or before the thesis deadline for any semester, the student will submit a complete (signed Signature Sheet through Curriculum
Vitae) 100% cotton copy of his or her thesis to the University Libraries along with a transmittal sheet. The student may also opt
to submit an electronic copy of his/her thesis. These submissions can be in Word, WordPerfect, or in portable document format
(PDF). Media formats (tiff, jpeg, png, wav, avi, mpeg, mov, rm, wmv, wma, etc.) for supporting materials will also be accepted.
Datasets may be accepted at the discretion of the libraries. The files may be submitted on CD, DVD, or USB memory device.
Please note that those students out of the ETDs program are required to submit two 100% cotton copies of their
thesis.

For degree conferral in a particular semester, the above materials must be submitted to the library by 5 p.m. on the last Friday of
classes in that semester. For specific deadlines and other information, go to registrar.gmu.edu.

Doctoral Students Also Pursuing a First Master's Degree

Requirements for master's degrees apply with the following exceptions. Residency derives from the doctoral degree
requirements. Time limit may derive from the doctoral requirements, although programs may reject course work that is not
sufficiently current. Students must be officially admitted to degree status in the master's program a full semester before the one in
which they will complete master's degree requirements, i.e. admitted in fall for graduation the following spring.

Requirements for Doctoral Degrees

Candidates must satisfy all applicable university degree requirements and all requirements established by the doctoral program
faculty. Departmental degree requirements are listed under the respective doctoral programs in this catalog. Programs may
impose more stringent requirements.

- **Admission.** Students must have been fully admitted into degree status.
- **Credit Hours.** Candidates must earn a minimum of 72 graduate credits, which may be reduced by a maximum of 30
  credits from a completed master’s degree or other suitable, approved transfer work.
- **Degree Credit.** The remaining 42 credits for students with a master’s degree may apply only to the doctoral degree and
  not to a second master’s degree.
- **Credit Level.** Only graduate courses may apply toward the degree.
- **Institutional Credit.** More than half of all credits applied to the doctoral degree (minimum 72) must be earned at
  Mason or in the case of programs offered through joint, cooperative, or consortium arrangements, at the participating
  institutions.
- **Residency.** More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the
degree program.
- **Candidacy.** Candidates must pass a written or oral doctoral candidacy (qualifying) exam, or both.
- **Dissertation.** Candidates must complete a minimum of 12 credits of doctoral proposal (998) and doctoral dissertation
  research (999), including at least three credits of 999. A maximum of 24 credits of 998 and 999 may be applied to the
degree.
- **Defense.** Candidates must pass a final public defense of the doctoral dissertation.
- **Quality.** Candidates must have a minimum GPA of 3.00 in course work presented on the degree application, which
  may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA
  calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the
degree.)

Time Limit
Doctoral students have six years from the time of first enrollment as a degree-seeking student to advance to candidacy. Students have five years from the time of advancement to candidacy to graduation. Individual doctoral programs may have stricter time limits, which are published in this catalog. International students attending in F-1 or J-1 status also have more restrictive limits; contact the Office of International Programs and Services for information. Students who are given permission to re-enroll following an absence from Mason may not count the time limits as beginning on the date of re-enrollment. Students who will not meet published time limits because of circumstances beyond their control may petition for an extension. Failure to meet the time limits or to secure approval of an extension request may result in termination from the program.

**Doctoral Research Skill Requirements**

Some doctoral degree programs require demonstration of proficiency in a research skill, including knowledge of the research literature in a foreign language, computer language, statistical methods, or a research tool specific to the discipline. Research skill requirements are included with the degree requirements for the specific doctoral degree. Where demonstration of research skills is required, certification that this requirement has been met must be completed for advancement to candidacy.

**Program of Study**

Usually before the end of the second year of graduate study but no later than consideration for advancement to candidacy, doctoral students must submit a program of study for approval by the dean or director of the college, school, or institute. The program of study must include major courses and supporting courses to be completed, research skills required, subject areas to be covered by the candidacy exam, and a proposed date for the candidacy exam. Program of Study Forms are available from each program’s doctoral coordinator. Any changes in the programs of study must be documented with an amended Program of Study Form.

**Advancement to Candidacy**

Advancement to candidacy implies that a doctoral student has demonstrated both a breadth and a depth of knowledge in the field of study and is capable of exploring problems on the boundaries of knowledge, and has identified a research area that is likely to lead to a successful dissertation. The candidacy exam includes a written part and may include an oral part, depending on the particular doctoral program. Doctoral students should consult the degree requirements for each doctoral program to determine whether an oral portion is required, whether it is judged separately or with the written portion, the number of times a failed candidacy exam may be repeated and any associated time limits, and any time limits for attempting the candidacy exam.

Before doctoral students may be advanced to candidacy by the unit dean or director, they should have completed all course work required by the program faculty, been certified in all doctoral research skills required, passed the candidacy exam, and been recommended by the doctoral supervisory committee or program coordinator. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for 999 Dissertation Research.

**Dissertation Committee**

By the time a doctoral student is advanced to candidacy, the dean or director of the school, college, or institute appoints a dissertation committee upon recommendation of the program director. Students work collaboratively with the program director and faculty to form the dissertation committee, with the understanding that some areas of research may be impossible to support due to available faculty expertise. Program personnel will facilitate the formation of the dissertation committee to the extent possible, but there can be no guarantee of successful formation. The committee consists of a dissertation director, normally a graduate faculty member (see the Graduate Faculty section in this chapter) from the department of the student’s field of study and at least two other members of the graduate faculty, one of whom must be from outside the student’s local academic unit (school, college, institute, or department). Additional members may be appointed who are not members of the graduate faculty or are from outside the university.
Student-initiated changes in the composition of the dissertation committee may occur only with the approval of the dean or director in consultation with the committee. Such changes may be made for extenuating circumstances only. Faculty may resign from a dissertation committee with appropriate notice by submitting a written resignation.

**Dissertation Registration (998, 999)**

Students working on dissertation research (999) must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the minimum number of credits of 998 and 999 required by the university and their degree program. Then, they must register for 1 credit of 999 until the dissertation is complete and has been officially submitted to the library. See the Full-Time Classification section for more information.

All registration for doctoral dissertation research (999) must be planned with the dissertation director and approved by the dean or director of the school, college, or institute. Dissertation research (999) is open only to doctoral students who have advanced to candidacy. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer. Individual doctoral programs may require continuous registration beginning with 998. Graduation candidates who miss the library deadline for dissertation submission, but do submit officially before the next semester begins, do not have to register for 999 in that next semester, but must stay active to graduate.

It is the student’s responsibility to complete registration for dissertation proposal (998) or research (999) prior to the first day of classes for the semester. If this date is missed, students must still enroll in these courses via Add or Late Schedule Adjustment procedures and are subject to Late Registration fees. Failing to register on time in a particular semester does not alter the requirement for continuous registration in 999.

**Doctoral Dissertation**

A dissertation is required for the doctor of philosophy degree and most professional doctoral degrees. The dissertation is a written piece of original thinking that demonstrates doctoral candidates’ mastery of subject matter, methodologies, and conceptual foundations in their chosen field of study. This is generally achieved through consideration of a problem on the boundaries of knowledge in the discipline.

The director of the dissertation committee is primarily responsible for directing the doctoral candidate’s research and guiding the preparation of the written dissertation. After the dissertation committee is appointed, the student should begin discussions with the director to define a suitable problem for the dissertation. Before the student may enroll in doctoral dissertation research (999), the dissertation proposal must be approved by the dissertation committee and evidence of approval sent to the unit dean or director for approval. Before that time, the student may enroll in proposal research (998).

Guidelines for the content and general format of doctoral dissertations are in the Thesis, Dissertation, or Project Guide, which is available at [thesis.gmu.edu](https://thesis.gmu.edu). Consult a doctoral coordinator to determine which additional reference manuals are suitable.

**Doctoral Defense**

As soon as all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense is given by the doctoral dissertation committee, department or program chair, and relevant dean or director of the school, college, or institute. Notice of a defense must be circulated to the university community two weeks before the defense date. The public defense should demonstrate the candidate’s maturity of judgment and intellectual command of the chosen branches of the field of study.

At the close of the final defense, the dissertation committee makes final judgments for approving the dissertation. The doctoral candidate is responsible for making all required changes promptly, submitting the original and required copies, and obtaining signatures. Final approval for the dissertation is given by the doctoral dissertation committee, department or program chair, and the relevant dean or director of the school, college, or institute, all of whom must sign the final copy.
For a dissertation to be approved, all members of the committee must sign. If a committee member refuses to do so, the student or any member of the committee may petition the unit dean or director for a review and ruling. The dean or director may seek the advice of outside reviewers to provide an assessment of the work. The final decision is that of the dean or director, and is not subject to appeal.

**Dissertation Submission and Fees**

The university has a policy on the dissemination of scholarly works created by graduate students. The Electronic Thesis and Dissertation (ETDs) program encourages doctoral-level graduate students to submit an electronic copy of their dissertation for broad scholarly dissemination through the Mason Archival Repository Service (MARS). Student participation in the ETDs program is strongly encouraged, but not mandatory. All students choosing to participate in this program will be required to sign the MARS Author/Contributor Permission Agreement.

On or before the dissertation deadline for any semester, the student will submit a complete (signed Signature Sheet through Curriculum Vitae) 100% cotton copy of his or her dissertation to the University Libraries along with a transmittal sheet. The student will also submit an electronic copy of his or her dissertation. These submissions can be in Word, WordPerfect, or in portable document format (PDF). Media formats (tiff, jpeg, png, wav, avi, mpeg, mov, rm, wmv, wma, etc.) will be accepted. Datasets may be accepted at the discretion of the libraries. The files may be turned in on CD, DVD, or USB memory device. Please note that those students opting out of the ETDs program are required to submit two 100% cotton copies of their dissertation.

Submission of an additional PDF on CD of the dissertation to University Microfilms International (ProQuest) is required; a fee of either $55 or $150 (depending on publishing option chosen) is paid by the student for this process. Submission of a completed Survey of Earned Doctorates is also required. All copies of the dissertation must be submitted and all fees paid before the doctoral degree is awarded.

For degree conferral in a particular semester, the above materials must be submitted to the library by 5 p.m. on the last Friday of classes in that semester. (For specific deadlines and more information, go to registrar.gmu.edu.) To be included in Mason’s published commencement program, doctoral students must submit materials to the library by the commencement program deadline.

**University Dissertation and Thesis Services**

University Dissertation and Thesis Services (UDTS) facilitates completion and submission of dissertations, theses, and graduate-level projects. The program assists Mason students in all stages of production. The UDTS website, thesis.gmu.edu, provides students with useful tools, including downloadable templates of necessary elements, forms required for the submission process, and links to related websites. Students completing a thesis or dissertation are required to complete a format review. UDTS is located in Fenwick Library, Special Collections and Archives, Wing 2C. For more information, contact the university dissertation and thesis coordinator at 703-993-2222.
Student Rights and Responsibilities

- Policies and Procedures Affecting All Students
- Official Communication with Students
- Student Requests for Academic Actions
- Privacy of Student Records
- Academic Assessment
- Honor System and Code
- Human Subjects Research
- Animal Use in Research
- Student Work, Intellectual Property
- Conduct within the University Community
- Student Health Services
- Drug and Alcohol Policy
- General Policies to include Equal Opportunity, Non Discrimination, Sexual Harassment, Reasonable Accommodation, Responsible Use of Computing, Parking Policy, Sexual Assault, Stalking and Other Regulations

Policies and Procedures Affecting All Students

Knowledge of University Policies

Each student is responsible for knowing Mason’s rules, regulations, requirements, and academic policies. This catalog is the normal repository of policy statements, but corrections, changes, or interpretations can be promulgated by other means, including electronic publication.

When the university or one of its academic units changes course requirements, grading procedures, or criteria for acceptance into particular programs, academic standing, or graduation, the changes apply to all students enrolled at the time of implementation of the change and thereafter.

Students have certain choices regarding the set of degree requirements under which they graduate, as detailed in the Catalog Requirements for Degrees section of this catalog. The Special Collections and Archives section of the Fenwick Library has copies of all previous catalogs. They may not be checked out, but may be photocopied. Any student in doubt about an academic matter should consult a faculty advisor or dean.

Students are subject to the university’s stated policies regarding patents and copyrights. These policies are available at www.gmu.edu/research/OSP/Policies.html.

Official Communication with Students

Web: mail.gmu.edu

Mason uses electronic mail to provide official information to students. Examples include notices from the library, notices about academic standing, financial aid information, class materials, assignments, questions, and instructor feedback. Students are responsible for the content of university communication sent to their Mason e-mail account and are required to activate that account and check it regularly. Students are also expected to maintain an active and accurate mailing address in order to receive communications sent through the United States Postal Service.

Student Requests for Academic Actions
All requests for academic actions, such as special permissions or exceptions to published academic regulations, must be submitted to the head of the unit in which the student’s program is housed, for example, the department chair, institute director, or school or college dean. Forms and instructions on how to initiate an academic action are available in the academic unit and on the unit’s web site. For students who have not yet declared a major, the academic actions process is executed in the Office of Student Academic Affairs, Johnson Center, Room 245. Students will be informed of the average wait time for decisions on academic actions undertaken within their units. Those who need assistance with the academic actions process may consult their academic advisor, or they may be directed to the university ombudsman.

**Appeals of Academic Procedures**

Students have the right to appeal decisions regarding requests for academic actions. The appeals process begins in the academic unit. Each college, school, and institute at Mason has a written statement of that unit's appeal process on file in the dean or director's office. Students who feel the appeals process was conducted unfairly by a college or school may appeal to the Provost’s Office. All appeals must be in writing, and they must demonstrate that the student has exhausted all options within the academic unit. Undergraduate students initiate appeals of unit decisions with the Associate Provost for Undergraduate Education. Graduate students initiate appeals of unit decisions with the Associate Provost for Graduate Education. The Provost's Office does not consider grade appeals or appeals of Honor Committee decisions.

The Provost’s Office may refer cases to the University Academic Appeals Committee. The committee consists of five faculty members, including at least one member of the Faculty Senate and the provost (or designee), who serves *ex officio*, in a nonvoting capacity. The committee hears only those cases where procedural irregularities or a questionable application of university policies is demonstrable, or when the provost or the committee deems the case relevant to the application of university-wide policies. The burden of proof rests with the student, who must provide clear and convincing documentation to support the contention that the decision was unfair based on the criteria stated above. The committee’s decision is final. The University Academic Appeals Committee is not charged to hear grade appeals or appeals of Honor Committee decisions.

The Provost’s Office is responsible for maintaining appeals records, determining whether students have just cause, and ensuring that complete documentation is available for all committee members. The committee communicates its decision to the student, the relevant unit, and the provost.

**Office of the Ombudsman**

Johnson Center, Room 245  
Phone: 703-993-3006  
E-mail: ombuds@gmu.edu  
Web: ombudsman.gmu.edu

**Administration:**  
Dolores Gomez-Moran, University Ombudsman

The Office of the Ombudsman is a neutral, independent, informal, and confidential resource to facilitate fair, equitable, and expeditious resolution of university-related concerns and problems raised by students. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests, but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves graduate and undergraduate students at the university.

**Privacy of Student Records**

Office of the Registrar  
Web: registrar.gmu.edu/privacy/privacy.html
Each year, Mason informs students of the Family Educational Rights and Privacy Act (FERPA) of 1974. The university intends to comply fully with this act, which protects the privacy of education records, establishes the right of students to inspect and review their education records, and provides guidelines for amending inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Policy Compliance Office (U.S. Department of Education) concerning alleged failures by Mason to comply with the act.

The Notification of Rights under FERPA and the Public Notice Designating Directory Information detail students’ rights and the procedures implemented by the university to comply with FERPA.

FERPA is a federal law that affords students certain rights with respect to their education records. Specifically, it affords students the right to: (1) inspect and review their education record; (2) request the amendment of inaccurate or misleading records; (3) consent to disclosure of personally identifiable information contained in their education record; and (4) to file a complaint with the Family Policy Compliance Office of the U.S. Department of Education concerning alleged failures of the University to comply with the act. George Mason University strives to fully comply with this law by protecting the privacy of student records and judiciously evaluating requests for release of information from those records. FERPA authorizes the release of “Directory Information” without the student’s prior consent under certain conditions, which are set forth in the act. George Mason University has defined its “Directory Information” in accordance with the law. Please visit the Registrar’s Office web site at registrar.gmu.edu for additional information about student privacy and FERPA.

**Public Notice Designating Directory Information**

George Mason University designates the following as public or “directory information.” Such information may be disclosed by the university without the student’s prior consent under the conditions set forth in the Family Educational Rights and Privacy Act of 1974 (FERPA).

**Directory Information:** Student name, address, telephone numbers(s), e-mail address, date and place of birth, photographs, major, dates of attendance, enrollment status (full time, part time), class, previous institutions, major field of study, awards, honors (including Dean’s List), degrees conferred including dates, past and present participation in officially recognized sports and activities, and physical factors (height and weight of athletes).

*Note:* Directory information is information that Mason may disclose, but it is not required to do so. It is Mason’s policy to refrain from actively disclosing addresses, telephone numbers, and dates of birth; however, the university routinely verifies this information. Mason does not disclose social security numbers, personal identification numbers, photographs, grades, grade point averages, class schedules, academic actions nor the number of credits enrolled in or earned unless the student has signed a consent form.

Currently enrolled students may withhold disclosure of directory information under FERPA. To withhold disclosure, students must present a photo ID in person at the Registrar’s Office, Room 1 N. Chesapeake, and complete the Request to Prevent Disclosure of Directory Information Form. The form may be submitted at any time throughout the year and will immediately affect prospective disclosures. George Mason University assumes that failure on the part of any student to specifically request the withholding of a category of directory information indicates individual approval for disclosure. Former students may not place a new request for nondisclosure of directory information on their education records; however, they may request its removal.

Telephone Directory: Prevents the listing of student name, address, telephone number(s), major, and e-mail address in the George Mason University Telephone Directory.

Requests to withhold your information from the campus directory must be submitted to the Registrar’s Office by 5 p.m. on Friday of the first week of classes of the semester to have information withheld in time for the publication of that academic year’s George Mason University Telephone Directory.

Confidential (Private): Prevents the disclosure of all directory information including name, address, telephone number(s), e-mail address, date and place of birth, photographs, major, dates of attendance, enrollment status (full time, part time), class, previous institutions, major field of study, awards, honors (including Dean’s List), degrees conferred (including dates), past and present participation in officially recognized sports and activities, and physical factors (height and weight of athletes).
Note: Confidential status does not convey a right to be anonymous in the classroom or to impede routine classroom communication and interactions. Students with confidential status should expect to be identified in class by name and to have their Mason email address used for class purposes.

Students who elect this category must conduct all university business either in person with a photo ID card or from a remote location with an original notarized request. Such students’ names will be published in the commencement program unless the students request exclusion in writing. Students in this category are eligible to use interactive web and other electronic systems, such as Patriot Web, for transactions (including registration) which are protected by a secured login.

**Academic Assessment**

All academic programs at Mason (including the University General Education program) have student learning outcomes that are assessed periodically. Student work in various courses may be used for such an assessment. Student anonymity is assured and grades will not be affected. At any time, students may contact the Office of Institutional Assessment at assessment@gmu.edu with questions, concerns, and comments about the use of academic work in assessment activities.

Students may be called on from time to time to participate in focus groups, complete questionnaires, or contribute in some other way to the ongoing assessment process. At any time, students may contact the Office of Institutional Assessment with concerns, comments, and recommendations about their educational experiences at Mason. Assessment is vital to the continuous improvement of the university, and student input forms an important part of the process.

To find out more about the learning goals and assessment activities of a specific program, whether curricular or extracurricular, go to assessment.gmu.edu and click on Academic Program Review.

**Student Identification Card**

After registering, each student should obtain a university photo identification card. It must be presented to use library services and is required for admission to university events and when using facilities after normal operating hours. It is not transferable and is validated each semester after payment is made for classes. For more information, call the Photo ID Office at 703-993-1004, or go to the Photo ID Office section in the General Policies page of this catalog.

**Change of Status, Address**

Each student is required to provide Mason with current contact and identifying information, including permanent and local addresses, telephone numbers, and legal name. Each student must also maintain the university e-mail account assigned at the time of admission. Students are responsible for official communications directed to Mason e-mail accounts. For more information, go to mail.gmu.edu.

Addresses should be updated over the Internet using Patriot Web. Name and Social Security number changes require official documentation and must be processed in person at the Office of the Registrar or with the original copy of a notarized request.

**Honor System and Code**

Web: academicintegrity.gmu.edu

Mason shares in the tradition of an honor system that has existed in Virginia since 1842. The code is an integral part of university life. On the application for admission, students sign a statement agreeing to conform to and uphold the Honor Code. Students are responsible, therefore, for understanding the code’s provisions. In the spirit of the code, a student’s word is a declaration of good faith acceptable as truth in all academic matters. Cheating and attempted cheating, plagiarism, lying, and stealing of academic work and related materials constitute Honor Code violations. To maintain an academic community according to these standards, students and faculty members must report all alleged violations to the Honor Committee. Any student who has knowledge of, but does not report, a violation may be accused of lying under the Honor Code.
The Honor Committee is independent of the student government and the university administration. It is composed of students selected by the student body, and it has the primary duty of espousing the values of the Honor Code. Its secondary function is to sit as a hearing committee on all alleged violations of the code.

At the beginning of each semester, faculty members have the responsibility of explaining to their classes their policy regarding the Honor Code. They must also explain the extent to which aid, if any, is permitted on academic work.

The complete Honor Code is as follows:

To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the university community, have set forth this honor code: Student members of the George Mason University community pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.

Honor Committee

The Honor Committee is a group of Mason students selected to promote academic integrity as a core value for our university community. Members of the committee also serve on hearing panels established to investigate and resolve alleged violations of the code. Mason's School of Law has an Honor Committee that is independent from the rest of the university's Honor Committee.

Membership will be limited to 100 members who apply for membership and are confirmed at an election held each spring. Members appointed by the chair of the Honor Committee may serve provisionally pending the next election. Undergraduate members must have no Honor Code violations, maintain a cumulative GPA of 2.30, be in good academic standing, and successfully complete the training and orientation program. Graduate members must meet all of the requirements above with the exception of maintaining a cumulative GPA of 3.00. If more than 100 students apply for membership, a candidate list will be maintained according to the date of the application, and appointments will be made as vacancies occur. The term of office extends from initial appointment until final graduation, provided the member is not found responsible for an Honor Code violation, serves on at least two hearing panels each semester, remains in good academic standing, and maintains the required GPA.

A chair and vice chair will be elected in April of each year by the members of the committee. The term of office will be one year. A faculty advisor, chosen jointly by the chair of the committee and the vice president for university life, will provide administrative assistance for committee business.

Student Responsibilities

Students should request an explanation of any aspect of the professor’s policies regarding the Honor Code that they do not fully understand. They also have an obligation not only to follow the code themselves, but also to encourage respect among their fellow students for the provisions of the code. This includes an obligation to report violations by other students to the Honor Committee.

Faculty Responsibilities

Faculty members are responsible for maintaining the integrity of the learning and testing process. They should explain at the beginning of each semester what would be considered a violation of academic integrity in their courses. Special attention should be given to the subject of plagiarism. Faculty members may actively proctor exams in situations they believe warrant such action.

Procedures for Reporting Violations
Suspected violations should be reported to the Honor Committee in a timely manner using forms provided by the Honor Committee. The Honor Committee will promptly notify the involved students in writing. Those students will meet with a representative of the Honor Committee to review the information and arrange for resolution of the matter.

**Hearing Panels**

When a student disputes an allegation, a five-member panel of Honor Committee members, appointed by the chair of the Honor Committee, will meet with both the student and the person(s) reporting the alleged offense. Each side will present information, and the panel will determine whether clear and convincing evidence of a violation has been presented. At least four of the five panel members must judge that the evidence proves responsibility for the offense. If the student is found responsible, a sanction or sanctions will be determined by majority vote of the panel.

**Counsel**

The hearing panel will have a faculty member present during the hearing to offer assistance when requested by the chair of the panel. All other parties may have an advisor present if that advisor is a member of the George Mason University student body, other than a student from the School of Law.

**Sanctions**

The hearing panel may impose oral and written reprimands and other such nonacademic sanctions as it deems proportionate to the offense. It can recommend sanctions to the course professor that involve reduced grades. Recommendations for nonacademic suspension and nonacademic dismissal are forwarded to the provost’s delegate. In determining sanctions, panel members should keep in mind the nonpunitive educational purpose of the Honor Code process.

**Appeals**

Appeals of honor committee decisions must be submitted in writing within seven business days of the hearing. Appeals can be granted only on the basis of new evidence, procedural irregularity, or other grounds of sufficient gravity to call into serious doubt the original hearing panel’s decision. The decision to accept or deny the appeal will be made by three Honor Committee members who have had no prior contact with the case. In the event that a faculty member does not elect to follow the Honor Committee’s recommended sanction, students may appeal the faculty member’s action to the Academic Appeals Committee, via the Provost’s Office. The decision of this committee is final.

**Amendments**

The Honor Committee, by majority vote, may approve proposed amendments to the Honor Code. The proposed amendments will be submitted to the student population at the next spring election, and they must be approved for implementation by a two-thirds majority of those voting.

**Human Subjects Research**

Please see Academic Policies Section

**Animal Use in Research**

Please see Academic Policies Section

**Student Work, Intellectual Property**
Copyrightable works, including dissertations and patentable works developed in connection with course work by students who are not Mason employees, are deemed to belong to the student. Mason may, however, claim copyright ownership of a work or ownership of a patentable invention when extraordinary use of university facilities, personnel, or resources is made in the development of the materials or invention, especially when unrelated to course work. Ownership and disposition of intellectual property developed by students while employed by the university, including undergraduates and graduate research and teaching assistants, is governed by university policies generally applicable to employees.

**Conduct within the University Community**

Students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university’s function as an educational institution. The Code of Virginia (Section 23-9.2:3) confers on the university the responsibility for maintaining order within the university and the right to exclude those who are disruptive.

The Office of Judicial Affairs is administratively responsible for supervising student conduct on campus. Questions regarding student conduct should be directed to Judicial Affairs, SUB I, Room 302, 703-993-2884, judicialaffairs.gmu.edu.

**Student Health Services**

Student Health Services provides high-quality health care to all currently enrolled students. There is no evaluation fee, but there are minimal charges for most tests and procedures. The staff includes physicians, nurse practitioners, registered nurses, a medical technologist, and various levels of support personnel. Appointments are required for nonemergency services.

For more information, please visit shs.gmu.edu.

Student health offices are located on the Fairfax, Prince William, and Arlington Campuses. Contact information is as follows:

**Fairfax Campus:** SUB I, Room 214, 703-993-2831

**Prince William Campus:** Occoquan Building, Room 229, 703-993-8374

**Arlington Campus:** 3330 Washington Boulevard, Room 150 F and I, 703-993-4863

**Immunization Requirements**

Immunization policies are determined by legislation enacted by the Virginia General Assembly and recommendations from the Advisory Committee on Immunization Practice, the Centers for Disease Control and Prevention (CDC), and the American College Health Association. All students born after December 31, 1956, are required to provide documented evidence that they have been immunized against certain communicable diseases.

The **required immunizations** are as follows:

- Two doses each of measles, mumps, rubella, after 1967 or the combination MMR, (after 1971, with first dose given after first birthday) or a laboratory report of a titer documenting positive immunity is acceptable.
- Primary tetanus, diphtheria, and pertussis series, with last tetanus and diphtheria booster within the past 10 years. Students requiring a decennial booster should receive Tdap.
- All students living in the residence hall shall be immunized against meningococcal disease. Students not living in residence halls may choose to be vaccinated to reduce their risk of meningococcal disease. Students may sign a waiver stating that they have received and reviewed information on meningococcal disease and the availability and effectiveness of the vaccine but have chosen not to be vaccinated. If the student is younger than 18 years old, the waiver must also be signed by a parent or other legal representative.
- Students shall be immunized against hepatitis B disease, or they must sign a waiver stating that they have received and reviewed information on hepatitis B disease and the availability and effectiveness of the vaccine but have chosen not to be vaccinated. If the student is younger than 18 years old, the waiver must also be signed by a parent or other legal representative.
• Tuberculosis (TB) screening is required for all students as defined by the CDC and the Virginia Department of Health. TB screening must have been completed in the United States, within the past 12 months. For more information, please visit shs.gmu.edu/immunizations.

The Immunization Record must be submitted by October 1 for fall entrance and March 1 for spring entrance. If the student’s completed immunization records are not submitted by the due date, his or her student account will be placed on hold and he or she could be charged an immunization record late fee. Records can be sent to George Mason University, SUB I, Room 214, 4400 University Drive, MS 2D3, Fairfax, Virginia 22030. Immunization records can also be faxed to 703-993-4053. The immunization record is included as a tear-out form in the orientation booklets that are mailed to all new undergraduate and transfer students when their application for admission to the university has been approved. For more information visit shs.gmu.edu/immunizations or call 703-993-2836 or 703-993-2135. E-mail questions to immunize@gmu.edu. Immunization records will not be accepted by email.

Drug and Alcohol Policy
The abuse of drugs and alcohol by members of the campus community is not compatible with the goals of the university. Mason attempts to prepare individuals to act responsibly by defining standards of behavior and providing educational programs to create an awareness of drug- and alcohol-related problems. Those in need of assistance in dealing with drug and alcohol-related problems are encouraged to seek the confidential help of the university’s Office of Alcohol, Drug, and Health Education, adhe.gmu.edu.

Drugs
• Use or possession of illegal drugs and drug paraphernalia is prohibited on all Mason campuses. Violation of this community standard will be considered a serious offense. Implementation of this policy will be in accord with established university procedures as contained in the University Judicial Code.
• The University Police will enforce all applicable local, state, and federal laws in accord with established standing orders, procedures, and guidelines.
• A university judicial review of all reports of drug offenses will be held. Action under the University Judicial Code will neither prejudice nor be prejudiced by action taken in the criminal justice system.
• Any student found responsible for a violation of law or regulation involving illegal drugs may, at the discretion of the hearing officer, be required to undergo an evaluation by the university’s Office of Alcohol, Drug, and Health Education.
• The housing status of a resident student found responsible for a drug regulation will be determined by the hearing officer. Guests and visitors found responsible of violating a campus drug regulation while in a residence hall will be issued a trespass order prohibiting their presence in any and all residential buildings on the university’s campuses. This trespass order will be in effect for a minimum of one calendar year. Residential students may be held accountable for the behavior of their guests as it relates to drug regulations.
• The standard sanction for a student’s first violation involving possession or use of marijuana or possession of drug paraphernalia will be suspension from the university for a minimum of one academic semester.
• Any student found responsible for a violation involving the sale or the possession of an illegal substance with intent to distribute will be permanently separated from the university.
• Any student found responsible for use or possession of an illegal drug other than marijuana will be suspended from the university for a minimum of one year. The suspended student must provide evidence of successful participation in a drug treatment program prior to reinstatement.

Alcohol
• The possession and consumption of alcoholic beverages is limited to those locations and circumstances authorized by university policy.
• Alcohol possession or consumption is prohibited in Presidents Park, designated first-year residential areas in University Commons, Dominion, Commonwealth, and Chesapeake Halls, and all designated Healthy Living floors.
• Students 21 years of age or older are permitted to possess alcohol in TAP (townhouses and apartments), Chesapeake, Liberty Square, Potomac Heights, and non-first-year areas in University Commons, Dominion, Commonwealth, and Chesapeake Halls. (Residents of legal drinking age may possess and store alcohol in quantities that reasonably can be considered for personal consumption (refer to the Guide to P.R.I.D.E. for further information).

• No alcoholic beverages may be consumed in public areas of residence halls, which includes, but is not limited to, hallways, study rooms, and lounges.

• Violations of this policy by students will be adjudicated through the Office of Judicial Affairs and, contingent on police involvement, the General District Court. Violations of this policy by nonstudents will be adjudicated through the General District Court System.

• Sanctions imposed will be designed to offer assistance in overcoming an identified challenge as it relates to a specific incident that involved alcohol consumption. While the purpose of the sanction will be educational and remedial, it may be appropriate to remove the student from campus housing or the university.

• The university will encourage parental involvement whenever there is a repeat offense or the first offense indicates a serious problem. This involvement will be in accord with the provisions of the Family Education Rights and Privacy Act.
General Policies

- Conduct within the University Community

Conduct within the University Community
For policies on Conduct within the University Community please see Student Rights and Responsibilities.

Equal Opportunity and Nondiscrimination Policy
George Mason University is committed to providing equal opportunity and an educational and work environment free from any discrimination on the basis of race, color, religion, national origin, sex, disability, veteran status, sexual orientation, or age. Mason shall adhere to all applicable state and federal equal opportunity/affirmative action statutes and regulations.

The university is dedicated to ensuring access, fairness, and equity for minorities, women, individuals with disabilities, and veterans (as covered by law) in its educational programs, related activities, and employment. Mason shall thus maintain a continuing affirmative action program to identify and eliminate discriminatory practices in every phase of university operations.

Retaliation against an individual who has raised claims of illegal discrimination or cooperated with an investigation of such claims is prohibited.

Students and employees should bring questions or concerns to the attention of the Office of Equity and Diversity Services, Mason Hall, Suite D105, 703-993-8730. The Equal Opportunity/Affirmative Action Grievance Procedure lists the various ways to file a complaint. Grievance procedures can be found at [www.gmu.edu/equity/policies_grievance.htm](http://www.gmu.edu/equity/policies_grievance.htm).

Sexual Harassment Policy

It is the policy of the university to provide an academic and work environment free from sexual harassment. Sexual harassment is contrary to the standards and mission of the university. Sexual harassment is illegal and will not be tolerated. Each member of the university community has a responsibility to maintain an academic and work environment free from sexual harassment. The university will take whatever action is necessary to prevent, stop, correct, or discipline harassing behavior. Same-sex sexual harassment violates this policy and is subject to discipline under the same procedures.*

Sexual harassment is defined by law as unwelcome sexual advances, requests for sexual favors, and other verbal, physical, or other form of expressive communication of a sexual nature when submission to or rejection of such conduct is used as a basis for employment or academic decisions, or such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance, or creating an intimidating, hostile, or sexually offensive work or academic environment. Examples of behavior that may be considered sexual harassment include, but are not limited to, the following:

- Sexual assault
- Explicitly or implicitly requiring submission to sexual advances as a condition or term of education or employment, i.e., grades, employment, promotion, letters of recommendation, or other privileges
- Repetitive sexual comments, questions, jokes, gestures, or other forms of sexually explicit expression

Any student, faculty member, or staff employee who believes he or she is the victim of sexual harassment should report the incident promptly in the manner most comfortable to him or her. The Equal Opportunity/Affirmative Action Grievance Procedure lists the various ways to file a complaint. Grievance procedures can be found at [www.gmu.edu/equity/policies_grievance.htm](http://www.gmu.edu/equity/policies_grievance.htm).
Procedure lists the various ways to file a complaint. Grievance procedures can be found at www.gmu.edu/equity/policies_grievance.htm.

Retaliation against an individual who has raised claims of illegal discrimination or cooperated with an investigation of such claims is prohibited.

Any employee who becomes aware of sexual harassment or other potentially discriminatory behavior must contact the Office of Equity and Diversity Services.

The Office for Equity and Diversity Services is responsible for administering and monitoring Mason’s equal opportunity/affirmative action policies and procedures. Inquiries about or complaints alleging violation of the university’s equal opportunity/affirmative action policies should be directed to the Office of Equity and Diversity Services, Mason Hall, Suite D105, 4400 University Drive, MS 2C2, Fairfax, Virginia 22030. Phone: 703-993-8730; TTY: 703-993-8787.

*Note:* Sexual harassment does not include verbal expression or written material that is relevant to course subject matter or curriculum, and this policy shall not abridge academic freedom or the university’s educational mission.

### Nondiscrimination and Reasonable Accommodations on the Basis of Disability

The university is committed to providing equal access to employment and educational opportunities for people with disabilities. Mason recognizes that individuals with disabilities may need reasonable accommodations to have equally effective opportunities to participate in or benefit from the university educational programs, services, and activities, and have equal employment opportunities. The university will adhere to all applicable federal and state laws, regulations, and guidelines with respect to providing reasonable accommodations as necessary to afford equal employment opportunity and equal access to programs for qualified people with disabilities. Applicants for admission and students requesting reasonable accommodations for a disability should call the Office of Disability Services at 703-993-2474. Employees and applicants for employment should call the Office of Equity and Diversity Services at 703-993-8730 or 703-993-8787 (TTY). Questions regarding reasonable accommodations and discrimination on the basis of disability should be directed to the Americans with Disabilities Act (ADA) coordinator in the Office of Equity and Diversity Services.

### Drug and Alcohol Policy

The abuse of drugs and alcohol by members of the campus community is not compatible with the goals of the university. Mason attempts to prepare individuals to act responsibly by defining standards of behavior and providing educational programs to create an awareness of drug- and alcohol-related problems. Those in need of assistance in dealing with drug and alcohol related problems are encouraged to seek the confidential help of the university’s Office of Alcohol, Drug, and Health Education, adhe.gmu.edu.

### Notice to All State Employees

The federal Drug-Free Workplace Act requires the university to inform all employees of the state that the unlawful manufacture, distribution, possession, or use of a controlled substance is prohibited in the workplace. The workplace consists of any state-owned, controlled, or leased property, or the site where state work is performed. Any employee who violates this prohibition will be subject to disciplinary action up to and including discharge and, at the discretion of management, will be required to satisfactorily participate in a drug abuse assistance or rehabilitation program. Employees must abide by the terms of this prohibition as a condition of employment and must notify their supervisor no later than five days after conviction of any criminal drug statute conviction occurring in the workplace.

### Commonwealth Policies on Alcohol, Drug Use

Those who purchase, possess, and consume alcoholic beverages on campus must do so responsibly and must have reached the legal age of 21. All members of the university community (students, faculty, staff, and alumni, and their guests) are expected to
comply with university-related regulations, as well as federal and state laws regarding the use of alcohol. Compliance also extends to university-sponsored activities held off campus. Students and employees are expected to take personal responsibility for their own conduct when making decisions regarding alcohol use.

Virginia law prohibits the purchase, possession, or consumption of beer, 3.2 beverages, wine, or distilled spirits by those under the age of 21. The law also prohibits purchasing for or serving such beverages to a person under age 21. Underage people who use or attempt to use a driver’s license that has been altered, forged, borrowed, or is in any way deceptive in an attempt to obtain prohibited beverages shall have their driver’s license revoked for a minimum of 30 days but for not more than one year. Consuming alcohol in unlicensed, public places or offering a drink to another in a unlicensed, public place is also a violation of Virginia law. The sale of alcoholic beverages to an intoxicated person is prohibited. In addition, it is unlawful for an intoxicated person to purchase or possess alcoholic beverages. While purchase or possession by an intoxicated person is a misdemeanor, violators are subject to having their driver’s license revoked for one year.

It is illegal to operate a motor vehicle, including mopeds, when a person has a blood alcohol concentration (BAC) of 0.08 percent or higher. Individuals under age 21 who drive with a BAC of more than 0.02 percent but less than 0.08 percent risk having their driver’s license suspended for six months and being fined up to $500. If a person is arrested for driving with a license revoked or suspended under a prior driving-under-the-influence (DUI) conviction, the offender’s car is immediately impounded for 30 days. Following conviction, the court can impound the vehicle for an additional 90 days. If the car does not belong to the offender, the owner of the car may petition the court for release of the vehicle.

Sobriety spot checks to detect drunken drivers are legal. Refusing a breath test or having a BAC of 0.08 percent or higher may result in an individual’s driver license being revoked for seven days. The option to request a blood test instead of a breath test for an alcohol-related offense is no longer available.

It is illegal to serve alcohol from an unregistered keg, which is defined as a common container holding four gallons or more. Only University Dining Services or other authorized entity may serve alcohol from kegs.

Possession, use, sale, or distribution of controlled substances, including marijuana, is a violation of federal and state laws, as well as university regulations. The 1988 federal Drug-Free Workplace Act also prohibits the unlawful manufacture, distribution, possession, or use of a controlled substance in the workplace.

Students, faculty, staff, and sponsoring organizations found in violation of state or university regulations may be subject to disciplinary action, civil action, or loss of the privilege to reserve or use university facilities. Disciplinary action for students or student organizations will be conducted in accordance with the Mason Judicial System for Student Conduct, and civil proceedings may occur in certain situations. University sanctions are intended not to punish individuals but to provide education and rehabilitation services.

Sanctions depend on the severity of the violation. They range from written warnings to expulsion from the university. Most sanctions require the student to be evaluated by Substance Abuse Programs and Services personnel, who will assess the severity of alcohol and other drug problems and offer referrals to arrange community service hours. Employees found in violation of the university’s drug and alcohol policy may be subject to action by the appropriate administrative office.

Health Risks

Alcohol is a depressant that slows brain activity. Alcohol use can impair decision-making abilities and lead to negative consequences, including risky sexual behavior. Drinking alcohol should be avoided by pregnant women and anyone taking prescription medications or operating a motor vehicle. Long-term or heavy use of alcohol is linked to cancer, heart and liver damage, and other serious illnesses, and can lead to tolerance and physical and psychological dependence. Excessive alcohol intake can cause death from alcohol poisoning. All students and employees are expected to respect those who choose not to drink.

Illicit drugs have more than legal consequences; they have specific health and ethical risks that can cause dangerous consequences and unhealthy, dependent behavior. Use of alcohol (or any other drug) in a manner that leads to impairment or intoxication is unhealthy and risky, and should be avoided and discouraged. The potential for health problems can also develop from the use of nicotine or caffeine products.
Those who need assistance in dealing with alcohol and other drug problems are encouraged to seek the confidential services of the resources listed in the Campus and Community Resources section listed below.

**General Rules for Serving Alcoholic Beverages**

University regulations prohibit the possession or consumption of any alcoholic beverage on university grounds unless the university has sanctioned the location and conditions for possession or consumption, such as the Bistro. For more information, please review the comprehensive guidelines for alcohol service available in the Office of Substance Abuse Programs and Services.

**Campus and Community Resources**

**Fairfax Campus—Health and Wellness Education Resource Room:** SUB I, Room 220, 703-993-3686, and SUB I, Room 219, 703-993-2830

**State Employee Assistance Service:** 804-786-6741

**Alcoholics Anonymous:** 703-993-3686 for campus meetings; for other locations, 703-876-6166

**Narcotics Anonymous:** 703-532-1255

The drug and alcohol policy outlines university regulations on substance use and abuse. This policy is distributed annually to all employees and students to inform the campus community of alcohol and drug laws, health risks, and campus and community resources. University regulations regarding the drug and alcohol policy have been developed by a committee of faculty, staff, and students. This policy statement is available in the Office of Substance Abuse Programs and Services, Health and Wellness Center, SUB I, Room 219K. This policy is also distributed through the student and faculty and staff handbooks and the university student newspaper, *Broadside*.

**Responsible Use of Computing Policy**

The Responsible Use of Computing (RUC) Policy applies to all academic and operational departments and offices at all university locations owned or leased. The policies and procedures provided herein apply to all Mason faculty, staff, students, visitors, and contractors.

The university provides and maintains general computing services, including web and Internet resources, and telecommunication technology to support the education, research, and work of its faculty, staff, and students. At the same time, Mason wishes to protect all users’ rights to an open exchange of ideas and information. This policy sets forth the responsibilities of each member of the Mason community in preserving the security, confidentiality, availability, and integrity of Mason computing resources. To accomplish these ends, this policy supports investigations of complaints involving Mason computing abuse, including sexual harassment, honor code, federal, state, applicable industry, and local law violations.

University faculty and staff members, as state employees, are subject to the Freedom of Information Act, §2.2-3700, et seq., of the Code of Virginia, and all applicable state and federal rules and regulations. While this policy endeavors to maintain user confidentiality, it cannot create, nor should faculty or staff members presume, any expectation of privacy.

Violations of this policy may result in revocation of access, suspension of accounts, disciplinary action, or prosecution. Evidence of illegal activity will be turned over to the appropriate authorities. It is the responsibility of all users of Mason computing resources to read and follow this policy and all applicable laws and procedures (user sign-on agreement).

To report violations of this policy, or any related university policy, e-mail the Security Review Panel (SRP) at *StopIt@gmu.edu* or *abuse@gmu.edu*.

**Definitions**
Mason computing resources. All computers, systems, workstations, networks, networking equipment, peripheral devices, servers, and any other university property attached to Mason’s web site or Internet network. These resources include all software, files, documents, and databases stored in Mason computing systems. The Mason web site includes all web pages that reside on servers owned by Mason. The Mason web site does not include servers or other resources owned by Internet service providers or personal resources owned by members of the Mason community who may use the resources to access Mason computing resources.

System administrator (SA). Anyone who has the responsibility to maintain, configure, operate, or repair Mason’s computing resources. System administrators have special privileges and special responsibilities under this policy.

Information Technology Unit (ITU). The organizational entity that is responsible for information technology (IT) equipment and services within the Mason campus system. The ITU is headed by the vice president for Information Technology (VPIT), who is administratively responsible for this policy.

Technology Council. A group of Mason faculty and staff members that provides advice and recommendations to the VPIT regarding the selection and architecture of technologies used to provide IT services.

Responsibilities of the Various Groups

System administrator. The SAs have extraordinary powers to override or alter access controls, configurations, and passwords. This power should be exercised with great care and integrity. SAs’ actions are constrained by this policy and by the policies of local administrative units.

Data stewards of Mason units who employ SAs are responsible for ensuring that the SAs comply with and enforce the requirements of this policy in the systems for which they are responsible. SAs who violate this policy or who misuse their powers are subject to disciplinary action.

If an SA observes someone engaging in activities that would seriously compromise the confidentiality, availability, or integrity of a Mason system, network, or electronic Mason data, the SA may take immediate action to stop the threat or minimize the damage or contact the ITU Support Center to activate the Computer Security Incident Response Team. SAs who observe suspected violations of law should immediately alert the University Police.

Security Review Panel (SRP). This policy establishes an SRP that is responsible for reviewing SAs’ decisions, responding to complaints, providing security advice, and periodically reviewing this policy. The SRP consists of the director of IT security, three faculty members, two members of Mason’s Technology Council, one representative from the Faculty Senate, one graduate student, one undergraduate student, one ITU staff member, and one non-ITU system administrator. The VPIT appoints the SRP members. The SRP chair will be one of the faculty members and will be appointed by the VPIT.

The SRP is responsible for periodically reviewing the RUC Policy and recommending improvements and clarifications as needed. All modifications to the policy will be made after full public disclosure and a reasonable period for public comment.

The SRP will establish a dispatching procedure for routing StopIt complaints to the appropriate official or staff member for action.

Rules of Use

Access to Mason’s computing resources is a privilege granted on a presumption that every member of the Mason community will exercise that privilege responsibly. Because it is impossible to anticipate all the ways in which individuals can damage, interrupt, or misuse Mason’s computing resources, this policy focuses on a few simple rules. These rules describe actions that users should avoid and the principles behind them. Each rule is followed by a nonexhaustive list of examples of actions that would violate the rule.

Rule 1. Use Mason computing resources consistently with the following intended purposes:
• Educational, research, and administrative purposes of Mason
• Uses indirectly related to Mason purposes that have an educational or research benefit, such as news reading, web browsing, chat sessions, and personal communications
• Employees and contractors of the Commonwealth of Virginia may not use Mason’s computing resources for recreation or entertainment.

Rule 2. Do not use computer accounts for illegitimate purposes.

Account usernames identify individuals to the entire international Internet user community. Users may be held responsible for actions in the account. If that person violates any policies, his or her actions will be traced back to the username and the account holder may be held responsible.

Forbidden:
• Selling access to Mason’s computing resources
• Engaging in commercial activity not sanctioned by Mason
• Intentionally denying or interfering with any network resources
• Using or accessing any Mason computing resource, or reading or modifying files without proper authorization
• Using the technology to in any way misrepresent or impersonate someone else
• Sending chain letters
• Violating copyright laws and licenses
• Violating federal or state law, or university policy

Rule 3. Honor the privacy of other users.

Mason respects the desire for privacy and voluntarily chooses to refrain from inspecting users’ files, except as described below in Section V. SAs who carry out standard administrative practices, such as backing up files, cleaning up trash or temporary files, or searching for rogue programs, do not violate privacy. Some examples of privacy violations are

• Accessing the contents of files of another user without explicit authorization from that user
• Intercepting or monitoring any network communications meant for another person
• Transmitting or distributing personal or private information about individuals without explicit authorization from the individuals affected
• Creating or using programs (e.g., key-loggers) that secretly collect information about users. Note that most systems keep audit trails and usage logs; these are not secret and are considered normal parts of system administration.

Rule 4. Do not use any account except the one you have been authorized to use.

If a user has a legitimate reason to give someone else access, it should be strictly temporary. The account holder should change the password after another user finishes using the account.

Rule 5. Do not use Mason’s computing resources to violate other policies or laws.

The list below is not comprehensive. In case of doubt, ask the SRP or e-mail stopit@gmu.edu.

• Using Mason’s computing resources to violate harassment laws or policies. Various types of harassment, including sexual or racial, are proscribed by Mason policies.
• Using Mason’s computing resources to violate the Honor Code
• Extending the Mason network without explicit permission from ITU Network Engineering. The unauthorized use of routers, switches, modems, and other devices can affect the security and stability of the network.
• Running vulnerability scans on systems. This action is considered hostile. If required for academic reasons, written permission from the system owner is required.
• Using Mason’s computing resources to transmit, store, display, download, print, or intentionally receive obscene material or distribute pornographic material. All users of Mason computing resources are subject to all federal and state obscenity laws. State employees should also be aware of state laws prohibiting the use of state equipment to access, store, print, or download sexually explicit material.
Electronic Information Environment

Personal e-mail, electronic files maintained on Mason equipment, and personal web sites are part of a unique electronic information environment. This environment creates unique privacy issues that involve federal and state laws as well as Mason policies.

Mason reserves the right to inspect user files and communications for all lawful purposes, including investigating allegations of illegal activity, violations of Mason policies, or protection of the integrity and security of network systems.

Web pages. Mason will investigate all complaints involving personal web sites and will remove or block material or links to material that violate federal or state law or university policy.

Compliance

The StopIt Process. The process described here, called “StopIt,” uses a graduated approach to handle violations of this policy. This policy distinguishes between incidents that pose no immediate danger to persons or system integrity and incidents that do. The three-step StopIt process described below is for cases in which there are no immediate dangers.

Incidents posing immediate danger to persons or systems require immediate action. These include active system break-ins or intrusions, denials of service, and incidents or criminal activity conducted using Mason computing resources. In these cases, the responsible SA may take reasonable actions to deal with the threat, such as temporarily disconnecting the system from the network, temporarily suspending accounts, and calling law enforcement. The SA taking such actions will notify his or her supervisor, and the ITU Support Center as soon as practicable.

The StopIt process rests on two foundations:

- Wide distribution of policy information: Notices describing the essence of the RUC Policy will be displayed in academic computing labs on Mason premises; the same information will be provided to the community at least annually. By logging on to the Mason network, users are agreeing to the conditions of the RUC Policy (user sign-on agreement).
- Standard reporting mechanism: The StopIt e-mail address is monitored regularly by individual(s) appointed by the SRP. Harmful or disruptive behavior should be reported to the StopIt e-mail or the University Police. The individual who responds to a complaint will normally forward it to the SA of the system on which the infraction apparently occurred. That SA will investigate the complaint, determine its validity, and take appropriate actions (see below).

The steps of the process are as follows:

StopIt 1. First Warning

The SRP member handling a case (or SA, if the case is delegated) will send a warning letter or email to the alleged perpetrators of improper use of Mason computing resources, harassment, or other uncivil behavior. The letter will have this form:

“Someone using your account did [description of offense].” This is followed by an explanation of why this behavior violates which policy. “Account holders are responsible for the use of their accounts. If you were unaware that your account was being used in this way, it may have been compromised. Your system administrator can help you change your password and secure your account. If you are aware, then please make sure that this does not happen again.”

This warning ensures that the alleged perpetrators are aware that a policy violation may have occurred and that there was a complaint. It offers them an opportunity to desist without having to admit guilt and secure their account against unauthorized use.

StopIt 2. Second Warning

If there is a second offense from an account that received a first-warning letter, the SRP member will issue a second warning and may require that the account holder come to a mandatory interview. The SRP chair can authorize the temporary suspension of
StopIt 3. Disciplinary Procedures

If the previous StopIt stages do not convince the perpetrators to desist, the matter will be turned over to the appropriate Mason authority designated for that type of offense. The SRP will make available all information and evidence it has on the case to that authority.

If it appears from the evidence that any federal or state laws may have been violated, the SRP may recommend suspension of the account pending the outcome of the Mason or law enforcement authorities’ investigation.

Amendments

All amendments to the Responsible Use of Computing Policy Number 1301 are to be reviewed and approved by the Office of the Provost and the Office of the Senior Vice President.

Effective Date

The policies herein are effective October 20, 1997, and were revised December 17, 2007. This policy shall be reviewed and revised, if necessary, annually to become effective at the beginning of Mason’s fiscal year, unless otherwise noted.

Parking Policy

Fairfax Campus Sandy Creek Parking Office
Phone: 703-993-2710

Arlington Campus 104 Original Building Office
Phone: 703-993-8146

Prince William Campus 112 Occoquan Building Office
Phone: 703-993-4808

Web: parking.gmu.edu

All faculty, staff, and students who park on property owned or operated by the university must display a valid permit or park in a parking deck and pay an hourly or daily rate. On the Fairfax Campus, the decks are located on Mason Pond Drive and Sandy Creek Way off Patriot Circle. A new parking deck is expected to open in fall 2009 off University Drive. Visitors and guests must park in the deck or at a meter unless special arrangements have been made through Parking Services.

Permit enforcement runs 24 hours a day, seven days a week. Metered parking is designated for short-term use and is monitored from 7 a.m. to 10 p.m., Monday through Friday, and 8 a.m. to 8 p.m., Saturday and Sunday. Broken meters are considered closed parking spaces; any vehicles parked in such spaces are subject to citation.

Restricted areas such as yellow curbs, crosswalks, sidewalks, landscaped or barricaded areas, loading zones, disabled spaces, and fire and emergency lanes are monitored 24 hours a day, seven days a week.

To avoid receiving a substantial fine, students, faculty, and staff should purchase a permit as soon as they arrive on campus. Parking permits are available on annual or semester basis. Permits, except for the Arlington Campus, may be purchased online at parking.gmu.edu or at the Parking Services sales office, located in the Fairfax Campus Sandy Creek Parking Office. Hours are 8:30 a.m. to 5 p.m., Monday, Wednesday, Thursday, and Friday, and 8:30 a.m. to 7 p.m. on Tuesday. Current parking permit fees and citation fine amounts, as well as information pertaining to the Arlington and Prince William Campuses, are listed on the Parking Services web site.
Disabled parking is available at a number of convenient locations at Mason facilities. A Department of Motor Vehicles (DMV) disabled placard or license plate must be displayed along with a university permit; a DMV placard or license plate alone is not sufficient for parking in disabled spaces in university lots. A visitor with a DMV placard or license plate may park in a parking deck at prevailing rates. Parking in or blocking access to a disabled space carries a fine at the prevailing rate.

Some parking lots have designated spaces reserved for faculty and staff, resident students, special permit holders, or service and repair vehicles. Please read all signs posted at entrances to the parking lots. All vehicles must be parked in a marked space. Complete parking regulations can be found at the Parking Services web site. For more information, call the Parking Services Office at 703-993-2710 or e-mail parking@gmu.edu. Please check the Parking Services web site for special announcements and changes to the policy.

Motorist Assistance Program

Phone: 703-993-2715

The Motorist Assistance Program (MAP) is designed to assist drivers who have minor car problems. Trained MAP personnel are available to help with dead batteries and can contact lockout or towing services at the driver’s request and expense. MAP is available at the Fairfax Campus from 8 a.m. to 11 p.m., Monday through Sunday. To access this service, call 703-993-2715.

Mason Shuttles/CUE Bus/Transportation

Mason Shuttles: 703-993-2828
Transportation: 703-993-2828
Web: shuttle.gmu.edu, transportation.gmu.edu

The following shuttles are operated by the Mason Shuttle program free of charge to the user:

- Prince William shuttle, providing service between the Prince William and Fairfax Campuses, Monday through Friday
- Mason to Metro shuttle, providing service Monday through Friday and Saturday and Sunday evenings between the Fairfax Campus and the Vienna Metro Station
- West Campus Shuttle, providing service between Presidents Park and the West Campus Parking Lot on the Fairfax Campus
- Field House Shuttle, providing service Monday through Thursday between the Field House and the CUE Bus Stop on the Fairfax Campus.

For more information and current shuttle schedules, go to shuttle.gmu.edu, call 703-993-2828, or e-mail shuttle@gmu.edu.

Mason faculty, staff, and students may also ride the City of Fairfax CUE Bus for free by showing their Mason ID card. For schedule information, go to www.fairfaxva.gov/CUEBus/CUEBus.asp. For other transportation information, go to transportation.gmu.edu or e-mail transportation@gmu.edu.

Other Policies

Sexual Assault Policy

The following policy applies equally to all members of the Mason community: students, faculty, administrators, staff, contract employees, and visitors.

The university is committed to providing an institutional environment where all people may pursue their studies, careers, duties, and activities in an atmosphere free of threat of unwelcome and unwanted sexual actions. It strongly condemns sexual offenses, will not tolerate sexual offenders, and supports those who have been victimized.
Sexual assault includes the attempt or act of rape (sexual intercourse without consent or with a child under the age of 13, by a stranger, an acquaintance, or an intimate), forced sodomy (forced oral or anal sex), or the forced penetration by a foreign object either animate, such as a finger, or inanimate. Nonpenetration sexual assault includes the act of touching an unwilling person’s intimate parts such as genitalia, anus, groin, breast, or buttocks, or the clothing covering these parts, or forcing an unwilling person to touch another’s intimate parts.

The above acts constitute sexual assault when they are committed against a person’s will as evidenced by refusal of consent; through the use of force, threat, manipulation, or intimidation, or against a person who by virtue of mental incapacity or physical helplessness is unable to give or withhold consent. This includes, but is not limited to, incapacity or helplessness caused by alcohol or other drugs. Intoxication of the assailant shall not diminish the assailant’s responsibility for the sexual assault.

The university will respond promptly, fairly, and decisively to all reports of sexual assault. Members of the university community accused of sexual assault will be subject to university disciplinary procedures when the alleged incident has occurred on campus or the incident has occurred off campus and materially affects the learning environment or operations of the university.

Sexual assaults are serious violations of the university’s student judicial code, faculty standards, and university employee policies. They are crimes under state law and punishable by fines or imprisonment. In addition, these actions are subject to civil suit for damages.

Mason is compliant with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (the Clery Act) as amended in 1998, which requires all postsecondary institutions to publish and distribute certain information regarding campus crimes, including reports of campus sexual assault, sexual assault policies, and security programming to all current students, employees, and any applicant who so requests.

Through the Office of Sexual Assault Services, 24-hour assistance is available to those who have been affected by sexual assault.

For more information, contact Sexual Assault Services at 703-993-4364.

**Stalking Policy**

Stalking is a crime under Virginia state law (18.2-60.3). Incidents of stalking outside Virginia may be admissible in court if they are relevant to the case and may be punishable as a misdemeanor or a felony. Stalking behavior is prohibited and will not be tolerated by Mason.

The university defines stalking as a series of behaviors that in context intend to place or have knowledge that the behaviors might place another person in reasonable fear of his or her safety or mental or physical well-being. Such behaviors include nonconsensual (unwanted) communication or contact, including face-to-face, telephone calls, voice messages, electronic mail, instant messaging, written letters, and unwanted gifts; harassment, either by the individual or through a third party; use of threatening gestures; pursuing or following; surveillance or other types of observation; use of electronic devices or software to track or obtain private information; trespassing; vandalism; and nonconsensual (unwanted) touching.

Some behaviors may result in separate criminal charges. While certain acts can be classified as crimes, others that do not rise to criminal behavior may still be subject to the campus judicial process. The university can take action and has the right to impose sanctions on an offender. Incidents occurring on or off campus are subject to university discipline when such actions materially affect the learning environment or operations of the university.

Legal options available to victims of stalking include reporting to the campus or local police, seeking a remedy through civil proceedings, and using the campus judicial process. Additional support is available from Sexual Assault Services.

This policy applies equally to all members of the Mason community: students, faculty, administrators, staff, contract employees, and visitors.

The university is committed to protecting the right of all individuals to pursue their intellectual, vocational, and personal interests without harassment or interference. The university is also committed to providing an environment in which visitors to and members of the campus community are treated with dignity, respect, and regard for their welfare and learning needs.
For more information on stalking issues or this policy, call Sexual Assault Services at 703-993-4364.

**Statement of Information on Dating/Partner Violence**

*Effective March 2008*

**This statement of information applies to all George Mason University students, staff, and faculty.**

George Mason University is committed to providing an institutional environment where all persons may pursue their studies, careers, duties, and activities in an atmosphere free of threat of interpersonal violence. The university will support those who have been victimized by dating/partner violence by providing information and counseling services and, depending on the individual case, will refer the matter to the appropriate office or department to be handled under applicable university policies, regulations or Virginia criminal statutes.

**George Mason University Dating/Partner Violence Definition**

Dating/partner violence, as defined by George Mason University, is often a pattern of controlling behaviors but can be a one-time incident used by an individual to gain and maintain power and control over another individual in the context of a dating/partner or familial relationship. The pattern of controlling behaviors is not caused by a lack of impulse control on the part of the abuser or as a matter of coincidence but rather is usually an ongoing effort to maintain domination over the victim to ensure submission to the abuser's will. This definition applies to people in heterosexual and same-sex relationships.

**Other Definitions**

Controlling behaviors: May include, but are not limited to, physical and sexual violence, direct and implied threats of violence, emotional and psychological intimidation, coercion, verbal abuse, isolation, stalking, spiritual abuse, economic/financial control, ridiculing religious beliefs, invasion of privacy, actual or threatened use of weapons, threats of deportation, blackmail, destruction of property, and/or harm to the victim's family, pets, and significant others.

Dating/Partner: A short- or long-term relationship (current or former, including marriage) between persons intended to provide some emotional, romantic, or physical intimacy.

Familial Relationship (as defined in Virginia law, Section 16.1-228):

- The person's spouse, whether or not he or she resides in the same home with the person
- The person's former spouse, whether or not he or she resides in the same home with the person
- The person's parents, stepparents, children, brothers, sisters, half-brothers, half-sisters, grandparents and grandchildren, regardless of whether such persons reside in the same home with the person
- The person's mother-in-law, father-in-law, sons-in-law, daughters-in-law, brothers-in-law, and sisters-in-law who reside in the same home with the person
- Any individual who has a child in common with the person, whether or not the person and that individual have been married or have resided together at any time
- Any individual who cohabits or who, within the previous 12 months, cohabited with the person, and any children of either of them then residing in the same home with the person.

Family abuse: Any act involving violence, force, or threat including, but not limited to, any forceful detention that results in bodily injury or places one in reasonable apprehension of bodily injury and is committed by a person against such person's family or household member (as defined in Virginia law, Section 16.1-228).

**Support Available:**

George Mason University will make reasonable efforts to provide support and referrals to students involved with dating/partner violence. Because dating/partner violence often occurs in conjunction with sexual violence and stalking, Mason students experiencing dating/partner violence may seek confidential assistance from the university's Sexual Assault Services and Counseling and Psychological Services.
Reporting Incidents and Legal Options

Criminal: Certain acts of dating/partner violence are crimes under Virginia law. These acts may be classified as assault and battery against a family or household member under Section 18.2-57.2 of the Virginia Criminal Code. Persons wishing to make an official police report and seek prosecution should contact the appropriate police agency.

Civil: Victims of dating/partner violence may seek to obtain a protective order at a local magistrate’s office and file a civil lawsuit to obtain compensation for personal damages. Victims can seek more information about protective orders and civil proceedings by contacting Mason's Sexual Assault Services.

University discipline: The university may take action and impose sanctions on those accused if the accused is an employee or a student, whether or not the incident rises to a criminal offense under Virginia law. Incidents occurring on or off campus between students and/or employees may be subject to university discipline when such actions materially affect the learning environment of the victim or the operations of the university. Sanctions on the accused may include education, counseling, restrictions, and penalties. See Behavioral Expectations 8 of the Student Judicial Code.

For more information about the Office of Judicial Affairs and the Student Judicial Code, please call 703-993-2884, go to judicialaffairs.gmu.edu, or visit the Office of Judicial Affairs in SUB I, Room 302. Employees may contact George Mason University Employee Relations at 703-993-2600. To reach University Police, please call 703-993-2810.

Employee policies related to this issue:

George Mason University Administrative Policy 2208—Preventing Workplace Violence

Virginia Department of Human Resource Management Policy 1.80—Workplace Violence

Virginia Department of Human Resource Management Policy 2.30—Workplace Harassment

Virginia Department of Human Resource Management Standards of Conduct Policy 1.60

This statement of information was created by the George Mason University Sexual Assault Services Coordinating Council.

Other Regulations

Annual Security Report

Mason’s 2008 Annual Security Report is available on the University Police web site. This report contains the previous three years' crime statistics and includes policies concerning campus security, such as sexual assault, stalking, and other matters that pertain to safety on campus. To view a copy of the report, go to www.gmu.edu/police/annualsecurity.htm. Paper copies of this report are available at any police facility.

Weapons

The unauthorized possession, storage, display, or use of any kind of ammunition, firearm, firework, explosive, air rifle, air pistol, or other lethal instrument is prohibited on university property. For more information, call University Police at 703-993-3840.

Smoking

Smoking is not permitted in any building on campus.
Bicycles and Skateboards

Bike racks are provided at various on-campus locations for the convenience of students who bike to and from campus. For resident students, bike racks are located in the residential complexes. Bikes and skateboards are not permitted on sidewalks, stairs, ramps, footpaths, or grassy areas of the campus. They also are not allowed inside university buildings.

Pets

No pets, except those assisting people with disabilities, are permitted in university buildings at any time. Pets on campus grounds must be on a leash and under supervision at all times.

Solicitors and Salespeople

Except on official business with the university, solicitors and salespeople are not permitted on the campus without prior approval of the University Services Office.

Resources and Services

Resources and services of the George Mason University Libraries are housed on the Fairfax Campus at the Charles Rogers Fenwick Library and the George W. Johnson Center Library; on the Arlington Campus at the Arlington Campus Library; and on
the Prince William Campus at the Mercer Library. The School of Law Library, on the Arlington Campus, is administered separately. Combined holdings, including the law library, total more than 1.2 million books and bound journal volumes; 11,000 current print serial subscriptions; 3.0 million microform units; 341,000 print government documents; 214,000 maps; 36,000 multimedia materials; 550 electronic databases; 31,000 electronic journals and proceedings; 100,000 electronic books; and significant holdings of manuscripts, special collections, and archives.

Mason’s integrated library information system provides an online public-access catalog, circulation, electronic reserves, and library-processing services. The information system can be used in any of the libraries from campus locations on the network or via the web. The web site library.gmu.edu offers access to a variety of networked digital resources and electronically mediated services, including a virtual reference service.

The library liaison program supports a variety of cooperative and collaborative activities. Liaison librarians work with academic departments and programs to develop print collections and electronic resources. They also offer introductory and advanced information literacy instruction sessions, as well as advanced reference and research consultation services to students and faculty. Each of the four libraries has its own dedicated instruction room for information literacy classes.

Through membership and active participation in local, regional, and national library consortia, the University Libraries are better able to meet the needs of the university’s growing and diverse academic and research programs. Current affiliations include the following:

- The Virtual Library of Virginia (VIVA) Program, a Virginia-funded electronic and resource-sharing program for public higher-education institutions
- Washington Research Library Consortium (WRLC), whose membership also includes American, Catholic, Georgetown, and George Washington universities
- Association of Southeastern Research Libraries, which includes the 36 largest university libraries in a 10-state region
- Center for Research Libraries, a Chicago-based research library for research libraries whose multimillion volume holdings comprise specialized and uniquely held materials in North America
- The international Online Computer Library Center, whose extensive computerized system and network facilitate national and international library resource-sharing activities.

An intercampus delivery service is available for students and faculty requesting materials held at any Mason campus library. Materials not held by Mason can be obtained by direct borrowing from WRLC institution libraries via the Consortium Loan Service, interlibrary loan, or commercial delivery services when required.

Expanded academic support services also include the following:

**Educational Services Unit**

The Educational Services Unit leads planning and program development for information literacy initiatives throughout all the libraries and, through collaboration with other university units, creates institution-wide projects and initiatives focused on students’ research abilities. The Educational Services Unit staff designs classes, tutorials, instructional materials, and program-level plans to teach students how to identify, assess, and manage information for their academic courses and other endeavors, and conduct research in an ethical way. This unit is also responsible for leading assessments related to information literacy and fluency projects.

**iMasonLibraries Service**

Web: library.gmu.edu/research

This service enables users to ask reference questions via an instant messenger.

**Mason Archival Repository Service**
The Mason Archival Repository Service (MARS) provides a stable digital archive for scholarly and research materials of lasting value held notably by Special Collections and Archives or produced by Mason faculty, students, and staff. MARS is managed by Digital Programs and Systems. The MARS librarian offers expert advice on archiving these materials, file formats, copyright issues, long-term management of archived materials, and issues pertaining to scholarly communication.

University Copyright Assistance Office

Johnson Center, Rooms 227 EB
Phone: 703-993-2544 or 2427
Fax: 703-993-4116
Web: library.gmu.edu/copyright

This office provides guidance and assistance on copyright and fair use issues, including copyright use in classroom teaching and technology, online courses, distance education, university publications, university web sites, networked library collections and related services, electronic course reserves, and course readers. Workshops are offered on a regular basis.

University Dissertation and Thesis Services

Phone: 703-993-2222
Web: thesis.gmu.edu

The University Dissertation and Thesis Service (UDTS) assists students and academic units in the dissertation, thesis, and graduate-level project process by helping students meet all university requirements and deadlines for submission of work. The UDTS web site provides useful tools such as the university’s Thesis, Dissertation, or Project Guide, which contains downloadable templates of necessary elements, forms required for the submission process, and links to related web sites. UDTS also assists graduate students through individual consultation and informational workshops.

Records Management

A part of the Special Collections and Archives, this service assists university academic and administrative departments with the retention and disposition of temporary records by providing a number of online resources to members of those departments. The records manager works with members of university departments to ensure that records are retained, retrieved, managed, and disposed of appropriately, in accordance with Virginia state laws, policies, and guidelines.

Statistical Research Services

Phone: 703-993-3417
Web: library.gmu.edu/srs

This office provides expert consultation services for students and faculty who need assistance with statistics-based research projects, including quantitative and qualitative research design analysis, and help with the myriad statistical-analysis software.

Fenwick Library

Phone: 703-993-2240

Fenwick is the main library in the university’s library system. It holds most of the book collections across disciplines, as well as current and bound journals, microforms, special collections and archives materials, federal and Virginia government documents,
and maps. Instruction and reference classes are available in search strategies, information sources, and information technology. In addition, publicly accessible computer workstations and data ports for laptop use enable access to the entire system’s electronic resources and associated services.

**Johnson Center Library**

Phone: 703-993-9060

This library is part of the George W. Johnson Center integrated learning environment. Electronic access to scholarly information is complemented by a print-reference collection, multimedia collections, and a circulating book collection comprising core texts and readings supporting the university’s undergraduate curriculum. This library, in particular, supports interdisciplinary programs such as the Honors College and New Century College through its collections and outreach services. The library also holds designated discipline-based circulating book collections. It is the center for multimedia collections and services for the university library system. This library also provides course support through reserve materials (electronic, print, and media) for students and faculty on the Fairfax Campus and manages the entire electronic reserves service. A collection of international newspapers rounds out the collections and services. The Johnson Center has a wireless network that students may use anywhere in the building. Assistive technologies include screen-reading software, text-enlargement software, and special hardware for individuals with disabilities.

**Arlington Campus Library**

Phone: 703-993-8818

This library is a full-service research facility supporting the teaching and research needs of Mason faculty, students, and staff on the Arlington Campus. Consistent with this campus’ distinct areas of academic specialization at the graduate level, the library’s collection emphasizes public policy, international commerce, economics, education, management of nonprofit organizations, and conflict resolution. The library holds a core of reference materials and is a depository of European Union documents. Intercampus delivery of circulating materials from other library sites is also available. Library staff can provide reference assistance and instruction for students, faculty, and staff in identifying and using resources. Physical library holdings continue to grow, while the library emphasizes providing many of its resources and services online. This library supports a wireless network, and assistive technologies are available for people with disabilities.

**Mercer Library (Prince William Campus)**

Phone: 703-993-8340

This library supports faculty and students in the programs and courses offered at the Prince William Campus, including education; biotechnology, bioinformatics, and biodefense; computer science; health, fitness, and recreation resources; and administration of justice. The library provides access to university-wide electronic resources, with an emphasis on instruction and assistance with information resources and research. Notable holdings include scientific journals in bioscience and biomedicine. The library is fostering partnerships to provide information services to the rapidly expanding corporate and technology presence in Prince William County. This library has a wireless network, as well as assistive technologies for people with disabilities.

**School of Law Library (Arlington Campus)**

Phone: 703-993-8106

Administration

Deborah M. Keene, Associate Dean, Library and Technology
This library supports the School of Law and has holdings in law and economics, including specialized academic tracks in intellectual property, litigation, corporate and securities law, international business, regulatory law, and technology and law. The library also provides access to electronic law resources including Lexis, Westlaw, and LegalTrac. This library is open to all members of the university community, and its collections are available for checkout by all faculty, students, and staff.

Office of the Ombudsman

Johnson Center, Room 245
Phone: 703-993-3006
Email: ombuds@gmu.edu
Web: ombudsman.gmu.edu

Administration:
Dolores Gomez-Moran, University Ombudsman

The Office of the Ombudsman is a neutral, independent, informal, and confidential resource to facilitate fair, equitable, and expeditious resolution of university-related concerns and problems raised by students. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests, but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves graduate and undergraduate students at the university.

Honors College

Enterprise Hall, Room 302
Phone: 703-993-1110

Administration:
Zofia Burr, Dean

The Honors College focuses attention on the excellence of Mason's student body and highlights the full spectrum of opportunities for academic achievement, professional development, and public service that Mason offers our most highly-motivated undergraduates. The Honors College provides talented students in all majors with an enriched academic and social environment that enhances their college experience. Through participation in unique, innovative, and challenging programs, students develop their full potential to lead and be active members of their local, national, and global communities.

By incorporating multiple resources into the Honors College, the university provides students the support to excel academically and in their life-long pursuits. Included in these resources is the Honors Program curriculum, which offers challenging courses that fulfill core academic requirements at Mason. Senior faculty, including Mason’s Robinson Professors, teach small classes of students taking the curriculum. From among the candidates invited to be a part of the Honors College, a small cadre of outstanding students are selected as University Scholars, Mason’s highest academic distinction. The Undergraduate Apprenticeship Program provides a research stipend to selected students who wish to work closely on a research or creative project with a faculty mentor of their choosing. Additionally, all Honors College students have direct access to the Postgraduate Scholarships and Fellowships Program, which provides advice and information to high-achieving Mason undergraduates and recent alumni about the application process for nationally competitive fellowships.

The benefits of being part of the Honors College include special lectures, events, and field trips on and off campus, including distinctive opportunities to take advantage of internships and cultural programs in Washington, D.C. Students in the Honors College have the option of living in a diverse living-learning community.

All students in the Honors College receive individualized academic advising, priority registration, and opportunities for close interaction with faculty for one-on-one mentoring and graduate and professional advising. The Honors College also offers competitive study abroad scholarships for students in their junior or senior years.
University Scholars Program

From among the candidates invited to be a part of the Honors College, a small cadre of the most outstanding students are selected as University Scholars. Students selected for this recognition are awarded the university's most competitive and distinguished four-year merit scholarship. This award is the highest academic distinction that Mason offers to undergraduate students and is given annually to top high school seniors admitted to the university. Each year the University Scholars Program enrolls approximately 25 new first-year students. Students receiving this award have demonstrated superior academic achievement, outstanding leadership, and an exemplary school and community service record. Applications must be submitted by December 1 to receive priority consideration for the scholarship.

The University Scholars reside in a common residence hall their first year and share the Dr. Noreen McGuire Prettyman University Scholars Lounge. Students enrolled in the University Scholars Program participate in a dynamic learning community that provides opportunities for intellectual, cultural, and social engagements.

The program draws to Mason a special caliber of student, one who is actively involved in all facets of academic and student life. In addition to excelling in their respective academic areas, the scholars have historically emerged in a variety of student leadership positions and service-related activities.

Intellectual dialogue is fostered among scholars, professors, and administrators through stimulating seminars, discussion groups, cultural activities, service projects, internships, campus events, and participation in organizations that complement the scholars’ academic experiences. The peer interaction, faculty guidance, student development programming, and the academic focus of the University Scholars community reflect the university’s commitment to providing an educationally stimulating and supportive environment that encourages academic excellence, professional development, and personal growth.

University Courses

University (UNIV) courses are special undergraduate academic seminars that appeal to a wide range of majors. These courses fall into three general categories: transitional, interdisciplinary honors, and special topics. To encourage interaction between students and faculty, many of these courses have smaller class sizes. Some UNIV courses satisfy general education requirements; see the University General Education section of this catalog.

University Transitions Courses

This series of courses focuses on transition through the various stages of college. UNIV 100, helps freshmen adjust academically, develop decision-making skills, and learn about the services and opportunities for involvement on campus. UNIV 101, Freshman Academic Transition focuses on academic transition and development issues for second semester freshmen. A special emphasis is placed on resources and techniques to assist students with assessing and improving their academic performance. Students will work closely with their instructor to track their academic progress over the course of the semester. UNIV 200 topics focus on choosing a major or career. UNIV 300 has three tracks: the first is for transfer students making the transition to a new university, the second focuses on career readiness for internships and research assistantships, and the third is designed for specific groups of student leaders. UNIV 400 emphasizes preparation for the workplace, graduate school, and life responsibilities.
University Interdisciplinary Honors Seminars

These seminars are offered to students who have demonstrated strong academic performance. They are developed to give high-ability freshmen and advanced-standing students the opportunity to study with a senior professor in a small classroom setting. The Freshman Seminars (UNIV 190) are open to eligible first-year students and are taught exclusively by the Robinson professors. Qualified students with 30 or more credits are invited to participate in the UNIV 390 seminars, which are taught by Robinson professors and other distinguished faculty scholars.

University Special Topics Courses

Upper-level University courses are open to all students unless specific prerequisites are indicated. They are usually repeated offerings. Two regularly offered University courses, each worth 3 credits, are UNIV 301 Great Ideas in Science and UNIV 441 AIDS: Its Impact in Our Society.

International Programs and Resources

Mason Worldwide (International Degrees)
Web: www.gmu.edu/global

The following academic programs have a strong focus on global issues and subjects:

- BA and MA in anthropology (Department of Sociology and Anthropology)
- BA in communication, with a concentration in international and intercultural communication (Department of Communication)
- BA, BS, MA, PhD in conflict analysis and resolution (Institute for Conflict Analysis and Resolution)
- BA, BS in geography (Department of Geography)
- BA in global affairs
- BA in government and international politics, with a concentration in international and comparative politics (Department of Public and International Affairs)
- BA in Latin American studies (Department of History and Art History)
- BA in Russian studies (Modern and Classical Languages)
- BA in foreign languages, with concentrations in French and Spanish (Department of Modern and Classical Languages)
- MEd in curriculum and instruction, with concentrations in multilingual and multicultural education, foreign language education, and teaching of English as a second language
- MA in foreign languages, with concentrations in French or Spanish, or in Spanish and bilingual-multicultural education (Department of Modern and Classical Languages)
- MS in global health (College of Health and Human Services)
- MS in health science, concentration in international health (College of Health and Human Services)
- MA in history, with concentrations in comparative world history and modern European history (Department of History and Art History)
- MA in international commerce and policy (School of Public Policy)
- MA in political science, with specialization in international politics and comparative government
- MS in professional studies: peace operations
- MPA with a concentration in international management
- MA in telecommunications with a concentration in international telecommunications
- Interdisciplinary minors in African and African American Studies, ancient Mediterranean art and archeology, Asia-Pacific studies, global systems, Islamic studies, Japanese studies, Judaic studies, Latin American studies, linguistics, Middle East studies, the New Europe
- Minors in Chinese, conflict analysis and resolution, French, German, global affairs, international and comparative studies, Latin, Russian, and Spanish
- Undergraduate certificate in Islamic studies and teaching of English as a second language
- Graduate certificates in global trade management; international business planning; international e-commerce and telecommunications policy; international governance and institutions; international health; international health care; international market analysis; managing international commerce; science, technology, and the global economy; teaching of English as a second language; world religions, diplomacy, and conflict resolution

**Center for Global Education: Study-Abroad Office**

Johnson Center, Room 235  
Phone: 703-993-2154  
Fax: 703-993-2153  
Web: globaled.gmu.edu  
E-mail: cge@gmue.edu

**Administration**

Dr. Yehuda Lukacs, Director

The Center for Global Education (CGE) offers students the opportunity to challenge their assumptions about themselves and other cultures in an educational environment by offering study-abroad programs of varying lengths, academic emphasis, and locations. Students can discover new cultures, sharpen language skills, and travel while earning credit. Study options include faculty-led, short-term study tours and intensive language programs; semester and year-long Mason-sponsored programs; direct exchange programs and international internship programs. Most programs are open to Mason undergraduate and graduate students and short-term programs are also open to faculty, staff, and the general public.

CGE offers a wealth of resources to help create a personalized international experience, including information sessions about study-abroad and internship options; one-on-one student advising; transfer of approved international program credits; a resource library of travel books; international and diplomatic community programming; advising to international students from partner schools; and International Student Identity Cards.

**English Language Institute**

Krug Hall, Room 202

**Administration**

John Pope, MA, Director  
Baotran Nguyen, MA, Assistant Director

The English Language Institute (ELI) provides instruction in English as a second language to develop students’ language and academic skills, as well as cultural awareness necessary for academic, personal, and professional success. ELI offers two programs: the Intensive English Program, which serves international students who have come to the United States to study English in preparation for academic study at an American college or university, and the Support Services Program, which provides programs for nonnative, English speaking students newly admitted to Mason and other international members of the campus community. ELI also provides contract services to private corporations, embassies, and government agencies.

**Office of International Programs and Services**
The Office of International Programs and Services (OIPS) advises and consults on matters affecting non-immigrant students, scholars, faculty, staff, and families at Mason. Staff members provide regulatory information related to non-immigrant status and have been designated by the university to issue and sign immigration documents and paperwork on behalf of the institution. OIPS advisors are available by appointment to discuss any concern and to provide practical assistance to students and scholars as they adjust to U.S. culture. OIPS conducts a comprehensive orientation program for new international students and offers social and cultural programming throughout the fall and spring semesters. Most notably, the staff works with student groups and the Student Activities Office to coordinate Mason’s International Week held annually in April.

**International/Multicultural Student Organizations**

Phone: 703-993-2909
E-mail: isu@gmu.edu

The International/Multicultural Student Organizations consist of a variety of international/multicultural student organizations that coordinate educational and social activities to promote cross-cultural understanding and international awareness.

**International Student Association**

Phone: 703-993-2970
E-mail: oips@gmu.edu

The International Student Association is a group of students from around the world who work together to assist newly arriving students and meet for fellowship and fun. Their goal is to make all students feel welcome and comfortable at George Mason University and to participate in activities with classmates of various cultures and backgrounds.

**Administration**

Janet Niblock, Executive Director

The Office of Continuing Professional Education (OCPE) serves as Mason’s initial point of contact and referral for the business and professional community, and responds to all professional development and continuing education inquiries, requests, and needs. Supported program activities include contracted academic credit programs, noncredit public programs and seminars,
online courses, professional certificate programs, continuing education units (CEUs), on-site contract training programs, special professional development events and programs, special workforce development programs, and training center facilities.

The OCPE is strategically located at the Fairfax Campus in Krug Hall, the Prince William Campus, and the Center for Innovative Technology (CIT) in Herndon. Current continuing education program information, offerings, and capabilities can be reviewed at ocpe.gmu.edu.

The Krug Hall office serves as the primary point of inquiry and referral. It facilitates, promotes, and administers the delivery of contract credit courses, online courses, and other specialized professional programs. This office also administers the award of CEUs, which are nationally recognized standard units of measurement earned for satisfactory completion of qualified programs of continuing education. OCPE provides this service to all Mason academic groups that deliver noncredit professional development programs.

The Prince William Campus office facilitates a variety of open enrollment and contract programs (both noncredit and credit) that support the strengths of the programs on that campus. Programs are designed to meet the professional development needs of the business community of the Prince William area, as well as Northern Virginia local and state government communities.

The OCPE Herndon Office located in CIT in Northern Virginia’s high-technology corridor facilitates a variety of professional development programs targeted to the area’s business and federal government organizations. This office reaches out to the business community by designing, marketing, and delivering noncredit training courses and in-depth certificate programs. Public seminars and customized, contract training programs respond to the needs and interests of managerial, technical, and professional employees in private, nonprofit, and public organizations located in Northern Virginia and Washington, D.C.

New Professional Studies, MA/MS

The Master of New Professional Studies Program was established in 1996 to provide graduate education for working professionals. The highlights of this innovative, interdisciplinary degree are as follows:

- Course activities are designed to adapt to the demands of working professionals with a variety of obligations. Through innovative use of information technologies and flexible course scheduling, participants are able to balance the demands of work with an intensive learning experience.
- The degree incorporates action-oriented group learning as a way to integrate theory and practice. Grouped into teams, candidates are immersed in the practical problems of organizations and, at the same time, engage each other through collaborative technologies. By dealing with practical organizational issues, participants gain deeper insight into how complex organizations work.
- The program produces a tightly integrated learning experience and focuses on building a learning community. Participants work on projects as teams and gain an understanding of how to develop team-based organizations.
- Collaborative technology skills developed early on are used throughout the degree program. They enable a high degree of collaboration and interaction between students.

New Professional Studies is an umbrella degree program with four tracks: knowledge management, organization development and knowledge management, peace operations, and teaching. Four core courses (12 credits) are common to all tracks: MNPS 700 The New Professionalism: Theory and Practice; MNPS 702 The New Professional as Reflective Practitioner; MNPS 703 Technology and Learning in the New Professions; and MNPS 704 Research Methodologies in the New Professions. The remaining elective courses (21 credits) are selected from participating disciplines. For information about the tracks on knowledge management, organization development and knowledge management, and peace operations, see the School of Public Policy chapter of this catalog. For information about the teaching track, see the Graduate School of Education section in the College of Education and Human Development chapter.

Army ROTC

Phone: 703-993-2706
Fax: 703-993-2708

Administration
Lieutenant Colonel Sean Barnes, U.S. Army  
Professor of Military Science

The Army Reserve Officers’ Training Corps (ROTC) is an elective program offering qualified students the opportunity to earn a commission as an officer in the U.S. Army, Army National Guard, or U.S. Army Reserve while pursuing a baccalaureate or graduate degree as a full-time student. The program emphasizes student learning and participation in applied leadership, leadership theory and assessment, decision making, management skills, time management, ethics and military law, logistics, military roles and national objectives, strategic and tactical planning and principles, and basic military knowledge and skills. The George Mason Army ROTC Patriot Battalion began in 1981, achieved independent status in 2000, and frequently conducts training with colleges and universities throughout Maryland, Virginia, West Virginia, and the District of Columbia.

Enrollment

Enrollment in military science (MLSC) courses is open to all students. Freshmen (MLSC 101 and 102), sophomore (MLSC 201 and 202), and junior (MLSC 301 and 302) classes are awarded 1 credit each. Senior classes (MLSC 401 and 402) earn 3 credits each. Credit earned in military science courses may count toward degree completion as elective credit. No military service obligation is incurred by enrolling in the lower-level Army ROTC courses. Courses can be dropped or added, as with any elective course at Mason.

The four-year program is organized into two successive phases: the basic course and the advanced course. For students seeking the opportunity to earn a commission as an officer, several entry methods and participation strategies can be used. A minimum of four semesters must remain in the student’s academic curriculum to complete commissioning requirements; these semesters may be part of either an undergraduate or graduate degree. Course descriptions appear under Military Science (MLSC) in the Course Descriptions chapter of this catalog. Cadets must meet established academic standards. A student must maintain an overall GPA of at least 2.00 to earn commission credit for ROTC.

Contracted cadets of any level are required to pass an Army Physical Fitness Test (APFT) twice each academic year. Physical training is conducted three times each week (Monday/Wednesday/Friday from 7 to 8 a.m.). All students are encouraged to attend in order to develop a lifelong commitment to fitness and health.

Basic Course Curriculum

The basic course curriculum is a four-course series (MLSC 101, 102, 201, 202), usually taken in the freshman and sophomore years. Each class awards 1 academic credit. The basic course trains students in the topics listed above, as well as in applied topics, including map reading, land navigation, first aid, physical fitness, leadership, ethics and communication skills. Each lecture class meets once a week for 75 minutes. Textbooks are provided free of charge to all enrolled students. Uniforms and equipment are also issued to students at no cost, but students must return them at the end of each semester.

Mason’s Army ROTC program has numerous experiential aspects. MLSC LAB 201 Leadership Laboratory encompasses several different activities. Students enrolling in any ROTC lecture class must enroll in the required, nongraded lab section. Only the Professor of Military Science can waive LAB 201 enrollment in certain circumstances, such as scheduling conflicts.

All LAB 201 sections meet as a combined unit on Thursdays from 1:30 to 4 p.m. During this time, the unit trains in a variety of hands-on, practical leadership skills and military tasks, ranging from drills and ceremonies to squad and platoon tactics.

Army ROTC also organizes numerous optional events, including rappelling, orienteering, and helicopter orientations. A battlefield visit is offered every year, and a formal military ball is held during the spring semester. The unit has an organized color guard and an intercollegiate Ranger Challenge competition team. Students also have the opportunity to attend official Army training courses such as basic airborne training, the air assault course, and the mountain warfare course. Enrolled students typically become progressively more involved to enhance their training, develop esprit de corps, and take part in social aspects of the program.

Advanced Course Curriculum
The advanced course consists of a four-course series (MLSC 301, 302, 401, 402) taken during the junior and senior years. MLSC 301 and 302 earn 1 credit each, while MLSC 401 and 402 earn 3 credits each. Enrollment in the ROTC advanced course requires that students enter into a contract to serve as a commissioned officer in the active or reserve component of the U.S. Army upon graduation. Most graduates elect to serve on active duty although ROTC also offers guarantees of entering either the Army Reserve or Army National Guard to students so inclined.

The 300-level courses emphasize squad and platoon leadership, tactics, and preparation for the Leadership Development Assessment Course (LDAC). LDAC is a five-week training and evaluation event conducted at Fort Lewis, Washington. Successful completion is a prerequisite for commissioning. Cadets typically attend LDAC in the summer between their junior and senior years; however, they may attend after their senior year if necessary. Salary, travel expenses, and room and board are all provided during the course.

Satisfactory completion of an approved military history course is also required. The department of History and Art history offers a 300-level survey course on the American military experience that satisfies this requirement. Permission of the Chair, department of Military Science, is required prior to substituting any other course.

Upper division ROTC students are also expected to participate in peer mentoring as part of their leadership development. The ROTC peer mentorship program helps lower division students assimilate into the program and helps students prioritize their time to ensure they remain in good academic standing.

Enrollment in the two lower-level ROTC courses is open to any Mason student. Prerequisites exist for upper-level courses. For more information, see the Course Descriptions chapter of this catalog.

The 400-level courses are considered to be the transition to officer phase. These courses focus on leadership, staff operations, logistics, military law, and ethics. Seniors are expected to organize and attend an additional one-hour staff and training meeting per week as part of their leadership experience and duties. Planning and implementation of training becomes the primary focus for seniors in LAB 201.

Earning a Commission

There are several methods by which students may enter Army ROTC to earn a commission as a second lieutenant on graduation:

- Traditional students may complete the four-year program.
- Sophomores may dual-enroll in both years of MLSC instruction to satisfy the lower-level division requirement in a single academic year.
- Veterans with prior college credits may enter directly into the upper-division sequence (if academically aligned as a junior).
- Sophomores may attend a five-week Leaders Training Camp (LTC) between the sophomore and junior years to gain experience equivalent to the basic course.
- A special four-semester program is available to nursing majors in which LTC is not required.

Education delays for graduate study also may be approved for cadets seeking training as physicians, lawyers or ministers. Non-U.S. citizens may participate freely in the lower-division ROTC courses, but must earn U.S. citizenship prior to enrollment in courses requiring a contractual obligation to serve as a commissioned officer.

Scholarship Programs

Two-, three-, and four-year ROTC scholarships are available to freshmen, sophomores, and juniors in all majors on a competitive basis as well as to graduating seniors who wish to pursue a two-year master's degree. Students must have a minimum cumulative GPA of 2.50 to apply and be under age 31 when commissioned. Scholarships pay 100 percent of tuition, an annual book allowance of $1,200, and a stipend of at least $300 per month during the school year, all tax free. Students do not have to be enrolled to apply, and there is no service obligation incurred when applying.
A two-year Guaranteed Reserve Forces Duty scholarship is available that guarantees reserve duty upon graduation and commissioning (no active duty tour). Students should contact the Professor of Military Science to determine eligibility.

High school students interested in four-year scholarships should apply by December 15 of their senior year for a scholarship that would start in the fall semester of their freshman year at Mason. Contact the Professor of Military Science for details.

Many students participate in ROTC as non scholarship cadets. A non scholarship cadet cannot enter into a contract to receive a commission until the sophomore year. For the sophomore, junior, and senior years, non scholarship contracted students receive a monthly stipend and book allowance for the school year.

Air Force ROTC

Two programs are available for college men and women to earn a commission as a second lieutenant in the U.S. Air Force while completing their university degree requirements. To enter, students should call 301-314-3242 or go to www.afrotc.umd.edu. Mason students can register for the appropriate courses through the Consortium Office, but mandatory courses are held at the University of Maryland. Car pools among Mason students are usually available.

Oak Ridge Associated Universities (ORAU)

Phone: 865-576-3306
Web: www.orau.org

Administration

Roger R. Stough, Vice President for Research and Economic Development; ORAU Councilor for George Mason University
Monnie E. Champion, ORAU Corporate Secretary

Since 1993, the students and faculty of George Mason University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with member institutions to help their students and faculty gain access to federal research facilities throughout the country; keep its members informed about opportunities for fellowship, scholarship, and research appointments; and organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility operated by ORAU, undergraduates, graduates, postgraduates, and faculty members enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines, including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the number of underrepresented minority students pursing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research, and support programs, as well as services to chief research officers.

Center for Global Studies

Phone: 703-993-9430
Web: cgs.gmu.edu

Administration
Dedicated to the promotion of multidisciplinary research on globalization, the Center for Global Studies coordinates outreach efforts in global affairs, facilitating access for external communities to the university’s full range of global expertise. Ongoing activities include hosting guest speakers and visiting scholars, an annual conference, electronic and paper publications, and an annual cycle of small grants to support faculty research. The center also manages multi-academic unit research projects and a number of regional and thematic working groups.

The Center for Real Estate Entrepreneurship

Phone: 703-993-9843
Web: realestate.gmu.edu

Administration

Greg Hero, Executive Director and Professor

Pooling resources and expertise from the Volgenau School of Information Technology and Engineering, the School of Public Policy, and the School of Management, the Center for Real Estate Entrepreneurship is developing undergraduate, graduate, and certificate programs in real estate development that encompass the entire real estate development continuum from land use and environmental considerations to acquisition dynamics and construction management. Areas of emphasis currently being designed include land use and zoning, sustainable development, real estate finance, management of the development process, development company management, marketing and asset management, and entrepreneurship and leadership.

The Research Office

The Office of Research and Economic Development has overall responsibility for the university’s research enterprise. Working in an atmosphere characterized by its commitment to cultivating innovation and generation of new knowledge for the benefit of our global society, Mason’s scholars conduct research in an array of disciplines and subjects. The Office works to foster the continuation of these endeavors and to promote an environment that sustains the highest standards of scholarship, health, and safety.

The Office establishes, under the advisement of the Research Council, and administers the policies governing the conduct of research at the university. It also oversees the management of Mason’s research programs, assists investigators seeking external funding, and promotes interdisciplinary research. Additional information about Research Administration, the units managed by the office, and the resources and policies supporting students and scholars conducting research throughout the university, go to research.gmu.edu.
University General Education

University General Education

Rick Davis, Associate Provost for Undergraduate Education
Office of the Provost
Phone: 703-993-8722
Web: http://provost.gmu.edu/gened/index.html

All undergraduates seeking a baccalaureate degree must complete the University General Education Program requirements. Additional requirements for specific degree programs can be found in the college or school chapters of this catalog.

Life, Liberty, and the Pursuit of Happiness: A Rationale for General Education at George Mason University

“Life, liberty, and the pursuit of happiness”—this ringing phrase from the Declaration of Independence makes a fine statement about the ideals of general education (or, as it is more classically called, liberal education) as we strive to articulate it at Mason.

Let’s take the three parts of Thomas Jefferson’s affirmation of humanity’s “unalienable rights” and see how they apply to the goals of a general, or liberal, education.

Life.

A liberal education prepares us for life’s unpredictable, fascinating journey. One sobering truth about formal learning is that no matter how many courses we take or degrees we earn, we can’t master every skill and possess every piece of knowledge that we need to succeed in a dynamic world. A liberal education proposes that the highest value of the college experience is the development of our ability to continue learning, adapting, creating, and responding to an ever-changing society and career environment. A liberal education turns out to be the most practical of all because it never goes out of date; the habits of mind it fosters help us to stay current with our careers and the life of our times.

Liberty.

A liberal education takes its name from this part of Jefferson’s phrase; the root word for both the concept we so cherish and the education we practice is the Latin liber, “free.” This kind of education offers to increase our freedom—of thought and action, from prejudice and ignorance. It is the foundation stone of citizenship as Jefferson and his contemporaries envisioned that notion, a liberty built on rights, responsibilities, and respect for differences. A liberally educated person feels free to seek knowledge and wisdom from across the whole spectrum of human experience—free to challenge the assumptions of the past and also, after critical consideration, to accept them.

The pursuit of happiness.

The liberal arts tradition provides tools for the pursuit of a happier, more fulfilled life. The definition of happiness is personal; for some, an appreciation of “the best that has been thought and said”—or composed, constructed, painted, danced, or acted—is a necessary condition for happiness. For others, it might be an understanding of the wonder of the natural universe, the ability of humans to create marvelous new inventions, or the complexities of the social fabric in an increasingly borderless world. For still others, it is a call to serve one’s community and world in large and small ways, acting for the betterment of humanity. For most, it is some combination of the above. No matter the specifics, a liberal education offers the joy of discovery and the satisfaction of engagement with the largest questions of our time—and all time.

At George Mason University, we have created several distinctive ways to experience the excitement and gain the value of liberal education: the University General Education Program, detailed in the following pages; New Century College; and, for a small group of outstanding students, the Honors College. Though their approaches differ, as befits the creative spirit and diverse nature of our university, they are united in their commitment to the ideals of life, liberty, and the pursuit of happiness.

Category Goals and Requirements
Foundation Requirements

Foundation requirements help ensure that students master the tools and techniques necessary to succeed in college and throughout their lives and careers. These courses emphasize skills—in writing, speaking, and working with numbers and technology—that can be applied to any major field of study and career goal.

Written communication goal: Students develop the ability to use written communication as a means of discovering and expressing ideas and meanings: in short, employing writing as a way of thinking. Students begin this process at the fundamental level in English 101 (100 for ESL students) and build higher-level skills in English 302. Writing will be emphasized in many courses throughout a student’s career, and at least one course in every student’s major is designated “writing intensive.”

Required: English 101 (or 100), 302, and an approved writing-intensive course in the major.

Oral communication goal: Students develop the ability to use oral communication as a way of thinking and learning, as well as sharing ideas. Courses provide opportunities for students to express themselves in public or group settings, apply critical-thinking skills to public messages, and gain understanding of the cultural, psychological, political, and practical significance of communication, with a special emphasis on the role of communication in a free society.

Required: One approved course. Students will be expected to continue developing oral communication skills in additional general education courses as appropriate.

Quantitative reasoning goal: Students develop the ability to use and critically evaluate numerical information and create and critique logical arguments using quantitative reasoning. Courses are intended to give students the capability to reason quantitatively through the examination of important problems and ideas. Students must take a placement exam to determine their proficiency before attempting courses that satisfy this requirement. Those who demonstrate basic proficiency must satisfy this requirement with MATH 106. Those who demonstrate a higher proficiency may choose from among an approved set of courses that develop quantitative reasoning.

Required: MATH 106, or if the student has achieved an appropriate placement score on quantitative skills, one of the following: MATH 108, 110, 111, 113, 115, or 125; or STAT 250. (Students are assumed to have achieved satisfactory completion of the high school math required for admission.)

Information technology (IT) goal: Students develop a command of basic software and hardware concepts, terminology and functions, and file and data structures. They also use appropriate electronic tools for data organization and search, including databases, web browsers, and search engines; data analysis, including spreadsheets, geographic information systems, and statistical software; and data presentation and communication, including text, electronic slides, web pages, graphs, presentation software, HTML, word processing, and e-mail.

Ethics component: Students are required to have classroom experience in, knowledge of, and appreciation for fundamental ethical issues relating to IT and our changing world. These issues include computer security, privacy laws, public policy issues and professional codes of ethics, intellectual property issues, copyright, security, and financial data.

Required: One approved 3-credit course that meets all IT requirements, or completion of an appropriate combination of courses, proficiency exams, and modules.

Core Requirements

Core requirements help ensure that students become acquainted with the broad range of intellectual domains that contribute to a liberal education. By experiencing the subject matter and ways of knowing in a variety of fields, students will be better able to synthesize new knowledge, respond to fresh challenges, and meet the demands of a complex world.

Literature goal: Courses aim to achieve a majority of the following learning outcomes: students will be able to read for comprehension, detail, and nuance; identify the specific literary qualities of language as employed in the texts they read; analyze
the ways specific literary devices contribute to the meaning of a text; identify and evaluate the contribution of the social, political, historical, and cultural contexts in which a literary text is produced; and evaluate a critical argument in others' writing as well as one's own.

Required: One approved course.

**Arts goal:** Courses aim to achieve a majority of the following learning outcomes: students will be able to identify and analyze the formal elements of a particular art form using vocabulary appropriate to that form; demonstrate an understanding of the relationship between artistic technique and the expression of a work's underlying concept; analyze cultural productions using standards appropriate to the form and cultural context; analyze and interpret material or performance culture in its social, historical, and personal contexts; and engage in the artistic process, including conception, creation, and ongoing critical analysis.

Required: One approved course.

**Natural science goal:** Courses provide an understanding of natural science by addressing the critical approach of the scientific method, relation of theory and experiment, use of quantitative and qualitative information, and development and elaboration of major ideas in science.

Required: Two approved science courses. At least one course will include laboratory experience.

**Western civilization/world history goal:** Courses aim to achieve a majority of the following learning outcomes: students will be able to demonstrate familiarity with the major chronology of Western civilization or world history; demonstrate the ability to narrate and explain long-term changes and continuities in Western civilization or world history; identify, evaluate, and appropriately cite online and print resources; develop multiple historical literacies by analyzing primary sources of various kinds (texts, images, music) and using these sources as evidence to support interpretation of historical events; communicate effectively—through speech, writing, and use of digital media—their understanding of patterns, process, and themes in the history of Western civilization or the world.

Required: One approved course.

**Global understanding goal:** Courses examine some of the principal global issues and concerns that shape our world today. After completing a course from this category, students will be able to identify the causes and consequences of change in significant global issues. While some courses may focus on a specific issue, others may focus on a specific area or region outside the contemporary Western world by incorporating specific comparisons of several cultures. These courses stress the interconnectedness, difference, and diversity that are central to understanding and operating in a global society.

Required: One approved course.

**Social and behavioral sciences goal:** Courses provide students with an understanding of the social and behavioral sciences, including the development of major ideas in social science. Students engage in reasoning using the scientific method, the use of quantitative and qualitative information, and the analysis of empirical observations in relation to theory, among other methods.

Required: One approved course.

**Synthesis Requirement**

**Synthesis goal:** Synthesis courses draw on skills and knowledge attained through the foundation and core elements of the General Education Program, applying the power of liberal learning to a specific field or fields. Some synthesis courses link particular issues in a given field to wider intellectual and community concerns; others are interdisciplinary. Some synthesis courses also serve as capstone courses in a major. All synthesis courses require students to demonstrate advanced skills in oral and written presentations. All students will take one upper-division synthesis course, typically after all other university general education requirements are met (or concurrently enrolled).

Required: One approved course.
Writing-Intensive Course Requirement

As an integral part of the university’s commitment to literacy in all programs, all students must complete at least one course designated as writing intensive, and at least one course in each major is designed to meet this requirement. For more information, go to the Academic Policies chapter of this catalog. Please read the description of each major for the specific courses that fulfill this requirement.

Approved Courses

The course list reflects approved courses as of press time. For the most current list, go to provost.gmu.edu/gened/approvedcourselisting.html.

Foundation Requirements

Written communication (6 credits: 3 lower, 3 upper)

- ENGL 100 - Composition for Non-native Speakers of English Credits: 4
  or
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Oral communication (3 credits)

- COMM 100 - Public Speaking Credits: 3
  or
- COMM 101 - Interpersonal and Group Interaction Credits: 3

Information technology (IT, all)

- ADJ 300 - Research Methods and Analysis Credits: 4
- ANTH 395 - Work, Technology, and Society: An IT Perspective Credits: 3
- CHEM 350 - Computer Techniques for Chemistry Credits: 3
- ENGR 117 - Information Technology for Engineering Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- IT 103 - Introduction to Computing Credits: 3
- MUSI 415 - Music in Computer Technology Credits: 3

Information technology (IT, all except ethics)

- AVT 180 - Computers in the Creative Arts Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
• PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
  (these must be taken in sequence)
• PSYC 300 - Statistics in Psychology Credits: 4
• PSYC 301 - Research Methods in Psychology Credits: 3
• PSYC 372 - Physiological Psychology Credits: 3
• SOCI 410 - Social Surveys and Attitude and Opinion Measurements Credits: 3

Information technology (IT, Ethics)

• CS 105 - Computer Ethics and Society Credits: 1
• ENGR 107 - Introduction to Engineering Credits: 2
• ENGR 401 - Professional Practice and Management in Engineering Credits: 1
• IT 304 - IT in the Global Economy Credits: 3
• PHIL 112 - Ethics and the Cybersociety Credits: 1

Quantitative reasoning (3 credits)

• MATH 106 - Quantitative Reasoning Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 110 - Introductory Probability and Statistics Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
• MATH 125 - Discrete Mathematics I Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3

Core Requirements

Literature (3 credits)

• ARAB 325 - Major Arab Writers/Stories Credits: 3
• CHIN 310 - Survey of Chinese Literature Credits: 3
• CHIN 311 - Modern Chinese Literature in Translation Credits: 3
• CHIN 325 - Major Chinese Writers Credits: 3
• CHIN 328 - Asian American Women Writers Credits: 3
• CLAS 250 - Classical Mythology Credits: 3
• CLAS 260 - The Legacy of Greece and Rome Credits: 3
• CLAS 340 - Greek and Roman Epic Credits: 3
• CLAS 350 - Greek and Roman Tragedy Credits: 3
• CLAS 360 - Greek and Roman Comedy Credits: 3
• CLAS 380 - Greek and Roman Novels Credits: 3
• ENGL 201 - Reading and Writing about Texts Credits: 3
- FREN 325 - Major French Writers Credits: 3
- FREN 329 - Problems of Western Civilization in French Literature Credits: 3
- FRLN 330 - Topics in World Literature Credits: 3
- GERM 325 - Major Writers Credits: 3
- ITAL 325 - Major Italian Writers Credits: 3
- PHIL 253 - Philosophy and Literature Credits: 3
- RELI 235 - Religion and Literature Credits: 3
- RUSS 325 - Major Russian Writers Credits: 3
- RUSS 326 - A Survey of Russian Literature Credits: 3
- RUSS 327 - A Survey of Russian Literature Credits: 3
- SPAN 325 - Major Hispanic Writers Credits: 3

Arts (3 credits)

- ARTH 101 - Introduction to the Visual Arts Credits: 3
- ARTH 102 - Symbols and Stories in Art Credits: 3
- ARTH 103 - Introduction to Architecture Credits: 3

George Mason University

Institute for Conflict Analysis and Resolution

Phone: 703-993-1300  
Web: icar.gmu.edu  
College Code: CA

Administration

Andrea Bartoli, Director  
Julie Shedd, Associate Director for Administration  
Sandra Cheldelin, PHD Program Coordinator  
Mark Goodale, MS Program Coordinator  
Mara Schoeny, Graduate Certificate Program Director  
Agnieszka Paczynska, Undergraduate Program Director

Faculty

Professors: Avruch, Cheldelin, Gopin, Jeong, Rothbart, Rubenstein, Sandole

Associate professors: Bartoli, Cobb, Hirsch, Lyons, Paczynska, Warfield

Assistant professors: Goodale, Maulden, Nan, Schoeny, Simmons

Research professors: Korostelina, Price, Sluzki

Affiliate faculty: Dale, Dukes

Emeritus faculty: Mitchell

Course Work

The Institute for Conflict Analysis and Resolution (ICAR) offers all course work designated CONF in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

Phone: 703-993-4165  
E-mail: ugradcar@gmu.edu  
Location: Fairfax Campus
Agnieszka Paczynska, Undergraduate Program Director.

Conflict Analysis and Resolution (CAR) offers students a BA, a BS, or a minor in a growing interdisciplinary social science field with practical applications. Conflict analysis and resolution is committed to analyzing the sources and dynamics of conflict and the means for resolution toward lasting peace. All CAR students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. Required bridge courses cover conflict analysis and resolution at three levels: interpersonal conflict, community and organizational conflict, and international conflict. After selecting a level of conflict as a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest, such as anthropology, communication, government, philosophy, psychology, management, sociology, and New Century College. The major also requires 3 credits of field experience in the form of an internship, a service-learning opportunity, or study abroad.

GRADUATE PROGRAMS

Phone: 703-993-1300  
E-mail: icarinfo@gmu.edu  
Location: Arlington Campus

Sandra Cheldelin, PHD Program Coordinator

Mark Goodale, MS Program Coordinator

The Ph.D. program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

The M.S. in Conflict Analysis and Resolution is a two-year professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

GRADUATE CERTIFICATES

Phone: 703-993-1300  
E-mail: icarcert@gmu.edu  
Location: Arlington Campus

Mara Schoeny, Certificate Program Director

Five graduate certificate programs are administered by ICAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

College of Education and Human Development

Phone: 703-993-2010  
Web site: cehd.gmu.edu  
College Code: E1

Schools

- School of Recreation, Health, and Tourism  
- Graduate School of Education

The College of Education and Human Development (CEHD) comprises the School of Recreation, Health, and Tourism (RHT), and the Graduate School of Education (GSE). The college is committed to excellence, innovation, and collaboration in research and the preparation of professionals for the highest levels of practice and service in diverse schools, organizations, and communities.

CEHD provides leadership in transforming schools, organizations, and communities through research, teaching, and collaboration. CEHD faculty members prepare scholars and practitioners through multidisciplinary programs of study that facilitate the understanding, integration, and application of knowledge. Through research activities, faculty and students expand and refine the knowledge base for teaching and learning. In response to the richness and complexity of a pluralistic society, CEHD infuses diversity into academic programs and research. The faculty develops and supports knowledgeable, caring, and reflective professionals who facilitate excellence and equity for all learners. CEHD students and faculty demonstrate their growth and development in ways meaningful to their communication and professional organizations. Innovative programs and the integration of technology provide opportunities for students to develop, examine, evaluate, and practice professional knowledge, skills, and dispositions.

Administration

Gary Galluzzo, Dean  
Martin Ford, Senior Associate Dean  
Peter Barcher, Associate Dean for Research  
Joan Isenberg, Associate Dean for Outreach and Program Development  
Ellen Rodgers, Associate Dean for Teaching and Academic Affairs  
David Wiggins, Director of the School of Recreation, Health, and Tourism

Undergraduate Degrees, Minors, and Certificates

CEHD offers four undergraduate degrees, 13 minors, and one undergraduate certificate. The School of Recreation Health and Tourism within the College of Education and Human Development collaborates with the College of Humanities and Social Sciences to offer three minors in interdisciplinary areas of study. Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.

In addition, the college also collaborates with the College of Science (Departments of Atmospheric, Oceanic, and Earth Science; Chemistry and Biochemistry; Mathematical Sciences; and Physics and Astronomy) and the College of Visual and Performing Arts (Departments of Dance and Music) to provide six collaborative undergraduate degree concentrations or emphases in Biology Education, Chemistry Education, Earth Science Education, Mathematics Education Music Education, and Physics Education, and
one licensure program in Dance Licensure. CEHD also collaborates with New Century College to support three interdisciplinary degree concentrations which prepare students for graduate study in education. The requirements for each degree, minor, and certificate are described on their respective catalog pages.

In addition to the policies stated in the first chapters of this catalog, the following policies and procedures apply to all students in the college. All correspondence from the program, school, college, and university administration is sent to the student’s official Mason e-mail account. Students should use their Mason e-mail account to communicate with their program and other administrative units.

Graduate Degrees and Certificates

CEHD offers one doctoral degree, seven master's degrees, and 31 graduate certificates. The requirements for each degree and certificate are described on their respective catalog pages. In addition to the policies stated in the first chapters of this catalog, the following policies and procedures apply to all students in the college. All correspondence from the program, school, college, and university administration is sent to the student’s official Mason e-mail account. Students should use their Mason e-mail account to communicate with their programs and other administrative units.

Academic Policies

Students are ultimately responsible for their academic progress towards their degrees and/or certificates. They are strongly advised to consult the Academic Policies chapter of this catalog for information concerning university-wide requirements for degree and nondegree students in addition to those for this college. Students with questions regarding academic policies and college-level requirements should contact the CEHD Office of Academic and Student Affairs (Robinson Hall, Suite 307; 703-993-2080; cehdoasa@gmu.edu). Additional policy information and forms are available online at http://cehd.gmu.edu/oasa/.

Grading Policy

All CEHD undergraduate and graduate students are held to the university grading policies as described in the Academic Policies section of this catalog. Those students enrolled in a CEHD licensure program, however, must earn a B- or better in all licensure coursework. The following licensure programs have more stringent grading policies that are detailed in their respective catalog sections: MEd in Curriculum and Instruction with concentrations in Elementary Education, English as a Second Language, Foreign Language (Arabic, Chinese, French, German, Japanese, Latin, Russian, and Spanish), International Education FAST TRAIN ESOL (PK-12), International Education FAST TRAIN Elementary PK-6, Secondary Education; and the MEd in Counseling and Development.

Grade Appeals

Students may appeal grades that they believe were assigned unjustly or were based on unclear criteria in accord with the Academic Policies chapter of this catalog. Grade appeals should initially be directed to the School Director for courses taken within the School of Recreation, Health, and Tourism (RHT), and to the Program Coordinator for courses taken within the Graduate School of Education (GSE). The decision may be further appealed to the Associate Dean for Teaching and Academic Affairs, who reserves the right to convene the elected members of the CEHD Appeals Committee if there is sufficient evidence of procedural irregularity. The Associate Dean’s decision is not subject to review or further appeal.

Professional Teacher Licensure

CEHD is responsible for professional courses, special standards, and licensure recommendations for students completing state-approved (Virginia) licensure programs that prepare teachers, administrators, counselors, and related-instructional personnel.

For more information and the dates and times of Think You Want to Be a Teacher? information sessions, please contact the CEHD Office of Admissions (Robinson Hall, Room 103; 703-993-2892; cehdgrad@gmu.edu). Additional information is available online at http://cehd.gmu.edu/admissions/.

Course Work

CEHD offers all course work designated ATEP, EDAE, EDAL, EDCD, EDCl, EDEP, EDIT, EDLE, EDRD, EDRS, EDSE, EDUC, EDUT, EFHP, HEAL, IETT, PHED, PRLS, SPMT, and TOUR in the Courses chapter of this catalog.

School of Recreation, Health, and Tourism

Phone: 703-993-2060
Web: rht.gmu.edu

The School of Recreation, Health, and Tourism (RHT) offers one master's degree, four undergraduate degrees, six minors, and one undergraduate certificate. The MS in Exercise Science, Fitness, and Health Promotion prepares professionals to more adequately serve their communities or pursue advanced academic study. The BS in Athletic Training, accredited by the Commission on the Accreditation of Athletic Training Education (CAATE), prepares students for careers in athletic training and graduate study in other allied health professions. The BS in Health, Fitness, and Recreation Resources prepares students for supervisory and management careers in private and public parks and recreation systems (clinical and community), health promotion agencies, non-profit and for-profit sport organizations. The Parks and Outdoor Recreation and Therapeutic Recreation concentrations are accredited by the National Recreation and Park Association (NRPA). The BSEd in Physical Education, accredited by the National Council for the Accreditation of Teacher Education (NCATE), prepares students for a teaching career (K–12) in public and private schools. The BS in Tourism and Events Management degree is one of the fastest growing majors at the university.

For more information and the dates and time of RHT Orientation Sessions, please contact the RHT Office (Bull Run Hall [Prince William Campus] Suite 213; 703-993-2098; srht@gmu.edu). Additional information is available online at rht.gmu.edu.

Faculty

Professors: Anderson, Brayley, Nauright, D. Wiggins

Associate professors: R. Baker, Banville, Bever, Daniels, Dieke, Kozlowski, Miller, Rikard, P. Rodgers, Schack, B. Wiggins

Assistant professors: Allen, Ambegaonkar, Caswell, Esherick, Harmon, Lee, Park, Shelby, Winchester

Instructors: Norden, Parham

Course Work

RHT offers course work designated ATEP, EFHP, HEAL, PHED, PRLS, SPMT, and TOUR in the Courses chapter of this catalog. Additional courses are offered for elective credit to George Mason University students. These courses are included under PHED and PRLS.
Writing-Intensive Requirement

The university requires all undergraduate students to successfully complete at least one 300-level or above course designated “writing-intensive” (WI) in their major(s). For RHT students, the WI requirement is satisfied by the successful completion of PRLS 450 and/or PHED 365, dependent on program requirements.

Interdisciplinary Minors

In addition to school-based minors, RHT offers two minors in interdisciplinary areas of study. These minors require course work from two or more disciplines and are administered by interunit faculty groups. In accordance with university policy, at least 8 credits must be applied only to the minor and may not fulfill requirements of the student's major concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Minor in Sport Communication

The Sport Communication Minor is offered jointly by the School of Recreation, Health, and Tourism and the Department of Communication. For details, see the Department of Communication section in the College of Humanities and Social Sciences chapter of this catalog.

Minor in Sustainability

The Sustainability Minor is offered jointly by the Department of Environmental Science and Policy and New Century College. Students may take select Parks, Recreation and Leisure Studies (PRLS) and Tourism and Events Management (TEM) courses to meet elective requirements. For details, see the Department of Environmental Science and Policy section in the College of Science chapter of this catalog.

Complementary Certificate Programs

Students may also complete a complementary graduate certificate outside of RHT in the following areas:

Environmental Management Undergraduate Certificate (SC-CERB-EVMG)

For details on this 27-credit undergraduate certificate, see the Department of Environmental Science and Policy section of the College of Science chapter of this catalog.

Note: Students interested in the Certificate in Environmental Management should take BIOL 213 and either BIOL 303 or BIOL 304 instead of BIOL 103 and 104.

Gerontology Undergraduate Certificate (HH-CERB-GERO)

For details on this 24-credit undergraduate certificate, see the College of Health and Human Services chapter of this catalog.

Note: Students interested in the Certificate in Gerontology should take BIOL 124 and BIOL 125.

Physical Activity and Sports Courses

RHT courses in physical activity and sports provide a broad range of opportunities that promote the health and wellness of students, faculty, and staff. Taught by experts with a wealth of experience and commitment to sharing their knowledge and skills,
the courses include individual and team sports, self-defense and martial arts, and recreation activities concerned with wilderness and outdoor pursuits. Open to students in any major, these courses are designed to foster educational growth, encourage leisure interests, and promote lifetime fitness for the entire Mason community.

Graduate School of Education

Phone: 703-993-2892
Web: cehd.gmu.edu

The Graduate School of Education (GSE) offers one doctoral degree, six master's degrees, seven minors, and 31 graduate certificates. Within each of these degree programs students have the option to choose a concentration or emphasis that best meets their interests or needs. Additionally, students may pursue course work leading to initial teacher licensure.

Faculty

Associate professors: Bannan-Ritland, Bauer, Bon, Brazer, Brigham, Burns, Castle, Clark, Dabbagh, DeMulder, Duck, Falconer, Fox, Grant, Kaffenberger, Kidd, Kitsantas, Ndura, Osterling, Pierce, Razeghi, Reybold, Samaras, Sanchez, Sprague, Talleyrand, Thomas, Thorp, Upperman, Werner, Wong, Zenkov

Assistant professors: P. Baker, Buehl, Cozart, Day, Frazier, Hanley, Hardy, Hjalmarson, Hruby, Jerome, Kalbfleisch, Malloy, Nasser, Parsons, Peters, Regan, Sheridan, Shockley, Suh, Swanson, Taboada, View, N. Williams, Williams van Rooij

Instructors: Hathaway, Rioux-Bailey

Course Work

GSE offers course work designated EDCD, EDCI, EDEP, EDIT, EDLE, EDRD, EDRS, EDSE, EDUC, and EDUT in the Courses chapter of this catalog. Students can pursue a Master's degree and up to two graduate certificates concurrently.

Collaborative Undergraduate Degree Licensure Programs

GSE supports undergraduate students from a variety of disciplines interested in education and teacher licensure. Six collaborative undergraduate degree licensure programs are available. For more information, contact the GSE Undergraduate Academic Advisor at 703-993-2078, usie@gmu.edu, or visit usie.gmu.edu.

Dance Licensure (PK–12)
Upon successful completion of the requirements for a BA or BFA in Dance, students may pursue course work that will allow them to attain licensure to teach dance in Virginia public school systems. For details, see the Department of Dance section in the College of Visual and Performing Arts chapter of this catalog.

**Concentration in Biology Education**

Upon successful completion of the BA in Biology or the BS in Biology with a concentration in Biology Education, students can obtain licensure to teach biology in Virginia public school systems. For details, see the Department of Molecular and Microbiology (MMB) and the Department of Environmental Science and Policy's (ESP) collaborative Biology program section in the College of Science chapter of this catalog.

**Concentration in Chemistry Education**

The BS in Chemistry with a concentration in Chemistry Education allows students to obtain licensure to teach chemistry in Virginia public school systems. For details, see the Department of Chemistry and Biochemistry section in the College of Science chapter of this catalog.

**Concentration in Earth Science Education**

The BS in Earth Science with a concentration in Earth Science Education allows students to obtain licensure to teach earth science in Virginia public school systems. For details, see the Department of Atmospheric, Oceanic and Earth Sciences section in the College of Science chapter of this catalog.

**Concentration in Mathematics Education**

Upon successful completion of the BA in Mathematics or the BS in Mathematics with a concentration in Mathematics Education, students can obtain licensure to teach mathematics in Virginia public school systems. For details, see the Department of Mathematical Science section in the College of Science chapter of this catalog.

**Concentration in Music Education (PK–12)**

The BM in Music with a concentration in Music Education allows students to obtain certification to teach in Virginia public school systems. Students may follow an instrumental or choral/general music emphasis in the curriculum. For details, see the Department of Music section in the College of Visual and Performing Arts chapter of this catalog.

**Emphasis in Physics Education**

The BS in Physics with an emphasis in Physics Education allows students to obtain licensure to teach high school physics in Virginia public school systems. For details, see the Department of Physics and Astronomy section in the College of Science chapter of this catalog.

**Peace Corps Fellows and Master's International Programs (MIP)**

The FAST TRAIN (The Foreign Affairs' Spouses Teacher Training) Program is an approved site for the Peace Corps Fellows and Master's International Programs. While FAST TRAIN has traditionally prepared teachers for international service, it has entered into an agreement with the Peace Corps to offer the Peace Corps Fellows Program which trains returning volunteers to teach elementary education or English as a Second Language (ESL) in multicultural settings in the Washington, D.C. metro area. FAST TRAIN also participates in the Peace Corps Master's International Program that prepares outgoing volunteers for their ESL
teaching assignments abroad as well as provides a program for completion of English as a Second Language (ESL) licensure and a MEd in Curriculum and Instruction.

College of Health and Human Services

Phone: 703-993-1901
Web: chhs.gmu.edu
College Code: HH

Academic Departments

- Global and Community Health
- Health Administration and Policy
- School of Nursing
- Social Work

The mission of the College of Health and Human Services (CHHS) is to equip professionals to provide leadership, care, and services related to health promotion, wellness, disease prevention, and quality of life through the promotion of physical, social, and environmental health practices. Graduates practice in a variety of roles in settings that are complex, multicultural, and dynamic. The college is a resource for health promotion to the university, as well as to citizens of Virginia.

The State Council of Higher Education for Virginia and the State Board of Nursing approved the baccalaureate nursing program in 1974. Since then, the program has grown from a department of nursing to a school of nursing. In 1993, the school was reorganized into the College of Nursing and Health Science, and in 2006, into the College of Health and Human Services to provide the breadth needed to respond to dramatic and dynamic fundamental changes occurring in health care and social work. The expanded, multidisciplinary CHHS offers degree programs and research opportunities in health administration, health policy, health information systems, health services research, nursing, public health, nutrition, global health, rehabilitation science, gerontology, and social work.

Administration

Shirley Travis, Dean
Keith Howell, Associate Dean, Research and Program Evaluation
J. Goodlett McDaniel, Associate Dean, Practice, Marketing, and Finance
Robin Remsburg, Associate Dean and Director, School of Nursing
Frank J. Whittington, Associate Dean, Academic Affairs
Susan J. Swett, Assistant Dean, Student Affairs
P. J. Maddox, Chair, Health Administration and Policy
Lisa Pawloski, Chair, Global and Community Health
Miriam Raskin, Acting Chair, Social Work

Faculty

Faculty emeriti: Ailinger, Boyd, Brenkus, Carty, Jenkins, Johnson-Brown, Langley, Parker-Smith, Redmond, Silva, Vail, Walker

Professors: Butler, Gaffney, Gerber, Hadley, Howell, Maddox, Meiners, Metcalf, Moore, Raskin, Remsburg, Ritchie, Rose, Sluzki, Sorrell, Travis, Whittington

Associate professors: Baghi, Cangelosi, Chong, Cuellar, Davidson, Davis, Douglas, Eckenwiler, Harris Rome, Keyser, Mahon, McDaniel, Moidu, Normile, Panniers, Pawloski, Ternus, Vakalahi, Wolf-Branigin, Wu
**Assistant professors:** Boland, Carle, Cartwright, Cleaveland, Gewa, Hahn, Ihara, Jacobsen, Kitsantas, Kodadek, Maradiegue, Miklancie, Moss, Oh, Perlin, Roberts, Rudowski, Smoczynski, Tompkins, Urban, Webster, Weinstein, Willis, Winter, Wojtusiak, Yang, Young, Zhou

**Instructors:** Almond, Blasser, Campo, Clark, Cox, Davis, Dickman, Durham, Freeborne, Gaston, Gillette, Henderson, Liss, Middle, Mulqueen, Shiver, Stoehr, Toulouse, Venske, Welsh

## Course Work

CHHS offers all course work designated GCH, HAP, HHS, NURS, and SOCW in the Courses chapter of this catalog.

## Academic Programs

The College of Health and Human Services is dedicated to educating the next generation of health professionals, researchers, and educators. Our School of Nursing produces more new RNs each year than any other program in the Commonwealth of Virginia, and these graduates have one of the state’s highest pass-rates on the nursing licensure exam. Through the PhD program in nursing, CHHS is helping fill the need for nursing faculty and researchers. The College’s Department of Health Administration and Policy prepares students for careers as leaders and managers of health care organizations and as health policy-makers at both the state and national levels, while the Department of Global and Community Health trains public health practitioners with a global reach, who can intervene and improve the health of both local and international populations. The Department of Social Work educates both undergraduate and graduate students to be professional social workers able to work in either community organization or clinical settings. These academic units offer a variety of specializations within degree programs, including nutrition, gerontology, rehabilitation science, epidemiology and biostatistics, forensic nursing, health technology and informatics, data security, clinical social work, and conflict analysis and resolution.

## Professional Conduct Policy

All CHHS students are expected to conduct themselves professionally at all times. This means that certain behavior is prohibited, including verbal abuse, insubordination, and behavior that threatens the safety of a client, another student, faculty member, or other health care provider when the behavior occurs within the context of an academic program. CHHS reserves the right to place on probation, suspend, or dismiss any student in its programs who engages in such conduct. Students disciplined for such reasons have the right to appeal to their department chair or director.

## Student Affairs

The Office of Student Affairs provides support to students, faculty and staff on a variety of admissions, academic, and policy issues. The office is involved with recruiting new students; pre-admission advising; processing applications for graduate programs and Nursing BSN programs (junior-level admission to the BSN pathways, and the accelerated second-degree BSN); and conducting orientations for newly-admitted students.

Student Affairs maintains the college’s student records; reviews and recommends action on undergraduate and graduate student requests for exceptions to academic policy; processes standard academic actions; and approves student records for degree completion prior to graduation. Student grade appeals fall under university policy, described in the Academic Policies section of the catalog.

Each student is assigned an academic advisor with whom he or she should meet at least once a semester to insure program graduation requirements are met. The assigned advisor may be a faculty member, a departmental advisor, or an advisor in the Office of Student Affairs.

## Student Responsibility
Students are required to have an active Mason e-mail account, and to update any change of address on-line through Patriotweb. The college will not use personal (non-GMU) e-mail addresses to communicate with students. Students are responsible for knowing the university academic policies and the policies governing their program as stated in the university catalog, and should regularly monitor their Mason transcript on-line and their degree progression through the degree evaluation tool on Patriotweb [link to https://patriotweb.gmu.edu/].

Background Checks

Many clinical agencies and practicum sites mandate that students working there have a criminal background check. All students enrolled in the School of Nursing are required to complete a criminal background check prior to beginning the program. Students enrolled in other CHHS programs may be required to complete background checks before entering a practicum environment. Information obtained from the background check is strictly confidential but may result in a student’s inability to perform clinical or practicum activities and, therefore, will disqualify the student from entering or continuing in the program. School of Nursing students are sent information regarding the criminal background check process, and associated fees, in their admission packets. Other students are informed individually as they are placed in practicum activities requiring background checks. Students are responsible for notifying the assistant dean of student affairs of any arrests, regardless of adjudication, that occur after acceptance and during enrollment in the program. Failure to promptly notify the assistant dean of student affairs may be grounds for dismissal from the program.

Health Records

To comply with the regulations established by the Commonwealth of Virginia and the agencies to which students are assigned and to minimize risks to student health, every student enrolled in a CHHS program requiring clinical or practicum coursework must document and submit evidence of good health and provide current immunization records to both the CHHS Office of Student Affairs and to the university’s Student Health Services at the time of admission to the college. Immunizations may be obtained through Student Health Services on any of the Mason campuses.

Students should keep copies of their health records should agencies require them for clinical and practicum assignments. All costs associated with immunizations and certifications are the student’s responsibility.

Insurance and Liability

Students are strongly advised to maintain health insurance coverage at all times. A student health insurance plan is available to eligible students through Mason. Students are responsible for their own health care, including emergency care, and CHHS assumes no financial responsibility for the health care of students. Enrolled students who are performing internships and similar experiential learning as a required part of their academic programs are also considered agents of the university. They are covered by the Commonwealth of Virginia Risk Management Plan while engaged in their prescribed educational duties.

Academic Outreach

The mission of the Office of Academic Outreach is to provide off-campus graduate coursework that supports the continued professional development and competency of practicing health professionals. This purpose is accomplished through collaborative relationships with expert health and instructional resources—individual and organizational—both internal and external to the University.

Academic Policies

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.
School of Nursing

Phone: 703-993-1926 (Undergraduate programs)
Phone: 703-993-1947 (Master's programs)
Phone: 703-993-1961 (Doctoral program)

Faculty

Emeriti: Ailinger, Boyd, Brenkus, Carty, Jenkins, Johnson-Brown, Langley, Paker-Smith, Redmond, Silva, Vail, Walker

Professors: Gaffney (assistant dean, doctoral studies), Milligan, Moore (assistant dean, nursing research), Remsburg (associate dean/director), Sorrell, Travis (dean)

Associate Professors: Cangelosi, Chong, Davidson, Douglas, Mahon, McDaniel (associate dean, business development), Normile, Panniers, Ternus (academic outreach director), Wu

Assistant Professors: Boland, Hahn (assistant dean, masters/post masters division), Kodadek, Maradiegue, Miklanci, Moss, Oh, Roberts, Smoczynski, Urban (assistant dean, undergraduate division), Willis, Young, Zho

Instructors: Almond, Blasser, Campo, Cox, Davis, Dickman, Durham, Liss, Middle, Mulqueen, Stoehr, Toulouse, Venzke, Welsh

The School of Nursing is a teaching/learning organization with a national and international academic reputation, grounded in sound general education. It develops and supports a diverse faculty who are visionary and competent practitioners, scholars, and researchers, excellent in teaching in academic and practice settings, and responsive to the needs of students and the community. Specifically, the Nursing programs prepare graduates to function as providers, coordinators, and managers of care and for leadership, advanced practice, and nurse scholar roles, as well as members of the nursing profession. Graduates of the School of Nursing are prepared to function as interdisciplinary health professionals and citizens who provide leadership, care, and service to the community. The School promotes health and well being through its programs and centers, engaging in scholarly activities and research with the aim of maximum health for all people.

Global and Community Health

Phone: 703-993-3126
web: chhs.gmu.edu/gch/

Faculty

Professors: Howell (associate dean for research and program evaluation), Butler, Metcalf, Sluzki, Gerber (chronic illness & disability center director), Whittington (associate dean for academic affairs)

Associate Professors: Baghi, Pawloski (chair), Keyser

Assistant Professors: Gewa, Jacobsen, Rudowski, Webster, Weinstein, Winter

Instructors: Freeborne, Gaston, Gillette
The Department of Global and Community Health (GCH) is an academic department within the College of Health and Human Services (CHHS), and as such it echoes the college’s overall goals. Specifically, the educational mission of GCH is to provide undergraduate and advanced degrees in health-related disciplines centered in global and community issues. Its research mission is to promote and develop solid and meaningful research programs that help define and address health issues and the needs of affected populations at the regional and global level. Its service mission is to increase the awareness of these problems, enhance health-promoting information, and collaborate with other organizations toward enhancing community, national, and international health.

■ Health Administration and Policy

Phone: 703-993-1929
web: hap.gmu.edu/

Faculty

Professors: Hadley, Maddox (chair), Meiners,

Associate Professors: Eckenwiler, Moidu, Cuellar

Assistant Professors: Carle, Cartwright, Kitsantas, Perlin, Wojtusiak, Yang

Instructors: Henderson (director, outreach & education coordinator), Shiver

The mission of the Department of Health Administration and Policy (HAP) is to provide innovative education and research that contributes to improving health and human systems and the quality of life and health for those they serve across the life span. The Department prepares working professionals and those who aspire to careers in health systems and organizations to work as administrators, health technology officers, data security managers, and health policy analysts.

The research and scholarly activities of the department contribute to basic and applied knowledge about the organization and effective management, financing and performance of U.S. health systems and public health services to foster innovation and quality improvement and effective use of information technology by health services researchers, health/social system managers, and public health policy- makers. The Department works with consumers, stakeholders, students, faculty, alumni, research funders, and the community to ensure rigorous, relevant educational programs (including post-graduate professional development), service activities, and the development and timely dissemination of research.

■ Social Work

Phone: 703-993-2030 (Undergraduate programs)
Phone: 703-993-4247 (Graduate programs)
web: chhs.gmu.edu/sw/

Faculty

Professors: Raskin (interim chair), Ritchie, Rose

Associate Professors: Davis, Harris Rome, Vakalahi, Wolf-Branigin

Assistant Professors: Clark, Cleaveland, Ihara, Tompkins,
The mission of the BSW Program is to prepare entry level generalist social work professionals who will demonstrate ethical leadership in innovative multidisciplinary practice, social reform, and research in diverse communities. Students will be provided with a range of opportunities to develop a broad knowledge and skills base consistent with the systems and strengths perspectives. They are expected to practice using core social work values and to examine and resolve ethical dilemmas. Classroom and field experiences prepare students to be competent in the use of relevant new technologies and in culturally sensitive generalist social work practice.

The MSW Program seeks to prepare social workers for advanced professional practice who are innovative leaders bringing superior management, interpersonal, technological, research, and communication skills to the human service delivery system. Through a concentration in either social change or clinical practice, graduates will be prepared to empower individuals, strengthen families and communities, stimulate positive change through advocacy, social and political action, and help meet the local, national, and global challenges of the new century. The MSW Program builds upon a foundation of generalist social work knowledge and skills that integrates micro and macro theory and practice, and emphasizes empowerment and systems transformation. This foundation equips students to enhance human well-being and to promote social and economic justice through ethical professional practice with culturally diverse individuals, families, groups, organizations, and communities.

About the College

The College of Humanities and Social Sciences (CHSS) is composed of 11 departments in the humanities and social sciences and 11 major interdisciplinary programs. The college is also home to New Century College, which offers an innovative interdisciplinary major as well as a first-year experience program for students in all majors, and Technology Across the Curriculum, which promotes the use of technology to enhance learning in all courses and disciplines. The college houses the university-wide Honors Program in General Education for students from all majors. Highly qualified undergraduates can take advantage of honors programs in their majors and accelerated master’s degree programs, which enable them to earn both an undergraduate and a graduate degree in five years. The college has a distinguished faculty of more than 400, including a Nobel laureate, a MacArthur fellow, and recipients of the Pulitzer Prize and Guggenheim Fellowship.

Programs of study at the undergraduate level emphasize global awareness, research experiences, and opportunities such as internships that prepare students for the workforce. Programs of study at the graduate level provide opportunities for career development and advancement, professional education, participation in research, and personal fulfillment. All programs encourage directly or indirectly the exploration of contemporary issues through a dynamic curriculum that fosters an informed understanding of real world problems. The college provides students with an education that enables them to think critically, adapt to the changing conditions of society, and provide informed leadership to future generations.

Policies for All Students
The requirements for each academic program offered by the college are described in the sections below. All students are subject to the policies stated in the first chapters of this catalog. Additional policies and procedures for students in the college are presented in this chapter.

George Mason uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail account, use it to communicate with their department and other administrative units, and check it regularly for important information.

**Registration and Degree Audit**

Students are responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses, and students may not sit in on classes for which they are not registered. All students should verify the accuracy of their enrollment before the end of the add period and should check PatriotWeb to verify that they are registered for the classes that they think they are.

All students are responsible for reviewing their own transcripts and degree audits regularly to ensure that they are correct and that they are on track to meet all their requirements.

**Withdrawal**

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the relevant dean (undergraduate academic affairs or graduate academic affairs) and are typically allowed only for full semesters at a time (a withdrawal from all enrolled courses). Withdrawals are only permitted for non-academic reasons; no withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible and never after the last day of classes.

**Grade Appeals**

Grade appeals should be made to the department or program following the process specified in the Academic Policies chapter of this catalog. If they are resolved within the department or program, that unit is the final level of appeal. The departmental decision may be appealed to the dean only on the basis of procedural irregularity. Undergraduate students should address such appeals through the Office of Undergraduate Academic Affairs and graduate students through the office of Graduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal.

**Grievances**

Grievances should be directed in writing to the senior associate dean.

**Accommodations for Disabled Students**

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

**Policies for Undergraduate Students**

The college offers 16 bachelor of arts (BA) degrees, 7 bachelor of science (BS) degrees, and a bachelor of individualized study (BIS) degree. The undergraduate degree consists of course work in four areas: university-wide general education, college level
requirements, a major area of study, and electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.”

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

The college cooperates with the Institute for Conflict Analysis and Resolution (ICAR) to provide courses from various disciplines in the college toward a BA, BS, and minor in conflict analysis and resolution (CAR). More information about CAR undergraduate degree programs can be found in the Institute for Conflict Analysis and Resolution chapter.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies and college-level requirements should contact the CHSS Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; chssdean@gmu.edu).

Additional policy information and forms are available online at http://www.gmu.edu/student/academicaffairs/.

Excluded Courses and Credits

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in the College of Humanities and Social Sciences. Students may use nonactivity PHED and PRLS courses for elective credit for college degrees. For a current list of PHED and PRLS courses that may be used for credit in the college, see the CHSS Undergraduate Academic Affairs Office Web site at at http://www.gmu.edu/student/academicaffairs/. Military Science (MLSC) courses cannot be counted toward credits required for a degree in the college.

Once admitted to Mason, students may not take CLEP exams and apply credits from those exams to degrees in the College of Humanities and Social Sciences. Students may apply credits from CLEP exams to degrees in the college if those credits were awarded at the time of admission.

Academic Load

The university limits undergraduate students with a cumulative GPA below 2.00 to 13 credit hours per semester. All undergraduate students returning from suspension are also limited to a maximum of 13 credit hours. Exceptions to this rule are very rare and only occur in exceptional cases.

Undergraduate students in good standing may enroll in up to 18 credit hours each semester. In exceptional circumstances, students may request an overload of the maximum credit hours. Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.
Withdrawals

Courses for which a withdrawal is approved receive a grade of "W".

Credits graded "W" do not affect a student's GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student's academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

Consortium of Universities Registration

Participation in consortium registration is available to degree-seeking juniors and seniors in good standing currently enrolled at Mason. Participation is limited to courses that are approved by the student's department chair and academic dean, apply to the student's program of study, are not offered during that semester at Mason, and have space available at the consortium institution. Students should consult with the Consortium Coordinator in the Registrar's Office, as additional restrictions may apply. Students may take just one course per semester, with a career maximum of two courses. Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Credit to Be Earned at Other Institutions

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean’s office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses can seldom be approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere review.

Courses elsewhere that have been pre-approved by the dean’s office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar's Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Additional information about study elsewhere can be found at http://www.gmu.edu/student/academicaffairs/.

Study Abroad

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:

- Have a cumulative GPA of 2.25 or higher at Mason
- Have completed the immediately preceding semester at Mason with a 2.00 or higher
- Have completed the necessary forms and have obtained all required signatures and course equivalencies
The Center for Global Education may have higher academic standards and students must meet all eligibility requirements.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

**Academic Clemency**

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters. To be considered for this exception, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
- Submit their request in writing by the last day of classes for their first semester back at George Mason
- In order to make this request, students should (a) enroll in at least 6 hours during their first semester back at George Mason and (b) earn at least a 2.50 semester GPA with no grade below “C.” If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

Additional information about clemency can be found at [http://www.gmu.edu/student/academicaffairs/](http://www.gmu.edu/student/academicaffairs/).

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Dean’s Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the Student Policies and Appeals Committee, a standing committee elected by the college faculty. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies chapter of this catalog.

The grade appeal process is discussed above.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Undergraduate Academic Affairs. When a department denies a substitution or waivers of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval.

The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester. Appeals of these decisions may be made to the Student Policies and Appeals Committee on the basis of procedural irregularity only, and it is the final level of approval.

Student Policies and Appeals Committee is the final level of appeal for college level requirements for CHSS; retroactive adds, withdrawals, and graduation; and return from suspension and dismissal. This committee is the final level of approval.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

**Teacher Licensure**
Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Minors

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the Registrar.

College-Level Requirements for Undergraduate Students

Bachelor of Arts

The BA degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements (university-wide general education requirements or requirements for the major).

- Philosophy or religious studies: 3 credits fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI.
- Natural science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CHSS Undergraduate Academic Affairs Office about a possible waiver of this requirement.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). This requirement may be fulfilled by the following courses:
  - ANTH 114, 300, 301, 302, 304, 305, 306, 311, 313, 330, 332, 396
  - ARTH 203, 204, 319, 320, 380, 381, 382, 383, 384, 385, 482
  - CHIN 318, 320, 325
  - DAN C 118
  - ECON 361, 362
  - FREN 451
  - GEOG 101, 316, 325, 330, 399
  - GOVT 328, 332, 333, 340, 341, 345, 432, 433
  - MUSI 103
  - RELI 211, 212, 272, 313, 314, 315, 337, 374, 375, 490
  - RUSS 353, 354
Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Requirements for each major are listed in the departmental sections that follow.

**Bachelor of Science**

The BS degree provides students with a more intensive approach to the core technical questions of their majors. This curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. CHSS students pursuing a BS must complete the university-wide general education program plus 1 additional credit of natural science (for a total of 8 credits), which must be fulfilled by an approved two-semester laboratory science sequence in a single science. This may not be fulfilled by BIOL 124 and 125. Requirements for each major are listed in the departmental sections that follow.

**Transfer Students**

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) with a curriculum grade point average (GPA) of at least 2.75 are considered to have met all of George Mason University’s lower level general education requirements. They are still required by the university to complete English 302 and a synthesis course. Transfer students who meet the conditions above and are pursuing a degree in CHSS are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor's degree from an accredited institution who are pursuing a degree in CHSS are also considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

**Policies for Graduate Students**

The college offers 16 master’s degrees, including a master of public administration and a master of fine arts in creative writing, and 11 doctoral degrees.

**Graduate Admission**

Admissions decisions are made by faculty committee and are not subject to further appeal.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

1. During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
2. There has been a misrepresentation in the application process.
3. Prior to the first day of classes for the term admitted, the college learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

**Provisional Admission**

Students provisionally admitted to their graduate degree program are not eligible to enroll in consortium course work or study at another institution until the conditions of the provisional contract have been met. Provisionally admitted students are also not eligible to participate in any study abroad programs until the provisional qualifier has been removed. Transfer of credit requests
for course work taken in non-degree status at Mason or from another institution prior to admission will not be considered until
the provisional contract has been fulfilled.

**Academic Load**

Graduate students can enroll in up to 12 credits of course work each semester. Non-degree students can enroll in up to 10 credits
of course work each semester.

**Non-degree Enrollment**

Applicants who have been denied admission to a graduate certificate, master’s or doctoral program are not permitted to take
graduate courses in that discipline as a non-degree student.

Graduate non-degree students may enroll in 500-, 600-, and 700-level courses. In exceptional cases graduate non-degree students
in the College of Humanities and Social Sciences may request to enroll in an 800-level course if they have an appropriate
academic or professional background, and have written permission of the course instructor, director of the graduate program
offering the course, and the graduate dean.

**Consortium of Universities Registration**

Eligible students may enroll in courses at any of the institutions in the Consortium of Universities in the Washington
Metropolitan area. Students are limited to one consortium course per semester, with a career maximum of 6 credits. To register
for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with
grades of IN on their record or who earned grades of C or F in the most recent semester are not eligible to register for a
consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in
additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their
first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must
wait until the grades for the previous semester have been posted. More information about the Consortium of Universities can be
found in the Academic Policies chapter.

**Transfer of Credit**

To be eligible for transfer, credits must have been earned at an accredited graduate degree-granting institution (and applicable to
a graduate degree at that institution) or at Mason while in non-degree status. Courses accepted for transfer credit must have been
completed within six years of the admission term and with a grade of B or better (3.00 or higher). Courses with grades of P or S
are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a B (3.00) or better. Some
programs have more stringent standards on transfer of credit; students should contact their graduate program for specific
information.

**Credit from Other Institutions**

Students must obtain all approvals, including course equivalencies, prior to enrolling in any course work at another institution.
All appropriate paperwork must be submitted to the Registrar’s Office by the last day to add during the academic term the course
meets. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason’s drop/add
deadlines in terms of acquiring necessary approvals.

**Dissertation Committee Criteria**

All dissertation committees must consist of at least three members of the graduate faculty, two of whom have a full-time
appointment at Mason. At least one member must be a tenured or tenure-track faculty member in the College of Humanities and
Social Sciences, and at least one member must be from outside the student’s academic unit. Additional members may be appointed who are not members of the graduate faculty or who are not full-time employees of the university. Individual departments and programs may set additional requirements for committee membership. The graduate program director recommends appointment of the dissertation committee to the dean. Though the dean appoints the committee it is the responsibility of the student to find qualified faculty who are willing and able to supervise the dissertation.

**Dissertation (999) Registration**

Doctoral students must be advanced to candidacy before they may enroll in 999. Students must register for 999 before the add deadline published each semester in the *Schedule of Classes*. Once doctoral students begin registering for 999, they must enroll in at least 3 credits of 999 each semester (excluding summers) until they have completed the total number of dissertation credits required on their individual program of study. Once enrolled in 999, all doctoral students must maintain continuous enrollment in 999 until they deposit their approved dissertation in the University Library. If they have completed the number of dissertation credits required on their program of study, they may maintain continuous enrollment by registering for only 1 credit of 999. See detailed information in the Academic Policies chapter of this catalog.

**Graduate Appeals of Dismissal or Termination**

All graduate students should be familiar with the university polices on dismissal and termination as stated in the Academic Policies chapter. Students who meet the criteria for dismissal or termination may submit a written appeal to the Office of Graduate Academic Affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation. Appeals of termination and dismissal are reviewed at the beginning of each semester by a faculty committee. The ruling of that committee represents the final decision of the college.

**Accelerated Master’s Degree Programs**

Many graduate programs in the College of Humanities and Social Sciences offer highly-qualified undergraduates the opportunity to apply to accelerated master’s degree programs. Students accepted into an accelerated master’s degree program obtain both a bachelor’s and a master’s degree after satisfactory completion of 144 - 150 credits (number of required credits depends on the degree programs).

Students admitted to an accelerated master's degree program may use up to six graduate credits (courses at the 500 or 600 level) in partial fulfillment of requirements for the undergraduate degree. Upon completion and conferral of the undergraduate degree with satisfactory performance in graduate courses (minimum grade of 3.00 in each), students are given advanced standing in their master’s program.

Undergraduates may take a maximum of six additional graduate credits while undergraduates and mark them for reserve graduate credit. These credits are not used to fulfill undergraduate degree requirements but can be applied to the master’s degree. See the section on Graduate Course Enrollment by Undergraduates in the Academic Policies chapter of the catalog. Courses taken for reserve graduate credit must be approved in advance by the Office of Undergraduate Academic Affairs and the appropriate paperwork filed with the Office of the Registrar.

Students must fulfill all other master’s degree requirements. For application information, contact the individual graduate degree program.

The college offers these accelerated master’s degree programs:

- Economics
- English with a concentration in linguistics
- Global Affairs
- Philosophy
- Political Science
- Psychology with a concentration in biopsychology
- Public Administration
- Sociology

Minors

- Administration of Justice
- African and African American Studies
- American Government
- Ancient Mediterranean Art and Archaeology
- Anthropology
- Applied Conservation Studies
- Art History
- Asia-Pacific Studies
- Chinese
- Classical Studies
- Communication
- Economic Systems Design
- Economics
- Electronic Journalism
- English
- Film and Media Studies
- Folklore and Mythology
- French
- German
- Global Affairs
- Global Systems
- History
- Immigration Studies
- International/Comparative Studies
- Islamic Studies
- Japanese Studies
- Judaic Studies
- Latin
- Latin American Studies
- Leadership
- Legal Studies
- Linguistics
- Middle East Studies
- Multimedia
- Native American and Indigenous Studies
- New Europe
- Nonprofit Studies
- Philosophy
- Philosophy and Law
- Political Philosophy
- Psychology
African and African American Studies

Faculty
Brigety, Carbonneau, Carton, Cherubin, Clark, Dennis, Fauntroy, Fuchs, Haley, Horton, Johnson, Lepore, Levine, Manuel-Scott (director), Miller, Paden, Richards Jordan, Smith, Stewart, Travis, Weatherspoon

Course Work

The African and African American Studies Program offers all course work designated AFAM in the Courses chapter of this catalog.

Undergraduate Programs

The African and African American Studies Program offers an interdisciplinary minor open to students in all majors.

In the minor students will examine the cultural, historical, economic, and political dimensions and experiences of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. Students will learn theories and methodologies that are used to examine the complex dynamics of race, class, gender, and ethnicity in America. Through this program, students are able develop critical and analytical approaches to societal issues because such issues are addressed and delineated through a variety of academic disciplines.

Students are encouraged to do an internship as part of the minor to further enhance their education and provide them with valuable preparation for the workforce.

African American Studies Research and Resource Center

The goal of the African American Studies Research and Resource Center (Paul Robeson Room) is to facilitate new ways for George Mason University students to learn about the African diaspora. As part of their academic and community involvements, students often need to address issues related to African and African American Studies. The center offers them opportunities for hands-on experience with African and African American life. It has been instrumental in assisting students, faculty, staff, and the community in finding resources to accomplish this goal.

The center sponsors a lecture series and a scholar-in-residence program and offers research and resources support for the Mason community.
Administration of Justice

Phone: 703-993-8315
Web: adj.gmu.edu

Faculty

Professors: Mastrofski, Taxman, Weisburd, Zingraff
Research professors: Turner, Waddington
Associate professors: Gallagher, Gould, Wilson (chair)
Assistant professors: Johnson, Lawton, Lum, Merola, Portillo, Rudes, Willis
Assistant research professors: Trotman, Andrew
Term instructors: Newmark, Sizemore, Wheeldon
Affiliate faculty: Uchida

Course Work

The Administration of Justice Department offers all course work designated ADJ and JLCP in the Courses chapter of this catalog.

Undergraduate Programs

The BS in administration of justice provides students with a sound foundation in the liberal arts and a focused study of the justice system as well as the social, human, and moral problems raised in the administration of justice. The course of study prepares students for careers in law enforcement, corrections, the courts, investigations, juvenile justice, private and homeland security, and related social and human services. The program also provides a strong background for law school and graduate study in criminal justice or law and society.

Honors in the Major

Highly qualified students may pursue advanced work leading to graduation with honors in the major. Students admitted to the honors program in the major take a two-course sequence ADJ 491 and 492. To graduate with honors in ADJ, students must complete these courses with a minimum GPA of 3.50.

Internships

The department supports an active internship program, which places students in justice and police organizations throughout the Washington metropolitan area. Students can gain valuable work place experience while earning credit toward their degree.

Graduate Programs

The department offers master's and doctoral degrees in justice, law, and crime policy. Both degree programs draw on a strong multidisciplinary faculty, who teach a wide range of courses in their specialties to support the graduate programs. These
programs can also take advantage of Mason's proximity to many justice organizations at the federal, state, and local levels. The curriculum is structured to give students the skills they need to do policy-relevant research as well as to be able to work with local and national justice and security agencies to put those skills to use.

**Funding**

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

### Communication

Phone: 703-993-1090  
Web: comm.gmu.edu

**Faculty**

**Professors:** Boileau, Botan, Decker, Friedley, Kreps (chair), Lichter, Lont, Maibach, McAuley, Rowan (associate chair)  
**Emeritus professors:** Looney, Manchester, Taylor  
**Associate professors:** Gibson, Muir, Nicotera, Villagran  
**Assistant professors:** Cai, Farnsworth, Hopson, Zhao  
**Term full professor:** Pober  
**Term associate professor:** Finn  
**Term assistant professors:** Bedore, Wright  
**Term research assistant professor:** Roser-Renouf  
**Term instructors:** Anderson, M. Dickerson, Haynes, Klein, R. Smith, Talkington, Tomasovic, Warren  
**Term research instructor:** McCutcheon  

**Adjuncts:** Ahmad, Akyeampong, Atwell, Aw, Barber, Beck, Biedrycki, Chaaban, Chilcote, Clark, Cordero, Dance, Dickerhoof, N. Dickerson, Dillon, Doyle, Effros, Feigenbaum, Fisher, Garifo, Gauthier, Gladis, Greiner, Hadji, Hansche, Harzold, Holsonbake, Kahn, Kehoe, Kohlmann, Kraus, Kubiske, Ledford, Lehman, LeValley, Long, Mangus, Mattox, Moss, Outlaw, Payne, Peck, Plaag, Schmeidler, Simpson, Slagle, Stumpo, Suarez, Trowbridge, Van Zummeren, Walsch, Walter, Wilson, Wolyn, R. Wood

**Affiliate:** J. R. Censer (professor)

### Course Work

The Communication Department offers all course work designated COMM in the Courses chapter of this catalog.

### Undergraduate Programs
The department offers a BA in communication, which prepares students for graduate study or entry-level positions in such fields as interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

Students majoring in communication complete a concentration in from one of these areas: interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

**Internships**

The department has an active internship program. Many students include an internship during their senior year as a way of gaining practical experience with national and international businesses, associations, or government agencies.

**Student Activities**

All students are encouraged to participate in one of the communication activities: Broadside, debate, forensics, GMView, Mason Cable Network, PRSSA, or WGMU.

**Honors in the Major**

Highly qualified students may pursue advanced work leading to graduation with honors in the major. Communication majors who have completed 80 credits with an overall minimum GPA of 3.50 and a minimum GPA of 3.50 in communication courses are eligible to apply. They must have satisfactorily completed or be enrolled in COMM 200, 300, 301, 302, 305, and 400. Eligible students are invited to submit a proposal for an honors thesis, and, if the proposal is approved, they are admitted to the program. To receive honors in the major, students must complete specific course work with a minimum GPA of 3.5 and write an acceptable honors thesis. For more information, contact the director of honors in communication.

**Minors**

The department offers minors in communication, electronic journalism, and sport communication. The latter is offered jointly by the Department of Communication and the School of Recreation, Health, and Tourism in the College of Education and Human Development. The department faculty also participate in these minors: Film and Media Studies Minor, Multimedia Minor, and Women and Gender Studies Minor.

Students majoring in communication may choose to minor in any discipline that offers an undergraduate minor.

**Graduate Programs**

The department offers a master's and a doctoral degree in communication with two major areas of emphasis: strategic communication and health communication. The programs provide students with a strong foundation in communication theory and research while at the same time encouraging students to apply their skills in the public, private, and nonprofit sectors.

The faculty in strategic communication, drawing on their expertise in public relations theory and research, teach courses on planning, developing, executing, and evaluating public communication campaigns. Faculty in health communication teach courses which explore the relationship between communication practices and the health and well-being of individuals and communities. This ranges from how to improve cooperation and coordination between health care providers and patients to how to develop more effective health promotion campaigns.

Strategic communication and health communication are two of the most rapidly expanding specialties within the broad field of communication. Graduates of these programs find a very welcoming employment market for for their expertise.
Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Cultural Studies

Phone: 703-993-2851
Web: culturalstudies.gmu.edu

Faculty

Albanese, Amireh, Best, Bickford, Bockman, Burr, Censer, Chang, Copelman, Deshmukh, Foster, Froman, Fuchs, Gibson, Gilbert, Greet, Guagnano, Gusterson, Hanrahan, Hodges, Holt, Jacobs, Jann, Johnsen-Neshati, Kaplan, Kapsoy, Karush, Kaufmann, Lancaster (director), Landsberg, Leeman, Lont, Mandaville, Matz, Miller, O’Connor, O’Malley, Palkovich, Rabin, Ricouart, Rosenblum, Sample, Scarlata, Seligman, Shutika, P. Smith, S. Smith, Sockett, Todd, Travis, Yadav, Yocom, Zagarri

Course Work

The Cultural Studies Program offers all course work designated CULT in the Courses chapter of this catalog.

Cultural Studies at Mason

The Cultural Studies Program is distinctive in several respects. While similar programs at other universities are based in a department, the program at Mason has a truly interdisciplinary foundation, drawing on faculty members from 14 different departments across the university. The program thus explicitly links the social sciences and the humanities by combining their methods of interpretation to explore the production, distribution, and consumption of cultural objects in their social contexts. With particular focus on theory and method in crafting this linkage, the program addresses contemporary issues of nationality, class, race, and gender and opens the scope of scholarly inquiry to all forms of culture, past and present.

Undergraduate Programs

Cultural studies does not have an undergraduate program, but supports the interdisciplinary undergraduate program in global affairs. CULT 320 - Globalization and Culture is a core requirement for global affairs majors.

Graduate Programs

The doctoral program in cultural studies trains students for scholarship and teaching. The core curriculum includes an introduction to cultural studies and a methods course, as well as courses on political economy, gender and sexuality, critical race studies, science and technology, social institutions, and visual and performance culture.

All students develop field specializations in two areas of cultural studies. The particular strengths of the program are gender, sexuality, and body studies; visual culture and media studies; political economy and globalization; and race, ethnicity, and nation.

Funding
The program offers teaching assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Related Master's Degrees

Applicants to the doctoral degree in cultural studies must already hold a master's degree. For students interested in cultural studies who do not meet this requirement, the university has established a number of related master's degrees. Students are encouraged to apply to one of these programs. See Graduate Programs in the English, History and Art History, Modern and Classical Languages, Philosophy, Religious Studies, and Sociology and Anthropology sections of this chapter. These programs cumulate in a capstone seminar, CULT 802.

Students may, if they wish, apply simultaneously to one of these master's degrees and the doctoral program simultaneously so that faculty may review their academic promise and suitability for the program. Students who wish to apply to two degree programs at the same time need to submit two separate applications. Especially strong candidates with bachelor's degrees may be admitted into the doctoral program on a conditional basis. Admission is contingent on their performance in the master's degree program, particularly in CULT 802.

Economics

Faculty

Distinguished professor emeriti: Buchanan, Smith, Tullock

Professors: Bennett, Boettke, Boudreaux, Congleton, Cowen, Crain, Heiner, Houser (chair), Klein, Levy, McCabe, Nye, Richardson, Roberts, Rowley, Stratmann, Wagner, Williams

Associate professors: Caplan, Hanson, Meyer, Ramirez, Reid, Tabarrok, Thorbecke, Wiest

Assistant professors: Al-Ubaydli, Johnson, Jones, Leeson

Instructor: Rustici

Professors emeriti: Chung (emeritus), Phillips (emeritus), Snavely (emeritus), Vaughn (emerita)

Course Work

The Economics Department offers all course work designated ECON in the Courses chapter of the catalog.

Undergraduate Programs

The department offers a bachelor of arts and a bachelor of science degree in economics. The bachelor of science degree program is designed for students who desire a more technical program with a stronger emphasis on economic and quantitative analysis. It is especially appropriate for students who anticipate a career as an economic analyst in government, consulting, trade associations, or other private sector positions that emphasize economic research and analysis. The requirements are also appropriate for students planning postgraduate education in economics or more quantitative business administration programs.
The bachelor of arts degree program is designed primarily for students with a stronger interest in the liberal arts. It is appropriate for those who prefer a less quantitative degree program and may be especially appropriate for students planning to attend law school or graduate programs in business or public administration.

**Minors**

The department offers a minor in economics and a minor in economic systems design. Both are available to students in any major.

**Bachelor’s/Accelerated Master’s Program**

The department offers highly qualified undergraduates the opportunity to apply to an accelerated master’s degree program in economics. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 144 credits, sometimes within five years.

**Graduate Programs**

The department offers a master's and a doctoral degree in economics. The department is noted for its emphasis on comparative institutional analysis and its focus on the relations among economic, political, and legal institutions. This is reflected in the specializations associated with the department: experimental economics, Austrian economics, public choice, constitutional political economy, law and economics, and new institutional economics.

The department offers a graduate certificate in economic systems design, which provides a well defined course of study for students who want to advance or update their knowledge in this fast-moving field.

**Funding**

The department offers teaching and research assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**English**

Phone: 703-993-1160  
Web: english.gmu.edu

**Faculty**

**Professors:** Cheuse, D’Andrea (Robinson Professor), Foster, Goodwin, Hodges, Jann, Lathbury, Lowry, Nadeau, Pankey, Tichy  

**Associate professors:** Albanese, Amireh, Anderson, Atkinson, Burr, Clark, Fuchs, Gallehr, Hawk, Holisky, Jones, Kaplan, Kaufmann, Keaney, Kuebrich, Lattanzi Shutika, Matz (chair), Mori, Rutledge, Weinberger, Yadav, Yocom, Zawacki

**Assistant professors:** Brkic, Chang, Eisner, Eyma, Habila, Harvey, Hoffmann, Keith, Lawrence, Lin, Lockwood, Malouf, Marcantonio, McCarthy, Michals, Reid, Rogers, Sample, Scarlata, Stanica, Widerhold, Wulf

**Term associate professors:** Koch, Michals, Miller, Samuelian, Scott, Taciuch, Thompson
Term assistant professors: Beach, Berg, Burnham, DeNys, DeFazio, Habib, Jacobs, Johnson, Lister, Matthews, McGeehan, Nanian, Nichols, Rudnicki, Saunders, Taylor, Williams

Term instructors: Hoy, Raffel, Scolaro

Adjunct assistant professors: Broyles, Cabral, Casal, Dreisonstok, Fletcher, Fowler, Humbertson, Johnston, Kuhta, Moody, Pabich, Redondo, Waldron

Adjunct instructors: Baker, Cooper, Dutta, Grogan-Barone, Johnston, Lawrence, McKinney, Morris, Rhein, Surrette

Course Work

The English Department offers all course work designated CL, ENGL, LING, and NAIS in the Courses chapter of this catalog.

Related Courses

Courses offered by other departments are occasionally crosslisted with English and given the ENGL course designator; such courses may be counted toward the English major.

Undergraduate Programs

The department offers a bachelor's degree in English, a versatile major with thirteen specialized concentrations that are designed to meet students' individual interests and career objectives. English majors can also pursue a special option in comparative literature or do an internship in technical writing or linguistics. Students interested in becoming teachers can participate in a program offered in conjunction with the College of Education and Human Development that allows undergraduates to simultaneously complete their BA in English and their licensure requirements to teach English at the secondary school level in Virginia.

English majors learn to read critically and write carefully in classes that are uniquely small for a university the size of Mason. Students develop these abilities not only thorough reading traditional texts but also through the use of technologies such as blogs, wikis, and multimedia production. Because English majors have excellent skills in written and oral communication, research, critical thinking, and focused creativity they are well prepared for any career - teaching, journalism, creative writing, management, law, and more.

Honors in the Major

Highly qualified students may pursue advanced work leading to graduation with honors in the major. To graduate with honors in the major, students must complete the honors course sequence and receive a 3.50 GPA in all courses counted toward the major and, separately, a minimum 3.50 GPA in their honors courses. Honors courses may simultaneously satisfy concentration and distribution requirements in the major.

Students may satisfy the honors course sequence in several ways:

- Students may take two sections of ENGL 414 Honors Seminar.
- Students may take one section of ENGL 414 Honors Seminar and ENGL 415 Honors Thesis Writing Seminar.
- Students in the creative writing concentration may take one section of ENGL 414 Honors Seminar and write a creative honors thesis in ENGL 416 Honors Independent Study.
- Students in the nonfiction concentration may take ENGL 416 Honors Independent Study in conjunction with an advanced course in nonfiction writing and complete a nonfiction thesis as part of ENGL 415 Honors Thesis Writing Seminar.

See the English Department for application procedures and other information.
**English with a Second Major**

Students can combine a major in English with a second major. Students interested in this option are encouraged to discuss their plans with their English advisor and the director of undergraduate programs in English. See the section on Credit for More than One Undergraduate Major in the Academic Policies chapter of the catalog.

**Minors**

The department offers a minor in English, available to students in any major.

Faculty from English coordinate or co-coordinate the Film and Media Studies Minor, the Folklore and Mythology Minor, the Native American and Indigenous Studies Minor, and the Linguistics Minor. See the Interdisciplinary Minors section of this chapter for more information.

**Bachelor’s/Accelerated Master’s Program**

The department offers highly qualified undergraduates in any major the opportunity to apply to an accelerated master’s degree program in English with a concentration in linguistics. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in English with a concentration in linguistics after satisfactory completion of 144 credits, sometimes within five years.

**Undergraduates in Graduate Courses**

The English Department permits qualified undergraduates to enroll in its graduate courses numbered 500 through 599. They may apply these credits to their undergraduate degree or mark them for reserve graduate credit. See the department for details on how to register.

**Writing Center**

The Writing Center offers one-on-one conferencing during all stages of the writing process. Conferences are free to all Mason students, faculty, staff, and alumni. Writing Center tutors, who are graduate teaching assistants in the English Department, have been trained in current methods of composition instruction. They can help clients overcome writing anxiety, develop organizational and revision skills, and learn useful strategies for editing their own work. Appointments should be made by calling 703-993-1200 or stopping by the center in Robinson Hall A, Room 11, to schedule a session.

**Northern Virginia Writing Project**

The Northern Virginia Writing Project (NVWP) is an inservice organization dedicated to improving the writing of Northern Virginia students, kindergarten through university level. Each summer, selected teachers attend an intensive five-week institute where they demonstrate successful teaching techniques, study research on the teaching of writing, and write. After the summer institute, participants return to their schools, colleges, and universities to lead workshops and in-service seminars for other teachers. NVWP is an affiliate of the National Writing Project and one of the seven sites of the Virginia Writing Project.

**Graduate Programs**

The department offers graduate programs in the study and practice of literature and writing, as well as course work in related fields such as folklore, film, linguistics, and cultural studies. The master's degree in English provides concentrations in literature, cultural studies, professional writing and rhetoric, the teaching of writing and literature, and linguistics.
The department also offers a terminal degree, the MFA in creative writing, with concentrations in fiction, poetry, and nonfiction. Faculty from the department coordinate the concentration in Folklore in the master's degree in individualized studies (MAIS). See the ■ Interdisciplinary Studies (MAIS) section of this chapter for details.

**Funding**

The department offers teaching assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must show satisfactory progress toward their degree.

**Certificates**

The department offers graduate certificates in folklore, professional writing and rhetoric, and teaching English as a second language. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the course work for the certificates may be able to be applied to a degree. Students must apply and be admitted to a graduate certificate program.

■ **Global Affairs**

Web: globalaffairs.gmu.edu

**Course Work**

The Global Affairs programs offer all course work designated GLOA in the Courses chapter of this catalog.

**Undergraduate Programs**

Phone: 703-993-9185

**Faculty**

**Bachelor's Degree**

The bachelor's degree in global affairs is an interdisciplinary major that introduces students to the global processes affecting all societies. Drawing on the broad international expertise of Mason faculty, this program incorporates courses from across the university. Global affairs majors examine transnational and international processes in a wide range of areas including politics, economics, culture, peace and conflict, and the environment. They also study specific regions and languages and investigate the ways particular parts of the world experience and influence global processes.

Global affairs majors take a common set of core courses and choose a concentration. They can focus on a theme (global economy, international development, the environment, and so on) or a world region (Africa, Asia, Latin America, etc.).
Students are strongly encouraged to take advantage of Mason's many study abroad courses and do an internship as part of their degree program.

**Global Affairs with a Second Major**

Students can complement their major in global affairs with a second major. Students interested in this option are encouraged to discuss their plans with advisors in both majors. See the section on Credit for More than One Undergraduate Major in the Academic Policies chapter of the catalog.

**Minors**

The undergraduate program in global affairs offers a minor in global affairs, which is available to students in any major in the university.

Students majoring in global affairs are encouraged to complement their major one of the many minors offered by the college.

**Graduate Programs**

Phone: 703-993-2152

**Faculty**

Bakhash, Kelly (director), Lyons, Mandaville, Shaklee, Wilsford

**Master's Degree**

The master's degree in global affairs is an interdisciplinary program that offers students the opportunity to engage in advanced study of a broad range of international global issues.

**Bachelor’s/Accelerated Master’s Program**

Highly qualified undergraduates in any major are invited to apply to the accelerated master’s degree program in global affairs. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in global affairs after satisfactory completion of 144 credits, sometimes within five years.

**Higher Education**

Phone: 703-993-2310
Web: highered.gmu.edu

**Faculty**

**Course Work**
This program offers all course work designated CTCH in the Courses chapter of this catalog.

Graduate Programs

The Higher Education Program prepares students for positions of leadership in teaching, research, and administration at community colleges, four-year colleges, and universities. The interdisciplinary curriculum emphasizes ethical leadership, assessment, and practice-based scholarship in teaching and learning. Students in these degrees come from varied professional backgrounds in college teaching, university administration, business, the performing arts, and government. They bring a vast spectrum of experience to their studies and fellow students.

Doctor of Arts in Community College Education

The doctor of arts in community college education prepares students for college teaching. They take course work in higher education pedagogy and in a disciplinary knowledge area. Working with an advisor, students choose appropriate courses from more than 20 participating departments. In addition to developing disciplinary expertise, the courses in higher education offers proficiency in core areas related to undergraduate education: the community college, college teaching, technology in higher education, and the scholarship of teaching and learning.

MAIS Concentration in Community College Teaching

The program sponsors the concentration in community college teaching within the master’s degree in interdisciplinary studies (MAIS). This concentration prepares students to teach entry-level courses in these growing fields in community colleges: communication, English, information systems, mathematics, Spanish, and teaching English as a second language.

See the Interdisciplinary Studies, MAIS section of this chapter.

MAIS Concentration in Higher Education

The program sponsors the concentration in higher education within the master’s degree in interdisciplinary studies (MAIS). This concentration prepares individuals for administrative and leadership positions in two-year colleges or four-year colleges and universities. Students may focus on administration or student services.

See the Interdisciplinary Studies, MAIS section of this chapter.

Doctor of Philosophy in Education with Specialization in Higher Education

The doctor of philosophy in education with a specialization in higher education is offered jointly by the Higher Education Program and the College of Education and Human Development. This doctoral program prepares students for positions of leadership in administration and student services through coursework in higher education administration and leadership and through a secondary concentration that can further disciplinary expertise.

See the College of Education and Human Development chapter of the catalog.

Certificates

The program offers graduate certificates in college teaching and in higher education administration. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.
History and Art History

Phone: 703-993-1250
Web: historyarthistory.gmu.edu

Faculty

Mathy Professor: Mattusch (art history)

Robinson Professor: Crew, Bakhash (history)

Professors: J. R. Censer (dean), J. T. Censer, Holt, Kiermer, Petrik, Sherwin, Stearns (provost), Stewart, Wade, Zagarri (history)

Associate professors: Bristol, Carton, Chang, Cohen, Copelman, Deshmukh, Hamdani, Karush, Kelly, Landsberg, Lytton, O’Malley, Platt (chair), Scully, Smith (history); Butler, DeCaroli (director), Todd (art history)

Assistant professors: Barnes, Bottoms, Bristol, Collins, Hamner, Lair, McDow, Schrag (history); Greet (art history)

Term faculty: Leon, Manuel-Scott, McCord, Orens, Scheinfeldt, Schrum, Walmsley (history); Gregg, Richardson (art history)

Postdoctoral teaching fellows: Hudgins, Salinas, Scales, Wolf

Course Work

This department offers all course work designated HIST and ARTH in the Courses chapter of this catalog.

Undergraduate Programs

History

The department offers a BA in history. History majors study a variety of historical time periods, from Greek and Roman antiquity to the late twentieth-century. They learn to interpret and evaluate the past by analyzing a variety of sources, from historical books and novels to images, films, oral interviews, newspapers, and other texts.

History majors have the opportunity to study with faculty who are internationally known for their work on the use of technology in the study of history. They can do an internship with one of them in the Center for History and New Media or at places like the Smithsonian Institution, the Library of Congress, or one of many other institutions in the Washington, D.C. area. There are also many opportunities to study abroad while earning credit towards the history major.

Advising

Students majoring or minoring in history are advised by the undergraduate director. History majors are urged to discuss their program of study periodically with the director.

Honors in the Major

History majors who have completed 75 credits (a minimum of 15 in history, 6 of which must have been taken at Mason) with a 3.50 overall GPA and a 3.50 GPA in history are eligible to apply to graduate with honors in history. Applicants must have completed or be enrolled in HIST 300. The statement of application should include references from two Mason history faculty
members. If a major part of the student’s work includes transfer credit, transcripts may be required. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

To graduate with honors in the major, students must complete HIST 490 and 491, linked individualized courses usually with the same instructor. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. HIST 490 should be taken before 491, although they may be taken concurrently. Either course may be taken concurrently with HIST 499 Senior Seminar in History. These 6 credits must be passed with a minimum 3.50 GPA, and the overall history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 36-credit major requirement in history, but they do not replace HIST 499.

Minors

The department offers a minor in history available to students in any major.

The department faculty participate in a number of interdisciplinary minors including African and African American Studies Minor, Ancient Mediterranean Art and Archaeology Minor, Asia-Pacific Studies Minor, Islamic Studies Minor, Latin American Studies Minor and Middle East Studies Minor. Students can earn credits toward these minors by taking selected history and art history courses. For details, see the Interdisciplinary Minors section and the Latin American Studies section of this chapter.

The minor in sport and American culture is offered jointly by the Department of History and Art History and the School of Recreation, Health and Tourism. For details, see the School of Recreation, Health and Tourism section in the College of Education and Human Development chapter of the catalog.

Art History

The department offers a BA in art history. Art history majors investigate works of art to learn how they were made, why they were made, and by and for whom they were made. They develop the skills to interpret a work of art as a record of the culture in which it was made. Through art history courses, students will learn to ask questions that touch on cultural, technological, and economic concerns. The major has flexible requirements, and students in art history receive individualized attention which helps them tailor their studies to their own individual interests and career goals.

Art history majors have the opportunity to study with faculty whose expertise covers many world regions - the United States, Latin America, Europe, South and Southeast Asia, and China - and all historical periods - from classical antiquity, Byzantine, Medieval, Renaissance, and Baroque, to the modern era.

Students are encouraged to do an internship at one of the many arts organizations in the Washington, D.C. region, such as the National Gallery of Art or the Corcoran Gallery. There are also many opportunities to study abroad while earning credit towards the art history major.

Honors in the Major

Majors who have completed 75 credits (a minimum of 15 credits in art history, with 6 credits taken at Mason) with a 3.50 overall GPA and a 3.80 GPA in art history are eligible to apply to graduate with honors in art history. Eligible students should apply to the undergraduate director by November 15 or April 15 with a statement of application including the names of two references from Mason art history faculty members. Transfer students should also submit transcripts. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

To graduate with honors in the major, students must complete ARTH 492 and 493, linked individualized courses that culminate in a research paper. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. ARTH 492 should be taken before 493, but they may be taken concurrently. These 6 credits must be passed with a minimum 3.50 GPA, and the overall art history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 33- to 34-credit major requirement in art history, but they do not replace the 6 required credits in ARTH 400, 420, 430, 440, 460, 471, 472, or 482.
Minors

The department offers a minor in art history available to students in any major.

The Art History Program coordinates the Ancient Mediterranean Art and Archaeology Minor. See the Interdisciplinary Minors section of this chapter.

Graduate Programs

History

The department offers a master's and a doctoral degree in history. In both programs, students select a specialization in American history, European history, or world history. Master's degree students choose from one of four concentrations: predoctoral history, applied history, enrichment, or teaching. Doctoral students focus their studies in one of four areas: college/university teaching, new media and information technology, public and applied history, or preprofessional development.

Graduate students in history have the opportunity to take courses in new media, studying with faculty who are internationally known for their use of technology in the study of history. Many students work alongside the faculty in the Center for History and New Media, a leader in the use of digital media and computer technology to democratize history. The center uses digital media and technology to preserve and present history online, transform scholarship across the humanities, and advance historical education and understanding.

Students can do an internship in applied history at one of the many institutions in the Washington, D.C. area or study abroad while earning credit towards their degrees.

Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Art History

The department offers a richly interdisciplinary master's degree in art history. It draws on faculty strengths in traditional research and new media and the vast cultural resources of the Washington, D.C. area. Students learn methods of art historical analysis, a variety of art historical interpretations, and practical applications of the field. The program places a special emphasis on the development of skills in new media, museology, and pre-professional internships - program features that are unique to this region.

The master's degree in art history is designed to meet the needs of a student population with diverse interests and career goals. Because of the focus on skill building in traditional research as well as new media, graduates of this program have the tools necessary for independent research, professional work, and the dissemination of knowledge in art history.

Honors Program in General Education

Phone: 703-993-1110
Web: honors.gmu.edu

Faculty
The program offers all course work designated HNRS in the Courses chapter of this catalog.

The Honors Program is the academic program of the Mason's Honors College (described in the University Academic Programs and Resources section of this catalog), which provides talented students in all majors with an enriched academic and social environment that enhances their college experience.

The Honors Program offers a unique selection of integrated courses designed for highly motivated students and taught by many of Mason’s most experienced teachers and accomplished scholars. Taken together, these courses satisfy the general education requirements in social sciences and humanities for all colleges and majors in the university. Because most honors classes have fewer than 25 students, honors students have the opportunity to be known and mentored by distinguished faculty during their first years on campus. The track in science, technology, engineering, economics, and mathematics offers honors sections of first-year courses in these disciplines, as well.

The Honors Program also offers students special access to the technical, intellectual, and artistic resources of the university and the national capital region. It seeks to develop among its students a sense of intellectual community and a commitment to lifelong learning.

Admission

Admission is limited and competitive. Students apply to the Honors Program when applying to Mason by selecting the box that indicates they are interested in the Honors Program and by completing an additional essay question. If the application meets the criteria for admission to the Honors Program, the applicant will receive an invitation to the program shortly after receiving the acceptance letter to the university.

Applicants are evaluated on the strength of their entire academic record, including the rigor of the high school curriculum, GPA, and standardized test scores. Students are allowed to use AP, IB, and dual-enrollment credit taken before admission to Mason to substitute for certain HNRS courses, excluding HNRS 110 and HRNS 353.

Requirements

The core of the honors curriculum is designed to satisfy the university general education requirements through a small number of interdisciplinary courses, allowing students increased opportunities to pursue minors or other individual interests. Students then have a choice of two tracks, determined by their majors and degrees. The STEM track is designed for students pursuing a bachelor of science degree in science, technology, engineering, economics, or mathematics. The Liberal Arts and Social Sciences (LASS) track is for students pursuing a bachelor of arts degree, who have additional college level requirements.

To receive honors in general education on their transcript, students must earn a minimum GPA of 3.00 in HNRS courses and supporting courses required for their approved honors program. Students whose cumulative GPA falls below 3.00 may complete the program but will not receive honors recognition on their transcripts.
Continuation in Honors

Students in the program who are placed on academic warning because their GPA falls below 2.00 (1.80 in the first or second semester) may be ineligible to continue in the program.

Honors students are expected to maintain high standards of academic integrity and personal conduct. Students may be asked to withdraw from the program for a violation of the University Honor Code or any other conduct that reflects adversely on the Honors Program.

Students who leave the program before completion must meet university general education requirements and college-level requirements for their particular degree programs. On leaving the program and before registering for general education courses, students should be advised on equivalencies between the honors courses they have completed and general education requirements.

Transfer of Honors Credits

*Within George Mason:* Because of the sequential and integrated nature of the program, honors courses may not correspond exactly to other courses used to fulfill general education requirements. A list of equivalencies is available in the Honors Program Office and on the web site.

*Outside George Mason:* Course work in the Honors Program may meet the general education requirements of other universities. As in all transfer situations, general education requirements of one institution may not precisely match those of another.

■ Individualized Study

Phone: 703-993-4556
Web: bis.gmu.edu

Administration

Jeannie Brown Leonard (Director)

Course Work

The program offers all course work designated BIS in the Courses chapter of this catalog.

Undergraduate Program

The bachelor of individualized study (BIS) degree provides an alternative to the traditional baccalaureate, offering students a distinctive educational opportunity that allows them to integrate previous experiences into university course work. Recognizing that college-level learning may be acquired through varied professional, military, and personal experience, the BIS Program provides mechanisms for translating experiential learning into academic credit. It accepts transfer credits from traditional institutions of higher education, as well as credits earned through other appropriate means.

There are two pathways for obtaining this degree. Students can design their own individualized interdisciplinary program of study or pursue a standardized concentration. These alternatives require different course work, prerequisites, and eligibility.

Eligibility
Applicants for an individualized study degree must have completed high school at least seven years prior to admission to the program and have accumulated at least 30 college-level credits, 15 of which must have been earned through conventional classroom instruction. The concentration in early childhood education studies is an exception to the seven-year time limit.

Application and Admission

Students interested in the BIS program must attend an information session and apply separately to the BIS Program in addition to applying to Mason through the Office of Admissions. The BIS information session schedule and application form are available online at www.bis.gmu.edu. Admission is selective and based on a minimum GPA of 2.50 on previous course work.

Honors in the Major

Highly qualified students may apply to graduate with honors in the major. Students should apply the semester before they intend to enroll in BIS 390 (The Research Process). Students accepted to the honors in the major must complete a BIS 391 and BIS 490 (an individualized section) with a minimum GPA of 3.5, maintain a cumulative GPA of 3.75 or higher, and successfully present their research during the Senior Capstone Project presentations.

Credit for Nontraditional Modes of Learning

The BIS program allows students to receive college credit for learning acquired through a variety of nontraditional methods indicated below. The maximum allowable credits are indicated for each category.

1. Nationally recognized exam programs such as the College Level Examination Program (CLEP) when the particular exam has been approved for Mason credit. For an approved list, go to admissions.gmu.edu/exams/ExamCLEP.asp (45 maximum credits).
2. Certain university approved industry, government, or military training credits if such credits are indexed and recommended as college-level credit by the American Council on Education (ACE). To be eligible for Mason credit, training and course specifics must exactly match what is in the ACE guide (45 maximum credits) and be approved for Mason credit. The specific credits must also be approved by the program director and the dean. Note: Total combined credit for exams and ACE-approved training cannot exceed 60 credits. For example, if 45 credits are accepted by ACE-approved training, a maximum of 15 credits can be accepted for the exam.
3. Experiential learning demonstrated by portfolios subject to approval by the program director and the dean (30 maximum credits).
4. College-level credit earned at institutions accredited by bodies other than recognized regional accrediting organizations subject to approval by the program director and the dean. These credits can only be considered if the institution is listed in Accredited Institutions of Postsecondary Education published by ACE (30 maximum credits).

Students may not pursue credit for options 1, 2, and 4 once they have matriculated at Mason. They must complete the third option within their first 30 credits after matriculation. Although the types of credit noted above may be applied to a BIS degree, not all university and program requirements can be fulfilled in these ways. These nontraditional credits are not transferable to other degree programs at Mason.

Bachelor’s/Accelerated Master’s Program

The program offers highly qualified undergraduates the opportunity to apply to an accelerated master’s degree program in telecommunications. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 144 credits.

■ Interdisciplinary Minors and Certificate (CHSS)
The College of Humanities and Social Sciences offers many minors and one certificate in interdisciplinary areas of study. These minors require course work from two or more disciplines and are administered by interdepartmental faculty groups, often faculty from across the university.

Other interdisciplinary minors are offered by departments and programs in the college. These include:

- African and African American Studies
- Global Affairs
- Judaic Studies
- Japanese Studies
- Latin American Studies
- Leadership
- Nonprofit Studies
- Women and Gender Studies

For policies governing all minors, see the Academic Policies chapter of the catalog.

### Interdisciplinary Studies

Phone: 703-993-8762  
Web: mais.gmu.edu

### Executive Committee

Addleson, Burns, Hodzic, Kidd, Lont, Martin, O'Connor, Rodgers, Salmon, Shutika, Simmons, Snyder-Hall (director), Sorrell, Wood, Vitazkova, Yocom

### Course Work

This program offers the courses designated MAIS in the Courses chapter of this catalog. However, students in the Master of Arts in Interdisciplinary Studies (MAIS) degree take most of their courses in the disciplines that they integrate as part of their degree program.

### Graduate Programs

The master's degree program in interdisciplinary studies (MAIS) is designed for students who seek a degree that integrates knowledge from several disciplines. It addresses a rapidly evolving demand for for specialized and individualized graduate study. Students choose one of eight structured concentrations or devise an individualized program of study when traditional degree programs do not meet their evolving careers or life goals.

The degree requires course work from a home department and selected courses from other disciplines. Student complete their degrees with a project or thesis.

### Concentrations

Students pursuing a master's degree program in interdisciplinary studies can choose a concentration in community college teaching or higher education, both sponsored by the Higher Education Program. They can do a concentration in folklore, sponsored by the faculty in English or one in religion, culture, and values, sponsored by Religious Studies. The video-based
production concentration is sponsored by the Communication Department, while the concentration in women and gender studies is sponsored by the Women and Gender Studies Program and that in Zoo and Aquarium Leadership, by New Century College.

For a variety of reasons, traditional graduate programs are not able to meet the specific educational goals of some students. They can choose the individualized concentration. With the help of a faculty advisor, they design an individualized program of study that includes courses from several academic disciplines.

■ Latin American Studies

Phone: 703-993-1010
Web: las.gmu.edu

Faculty

Berroa (Modern and Classical Languages), Bristol (History and Art History), Burt (Public and International Affairs), Greet (History and Art History), Karush (History and Art History, director), Leeman (Modern and Classical Languages), Lepore (Dance), Meyer (Economics), Rabin (Modern and Classical Languages), Ramos-Pellicia (Modern and Classical Languages), Seligmann (Sociology and Anthropology), Shutika (English), Vivancos-Pérez (Modern and Classical Languages), Yocom (English)

Course Work

The Latin American Studies Program offers courses designated LAS in the Courses chapter of this catalog. As an interdisciplinary program, Latin American Studies offers many other courses across a range of departments that do not bear the LAS code. For the major and minor, students should consult with the director to determine whether a particular course may be used to fulfill a Latin American studies requirement or elective.

Undergraduate Programs

The bachelor’s degree in Latin American studies presents students with the opportunity to study one of the world’s most diverse and fascinating regions. Contemporary Latin America is the product of a long and turbulent history of conquest, resistance, and cultural mixing. The result is a rich and unique amalgam of African, indigenous, and European cultures. Understanding these complex societies has never been more crucial than it is today since people of Latin American descent represent more than 13% of the population of the United States. Knowledge of Latin American history, culture, society, and politics is indispensable for anyone who seeks to understand the contemporary United States and its place in the world.

Majors in Latin American studies develop a broad expertise in the region while pursuing an individualized program of study that suits their own particular interests. Student improve their language skills and take courses in many disciplines including anthropology, dance, economics, folklore, geography, government, history, and literature. The course work cumulates in a seminar where students develop a research project under the mentorship of a faculty expert.

Honors in the Major

Latin American Studies majors who have completed 75 credits (a minimum of 15 in Latin American Studies, 6 of which must have been taken at Mason) with at least a 3.50 overall GPA and at least a 3.50 GPA within the major may apply to pursue advanced work leading to graduation with honors in the major. The application consists of a transcript, a recommendation from one member of the LAS faculty, and a brief description of a proposed research project.
Once accepted into the program, students then complete a two-course sequence – LAS 491 and LAS 492 – which must be taken in successive semesters. In this sequence, students complete an advanced research project under the guidance of an faculty member. To graduate with honors in the major, students must earn at least a 3.5 in these two courses. Students who complete LAS 491 and LAS 492 do take LAS 499, the regular capstone class in the major.

Modern and Classical Languages

Phone: 703-993-1220
Web: mcl.gmu.edu

Faculty

Professors: Gilbert, Ricouart, Winkler
Associate professors: Berroa, Chamberlain, Christensen (chair), Goldin, Leeman, Levine, Rabin, Roman-Mendoza
Assistant professors: Carreño-Rodriguez, Markx, Olson, Ramos-Pellicia, Sanusi, So, Vivancos-Perez
Term associate professors: Zhang
Term assistant professors: Apitz, Falcon, Fujiwara, Fyfe, Quintana, Ruiz-Ross, Salawdeh, Vasilyeva
Term instructors: Chen, Hilmi, Kirsch, Lamothe, Mircea-Pines, Planas, Sweet

Course Work

This department offers all course work designated ARAB, CHIN, CLAS, FREN, FRLN, GERM, GREE, HEBR, ITAL, JAPA, KORE, LATN, RUSS, and SPAN in the Courses chapter of this catalog.

The following courses are offered in English. Knowledge of a foreign language is not required: ARAB 325; CHIN 310, 311, 320, 325, 328; FREN 325, 329; GERM 301, 325; ITAL 325; JAPA 320; RUSS 325, 326, 327, 353, 354; SPAN 321, 322, 325, 329; and all courses designated CLAS and FRLN.

Courses numbered 325 may be repeated once for credit if the authors studied are different.

General Education Requirements

The department offers courses approved to fulfill university general education requirements: RUSS 354 and SPAN 322 fulfill the general education requirement in global understanding; FRLN 385, RUSS 353, and SPAN 388 fulfill the general education synthesis requirement; a number of courses fulfill the general education requirement in literature; RUSS 354 and SPAN 322, which are approved to fulfill the general education requirement in global understanding. See the University General Education chapter of the catalog.

College-Level Requirements

Language courses through the intermediate (200) level can be used to fulfill the college-level requirement in foreign languages for the bachelor of arts degree in the College of Humanities and Sciences and the College of Science. FREN 451, RUSS 353, and RUSS 354 fulfill the college-level requirement in non-Western culture.
Undergraduate Programs

The department offers a bachelor's degree in foreign languages with concentrations in French and Spanish.

The concentration in French is designed for students who want to increase their proficiency in French language and culture while learning about the history, politics, and economics of the many French-speaking countries around the world. Students can take a study abroad course or spend a summer in Paris or Quebec, earning credit towards their degree. They can participate in the many French-speaking activities sponsored by Mason's French Club.

The concentration in Spanish enables students to become proficient in speaking, reading, and writing Spanish while learning about Latin American, Latino and Spanish languages practices, literatures, histories, and cultures. Students are encouraged to do an internship or service learning project, where they can draw on their knowledge of Spanish, gain valuable work experience while working for social change in their communities. Students have many opportunities to study Spanish abroad for as little as a week and as long as a semester and at the same time, earn credit toward their degree.

Both concentrations prepare students for teaching careers at the secondary school level, graduate study in languages, and research and professional work in government and private enterprise.

Foreign Languages with a Second Major

Majors in foreign language are encouraged to complete a second major in another field. Students who want to pursue a second undergraduate major should plan a program of study in consultation with advisors from both degrees and be familiar with the relevant policies on more than one major. See the Academic Policies chapter of the catalog.

Minors

Language majors are encouraged to complete a minor in another field.

The department offers minors in classical studies, Japanese studies, Chinese, French, German, Latin, Russian, and Spanish. They are available to students in any major. Except for classical studies, all the minors have as a prerequisite the completion of an intermediate course in the relevant language.

Graduate Programs

The department offers a distinctive interdisciplinary master's degree in foreign languages designed to meet the needs and interests of prospective and practicing teachers and other professionals. It also prepares students for doctoral study at other institutions. Within the master's degree, students choose one of four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

Students are encourage to participate in the many study abroad programs offered by Mason. These include short courses during winter and spring breaks as well as semester-long programs in the French and Spanish speaking regions of the world.

Funding

The department has a limited number of teaching assistantships for highly qualified graduate students with excellent language preparation. Students develop valuable language teaching experience by working with faculty experts in language teaching pedagogy.

■ Philosophy
Faculty

Professors: Bergoffen, Rothbart

Associate professors: Cherubin, De Nys, Eckenwiler, Froman, Holman, Kinnaman (chair), Light, Paden

Term professor: Boyd

Adjunct professors: D. Gregory, J. Miller, Oberoi, Register, Sigrist, Sojka, Van Camp

Course Work

This department offers all course work designated PHIL in the Courses chapter of this catalog.

Undergraduate Programs

The department offers a bachelor's degree in philosophy, which covers the major issues and areas in philosophy. It is intended to serve the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Majors in philosophy take courses in a variety of philosophical traditions and study logic, ethics, and social and political philosophy. With the skills of critical thinking, skillful writing, and analytical reasoning that are the hallmark of philosophy majors, students are well-prepared for a wide range of careers including law, government service, or graduate study.

The philosophy program can complement other interests of students when they complete a second major in another field. Students who plan to pursue more than one undergraduate major should work out a program of study in consultation with advisors from both majors and be familiar with the relevant policies for completing more than one major. See the Academic Policies chapter of the catalog.

In addition to the general degree in philosophy, students can choose a concentration in philosophy and law. This concentration offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law.

Honors in the Major

Highly qualified students may apply to the honors program in the major. Students can apply in their second semester as a junior, before they have completed 90 credits and should have a minimum GPA in the major of 3.50. Eligible students should submit a transcript, one letter of recommendation from a member of the philosophy faculty, and one writing sample, a paper from one of the student’s courses in philosophy.

To receive honors in the major, students must complete 6 credits of honors course work in either PHIL 422, 425, or 471. To graduate with honors in philosophy, students must complete these courses with a minimum GPA of 3.50.

Minors

The department offers a minor in philosophy and a minor in philosophy and law. These minors are available to students in any major. The department, in cooperation with the Department of Public and International Affairs, coordinates the interdisciplinary minor in political philosophy. See the Interdisciplinary Minors section of this chapter.

Bachelor’s/Accelerated Master’s Program
The department offers highly qualified undergraduate majors in philosophy the opportunity to apply to an accelerated master’s degree program in philosophy. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, generally within five years.

**Graduate Programs**

The department offers a master’s degree in traditional and contemporary philosophy with specialized concentrations in philosophy and cultural theory and in professional ethics. The degree is designed for students who want to further their professional goals or foster their intellectual development. It provides a solid preparation for advanced work in philosophy or other fields such as women and gender studies, cultural studies, or law. The degree provides grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science.

With its focus on traditional and contemporary philosophy, the master's degree program provides students with a historical and pluralistic approach to philosophical questions. The concentration in professional ethics gives students the opportunity to explore the ethical and philosophical issues that arise in such professional fields of study and work as business, health care, scientific research, biomedical technology, and public policy. The concentration in philosophy and cultural theory provides students with a distinctive and important theoretical foundation for doctoral work in cultural studies.

Students are encouraged to pursue opportunities beyond the classroom such as study abroad, professional internships, and research with faculty members.

The department also offers a graduate certificate in professional ethics for those students interested in combining the study of ethics in a variety of career settings. Students may earn the certificate as a stand alone program or pursue it concurrently with a graduate degree program. Part of the coursework for the certificate may be able to be applied also to a degree program. Students must apply and be admitted to the graduate certificate program.

**Psychology**

Phone: 703-993-1342  
Web: gmu.edu/departments/psychology

**Faculty**

*Professors:* Ascoli, Boehm-Davis (chair), Cortina (associate chair for graduate studies), Denham (director, Applied Developmental Program), Klimoski, Maddux, Mandes, Naglieri, Parasuraman (director, Human Factors/Applied Cognition Program), Pasnak, Riskind, Rojahn (director, School Psychology Program, director, Center for Cognitive Development), R. Smith (director, Biopsychology Program), Tangney, Tetrack (director, Industrial/Organizational Program), Winsler, Zaccaro

*Research professors:* Butler, Olds

*Associate professors:* Bitler, Blackwell, Buffardi, Finn, Greenwood, Kello, Kozhevnikov, Peterson, Sanford (associate chair for undergraduate studies), Short (director, Clinical Program)

*Research associate professors:* Bachus, Warren

*Assistant professors:* Baldwin, Cattaneo, Dalal, Kashdan, Kaplan, King, McKnight, Mohr, Monk, Perez-Edgar, Rowe, Thompson

*Term associate professors:* Chrosniak, Wanschura

*Research assistant professors:* Bassett, Fu, McDonald, Stuewig, Tran
Term assistant professors: Battaglia, Hurley, Meier

Affiliates: Eby, Hunt

Adjuncts: Anderson, Benedi, Curtin, Dechman, Hawley, Hirsch, Levitas, Mayfield, Perez, Pomeroy, Schumann, Shiraev, Stanhope, Steve, Werber

Course Work

The Psychology Department offers all course work designated PSYC in the Courses chapter of this catalog.

Undergraduate Programs

The department offers a bachelor of arts degree and a bachelor of science degree in psychology. All psychology majors complete a broad range of courses from social and abnormal psychology to cognitive and biospychology. Students can also choose from special topics courses such as forensic psychology and romantic relationships.

Students in psychology may have the opportunity to do research with a faculty member or do a service learning course, which allows them to put into practice what they've learned in the classroom.

Students interested in graduate study should be aware that undergraduate research experience and letters of recommendation are major factors for admission to graduate study. Such students should distribute courses across a number of areas in psychology and work closely with one or more professors on individual projects during their junior and senior years.

Honors in the Major

Highly qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses (PSYC 490, 491, and 492), which cumulates in the successful completion and presentation of an independent honors thesis. To graduate with honors, students must earn at least 3.50 in the three honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

Minor

The department offers a minor in psychology available to students in any major.

Bachelor’s/Accelerated Master’s Program

The department offers highly qualified undergraduate majors the opportunity to apply to an accelerated master’s degree program in psychology with a concentration in biospychology. If accepted, students will be able to earn both an undergraduate and a graduate degree in psychology, the master's with a concentration in biospychology, after satisfactory completion of 146 credits, sometimes within five years.

Graduate Programs

The graduate programs in psychology are distinguished by an emphasis on basic research and the application of research to solving practical problems in families, schools, industry, government, and health care settings.
The department offers master's and doctoral degrees with concentrations in applied developmental psychology, biopsychology, human factors/applied cognition, and industrial/organizational psychology. They offer a doctoral degree with a concentration in clinical psychology. Finally, they offer a master's degree with a concentration in school psychology as well as a certificate of advanced graduate studies in school psychology.

**Funding**

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**Certificates**

The department offers graduate certificates in aviation psychology, usability, and cognitive neuroscience. These have been designed to meet the needs of students who desire to upgrade their skills and earn a certificate as evidence of their skill attainment. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

The certificate programs are open to all students who hold a bachelor’s degree from an accredited university and meet the admissions requirements for the master's degree in psychology with a concentration in human factors and applied cognition.

**Nondegree Status**

Applicants who have not been admitted to a graduate degree program or a certificate program may apply for nondegree status. Nondegree students must meet the same admission requirements as degree-seeking students. Nondegree status is not intended as a way to qualify for admission as a degree-seeking student.

While it may be possible to transfer the credits earned in nondegree status to a degree program, such transfers are not automatic. They require the approval of the graduate director and the dean. If approved, a maximum of 12 credits earned in nondegree status may be applied to a degree program. Nondegree students who intend to transfer their credits to a degree program should discuss this with the appropriate program director.

**Public and International Affairs**

Phone: 703-993-1400  
Web: pia.gmu.edu

**Faculty**

**Robinson Professors:** Heclo, Paden  
**Emeritus faculty:** Brown, Clark, Early, Gortner, Hart-Nibbrig, Knight, White  
**Professors:** Abramson, Cioffi-Revilla, Conant, Conlan, Druckman, Dudley (chair), Katz, Posner, Regan, Sockett, Wan, Wilsford  
**Associate professors:** Balint, Burt, Dueck, Hackler, Harbour, Lukacs, Mahler, Mandaville, McDonald, McFerson, Miller, Nguyen, Sacco, Snyder-Hall, Toepler, Travis  
**Assistant professors:** Benjamin, Bowie, Brigety, Haddad, Koblenz, Lopez-Santana, Ougrah-Gormley, Robbins
Term assistant professors: Burroughs, Palubinskas, Walker

Affiliate faculty: Bushee, Casamayou, Connolly, Edner, Shogan

Course Work

The Public and International Affairs Department offers all course work designated BIOD, GOVT, and PUAD in the Courses chapter of this catalog.

Undergraduate Programs

The department offers two degrees for students interested in political science, government, and international relations: a BA in government and international politics and a BS in public administration. Majors in government and international politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American politics, international politics, political theory and law, or public policy. Majors in public administration take courses in government and nonprofit management, computer applications, and business administration.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning college credit.

Honors in the Major

Highly qualified students majoring in government and international politics and public administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence GOVT 491 and 496. To graduate with honors in the major, students must complete these courses with a GPA of at least 3.00.

Minors

The department offers minors in American government, international/comparative studies, legal studies, and public policy and management. In addition, it coordinates the Asia-Pacific Studies Minor, Global Systems Minor, and Urban and Suburban Studies Minor and participates with the Philosophy Department in the Political Philosophy Minor. See the Interdisciplinary Minors section in this chapter for descriptions of these minors.

Bachelor's/Accelerated Master's Programs

The department offers highly qualified undergraduates the opportunity to apply to an accelerated master’s degree program in political science or public administration. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 150 credits, sometimes within five years.

Graduate Programs

The department offers masters and doctoral programs in biodefense and political science. They offer a master's of public administration (MPA), in which students can focus their electives to earn a concentration in administration of justice, emergency
management and homeland security, environmental science and public policy, human resources management, international management, nonprofit management, policy studies, public management, publica and nonprofit finance, state and local government, or third-party governance.

**Funding**

The department offers teaching assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**Certificate Programs**

The department offers six graduate certificates. Students may pursue a certificate as a stand alone program or as part of another graduate degree. They must apply for admission to the certificate program and meet the admission standards set for degree-seeking graduate students in the department.

**Master’s International (MI)**

Graduate students can take advantage of Master’s International (MI), a joint program between Mason and the Peace Corps, which enables participants to combine Peace Corps volunteer service with the master's degrees in political science or public administration. See the degree programs below for more details.

■ **Religious Studies**

Phone: 703-993-1290  
Web: religious.gmu.edu

**Faculty**

**Associate professors:** Burns, M. Dakake, Farina, Nguyen, Rashkover, Ro (chair), Shiner  
**Adjuncts:** Bond, D. Dakake, Dreyer, Hebbar, Hostetter, Padgett

**Course Work**

This department offers all course work designated RELI in the Courses chapter of this catalog.

**Undergraduate Programs**

The department offers a bachelor's degree in religious studies for students who are interested in learning more about the world's religious traditions. Majors explore the many dimensions of religion and study religion's spiritual, historical, cultural, and social aspects.

Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Though the required coursework, majors in religious studies develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.
The courses in the undergraduate program are writing intensive. They enable students to study and analyze religious ideas and symbols and give them the skills they need to present well-argued papers.

Minors

Students majoring in religious studies are encouraged to do one of the many minors offered by the college.

The department also offers minors in religious studies and Judaic studies, both of which are available to students in all majors.

Graduate Programs

The department sponsors the concentration in religion, culture, and values in the master's degree in individualized studies (MAIS). This concentration is designed for students who interested in exploring the world's major religions at the graduate level. Students study the development and interaction of the global religious traditions that influence human identity, behavior, culture, and values. They investigate the effects that historical crises and the forces of change have on religion, placing contemporary religious pluralism and inter-religious dialog in a global context.

See the Interdisciplinary Studies (MAIS) section of this chapter for details.

■ Russian and Eurasian Studies

Phone: 703-993-1233
Web: russianstudies.gmu.edu

Faculty

Barnes (History and Art History), Bockman (Sociology and Anthropology), Boettke (Economics), Christensen (Modern and Classical Languages), Johnsen-Neshati (Theater), Katz (Public and International Affairs), Kelly (History and Art History), Korostelina (Institute for Conflict Analysis and Resolution), Levine (Modern and Classical Languages, director), McGlinchey (Public and International Affairs), Pacynska (Institute for Conflict Analysis and Resolution), Vasilyevna-Roberts (Modern and Classical Languages), Wade (History and Art History)

Coursework

As an interdisciplinary program, Russian and Eurasian Studies draws on many courses from across the university. Students should consult with the director to determine whether a particular course may be used to fulfill a requirement or elective in the degree program.

Undergraduate Programs

The bachelor's degree in Russian and Eurasian studies allows students to choose a concentration in one of three areas: Russian language and culture, Russia studies, or Eurasia studies.

■ Sociology and Anthropology
Faculty

Emeritus faculty: Black, Dumont, Golomb (anthropology); Borkman (sociology)

Professors: Gusterson, Lancaster, Seligmann, Williams (anthropology); Dennis, Haines, Kurtz, Rosenblum, Scimecca (sociology)

Associate professors: Bryant, Palkovich, Snead, Trencher (chair) (anthropology); Best, Guagnano, Hanrahan, Jacobs, Rader (sociology)

Assistant professors: Benitez, Bickford, Mantz (anthropology); Bockman, Dale, Davis, Kim, Samara (sociology)

Term associate professor: Masters (sociology)

Term assistant professors and instructors: Arabandi, Zimmerman (sociology)

Affiliate professors: Avruch (anthropology); Bainbridge, Goldstone, Johnson, Levine, Zingraff (sociology)

Adjuncts: Minnich, Nambiar, Pearlman, Sandole-Staroste

Course Work

This department offers all course work designated ANTH, SOAN, and SOCI in the Courses chapter of this catalog.

Undergraduate Programs

Anthropology

The department offers a bachelor of arts degree in anthropology. The program draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

Honors in the Major

Highly qualified students may apply to graduate with honors in the major. Eligible students must have completed at least 60 credits, taken ENGL 302 for the social sciences, completed 15 credits of anthropology (including ANTH 114, 120, and 135), and have a minimum cumulative GPA of 3.50 and a minimum GPA of 3.75 in anthropology courses.

To graduate with honors in the major students must successfully complete a sequence of special honors sections: ANTH 492 (for those focusing on sociocultural anthropology) or ANTH 420 (for those interested in archaeology or biological anthropology) both plus ANTH 499, where they conduct additional research leading to the completion of an honors thesis. For more information, contact the anthropology undergraduate director.

Sociology
The department offers a bachelor's degree in sociology. Sociology majors study how social movements emerge from the collective efforts of individuals and the role that social forces play in defining racial identities and gender roles. They take courses in the theories that explain social phenomena and develop strong research skills, learning how to conduct surveys, interviews, systematic observation as well as how to evaluate sources.

With the strong research skills, critical thinking, and effective writing that are the hallmark of sociology graduates, they are prepared for a variety of career paths from teaching, human service, and human resource occupations to work in the criminal justice system, marketing, and social research. The sociology major is also excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

**Honors in the Major**

Highly qualified students may apply to graduate with honors in the major. Eligible students must have completed at least 75 credits with a minimum of 15 credits in sociology (6 of which must have been taken at Mason) and have a minimum cumulative GPA of 3.50 and a minimum GPA of 3.75 in sociology courses.

To graduate with honors in sociology, students must complete SOCI 480 and 481 with a minimum GPA of 3.50 overall and in sociology courses presented for graduation. The 6 credits of honors courses may count toward the major requirement in sociology. For more information or application procedures, contact the department.

**Bachelor’s/Accelerated Master’s Program**

The department offers highly qualified majors in sociology the opportunity to apply to an accelerated master’s degree program in sociology. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, sometimes within five years.

**Minors**

The department offers minors in anthropology and sociology available to students in any major.

The department coordinates the Immigration Studies Minor. See the Interdisciplinary Minors section of this chapter for more information.

**Graduate Programs**

**Anthropology**

The department offers a master's degree in anthropology. Students can choose one of three emphases: advanced training in sociocultural anthropology; culture, health and bioethics; or transnational and global issues. They can chose from many courses that are richly interdisciplinary, and cover such diverse topics as nationalism and transnationalism; bioethics; social movements, ethnicity and identity; conflict and violence; migration, displacement, and refugees; regional ethnography; and political economy and globalization. Departmental specializations include the following regions: Central and South America, Europe, Africa, the Middle East, Asia, and the United States. Course work progresses from core courses to more advanced courses and culminates in a thesis.

**Sociology**

The department offers a master's and doctoral degree in sociology. Students pursuing a master’s degree in sociology take required courses in theory and methods and a host of electives. Students may choose to focus their electives in one of a number of
emphases: sex and gender; crime, delinquency, and corrections; race and ethnicity; cultural studies; or conflict analysis and management.

The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

**Funding**

The department has a limited number of teaching assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**Cultural Studies**

The master's degrees in anthropology and sociology provide excellent preparation for students interested in pursuing a doctorate in cultural studies who do not already hold a master's degree. Within the master's in sociology, the emphasis in sociology of culture is designed explicitly to prepare students for the doctoral program in cultural studies.

**Nondegree Status**

Applicants who do not wish to pursue a degree may apply for nondegree status. Nondegree students must meet the same admission requirements as degree-seeking students (minimum undergraduate GPA of 3.00, among other criteria). Nondegree students may later apply for admission to a degree program, and up to nine credits earned in nondegree status may be transferred to the master's degrees in anthropology or sociology, subject to the approval of the program director and dean.

■ **Women and Gender Studies**

Phone: 703-993-2896  
Web: wmst.gmu.edu

**Faculty**

Amireh, Baker, Beach, Bergoffen, Bernard, Best, Bullard, Burr, Carbonneau, Cattaneo, Censer, Cheldelin, Cherubin, Christensen, Cohen, Constantine, Copelman, Davidson, Davis, Deshmukh, Dunne, Eby, Fischer, Friedley, Fuchs, Fyfe, Gilbert, Gring-Pemble, Hamdani, Hanrahan (director), Harvey, Hodges, Hodzic, Jadallah, Johnsen-Neshati, Jordan, Kaplan, Karametou, King, Kirkland, Kirsch, Koch, Lont, Mann, Masters, Michals, Misencik, Muir, Palkovich, Pascarell, Pawloski, Rabin, Regan, Ricouart, Rosenblum, Samuelian, Sandole-Staroste, Scott, Seligmann, Snyder-Hall, Stearns, Tichy, Todd, Tolchin, Travis, Vivancos Perez, Yocom, Zawacki

**Course Work**

The Women and Gender Studies Department offers all course work designated WMST in the Courses chapter of this catalog.

**About Women and Gender Studies at Mason**
By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender roles in social, political, cultural, and economic life; gender roles in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people’s lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

**Undergraduate Programs**

The Women and Gender Studies Program offers an interdisciplinary minor open to students from any major. Students have the opportunity to earn credit towards the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason's campus. Students pursuing this minor can take advantage of the many activites and resources provided by the Women and Gender Studies Center.

**Graduate Programs**

The program sponsors the concentration in women and gender studies in the master’s degree in interdisciplinary studies (MAIS). This concentration promotes advanced scholarship that transcends traditional disciplinary boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, public policy, philosophy, social work, conflict analysis and resolution, environmental science, and the arts. See Interdisciplinary Studies, MAIS section of this chapter.

The program also offers a graduate certificate in women and gender studies. Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

**Women and Gender Studies Center**

The academic program is closely affiliated with the Women and Gender Studies Center. The center organizes a wide variety of lectures, conferences, workshops, and other public events throughout the year. The center hosts a library and functions as a community space for students and faculty. It supports the Gender Justice Research Group, a monthly forum for research on gender and global human rights, as well as the Gender Research Project, a methodology class and project focused on gender issues on the Mason campus.

■ **New Century College**

Phone: 703-993-1436

Misty Hensley-McGaffey, Student Services Coordinator

Course Work

NCC offers all course work designated NCLC in the Courses chapter of this catalog.

About New Century College

An integral part of the College of Humanities and Social Sciences, New Century College (NCC) offers students a personalized, interdisciplinary education typical of a small college within the context of a large public university. Drawing on its own faculty, which is enriched regularly with others from across the university, New Century provides a learning environment that integrates interdisciplinary knowledge with workplace and lifelong learning. The programs enhance students' technology skills, improve their writing, and provide them with challenging opportunities.

New Century College students interact closely with faculty; engage in critical thinking, problem solving, creative activity, and leadership development; and participate in experiential education in the form of internships, field studies, service learning, or study abroad. They learn to develop original ideas, engage in active and reflective learning, master competency areas, and conduct independent inquiry with high ethical standards. Both the structure and curriculum of New Century College respond to the needs of civic and corporate communities and provide instruction for a rapidly changing society.

Undergraduate Programs

New Century College offers a bachelor of arts and a bachelor of science degree in integrative studies. The curriculum is based on intensive, interdisciplinary learning communities, coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self reflection.

Students who enroll in this degree program in their first year at Mason take Mason Cornerstones (see below). All students complete their degree programs with an interdisciplinary concentration. See the programs of study below. Students develop mastery of nine essential competencies (communication, valuing, global understanding, problem solving, group interaction, effective citizenship, aesthetic awareness, critical thinking, and information technology) assessed through freshman and graduation portfolios.

Mason Cornerstones

New Century College offers an interdisciplinary first-year program known as Mason Cornerstones. This is open to students in any major. Cornerstones is a 24-credit program that consists of a sequence of four courses: NCLC 101, 102, 103 and 203.

Students who successfully complete Mason's Cornerstones will have met the university general education requirements in lower-level written communication, oral communication, information technology, literature, arts, non-laboratory natural science, global understanding, and social and behavioral sciences.
Transfer Students

New Century College welcomes transfer students from other four-year institutions or community colleges, as well as from other academic units within Mason. Academic advisors work with students to best use transfer credits and provide a plan for timely completion of the bachelor’s degree. All transfer students are required to take NCLC 391 within their first two semesters and meet with an academic advisor as soon as possible.

Minors

New Century College offers minors in leadership studies and nonprofit studies. Both are available to students in any major.

The Sustainability Studies Minor is offered jointly by the Department of Environmental Science and Policy and New Century College. For details, see the Department of Environmental Science and Policy section of the College of Science chapter of this catalog.

Graduate Programs

The college sponsors the concentration in zoo and aquarium leadership in the master’s degree in interdisciplinary studies (MAIS). This concentration prepares students for advanced careers in modern, professional zoos and aquariums. Admission to the concentration and enrollment in the courses is restricted to members of the Association of Zoos and Aquariums.

See the MAIS section of this chapter for details.

Centers

New Century College houses the Center for Field Studies and the Center for Leadership and Community Engagement. The services of these centers are available to all students and faculty in the university.

Krasnow Institute for Advanced Study

Phone: 703-993-4333  
Web: krasnow.gmu.edu  
College Code: KR

Administration

James L. Olds, Director  
Kenneth De Jong, Associate Director  
James L. Olds, Chair, Department of Molecular Neuroscience  
Robert Axtell, Chair, Department of Computational Social Science

Faculty

Ascoli, Axtell, Barreto, Blackwell, Butler, Cebral, Cioffi-Revilla, Cox, Cressman, Crooks, De Jong, Dumas, Gero, Grefenstette, Kabbani, Kalbfleisch, McCabe, Morowitz, Olds, Palkovich, Parasuraman, Peixoto, Sikdar, So, Tsvetovat

The Institute
The Krasnow Institute for Advanced Study seeks to expand the understanding of mind, brain, and intelligence by conducting research at the intersection of the separate fields of cognitive psychology, neurobiology, and the computer-driven study of artificial intelligence and complex adaptive systems, including social systems. These separate disciplines increasingly overlap and promise progressively deeper insight into human thought processes. The institute also examines how new insights from cognitive science research can be applied for human benefit in the areas of mental health, neurological disease, education, computer design, and social system analysis.

The Krasnow Institute for Advanced Study was chartered in 1990 as a private nonprofit Virginia corporation and merged with Mason in 2002, becoming a chartered institute under the Office of the Provost. The Center for Social Complexity joined the Krasnow Institute in 2005. In 2007, the institute became an academic unit housing the Molecular Neuroscience Department and the Computational Social Science Department. With an annual budget of $3.3 million, the institute is home to a scientific staff of 60. Cognitive research at the institute spans from molecules to the mind to social systems. Krasnow scientists have published extensively in the most prestigious scholarly journals and collectively have brought in more than $26.5 million in sponsored research from federal agencies such as the National Institutes of Health and private sources such as the Sir John Templeton Foundation.

**Academic Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Computational Social Science Department**

Phone: 703-993-9298
Email: cssgrad@gmu.edu
Web: socialcomplexity.gmu.edu/index.php

Computational Social Science is the interdisciplinary science of complex social systems and their investigation through computational models and related tools. The field is at the intersection of social science and computer science and spans anthropology, economics, political science, sociology, and social psychology—the classical social sciences—as well as allied disciplines such as geography, history, organization theory, regional science, communication, and linguistics. Computational approaches include agent-based social simulation models (multi-agent systems), social network analysis, mathematical analysis based on complexity theory, social geospatial modeling methods, and automated information and content analysis methods.

**Molecular Neuroscience Department**

Phone: 703-993-4333
Web: neuroscience.gmu.edu

The Krasnow Institute’s Department of Molecular Neuroscience, together with the College of Science (COS) and the College of Humanities and Social Sciences (CHSS), oversees the campus wide Neuroscience Council in developing the Neuroscience PhD curriculum.

Neuroscience PhD courses are listed under NEUR in the Courses section of this catalog. Neuroscience PhD admissions and program requirements are listed under Neuroscience, PhD in the College of Science section of this catalog.

**School of Management**

Enterprise Hall
Phone: 703-993-1807
SOM faculty members have research and teaching expertise on topics such as executive compensation, effect of insider trading on stock prices and e-commerce, and international work groups and teams. Faculty members have provided testimony to nearly every federal agency and served as consultants to industry and organizations such as NASDAQ, the Federal Deposit Insurance Corporation, and the Department of Defense.

Today, more than 4,300 students are studying in five undergraduate majors, the business minor, and five graduate programs. SOM’s offerings provide a solid business core that emphasizes information technologies and communication, entrepreneurial thinking, and a global business strategy. We prepare students to lead with initiative, imagination, and innovation. The Mason MBA, Executive MBA, and MS in Technology Management are pioneers nationwide, being among the first graduate business programs to require a global residency program for all graduate business students.

Of all the business programs in the world, only 560 are fully accredited by the Association to Advance Collegiate Schools of Business (AACSB) International. SOM is one of only 168 business schools with both AACSB business and accounting accreditation.

A Mason business degree provides in-depth exposure in an area of specialization, as well as the skills required for success in a global business world. The school’s unique undergraduate keystone and capstone courses develop communication and analytical skills and provide students with opportunities to interact with regional business leaders.

More than 90 percent of the school’s graduate students study while employed, which gives them numerous opportunities to link classroom learning to real-world business challenges. Because our graduate programs emphasize learning in teams, each student has the opportunity to test classroom concepts against the best practices of some of the region’s premier organizations. SOM integrates teamwork, technology, and innovation into a state-of-the-art curriculum to prepare students for tomorrow’s business environment.

**Administration**

**Jorge Haddock**, Dean  
**David J. Harr**, Senior Associate Dean  
**Alison S. O’Brien**, Associate Dean, Undergraduate Programs  
**Angel J. Burgos**, Director, MBA Program, MSA Program  
**Roy W. Hinton**, Associate Dean, Executive Programs, and Director, Executive MBA Program  
**Karen Hallows**, Academic Director, Executive MBA Program  
**Hilda M. Maness**, Director, Development  
**Pamela A. Allen**, Assistant Dean, Academic and Career Services

**Faculty**

**Accounting**

Aier, Blue, Buchanan, Chen, Dafashy, Douthett, Hasan, Hylton, Jones, Kitching, Lei, Magro, Nutter, Pevzner, Sengupta, Shen, Visvanathan, Warne, Zadeh, Zhang

**Finance**

Canterbury, Christophe, Crockett, Ferri, Gao, Hanweck, Hsieh, Johnston, Nikolova, Philipov, Stahel, Wang, Xie, Zhdanov

**Information Systems and Operations Management**
Management

Coffinberger, Cramton, Cronin, Demory, Joshi, Klimoski, Kravitz, Langfred, C. Lee, H. Lee, Lei, Ling, O’Brien, Parker, Rockmann, Samuels, Wolf, Wolfe, Yasai

Marketing

Cheng, Entrikin, Harvey, Joiner, Jaju, Kulick, Li, Martin, McCrohan, Meamber, Mouri, Philpot, Rose-Robinson, Scott, Sussan

Courses and Programs

SOM offers all course work designated ACCT, BULE, EMBA, FNAN, GSOM, MBA, MGMT, MIS, MKTG, MSOM, OM, SOM, and TECM in the Courses chapter of this catalog.

Undergraduate

The programs in management education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate

SOM offers an MBA, Executive MBA, MS in Accounting, MS in Taxation, and MS in Technology Management. Two graduate certificates are also available in Spatial Business Intelligence and Real Estate Finance.

Academic Policies

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

School of Public Policy

College Code: PP
Rooted in the strong democratic government traditions of the commonwealth of Virginia, the School of Public Policy (SPP) is committed to transcending traditional conceptual boundaries of research and teaching by integrating real-world experience and problem solving into public policy education. The school’s programs focus on the interplay of culture, organizations, and technology to find alternative approaches to public policy decisions and policy making. Teaching and research are focused on the following principal themes: governance; regional and economic development; international commerce and policy; science and technology policy; transportation policy; entrepreneurship; and culture and values in public policy.

SPP contributes to new and innovative concepts in policy formation while building on the fundamental, pluralistic, and democratic characteristics of policy making in the United States. SPP endorses creativity and responsibility in governance, public management, and the development of economic policy.

Administration

Kingsley E. Haynes, Dean
James H. Finkelstein, Vice Dean
Jonathan L. Gifford, Associate Dean for Research and Development
Matthys van Schaik, Associate Dean for Academic Affairs
William H. Coester, Assistant Dean for Human Resources and Planning
Elizabeth C. Eck, Assistant Dean for Program Management
Jill V. Emerson, Assistant Dean for Student Services
Leslie Metzger Levin, Assistant Dean for Graduate Admissions and Marketing

Faculty

associate Faculty

Avruch, Bernold, Conlan, Donahue, Flood, Frase, Friesz, Guagnano, Heclo, Hennessey, Mahler, Paden, Regan, Scimecca

Research and Term Faculty

Adjunct Faculty

Bensimon, Burris, Fowler, Gaske, Gianturco, Gordon, Kewley, Muhlhansen, Robinson, Rogowsky, Stabile, Sullivan, Thompson, Varkonyi, Watkins

Faculty Emeritus

Kash, Warfield

Course Work
SPP offers courses designated PUBP, ITRN, MNPS, LRNG, and TELE in the Courses chapter of this catalog. Other academic courses are offered in conjunction with the research activities of the Mason Enterprise Center.

**Law and Public Policy, Joint Degree Program**

The School of Public Policy and the School of Law offer a joint JD/MPP degree program in law and public policy studies. For more information, go to [www.law.gmu.edu/academics/llm.html](http://www.law.gmu.edu/academics/llm.html).

**Academic Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog.

**Research Centers**

- **Center for Regional Analysis**
  **Director:** Stephen Fuller, PhD

  Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

- **Center for Transportation Policy, Operations and Logistics**
  **Director:** Kenneth J. Button, PhD

  This center works with federal and state authorities to find better ways to manage existing transport networks from surface to air to space. The center is active in the areas of intelligent transportation systems and aviation policy.

- **International Center for Applied Studies in Information Technology**
  **Director:** Stephen Ruth, PhD

  The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

- **Mason Enterprise Center**
  **Director:** Kingsley E. Haynes, PhD

  Dedicated to creating and developing businesses in the Washington, D.C., area, the Mason Enterprise Center (MEC) is the synthesis of seven programs designed to meet the needs of growing businesses. The center focuses the energy, skills, and intellectual capital of the university on enterprise creation, expansion, and restructuring. MEC is highly geared on providing its clients with services that add value to their organizations. The center specializes in business development, entrepreneurship, government contracting, international business, technology ventures, and telework, making it a business-development center unlike any other. In addition, MEC conducts seminars and conferences related to its areas of expertise.

- **Center for Global Policy**
  **Director:** Jack Goldstone, PhD
This center conducts research on a wide range of global policy issues, including foreign trade, democratization and statebuilding, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

**Center for Science and Technology Policy**  
**Director: Philip Auerswald, PhD**

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

**Center for the Study of International Medical Policies and Practices**  
**Director: Arnauld Nicogossian, MD**

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

**State Economic Development Center**  
**Director: Kingsley E. Haynes, PhD**

This center’s focus is on providing education, training, and research support for state-level economic development policy and programs. While the primary goal is to provide assistance to agencies and organizations in Virginia, the center also works with other government organizations in the United States as well as abroad. Methods employed by the center include roundtable discussions, formal focus groups, survey research, statistical analysis, and mathematical models.

**Center for Entrepreneurship and Public Policy**  
**Director: Zoltan Acs, PhD**

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurship approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

**Center for Aerospace Policy**  
**Director: Kenneth J. Button, PhD**

The mission of the Center for Aerospace Policy is to develop the U.S. aerospace sector by providing educational and research resources. The center helps national agencies, such as NASA, enhance their internal efficiency and smooth the interface between U.S. agencies and other government agencies, the private sector, and foreign counterparts.

**Terrorism, Transnational Crime and Corruption Center**  
**Director: Louise I. Shelley, PhD**

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.
Transportation and Economic Development Research Center
Director: Brien Benson, PhD

The Transportation and Economic Development Research Center is a University Transportation Center, funded by the Research and Innovative Technology Administration of the U.S. Department of Transportation. The Center conducts research in transportation finance, transportation and land use, and entrepreneurship and innovation in transportation.

College of Science

Phone: 703-993-3622
Web: cos.gmu.edu
College Code: SC

Departments

- Atmospheric, Oceanic and Earth Sciences
- Bioinformatics and Computational Biology
- Chemistry and Biochemistry
- Computational and Data Sciences
- Environmental Science and Policy
- Geography and Geoinformation Science
- Mathematical Sciences
- Molecular and Microbiology
- Physics and Astronomy

Additional Academic Units

- Biology Undergraduate Program
- Forensic Science Program
- Neuroscience Program

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at Mason. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its 9 departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate students and to undergraduates whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and able to adapt to an ever-changing world.
Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Graduate Degree Programs

COS offers 10 master’s degrees and 10 doctoral degrees. The requirements for each degree are described in the departmental and degree sections that follow. A complete listing of the graduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/degree_programs/graduate.

Undergraduate Degree Programs

COS offers 6 bachelor of arts degrees and 10 bachelor of science degrees. These undergraduate degree consist of course work in university-wide general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

A complete listing of the undergraduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/undergraduate/degree_programs.

College-Level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

Bachelor of Arts

The BA degree provides students with a breadth of knowledge, as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below, and the courses listed in the departmental sections that follow. Except where expressly prohibited, a
A course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements, such as university-wide general education requirements, college-level requirements, or requirements for the major. In some cases, the COS requirements below may be superseded by requirements of the major degree program.

- Philosophy or religious studies: 3 credits, fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement for a total of 6 credits. These two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI.
- Science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). This requirement may be fulfilled by any of the following courses: ANTH 114, 301, 302, 304, 305, 306, 311, 313, 330, 332, 396; ARTH 203, 204, 319, 320, 380, 381, 382, 383, 384, 385, 482; CHIN 318, 320, 325; DANC 118; ECON 361, 362; FREN 451; GEOG 101, 316, 325, 330, 399; GOVT 328, 332, 333, 340, 341, 345, 342, 433; HIST 130, 251, 252, 261, 262, 271, 281, 282, 328, 329, 353, 354, 355, 356, 365, 366, 367, 387, 426, 459, 460, 461, 465, 466; MUSI 103; RELI 211, 212, 272, 313, 314, 315, 337, 374, 375, 490; or RUSS 353, 354. Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210; or by successfully completing a 300- or 400-level course that requires intermediate-level proficiency and is taught in the foreign language; or by achieving a satisfactory score on an approved proficiency test; or by presenting for admission to George Mason University an approved score on the TOEFL and on the TOEFL essay (for students whose native language is not English). International students should consult the Undergraduate Academic Affairs Office about a possible waiver of the foreign language requirement.

Requirements for each BA major are listed in the departmental sections that follow.

**Bachelor of Science**

The BS degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the university-wide general education program plus the requirements for their major. Requirements for each BS major in COS are listed in the departmental sections that follow.

**Teacher Licensure**

Degree programs that prepare students for high school teaching careers are available in the following COS departments or programs: Atmospheric, Oceanic and Earth Science; Biology; Chemistry, Mathematics, and Physics. Students who wish to become K-12 teachers, and who plan to seek teacher licensure should also consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Minors**
Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.

**Undergraduate Policies**

Students should become familiar with the university’s general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Questions about Academic Policies**

Students with questions regarding exceptions to academic policies and college-level requirements should contact the Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; cosdean@gmu.edu). Additional policy information and forms are available online at www.gmu.edu/student/academicaffairs.

**Registration**

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

**Academic Load**

The university limits undergraduate students with a cumulative GPA below 2.00 to 13 credit hours per semester. All undergraduate students returning from suspension are also limited to a maximum of 13 credit hours. Exceptions to this rule are very rare and only occur in exceptional cases.

Undergraduate students in good standing may enroll in up to 18 credit hours each semester. In exceptional circumstances, students may request an overload of the maximum credit hours. Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Withdrawals**

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the
semester as possible, and never after the last day of classes.

Credits graded “W” do not affect a student’s GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student’s academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

University Consortium Registration

Participation in consortium registration is available to degree-seeking juniors and seniors in good standing currently enrolled at Mason. Participation is limited to courses that are approved by the student’s department chair and academic dean, apply to the student’s program of study, are not offered during that semester at Mason, and have space available at the consortium institution. Students should consult with the Consortium Coordinator in the Registrar’s Office, as additional restrictions may apply. Students may take just one course per semester, with a career maximum of two courses. Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Credit to Be Earned at Other Institutions

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean’s office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses can seldom be approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere.

Courses taken elsewhere that have been pre-approved by the dean’s office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar’s Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Additional information about study elsewhere can be found at www.gmu.edu/student/academicaffairs/policies.htm.

Study Abroad

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:

- Have a cumulative GPA of 2.25 or higher at Mason
- Have completed the immediately preceding semester at Mason with a 2.00 or higher
- Have completed the necessary forms and have obtained all required signatures and course equivalencies

The Center for Global Education (globaled.gmu.edu/index.html) may have higher academic standards and students must meet all eligibility requirements.
Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

**Academic Clemency**

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters. To be considered for this exception, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
- Submit their request in writing by the last day of classes for their first semester back at George Mason
- In order to make this request, students should (a) enroll in at least 6 hours during their first semester back at George Mason and (b) earn at least a 2.50 semester GPA with no grade below “C.” If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances

Additional information about clemency can be found at www.gmu.edu/student/academicaffairs/policies.htm.

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Dean’s Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the COS Associate Dean for Undergraduate Programs. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies chapter of this catalog.

Grade appeals should be made to the department or program, following the process specified in the Academic Policies chapter of this catalog. If they are resolved within the department or program, that unit is the final level of appeal. The departmental decision may be appealed to the dean only on the basis of procedural irregularity. Such appeals should be made through the Office of Undergraduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Undergraduate Academic Affairs. When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval.

The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester.

The COS Associate Dean for Undergraduate Programs is the final level of appeal for COS college level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal. The Associate Dean is the final level of approval.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.
Grievances

Grievances should be directed in writing to the Associate Dean for Undergraduate Programs. The COS Undergraduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS or AA&S degree from the Virginia Community College System (VCCS) with a curriculum grade point average (GPA) of at least 2.75 are considered to have met all of George Mason University’s lower level general education requirements. They are still required by the university to complete ENGL 302 and a synthesis course. Transfer students who meet the conditions above and are pursuing a degree in COS are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor’s degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

Excluded Courses

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in the College of Science. Students may use nonactivity PHED and PRLS courses for elective credit for college degrees. For a current list of PHED and PRLS courses that may be used for credit in the college, see the CHSS Undergraduate Academic Affairs Office Web site at http://www.gmu.edu/student/academicaffairs/. Military Science (MLSC) courses cannot be counted toward credits required for a degree in the college.

Once admitted to Mason, students may not take CLEP exams and apply credits from those exams to degrees in the College of Science. Students may apply credits from CLEP exams to degrees in the college only if those credits were awarded at the time of admission.

Atmospheric, Oceanic and Earth Sciences

Phone: 703-993-8958
Web: aoes.gmu.edu

Faculty

Professors: Diecchio, Hazen (Robinson Professor), Schneider, Schopf, Shukla (chair), Straus

Associate professors: DelSole, Harlan, Huang, Kinter, Klinger, McBride

Assistant professors: Jin, Kysar-Mattietti

Contract professor: Doty, Krishnamurthy, Nord-Cooper, Verardo

Course Work

The department offers all course work designated CLIM and GEOL in the Courses chapter of this catalog.

Honors Program for Earth Science and Geology
Earth science majors who have completed 16 credits of math and science, including GEOL 302 or BIOL 307, with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a B or better in GEOL 302 or BIOL 307 are also eligible. To graduate with honors in Earth Science students are required to maintain a minimum GPA of 3.00 in math and science and complete the following courses with an average GPA of 3.50 or better: GEOL 406, 410, and 411.

■ Bioinformatics and Computational Biology

Phone: 703-993-8400
Web: bioinformatics.gmu.edu

Faculty

Professors: Grefenstette, Jafri (chair), Willett
Associate professors: Kinser, Klimov, Seto, Vaisman
Contract assistant professor: Solka

Course Work

The department offers all course work designated BINF in the Courses chapter of this catalog.

■ Biology Undergraduate Program

Phone: 703-993-1050
Web: biology.gmu.edu

Faculty

Director: Rockwood
Assistant Director: Beck
Professors: Rockwood
Term associate professors: Beck, Cressey, Polayes
Term assistant professors: Coss, Fondue, Kocache, Madden, Otto, Polayes
Adjunct faculty: Henley, Jones, Kaminski, Laemmerzahl, McClintock, Oaks, Tondi, Wood-Salvesen

The Biology Undergraduate Program is a collaboration between the Department of Molecular and Microbiology (MMB) and the Department of Environmental Science and Policy (ESP). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Biology Program Director and the Assistant Program Director. It is governed by a Biology Program Committee consisting of the Program Director, two Biology Program faculty, two faculty from the MMB Department and two faculty from the ESP Department.
Course Work

The program offers all undergraduate course work designated BIOL and MTCH in the Courses chapter of this catalog.

Undergraduate Degree Programs

The bachelor degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allows students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science. The program also offers a BS in medical technology. Additional information can be found at the Biology Program’s web site at biology.gmu.edu or by contacting the Biology Program office, David J. King Hall, Room 3005, 703-993-1050.

Advising

All biology majors are strongly urged to see an academic advisor regularly to help them plan their schedule, so they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester and again as they complete 60 credits and 90 credits. Medical technology majors must see the medical technology advisor to obtain permission to register each semester. Call 703-993-1050 or visit David J. King Hall, Room 3005, to make an advising appointment.

Residence Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any program research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Honors Program in Biology

Admission Requirements

Minimum requirements for invitation:

- GPA in biology courses must be 3.50 or better
• GPA in supporting requirements (math and other science) must be 3.00 or better
• Grade of B or better in Biol 213

Ideally, we would like to recruit students in their freshman or sophomore year.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.50 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 7 credits in honors courses in BIOL including three semesters of BIOL 494 (honors seminar, 1 credit) or two semesters of Biol 494 and one semester of BIOL 493 (honors research, 1 credit). The GPA requirements are as follows:

• Minimum 3.50 GPA in honors biology courses
• Minimum 3.50 GPA in biology requirements
• Minimum 3.00 GPA in supporting requirements
• Minimum 3.00 GPA overall

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in medical technology fulfill this requirement by successfully completing BIOL 453. Students not taking BIOL 453 at Mason should consult the program director for a course to fulfill this requirement.

Notes:

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246. Professional study during the senior year involves clinical education at an affiliated school of medical technology. Thirty credits of course work are required, including MTCH 401, 402, 403, 404, 405, and 406. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required course work and overall preparation.

Teacher Licensure

Students who wish to become teachers should pursue either the BA in Biology with a Concentration in Education or the BS in Biology with a Concentration in Education and consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.
Biology for Nonmajors

Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in BIOL 103 and 104. With permission of the instructor, nonmajors may enroll in BIOL 213 and then take one of the following to complete the requirement: BIOL 303, 304, or 305/306. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.

Medical Laboratory Technician Articulation Program

A special program is available for Medical Laboratory Technicians (MLTs) who are graduates of associate degree programs. This program provides substantial credit for the scientific and clinical aspects of the associate degree but requires students to meet clinical requirements for national certifying exams through approved work experience. For details, contact the program director.

Major in Medical Technology as a Second Bachelor’s Degree

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor’s degree before entering the clinical program (4 + 1). Students who have completed a BS in biology or chemistry at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor’s degree with a major in medical technology. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a medical technology advisor.

Premedical Honor Society

Alpha Epsilon Delta Zeta Premedical Honor Society is a national student support group, providing professional school tours, educational programs, and lectures on health topics and the professional school admissions process to students interested in such health-related fields as medicine, dentistry, optometry, and veterinary medicine. Active membership is awarded to students who have completed at least three semesters with a minimum scholastic GPA of 3.00. Associate membership is also available.

Predental Society

Mason students who are interested in pursuing careers in dentistry are encouraged to participate in the Predental Society. This student organization organizes supplemental programming focused toward dentistry as a career.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to
have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

■ Chemistry and Biochemistry

Phone: 703-993-1070
Web: chemistry.gmu.edu

Faculty

Professors: Cozzens, Davies, Foster (chair), Mose, Mushrush

Associate professors: Born, Honeychuck, Hussam, Schreifels, Slayden, Weatherspoon (associate chair)

Term associate professor: Hatton

Assistant professors: Bishop, Cooper, Couch

Term assistant professors: Kort, Pettigrew

Course Work

This department offers all course work designated CHEM in the Courses chapter of this catalog.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336, 337, or 465.

Honors Program in Chemistry

Chemistry majors who have completed prerequisites for CHEM 455 and 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 and 456 with a minimum GPA of 3.50.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required course work and overall preparation.

Prepharmacy Society

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Prepharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.
Chemistry Club

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Graduate Degree Programs

The department offers an MS in chemistry with a research project (thesis option) or an all-course-work program (nonthesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the degrees in environmental science and policy, bioscience, and physical sciences. An area of emphasis in computational chemistry is available through the PhD in computational sciences and informatics program offered in conjunction with the Department of Computational and Data Sciences.

Chemistry, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Chemistry within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

■ Computational and Data Sciences

Phone: 703-993-3807
Web: cds.gmu.edu

Faculty

Associate professors: Axtell*, Borne, Cebral, Klimov*, Wallin, C. Yang, R. Yang*, Zoltek

Assistant professors: Camelli, Griva, Opher*, Sheng, Tollaksen, Weigel, Zhang

Research professors: Bilitza, Dere, Economou, Gomez, Poland, Titarchuk

Adjuncts: Guharay, Lanzagorta, Veytsman

*Faculty holding primary appointments in other departments.

Course Work
The department offers all course work designated CDS, CSI, CSS, and NANO in the Courses chapter of this catalog.

# Environmental Science and Policy

Phone: 703-993-1043  
Web: esp.gmu.edu

## Faculty

**Professors**: Jones, Lawrey  
**Term professor**: Talbot  
**Associate professors**: Balint, Birchard, Gillevet, Jonas (Chair), Macfarlane, McBride, Rockwood, Torzilli  
**Assistant professors**: Ahn, Crate, Darnall, Edwards, Forkner, Kraus, Manca, Weeks  
**Term associate professors**: Cressey, Parsons, Sklarew  
**Term assistant professors**: Largen, Peters  
**Research associate professor**: Litchfield  
**Emeritus professors**: Bradley, Ernst, Kelso, Shaffer, Skog

## Other Environmental Program Faculty

**Professors**: Black, Chandhoke, Conlan, Diecchio, Foster, Gifford, Haack, Houck, Mose, Mushrush, Nadeau, Regan, Rowan, Sage, Schum, Wan, Willett, Wong  
**Associate professors**: Beach, Christensen, Conant, deMonsabert, Fryxell, Guagnano, Honeychuck, Kozlowski, Mahler, McBride, Meyer, Paden, Palkovich, Rodgers, Royt, Seto, Stough, Wood  
**Assistant professor**: Kysar-Mattietti, Parker  
**Term associate professors**: Verardo  
**Term assistant professors**: Nord-Cooper  
**Affiliate faculty**: Bailey, Bartoldus, Baxter, Buchino, Burgess, Creque, Croisier, Hamdan, Jordan, Kriechevsky, Lebovitz, Leimgrubcr, Litchfield, Maldini, Maldonado, Marra, Maurakis, May-Collado, Megonigal, Noe, Oren, Ragen, Rybicki, Seidensticker, Sillett, Sladen, Smith, Songsasen, Strong, Wang

## Course Work

This department offers all course work designated EVPP and numerous BIOL courses, listed in the Courses chapter of this catalog.

## Other Undergraduate Programs
In addition to its own undergraduate programs, the Environmental Science and Policy department also works closely with and provides administrative input to other undergraduate programs.

In concert with the Biology Undergraduate Program, through which the BA and BS degrees in biology are offered, Environmental Science and Policy administers the environmental and conservation biology and the marine and freshwater biology concentrations.

The Concentration in Environmental and Conservation Biology (ESCB) within the BS in Biology is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology.

The Concentration in Marine and Freshwater Biology within the BS in Biology is offered to students seeking a biology degree that focuses on marine and freshwater biology and prepares them for graduate work or employment in aquatic, marine and fisheries fields.

Refer to the Biology Undergraduate Program section for more information on Biology, BS program and these two concentrations.

Environmental Science and Policy and the department of Geography and Geoinformation Sciences cooperatively offer the BS in Global and Environmental Change. This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from the other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth's systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. Refer to the GGS section for more information on the Global and Environmental Change, BS program.

The Concentration in Environmental Science (EVSC) within the BS in Earth Science degree program is offered by Environmental Science and Policy jointly with the Department of Atmospheric, Oceanic and Earth Sciences. It is intended for students interested in studying the earth and its environment. Refer to to AOES section for more information on the Earth Science, BS degree program and this concentration.

Other Graduate Programs

In addition to its own graduate programs, the Environmental Science and Policy department also participates in the MS in Earth Systems Science administered primarily through the Department of Geography and Geoinformation Science (GGS). Please see the GGS listing for program requirements.

The Environmental Science and Policy department also offers (jointly with the Institute for Conflict Analysis and Resolution) the Graduate Certificate in Environmental Conflict Resolution and Collaboration, which focuses on a systems approach to environmental conflict and how to understand its legal, regulatory, and ecological implications. Coursework addresses the strategic thinking that is required for assessing and designing appropriate environmental conflict resolution processes, as well as understanding the public interest and the intertwined questions of social justice and sustainability that make environmental conflict particularly important and challenging.

■ Forensic Science Program

Phone: 703-993-1050
Web: cos.gmu.edu/forensics

Faculty

Director: Whildin
The Forensic Science Program is an interdisciplinary academic collaboration between the Department of Chemistry and Biochemistry; the Department of Molecular and Microbiology (MMB); the Department of Environmental Science and Policy (ESP); and the Department of Bioinformatics and Computational Biology (BCB). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Forensic Science Program Director, and governed by an interdepartmental Forensic Science Program Committee.

Course Work

The program offers all course work designated FSRC in the Courses chapter of this catalog.

Undergraduate Degree Programs

The Forensic Science Program oversees the undergraduate minor in Forensic Science.

Graduate Degree Programs

The Forensic Science Program oversees the MS and Graduate Certificate programs in Forensic Science.

Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212
Web: ggs.gmu.edu

Faculty

Professors: Agouris, Di, Falconer, Haack, Taylor, Waters, Wong

Associate professors: Beach, Chiu, Curtin, Houser, Qu, Stefanidis, R. Yang

Assistant professors: Cervone, Kronenfeld, Leslie, Manca, Rice, Sun, C. Yang, W. Yang, Zolnik

Research or contract professors: Gomez, Pilon, Self

Term instructors: Boudinot, Halliden

Course Work

This department offers all courses designated EOS and GEOG in the Courses chapter of this catalog.

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GEOG 415. Students majoring in Global and Environmental Change fulfill this requirement by successfully completing EOS 304.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

PhD Studies in Other Programs

The department participates in other programs that provide opportunities for geographical, environmental, and earth science research. A popular example is the Environmental Science and Public Policy PhD Program where faculty members serve as both dissertation committee members and chairs. Geographic studies fit well with many issues related to public policy, planning, conservation, and sustainable development. Program description and degree regulations are listed under the Department of Environmental Science and Policy.

The department also participates in the Public Policy PhD Program, along with some of the university’s leading geographers who are members of the School of Public Policy. In addition, geography and geoinformation science faculty members provide joint supervision and serve as committee members to support those pursuing research primarily geographic in nature. Program description and degree regulations can be found under the School of Public Policy listing. Several departments participate in supervisory committees providing a rich opportunity for students to expand their interdisciplinary interests with these departments.

Mathematical Sciences

Phone: 703-993-1460
Web: math.gmu.edu

Faculty

Professors: Alligood, Colonna, Fischer (chair), Kulesza, B. Lawrence, J. Lawrence, Levy, Morris, Polyak, Sachs, Saperstone, Sauer (COS Distinguished Scholar), Shapiro (undergraduate coordinator), Singman, Soltan, Walnut (graduate coordinator)

Associate professors: Agnarsson, Anderson, Gabel, Goldin, Kiley, Lamba, Lim, Lin, Sander, Seshaiyer, Wanner, Zoltek

Assistant professors: Emelianenko, Griva, Napoletani

Adjuncts: Crain, Gill, Lightbourne, Morris, Morse, Moumen, Nefessi, Roberts, Shaw, Wallace, Yazigi, Zampedro

Admin professional: O’Brien

Term instructors: Crossin, Goldman, Granfield, Matveev, Nuttall, O’Beirne

Affiliates: Loustaunau

Emeritus: Cabell

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or pursue a program focused on either actuarial mathematics or applied
Mathematics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Course Work

The Mathematical Sciences Department offers all course work designated MATH in the Courses chapter of this catalog.

Writing-Intensive Requirement

Mason policy requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290.

Math Tutoring Center

The department manages the Math Tutoring Center, which offers free tutoring for first- and second-year math courses (math.gmu.edu/tutorcenter.htm). Tutoring is given by advanced mathematics students and available on a drop-in basis with daytime and evening hours throughout the term.

Math Learning Center

The Math Learning Center (math.gmu.edu/mathlearningcenter.htm) for a small fee offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in Math 105, 106, 108, 110, 111, 112, or 125.

Honors Program in Mathematics

Mathematics majors who have maintained a GPA of at least 3.5 in Mathematics courses and a GPA of 3.5 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite. Admission to the program will be monitored by the undergraduate committee. To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.5 in mathematics courses and successfully complete MATH 405 and 406 with an average GPA of at least 3.5 in these two courses.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Certificate in College Teaching

A student enrolled in the MS or PhD program in mathematics who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the Higher Education Program’s College Teaching Graduate Certificate, offered through the College of Humanities and Social Sciences (LA-CERG-CTCH).
Students must complete 18 credits as follows: CTCH 602, 603, 604 or 605 (or equivalents with a specific disciplinary focus), 685, and 6 credits of CTCH electives, approved by the program director for higher education. Credit can be earned for CTCH 685 (practicum) by working one semester as a graduate teaching assistant in the Mathematics Department.

**Mathematics, Bachelor’s/Accelerated Master’s Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Mathematics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

■ **Molecular and Microbiology**

Phone: 703-993-4263  
Web: gmu.edu/departments/mmb

**Faculty**

**Chair:** Willett  
**Professors:** Bailey (distinguished), Liotta, Petricoin, Popov, Soyfer (distinguished university), Willett  
**Associate professors:** Baranova, Christensen, Fryxell, Grant, Royt  
**Assistant professors:** Cox, van Hoek, Wu  
**Term assistant professors:** Beck (associate chair), Coss, Fondufe, Fox, Jarrar, Kocache, Madden, Otto, Polayes  
**Adjunct faculty:** Baker, McClintock, Pitt, Tondi  
**Emeritus:** Isbister

**Course Work**

The department offers all course work designated BIOL, BIOS, and MTCH in the Courses chapter of this catalog.

**Other Undergraduate Programs**

The Molecular and Microbiology department works closely with and provides administrative input to the Biology Undergraduate Program, through which the BA and BS degrees in Biology are offered. Refer to the Biology Undergraduate Program section for more information on bachelors degrees in Biology.

**Policy on Using Departmental Laboratories**

Only authorized experiments and exercises may be carried out in any departmental research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.
Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is completed.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE general exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the exam.

■ Neuroscience Program

Phone: 703-993-4333
Web: gmu.edu/departments/neuroscience

Faculty

Director: Jafri

Professors: Ascoli, Butler, Jafri, Olds, Smith, McCabe, Parasuraman

Associate professors: Blackwell, Cebral, Flinn, Fryxell, Greenwood, Houser, Kello, Klimov, Peterson, Sander, So

Assistant professors: Barreto, Cox, Dumas, Kabbani, Kalbfleisch, Kochevnikov, Peixoto, Sikdar, Thompson

Neuroscience at George Mason University is an interdisciplinary field, grounded in biology, chemistry, and psychology. Research and education in neuroscience at Mason is conducted under the auspices of the Neuroscience Advisory Council (NAC). The BS degree in neuroscience is administered by the Psychology department in the College of Humanities and Social Sciences, and the PhD program in neuroscience is administered by the College of Science. The neuroscience faculty at Mason comprise a unique blend of traditional, experimental, and theoretical scientists. They include faculty in the Psychology; Molecular Neuroscience; Molecular and Microbiology; Physics and Astronomy; Bioinformatics and Computational Biology, and Electrical Engineering departments. Research in neuroscience focuses on the broad areas of behavior, anatomy, physiology, biochemistry, computational modeling, and informatics. Some of the key research initiatives currently underway at Mason include studies of:
• effects of drugs and alcohol on behavioral and neurological development
• cellular organization and connections of sensory processing areas in fish
• biochemical dynamics in disorders of the basal ganglia
• computational methods for simulation of complex biological systems
• description and generation of neuronal morphology
• adaptive control for stabilization of epilepsy
• role of metals in memory and Alzheimer's disease
• biochemical/metabolic simulations at the organism level
• cellular and sub-cellular models of associative learning

Course Work

The program offers all course work designated NEUR in the Courses chapter of this catalog.

■ Physics and Astronomy

Phone: 703-993-1280
Web: www.physics.gmu.edu

Faculty

Professors: Becker*, Blaisten-Barojas*, Dworzecka, Ehrlich (chair), Ellsworth, Lieb, Mishin, Satija, Summers, Trefil

Associate professors: Barreto, Ceperley, Opher, Rubin, Satyapal, Sauer, So, Wallin*, Weingartner

Assistant professors: Cressman, Rosenberg, Tian, Weigel*, Zhang*

Term associate professor: Goldman, Oerter

Term assistant professors: Geller, Iacoletti, Jazaeri, Wyczalkowski

Term instructors: Ericson, Ewell

Emeriti: Ceperley, Evans, Mieleczarek

Research faculty: Duxbury, Gliozzi, Meier, Poland, Richards

*These guest faculty hold primary appointments in other departments.

Course Work

The Physics and Astronomy Department offers all course work designated ASTR and PHYS in the Courses chapter of this catalog.

Honors Program in Physics

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at Mason may apply to the departmental honors program when they complete the first semester of their junior year. To graduate
with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and 406 with a GPA of at least 3.50 and a grade of at least A- in PHYS 406.

**Honors Program in Astronomy**

Astronomy majors who have completed the prerequisites for ASTR 405 Honors Thesis in Astronomy, have a GPA of at least 3.5 in ASTR and PHYS courses taken at GMU, and have a GPA of at least 3.5 in all courses taken at GMU may apply for admission to the Astronomy Honors Program. To graduate with honors in astronomy, a student must maintain a GPA of at least 3.5 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 and 406 with a GPA of at least 3.5 and a grade of A- or better in ASTR 406. Students in ASTR 405/406 will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

**Alternative Introductory Sequence**

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, 161, 260, 261, 262, and 263). Students who decide to major in physics after completing PHYS 243, 244, 245, and 246 may do so but only with written permission of the Physics and Astronomy Department. Those students are required to take at least 4 additional credits in approved physics courses.

**Physics for Nonmajors**

PHYS 243, 244, 245, and 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, 102, 103, and 104 are intended for nonscience majors. PHYS 160, 161, 260, 261 or 265, 262, and 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, 244, 245, 246; PHYS 103, 104; or PHYS 160, 161, 260, 261, 262, 263.

**Research Opportunities**

The department offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research of interest to them, based on their examination of the Physics Department web site.

**Teacher Licensure**

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2078, e-mail gacline2@gmu.edu, or go to gse.gmu.edu.

**Physics, Bachelor’s/Accelerated Master’s Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Physics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Additional Academic Units

Art Education
Arts Management
Computer Game Design
Film and Video Studies

“Mason is deeply committed to the arts and educating our students about the significance the arts have in all our lives. This is why the arts are integral to our institution. We encourage active student participation in the many programs and related courses in the arts that are scheduled throughout the year. Students are able to receive a more balanced education, develop a deeper appreciation of the arts, and achieve a more enlightened perspective of the world.”

—Alan G. Merten
President, George Mason University

The College of Visual and Performing Arts (CVPA) creates an academic environment in which the arts are considered as individual disciplines as well as interdisciplinary forms that strengthen each other. Courses of study are designed to lead to careers as creators, performers, teachers, managers, and scholars of the arts, as well as prepare students for the challenges of a rapidly changing world. In addition to providing strong programs for arts majors and minors, CVPA strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal arts education.

Studying the arts goes hand in hand with creation and performance. CVPA provides the theaters, studios, rehearsal spaces, computer laboratories, recital halls, and performance classrooms in which students hone their skills. Each major features strong academic preparation in the history and theory of the art form that supports discipline based technique courses. Creative work and performance are at the core of most courses of study. The college’s faculty of practicing artist-teachers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment. Students regularly perform, create, exhibit, and otherwise develop their art forms in a wide variety of public venues, enhancing their experience as working artists while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts, which comprises a variety of professional presenting and producing units that provide a diverse program of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform in the Concert Hall, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of
the Concert Hall, TheaterSpace, the Fine Arts Building and Johnson Center Galleries, Harris Theater, and other campus venues make the arts pervasive at Mason and in our larger community.

Administration

William F. Reeder, Dean
Linda G. Miller, Senior Associate Dean
Brian Marcus, Associate Dean, Development and Alumni Affairs
Andrew Bursten, Director Finance and Administration, CFO
Thomas Reynolds, Director of Artistic Programming, Marketing and Audience Services
Julie Thompson, Executive Director, Center for the Arts
Jean Kellogg, Executive Director, Hylton Performing Arts Center
Victoria N. Salmon, Assistant Dean, Graduate Studies
Scott Martin, Assistant Dean, Research, Technology
Rick Davis, Artistic Director, Center for the Arts and Co-Artistic Director, Theater of the First Amendment

Undergraduate Degree Programs

The undergraduate degree consists of course work in university general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Graduate Degree Programs

CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described in the sections that follow.

Academic Policies

Students are ultimately responsible for their academic progress towards their degrees. Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (Performing Arts Building, A407; 703-993-4551).

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Graduate students earning degrees in CVPA may register for a maximum of 13 credits per fall and spring semester. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Accomodations for Disabled Students
Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Advising

Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits, or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.

Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

General Education Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the University General Education chapter (University General Education). Students accepted into the Honors Program in General Education fulfill their core general education requirements with completion of that program of study. Students are strongly advised to consult the University General Education chapter of this catalog for information concerning general education.

Minors

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. Some departments have more specific criteria for applying credits to a minor.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take nonactivity PHED courses for elective credit for CVPA degrees.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

Study Elsewhere

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean's office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence.
community colleges are not part of the University Consortium, and requests to take community college courses are seldom approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere review.

Courses elsewhere that have been pre-approved by the dean's office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar's Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Transfer of Credit

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status into a degree program.

Graduate credit earned prior to admission to a certificate, master's, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see the Graduate Policies/Transfer of Credit portion of the catalog for more detailed information about the requirements.

Withdrawals

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See University Academic Policies for further details.

Appeals Process

Appeals of Academic Procedures:

See Academic Policies in George Mason University's University Catalog.

CVPA Procedures for Grade Appeal:

Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor is unfair. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The following are the College's steps in grade appeals:

1. The student meets with the professor to discuss the grade and class performance; this meeting should occur within two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Department or Program Chair.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the appeal, the student must submit a written appeal to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.

The Decision of the CVPA Associate Dean (undergraduate students), or Assistant Dean (graduate students) is final.
CVPA Procedures for Appeal of an Academic Action:

In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.
2. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.
3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.
4. A nonparticipating observer of the student's choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.
5. The student may follow University appeal procedures outlined in the University Catalog.

CVPA Procedure for Non-Academic Appeals or Grievance:

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator follows the following steps:

1. The student meets with the professor and Department Chair to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Chair only.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all non-academic appeals and grievances.

Academic Dismissal from a Graduate Program:

The Registrar's Office contacts students via e-mail if they earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. a written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.
4. The CVPA Assistant Dean for Graduate Programs reviews the appeal.
5. The final decision of the CVPA Assistant Dean is forwarded to the student and Registrar's Office.
6. The student may follow University appeal procedures outlined in the University Catalog.

For these, and any other academic concerns, students are encouraged to contact George Mason University's Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university. (Academic Policies).

CVPA Courses

Some CVPA courses transcend individual disciplines. These courses are administered by the Dean’s Office and are designated CVPA in the Courses chapter of this catalog.

Art and Visual Technology
Faculty

Harold Linton, Chair

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (chair), Mandes, Sandell

Associate professors: Ashcraft (associate chair), Crawford, Feerick, Frenn, White

Assistant professors: Cooley, Cui, Endress, Karametou, Rothstein, Sheridan, Winant (associate chair), Wrbican

Term assistant professors: Constantine, Del Popolo, Malone, Stanley, Starr

Adjunct faculty: Bradley, Bulisova, Carr-Shaffer, Castellana, Chao, Clements, Cushner, DeLuca, Dicicco, Fairfax, Ferreira, Goldman, Gorman, Guerrieri, Herce, Hicks, Ho, Hoffmann, Kerns, Kirk, Nahidian, Organ, Petzwinkler, Rodriguez, Rozario, Sapsford, Serafin, Tomhave, Watson, Wiseman

Mission

The Department of Art and Visual Technology (AVT) offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the AVT Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

Course Work

The Department of Art and Visual Technology offers all course work designated AVT in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

Undergraduate studio degrees offered by the Department of Art and Visual Technology include the bachelor of arts (BA) and the bachelor of fine arts (BFA). The department also offers an undergraduate minor in AVT, an interdisciplinary minor in multimedia, and a departmental honors program for selected AVT majors.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in AVT. Consult the course listings for prerequisites.
Admission to AVT Requirements

All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review. Students may be admitted to study in the BA or BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

BFA Portfolio Review

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the AVT Department. Please call the main office to schedule an appointment (703-993-8898).

For current Mason student in the AVT BA program who wish to change to the BFA program, or other current Mason students, application deadlines are at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their AVT concentration in the semester prior to their application to discuss the portfolio.

For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students may alternatively be admitted to study in the BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the Department of Art and Visual Technology for an application and specific directions on presenting the portfolio.

Artsbus Requirement

All AVT majors must meet the department’s requirement of travel to galleries and museums through the AVT Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five
semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

Visual Voices Requirement

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

Major GPA

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Studios

The Art and Visual Technology program is located in the arts building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

AVT Honors Program

Students interested in the Honors Program in Art and Visual Technology should contact the chair of the department. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

Academic Policies
Please see College of Visual and Performing Arts academic policies.

**Art Education**

Renee Sandell, Program Director  
Phone: 703-993-8562  
Web: arteducation.gmu.edu

The master of arts in teaching in art education is a preservice degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, and studio work prior to preservice teaching internship and seminar.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Arts Management**

4260 Chain Bridge Road  
Fairfax, VA 22030  
Phone: 703-993-8926  
Web: artsmanagement.gmu.edu

**Faculty**

Richard Kamenitzer, Program Director

**Professor:** Reeder

**Associate professors:** Brindle, Marcus, Martin

**Term associate professor:** Kamenitzer (program director)

**Adjunct faculty:** Allen, Berardelli, Bienvenu, Case, Coppage, Dawn, Denhardt, Hauptle, Hill, Huschle, Kaiser, Kraft, Lopez, Madden, Murray, Richard, Simpson, Smyers, Thompson

**Course Work**

The Arts Management Program offers all course work designated MAM in the Courses chapter of this catalog.

**Graduate Certificates:**

**Arts Entrepreneurship**
The Arts Entrepreneurship certificate is for early to mid-career professionals working at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the actual execution of business models.

**Fund Raising and Development in the Arts**

The Fund Raising and Development certificate is especially helpful for mid-career professionals. It focuses on the practical application of development principles, writing and communication skills, and strategic planning.

**Public Relations and Marketing in the Arts**

The Public Relations and Marketing in the Arts certificate focuses on strategic planning, development and implementation of public relations and marketing in arts organization for the beginning and mid-level professional.

**Special Events Management in the Arts**

The Special Events Management in the Arts certificate is for the entry level or mid-level professional to increase their skills in the fast paced and creative field of events management.

**PROGRAM**

The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the world of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of performing and visual arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship-building management among the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 23-credit core and then select courses from a cluster: entrepreneurship in the arts and management; finance and budgeting for the arts; marketing and public relations; or an arts-specific cluster. Students also take internal and external internships. The internal internship affords an in-depth opportunity to work with professionals in residence at Mason’s Center for the Arts. The external internship provides the opportunity to work at more than 60 different visual and performing arts venues in the Washington, D.C. metropolitan area.

**Admissions Requirements**

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that applicants will come from the arts community, with experience and training in music, dance, theater, and visual and technical arts and wish to add the skills of marketing, finance, strategy, entrepreneurship, and management to their repertoire. It is also expected that students will enter with more developed skills in the business side of the arts and wish to unite these skills with prior experiences in the arts. Completed applications must be received by March 1 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities
- A two-page (maximum) statement of intent and goals

Applicants might be asked to interview with at least one member of the program faculty or Admissions Committee. In addition, applicants may submit a portfolio that demonstrates work experience. Internship experience for recent graduates will also be considered.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

---

**Computer Game Design**

Performing Arts Building, Room A407  
Phone: 703-993-1321  
Web: cvpa.gmu.edu/game-design

**Faculty**

Scott Martin, Program Director

Associate Professor: Martin (program director)

Term Assistant Professor: Wren

---

**UNDERGRADUATE PROGRAM**

The 120 credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability postgraduation.

**Course Work**

The Computer Game Design Program offers all course work designated GAME in the Courses chapter of this catalog.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students seeking a BFA in computer game design should speak with the program director about this requirement.

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

**Major GPA**
All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

■ Dance

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

Faculty

Elizabeth Price, Chair

Professors: Lepore, Miller, Shields

Associate professors: Price (chair), Studd

Assistant professors: Joyce

Term Assistant Professors: Dinapoli, Fang, Reedy, Willis

Adjunct Faculty: Bush, Clancy, Cronmiller, Goodson, Koucheravy, Lee, Lees, Mattingly, Nuamah, Summerall, Volberg, Windom

Course Work

The Department of Dance offers all course work designated DANC in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

The Dance Department offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the department web page, dance.gmu.edu, or by calling the department office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Certification to Teach

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:
• Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.**

• Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).

• Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.

• As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.

• With committee approval, register for and complete EDUC 300 and 302 and EDRD 300.

• After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a postbaccalaureate semester.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**GRADUATE PROGRAM**

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching in higher education. Candidates are expected to enter the program with significant professional performance at the national or international level, advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.

**Admission Requirements**

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the Dance Department a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the Dance Department at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

■ **Film and Video Studies**

Performing Arts Building, Room A407
Phone: 703-993-1992

Faculty

Cynthia Lont, Program Director

Clayton Austin, Theater; Thomas Britt, Film and Video Studies; Julie Christensen, Modern and Classical Languages; Mark Cooley, Art and Visual Technology; Lynne Constantine, Art and Visual Technology; Edgar Endress, Art and Visual Technology; Peggy Feerick, Art and Visual Technology; Cynthia Fuchs, English; Edward Gero, Theater; Timothy Gibson, Communication; Carma Hinton, Robinson Professor; Richard Kamenitzer, Arts Management; Howard Kurtz, Theater; Alison Landsberg, History and Art History; Scott Martin, Arts Management; Kristina Olsen, Modern and Classical Languages; Paula Petrik, History and Art History; Janine Ricouart, Modern and Classical Languages; Mark Sample, English; Jessica Scarlata, English; Gail Scott White, Art and Visual Technology; Martin Winkler, Modern and Classical Languages; Sue Wrbican, Art and Visual Technology

Course Work

The Film and Video Studies Program offers all course work designated FAVS in the Courses chapter of this catalog.

PROGRAM

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, English, History and Art History, Modern and Classical Languages, New Century College, and Theater. Students study film and video production, theory, criticism, ethics, screenwriting, and business.

The vocabulary of film (broadly defined) now pervades the intellectual, cultural, political, and social landscape. The tools the filmmaker wields apply to an ever-widening range of tasks across the fields of human endeavor, from traditional narrative and documentary productions to academic research and pedagogical applications to projects of personal expression. Emerging technology makes the means of production available to anyone with access to a moderate level of computing power. This combination of factors makes film an important subject for academic inquiry and training.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students seeking a BA in film and video studies fulfill this requirement by completing THR 482.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Music

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: gmu.edu/departments/music

Faculty

James Gardner, Chair
Professors: Camphouse, Carroll, Engebretson, J. Gardner (chair), Maiello, Miller, Monson (associate chair), Smith

Term professor: Balakerskaia, Hearden, Johonnott, Lapple

Associate professors: Billingham, T. Owens

Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Hughes, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner

Course Work

The Music Department offers all course work designated MUSI in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

The two undergraduate degree programs offered through the Department of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the department enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The department also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the department provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The department also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The department seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the music department web site: gmu.edu/departments/music.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the Department of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Writing-Intensive Requirement
Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Teacher Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this chapter. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

GRADUATE PROGRAMS

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

Graduate Certificates

Instrumental Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Piano Performance Artist Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Vocal Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Music, MM

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance (single or multiple instruments), music education, composition, conducting, and pedagogy and performance. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.
PhD in Music Education (pending SCHEV approval)

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

Doctor of Music Arts (pending SCHEV approval)

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline. DMA graduates are qualified to teach music at the college or university level, as well as K–12.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

■ Theater

Performing Arts Building, Room A407  
Phone: 703-993-1120  
Web: gmu.edu/departments/theater

Faculty

Clayton Austin, Chair  
Professors: D’Andrea (Robinson professor), Davis  
Associate professors: Austin, Elston, Gero, Johnsen-Neshati, Kurtz, McDonald  
Term associate professor: Chew  
Adjunct Faculty: Cetron, Lechter, Lee, McManus, Mountain, Murray, Nanni-Messegee, Wallace

Course Work

The Theater Department offers all course work designated THR in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAM

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in the theater. Students electing to major in theater complete the theater core, which is a group of courses providing a broad introduction to the various theater arts and striving to create a shared body of knowledge within the department’s student population.
To organize their advanced work within the major, students elect a course of study that includes classes in at least two of three areas: performance, design and technical theater, and theater studies. The department aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements including foreign language. Students must earn a minimum 2.00 cumulative GPA in their major.

**Theater Concentrations**

Theater majors may apply to complete their degree in one of the following concentrations: Design and Technical Theater, Performance, Playwriting and Dramaturgy, or Theater Studies.

To apply for admission into a concentration a student must have:

- completed 45 credits including THR credits as specified in the concentration
- cumulative GPA minimum of 2.5

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated writing-intensive in their majors at the 300 level or above. Students seeking a BA in theater fulfill this requirement by successfully completing THR 350 or THR 351.

**Honors in Theatre**

Students wishing to pursue Honors in Theater should contact the department chair.

**Production Opportunities**

Participation in Theater Department productions with the GMU Players is expected of all declared majors. Up to 4 practicum credits, 1 credit per assignment can be awarded for satisfactory completion of performance and production assignments in the major, including faculty or guest-directed GMU Players main stage, studio, or Theater of the First Amendment (TFA) productions.

TFA, a professional theater in residence within CVPA, offers students the chance to work closely with professional artists. TFA productions regularly employ student assistants in stage management, directing, design, dramaturgy, technical crews, and production and company management. Students are eligible to audition for age-appropriate roles or understudy assignments in TFA productions and may participate in the Membership Candidate Program through the Actors’ Equity Association.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**The Volgenau School of Information Technology and Engineering**
The mission of the Volgenau School of IT & Engineering is to provide our students with a high-quality education that emphasizes the importance of ethical behavior, integrity, and entrepreneurship. In addition, the School seeks to develop and disseminate leading-edge research that significantly advances the field of knowledge.

The Volgenau School of Information Technology and Engineering is concerned primarily with study areas that involve integrating the information basis for modern engineering with the more conventional physical and materials science approach. The careful integration of these areas results in a unique academic experience for highly motivated students.

The Volgenau School offers several degree programs that concentrate on important contemporary technological issues and needs. Bachelor’s degree programs are offered in the areas of applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, information technology, and systems engineering. Minors in information technology, computer science, software engineering, data analysis, and systems engineering and operations research are also available.

Master’s degree programs are available in the following areas: applied information technology, civil and infrastructure engineering, computer engineering, computer forensics, computer science, electrical engineering, information security and assurance, information systems, operations research, software engineering, statistical science, systems engineering, and telecommunications. Several doctoral programs are offered, including a cross-disciplinary program in information technology and more focused programs in civil and infrastructure engineering, computer science, electrical and computer engineering, systems engineering and operations research, and statistical science. In addition, the engineer degree in information technology provides post-master’s training in an application area.

Undergraduate certificates are offered in applied statistics, information technology, postbachelor computer science, and operations research and engineering. For graduate students, certificate programs are offered in advanced network protocols for telecommunications; architecture-based systems engineering; biometrics; e-commerce; command, control, communications, computing, and intelligence; intelligent agents; communications and networking; computational modeling; systems engineering of software intensive systems; federal statistics; biostatistics; information engineering; information security and assurance; military operations research; signal processing; software engineering; telecommunications forensics and security; networks, systems integration and testing; very-large-scale-integration (VLSI) design and manufacturing; civil infrastructure and security engineering; discovery, design, and innovation; computer networking; network technologies and applications; wireless communications; telecommunications systems modeling; data mining; database management; and web-based software engineering.

The undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor’s degrees include required and elective courses in mathematics, humanities, and general education, and specialty courses in applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, information technology, and systems engineering. Each program strongly emphasizes English composition and communication.
Students also have opportunities to develop interest areas in other fields within the Volgenau School that offer undergraduate courses but do not have undergraduate majors. The bachelor of individualized study (BIS) degree program may appeal to adult students who have completed a substantial portion of their studies at other institutions.

Bioengineering has been increasingly represented at the Volgenau School. New faculty members are working with other departments, schools, and institutes at Mason to provide a quality education to students interested in this rapidly growing field. The faculty at the Volgenau School hopes to work with numerous Washington-area organizations dedicated to health oriented research or clinical service.

**Administration**

Lloyd Griffiths, Dean  
Daniel A. Menascé, Senior Associate Dean  
E. Bernard White, Associate Dean for Undergraduate Studies  
Sharon Caraballo, Assistant Dean for Academic Affairs  
Jennifer Lamb, Assistant Dean for Development  
Melinda Barnhart, Executive Director, Finance and Administration  
Pete Farrell, Director, Business Development  
Jonathan Goldman, Director, Computing Resources  
Terri Mancini, Director, Sponsored Research Administration  
Lisa Nolder, Director, Graduate Student Services  
Nicole Sealey, Director, Graduate Admissions and Enrollment Management

**Bachelor of Science Programs**

The Volgenau School offers seven programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

**Undergraduate Mission, Goals**

The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent; prepared for ethical professional practice and a lifetime of learning; communicate effectively and work as members or leaders of technical teams; and understand the global nature and effect of information technology and engineering.

**Degree Requirements**
The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above)
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (university general education electives)
- At least 3 credits of arts, 3 credits of Western civilization, 3 credits of social and behavioral science, and 3 credits of global understanding issues (university general education electives)
- At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education courses described above
- All requirements listed in the following sections for specific Volgenau School majors, including university requirements for mathematics, natural science, information technology competency and ethics, and synthesis

Freshmen who are undecided about their specific majors may select Volgenau School undeclared as their major. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments. With approval of department advisors, some courses may be taken out of the indicated sequences, particularly English, literature and social science courses.

The requirements for the BIS degree can be found in the College of Humanities and Social Sciences chapter. Requirements for the applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, IT, and systems engineering undergraduate degree programs are provided in the academic departments’ sections of this chapter.

**Academic Policies**

Students should become familiar with the University's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog. That chapter also lists additional university requirements for minor programs and additional (double) majors.

**Academic Progression, Course Repeat**

Students majoring in the Volgenau School programs are expected to have an acceptable plan of study formulated with assistance from the department advisor on file. They are expected to make reasonable progress toward their degree during each semester they are enrolled. Undergraduate students may be required to obtain permission from the Volgenau School Student Services Office to repeat some courses required for the major in which they have previously received a grade of D or F. Individual Volgenau School programs may disallow students from retaking certain high-demand courses in which they have already earned a grade of C or better if they want to retake the course to improve their GPA.

**Restricted Courses**

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for the Volgenau School undergraduate programs may not include credits earned in activity courses in any department. Examples are many of the courses listed under the catalog designations of art, dance, music, or theater; individual sports, physical education, or team sports; and recreational activities. Exceptions in these categories are courses that meet the university general education requirements for the major, including global understanding or Arts. Whenever there is uncertainty, students must consult with an academic advisor in their departments. Generally, degree requirements for computer science and engineering majors may not be met by 100- to 400-level courses designated “IT” (and any associated cross-listed courses) in the Course Descriptions chapter of this catalog. The respective computer science or engineering student’s department might approve requests for some IT courses, such as IT 350, 362, 462, and 466, to satisfy degree requirements. For more information, contact the department or the Volgenau School Student Services Office at 703-993-1511.

**Writing-Intensive Requirement**
The university requires all undergraduate students to successfully complete a course, or combination of courses, designated “writing-intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

BS/Accelerated MS Programs

Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details may be found in the individual department sections.

Master of Science Programs

Degree Requirements

The Volgenau School offers 15 master of science programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

Doctor of Philosophy Programs

The Volgenau School offers 5 PhD programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow with the exception of the Information Technology PhD program. The PhD in information technology is a program that builds on a fundamental core and emphasizes cross-disciplinary efforts among the 15
master’s programs in the Volgenau School, as well as with related units at Mason. Specific entrance and degree requirements for this doctoral program are found in the Interdisciplinary Programs section of this chapter.

**Engineer Degree in Information Technology**

The engineer degree is a post-master’s degree, but it does not confer a doctorate. Students pursuing the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements. Students who are awarded an engineer degree will be able, at a later date, to work toward a PhD in information technology. Details about the engineer degree can be found in the Interdisciplinary Programs section of this chapter.

**Commonwealth Graduate Engineering Program**

The Commonwealth Graduate Engineering Program (CGEP) is a cooperative program of Mason, the University of Virginia (UVA), Virginia Tech, Old Dominion University (ODU), and Virginia Commonwealth University (VCU) designed to make graduate engineering education available in locations throughout Virginia through distance learning. CGEP offers graduate degree programs in engineering and information technology. Instruction takes place through a mix of videoconferencing and web-based courses available at educational and corporate receive sites around the state.

Each degree program is taught by one of the five participating universities, and prospective students should apply directly to the university offering the degree of interest. Mason’s master of science in computer science degree is available through CGEP. Courses from the other institutions may be offered at Mason’s Fairfax or Prince William campuses. For more information, go to volgenau.gmu.edu/graduates/commonwealth_graduate_engineering.php.

**Applied Information Technology**

Phone: 703-993-3565  
Web: ait.gmu.edu  

School: The Volgenau School of Information Technology and Engineering

**Faculty**

Professors: Gantz (chair), Jajodia, Marchant  
Associate professor: Snow (associate chair)  
Assistant professors: Aksoy, Boicu, Bruno, Rytikova, Wang
Applied Information Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, technical and leadership skills.

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating new IT workers in current principles and practices, and in its applications. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates fill jobs that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration, information security, information systems, telecommunications, web development, and computer graphics.

The MS in AIT emphasizes elements of productive, effective and ethical leadership of major IT projects, in both the federal and private sectors.

The department also offers a number of certificate programs for students seeking to add an AIT certification to their existing credentials. Students currently pursuing undergraduate degrees in other disciplines may choose to add a minor in AIT.

Course Work

The AIT Department offers all 100 - 400 IT courses and many 500/600 level IT courses in the Courses chapter of this catalog.

Assistant professors: Casey, Urgessa

Research professor: Hero

Adjunct professors: Adler, Ali, Bhargava, Binning, Chase, Chipley, Choudhury, Donahue, Doyle, Gagne, Goode, Hartmann, Harrop-Williams, Matusik, McDaniel, Miller, Rodriguez, Suydam, Ward, Zobel

The Civil, Environmental, and Infrastructure Engineering (CEIE) Department offers a BS and an MS in civil and infrastructure engineering. These degree programs complement the study of civil and environmental engineering with advances in information technology (IT), and they focus on the physical and organizational infrastructure essential to the functioning of an urban society. The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. Students interested in pursuing doctoral education in civil and infrastructure engineering are encouraged to read the sections on the interdisciplinary PhD in information technology and PhD study in civil and infrastructure engineering.
Civil and infrastructure engineering is the study of land, transportation, water, environmental, structural, energy, and telecommunications systems from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment such as the Washington, D.C., metropolitan area.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities, and structures; and solid waste management.

Course Work

The department offers all courses designated CEIE and some of the ENGR and IT courses in the Courses chapter of this catalog.

■ Computer Science

Phone: 703-993-1530
Web: cs.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Barbara, J. Chen, DeJong, Gomaa (chair), Kerschberg, Menascé, Motro, Offutt, Pullen, Sibley, Sood, Tecuci, Wechsler

Assistant professors: S. Chen, Li, Lien, Lin, T. Maddox, Malek, Rangwala, Shehu, Sousa, Stavrou, X. Wang, Zhong

Instructors: Fleck, Heishman, Nordstrom

Adjunct professors: Abdurazik, Ahmed, Alazzawe, Armour, Baldo, Dean, Ellis, Foxwell, Geldon, Gravatt, Howard, Hwang, Kakarlamudi, Kodali, M. Maddox, Martin, Masiyoswski, Nidiffer, Olimpiew, Pettit, Ritchey, Scoggins, Sharif, Smeltzer, Smith

Emeritus faculty: Baum, Hamburger, Rine

Introduction

Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computation is creating new scientific and engineering fields; such as robotics, computational sciences, bioinformatics, astroinformatics, and health informatics, to name a few. Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse application areas, for example, web-based applications such as e-mail, wireless networking, online group gaming, social networks, and e-
commerce. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn (1) theories of computation, analysis of algorithms, operating systems, and artificial intelligence; (2) communication and coordination via advanced computer networks; (3) storage, retrieval, and management of large databases; and (4) analysis, design, and implementation of reliable software systems.

Course Work

The Department of Computer Science (CS) offers courses designated CS, INFS, ISA, and SWE, as well as some IT courses, in the Courses chapter of this catalog. The department offers undergraduate programs in computer science and applied computer science. A double major is offered in computer science and computer engineering. Students may also elect a minor in computer science or software engineering. Several accelerated BS Computer Science/MS Programs are offered. Graduate programs offered are an MS in computer science, an MS in information security and assurance, an MS in information systems, an MS in software engineering, a PhD in computer science, and several graduate certificate programs. The department also participates in the PhD in Information Technology Program with the following concentrations: PhD study in information security and assurance, PhD study in information systems, and PhD study in software engineering.

■ Electrical and Computer Engineering

Phone: 703-993-1569  
Web: ece.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Allnutt, Cook, Ephraim, Gertler, Griffiths, Ioannou, Jabbari, Levis, Manitius (chair), Mulpuri

Associate professors: Berry, Chang, Gaj, Hintz, Mark, Pachowicz, Paris, W. Sutton, Wage

Assistant professors: Hwang, Ikonomidou, Kaps, Li, Nelson, Peixoto, Sikdar

Research professors: Katona, Wagenhals, Zaidi

Instructor: Pandula

Adjunct professors: Abgariah, Allen, Alper, Beatty, Bollino, Brooks, Follendore, Fowler, Gong, Hibey, Hockensmith, Hrnjez, Lazarevich, Leaf, Lorie, Osgood, Sabzevari, Tham, Tran, Van Meter T, West S, Williams, Wilson, Wu, Young

Emeritus faculty: Baraniecki, Beale, Black, Schaefer, Tabak, Van Trees

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

The objectives of undergraduate programs within the ECE Department relate to the abilities of our graduates three to five years after graduation. These objectives include:

- Technical knowledge: Graduates will be able to apply the fundamentals in the appropriate engineering discipline as demonstrated by success as productive engineers in industry, government, or graduate school.
- Preparation for further study: Graduates will have the knowledge and skills to engage in lifelong learning.
Professionalism: Graduates will have the skills and understanding needed to fulfill their professional responsibilities as engineers, including written and oral communication, ethics, and teamwork. Graduate programs leading to MS and PhD degrees in engineering prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. ECE offers the PhD in electrical and computer engineering, MS degrees in computer engineering and electrical engineering, and certificates in communications and networking, signal processing, and very large-scale integration design and manufacturing. The PhD in information technology is offered by The Volgenau School and includes a number of courses with an electrical engineering or computer engineering emphasis. Details about these programs are available at ite.gmu.edu.

ECE is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, intelligent systems and microelectronics. The department recognizes the need to augment and enhance these areas through the use of modern IT. Graduate students are offered a progressive environment with ample opportunities for the type of advanced engineering research needed to confront the complex realities of the 21st century.

The courses in these programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

Course Work

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE, BENG and CRFS in the Courses chapter of this catalog. The department also offers most of the courses designated TCOM and some ENGR and IT courses.

■ Interdisciplinary Programs (VSITE)

School: The Volgenau School of Information Technology and Engineering

The Volgenau School offers two interdisciplinary post-master programs: the PhD in Information Technology and the Engineer in IT degree. The first is designed for students who seek a doctoral program in Information Technology and want to be able to customize it to their needs. The second is a professional degree with the flexibility to integrate knowledge from all of the disciplines offered in our School. The programs are managed by the Graduate Student Services Office under the purview of the Senior Associate Dean.

Doctoral students may conduct their doctoral research under the supervision of any eligible faculty member of any of the school's departments. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas, including information systems, software engineering, and information security.

The Engineer in IT degree program allows a student to combine the advanced course work of the PhD degree in IT with an applied project. It is designed to meet the needs of working professionals seeking advanced and up-to-date training in IT areas, but who are not planning a research career.

■ Statistics

Phone: 703-993-3645
Web: statistics.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty
Professors: Carr, Gentle, Rosenberger (chair), Wegman

Associate professors: Bell, Davis (associate chair), Miller, C. Sutton

Assistant professors: Diao, Tang

Instructors: Sims (visiting), Surina

Emeritus faculty: Bolstein

Course Work

The Statistics Department offers all courses designated STAT in the Courses chapter of this catalog. Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and engineering applications of statistics and data analysis.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer an undergraduate certificate program in applied statistics and a minor in data analysis. Also, a variety of advanced undergraduate courses is available for inclusion in other degree programs.

Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Adelman, Chang, Chen, Donohue, Hoffman, Nash, Polyak, Schum, Sage, Sofer (chair)

Associate professors: Brouse, Laskey, Loerch, Shortle, Speller, White

Assistant professors: Ganesan, Liu

Affiliated faculty members: Houck, VanTrees

Research and term professors: Costa, Gross, Sherry, Wagenhals, Wagner, Wolman

Adjunct professors: Alexander, Barry, Camp, Carley, Durbin, Fischer, Humphrey, Killam, Laveson, McDevitt, Rothwell, Soller, Stephenson, Wieland, Yost
Emeritus faculty: Palmer

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a minor in systems engineering and operations research, master’s degrees in systems engineering and in operations research, and a PhD degree in systems engineering and operations research. In addition, the department offers five certificate programs at the master’s level: architecture-based systems engineering; command, control, communications, computing, and intelligence (C4I); military operations research; computational modeling; and systems engineering of software intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

Systems engineers determine the most effective ways for an organization to use all of a given system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, automobiles, intelligent robots, stereos, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations research is the professional field that deals with using scientific methods in engineering and management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, and procedures. The overall purpose is to provide a rational basis for decision making.

Mason’s operations research faculty members are principally involved in the theoretical and empirical study of managerial and operational processes, and the use of mathematical and computer models to optimize these systems. Models are needed for a variety of decision-making purposes in business, industry, scientific research, and government to describe different environments and relate alternative plans of action. Thus, the courses in operations research focus on quantitative modeling and the analysis of complex systems. Courses stress the use of contemporary computer hardware and software in modeling and analysis. The Bureau of Labor Statistics predicts that the field of operations research will be one of the fastest-growing professions of the next decade.

Obviously, there is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Course Work

The department offers all courses designated SEOR, SYST, and OR in the Courses chapter of this catalog.

Emeritus faculty: Mitchell

Course Work

The Institute for Conflict Analysis and Resolution (ICAR) offers all course work designated CONF in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

Phone: 703-993-4165
E-mail: ugradcar@gmu.edu
Location: Fairfax Campus

Agnieszka Paczynska, Undergraduate Program Director.

Conflict Analysis and Resolution (CAR) offers students a BA, a BS, or a minor in a growing interdisciplinary social science field with practical applications. Conflict analysis and resolution is committed to analyzing the sources and dynamics of conflict and
the means for resolution toward lasting peace. All CAR students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. Required bridge courses cover conflict analysis and resolution at three levels: interpersonal conflict, community and organizational conflict, and international conflict. After selecting a level of conflict as a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest, such as anthropology, communication, government, philosophy, psychology, management, sociology, and New Century College. The major also requires 3 credits of field experience in the form of an internship, a service-learning opportunity, or study abroad.

**GRADUATE PROGRAMS**

Phone: 703-993-1300  
E-mail: icarinfo@gmu.edu  
Location: Arlington Campus

Sandra Cheldelin, PHD Program Coordinator

Mark Goodale, MS Program Coordinator

The Ph.D. program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

The M.S. in Conflict Analysis and Resolution is a two-year professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

**GRADUATE CERTIFICATES**

Phone: 703-993-1300  
E-mail: icarcert@gmu.edu  
Location: Arlington Campus

Mara Schoeny, Certificate Program Director

Five graduate certificate programs are administered by ICAR. Each of these one-year, 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

**Academic Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.
Undergraduate Degree

Conflict Analysis and Resolution, BA

Banner Code: CA-BA-CONF

Students must fulfill all requirements for bachelor's degrees including university general education requirements. Students majoring in CAR must also complete the College of Humanities and Social Sciences (CHSS) college-level requirements for philosophy or religious studies, foreign language proficiency, social sciences, and non-Western culture as well as 39 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the ICAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as “writing intensive” in their major at the 300-level or above. CONF 302 has been designated “writing intensive.”

Advising

CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with a CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Physical Education Courses

PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in CAR. Students may use nonactivity PHED courses for elective credit for CAR degrees.

Degree Requirements

Required core courses (15 credits):

- CONF 101 - Conflict and Our World Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3
- CONF 302 - Identity Conflicts and their Resolution Credits: 3
- CONF 490 - Integration Credits: 3

Required bridge courses (9 credits):

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
• CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
• CONF 340 - Global Conflict Analysis and Resolution Credits: 3

Field experience (3 credits):

Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Students register for internship credits through New Century College. More information is available at http://ncc.gmu.edu. Students interested in study abroad should register through the Center for Global Education. More information can be found at http://www.gmu.edu/departments/cge. Prior approval by the major advisor is required for all field experience options.

Internship/Service Learning:

• NCLC 390 - Internship Credits: 1-6
• NCLC 490 - Internship Credits: 1-6
• CONF 375 - Special Programs Field Experience Credits: 1-6
• NCLC 395 - Field-Based Work Credits: 1-15
• NCLC 495 - Field-Based Work Credits: 1-15

Study Abroad:

• CONF 385 - International Field Experience Credits: 3

Concentration courses (12 credits):

Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The CAR director will consider student requests for approval of courses not listed below.

▲ Concentration in Interpersonal Conflict (MICR)

Students choose four courses from the following areas:

• ADJ 302 - Delinquency Credits: 3
• ADJ 404 - Crime Victims and Victimization Credits: 3
• ADJ 406 - Family Law and the Justice System Credits: 3
• ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
• ANTH 365 - Race and Racism Credits: 3
• ANTH 371 - Psychological Anthropology Credits: 3
• COMM 305 - Foundations of Intercultural Communication Credits: 3
• CONF 202 - Dialogue and Difference Credits: 3
• CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
• CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
• CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
NCLC 305 - Conflict Resolution and Transformation Credits: 6
NCLC 310 - Violence and Gender Credits: 3-15
NCLC 315 - Spirituality and Conflict Transformation Credits: 6
NCLC 317 - Issues in Family Relationships Credits: 4
NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 3-15
PHIL 309 - Bioethics Credits: 3
PHIL 355 - Theories of Ethics Credits: 3
PSYC 231 - Social Psychology Credits: 3
PSYC 321 - Counseling Psychology Credits: 3
PSYC 324 - Personality Theory Credits: 3
PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
SOCI 300 - Social Control and Human Freedom Credits: 3
SOCI 302 - Sociology of Delinquency Credits: 3
SOCI 305 - Sociology of Small Groups Credits: 3
SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
SOCI 350 - Community, Diversity, and Democracy: A Practicum Credits: 3
SOCW 323 - Human Behavior in the Social Environment I Credits: 3

▲ Concentration in Community and Organizational Conflict (MEZZ)

Students choose four courses from the following areas:

- ADJ 302 - Delinquency Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ADJ 407 - Law and Society Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- CONF 202 - Dialogue and Difference Credits: 3
- CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 320 - Labor Problems Credits: 3
- GEOG 306 - Urban Geography Credits: 3
- GEOG 406 - Suburban Geography Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
- GOVT 365 - State and Regional Public Policy Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- HIST 340 - History of American Racial Thought Credits: 3
• HIST 350 - U.S. Women's History Credits: 3
• HIST 418 - Ethnic Groups in America Credits: 3

• MGMT 301 - Managing People and Organizations Credits: 3
or
• MSOM 301 - Managing People and Organizations Credits: 3

• MGMT 412 - Diversity in Organizations Credits: 3
• MGMT 463 - Negotiations in Organizations Credits: 3
• NCLC 301 - Science in the News Credits: 3
• NCLC 304 - Social Movements and Community Activism Credits: 4
• NCLC 310 - Violence and Gender Credits: 3-15
• NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 3-15
• NCLC 361 - Neighborhood, Community, and Identity Credits: 3-15
• NCLC 381 - When Cultural Worlds Collide Credits: 3-15
• PHIL 254 - Contemporary Ethical Problems Credits: 3
• PHIL 309 - Bioethics Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• PSYC 333 - Industrial and Organizational Psychology Credits: 3
• SOCI 300 - Social Control and Human Freedom Credits: 3
• SOCI 301 - Criminology Credits: 3
• SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 308 - Racial and Ethnic Relations Credits: 3
• SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 332 - Sociology of Urban Communities Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 352 - Social Problems Credits: 3
• SOCI 373 - The Community Credits: 3
• SOCI 492 - Sociology of Organizations Credits: 3
• SOCW 351 - Social Policy and Social Justice I Credits: 3
• SOCW 425 - Planning and Organizing for Community Change Credits: 3
• UNIV 342 - The George Mason Debates in Current Affairs Credits: 3

▲ Concentration in International Conflict (MACR)

Students choose four courses from:

• ADJ 405 - Law and Justice around the World Credits: 3
• ADJ 475 - Theory and Politics of Terrorism Credits: 3
• ANTH 312 - Political Anthropology Credits: 3
• ANTH 331 - Refugees Credits: 3
• ANTH 332 - Cultures in Comparative Perspective Credits: 3
• ANTH 333 - Humanitarian Action Credits: 3
• ANTH 365 - Race and Racism Credits: 3
• ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
• ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3

• COMM 412 - Politics and the Mass Media Credits: 3
or
• GOVT 412 - Politics and the Mass Media Credits: 3

• CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
• CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
• CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
• CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
• ECON 360 - Economics of Developing Areas Credits: 3
• ECON 361 - Economic Development of Latin America Credits: 3
• GEOG 301 - Political Geography Credits: 3
• GOVT 331 - Government and Politics of Latin America Credits: 3
• GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 345 - Political Islam Credits: 3
• GOVT 349 - Issues in the Analysis of Global Systems Credits: 1-3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3
• HIST 364 - Revolution and Radical Politics in Latin America Credits: 3
• HIST 461 - Arab-Israeli Conflict Credits: 3
• HIST 466 - Origins of Conflict in Southern Africa Credits: 3
• MGMT 461 - Cross Cultural and Global Management Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• NCLC 381 - When Cultural Worlds Collide Credits: 3-15
• PHIL 327 - Contemporary Western Political Theory Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 350 - Community, Diversity, and Democracy: A Practicum Credits: 3
• SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies Credits: 3

Additional Courses:

Students may choose to take additional courses from any of the concentration lists. Students should also consider CONF 341 Simulation in Global Conflict Resolution (1 credit).
Conflict Analysis and Resolution, BS

Banner Code: CA-BS-CONF

Students must fulfill all requirements for bachelor's degrees including university general education requirements. CAR majors must also complete 54 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the ICAR undergraduate program will be expected to fulfill all of the university general education and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as “writing intensive” in their major at the 300-level or above. CONF 302 has been designated “writing intensive.”

Advising

CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with a CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Physical Education Courses

PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in CAR. Students may use nonactivity PHED courses for elective credit for CAR degrees.

Degree Requirements

- Non-Western culture (3 credits): from College of Humanities and Social Sciences BA requirement list. Cannot be double counted for global understanding requirement.

Required core courses (15 credits):

- CONF 101 - Conflict and Our World Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CONF 301 - Research and Inquiry in Conflict Resolution Credits: 3
- CONF 302 - Identity Conflicts and their Resolution Credits: 3
- CONF 490 - Integration Credits: 3

Required bridge courses (9 credits):

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3
Research methods (6 credits):

- STAT 250 - Introductory Statistics I Credits: 3

3 credits chosen from:

- ADJ 300 - Research Methods and Analysis Credits: 4
- ANTH 380 - Language and Culture Credits: 3
- ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3
- ENGL 327 - Introduction to Cultural Studies Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GOVT 366 - Public Policy Analysis Credits: 3
- GOVT 400 - Political Research and Data Analysis Credits: 3
- PHIL 357 - Philosophy of the Social Sciences Credits: 3
  or
- SOCI 599 - Issues in Sociology Credits: 3
- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3
- SOCI 303 - Sociological Research Methodology Credits: 4
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- SOCI 410 - Social Surveys and Attitude and Opinion Measurements Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
  or
- IT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3

Field experience (3 credits):

Students can choose to fulfill this requirement through an internship, service learning, or study abroad. Students register for internship credits through New Century College. More information is available at http://ncc.gmu.edu. Students interested in study abroad should register through the Center for Global Education. More information can be found at http://www.gmu.edu/departments/cge. Prior approval by the major advisor is required for all field experience options.

Internship/Service Learning:

- NCLC 390 - Internship Credits: 1-6
- NCLC 490 - Internship Credits: 1-6
- CONF 375 - Special Programs Field Experience Credits: 1-6
- NCLC 395 - Field-Based Work Credits: 1-15
- NCLC 495 - Field-Based Work Credits: 1-15
Study Abroad:

- CONF 385 - International Field Experience Credits: 3

Concentration courses (12 credits):

Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). Students should choose classes that pertain to their concentration and are listed as approved. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. Independent study approved by the advisor is also an option. The CAR director will consider student requests for approval of courses not listed below.

▲ Concentration in Interpersonal Conflict (MICR)

Students choose four courses from:

- ADJ 302 - Delinquency Credits: 3
- ADJ 404 - Crime Victims and Victimization Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 371 - Psychological Anthropology Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- CONF 202 - Dialogue and Difference Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
- NCLC 305 - Conflict Resolution and Transformation Credits: 6
- NCLC 310 - Violence and Gender Credits: 3-15
- NCLC 315 - Spirituality and Conflict Transformation Credits: 6
- NCLC 317 - Issues in Family Relationships Credits: 4
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 3-15
- PHIL 309 - Bioethics Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 321 - Counseling Psychology Credits: 3
- PSYC 324 - Personality Theory Credits: 3
- PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
- SOCI 300 - Social Control and Human Freedom Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 305 - Sociology of Small Groups Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 350 - Community, Diversity, and Democracy: A Practicum Credits: 3
- SOCW 323 - Human Behavior in the Social Environment I Credits: 3
Concentration in Community and Organizational Conflict (MEZZ)

Students choose four courses from:

- ADJ 302 - Delinquency Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ADJ 407 - Law and Society Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- CONF 202 - Dialogue and Difference Credits: 3
- CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 320 - Labor Problems Credits: 3
- GEOG 306 - Urban Geography Credits: 3
- GEOG 406 - Suburban Geography Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
- GOVT 365 - State and Regional Public Policy Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- HIST 340 - History of American Racial Thought Credits: 3
- HIST 350 - U.S. Women's History Credits: 3
- HIST 418 - Ethnic Groups in America Credits: 3
- MGMT 301 - Managing People and Organizations Credits: 3
- or
- MSOM 301 - Managing People and Organizations Credits: 3
- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- NCLC 301 - Science in the News Credits: 3
- NCLC 304 - Social Movements and Community Activism Credits: 4
- NCLC 310 - Violence and Gender Credits: 3-15
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 3-15
- NCLC 361 - Neighborhood, Community, and Identity Credits: 3-15
- NCLC 381 - When Cultural Worlds Collide Credits: 3-15
- PHIL 254 - Contemporary Ethical Problems Credits: 3
- PHIL 309 - Bioethics Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
PSYC 231 - Social Psychology Credits: 3
PSYC 333 - Industrial and Organizational Psychology Credits: 3
SOCI 300 - Social Control and Human Freedom Credits: 3
SOCI 301 - Criminology Credits: 3
SOCI 302 - Sociology of Delinquency Credits: 3
SOCI 307 - Social Movements and Political Protest Credits: 3
SOCI 308 - Racial and Ethnic Relations Credits: 3
SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
SOCI 332 - Sociology of Urban Communities Credits: 3
SOCI 340 - Power, Politics, and Society Credits: 3
SOCI 352 - Social Problems Credits: 3
SOCI 373 - The Community Credits: 3
SOCI 492 - Sociology of Organizations Credits: 3
SOCW 351 - Social Policy and Social Justice I Credits: 3
SOCW 425 - Planning and Organizing for Community Change Credits: 3
UNIV 342 - The George Mason Debates in Current Affairs Credits: 3

▲ Concentration in International Conflict (MACR)

Students choose four courses from:

- ADJ 405 - Law and Justice around the World Credits: 3
- ADJ 475 - Theory and Politics of Terrorism Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 331 - Refugees Credits: 3
- ANTH 332 - Cultures in Comparative Perspective Credits: 3
- ANTH 333 - Humanitarian Action Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
- ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3
- COMM 412 - Politics and the Mass Media Credits: 3
  or
- GOVT 412 - Politics and the Mass Media Credits: 3

- CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- GEOG 301 - Political Geography Credits: 3
- GOVT 331 - Government and Politics of Latin America Credits: 3
- GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
- GOVT 333 - Government and Politics of Asia Credits: 3
- GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 345 - Political Islam Credits: 3
• GOVT 349 - Issues in the Analysis of Global Systems Credits: 1-3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3
• HIST 364 - Revolution and Radical Politics in Latin America Credits: 3
• HIST 461 - Arab-Israeli Conflict Credits: 3
• HIST 466 - Origins of Conflict in Southern Africa Credits: 3
• MGMT 461 - Cross Cultural and Global Management Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• NCLC 381 - When Cultural Worlds Collide Credits: 3-15
• PHIL 327 - Contemporary Western Political Theory Credits: 3
• PHIL 355 - Theories of Ethics Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 320 - Social Structure and Globalization Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies Credits: 3

Major electives (6 credits):

Elective courses can be chosen from the approved concentration course list at any level but may not count for both concentration and elective credit. Independent study approved by the advisor is also an option.

Additional Courses:

Students may choose to take additional courses from any of the concentration lists. Students should also consider CONF 341 Simulation in Global Conflict Resolution (1 credit).

Undergraduate Minor

Conflict Analysis and Resolution Minor

Banner Code: CONF

Students are required to achieve a minimum of 2.00 GPA in courses applied to a minor. At least 8 credits of the minor must be applied only to the CAR minor and may not be used to fulfill requirements of the student’s major, major concentration, or another minor.

Advising
CAR advisors help students create interdisciplinary programs that meet their interests and career goals. All majors and minors are strongly encouraged to meet regularly with a CAR academic advisor who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

**Physical Education Courses**

PHED courses offered by the School of Recreation, Health, and Tourism that are activity courses cannot be counted toward credits required for a degree in CAR. Students may use nonactivity PHED courses for elective credit for CAR degrees.

**Course Work**

Students pursuing a minor complete 18 credits distributed as follows:

**Required core courses (6 credits):**

- CONF 101 - Conflict and Our World Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3

**One of three bridge courses (3 credits):**

- CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
- CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3

**Emphasis courses (9 credits):**

Students choose courses from one of three levels of conflict: interpersonal (micro level), community and organizational (mezzo level), and international (macro level). With permission of the advisor, students may use other CONF designated courses to fulfill emphasis requirements. The CAR director will consider student requests for approval of courses not listed below.

**Emphasis in Interpersonal Conflict**

Students choose three courses from:

- ADJ 302 - Delinquency Credits: 3
- ADJ 404 - Crime Victims and Victimization Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 371 - Psychological Anthropology Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- CONF 202 - Dialogue and Difference Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
Emphasis in Community and Organizational Conflict

Students choose three courses from:

- ADJ 302 - Delinquency Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ADJ 407 - Law and Society Credits: 3
- ANTH 310 - Social Organization and Kinship Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 432 - Political Communication Credits: 3
- CONF 202 - Dialogue and Difference Credits: 3
- CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
- CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ECON 320 - Labor Problems Credits: 3
- GEOG 306 - Urban Geography Credits: 3
- GEOG 406 - Suburban Geography Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
- GOVT 365 - State and Regional Public Policy Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- HIST 340 - History of American Racial Thought Credits: 3
- HIST 350 - U.S. Women's History Credits: 3
- HIST 418 - Ethnic Groups in America Credits: 3

- MGMT 301 - Managing People and Organizations Credits: 3
or
- MSOM 301 - Managing People and Organizations Credits: 3

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- NCLC 301 - Science in the News Credits: 3
- NCLC 304 - Social Movements and Community Activism Credits: 4
- NCLC 310 - Violence and Gender Credits: 3-15
- NCLC 320 - Construction of Differences: Race, Class, and Gender Credits: 3-15
- NCLC 361 - Neighborhood, Community, and Identity Credits: 3-15
- NCLC 381 - When Cultural Worlds Collide Credits: 3-15
- PHIL 254 - Contemporary Ethical Problems Credits: 3
- PHIL 309 - Bioethics Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- SOCI 300 - Social Control and Human Freedom Credits: 3
- SOCI 301 - Criminology Credits: 3
- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Racial and Ethnic Relations Credits: 3
- SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
- SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 352 - Social Problems Credits: 3
- SOCI 373 - The Community Credits: 3
- SOCI 492 - Sociology of Organizations Credits: 3
- SOCW 351 - Social Policy and Social Justice I Credits: 3
- SOCW 425 - Planning and Organizing for Community Change Credits: 3
- UNIV 342 - The George Mason Debates in Current Affairs Credits: 3

**Emphasis in International Conflict**

Students choose three courses from:

- ADJ 405 - Law and Justice around the World Credits: 3
- ADJ 475 - Theory and Politics of Terrorism Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 331 - Refugees Credits: 3
- ANTH 332 - Cultures in Comparative Perspective Credits: 3
- ANTH 333 - Humanitarian Action Credits: 3
- ANTH 365 - Race and Racism Credits: 3
• ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
• ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3

• COMM 412 - Politics and the Mass Media Credits: 3
  or
• GOVT 412 - Politics and the Mass Media Credits: 3

• CONF 240 - Social Dynamics of Terrorism, Security, and Justice Credits: 3
• CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3
• CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
• CONF 495 - Organizations and Actors in the Conflict Field Credits: 3
• ECON 360 - Economics of Developing Areas Credits: 3
• ECON 361 - Economic Development of Latin America Credits: 3
• GEOG 301 - Political Geography Credits: 3
• GOVT 331 - Government and Politics of Latin America Credits: 3
• GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 345 - Political Islam Credits: 3
• GOVT 349 - Issues in the Analysis of Global Systems Credits: 1-3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3
• HIST 364 - Revolution and Radical Politics in Latin America Credits: 3
• HIST 461 - Arab-Israeli Conflict Credits: 3
• HIST 466 - Origins of Conflict in Southern Africa Credits: 3
• MGMT 461 - Cross Cultural and Global Management Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• NCLC 381 - When Cultural Worlds Collide Credits: 3-15
• PHIL 327 - Contemporary Western Political Theory Credits: 3

• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies Credits: 3

Additional Courses:

Students may choose to take additional courses from any of the concentration lists. Students should also consider CONF 341 - Simulation in Global Conflict Resolution (1 credit).
Dual Degree

Social Work and Conflict Analysis and Resolution Dual Degree, MS (ICAR)

Banner Codes: HH-MSW-SOCW and CA-MS-CONF

The Department of Social Work and the Institute for Conflict Analysis and Resolution have joined forces to offer a three year dual-degree program. Students can earn both an MSW and an MS in conflict analysis and resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university’s proximity to the nation’s capital. This is the only dual-degree program of its kind.

Admissions Requirements

Students interested in the 3-year Dual Degree program on MSW and Master’s in Conflict Analysis & Resolution must complete a University Graduate Application (one application; designate Social Work as the primary program). One Goal Statement, Three Letters of Recommendation, and Transcripts are required. In answering the Goal Statement and on Letters of Recommendation, please address your interest in both programs.

In addition, for the MSW, submit a Resume, Critical Thinking Essay, and Application Data Form. On the MSW checklist and applicant data form, check Dual Degree.

Application materials are to be submitted to the College of Health and Human Services.

If accepted to the Dual Degree program, one letter will be sent from the Social Work Department Chair and Director of the Institute on Conflict Analysis and Resolution. An orientation on the Dual Degree will be held during the summer prior to the beginning of the program. Advising will be done collaboratively between the two programs.

Please note that in order to complete the Dual Degree, students must be accepted to both programs at the same time (fall semester admission), complete the courses as outlined in the curriculum beginning in the fall, and graduate with both degrees at the same time. Students who are already enrolled in either program are not eligible to complete the Dual Degree.

Degree Requirements

Students must successfully complete the following:

Social Work Courses (50 credits)

- SOCW 623 - Human Behavior and Social Systems I Credits: 3
- SOCW 624 - Human Behavior and Social Systems II Credits: 3
- SOCW 651 - Social Policies, Programs, and Services Credits: 3
- SOCW 652 - Influencing Social Policy Credits: 3
- SOCW 657 - Direct Social Work Practice I Credits: 3
- SOCW 658 - Direct Social Work Practice II Credits: 3
- SOCW 670 - Communication and Technology for Social Work Practice Credits: 3
- SOCW 672 - Foundation Field Practicum and Seminar I Credits: 3
- SOCW 673 - Foundation Field Practicum and Seminar II Credits: 3
- SOCW 684 - Social Work and the Law Credits: 4
- SOCW 685 - Organizational Leadership for Social Workers Credits: 4
- SOCW 687 - Empowering Communities for Change Credits: 4
- SOCW 688 - Advanced Research in Social Work Credits: 3
- SOCW 694 - Social Change Practicum I Credits: 4
- SOCW 695 - Social Change Practicum II Credits: 4

Conflict Analysis and Resolution Courses (35 credits)

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- CONF 601 - Theories of Conflict and Conflict Resolution Credits: 3
- CONF 610 - Philosophy and Methods of Conflict Research Credits: 3
- CONF 642 - Integration of Theory and Practice Credits: 3
- CONF 694 - Internship Credits: 1-6
  3 credits of CONF 694 are required
- CONF 713 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- CONF 795 - Professional Development Seminars Credits: 1-3
  5 credits of CONF 795 are required

Electives

- 12 credits of CONF electives, selected with approval from ICAR

Total: 85 credits

Master’s Degree

Conflict Analysis and Resolution, MS

Banner Code: CA-MS-CONF

This two-year professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit all undergraduate and graduate transcripts; three letters of recommendation, one of which should be from a faculty member in the applicant’s undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to
the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis.

Transfer of Non-Degree Credit

A maximum of 12 credits of ICAR graduate courses taken at George Mason as a non-degree graduate student, or as part of ICAR's graduate certificate program may be transferred into the M.S. program. How credit will be counted will be determined in consultation with the accepted student's advisor. A maximum of 6 credits of non-ICAR courses taken as non-degree credit can be counted toward the M.S. program. Courses counted toward another degree cannot be transferred.

Degree Requirements

Forty-one credits are required: 15 in required core courses, 20 in elective courses, and 6 in integrative courses (students can choose from a defined list). Mason requires all students to complete the master's degree within six years of their official admission date.

Because the choice of electives can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

Please check the ICAR student handbook for information on registration procedures.

Required Courses

Students take the following 15 credits of required course work.

- **CONF 501** - Introduction to Conflict Analysis and Resolution Credits: 3
- **CONF 601** - Theories of Conflict and Conflict Resolution Credits: 3
- **CONF 610** - Philosophy and Methods of Conflict Research Credits: 3
- **CONF 713** - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- **CONF 642** - Integration of Theory and Practice Credits: 3
  
  CONF 642 should be taken in the last semester of a students M.S. coursework.

Elective Courses

Students take 20 credits of elective coursework. Electives are any 500, 600, or 700 level CONF courses, except required courses and courses from the Graduate Certificate Program. With the advisor's approval, each student is eligible to include a maximum of 6 credits of electives from outside the ICAR program, including courses in other Mason departments, consortium courses, ICAR graduate certificate courses, and transfer courses from other universities.

Integrative Courses

Students must complete 6 credits of integrative work, choosing one of the following options:

Applied Practice and Theory
The Applied Practice and Theory (APT) Program is a 6-credit course that runs yearlong. It is designed to take the concepts presented in class and practiced in labs into real situations with conflict and consequences. Students work in teams integrating research and practice with theory development and applied ethics.

- CONF 690 - Practicum in Conflict Analysis and Resolution Credits: 6

Internship

The internship program provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. Experience does not necessarily have to be explicitly hands on. CONF 694 requires at least 160 hours of supervised work on a project toward the analysis or resolution of conflict. Such work must be spelled out in a memorandum of agreement to be signed by the student, the site supervisor, and the internship coordinator before the internship begins. Students may either take 6 credits of CONF 694 or 3 credits of CONF 694 & 3 of CONF 795.

- CONF 694 - Internship Credits: 1-6
- CONF 795 - Professional Development Seminars Credits: 1-3

Thesis

Students wishing to complete a Master's Thesis are strongly encouraged to take CONF 798 (Thesis Proposal) the semester before beginning the thesis project. Before registering, students must have identified a Master's thesis committee chair to supervise the project.

- CONF 798 - Thesis Proposal Credits: 1
- CONF 799 - Master's Thesis Credits: 1-6

Directed Readings

Only two directed readings (CONF 697) may be applied toward requirements for the master's degree.

- CONF 697 - Directed Reading Credits: 1-3

Master's Level Certificate

Conflict Analysis and Resolution Advanced Skills Graduate Certificate

Banner Code: CA-CERG-CARA

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict...
analysis and resolution approaches in their work in a variety of fields. The Conflict Analysis and Resolution Advanced Skills Certificate covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices.

**Admission Requirements**

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note Graduate Certificate courses are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

**Certificate Requirements**

Fifteen credits are required for each graduate certificate degree.

**Required Courses**

Students take 12 credits of required course work.

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 650 - Conflict Analysis and Resolution Advanced Skills Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

**Elective Courses**

Students take 3 credits of elective course work. They may choose from the following:

- CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

**Note:**

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.
Conflict Analysis and Resolution for Collaborative Leadership in Community Planning Graduate Certificate

Banner Code: CA-CERG-CARC

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Conflict Analysis and Resolution for Collaborative Leadership in Community Planning Certificate covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements in land use, development or other community planning contexts.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Certificate Requirements

Fifteen credits are required for each graduate certificate degree.

Required Courses

Students take 12 credits of required coursework.

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 651 - Conflict Analysis and Resolution for Collaborative Leadership in Community Planning Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Courses

Students take 3 credits of elective course work. They may choose from the following:

- CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution Credits: 3 (spring)
CONF 657 - Facilitation Skills Credits: 3 (spring)
CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:
Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate

Banner Code: CA-CERG-CARP

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts Graduate Certificate augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note Graduate Certificate courses are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Certificate Requirements

Fifteen credits are required for each graduate certificate degree.

Required Courses
Students take 12 credits of required course work.

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)

Elective Courses

Students take 3 credits of elective course work. They may choose from the following:

- CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution Credits: 3
- CONF 657 - Facilitation Skills Credits: 3
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Environmental Conflict Resolution and Collaboration Graduate Certificate

Banner Code: CA-CERG-ECR

The Institute for Conflict Analysis and Resolution (ICAR) and the Department of Environmental Science and Policy (ESP) jointly offer a 15-credit Graduate Certificate in Environmental Conflict Resolution and Collaboration. This certificate is intended for mid-career professionals working in federal, state and local government as well as others whose positions involve negotiating environmental conflicts.

The Graduate Certificate in Conflict Resolution and Collaboration focuses on a systems approach to environmental conflict to understand how it is embedded within formal legal, regulatory, and ecological systems as well as informal networks of governance. Coursework focuses on the strategic thinking that is required for assessing and designing appropriate ECR processes; as well as understanding the public interest and questions of social justice and sustainability that make environmental conflict particularly important and challenging.

Admissions Procedures and Requirements For admission, students must show graduation from a Bachelor’s program (or equivalent) and related work experience. Applicants to this graduate certificate program should hold a B.A. or B.S. degree in a discipline related to the certificate’s theme from an accredited university, with a minimum GPA of 3.00. Applicants must submit a completed Mason graduate application, along with official transcripts, resume, VA domicile classification form, and TOEFL scores if they are foreign nationals. GRE scores and letters of recommendation are not required, but will considerably strengthen an application, if available. Questions and application materials should be directed to the ICAR Graduate Admissions office. Depending on the background of the individual student, the certificate director may recommend remedial or preparatory courses tailored to student’s needs. Students may transfer no more than 3 credit hours into the certificate program with the approval of the academic director.
Certificate Requirements

Fifteen credits are required for the graduate certificate.

Core Courses

Students take 9 credits of core courses. The core courses listed below are crosslisted with EVPP 682, EVPP 683, EVPP 684, and students may register for either using the CONF course number or equivalent EVPP course number.

- CONF 682 - Principles of Environmental Conflict Resolution Credits: 3 (fall)
- CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices Credits: 3 (spring)
- CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone Credits: 3 (spring)

Skills and Competencies Courses

3 credits required in environmental conflict resolution skills and competencies. This requirement is fulfilled through the following courses, depending upon the student’s academic background. Students without prior background in either conflict resolution or environmental science should take both EVPP 607 and CONF 501 or 502, and none of the elective courses listed below. Students without an environmental background should take EVPP 607. Students without a conflict resolution background should take either CONF 501 or CONF 502. Students with both prior environmental and conflict background may choose among a set of for-credit “short courses” with approval of the Certificate Director to satisfy this requirement.

- EVPP 607 - Fundamentals of Ecology Credits: 3 for students without a prior environmental background
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3 for students without a prior conflict resolution background
  OR
- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 for students without a prior conflict resolution background

Elective Courses

Students take 3 credits of elective course work, they may choose from the following courses. Application of any other course toward fulfillment of the elective requirement must be approved by the Director of the Certificate Program.

- CONF 695 - Selected Topics Credits: 3 topic must be approved by Certificate Program Director
- EVPP 623 - Translating Environmental Policy into Action Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 1-4
- EVPP 521 - Marine Conservation Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 626 - Environment and Development in Asia Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3
World Religions, Diplomacy, and Conflict Resolution Graduate Certificate

Banner Code: CA-CERG-CARW

This 15-credit program is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for midcareer professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. The World Religions, Diplomacy, and Conflict Resolution Certificate considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enter the program in either the fall or spring semester, they are strongly encouraged to participate fully in the cohort learning experience by enrolling for the fall semester, taking two courses in the fall and two in the spring, and completing their certificate with the final course in the summer. The capstone course is only offered in the summer, students admitted for the spring term should expect their certificate program to take at least 18 months.

Please note Graduate Certificate courses are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Certificate Requirements

Fifteen credits are required for each graduate certificate.

Required Courses

Students take 12 credits of required course work.

- CONF 502 - Intensive Introduction to Conflict Analysis and Resolution Credits: 3 (fall and spring)
- CONF 653 - World Religions, Diplomacy, and Conflict Resolution Credits: 3 (fall)
- CONF 660 - Conflict Assessment and Program Evaluation Credits: 3 (spring)
- CONF 668 - Applied Integration for Graduate Certificates Credits: 3 (summer)
Elective Courses

Students take 3 credits of elective course work. They may choose from the following:

- CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 657 - Facilitation Skills Credits: 3 (spring)
- CONF 658 - Diversity and Difference in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 659 - Leadership in Conflict Analysis and Resolution Credits: 3 (spring)
- CONF 665 - Special Topics in Conflict Analysis and Resolution Credits: 3

Note:

Application of any other course toward fulfillment of the elective requirement must be approved by the Certificate Program Director.

Doctoral Degree

Conflict Analysis and Resolution, PhD

Banner Code: CA-PHD-CONF

The doctoral program, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

Admission Requirements

A master’s degree or equivalent degree is required for admission to the PhD program. In addition to meeting all admission requirements for graduate study, applicants must submit all undergraduate and graduate transcripts; three letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field; a 750 to 1,000 word essay on goals and reasons for seeking admission to the program; a written sample of work that shows the applicant’s potential for completing dissertation research in a doctoral program, and a resume or curriculum vitae. GRE or other standardized test scores are not required but may be submitted. THE TOEFL is required of international students. For more information, see the Admission of International Students section in the Admissions chapter of this catalog. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

Credit for Prior Study

Students who have earned an MS in conflict analysis and resolution from Mason may have the course total required for a doctoral degree reduced by 15 credits. The actual number of credits reduced is determined in consultation with the student’s advisor and the program coordinator after a review of courses taken.
Students entering with other relevant degrees (MA, MS, or JD) may have the required course load reduced by up to 15 credits. The actual number of applied credits is determined in consultation with the student’s advisor and the program coordinator after a review of courses taken, subsequent to a student's admission to the program.

**Transfer of Non-Degree Credit**

A maximum of 12 credits of ICAR graduate courses taken at George Mason as a non-degree graduate student, or as part of ICAR's graduate certificate program may be transferred into the Ph.D. program. How credit will be counted will be determined in consultation with the accepted student's advisor. A maximum of 6 credits of non-ICAR courses taken as non-degree credit can be counted toward the Ph.D. program. Courses counted toward another degree cannot be transferred.

**Foreign Language Requirement**

Every doctoral student must show competence in a foreign language (that is, a language other than their native tongue) before advancing to candidacy. Students cannot register for CONF 998 without evidence of meeting this requirement. International students may use English as their foreign language and the TOEFL as a demonstration of competency. Neither American Sign Language nor computer languages can be used to fulfill this requirement. All students, regardless of how recently language courses have been taken, are required to fulfill the same standard before advancing to candidacy.

Competence in a foreign language must be shown by taking a placement test at Mason’s Language Laboratory. The test has oral and written components. Results of the proficiency test must indicate the student is proficient in the language at the intermediate level (competency at completion of 202, 209, or 210 level). Please visit [http://mcl.gmu.edu/resources/placement_testing.html](http://mcl.gmu.edu/resources/placement_testing.html) for testing times and details.

If the student desires testing in a language that Mason does not offer, the test can be taken at an outside organization, embassy, church, or other entity. The student must submit a letter to Mason certifying that the test was passed at a high, intermediate, or low advanced level. The student may submit for approval the names and qualifications of those capable of administering such a test. Please use the waiver form found on the Department of Modern and Classical Languages website: [http://mcl.gmu.edu/resources/placement_testing.html](http://mcl.gmu.edu/resources/placement_testing.html)

After students pass their comprehensive exam and before they register for CONF 998, they should notify the PhD coordinator about the language they have selected to satisfy the foreign language requirement.

**Advancement to PhD Candidacy**

After completing course work (except the dissertation) listed on the Program of Studies, passing written comprehensive exams, and completing the language requirement, students are advanced to candidacy. A candidate is permitted five years from the advancement date to complete the dissertation.

**Degree Requirements**

Fifty-seven credits are required. Students must complete coursework, comprehensive exams, and be advanced to candidacy within six years of their official admission date.

**Required Courses**

Students take 27 credits of required course work.

- CONF 711 - The Conventions of Statistical Methodology Credits: 3
- CONF 713 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
• CONF 801 - Introduction to Conflict Analysis and Resolution Credits: 3
• CONF 802 - Theories of the Person Credits: 3
• CONF 803 - Structural Theories Credits: 3
• CONF 810 - Philosophy and Conflict Research Credits: 3
• CONF 811 - Advanced Quantitative Research Methods Credits: 3
• CONF 812 - Advanced Qualitative Research Methods Credits: 3
• CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis Credits: 3

Elective Courses

Eighteen elective credits must be completed prior to comprehensive exams. Electives are any 500-, 600-, and 700-level CONF courses, except required courses and courses from the Graduate Certificate Program. With the advisor’s approval, each student may include a maximum of 6 credits of electives from outside the ICAR Program, including courses in other Mason departments, consortium courses, ICAR graduate certificate courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work.

Directed Readings

Only two directed readings (CONF 897) can be applied toward doctoral elective requirements.

• CONF 897 - Directed Reading Credits: 3

Dissertation Units

Students are required to complete 12 combined units of CONF 998 (Doctoral Dissertation Proposal) and CONF 999 (Doctoral Dissertation Research). Students must have a signed dissertation proposal in order to register for CONF 999.

• CONF 998 - Doctoral Dissertation Proposal Credits: 1-6 (All CONF 998 courses are graded In Progress until completion of the proposal. At that time, an appropriate grade is issued.)
• CONF 999 - Doctoral Dissertation Research Credits: 1-12 (All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, an appropriate grade is issued.)
The College of Education and Human Development (CEHD) comprises the School of Recreation, Health, and Tourism (RHT), and the Graduate School of Education (GSE). The college is committed to excellence, innovation, and collaboration in research and the preparation of professionals for the highest levels of practice and service in diverse schools, organizations, and communities.

CEHD provides leadership in transforming schools, organizations, and communities through research, teaching, and collaboration. CEHD faculty members prepare scholars and practitioners through multidisciplinary programs of study that facilitate the understanding, integration, and application of knowledge. Through research activities, faculty and students expand and refine the knowledge base for teaching and learning. In response to the richness and complexity of a pluralistic society, CEHD infuses diversity into academic programs and research. The faculty develops and supports knowledgeable, caring, and reflective professionals who facilitate excellence and equity for all learners. CEHD students and faculty demonstrate their growth and development in ways meaningful to their communication and professional organizations. Innovative programs and the integration of technology provide opportunities for students to develop, examine, evaluate, and practice professional knowledge, skills, and dispositions.

Administration

Gary Galluzzo, Dean
Martin Ford, Senior Associate Dean
Peter Barcher, Associate Dean for Research
Joan Isenberg, Associate Dean for Outreach and Program Development
Ellen Rodgers, Associate Dean for Teaching and Academic Affairs
David Wiggins, Director of the School of Recreation, Health, and Tourism

Undergraduate Degrees, Minors, and Certificates

CEHD offers four undergraduate degrees, 13 minors, and one undergraduate certificate. The School of Recreation Health and Tourism within the College of Education and Human Development collaborates with the College of Humanities and Social Sciences to offer three minors in interdisciplinary areas of study. Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.
In addition, the college also collaborates with the College of Science (Departments of Atmospheric, Oceanic, and Earth Science; Chemistry and Biochemistry; Mathematical Sciences; and Physics and Astronomy) and the College of Visual and Performing Arts (Departments of Dance and Music) to provide six collaborative undergraduate degree concentrations or emphases in Biology Education, Chemistry Education, Earth Science Education, Mathematics Education Music Education, and Physics Education, and one licensure program in Dance Licensure. CEHD also collaborates with New Century College to support three interdisciplinary degree concentrations which prepare students for graduate study in education. The requirements for each degree, minor, and certificate are described on their respective catalog pages.

In addition to the policies stated in the first chapters of this catalog, the following policies and procedures apply to all students in the college. All correspondence from the program, school, college, and university administration is sent to the student’s official Mason e-mail account. Students should use their Mason e-mail account to communicate with their program and other administrative units.

**Graduate Degrees and Certificates**

CEHD offers one doctoral degree, seven master's degrees, and 31 graduate certificates. The requirements for each degree and certificate are described on their respective catalog pages. In addition to the policies stated in the first chapters of this catalog, the following policies and procedures apply to all students in the college. All correspondence from the program, school, college, and university administration is sent to the student’s official Mason e-mail account. Students should use their Mason e-mail account to communicate with their programs and other administrative units.

**Academic Policies**

Students are ultimately responsible for their academic progress towards their degrees and/or certificates. They are strongly advised to consult the Academic Policies chapter of this catalog for information concerning university-wide requirements for degree and nondegree students in addition to those for this college. Students with questions regarding academic policies and college-level requirements should contact the CEHD Office of Academic and Student Affairs (Robinson Hall, Suite 307; 703-993-2080; cehdoasa@gmu.edu). Additional policy information and forms are available online at http://cehd.gmu.edu/oasa/.

**Grading Policy**

All CEHD undergraduate and graduate students are held to the university grading policies as described in the Academic Policies section of this catalog. Those students enrolled in a CEHD licensure program, however, must earn a B- or better in all licensure coursework. The following licensure programs have more stringent grading policies that are detailed in their respective catalog sections: MEd in Curriculum and Instruction with concentrations in Elementary Education, English as a Second Language, Foreign Language (Arabic, Chinese, French, German, Japanese, Latin, Russian, and Spanish), International Education FAST TRAIN ESOL (PK-12), International Education FAST TRAIN Elementary PK-6, Secondary Education; and the MEd in Counseling and Development.

**Grade Appeals**

Students may appeal grades that they believe were assigned unjustly or were based on unclear criteria in accord with the Academic Policies chapter of this catalog. Grade appeals should initially be directed to the School Director for courses taken within the School of Recreation, Health, and Tourism (RHT), and to the Program Coordinator for courses taken within the Graduate School of Education (GSE). The decision may be further appealed to the Associate Dean for Teaching and Academic Affairs, who reserves the right to convene the elected members of the CEHD Appeals Committee if there is sufficient evidence of procedural irregularity. The Associate Dean’s decision is not subject to review or further appeal.

**Professional Teacher Licensure**
CEHD is responsible for professional courses, special standards, and licensure recommendations for students completing state-approved (Virginia) licensure programs that prepare teachers, administrators, counselors, and related-instructional personnel.

For more information and the dates and times of Think You Want to Be a Teacher? information sessions, please contact the CEHD Office of Admissions (Robinson Hall, Room 103; 703-993-2892; cehdgrad@gmu.edu). Additional information is available online at http://cehd.gmu.edu/admissions/.

**Course Work**

CEHD offers all course work designated ATEP, EDAL, EDCD, EDCI, EDEP, EDLE, EDRD, EDRS, EDSE, EDUC, EDUT, EFHP, HEAL, IETT, PHED, PRLS, SPMT, and TOUR in the Courses chapter of this catalog.

## School of Recreation, Health, and Tourism

Phone: 703-993-2060  
Web: rht.gmu.edu

The School of Recreation, Health, and Tourism (RHT) offers one master's degree, four undergraduate degrees, six minors, and one undergraduate certificate. The MS in Exercise Science, Fitness, and Health Promotion prepares professionals to more adequately serve their communities or pursue advanced academic study. The BS in Athletic Training, accredited by the Commission on the Accreditation of Athletic Training Education (CAATE), prepares students for careers in athletic training and graduate study in other allied health professions. The BS in Health, Fitness, and Recreation Resources prepares students for supervisory and management careers in private and public parks and recreation systems (clinical and community), health promotion agencies, non-profit and for-profit sport organizations. The Parks and Outdoor Recreation and Therapeutic Recreation concentrations are accredited by the National Recreation and Park Association (NRPA). The BSEd in Physical Education, accredited by the National Council for the Accreditation of Teacher Education (NCATE), prepares students for a teaching career (K–12) in public and private schools. The BS in Tourism and Events Management degree is one of the fastest growing majors at the university.

For more information and the dates and time of RHT Orientation Sessions, please contact the RHT Office (Bull Run Hall [Prince William Campus] Suite 213; 703-993-2098; srht@gmu.edu). Additional information is available online at rht.gmu.edu.

**Faculty**

**Professors:** Anderson, Brayley, Nauright, D. Wiggins  
**Associate professors:** R. Baker, Banville, Bever, Daniels, Dieke, Kozlowski, Miller, Rikard, P. Rodgers, Schack, B. Wiggins  
**Assistant professors:** Allen, Ambegaonkar, Caswell, Esherick, Harmon, Lee, Park, Shelby, Winchester  
**Instructors:** Norden, Parham

**Course Work**
RHT offers course work designated ATEP, EFHP, HEAL, PHED, PRLS, SPMT, and TOUR in the Courses chapter of this catalog. Additional courses are offered for elective credit to George Mason University students. These courses are included under PHED and PRLS.

**Writing-Intensive Requirement**

The university requires all undergraduate students to successfully complete at least one 300-level or above course designated “writing-intensive” (WI) in their major(s). For RHT students, the WI requirement is satisfied by the successful completion of PRLS 450 and/or PHED 365, dependent on program requirements.

**Interdisciplinary Minors**

In addition to school-based minors, RHT offers two minors in interdisciplinary areas of study. These minors require course work from two or more disciplines and are administered by interunit faculty groups. In accordance with university policy, at least 8 credits must be applied only to the minor and may not fulfill requirements of the student's major concentration, or another minor. For policies governing all minors, see the Academic Policies chapter of this catalog chapter of this catalog.

**Minor in Sport Communication**

The Sport Communication Minor is offered jointly by the School of Recreation, Health, and Tourism and the Department of Communication. For details, see the Department of Communication section in the College of Humanities and Social Sciences chapter of this catalog.

**Minor in Sustainability**

The Sustainability Minor is offered jointly by the Department of Environmental Science and Policy and New Century College. Students may take select Parks, Recreation and Leisure Studies (PRLS) and Tourism and Events Management (TEM) courses to meet elective requirements. For details, see the Department of Environmental Science and Policy section in the College of Science chapter of this catalog.

**Complementary Certificate Programs**

Students may also complete a complementary graduate certificate outside of RHT in the following areas:

**Environmental Management Undergraduate Certificate (SC-CERB-EVMG)**

For details on this 27-credit undergraduate certificate, see the Department of Environmental Science and Policy section of the College of Science chapter of this catalog.

*Note:* Students interested in the Certificate in Environmental Management should take BIOL 213 and either BIOL 303 or BIOL 304 instead of BIOL 103 and 104.

**Gerontology Undergraduate Certificate (HH-CERB-GERO)**

For details on this 24-credit undergraduate certificate, see the College of Health and Human Services chapter of this catalog.

*Note:* Students interested in the Certificate in Gerontology should take BIOL 124 and BIOL 125.
Physical Activity and Sports Courses

RHT courses in physical activity and sports provide a broad range of opportunities that promote the health and wellness of students, faculty, and staff. Taught by experts with a wealth of experience and commitment to sharing their knowledge and skills, the courses include individual and team sports, self-defense and martial arts, and recreation activities concerned with wilderness and outdoor pursuits. Open to students in any major, these courses are designed to foster educational growth, encourage leisure interests, and promote lifetime fitness for the entire Mason community.

PHED 102 - Introduction to Soccer Credits: 1
PHED 103 - Credits: 3 Credits: 1
PHED 105 - Aerobics and Basic Conditioning Credits: 1
PHED 107 - Social Dance Credits: 1
PHED 108 - Weight Training and Body Conditioning Credits: 1
PHED 110 - Beginning Swimming Credits: 1
PHED 113 - Latin Dance Credits: 1
PHED 118 - Advanced Life Guarding Credits: 1
PHED 127 - Social Dance II Credits: 1
PHED 128 - Fencing II Credits: 2
PHED 129 - Introduction to Yoga Credits: 1
PHED 130 - Intermediate Yoga Credits: 1
PHED 134 - Self-Defense for Men and Women Credits: 1
PHED 135 - Self-Defense for Men and Women II Credits: 1

PRLS 115 - Introduction to Fly Fishing Credits: 1
PRLS 117 - Rock Climbing Credits: 2
Undergraduate Degree

Athletic Training, BS

Banner Code: E1-BS-ATT

This 123-credit degree provides educational and clinical experiences concerning the management of injuries and health problems associated with physical activity. The goal is to equip students with the knowledge and skills that must be mastered to successfully challenge the Board of Certification (BOC®) Examination and practice as an entry-level certified athletic trainer. The Athletic Training Education Program (ATEP) is divided into pre-professional and professional phases. Students begin the pre-professional phase upon admission to Mason by enrolling in required prerequisite courses (ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, HEAL 230, PHED 300).

Upon successful completion of all pre-professional course work with a grade of C or higher and a minimum cumulative GPA or 2.5, students may advance into the professional phase (three levels) of the program. Levels I-III require concurrent enrollment in didactic, clinical techniques, and clinical education practicum courses. The professional phase requires satisfactory completion of prerequisites, attainment of a grade of C or higher in all ATEP required course work, upholding a minimum cumulative within-major GPA of 2.5, and maintenance of current Emergency Cardiac Care (ECC) and First Aid certifications.

Application Process

Freshmen Applications

Admission to George Mason University is competitive, and successful candidates generally have a B+ average or higher in a challenging college preparatory curriculum. All students accepted to George Mason University and declaring athletic training as a major are admitted into the pre-professional phase of the program (typically freshmen). Freshmen are bound to university admissions criteria as stated in the university catalog. To progress into the professional phase of the program, students must earn a minimum grade of C in all within-major courses (ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, HEAL 230, PHED 300) and attain a cumulative minimum within-major GPA of 2.5 or greater.

Transfer Student Applications
Application for admission as a transfer student into the ATEP is competitive. Transfer applicants are evaluated based on satisfactory completion of standards identical to all other students enrolled in ATEP. Students transferring from another institution must produce documentation that demonstrates successful completion of all pre-professional phase course work and related clinical experiences. Students must provide documentation of completion of all ATEP related prerequisite course work with a grade of C or higher and a cumulative within-major GPA of 2.5 or higher on a 4.0 scale. Additional documentation includes transcripts, course syllabi, a letter from the ATEP director of the previous institution certifying satisfactory completion of all clinical experiences, completed proficiency assessments signed and dated by an approved clinical instructor attained at the previous institution, and current Emergency Cardiac Care (ECC) and First Aid certifications. Students unable to provide this documentation will not be admitted into the professional phase of the ATEP. All transfer students are advised to meet with the ATEP Director for an evaluation of all previously completed course work.

Special Requirements

Fees and expenses specific to the ATEP are as follows: laboratory supplies and equipment, clinical attire, clinical supplies, and clinical education manuals. Pre professional phase students enrolling in ATEP 150 will be assessed a laboratory fee $110. Professional phase students will be assessed a laboratory fee of $100 for each clinical techniques course. Payment is due at the first meeting of each course.

After admission to the pre-professional phase, students must submit a technical standards certification statement indicating that they have read, understand, and can meet the technical standards for athletic training students, either with or without accommodation. These standards outline the essential functional tasks that students must be able to perform to enroll in and complete the program. Students requiring special accommodations are encouraged to contact the Office of Disability Services.

Athletic training students are required to obtain a health examination and immunizations before entering the professional phase of the program. Students must have evidence of completion of the three hepatitis B immunizations and provide proof of tuberculosis screening in accordance with current U.S. Public Health Service recommendations. Students choosing not to complete hepatitis B immunizations will be required to sign a declination waiver. All professional phase students must complete annual blood-borne pathogens training and may be required to submit to a criminal background check. All students must have Emergency Cardiac Care (CPR, AED) and First Aid certifications before entering their first practicum experience and maintain these certifications through the remainder of the ATEP. For additional information about ATEP academic policies and procedures refer to the program handbook at http://rht.gmu.edu/atep/forms/

Course Work

General Education Requirements (38 credits)

- Written communication (6)
- Oral communication (3)
- Information technology (3)
- Quantitative reasoning (3)
- Literature (3)
- Arts (3)
- Western civilization (3)
- Social and behavioral sciences (3)
  Must take HEAL 230
- Global understanding (3)
- Natural science (8)
  Must take BIOL 124 and BIOL 125
Pre-Professional Courses (24 credits)

- ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques Credits: 3 Fall Semester
- ATEP 180 - Emergency Medical Care for Physically Active Populations Credits: 4 Spring Semester
- BIOL 124 - Human Anatomy and Physiology Credits: 4 Fall Semester
- BIOL 125 - Human Anatomy and Physiology Credits: 4 Spring Semester
- HEAL 110 - Personal Health Credits: 3 Fall Semester
- HEAL 230 - Introduction to Health Behavior Credits: 3 Spring Semester
- PHED 300 - Kinesiology Credits: 3 Spring Semester

Note:

Pre-professional requirements BIOL 124, BIOL 125, and HEAL 230 are satisfied as General Education credits. They are therefore, not included in the total pre-professional credit count.

Professional Courses (Level I) (24 credits)

- ATEP 250 - Physical Assessment of the Lower Body Credits: 3 * Fall Semester
- ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body Credits: 3 * Fall Semester
- ATEP 256 - Practicum I: Physical Assessment of the Lower Body Credits: 3 * Fall Semester
- ATEP 260 - Physical Assessment of the Upper Body Credits: 3 * Spring Semester
- ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body Credits: 3 * Spring Semester
- ATEP 266 - Practicum II: Physical Assessment of the Upper Body Credits: 3 * Spring Semester
- ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations Credits: 3 Spring Semester
- HEAL 330 - Nutrition Credits: 3 Fall Semester

Professional Courses (Level II) (22 credits)

- ATEP 350 - Therapeutic Modalities Credits: 3 * Fall Semester
- ATEP 355 - Clinical Techniques III: Therapeutic Modalities Credits: 3 * Fall Semester
- ATEP 356 - Practicum III: Therapeutic Modalities Credits: 3 * Fall Semester
- ATEP 360 - Therapeutic Rehabilitation Credits: 3 * Spring Semester
- ATEP 365 - Clinical Techniques IV: Therapeutic Rehabilitation Credits: 3 * Spring Semester
- ATEP 366 - Practicum IV: Therapeutic Rehabilitation Credits: 3 * Spring Semester
- PHED 450 - Physiology of Exercise Credits: 4 Fall Semester

Professional Courses (Level III) (21 credits)

- ATEP 441 - Practicum in Athletic Training Credits: 3 Spring Semester *
- ATEP 450 - Administration and Management in Athletic Training Credits: 3 * Fall Semester
- ATEP 456 - Practicum V: Professional Integration Credits: 6 * Fall Semester
Electives (5 credits)

Choose an additional 5 credits

Notes

*Indicates concurrent enrollment required. Practicum courses require a clinical education field experience component.

Total: 123 credits

Health, Fitness, and Recreation Resources, BS

Banner Code: E1-BS-HFRR

This 120-credit degree allows students to specialize in one of five varied concentrations (Exercise Science, Health Promotion, Parks and Outdoor Recreation, Sport Management, and Therapeutic Recreation).

Internship Application

The HFRR internship is a 12-credit course taken toward the end of a student’s academic program. Students must have earned 90 credit hours and met the specific prerequisites for their concentration to be eligible for the internship (see HEAL 490, PRLS 490, and SPMT 490). The internship is designed to be a synthesis experience for each student in their specific concentration area. The internship process begins with an in-service hosted by the internship coordinator. During the preliminary phase students will develop learning goals and consult with faculty on viable internship sites. Once the internship site has been selected, the student must complete 400 hours (480 hours for therapeutic recreation) of an applied experience in their field of study. Throughout the internship, the student will be monitored by a site supervisor (a Certified Therapeutic Recreation Specialist for therapeutic recreation), as well as a university supervisor, to facilitate a meaningful experience. For specific internship requirements, see the School of Recreation, Health and Tourism (RHT) Internship Manual.

▲ Concentration in Exercise Science (EXS)

This concentration emphasizes promotion of healthy lifestyles outside school settings. Students are prepared for supervisory and managerial careers in private and public fitness agencies and clinical and public safety settings. Students complete supervised internships in professional settings.

Course Work

General Education Requirements (38 credits)
- Written communication (6)
- Oral communication (3)
- Information technology (3)
- Quantitative reasoning (3)
  Must take STAT 250
- Literature (3)
- Arts (3)
- Western civilization (3)
- Social and behavioral science (3)
- Global understanding (3)
- Natural science (8)
  Must take BIOL 124 and BIOL 125

Professional Sequence (71 credits)

- HEAL 205 - Principles of Accident Causation and Prevention Credits: 4
- HEAL 220 - Dimensions of Mental Health Credits: 3
- HEAL 323 - Program Leadership and Evaluation Credits: 3
- HEAL 330 - Nutrition Credits: 3
- HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3 *

▲ Concentration in Parks and Outdoor Recreation (POR)

This concentration explores the contribution of recreation and parks to public well-being and quality of life. The curriculum includes courses in natural resources management, outdoor recreation programming, and environmental education. The program is accredited by the National Recreation and Park Association. Graduates are employed in national, state, and local recreation and park agencies, non-profit organizations, and private and commercial operations. Students complete supervised internships in professional settings.

▲ Concentration in Sport Management (SPMT)
This concentration enhances the professional development of liberal arts-educated students, thereby preparing them to assume entry-level managerial positions in the $300 billion sport industry, including private enterprises, government or public employment sectors, nonprofit or voluntary agencies, and commercial sport ventures. Preparation in sport marketing, finance, ethics, law, operations, planning, and program leadership fosters the skills that enhance students’ acquisition and advancement in sport management careers. An integral part of the program is the opportunity to complete two field experiences in sport organizations.

Physical Education, BSEd

Banner Code: E1-BSED-PHED

This 120-credit degree program is accredited by the National Council for Accreditation of Teacher Education (NCATE). Completing this degree fulfills requirements for licensure in Health and Physical Education (PK-12) in Virginia. Students complete a student teaching experience in their final semester.

Student Teaching Internship

To enroll in student teaching, physical education majors must have a minimum 2.50 GPA in the last 60 credits of course work and submit copies of official passing scores for the VCLA and PRAXIS II exams. The application must be completed one full semester before taking PHED 415 - Student Teaching in Physical Education. Application deadlines are listed below and forms are located at rht.gmu.edu/phed/student_teaching.

Student Teaching Internship Application Deadlines:

Fall Semester—February 1
Spring Semester—September 1

Admission

Four-year students: Students entering as freshmen with an interest in majoring in physical education will initially be accepted with BPRE (pre-PHED) status. Students must successfully complete a minimum of 45 credits and attain a cumulative GPA of
2.50 to apply to the BSED in Physical Education Program. In addition, students must submit passing Praxis I scores and have earned passing grades in BIOL 124, BIOL 125, PHED 201, and PHED 202.

Degree-seeking transfer students: Transfer students can apply for BSED status by having (1) a minimum of 45 credits from their previous institution with a cumulative GPA of 2.50 or by completing 12 credits at Mason with a minimum of a 2.50 GPA; (2) submitted passing scores for PRAXIS I or its approved substitutes; and (3) passed BIOL 124 and BIOL 125, and PHED 201 and PHED 202 (only a grade of C or higher is accepted for BIOL 141 and BIOL 142, if transferred from a Virginia Community College System(VCCS) institution).

Choose six credits from the following:

- HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3
- PRLS 317 - Social Psychology of Play and Recreation Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 405 - Planning, Design, and Maintenance of Leisure Facilities Credits: 3
- PRLS 411 - Administration of RHT Organizations II Credits: 3
- TOUR 190 - Wedding Planning Credits: 3
- TOUR 210 - Global Understanding through Travel and Tourism Credits: 3
- TOUR 221 - Event Implementation and Evaluation Credits: 3
- TOUR 230 - Introduction to Hospitality Management Credits: 3
- TOUR 311 - Women and Tourism Credits: 3
- TOUR 430 - Tourism on Public Lands Credits: 3
- TOUR 480 - Special Topics Credits: 1-3
- TOUR 499 - Independent Study Credits: 1-3
Note:

TOUR 210 and TOUR 311 may not be used to satisfy both degree and general education requirements.

Electives (13 credits)

Choose an additional 13 credits

Total: 120 credits

Bachelor's Level Certificate

Outdoor Adventure Undergraduate Certificate

Banner Code: E1-CERB-OADV

This 25-credit certificate program provides students with specialized skills unique to a variety of outdoor adventure activities, such as backpacking, rock climbing, canoeing, kayaking, and challenge-course facilitation. Course work focuses on the acquisition of technical skills and application of theory-to-experiential learning in an outdoor adventure curriculum. Students completing this program are prepared to be certified Leave-No-Trace Trainers, as well as challenge-course facilitators for outdoor education and adventure education organizations.

Course Work

Required Core Courses (16 credits)

- PRLS 110 - Exploring Outdoor Adventure Credits: 2
- PRLS 210 - Introduction to Recreation and Leisure Credits: 3
- PRLS 214 - Field Study in Natural History Credits: 3
- PRLS 220 - Experiential Education Theory and Application Credits: 3
- PRLS 221 - Challenge Course Facilitator Field Work Credits: 2
- PRLS 316 - Outdoor Education and Leadership Credits: 3

Electives (9 credits)

Choose 9 credits from the following:

- PRLS 115 - Introduction to Fly Fishing Credits: 1
- PRLS 117 - Rock Climbing Credits: 2
- PRLS 120 - Introduction to Backpacking Credits: 2
- PRLS 170 - Introduction to White-water Kayaking Credits: 1
- PRLS 173 - Basic Coastal Kayaking Credits: 2
- PRLS 180 - White-water Canoeing Credits: 2
- PRLS 181 - White-water Canoeing II Credits: 2
- PRLS 190 - Downhill and Cross-Country Skiing Credits: 1
- PRLS 250 - Wilderness Travel and Sustainability Credits: 2
- PRLS 480 - Special Topics in Parks, Recreation, and Leisure Studies Credits: 3

Total: 25 credits

Undergraduate Minor

Exercise Science Minor

Banner Code: EXS

This 16-credit minor is available to all Mason undergraduate students, with the exception of those enrolled in the BS in Health, Fitness, and Recreation Resources degree program and pursuing a concentration in Exercise Science or Health Promotion. Eight credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

- HEAL 330 - Nutrition Credits: 3
- PHED 300 - Kinesiology Credits: 3
- PHED 364 - Strength Training: Concepts and Applications Credits: 3
- PHED 365 - Measurement and Evaluation of Physical Fitness Credits: 3
- PHED 450 - Physiology of Exercise Credits: 4

Total: 16 credits

Health Promotion Minor

Banner Code: HPR

This 18-credit minor is available to all Mason undergraduate students, with the exception of those enrolled in the BS in Health, Fitness, and Recreation Resources degree program pursuing the Concentration in Health Promotion. Eight credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work
• HEAL 230 - Introduction to Health Behavior Credits: 3
• HEAL 372 - Health Communication Credits: 3
• HEAL 430 - Seminar in Exercise Science and Health Promotion Credits: 3
• HEAL 450 - Epidemiology and Environmental Health Credits: 3
• PHED 200 - Professional Dimensions of Health, Recreation, and Physical Education Credits: 3
• PRLS 310 - Program Planning and Design Credits: 3

Total: 18 credits

Parks, Recreation, and Leisure Studies Minor

Banner Code: PRLS

This 18-credit minor (including a practicum) is available to all Mason undergraduate students, with the exception of those enrolled in the BS in Health, Fitness, and Recreation Resources degree program pursuing a concentration in Parks and Outdoor Recreation or Therapeutic Recreation. Eight credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

• PRLS 210 - Introduction to Recreation and Leisure Credits: 3
• PRLS 241 - Practicum Credits: 3
• PRLS 310 - Program Planning and Design Credits: 3
• PRLS 316 - Outdoor Education and Leadership Credits: 3
• PRLS 327 - Foundations of Therapeutic Recreation Credits: 3
• PRLS 410 - Administration of RHT Organizations I Credits: 3

Note:

Students must complete PRLS 210, PRLS 310, PRLS 316, PRLS 327, and PRLS 410 before taking PRLS 241. PRLS 241 and PRLS 410 may be taken concurrently.

Total: 18 credits

Sport and American Culture Minor

Banner Code: SAMC

This 18-credit interdisciplinary minor is offered jointly by the School of Recreation, Health, and Tourism and the Department of History and Art History. Students must take two required and four elective courses (two from Sport Management and two from History). This minor is available to all Mason undergraduate students. Eight credits must be unique to the minor.
Course Work

- SPMT 304 - Sport, Culture, and Society Credits: 3
- HIST 389 - Topics in U.S. History Credits: 3
  History of Sport in America

Electives (Sport Management)

Choose two courses (6 credits) from the following:

- SPMT 321 - America Through Baseball Credits: 3
- SPMT 322 - Football and American Culture Credits: 3
- SPMT 323 - America and the Modern Olympics Credits: 3

Electives (History)

Choose two courses (6 credits) from the following:

- HIST 389 - Topics in U.S. History Credits: 3
  African-American Experience in Modern American Sport
  Gender and Twentieth-Century Capital American Sport
  The Growth of American Entertainment and Sport

Total: 18 credits

Sport Management Minor

Banner Code: SPMT

This 18-credit minor is available to all Mason undergraduate students, with the exception of those enrolled in the BS in Health, Fitness, and Recreation Resources degree program and pursuing a concentration in Sport Management. Eight credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

- PRLS 410 - Administration of RHT Organizations I Credits: 3
- SPMT 201 - Introduction to Sport Management Credits: 3
- SPMT 405 - Sport Operation and Planning Credits: 3
- SPMT 412 - Sport Marketing and Finance Credits: 3
- SPMT 420 - Economics and Finance in the Sport Industry Credits: 3
- SPMT 455 - Governance and Policy in Sport Organizations Credits: 3
Total: 18 credits

Tourism and Events Management Minor

Banner Code: TEM

This 15-credit minor is available to all Mason undergraduate students, with the exception of those enrolled in the BS in Tourism and Events Management degree program. Eight credits must be unique to the minor. For requirements governing all minors, see the Academic Policies section of this catalog.

Course Work

- TOUR 200 - Introduction to Travel and Tourism Credits: 3
- TOUR 220 - Introduction to Event Management Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3

Electives

Choose six additional credits from TOUR-prefix courses

Total: 15 credits

Master's Degree

Exercise, Fitness, and Health Promotion, MS

Banner Code: E1-MS-EFHP

This 30-credit master's degree focuses on the role of physical activity in the promotion of health, fitness, and quality of life. Completion of this degree may lead to the pursuit of further academic study (doctoral programs) or preparation of professionals equipped to more adequately serve their communities. Students may select to pursue a thesis or non-thesis option for completion of this degree.

Course Work (18 credits)

- EFHP 606 - Foundations of Exercise, Fitness, and Health Promotion Credits: 3
- EFHP 610 - Advanced Exercise Physiology Credits: 3
- EFHP 611 - Fitness Assessment: Theory and Practice Credits: 3
- EFHP 614 - Advanced Exercise Nutrition Credits: 3
- EFHP 618 - Exercise and Sport Psychology Credits: 3
- EFHP 623 - Research Design and Statistical Reasoning Credits: 3

Options

Thesis Option (12 credits)

- **Electives**: Choose an additional 6 credits with advisor/coordinator approval
- EFHP 799 - Thesis Credits: 1-6 (Must register for 6 credits)

Note:

Students must select an advisor from among the EFHP graduate faculty to supervise thesis work and chair the three-member thesis committee. Committee members are appointed by the EFHP Graduate Coordinator(s). One committee member may be selected from faculty outside of the program. Students may not register for thesis credit until a proposal has been approved by the student’s thesis committee and the EFHP Graduate Coordinator(s).

Total: 30 credits

Nonthesis Option (12 credits)

- **Electives**: Choose an additional 12 credits with advisor/coordinator approval
- Written Comprehensive Examination

Total: 30 credits

Other Programs

Physical Activity and Sports Courses

Our courses in physical activity and sports provide a broad range of opportunities that promote the health and wellness of students, faculty, and staff. Taught by experts with a wealth of experience and commitment to sharing their knowledge and skills, the courses include more traditional individual and dual sports, self-defense and martial arts, and recreation activities concerned with wilderness and outdoor pursuits. Open to students in any major, these courses are designed to foster educational growth, encourage leisure interests, and promote lifetime fitness for the entire Mason community.
The Graduate School of Education (GSE) offers one doctoral degree, six master's degrees, seven minors, and 31 graduate certificates. Within each of these degree programs students have the option to choose a concentration or emphasis that best meets their interests or needs. Additionally, students may pursue course work leading to initial teacher licensure.

Faculty

Associate professors: Bannan-Ritland, Bauer, Bon, Brazer, Brigham, Burns, Castle, Clark, Dabbagh, DeMulder, Duck, Falconer, Fox, Grant, Kaffenberger, Kidd, Kitsantas, Ndura, Osterling, Pierce, Razeghi, Reybold, Samaras, Sanchez, Sprague, Talleyrand, Thomas, Thorp, Upperman, Werner, Wong, Zenkov

Assistant professors: P. Baker, Buehl, Cozart, Day, Frazier, Hanley, Hardy, Hjalmarson, Hruby, Jerome, Kalbfleisch, Malloy, Nasser, Parsons, Peters, Regan, Sheridan, Shockley, Suh, Swanson, Taboada, View, N. Williams, Williams van Rooij

Instructors: Hathaway, Rioux-Bailey

Course Work

GSE offers course work designated EDCD, EDCI, EDEP, EDIT, EDLE, EDRD, EDRS, EDSE, EDUC, and EDUT in the Courses chapter of this catalog. Students can pursue a Master's degree and up to two graduate certificates concurrently.

Collaborative Undergraduate Degree Licensure Programs

GSE supports undergraduate students from a variety of disciplines interested in education and teacher licensure. Six collaborative undergraduate degree licensure programs are available. For more information, contact the GSE Undergraduate Academic Advisor at 703-993-2078, usie@gmu.edu, or visit usie.gmu.edu.

Dance Licensure (PK–12)

Upon successful completion of the requirements for a BA or BFA in Dance, students may pursue course work that will allow them to attain licensure to teach dance in Virginia public school systems. For details, see the Department of Dance section in the College of Visual and Performing Arts chapter of this catalog.

Concentration in Biology Education

Upon successful completion of the BA in Biology or the BS in Biology with a concentration in Biology Education, students can obtain licensure to teach biology in Virginia Public school systems. For details, see the Department of Molecular and Microbiology (MMB) and the Department of Environmental Science and Policy's (ESP) collaborative Biology program section in the College of Science chapter of this catalog.

Concentration in Chemistry Education
The BS in Chemistry with a concentration in Chemistry Education allows students to obtain licensure to teach chemistry in Virginia public school systems. For details, see the Department of Chemistry and Biochemistry section in the College of Science chapter of this catalog.

**Concentration in Earth Science Education**

The BS in Earth Science with a concentration in Earth Science Education allows students to obtain licensure to teach earth science in Virginia public school systems. For details, see the Department of Atmospheric, Oceanic and Earth Sciences section in the College of Science chapter of this catalog.

**Concentration in Mathematics Education**

Upon successful completion of the BA in Mathematics or the BS in Mathematics with a concentration in Mathematics Education, students can obtain licensure to teach mathematics in Virginia Public school systems. For details, see the Department of Mathematical Science section in the College of Science chapter of this catalog.

**Concentration in Music Education (PK–12)**

The BM in Music with a concentration in Music Education allows students to obtain certification to teach in Virginia public school systems. Students may follow an instrumental or choral/general music emphasis in the curriculum. For details, see the Department of Music section in the College of Visual and Performing Arts chapter of this catalog.

**Emphasis in Physics Education**

The BS in Physics with an emphasis in Physics Education allows students to obtain licensure to teach high school physics in Virginia public school systems. For details, see the Department of Physics and Astronomy section in the College of Science chapter of this catalog.

**Peace Corps Fellows and Master's International Programs (MIP)**

The FAST TRAIN (The Foreign Affairs' Spouses Teacher Training) Program is an approved site for the Peace Corps Fellows and Master's International Programs. While FAST TRAIN has traditionally prepared teachers for international service, it has entered into an agreement with the Peace Corps to offer the Peace Corps Fellows Program which trains returning volunteers to teach elementary education or English as a Second Language (ESL) in multicultural settings in the Washington, D.C. metro area. FAST TRAIN also participates in the Peace Corps Master's International Program that prepares outgoing volunteers for their ESL teaching assignments abroad as well as provides a program for completion of English as a Second Language (ESL) licensure and a MEd in Curriculum and Instruction.

**Undergraduate Minor**

**Assistive Technology Minor**

*Banner Code: AT*

This 15-credit minor provides undergraduate students with background knowledge in assistive technology. Completing this minor partially fulfills requirements for licensure in Special Education in Virginia. Eight credits of course work must be unique to the minor.
Course Work

- EDIT 410 - Introduction to Assistive Technology Credits: 3
- EDIT 423 - Accessibility/Input Modifications Credits: 2
- EDUC 203 - Human Disabilities in American Culture Credits: 3

Electives

Choose 7 credits from the following:

- EDIT 412 - Assistive Technology for Individuals with Sensory Impairments Credits: 2
- EDIT 425 - Software for Individuals with Special Needs Credits: 2
- EDIT 426 - Web Accessibility and Design Credits: 3
- EDIT 428 - Low-Technology Assistive Technology Solutions Credits: 1
- EDSE 422 - Augmentative Communication Credits: 2

Total: 15 credits

Early Childhood Special Education Minor

Banner Code: ECSE

This 15-credit minor provides undergraduate students with background knowledge in Early Childhood Special Education. Completing this minor partially fulfills requirements for licensure in Early Childhood Special Education in Virginia. Eight credits of course work must be unique to the minor.

Course Work

- EDSE 405 - Introduction to Early Childhood Special Education Credits: 3
- EDSE 415 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches Credits: 3
- EDSE 457 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 458 - Medical Aspects of Physical and Sensory Disabilities in Young Children Credits: 3
- EDSE 459 - Curriculum and Methods: Early Childhood Special Education Credits: 3

Additional suggested course work:
- EDSE 456 - Language Development and Communication for Diverse Infants and Toddlers Credits: 3

Total: 15 credits
Education Studies Minor

Banner Code: ESTU

This 18-credit minor is designed for students with a strong interest in exploring the field of education to develop a conceptual and situated understanding of schools and teaching. Eight credits of course work must be unique to the minor.

Course Work

- EDUC 300 - Introduction to Teaching Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3

Electives

Choose four courses from the following:

- EDIT 413 - Technology, Society, and the Culture of Learning Credits: 3
- EDLE 412 - Schools and the Law Credits: 3
- EDLE 420 - Organization and Management of Schools Credits: 3
- EDUC 303 - Politics of American Education Credits: 3
- NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-15 (Must register for 3 credits)

Total: 18 credits

Mild Disabilities Minor

Banner Code: MDIS

This 15-credit minor provides undergraduate students with background knowledge in mild disabilities. Completing this minor partially fulfills requirements for licensure in Special Education in Virginia. Eight credits of course work must be unique to the minor.

Course Work

- EDSE 401 - Introduction to Special Education Credits: 3
- EDSE 402 - Classroom Management and Applied Behavior Analysis Credits: 3
- EDSE 403 - Language Development and Reading Credits: 3
- EDSE 428 - Elementary Reading, Curriculum, and Strategies for Students Who Access the General Education Curriculum Credits: 3
- EDSE 440 - Characteristics of Students with Disabilities Who Access the General Curriculum Credits: 3
Total: 15 credits

Secondary Education English Minor

This 24-credit minor provides undergraduates with background knowledge in Secondary Education English. Completing this minor fulfills requirements for licensure in Secondary Education English (6-12) in Virginia. Eight credits of course work must be unique to the minor.

Course Work

- EDCI 370 - Young Adult Literature in Multicultural Settings Credits: 3
- EDCI 569 - Teaching English in the Secondary School Credits: 3

- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3

Severe Disabilities Minor

Banner Code: SPSD

This 15-credit minor provides undergraduate students with background knowledge in severe disabilities. Completing this minor partially fulfills requirements for licensure in Special Education in Virginia. Eight credits of course work must be unique to the minor.

Course Work

- EDSE 401 - Introduction to Special Education Credits: 3
- EDSE 431 - Transition and Community-Based Instruction Credits: 3
- EDSE 434 - Communication and Severe Disabilities Credits: 3
- EDSE 447 - Medical and Developmental Risk Factors for Children with Disabilities Credits: 3
- EDSE 457 - Foundations of Language and Literacy for Diverse Learners Credits: 3

Total: 15 credits

Master's Degree
Counseling and Development, MEd

Banner Code: E1-MED-CNDV

This master’s program emphasizes the integration of theory and practice, and culminates with an internship in an appropriate setting. Students may choose one of two concentrations: Community Agency Counseling (52 credits) or School Counseling (45 credits).

Grading Policy: Students enrolled in this degree program must earn a B or higher in Counseling skills courses (EDCD 603, EDCD 606, EDCD 608, EDCD 609, EDCD 755) and in all licensure course work. Students are permitted to repeat a course only once.

▲ Concentration in Community Agency Counseling (CA)

Course Work

- EDCD 609 - Advanced Counseling Skills and Strategies Credits: 4
- EDCD 652 - Introduction to Substance Abuse Counseling Credits: 3
- EDCD 654 - Counseling, Ethics, and Consultation in Community Agencies Credits: 3
- EDCD 656 - Diagnosis and Treatment Planning for Mental Health Professionals Credits: 3
- EDCD 658 - Couples and Family Counseling Credits: 3
- EDCD 797 - Advanced Topics in Education Credits: 1-6 (Must register for 2 credits)

MEd Requirements (28 credits)

- EDCD 525 - Advanced Human Growth and Development Credits: 3
- EDCD 601 - Introduction to Research in Counseling Credits: 3
- EDCD 602 - Foundations in Counseling Credits: 3
- EDCD 603 - Counseling Theories and Practice Credits: 3
- EDCD 604 - Assessment and Appraisal in Counseling Credits: 3
- EDCD 608 - Group Processes and Analyses Credits: 4
- EDCD 610 - Career and Educational Counseling Credits: 3
- EDCD 628 - Counseling and Social Justice Credits: 3
- EDCD 660 - Multicultural Counseling Credits: 3

Practicum and Internship (6 credits)

- EDCD 755 - Practicum in Counseling Credits: 3
- EDCD 791 - Internship in Counseling Credits: 3

Total: 52 credits
▲ Concentration in School Counseling PK–12 (SC)

Course Work

- EDCD 606 - Counseling Children and Adolescents Credits: 4
- EDCD 611 - Introduction to Ethical and Legal Issues in School Counseling Credits: 2
- EDCD 626 - Principles and Practices of School Counseling Credits: 3
- EDCD 797 - Advanced Topics in Education Credits: 1-6 (Must register for 2 credits)

MEd Requirements (28 credits)

- EDCD 525 - Advanced Human Growth and Development Credits: 3
- EDCD 601 - Introduction to Research in Counseling Credits: 3
- EDCD 602 - Foundations in Counseling Credits: 3
- EDCD 603 - Counseling Theories and Practice Credits: 3
- EDCD 604 - Assessment and Appraisal in Counseling Credits: 3

- EDCD 610 - Career and Educational Counseling Credits: 3
- EDCD 628 - Counseling and Social Justice Credits: 3
- EDCD 660 - Multicultural Counseling Credits: 3

Practicum and Internship (6 credits)

- EDCD 755 - Practicum in Counseling Credits: 3
- EDCD 791 - Internship in Counseling Credits: 3

Total: 45 credits

Curriculum and Instruction, MEd

Banner Code: E1-MED-CRIN

This master’s degree is offered to students preparing for initial teacher licensure, advanced teacher education, and ancillary educational programs. Students may choose up to two of the following concentrations.

Advanced Studies in Teaching and Learning (ASTL)

The ASTL concentrations are for teachers and other educators with one or more years of teaching or education-related experience who want to continue to grow professionally. The program offers advanced study in a specific concentration area, including Virginia’s Standards of Learning content areas, cohort classes, an innovative schedule, and the use of technology. The courses, aligned with the National Board for Professional Teaching Standards, help teachers think and practice as board-certified teachers.
The program develops teacher-leaders who practice reflection through action-research, problem-based learning, and self-inquiry, and teacher expertise in a concentration that will identify the teacher as a potential leader in that area.

The program provides two options to experienced teachers and other educators. Educators with or without a master’s degree may apply for the full master’s degree program, which includes core and emphases, or an 18- to 21-credit graduate certificate program or advanced study in a particular area.

**MEd Requirements (12 credits)**

- EDUC 606 - Education and Culture Credits: 3
- EDUC 612 - Inquiry into Practice Credits: 2
- EDUC 613 - How Students Learn Credits: 3
- EDUC 614 - Designing and Assessing Teaching and Learning Credits: 2
- EDUC 615 - Educational Change Credits: 2

▲**Concentration in ASTL: Advanced International Baccalaureate (AIB)**

This 18-credit International Baccalaureate(IB) concentration provides advanced professional development for teachers on the philosophy, elements, and assessments of the Primary Years Programme (PYP), Middle Years Programme (MYP), and Diploma Programme (DP). The course work focuses on the theory, pedagogy, and research under girding the International Baccalaureate programs.

**Course Work**

- EDUC 621 - Teaching and Learning in the International Baccalaureate Primary Years Program Credits: 3
- EDUC 622 - Curriculum Development across IB Programs Credits: 3
- EDUC 623 - Models and Strategies for Teaching and Learning in IB Schools Credits: 3
- EDUC 624 - Assessment and Learning in IB Schools Credits: 3
- EDUC 626 - Inquiry into Action: IB Teachers, Learners, and Schools Credits: 3
- EDUC 627 - Contemporary Issues and Trends in IB Credits: 3

Total: 18 credits

▲**Concentration in ASTL: Alternative Education (AALT)**

The 18-credit alternative education concentration provides advanced professional development for practicing teachers who work in programs for students who are at risk of dropping out of school, have significant life challenges, or have been suspended. Completion of the concentration provides a certificate in alternative education.

**Course Work**

- EDAE 600 - Alternative Education for At-Risk Youth Credits: 1
- EDAE 601 - Curriculum and Methods in Alternative Education Credits: 3
- EDAE 602 - Preparing Students for Employment and Living Independently Credits: 2
- EDAE 603 - Communication and Management Strategies for Alternative Education Credits: 3
- EDAE 604 - Multidisciplinary and Interagency Collaboration Credits: 3
- EDSE 551 - Classroom Management: Theory and Practice Credits: 3

**Electives**

Choose one 3-credit course with advisor's approval

**Total: 18 credits**

▲ **Concentration in ASTL: Art Education (AART)**

The 18-credit art education concentration is designed for art teachers with current licensure in art PK–12. It consists of six required courses that address contemporary professional development content areas in art education.

**Course Work**

- AVT 605 - Issues and Research in Art Education Credits: 3
- AVT 615 - Technology for Art Teachers Credits: 3
- AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK–12 Credits: 3
- AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts Credits: 2
- EDEP 601 - Creativity and Cognition in the Arts and Media Credits: 3

**Electives**

Choose one studio course from the following:

- AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 4
- AVT 668 - Three-Dimensional Art Making across Cultures Credits: 4
- AVT 669 - Four Dimensional Art Making: Technology and New Media Credits: 4

**Note:**

AVT 615 is a 3-credit studio course. Qualified students who test out of this course should choose two of the above 4 credit studio courses for a total of 8 studio credits.

**Total: 18 credits**
▲ Concentration in ASTL: Early Childhood Education (AECE)

The 18-credit early childhood concentration provides advanced professional development in preschool through third grade content and includes three required courses and three electives. The concentration focuses on practicing teachers who may or may not be licensed to teach young children.

Course Work

- EDCI 603 - Trends, Issues, and Research in Early Childhood Education Credits: 3
- EDCI 615 - Advanced Human Development Credits: 3
- EDCI 784 - Capstone Seminar in Early Childhood Education Credits: 3

Electives

Choose three courses from the following:

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 601 - Applied Study of Communicative Competence and Classroom Discourse Credits: 3
- EDCI 613 - Curriculum and Assessment in Early Childhood Education I Credits: 3
- EDCI 614 - Curriculum and Assessment in Early Childhood Education II Credits: 3
- EDCI 616 - The Creative Arts and Play in Early Childhood Education Credits: 3
- EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood Credits: 3
- EDSE 556 - Developing Language, Literacy, and Communication in Young Children Credits: 3
- EDSE 557 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 656 - Assessment of Diverse Young Learners Credits: 3
- EDSE 667 - Cognitive Development of Diverse Young Children Credits: 3

Total: 18 credits

▲ Concentration in ASTL: Elementary Mathematics (AEMA)

The 18-credit elementary math concentration combines the study of mathematics content appropriate for kindergarten through eighth grade with the study of mathematics education research, curriculum, leadership, and assessment.

Course Work

Must complete five separate 3-credit MATH 600 special topics courses as noted below:

- MATH 600 - Special Topics in Mathematics Credits: 1-6
  Number Systems and Number Theory for K-8 Teachers Credits: 3
  Geometry and Measurement for K-8 Teachers Credits: 3
  Probability and Statistics for K-8 Teachers Credits: 3
  Algebra and Functions for K-8 Teachers Credits: 3
  Rational Numbers and Proportional Reasoning for K-8 Teachers Credits: 3
Electives

Choose one 3-credit course from the following:

- EDCI 645 - Curriculum Development in Mathematics Education Credits: 3
- EDCI 646 - Mathematics Education Leadership for School Change Credits: 1-3 (Must register for 3 credits)
- EDCI 666 - Research in Mathematics Teaching Credits: 3

Total: 18 credits

▲Concentration in ASTL: Foreign Language French (AFLF)

The 18-credit foreign language concentration provides advanced professional development and language study for practicing foreign language teachers. The 18 credits include a combination of modern language courses and targeted electives.

Course Work

Choose six credits in literature:

- FREN 515 - Medieval French Literature Credits: 3
- FREN 517 - Studies in Seventeenth-Century Literature Credits: 3
- FREN 518 - Studies in Eighteenth-Century Literature Credits: 3
- FREN 519 - Studies in Nineteenth-Century Literature Credits: 3
- FREN 525 - Studies in Modern French Literature Credits: 3
- FREN 550 - Special Topics Credits: 3

Note:

Courses may be substituted with advisor-approved literature-related electives in French.

Choose six credits in language and linguistics:

- FREN 560 - History of the French Language Credits: 3
- FREN 575 - Grammatical Analysis Credits: 3
- FREN 576 - Advanced Translation Credits: 3

Note:

Courses may be substituted with advisor-approved language and linguistics-related electives.
Electives

Choose six credits in literature or language (select from courses listed above or below)

- FREN 580 - Contemporary French Society and Culture Credits: 3
- FRLN 510 - Bibliography and Research in Foreign Languages and Literature Credits: 3
- FRLN 525 - Literary Translation Credits: 3
- FRLN 550 - Special Topics Credits: 3
- FRLN 565 - Theory of Translation Credits: 3
- FRLN 572 - Integrating Technology into Language Learning Credits: 3
- FRLN 573 - Basic Issues in Language Pedagogy Credits: 3
- FRLN 590 - Internship and Seminar in Translation Credits: 3
- FRLN 620 - Literary Theory and Criticism Credits: 3
- FRLN 660 - Approaches to the Study of Language Credits: 3
- FRLN 670 - Foreign Language Learning and Teaching Credits: 3

Note:

Courses may be substituted with advisor-approved language and literature-related electives.

Total: 18 credits

▲ Concentration in ASTL: Foreign Language Spanish (AFLS)

The 18-credit foreign language concentration provides advanced professional development and language study for practicing foreign language teachers. The 18 credits include a combination of modern language courses and targeted electives.

Course Work

- SPAN 502 - Hispanic Sociolinguistics Credits: 3
- SPAN 505 - Applied Spanish Stylistics Credits: 3
- SPAN 510 - Introduction to the Graduate Study of Literature in Spanish Credits: 3

Electives

Choose nine credits from the following:

- FRLN 510 - Bibliography and Research in Foreign Languages and Literature Credits: 3
- FRLN 525 - Literary Translation Credits: 3
- FRLN 550 - Special Topics Credits: 3
- FRLN 565 - Theory of Translation Credits: 3
- FRLN 572 - Integrating Technology into Language Learning Credits: 3
- FRLN 573 - Basic Issues in Language Pedagogy Credits: 3
• FRLN 590 - Internship and Seminar in Translation Credits: 3
• FRLN 620 - Literary Theory and Criticism Credits: 3
• FRLN 650 - The Teaching of Culture in Foreign Language Programs Credits: 3
• FRLN 660 - Approaches to the Study of Language Credits: 3
• FRLN 670 - Foreign Language Learning and Teaching Credits: 3
• SPAN 501 - Applied Spanish Grammar Credits: 3
• SPAN 520 - Studies in Medieval Spanish Literature Credits: 3
• SPAN 525 - Studies in Renaissance Literature Credits: 3
• SPAN 530 - Studies in the Literature of the Golden Age Credits: 3
• SPAN 540 - Studies in 20th-Century Literature Credits: 3
• SPAN 545 - Studies in Hispanic Literature Credits: 3
• SPAN 551 - Special Topics in Spanish Credits: 3
• SPAN 560 - Studies in Spanish American Poetry Credits: 3
• SPAN 565 - Studies in Spanish American Drama Credits: 3
• SPAN 576 - Advanced Translation Credits: 3
• SPAN 580 - Contemporary Hispanic Institutions Credits: 3
• SPAN 635 - Seminar in Don Quixote Credits: 3
• SPAN 650 - Seminar in Twentieth-Century Drama Credits: 3
• SPAN 655 - Seminar in Twentieth-Century Prose Credits: 3
• SPAN 670 - Seminar in Spanish American Prose Credits: 3
• SPAN 675 - Seminar in Literature and Art Credits: 3
• SPAN 680 - Seminar in Literature and Society Credits: 3
• SPAN 685 - Seminar in Literature and Ideas Credits: 3

Note:

Courses may be substituted with advisor-approved language and literature-related electives.

Total: 18 credits

▲Concentration in ASTL: Geography (AGEO)

The 21-credit geography concentration includes five required geography courses and two approved elective courses. The concentration is designed for elementary, middle and high school teachers who seek a professional specialization in geography. Coursework provides an add-on endorsement in geography for Virginia teachers.

Course Work

• GEOG 520 - Geography for Teachers Credits: 3
• GEOG 533 - Issues in Regional Geography Credits: 1-6 (Must register for 3 credits)
• GEOG 550 - Geospatial Science Fundamentals Credits: 3
• GEOG 603 - Geographic Perspectives of Complex Natural Resource Management Topics Credits: 3
• GEOG 690 - Advanced Practicum in Geographical Applications Credits: 1-6 (Must register for 3 credits)
Electives

Choose two courses from the following:

- GEOG 581 - World Food and Population Credits: 3
- GEOG 505 - Transportation Geography Credits: 3
- GEOG 590 - Selected Topics in Geography and Cartography Credits: 3
- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 563 - Advanced Geographic Information Systems Credits: 3

Total: 21 credits

▲ Concentration in ASTL: Gifted Child Education (AGCE)

The 21-credit gifted child education concentration provides advanced professional development through endorsement or master’s degree for teachers of gifted students. The concentration meets NAGC/CEC graduate standards and focuses on culturally diverse, multilingual, twice exceptional, and traditionally defined gifted students and programs.

Course Work

- EDCI 621 - Introduction to Gifted and Talented Learners Credits: 3
- EDCI 622 - Curriculum Differentiation for Diverse Learners Credits: 3
- EDCI 623 - Models and Strategies for Teaching Gifted Learners Credits: 3
- EDCI 624 - Assessment, Identification, and Evaluation of Gifted Learners Credits: 3
- EDCI 625 - Contemporary Issues and Trends in Gifted Education Credits: 3
- EDCI 626 - Action Research in Gifted Education Credits: 3
- EDCI 627 - Advanced Practicum in Gifted Education Credits: 3

Note: One year of successful full-time teaching in an accredited public or non-public school may be accepted in lieu of the EDCI 627 practicum (VA Licensure Regulations for School Personnel, 1998). A 3-credit elective course must be chosen with advisor approval to meet the 21-credit requirement.

Total: 21 credits

▲ Concentration in ASTL: History (AHIS)

The 18-credit history concentration includes one geography and five history courses that are required. The concentration is designed for elementary, middle, and high school teachers who seek a foundation in the history courses that are taught within Virginia public schools.

Course Work
- GEOG 520 - Geography for Teachers Credits: 3
- HIST 510 - Approaches to Modern World History Credits: 3
- HIST 601 - Themes in U.S. History I Credits: 3
- HIST 602 - Themes in U.S. History II Credits: 3
- HIST 605 - Themes in European History I Credits: 3
- HIST 695 - History Symposium Credits: 3

Note:

Courses may be substituted with advisor-approved history electives.

Total: 18 credits

▲ Concentration in ASTL: Individualized (AATL)

The 18-credit individualized concentration is developed in concert with a student’s advisor to provide course work in a student’s specialized area that is not provided in other ASTL concentrations. The student works with the program director to design a program of study that provides individualized learning experiences in an area of expertise relevant to one’s professional educational setting.

▲ Concentration in ASTL: Literacy: PK–12 Classroom Teachers (AP12)

This 18-credit concentration includes three required literacy courses and three approved electives in ESOL, special education, psychology, secondary and elementary education, early childhood, writing, and other areas. Theory and strategies in literacy and reading for teachers in any discipline, PK–12.

Course Work

- EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood Credits: 3
- EDRD 631 - Advanced Literacy Foundations and Instruction, Adolescence through Adulthood Credits: 3
- EDRD 632 - Literacy Assessments and Interventions for Groups Credits: 3

Electives

Choose 9 credits from the following:

- EDCI 520 - Assessment of Language Learners Credits: 3
- EDRD 615 - Reading/Writing for Multilingual Students Credits: 3
- EDRD 633 - Literacy Assessments and Interventions for Individuals Credits: 3
- EDRD 637 - Supervised Literacy Practicum Credits: 2-3 (Must register for 3 credits)
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 627 - Assessment Credits: 3
Note:

Student may choose an alternate elective with advisor approval.

Total: 18 credits

▲ Concentration in ASTL: Literacy: Reading Specialist (ALRS)

This 21-credit concentration is a state-approved sequence of courses leading to Virginia reading specialist licensure. Course work includes foundational knowledge, instructional and assessment strategies for individuals and groups, and preparation as a literacy coach and staff developer. Licensure also requires a master’s degree, passing of the Virginia Reading Assessment, and three years of teaching under contract.

Course Work

- EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood Credits: 3
- EDRD 631 - Advanced Literacy Foundations and Instruction, Adolescence through Adulthood Credits: 3
- EDRD 632 - Literacy Assessments and Interventions for Groups Credits: 3
- EDRD 633 - Literacy Assessments and Interventions for Individuals Credits: 3
- EDRD 634 - School-Based Leadership in Literacy Credits: 3
- EDRD 635 - School-Based Inquiry in Literacy Credits: 3
- EDRD 637 - Supervised Literacy Practicum Credits: 2-3 (Must register for 3 credits)

Total: 21 credits

▲ Concentration in ASTL: Mathematics (Middle and Secondary) (AMTH)

This 18-credit concentration provides advanced professional development in mathematics teaching and learning for practicing middle or high school mathematics teachers. Students pursue either Middle Education, Grades 6-8 or Secondary Education, Grades 9-12 course work dependent on their current teaching assignment

Course Work

Middle Education, Grades 6-8

- EDCI 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
- MATH 601 - Analysis I for Teachers Credits: 3
- MATH 604 - Geometry for Teachers Credits: 3
- MATH 605 - Discrete/Finite Mathematics for Teachers Credits: 3
- MATH 607 - Algebraic Structure for Teachers Credits: 3
- MATH 608 - Problem Solving in Mathematics Credits: 3

Total: 18 credits

Secondary Education, Grades 9-12

- EDCI 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
- MATH 601 - Analysis I for Teachers Credits: 3
- MATH 602 - Analysis II for Teachers Credits: 3
- MATH 604 - Geometry for Teachers Credits: 3
- MATH 605 - Discrete/Finite Mathematics for Teachers Credits: 3
- MATH 607 - Algebraic Structure for Teachers Credits: 3

Total: 18 credits

▲ Concentration in ASTL: Physical Education (APED)

The 18-credit physical education concentration provides course work in research design, curriculum development, collaborative supervision, research in pedagogy, and advanced adapted content. It is designed for practicing teachers seeking to improve their professional knowledge and teaching performance for improving student learning.

Course Work

- EFHP 623 - Research Design and Statistical Reasoning Credits: 3
- PHED 670 - Analysis of Teaching in Physical Education Credits: 3
- PHED 672 - Curriculum and Assessment in Physical Education Credits: 3
- PHED 673 - Motor Development for Special Populations Credits: 3
- PHED 680 - Mentoring and Supervising in Physical Education Credits: 3

Electives

Choose one course from the following:

- DANC 553 - Teaching Creative Movement Credits: 3
- DANC 580 - Laban Movement Analysis Credits: 3
- EDLE 610 - Leading Schools and Communities Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3
- EFHP 606 - Foundations of Exercise, Fitness, and Health Promotion Credits: 3
- EFHP 610 - Advanced Exercise Physiology Credits: 3
• EFHP 611 - Fitness Assessment: Theory and Practice Credits: 3
• EFHP 614 - Advanced Exercise Nutrition Credits: 3
• EFHP 618 - Exercise and Sport Psychology Credits: 3

Note:

Student may choose an alternate elective with advisor approval.

Total: 18 credits

▲ Concentration in ASTL: Science (ASCI)

The 18-credit science concentration provides advanced professional development in science teaching and learning for practicing elementary, middle, or high school science teachers.

Course Work

• EDCI 663 - Research in Science Teaching Credits: 3
• EDCI 683 - Curriculum Development and Evaluation in Science Education Credits: 3
• EDCI 693 - Leadership and Organizational Issues in Science Education Credits: 3
• EDLE 791 - Internship in Educational Leadership Credits: 3

Electives

Choose six credits of science course work with advisor approval.

Total: 18 credits

▲ Concentration in ASTL: Special Education (ASPE)

The 18-credit special education concentration provides advanced expertise for educators, administrators, and other professionals providing services to individuals with special needs. Students select one of the following areas of emphasis: applied behavior analysis; assistive technology; emotional disturbance and learning disabilities; emotional disturbance, learning disabilities, and mental retardation; mental retardation; or severe disabilities.

Course Work

Applied Behavior Analysis
- EDSE 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy Credits: 3
- EDSE 621 - Applied Behavior Analysis: Empirical Bases Credits: 3
- EDSE 623 - Applied Behavior Analysis: Assessments and Interventions Credits: 3
- EDSE 624 - Applied Behavior Analysis: Applications Credits: 3
- EDSE 625 - Applied Behavior Analysis: Verbal Behavior Credits: 3
- EDSE 790 - Internship in Special Education Credits: 1-6 (Must register for 3 credits)

Total: 18 credits

**Assistive Technology**

Choose 18 credits from the following:

- EDSE 522 - Assistive Technology for Individuals with Sensory Impairments Credits: 2-3
  or
- EDIT 522 - Assistive Technology for Individuals with Sensory Impairments Credits: 2-3
- EDSE 523 - Accessibility/Input Modification Credits: 1-3
  or
- EDIT 523 - Accessibility/Input Modification Credits: 1-3
- EDSE 524 - Assistive Technology for Individuals with Learning Disabilities Credits: 2
  or
- EDIT 524 - Assistive Technology for Individuals with Learning Disabilities Credits: 2
- EDSE 525 - Software for Individuals with Special Needs Credits: 1-2
  or
- EDIT 525 - Software for Individuals with Special Needs Credits: 1-2
- EDSE 526 - Web Accessibility and Design Credits: 3
  or
- EDIT 526 - Web Accessibility and Design Credits: 3
- EDSE 527 - Adapted Sports, Recreation, and Leisure Credits: 1
- EDSE 528 - Low-Tech Assistive Technology Solutions Credits: 1
- EDSE 622 - Augmentative Communication Credits: 2
- EDSE 797 - Advanced Topics in Education Credits: 1-6
- EDUC 600 - Workshop in Education Credits: 1-6

**Note:**

Assistive technology courses are offered for variable credit each semester. Select 18 credits to meet the concentration requirement.

Total: 18 credits

**Emotional Disturbance and Learning Disabilities (ED/LD) K–12**
Choose 18 credits from the following:

- EDSE 501 - Introduction to Special Education Credits: 3
- EDSE 502 - Classroom Management and Applied Behavior Analysis Credits: 3
- EDSE 503 - Language Development and Reading Credits: 3
- EDSE 540 - Characteristics of Students with Disabilities who Access the General Curriculum Credits: 3
- EDSE 626 - The Inclusive Classroom Credits: 3
  or
- EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum Credits: 3
- EDSE 627 - Assessment Credits: 3
- EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum Credits: 3
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 790 - Internship in Special Education Credits: 1-6 (Must register for 2 credits)
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Total: 18 credits

Emotional Disturbance, Learning Disabilities, and Mental Retardation (ED/LD/MR) K–12

Choose 18 credits from the following:

- EDSE 501 - Introduction to Special Education Credits: 3
- EDSE 502 - Classroom Management and Applied Behavior Analysis Credits: 3
- EDSE 503 - Language Development and Reading Credits: 3
- EDSE 540 - Characteristics of Students with Disabilities who Access the General Curriculum Credits: 3
- EDSE 542 - Characteristics of Students with Mental Retardation Credits: 3
  or
- EDSE 547 - Medical and Developmental Risk Factors for Children with Disabilities Credits: 3
- EDSE 627 - Assessment Credits: 3
- EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum Credits: 3
  or
- EDSE 626 - The Inclusive Classroom Credits: 3
- EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum Credits: 3
- EDSE 661 - Curriculum and Methods: Severe Disabilities Credits: 3
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 790 - Internship in Special Education Credits: 1-6 (Must register for 2 credits)
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Total: 18 credits
Mental Retardation (MR) K–12

Choose 18 credits from the following:

- EDSE 501 - Introduction to Special Education Credits: 3
- EDSE 502 - Classroom Management and Applied Behavior Analysis Credits: 3
- EDSE 503 - Language Development and Reading Credits: 3
- EDSE 542 - Characteristics of Students with Mental Retardation Credits: 3
- EDSE 547 - Medical and Developmental Risk Factors for Children with Disabilities Credits: 3
- EDSE 627 - Assessment Credits: 3
- EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum Credits: 3
  or
- EDSE 626 - The Inclusive Classroom Credits: 3
- EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum Credits: 3
- EDSE 661 - Curriculum and Methods: Severe Disabilities Credits: 3
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 790 - Internship in Special Education Credits: 1-6 (Must register for 2 credits)
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Total: 18 credits

Severe Disabilities (SD) K–12

Choose 18 credits from the following:

- EDSE 531 - Transition and Community-Based Instruction Credits: 3
- EDSE 547 - Medical and Developmental Risk Factors for Children with Disabilities Credits: 3
- EDSE 557 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 532 - Positive Behavior Supports Credits: 3
  or
- EDSE 502 - Classroom Management and Applied Behavior Analysis Credits: 3
- EDSE 534 - Communication and Severe Disabilities Credits: 3
  or
- EDSE 533 - Curriculum and Assessment in Severe Disabilities Credits: 3
  or
- EDSE 627 - Assessment Credits: 3
- EDSE 661 - Curriculum and Methods: Severe Disabilities Credits: 3
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 669 - Interdisciplinary Approach for Children with Sensory and Motor Disabilities Credits: 3
- EDSE 790 - Internship in Special Education Credits: 1-6 (Must register for 2 credits)
- EDSE 791 - Midpoint Portfolio Credits: 1
• EDSE 792 - Final Portfolio Credits: 1
• EDSE 622 - Augmentative Communication Credits: 2

Total: 18 credits

▲ Concentration in ASTL: Teacher Leadership (ATL)

This 18-credit concentration provides advanced professional development in school leadership. The educational leadership course work focuses on teachers as leaders in their classrooms, teams, departments, programs, and schools.

Course Work

• EDLE 610 - Leading Schools and Communities Credits: 3
• EDLE 612 - Education Law Credits: 3
• EDLE 618 - Supervision and Evaluation of Instruction Credits: 3
• EDLE 620 - Organizational Theory and Leadership Credits: 3
• EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
• EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)

Total: 18 credits

▲ Concentration in Early Childhood Education-UTEEM (Licensure) (EDUT)

This 63-credit concentration prepares students to apply for triple licensure. It provides professionals with the skills to work with culturally, linguistically, and ability-diverse young children and their families in schools and diverse community settings. Participation in the program requires a full-time, primarily daytime commitment for one summer and two academic years of integrated study and ongoing practice in four different internships. The program is designed to provide professionals with the specialized knowledge, skills, and dispositions needed to meet the developmental and educational needs of young children.

Course Work

• EDRS 590 - Education Research Credits: 3
• EDSE 517 - Computer Applications for Special Populations Credits: 3
• EDUT 511 - Developmental Pathways of Diverse Learners, Birth-Adolescence Credits: 3
• EDUT 512 - Assessment of Diverse Young Learners, Ages 3-5 Credits: 3
• EDUT 513 - Foundations of Language and Literacy for Diverse Learners Credits: 3
• EDUT 514 - Curriculum and Instruction for Diverse Learners, Ages 3-5 Credits: 3
• EDUT 521 - Infant/Toddler Development in Family and Cultural Contexts Credits: 3
• EDUT 522 - Family-Centered Assessment of Diverse Infants and Toddlers Credits: 3
• EDUT 523 - Developing Language, Literacy, and Communication in Diverse Young Children Credits: 3
EDUT 524 - Culturally, Linguistically, and Developmentally Appropriate Practices with Infants, Toddlers, and Their Families Credits: 3
EDUT 612 - Assessment of Diverse Young Learners Credits: 3
EDUT 613 - Language and Literacy Assessment and Instruction for Diverse Young Learners Credits: 3
EDUT 614 - Curriculum Across the Content Areas for Diverse Learners, K-3 Credits: 3
EDUT 615 - Mathematics and Science for Diverse Young Learners Credits: 3
EDUT 781 - Frameworks for Unified, Transformative Early Care and Education Credits: 3
EDUT 782 - Policy Perspectives Affecting Diverse Young Learners and Their Families Credits: 3
EDUT 790 - Internship with Diverse Learners Credits: 3
EDUT 791 - Internship with Diverse Infants and Toddlers and Their Families Credits: 3
EDUT 792 - Internship with Diverse Learners, K-3 Credits: 3
EDUT 793 - Specialization Internship with Diverse Learners and Their Families Credits: 6

Portfolio Requirement

A professional portfolio is required. The portfolio reflects the student's professional development throughout the program and contains examples of performance assessments associated with standards.

Total: 63 credits

▲Concentration in Early Childhood Education PK-3 (EPK3)

This 32-credit concentration prepares students to apply for initial teacher licensure. It provides professionals with the skills to work with culturally, linguistically, and ability-diverse young children and their families in schools and diverse community settings. The program is designed to provide professionals with the specialized knowledge, skills, and dispositions needed to meet the developmental and educational needs of young children in preschool to grade 3.

Course Work

- EDUT 511 - Developmental Pathways of Diverse Learners, Birth-Adolescence Credits: 3
- EDUT 513 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDUT 514 - Curriculum and Instruction for Diverse Learners, Ages 3-5 Credits: 3
- EDUT 612 - Assessment of Diverse Young Learners Credits: 3
- EDUT 613 - Language and Literacy Assessment and Instruction for Diverse Young Learners Credits: 3
- EDUT 614 - Curriculum Across the Content Areas for Diverse Learners, K-3 Credits: 3
- EDUT 615 - Mathematics and Science for Diverse Young Learners Credits: 3
- EDUT 781 - Frameworks for Unified, Transformative Early Care and Education Credits: 3
- EDUT 782 - Policy Perspectives Affecting Diverse Young Learners and Their Families Credits: 3
- EDUT 790 - Internship with Diverse Learners Credits: 3
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Portfolio Requirement
A professional portfolio is required. The portfolio reflects the student's professional development throughout the program and contains examples of performance assessments associated with standards.

Total: 32 credits

▲Concentration in Elementary Education (ELED)

The 39-credit Elementary Education concentration and initial licensure component provides professionals with the specialized knowledge, skills, and dispositions needed to meet the educational needs of students attending today's elementary schools. Specific content and endorsement courses are required. Two programs (one-or two-semester internships) provide flexibility for all students. The two-semester internship program begins each fall semester; the one-semester internship program begins each summer semester.

All students are required to submit and successfully complete a series of performance-based assessments. These assessments include content knowledge, pedagogical skills, and dispositions.

Grading Policy: Students enrolled in this degree program must earn a B or higher in all course work.

Course Work

- EDCI 544 - Curriculum and Methods of Teaching in Elementary Education Credits: 3
- EDCI 545 - Assessment and Differentiation Credits: 3
- EDCI 546 - Integrating Technology in Elementary Classrooms: Literacy Credits: 1
- EDCI 547 - Integrating Technology in Elementary Classrooms: Mathematics Credits: 1
- EDCI 548 - Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts Credits: 1
- EDCI 552 - Mathematics Methods for the Elementary Classroom Credits: 1-3 (Must register for 3 credits)
- EDCI 553 - Science Methods for the Elementary Classroom Credits: 1-3 (Must register for 3 credits)
- EDCI 554 - Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom Credits: 3
- EDCI 555 - Literacy Teaching and Learning in Diverse Elementary Classrooms I Credits: 3
- EDCI 556 - Literacy Teaching and Learning in Diverse Elementary Classrooms II Credits: 1-3 (Must register for 3 credits)
- EDCI 559 - Research and Assessment in Elementary Education Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Year-long internship: students must register for 3 credits in the fall and 3 credits in the spring. Semester internship: students must register for 6 credits)
- EDUC 542 - Foundations of Education Credits: 3
- EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds Credits: 3

Total: 39 credits

▲Concentration in English as a Second Language (PK-12)(CISL)

This 39-credit ESL/ESOL PK-12 concentration provides initial state teacher licensure (endorsement) for candidates wanting to teach in Virginia public schools, grades PK to 12. This program provides teachers with the specialized knowledge, skills, and
professional dispositions required to pass an oral and written proficiency assessment in English to meet state licensing require-ments and national professional standards. This program has a licensure component of 30 credits and requires an additional 9 credits for completion of the MEd in Curriculum and Instruction.

**Prerequisites for admission:** Six credits of a modern foreign language (graduate or undergraduate, do not count toward the MEd).

**Field experience:** Field experiences involving observations and analyses in public schools are required throughout the program; a maximum of 15 clock hours per course or 30 clock hours per term. Arrangements can be made with each course instructor.

**Grading Policy:** Students enrolled in this degree program must earn a B or higher in all licensure course work.

**Course Work**

**Licensure Requirements (30 credits)**

- EDCI 510 - Linguistics for PreK-12 ESOL Teachers Credits: 3
- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
- EDCI 520 - Assessment of Language Learners Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
- EDRD 525 - Emergent Literacy for English Language Learners, PK-12 Credits: 3
- EDRD 610 - Content Literacy for English Language Learners, PK-12 Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3

**Note:**

For licensed teachers only, the add-on endorsement in ESL PK-12 requires completion of all licensure course work with the exception of EDCI 790.

**Prerequisites**

All licensure course work listed above

**MEd Requirements (9 credits)**

- EDCI 521 - Curriculum Development for Language Learners Credits: 3
- EDCI 777 - Research to Practice Credits: 3
- EDRS 590 - Education Research Credits: 3
  or
  3-credit elective course (approved by advisor)

**Total: 39 credits**
Internship Options

A six-credit, 15-week daytime internship, EDCI 790, is required for completion of the state-approved licensure program. Both elementary and middle school or secondary school placements are required. Two options are available to meet the needs of most individuals:

- **Placement internship:** One semester, daytime internship in the classroom of a cooperating teacher. Intern assumes co-teaching and independent teaching responsibilities.
- **On-the-job internship:** Available only to students who are employed as full-time, provisionally licensed teachers and are teaching ESL/ESOL in an accredited school. In addition to a fall or spring experience, this option includes a summer or other appropriate experience.

In lieu of an internship, provisionally licensed teachers may use their full-time teaching to satisfy the internship requirements; however, the 39-credit master's degree requires that candidates substitute six credits in approved course work for the internship.

▲ Concentration in Foreign Language: Arabic (EARB)

This 39-credit Foreign Language: Arabic concentration with an initial licensure component prepares professionals with the knowledge, skills, and professional dispositions needed to teach Arabic to students in grades PK-12. The program has a licensure component of 27 credits and requires an additional 12 credits for completion of the MEd.

**Grading Policy:** Students enrolled in this degree program must earn a B or higher in all licensure course work.

Course Work

Licensure Requirements (27 credits)

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 520 - Assessment of Language Learners Credits: 3
- EDCI 560 - Methods of Teaching in Foreign/World Languages Credits: 3
- EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits in the Arabic-specific section)
- EDRD 620 - Reading/Writing in Foreign/World Languages Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3
- EDUC 539 - Human Development and Learning PK-12 Credits: 3

Prerequisites

All licensure course work listed above

MEd Requirements (12 credits)

- EDCI 521 - Curriculum Development for Language Learners Credits: 3
- EDCI 777 - Research to Practice Credits: 3
- EDRS 590 - Education Research Credits: 3
• EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)

Total: 39 credits

Internship Options

A six-credit, 15-week daytime internship, EDCI 790, is required for completion of the state-approved licensure program. Both elementary and middle school or secondary school placements are required. Two options are available to meet the needs of most individuals:

• Placement Internship: One semester, daytime internship in the classroom of a cooperating teacher. Intern assumes co-teaching and independent teaching responsibilities.
• On-the-job Internship: Available only to students who are employed as full-time, provisionally licensed teachers and are teaching in their endorsement area in an accredited school. In addition to a fall or spring experience, this option includes a summer or other appropriate experience.

In lieu of an internship, provisionally licensed teachers may use their full-time teaching to satisfy the internship requirements; however, the 39-credit master's degree requires that candidates substitute six credits in approved course work for the internship.

▲Concentration in Foreign Language: Chinese (ECHN)

This 39-credit Foreign Language: Chinese concentration with an initial licensure component prepares professionals with the knowledge, skills, and professional dispositions needed to teach Chinese to students in grades PK-12. The program has a licensure component of 27 credits and requires an additional 12 credits for completion of the MEd.

Grading Policy: Students enrolled in this degree program must earn a B or higher in all licensure course work.

Course Work

Licensure Requirements (27 credits)

• EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
• EDCI 520 - Assessment of Language Learners Credits: 3
• EDCI 560 - Methods of Teaching in Foreign/World Languages Credits: 3
• EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools Credits: 3
• EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits in the Chinese-specific section)
• EDRD 620 - Reading/Writing in Foreign/World Languages Credits: 3
• EDUC 537 - Foundations of Multicultural Education Credits: 3
• EDUC 539 - Human Development and Learning PK-12 Credits: 3

Prerequisites

All licensure course work listed above
MEd Requirements (12 credits)

- EDCI 521 - Curriculum Development for Language Learners Credits: 3
- EDCI 777 - Research to Practice Credits: 3
- EDRS 590 - Education Research Credits: 3
- EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)

Total: 39 credits

Internship Options

A six-credit, 15-week daytime internship, EDCI 790, is required for completion of the state-approved licensure program. Both elementary and middle school or secondary school placements are required. Two options are available to meet the needs of most individuals:

- **Placement Internship:** One semester, daytime internship in the classroom of a cooperating teacher. Intern assumes co-teaching and independent teaching responsibilities.
- **On-the-job Internship:** Available only to students who are employed as full-time, provisionally licensed teachers and are teaching in their endorsement area in an accredited school. In addition to a fall or spring experience, this option includes a summer or other appropriate experience.

In lieu of an internship, provisionally licensured teachers may use their full-time teaching to satisfy the internship requirements; however, the 39-credit master's degree requires that candidates substitute six credits in approved course work for the internship.

▲ Concentration in Foreign Language: French (EFRN)

This 39-credit Foreign Language:French concentration with an initial licensure component prepares professionals with the knowledge, skills, and professional dispositions needed to teach French to students in grades PK-12. The program has a licensure component of 27 credits and requires an additional 12 credits for completion of the MEd.

**Grading Policy:** Students enrolled in this degree program must earn a B or higher in all licensure course work.

**Instructional Technology**

Four concentrations with an instructional technology focus provide professionals the specialized knowledge and skills needed to apply a wide range of computer and telecommunications technologies in achieving educational goals within school, community, and corporate or public settings. The concentrations combine current theoretical foundations or technology development and integration with practical, hands-on experiences in using state-of-practice and state-of-the-art technologies. These concentrations serve the various needs and interests of specific types of instructional technology clients: instructional design and development, integration of technology in schools, technology innovations in education, and assistive and special education technology.

▲**Concentration in Assistive and Special Education Technology (IASP)**

**Course Work**

- EDSE 510 - Introduction to Assistive Technology Credits: 3
  or

Total: 36 credits

▲Concentration in International Education FAST TRAIN ESOL (PK-12)
(FTSL)

This 30-credit concentration is specifically designed for teachers and educators who are working abroad or plan on teaching overseas, or individuals living outside the Washington, DC area who want a license and master's degree in ESOL. This program has a licensure component of 21 credits and requires an additional 9 credits for completion of the MEd. Course work includes integrated fieldwork in schools and all requirements for a Virginia ESOL license PK-12. The convenient schedule enables participants to complete the program through on-campus study during two summers and on-line study during the academic year. On successful completion of course work and passing scores on the required exams, participants are eligible to receive a statement of eligibility from the state. After completing an internship requirement overseas (either one term of student teaching or one year of full-time teaching), candidates are eligible to apply for the ESOL PK-12 Virginia license.

Grading Policy: Students enrolled in this degree program must earn a B or higher in all course work.

Course Work

Licensure Requirements (24 credits)

• EDCI 510 - Linguistics for PreK-12 ESOL Teachers Credits: 3
• EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
• EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
• EDCI 790 - Internship in Education Credits: 1-6 Optional (Must register for 6 credits)
• EDCI 520 - Assessment of Language Learners Credits: 3
• EDRD 615 - Reading/Writing for Multilingual Students Credits: 3
• EDUC 511 - Introduction to Education in International Schools Credits: 3
• EDUC 537 - Foundations of Multicultural Education Credits: 3
• EDRD 558 - Literacy in the Content Areas, PK-12 Credits: 3

MEd Requirements (6 credits)

• EDCI 521 - Curriculum Development for Language Learners Credits: 3
• EDCI 777 - Research to Practice Credits: 3
Note:

All course work and tests must be finished prior to the internship. Some course work requires field experience.

Total: 30 credits

▲Concentration in International Education FAST TRAIN (Elementary) PK-6 (FTEL)

This 30-credit hour concentration is an alternative teacher licensure program that prepares educators for international teaching assignments. This program has an 18 credit licensure component and requires an additional 12 credits for completion of the MEd. The course work may be completed in the part-time evening program or during the summer five week intensive program. All course work requires 20 hours of integrated fieldwork observation and practice. On successful completion of course work and passing scores on the required exams, participants are eligible to receive a state of eligibility from the state. After completing an internship requirement overseas (either one term of student teaching or one year full-time teaching), candidates are eligible to apply for the elementary PK-6 Virginia license.

Grading Policy: Students enrolled in this degree program must earn a B or higher in all course work.

Course Work

Licensure Requirements (18 credits)

- EDUC 511 - Introduction to Education in International Schools Credits: 3
- EDUC 512 - Teaching Elementary Social Studies in International Schools Credits: 3
- EDUC 513 - Teaching Elementary Math in International Schools Credits: 3
- EDUC 514 - Teaching Elementary Science in International Schools Credits: 3
- EDUC 516 - Language Across the Elementary International School Curriculum Credits: 3
- EDUC 520 - Elementary Curriculum, Instruction, and Assessment in International Schools Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 Optional (Must register for 6 credits)

MEd Requirements (12 credits)

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3

Note:

All course work and tests must be finished prior to the internship. Some course work requires field experience.
ESOL Endorsement Requirements for Licensed (In-Service) Teachers

The FAST TRAIN English for Students of Other Languages (ESOL) Licensure Program (PK-12) is specifically designed for prospective teachers and educators who are working abroad or who plan on going overseas to teach and want a license in ESOL.

- EDCI 510 - Linguistics for PreK-12 ESOL Teachers Credits: 3
- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
- EDCI 520 - Assessment of Language Learners Credits: 3
- EDRD 615 - Reading/Writing for Multilingual Students Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3

▲Concentration in Multilingual and Multicultural Education (CIMM)

This 30-credit concentration prepares professionals to work with diverse population of individuals. It provides courses for licensed teachers and the required courses for an add-on endorsement in English as a second language (ESL) PK-12, also known as English for speakers of other languages (ESOL). The program is appropriate for individuals who are not licensed and wish to complete a master's degree. Six credits of a foreign language (undergraduate or graduate level) are required but do not count toward the master's degree.

Course Work

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
- EDCI 520 - Assessment of Language Learners Credits: 3
- EDCI 521 - Curriculum Development for Language Learners Credits: 3
- EDCI 777 - Research to Practice Credits: 3
- EDRD 525 - Emergent Literacy for English Language Learners, PK-12 Credits: 3
- EDRD 610 - Content Literacy for English Language Learners, PK-12 Credits: 3
- EDRS 590 - Education Research Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3
- LING 520 - Descriptive Linguistics Credits: 3
  or
  Choose three credits with advisor approval

Total: 30 credits

Secondary Education (6–12)

The seven 33-credit secondary education concentrations with a licensure component are designed to meet the needs of individuals who wish to be licensed or need to satisfy the requirements of a provisional license to teach at the secondary level. Specific endorsement areas are Biology, Chemistry, Earth Science, English, History and Social Science, Mathematics, and Physics.
The Career Switcher Program is an alternative licensure route that prepares experienced professionals for licensure as secondary school teachers with endorsements in Biology, Chemistry, Earth Science, English, History and Social Science, Mathematics, and Physics. Successful applicants must have at least five years of work experience and passing scores on the Praxis I and II, and VCLA exams. In addition, they must have completed all required endorsement courses. The program consists of six months of course work and fieldwork, followed by a closely mentored year of full-time paid classroom teaching.

Grading Policy: Students enrolled in this degree program must earn a B or higher in all course work.

Field Experience

Field experiences in public schools will be required throughout the program (a maximum of 15 clock hours per course or 30 clock hours per term). Arrangements will be made at the beginning of each term.

▲ Concentration in Secondary Education Biology (SECB)

Course Work

Licensure Requirements (21 credits)

Licensure Requirements (21 credits)

- EDCI 573 - Teaching Science in the Secondary School Credits: 3
- EDCI 673 - Advanced Methods of Teaching Science in the Secondary School Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
- EDRD 619 - Literacy in Content Areas Credits: 3
- EDUC 522 - Foundations of Secondary Education Credits: 3
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3

MEd Requirements (12 credits)
- EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom Credits: 3
- EDUC 675 - Research in Secondary Education Credits: 3

Electives

- Earth Science elective (chosen with advisor’s approval) (3 credits)
- Education elective (chosen with advisor’s approval) (3 credits)

Total: 33 credits

▲ Concentration in Secondary Education English (SECE)

Course Work

Licensure Requirements (21 credits)

- EDCI 569 - Teaching English in the Secondary School Credits: 3
- EDCI 669 - Advanced Methods of Teaching English in the Secondary School Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
- EDRD 619 - Literacy in Content Areas Credits: 3
- EDUC 522 - Foundations of Secondary Education Credits: 3
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3

MEd Requirements (12 credits)

- EDCI 570 - Teaching Young Adult Literacy in a Multicultural Setting Credits: 3
- EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom Credits: 3
- EDUC 675 - Research in Secondary Education Credits: 3

Electives

- Education elective, chosen with advisor’s approval (3 credits)

Total: 33 credits

▲ Concentration in Secondary Education History and Social Studies (SECH)
Course Work

Licensure Requirements (21 credits)

- EDCI 567 - Teaching Social Studies in the Secondary School Credits: 3
- EDCI 667 - Advanced Methods of Teaching Social Sciences in the Secondary School Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
- EDRD 619 - Literacy in Content Areas Credits: 3
- EDUC 522 - Foundations of Secondary Education Credits: 3
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3

MEd Requirements (12 credits)

- EDUC 671 - Schools and Culture Credits: 3
- EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom Credits: 3
- EDUC 675 - Research in Secondary Education Credits: 3

Electives

- History and Social Studies content elective, chosen with advisor's approval (3 credits)

Total: 33 credits

▲ Concentration in Secondary Education Mathematics (SECM)

Course Work

Licensure Requirements (21 credits)

- EDCI 572 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School Credits: 3
- EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
- EDRD 619 - Literacy in Content Areas Credits: 3
- EDUC 522 - Foundations of Secondary Education Credits: 3
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3

MEd Requirements (12 credits)
• EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom Credits: 3
• EDUC 675 - Research in Secondary Education Credits: 3

Electives

• Mathematics content elective, chosen with advisor’s approval (3 credits)
• Education elective, chosen with advisor’s approval (3 credit)

Total: 33 credits

▲ Concentration in Secondary Education Physics (SECP)

Course Work

Licensure Requirements (21 credits)

• EDCI 573 - Teaching Science in the Secondary School Credits: 3
• EDCI 673 - Advanced Methods of Teaching Science in the Secondary School Credits: 3
• EDCI 790 - Internship in Education Credits: 1-6 (Must register for 6 credits)
• EDRD 619 - Literacy in Content Areas Credits: 3
• EDUC 522 - Foundations of Secondary Education Credits: 3
• EDUC 672 - Human Development and Learning: Secondary Education Credits: 3

MEd Requirements (12 credits)

• EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom Credits: 3
• EDUC 675 - Research in Secondary Education Credits: 3

Electives

• Physics content elective, chosen with advisor’s approval (3 credits)
• Education elective, chosen with advisor’s approval (3 credits)

Internship Options

A 6-credit 15-week daytime internship (EDCI 790) is required for completion of the state-approved licensure program. Three options are available to meet the needs of most individuals:

• Professional Development School (PDS) internship: A one-term daytime internship as a PDS intern in a school identified by secondary faculty members
- **Student teaching internship**: A one-term daytime internship in the classroom of a cooperating teacher. Intern assumes co-teaching and independent teaching responsibilities.

- **On-the-job internship**: Available only to students who are employed as full-time provisionally licensed teachers and teaching in their endorsement area in an accredited middle or secondary school and want to complete a master’s degree. In lieu of an internship, provisionally licensed teachers may choose to use their full-time teaching to satisfy the experience requirement for a full license; however, the 33-credit master’s degree requires that 6 credits of approved course work be substituted for the internship.

**Total: 33 credits**

**Education Leadership, MEd**

**Banner Code: E1-MED-EDLE**

This 30-credit master’s degree (24-credit licensure component and 6 additional credits) prepares candidates for leadership and management positions in a variety of educational settings. The program emphasizes an understanding of the complexities of change in schools, communities, and organizations. Participants are expected to develop and demonstrate the knowledge, skills, and dispositions necessary to create and maintain learning environments that value diversity, continual knowledge acquisition, instructional leadership, innovative and ethical decision making, reflective practice, and successful achievement of all school-aged youth.

Participants who are admitted into the MEd in Education Leadership program who already have a master's degree and three years of teaching experience may complete only the licensure course work (24-credits) for the administration and supervision PK-12 license.

Students may also complete the MEd in Education Leadership with a concentration in one of the following: Mathematics Education Leadership (K-8), Mathematics Specialist Leader (K-8), Science Education Leadership (PK-12), or Special Education Leadership.

**Course Work**

**Licensure Requirements (24 credits)**

- EDLE 610 - Leading Schools and Communities Credits: 3
- EDLE 612 - Education Law Credits: 3
- EDLE 614 - Managing Financial and Human Resources Credits: 3
- EDLE 616 - Curriculum Development and Evaluation Credits: 3
- EDLE 618 - Supervision and Evaluation of Instruction Credits: 3
- EDLE 620 - Organizational Theory and Leadership Credits: 3
- EDLE 690 - Using Research to Lead School Improvement Credits: 3
- EDLE 791 - Internship in Educational Leadership Credits: 3

**Internship**
The internship is integral to the Education Leadership degree and provides an opportunity to synthesize and apply the knowledge and practice the skills identified in the Educational Leadership Constituency Consortium Standards through substantial, sustained work in educational settings.

Prerequisites

All licensure course work listed above

MEd Requirements (6 credits)

- EDLE 634 - Contemporary Issues in Education Leadership Credits: 3
- EDLE 636 - Adult Motivation and Conflict Management in Education Settings: A Case Study Approach Credits: 3

Total: 30 credits

▲Concentration in Mathematics Education Leadership (K-8) (EDML)

This 33-credit concentration in Mathematics Education Leadership (K-8) prepares individuals for master teacher, lead teacher, or school-wide leadership positions in elementary or middle school mathematics. Course work included study or experiences in educational leadership, mathematics teaching and learning, instructional technology, and curriculum development. Program participants study and use research that has significant positive effects on professional development and teaching and learning mathematics. Program experiences prepare students to select, develop, and implement school-based curricula and teaching and learning materials, as well as in-service and professional development programs for teachers. The internship in an individual experience designed and developed in consultation with a faculty advisor or mentor.

Course Work

- EDCI 644 - Mathematics Learning and Assessment (K-8) Credits: 3
- EDCI 645 - Curriculum Development in Mathematics Education Credits: 3
- EDCI 646 - Mathematics Education Leadership for School Change Credits: 1-3 (Must register for 3 credits)
- EDCI 663 - Research in Science Teaching Credits: 3
- EDCI 666 - Research in Mathematics Teaching Credits: 3
- EDCI 705 - Instructional Design Credits: 3
- EDIT 704 - Instructional Technology Foundations and Theories of Learning Credits: 3
- EDLE 618 - Supervision and Evaluation of Instruction Credits: 3
- EDLE 791 - Internship in Educational Leadership Credits: 3

Electives

- Mathematics Elective (3 credits)
- Technology Elective (3 credits)

Total: 33 credits
▲ Concentration in Mathematics Specialist Leader (K–8) (MSLR)

This 33-credit Mathematics Specialist Leader (K-8) concentration is designed for working professionals. Students study mathematics content and pedagogy, teaching, curriculum and professional development. They also explore school-based leadership issues in mathematics education. The internship is an individual experience designed and developed in consultation with a faculty advisor or mentor. This program includes all course work required for Virginia state licensure as a K-8 mathematics specialist. Students who apply for this licensure must have three years of successful teaching experience in addition to the MEd degree.

Course Work

- EDCI 645 - Curriculum Development in Mathematics Education Credits: 3
- EDCI 646 - Mathematics Education Leadership for School Change Credits: 1-3 (Must register for 3 credits)
- EDCI 666 - Research in Mathematics Teaching Credits: 3
- EDLE 616 - Curriculum Development and Evaluation Credits: 3
- EDLE 618 - Supervision and Evaluation of Instruction Credits: 3
- EDLE 791 - Internship in Educational Leadership Credits: 3

Complete five separate 3-credit Math 600 special topics courses as noted below:

- MATH 600 - Special Topics in Mathematics Credits: 1-6
  Number Systems and Number Theory for K-8 Teachers Credits: 3
  Geometry and Measurement for K-8 Teachers Credits: 3
  Probability and Statistics for K-8 Teachers Credits: 3
  Algebra and Functions for K-8 Teachers Credits: 3
  Rational Numbers and Proportional Reasoning for K-8 Teachers Credits: 3

Total: 33 credits

▲ Concentration in Science Education Leadership (PK-12) (EDSL)

This 30-credit concentration in Science Education Leadership (PK-12) focuses on education leadership and science teaching and learning. Study study the changing nature of science, science teaching, assessment, curriculum, technology, safety, and meeting the diverse needs of learners. Students also develop skills in science teaching and learning, data-driven making, systematic and continual improvement, and leading dynamic organizations. Internship experiences include working with a practicing scientist in a research setting and interacting with school leaders at the state and local levels who directly and indirectly influence science education. This program includes all course work required for Virginia licensure and supervision (PK-12). Students who apply for this licensure must have three years of successful teaching experience in addition to the MEd degree.

Course Work

- EDCI 663 - Research in Science Teaching Credits: 3
- EDCI 666 - Research in Mathematics Teaching Credits: 3
- EDCI 683 - Curriculum Development and Evaluation in Science Education Credits: 3
- EDCI 693 - Leadership and Organizational Issues in Science Education Credits: 3
Total: 30 credits

▲Concentration in Special Education Leadership (SELE)

This 30-credit Special Education Leadership concentration (24-credit licensure component and 6 additional credits) is designed to provide training for educators who administer program implementation efforts for learners with exceptional needs. It is appropriate for those who have an interest in becoming special education directors, program coordinators, school building administrators, department chairs, or lead teachers; however, opportunities beyond special education also exist.

Participants who are admitted into the MEd in Education Leadership program who already have a master’s degree and three years of teaching experience may complete only the licensure course work (24-credits) for the administration and supervision PK-12 license.

Licensure Requirements (24 credits)

- EDLE 610 - Leading Schools and Communities Credits: 3
- EDLE 612 - Education Law Credits: 3
- EDLE 618 - Supervision and Evaluation of Instruction Credits: 3
- EDLE 791 - Internship in Educational Leadership Credits: 3
- EDSE 626 - The Inclusive Classroom Credits: 3
- EDLE 690 - Using Research to Lead School Improvement Credits: 3
- EDSE 702 - Managing Resources for Special Education Programs Credits: 3
- EDSE 743 - Leadership in Special Education Administration Credits: 3

MEd Requirements (6 credits)

- EDSE 701 - Legal Issues and Special Populations Credits: 3
  or
- EDSE 703 - Creating a Collaborative Culture Credits: 3
- EDSE 744 - Current Issues in Special Education Credits: 3

Total: 30 credits
Educational Psychology, MS

Banner Code: E1-MS-EDP

This 30-credit master’s program is designed to offer professionals and students the opportunity to apply principles of learning, cognition, and motivation to vital problems in the area of education; develop a solid understanding of research, assessment, and evaluation methodologies; and develop an analytical and scholarly approach to critically assessing theoretical perspectives, research, and practice within and across content domains. By participating in a supportive and collegial environment with faculty from numerous educational disciplines and expertise, students are expected to develop the skills to meet the needs of diverse populations and design and implement effective educational programs appropriate for a broad range of cultural contexts.

▲ Concentration in Assessment, Evaluation, and Testing (EDPA)

Course Work

- EDRS 630 - Educational Assessment Credits: 3
- EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)
  or
- EDUC 599 - Thesis Credits: 1-6 (Must register for 3 credits)

Choose two courses from the following:
- EDEP 650 - High-Stakes Assessment and Accountability Systems Credits: 3
- EDEP 651 - Test Design and Interpretation Credits: 3
- EDRS 631 - Program Evaluation Credits: 3
- EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
  
  Focus on research methodology assessment, evaluation, and/or testing
- PSYC 541 - Survey Research Credits: 3
- PSYC 557 - Psychometric Methods Credits: 3

Educational Psychology Core (9 credits)

- EDEP 550 - Theories of Learning and Cognition Credits: 3
- EDEP 551 - Principles of Learner Motivation Credits: 3

Choose three credits from the following:
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
  
  Focus on human development
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3
- PSYC 666 - Cognitive and Perceptual Development Credits: 3

Research Methodology Core (9 credits)
• EDRS 531 - Educational and Psychological Measurement Credits: 3
• EDRS 620 - Quantitative Inquiry in Education Credits: 3
• EDRS 621 - Qualitative Inquiry in Education Credits: 3

Total: 30 credits

▲Concentration in Learning, Cognition, and Motivation (EDPL)

Course Work

• EDEP 652 - Process of Learning and Development Credits: 3
• EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)
or
• EDUC 599 - Thesis Credits: 1-6 (Must register for 3 credits)

Choose two courses from the following:
• EDEP 653 - Culture and Intelligence Credits: 3
• EDEP 654 - Learning, Motivation, and Self-Regulation Credits: 3
• EDSE 667 - Cognitive Development of Diverse Young Children Credits: 3
• EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)

Focus on learning, cognition, or motivation

Educational Psychology Core (9 credits)

• EDEP 550 - Theories of Learning and Cognition Credits: 3
• EDEP 551 - Principles of Learner Motivation Credits: 3

Choose three credits from the following:
• EDUC 539 - Human Development and Learning PK-12 Credits: 3
• EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)

Focus on human development
• EDUC 672 - Human Development and Learning: Secondary Education Credits: 3
• PSYC 666 - Cognitive and Perceptual Development Credits: 3

Research Methodology Core (9 credits)

• EDRS 531 - Educational and Psychological Measurement Credits: 3
• EDRS 620 - Quantitative Inquiry in Education Credits: 3
• EDRS 621 - Qualitative Inquiry in Education Credits: 3

Total: 30 credits
Concentration in Teacher Preparation (EDPT)

Students pursuing the MS in Educational Psychology with a concentration in Teacher Preparation must be admitted into one of the following teacher licensure certificate programs prior to completion of MS course work: English as a Second Language, Secondary Education, Students with Disabilities who Access the General Curriculum, Students with Disabilities who Access the Adapted Curriculum, or Visual Impairments. Students apply 3 courses (9 credits) from within one of the above mentioned teacher licensure certificate programs toward their MS degree in Educational Psychology with the expectation that they will complete the teacher certification program.

Course Work

- EDUC 598 - Directed Reading, Research, and Individual Projects Credits: 1-6 (Must register for 3 credits)
  or
- EDUC 599 - Thesis Credits: 1-6 (Must register for 3 credits)

Educational Psychology Core (9 credits)

- EDEP 550 - Theories of Learning and Cognition Credits: 3
- EDEP 551 - Principles of Learner Motivation Credits: 3

Choose three credits from the following:
- EDUC 539 - Human Development and Learning PK-12 Credits: 3
- EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
  Focus on human development
- EDUC 672 - Human Development and Learning: Secondary Education Credits: 3
- PSYC 666 - Cognitive and Perceptual Development Credits: 3

Research Methodology Core (9 credits)

- EDRS 531 - Educational and Psychological Measurement Credits: 3
- EDRS 620 - Quantitative Inquiry in Education Credits: 3
- EDRS 621 - Qualitative Inquiry in Education Credits: 3

Total: 30 credits

New Professional Studies, MA

Banner Code: E1-MA-NPST

This 30-credit hour master's degree engages teachers to improve their approach to a wide range of issues connected to the craft of teaching and learning for Pre-K-12 children. Graduate course work is linked to school-based issues for teachers. Class days are
designed to complement a teacher's schedule during the summer and school year. Specific information is available from the Initiatives in Educational Transformation (IET) web site, gse.gmu.edu/iet, or calling 703-993-8320.

▲ Concentration in Teaching (PSTT)

Course Work

- EDUC 597 - Special Topics in Education Credits: 1-6 (Must register for 3 credits)
- IETT 750 - Studies in Language and Culture I Credits: 3
- IETT 751 - Studies in Language and Culture II Credits: 3
- IETT 752 - Research in Practice: The Team Project Credits: 6
- IETT 753 - Teaching and Learning Credits: 3
- MNPE 700 - The New Professionalism: Theory and Practice Credits: 3
- MNPE 702 - The New Professional as a Reflective Practitioner Credits: 3
- MNPE 703 - Technology and Learning in the New Professions Credits: 3
- MNPE 704 - Research Methodologies in the New Professionalism Credits: 3

Special Education, MEd

Banner Code: E1-MED-EDSE

This 30-credit program leads to a master's degree for professionals who already hold a special education teacher license or are interested in working in a special education context outside the classroom. Students may also earn a master's degree by completing initial licensure course work in conjunction with master's degree core courses.

Students who wish to focus their program on a specific area in the field are advised to consider completing a licensure or non-licensure certificate program in conjunction with the MEd. Students may use their certificate coursework to fulfill the elective credits for the MEd degree program.

Course Work

MEd Requirements (17 credits)

- EDSE 501 - Introduction to Special Education Credits: 3
- EDSE 503 - Language Development and Reading Credits: 3
  or
- EDSE 557 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 517 - Computer Applications for Special Populations Credits: 3
- EDSE 590 - Special Education Research Credits: 3
- EDSE 662 - Consultation and Collaboration Credits: 3
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1
Note:

EDSE 782 - *Comprehensive Topics in Special Education: Trends and Issues* may be substituted for EDSE 791 and EDSE 792 for students seeking the MEd in Special Education without licensure. Students seeking licensure in conjunction with the MEd in Special Education must complete EDSE 791 and EDSE 792.

Electives (13 credits)

- Choose 13 credits from graduate EDSE-prefix courses

Total: 30 credits

▲ Concentration in Early Childhood Special Education (Non-licensure) (SPEC)

This 30-credit concentration is for professionals who already hold an early childhood special education teacher license or are interested in working in an early childhood special education context outside the classroom.

Course Work (17 credits)

- EDSE 505 - Introduction to Early Childhood Special Education Credits: 3
- EDSE 557 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 517 - Computer Applications for Special Populations Credits: 3
- EDSE 590 - Special Education Research Credits: 3
- EDSE 665 - Families of Children with Special Needs Credits: 3
- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Note:

A professional portfolio is required. The portfolio reflects the student's professional development throughout the program and contains examples of performance assessments associated with standards.

Electives (13 credits)

- Choose 13 credits from graduate EDSE- or EDUT-prefix courses

Total: 30 credits
Master's Level Certificate

Applied Behavior Analysis Graduate Certificate

Banner Code: E1-CERG-ABAC

This 15-credit non-licensure certificate is designed to increase the professional training of individuals responsible for designing, implementing, and monitoring behavioral treatment programs in schools, agencies (such as psychiatric hospitals), and training centers for people with severe disabilities.

Course Work

- EDSE 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy Credits: 3
- EDSE 621 - Applied Behavior Analysis: Empirical Bases Credits: 3
- EDSE 623 - Applied Behavior Analysis: Assessments and Interventions Credits: 3
- EDSE 624 - Applied Behavior Analysis: Applications Credits: 3
- EDSE 625 - Applied Behavior Analysis: Verbal Behavior Credits: 3

Note

EDSE 790 - Internship in Special Education may be taken to meet the Behavior Analysis Certification Board (BACB) supervised practicum requirements.

Total: 15 credits

Assistive Technology Graduate Certificate

Banner Code: E1-CERG-IAST

This 15-credit certificate provides supplemental training for practitioners, families, and caregivers who use assistive technology while working with people with disabilities. The certificate is appropriate for general and special educators, related service personnel, adult service providers, and families and caregivers who need to apply assistive technology solutions within their specific discipline or school, work, home, or community setting.

Course Work

- EDSE 510 - Introduction to Assistive Technology Credits: 3
  or
- EDIT 510 - Introduction to Assistive Technology Credits: 3
- EDSE 610 - Designing Adaptive Environments Credits: 2
Electives

Choose 10 credits from the following:

- EDIT 522 - Assistive Technology for Individuals with Sensory Impairments Credits: 2-3
- EDIT 523 - Accessibility/Input Modification Credits: 1-3
  or
- EDSE 523 - Accessibility/Input Modification Credits: 1-3
- EDIT 524 - Assistive Technology for Individuals with Learning Disabilities Credits: 2
  or
- EDSE 524 - Assistive Technology for Individuals with Learning Disabilities Credits: 2
- EDIT 525 - Software for Individuals with Special Needs Credits: 1-2
  or
- EDSE 525 - Software for Individuals with Special Needs Credits: 1-2
- EDIT 526 - Web Accessibility and Design Credits: 3
  or
- EDSE 526 - Web Accessibility and Design Credits: 3
- EDIT 529 - Internet as an Assistive Technology Tool Credits: 2
  or
- EDSE 529 - Internet as an Assistive Technology Tool Credits: 2
- EDIT 797 - Advanced Topics in Education Credits: 1-6
- EDSE 527 - Adapted Sports, Recreation, and Leisure Credits: 1
- EDSE 528 - Low-Tech Assistive Technology Solutions Credits: 1
- EDSE 534 - Communication and Severe Disabilities Credits: 3
- EDSE 622 - Augmentative Communication Credits: 2
- EDUC 600 - Workshop in Education Credits: 1-6

Assistive Technology elective courses are offered for variable credit each semester. Select 10 credits to meet the elective requirement.

Total: 15 credits

ASTL: Alternative Education Graduate Certificate

Banner Code: E1-CERG-AALT

This 18-credit certificate is designed for professionals who are interested in or are working in alternative education settings. It offers the knowledge and skills necessary to work effectively with at-risk students, their families, and involved agencies.

Course Work

- EDAE 600 - Alternative Education for At-Risk Youth Credits: 1
- EDAE 601 - Curriculum and Methods in Alternative Education Credits: 3
- EDAE 602 - Preparing Students for Employment and Living Independently Credits: 2
- EDSE 551 - Classroom Management: Theory and Practice Credits: 3
- EDAE 603 - Communication and Management Strategies for Alternative Education Credits: 3
- EDAE 604 - Multidisciplinary and Interagency Collaboration Credits: 3

Electives
Choose 3 credits with advisor approval

Total: 15 credits

ASTL: Art Education Graduate Certificate

Banner Code: E1-CERG-AART

The 18-credit art education certificate is designed for art teachers with current licensure in art PK–12. It consists of six required courses that address contemporary professional development content areas in art education.

Course Work

- AVT 605 - Issues and Research in Art Education Credits: 3
- AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK–12 Credits: 3
- AVT 615 - Technology for Art Teachers Credits: 3
- AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts Credits: 2
- EDEP 601 - Creativity and Cognition in the Arts and Media Credits: 3

Studio Course

Choose one studio course from the following:

- AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 4
- AVT 668 - Three-Dimensional Art Making across Cultures Credits: 4
- AVT 669 - Four Dimensional Art Making: Technology and New Media Credits: 4

Note:
AVT 615 is considered a 3-credit studio course. Qualified students who test out of this course should choose two of the above four-credit studio courses.

Total: 18 credits
ASTL: Early Childhood Education Graduate Certificate

Banner Code: E1-CERG-AECE

This 18-credit certificate is designed for early childhood professionals who work in various roles with young children and their families. It focuses on the practice and study of early childhood education and is based on the early childhood generalist standards of the National Board for Professional Teaching Standards.

Course Work

- EDCI 603 - Trends, Issues, and Research in Early Childhood Education Credits: 3
- EDCI 615 - Advanced Human Development Credits: 3
- EDCI 784 - Capstone Seminar in Early Childhood Education Credits: 3

Electives

Choose nine credits from the following:

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 601 - Applied Study of Communicative Competence and Classroom Discourse Credits: 3
- EDCI 613 - Curriculum and Assessment in Early Childhood Education I Credits: 3
- EDCI 614 - Curriculum and Assessment in Early Childhood Education II Credits: 3
- EDCI 616 - The Creative Arts and Play in Early Childhood Education Credits: 3
- EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood Credits: 3
- EDSE 556 - Developing Language, Literacy, and Communication in Young Children Credits: 3
- EDSE 557 - Foundations of Language and Literacy for Diverse Learners Credits: 3
- EDSE 656 - Assessment of Diverse Young Learners Credits: 3
- EDSE 667 - Cognitive Development of Diverse Young Children Credits: 3

Total: 18 credits

ASTL: Foreign Language French Graduate Certificate

Banner Code: E1-CERG-AFLS

This 18-credit certificate is for practicing teachers who wish to deepen their expertise in French and augment their teacher development through course work in advanced pedagogy that is aligned with the propositions of the National Board for Professional Teaching Standards.

Course Work

Literature
Choose six credits from the following:

- FREN 515 - Medieval French Literature Credits: 3
- FREN 517 - Studies in Seventeenth-Century Literature Credits: 3
- FREN 518 - Studies in Eighteenth-Century Literature Credits: 3
- FREN 519 - Studies in Nineteenth-Century Literature Credits: 3
- FREN 525 - Studies in Modern French Literature Credits: 3
- FREN 550 - Special Topics Credits: 3

Note:

Courses may be substituted with advisor-approved literature-related electives in French.

Language and Linguistics

Choose six credits from the following:

- FREN 560 - History of the French Language Credits: 3
- FREN 575 - Grammatical Analysis Credits: 3
- FREN 576 - Advanced Translation Credits: 3

Note:

Courses may be substituted with advisor-approved language- and linguistics-related electives.

Electives

Choose six credits from the following:

- FREN 580 - Contemporary French Society and Culture Credits: 3
- FRLN 510 - Bibliography and Research in Foreign Languages and Literature Credits: 3
- FRLN 525 - Literary Translation Credits: 3
- FRLN 550 - Special Topics Credits: 3
- FRLN 565 - Theory of Translation Credits: 3
- FRLN 572 - Integrating Technology into Language Learning Credits: 3
- FRLN 573 - Basic Issues in Language Pedagogy Credits: 3
- FRLN 590 - Internship and Seminar in Translation Credits: 3
- FRLN 620 - Literary Theory and Criticism Credits: 3
- FRLN 660 - Approaches to the Study of Language Credits: 3
- FRLN 670 - Foreign Language Learning and Teaching Credits: 3

Note:

Courses may be substituted with advisor-approved language- and literature-related electives.
Total: 18 credits

ASTL: Foreign Language Spanish Graduate Certificate

Banner Code: E1-CERG-AFLS

This 18-credit certificate is for practicing teachers who wish to deepen their expertise in Spanish and augment their teacher development through course work in advanced pedagogy that is aligned with the propositions of the National Board for Professional Teaching Standards.

Course Work

- SPAN 502 - Hispanic Sociolinguistics Credits: 3

- EDSE 791 - Midpoint Portfolio Credits: 1
- EDSE 792 - Final Portfolio Credits: 1

Total: 32 credits

**Doctoral Degree**
Education, PhD

Banner Code:  E1-PHD-EDUC

The PhD in Education provides advanced professional education for experienced practitioners pursuing or planning careers in educational settings. The program requires 85–96 credits beyond the baccalaureate degree or a minimum of 55–66 credits beyond the master’s degree. A student’s individual credit requirement depends on goals, program requirements, and previous preparation. A limited number of graduate credits taken previously may be applied; however, a student’s total program typically requires 10 more credits than the minimum requirements.

With the guidance of faculty, students develop individual programs of study in concert with their goals, program requirements, and self-assessed skills and knowledge. Each student’s program must include study in a professional field, such as education administration, educational psychology, instructional technology, special education, curriculum, instruction, international education, bilingual education, counseling and development, early childhood education, or literacy. The specific nature of courses is determined by the student in conjunction with a faculty doctoral advising committee after completing two semesters. Students also complete a secondary emphasis of study consisting of 12 credits.

To complete the PhD program, each student must demonstrate competence in oral and written English, computer literacy, mastery of knowledge and skills in the area of professional expertise, and the ability to apply general and specific knowledge and skills to significant educational problems. Students demonstrate these competencies by successfully completing courses, seminars, and a doctoral portfolio, and preparing and orally defending a doctoral dissertation. Students have five years from the time they enroll in their first class to complete all course work and the doctoral portfolio. Five additional years, starting with the date on which students are advanced to candidacy, are allowed to complete the dissertation.

Admissions Requirements

Candidates are admitted to study by the College of Education and Human Development (CEHD); admission is highly selective. Applicants must fulfill the following admission requirements:

- A minimum of three years of successful experience as a practitioner in an educational setting
- Baccalaureate or master’s degree from an accredited institution
- Demonstrate high intellectual capability
- Demonstrate leadership potential
- Three letters of recommendation
- GRE general test scores and the writing assessment
- Written goals statement relating study in the PhD program to educational and career plans

For more information, call the PhD in Education Program Office at 703-993-2011.

Completed applications must be submitted to the CEHD Graduate Admissions Office by February 1 for summer or fall admission, or by September 1 for spring admission.

Course Work

General Culture (8 credits)

- EDUC 800 - Ways of Knowing Credits: 3
- EDUC 802 - Leadership Seminar Credits: 3
- EDUC 805 - Research and Scholarship in Education Credits: 2
Research Methods (12 credits)

- EDRS 810 - Problems and Methods in Education Research Credits: 3
- EDRS 811 - Quantitative Methods in Educational Research Credits: 3
- EDRS 812 - Qualitative Methods in Educational Research Credits: 3

Electives

Choose one course from the following:

- EDRS 820 - Evaluation Methods for Educational Programs and Curricula Credits: 3
- EDRS 821 - Advanced Applications of Quantitative Methods Credits: 3
- EDRS 822 - Advanced Applications of Qualitative Methods Credits: 3
- EDRS 823 - Advanced Research Methods in Single Subject/Case Design Credits: 3
- EDRS 825 - Advanced Research Methods in Self-Study Credits: 3

Professional Specialization (21 credits)

Students select course work (including three internship credits) based on their area of specialization. Professional specializations include: counseling and development, early childhood education, education leadership, educational psychology, higher education, international education, instructional technology, literacy and reading, mathematics or science education leadership, multilingual or multicultural education (English as a second language), research methodology, special education, and teaching and teacher education.

Note:

Students enroll in one to three internships designed to broaden their professional expertise. One internship must be taken in a setting that differs from the student’s work setting.

Secondary Emphasis (12 credits)

Students have a number of options for developing a secondary emphasis including course work offered within CEHD and/or other Mason units. Master's degree course work may also be used to fulfill secondary emphasis requirements.

Dissertation (12 credits)

- EDUC 998 - Doctoral Dissertation Proposal Credits: 1-3 (Must register for 3 credits the first semester enrolled in EDUC 998. Students preparing their proposal must register for 1 credit each semester thereafter until the proposal has been successfully defended)
- EDUC 999 - Doctoral Dissertation Research Credits: 1-9 (Must register for a minimum of 6 credits the first semester enrolled in EDUC 999. Must register for at least 1 credit thereafter until all work has been completed including the semester in which degree is received)

Total: 65 credits
College of Health and Human Services

College Code: HH

Academic Departments

- Global and Community Health
- Health Administration and Policy
- School of Nursing
- Social Work

The mission of the College of Health and Human Services (CHHS) is to equip professionals to provide leadership, care, and services related to health promotion, wellness, disease prevention, and quality of life through the promotion of physical, social, and environmental health practices. Graduates practice in a variety of roles in settings that are complex, multicultural, and dynamic. The college is a resource for health promotion to the university, as well as to citizens of Virginia.

The State Council of Higher Education for Virginia and the State Board of Nursing approved the baccalaureate nursing program in 1974. Since then, the program has grown from a department of nursing to a school of nursing. In 1993, the school was reorganized into the College of Nursing and Health Science, and in 2006, into the College of Health and Human Services to provide the breadth needed to respond to dramatic and dynamic fundamental changes occurring in health care and social work. The expanded, multidisciplinary CHHS offers degree programs and research opportunities in health administration, health policy, health information systems, health services research, nursing, public health, nutrition, global health, rehabilitation science, gerontology, and social work.

Administration

Shirley Travis, Dean
Keith Howell, Associate Dean, Research and Program Evaluation
J. Goodlett McDaniel, Associate Dean, Practice, Marketing, and Finance
Robin Remsburg, Associate Dean and Director, School of Nursing
Frank J. Whittington, Associate Dean, Academic Affairs
Susan J. Swett, Assistant Dean, Student Affairs
P. J. Maddox, Chair, Health Administration and Policy
Lisa Pawloski, Chair, Global and Community Health
Miriam Raskin, Acting Chair, Social Work

Faculty

Faculty emeriti: Ailinger, Boyd, Brenkus, Carty, Jenkins, Johnson-Brown, Langley, Parker-Smith, Redmond, Silva, Vail, Walker

Professors: Butler, Gaffney, Gerber, Hadley, Howell, Maddox, Meiners, Metcalf, Moore, Raskin, Remsburg, Ritchie, Rose, Sluzki, Sorrell, Travis, Whittington

Assistant professors: Boland, Carle, Cartwright, Cleaveland, Gewa, Hahn, Ihara, Jacobsen, Kitsantas, Kodadek, Maradiegue, Miklancie, Moss, Oh, Perlin, Roberts, Rudowski, Smoczynski, Tompkins, Urban, Webster, Weinstein, Willis, Winter, Wojtusiak, Yang, Young, Zhou

Instructors: Almond, Blasser, Campo, Clark, Cox, Davis, Dickman, Durham, Freeborne, Gaston, Gillette, Henderson, Liss, Middle, Mulqueen, Shiver, Stoehr, Toulouse, Venske, Welsh

Course Work

CHHS offers all course work designated GCH, HAP, HHS, NURS, and SOCW in the Courses chapter of this catalog.

Academic Programs

The College of Health and Human Services is dedicated to educating the next generation of health professionals, researchers, and educators. Our School of Nursing produces more new RNs each year than any other program in the Commonwealth of Virginia, and these graduates have one of the state’s highest pass-rates on the nursing licensure exam. Through the PhD program in nursing, CHHS is helping fill the need for nursing faculty and researchers. The College’s Department of Health Administration and Policy prepares students for careers as leaders and managers of health care organizations and as health policy-makers at both the state and national levels, while the Department of Global and Community Health trains public health practitioners with a global reach, who can intervene and improve the health of both local and international populations. The Department of Social Work educates both undergraduate and graduate students to be professional social workers able to work in either community organization or clinical settings. These academic units offer a variety of specializations within degree programs, including nutrition, gerontology, rehabilitation science, epidemiology and biostatistics, forensic nursing, health technology and informatics, data security, clinical social work, and conflict analysis and resolution.

Professional Conduct Policy

All CHHS students are expected to conduct themselves professionally at all times. This means that certain behavior is prohibited, including verbal abuse, insubordination, and behavior that threatens the safety of a client, another student, faculty member, or other health care provider when the behavior occurs within the context of an academic program. CHHS reserves the right to place on probation, suspend, or dismiss any student in its programs who engages in such conduct. Students disciplined for such reasons have the right to appeal to their department chair or director.

Student Affairs

The Office of Student Affairs provides support to students, faculty and staff on a variety of admissions, academic, and policy issues. The office is involved with recruiting new students; pre-admission advising; processing applications for graduate programs and Nursing BSN programs (junior-level admission to the BSN pathways, and the accelerated second-degree BSN); and conducting orientations for newly-admitted students.

Student Affairs maintains the college’s student records; reviews and recommends action on undergraduate and graduate student requests for exceptions to academic policy; processes standard academic actions; and approves student records for degree completion prior to graduation. Student grade appeals fall under university policy, described in the Academic Policies section of the catalog.

Each student is assigned an academic advisor with whom he or she should meet at least once a semester to insure program graduation requirements are met. The assigned advisor may be a faculty member, a departmental advisor, or an advisor in the Office of Student Affairs.
Student Responsibility

Students are required to have an active Mason e-mail account, and to update any change of address on-line through Patriotweb. The college will not use personal (non-GMU) e-mail addresses to communicate with students. Students are responsible for knowing the university academic policies and the policies governing their program as stated in the university catalog, and should regularly monitor their Mason transcript on-line and their degree progression through the degree evaluation tool on Patriotweb [link to https://patriotweb.gmu.edu/].

Background Checks

Many clinical agencies and practicum sites mandate that students working there have a criminal background check. All students enrolled in the School of Nursing are required to complete a criminal background check prior to beginning the program. Students enrolled in other CHHS programs may be required to complete background checks before entering a practicum environment. Information obtained from the background check is strictly confidential but may result in a student’s inability to perform clinical or practicum activities and, therefore, will disqualify the student from entering or continuing in the program. School of Nursing students are sent information regarding the criminal background check process, and associated fees, in their admission packets. Other students are informed individually as they are placed in practicum activities requiring background checks. Students are responsible for notifying the assistant dean of student affairs of any arrests, regardless of adjudication, that occur after acceptance and during enrollment in the program. Failure to promptly notify the assistant dean of student affairs may be grounds for dismissal from the program.

Health Records

To comply with the regulations established by the Commonwealth of Virginia and the agencies to which students are assigned and to minimize risks to student health, every student enrolled in a CHHS program requiring clinical or practicum coursework must document and submit evidence of good health and provide current immunization records to both the CHHS Office of Student Affairs and to the university’s Student Health Services at the time of admission to the college. Immunizations may be obtained through Student Health Services on any of the Mason campuses.

Students should keep copies of their health records should agencies require them for clinical and practicum assignments. All costs associated with immunizations and certifications are the student’s responsibility.

Insurance and Liability

Students are strongly advised to maintain health insurance coverage at all times. A student health insurance plan is available to eligible students through Mason. Students are responsible for their own health care, including emergency care, and CHHS assumes no financial responsibility for the health care of students. Enrolled students who are performing internships and similar experiential learning as a required part of their academic programs are also considered agents of the university. They are covered by the Commonwealth of Virginia Risk Management Plan while engaged in their prescribed educational duties.

Academic Outreach

The mission of the Office of Academic Outreach is to provide off-campus graduate coursework that supports the continued professional development and competency of practicing health professionals. This purpose is accomplished through collaborative relationships with expert health and instructional resources—individual and organizational—both internal and external to the University.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Faculty

Emeriti: Ailinger, Boyd, Brenkus, Carty, Jenkins, Johnson-Brown, Langley, Paker-Smith, Redmond, Silva, Vail, Walker

Professors: Gaffney (assistant dean, doctoral studies), Milligan, Moore (assistant dean, nursing research), Remsburg (associate dean/director), Sorrell, Travis (dean)

Associate Professors: Cangelosi, Chong, Davidson, Douglas, Mahon, McDaniel (associate dean, business development), Normile, Panniers, Ternus (academic outreach director), Wu

Assistant Professors: Boland, Hahn (assistant dean, masters/post masters division), Kodadek, Maradiegue, Miklanci, Moss, Oh, Roberts, Smoczynski, Urban (assistant dean, undergraduate division), Willis, Young, Zho

Instructors: Almond, Blasser, Campo, Cox, Davis, Dickman, Durham, Liss, Middle, Mulqueen, Stoehr, Toulouse, Venzke, Welsh

The School of Nursing is a teaching/learning organization with a national and international academic reputation, grounded in sound general education. It develops and supports a diverse faculty who are visionary and competent practitioners, scholars, and researchers, excellent in teaching in academic and practice settings, and responsive to the needs of students and the community. Specifically, the Nursing programs prepare graduates to function as providers, coordinators, and managers of care and for leadership, advanced practice, and nurse scholar roles, as well as members of the nursing profession. Graduates of the School of Nursing are prepared to function as interdisciplinary health professionals and citizens who provide leadership, care, and service to the community. The School promotes health and well being through its programs and centers, engaging in scholarly activities and research with the aim of maximum health for all people.

Undergraduate Degree

Nursing, BSN

Banner Code: HH-BSN-NURS

The Bachelor of Science in Nursing (BSN) Program is accredited by the Virginia State Board of Nursing and the Commission on Collegiate Nursing Education. The undergraduate nursing program prepares students to deliver superior nursing care and provide leadership in nursing in the increasingly complex and challenging field of modern health care. Graduates are in demand as professional nurses in hospitals, long-term care facilities, and community health and other health care agencies. The program emphasizes health promotion and disease prevention, capitalizing on early detection of potential health problems, health maintenance in ambulatory services, and preparation for the managerial responsibilities of nursing.
The School of Nursing offers four pathways to complete the BSN, all of which lead to completion of the objectives of the undergraduate program. The traditional pathway is a two-year curriculum following the completion of general education and prerequisite requirements. The LPN-to-BSN pathway is offered for students holding current LPN licenses and is also a two-year curriculum following completion of general education and prerequisite requirements. An accelerated RN-to-BSN pathway for students holding current registered nurse (RN) licenses can be completed in one year (full-time) following completion of general education and prerequisite requirements. The accelerated, second degree pathway is a 15-month, full-time pathway for students holding a baccalaureate degree outside of nursing. The nursing programs must be completed on a full-time basis. Students who are interested in pursuing a major in nursing, with the exception of those currently licensed as RNs, must make an additional and separate application through the School of Nursing and are encouraged to contact the nursing program for advising prior to applying to the nursing major.

Clinical nursing begins at the junior level. Students must complete a prenursing curriculum and be admitted to junior standing or one of the accelerated pathways. These conditions do not apply to students who are already RNs.

Attendance at the first meeting of all nursing courses (lectures, on-campus laboratories, and agency laboratories) is mandatory.

**Writing Intensive Requirement**

Mason requires all students to complete at least one course in their major's designated “writing intensive” at the 300 level or above. Students majoring in nursing fulfill this requirement by successfully completing HHS 465.

**Academic Grade Standards**

After Admission to junior-standing and the nursing program, students who get a grade lower than a C in a required nursing (NURS or HHS) course must repeat the course and earn a grade of C or higher to resume progression in nursing coursework. This may alter or halt further progression in the nursing program and affect the expected graduation date. Students may repeat a nursing course in which they earned a grade lower than C only one time. Those who fail to earn a C or higher after repeating the course are dismissed from the BSN program. Those who earn a grade of c or higher may resume progress in required coursework. Earning a grade of less than C in a second nursing course results in dismissal from the nursing program.

Dismissal from any one one of the nursing pathways constitutes dismissal from the undergraduate (BSN) nursing program in the School of Nursing. The student has the right to appeal.

**Professional Conduct Policy**

All students in the School of Nursing are expected to adhere to the Professional Conduct Policy of the College of Health and Human Services.

**Appeal Process**

Faculty members in the nursing program are generally the best judges of a student’s professional performance; however, some students may feel that the faculty member’s judgment of readmission or dismissal is unfair. Students in the School of Nursing wishing to appeal a grade are expected to follow the GMU guidelines for grade appeals, found in the Academic Policies section of the GMU University Catalog.

Students wishing to appeal a dismissal must submit a letter of request to the Director of Nursing and provide rationale for the appeal.

**NCLEX Readiness Preparation and Testing**
Throughout the BSN program, all students with the exception of RN-to-BSN students, participate in preparation for the NCLEX-RN licensing exam through opportunities provided during nursing courses. These opportunities are included as integrated components of select courses and include practice NCLEX-style exams and content specific testing. A final cumulative assessment exam is given towards the end of the program to provide guidance to the student concerning their chance for success on the licensing exam. A final critical thinking and test-analysis course is required for the senior year and remediation in select content areas may be required as a component of this course.

**Special Requirements**

Fees and expenses related to the nursing program include: skills laboratory fee, NCLEX-readiness preparation, uniforms, stethoscope, name pin, books, CPR certification, health forms, immunizations, and criminal background check fees. The availability of personal transportation to and from clinical agencies is expected of all students. For a summary of all current fees and estimated expenses, see the School of Nursing web site.

All BSN students are required to obtain a health clearance and complete the immunizations required by GMU as listed in the Student Health Services, Immunization Requirements in the GMU catalog. In addition, the School of Nursing, in meeting the requirements of its clinical agency partners requires that two out of three injections of the series of hepatitis B immunizations must be completed before beginning the first clinical course, with the third immunization completed as it is due. **Students are not allowed into any clinical setting without the completed immunization series as prescribed by GMU or the School of Nursing and may have an offer of admission withdrawn for inability to meet these requirements.** Students must also have an annual tuberculosis screenings by PPD or as determined by a health care provider in the case of past positive tests. All immunizations and expenses of screenings are the responsibility of the student. The School of Nursing reviews health records and reserves the right to refuse admission or continued enrollment to the School of Nursing to any student who is unable to comply with these requirements.

All students must have CPR certification before entering the first clinical nursing course and maintain it through the remainder of the program. Either the American Red Cross Professional Rescuer or the American Heart Association Basic Life Support - Health Care Provider is required. On-line renewal of CPR certification is not accepted. Any cost incurred is the responsibility of the student.

No student or faculty member will be discriminated against or denied admission to the nursing program for the sole reason that the student or faculty member has been exposed to, infected with, or diagnosed with HIV or HBV. All student are expected to practice Universal Precautions with all clients and failure to do so will result in dismissal from the program. In the event that a student has a clinical experience or practicum exposure to body fluids of a client, procedures and appropriate reports are completed according to institutional and nursing policies. Information related to exposure or infection is confidential, and dissemination of such information is based on the need-to-know criteria that apply in health care situations. HIPAA and FERPA regulations apply. A complete and detailed HIV/HBV policy is available in the CHHS Office of Student Affairs.

**RN and LPN Requirements**

RN and LPN licensed students enrolled in those pathways are required to submit a copy of their current license prior to entering the first nursing course. RN and LPN-licensed students must maintain current licensure throughout the academic program.

**Degree Requirements**

**General Education (30 credits)**

**Written Communication:**
• ENGL 101 - Composition Credits: 3
• ENGL 302 - Advanced Composition Credits: 3

Note:

Non-native speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Oral Communication:

Choose one of the following:

• COMM 100 - Public Speaking Credits: 3
• COMM 101 - Interpersonal and Group Interaction Credits: 3

Information Technology:

• IT 103 - Introduction to Computing Credits: 3

Literature:

• An approved University General Education literature course.

Arts:

• An approved University General Education arts course.

Western Civilization:

Choose one of the following:

• HIST 100 - History of Western Civilization Credits: 3
• HIST 125 - Introduction to World History Credits: 3

Global Understanding:

• An approved University General Education global understanding course. International Health (GCH 205) is recommend.

Social Science:

• PSYC 100 - Basic Concepts in Psychology Credits: 3

Choose one of the following:
Designated Nursing Prerequisites (24 credits)

**Anatomy and physiology:**
- BIOL 124 - Human Anatomy and Physiology Credits: 4
- BIOL 125 - Human Anatomy and Physiology Credits: 4

**Microbiology:**
- BIOL 246 - Introductory Microbiology Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

**Ethics:**
- PHIL 151 - Introduction to Ethics Credits: 3
  or
- PHIL 309 - Bioethics Credits: 3

**Statistics:**
- STAT 250 - Introductory Statistics I Credits: 3

**Human Lifespan Development:**
- PSYC 211 - Developmental Psychology Credits: 3

**Nutrition:**
- GCH 295 - Nutrition for Health Professionals Credits: 3

BIOL 124 and 125 meet the natural science general education requirement. Statistics 250 fulfills the quantitative reasoning general education requirement.

**Electives (4 credits)**

No more than 3 credits of non-required NURS-prefix nursing electives may be used to satisfy this requirement.

**Traditional BSN Pathway (62 credits)**

To be eligible to apply for junior standing, traditional prenursing students must complete the designated nursing prerequisites by the end of the spring semester preceding entry to the nursing program. Students must earn a C or better in anatomy and physiology (BIOL 124 and 125, 8 credits); microbiology (BIOL 246 and 306, 4 credits); statistics (STAT 250, 3 credits); nutrition (GCH 295, 3 credits); developmental psychology (PSYC 211, 3 credits); and ethics (PHIL 151 or 309, 3 credits). All university general education requirements, with the exception of ENGL 302, must be completed by the end of the summer semester preceding entry into the nursing program.

**Traditional BSN Major, Required Courses**

- NURS 330 - Nursing Fundamentals Credits: 3
- NURS 331 - Nursing as a Process for Health Practicum Credits: 2
NURS 332 - Concepts of Health Promotion and Disease Prevention throughout the Lifespan Credits: 3
NURS 337 - Applied Nursing Fundamentals and Health Assessment Credits: 1
NURS 343 - Pharmacology Credits: 3
NURS 344 - Intermediate Nursing Technologies Credits: 1
NURS 347 - Adult Pathophysiology and Nursing Care Credits: 2
NURS 348 - Maternal-Newborn Physiology, Pathophysiology, and Nursing Care Credits: 2
NURS 349 - Pediatric Pathophysiology and Nursing Care Credits: 2
NURS 357 - Health Promotion and Disease Prevention in Medical/Surgical Nursing Credits: 2
NURS 358 - Health Promotion and Disease Prevention in Maternal/Infant Nursing Credits: 2
NURS 359 - Health Promotion and Disease Prevention in Pediatric Nursing Credits: 2
NURS 388 - Problem-Based Clinical Inquiry Credits: 3
NURS 410 - Nursing Care of Clients with Pathological Conditions Credits: 3
NURS 425 - Comprehensive Health Assessment Credits: 3
NURS 436 - Leadership and Management of Health Care Credits: 3
NURS 451 - Advanced Clinical Preceptorship Credits: 5
NURS 453 - Research in Nursing Credits: 3
NURS 455 - Advanced Technologies in Nursing Credits: 2
HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3
NURS 466 - Community Health Nursing Credits: 2
NURS 467 - Clinical in Community Health Nursing Credits: 2
NURS 468 - Psychiatric and Mental Health Nursing Credits: 2
NURS 469 - Clinical in Psychiatric and Mental Health Nursing Credits: 2
NURS 488 - Inquiry-Based Clinical Seminar Credits: 2
NURS 491 - Critical Thinking and Analysis of Test Taking Strategies Credits: 2

Total: 120 credits

Concentrations: Alternative Pathways

Students who are eligible for an alternative pathway to the BSN must meet the requirements for the pathway to which they have been admitted rather than those for the traditional BSN pathway described above.

Except where noted in the concentration description, requirements for general education (30 credits), designated nursing prerequisites (24 credits) and the elective for the major (4 credits) are still required.

▲ LPN-to-BSN Nursing Pathway (LPN): 62 credits

To be eligible to apply for junior standing, students who hold an LPN (Licensed Practical Nurse) license must complete the designated nursing prerequisites and general education requirements by the end of the spring semester preceding entry to the nursing program. Students must earn a C or better in anatomy and physiology (BIOL 124 and 125, 8 credits); microbiology (BIOL 246 and 306, 4 credits); statistics (STAT 250, 3 credits); nutrition (GCH 295, 3 credits); developmental psychology (PSYC 211, 3 credits); and ethics (PHIL 151 or 309, 3 credits). Applicants to the second degree pathway must achieve a minimum GPA of 3.00 in the designated prerequisite course work.
LPN-to-BSN Concentration, Required Courses

- NURS 334 - Nursing as a Health Profession and Discipline Credits: 3
  Credit by Exam: Upon successful completion of NURS 334, LPN students will be awarded 5 additional credits in nursing.
- NURS 337 - Applied Nursing Fundamentals and Health Assessment Credits: 1
- NURS 343 - Pharmacology Credits: 3
- NURS 344 - Intermediate Nursing Technologies Credits: 1
- NURS 347 - Adult Pathophysiology and Nursing Care Credits: 2
- NURS 348 - Maternal-Newborn Physiology, Pathophysiology, and Nursing Care Credits: 2
- NURS 349 - Pediatric Pathophysiology and Nursing Care Credits: 2
- NURS 357 - Health Promotion and Disease Prevention in Medical/Surgical Nursing Credits: 2
- NURS 358 - Health Promotion and Disease Prevention in Maternal/Infant Nursing Credits: 2
- NURS 359 - Health Promotion and Disease Prevention in Pediatric Nursing Credits: 2
- NURS 388 - Problem-Based Clinical Inquiry Credits: 3
- NURS 410 - Nursing Care of Clients with Pathological Conditions Credits: 3
- NURS 425 - Comprehensive Health Assessment Credits: 3
- NURS 436 - Leadership and Management of Health Care Credits: 3
- NURS 451 - Advanced Clinical Preceptorship Credits: 5
- NURS 453 - Research in Nursing Credits: 3
- NURS 455 - Advanced Technologies in Nursing Credits: 2
- NURS 466 - Community Health Nursing Credits: 2
- NURS 467 - Clinical in Community Health Nursing Credits: 2
- NURS 468 - Psychiatric and Mental Health Nursing Credits: 2
- NURS 469 - Clinical in Psychiatric and Mental Health Nursing Credits: 2
- NURS 488 - Inquiry-Based Clinical Seminar Credits: 2
- NURS 491 - Critical Thinking and Analysis of Test Taking Strategies Credits: 2
- HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3

Total: 120 credits

▲ Accelerated, Second Degree BSN Pathway (SEC): 47 credits

The Accelerated, Second Degree BSN Pathway is designed for students already holding a bachelor's degree who are interested in pursuing an undergraduate degree in nursing. Students must have a baccalaureate degree from an accredited college or university. This full-time accelerated program begins in the fall semester and is completed in 12 months. Students must earn a C or better in anatomy and physiology (BIOL 124 and 125, 8 credits); microbiology (BIOL 246 and 306, 4 credits); statistics (STAT 250, 3 credits); nutrition (GCH 295, 3 credits); developmental psychology (PSYC 211, 3 credits); and ethics (PHIL 151 or 309, 3 credits). Applicants to the second degree pathway must achieve a minimum GPA of 3.00 in the designated prerequisite course work.

Admission to the second degree nursing program is competitive. Students must have a minimum cumulative GPA of 2.75 in their first degree or a 3.00 GPA in the last 30 credits of the undergraduate degree. They also must complete the application including an intentional essay. To be eligible to apply to this program, students must complete the designated nursing prerequisites by the end of the spring semester preceding entry into the nursing program.
The application deadline is February 1, and students are notified of their status in June. Permission to register for courses with NURS prefixes requires prior acceptance into junior standing in nursing.

Second Degree Pathway, Alternative BSN Requirements

Candidates for the degree must present at least 120 credits:

- General Education: 49 credits are transferred from the first degree. Mason general education requirements are satisfied by the initial degree and fulfilled through transfer credit.
- 24 credits are required prerequisites;
- 47 credits are required for the concentration. Specific requirements are as follows:

Second Degree Concentration, Required Courses

- NURS 305 - Application of Basic Nursing Techniques Credits: 1
- NURS 309 - Introduction to Basic Nursing Care Credits: 3
- NURS 310 - Application of Basic Nursing Care Credits: 3
- NURS 319 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups Credits: 4
- NURS 334 - Nursing as a Health Profession and Discipline Credits: 3
- NURS 343 - Pharmacology Credits: 3
- NURS 350 - Application of Nursing Care for Individuals and Small Groups Credits: 5
- NURS 351 - Application of Intermediate Nursing Technologies Credits: 1
- NURS 419 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups II Credits: 3
- NURS 425 - Comprehensive Health Assessment Credits: 3
- NURS 427 - Advanced Technologies for the Accelerated Pathway Credits: 1
- NURS 428 - Community Health Clinical for the Accelerated Pathway Credits: 2
- NURS 429 - Preceptorship for the Accelerated Pathway Credits: 3
- NURS 436 - Leadership and Management of Health Care Credits: 3
- NURS 440 - Community Health and Epidemiology Credits: 3
- NURS 453 - Research in Nursing Credits: 3
- HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3

Total: 120 credits

▲ Accelerated RN-to-BSN Pathway (RN): 27 credits

Students who hold current RN licenses need to apply only to the university. The Accelerated RN-to-BSN Pathway allows RNs to progress quickly through the program while meeting the objectives of the undergraduate curriculum. On completion of the general education requirements and designated nursing prerequisites, RN students can complete the BSN in two semesters of full-time study. The program can also be completed on a part-time basis.

RN students must satisfy all general education requirements and nursing prerequisites.

RN-to-BSN Pathway, Alternative BSN Requirements
Candidates for the degree must present at least 120 credits. A minimum of 30 credits must be earned at Mason to fulfill requirements for graduation. These include:

- 21 credits of nursing prerequisite courses, described below;
- 27 credits specific to the concentration, described below;
- 9 credits of electives, described below;
- 33 credits designated "Credit by Exam", described below.

30 credits of general education must be completed as previously described in the general degree requirements section. Transfer credits are accepted for many general education and prerequisite courses that may have been completed at other colleges or universities by students coming in with an RN.

**Designated RN-BSN Nursing Prerequisites (21 credits)**

- Psychology (3 credits)
  - Anatomy and physiology:
    - BIOL 124 - Human Anatomy and Physiology Credits: 4
    - BIOL 125 - Human Anatomy and Physiology Credits: 4
  - Microbiology:
    - BIOL 246 - Introductory Microbiology Credits: 3
    - BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
  - Ethics:
    - PHIL 151 - Introduction to Ethics Credits: 3
    - or
    - PHIL 309 - Bioethics Credits: 3
  - Statistics:
    - STAT 250 - Introductory Statistics I Credits: 3

**RN-to-BSN Concentration, Required Courses**

- 3 credit 400- or 500-level nursing elective
- NURS 334 - Nursing as a Health Profession and Discipline Credits: 3
- NURS 425 - Comprehensive Health Assessment Credits: 3
- NURS 436 - Leadership and Management of Health Care Credits: 3
- NURS 440 - Community Health and Epidemiology Credits: 3
- NURS 441 - Nursing of Clients in Communities and Large Groups Credits: 5
- NURS 442 - Case Studies in Community Health Nursing Credits: 1
- NURS 453 - Research in Nursing Credits: 3
- HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3

**Electives (9 credits)**

- No more than 3 credits of nursing electives may be used to satisfy this requirement.
Credit by Exam (33 credits)

On successful completion of NURS 334, RN students will be awarded 30 credits in nursing and 3 credits of nutrition.

Total: 120 credits

Dual Degree

Nursing, MSN/MBA

Banner Code: HH-MSNBA-NBA

The MSN/MBA Program, offered with the School of Management (SOM), prepares nurses for mid- and top-level administrative, leadership, and health policy roles in health and health-related organizations. A variety of health care and health-related settings are used for clinical practice experiences. The program requires 58 graduate credits, including graduate nursing, business, decision sciences, and elective courses.

Applicants must have GMAT scores sent directly to Mason and must meet admission requirements for graduate degree status in both CHHS and SOM.

Degree Requirements

MSN Courses

- HAP 703 - Financial Management in Health Systems Credits: 3
- NURS 660 - Seminar in the Ethics of Health Care Credits: 3
- NURS 680 - Theoretical Foundations Related to Nursing Credits: 2
- NURS 685 - Advanced Nursing Research Methods Credits: 3
- NURS 686 - Projects in Nursing Research Credits: 2
- NURS 688 - Organization of Nursing and Health Care Delivery Systems Credits: 3
- NURS 763 - Administrative Theory in Nursing Credits: 3
- NURS 765 - Practicum in Nursing Administration I Credits: 3
- NURS 766 - Administrative Strategies in Nursing Credits: 3
- NURS 768 - Practicum in Nursing Administration II Credits: 3

MBA Courses

- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 612 - Managing Costs and Evaluating Performance Credits: 1.5
- MBA 613 - Financial Reporting and Decision Making Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
MBA 643 - Managerial Finance Credits: 3
MBA 653 - Organizational Behavior Credits: 3
MBA 673 - Legal Environment for Management Credits: 1.5
MBA 678 - Strategy and Organizational Leadership Credits: 3

Total: 58

Master's Degree

Nursing, MSN

Banner Code: HH-MSN-NURS

The Master of Science in Nursing (MSN) Program is accredited by the Virginia State Board of Nursing and the Commission on Collegiate Nursing Education. The program prepares nurses for a variety of leadership roles in the health care delivery system. The adult, adult/gerontological, and family nurse practitioner primary care concentrations are part of a collaborative program with George Washington University School of Medicine and Health Sciences. These concentrations have been approved by the state boards of nursing and medicine in Virginia. The concentration in advanced clinical nursing prepares nurses to provide and manage care of individuals, families, and groups, including the chronically ill, the elderly, and others with self-care limitations. The concentration in nursing administration prepares nurses to function in management positions in hospitals, nursing homes, community health agencies, and other health-related facilities. The nurse educator concentration prepares graduates for faculty positions in schools of nursing, as well as nurse educator positions in hospitals and community health care agencies. The clinical nurse leader concentration prepares nurses as generalists with solid foundations in health policy and finance to provide competent care and clinical leadership within the health care system.

Admission Requirements

In addition to meeting graduate admission requirements, applicants to MSN programs must have a cumulative GPA of 3.00 for the last 60 credits of undergraduate work, hold an active license as a registered nurse (RN), and submit two letters of recommendation, a résumé, and a goals statement. Although the GRE is not formally required, applicants may be asked to submit GRE scores at the discretion of the school when it believes those scores will lead to a clearer presentation of the applicant’s qualifications. Applicants must have successfully completed undergraduate statistics and a graduate bivariate statistics course (HHS 597).

Students applying to the advanced clinical nursing, clinical nurse leader, nurse educator, and all the nurse practitioner concentrations must have a health assessment skills continuing education course within 18 months prior to taking NURS 514 or 719. In addition, applicants to the nursing administration concentration are required to have the equivalent of one year’s experience in direct patient care as a registered nurse. Students applying to any nurse practitioner concentration are required to have a minimum of one year experience in direct patient care. It is recommended that students applying to the advanced clinical nursing concentration have the equivalent of one year’s experience in direct patient care as an RN.

Special Requirements

Graduate students are required to have annual health exams and immunizations before enrolling in practicum courses. Students must be in the process of completing a hepatitis B immunization series when they enroll for their first practicum course. Student
health and immunization records are monitored at the CHHS Office of Student Affairs. Criminal background checks are required of all School of Nursing students. All students are required to have an active Mason e-mail account.

Degree Requirements

The master’s program in nursing requires 37 to 48 graduate credits. Of these, a 13-credit core consists of course work in the theoretical foundations of nursing, applications in nursing research, a seminar in the ethics of health care, and a course on the organization of nursing and health care delivery systems. The remaining credits are satisfied by completing one of seven concentrations. The nursing administration concentration requires; the clinical nurse leader concentration, an additional 25 credits; the nurse educator concentration, an additional 26 credits; the advanced clinical nursing concentration, an additional 26 to 32 credits; the adult nurse practitioner concentration, an additional 29 credits; and the adult/gerontological and family nurse practitioner concentrations, an additional 35 credits.

A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students (both master’s and doctoral) may repeat no more than two courses in their total program of study.

Actual clinical hours may exceed those listed in the catalog. Actual clinical hours will meet those required for certification purposes. Credits listed in the catalog reflect the minimum required credits.

MSN Core Courses (required of all students): 13 credits

- NURS 660 - Seminar in the Ethics of Health Care Credits: 3
- NURS 680 - Theoretical Foundations Related to Nursing Credits: 2
- NURS 685 - Advanced Nursing Research Methods Credits: 3
- NURS 686 - Projects in Nursing Research Credits: 2
- NURS 688 - Organization of Nursing and Health Care Delivery Systems Credits: 3

Concentrations: Complete One

Students in the MSN will complete one concentration from the following:

▲ Adult Nurse Practitioner in Primary Care Concentration (ANPR)

Required Courses (17 credits)

- NURS 623 - Clinical Concepts in Community-Oriented Primary Care Credits: 3
- NURS 746 - Practicum in Adult Primary Care Nursing Credits: 6
- NURS 748 - Practicum in Adult Primary Care Nursing II Credits: 8

Nurse Practitioner Support Courses (12 credits)

These required courses are colisted with George Washington University (GWU) School of Medicine and Health Sciences.

Note: All courses offered at GWU are charged at GWU’s tuition rates. Nurse practitioner students must have taken a continuing education health assessment course with a skills component within 18 months of taking NURS 719.
- NURS 719 - Advanced Health Assessment Credits: 2
- NURS 723 - Clinical Decision Making Credits: 2
- NURS 745 - Pharmacology Credits: 3
- NURS 747 - Pharmacology in Disease and Pathophysiology Credits: 1
- NURS 756 - Advanced Pathology and Pathophysiology Credits: 4

Total: 29 credits

▲ Adult/Gerontological Nurse Practitioner in Primary Care Concentration (AGNP)

Required Courses (23 credits)

- NURS 623 - Clinical Concepts in Community-Oriented Primary Care Credits: 3
- NURS 746 - Practicum in Adult Primary Care Nursing Credits: 6
- NURS 748 - Practicum in Adult Primary Care Nursing II Credits: 8
- NURS 780 - Practicum in Gerontological Nursing I Credits: 3
- NURS 781 - Practicum in Gerontological Nursing II Credits: 3

Nurse Practitioner Support Courses (12 credits)

These required courses are colisted with George Washington University (GWU) School of Medicine and Health Sciences.

Note: All courses offered at GWU are charged at GWU’s tuition rates. Nurse practitioner students must have taken a continuing education health assessment course with a skills component within 18 months of taking NURS 719.

- NURS 719 - Advanced Health Assessment Credits: 2
- NURS 723 - Clinical Decision Making Credits: 2
- NURS 745 - Pharmacology Credits: 3
- NURS 747 - Pharmacology in Disease and Pathophysiology Credits: 1
- NURS 756 - Advanced Pathology and Pathophysiology Credits: 4

Total: 35 credits

▲ Family Nurse Practitioner in Primary Care Concentration (FNUP)

Required Courses (23 credits)

- NURS 623 - Clinical Concepts in Community-Oriented Primary Care Credits: 3
- NURS 720 - Practicum in Family Primary Care Nursing I Credits: 4
NURS 721 - Practicum in Assessment and Management of the Developing Family Credits: 8
NURS 722 - Practicum in Family Primary Care Nursing II Credits: 8

Nurse Practitioner Support Courses (12 credits)

These required courses are colisted with George Washington University (GWU) School of Medicine and Health Sciences.

**Note:** All courses offered at GWU are charged at GWU’s tuition rates. Nurse practitioner students must have taken a continuing education health assessment course with a skills component within 18 months of taking NURS 719.

- NURS 719 - Advanced Health Assessment Credits: 2
- NURS 723 - Clinical Decision Making Credits: 2
- NURS 745 - Pharmacology Credits: 3
- NURS 747 - Pharmacology in Disease and Pathophysiology Credits: 1
- NURS 756 - Advanced Pathology and Pathophysiology Credits: 4

Total: 35 credits

▲ Advanced Clinical Nursing Concentration (NUAC)

Required Courses (26 credits)

- NURS 513 - Advanced Pharmacology in Nursing Credits: 3
- NURS 514 - Application of Advanced Health Assessment Methods Credits: 2 *
- NURS 550 - Pathophysiologic Bases for Major Health Deviations of Individuals Credits: 3
- NURS 773 - Advanced Clinical Nursing I Credits: 3
- NURS 775 - Advanced Specialty Practice I Credits: 3
- NURS 776 - Advanced Clinical Nursing II Credits: 3
- NURS 778 - Advanced Specialty Practice II Credits: 3
- Nursing Electives (6 credits)

* A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514

Clinical Nurse Specialist Emphasis

Students in the advanced clinical nursing concentration who opt for the clinical nurse specialist emphasis must accrue 500 clinical hours by completing:

- NURS 740 - Clinical Nurse Specialist Internship Credits: 3
  May be repeated once if necessary to accrue 500 hours (for total of 6 credits)
Total: 26-32 credits

▲ Nursing Administration Concentration (NUAD)

Required Courses (12 credits)

- NURS 763 - Administrative Theory in Nursing Credits: 3
- NURS 765 - Practicum in Nursing Administration I Credits: 3
- NURS 766 - Administrative Strategies in Nursing Credits: 3
- NURS 768 - Practicum in Nursing Administration II Credits: 3

Nursing Administration Support Courses (12 credits)

- Nursing or related discipline electives (6 credits)
- NURS 654 - Nursing Administration Financial Management Credits: 3
  or
- HAP 703 - Financial Management in Health Systems Credits: 3

Choose one of the following management/organizational theory courses:
- HAP 621 - Management of Health Service Organizations Credits: 3
- LRNG 601 - Organizational Learning Credits: 3
- PUAD 620 - Organization Theory and Management Behavior Credits: 3

Total: 24 credits

▲ Nurse Educator Concentration (NURE)

Required Courses (15 credits)

- NURS 556 - Principles of Assessment and Evaluation in Nursing Education Credits: 3
- NURS 726 - Perspectives in Nursing Education Credits: 3
- NURS 727 - Application of Nursing Education Principles to Curriculum and Program Development Credits: 3
- NURS 728 - Practicum and Seminar in Nursing Education I Credits: 3
- NURS 729 - Practicum and Seminar in Nursing Education II Credits: 3

Nurse Educator Support Courses (11 credits)
• NURS 550 - Pathophysiologic Bases for Major Health Deviations of Individuals Credits: 3
• NURS 514 - Application of Advanced Health Assessment Methods Credits: 2 *
• Nursing or related discipline electives (6 credits)

* A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514

Total: 26 credits

▲ Clinical Nurse Leader Concentration (NUCL)

Course Work (17 credits)

• HAP 586 - Quality Improvement in Health Services Credits: 3
• NURS 654 - Nursing Administration Financial Management Credits: 3
• NURS 730 - Leadership Strategies for the Clinical Nurse Leader Credits: 2
• NURS 731 - Clinical Nurse Leader Role Integration Credits: 2
• NURS 732 - Clinical Nurse Leader Practicum Credits: 7

Clinical Nurse Leader Support Courses (8 credits)

• NURS 513 - Advanced Pharmacology in Nursing Credits: 3
• NURS 550 - Pathophysiologic Bases for Major Health Deviations of Individuals Credits: 3
• NURS 514 - Application of Advanced Health Assessment Methods Credits: 2 *
  * A continuing education health assessment course with a skills component is required within 18 months prior to taking NURS 514

Total: 25 credits

RN-to-MSN Pathway

This pathway allows RNs who have completed the general education requirements (as listed in the undergraduate RN-to-MSN Pathway described in the Nursing, BSN program) and have demonstrated substantial involvement in professional nursing within the past two years to earn the MSN degree. Students entering a concentration through this pathway must meet all the requirements for admission to that concentration.

In addition to fulfilling admission requirements for degree status at Mason, applicants must hold a current license to practice nursing, be graduates of an accredited nursing program, have earned a 3.00 GPA in the general education courses at an accredited
institution, and demonstrate substantial involvement in professional nursing within the past two years as an RN in clinical practice.

Students in the RN-to-MSN pathway are required to take the following bridge course:

- NURS 595 - RN to MSN Transition: Evidence Based Community Health Nursing Credits: 3

Note:

After completion of the bridge course, students choose one of the seven concentrations and meet all requirements of the graduate program.

Master’s International

The MSN prepares nurses for a variety of leadership roles in health care delivery systems. Courses are held on the Fairfax Campus and in distributed local health care facilities. Most classes are offered after 4 p.m., Monday through Friday. Mason is a public institution with excellent tuition rates for those who qualify for Virginia residency. Peace Corps volunteers accepted into the MSN program who are not Virginia residents may be eligible for the tuition support program to obtain the in-state rate. The program has been rated in the top 50 graduate nursing programs by U.S.News & World Report.

The Master’s International (MI), a joint program of Mason and the Peace Corps, enables participants to prepare for Peace Corps service while earning the MSN. Participants apply separately to the Peace Corps and to Mason. The MSN offers several concentrations, but two are more appropriate to the Peace Corps experience: advanced clinical nursing, a 38-credit program, and nursing administration, a 37-credit program. Students are able to complete initial requirements of 31 or 32 credits within one year (to include summer sessions). Six credits are earned as practicum credits for the overseas Peace Corps service. Students return to Mason for their final project presentation, during which they discuss and share their Peace Corps experiences with faculty and other MSN students.

Admission Requirements for MI

Applicants should hold a BSN. They must submit a completed application for graduate admission, along with the nonrefundable application fee; application for Virginia in-state rates for those claiming eligibility; original transcripts from all previously attended colleges or universities; GRE scores (cumulative undergraduate GPA may allow for waiver of the entrance exam requirement); two letters of recommendation from professional sources; résumé; and a goals statement.

Applications are reviewed throughout the year for admission to either the fall or the spring semester, although new students may take their initial course during Summer Term. Students accepted into the program but waiting for notification of acceptance from the Peace Corps may begin their master’s program but will not be eligible for tuition support until they have been accepted into the Peace Corps.

For more information about Master’s International, contact the Peace Corps regional office at 1-800-424-8580. For the Fellows/USA program, call the above number and then extension 1440.

Master's Level Certificate

Forensic Nursing Graduate Certificate

Banner Code: HH-CERG-FRNN
This program provides advanced education at the graduate level to students who are actively involved or wish to pursue a career in forensic nursing. The certificate will provide the educational requirements for certification as a sexual assault nurse examiner (SANE) through the International Association of Forensic Nurses (IFAN) and as a certified forensic nurse through the American College of Forensic Examiners (ACFE).

Certificate Requirements

Applicants must have a current nursing license and a bachelor’s degree from an accredited institution of higher education. Courses are open to other graduate students, with the exception of NURS 734, which requires students to have a current nursing license.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (15 credits):

- NURS 733 - Introduction to Forensic Science Credits: 3
- NURS 734 - Role of the Sexual Assault Nurse Examiner and Interpersonal Violence Credits: 3 *
- NURS 735 - Crime Lab and Crime Scene Investigation Credits: 3
- NURS 736 - Psychological and Legal Aspects of Forensic Science Credits: 3
- NURS 737 - Investigation of Injury and Death Credits: 3

Note:

*Students who are currently certified as a SANE take GCH 602 Global Health Issues Related to Violence in place of NURS 734.

Nursing Administration Graduate Certificate

Banner Code: HH-CERG-NUAD

This program offers formal study in theory and practice in nursing administration in the health care delivery system.

Certificate Requirements

Applicants must hold a master's degree in nursing. Application is made through CHHS.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses

- NURS 763 - Administrative Theory in Nursing Credits: 3
- NURS 765 - Practicum in Nursing Administration I Credits: 3
- NURS 768 - Practicum in Nursing Administration II Credits: 3

Electives
• Six graduate credits as approved by the student’s advisor

Total: 15 credits

Nursing Education Graduate Certificate

Banner Code: HH-CERG-NUED

This program combines foundation courses in education with courses in the principles and practices of nursing education. It prepares students to function in nursing educational roles in academic and nonacademic settings.

Certificate Requirements

Applicants must hold a master's degree in nursing. Application is made through CHHS.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (15 credits)

- NURS 556 - Principles of Assessment and Evaluation in Nursing Education Credits: 3
- NURS 726 - Perspectives in Nursing Education Credits: 3
- NURS 727 - Application of Nursing Education Principles to Curriculum and Program Development Credits: 3
- NURS 728 - Practicum and Seminar in Nursing Education I Credits: 3
- NURS 729 - Practicum and Seminar in Nursing Education II Credits: 3

Notes:

Students who qualify for a 3-credit practicum because of their educational experience may choose the remaining 3 credits from courses designated by the graduate nursing program.

Doctoral Degree

Nursing, PhD

Banner Code: HH-PHD-NURS

The PhD in Nursing Program builds on the MSN degree and requires a minimum of 48 credit hours beyond the master's. The objective of the program is to prepare nurses for executive and educational roles in nursing and health care and to conduct research. Graduates of the program exemplify the administrative and the leadership characteristics essential to assuming executive roles; conduct and support research in nursing and health care ethics, health care administration, health policy, and nursing education; and influence the formation and implementation of public policy in health care through analysis of sociocultural, economic, fiscal, political, ethical, and governmental processes.
Admission Requirements

In addition to fulfilling admission requirements for degree status in CHHS, applicants must hold a master’s degree in nursing from an accredited program equivalent to 30 credits or a master’s degree in a related health field with a baccalaureate degree in nursing. They must have earned a minimum GPA of 3.50 on a 4.00 scale in a master’s program. They also must show evidence of one year of experience as an RN prior to enrollment.

Other requirements are as follows:

- For international students, a TOEFL score of at least 250 (computer-based exam) or 600 (paper-based exam)
- Evidence of current licensure to practice professional nursing. Students on foreign student visas must present evidence of their country’s nursing licensure or the equivalent.
- Three letters of recommendation from professional or academic sources, with at least two of the references from people who have had contact with the applicant within the past two years
- Interview with one or more members of the doctoral admissions committee
- Writing sample describing goals in pursuing preparation for the PhD
- Evidence of prerequisite graduate-level course work in applied statistics (past two years)
- A résumé of professional experience

Students are admitted for fall semester only. All materials for admission must be submitted to the CHHS Admissions Office by March 1 of the year of application.

Students must supply official transcripts documenting satisfactory grades for graduate-level semester credits (as designated by the educational institution where taken), as well as official catalog descriptions of each course petitioned for transfer. Students may transfer up to 12 credits from other academic institutions. Transfer credits may be applied to degree requirements pending approval from the director of the program.

Other requirements are as follows:

- Successfully complete the program of study outlined in the PhD curriculum.
- Successfully complete a written doctoral candidacy comprehensive exam after completing all PhD credit requirements, except NURS 998 and 999.
- Successfully pass the final oral doctoral dissertation defense, and submit the doctoral dissertation approved by the doctoral dissertation committee, the director of doctoral program, and the CHHS dean. (The dissertation is submitted in the approved format to University Libraries and the director of the doctoral program.)
- Complete application material for graduation and the PhD degree in accordance with prevailing Mason policies

Advancement to Candidacy

After students have successfully completed the qualifying exam and all required course work, the director of the School of Nursing doctoral program approves advancement to candidacy.

Dissertation Proposal

The proposal must focus on a topic in nursing and be approved by the doctoral dissertation committee, the doctoral program director, and the CHHS dean. The dissertation proposal and written dissertation must be consistent with the guidelines outlined in Mason’s Guide for Preparing Graduate Theses, Dissertations, and Projects.

Doctoral Dissertation
Before enrolling for dissertation credit, the student must have advanced to candidacy. The completed dissertation must be approved by the doctoral dissertation committee, the doctoral program director, and the CHHS dean.

**Final Oral Doctoral Exam**

The doctoral dissertation committee chair, on preliminary approval of the doctoral dissertation by the committee, petitions the doctoral program director in the School of Nursing to schedule the final oral doctoral exam, which includes a defense of the doctoral dissertation. The final oral doctoral exam also demonstrates the candidate’s intellectual command and maturity of judgment in the area of emphasis chosen by the candidate and approved by the doctoral dissertation committee. At the close of the final oral doctoral exam, the committee makes a final judgment regarding approval of the doctoral dissertation and successful completion of PhD degree requirements.

**Time Requirements**

Students must complete all planned course work, including electives, and advance to candidacy within six years of admission to degree or provisional status in the PhD program. The student must successfully complete the doctoral dissertation, final oral doctoral exam, and all PhD degree requirements within five years following the semester of advancement to candidacy.

**Degree Requirements**

The PhD in Nursing Program offers an individualized area of concentration (minimum 48 credits). Before advancing to candidacy and enrolling for dissertation credit (12 credits), students must have their program of study approved by the director of the doctoral program.

▲ **Concentration in Individualized Study (INDV)**

The prerequisite for this concentration is HHS 597 Approaches to Quantitative Data Analysis in Health Care Research or the equivalent. Other prerequisites are determined individually.

**Scientific Base/Research Core (21 credits)**

- NURS 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
- NURS 805 - Advanced Quantitative Data Analysis for Health Care Research II Credits: 3
- NURS 855 - Ethics in Health Administration Credits: 3
- NURS 875 - Research Internship Credits: 1-3
  Students must take 3 credit hours.
- NURS 920 - Qualitative Research in Nursing and Health Care Credits: 3
- NURS 930 - Quantitative Methods in Nursing and Health Care Credits: 3
- NURS 955 - Philosophical Bases of Inquiry Credits: 3

**Individualized Core (15 credits)**

- NURS 808 - Translating Nursing and Health Care Research into Evidence-Based Policy Credits: 3
- NURS 809 - Research Design and Methods in Nursing and Health Care Credits: 3
Electives (9 credits) - Students must complete a cohesive set of existing doctoral-level courses designed with their advisor and program director to contribute to their program of research. Examples may include coursework in nursing administration, biostatistics, bio-terrorism, conflict analysis, nursing education, gerontology, and cultural studies.

Dissertation (minimum 12 credits)

- NURS 998 - Doctoral Dissertation Proposal Credits: 3 (may be repeated up to four times)
- NURS 999 - Doctoral Dissertation Credits: 1-9

Total: 48 credits

Global and Community Health

Phone: 703-993-3126
web: chhs.gmu.edu/gch/

Faculty

Professors: Howell (associate dean for research and program evaluation), Butler, Metcalf, Sluzki, Gerber (chronic illness & disability center director), Whittington (associate dean for academic affairs)

Associate Professors: Baghi, Pawloski (chair), Keyser

Assistant Professors: Gewa, Jacobsen, Rudowski, Webster, Weinstein, Winter

Instructors: Freeborne, Gaston, Gillette

The Department of Global and Community Health (GCH) is an academic department within the College of Health and Human Services (CHHS), and as such it echoes the college’s overall goals. Specifically, the educational mission of GCH is to provide undergraduate and advanced degrees in health-related disciplines centered in global and community issues. Its research mission is to promote and develop solid and meaningful research programs that help define and address health issues and the needs of affected populations at the regional and global level. Its service mission is to increase the awareness of these problems, enhance health-promoting information, and collaborate with other organizations toward enhancing community, national, and international health.

Undergraduate Degree

Community Health, BS

Banner Code: HH-BS-COMH
This degree prepares students with a basic knowledge and understanding of public health, the health care system, and issues and policies related to health promotion, disease prevention, and education. The focus is to understand health issues related to specific communities and larger populations at the national and international levels.

Public health and community health professionals work in partnership with other professionals in private and public community organizations and are expected to confront complex behavioral, cultural, and social health issues within communities. The skills and knowledge gained through this program prepare graduates to address the local, national, and global health needs of communities and populations, providing understanding, education, monitoring, evaluation, and interventions within a community setting.

Students majoring in Community Health may elect one of four specializations: Global Health, Health Education, Nutrition, or Pre-Health Professions. The program may be completed on a full-time or part-time basis. Interested students are encouraged to contact the Department of Global and Community Health before admission.

A criminal background check may be required of students prior to beginning the internship if the organization requires one. A minimum grade of C must be maintained in all major courses. Students may substitute two 3-credit GCH courses for the internship, depending on the student’s work experience, with their advisor’s approval.

Degree Requirements

General Education (38 credits)

Written Communication:

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Oral Communication:

Choose one:

- COMM 100 - Public Speaking Credits: 3
- COMM 101 - Interpersonal and Group Interaction Credits: 3

Quantitative Reasoning:

- STAT 250 - Introductory Statistics I Credits: 3

Information Technology:
• IT 103 - Introduction to Computing Credits: 3

Literature:

• An approved University General Education literature course.

Arts:

• An approved University General Education arts course.

Natural Science:

• BIOL 124 - Human Anatomy and Physiology Credits: 4
• BIOL 125 - Human Anatomy and Physiology Credits: 4
  Required for the Health Education, Global Health and Nutrition concentrations.

  or

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 303 - Animal Biology Credits: 4
  Required for the Pre-Health Professions concentration.

Western Civilization:

Choose one of the following:

• HIST 100 - History of Western Civilization Credits: 3
• HIST 125 - Introduction to World History Credits: 3

Global Understanding:

• GCH 205 - International Health Credits: 3

Social Science:

• PSYC 100 - Basic Concepts in Psychology Credits: 3

Community Health Major Core (30 credits)

• GCH 295 - Nutrition for Health Professionals Credits: 3
• GCH 332 - Health and Disease Credits: 3
• GCH 350 - Health Education Credits: 3
• GCH 360 - Health and Environment Credits: 3
• GCH 411 - Health Program Planning Credits: 3
• GCH 412 - Fundamentals of Epidemiology Credits: 3
• GCH 460 - Public Health Research and Methods Credits: 3
• HAP 301 - Health Care Delivery in the United States Credits: 3
• HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3
Choose one of the following:
• STAT 350 - Introductory Statistics II Credits: 3
• STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Concentrations: Complete One

▲ Global Health Concentration (GLOH): 28 credits

The global health concentration is designed for students interested in global public health and is particularly focused on improving health conditions in developing countries.

• GCH 310 - Health Behavior Theories Credits: 3
• GCH 405 - International Health Policy and Practice Credits: 3
• BIOL 246 - Introductory Microbiology Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Foreign Language (9 credits)

Global Health Electives (9 credits)

Three courses as approved by the department.

▲ Health Education Concentration (HEAL): 27 credits

The health education concentration prepares students to enter a career in health education and to sit for the professional health educators' licensure exam.

• GCH 310 - Health Behavior Theories Credits: 3
• COMM 399 - Special Topics in Communication Credits: 1-3
  Health Communications section only.
• HEAL 470 - Community Health Systems Credits: 3
• HAP 416 - Leadership and Management of Health Systems I Credits: 3
• PSYC 231 - Social Psychology Credits: 3

Health Education Electives (12 credits)

Four courses as approved by the department.
▲ Nutrition Concentration (NUTR): 28 credits

The nutrition concentration is designed for students interested in community nutrition. Students will develop an understanding of nutrition issues and intervention.

- GCH 420 - Strategies for Nutrition Education Credits: 3
- GCH 421 - Community Nutrition Credits: 3
- GCH 422 - Nutrition throughout the Life Cycle Credits: 3
- GCH 423 - Nutrition and Chronic Illnesses Credits: 3
- GCH 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia Credits: 3
- BIOL 246 - Introductory Microbiology Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Nutrition Electives (9 credits)

Three courses as approved by the department.

▲ Pre-Health Professions Concentration (PRHP): 29 credits

The pre-health professions concentration prepares students to apply for graduate programs in the health professions such as medical school, dentistry school, veterinary school, and physical therapy programs. This concentration does not guarantee entrance into a graduate health professional program. It is important to note that, depending on the type of graduate program that students are interested in, additional coursework may be required. It is the student's responsibility to determine the essential criteria for admission to their target schools in consultation with the health professions advising office.

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- PSYC 211 - Developmental Psychology Credits: 3
- PSYC 325 - Abnormal Psychology Credits: 3
Choose one the following:
- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Pre-Health Professions Electives (12 credits)

Four courses as approved by the department.

Electives (23-25 credits)

Total: 120 credits

Bachelor's Level Certificate
Gerontology Undergraduate Certificate

Banner Code: HH-CERB-GERO

The undergraduate certificate program in gerontology prepares students for work with older adults, as well as with professionals who are already working with the elderly. The program provides a background of basic knowledge in gerontology and prepares students in professional skill areas such as counseling, recreation, social work, nursing, and administration.

The certificate program is administered by CHHS. Three other academic units participate in the program: the College of Education and Human Development, the Department of Psychology, and the Department of Sociology and Anthropology. A Gerontology Certificate Committee determines program policy and curriculum.

Academic advising and an application form are available through CHHS.

Certificate Requirements

The certificate program consists of 24 credits. Students receiving the certificate must already hold a baccalaureate degree or have earned one from Mason by the time they receive the certificate.

Core Courses (12 credits)

Select four from the following:

- GCH 480 - Health Maintenance and Health Aspects of Aging Credits: 3
- NURS 505 - Case Management Credits: 3
- NURS 570 - Cultural Dimension of Aging Credits: 3
- PSYC 415 - Psychological Factors in Aging Credits: 3
- SOCI 441 - The Sociology of Aging Credits: 3
- SOCW 483 - Selected Approaches to Social Work Intervention Credits: 3

Gerontology Practicum (6 credits)

Students must have completed at least 9 credits of core courses before enrolling in the practicum.

- GCH 498 - Global and Community Health Internship Credits: 6

Electives (6 credits)

Select from the following:

- reading and research in gerontology from any department
- GCH 332 - Health and Disease Credits: 3
- HEAL 110 - Personal Health Credits: 3
- HEAL 323 - Program Leadership and Evaluation Credits: 3
- HEAL 480 - Special Topics Credits: 1-3
- PHED 415 - Student Teaching in Physical Education Credits: 12
PHED 450 - Physiology of Exercise Credits: 4
PHED 499 - Independent Study in Physical Education and Fitness Credits: 1-3
PRLS 210 - Introduction to Recreation and Leisure Credits: 3
PRLS 310 - Program Planning and Design Credits: 3
PSYC 211 - Developmental Psychology Credits: 3
PSYC 325 - Abnormal Psychology Credits: 3
PSYC 326 - Therapeutic Communication Skills Credits: 3
PSYC 415 - Psychological Factors in Aging Credits: 3
PSYC 423 - Group Psychotherapy Techniques Credits: 3
PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
SOCI 350 - Community, Diversity, and Democracy: A Practicum Credits: 3
SOCI 390 - Sociology of Health, Illness, and Disability Credits: 3
SOCI 599 - Issues in Sociology Credits: 3
SOCW 200 - Introduction to Social Work Credits: 3
SOCW 351 - Social Policy and Social Justice I Credits: 3
SOCW 352 - Social Policy and Social Justice II Credits: 3

Total: 24 credits

Nutrition Undergraduate Certificate

Banner Code: HH-CERB-NUTR

This program offers a variety of courses in nutrition for future and present health care professionals, researchers, and others who are commonly faced with community-related nutrition issues. The program is intended to help health care professionals and others who would like to increase their knowledge in nutrition. This certificate is not equivalent to the registered dietitian license and does not provide a license to practice therapeutic nutrition.

Certificate Requirements

Applicants need not have a bachelor’s degree. Applications are encouraged from all areas of nursing and health sciences. Application is made through CHHS. A requirement for the certificate is 24 credits of undergraduate course work.

Required Courses (21 credits)

- One sociology or anthropology course (which may include GCH 583) (3)
- One human development course such as in psychology or education (3)
- GCH 295 - Nutrition for Health Professionals Credits: 3
- GCH 420 - Strategies for Nutrition Education Credits: 3
- GCH 421 - Community Nutrition Credits: 3
- GCH 422 - Nutrition throughout the Life Cycle Credits: 3
- GCH 423 - Nutrition and Chronic Illnesses Credits: 3

General Nutrition Electives (3 credits)
Select one of the following:

- CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- GCH 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia Credits: 3 *
- GCH 530 - Nutrition: A Global Perspective Credits: 3
- GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition Credits: 3

Note:

*GCH 466 may be substituted for either GCH 420 or 421.

Total: 24 credits

Undergraduate Minor

Nutrition Minor

Banner Code: NUTR

The minor in nutrition offers a variety of courses for students pursuing undergraduate degrees at Mason. Students who may be interested in completing the minor include those pursuing degrees related to nutrition, health, and education. The minor is intended to increase knowledge of nutrition issues. This minor is not equivalent to the registered dietitian license and does not provide a license to practice therapeutic nutrition.

Course Work

Applications are encouraged from all areas at Mason. Application is made through CHHS. Students are required to take an introductory nutrition course such as GCH 295. To complete the minor, students are required to pass 15 credits of undergraduate course work. At least 6 credits must be completed at Mason, and no more than 3 credits of C- or D in the minor are accepted.

Students should consult the Academic Policies section of this catalog for more information on the university-wide requirements for minors.

Minor Requirements

Required Courses (12 credits)

- GCH 420 - Strategies for Nutrition Education Credits: 3
- GCH 421 - Community Nutrition Credits: 3
- GCH 422 - Nutrition throughout the Life Cycle Credits: 3
- GCH 423 - Nutrition and Chronic Illnesses Credits: 3
Electives (3 credits)

Select one of the following:

- CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- GCH 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia Credits: 3
  
  Can be used to substitute for either GCH 420 or GCH 421.
- GCH 530 - Nutrition: A Global Perspective Credits: 3
- GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition Credits: 3

Total: 15 credits

Public Health Minor

Banner Code: PUBH

Public health encompasses the great variety of work done by health educators, health administrators and managers, health policymakers, community health practitioners, and health researchers. the public health minor will provide students with a basic understanding of each of the core areas of public health, will introduce students to career opportunities in the fields of global and community health, and will prepare students for admission to graduate programs in public health.

Course Work

Students should consult the Academic Policies section of this catalog for more information on the university-wide requirements for minors.

Minor Requirements

Required Courses (18 credits)

- GCH 205 - International Health Credits: 3
- GCH 412 - Fundamentals of Epidemiology Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
- GCH 360 - Health and Environment Credits: 3

Choose one from the following courses:

- HAP 301 - Health Care Delivery in the United States Credits: 3
- GCH 405 - International Health Policy and Practice Credits: 3

Choose one from the following courses:

- GCH 310 - Health Behavior Theories Credits: 3
- GCH 350 - Health Education Credits: 3
Total: 18 credits

Master's Degree

Epidemiology and Biostatistics, MS (CHHS)

Banner Code: HH-MS-EBST

The program prepares participants to apply epidemiological and statistical principles to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies, such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations with the need to design experiments for medical and health services research. Graduates are expected to analyze and interpret increasingly complex, non experimental health care data. The degree is taught jointly by faculty from the Department of Statistics in the Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in CHHS.

Admission Requirements

Applicants must hold a baccalaureate degree in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Courses in calculus at the undergraduate level through multivariate calculus equivalent to Math 113, 114, and 213 with a grade of B or better are required for admission to the program. Applications to the degree program are made through CHHS. Admission decisions are made by a joint faculty committee from the Department of Statistics and the Department of Global and Community Health.

Degree Requirements

Students must complete 36 credits of graduate course work. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

Core Requirements (15 credits)

- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3

Epidemiology Electives (6 credits)

Select a minimum of two courses from the following:

- GCH 551 - Research Methods in Rehabilitation Science Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
Statistics Electives (9 credits)

*Select a minimum of three courses from the following:

- Analysis (3)
- STAT 544 - Applied Probability Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3

Electives (6 credits)

- Choose two electives (6 credits) in consultation with the academic advisor. Students may choose to work with their advisor to conduct an epidemiology/biostatistics research project.

Total: 36 credits

Global Health, MS

Banner Code: HH-MS-GLOH

This degree incorporates epidemiology and biostatistics, region-based nutrition, cross-cultural perspectives in mental health issues, community health assessment, program evaluation, human resource concerns, international health systems and organizations, refugee and internally displaced people health issues, and international health research. Practicum or thesis options allow students to explore in situ current dilemmas, demands, and health services with a global focus and perspective.

Graduates of this program will be given the knowledge base and skills to work and conduct research within the global health environment. Through course work and experiential learning, students will be prepared to work in the diverse cultural and multidisciplinary environments inherent to global health. Students will learn about the fundamentals of global public health, including epidemiology, environmental health, global health policies, and sociocultural influences on health and behavior. Students will also be trained on how to collaborate among nonprofit, governmental, and business sectors. Graduates will be prepared to work in international health organizations such as nongovernmental organizations (NGOs), governmental organizations, and multilateral organizations, or may choose to pursue a research pathway and continue toward a terminal degree.

Admission Requirements
Admission to the program requires a bachelor’s degree from an accredited institution of higher education with a minimum GPA of 3.00 in the last 60 credits. Undergraduate courses in statistics, anthropology or sociology and natural sciences are helpful. In addition, at least 6 credits of a foreign language or equivalent are prerequisites for students who are not already fluent in a second language. Applications to this program are made through the CHHS.

Options

Practicum Option

For the practicum option, which entails the application of an idea or theory through fieldwork, students will be required to complete two practica of 112 hours each. Both practica must be performed within a global health agency under the guidance of a preceptor and a faculty advisor. Students are encouraged to conduct one practicum abroad and one in the Washington DC region. As part of each practicum, students must attend a seminar course, complete a project, and produce a formal report and presentation.

Thesis Option

Thesis option students will select a thesis director who will guide the work and be the ultimate judge of its acceptability. The director must be within the Department of Global and Community Health. Thesis topics must complement one of the areas of GCH faculty expertise, which include epidemiology, biostatistics, rehabilitation science, chronic illness, mental health, social networks, gerontology, nutrition, and health behavior. Students must conduct an original research project that employs a standard research design to collect data and test a theory. Students must develop a research proposal and have it approved by their advisor before beginning the research project. Students must register for 6 hours of thesis research, but completion of these hours is not sufficient to satisfy the thesis requirement. The final thesis must conform to University Libraries guidelines.

Degree Requirements

Students complete a total of 42 credits of graduate course work, including either a practicum or a thesis option. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses. Students must maintain a 3.00 GPA to graduate from the master’s program.

Required Core Courses (27 credits)

- COMM 620 - Health Communication Credits: 3
- GCH 530 - Nutrition: A Global Perspective Credits: 3
- GCH 543 - Global Health: Trends and Policies Credits: 3
- GCH 560 - Environmental Health Credits: 3
- GCH 590 - International Health Organizations Credits: 3
- GCH 601 - Introduction to Biostatistics Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- HAP 621 - Management of Health Service Organizations Credits: 3

Practicum or Thesis Option (6 credits)

Students may register for the practicum or thesis only with approval from their advisor and after they have completed at least 27 credits of the program.
Practicum option:
- GCH 788 - Public Health Research I Credits: 3
- GCH 789 - Public Health Research II Credits: 3

Thesis option:
- GCH 798 - Practicum in Public Health I Credits: 3
- GCH 799 - Practicum in Public Health II Credits: 3

Electives (9 credits from the following)
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- COMM 506 - Communication in International Organizations Credits: 3
- COMM 656 - Global Communication Credits: 3
- EOS 704 - Spatial Analysis and Modeling of Population Credits: 3
- GEOG 540 - Medical Geography Credits: 3
- GCH 502 - U.S. Role in Global Health, Nutrition, and Population Credits: 3
- GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition Credits: 3
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 726 - Advanced Seminar in Epidemiology Credits: 3
- GOVT 641 - Seminar in Global Systems Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 1-3
- PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3

Total: 42 credits

Public Health, MPH

The Master of Public Health (MPH) emphasizes a skill-set tailored to expanding public health-related needs. The curriculum includes all the core disciplines of public health – epidemiology, biostatistics, health administration and policy, social and behavioral sciences, and environmental health – as well as additional courses in nutrition, global health and other cross-disciplinary topics. In addition to required coursework in each of the core disciplines and a mandatory practical experience, students will pursue a concentration in community health, epidemiology, global health, or health administration and policy. The coursework and practicum experience will prepare graduates of the program to work for agencies, businesses, and organizations that seek to improve public health at the local, national, and global level. The MPH will follow the curriculum guidelines set by the Council on Education for Public Health (CEPH), and the Department will apply for CEPH accreditation after the first group of students graduate as required by CEPH (http://www.ceph.org/).

The Master of Public Health program comprises 42 credit hours, distributed among the following categories of courses: Public Health Core (15 credits), Professional Development core (12 credits), and a concentration (15 credits). Concentrations will include community health, epidemiology, global health, and public health administration. These requirements are based on
guidelines from the Council for Education in Public Health (http://www.ceph.org/). All students will take a comprehensive master’s exam that will assess mastery of key learning objectives.

Admission Requirements

Admission to the program is competitive, and a variety of criteria are evaluated in the admission process: the strength of the undergraduate record and any post-baccalaureate course work, the GRE general examination, professional goals and experience, letters of recommendation, and evidence of the ability to write and conduct research at the graduate level. Although the GRE is required, it is only one of several areas of evaluation in the admission process. Some background in statistics, biology, and the social sciences is preferred. With the exception of international applicants, the GRE may be waived at the discretion of the department for those who hold advanced degrees.

The application deadline is April 1 for fall and November 1 for spring. Late applications will be considered on a space-available basis. Those who miss the application deadline may apply through Non-degree Studies to enroll in an MPH course, as long as they have achieved a 3.0 GPA or above in their undergraduate degree. A maximum of nine credits may be taken in non-degree status. Students in non-degree status who are latter admitted to the MPH program may petition for courses taken as non-degree to apply toward the degree.

Degree Requirements

Students must complete 42 credits of graduate course work. Each course can be used to fulfill only one requirement. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

Public Health Core (15 Credits)

- GCH 601 - Introduction to Biostatistics Credits: 3
  or approved statistics course.
- GCH 560 - Environmental Health Credits: 3
- GCH 610 - Foundations of Health Education and Behavior Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3

Choose one from the following:

- GCH 590 - International Health Organizations Credits: 3
  Must be taken by those in the Global Health Concentration
- HAP 680 - Applied Public Health Leadership and Management Credits: 3
- HAP 678 - Introduction to the U.S. Health System Credits: 3

Professional Development Core (12 Credits)

- GCH 555 - Human Biology Credits: 3
Licensed health professionals may select an elective as approved.

Choose one of the following:

- HAP 680 - Applied Public Health Leadership and Management Credits: 3
- GCH 691 - Project Management in Public Health Credits: 3

Practicum or Thesis Option

Students may register for 6 credits of practicum or thesis only with approval from their advisor and after they have completed at least 27 credits of the program.

**Practicum Option**

For the practicum option, which entails the application of an idea or theory through fieldwork, students will be required to complete two practica of 112 hours each. Both practica must be performed within a public health agency under the guidance of a preceptor and a faculty advisor. As part of each practicum, students must attend a seminar course, complete a project, and produce a formal report and presentation during each practicum.

**Thesis Option**

Thesis option students will select a thesis director who will guide the work and be the ultimate judge of its acceptability. The director must be within the Department of Global and Community Health. Thesis topics must be related to a subject within their chosen concentration. Students must conduct an original research project that employs a standard research design to collect data and test a theory. Students must develop a research proposal and have it approved by their advisor before beginning the research project. Students must register for 6 hours of thesis research, but completion of these hours is not sufficient to satisfy the thesis requirement. The final thesis must conform to University Libraries guidelines.

- GCH 798 - Practicum in Public Health I Credits: 3
- GCH 799 - Practicum in Public Health II Credits: 3

- GCH 788 - Public Health Research I Credits: 3
- GCH 789 - Public Health Research II Credits: 3

Complete one concentration from the following choices:

▲ **Community Health Concentration (15 Credits)**

Community health seeks to improve the health of communities. It includes private and public efforts of individuals, groups, and organizations that promote, protect, and maintain the health of populations. The community health concentration emphasizes a health education and behavior approach and prepares students to address social and behavioral factors affecting the health of communities. Through coursework and opportunities for practical application, students will learn to develop, implement, manage, and evaluate health promotion and disease prevention strategies.
Choose two of the following:

- GCH 502 - U.S. Role in Global Health, Nutrition, and Population Credits: 3
- GCH 543 - Global Health: Trends and Policies Credits: 3
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- COMM 620 - Health Communication Credits: 3
- COMM 705 - Intercultural Health and Risk Communication Credits: 3

Elective: 3 credits as approved by advisor

▲ Epidemiology Concentration (15 Credits)

Epidemiology is the study of the factors that influence the occurrence, distribution, prevention, and control of disease. The epidemiology concentration emphasizes the development of skills such as study design, data collection and management, data analysis and interpretation, and communication of research findings.

- GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
  or approved course.

Choose three of the following:

At least one course must be GCH 722 or GCH 732.

- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- GCH 551 - Research Methods in Rehabilitation Science Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 726 - Advanced Seminar in Epidemiology Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3

Elective: 3 credits as approved by advisor

▲ Global Health Concentration (15 Credits)

Global health is the study of health problems that extend across borders. Professionals working in global health need to be familiar with a wide range of issues, including infectious disease, nutrition, environmental health, the social and cultural factors.
that influence health and health behavior, and health policy and management. The global health concentration gives students the opportunity to develop knowledge and skills in all these areas through both coursework and practical experiences. Students completing this concentration will be prepared to design, implement, monitor, and manage global health programs.

- GCH 543 - Global Health: Trends and Policies Credits: 3
- GCH 530 - Nutrition: A Global Perspective Credits: 3

Choose two of the following:

- GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition Credits: 3
- GCH 594 - Special Topics in Health Care Credits: 3
  Global Health focus section only
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 751 - Nutritional Assessment, Monitoring, and Surveillance Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3

Elective: 3 credits as approved by advisor

▲ Health Administration and Policy Concentration (15 Credits)

The health administration and policy concentration provides courses that explain the organization, financing, and delivery of health services and public health systems in the United States and prepare students to apply the principles of program planning, development, budgeting, management, and evaluation to organizational and community initiatives.

- HAP 660 - Health Policy Formation and Implementation Credits: 3
- HAP 715 - Health Economics Credits: 3

Choose two of the following:

- HAP 540 - Introduction to Emergency Preparedness/Disaster Recovery for Health Care Professionals Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- HAP 661 - Policy Development and Analysis for Community Health Programs Credits: 3
- HAP 678 - Introduction to the U.S. Health System Credits: 3
- HAP 680 - Applied Public Health Leadership and Management Credits: 3
- HAP 702 - Managerial Accounting in Health Care Credits: 3
- HAP 703 - Financial Management in Health Systems Credits: 3
- HAP 704 - Contemporary Issues in Health Systems Management Credits: 3
- HAP 705 - Strategic Management and Marketing in Health Care Credits: 3
- HAP 706 - Integrated Health Systems Management Credits: 3
- HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions Credits: 3
- HAP 764 - Health Policy and Government Payment Systems for Health Care Services Credits: 3
Elective: 3 credits as approved by advisor

Total: 42 credits

Master's Level Certificate

Biostatistics Graduate Certificate (CHHS)

Banner Code: HH-CERG-BSTN

This 15 credit certificate prepares participants to apply statistical methods to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies, such as the National Institutes of Health. It is also aimed at and professionals in pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations who design medical experiments and analyze and interpret increasingly complex health care data. In addition, the program helps prepare students to begin careers in such organizations.

The certificate is a joint graduate certificate program from the Department of Statistics in the Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in CHHS. Courses are taught by faculty members from both programs.

Admission Requirements

Applicants must hold a bachelor’s degree from a regionally accredited institution of higher education in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. A course in statistics and a course in college algebra with a grade of B or higher are required for admission to the program.

Certificate Requirements

Students must complete one course from each of the five groups. A minimum of 6 credits must be taken through the health science program.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

- GCH 712 - Introduction to Epidemiology Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3

Choose one of the following two courses:
- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 554 - Applied Statistics Credits: 3

Choose one of the following three courses:
• GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
• STAT 656 - Regression Analysis Credits: 3
• STAT 668 - Survival Analysis Credits: 3

Choose one of the following two courses:
• NURS 805 - Advanced Quantitative Data Analysis for Health Care Research II Credits: 3
• STAT 662 - Multivariate Statistical Methods Credits: 3

Total: 15 credits

Epidemiology Graduate Certificate

Banner Code: HH-CERG-EPID

Epidemiology is the study of the factors that influence the occurrence, distribution, prevention, and control of disease. This certificate prepares students to apply the principles and methods of epidemiology to health research. The program emphasizes the development of skills such as study design, data collection and management, data analysis and interpretation, and communication of research findings. All students in the certificate program must complete introductory courses in epidemiology and biostatistics and then choose four elective courses in areas such as infectious disease epidemiology, chronic disease epidemiology, social epidemiology, and advanced epidemiological methods.

Certificate Requirements

Students applying to the certificate must hold a bachelor’s degree. Application is made through the CHHS. Course work in statistics, health science, biological science, and the social sciences are beneficial in preparation for this certificate. Candidates must have 18 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (6 credits)

• GCH 601 - Introduction to Biostatistics Credits: 3 (or an approved graduate-level statistics course)
• GCH 712 - Introduction to Epidemiology Credits: 3

Electives (select 12 credits from the following)

• GCH 605 - Social Epidemiology Credits: 3
• GCH 680 - International Research Ethics and Methods Credits: 3
• GCH 722 - Infectious Disease Epidemiology Credits: 3
• GCH 726 - Advanced Seminar in Epidemiology Credits: 3
• GCH 732 - Chronic Disease Epidemiology Credits: 3
• GCH 752 - Nutritional Epidemiology Credits: 3

Total: 18 credits
Note:

Other epidemiology-related course may count toward the certificate with prior approval of the program director.

Gerontology Graduate Certificate

Banner Code: HII-CERG-GERO

The graduate certificate program in gerontology combines theoretical and applied course work in aging with the student’s graduate curriculum in one of several departments. Because gerontology is by definition multidisciplinary, students are required to take course work outside their major field. Two other academic units participate in the program: the Department of Psychology and the Department of Sociology and Anthropology. The program is administered by CHHS and supervised by a committee with representatives from the participating academic units.

Certificate Requirements

Applicants must have a bachelor’s degree in nursing or a related discipline. Application is made through CHHS. Candidates must have 18 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Core Courses (6 credits)

- GCH 637 - Normal Aging and Health Deviations Credits: 3
- SOCI 686 - Sociology of Aging Credits: 3

Gerontological Electives (3 credits)

Select at least one of the following:

- NURS 505 - Case Management Credits: 3
- PSYC 592 - Special Topics Credits: 3

Other Electives (3 credits)

Select at least one of the following:

- EDCD 525 - Advanced Human Growth and Development Credits: 3
- EFHP 630 - Exercise, Health, and Fitness Program Development Credits: 3
- SOCI 651 - Health Care Systems Credits: 3

Practicum Requirements (6 credits)

- GCH 770 - Gerontology Practicum I Credits: 3
- GCH 771 - Gerontology Practicum II Credits: 3
Total: 18 credits

Global Health Graduate Certificate

Banner Code: HH-CERG-GLOH

This program develops an understanding of global health through a practicum, as well as a sequence of courses that includes global health, epidemiology, nutrition, anthropology, international relations, communications, and geography.

Certificate Requirements

Applicants must hold a bachelor’s degree. Application is made through CHHS. Candidates must have 18 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (12 credits)

- GCH 530 - Nutrition: A Global Perspective Credits: 3
- GCH 543 - Global Health: Trends and Policies Credits: 3
- GCH 590 - International Health Organizations Credits: 3
- GCH 798 - Practicum in Public Health I Credits: 3

Electives (select 6 credits from the following)

- GCH 550 - Introduction to Rehabilitation Science Credits: 3
- GCH 560 - Environmental Health Credits: 3
- GCH 602 - Global Health Issues Related to Violence Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 610 - Foundations of Health Education and Behavior Credits: 3
- GCH 620 - Psychosocial Aspects of Rehabilitation Credits: 3
- GCH 637 - Normal Aging and Health Deviations Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 751 - Nutritional Assessment, Monitoring, and Surveillance Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3
- ANTH 631 - Refugees in the Contemporary World Credits: 3
- COMM 637 - Risk Communication Credits: 3
- GEOG 540 - Medical Geography Credits: 3
- GEOG 581 - World Food and Population Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- HHS 597 - Approaches to Quantitative Data Analysis in Health Care Research Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 1-3
Total: 18 credits

**Nutrition Graduate Certificate**

**Banner Code:** HH-CERG-NUTR

The graduate certificate in nutrition prepares students to apply the principles and latest scientific evidence and methods of nutrition to health practice and research among different populations. The program emphasizes understanding the role of nutrition in population health and well-being and the development of skills required in the practice, analysis, and interpretation of nutrition-related information and data among individuals and populations. Students will acquire competencies in the following areas: public health nutrition framework, assessment and monitoring; research design and methodology; and planning and evaluation of nutrition programs.

**Admission**

Admission to this certificate requires a bachelor’s degree from an accredited institution of higher education with a minimum GPA of 3.00 in the last 60 credits. Application is made through the CHHS.

**Certificate Requirements**

Undergraduate courses in natural sciences, nursing, health science, and sociology are helpful. A maximum of 3 credits in equivalent course work taken at another college or university can be applied toward the certificate.

Candidates must have 18 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

**Required Courses (12 credits)**

- GCH 530 - Nutrition: A Global Perspective Credits: 3
- GCH 566 - Nutrition and Weight Management Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 751 - Nutritional Assessment, Monitoring, and Surveillance Credits: 3

**Electives (select two of the following) (6 credits)**

- GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition Credits: 3
- GCH 611 - Planning, Implementing, and Evaluating Health Promotion Programs Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3
- GEOG 581 - World Food and Population Credits: 3

Total: 18 credits
Rehabilitation Science Graduate Certificate

Banner Code: HH-CERG-RHBS

The graduate certificate in rehabilitation science prepares participants to apply research and statistical techniques to the study of the enabling-disabling process. The Institute of Medicine defines rehabilitation science as "a field of study that encompasses basic and applied aspects of the health sciences, social sciences, and engineering. It is the melding of knowledge from several disciplines to understand the fundamental nature of the enabling-disabling process." Students will acquire competencies in the following areas: rehabilitation and recovery framework, research design and methodology, statistics, and conduct of applied rehabilitation research.

Admission

Admission to this certificate requires a bachelor’s degree in a discipline related to health sciences from an accredited institution of higher education with a minimum GPA of 3.00 in the last 60 credits. Such fields include, but are not limited to, health science, biostatistics, biology, nursing, medicine, physical therapy, occupational therapy, physiatry, engineering, and psychology. Application is made through the CHHS.

Certificate Requirements

A maximum of 3 credits in equivalent course work taken at another college or university can be applied toward the certificate.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (12 credits)

- GCH 510 - Scientific Basis for Pain, Fatigue, and Suffering in Chronic Illness and Disability Credits: 3
- GCH 550 - Introduction to Rehabilitation Science Credits: 3
- GCH 551 - Research Methods in Rehabilitation Science Credits: 3
- HHS 597 - Approaches to Quantitative Data Analysis in Health Care Research Credits: 3

Electives (3 credits)

Select one of the following:

- GCH 506 - Clinical Exercise Physiology Credits: 3
- GCH 620 - Psychosocial Aspects of Rehabilitation Credits: 3
- GCH 637 - Normal Aging and Health Deviations Credits: 3
- GCH 659 - Health Care of Aging Persons with Chronic Illnesses Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- GCH 740 - Applied Physiology: Cardiorespiratory System Credits: 3

- GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3

or
Health Administration and Policy

Phone: 703-993-1929

Faculty

Professors: Hadley, Maddox (chair), Meiners,

Associate Professors: Eckenwiler, Moidu, Cuellar

Assistant Professors: Carle, Cartwright, Kitsantas, Perlin, Wojtusiak, Yang

Instructors: Henderson (director, outreach & education coordinator), Shiver

The mission of the Department of Health Administration and Policy (HAP) is to provide innovative education and research that contributes to improving health and human systems and the quality of life and health for those they serve across the life span. The Department prepares working professionals and those who aspire to careers in health systems and organizations to work as administrators, health technology officers, data security managers, and health policy analysts.

The research and scholarly activities of the department contribute to basic and applied knowledge about the organization and effective management, financing and performance of U.S. health systems and public health services to foster innovation and quality improvement and effective use of information technology by health services researchers, health/social system managers, and public health policy-makers. The Department works with consumers, stakeholders, students, faculty, alumni, research funders, and the community to ensure rigorous, relevant educational programs (including post-graduate professional development), service activities, and the development and timely dissemination of research.

Undergraduate Degree

Health Science, BS

Banner Code: HHH-BS-HSCI

The BS in health science prepares students to become managers and clinicians in a variety of settings, including hospitals; clinics; schools; community health, home care, long-term care, employee health, and managed care organizations; group medical practices; manufacturing, medical technology, and supply organizations; advocacy organizations and professional associations; the insurance industry; and financial consultant services. Concentrations are offered in health systems management and in assisted living administration. An accelerated pathway in health systems management is offered to students who have an associate of science degree in allied health.

The concentration in health systems management traditional and accelerated pathways prepare graduates to serve in entry-level administrative and support positions in a variety of health-related agencies and organizations.
The program may be completed on a full- or part-time basis; the accelerated pathway for graduates of allied health technical programs takes into account the needs of the adult learner. All pathways lead to completion of the objectives of the undergraduate BS program. A criminal background check is required of all students prior to beginning their internship. A minimum grade of C must be obtained in all required courses.

Students must check with their advisor to ensure that all university-wide general education requirements have been met prior to graduation. HAP 498 is a competitive internship elective offered in the student’s final semester as described below.

Degree Requirements

General Education (38 credits)

Written Communication:

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3 (Business section recommended)

Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Oral Communication:

Choose one of the following:

- COMM 100 - Public Speaking Credits: 3
- COMM 101 - Interpersonal and Group Interaction Credits: 3

Quantitative Reasoning:

- STAT 250 - Introductory Statistics I Credits: 3

Information Technology:

- IT 103 - Introduction to Computing Credits: 3

Literature:

- An approved University General Education literature course.

Arts:
• An approved University General Education arts course.

Natural Science:

• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4

Western Civilization:

Choose one of the following:

• HIST 100 - History of Western Civilization Credits: 3
• HIST 125 - Introduction to World History Credits: 3

Global Understanding:

• An approved University General Education global understanding course.

Social Science:

Choose one of the following:

• SOCI 101 - Introductory Sociology Credits: 3
• ANTH 114 - Introduction to Cultural Anthropology Credits: 3

▲ Concentration in Health Systems Management: Traditional Pathway (HMT)

Required Courses (22 credits)

• ACCT 203 - Survey of Accounting Credits: 3
• BULE 302 - Legal Environment of Business Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• HHS 201 - Introduction to Careers in the Health Professions Credits: 3
• MIS 102 - Spreadsheet Applications for Business Credits: 1
• MSOM 303 - Marketing in a Global Economy Credits: 3
• PHIL 309 - Bioethics Credits: 3
• PSYC 100 - Basic Concepts in Psychology Credits: 3

Major Requirements for Pathway (33 credits)

• GCH 300 - Introduction to Public Health Credits: 3
• HAP 301 - Health Care Delivery in the United States Credits: 3
- HAP 360 - Introduction to Health Information Systems Credits: 3
- HAP 395 - Health Care Finance Credits: 3
- HAP 396 - Strategic Health Management and Planning Credits: 3
- HAP 410 - Introduction to Health/Medical Practice Management Credits: 3
- HAP 416 - Leadership and Management of Health Systems I Credits: 3
- HAP 417 - Leadership and Management of Health Systems II Credits: 3
- HAP 442 - Introduction to Health Care Politics and Policy Credits: 3
- HAP 445 - Introduction to Health Services Research Credits: 3
- HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3 (satisfies the university synthesis requirement)

CHHS Electives (9 credits)

- 3 credits of CHHS elective approved by the program coordinator
- HAP 498 - Health Administration Internship Credits: 6
  The internship course (HAP 498) is a 6-credit pathway elective. Students must submit an application and be chosen by a panel of HAP Department faculty. The internship is designed to provide selected students with experience in a real world work environment.

Note:

Students not choosing an internship must select alternative CHHS electives approved by the program coordinator.

General Electives (18 credits)

- Electives are at the student’s discretion.

Total: 120 credits

▲ Concentration in Health Systems Management: Accelerated Pathway for Students with an Associate’s Degree in Allied Health (HMA)

Required Courses (19 credits)

- PHIL 309 - Bioethics Credits: 3
- PSYC 100 - Basic Concepts in Psychology Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- ACCT 203 - Survey of Accounting Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
Major Requirements for Pathway (39 credits)

- GCH 332 - Health and Disease Credits: 3
- HAP 395 - Health Care Finance Credits: 3
- HAP 396 - Strategic Health Management and Planning Credits: 3
- HAP 334 - Role Development for Health Administration Majors Credits: 3 *(bridge course)*
- HAP 360 - Introduction to Health Information Systems Credits: 3
- HAP 301 - Health Care Delivery in the United States Credits: 3
- HAP 410 - Introduction to Health/Medical Practice Management Credits: 3
- HAP 416 - Leadership and Management of Health Systems I Credits: 3
- HAP 417 - Leadership and Management of Health Systems II Credits: 3
- HAP 445 - Introduction to Health Services Research Credits: 3
- HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3 *(satisfies the university synthesis requirement)*

Electives (2 credits)

The internship course (HAP 498) is a 6-credit pathway elective. Students must submit an application and be chosen by a panel of HAP department faculty. The internship is designed to provide selected students with experience in a real world work environment. Students not choosing an internship may select alternative credits through electives approved by the program coordinator.

Additional Credit Awarded (22 credits)

On completion of bridge course (HAP 334), students are awarded 22 credits from the associate’s degree program.

Total: 120 credits

▲ Concentration in Assisted Living Administration (ALA)

Required Courses (19 credits)

- PHIL 309 - Bioethics Credits: 3
- PSYC 100 - Basic Concepts in Psychology Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- ACCT 203 - Survey of Accounting Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3

Assisted Living Concentration Courses (51 credits)
• GCH 300 - Introduction to Public Health Credits: 3
• GCH 332 - Health and Disease Credits: 3
• GCH 480 - Health Maintenance and Health Aspects of Aging Credits: 3
• HAP 395 - Health Care Finance Credits: 3
• HAP 396 - Strategic Health Management and Planning Credits: 3
• HAP 307 - Assisted-Living Management and Philosophy Credits: 3
• HAP 360 - Introduction to Health Information Systems Credits: 3
• HAP 301 - Health Care Delivery in the United States Credits: 3
• HAP 410 - Introduction to Health/Medical Practice Management Credits: 3
• HAP 416 - Leadership and Management of Health Systems I Credits: 3
• HAP 417 - Leadership and Management of Health Systems II Credits: 3
• HAP 460 - Information Technology Project Management Credits: 3
• HHS 465 - Examination and Integration of Professional and Health Care Issues Credits: 3
• NURS 492 - Death, Dying, and Decision Making Credits: 3
• GCH 585 - Care Management of Persons with Alzheimer's Disease and Related Disorders Credits: 3 (satisfies the university synthesis requirement)
• HAP 498 - Health Administration Internship Credits: 6

Internship in assisted living and senior housing or hospitality services as approved by the program coordinator.

**Note:** This internship is designed to provide selected students with project-focused work experience in an assisted living or senior housing or hospitality enterprise under the direction of a preceptor.

**Electives (12 credits)**

• Electives must be taken from a list of electives approved by the department.

**Total: 120 credits**

**Master's Degree**

**Health Systems Management, MS**

**Banner Code:** HH-MS-HSMG

This program provides students with the skills and tools to work as leaders and executive-level managers in evolving health systems, health policy analysts, or consultants and managers of electronic commerce and technology products and enterprises in the health system. The curriculum was developed in response to the demand for advanced health management and policy preparation for a variety of health care and allied health professionals. Five concentrations are offered: executive management, health information systems, health care security and privacy, health policy analysis, and risk management and patient safety.

The program of study offers state-of-the-art technical and humanistic skills so that graduates may serve as leaders, managers, consultants, and health policy advisors and analysts in various settings. Graduates are prepared to work in public and private health care systems (including public health agencies); legislative arenas and policy-related professional and advocacy organizations; and health accreditation and regulatory organizations. The curriculum integrates concepts from a variety of disciplines such as business management, economics, philosophy, organizational behavior, information technology, social psychology, public policy, law, and ethics as they uniquely apply to health systems and technology management, assisted living and senior housing services administration, and health policy formulation.
The interdisciplinary curriculum is designed to prepare graduates with an understanding of the larger sociopolitical, global health, and economic contexts in which the U.S. health system operates. It provides working professionals with leadership knowledge and managerial skills and abilities that contribute to improving the efficiency and effectiveness of health systems and alignment of decisions and resources to optimize organizational and health-related public policy goals. Students examine social imperatives for access to health services and the feasibility, need, and mechanisms of market factors. They create links and alignment between public and private sectors and among voluntary, market, and regulatory forces in the context of a variety of public policy frameworks. Students explore the design and management of seamless systems of care, information technology, and services that support the providers of health-related care and services over the life span continuum. Using ethical principles, students explore approaches to improving access to care and services and the quality and safety of health systems and their integration to maximize quality of life and community health.

Admission Procedures and Requirements

Health care professionals with a baccalaureate degree and at least three years of recent leadership experience in a health or related management, public policy, or technology field are eligible to apply. Applicants must submit the following: transcripts from all previous college-level studies, a letter of interest specifying study goals, a curriculum vita, and a complete Mason graduate admissions form. GRE or GMAT scores may be requested if the applicant does not have a graduate degree or has an undergraduate GPA lower than a 3.00. Applicants are competitively selected. Admitted students begin study in January and August each year. Provisional admission can be made for students whose undergraduate GPA is lower than 3.00, but whose work since school indicates a high likelihood of success in graduate work. Students admitted provisionally with lower than a 3.00 GPA must achieve a 3.00 GPA in the first 12 credits of graduate work.

Program Format and Curriculum Features

The program schedule is geared toward working professionals. The usual schedule for students involves part-time study, comprising two classes (6 credits) per semester. Classes are held primarily in evenings, with some Saturday daytime classes. Selected courses also are available via the Internet.

Courses offer the following unique features:

- Content focuses on individual competencies in analytic decision making, and how services are provided across institutions and levels of care through integrated systems. Services are analyzed according to their effect on individual health status and enrolled populations, and how individuals and groups affect the use of health services and outcomes. Business functions are taught in the context of integrated systems versus individual institutions. For example, financial management examines how risk is incurred and distributed across multiple institutions.

- Management skills are taught from the contexts of leadership in learning organizations and as team leaders managing self-directed professionals across functional and specialized service units. Business and clinical decisions are integrated with competencies in information systems and data management for effective administrative operations in health-related organizations, clinical decision support systems, quality and safety improvement efforts (including evaluation of clinical outcomes), and inter organizational relations and operations.

- Managerial competencies are also taught relating concepts of integrated services and managed care, based on optimization of the delivery of care and services to targeted populations in the community and market. The curriculum prepares graduates to assess health risks, understand consumer behavior, and structure community networks, specialty services, and integrated health systems.

- Health policy curriculum teaches applied public policy skills that support the development and analysis of health policy and the management of political, legislative, and regulatory processes involving the financing and service delivery in the health industry and health-related technology and information management, and governing health professionals practice.

Degree Requirements
The program of study comprises 39 credits: 24 credits from the common core of the degree and another 15 from one of the six concentrations.

Note: If students have not had recent, broad, relevant experience in the U.S. health system, an additional 3-credit core course is required (HAP 678 Introduction to the U.S. Health System), bringing the number of credits required to 42.

Core Courses (24 credits)

- HAP 501 - Business Statistics in Health Service Management Credits: 3
- HAP 586 - Quality Improvement in Health Services Credits: 3
- HAP 621 - Management of Health Service Organizations Credits: 3
- HAP 715 - Health Economics Credits: 3
- HAP 740 - Management of Health Information Systems Credits: 3
- HHS 750 - Legal Issues Relevant to Health Care Administration Credits: 3
- HAP 790 - Health Management Practicum and Capstone Seminar Credits: 3
- HAP 645 - Introduction to Health Sciences Research Credits: 3

▲ Concentration in Executive Management (EMGT)

Required Courses (15 credits)

- HAP 702 - Managerial Accounting in Health Care Credits: 3
- HAP 703 - Financial Management in Health Systems Credits: 3
- HAP 704 - Contemporary Issues in Health Systems Management Credits: 3
- HAP 705 - Strategic Management and Marketing in Health Care Credits: 3
- HAP 706 - Integrated Health Systems Management Credits: 3

Total: 15 credits

▲ Concentration in Health Policy Analysis (HP)

Required Courses (9 credits)

- HAP 642 - Health Policy Development and Analysis Credits: 3
- HAP 730 - Health Care Decision Analysis Credits: 3
- HAP 866 - Politics of Influencing Health Care Policy Credits: 3

Electives (select 6 credits from the following)

- HAP 547 - Regulatory Requirements for Health Care Systems Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- HAP 703 - Financial Management in Health Systems Credits: 3
- HAP 714 - Ethical Issues in Health Administration and Policy Credits: 3
• HAP 727 - Program Evaluations in Health Care Credits: 3
• HAP 745 - Health Care Security Policy Credits: 3
• HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions Credits: 3
• HAP 764 - Health Policy and Government Payment Systems for Health Care Services Credits: 3
  others as approved by advisor

Total: 15 credits

▲ Concentration in Health Care Security and Privacy (HCSP)

Required Courses (12 Credits)

• HAP 735 - Risk Analysis in Health and Bioscience Credits: 3
• HAP 612 - Maintaining Business Continuity in Health Care Credits: 3
• HAP 745 - Health Care Security Policy Credits: 3
• ISA 562 - Information Security Theory and Practice Credits: 3

Elective (3 Credits)

Advisor approved elective related to health Care data or information systems security or policy

Total: 15 credits

▲ Concentration in Health Information Systems (HISN)

Required Courses (12 credits)

• HAP 601 - E-Commerce and On-line Marketing for Health Services Credits: 3
• HAP 709 - Health Care Databases Credits: 3
• HAP 720 - Health Data Integration Credits: 3
• HAP 745 - Health Care Security Policy Credits: 3

Electives (3 credits)

• Approved elective (3)

Total: 15 credits
▲ Concentration in Assisted Living/Senior Housing Administration (ASHA)

Required Courses (6 credits)

- HAP 650 - Assisted Living Management and Operations Credits: 3
- HAP 705 - Strategic Management and Marketing in Health Care Credits: 3

Electives (select 9 credits from the following)

- GCH 585 - Care Management of Persons with Alzheimer's Disease and Related Disorders Credits: 3
- GCH 637 - Normal Aging and Health Deviations Credits: 3
- HAP 662 - Aging and Health Care Policy Credits: 3
- HAP 702 - Managerial Accounting in Health Care Credits: 3
- HAP 703 - Financial Management in Health Systems Credits: 3

Total: 15 credits

▲ Concentration in Risk Management and Patient Safety (RMPS)

Required Courses (12 credits)

- HAP 730 - Health Care Decision Analysis Credits: 3
- HAP 735 - Risk Analysis in Health and Bioscience Credits: 3
  (Students may also meet this requirement by taking courses in the Epidemiology and Biostatistics Program within the Department of Global and Community Health)
- HAP 746 - Health Policy Leadership Credits: 3
- STAT 668 - Survival Analysis Credits: 3

Elective (select 3 credits from the following)

- HAP 547 - Regulatory Requirements for Health Care Systems Credits: 3
- HAP 642 - Health Policy Development and Analysis Credits: 3
- HAP 690 - Independent Study Credits: 1-3
- HAP 720 - Health Data Integration Credits: 3
- HAP 710 - Inferential Statistics in Health Services Research and Management Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
  others as approved by advisor

Total: 15 credits
Master’s International

The MS in health systems management offers high-quality academic preparation in health care management, policy analysis, health information systems, health care security and privacy, and assisted living and senior housing management. Courses are scheduled at the Fairfax Campus and are offered evenings, weekends, and online. Mason is a public institution with excellent tuition rates for those who qualify for Virginia residency. Out-of-state students accepted into both the Peace Corps and the MS program who enroll as a cohort through CHHS are eligible for a 45.5 percent reduction in tuition rates. Students benefit from the university’s proximity to Washington, D.C., by taking classes from leading professors in health policy and adjunct instructors working in government management or nonprofit settings. The Northern Virginia technology corridor provides an excellent location for students who wish to focus on management information systems.

The Master’s International (MI), a joint program of Mason and the Peace Corps, enables participants to prepare for Peace Corps volunteer service while earning the MS in health systems management. Students apply separately to the Peace Corps and to Mason. The 39-credit curriculum provides students with the skills and tools to work as leaders and executive-level managers in evolving health systems; health policy analysts; consultants and managers of electronic commerce and technology products and enterprises in the health system; and executive management of assisted living programs. An accelerated pathway is provided for Peace Corps volunteers to complete 30 credits in one year (including Summer Term). Three semester hours will be earned as internship credits for overseas Peace Corps service. Students return to Mason for their final 6 credits or take the 6 credits online.

Admission Requirements for MI Program

Applicants must submit a completed application for graduate admission along with the nonrefundable application fee; the application for Virginia in-state tuition rates for those claiming eligibility; original transcripts from all previously attended colleges or universities; résumé; and a letter of interest specifying study goals. Scores from a standardized graduate admissions test are not required but may be requested of students who do not have a graduate degree or an undergraduate GPA less than 3.00. Applications are reviewed throughout the year for admission to the fall or the spring semester, although new students may take their initial course during Summer Term. Students accepted into the program but waiting for notification of acceptance from the Peace Corps may begin their master’s program but will not be eligible for tuition support until they are accepted in the Peace Corps.

For more information, call the Peace Corps regional office at 1-800-424-8580. For the Fellows/USA Program, call the above number and then extension 1440.

Master's Level Certificate

Assisted Living/Senior Housing Administration Graduate Certificate

Banner Code: CERG-ASHA

This 15 to 18-credit certificate provides multidisciplinary education in assisted living and senior housing services management. Courses enable students to evaluate, analyze, and synthesize information relative to the aging population, the evolution of assisted living and senior housing services within the U.S. health system, the application of business practices to these services, and current regulatory and policy issues. An additional focus is on biological, psychological, and social aspects of healthy aging, and factors that promote quality of life and independence for seniors with special needs (i.e., memory issues and dementia).

Certificate Requirements
Applicants must hold a bachelor’s degree in business administration, management, or a health-related field, or they may have any bachelor's degree plus 2 year's professional experience in the health care industry. Candidates must have 15-18 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses:

- GCH 585 - Care Management of Persons with Alzheimer's Disease and Related Disorders Credits: 3
- GCH 637 - Normal Aging and Health Deviations Credits: 3
- HAP 650 - Assisted Living Management and Operations Credits: 3
- HAP 705 - Strategic Management and Marketing in Health Care Credits: 3
- HAP 790 - Health Management Practicum and Capstone Seminar Credits: 3 (optional)

* Students without recent, broad, relevant experience in the U.S. health system are required to take an additional 3-credit course:
- HAP 678 - Introduction to the U.S. Health System Credits: 3

Total: 15-18 credits

Health Care Security and Privacy Graduate Certificate

**Banner Code: HHH-CERG-HCSP**

The curriculum is expected to enhance the skills of directors responsible for information and physical security at area hospitals, nursing homes, public agencies, insurance companies, and other health care agencies. The curriculum improves the effectiveness of these directors in bringing about change within their own organization and coordinating activities with counterparts in public and private agencies.

**Admission Requirements**

Applicants must hold a bachelor’s degree. They must submit the Mason application and two letters of recommendation. Knowledge of the health care system and design of databases is not required, but students without this knowledge are required to take additional courses. Application is made through CHHS.

**Certificate Requirements**

Students are expected to have broad health care experience or complete HAP 678, and knowledge of health care databases or complete HAP 709 or INFS 601. Completion of the certificate requires 15 credits. Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

**Required Courses**

- HAP 612 - Maintaining Business Continuity in Health Care Credits: 3
- HAP 735 - Risk Analysis in Health and Bioscience Credits: 3
- HAP 745 - Health Care Security Policy Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
Electives

- Select a minimum of 3 credits of advisor approved electives related to Health Care data or information systems security or policy

Total: 15 credits

Note:

Courses can be taken in any sequence. The recommended sequence is in the order of course numbers.

Health Information Systems Graduate Certificate

Banner Code: HH-CERG-HISN

This certificate prepares clinicians and health care managers to develop and manage health information systems and electronic commerce services. Students learn the development and management of systems and service related to patient records, enterprise data management in health industry, and Telehealth. The certificate is ideal for people with technical and programming skills who have been promoted to new managerial positions in the health care industry and wish to enhance their understanding of health care issues and management techniques. It is also ideal for clinicians and managers with little background in database management who wish to gain more skills and understanding about organizing health databases.

Admission Requirements

Applicants must have a bachelor’s degree. No prior computer programming training is needed, although knowledge of HTML language is assumed. Application is made through CHHS.

Certificate Requirements

Completion of the certificate requires 15-18* graduate credits. Students must complete all courses with a minimum GPA of 3.00.

Required Courses (15 credits)

- HAP 586 - Quality Improvement in Health Services Credits: 3
- HAP 601 - E-Commerce and On-line Marketing for Health Services Credits: 3
- HAP 709 - Health Care Databases Credits: 3
- HAP 720 - Health Data Integration Credits: 3
- HAP 740 - Management of Health Information Systems Credits: 3

Additional Coursework Required

If the student does not have recent, relevant experience in the U.S. health industry, an additional course is required, thus bringing the number of required credits to 18.
Quality Improvement and Outcomes Management in Health Care Systems Graduate Certificate

Banner Code: HH-CERG-QIOM

This certificate prepares working clinicians and administrative support staff in health care organizations to implement quality-improvement initiatives and manage populations of patients to optimize efficiency and effectiveness of care and services. Participants acquire the knowledge and ability to work in interdisciplinary health care teams using the tools and techniques of statistical process control, and selected methods and tools from operations research and quality improvement. In addition, they use information management technology and qualitative decision-making applications to identify opportunities for clinical and administrative improvement, support decision making optimization, and improve health-service outcomes for identified populations.

Certificate Requirements

Applicants must hold a bachelor’s degree. Application is made through CHHS.

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

Required Courses (12 credits)

- HAP 501 - Business Statistics in Health Service Management Credits: 3
  or HHS 597, or SOCW 671, or GCH 601
- HAP 586 - Quality Improvement in Health Services Credits: 3
- HAP 709 - Health Care Databases Credits: 3
- HAP 730 - Health Care Decision Analysis Credits: 3

Elective (3 credits)

Choose one course from the following:

- HAP 547 - Regulatory Requirements for Health Care Systems Credits: 3
- HAP 710 - Inferential Statistics in Health Services Research and Management Credits: 3
- HAP 715 - Health Economics Credits: 3
- HAP 740 - Management of Health Information Systems Credits: 3
- SOCW 688 - Advanced Research in Social Work Credits: 3

Note:
A course in basic computer skills (credit or noncredit) and HAP 678: Introduction to the U.S. Health System (mandatory for students without recent working experience in the U.S. health system) are considered optional for students who already possess the requisite knowledge and skills. They are required of those who do not.

**Risk Management and Patient Safety Graduate Certificate**

**Banner Code:** HH-CERG-RMPS

This graduate certificate prepares individuals with advanced skills in health-related risk assessment, management, and safety improvement in health care organizations to gain indepth knowledge to function effectively as health care risk managers.

**Admission**

Applicants must have a bachelor’s of science degree from an accredited university, or its equivalent. Applicants must have a grade point average of 3.00 or better, submit two letters of reference, and complete an application to the certificate program. No GRE, GMAT, or other tests are necessary. Foreign students must provide a TOEFL score.

**Certificate Requirements**

Candidates must have 15 graduate credits and a minimum GPA of 3.00 in course work, with no more than 3 credits with a grade of C to earn the certificate.

**Required Courses (12 credits)**

- HAP 730 - Health Care Decision Analysis Credits: 3
- HAP 735 - Risk Analysis in Health and Bioscience Credits: 3
- HAP 746 - Health Policy Leadership Credits: 3
- STAT 668 - Survival Analysis Credits: 3

**Elective (3 Credits)**

Choose one of the following:

- HAP 547 - Regulatory Requirements for Health Care Systems Credits: 3
- HAP 642 - Health Policy Development and Analysis Credits: 3
- HAP 690 - Independent Study Credits: 1-3
- HAP 720 - Health Data Integration Credits: 3
- HAP 710 - Inferential Statistics in Health Services Research and Management Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
  other as approved by advisor

Total: 15 credits

**Social Work**
Faculty

Professors: Raskin (interim chair), Ritchie, Rose

Associate Professors: Davis, Harris Rome, Vakalahi, Wolf-Branigin

Assistant Professors: Clark, Cleaveland, Ihara, Tompkins,

The mission of the BSW Program is to prepare entry level generalist social work professionals who will demonstrate ethical leadership in innovative multidisciplinary practice, social reform, and research in diverse communities. Students will be provided with a range of opportunities to develop a broad knowledge and skills base consistent with the systems and strengths perspectives. They are expected to practice using core social work values and to examine and resolve ethical dilemmas. Classroom and field experiences prepare students to be competent in the use of relevant new technologies and in culturally sensitive generalist social work practice.

The MSW Program seeks to prepare social workers for advanced professional practice who are innovative leaders bringing superior management, interpersonal, technological, research, and communication skills to the human service delivery system. Through a concentration in either social change or clinical practice, graduates will be prepared to empower individuals, strengthen families and communities, stimulate positive change through advocacy, social and political action, and help meet the local, national, and global challenges of the new century. The MSW Program builds upon a foundation of generalist social work knowledge and skills that integrates micro and macro theory and practice, and emphasizes empowerment and systems transformation. This foundation equips students to enhance human well-being and to promote social and economic justice through ethical professional practice with culturally diverse individuals, families, groups, organizations, and communities.

Undergraduate Degree

Social Work, BS

Banner Code: HH-BS-SOCW

The undergraduate social work program prepares students for beginning generalist professional practice in social work at the baccalaureate level and has been granted full accreditation by the Council on Social Work Education. All students are expected to abide by the Code of Ethics of the National Association of Social Workers.

No academic credit toward field experience or course work is given based on previous work or life experience. Since the social work program does not offer all of the required courses during the evening hours, students should meet with their academic advisor to develop a plan to complete course work for the degree.

SOCW 323 has been approved as a university synthesis course and is open to all majors.

Admission Requirements

To be admitted to the social work program, a student must have completed at least 45 credits with a GPA of 2.30; completed or be registered in BIOL 103, ENGL 101, SOCI 101, and PSYC 100; earned at least a C in SOCW 200, 301, 323, 351, and 357; satisfactorily completed at least 60 hours in one semester in a service learning agency in conjunction with SOCW 301; and
submitted an application for the social work major to the director of social work admissions. Students should file this application during the junior year. The student’s application for admission to the social work major is reviewed for action by social work faculty members. A personal interview may be required.

There is no admission to the social work program in the summer. Students who have not met all criteria for admission to the major (including completion of service learning requirements) by May 30 will not be considered for admission until the fall semester.

**Immunization and Fees**

All students who are enrolled in a course that requires a field placement (SOCW 301, 359, 453, and 456) must have an annual tuberculosis screening (PPD). In addition, students must complete the entire hepatitis B immunization series in accordance with current U.S. Public Health Service recommendations. The cost of immunizations is the responsibility of the student. The majority of agencies used for field placements require fingerprinting, a criminal background check (may be more extensive than the university requirement), and a child protective services check. Any cost related to these requirements is the responsibility of the student.

**Writing Intensive Requirement**

The university requires all students to complete at least one course designated “writing intensive” in the 300 level or above. Students majoring in social work fulfill this requirement by successfully completing SOCW 471.

**Degree Requirements**

Students must fulfill all requirements for the bachelor's degree including university general education requirements.

**General Education and Required Courses (53–54 credits)**

**Composition:**

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

**Oral Communication:**

- COMM 100 - Public Speaking Credits: 3

**Quantitative Reasoning:**

- MATH 106 - Quantitative Reasoning Credits: 3

**Information Technology:**

- IT 103 - Introduction to Computing Credits: 3
Literature:

- An approved University General Education literature course.

Arts:

- An approved University General Education arts course.

Natural Science:

- BIOL 103 - Introductory Biology I
- One 3 or 4 credit approved University General Education natural science course.

Western Civilization:

- HIST 100 - History of Western Civilization Credits: 3
- HIST 125 - Introduction to World History Credits: 3

Global Understanding:

- An approved University General Education global understanding course.

American Government:

- GOVT 103 - Introduction to American Government Credits: 3

Psychology:

- PSYC 100 - Basic Concepts in Psychology Credits: 3

Economics:

- ECON 100 - Economics for the Citizen Credits: 3

Sociology:

- SOCI 101 - Introductory Sociology Credits: 3

Statistics:
Choose one of the following:

- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- PSYC 300 - Statistics in Psychology Credits: 4

Social Work Major (42 credits)

- SOCW 200 - Introduction to Social Work Credits: 3
- SOCW 301 - Laboratory in Interpersonal Communication Credits: 4
- SOCW 323 - Human Behavior in the Social Environment I Credits: 3
- SOCW 324 - Human Behavior in the Social Environment II Credits: 3
- SOCW 351 - Social Policy and Social Justice I Credits: 3
- SOCW 352 - Social Policy and Social Justice II Credits: 3
- SOCW 357 - Methods of Social Work Intervention I Credits: 3
- SOCW 358 - Methods of Social Work Intervention II Credits: 3
- SOCW 359 - Junior Seminar Credits: 1
- SOCW 417 - Integrative Methods in Social Action and Social Change Credits: 3
- SOCW 452 - Senior Seminar I Credits: 2
- SOCW 453 - Senior Practicum I Credits: 3
- SOCW 454 - Senior Seminar II Credits: 2
- SOCW 456 - Senior Practicum II Credits: 3
- SOCW 471 - Research in Social Work Credits: 3

Electives (24-25 credits)

- Six credits must be in social work at the 400- or 500-level, not including courses listed above; SOCW 499 may be used to satisfy an additional 1 to 3 credits toward general electives.

Total: 120 credits

Notes:

SOCW 110 Global Perspectives on Human Rights is open to social work and nonsocial work majors; it does not count toward the social work degree requirements.

The Social Work faculty evaluates student performance periodically and may require students to withdraw from the program when, in their judgment, performance is not satisfactory. The decision is based on the quality of academic and field performance, as well as on personal fitness for the profession of social work. Students have the right to appeal.

Class attendance is required in all Social Work courses.

SOCW 301 can only be taken in the fall semester and is a prerequisite to SOCW 359. SOCW 323, 351, and 357 are sequenced courses offered only during the fall semester. The second parts, SOCW 324, 352, and 358/359, are offered only during the spring semester and can only be taken on successful completion of the first parts (a grade of C or better). The sequencing requirement pertains only to social work majors. Graduation will be delayed if courses are not taken in proper sequence.
Undergraduate Minor

Social Work Minor

Banner Code: SOCW

Course Work

Minor courses must be completed with a minimum GPA of 2.00.

Students should be familiar with university-wide requirements for minors described in the Undergraduate Policies section of the Academic Policies chapter of this catalog.

Required Courses (13 credits)

- SOCW 200 - Introduction to Social Work Credits: 3
- SOCW 301 - Laboratory in Interpersonal Communication Credits: 4
- SOCW 323 - Human Behavior in the Social Environment I Credits: 3
- SOCW 351 - Social Policy and Social Justice I Credits: 3

Electives (6 credits)

- Social work electives (6)

Total: 19 credits

Note:

SOCW 357, 358, 359, 452, 453, 454, and 456 are not open to minors. See an advisor in the social work program for more information.

Dual Degree

Social Work and Conflict Analysis and Resolution Dual Degree, MS (CHHS)

Banner Codes: HH-MSW-SOCW and CA-MS-CONF

The Department of Social Work is partnering with George Mason’s nationally recognized Institute for Conflict Analysis & Resolution (ICAR) to offer a 3-year dual degree program. Students can earn both an MSW and an MS in Conflict Analysis &
Resolution while taking advantage of the diversity of the Washington, DC metropolitan area and the University’s proximity to the nation’s capital. This is the only existing dual degree program of its kind.

**Admissions Requirements**

Students interested in the 3-year Dual Degree program, MSW and Master’s in Conflict Analysis & Resolution, must complete a University Graduate Application (one application; designate Social Work as the primary program). One Goal Statement, Three Letters of Recommendations, and Transcripts are required. In answering the Goal Statement and on Letters of Recommendations, please address your interest in both programs. For the MSW, also submit a Resume, Critical Thinking Essay, and Application Data Form. On the MSW checklist and applicant data form, check Dual Degree. Please consult the MSW program website and the Director for additional information.

**Degree Requirements**

*To graduate with the dual degree, students must successfully complete the following:*

**Social Work Courses (50 credits)**

- SOCW 623 - Human Behavior and Social Systems I Credits: 3
- SOCW 624 - Human Behavior and Social Systems II Credits: 3
- SOCW 651 - Social Policies, Programs, and Services Credits: 3
- SOCW 652 - Influencing Social Policy Credits: 3
- SOCW 657 - Direct Social Work Practice I Credits: 3
- SOCW 658 - Direct Social Work Practice II Credits: 3
- SOCW 670 - Communication and Technology for Social Work Practice Credits: 3
- SOCW 672 - Foundation Field Practicum and Seminar I Credits: 3
- SOCW 673 - Foundation Field Practicum and Seminar II Credits: 3
- SOCW 684 - Social Work and the Law Credits: 4
- SOCW 685 - Organizational Leadership for Social Workers Credits: 4
- SOCW 687 - Empowering Communities for Change Credits: 4
- SOCW 688 - Advanced Research in Social Work Credits: 3
- SOCW 694 - Social Change Practicum I Credits: 4
- SOCW 695 - Social Change Practicum II Credits: 4

**Conflict Analysis and Resolution Courses (35 credits)**

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- CONF 601 - Theories of Conflict and Conflict Resolution Credits: 3
- CONF 610 - Philosophy and Methods of Conflict Research Credits: 3
- CONF 642 - Integration of Theory and Practice Credits: 3
- CONF 694 - Internship Credits: 1-6
- CONF 713 - Reflective Practice in Interpersonal-Multiparty Conflicts Credits: 3
- CONF 795 - Professional Development Seminars Credits: 1-3

5 credits of Professional Development Seminars are required

**Electives**
Total: 85 credits

Master's Degree

Social Work, MSW

Banner Code: HH-MSW-SOCW

The MSW Program opened its doors in fall 2002 and was accredited by the Council on Social Work Education in spring 2006. The MSW Program prepares students for advanced practice in social work and has been granted full accreditation by the Council on Social Work Education. Following completion of a foundation year of study, students complete specialized concentrations in social change or clinical practice. All social work students are expected to abide by the Code of Ethics of the National Association of Social Workers. No academic credit toward field experience or course work is given based on previous work or life experience.

To accommodate working students, MSW courses are offered during late afternoon and evening hours. Field placements, however, generally require availability during regular daytime hours. Students are required to successfully complete 1,200 hours of supervised field practicum in agencies approved by the Department of Social Work. Students may complete the MSW Program under a two-year or three-year plan, but all courses are sequenced and must be taken in the order designated. Students should meet with their academic advisor to ensure timely completion of all degree requirements.

Admission Requirements

Students are admitted in fall semester only. In addition to meeting the university’s graduate admission requirements, including an undergraduate degree from a regionally accredited college or university, students must have a minimum of 30 undergraduate credits in the liberal arts, including at least 3 credits in each of the following: English composition, U.S. history or government, social sciences, and statistics.

Program Requirements

To remain in good standing, students must earn a B- or better in each required course and maintain a 3.00 GPA. A course in which the student earns a C may be repeated once. Overall, no more than 8 total credits of C may be repeated. A prerequisite must be satisfied with a B- or better before registering for the next course in a sequence. No more than 8 total credits of C may be repeated overall. Two course grades of F or 9 credits of unsatisfactory grades (C or below) will result in termination from the program.

Social Work faculty members evaluate each student’s performance periodically and may require the student to withdraw from the program when, in their judgment, performance is not satisfactory. The decision is based on the quality of academic and field performance, as well as on personal fitness for the profession of social work. The student has the right to appeal.

Insurance Coverage
Students engaged in internships are covered for liability under the Commonwealth of Virginia’s Self-Insured Liability Insurance Plan and covered for medical malpractice under the Medical Malpractice Insurance Plan, as established by the Department of General Services, Division of Risk Management. Only practicum activities that have been determined by the field instructor to be part of the course are covered. Students are encouraged to obtain professional liability coverage through the National Association of Social Workers, although this additional coverage is optional.

Immunizations

All students who are enrolled in a course that requires a field placement (SOCW 672, 673, 692, 693, 694, 695) must have an annual tuberculosis screening (PPD). In addition, students must complete the entire Hepatitis B immunization series in accordance with current U.S. Public Health Service recommendations. Any cost related to these requirements is the responsibility of the student. Students can register for classes prior to the completion of the immunizations but documentation of completion must be submitted to the social work office no later than October 1 for fall entrance. Immunizations are program requirements and must be completed by the student even if they are not required by the agency. Documentation must be submitted to the MSW Program administrative assistant.

Degree Requirements

Nondegree students must seek department approval before registering for courses. Nondegree students may take up to 9 credits total which may be transferred into the program once they are admitted. Courses available to nondegree students include: SOCW 670, SOCW 623 and SOCW 624, or SOCW 651 and SOCW 652.

In order to graduate with the MSW degree, students must successfully complete the following foundation courses and one concentration.

Foundation Courses (30 credits)

- SOCW 623 - Human Behavior and Social Systems I Credits: 3
- SOCW 624 - Human Behavior and Social Systems II Credits: 3
- SOCW 651 - Social Policies, Programs, and Services Credits: 3
- SOCW 652 - Influencing Social Policy Credits: 3
- SOCW 657 - Direct Social Work Practice I Credits: 3
- SOCW 658 - Direct Social Work Practice II Credits: 3
- SOCW 670 - Communication and Technology for Social Work Practice Credits: 3
- SOCW 671 - Research Methods for Social Workers Credits: 3
- SOCW 672 - Foundation Field Practicum and Seminar I Credits: 3
- SOCW 673 - Foundation Field Practicum and Seminar II Credits: 3

Concentration (30 credits)

▲ Social Change Concentration (SOCC)

- SOCW 676 - Selected Topics in Social Work and Social Change Credits: 4
- SOCW 684 - Social Work and the Law Credits: 4
- SOCW 685 - Organizational Leadership for Social Workers Credits: 4
• SOCW 687 - Empowering Communities for Change Credits: 4
• SOCW 688 - Advanced Research in Social Work Credits: 3
• SOCW 694 - Social Change Practicum I Credits: 4
• SOCW 695 - Social Change Practicum II Credits: 4
• SOCW 697 - Thesis Project Seminar Credits: 3

▲ Clinical Practice Concentration (CLNP)

• SOCW 630 - Forensic Social Work Practice Credits: 4
• SOCW 640 - Advanced Clinical Practice Credits: 4
• SOCW 645 - Community-Centered Clinical Practice Credits: 4
• SOCW 674 - Psychopathology Credits: 4
• SOCW 688 - Advanced Research in Social Work Credits: 3
• SOCW 692 - Clinical Practicum I Credits: 4
• SOCW 693 - Clinical Practicum II Credits: 4
• SOCW 697 - Thesis Project Seminar Credits: 3

Thesis

• All students must successfully complete a culminating research thesis.

Total: 60 credits

Advanced Standing

Students with a BSW degree who demonstrate superior academic achievement and excellence in social work practice will be considered for advanced standing. Advanced standing students begin the MSW Program in the summer and upon successfully completing SOCW 670, move directly into the concentration year. Advanced standing students must successfully complete 600 hours of supervised field practicum in agencies approved by the Department of Social Work.

Admission Requirements

Minimum admission requirements include a BSW degree earned within the past five years from a program accredited by the Council on Social Work Education; a GPA of 3.20 for the last 60 credits; and 30 credits of undergraduate liberal arts courses, including a minimum of 3 credits in each of the following: statistics, English composition, history or government, and social science.

To graduate with the MSW degree, advanced standing students must successfully complete the following foundation course in the summer prior to beginning the concentration year, and complete one concentration.

Foundation Course (3 credits)
• SOCW 670 - Communication and Technology for Social Work Practice Credits: 3

Concentrations

▲ Social Change Concentration (SOCC) Courses (30 credits)

• SOCW 676 - Selected Topics in Social Work and Social Change Credits: 4
• SOCW 684 - Social Work and the Law Credits: 4
• SOCW 685 - Organizational Leadership for Social Workers Credits: 4
• SOCW 687 - Empowering Communities for Change Credits: 4
• SOCW 688 - Advanced Research in Social Work Credits: 3
• SOCW 694 - Social Change Practicum I Credits: 4
• SOCW 695 - Social Change Practicum II Credits: 4
• SOCW 697 - Thesis Project Seminar Credits: 3

▲ Clinical Practice Concentration (CLNP) Courses (30 credits)

• SOCW 630 - Forensic Social Work Practice Credits: 4
• SOCW 640 - Advanced Clinical Practice Credits: 4
• SOCW 645 - Community-Centered Clinical Practice Credits: 4
• SOCW 674 - Psychopathology Credits: 4
• SOCW 688 - Advanced Research in Social Work Credits: 3
• SOCW 692 - Clinical Practicum I Credits: 4
• SOCW 693 - Clinical Practicum II Credits: 4
• SOCW 697 - Thesis Project Seminar Credits: 3

Thesis

• All students must successfully complete a culminating research thesis.

Total: 33 credits

Note:

All other academic policies for the advanced standing program are identical to those for the regular MSW Program.

About the College

The College of Humanities and Social Sciences (CHSS) is composed of 11 departments in the humanities and social sciences and 11 major interdisciplinary programs. The college is also home to New Century College, which offers an innovative interdisciplinary major as well as a first-year experience program for students in all majors, and Technology Across the Curriculum, which promotes the use of technology to enhance learning in all courses and disciplines. The college houses the university-wide Honors Program in General Education for students from all majors. Highly qualified undergraduates can take advantage of honors programs in their majors and accelerated master’s degree programs, which enable them to earn both an undergraduate and a graduate degree in five years. The college has a distinguished faculty of more than 400, including a Nobel laureate, a MacArthur fellow, and recipients of the Pulitzer Prize and Guggenheim Fellowship.

Programs of study at the undergraduate level emphasize global awareness, research experiences, and opportunities such as internships that prepare students for the workforce. Programs of study at the graduate level provide opportunities for career development and advancement, professional education, participation in research, and personal fulfillment. All programs encourage directly or indirectly the exploration of contemporary issues through a dynamic curriculum that fosters an informed understanding of real world problems. The college provides students with an education that enables them to think critically, adapt to the changing conditions of society, and provide informed leadership to future generations.

Policies for All Students

The requirements for each academic program offered by the college are described in the sections below. All students are subject to the policies stated in the first chapters of this catalog. Additional policies and procedures for students in the college are presented in this chapter.

George Mason uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail account, use it to communicate with their department and other administrative units, and check it regularly for important information.

Registration and Degree Audit
Students are responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses, and students may not sit in on classes for which they are not registered. All students should verify the accuracy of their enrollment before the end of the add period and should check PatriotWeb to verify that they are registered for the classes that they think they are.

All students are responsible for reviewing their own transcripts and degree audits regularly to ensure that they are correct and that they are on track to meet all their requirements.

Withdrawal

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the relevant dean (undergraduate academic affairs or graduate academic affairs) and are typically allowed only for full semesters at a time (a withdrawal from all enrolled courses). Withdrawals are only permitted for non-academic reasons; no withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible and never after the last day of classes.

Grade Appeals

Grade appeals should be made to the department or program following the process specified in the Academic Policies chapter of this catalog. If they are resolved within the department or program, that unit is the final level of appeal. The departmental decision may be appealed to the dean only on the basis of procedural irregularity. Undergraduate students should address such appeals through the Office of Undergraduate Academic Affairs and graduate students through the office of Graduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal.

Grievances

Grievances should be directed in writing to the senior associate dean.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Policies for Undergraduate Students

The college offers 16 bachelor of arts (BA) degrees, 7 bachelor of science (BS) degrees, and a bachelor of individualized study (BIS) degree. The undergraduate degree consists of course work in four areas: university-wide general education, college level requirements, a major area of study, and electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.”

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

The college cooperates with the Institute for Conflict Analysis and Resolution (ICAR) to provide courses from various disciplines in the college toward a BA, BS, and minor in conflict analysis and resolution (CAR). More information about CAR undergraduate degree programs can be found in the Institute for Conflict Analysis and Resolution chapter.
Questions about Academic Policies

Students with questions regarding exceptions to academic policies and college-level requirements should contact the CHSS Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; chssdean@gmu.edu).

Additional policy information and forms are available online at http://www.gmu.edu/student/academicaffairs/.

Excluded Courses and Credits

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in the College and Humanities and Social Sciences. Students may use nonactivity PHED and PRLS courses for elective credit for college degrees. For a current list of PHED and PRLS courses that may be used for credit in the college, see the CHSS Undergraduate Academic Affairs Office Web site at http://www.gmu.edu/student/academicaffairs/. Military Science (MLSC) courses cannot be counted toward credits required for a degree in the college.

Once admitted to Mason, students may not take CLEP exams and apply credits from those exams to degrees in the College of Humanities and Social Sciences. Students may apply credits from CLEP exams to degrees in the college if those credits were awarded at the time of admission.

Academic Load

The university limits undergraduate students with a cumulative GPA below 2.00 to 13 credit hours per semester. All undergraduate students returning from suspension are also limited to a maximum of 13 credit hours. Exceptions to this rule are very rare and only occur in exceptional cases.

Undergraduate students in good standing may enroll in up to 18 credit hours each semester. In exceptional circumstances, students may request an overload of the maximum credit hours. Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Withdrawals

Courses for which a withdrawal is approved receive a grade of "W".

Credits graded "W" do not affect a student's GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student’s academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

Consortium of Universities Registration
Participation in consortium registration is available to degree-seeking juniors and seniors in good standing currently enrolled at Mason. Participation is limited to courses that are approved by the student's department chair and academic dean, apply to the student's program of study, are not offered during that semester at Mason, and have space available at the consortium institution. Students should consult with the Consortium Coordinator in the Registrar's Office, as additional restrictions may apply. Students may take just one course per semester, with a career maximum of two courses. Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Credit to Be Earned at Other Institutions

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean’s office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses can seldom be approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere review.

Courses elsewhere that have been pre-approved by the dean’s office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar's Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Additional information about study elsewhere can be found at http://www.gmu.edu/student/academicaffairs/.

Study Abroad

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:

- Have a cumulative GPA of 2.25 or higher at Mason
- Have completed the immediately preceding semester at Mason with a 2.00 or higher
- Have completed the necessary forms and have obtained all required signatures and course equivalencies

The Center for Global Education may have higher academic standards and students must meet all eligibility requirements.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Academic Clemency

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters. To be considered for this exception, students must meet all of the following criteria:
• Be absent from George Mason for a minimum of three consecutive calendar years
• Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
• Submit their request in writing by the last day of classes for their first semester back at George Mason
• In order to make this request, students should (a) enroll in at least 6 hours during their first semester back at George Mason and (b) earn at least a 2.50 semester GPA with no grade below “C.” If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

Additional information about clemency can be found at http://www.gmu.edu/student/academicaffairs/.

Appeals Process

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Dean’s Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the Student Policies and Appeals Committee, a standing committee elected by the college faculty. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies chapter of this catalog.

The grade appeal process is discussed above.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Undergraduate Academic Affairs. When a department denies a substitution or waivers of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval.

The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester. Appeals of these decisions may be made to the Student Policies and Appeals Committee on the basis of procedural irregularity only, and it is the final level of approval.

Student Policies and Appeals Committee is the final level of appeal for college level requirements for CHSS; retroactive adds, withdrawals, and graduation; and return from suspension and dismissal. This committee is the final level of approval.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Teacher Licensure

Students who plan to seek teacher licensure and become K–12 teachers should consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Minors

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the Registrar.

College-Level Requirements for Undergraduate Students
Bachelor of Arts

The BA degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements (university-wide general education requirements or requirements for the major).

- Philosophy or religious studies: 3 credits fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI.
- Natural science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CHSS Undergraduate Academic Affairs Office about a possible waiver of this requirement.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). This requirement may be fulfilled by the following courses:
  - ANTH 114, 300, 301, 302, 304, 305, 306, 311, 313, 330, 332, 396
  - ARTH 203, 204, 319, 320, 380, 381, 382, 383, 384, 385, 482
  - CHIN 318, 320, 325
  - DANC 118
  - ECON 361, 362
  - FREN 451
  - GEOG 101, 316, 325, 330, 399
  - GOVT 328, 332, 333, 340, 341, 345, 432, 433
  - MUSI 103
  - RELI 211, 212, 272, 313, 314, 315, 337, 374, 375, 490
  - RUSS 353, 354

Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.

Requirements for each major are listed in the departmental sections that follow.

Bachelor of Science

The BS degree provides students with a more intensive approach to the core technical questions of their majors. This curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. CHSS students pursuing a BS must complete the university-wide general education program plus 1 additional credit of natural science (for a total of 8 credits), which must be fulfilled by an approved two-semester laboratory science sequence in a single science. This may not be fulfilled by BIOL 124 and 125. Requirements for each major are listed in the departmental sections that follow.
Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) with a curriculum grade point average (GPA) of at least 2.75 are considered to have met all of George Mason University’s lower level general education requirements. They are still required by the university to complete English 302 and a synthesis course. Transfer students who meet the conditions above and are pursuing a degree in CHSS are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor's degree from an accredited institution who are pursuing a degree in CHSS are also considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Policies for Graduate Students

The college offers 16 master’s degrees, including a master of public administration and a master of fine arts in creative writing, and 11 doctoral degrees.

Graduate Admission

Admissions decisions are made by faculty committee and are not subject to further appeal.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

1. During his or her academic studies, the admitted applicant has a significant drop in academic performance or fails to graduate with a degree prior to the first day of classes for the term admitted.
2. There has been a misrepresentation in the application process.
3. Prior to the first day of classes for the term admitted, the college learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

Provisional Admission

Students provisionally admitted to their graduate degree program are not eligible to enroll in consortium course work or study at another institution until the conditions of the provisional contract have been met. Provisionally admitted students are also not eligible to participate in any study abroad programs until the provisional qualifier has been removed. Transfer of credit requests for course work taken in non-degree status at Mason or from another institution prior to admission will not be considered until the provisional contract has been fulfilled.

Academic Load

Graduate students can enroll in up to 12 credits of course work each semester. Non-degree students can enroll in up to 10 credits of course work each semester.

Non-degree Enrollment

Applicants who have been denied admission to a graduate certificate, master’s or doctoral program are not permitted to take graduate courses in that discipline as a non-degree student.

Graduate non-degree students may enroll in 500-, 600-, and 700-level courses. In exceptional cases graduate non-degree students in the College of Humanities and Social Sciences may request to enroll in an 800-level course if they have an appropriate
academic or professional background, and have written permission of the course instructor, director of the graduate program offering the course, and the graduate dean.

**Consortium of Universities Registration**

Eligible students may enroll in courses at any of the institutions in the Consortium of Universities in the Washington Metropolitan area. Students are limited to one consortium course per semester, with a career maximum of 6 credits. To register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of IN on their record or who earned grades of C or F in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted. More information about the Consortium of Universities can be found in the Academic Policies chapter.

**Transfer of Credit**

To be eligible for transfer, credits must have been earned at an accredited graduate degree-granting institution (and applicable to a graduate degree at that institution) or at Mason while in non-degree status. Courses accepted for transfer credit must have been completed within six years of the admission term and with a grade of B or better (3.00 or higher). Courses with grades of P or S are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a B (3.00) or better. Some programs have more stringent standards on transfer of credit; students should contact their graduate program for specific information.

**Credit from Other Institutions**

Students must obtain all approvals, including course equivalencies, prior to enrolling in any course work at another institution. All appropriate paperwork must be submitted to the Registrar’s Office by the last day to add during the academic term the course meets. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason’s drop/add deadlines in terms of acquiring necessary approvals.

**Dissertation Committee Criteria**

All dissertation committees must consist of at least three members of the graduate faculty, two of whom have a full-time appointment at Mason. At least one member must be a tenured or tenure-track faculty member in the College of Humanities and Social Sciences, and at least one member must be from outside the student’s academic unit. Additional members may be appointed who are not members of the graduate faculty or who are not full-time employees of the university. Individual departments and programs may set additional requirements for committee membership. The graduate program director recommends appointment of the dissertation committee to the dean. Though the dean appoints the committee it is the responsibility of the student to find qualified faculty who are willing and able to supervise the dissertation.

**Dissertation (999) Registration**

Doctoral students must be advanced to candidacy before they may enroll in 999. Students must register for 999 before the add deadline published each semester in the Schedule of Classes. Once doctoral students begin registering for 999, they must enroll in at least 3 credits of 999 each semester (excluding summers) until they have completed the total number of dissertation credits required on their individual program of study. Once enrolled in 999, all doctoral students must maintain continuous enrollment in 999 until they deposit their approved dissertation in the University Library. If they have completed the number of dissertation credits required on their program of study, they may maintain continuous enrollment by registering for only 1 credit of 999. See detailed information in the Academic Policies chapter of this catalog.
**Graduate Appeals of Dismissal or Termination**

All graduate students should be familiar with the university policies on dismissal and termination as stated in the Academic Policies chapter. Students who meet the criteria for dismissal or termination may submit a written appeal to the Office of Graduate Academic Affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation. Appeals of termination and dismissal are reviewed at the beginning of each semester by a faculty committee. The ruling of that committee represents the final decision of the college.

**Accelerated Master’s Degree Programs**

Many graduate programs in the College of Humanities and Social Sciences offer highly-qualified undergraduates the opportunity to apply to accelerated master’s degree programs. Students accepted into an accelerated master’s degree program obtain both a bachelor’s and a master’s degree after satisfactory completion of 144 - 150 credits (number of required credits depends on the degree programs).

Students admitted to an accelerated master's degree program may use up to six graduate credits (courses at the 500 or 600 level) in partial fulfillment of requirements for the undergraduate degree. Upon completion and conferral of the undergraduate degree with satisfactory performance in graduate courses (minimum grade of 3.00 in each), students are given advanced standing in their master’s program.

Undergraduates may take a maximum of six additional graduate credits while undergraduates and mark them for reserve graduate credit. These credits are not used to fulfill undergraduate degree requirements but can be applied to the master’s degree. See the section on Graduate Course Enrollment by Undergraduates in the Academic Policies chapter of the catalog. Courses taken for reserve graduate credit must be approved in advance by the Office of Undergraduate Academic Affairs and the appropriate paperwork filed with the Office of the Registrar.

Students must fulfill all other master’s degree requirements. For application information, contact the individual graduate degree program.

The college offers these accelerated master's degree programs:

- Economics
- English with a concentration in linguistics
- Global Affairs
- Philosophy
- Political Science
- Psychology with a concentration in biopsychology
- Public Administration
- Sociology

**Minors**

Course Work

The African and African American Studies Program offers all course work designated AFAM in the Courses chapter of this catalog.

Undergraduate Programs

The African and African American Studies Program offers an interdisciplinary minor open to students in all majors.

In the minor students will examine the cultural, historical, economic, and political dimensions and experiences of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. Students will learn theories and methodologies that are used to examine the complex dynamics of race, class, gender, and ethnicity in America. Through this program, students are able develop critical and analytical approaches to societal issues because such issues are addressed and delineated through a variety of academic disciplines.

Students are encouraged to do an internship as part of the minor to further enhance their education and provide them with valuable preparation for the workforce.

African American Studies Research and Resource Center

The goal of the African American Studies Research and Resource Center (Paul Robeson Room) is to facilitate new ways for George Mason University students to learn about the African diaspora. As part of their academic and community involvements, students often need to address issues related to African and African American Studies. The center offers them opportunities for hands-on experience with African and African American life. It has been instrumental in assisting students, faculty, staff, and the community in finding resources to accomplish this goal.

The center sponsors a lecture series and a scholar-in-residence program and offers research and resources support for the Mason community.

Undergraduate Interdisciplinary Minor

African and African American Studies Minor

Banner Code: AAMS

In the minor students will examine the cultural, historical, economic, and political dimensions and experiences of people of African descent in America, the Caribbean, Africa, and throughout the Diaspora. Students will learn theories and methodologies that are used to examine the complex dynamics of race, class, gender, and ethnicity in America. Through this program, students are able to develop critical and analytical approaches to societal issues because such issues are addressed and delineated through a variety of academic disciplines.

Students are encouraged to do an internship as part of the minor to further enhance their education and provide them with valuable preparation for the workforce.
For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing the minor in African and African American Studies must complete a minimum of 15 credits with a minimum GPA of 2.00.

One required course (3 credits):

- AFAM 200 - Introduction to African American Studies Credits: 3

Four elective courses (12 credits) chosen from the list below:

Other courses, when relevant, may be able to meet this requirement with prior written approval of the director.

- AFAM 390 - Special Topics in African and African American Studies Credits: 3
- AFAM 490 - Internship Credits: 3
- AFAM 499 - Independent Study Credits: 1-3
- DANC 118 - World Dance Credits: 3
- ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
- ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
- ENGL 371 - African American Literature Through 1946 Credits: 3
- ENGL 372 - Contemporary African American Literature Credits: 3
- FREN 451 - Sub-Saharan African Literature Credits: 3
- FREN 454 - Caribbean Literature in French Credits: 3
- GEOG 325 - Geography of North Africa and the Middle East Credits: 3
- GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
- HIST 130 - History of the Modern Global System Credits: 3
- HIST 261 - Survey of African Civilization Credits: 3
- HIST 262 - Survey of African Civilization Credits: 3
- HIST 335 - The African American Experience in the United States: African Background to 1885 Credits: 3
- HIST 336 - The African American Experience in the United States: Reconstruction to the Present Credits: 3
- HIST 340 - History of American Racial Thought Credits: 3
- HIST 466 - Origins of Conflict in Southern Africa Credits: 3
- SOCI 308 - Racial and Ethnic Relations Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3

Total: 15 credits

Term instructors: Newmark, Sizemore, Wheeldon

Affiliate faculty: Uchida

Course Work

The Administration of Justice Department offers all course work designated ADJ and JLCP in the Courses chapter of this catalog.

Undergraduate Programs

The BS in administration of justice provides students with a sound foundation in the liberal arts and a focused study of the justice system as well as the social, human, and moral problems raised in the administration of justice. The course of study prepares students for careers in law enforcement, corrections, the courts, investigations, juvenile justice, private and homeland security, and related social and human services. The program also provides a strong background for law school and graduate study in criminal justice or law and society.

Honors in the Major

Highly qualified students may pursue advanced work leading to graduation with honors in the major. Students admitted to the honors program in the major take a two-course sequence ADJ 491 and 492. To graduate with honors in ADJ, students must complete these courses with a minimum GPA of 3.50.

Internships

The department supports an active internship program, which places students in justice and police organizations throughout the Washington metropolitan area. Students can gain valuable work place experience while earning credit toward their degree.

Graduate Programs

The department offers master's and doctoral degrees in justice, law, and crime policy. Both degree programs draw on a strong multidisciplinary faculty, who teach a wide range of courses in their specialties to support the graduate programs. These programs can also take advantage of Mason's proximity to many justice organizations at the federal, state, and local levels. The curriculum is structured to give students the skills they need to do policy-relevant research as well as to be able to work with local and national justice and security agencies to put those skills to use.

Funding
The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Undergraduate Degree

Administration of Justice, BS

Banner Code: LA-BS-ADJ

This bachelor of science in administration of justice provides a sound foundation in the liberal arts and a focused study of the justice system and social, human, and moral problems raised in the administration of justice. The course of study prepares students for careers in law enforcement, corrections, the courts, investigations, juvenile justice, private and homeland security, and related social and human services. The program also provides a strong background for law school and graduate study in criminal justice or law and society.

Students may use up to 18 credits of approved ADJ courses taken at Northern Virginia Community College (NVCC) or another community college to fulfill the requirements detailed below. Once a student matriculates at Mason, no courses may be taken at another institution without prior written approval from the program and the dean.

This program of study is offered by the Department of Administration of Justice.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 67 credits with a minimum GPA of 2.00.

Five core courses (16 credits):

- ADJ 100 - Introduction to Criminal Justice Credits: 3
- ADJ 300 - Research Methods and Analysis Credits: 4
- ADJ 303 - Experiencing the Criminal Justice System Credits: 3
- ADJ 306 - Criminal Justice Ethics Credits: 3
- ADJ 424 - Constitutional Law: Criminal Process and Rights Credits: 3

Twelve elective courses (36 credits) including at least 24 credits of ADJ courses chosen from:

- ADJ 301 - Public Law and the Judicial Process Credits: 3
  or
- GOVT 301 - Public Law and the Judicial Process Credits: 3

- ADJ 302 - Delinquency Credits: 3
- ADJ 304 - Computer Crime, Forensics, and Auditing Credits: 3
• ADJ 305 - Crime and Crime Policy Credits: 3
• ADJ 307 - Social Inequality, Crime, and Justice Credits: 3
• ADJ 308 - Human Rights and Justice Credits: 3
• ADJ 400 - Applied Criminal Psychology Credits: 3
• ADJ 401 - Policing in America Credits: 3
• ADJ 402 - Punishment and Corrections Credits: 3
• ADJ 403 - Community Corrections Credits: 3
• ADJ 404 - Crime Victims and Victimization Credits: 3
• ADJ 405 - Law and Justice around the World Credits: 3
• ADJ 406 - Family Law and the Justice System Credits: 3
• ADJ 407 - Law and Society Credits: 3
• ADJ 408 - Criminal Courts Credits: 3
• ADJ 409 - Community Policing Credits: 3
• ADJ 422 - Controversial Legal Issues Credits: 3

• ADJ 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
• GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3

• ADJ 425 - Criminal Justice Management Credits: 3
• ADJ 460 - Surveillance and Privacy in Contemporary Society Credits: 3
• ADJ 461 - Introduction to Homeland Security Credits: 3
• ADJ 462 - Law Enforcement and Homeland Security Credits: 3
• ADJ 471 - Prevention and Deterrence of Crime Credits: 3
• ADJ 475 - Theory and Politics of Terrorism Credits: 3
• ADJ 490 - Special Topics in Administration of Justice Credits: 1-3
• ADJ 491 - Honors Seminar I Credits: 3
• ADJ 492 - Honors Seminar II Credits: 3
• ADJ 499 - Independent Study in Administration of Justice Credits: 1-3
• GOVT 101 - Democratic Theory and Practice Credits: 3
• GOVT 103 - Introduction to American Government Credits: 3
• GOVT 420 - American Political Thought Credits: 3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 452 - Administrative Law and Procedures Credits: 3
• PHIL 151 - Introduction to Ethics Credits: 3
• PHIL 311 - Philosophy of Law Credits: 3
• PSYC 100 - Basic Concepts in Psychology Credits: 3
• PSYC 211 - Developmental Psychology Credits: 3
• PSYC 231 - Social Psychology Credits: 3
• PSYC 314 - Adolescent Psychology Credits: 3
• PSYC 325 - Abnormal Psychology Credits: 3
• PSYC 326 - Therapeutic Communication Skills Credits: 3
• SOCI 101 - Introductory Sociology Credits: 3
• SOCI 301 - Criminology Credits: 3
• SOCI 308 - Racial and Ethnic Relations Credits: 3
• SOCI 310 - Sociology of Deviance Credits: 3
• SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
• SOCI 352 - Social Problems Credits: 3
• SOCI 475 - Women and the Law Credits: 3
• SOCW 400 - Legal and Ethical Issues in Human Services Credits: 3
• SOCW 410 - Alcohol and Substance Abuse: Policies and Programs Credits: 3
• SOCW 423 - Social Work with Children and Adolescents Credits: 3
• SOCW 430 - Social Work and the Law Credits: 3
• CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
• CONF 302 - Identity Conflicts and their Resolution Credits: 3
• CONF 320 - Interpersonal Conflict Analysis and Resolution Credits: 3
• CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution Credits: 3
• CONF 393 - Philosophy, Conflict Theory, and Violence Credits: 3

15 credits in skills for the justice professional chosen from:

• Any foreign language courses that develop or require foreign language skills and are taught in the language
• Any CS course; any IT course
• ADJ 479 - Preparation for Internship Credits: 3
• ADJ 480 - Internship in Justice Administration Credits: 3-12
• GEOG 311 - Introduction to Geographic Information Systems Credits: 3
• GOVT 305 - Contemporary American Federalism Credits: 3
• GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
• GOVT 351 - Administration in the Political System Credits: 3
• GOVT 355 - Public Personnel Administration Credits: 3
• GOVT 356 - Public Budgeting and Finance Credits: 3
• GOVT 357 - Urban Governance and Planning Credits: 3
• GOVT 359 - Computers in Public Management Credits: 3
• GOVT 364 - Public Policy Making Credits: 3
• GOVT 366 - Public Policy Analysis Credits: 3
• GOVT 400 - Political Research and Data Analysis Credits: 3
• GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
• PSYC 260 - Basic Research Methods in Psychology Credits: 1-3
• SOCI 405 - Analysis of Social Data Credits: 4
• SOCI 410 - Social Surveys and Attitude and Opinion Measurements Credits: 3
• STAT 362 - Introduction to Computer Statistical Packages Credits: 3
• STAT 455 - Experimental Design Credits: 3
• STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
• STAT 474 - Introduction to Survey Sampling Credits: 3
• SOCW 200 - Introduction to Social Work Credits: 3
• SOCW 301 - Laboratory in Interpersonal Communication Credits: 4
• SOCW 323 - Human Behavior in the Social Environment I Credits: 3
• SOCW 324 - Human Behavior in the Social Environment II Credits: 3
• SOCW 351 - Social Policy and Social Justice I Credits: 3
• SOCW 352 - Social Policy and Social Justice II Credits: 3
• SOCW 425 - Planning and Organizing for Community Change Credits: 3
• SOCW 430 - Social Work and the Law Credits: 3
Concentrations

ADJ majors have the option of obtaining a concentration by completing 15 of their 36 elective credits within one of the following areas. Credits earned in ADJ 490, 491, 492, and 499, when relevant, may be applied to a concentration with prior written approval of the director of the BS in Administration of Justice Program.

▲ Concentration in Law and Society (LAWS)

- ADJ 301 - Public Law and the Judicial Process Credits: 3
- ADJ 308 - Human Rights and Justice Credits: 3
- ADJ 405 - Law and Justice around the World Credits: 3
- ADJ 406 - Family Law and the Justice System Credits: 3
- ADJ 407 - Law and Society Credits: 3
- ADJ 408 - Criminal Courts Credits: 3
- ADJ 422 - Controversial Legal Issues Credits: 3
- ADJ 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- ADJ 460 - Surveillance and Privacy in Contemporary Society Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3

▲ Concentration in Criminal Justice (CJUS)

- ADJ 302 - Delinquency Credits: 3
- ADJ 304 - Computer Crime, Forensics, and Auditing Credits: 3
- ADJ 305 - Crime and Crime Policy Credits: 3
- ADJ 307 - Social Inequality, Crime, and Justice Credits: 3
- ADJ 400 - Applied Criminal Psychology Credits: 3
- ADJ 401 - Policing in America Credits: 3
- ADJ 402 - Punishment and Corrections Credits: 3
- ADJ 403 - Community Corrections Credits: 3
- ADJ 404 - Crime Victims and Victimization Credits: 3
- ADJ 408 - Criminal Courts Credits: 3
- ADJ 409 - Community Policing Credits: 3
- ADJ 425 - Criminal Justice Management Credits: 3
- ADJ 471 - Prevention and Deterrence of Crime Credits: 3

▲ Concentration in Homeland Security and Justice (HSJ)

- ADJ 405 - Law and Justice around the World Credits: 3
- ADJ 460 - Surveillance and Privacy in Contemporary Society Credits: 3
- ADJ 461 - Introduction to Homeland Security Credits: 3
- ADJ 462 - Law Enforcement and Homeland Security Credits: 3
- ADJ 475 - Theory and Politics of Terrorism Credits: 3
Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in administration of justice fulfill this requirement by successfully completing ADJ 303. Students should complete ENGL 302 before taking the writing-intensive course in the major or take the two courses simultaneously.

Undergraduate Minor

Administration of Justice Minor

Banner Code: ADJ

This minor develops knowledge of the principles, institutions, and practices for systems of administering justice. It provides a solid foundation for students seeking to supplement their major area of study, develop knowledge and skills needed for justice-related occupations, or lay the foundation for possible graduate study in the justice field. Students first obtain an overview of the justice system, learn legal or ethical standards by which to judge the behavior of justice practitioners, and then develop advanced knowledge of selected features of the justice system.

Students should plan their course of study with an Administration of Justice faculty advisor who will be assigned by the program. The minor must be approved by the Administration of Justice Program before graduation.

This program of study is offered by the Department of Administration of Justice.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 15 credits distributed as follows.

One required course (3 credits):

- ADJ 100 - Introduction to Criminal Justice Credits: 3

Four courses (12 credits) in upper-level ADJ courses

- ADJ 479 and ADJ 480 may not be used to fulfill this requirement.

Master's Degree

Justice, Law, and Crime Policy, MA

Banner Code: LA-MA-JLCP
The Justice, Law and Crime Policy (JCLP) MA Program brings cutting edge social science methods to the disciplines of criminology and law and society. Students coming to this program seek to make a difference in the development and evaluation of policy in these fields. The Masters program aims to train individuals seeking to enhance analytical and policy evaluation skills to further career development or prepare for competitive, sought-after positions.

The program draws from a multidisciplinary faculty in the Administration of Justice Program for required core courses and electives. It also makes available a wide range of other electives from many different university programs, including those in computational social science, conflict analysis and resolution, economics, government, law, philosophy, psychology, public administration, sociology, and statistics.

The program takes advantage of the university’s proximity to many justice organizations at the federal, state, and local levels in the capital region. The curriculum is structured to give students the skills to do policy-relevant research and work with justice and security agencies in the region to exercise those skills and serve the needs of those agencies.

This program of study is offered by the Department of Administration of Justice.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

**Transfer Credits**

Students may request to transfer a maximum of 12 credits for prior graduate course work not resulting in a degree in a relevant area, subject to approval by the graduate director and dean and in accordance with university policies.

**Satisfactory Progress**

Each new student is assigned a faculty advisor who helps develop a program of study. The advisor and JCLP faculty assess the progress of all students annually. Students who fail to make satisfactory progress may be terminated from the program. Satisfactory progress in the JCLP Program is defined as maintaining a GPA of at least a 3.00 and all course work must result in grades of B- or above. An academic warning will be issued at the first grade below B-, and dismissal will be initiated at the second grade below B-.

**Application Requirements**

See the Application for Graduate Study for admissions deadlines for the Spring and Fall semesters. Late applications will be considered on a space available basis. There is no required background or preferred experience, but students should demonstrate interest in and aptitude for graduate study in justice, law, and crime policy. In addition to meeting all requirements for graduate study, applicants should submit three letters of recommendation from faculty members or individuals with first-hand knowledge of academic or professional capabilities; a statement of purpose of study no longer than 500 words; official verbal, quantitative, and analytical GRE scores on tests taken within five years of application submission; and a writing sample of a recent sole-authored work of at least 2,500 words. An interview may be required.

**Degree Requirements**

Four core courses (12 credits) in three fields:

**Justice and Law:**
• JLCP 700 - Theories of Justice Credits: 3
• JLCP 720 - Behavior of Law Credits: 3

Justice organizations, administration, and leadership:

• JLCP 740 - Justice Organization and Administration Credits: 3

Crime and crime policy:

• JLCP 760 - Crime and Crime Policy Credits: 3

Three courses (9 credits) of analytic methods:

• JLCP 780 - Research Methods Credits: 3
• JLCP 782 - Statistics I Credits: 3
• JLCP 783 - Statistics II Credits: 3

Thesis (3 to 6 credits):

• JLCP 799 - Master's Thesis Credits: 1-6

Note:

A maximum of 6 credits of thesis may be applied to the degree. A thesis proposal form must be submitted to the graduate program director prior to enrollment in thesis credits. The master’s thesis must be defended orally before a committee of three faculty appointed by the JLCP graduate director.

One to two elective courses (3 to 6 credits):

• Chosen from courses in one or more substantive fields of study listed below

Substantive Fields of Study

Master’s students are required to take one or two of the offered electives within the substantive fields of study (depending upon how many thesis credits are taken). Master’s students may take one non-JLCP elective course. Students may use other courses offered by JLCP or other programs as elective credit for a substantive field with prior written approval of the student’s advisor, director of the JLCP program, and sponsoring program.

Justice and Law

Justice-related electives:
• JLCP 702 - Comparative Justice Credits: 3
• JLCP 703 - Restorative Justice Credits: 3
• GOVT 520 - Political Theory Credits: 3
• GOVT 725 - Democratic Theory and Democratization Credits: 3
• GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
• SOCI 611 - Classical Sociological Theory Credits: 3
• SOCI 612 - Contemporary Sociological Theory Credits: 3
• SOCI 619 - Conflict and Conflict Management: Perspectives from Sociology Credits: 3
• SOCI 640 - Social Theory and Social Policy Credits: 3
• CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
• CONF 701 - Theories of Social Harmony Credits: 3
• CONF 720 - Ethnic and Cultural Factors in Conflict Resolution Credits: 3
• CONF 721 - Conflict and Race Credits: 3
• CONF 723 - Conflict and Gender Credits: 3
• CONF 726 - Moral and Philosophical Foundations of Conflict Credits: 3
• CONF 747 - Reconciliation Credits: 3
• CONF 802 - Theories of the Person Credits: 3
• CONF 803 - Structural Theories Credits: 3
• ECON 611 - Microeconomic Theory Credits: 3
• ECON 852 - Public Choice I Credits: 3
• ECON 854 - Public Choice II Credits: 3

Law-related electives:

• Any selected LAW courses*
• JLCP 721 - The Constitution, Criminal Procedure, and Security Credits: 3
• JLCP 722 - Civil Justice Credits: 3
• JLCP 723 - Law and Social Control Credits: 3
• JLCP 730 - Seminar in the Courts and Constitutional Law Credits: 3
• SOCI 503 - Sociology of Law Credits: 3
• PHIL 611 - Philosophy of Law Credits: 3
• CONF 733 - Law and Justice from a Conflict Perspective Credits: 3
• ECON 895 - Special Topics in Economics Credits: 3

Note:

*Successful completion of JLCP 720 and 721 is a prerequisite for enrollment in LAW courses, which also requires preapproval from the JLCP coordinator, law school instructor, and associate dean for student academic affairs of the Law School.

Justice Organizations, Administration, and Leadership

• JLCP 741 - Conduct of Justice Organizations at the Street Level Credits: 3
• JLCP 742 - Leadership in Justice and Security Organizations Credits: 3
• JLCP 743 - Changing Justice and Security Organizations Credits: 3
• JLCP 749 - Issues in Justice Administration Credits: 1-3
- JLCP 509 - Justice Organizations and Processes Credits: 3
- JLCP 510 - Policing in a Democratic Society Credits: 3
- JLCP 691 - Justice Program Planning and Implementation Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 620 - Organization Theory and Management Behavior Credits: 3
- PUAD 621 - Principles and Practices in Government Organization and Management Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 671 - Public Employee Labor Relations Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 700 - Ethics and Public Administration Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- CONF 731 - Conflict in Organizations Credits: 3
- CONF 741 - Negotiations Credits: 3
- CONF 743 - Dynamics of Conflict Termination Credits: 3
- PSYC 532 - The Social Psychology of Industry Credits: 3
- PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
- PSYC 639 - Survey of Organizational Processes Credits: 3
- SOCI 505 - Sociology of Sex and Gender Credits: 3
- SOCI 523 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
- SOCI 692 - McDonaldization of Organizations Credits: 3

**Crime and Crime Policy**

- JLCP 761 - Politics of Crime Policy Credits: 3
- SOCI 607 - Criminology Credits: 3
- GOVT 745 - International Security Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 644 - Public Policy Models Credits: 3
- PUAD 741 - Policy Analysis Credits: 3
- PSYC 617 - Child Psychopathology Credits: 3

**Note:**

Students may use other courses offered by JLCP or other programs as elective credit for a substantive field with prior written approval of the student’s advisor, director of the JLCP program, and sponsoring program.

**Doctoral Degree**

**Justice, Law, and Crime Policy, PhD**

*Banner Code: LA-PHD-JLCP*
The Justice, Law and Crime Policy (JCLP) PhD program is designed to produce top academic scholars and leaders in policy and applied settings. It brings cutting edge social science methods to the disciplines of criminology and law and society. Students coming to this program seek to make a difference in the development and evaluation of policy in these fields. The goal of this program is to provide a rigorous course of study that will prepare students to do research, teach, develop and test policies, and administer agencies and programs designed to administer law, deliver justice, reduce crime, and enhance domestic security.

The program draws from a multidisciplinary faculty in the Administration of Justice Program for required core courses and electives. It also makes available a wide range of other electives from many different university programs, including those in computational social science, conflict analysis and resolution, economics, government, law, philosophy, psychology, public administration, sociology, and statistics. The program takes advantage of the university’s proximity to many justice organizations at the federal, state, and local levels in the capital region. The curriculum is structured to give students the skills to do policy-relevant research and work with justice and security agencies in the region to exercise those skills and serve the needs of those agencies.

This program of study is offered by the Department of Administration of Justice.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Reduction of Credit

Students entering the doctoral program with a master’s degree in a related discipline, including law degrees, may request that the required credits for the doctoral degree be reduced by a maximum of 24 credits with approval of the program director and dean and in accordance with university policy. Students who have prior graduate course work that has not been applied to another degree may request to have a maximum of 12 of these graduate credits transferred to their JLCP degree program, with approval of the program coordinator and dean and in accordance with university policy.

Satisfactory Progress

Each new student is assigned an advisor who helps develop a program of study. The program of study must be submitted by the end of the first year. On advancing to candidacy, the chair of the dissertation committee becomes the advisor. The advisor and JLCP faculty assess the progress of all students annually. Students who fail to make satisfactory progress may be terminated from the program or dismissed from the university. Satisfactory progress in the JLCP program is defined as maintaining a GPA of at least a 3.00 and all course work must result in grades of B- or above. An academic warning will be issued at the first grade below B-, and dismissal will be initiated at the second grade below B-.

Application Requirements

See the Application for Graduate Study for admissions deadlines for the Spring and Fall semesters. Late applications will be considered on a space-available basis. Applicants admitted to the JLCP doctoral program without a graduate degree in a relevant area will be required to complete the JLCP master’s degree as an integral part of the doctorate. There is no required background or preferred experience, but students should demonstrate interest in and aptitude for graduate study in justice, law, and crime policy.

In addition to meeting all requirements for graduate study, applicants should submit three letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities; a statement of purpose of study no longer than 500 words; official verbal, quantitative, and analytical GRE scores on tests taken within five years of application submission; and a writing sample of a recent sole-authored work of at least 2,500 words. An interview may be required.

Degree Requirements
In addition to satisfying the requirements for all doctoral degrees, students must successfully complete 72 credits of required course work, pass two qualifying exams, and form a dissertation committee, after which they are advanced to candidacy. The final requirements are the dissertation proposal defense and a dissertation of original research representing a significant contribution to the field, which should be publishable in a referred journal or a quality press.

Four core substantive courses (12 credits):

- JLCP 700 - Theories of Justice Credits: 3
- JLCP 720 - Behavior of Law Credits: 3
- JLCP 740 - Justice Organization and Administration Credits: 3
- JLCP 760 - Crime and Crime Policy Credits: 3

Four analytical methods courses (12 credits):

- JLCP 780 - Research Methods Credits: 3
- JLCP 782 - Statistics I Credits: 3
- JLCP 783 - Statistics II Credits: 3

and one course chosen from:

- JLCP 781 - Justice Program Evaluation Credits: 3
- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3
- PSYC 633 - Evaluative Research in Psychology Credits: 3
- PSYC 640 - Techniques in Industrial/Organizational Psychology Credits: 3
- PUAD 643 - Public Policy Research Credits: 3
- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3

Six courses (18 credits) in two substantive fields of study:

- Select two substantive fields and complete three courses within each area. Students may take one non-JLCP elective course in each area or other courses offered by JLCP with prior written approval of the director of the JLCP program.

Justice and Law
Justice-related electives:

- JLCP 702 - Comparative Justice Credits: 3
- JLCP 703 - Restorative Justice Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 725 - Democratic Theory and Democratization Credits: 3
- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- SOCI 611 - Classical Sociological Theory Credits: 3
- SOCI 612 - Contemporary Sociological Theory Credits: 3
- SOCI 619 - Conflict and Conflict Management: Perspectives from Sociology Credits: 3
- SOCI 640 - Social Theory and Social Policy Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- CONF 701 - Theories of Social Harmony Credits: 3
- CONF 720 - Ethnic and Cultural Factors in Conflict Resolution Credits: 3
- CONF 721 - Conflict and Race Credits: 3
- CONF 723 - Conflict and Gender Credits: 3
- CONF 726 - Moral and Philosophical Foundations of Conflict Credits: 3
- CONF 747 - Reconciliation Credits: 3
- CONF 802 - Theories of the Person Credits: 3
- CONF 803 - Structural Theories Credits: 3
- ECON 611 - Microeconomic Theory Credits: 3
- ECON 852 - Public Choice I Credits: 3
- ECON 854 - Public Choice II Credits: 3

Law-related electives:

- Any selected LAW courses*
- JLCP 721 - The Constitution, Criminal Procedure, and Security Credits: 3
- JLCP 722 - Civil Justice Credits: 3
- JLCP 723 - Law and Social Control Credits: 3
- JLCP 730 - Seminar in the Courts and Constitutional Law Credits: 3
- SOCI 503 - Sociology of Law Credits: 3
- PHIL 611 - Philosophy of Law Credits: 3
- CONF 733 - Law and Justice from a Conflict Perspective Credits: 3
- ECON 895 - Special Topics in Economics Credits: 3

Note:

*Successful completion of JLCP 720 and 721 is a prerequisite for enrollment in LAW courses, which also requires preapproval from the JLCP coordinator, law school instructor, and associate dean for student academic affairs of the Law School.

Justice Organizations, Administration, and Leadership

- JLCP 741 - Conduct of Justice Organizations at the Street Level Credits: 3
- JLCP 742 - Leadership in Justice and Security Organizations Credits: 3
• JLCP 743 - Changing Justice and Security Organizations Credits: 3
• JLCP 749 - Issues in Justice Administration Credits: 1-3
• JLCP 509 - Justice Organizations and Processes Credits: 3
• JLCP 510 - Policing in a Democratic Society Credits: 3
• JLCP 691 - Justice Program Planning and Implementation Credits: 3
• PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
• PUAD 620 - Organization Theory and Management Behavior Credits: 3
• PUAD 621 - Principles and Practices in Government Organization and Management Credits: 3
• PUAD 622 - Program Planning and Implementation Credits: 3
• PUAD 640 - Public Policy Process Credits: 3
• PUAD 661 - Public Budgeting Systems Credits: 3
• PUAD 671 - Public Employee Labor Relations Credits: 3
• PUAD 680 - Managing Information Resources Credits: 3
• PUAD 700 - Ethics and Public Administration Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
• PUAD 781 - Information Management: Technology and Policy Credits: 3
• CONF 731 - Conflict in Organizations Credits: 3
• CONF 741 - Negotiations Credits: 3
• CONF 743 - Dynamics of Conflict Termination Credits: 3
• PSYC 532 - The Social Psychology of Industry Credits: 3
• PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
• PSYC 639 - Survey of Organizational Processes Credits: 3
• SOCI 505 - Sociology of Sex and Gender Credits: 3
• SOCI 523 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
• SOCI 692 - McDonaldization of Organizations Credits: 3

Crime and Crime Policy

• JLCP 761 - Politics of Crime Policy Credits: 3
• SOCI 607 - Criminology Credits: 3
• GOVT 745 - International Security Credits: 3
• PUAD 640 - Public Policy Process Credits: 3
• PUAD 644 - Public Policy Models Credits: 3
• PUAD 741 - Policy Analysis Credits: 3
• PSYC 617 - Child Psychopathology Credits: 3

At least one elective course (at least 3 credits) relevant to JLCP

Dissertation proposal (3 to 6 credits):

• JLCP 998 - Doctoral Dissertation Proposal Credits: 1-6

Dissertation (12 to 21 credits):
Qualifying Exams

Students must pass written qualifying exams in two core substantive fields of the student’s choosing, selected from the three fields below. Students may take a single qualifying exam at each sitting. All three qualifying exams will be offered at each sitting.

Students are not eligible to take the qualifying exams until they have successfully completed the required course work, as well as course work in the substantive area in which they intend to sit for the qualifying exam. Students have one opportunity across both exam areas to retake a failed exam.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass two qualifying exams. In addition, students must have a dissertation committee appointed by the Dean’s Office and have defended their dissertation proposal.

Continuous Registration

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Dissertation Committee

The student’s committee is composed of at least three faculty members and a chair, at least two of whom must be full-time JLCP faculty and one, a member of the graduate faculty outside JLCP. The chair must be a full-time JLCP faculty member.

Communication

Phone: 703-993-1090

Faculty

Professors: Boileau, Botan, Decker, Friedley, Kreps (chair), Lichter, Lont, Maibach, McAuley, Rowan (associate chair)

Emeritus professors: Looney, Manchester, Taylor

Associate professors: Gibson, Muir, Nicotera, Villagran

Assistant professors: Cai, Farnsworth, Hopson, Zhao

Term full professor: Pober

Term associate professor: Finn

Term assistant professors: Bedore, Wright
**Term research assistant professor:** Roser-Renouf

**Term instructors:** Anderson, M. Dickerson, Haynes, Klein, R. Smith, Talkington, Tomasovic, Warren

**Term research instructor:** McCutcheon

**Adjuncts:** Ahmad, Akyeampong, Atwell, Aw, Barber, Beck, Biedrycki, Chaaban, Chilcote, Clark, Cordero, Dance, Dickerhoof, N. Dickerson, Dillon, Doyle, Effros, Feigenbaum, Fisher, Garifo, Gauthier, Gladis, Greiner, Hadj, Hansche, Harzold, Holsonbake, Kahn, Kehoe, Kohlmann, Kraus, Kubiske, Ledford, Lehman, LeValley, Long, Mangus, Mattox, Moss, Outlaw, Payne, Peck, Plaag, Schmeidler, Simpson, Slagle, Stumpo, Suarez, Trowbridge, Van Zummeren, Walsch, Walter, Wilson, Wolyn, R. Wood

**Affiliate:** J. R. Censer (professor)

## Course Work

The Communication Department offers all course work designated COMM in the Courses chapter of this catalog.

### Undergraduate Programs

The department offers a BA in communication, which prepares students for graduate study or entry-level positions in such fields as interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

Students majoring in communication complete a concentration in from one of these areas: interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

### Internships

The department has an active internship program. Many students include an internship during their senior year as a way of gaining practical experience with national and international businesses, associations, or government agencies.

### Student Activities

All students are encouraged to participate in one of the communication activities: Broadside, debate, forensics, GMView, Mason Cable Network, PRSSA, or WGMU.

### Honors in the Major

Highly qualified students may pursue advanced work leading to graduation with honors in the major. Communication majors who have completed 80 credits with an overall minimum GPA of 3.50 and a minimum GPA of 3.50 in communication courses are eligible to apply. They must have satisfactorily completed or be enrolled in COMM 200, 300, 301, 302, 305, and 400. Eligible students are invited to submit a proposal for an honors thesis, and, if the proposal is approved, they are admitted to the program. To receive honors in the major, students must complete specific course work with a minimum GPA of 3.5 and write an acceptable honors thesis. For more information, contact the director of honors in communication.

### Minors
The department offers minors in communication, electronic journalism, and sport communication. The latter is offered jointly by the Department of Communication and the School of Recreation, Health, and Tourism in the College of Education and Human Development. The department faculty also participate in these minors: Film and Media Studies Minor, Multimedia Minor, and Women and Gender Studies Minor.

Students majoring in communication may choose to minor in any discipline that offers an undergraduate minor.

**Graduate Programs**

The department offers a master's and a doctoral degree in communication with two major areas of emphasis: strategic communication and health communication. The programs provide students with a strong foundation in communication theory and research while at the same time encouraging students to apply their skills in the public, private, and nonprofit sectors.

The faculty in strategic communication, drawing on their expertise in public relations theory and research, teach courses on planning, developing, executing, and evaluating public communication campaigns. Faculty in health communication teach courses which explore the relationship between communication practices and the health and well-being of individuals and communities. This ranges from how to improve cooperation and coordination between health care providers and patients to how to develop more effective health promotion campaigns.

Strategic communication and health communication are two of the most rapidly expanding specialties within the broad field of communication. Graduates of these programs find a very welcoming employment market for for their expertise.

**Funding**

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

**Undergraduate Degree**

**Communication, BA**

*Banner Code: LA-BA-COM*

The bachelor of arts degree in communication prepares students for graduate study or entry-level positions in such fields as interpersonal and organizational communication, journalism, media production and criticism, persuasive and political communication, and public relations.

This program of study is offered by the Department of Communication.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

**Degree Requirements**

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 36 credits with a minimum grade of 2.00 in each course.
Six required courses (18 credits) in communication:

Students must complete COMM 200 with a grade of C (2.00) or better before enrolling in COMM 300, 301, 302, 305, or 400.

- COMM 200 - Introduction to Communication Credits: 3
- COMM 300 - Foundations of Public Communication Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 302 - Foundations of Mass Communication Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 400 - Research Methods in Communication Credits: 3

Elective courses in communication (6 credits)

Presentation-Intensive Requirement

Students must complete a presentation-intensive course chosen from the following courses (or COMM 399 when the topic is special occasion speaking). The presentation-intensive course may simultaneously fulfill the requirements for elective courses in communication or an approved concentration.

- COMM 100 - Public Speaking Credits: 3
- COMM 210 - Voice and Articulation Credits: 3
- COMM 260 - Basic Debate Theory and Practice Credits: 3
- COMM 310 - Oral Interpretation Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- COMM 356 - Video: Performance and Writing Credits: 3

Approved concentration (12 credits):

Students must declare a concentration before they earn more than 75 credits. Transfer students with 60 or more credits are encouraged to declare a concentration by the end of their first semester. COMM 399 - Special Topics in Communication, when relevant, may be applied toward a concentration with prior written approval of the undergraduate director.

▲ Concentration in Interpersonal and Organizational Communication (IOC)

Four courses (12 credits) chosen from:

- COMM 201 - Small Group Communication Credits: 3
- COMM 230 - Case Studies in Persuasion Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- COMM 332 - Nonverbal Communication Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 344 - Parliamentary Procedure Credits: 1
- COMM 401 - Interpersonal Communication in the Workplace Credits: 3
- COMM 430 - Persuasion Credits: 3
- COMM 434 - Interviewing Credits: 3
• COMM 465 - Topics in Communication and Gender Credits: 3

▲ Concentration in Journalism (JNL)

Three courses (9 credits) chosen from:

• COMM 145 - Newspaper Workshop I Credits: 1
• COMM 203 - Introduction to Journalism Credits: 3
• COMM 210 - Voice and Articulation Credits: 3
• COMM 330 - Principles of Public Relations Credits: 3
• COMM 345 - Newspaper Workshop II Credits: 1
• COMM 351 - News Writing and Reporting Credits: 3
• COMM 352 - News Editing: Print and Beyond Credits: 3
• COMM 353 - Broadcast Journalism Credits: 3
• COMM 356 - Video: Performance and Writing Credits: 3
• COMM 361 - Online Journalism Credits: 3
• COMM 362 - Argument and Public Policy Credits: 3
• COMM 370 - Feature Writing Credits: 3
• COMM 371 - Sports Writing and Reporting Credits: 3
• COMM 374 - Political Journalism Credits: 3
• COMM 390 - Case Studies in Public Relations Credits: 3
• COMM 391 - Writing for Public Relations Credits: 3
• COMM 412 - Politics and the Mass Media Credits: 3
• COMM 431 - Information Technology and the Political Process Credits: 3
• COMM 434 - Interviewing Credits: 3
• COMM 435 - Computers and Communication Credits: 3
• COMM 454 - Free Speech and Ethics Credits: 3
• COMM 455 - History of Print Journalism Credits: 3
• COMM 475 - Journalism Law Credits: 3

One required course (3 credits):

• COMM 303 - Writing across the Media Credits: 3

▲ Concentration in Media Production and Criticism (MPC)

Four courses (12 credits) chosen from:

• COMM 148 - Radio Workshop I Credits: 1
• COMM 157 - Video Workshop Credits: 1
• COMM 202 - Mass Media and Communication Systems Credits: 3
• COMM 210 - Voice and Articulation Credits: 3
• COMM 303 - Writing across the Media Credits: 3
• COMM 348 - Radio Workshop II Credits: 1
• COMM 350 - Mass Communication and Public Policy Credits: 3
• COMM 354 - Radio Production Credits: 3
• COMM 355 - Video Principles and Practices Credits: 3
• COMM 356 - Video: Performance and Writing Credits: 3
• COMM 358 - Video Producing and Directing Credits: 3
• COMM 359 - Media Management Credits: 3
• COMM 360 - Video Editing Credits: 3
• COMM 363 - Media Career Seminar Credits: 1
• COMM 365 - Women and Media Credits: 3
• COMM 366 - Visual Communication Credits: 3
• COMM 375 - Mass Communication Advertising and Promotions Credits: 3
• COMM 380 - Media Criticism Credits: 3
• COMM 456 - Comparative Mass Media Credits: 3

▲ Concentration in Persuasive and Political Communication (PPC)

Four courses (12 credits) chosen from:

• COMM 140 - Forensics Seminar in Creative Arts Credits: 1
• COMM 141 - Forensics Seminar in Recreative Arts Credits: 1
• COMM 142 - Forensics Seminar in Debate: Affirmative Strategies Credits: 1
• COMM 143 - Forensics Seminar in Debate: Negative Strategies Credits: 1
• COMM 230 - Case Studies in Persuasion Credits: 3
• COMM 260 - Basic Debate Theory and Practice Credits: 3
• COMM 261 - Theories of Argumentation Credits: 3
• COMM 320 - Business and Professional Communication Credits: 3
• COMM 326 - Rhetoric of Social Movements and Political Controversy Credits: 3
• COMM 340 - Forensics Seminar in Creative Arts Credits: 1
• COMM 341 - Forensics Seminar in Recreative Arts Credits: 1
• COMM 342 - Forensics Seminar in Debate: Affirmative Strategies Credits: 1
• COMM 343 - Forensics Seminar in Debate: Negative Strategies Credits: 1
• COMM 362 - Argument and Public Policy Credits: 3
• COMM 374 - Political Journalism Credits: 3
• COMM 380 - Media Criticism Credits: 3
• COMM 412 - Politics and the Mass Media Credits: 3
• COMM 430 - Persuasion Credits: 3
• COMM 431 - Information Technology and the Political Process Credits: 3
• COMM 432 - Political Communication Credits: 3
• COMM 454 - Free Speech and Ethics Credits: 3
• COMM 465 - Topics in Communication and Gender Credits: 3

▲ Concentration in Public Relations (PR)

Four courses (12 credits) chosen from:

• COMM 202 - Mass Media and Communication Systems Credits: 3
• COMM 230 - Case Studies in Persuasion Credits: 3
• COMM 260 - Basic Debate Theory and Practice Credits: 3
• COMM 261 - Theories of Argumentation Credits: 3
• COMM 303 - Writing across the Media Credits: 3
• COMM 320 - Business and Professional Communication Credits: 3
• COMM 330 - Principles of Public Relations Credits: 3
• COMM 335 - Organizational Communication Credits: 3
• COMM 351 - News Writing and Reporting Credits: 3
• COMM 359 - Media Management Credits: 3
• COMM 362 - Argument and Public Policy Credits: 3
• COMM 375 - Mass Communication Advertising and Promotions Credits: 3
• COMM 389 - Public Relations for Associations and Nonprofits Credits: 3
• COMM 390 - Case Studies in Public Relations Credits: 3
• COMM 391 - Writing for Public Relations Credits: 3
• COMM 430 - Persuasion Credits: 3
• COMM 454 - Free Speech and Ethics Credits: 3

Notes:

Of the 6 credits of elective courses and 12 credits in an approved concentration, at least 12 credits must be at the 300-400 level and no more than 6 credits may be in COMM 450 - Internship.

No more than 9 credits of internship (COMM 450 or GOVT 450) in total may be applied to the 120 credits required for a degree.

In addition, no more than 10 credits may be in these courses:

• COMM 140 - Forensics Seminar in Creative Arts Credits: 1
• COMM 141 - Forensics Seminar in Recreative Arts Credits: 1
• COMM 142 - Forensics Seminar in Debate: Affirmative Strategies Credits: 1
• COMM 143 - Forensics Seminar in Debate: Negative Strategies Credits: 1
• COMM 145 - Newspaper Workshop I Credits: 1
• COMM 148 - Radio Workshop I Credits: 1
• COMM 157 - Video Workshop Credits: 1
• COMM 340 - Forensics Seminar in Creative Arts Credits: 1
• COMM 341 - Forensics Seminar in Recreative Arts Credits: 1
• COMM 342 - Forensics Seminar in Debate: Affirmative Strategies Credits: 1
• COMM 343 - Forensics Seminar in Debate: Negative Strategies Credits: 1
• COMM 345 - Newspaper Workshop II Credits: 1
• COMM 346 - Yearbook Workshop Credits: 1
• COMM 348 - Radio Workshop II Credits: 1
• COMM 450 - Internship in Communication Credits: 3
• COMM 451 - Facilitating Communication Education Credits: 3
• COMM 452 - Media Production Practicum Credits: 3
• COMM 499 - Independent Study in Communication Credits: 3

Writing-Intensive Requirement
The university requires all students to complete at least one course designated as writing intensive in their majors at the 300 level or above. Students majoring in communication fulfill this requirement by successfully completing COMM 300.

**Undergraduate Minor**

**Communication Minor**

Banner Code: COM

The minor in communication is offered by the Department of Communication.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing the minor must complete 18 credits in communication beyond the 3 credits used to satisfy the university general education requirement. Students must earn a C or better in all courses applied to the minor.

**One required course (3 credits):**

- COMM 200 - Introduction to Communication Credits: 3

**Two courses (6 credits) chosen from:**

- COMM 300 - Foundations of Public Communication Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 302 - Foundations of Mass Communication Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3

**One course (3 credits) that is public presentation intensive (PPI) chosen from:**

- COMM 100 - Public Speaking Credits: 3
- COMM 210 - Voice and Articulation Credits: 3
- COMM 310 - Oral Interpretation Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- COMM 356 - Video: Performance and Writing Credits: 3

**Note:**

COMM 399 - Special Topics in Communication, when it is PPI, may be applied to this requirement with prior approval of the director of the minor.

**Two elective courses (6 credits) in communication**
Electronic Journalism Minor

Banner Code: EJ

Electronic journalism provides a foundation in journalism with a focus on the writing style and research techniques unique to broadcast, on line, and computer-assisted reporting.

This minor is not available to communication majors pursuing a concentration in journalism.

This program of study is offered by the Department of Communication.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00.

Four required courses (12 credits):

- COMM 303 - Writing across the Media Credits: 3
- COMM 351 - News Writing and Reporting Credits: 3
- COMM 361 - Online Journalism Credits: 3
- COMM 475 - Journalism Law Credits: 3

Two elective courses (6 credits) chosen from:

- COMM 203 - Introduction to Journalism Credits: 3
- COMM 352 - News Editing: Print and Beyond Credits: 3
- COMM 353 - Broadcast Journalism Credits: 3
- COMM 370 - Feature Writing Credits: 3
- COMM 435 - Computers and Communication Credits: 3
- COMM 454 - Free Speech and Ethics Credits: 3

Note:

COMM 399 - Special Topics in Communication or COMM 450 - Internship in Communication, when relevant, may be applied to this requirement with prior written approval of the coordinator of the minor.

Sport Communication Minor

Banner Code: SCOM

The minor in sport communication offers students the opportunity to examine important and timely sports-related issues in an ethical context as well as analyze sports from cross-cultural perspectives. Students will gain an understanding of sport mass media, sport communication, sports reporting, interpersonal and organizational communication, and the impact each has in our
global society. The courses cover theory and practice in cross-platform communication, sports ethics and theoretical underpinnings, public relations, and marketing. The minor provides applied fundamentals for students seeking employment in the commercial world of sports (areas such as management or promotion of athletic organizations) and in sports media.

This minor is offered jointly by the Department of Communication and the School of Recreation, Health, and Tourism in the College of Education and Human Development.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students must complete 18 credits with a minimum GPA of 2.00.

Four required courses (12 credits):

- COMM 303 - Writing across the Media Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- SPMT 201 - Introduction to Sport Management Credits: 3
  or
- SPMT 304 - Sport, Culture, and Society Credits: 3
- SPMT 430 - Sport Communication Credits: 3

Two elective courses (6 credits) chosen from:

- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 330 - Principles of Public Relations Credits: 3
- COMM 351 - News Writing and Reporting Credits: 3
- COMM 356 - Video: Performance and Writing Credits: 3
- COMM 359 - Media Management Credits: 3
- COMM 361 - Online Journalism Credits: 3
- COMM 371 - Sports Writing and Reporting Credits: 3
- SPMT 302 - Sport and Ethics Credits: 3
- SPMT 318 - Gender and Racial Issues in Sport Credits: 3
- SPMT 405 - Sport Operation and Planning Credits: 3
- SPMT 412 - Sport Marketing and Finance Credits: 3
- SPMT 420 - Economics and Finance in the Sport Industry Credits: 3
- SPMT 440 - Global Perspectives in Sport Credits: 3
- SPMT 455 - Governance and Policy in Sport Organizations Credits: 3

Note:

Special topics courses, when relevant, may be used to fulfill this requirement with the prior written approval of the coordinator.

Master's Degree
Communication, MA

Banner Code: LA-MA-COM

The master of arts in communication examines the powerful role played by communication practices in contemporary society. The program has two major areas of emphasis: health and strategic communication.

This program of study is offered by the Department of Communication.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. In addition to fulfilling the university application requirements, applicants must submit

- Three letters of recommendation
- Evidence of GRE taken within the past five years
- 500-word essay addressing the communication area in which the applicant is interested
- Résumé

Admission to the graduate programs in communication is competitive. Meeting the minimum admission criteria does not guarantee admission.

Degree Requirements

Student pursuing the degree must complete 33 credits of graduate course work distributed as follows:

Three core courses (9 credits)

- COMM 600 - Introduction to Graduate Studies Credits: 3
- COMM 650 - Research Methodologies in Communication Credits: 3
- COMM 798 - Communication Studies Project Credits: 3

Two theory courses (6 credits) chosen from:

- COMM 602 - Theories and Research of Mass Communication Credits: 3
- COMM 605 - Intercultural Communication Credits: 3
- COMM 620 - Health Communication Credits: 3
- COMM 630 - Theories of Public Relations Credits: 3
- COMM 634 - Theories of Interpersonal Communication Credits: 3
- COMM 635 - Organizational Communication Credits: 3

One practicum course (3 credits)

- COMM 604 - Communication Research Practicum Credits: 3
• COMM 621 - Media Advocacy for Nonprofit Organizations Credits: 3
• COMM 653 - Graduate Communication: Research and Teaching Credits: 3
• COMM 655 - Theories of Visual Communication in Telecommunications Credits: 3
• COMM 694 - Communication Internship Credits: 3-6
• COMM 697 - Independent Production Credits: 1-3
• COMM 721 - E-Health Communication Credits: 3
• COMM 820 - Health Communication Campaigns Credits: 3
• COMM 590 - Seminar in Communication Credits: 3

Note:

Other courses including independent study can be used to fulfill this requirement with prior written approval of the director of graduate studies.

Elective courses (12 to 15 credits)

• Chosen from graduate communication courses, including those listed above under theory or practicum. Students may take up to 6 credits of course work outside the department with prior approval of the director of graduate studies.

Thesis option (3 credits)

• Students electing the thesis option should consult the section on Master’s Thesis in the Academic Policies section of this catalog.

Doctoral Degree

Communication, PhD

Banner Code: LA-PHD-COM

The doctor of philosophy degree in communication at Mason examines the powerful roles performed by communication in contemporary society. The program has two major areas of emphasis: health and strategic communication.

This program of study is offered by the Department of Communication.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

To receive the PhD in communication, students must complete a minimum of 60 credits beyond the master’s degree, including core courses in theory and research methods, course work in substantive fields of study, and a research practicum. Following completion of all required course work, students must pass a written qualifying examination and an oral defense of it, after which they are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

One required course (3 credits):
Three theory courses (9 credits) chosen from:

- COMM 602 - Theories and Research of Mass Communication Credits: 3
- COMM 605 - Intercultural Communication Credits: 3
- COMM 634 - Theories of Interpersonal Communication Credits: 3
- COMM 635 - Organizational Communication Credits: 3

Three research methods courses (9 credits):

- COMM 650 - Research Methodologies in Communication Credits: 3
- COMM 725 - Qualitative Methods Credits: 3
- COMM 750 - Research Methods II Credits: 3

Note:

Other 700-level courses, when relevant, may be used to fulfill this requirement with the prior written approval of the director.

Six courses (18 credits) in one of the following substantive fields of study:

Health communication:

Three courses (9 credits) chosen from:

- COMM 620 - Health Communication Credits: 3
- COMM 705 - Intercultural Health and Risk Communication Credits: 3
- COMM 720 - Consumer-Provider Health Communication Credits: 3
- COMM 820 - Health Communication Campaigns Credits: 3

Three elective courses (9 credits) chosen with approval of the advisor and director

Strategic communication:

Three courses (9 credits) chosen from:

- COMM 630 - Theories of Public Relations Credits: 3
- COMM 705 - Intercultural Health and Risk Communication Credits: 3
• COMM 706 - Strategic Communication Credits: 3
• COMM 735 - Crisis Communication Credits: 3

Three elective courses (9 credits) chosen with approval of the advisor and director

One research practicum (3 credits) chosen from:

• COMM 604 - Communication Research Practicum Credits: 3
• COMM 890 - Special Topics in Communication Credits: 3
• COMM 896 - Independent Study Credits: 3

Dissertation proposal and research (18 credits):

3 credits of:

• COMM 998 - Doctoral Dissertation Proposal Credits: 1-6

and 15 credits of:

• COMM 999 - Doctoral Dissertation Research Credits: 1-15

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully pass a written qualifying exam and an oral qualifying exam. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Continuous Registration

Once enrolled in 998, students must maintain continuous registration for at least 1 credit; once enrolled in 999, students must follow the university continuous registration policy. A maximum of 3 credits of COMM 998 and 15 credits of COMM 999 may be applied toward the 60 credits required for the degree, although because of continuous registration policy, students may be required to register for additional credits of these courses.

■ Cultural Studies

Phone: 703-993-2851
Web: culturalstudies.gmu.edu
Faculty

Albanese, Amireh, Best, Bickford, Bockman, Burr, Censer, Chang, Copelman, Deshmukh, Foster, Froman, Fuchs, Gibson, Gilbert, Greet, Guagnano, Gusterson, Hanrahan, Hodges, Holt, Jacobs, Jann, Johnsen-Neshati, Kaplan, Kaposy, Karush, Kaufmann, Lancaster (director), Landsberg, Leeman, Lont, Mandaville, Matz, Miller, O'Connor, O'Malley, Palkovich, Rabin, Ricouart, Rosenblum, Sample, Scarlata, Seligman, Shutika, P. Smith, S. Smith, Sockett, Todd, Travis, Yadav, Yocom, Zagarri

Course Work

The Cultural Studies Program offers all course work designated CULT in the Courses chapter of this catalog.

Cultural Studies at Mason

The Cultural Studies Program is distinctive in several respects. While similar programs at other universities are based in a department, the program at Mason has a truly interdisciplinary foundation, drawing on faculty members from 14 different departments across the university. The program thus explicitly links the social sciences and the humanities by combining their methods of interpretation to explore the production, distribution, and consumption of cultural objects in their social contexts. With particular focus on theory and method in crafting this linkage, the program addresses contemporary issues of nationality, class, race, and gender and opens the scope of scholarly inquiry to all forms of culture, past and present.

Undergraduate Programs

Cultural studies does not have an undergraduate program, but supports the interdisciplinary undergraduate program in global affairs. CULT 320 - Globalization and Culture is a core requirement for global affairs majors.

Graduate Programs

The doctoral program in cultural studies trains students for scholarship and teaching. The core curriculum includes an introduction to cultural studies and a methods course, as well as courses on political economy, gender and sexuality, critical race studies, science and technology, social institutions, and visual and performance culture.

All students develop field specializations in two areas of cultural studies. The particular strengths of the program are gender, sexuality, and body studies; visual culture and media studies; political economy and globalization; and race, ethnicity, and nation.

Funding

The program offers teaching assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Related Master's Degrees

Applicants to the doctoral degree in cultural studies must already hold a master's degree. For students interested in cultural studies who do not meet this requirement, the university has established a number of related master's degrees. Students are encouraged to apply to one of these programs. See Graduate Programs in the English, History and Art History, Modern and Classical Languages, Philosophy, Religious Studies, and Sociology and Anthropology sections of this chapter. These programs cumulate in a capstone seminar, CULT 802.
Students may, if they wish, apply simultaneously to one of these master's degrees and the doctoral program simultaneously so that faculty may review their academic promise and suitability for the program. Students who wish to apply to two degree programs at the same time need to submit two separate applications. Especially strong candidates with bachelor's degrees may be admitted into the doctoral program on a conditional basis. Admission is contingent on their performance in the master's degree program, particularly in CULT 802.

**Doctoral Degree**

**Cultural Studies, PhD**

Banner Code: LA-PHD-CULT

The doctoral program in cultural studies is offered by the Cultural Studies Program.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

**Application Requirements**

Applicants to the doctoral program in cultural studies must already have earned a master's degree in a relevant field. Students with only a bachelor's degree should apply to a master's program in a department that has an established related master's degree. See the Cultural Studies Program for more information.

In addition to materials required of all applicants for graduate study at Mason, applicants to cultural studies should submit the following:

- Scores on the GRE (general test is required; subject tests are optional)
- Three letters of recommendation from individuals who can judge the applicant’s scholarly potential
- Statement of purpose
- Writing sample demonstrating scholarly potential

**Degree Requirements**

As with all doctoral programs, the emphasis in this program is on the development of intellectual mastery and professional competence. The most important requirements are comprehensive exams and completion of a doctoral thesis that reflects the student’s ability to do original interdisciplinary work that meets professional standards. Students are required to demonstrate proficiency in at least one foreign language before being permitted to defend the doctoral dissertation proposal.

Students pursuing the doctorate in cultural studies must complete 48 credits beyond the master's degree.

**Three core courses (9 credits):**

- CULT 802 - Histories of Cultural Studies Credits: 3
- CULT 806 - Research Seminar in Cultural Studies Credits: 3
- CULT 808 - Student/Faculty Colloquium in Cultural Studies Credits: 1

**Note:**
Students must register for CULT 808 a minimum of 3 times.

**One course (3 credits) in theory chosen from:**

- CULT 810 - Culture and Political Economy Credits: 3
- CULT 814 - Gender and Sexuality Credits: 3
- CULT 820 - After Colonialism: Race, Ethnicity, Nationalism Credits: 3

**One course (3 credits) in a topic chosen from:**

- CULT 812 - Visual and Performance Culture Credits: 3
- CULT 816 - Science/Technology Credits: 3
- CULT 818 - Social Institutions Credits: 3

**One course (3 credits) in methodology**

- Students choose a course in a relevant methodology in which they are not already trained from departmental graduate offerings (600 level or above) under the guidance of faculty advisory committees.

**Field Requirements (18 credits)**

- Students must take a minimum of 3 courses in two fields. Under the guidance of faculty advisory committees, students select two fields that point topically and theoretically toward teaching interests, dissertation research, and related forms of professional development. Students select relevant courses from theory or topic courses not used to fulfill the previous requirements or from special topics courses. As part of the minimum 9-credit field requirement, students must take a 3-credit directed readings course, CULT 870, in each field with that field’s primary advisor. Students demonstrate competence in each field by producing and orally defending a field statement that consists of a comprehensive, critical literature review.

**Oral defense**

- Oral defense of two written field statements (See Field Requirements section above)

**Proficiency in a foreign language**

**Dissertation research (12 credits):**

- CULT 998 - Doctoral Dissertation Proposal Credits: 1-6
- CULT 999 - Doctoral Dissertation Credits: 1-12

**Advancement to Candidacy**
To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete two written field statements and pass an oral comprehensive exam based on them.

Continuous Registration

Students are required to register for a minimum of 3 credits of 998 or 999 each semester until they have completed the minimum number of credits of 998 and 999 required on their program of study. Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

■ Economics

Phone: 703-993-1130
Web: economics.gmu.edu

Faculty

Distinguished professor emeriti: Buchanan, Smith, Tullock

Professors: Bennett, Boettke, Boudreaux, Congleton, Cowen, Crain, Heiner, Houser (chair), Klein, Levy, McCabe, Nye, Richardson, Roberts, Rowley, Stratmann, Wagner, Williams

Associate professors: Caplan, Hanson, Meyer, Ramirez, Reid, Tabarrok, Thorbecke, Wiest

Assistant professors: Al-Ubaydli, Johnson, Jones, Leeson

Instructor: Rustici

Professors emeriti: Chung (emeritus), Phillips (emeritus), Snavely (emeritus), Vaughn (emerita)

Course Work

The Economics Department offers all course work designated ECON in the Courses chapter of the catalog.

Undergraduate Programs

The department offers a bachelor of arts and a bachelor of science degree in economics. The bachelor of science degree program is designed for students who desire a more technical program with a stronger emphasis on economic and quantitative analysis. It is especially appropriate for students who anticipate a career as an economic analyst in government, consulting, trade associations, or other private sector positions that emphasize economic research and analysis. The requirements are also appropriate for students planning postgraduate education in economics or more quantitative business administration programs.

The bachelor of arts degree program is designed primarily for students with a stronger interest in the liberal arts. It is appropriate for those who prefer a less quantitative degree program and may be especially appropriate for students planning to attend law school or graduate programs in business or public administration.

Minors

The department offers a minor in economics and a minor in economic systems design. Both are available to students in any major.
Bachelor’s/Accelerated Master’s Program

The department offers highly qualified undergraduates the opportunity to apply to an accelerated master’s degree program in economics. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 144 credits, sometimes within five years.

Graduate Programs

The department offers a master's and a doctoral degree in economics. The department is noted for its emphasis on comparative institutional analysis and its focus on the relations among economic, political, and legal institutions. This is reflected in the specializations associated with the department: experimental economics, Austrian economics, public choice, constitutional political economy, law and economics, and new institutional economics.

The department offers a graduate certificate in economic systems design, which provides a well defined course of study for students who want to advance or update their knowledge in this fast-moving field.

Funding

The department offers teaching and research assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Undergraduate Degree

Economics, BA

Banner Code: LA-BA-ECON

This program is designed primarily for students with a stronger interest in the liberal arts. It is appropriate for those who prefer a less quantitative degree program and may be especially appropriate for students planning to attend law school or graduate programs in business or public administration.

Some economics courses may fulfill the university-wide general education requirement in global understanding or the CHSS requirement in non-Western culture. Check with the departmental advising office for more information. Economics majors can fulfill the university-wide general education synthesis requirement with ECON 309.

This program of study is offered by the Department of Economics.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete the course work below with a minimum GPA of 2.00 in ECON courses.

Six required courses (18 credits):
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3
• ECON 306 - Intermediate Microeconomics Credits: 3
• ECON 311 - Intermediate Macroeconomics Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• IT 103 - Introduction to Computing Credits: 3

One or two courses in statistics (4 or 6 credits)

• OM 210 - Statistical Analysis for Management Credits: 4
  or
• STAT 250 - Introductory Statistics I Credits: 3
• STAT 350 - Introductory Statistics II Credits: 3

Eight elective courses (24 credits)

• Chosen from courses in economics at the 300 and 400 level; ECON 385 may not be used to fulfill this requirement.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in economics fulfill this requirement by successfully completing ECON 320, 345, 350, 360, or 365.

Economics, BS

Banner Code: LA-BS-ECON

The bachelor of science degree is designed for students who desire a more technical program with a stronger emphasis on economic and quantitative analysis. It is especially appropriate for students who anticipate a career as an economic analyst in government, consulting, trade associations, or other private sector positions that emphasize economic research and analysis. The requirements are also appropriate for students planning postgraduate education in economics or more quantitative business administration programs.

Some economics courses may fulfill the university-wide general education requirement in global understanding. Check with the departmental advising office for more information. Economics majors can fulfill the university-wide general education synthesis requirement with ECON 309.

This program of study is offered by the Department of Economics.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements
In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students pursuing the BS in economics must complete 57-59 credits of course work, earning a minimum GPA of 2.00 in ECON courses.

Eight required courses (26 credits):

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
- ECON 306 - Intermediate Microeconomics Credits: 3
- ECON 311 - Intermediate Macroeconomics Credits: 3
- ECON 345 - Introduction to Econometrics Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- IT 103 - Introduction to Computing Credits: 3

One course (3 credits) chosen from:

- ACCT 203 - Survey of Accounting Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

One or two courses in statistics (4 or 6 credits):

- OM 210 - Statistical Analysis for Management Credits: 4
  or
- STAT 250 - Introductory Statistics I Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3

Eight elective courses (24 credits)

- Chosen from courses in economics at the 300 and 400 level; ECON 385 may not be used to fulfill this requirement.

Note:

If ECON 340 Mathematical Economics is chosen as an elective, students need not take MATH 114; however, MATH 114 is strongly recommended for students considering graduate school in economics and is required for admission to most graduate programs. An additional calculus course beyond MATH 114 is also advisable for students considering graduate study in economics.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in economics fulfill this requirement by successfully completing ECON 320, 345, 350, 360, or 365.
Managerial Economics, BS (pending SCHEV approval)

Banner Code: LA-BS-MECN

The BS degree program in managerial economics provides students who wish to prepare for a career in the business sector an alternative to the traditional undergraduate program in the School of Management. The major in managerial economics places greater emphasis on the application of economic concepts and reasoning in analyzing management and finance decisions in the business sector. Relative to the BS in economics, the BS in managerial economics offers a course of study more focused on the business world.

Some economics courses may fulfill the university-wide general education requirement in global understanding. Check with the departmental advising office for more information. Economics majors can fulfill the university-wide general education synthesis requirement with ECON 309.

This program of study is offered by the Department of Economics.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students majoring in managerial economics must complete the coursework below. Students must earn a minimum GPA of 2.00 in ECON courses.

Six required courses (18 credits) in economics:

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
- ECON 306 - Intermediate Microeconomics Credits: 3
- ECON 308 - Managerial Economics and Strategy Credits: 3
- ECON 311 - Intermediate Macroeconomics Credits: 3
- ECON 345 - Introduction to Econometrics Credits: 3

Two required courses (8 credits) in mathematics:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

One or two required courses (4 or 6 credits) in statistics:

- OM 210 - Statistical Analysis for Management Credits: 4
  or
- STAT 250 - Introductory Statistics I Credits: 3
  and
- STAT 350 - Introductory Statistics II Credits: 3
Three required supporting courses (9 credits):

- ACCT 203 - Survey of Accounting Credits: 3
- IT 103 - Introduction to Computing Credits: 3
- SOM 301 - Business Models: A Learning by Writing Introduction Credits: 3

Six elective courses (18 credits) in economics:

Four elective courses (12 credits) in economics chosen from:

- ECON 310 - Money and Banking Credits: 3
- ECON 321 - Economics of Labor Credits: 3
- ECON 370 - Economics of Industrial Organization Credits: 3
- ECON 390 - International Economics Credits: 3
- ECON 412 - Game Theory and Economics of Institutions Credits: 3
- ECON 415 - Law and Economics Credits: 3
- ECON 420 - International Money and Finance Credits: 3

Note:

With departmental approval, ECON 496 - Special Topics in Economics may be used to fulfill this requirement.

Two elective courses in economics at the 300 and 400 level

- ECON 385 may not be used to fulfill this requirement.

One elective course (3 credits) not in economics chosen from:

- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - Managing People and Organizations Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3
- OM 301 - Operations Management Credits: 3

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in economics fulfill this requirement by successfully completing ECON 320, 345, 350, 360, or 365.
Undergraduate Minor

Economic Systems Design Minor

Banner Code: ESD

The design of processes that efficiently allocate resources and foster exchange are crucial in society, organizations, personal interactions, and individual decision making. Economic systems design is the scientific study of the design, development, testing, and understanding of economic institutions. Economic systems design explores problems in the design of allocation systems and provides a method to develop and test the properties of such systems. A minor in economic systems design prepares students to undertake the scientific process of understanding and developing systems of exchange and their incentives. The skills offered through this minor can be of use to e-commerce designers, policy analysts, systems designers, engineers, and computer scientists.

This program of study is offered by the Department of Economics.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing the minor must complete 15 credits, distributed as follows.

Three required courses (9 credits):

- ECON 440 - Economic Systems Design: Principles and Experiments Credits: 3
- ECON 441 - Economic Systems Design: Case Studies and Analysis Credits: 3
- ECON 442 - Economic Systems Design: Implementation Credits: 3

Two elective courses (6 credits):

- Chosen in consultation with an advisor in the minor.

Typical courses include:

- MIS 491 - Seminar in Management Information Systems Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- SYST 420 - Network Analysis Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ECON 335 - Environmental Economics Credits: 3
- ECON 415 - Law and Economics Credits: 3

Economics Minor
This program of study is offered by the Department of Economics.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 21 credits in economics with a minimum GPA of 2.00.

A minimum of 9 credits of upper-level economics courses must be taken at Mason. With permission of the department chair or undergraduate director, a course in a closely related field may be substituted for 3 credits of economics electives. A course in statistics is highly recommended, and OM 210, or STAT 250 or 344 may be substituted for up to 3 credits of economics electives.

Three required courses (9 credits):

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3
- ECON 306 - Intermediate Microeconomics Credits: 3

Four elective courses (12 credits)

- Chosen from courses in economics at the 300 or 400 level; ECON 385 may not be used to fulfill this requirement.

Bachelor's/Accelerated Master's Program

Economics, BA or BS/Economics Accelerated MA

Highly qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both bachelor’s and master’s degrees in economics after satisfactory completion of 144 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met. Graduates are exceptionally well-prepared for a professional school or a PhD program in economics or a related discipline. Interested students should contact the department for details about the application process.

Master's Degree

Economics, MA

Banner Code: LA-MA-ECON
The master's degree in economics strengthens students’ knowledge of economic theory and improves their skills in applying the theory to economic problems. Graduates are qualified to read and judge other research and conduct their own research, either individually or as members of government or business teams. They are also prepared to write policy analysis articles. Students who plan to pursue a PhD in economics should apply directly to the doctoral program.

This program of study is offered by the Department of Economics.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Applicants should hold an undergraduate degree, which does not have to be in economics, from an accredited institution. They should have satisfactorily completed intermediate microeconomics and macroeconomics and MATH 108 or equivalent, and at least one semester of calculus before enrolling in any graduate courses. Students entering the master’s program should be familiar with basic statistics as well. Students also should have earned a 3.00 GPA in the last two years of undergraduate work and in all economics courses, as well as satisfactory scores on the GRE (subject exam is optional).

All applicants must submit two letters of recommendation and a brief personal statement explaining their interest in the program.

Degree Requirements

Students pursuing this degree must complete 30 graduate credits with a cumulative GPA of 3.00.

Three required courses (9 credits):

- ECON 611 - Microeconomic Theory Credits: 3
- ECON 612 - Microeconomic Theory II Credits: 3
- ECON 615 - Macroeconomic Theory Credits: 3

Seven elective courses (21 credits)

- Chosen from courses in economics from any of the fields offered by the department.

Recommended Courses

- ECON 535 - Survey of Applied Econometrics Credits: 3
- ECON 630 - Mathematical Economics I Credits: 3

Note:

Students may receive departmental permission to substitute up to 6 credits of electives taken outside economics in closely related fields. Students may also elect the thesis option, which offers 6 credits for independent research and writing under the supervision of a faculty member in lieu of 6 credits of electives.

Comprehensive Exams
Students must pass comprehensive exams in micro- and macroeconomics. Exams are offered twice each year.

Notes:

Although the department does not guarantee availability of courses every semester, a typical first-year sequence includes ECON 611 and 630, and an elective in the fall, and ECON 612 and 615, and an elective in the spring. If possible, part-time students should arrange their work schedules to take two courses per semester in the first year.

Master’s degree students must enroll at the Arlington Campus for core theory courses.

**Master's Level Certificate**

**Economic Systems Design Graduate Certificate**

**Banner Code: LA-CERG-ECSD**

This certificate provides graduate students with a program of courses and laboratory experience. Course work for the graduate certificate can be used for credit toward the MA and PhD in economics. The primary purpose is to provide a well defined target for students who want to advance or update their knowledge in this fast-moving field.

Graduate students in economics, computer science, mathematics, systems engineering, and informatics find this certificate a strong complement to their major area of study. The courses and project work provide skills that can be used in electronic commerce, public policy, and internal firm resource allocation processes.

This program of study is offered by the Department of Economics.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

**Application Requirements**

The program is open to all students who hold a bachelor’s degree from an accredited university. Interested students not already in a degree program should submit an application for graduate studies.

**Certificate Requirements**

Students pursuing the certificate must complete 15 credits. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate.

Three graduate-level courses (9 credits) in economic systems design

Two elective courses (6 credits)

- Chosen in consultation with an advisor in economics

**Doctoral Degree**
Economics, PhD

Banner Code: LA-PHD-ECON

This program prepares students for careers in academia, business, and government. Core courses train students in modern theory and quantitative techniques, while field courses stress the application of theory to relevant economic problems. Dissertation work requires students to master and apply the skills of original research. The department emphasizes publishing; many students have had articles accepted for publication in professional journals while in the graduate program. Research in the Department of Economics covers a broad spectrum, from problems of immediate policy importance to fundamental questions of economic and social organization.

This program of study is offered by the Department of Economics.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Applicants should hold an undergraduate degree, which does not have to be in economics, from an accredited institution and have satisfactorily completed intermediate microeconomics and macroeconomics. They also should have one year of calculus, one year of statistics, and one semester each of matrix algebra and econometrics. Applicants should have earned a 3.00 GPA in the last two years of undergraduate work and in all economics courses, as well as received satisfactory scores on the GRE (subject exam is optional).

Applicants must submit two letters of recommendation and a brief personal statement explaining their interest in the program. The department accepts doctoral students only for the fall semester.

Reduction of Credit

Students who enter with a master’s degree in economics may have their credit requirement reduced by up to 30 credits at the discretion of the department with approval of the dean. Credit is not given for comprehensive and field exams from other universities.

Degree Requirements

In addition to satisfying the university requirements for all doctoral degrees, students must successfully complete 72 credits of course work with a cumulative GPA of 3.00 including exams. No more than two courses with a grade of 2.00 may be applied toward the degree.

Six required core courses (18 credits):

- ECON 630 - Mathematical Economics I Credits: 3
- ECON 637 - Econometrics I Credits: 3
- ECON 715 - Macroeconomic Theory I Credits: 3
- ECON 811 - Microeconomic Theory I Credits: 3
- ECON 812 - Microeconomic Theory II Credits: 3
- ECON 816 - Macroeconomic Theory II Credits: 3
Six to ten elective courses (18 to 30 credits)

Two courses in each of two fields listed below (12 credits):

Subject to course availability, the department offers exams in the following fields of study. Consult the department for the required courses for each field.

- Austrian economics
- Constitutional economics
- Economic history
- Economics and religion
- Experimental economics
- Industrial organization
- Institutions and Development
- Law and economics
- Monetary theory
- Public choice
- Public finance

Exams

- Field exams in two fields of study
- Comprehensive exams in microeconomics and macroeconomics

Dissertation (12 to 24 credits):

- ECON 998 - Doctoral Dissertation Proposal Research. Credits:
- ECON 999 - Doctoral Dissertation Research Credits: variable

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass comprehensive exams in microeconomics and macroeconomics, as well as field exams in two knowledge areas. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Continuous Registration

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

■ English
Faculty

Professors: Cheuse, D’Andrea (Robinson Professor), Foster, Goodwin, Hodges, Jann, Lathbury, Lowry, Nadeau, Pankey, Tichy

Associate professors: Albanese, Amireh, Anderson, Atkinson, Burr, Clark, Fuchs, Gallehr, Hawk, Holisky, Jones, Kaplan, Kaufmann, Keaney, Kuebrich, Lattanzi Shutika, Matz (chair), Mori, Rutledge, Weinberger, Yadav, Yocom, Zawacki

Assistant professors: Brkie, Chang, Eisner, Eyman, Habila, Harvey, Hoffmann, Keith, Lawrence, Lin, Lockwood, Maloux, Marcantonio, McCarthy, Michals, Reid, Rogers, Sample, Scarlata, Stanica, Widerhold, Wulf

Term associate professors: Koch, Michals, Miller, Samuelian, Scott, Taciuch, Thompson

Term assistant professors: Beach, Berg, Burnham, DeNys, DeFazio, Habib, Jacobs, Johnson, Lister, Matthews, McGeehan, Nanian, Nichols, Rudnicki, Saunders, Taylor, Williams

Term instructors: Hoy, Raffel, Scolaro

Adjunct assistant professors: Broyles, Cabral, Casal, Dreisonstok, Fletcher, Fowler, Humbertson, Johnston, Kuhta, Moody, Pabich, Redondo, Waldron

Adjunct instructors: Baker, Cooper, Dutta, Grogan-Barone, Johnston, Lawrence, McKinney, Morris, Rhein, Surrette

Course Work

The English Department offers all course work designated CL, ENGL, LING, and NAIS in the Courses chapter of this catalog.

Related Courses

Courses offered by other departments are occasionally crosslisted with English and given the ENGL course designator; such courses may be counted toward the English major.

Undergraduate Programs

The department offers a bachelor's degree in English, a versatile major with thirteen specialized concentrations that are designed to meet students' individual interests and career objectives. English majors can also pursue a special option in comparative literature or do an internship in technical writing or linguistics. Students interested in becoming teachers can participate in a program offered in conjunction with the College of Education and Human Development that allows undergraduates to simultaneously complete their BA in English and their licensure requirements to teach English at the secondary school level in Virginia.

English majors learn to read critically and write carefully in classes that are uniquely small for a university the size of Mason. Students develop these abilities not only thorough reading traditional texts but also through the use of technologies such as blogs, wikis, and multimedia production. Because English majors have excellent skills in written and oral communication, research, critical thinking, and focused creativity they are well prepared for any career - teaching, journalism, creative writing, management, law, and more.

Honors in the Major
Highly qualified students may pursue advanced work leading to graduation with honors in the major. To graduate with honors in the major, students must complete the honors course sequence and receive a 3.50 GPA in all courses counted toward the major and, separately, a minimum 3.50 GPA in their honors courses. Honors courses may simultaneously satisfy concentration and distribution requirements in the major.

Students may satisfy the honors course sequence in several ways:

- Students may take two sections of ENGL 414 Honors Seminar.
- Students may take one section of ENGL 414 Honors Seminar and ENGL 415 Honors Thesis Writing Seminar.
- Students in the creative writing concentration may take one section of ENGL 414 Honors Seminar and write a creative honors thesis in ENGL 416 Honors Independent Study.
- Students in the nonfiction concentration may take ENGL 416 Honors Independent Study in conjunction with an advanced course in nonfiction writing and complete a nonfiction thesis as part of ENGL 415 Honors Thesis Writing Seminar.

See the English Department for application procedures and other information.

**English with a Second Major**

Students can combine a major in English with a second major. Students interested in this option are encouraged to discuss their plans with their English advisor and the director of undergraduate programs in English. See the section on Credit for More than One Undergraduate Major in the Academic Policies chapter of the catalog.

**Minors**

The department offers a minor in English, available to students in any major.

Faculty from English coordinate or co-coordinate the Film and Media Studies Minor, the Folklore and Mythology Minor, the Native American and Indigenous Studies Minor, and the Linguistics Minor. See the Interdisciplinary Minors section of this chapter for more information.

**Bachelor’s/Accelerated Master’s Program**

The department offers highly qualified undergraduates in any major the opportunity to apply to an accelerated master’s degree program in English with a concentration in linguistics. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in English with a concentration in linguistics after satisfactory completion of 144 credits, sometimes within five years.

**Undergraduates in Graduate Courses**

The English Department permits qualified undergraduates to enroll in its graduate courses numbered 500 through 599. They may apply these credits to their undergraduate degree or mark them for reserve graduate credit. See the department for details on how to register.

**Writing Center**

The Writing Center offers one-on-one conferencing during all stages of the writing process. Conferences are free to all Mason students, faculty, staff, and alumni. Writing Center tutors, who are graduate teaching assistants in the English Department, have been trained in current methods of composition instruction. They can help clients overcome writing anxiety, develop organizational and revision skills, and learn useful strategies for editing their own work. Appointments should be made by calling 703-993-1200 or stopping by the center in Robinson Hall A, Room 11, to schedule a session.
The Northern Virginia Writing Project (NVWP) is an inservice organization dedicated to improving the writing of Northern Virginia students, kindergarten through university level. Each summer, selected teachers attend an intensive five-week institute where they demonstrate successful teaching techniques, study research on the teaching of writing, and write. After the summer institute, participants return to their schools, colleges, and universities to lead workshops and in-service seminars for other teachers. NVWP is an affiliate of the National Writing Project and one of the seven sites of the Virginia Writing Project.

Graduate Programs

The department offers graduate programs in the study and practice of literature and writing, as well as course work in related fields such as folklore, film, linguistics, and cultural studies. The master's degree in English provides concentrations in literature, cultural studies, professional writing and rhetoric, the teaching of writing and literature, and linguistics.

The department also offers a terminal degree, the MFA in creative writing, with concentrations in fiction, poetry, and nonfiction.

Faculty from the department coordinate the concentration in Folklore in the master's degree in individualized studies (MAIS). See the ■ Interdisciplinary Studies (MAIS) section of this chapter for details.

Funding

The department offers teaching assistantships and fellowships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must show satisfactory progress toward their degree.

Certificates

The department offers graduate certificates in folklore, professional writing and rhetoric, and teaching English as a second language. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the course work for the certificates may be able to be applied to a degree. Students must apply and be admitted to a graduate certificate program.

Undergraduate Degree

English, BA

Banner Code: LA-BA-ENGL

This program of study is offered by the Department of English.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 30 credits (nine courses) in English beyond ENGL 302 with a minimum GPA of 2.00.
Students should consult with an English Department advisor to learn ways in which the university-wide general education requirements can also satisfy college-level requirements or the English major.

One required course (6 credits):

- ENGL 325 - Dimensions of Writing and Literature Credits: 6

Note:

Fulfills the university writing-intensive requirement.

Four core courses (12 credits) distributed as follows:

One course (3 credits) in literature before 1800 chosen from:

- ENGL 335 - Shakespeare Credits: 3 (Histories and Comedies)
- ENGL 336 - Shakespeare Credits: 3 (Tragedies and Romances)
- ENGL 400 - Literature of the Middle Ages Credits: 3
- ENGL 401 - English Poetry and Prose of the 16th Century Credits: 3
- ENGL 402 - English Poetry and Prose of the 17th Century Credits: 3
- ENGL 404 - The Augustan Age Credits: 3
- ENGL 405 - The Age of Sensibility Credits: 3
- ENGL 431 - Medieval Intellectual Topics Credits: 3
- ENGL 440 - English Renaissance Drama Credits: 3
- ENGL 443 - Restoration and Eighteenth-Century Drama Credits: 3
- ENGL 450 - English Novel of the 18th Century Credits: 3
- ENGL 471 - Chaucer Credits: 3
- ENGL 472 - Spenser Credits: 3
- ENGL 474 - Milton Credits: 3

One course (3 credits) in literature before 1915 chosen from courses listed above and the following courses:

- ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
- ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
- ENGL 406 - English Poetry of the Romantic Period Credits: 3
- ENGL 407 - Prose and Poetry of the Victorian Period Credits: 3
- ENGL 423 - Colonial and Federalist American Literature Credits: 3
- ENGL 425 - Literature of the American Renaissance Credits: 3
- ENGL 436 - Nineteenth-Century Continental Novels in Translation Credits: 3
- ENGL 452 - Development of the American Novel to 1914 Credits: 3
- ENGL 453 - English Novel of the 19th Century Credits: 3
One course (3 credits) in minority, folkloric, or popular literary and cultural traditions chosen from:

- ENGL 333 - Folklore of the Americas Credits: 3
- ENGL 334 - Literary Approaches to Popular Culture Credits: 3
- ENGL 349 - Global Voices Credits: 3
- ENGL 350 - The Idea of a World Literature Credits: 3
- ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
- ENGL 369 - Women and Literature Credits: 3
- ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
- ENGL 371 - African American Literature Through 1946 Credits: 3
- ENGL 372 - Contemporary African American Literature Credits: 3
- ENGL 375 - Ethnic American Literature Credits: 3
- ENGL 439 - Literature in English Other Than British and American Credits: 3
- ENGL 460 - Critical Study of Children's Literature Credits: 3
- ENGL 479 - Ethnicity and Immigration in Folklore Credits: 3
- ENGL 480 - Folklore of the Spirit World Credits: 3
- ENGL 481 - Folk Arts and Folk Artists Credits: 3
- ENGL 491 - Special Topics in Folklore Credits: 3
- ENGL 492 - Science Fiction Credits: 3
- ENGL 493 - Special Topics in Popular Literature Credits: 3

One elective course (3 credits) above ENGL 302

Note:

Courses taken to fulfill this requirement may simultaneously satisfy a concentration. Special topics courses, when relevant, may be used to fulfill this requirement with the prior written approval of the department.

Four courses (12 credits) in one of the following concentrations:

Special topics courses may be used to fulfill the requirements for a concentration when so designated by department.

▲ Concentration in American Literature (ALIT)

Four courses (12 credits) chosen from:

- ENGL 333 - Folklore of the Americas Credits: 3
- ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
- ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
- ENGL 371 - African American Literature Through 1946 Credits: 3
- ENGL 372 - Contemporary African American Literature Credits: 3
• ENGL 375 - Ethnic American Literature Credits: 3
• ENGL 380 - Recent American Fiction Credits: 3
• ENGL 390 - Recent American Poetry Credits: 3
• ENGL 423 - Colonial and Federalist American Literature Credits: 3
• ENGL 425 - Literature of the American Renaissance Credits: 3
• ENGL 447 - American Drama of the Twentieth Century Credits: 3
• ENGL 452 - Development of the American Novel to 1914 Credits: 3
• ENGL 454 - Development of the American Novel since 1914 Credits: 3
• ENGL 463 - American Poetry of the Twentieth Century Credits: 3
• ENGL 478 - Special Topics: American Authors Credits: 3
• ENGL 479 - Ethnicity and Immigration in Folklore Credits: 3

▲ Concentration in Creative Writing (CW)

Four courses (12 credits) chosen from:

• ENGL 344 - Introduction to Digital Writing in the Genres Credits: 3
• ENGL 397 - Poetry Writing Credits: 3
• ENGL 398 - Fiction Writing Credits: 3
• ENGL 399 - Creative Nonfiction Writing Credits: 3
• ENGL 458 - Advanced Fiction Writing Workshop Credits: 3
• ENGL 464 - Advanced Poetry Writing Workshop Credits: 3
• ENGL 497 - Special Topics in Creative Writing Credits: 3

▲ Concentration in Cultural Studies (CULT)

Four courses (12 credits) chosen from:

• ENGL 327 - Introduction to Cultural Studies Credits: 3
• ENGL 330 - Introduction to Literary Theory Credits: 3
• ENGL 332 - Introduction to Film Credits: 3
• ENGL 333 - Folklore of the Americas Credits: 3
• ENGL 334 - Literary Approaches to Popular Culture Credits: 3
• ENGL 338 - Cultural Constructions of Sexualities Credits: 3
• ENGL 349 - Global Voices Credits: 3
• ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
• ENGL 369 - Women and Literature Credits: 3
• ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
• ENGL 371 - African American Literature Through 1946 Credits: 3
• ENGL 372 - Contemporary African American Literature Credits: 3
• ENGL 460 - Critical Study of Children's Literature Credits: 3
• ENGL 479 - Ethnicity and Immigration in Folklore Credits: 3
• ENGL 490 - Special Topics in Film Credits: 3
• ENGL 491 - Special Topics in Folklore Credits: 3
• ENGL 493 - Special Topics in Popular Literature Credits: 3

Up to one course (3 credits) may be from outside the English Department chosen from:

• COMM 465 - Topics in Communication and Gender Credits: 3
• CULT 320 - Globalization and Culture Credits: 3
• PSYC 362 - Psychology of Women Credits: 3
• SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
• WMST 300 - Current Issues in Women and Gender Studies Credits: 3
• WMST 330 - Feminist Theory Across the Disciplines Credits: 3

▲ Concentration in Drama (DRA)

Four courses (12 credits) chosen from:

• ENGL 335 - Shakespeare Credits: 3 (Histories and Comedies)
• ENGL 336 - Shakespeare Credits: 3 (Tragedies and Romances)
• ENGL 440 - English Renaissance Drama Credits: 3
• ENGL 443 - Restoration and Eighteenth-Century Drama Credits: 3
• ENGL 445 - English and Irish Drama of the Twentieth Century Credits: 3
• ENGL 447 - American Drama of the Twentieth Century Credits: 3
• ENGL 448 - Modern Drama Credits: 3
• ENGL 449 - Special Topics in Drama Credits: 3

Note:

A maximum of one course (3 credits) may be from courses on Shakespeare.

Up to one course (3 credits) may be from outside the English Department from:

• FREN 413 - French Literature of the Seventeenth Century: Classical Drama Credits: 3
• FREN 442 - Twentieth-Century Drama and Poetry Credits: 3
• RUSS 407 - Russian Drama and Theater Credits: 3
• SPAN 565 - Studies in Spanish American Drama Credits: 3
• THR 350 - Script Analysis Credits: 3
• THR 351 - Dramatic Theory and Criticism Credits: 3
• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 380 - Playwriting I Credits: 3
• THR 381 - Playwriting II Credits: 3

▲ Concentration in Fiction (FIC)
Four courses (12 credits) chosen from:

- ENGL 380 - Recent American Fiction Credits: 3
- ENGL 398 - Fiction Writing Credits: 3
- ENGL 437 - Twentieth-Century Continental Novels in Translation Credits: 3
- ENGL 450 - English Novel of the 18th Century Credits: 3
- ENGL 452 - Development of the American Novel to 1914 Credits: 3
- ENGL 453 - English Novel of the 19th Century Credits: 3
- ENGL 454 - Development of the American Novel since 1914 Credits: 3
- ENGL 456 - English Novel of the Twentieth Century Credits: 3
- ENGL 459 - Special Topics in Fiction Credits: 3
- ENGL 460 - Critical Study of Children's Literature Credits: 3
- ENGL 492 - Science Fiction Credits: 3

At least one of the four courses (3 credits) must be in fiction before 1915 chosen from:

- ENGL 436 - Nineteenth-Century Continental Novels in Translation Credits: 3
- ENGL 450 - English Novel of the 18th Century Credits: 3
- ENGL 452 - Development of the American Novel to 1914 Credits: 3
- ENGL 453 - English Novel of the 19th Century Credits: 3

▲ Concentration in Film and Media Studies (FILM)

Four courses (12 credits) chosen from:

- ENGL 327 - Introduction to Cultural Studies Credits: 3
- ENGL 331 - Introduction to Documentary Credits: 3
- ENGL 332 - Introduction to Film Credits: 3
- ENGL 343 - Textual Media Credits: 3
- ENGL 421 - Topics in Film History Credits: 3
- ENGL 422 - Topics in Film Theory Credits: 3
- ENGL 490 - Special Topics in Film Credits: 3

Up to one course (3 credits) may be from outside the English Department from:

- ARTH 362 - Twentieth-Century European Art Credits: 3
- ARTH 373 - Studies in 20th-Century Art of the United States Credits: 3
- ARTH 374 - Art Now Credits: 3
- COMM 380 - Media Criticism Credits: 3
- COMM 465 - Topics in Communication and Gender Credits: 3
- MUSI 301 - Music in Motion Pictures Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3
Concentration in Folklore and Mythology (FML)

At least two courses (6 credits) in folklore and mythology chosen from:

- ENGL 311 - Writing Ethnography Credits: 3
- ENGL 333 - Folklore of the Americas Credits: 3
- ENGL 337 - Special Topics in Myth and Literature Credits: 3
- ENGL 479 - Ethnicity and Immigration in Folklore Credits: 3
- ENGL 480 - Folklore of the Spirit World Credits: 3
- ENGL 481 - Folk Arts and Folk Artists Credits: 3
- ENGL 491 - Special Topics in Folklore Credits: 3
- ENGL 498 - Internship: Special Topics Credits: 1-3
- ENGL 591 - Special Topics in Folklore Credits: 3

Up to one course (3 credits) may be from outside the English Department chosen from:

- ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3
  or
- CLAS 340 - Greek and Roman Epic Credits: 3

Up to two courses (6 credits) related to folklore and mythology chosen from:

- ENGL 327 - Introduction to Cultural Studies Credits: 3
- ENGL 335 - Shakespeare Credits: 3 (Histories and Comedies)
- ENGL 336 - Shakespeare Credits: 3 (Tragedies and Romances)
- ENGL 349 - Global Voices Credits: 3
- ENGL 368 - Beginnings of African American Literature Through 1865 Credits: 3
- ENGL 370 - African American Literature: Reconstruction to 1903 Credits: 3
- ENGL 371 - African American Literature Through 1946 Credits: 3
- ENGL 372 - Contemporary African American Literature Credits: 3
- ENGL 400 - Literature of the Middle Ages Credits: 3
- ENGL 445 - English and Irish Drama of the Twentieth Century Credits: 3
- ENGL 471 - Chaucer Credits: 3
- ENGL 472 - Spenser Credits: 3
- ENGL 474 - Milton Credits: 3

One course (3 credits) may be from outside the English Department chosen from:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 303 - Peoples and Cultures of Selected Regions Credits: 3
- ANTH 304 - Peoples and Cultures of the Pacific Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
• ANTH 307 - Ancient Mesoamerica Credits: 3
• ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
• ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3
• ANTH 313 - Myth, Magic, and Mind Credits: 3
• ANTH 332 - Cultures in Comparative Perspective Credits: 3
• ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
• ARTH 321 - Greek Art and Archaeology Credits: 3
• ARTH 322 - Roman Art and Archaeology Credits: 3
• ARTH 340 - Early Renaissance Art in Italy, 1300-1500 Credits: 3
• ARTH 342 - High Renaissance Art in Italy, 1480–1570 Credits: 3
• ARTH 345 - Northern Baroque Art, 1600-1750 Credits: 3
• ARTH 382 - Arts of India Credits: 3
• ARTH 383 - Arts of Southeast Asia Credits: 3
• ARTH 384 - Arts of China Credits: 3
• ARTH 385 - Arts of Japan Credits: 3
• RELI 351 - Religions of the Ancient Near East Credits: 3

▲ Concentration in Linguistics (LING)

One required course (3 credits):

• LING 326 - General Linguistics Credits: 3

Three courses (9 credits) chosen from:

• LING 322 - English Grammar Credits: 3
• LING 450 - Introduction to Sociolinguistics Credits: 3
• LING 485 - Semantics and Pragmatics Credits: 3
• LING 486 - Syntax I Credits: 3
• LING 490 - Generative Phonology Credits: 3
• LING 499 - Independent Study Credits: 1-3
• LING 507 - Field Work in Applied Linguistics Credits: 3
• LING 521 - Applied Linguistics: Teaching English as a Second Language Credits: 3
• LING 523 - Descriptive Aspects of English Phonetics and Phonology Credits: 3
• LING 581 - Psycholinguistics Credits: 3
• LING 582 - Second Language Acquisition Credits: 3

▲ Concentration in Medieval and Renaissance Literature (MRL)

Four courses (12 credits) chosen from:

• ENGL 335 - Shakespeare Credits: 3 (Histories and Comedies)
• ENGL 336 - Shakespeare Credits: 3 (Tragedies and Romances)
• ENGL 400 - Literature of the Middle Ages Credits: 3
• ENGL 401 - English Poetry and Prose of the 16th Century Credits: 3
• ENGL 402 - English Poetry and Prose of the 17th Century Credits: 3
• ENGL 431 - Medieval Intellectual Topics Credits: 3
• ENGL 440 - English Renaissance Drama Credits: 3
• ENGL 471 - Chaucer Credits: 3
• ENGL 472 - Spenser Credits: 3
• ENGL 473 - Special Studies in Shakespeare Credits: 3
• ENGL 474 - Milton Credits: 3

Up to one course (3 credits) may be from outside the English Department chosen from:

• ARTH 333 - Early Christian and Byzantine Art Credits: 3
• ARTH 334 - Western Medieval Art Credits: 3
• ARTH 340 - Early Renaissance Art in Italy, 1300-1500 Credits: 3
• ARTH 341 - Northern Renaissance Art Credits: 3
• ARTH 342 - High Renaissance Art in Italy, 1480–1570 Credits: 3
• ARTH 344 - Baroque Art in Italy, France, and Spain, 1600–1750 Credits: 3
• ARTH 345 - Northern Baroque Art, 1600-1750 Credits: 3
• HIST 304 - Western Europe in the Middle Ages Credits: 3
• HIST 305 - The Renaissance Credits: 3
• HIST 306 - The Reformation Credits: 3
• HIST 321 - Early Modern England Credits: 3
• PHIL 302 - History of Western Philosophy: Medieval Credits: 3
• RELI 371 - Classic Jewish Texts Credits: 3

▲ Concentration in Modern British Literature (MBL)

Four courses (12 credits) chosen from:

• ENGL 404 - The Augustan Age Credits: 3
• ENGL 405 - The Age of Sensibility Credits: 3
• ENGL 406 - English Poetry of the Romantic Period Credits: 3
• ENGL 407 - Prose and Poetry of the Victorian Period Credits: 3
• ENGL 443 - Restoration and Eighteenth-Century Drama Credits: 3
• ENGL 445 - English and Irish Drama of the Twentieth Century Credits: 3
• ENGL 450 - English Novel of the 18th Century Credits: 3
• ENGL 453 - English Novel of the 19th Century Credits: 3
• ENGL 456 - English Novel of the Twentieth Century Credits: 3
• ENGL 462 - English Poetry of the Twentieth Century Credits: 3

▲ Concentration in Nonfiction Writing and Rhetoric (NWR)
Four courses (12 credits) chosen from:

- ENGL 309 - Introduction to Nonfiction Writing Credits: 3
- ENGL 311 - Writing Ethnography Credits: 3
- ENGL 342 - Web Authoring and Design Credits: 3
- ENGL 343 - Textual Media Credits: 3
- ENGL 392 - Editing for Audience, Style, and Voice Credits: 3
- ENGL 399 - Creative Nonfiction Writing Credits: 3
- ENGL 410 - Professional and Technical Writing Credits: 3
- ENGL 489 - Advanced Nonfiction Writing Credits: 3
- ENGL 496 - Topics in Rhetoric and Writing Credits: 3
- ENGL 498 - Internship: Special Topics Credits: 1-3
- ENGL 503 - Theory and Practice of Editing Credits: 3
- ENGL 504 - Internship in Writing and Editing Credits: 3
- ENGL 505 - Computer-Assisted Publications Writing and Design Credits: 3

▲ Concentration in Poetry (POE)

Four courses (12 credits) chosen from:

- ENGL 335 - Shakespeare Credits: 3 (Histories and Comedies)
- ENGL 336 - Shakespeare Credits: 3 (Tragedies and Romances)
- ENGL 390 - Recent American Poetry Credits: 3
- ENGL 397 - Poetry Writing Credits: 3
- ENGL 400 - Literature of the Middle Ages Credits: 3
- ENGL 401 - English Poetry and Prose of the 16th Century Credits: 3
- ENGL 402 - English Poetry and Prose of the 17th Century Credits: 3
- ENGL 404 - The Augustan Age Credits: 3
- ENGL 406 - English Poetry of the Romantic Period Credits: 3
- ENGL 407 - Prose and Poetry of the Victorian Period Credits: 3
- ENGL 462 - English Poetry of the Twentieth Century Credits: 3
- ENGL 463 - American Poetry of the Twentieth Century Credits: 3
- ENGL 468 - Special Topics in Poetry Credits: 3
- ENGL 471 - Chaucer Credits: 3

▲ Concentration in World Literature (WLIT)

- Up to one course (3 credits) chosen from courses from the concentrations in Medieval and Renaissance Literature, American Literature, or Modern British Literature

At least two courses (6 credits) chosen from:

- ENGL 349 - Global Voices Credits: 3
• ENGL 350 - The Idea of a World Literature Credits: 3
• ENGL 436 - Nineteenth-Century Continental Novels in Translation Credits: 3
• ENGL 437 - Twentieth-Century Continental Novels in Translation Credits: 3
• ENGL 439 - Literature in English Other Than British and American Credits: 3
• ENGL 448 - Modern Drama Credits: 3

Up to one course (3 credits) in a relevant course from these approved courses:

• ANTH 300 - Civilizations Credits: 3
• CULT 320 - Globalization and Culture Credits: 3
• HIST 308 - Nineteenth-Century Europe Credits: 3
• HIST 309 - Europe in Crisis: 1914-1948 Credits: 3
• HIST 387 - Topics in Global History Credits: 3
• CHIN 310 - Survey of Chinese Literature Credits: 3
• CHIN 311 - Modern Chinese Literature in Translation Credits: 3
• CHIN 325 - Major Chinese Writers Credits: 3
• CHIN 328 - Asian American Women Writers Credits: 3
• FRLN 330 - Topics in World Literature Credits: 3
• FREN 325 - Major French Writers Credits: 3
• FREN 329 - Problems of Western Civilization in French Literature Credits: 3
• GERM 325 - Major Writers Credits: 3
• JAPA 320 - Japanese Cinema Credits: 3
• RUSS 325 - Major Russian Writers Credits: 3
• RUSS 326 - A Survey of Russian Literature Credits: 3
• RUSS 327 - A Survey of Russian Literature Credits: 3
• SPAN 325 - Major Hispanic Writers Credits: 3
• SPAN 329 - Special Topics in Spanish and Latin American Literature Credits: 3

Comparative Literature Emphasis

The English Department and the Modern and Classical Languages Department offer a BA in English with an emphasis in comparative literature. This program combines the study of literature in English with the study of one or more foreign literatures and with cross-cultural literary study. It requires 10 courses above ENGL 302. Students should consult with their advisor to design a program of study that best suits their particular interests and goals.

Two required courses (6 credits):

• CL 300 - Introduction to Comparative Literature Credits: 3
• CL 514 - Theories of Comparative Literature Credits: 3

One course (3 credits) in literary criticism, as appropriate for the student’s focus:

• ENGL 325 - Dimensions of Writing and Literature Credits: 6
• FREN 381 - Introduction to Literary Analysis Credits: 3
Two courses (6 credits) in English or American literature

Two courses (6 credits) in literature other than English or American

- Chosen from courses in a literature other than English or American, either in translation or, for those pursuing foreign language study, with selected readings in the original language

Three courses (9 credits) in comparative or world literature

Comparative or world literature courses are designated by the comparative literature committee and generally selected in consultation with the advisor every semester. Examples are:

- various 300-level CLAS courses
- FRLN 330 courses
- Special topics courses, when relevant, in ENGL, FREN, GERM, RUSS, SPAN, or other language
- ENGL 350 - The Idea of a World Literature Credits: 3
- ENGL 431 - Medieval Intellectual Topics Credits: 3
- ENGL 436 - Nineteenth-Century Continental Novels in Translation Credits: 3
- ENGL 437 - Twentieth-Century Continental Novels in Translation Credits: 3
- ENGL 439 - Literature in English Other Than British and American Credits: 3

Undergraduate Minor

English Minor

Banner Code: ENGL

A minor in English provides students with a strong background in writing and critical thinking, as well as introducing them to significant literary and cultural documents. Prerequisite for the minor in English is the 3-credit university-wide general education requirement in literature.

The minor must be approved by the English Department undergraduate advisor before graduation.

This program of study is offered by the Department of English.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits above ENGL 302 with a minimum GPA of 2.00.

One required course (6 credits):

- ENGL 325 - Dimensions of Writing and Literature Credits: 6
Three courses (9 credits) in English

- Chosen from courses in a concentration listed under the English major or three courses that satisfy the core requirements for the major

One elective course (3 credits)

Teaching English as a Second Language Minor

Banner Code: TESL

The minor in teaching English as a second language (TESL) helps prepare undergraduate students to teach nonnative speakers of English in the United States or abroad. This course of study combines linguistic theory, second language acquisition theory, and ESL teaching methodology.

The minor in TESL may be pursued concurrently with any undergraduate major. English majors concentrating in linguistics can apply up to 9 credits in LING used for the major to the TESL minor. Students in the TESL minor must have approval from the director to register for the 500-level courses in the TESL program.

This program of study is offered by the Department of English.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor complete 18 credits, distributed as follows:

Five required courses (15 credits):

- LING 322 - English Grammar Credits: 3
- LING 326 - General Linguistics Credits: 3
- LING 521 - Applied Linguistics: Teaching English as a Second Language Credits: 3
- LING 523 - Descriptive Aspects of English Phonetics and Phonology Credits: 3
- LING 582 - Second Language Acquisition Credits: 3

One elective course (3 credits) chosen from:

- Any course in a foreign language beyond the college requirement for the BA degree
- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- ENGL 327 - Introduction to Cultural Studies Credits: 3
- LING 450 - Introduction to Sociolinguistics Credits: 3
- LING 485 - Semantics and Pragmatics Credits: 3
- LING 486 - Syntax I Credits: 3
- LING 490 - Generative Phonology Credits: 3
• LING 499 - Independent Study Credits: 1-3
• LING 525 - Practicum in ESL Credits: 3

Note:

Other suitable elective courses may be applied to the minor with the prior approval of the director.

Bachelor's/Accelerated Master's Program

BA/ English, Accelerated MA (Linguistics)

Highly qualified Mason undergraduates in any major may apply to the accelerated master’s degree program and obtain a BA in their chosen major and an MA in English with a concentration in linguistics after satisfactory completion of 144 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Satisfactory performance in LING 326 and one other LING course are a prerequisite for admission.

Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance in graduate courses (minimum grade of 3.00 in each course), students are given advanced standing in the master’s program. All other master’s degree requirements must be met. Interested students should contact the director of linguistics for details about the application process.

Master's Degree

Creative Writing, MFA

Banner Code: LA-MFA-CW

The MFA program has three concentrations: poetry, fiction, and nonfiction. Students should apply to only one concentration, although a student turned down by one concentration may subsequently apply to another or to that same concentration in a subsequent year.

Students interested in taking individual courses or in applying in the future to the MFA program are welcome to apply to take classes as non degree students; however, such enrollments are allowed only with the instructor’s permission. Regular applicants to the MFA program who are denied admission may not take courses as non degree students. Students interested in taking a course as non degree should submit a brief letter of introduction and a writing sample to the professor at least one week before the start of classes.

This program of study is offered by the Department of English.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit two letters of recommendation, one copy of a 1,000-word analytical writing sample, and a portfolio of original work. The analytical writing sample may be a paper written for an undergraduate class or any other work that gives evidence of advanced writing skills. For those applying to the
MFA concentration in fiction, the portfolio should consist of up to 50 pages of fiction; at least two complete short stories are preferred. For those applying to the poetry concentration, the portfolio should consist of up to 20 pages of poetry. For those applying to the nonfiction concentration, the portfolio should consist of up to 50 pages of creative nonfiction.

Degree Requirements

Students pursuing this degree must successfully complete 48 graduate credits, distributed as follows:

Two to four courses (6 to 12 credits) in literature

Four to six courses (12 to 18 credits) in one of the following concentrations:

▲Concentration in Fiction (FIC)

One course (3 credits) in the form:

- ENGL 566 - Forms of Fiction Credits: 3

Writing workshops (9 credits):

- ENGL 618 - Fiction Writing Workshop Credits: 1-6
- ENGL 751 - Advanced Workshop in Fiction Writing Credits: 1-6

▲Concentration in Nonfiction (NFW)

One required course (3 credits):

Students should enroll the first semester it is offered after they enter the program.

- ENGL 506 - Research for Narrative Writing Credits: 3

One course (3 credits) in the form:

- ENGL 565 - Forms of Nonfiction Credits: 3

Writing workshops (9 credits):

- ENGL 616 - Nonfiction Writing Workshop Credits: 1-6
- ENGL 752 - Advanced Workshop in Nonfiction Writing Credits: 1-6
▲ Concentration in Poetry (POE)

One course (3 credits) in the form:

- ENGL 564 - Form of Poetry Credits: 3

Writing workshops (9 credits)

- ENGL 617 - Poetry Writing Workshop Credits: 1-6
- ENGL 750 - Advanced Workshop in Poetry Writing Credits: 3

At least one course (3 credits) in another genre (fiction or nonfiction)

- This requirement may be filled by a section of ENGL 608 in another genre.

Elective courses (up to 15 credits)

- Chosen in consultation with the writing program faculty

Craft Seminars (6 to 12 credits):

- ENGL 608 - Craft Seminars Credits: 3

Workshop (1 credit):

- ENGL 699 - Workshop in English Credits: 1-3

Thesis (6 credits)

May be taken in the summer only with permission of the thesis committee.

- ENGL 799 - Thesis Credits: 1-6

Exam or Project

Students in poetry must pass a written MFA exam based on the authors they have chosen. The authors are selected in collaboration with the writing faculty any time after completing 12 credits of course work and before completing 32 credits. The exam must be completed at least one semester before the student registers for the final 3 credits of thesis.
Students in fiction and nonfiction must pass an MFA exam or complete an MFA project. Students who elect to take the MFA exam select, after the completion of 18 credits and with the approval of their faculty advisors, a list of authors and an area of emphasis (for example, the European novel). Students who elect to complete an MFA project (such as editing an anthology) must carry out the project under the direction of a faculty member and may register for ENGL 798 to fulfill this requirement. ENGL 798 may not be used to fulfill the literature requirement or as thesis preparation. The exam or project must be completed at least one semester before the student registers for the final 3 credits of thesis.

Note:

With the approval of the MFA faculty, the program director, and the dean, the number of credits required for an MFA may be reduced by a maximum of 20 credits on the basis of graduate course work before admission.

English, MA

Banner Code: LA-MA-ENGL

This program of study is offered by the Department of English.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit one copy of a 1,500 to 2,000-word analytical writing sample and two letters of recommendation. For those applying in cultural studies, literature, professional writing and rhetoric, and the teaching of writing and literature, the writing sample should be an interpretive paper on a literary text. In addition to the writing sample, applicants must submit a goals statement of no more than 750 words. Applicants for the concentration in professional writing and rhetoric must also submit two copies of a 10- to 15-page portfolio of their nonfiction work such as a technical or business report, essay, term paper, editing project, or any other material reflecting interests and skills in nonfiction writing.

Applicants may submit scores from the GRE when they believe those scores will lead to a clearer representation of their qualifications. Those with undergraduate majors in disciplines other than English are encouraged to apply, but they may be required to make up deficiencies before entering the program.

Degree Requirements

Students pursuing this degree must successfully complete 30 credits in graduate English courses in one of the following concentrations.

Foreign Language Proficiency

Students in all concentrations must demonstrate proficiency in a foreign language by course work equivalent to Mason’s foreign language 210 or by passing a translation test administered by the department.

▲ Concentration in Cultural Studies (CULT)

Three required course (9 credits):
• ENGL 676 - Introduction to Cultural Studies Credits: 3
• ENGL 701 - Research in English Studies Credits: 3
• CULT 802 - Histories of Cultural Studies Credits: 3

Two courses (6 credits) chosen from:

• ENGL 551 - Literary Criticism Credits: 3
• ENGL 555 - Introduction to Cinema Studies Credits: 3
• ENGL 665 - Texts in Global Contexts Credits: 3
• ENGL 670 - Visual Culture: Theories and Histories Credits: 3
• ENGL 675 - Feminist Theory and Criticism Credits: 3
• ENGL 685 - Selected Topics, Movements, or Genres of Literature in English Credits: 3
• ENGL 705 - Literary Theory and Criticism Credits: 3
• ENGL 740 - Seminar in English/Cultural Studies Credits: 3

Note:

ENGL 685, 705, and 740 may be repeated once with permission of the director of graduate studies.

Five courses (15 credits) of literature

Thesis option: (6 credits)

If thesis option is chosen, the 6 credits in thesis substitute for 6 credits of literature.

• ENGL 799 - Thesis Credits: 1-6

▲ Concentration in Linguistics (LING)

The linguistics concentration of the MA in English combines courses in linguistics with courses in some related area of language study, such as teaching English as a second language, bilingual education, or foreign language teaching. The course of study is designed to prepare students for teaching in one of these fields or for doctoral work. The certificate in teaching English as a second language can be earned concurrently. Students pursuing the linguistics concentration must successfully complete 30 graduate credits, distributed as follows, and demonstrate foreign language proficiency (see above).

Six core courses (18 credits):

• LING 690 - Generative Phonology Credits: 3
• LING 691 - Theories of Language Credits: 3
• LING 692 - Phonology II Credits: 3
• LING 785 - Semantics and Pragmatics Credits: 3
• LING 786 - Syntax I Credits: 3
• LING 787 - Syntax II Credits: 3
Four elective courses (12 credits)

In consultation with an advisor, chosen from courses that reflect one or more areas of language study. Electives can be in such areas as linguistics, the teaching of reading or writing, literary criticism, bilingual education, or a foreign language, and may include 6 credits of thesis.

▲ Concentration in Literature (LIT)

One required course (3 credits):

- ENGL 701 - Research in English Studies Credits: 3

One course (3 credits) in critical theory, chosen from:

- ENGL 514 - Theories of Comparative Literature Credits: 3
- ENGL 551 - Literary Criticism Credits: 3
- ENGL 675 - Feminist Theory and Criticism Credits: 3
- ENGL 676 - Introduction to Cultural Studies Credits: 3
- ENGL 705 - Literary Theory and Criticism Credits: 3

Eight courses (24 credits) in literature

A maximum of 6 credits of related study outside the department may substitute for the equivalent number of literature credits, with permission of the graduate director.

Thesis option: (6 credits)

If thesis option is chosen, the 6 credits in thesis substitutes for 6 credits of literature.

- ENGL 799 - Thesis Credits: 1-6

▲ Concentration in Professional Writing and Rhetoric (PWR)

Two required courses (6 credits):

- ENGL 501 - Introduction to Professional Writing and Rhetoric Credits: 3
- ENGL 502 - Research Methods in Rhetoric and Professional Writing Credits: 3

Two courses (6 credits) in professional writing and rhetoric
One course (3 credits) in writing, nonfiction, or professional writing and rhetoric

Three courses (9 credits) chosen from designated courses in literature and literary theory, linguistics, cultural studies, film and media studies, and folklore

Project or Thesis Option:

One elective course and 3 credits of project:

- ENGL 797 - Projects in Professional Writing and Rhetoric Credits: 3

or 6 credits of thesis:

- ENGL 799 - Thesis Credits: 1-6

▲ Concentration in the Teaching of Writing and Literature (TWL)

One required course (3 credits):

- ENGL 701 - Research in English Studies Credits: 3

Two courses (6 credits) in writing

Two courses (6 credits) in literature

One course (3 credits) in linguistics, usually:

- LING 522 - Modern English Grammar Credits: 3

Two courses (6 credits) in the teaching of writing and in the teaching of literature, usually:

- ENGL 615 - Proseminar in Composition Instruction Credits: 3
- ENGL 610 - Proseminar in Teaching the Reading of Literature Credits: 3
One course (3 credits) in composition theory:

- ENGL 697 - Composition Theory Credits: 3
  or an appropriate section of
- ENGL 611 - Studies in Rhetoric Credits: 3

One elective course (3 credits) in literature or writing

Thesis option (6 credits):

A thesis may be arranged through the advisor and director of graduate studies in English; this option requires 6 credits and expands the degree program from 30 to 33 credits.

- ENGL 799 - Thesis Credits: 1-6

**Master's Level Certificate**

**Folklore Graduate Certificate**

Banner Code: LA-CERG-FLK

The certificate in folklore enables students to explore the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine, folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values. Interdisciplinary by nature, folklore thrives on local particularities as well as compelling global connections. This certificate prepares students for careers in cultural agencies, governmental organizations, and teaching institutions, and advanced study in the humanities.

This program of study is offered by the Department of English.

**Certificate Requirements**

Students pursuing this certificate must complete 18 credits.

**Core courses (15 credits):**

- ENGL 591 - Special Topics in Folklore Credits: 3
  (may be repeated for different topics)
- ENGL 798 - Directed Reading and Research Credits: 1-3
- ANTH 750 - Ethnographic Genres Credits: 3

One research course (3 credits) chosen from:
Professional Writing and Rhetoric Graduate Certificate

Banner Code: LA-CERG-PWR

This certificate provides graduate students with course work in nonfiction writing in specific genres, current writing practices and theories of writing in organizational settings, research methods in professional writing, and nonfiction literature.

This program of study is offered by the Department of English.

For policies governing all certificates, see the Academic Policies chapter of the catalog.

Application Requirements

Applicants must submit an analytical writing sample of at least 1,000 words, a goals statement, two letters of recommendation, and a portfolio of writing or editing. Applicants must be currently admitted to a graduate degree program or approved for enrollment as nondegree students. Because only 6 credits earned as a nondegree student may be applied to the certificate, students who initially take courses as nondegree should apply for admission before completing 6 credits of course work. Completion of course work is not in itself a guarantee of admission to the certificate program.

The certificate may be pursued concurrently with any of several degree programs in English and elsewhere. Part of the course work toward the certificate may be applied to those degrees.

Certificate Requirements

Students pursuing this certificate must complete 18 credits of English graduate courses, with a minimum grade of 3.00 in each course.

One core course (3 credits):

- ENGL 501 - Introduction to Professional Writing and Rhetoric Credits: 3

One course (3 credits) in research methods:

- ENGL 502 - Research Methods in Rhetoric and Professional Writing Credits: 3

Two courses (6 credits) in professional writing and rhetoric chosen from:

- ENGL 503 - Theory and Practice of Editing Credits: 3
- ENGL 504 - Internship in Writing and Editing Credits: 3
- ENGL 508 - Digital Rhetoric and Design Credits: 3
- ENGL 611 - Studies in Rhetoric Credits: 3
- ENGL 612 - Cultures of Professional Writing Credits: 3
- ENGL 613 - Technical and Scientific Writing Credits: 3
- ENGL 697 - Composition Theory Credits: 3

One course (3 credits) in nonfiction writing chosen from:

- ENGL 565 - Forms of Nonfiction Credits: 3
- ENGL 506 - Research for Narrative Writing Credits: 3
- ENGL 615 - Proseminar in Composition Instruction Credits: 3
- ENGL 619 - Special Topics in Writing Credits: 3
- ENGL 695 - Northern Virginia Writing Project Inservice Program Credits: 1, 2, 3
- ENGL 699 - Workshop in English Credits: 1-3

One elective course (3 credits)

Teaching English as a Second Language Graduate Certificate

Banner Code: LA-CERG-TESL

The Teaching English as a Second Language (TESL) certificate prepares students to teach non-native speakers of English in the United States or abroad. Certificate courses fulfill, in part, requirements for an endorsement in English as a second language to the Virginia state teaching credential. Students who want to earn this endorsement should consult with an advisor.

This program of study is offered by the Department of English.

For policies governing all graduate certificates, see the Academic Policies chapter of this catalog.

Application Requirements

Applicants must be admitted to graduate study or approved for graduate course enrollment as nondegree students. Students who initially enroll in the certificate program as nondegree must apply for admission to the graduate program no later than the second semester of study. When formal admission to graduate study is sought, applicants must submit one copy of an analytical writing sample of approximately 1,000 words, a goals statement, and two letters of recommendation.

The certificate may be pursued concurrently with any of several degree programs offered through the College of Education and Human Development, the English Department, and the Modern and Classical Languages Department. Part of the course work toward the certificate may be applied toward degrees in those departments. Students enrolled in another graduate degree program who want to work for the certificate must apply to the English Department for admission into the certificate program.

Certificate Requirements

Students pursuing this certificate must complete 18 credits, earning a grade of 3.00 or better.
Six required courses (18 credits):

- LING 520 - Descriptive Linguistics Credits: 3
- LING 521 - Applied Linguistics: Teaching English as a Second Language Credits: 3
- LING 522 - Modern English Grammar Credits: 3
- LING 523 - Descriptive Aspects of English Phonetics and Phonology Credits: 3
- LING 525 - Practicum in ESL Credits: 3
- LING 582 - Second Language Acquisition Credits: 3

Doctoral Degree

Linguistics, PhD

Banner Code: LA-PHD-LING

The PhD in linguistics trains students in the science of language. Students become specialists in the core areas of linguistics—phonology, syntax, and semantics—and learn to integrate this core with the study of second language acquisition. This 72-credit degree program prepares students for positions in academia, industry, and government working in a host of organizations that are concerned with language and second language acquisition. They might be research and teaching professors, administrators of language-learning programs, or consultants in computational linguistic research.

This program of study is offered by the Department of English.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

This program is open to students with any undergraduate major, though all applicants should have satisfactorily completed an introductory course in linguistics.

An applicant must submit three letters of recommendation, score on the GRE, a one or two page personal statement explaining the applicant’s interest in the program, and an academic writing sample that is preferably at least ten pages in length and of some theoretical rigor. The department accepts doctoral students only for the fall semester.

Degree Requirements

To receive the PhD, students are must complete a minimum of 72 credits of course work, of which no more than 24 credits may be in LING 998/999. Students must submit two qualifying papers in linguistics. Students who enter with a master’s degree in linguistics may have their credit requirement reduced by up to 30 credits at the discretion of the department.

Three courses (9 credits) in phonology:

- LING 690 - Generative Phonology Credits: 3
- LING 692 - Phonology II Credits: 3
- LING 890 - Advanced Phonology Seminar Credits: 3
Three courses (9 credits) in syntax:

- LING 786 - Syntax I Credits: 3
- LING 787 - Syntax II Credits: 3
- LING 886 - Advanced Syntax Seminar Credits: 3

Two courses (6 credits) in semantics/pragmatics:

- LING 785 - Semantics and Pragmatics Credits: 3
- LING 788 - Semantics and Pragmatics II Credits: 3

Two courses in (6 credits) in language acquisition chosen from:

- LING 582 - Second Language Acquisition Credits: 3
- LING 782 - Second Language Acquisition II Credits: 3
- LING 882 - Seminar in Language Acquisition Credits: 3

One course (3 credits) in research methodology:

- LING 770 - Research Methods Credits: 3

Seminars (6 credits):

- Two seminar courses in two chosen fields

Five elective courses (15 credits) chosen from:

- LING 507 - Field Work in Applied Linguistics Credits: 3
- LING 521 - Applied Linguistics: Teaching English as a Second Language Credits: 3
- LING 522 - Modern English Grammar Credits: 3
- LING 523 - Descriptive Aspects of English Phonetics and Phonology Credits: 3
- LING 525 - Practicum in ESL Credits: 3
- LING 581 - Psycholinguistics Credits: 3
- LING 650 - Introduction to Sociolinguistics Credits: 3
- LING 691 - Theories of Language Credits: 3
- LING 798 - Directed Reading and Research Credits: 1-3
- ENGL 592 - Historical Studies of the English Language Credits: 3
- FREN 560 - History of the French Language Credits: 3
- FREN 575 - Grammatical Analysis Credits: 3
- FRLN 565 - Theory of Translation Credits: 3
• SOCI 531 - Statistical Reasoning Credits: 3
• SPAN 500 - History of the Spanish Language Credits: 3
• SPAN 501 - Applied Spanish Grammar Credits: 3
• SPAN 502 - Hispanic Sociolinguistics Credits: 3
• PSYC 615 - Language Development Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
• CSI 606 - Scientific Graphics and Visualization Tools Credits: 1
• CSI 607 - Database Tools for Scientists Credits: 1
• CSS 600 - Introduction to Computational Social Science Credits: 3
• NEUR 604 - Ethics in Scientific Research Credits: 1-3
• EDUC 611 - Cultural Issues in Second Language Acquisition Credits: 3
• EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
• EDCI 569 - Teaching English in the Secondary School Credits: 3

Two qualifying papers (6 credits):
• LING 898 - Advanced Independent Study Credits: 3

Doctoral Dissertation (12 credits):
• LING 998 - Doctoral Dissertation Proposal Credits: 1-6
• LING 999 - Doctoral Dissertation Credits: 1-12

Total: 72 credits

Global Affairs

Web: globalaffairs.gmu.edu

Course Work

The Global Affairs programs offer all course work designated GLOA in the Courses chapter of this catalog.

Undergraduate Programs

Phone: 703-993-9185

Faculty

Bachelor's Degree

The bachelor's degree in global affairs is an interdisciplinary major that introduces students to the global processes affecting all societies. Drawing on the broad international expertise of Mason faculty, this program incorporates courses from across the university. Global affairs majors examine transnational and international processes in a wide range of areas including politics, economics, culture, peace and conflict, and the environment. They also study specific regions and languages and investigate the ways particular parts of the world experience and influence global processes.

Global affairs majors take a common set of core courses and choose a concentration. They can focus on a theme (global economy, international development, the environment, and so on) or a world region (Africa, Asia, Latin America, etc.).

Students are strongly encouraged to take advantage of Mason's many study abroad courses and do an internship as part of their degree program.

Global Affairs with a Second Major

Students can complement their major in global affairs with a second major. Students interested in this option are encouraged to discuss their plans with advisors in both majors. See the section on Credit for More than One Undergraduate Major in the Academic Policies chapter of the catalog.

Minors

The undergraduate program in global affairs offers a minor in global affairs, which is available to students in any major in the university.

Students majoring in global affairs are encouraged to complement their major one of the many minors offered by the college.

Graduate Programs

Phone: 703-993-2152

Faculty

Bakhash, Kelly (director), Lyons, Mandaville, Shaklee, Wilsford

Master's Degree

The master's degree in global affairs is an interdisciplinary program that offers students the opportunity to engage in advanced study of a broad range of international global issues.

Bachelor’s/Accelerated Master’s Program

Highly qualified undergraduates in any major are invited to apply to the accelerated master’s degree program in global affairs. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in global affairs after satisfactory completion of 144 credits, sometimes within five years.
Undergraduate Degree

Global Affairs, BA

Banner Code: LA-BA-GLOA

Global affairs is an interdisciplinary major that introduces students to the global processes affecting all societies. Study abroad and internships are strongly encouraged. Students can complement their major with a second major or a minor.

This program of study is offered by the Global Affairs Program.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 36 credits with a minimum cumulative GPA of 2.00. Students must have a minimum grade of 2.00 in each of the core courses and a minimum grade of 1.67 in each of the courses used to fulfill the concentration and the language requirement for global affairs major. Students who major in global affairs may not also earn the minor in global systems or receive credit for ECON 390.

Six core courses (18 credits):

- GLOA 101 - Introduction to Global Affairs Credits: 3
  or
- SOCI 120 - Globalization and Society Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3
- CULT 320 - Globalization and Culture Credits: 3
- ECON 385 - International Economic Policy Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- GOVT 322 - International Relations Theory Credits: 3

Note:

GOVT 132 or 133 is a prerequisite to GOVT 322.

6-9 credits of language study beyond intermediate proficiency

- Three courses (9 credits) beyond 210, or
- Two courses (6 credits) beyond 202

Four courses (12 credits) in an approved concentration

Courses applied to a global affairs concentration should come from two different departments. They have to be unique to the concentration: They cannot be simultaneously used to fulfill any general education requirement or college requirement for the
bachelor's degree. They cannot be applied to any other major, minor, concentration, or certificate. In addition to the courses listed below, other relevant courses, including special topics courses, study abroad, and internships, may be applied to a concentration with prior written approval from the director.

By Global Topic

▲ The Environment (EVT)

Choose 12 credits from the following:

- ANTH 370 - Environment and Culture Credits: 3
- BIOL 301 - Biology and Society Credits: 3
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOL 309 - Introduction to Oceanography Credits: 3
- TOUR 312 - Ecotourism Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3

▲ Global Communications and Technology (GCT)

Choose 12 credits from the following:

- ANTH 332 - Cultures in Comparative Perspective Credits: 3
- COMM 202 - Mass Media and Communication Systems Credits: 3
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 306 - Issues in Intercultural Communication Credits: 3
- COMM 307 - Field Study in Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 375 - Mass Communication Advertising and Promotions Credits: 3
- COMM 412 - Politics and the Mass Media Credits: 3
- COMM 431 - Information Technology and the Political Process Credits: 3
- COMM 456 - Comparative Mass Media Credits: 3
- COMM 506 - Communication in International Organizations Credits: 3
- COMM 554 - Telecommunications Policy and Regulation Credits: 3
- IT 223 - Information Security Fundamentals Credits: 3
- IT 300 - Modern Telecommunications Credits: 3
- IT 341 - Data Communications and Network Principles Credits: 3
- IT 353 - Information Defense Technologies Credits: 3
- IT 366 - Network Security I Credits: 3
- IT 462 - Information Security Principles Credits: 3
- IT 488 - Fundamentals of Satellite Communications Credits: 3
- PSYC 379 - Applied Cross-Cultural Psychology Credits: 3
▲ Global Economy and Management (GEM)

Choose 12 credits from the following:

- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- ECON 362 - African Economic Development Credits: 3
- ECON 380 - Economies in Transition Credits: 3
- FNAN 440 - International Financial Management Credits: 3
- GOVT 343 - International Political Economy Credits: 3
- IT 304 - IT in the Global Economy Credits: 3
- MGMT 461 - Cross Cultural and Global Management Credits: 3
- MKTG 407 - International Marketing Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3
- NCLC 423 - Management in the Global Marketplace Credits: 6
- BULE 302 - Legal Environment of Business Credits: 3
- BULE 402 - Commercial Law Credits: 3

Note:

BULE courses require the approval of the director.

▲ Global Inequalities and Responses (GIR)

Choose 12 credits from the following:

- ADJ 405 - Law and Justice around the World Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- HIST 366 - Comparative Slavery Credits: 3
- NCLC 304 - Social Movements and Community Activism Credits: 4
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 308 - Racial and Ethnic Relations Credits: 3
- SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
- SOCI 475 - Women and the Law Credits: 3
- WMST 100 - Representations of Women Credits: 3

▲ International Development (IDEV)

Choose 12 credits from the following:

- ANTH 331 - Refugees Credits: 3
- ANTH 333 - Humanitarian Action Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- ECON 362 - African Economic Development Credits: 3
- GCH 205 - International Health Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GOVT 336 - Political Development and Change Credits: 3
- GOVT 434 - Democracy in Global Perspective Credits: 3
- GOVT 445 - Human Rights Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- HEAL 350 - Interventions for Populations and Communities at Risk Credits: 3
- NCLC 401 - Conservation Biology Credits: 3-15
- PHIL 429 - International Ethics Credits: 3
- SOCI 350 - Community, Diversity, and Democracy: A Practicum Credits: 3
- SOCW 351 - Social Policy and Social Justice I Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3

▲ World Arts (WA)

Choose 12 credits from the following:

- ARTH 203 - Survey of Asian Art Credits: 3
- ARTH 204 - Survey of Latin American Art Credits: 3
- ARTH 362 - Twentieth-Century European Art Credits: 3
- ARTH 380 - African Art Credits: 3
- ARTH 382 - Arts of India Credits: 3
- ARTH 383 - Arts of Southeast Asia Credits: 3
- ARTH 384 - Arts of China Credits: 3
- ARTH 385 - Arts of Japan Credits: 3
- ARTH 386 - The Silk Road Credits: 3
- ARTH 394 - The Museum Credits: 3
- AVT 372 - Hip Hop Culture Credits: 3
- CHIN 311 - Modern Chinese Literature in Translation Credits: 3
- CHIN 320 - Contemporary Chinese Film Credits: 3
- CL 300 - Introduction to Comparative Literature Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 391 - Dance History: Twentieth Century Credits: 3
- DANC 418 - Global Dance Intensive Credits: 1-3
- ENGL 333 - Folklore of the Americas Credits: 3
- ENGL 349 - Global Voices Credits: 3
- ENGL 350 - The Idea of a World Literature Credits: 3
- ENGL 380 - Recent American Fiction Credits: 3
- ENGL 439 - Literature in English Other Than British and American Credits: 3
- FREN 325 - Major French Writers Credits: 3
- FREN 378 - Survey of French Literature: 1800 to Present Credits: 3

▲ Russia and Central Asia (RCA)

Choose 12 credits from the following:

• GEOG 330 - Geography of the Soviet Succession States Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 340 - Central Asian Politics Credits: 3
• GOVT 447 - Revolution and International Politics Credits: 3
• HIST 329 - Modern Russia and the Soviet Union Credits: 3
• RUSS 325 - Major Russian Writers Credits: 3
• RUSS 326 - A Survey of Russian Literature Credits: 3
• RUSS 327 - A Survey of Russian Literature Credits: 3
• RUSS 353 - Russian Civilization Credits: 3
• RUSS 354 - Contemporary Post-Soviet Life Credits: 3
• RUSS 407 - Russian Drama and Theater Credits: 3
• RUSS 410 - Russian Poetry Credits: 3
• RUSS 470 - Topics in (Post) Soviet Film Credits: 3

▲ Individualized Concentration (IST)

Students may construct an individualized concentration with the director’s help and written approval.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their major at the 300 level or above. Students majoring in global affairs should consult the program advisor for courses that can be used to fulfill this requirement.

Undergraduate Minor

Global Affairs Minor

Banner Code: GLOA

The minor in global affairs provides students with a global perspective that can enhance many different majors. The minor is not available to students majoring in global affairs or minoring in global systems.

This program of study is offered by the Global Affairs Program.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 15 credits distributed as follows:

• GLOA 101 - Introduction to Global Affairs Credits: 3
  or
• SOCI 120 - Globalization and Society Credits: 3
• CULT 320 - Globalization and Culture Credits: 3
• ECON 385 - International Economic Policy Credits: 3
• GOVT 322 - International Relations Theory Credits: 3
• CONF 340 - Global Conflict Analysis and Resolution Credits: 3
  or
• EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
Total: 15 credits

Bachelor's/Accelerated Master's Program

BA/Global Affairs Accelerated MA

Highly qualified undergraduates in any major may apply to the accelerated master's degree program in Global Affairs. If accepted, and depending on their undergraduate major, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in global affairs after satisfactory completion of 144 credits, sometimes within five years.

Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits (courses at the 500 or 600 level) in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance in graduate courses (minimum grade of 3.00 in each course), students are given advanced standing in the master's program. A maximum of 6 graduate credits may also be taken as reserve graduate credit and only applied to the master's degree. All other master's degree requirements must be met.

Applicants must have a cumulative GPA of 3.40 or higher and submit an application, two letters of recommendation, a writing sample, and evidence of advanced professional competency in a second language (other than English) that is widely used in contemporary international communication. Applications for the accelerated master's program may be obtained from the director of the graduate program in global affairs.

Master's Degree

Global Affairs, MA

Banner Code: LA-MA-GLOA

The master of arts in global affairs is an interdisciplinary program offering students the opportunity to engage in advanced study of a broad range of international global issues. Students complete a core curriculum that provides the knowledge and skills to think and act globally and then select a specialization. The possible specializations reflect the strengths of George Mason in the global arena including global economics and development, international management, international education, international health. They include courses offered by academic departments across the university. All students in the program take part in a residency abroad, typically two weeks in duration, and complete a capstone seminar or thesis. Graduates of the program are prepared for careers in a wide variety of international contexts.

This program of study is offered by the Global Affairs Program.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Applicants to the master's degree in global affairs must meet the university admission standards and the application requirements for graduate study. See the Graduate Admission Policies section of the catalog. In addition, applicants must submit two letters of
recommendation from individuals familiar with the applicant’s qualifications for graduate study and a satisfactory score on the GRE.

Applicants will need to present evidence an advanced professional competency in a second language (other than English) that is widely used in contemporary international communication. Evidence of language competency may be demonstrated either through testing by Language Testing International or through other means approved by the College of Humanities and Social Sciences.

Degree Requirements

Students pursuing this degree must complete 30 credits distributed as follows:

Four core courses (12 credits):

- GLOA 600 - Global Competencies Credits: 3
- GLOA 610 - Economic Globalization and Development Credits: 3
- GLOA 620 - Human Systems Credits: 3
- GLOA 710 - Seminar Abroad Credits: 3

One course (3 credits) chosen from:

- ITRN 602 - International Financial Institutions and Globalization Credits: 3
- ITRN 603 - International Trade Relations Credits: 3
- GCH 560 - Environmental Health Credits: 3

Four courses (12 credits) in a specialization

The specialization is developed in consultation with an advisor and approved by the director of the program. Specializations reflect the strengths of George Mason in the global arena including global economics and development, international management, international education, international health.

One capstone seminar (3 credits):

- GLOA 720 - Capstone Research Seminar Credits: 3

Total: 30 credits

Higher Education

Phone: 703-993-2310
Web: highered.gmu.edu
Faculty

Course Work

This program offers all course work designated CTCH in the Courses chapter of this catalog.

Graduate Programs

The Higher Education Program prepares students for positions of leadership in teaching, research, and administration at community colleges, four-year colleges, and universities. The interdisciplinary curriculum emphasizes ethical leadership, assessment, and practice-based scholarship in teaching and learning. Students in these degrees come from varied professional backgrounds in college teaching, university administration, business, the performing arts, and government. They bring a vast spectrum of experience to their studies and fellow students.

Doctor of Arts in Community College Education

The doctor of arts in community college education prepares students for college teaching. They take course work in higher education pedagogy and in a disciplinary knowledge area. Working with an advisor, students choose appropriate courses from more than 20 participating departments. In addition to developing disciplinary expertise, the courses in higher education offers proficiency in core areas related to undergraduate education: the community college, college teaching, technology in higher education, and the scholarship of teaching and learning.

MAIS Concentration in Community College Teaching

The program sponsors the concentration in community college teaching within the master’s degree in interdisciplinary studies (MAIS). This concentration prepares students to teach entry-level courses in these growing fields in community colleges: communication, English, information systems, mathematics, Spanish, and teaching English as a second language.

See the Interdisciplinary Studies, MAIS section of this chapter.

MAIS Concentration in Higher Education

The program sponsors the concentration in higher education within the master’s degree in interdisciplinary studies (MAIS). This concentration prepares individuals for administrative and leadership positions in two-year colleges or four-year colleges and universities. Students may focus on administration or student services.

See the Interdisciplinary Studies, MAIS section of this chapter.

Doctor of Philosophy in Education with Specialization in Higher Education

The doctor of philosophy in education with a specialization in higher education is offered jointly by the Higher Education Program and the College of Education and Human Development. This doctoral program prepares students for positions of leadership in administration and student services through coursework in higher education administration and leadership and through a secondary concentration that can further disciplinary expertise.
Certificates

The program offers graduate certificates in college teaching and in higher education administration. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

Master's Level Certificate

College Teaching Graduate Certificate

Banner Code: LA-CERG-CTCH

The certificate in college teaching is designed for graduate students who are planning a career in undergraduate education. The program offers courses that enhance pedagogical skills, explore pedagogical assessment or scholarship and the use of technology in instruction.

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section.

This program of study is offered by the Higher Education Program.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete 18 credits. They may substitute courses with a disciplinary focus for any of the three required courses, with prior written approval of the director.

Three required courses (9 credits):

- CTCH 602 - College Teaching Credits: 3
- CTCH 603 - Technology in Higher Education Credits: 3
- CTCH 604 - The Scholarship of Teaching and Learning Credits: 3
  or
- CTCH 605 - Curriculum and Program Design and Assessment Credits: 3

Practicum (3 credits):

- CTCH 685 - Practicum Credits: 3

Two elective courses (6 credits)
Electives should be chosen in consultation with an advisor and with approval of the director.

Total: 18 credits

Higher Education Administration Graduate Certificate

Banner Code: LA-CERG-HEDA

The certificate in higher education administration is designed for individuals who are planning or enhancing a career in a broad range of administrative positions in higher education institutions. The certificate will provide core knowledge for administrative processes in the context of higher education institutions.

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section of the Admission chapter.

This program of study is offered by the Higher Education Program.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete 18 credits:

Three required courses (9 credits):

- CTCH 621 - Higher Education in the United States Credits: 3
- CTCH 622 - Organization and Administration in Higher Education Credits: 3
- CTCH 624 - Finance and Fiscal Management in Higher Education Credits: 3

One course (3 credits) chosen from the list below:

Special topics courses, when relevant, may be used to fulfill this requirement with the prior written approval of the director.

- CTCH 603 - Technology in Higher Education Credits: 3
- CTCH 606 - Diversity in Higher Education Credits: 3
- CTCH 626 - Assessment in Higher Education Credits: 3
- CTCH 645 - The Contemporary College Student Credits: 3

Two elective courses (6 credits)

Electives should be chosen in consultation with an advisor.

Total: 18 credits
Doctoral Degree

Community College Education, DA

Banner Code: LA-DA-EDCC

The doctor of arts in community college education (DACCE) prepares students to be leaders in undergraduate education. In addition to expertise in a selected disciplinary or interdisciplinary knowledge area, graduates are proficient in four core areas related to undergraduate education: scholarly activity related to teaching and learning; effective integration of technology in the teaching and learning process; pedagogy appropriate to the discipline; and program and curriculum design, development, and assessment. With this background and the guided practical experience provided by internships, students are prepared to lead their institutions to respond to the changing needs of 21st-century students.

This program of study is offered by the Higher Education Program.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Students are accepted for the fall and spring semesters. Applications submitted after the posted deadline will be considered on a space-available basis. In addition to meeting admission requirements for graduate study at Mason, applicants should have a master’s degree, and submit a writing sample, a statement of purpose, three letters of recommendation, GRE scores, and a résumé.

Knowledge Area

Substantial work in a knowledge area is essential to the leadership in curriculum expected of students. Given the dynamic nature of the community college and growth of programs in nontraditional fields, the choice of a knowledge area and relevant course work should be guided by the student’s developing interests and a vision of the student’s role as a community college educator. While many DACCE students take their 24 knowledge area credits exclusively in one discipline or department, they are encouraged to think broadly and in terms of multiple disciplines and work with their advisor to choose appropriate courses from more than one discipline or department.

Education Core

The 18-credit core of education courses is designed to develop leaders in undergraduate education. The program emphasizes a broad knowledge base in teaching and course work in the history and philosophy of the community college and instructional technology. These courses concentrate on scholarship and practice in teaching and learning, instructional technology, and program and curriculum design and assessment. All courses emphasize leadership, ethics, and diversity in higher education.

Program of Study

Working with an advisor, students develop a program of study that outlines courses that will be used to fulfill degree requirements. The program of study is approved by the advisor and director; any modifications require the student to file a revised program of study.
Degree Requirements

Students pursuing this degree must complete a minimum of 60 credits beyond the master’s degree, distributed as follows:

Knowledge area (21 credits), including 3 credits of methodology

Four courses (12 credits) in the education core:

- CTCH 601 - The Community College Credits: 3
- CTCH 602 - College Teaching Credits: 3
- CTCH 603 - Technology in Higher Education Credits: 3
- CTCH 604 - The Scholarship of Teaching and Learning Credits: 3

Two elective courses (6 credits) from approved list of courses

One course (3 credits) in research design or methods

Internships (6 credits):

- CTCH 885 - Doctoral Internship in College Teaching and Administration Credits: 3

Note:

Students participate in two 3-credit internships to learn skills applicable to college-based teaching and higher education administration or policy. Internships provide an important educational experience that complements classroom-based course work. Students doing an internship should have completed 18 credits of education core requirements, 6 credits in the knowledge area, and an approved program of study. Internships, which must be approved by the advisor and internship coordinator, require a minimum of 180 hours of work for 3 credits and participation in an internship seminar.

Dissertation (12 credits):

- CTCH 998 - Doctoral Dissertation Proposal Credits: 1-3
- CTCH 999 - Doctoral Dissertation Credits: 1-12

Candidacy Exams

Students must pass candidacy exams to demonstrate breadth and depth of knowledge in both the knowledge area and education core. To be eligible to take a candidacy exam, students need to have completed all course work in the specific area, be in good standing (minimum cumulative GPA of 3.00), and be registered for at least 1 credit. The competency exam for the education core
is a written exam administered by the Higher Education Program. The knowledge area exams are administered by the liaison in the knowledge area; each area has its own exam guidelines.

Students who do not pass a candidacy exam in either area have until the last day of the next semester (published in the Schedule of Classes) to retake it. (For students who take exams in the summer months, this will be the published date for the fall semester.) Students who do not retake the exam by this deadline or do not successfully complete the candidacy exam the second time will be terminated from the program.

Continuous Registration

Once enrolled in 998, students must maintain continuous registration in 998 or 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass comprehensive exams on the education core and the major knowledge area. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can be advanced to candidacy.

Dissertation

In the dissertation, students demonstrate an ability to conduct original research that contributes new knowledge or a reinterpretation of existing knowledge to the area of investigation. Students who focus their dissertation in the knowledge area must connect their research to higher education. Dissertations may be practice-oriented, focusing on new and replicable ways of teaching within the knowledge area.

To register for dissertation proposal (998), students need to have an approved program of study and must have completed the two internships, all other course work, and candidacy exams in the education core and the knowledge area. To register for dissertation research (999), students must be advanced to candidacy. Students enrolled in 999 are required to submit evidence of progress to the dissertation advisor and the program by the last day of classes each semester (as published in the Schedule of Classes), such as a draft of a chapter or a brief, descriptive report of research activities. Students showing successful progress will receive a grade of IP. Those who do not will receive an IN.

Students are required to take at least 3 credits of doctoral dissertation proposal (998) and 3 credits of doctoral dissertation (999), and must complete a total of 12 credits of 998 and 999 combined. Once enrolled in 999, students must maintain continuous registration in 999 each semester until graduation, excluding summers. Once they meet the 12 credit requirement, they may register for 1 credit of 999 per semester to maintain enrollment. Students who defend in the summer must be registered for at least 1 credit of 999 in the summer.

**Postdoctoral teaching fellows:** Hudgins, Salinas, Scales, Wolf

## Course Work

This department offers all course work designated HIST and ARTH in the Courses chapter of this catalog.

## Undergraduate Programs

### History

The department offers a BA in history. History majors study a variety of historical time periods, from Greek and Roman antiquity to the late twentieth-century. They learn to interpret and evaluate the past by analyzing a variety of sources, from historical books and novels to images, films, oral interviews, newspapers, and other texts.

History majors have the opportunity to study with faculty who are internationally known for their work on the use of technology in the study of history. They can do an internship with one of them in the Center for History and New Media or at places like the Smithsonian Institution, the Library of Congress, or one of many other institutions in the Washington, D.C. area. There are also many opportunities to study abroad while earning credit towards the history major.

### Advising

Students majoring or minoring in history are advised by the undergraduate director. History majors are urged to discuss their program of study periodically with the director.

### Honors in the Major

History majors who have completed 75 credits (a minimum of 15 in history, 6 of which must have been taken at Mason) with a 3.50 overall GPA and a 3.50 GPA in history are eligible to apply to graduate with honors in history. Applicants must have completed or be enrolled in HIST 300. The statement of application should include references from two Mason history faculty members. If a major part of the student’s work includes transfer credit, transcripts may be required. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

To graduate with honors in the major, students must complete HIST 490 and 491, linked individualized courses usually with the same instructor. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. HIST 490 should be taken before 491, although they may be taken concurrently. Either course may be taken concurrently with HIST 499 Senior Seminar in History. These 6 credits must be passed with a minimum 3.50 GPA, and the overall history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 36-credit major requirement in history, but they do not replace HIST 499.

### Minors
The department offers a minor in history available to students in any major.

The department faculty participate in a number of interdisciplinary minors including African and African American Studies Minor, Ancient Mediterranean Art and Archaeology Minor, Asia-Pacific Studies Minor, Islamic Studies Minor, Latin American Studies Minor and Middle East Studies Minor. Students can earn credits toward these minors by taking selected history and art history courses. For details, see the Interdisciplinary Minors section and the Latin American Studies section of this chapter.

The minor in sport and American culture is offered jointly by the Department of History and Art History and the School of Recreation, Health and Tourism. For details, see the School of Recreation, Health and Tourism section in the College of Education and Human Development chapter of the catalog.

**Art History**

The department offers a BA in art history. Art history majors investigate works of art to learn how they were made, why they were made, and by and for whom they were made. They develop the skills to interpret a work of art as a record of the culture in which it was made. Through art history courses, students will learn to ask questions that touch on cultural, technological, and economic concerns. The major has flexible requirements, and students in art history receive individualized attention which helps them tailor their studies to their own individual interests and career goals.

Art history majors have the opportunity to study with faculty whose expertise covers many world regions - the United States, Latin America, Europe, South and Southeast Asia, and China - and all historical periods - from classical antiquity, Byzantine, Medieval, Renaissance, and Baroque, to the modern era.

Students are encouraged to do an internship at one of the many arts organizations in the Washington, D.C. region, such as the National Gallery of Art or the Corcoran Gallery. There are also many opportunities to study abroad while earning credit towards the art history major.

**Honors in the Major**

Majors who have completed 75 credits (a minimum of 15 credits in art history, with 6 credits taken at Mason) with a 3.50 overall GPA and a 3.80 GPA in art history are eligible to apply to graduate with honors in art history. Eligible students should apply to the undergraduate director by November 15 or April 15 with a statement of application including the names of two references from Mason art history faculty members. Transfer students should also submit transcripts. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

To graduate with honors in the major, students must complete ARTH 492 and 493, linked individualized courses that culminate in a research paper. Students must have completed at least one course in the field (or with the professor) chosen for these honors courses. ARTH 492 should be taken before 493, but they may be taken concurrently. These 6 credits must be passed with a minimum 3.50 GPA, and the overall art history GPA presented for graduation must be a minimum of 3.50. These 6 credits may be counted toward the 33- to 34-credit major requirement in art history, but they do not replace the 6 required credits in ARTH 400, 420, 430, 440, 460, 471, 472, or 482.

**Minors**

The department offers a minor in art history available to students in any major.

The Art History Program coordinates the Ancient Mediterranean Art and Archaeology Minor. See the Interdisciplinary Minors section of this chapter.

**Graduate Programs**
History

The department offers a master's and a doctoral degree in history. In both programs, students select a specialization in American history, European history, or world history. Master's degree students choose from one of four concentrations: predoctoral history, applied history, enrichment, or teaching. Doctoral students focus their studies in one of four areas: college/university teaching, new media and information technology, public and applied history, or preprofessional development.

Graduate students in history have the opportunity to take courses in new media, studying with faculty who are internationally known for their use of technology in the study of history. Many students work alongside the faculty in the Center for History and New Media, a leader in the use of digital media and computer technology to democratize history. The center uses digital media and technology to preserve and present history online, transform scholarship across the humanities, and advance historical education and understanding.

Students can do an internship in applied history at one of the many institutions in the Washington, D.C. area or study abroad while earning credit towards their degrees.

Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Art History

The department offers a richly interdisciplinary master's degree in art history. It draws on faculty strengths in traditional research and new media and the vast cultural resources of the Washington, D.C. area. Students learn methods of art historical analysis, a variety of art historical interpretations, and practical applications of the field. The program places a special emphasis on the development of skills in new media, museology, and pre-professional internships - program features that are unique to this region.

The master's degree in art history is designed to meet the needs of a student population with diverse interests and career goals. Because of the focus on skill building in traditional research as well as new media, graduates of this program have the tools necessary for independent research, professional work, and the dissemination of knowledge in art history.

Undergraduate Degree

Art History, BA

Banner Code: LA-BA-ARTH

As a liberal arts discipline, art history emphasizes the analysis of visual data in a historical context. The bachelor's degree in art history prepares students for graduate study in art history as well as for professional work.

This program of study is offered by the Department of History and Art History.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements
In addition to satisfying university general education requirements and requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 33 to 34 credits with a minimum GPA of 2.00.

**One survey course (3 credits) chosen from:**

- ARTH 200 - Survey of Western Art Credits: 3
- ARTH 201 - Survey of Western Art Credits: 3
- ARTH 203 - Survey of Asian Art Credits: 3
- ARTH 204 - Survey of Latin American Art Credits: 3

**One museum course (3 credits):**

- ARTH 394 - The Museum Credits: 3

**Five courses (15 credits) in ARTH at the 300 level**

**One course (3 credits) in ARTH at the 400 level chosen from:**

- ARTH 400 - Historiography and Methods of Research in Art History Credits: 3
- ARTH 420 - Advanced Studies in Ancient Art Credits: 3
- ARTH 430 - Advanced Studies in Medieval or Islamic Art Credits: 3
- ARTH 440 - Advanced Studies in Renaissance and Baroque Art Credits: 3
- ARTH 460 - Advanced Studies in 20th-Century European Art Credits: 3
- ARTH 471 - Advanced Studies in Art of the United States Credits: 3
- ARTH 472 - Advanced Studies in 20th-Century Latin American Art Credits: 3
- ARTH 482 - Advanced Studies in Asian Art Credits: 3

**One additional course (3 credits) in ARTH at the 400 level or above**

**One course (3 or 4 credits) in AVT chosen from:**

- AVT 103 - Introduction to the Artist's Studio Credits: 3
- AVT 104 - Studio Fundamentals I Credits: 4

**One elective course (3 credits) chosen from:**

- One course (3 credits) in ARTH at the 100 or 200 level
- One course (3 credits) at the 300-level
- Other courses, with prior written approval of the director of the undergraduate program
Notes:

All art history majors are encouraged to pursue internships in art history (ARTH 393 or, with permission, ARTH 593) in their junior or senior year. Up to 6 credits in art history internships may be applied toward ARTH requirements for the major, with permission of the art history undergraduate director.

Students are strongly recommended to participate in a study abroad program. Students contemplating graduate study in art history should acquire a reading knowledge of French, German, or other appropriate research languages in consultation with an advisor.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in art history fulfill the university’s writing-intensive requirement by successfully completing any 400-level ARTH course.

History, BA

Banner Code: LA-BA-HIST

This program of study is offered by the Department of History and Art History.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 36 credits of history, with at least 18 credits at the 300 and 400 levels. Additional credits of history in excess of 36 may be presented as elective credits to be counted toward graduation. Students must have a minimum GPA of 2.00 in courses counting toward the major.

Two courses (6 credits) of U.S. history

Two courses (6 credits) of European history

- HIST 100 - History of Western Civilization used to fulfill the university-wide general education requirement in western civilization may be used to fulfill one course (3 credits) of this requirement.

Two courses (6 credits) of global, Latin American, African, Asian, or Middle Eastern history

- Approved history courses used to fulfill the university general education requirement in global understanding and the college-level requirement in non-Western culture may be used to fulfill this requirement.

One methods course (3 credits):

- HIST 300 - Introduction to Historical Method Credits: 3 (with a minimum grade of 2.00)
One seminar course (3 credits):

- HIST 499 - Senior Seminar in History Credits: 3 (fulfills university synthesis requirement)

Four elective courses (12 credits) in history

- Chosen from courses in history at the 300 or 400 levels if necessary to complete the 18-credit, upper-level history requirement

Note:

HIST 300 and 499 may not be used to satisfy the first three requirements. Before registering, students should see an advisor to help plan their history program to meet university general education and college-level requirements. The advisor also can help students choose electives or a minor.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in history may fulfill this requirement by successfully completing HIST 300 and 499.

Undergraduate Minor

Art History Minor

Banner Code: ARTH

The minor in art history covers a broad spectrum of periods, cultures, and themes, with an emphasis on historical context.

This program of study is offered by the Department of History and Art History.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00. ARTH 394 is not required for the minor but is strongly encouraged.

One to two courses (3 to 6 credits) in 100- or 200-level art history courses

Four to five courses (12 to 15 credits) in 300- or 400-level art history courses
History Minor

Banner Code: HIST

This program of study is offered by the Department of History and Art History.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits in history with a minimum GPA of 2.00.

The program must be approved by the undergraduate director before graduation.

Four courses (12 credits) in 300- or 400- level history courses

Three courses (9 credits) in a region or topic

- Chosen from courses concentrated in a region or topic related, if possible, to the student’s major

Master's Degree

Art History, MA

Banner Code: LA-MA-AH

The program in art history offers a unique master’s degree based on departmental strengths in traditional research, the application of new media, and the vast cultural resources of the Washington, D.C., area. Students study a broad range of art-historical periods, theory, and research methods. In addition, the program emphasizes new media skills, museum studies, and preprofessional internship training. Graduates are well-prepared for art museum and gallery professional work, where a master's degree is now routinely required, or further study in doctoral programs.

This program of study is offered by the Department of History and Art History.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to meeting requirements for graduate study at Mason, applicants should hold a BA in art history or a minor in art history that includes two courses at the 400 level, or have an equivalent background. Candidates without the requisite background may be admitted provisionally. In addition to the application materials required for graduate study, applicants should submit the following:

- Résumé that clearly describes student’s background in art history or related fields
• Goals statement that explains student’s interest in art history graduate study
• Satisfactory scores on GRE (This requirement is waived for students who received their undergraduate degree 10 or more years ago, or hold another graduate degree.)
• Writing sample
• Two letters of recommendation from art history professors or others closely associated with the candidate’s preprofessional activities

Degree Requirements

Students pursuing this degree must complete 30 graduate credits.

Three required courses (9 credits):

• ARTH 600 - Methods and Research in Art History Credits: 3
• ARTH 696 - Independent Directed Readings Credits: 3
• ARTH 699 - Topics in Art History Credits: 3

Five elective courses (15 credits) in ARTH and HIST

• Electives from AVT, ANTH, or CULT may be used, with prior written permission of the graduate director

One course (3 credits) of applied preprofessional learning chosen from:

• ARTH 593 - Art History Internships Credits: 3-6
• ARTH 594 - The Museum Credits: 3

One course (3 credits) in technology and new media for preparation for the comprehensive exam chosen from:

• HIST 696 - Clio Wired: An Introduction to History and New Media Credits: 3
• HIST 697 - Creating History in New Media Credits: 3

Research Language Proficiency

• Demonstration of reading ability in one relevant research language, to be approved by the graduate director

Written comprehensive exam

• Students may retake the exam once, following the original procedures. The second exam must be taken within one calendar year.

History, MA
The Department of History and Art History provides graduate training in historical methods and analysis for students with widely varying goals. The MA concentrations that follow are designed to meet those goals.

This program of study is offered by the Department of History and Art History.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Applicants must fulfill admission requirements for graduate study and the Department of History and Art History. These requirements include satisfactory scores on the GRE and two letters of recommendation from history professors with whom the applicant has studied or others directly familiar with the applicant’s professional competence and interests.

The GRE requirement is waived for students who received their undergraduate degrees 10 or more years ago or hold another graduate degree.

Degree Requirements

Students pursuing this degree must complete the requirements for one of the concentrations below. The first five concentrations require 30 credits of course work along with a specialization in U.S. history (AH), modern European history (EH), or world history (WH). The sixth concentration in teaching requires 36 credits.

Students may be required to take up to 12 additional credits of foundation courses, which cover broad thematic areas (HIST 601, 602, 605, 606), to remedy deficiencies in their undergraduate preparation. If required as foundational, these credits cannot be applied toward the credits required for the degree.

If foundation courses are not required at admission, students in the concentrations in enrichment and teaching may apply one of the thematic courses toward their degree. Students in the other concentrations may not apply these courses toward their degree.

Students may apply no more than 6 credits earned through study abroad courses toward their degree.

▲ Concentration in Predoctoral History (AH1, EH1, WH1)

This concentration is for students planning to pursue doctoral studies.

One required course (3 credits) taken within the first 9 credits:

- HIST 610 - The Study and Writing of History Credits: 3

Three to four courses (9-12 credits) in a specialization:

- Specialization in U.S. history (at least 3 credits from each group):
  - Origins to 1861
  - 1861–1914
  - 1914 World War I to the present
- Specialization in European history (at least 3 credits from each group):
  - Ancient, medieval, early modern to 1789
  - 1789–1914
1914 to the present

- Specialization in world history (at least 3 credits from two regions):
  - Africa
  - Asia
  - Middle East
  - Latin America

One research seminar (3 credits) in a specialization:

- HIST 711 - Research Seminar in U.S. History Credits: 3
- HIST 731 - Research Seminar in European History Credits: 3
- HIST 751 - Research Seminar in Comparative World History Credits: 3

One comprehensive reading course (3 credits) in a specialization:

The comprehensive reading course is designed by the student and a professor and taken during the last semester of course work. It generally requires reading beyond what is required in the other concentrations. This course is used to round out general historical knowledge and prepare students for the comprehensive exam.

- HIST 790 - Comprehensive Readings in U.S. History Credits: 3
- HIST 791 - Comprehensive Readings in Comparative World History Credits: 3
- HIST 792 - Comprehensive Readings in European History Since 1500 Credits: 3

Two elective courses (6 credits) in history

Written comprehensive exam

Students who do not pass the comprehensive exam are given the option of taking a second exam following the original procedures. The second exam must be taken within a calendar year.

Reading proficiency in a modern foreign language, as demonstrated by course work or an exam

3 credits of project or 6 credits of thesis

- HIST 798 - Directed Research and Writing in History Credits: 3
- HIST 799 - Thesis Credits: 1-6

Note:
HIST 798 requires the completion of a major paper that is a substantial and original contribution to historical knowledge on the model of an article in a scholarly journal. If students choose to take HIST 798, they complete an additional 3 credits in their specialization.

▲ Concentration in Predoctoral History with an Emphasis in Cultural History (AH5, EH5, WH5)

This concentration is for students with a particular interest in cultural history and students considering future work in the cultural studies doctoral program. Completion of this program of study does not guarantee admission to the doctoral program in cultural studies. Students interested in that degree program should contact the Cultural Studies Program.

One required course (3 credits) taken within the first 9 credits:

- HIST 610 - The Study and Writing of History Credits: 3

Three courses (9 credits) in a specialization:

- Specialization in U.S. history (at least 3 credits from each group):
  - Origins to 1861
  - 1861–1914
  - 1914 World War I to the present
- Specialization in European history (at least 3 credits from each group):
  - Ancient, medieval, early modern to 1789
  - 1789–1914
  - 1914 to the present
- Specialization in world history (at least 3 credits from two regions):
  - Africa
  - Asia
  - Middle East
  - Latin America

One research seminar (3 credits) in a specialization:

- HIST 711 - Research Seminar in U.S. History Credits: 3
- HIST 731 - Research Seminar in European History Credits: 3
- HIST 751 - Research Seminar in Comparative World History Credits: 3

One comprehensive reading course (3 credits) in a specialization:

The comprehensive reading course is designed by the student and a professor and taken during the last semester of course work. It generally requires reading beyond what is required in the other concentrations. This course is used to round out general historical knowledge and prepare students for the comprehensive exam.

- HIST 790 - Comprehensive Readings in U.S. History Credits: 3
- HIST 791 - Comprehensive Readings in Comparative World History Credits: 3
• HIST 792 - Comprehensive Readings in European History Since 1500 Credits: 3

One required course (3 credits) in cultural studies:

• CULT 802 - Histories of Cultural Studies Credits: 3

One course (3 credits) in approaches to cultural history

One course (3 credits) from outside the area of specialization containing a significant cultural history component as defined by the instructor

Written comprehensive exam

Students who do not pass the comprehensive exam are given the option of taking a second exam following the original procedures. The second exam must be taken within a calendar year.

Reading proficiency in a modern foreign language, as demonstrated by course work or an exam

3 credits of project

• HIST 798 - Directed Research and Writing in History Credits: 3

Note:

HIST 798 requires the completion of a major paper on a topic in cultural history that is a substantial and original contribution to historical knowledge on the model of an article in a scholarly journal.

▲ Concentration in Applied History (AH2, EH2, WH2)

This concentration is for students seeking expertise in applied history fields, such as archival management, museum studies, historic preservation, and historical editing. It is also suitable for professionally employed historians who desire to further their careers.

One required course (3 credits) taken within the first 9 credits:

• HIST 610 - The Study and Writing of History Credits: 3
Four courses (12 credits) in a specialization:

- Specialization in U.S. history (at least 3 credits from each group):
  - Origins to 1861
  - 1861–1914
  - 1914 World War I to the present

- Specialization in European history (at least 3 credits from each group):
  - Ancient, medieval, early modern to 1789
  - 1789–1914
  - 1914 to the present

- Specialization in world history (at least 3 credits from two regions):
  - Africa
  - Asia
  - Middle East
  - Latin America

One research seminar (3 credits) in a specialization:

- HIST 711 - Research Seminar in U.S. History Credits: 3
- HIST 731 - Research Seminar in European History Credits: 3
- HIST 751 - Research Seminar in Comparative World History Credits: 3

Two to three courses (6-9 credits) in applied history

Students can choose from courses in historic preservation, museum studies, archives, historical editing, or new media and information technology.

3 or 6 credits of internship

If students chose to do a 3-credit internship, they will take an additional 3 credits in applied history course work.

- HIST 794 - Internship in Applied History Credits: 3-6

Proficiency in a relevant research tool

- Demonstrated by course work or exam in computers, statistics, or a modern foreign language

▲ Concentration in Applied History with New Media and Information Technology Emphasis (AH4, EH4, WH4)

One required course (3 credits) taken within the first 9 credits:
• HIST 610 - The Study and Writing of History Credits: 3

Four courses (12 credits) in a specialization:

• Specialization in U.S. history (at least 3 credits from each group):
  o Origins to 1861
  o 1861–1914
  o 1914 World War I to the present
• Specialization in European history (at least 3 credits from each group):
  o Ancient, medieval, early modern to 1789
  o 1789–1914
  o 1914 to the present
• Specialization in world history (at least 3 credits from two regions):
  o Africa
  o Asia
  o Middle East
  o Latin America

One research seminar (3 credits) in a specialization:

• HIST 711 - Research Seminar in U.S. History Credits: 3
• HIST 731 - Research Seminar in European History Credits: 3
• HIST 751 - Research Seminar in Comparative World History Credits: 3

Two courses (6 credits) in new media and information technology

3 or 6 credits of internship in information technology

If students chose to do a 3-credit internship, they will take an additional 3 credits in applied history course work.

• HIST 794 - Internship in Applied History Credits: 3-6

Proficiency in a relevant research tool

• Demonstrated by course work or exam in computer science, statistics, information technology, or a modern foreign language

▲ Concentration in Enrichment (AH3, EH3, WH3)

This concentration is for students who want to study history for intellectual self-fulfillment or vocational reasons. It allows more flexibility in the selection of courses and does not have a foreign language requirement.
One required course (3 credits) taken within the first 9 credits:

- HIST 610 - The Study and Writing of History Credits: 3

Four courses (12 credits) in a specialization:

- Specialization in U.S. history (at least 3 credits from each group):
  - Origins to 1861
  - 1861–1914
  - 1914 World War I to the present
- Specialization in European history (at least 3 credits from each group):
  - Ancient, medieval, early modern to 1789
  - 1789–1914
  - 1914 to the present
- Specialization in world history (at least 3 credits from two regions):
  - Africa
  - Asia
  - Middle East
  - Latin America

One research seminar (3 credits) in a specialization:

- HIST 711 - Research Seminar in U.S. History Credits: 3
- HIST 731 - Research Seminar in European History Credits: 3
- HIST 751 - Research Seminar in Comparative World History Credits: 3

Four elective courses (12 credits)

Students may optionally do a thesis HIST 799 (6 credits). Students who choose this option complete only 6 credits of electives.

▲ Concentration in Teaching (HS4)

This concentration is intended for students already licensed for teaching or seeking licensure. Although it includes course work in history and education, completion of this concentration alone is not sufficient to qualify for licensure. A licensure program is offered by the College of Education and Human Development (CEHD), and admission is limited. Students are advised to consult with CEHD for specific requirements regarding licensure.

One required course (3 credits) taken within the first 9 credits:

- HIST 610 - The Study and Writing of History Credits: 3

Six courses (18 credits) in history

- Choose at least one course (3 credits) each from U.S., European, and world history
One research seminar (3 credits) chosen from:

- HIST 711 - Research Seminar in U.S. History Credits: 3
- HIST 731 - Research Seminar in European History Credits: 3
- HIST 751 - Research Seminar in Comparative World History Credits: 3

Four courses (12 credits) in graduate education courses, including:

- EDCI 567 - Teaching Social Studies in the Secondary School Credits: 3

Doctoral Degree

History, PhD

Banner Code: LA-PHD-HIST

The PhD in history prepares students for careers in college teaching, digital media, publishing, educational administration, public history, and historical research. Students gain expertise in conventional historical methods and web-based technologies. Major fields include U.S. history, European history, and world history; minor fields are chosen by the student and may include such areas as public history, constitutional studies, and new media and information technology. Depending on career goals and interests, students can also focus their degrees in one of four areas:

College and university teaching: This emphasis is for students who are seeking a career in teaching or research at the community college, college, or university level.

New media and information technology: Although all students in the program take some courses in new media, students in this emphasis seek careers specifically in new media (publishing, education, or a college or university history department where they would serve as the department’s lead person in new media and information technology). This emphasis requires more advanced work in new media than any other.

Public and applied history: This emphasis prepares students for work in applied areas of history, such as museums, archives, federal government work, preservation, and editing, or helps students already working in those areas to advance. In some cases, students will do advanced course work in their field of work; in other cases, they will acquire knowledge or skills that will foster their professional work (such as nonprofit management).

Professional development: This emphasis responds to the needs of students who have already launched a career and want a doctoral degree to further career goals or fulfill personal intellectual goals. Candidates who need flexible scheduling will be advised on a case-by-case basis.

This program of study is offered by the Department of History and Art History.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Three letters of recommendation from professional colleagues or academic mentors
• GRE score
• Goals statement that explains the applicant’s academic credentials, professional background, intellectual interest in the doctoral program in history, and ultimate career goals
• Writing sample consisting of a history essay, research paper, or professional paper

Reduction of Credit

For students entering the doctoral program with a master’s degree, the number of required credits may be reduced by a maximum of 30 credits, subject to approval of the program faculty and the dean. Requests for reduction of credit are reviewed only after acceptance to the doctoral program.

Degree Requirements

Students pursuing this degree must complete a minimum of 72 graduate credits. Students will be terminated from the program if they receive more than one unsatisfactory grade (C or F). No more than 6 credits earned through study abroad courses may be applied towards the degree.

In addition to core courses, students must complete course work in a major field of study and two minor fields; pass a comprehensive exam; and complete a dissertation. The dissertation demonstrates mastery of the subject matter, methodologies, and conceptual foundations in the chosen field of study. This requirement is generally achieved through consideration of a problem on the boundaries of knowledge in the discipline.

Six core courses (21 credits):

• HIST 610 - The Study and Writing of History Credits: 3
• HIST 696 - Clio Wired: An Introduction to History and New Media Credits: 3
• HIST 697 - Creating History in New Media Credits: 3
• HIST 810 - History Doctoral Colloquium Credits: 1
• HIST 811 - Doctoral Research Seminar Credits: 3

and one seminar course chosen from:

• HIST 711 - Research Seminar in U.S. History Credits: 3
• HIST 731 - Research Seminar in European History Credits: 3
• HIST 751 - Research Seminar in Comparative World History Credits: 3

Major field (15 credits):

• Chosen from courses in U.S. history, European history, comparative world history

Minor fields (18 credits):

• Chosen from courses in two minor fields (9 credits each)

Doctoral research skills:
• Students must demonstrate basic competency in computers. Students whose research requires knowledge of a foreign language must also demonstrate a reading knowledge of one foreign language. The department sets specific research skills requirements for students, depending on their field of study.

Comprehensive exam:

• Students need to pass a comprehensive exam that consists of a written field statement for each minor field and an oral exam for the major field.

Dissertation:

• HIST 998 - Doctoral Dissertation Proposal Credits: 1-6 (3 credits minimum; 6 credits maximum)
• HIST 999 - Doctoral Dissertation Research Credits: 1-12 (15 credits)

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass an oral comprehensive exam in a major field and written field statements in two minor fields. In addition, students must have a dissertation committee appointed by the Dean’s Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can be advanced to candidacy.

Continuous Registration

Once enrolled in 998, students must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by University Libraries.

■ Honors Program in General Education

Phone: 703-993-1110
Web: honors.gmu.edu

Faculty

Albanese, Alligood (associate director), Bakhash, Bristol, Burr (director), Burt, Butler, Carbonneau, Carton, J. R. Censer, Cherubin, Constantine, Dakake, D’Andrea, DeCaroli, Deshmukh, Diecchio, Fox, Geller, Gifford, Gould, Granfield, Haines, Harbour, Heelo, Hodges, M. Holt, Jacobs, Jann, Johnsen-Neshati, Jones, Karush, Koch, Kulesza, Leeman, Maloney, Mandaville, Mandes, Mattusch, McFerson, Metcalf, L. Miller, Nadeau, Nichols, J. Paden, Palkovich, Ramos-Pellicia, Roan, Roman-Mendoza, Reid, Rutledge, Sachs, Sample, Samuelian, Seligmann, Shutika, V. Smith, C. Snyder-Hall, Stearns, Taciuch, Tangney, Taylor, Todd, Trefil, T. Williams, B. Wilson, Yadav, Zaccaro, Zagarri

Course Work

The program offers all course work designated HNRS in the Courses chapter of this catalog.

Honors Program
The Honors Program is the academic program of the Mason's Honors College (described in the University Academic Programs and Resources section of this catalog), which provides talented students in all majors with an enriched academic and social environment that enhances their college experience.

The Honors Program offers a unique selection of integrated courses designed for highly motivated students and taught by many of Mason’s most experienced teachers and accomplished scholars. Taken together, these courses satisfy the general education requirements in social sciences and humanities for all colleges and majors in the university. Because most honors classes have fewer than 25 students, honors students have the opportunity to be known and mentored by distinguished faculty during their first years on campus. The track in science, technology, engineering, economics, and mathematics offers honors sections of first-year courses in these disciplines, as well.

The Honors Program also offers students special access to the technical, intellectual, and artistic resources of the university and the national capital region. It seeks to develop among its students a sense of intellectual community and a commitment to lifelong learning.

Admission

Admission is limited and competitive. Students apply to the Honors Program when applying to Mason by selecting the box that indicates they are interested in the Honors Program and by completing an additional essay question. If the application meets the criteria for admission to the Honors Program, the applicant will receive an invitation to the program shortly after receiving the acceptance letter to the university.

Applicants are evaluated on the strength of their entire academic record, including the rigor of the high school curriculum, GPA, and standardized test scores. Students are allowed to use AP, IB, and dual-enrollment credit taken before admission to Mason to substitute for certain HNRS courses, excluding HNRS 110 and HRNS 353.

Requirements

The core of the honors curriculum is designed to satisfy the university general education requirements through a small number of interdisciplinary courses, allowing students increased opportunities to pursue minors or other individual interests. Students then have a choice of two tracks, determined by their majors and degrees. The STEM track is designed for students pursuing a bachelor of science degree in science, technology, engineering, economics, or mathematics. The Liberal Arts and Social Sciences (LASS) track is for students pursuing a bachelor of arts degree, who have additional college level requirements.

To receive honors in general education on their transcript, students must earn a minimum GPA of 3.00 in HNRS courses and supporting courses required for their approved honors program. Students whose cumulative GPA falls below 3.00 may complete the program but will not receive honors recognition on their transcripts.

Continuation in Honors

Students in the program who are placed on academic warning because their GPA falls below 2.00 (1.80 in the first or second semester) may be ineligible to continue in the program.

Honors students are expected to maintain high standards of academic integrity and personal conduct. Students may be asked to withdraw from the program for a violation of the University Honor Code or any other conduct that reflects adversely on the Honors Program.

Students who leave the program before completion must meet university general education requirements and college-level requirements for their particular degree programs. On leaving the program and before registering for general education courses, students should be advised on equivalencies between the honors courses they have completed and general education requirements.
Transfer of Honors Credits

Within George Mason: Because of the sequential and integrated nature of the program, honors courses may not correspond exactly to other courses used to fulfill general education requirements. A list of equivalencies is available in the Honors Program Office and on the web site.

Outside George Mason: Course work in the Honors Program may meet the general education requirements of other universities. As in all transfer situations, general education requirements of one institution may not precisely match those of another.

Individualized Study

Phone: 703-993-4556
Web: bis.gmu.edu

Administration

Jeannie Brown Leonard (Director)

Course Work

The program offers all course work designated BIS in the Courses chapter of this catalog.

Undergraduate Program

The bachelor of individualized study (BIS) degree provides an alternative to the traditional baccalaureate, offering students a distinctive educational opportunity that allows them to integrate previous experiences into university course work. Recognizing that college-level learning may be acquired through varied professional, military, and personal experience, the BIS Program provides mechanisms for translating experiential learning into academic credit. It accepts transfer credits from traditional institutions of higher education, as well as credits earned through other appropriate means.

There are two pathways for obtaining this degree. Students can design their own individualized interdisciplinary program of study or pursue a standardized concentration. These alternatives require different course work, prerequisites, and eligibility.

Eligibility

Applicants for an individualized study degree must have completed high school at least seven years prior to admission to the program and have accumulated at least 30 college-level credits, 15 of which must have been earned through conventional classroom instruction. The concentration in early childhood education studies is an exception to the seven-year time limit.

Application and Admission

Students interested in the BIS program must attend an information session and apply separately to the BIS Program in addition to applying to Mason through the Office of Admissions. The BIS information session schedule and application form are available on line at www.bis.gmu.edu. Admission is selective and based on a minimum GPA of 2.50 on previous course work.

Honors in the Major
Highly qualified students may apply to graduate with honors in the major. Students should apply the semester before they intend to enroll in BIS 390 (The Research Process). Students accepted to the honors in the major must complete a BIS 391 and BIS 490 (an individualized section) with a minimum GPA of 3.5, maintain a cumulative GPA of 3.75 or higher, and successfully present their research during the Senior Capstone Project presentations.

Credit for Nontraditional Modes of Learning

The BIS program allows students to receive college credit for learning acquired through a variety of nontraditional methods indicated below. The maximum allowable credits are indicated for each category.

1. Nationally recognized exam programs such as the College Level Examination Program (CLEP) when the particular exam has been approved for Mason credit. For an approved list, go to admissions.gmu.edu/exams/ExamCLEP.asp (45 maximum credits).
2. Certain university approved industry, government, or military training credits if such credits are indexed and recommended as college-level credit by the American Council on Education (ACE). To be eligible for Mason credit, training and course specifics must exactly match what is in the ACE guide (45 maximum credits) and be approved for Mason credit. The specific credits must also be approved by the program director and the dean. Note: Total combined credit for exams and ACE-approved training cannot exceed 60 credits. For example, if 45 credits are accepted by ACE-approved training, a maximum of 15 credits can be accepted for the exam.
3. Experiential learning demonstrated by portfolios subject to approval by the program director and the dean (30 maximum credits).
4. College-level credit earned at institutions accredited by bodies other than recognized regional accrediting organizations subject to approval by the program director and the dean. These credits can only be considered if the institution is listed in Accredited Institutions of Postsecondary Education published by ACE (30 maximum credits).

Students may not pursue credit for options 1, 2, and 4 once they have matriculated at Mason. They must complete the third option within their first 30 credits after matriculation. Although the types of credit noted above may be applied to a BIS degree, not all university and program requirements can be fulfilled in these ways. These nontraditional credits are not transferable to other degree programs at Mason.

Bachelor’s/Accelerated Master’s Program

The program offers highly qualified undergraduates the opportunity to apply to an accelerated master’s degree program in telecommunications. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 144 credits.

Undergraduate Degree

Individualized Study, BIS

Banner Code: LA-BIS-INDV

Students pursing a bachelor's degree in individualized study must meet the baccalaureate degree requirements for all undergraduates: they need to complete a minimum of 120 credits of course work, complete 45 credits in courses above the 300 level, take at least 30 credits at Mason, and complete general education requirements.

Students in the BIS program are required to meet a modified general education program of 36 credits: 6 credits in English composition (ENG 101 and ENG 302), 9 credits in humanities, 9 credits in social sciences, 3 credits in MATH or STAT (MATH 106 or STAT 250), 3 credits in IT-designated course work, 3 credits in a lab or non-lab natural science, and 3 credits in synthesis (BIS 490).
This program of study is offered by the Individualized Study Program.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

Students pursuing a BIS degree must complete four required courses and one of the concentrations below. Concentrations consist of 24-39 credits. At least 24 credits applied to the concentration must be at the 300 level or above. Students must have a minimum GPA of 2.00 in courses applied to the concentration. No more than six credits of C- or D grades may be applied to the concentration.

Courses applied to a concentration may not also be used to fulfill general education requirements.

Students are encouraged to pursue a minor. 15 credits of the minor must be applied uniquely to the minor and not to the BIS concentration.

Four required courses (10 credits) with a minimum grade of 2.00:

To enroll to enroll in BIS 490, students must have an approved BIS 390 project proposal. In BIS 490, students complete a senior capstone project that varies according to the individual program of study. It may be a research or creative project, and it must be appropriate to the student’s interdisciplinary concentration. BIS 490 requires significant writing and fulfills the synthesis requirement. The project is evaluated by the BIS 490 instructor in consultation with the student’s faculty mentor and usually one other faculty member or qualified professional. BIS 490 and BIS 491 are taken concurrently when no more than 6 credits remain in the concentration.

- BIS 300 - Understanding Multidisciplinary Studies Credits: 3
- BIS 390 - The Research Process Credits: 3
  or
- BIS 391 - The Research Process for Honors Credits: 3
- BIS 490 - Senior Project Credits: 3
- BIS 491 - Senior Project Presentation Credits: 1

Choose from one of the following concentrations:

Concentration Requirements

▲ BIS Individualized Concentration (IND)

Students may choose to do an individualized concentration to meet their own academic needs and interests. The concentration is developed in close consultation with BIS staff and a faculty mentor. Students may incorporate into their individualized concentrations up to 9 credits of previously earned college course work and nontraditional credit from other institutions. The concentration consists of between 24 and 36 credits depending on the topic and the student's preparation. In addition to meeting the requirements for all concentrations above, 25 credits applied to this concentration must be completed at Mason.
24 to 36 credits from a minimum of two disciplines

Students are encouraged to include BIS 489 - Directed Readings and Research in the concentration and complete it before taking BIS 490.

Notes:

Students must have an approved BIS 390 project proposal to enroll in BIS 490. In BIS 490, students complete a senior capstone project that varies according to the individual program of study. It may be a research or creative project, and it must be appropriate to the student’s interdisciplinary concentration. BIS 490 requires significant writing and fulfills the synthesis requirement. The project is evaluated by the BIS 490 instructor in consultation with the student’s faculty mentor and usually one other faculty member or qualified professional. BIS 490 and BIS 491 are taken when no more than 6 credits remain in the concentration. Students must receive a grade of 2.00 or better in all BIS Core classes.

Total: 24-36 credits

▲ BIS Concentration in Business Communications (BCO)

This concentration provides an interdisciplinary foundation for students who want to pursue a variety of business and/or communication-related careers. Drawing from course work in management, psychology, communication, and English, students learn about communication in the workplace from multiple perspectives.

Five courses (15 credits) of communication:

- COMM 305 - Foundations of Intercultural Communication Credits: 3
  or
- COMM 332 - Nonverbal Communication Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- COMM 330 - Principles of Public Relations Credits: 3
  or
- COMM 389 - Public Relations for Associations and Nonprofits Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- COMM 401 - Interpersonal Communication in the Workplace Credits: 3
  or
- COMM 434 - Interviewing Credits: 3

Three courses (9 credits) in business:
• MSOM 301 - Managing People and Organizations Credits: 3
• MSOM 302 - Managing Information in a Global Environment Credits: 3
• MSOM 303 - Marketing in a Global Economy Credits: 3

Two courses (6 credits) of other interdisciplinary coursework:

• ENGL 410 - Professional and Technical Writing Credits: 3
• PSYC 467 - The Psychology of Working in Groups and Teams Credits: 3
  or
• SOCI 304 - Sociology of Work and Occupations Credits: 3

Total: 30 credits

▲ BIS Concentration in Educational Psychology (EDP)

This concentration provides an interdisciplinary foundation for students who want to go into educational careers, including administrative, instructional, and counseling roles across the K–12 spectrum. Drawing from psychology and education course work, students in this concentration learn about the psychology of learning, including cognitive processes across developmental stages and educational strategies through which individuals better comprehend and internalize knowledge.

Five education courses (15 credits):

• EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
• EDUC 302 - Human Growth and Development Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
• EDUT 411 - Developmental Pathways of Diverse Learners, Birth-Adolescence Credits: 3
• EDUT 413 - Foundations of Language and Literacy for Diverse Learners Credits: 3
  or
• EDUT 414 - Curriculum and Instruction for Diverse Learners, Ages 3-5 Credits: 3

Five courses (15 credits) of psychology:

• PSYC 211 - Developmental Psychology Credits: 3
• PSYC 313 - Child Psychology Credits: 3
• PSYC 309 - Sensation, Perception, and Information Processing Credits: 4
or
- PSYC 317 - Cognitive Psychology Credits: 3
- PSYC 314 - Adolescent Psychology Credits: 3
  or
- NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-15
- PSYC 321 - Counseling Psychology Credits: 3
  or
- PSYC 325 - Abnormal Psychology Credits: 3

Total: 30 credits

▲ BIS Concentration in Early Childhood Education Studies (ECES)

This concentration offers students holding a Northern Virginia Community College associate’s degree in applied science in early childhood development the opportunity to obtain a BIS in early childhood education studies and a minor in business. This concentration does not lead to teacher licensure in early childhood education. Students must complete 49 credits with a minimum GPA of 2.00.

Admission Requirements

Admission to this concentration requires a separate application to the program after admission to the university. Students are guaranteed admission to Mason and the BIS program if they have achieved the GPA stipulated in the Mason/NVCC general articulation agreement (currently 2.75) and completed all requirements for an associate’s degree in applied science in early childhood development. Unlike the individualized program, there is no restriction regarding years since high school graduation for admission into the BIS in early childhood education.

24 credits of interdisciplinary courses:

In addition to the courses below, students complete this requirement with electives chosen in consultation with the director.

- EDUC 302 - Human Growth and Development Credits: 3
- SOCI 303 - Sociological Research Methodology Credits: 4
  or
- GOVT 300 - Research Methods and Analysis Credits: 4
- Take 8 credits of NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-15
- PSYC 313 - Child Psychology Credits: 3
- EDUT 413 - Foundations of Language and Literacy for Diverse Learners Credits: 3
  or
- EDUT 414 - Curriculum and Instruction for Diverse Learners, Ages 3-5 Credits: 3
- EDUT 423 - Language Acquisition and Communication for Diverse Infants and Toddlers Credits: 3
or

- EDUT 424 - Culturally, Linguistically, and Developmentally Appropriate Practices with Infants, Toddlers, and their Families Credits: 3

Five courses (15 credits) leading to a minor in business:

- MSOM 300 - Managing Financial Resources Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3
- MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3

Total: 39 credits

▲ BIS Concentration in Human Resources and Organizational Studies (HROS)

This concentration provides an interdisciplinary foundation for students who want to pursue careers in employee relations, human resources management, and organizational development. Drawing from course work in sociology, management, psychology, and communication, students learn theories on employee and organizational behavior from multiple perspectives as well as ethical and best practices in the field.

33-34 credits of interdisciplinary course work:

- MGMT 301 - Managing People and Organizations Credits: 3
- MGMT 321 - Introduction to Human Resource Management Credits: 3
- MGMT 413 - Organizational Development and Management Consulting Credits: 3
- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - Employee Relations Credits: 3
- PSYC 320 - Psychological Tests and Measurements Credits: 4
  or
- PSYC 330 - Psychology of Adjustment Credits: 3
  or
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
  or
- PSYC 435 - Personnel Training and Development: A Psychological Perspective Credits: 3
- SOCI 304 - Sociology of Work and Occupations Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
  or
• COMM 335 - Organizational Communication Credits: 3
• NCLC 305 - Conflict Resolution and Transformation Credits: 6
• SOM 301 - Business Models: A Learning by Writing Introduction Credits: 3
  or
• ENGL 410 - Professional and Technical Writing Credits: 3

Total: 33-34 credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in BIS may fulfill this requirement by successfully completing BIS 390/391. Students must have an approved BIS concentration and a grade of 2.00 or better in ENGL 302 before enrolling in BIS 390/391.

Bachelor's/Accelerated Master's Program

Individualized Study, BIS/Telecommunications, Accelerated MS

Students who are in the Bachelor of Individualized Study (BIS) Program may elect to enter an Accelerated MS in TCOM Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the BIS Program who would like to proceed directly into the MS in TCOM Program, completing the two degrees with 144 credits. Accelerated students must satisfy requirements for the BIS (including 120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS in TCOM is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the table that follows and will be substituted for BIS concentration courses, subject to prior approval by a BIS advisor. Note: Accelerated students must take ECE 301 or 303 as one of their BIS concentration courses.

Applicants must be Mason undergraduate students in the BIS Program. Students may apply for the accelerated program during the semester after which they will have completed 90 or more credits and 15 Mason resident credits applicable toward the BIS as an undergraduate. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission into the MS in TCOM Program, except that students do not need to have completed an undergraduate degree prior to acceptance into the accelerated program.

Students who have been accepted into the accelerated program must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, after students have been accepted into the accelerated program, they must maintain a 3.25 GPA until they have satisfied all requirements for the BIS degree. They must then maintain a minimum 3.00 GPA in the graduate segment of the accelerated program.

Students must complete all requirements for the BIS degree. Students in the accelerated program must apply to have the BIS degree conferred the semester before they expect to complete BIS requirements, and must graduate. The MS in TCOM is granted on completion of all requirements for the accelerated degree.

TCOM courses that may be taken by a BIS undergraduate student as part of the accelerated program are given in the table below. **Note:** All of the prerequisite courses indicated below must be passed with a grade of B or higher.
Degree Requirements

Telecommunications courses:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5 (prerequisite: acceptance to accelerated program)
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5 (prerequisites: TCOM 501, IT 341, or equivalent)
- TCOM 503 - Fiber Optic Communications Credits: 1.5 (prerequisite: TCOM 500 or equivalent)
- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5 (prerequisites: TCOM 501, IT 341, or equivalent)
- TCOM 509 - Internet Protocols Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5 (prerequisite: TCOM 505)
- TCOM 513 - Optical Communications Networks Credits: 1.5 (prerequisite: TCOM 503)
- TCOM 519 - Voice over IP Credits: 1.5 (prerequisites: TCOM 509, IT 341, or equivalent)
- TCOM 529 - Advanced Internet Protocols Credits: 1.5 (prerequisite: TCOM 509)
- TCOM 539 - Advanced Voice over IP Credits: 1.5 (prerequisite: TCOM 519)
- TCOM 551 - Digital Communication Systems Credits: 3 (prerequisite: TCOM 500 or equivalent)
- TCOM 607 - Satellite Communications Credits: 3 (prerequisites: ECE 463, TCOM 551, or equivalent)

Note:

Accelerated students who have passed IT 341 with a grade of B or higher will not be required to take TCOM 501 in the MS in TCOM core. They may take a 1.5-credit elective instead. Other TCOM courses may be approved on a case by- case basis.

BIS Concentration: 34-46 credits

- Additional 500-level TCOM course (3)
- Plus an additional 9 to 21 credits to reach required number.
- BIS 300 - Understanding Multidisciplinary Studies Credits: 3
- BIS 390 - The Research Process Credits: 3
- BIS 490 - Senior Project Credits: 3
- BIS 491 - Senior Project Presentation Credits: 1

- ECE 301 - Digital Electronics Credits: 3
  or
- ECE 303 - Digital Design/Intro Assembly Language Credits: 4

- IT 212 - Computer Hardware Fundamentals Credits: 3
- IT 341 - Data Communications and Network Principles Credits: 3
- TCOM 500 - Modern Telecommunications Credits: 3

■ Interdisciplinary Minors and Certificate (CHSS)
The College of Humanities and Social Sciences offers many minors and one certificate in interdisciplinary areas of study. These minors require course work from two or more disciplines and are administered by interdepartmental faculty groups, often faculty from across the university.

Other interdisciplinary minors are offered by departments and programs in the college. These include:

- African and African American Studies
- Global Affairs
- Judaic Studies
- Japanese Studies
- Latin American Studies
- Leadership
- Nonprofit Studies
- Women and Gender Studies

For policies governing all minors, see the Academic Policies chapter of the catalog.

**Bachelor's Level Certificate**

**Islamic Studies Undergraduate Certificate**

**Banner Code: LA-CERB-ISLM**

The certificate is for those seeking academic or professional enhancement through basic knowledge about Islam. Students may not earn both a minor and a certificate in Islamic Studies.

This program of study is offered by the College of Humanities and Social Sciences.

For policies governing all certificates, see the Academic Policies chapter of the catalog.

**Certificate Requirements**

Students pursuing this certificate complete 24 credits.

**Three core courses (9 credits):**

- GOVT 345 - Political Islam Credits: 3
- HIST 281 - Survey of Middle Eastern Civilization Credits: 3
- RELI 272 - Islamic Religious Life Credits: 3

**Four elective courses (12 credits) chosen from:**

- ANTH 309 - Peoples and Cultures of India Credits: 3
- ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- ARTH 382 - Arts of India Credits: 3
FREN 453 - Francophone Literature from North Africa Credits: 3
GEOG 325 - Geography of North Africa and the Middle East Credits: 3
GEOG 330 - Geography of the Soviet Succession States Credits: 3
GOVT 328 - Non-Western Political Theory Credits: 3
GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
HIST 282 - Survey of Middle Eastern Civilization Credits: 3
HIST 462 - Women in Islamic Society Credits: 3
HIST 465 - The Middle East in the 20th Century Credits: 3
RELI 374 - Islamic Thought Credits: 3
RELI 375 - Qur'an and Hadith Credits: 3

Foreign language requirement (3 credits)

One course in a foreign language of any country with a significant Muslim population. While Arabic maybe used to fulfill this requirement, other languages can be substituted with prior approval of the coordinator.

Notes:

Students may have the foreign language requirement waived if they can demonstrate proficiency in a relevant foreign language. They may do this through an exam offered by the Department of Modern and Classical Languages or through presentation of the relevant documentation to the Office of Undergraduate Academic Affairs. Such students will have 3 additional elective credits. Courses in another language of the Islamic world can also be applied toward elective credits.

Special topics courses, when relevant, may be used to fulfill elective credits for the minor with prior written approval of the coordinator.

Total: 24 credits

Undergraduate Interdisciplinary Minor

Ancient Mediterranean Art and Archaeology Minor

Banner Code: ARTM

Phone: 703-993-3770

Faculty

Butler (coordinator), Cherubin, Lytton, Mattusch, Winkler

This interdisciplinary minor is for students with diverse interests in the material culture of the ancient world. Course work combines the study of archeology, literature, art, history, philosophy, myth, and religion. The minor’s scope is not limited to Greece and Rome, but touches on all the ancient civilizations of the Mediterranean and the heirs of late antiquity such as Byzantium and early Islam.
The program represents foundation work crucial to graduate study in traditional departments of classical, near Eastern, or Mediterranean art and archeology. Through this minor, students are given credit for acquiring practical linguistic skills and archaeological field experience as well as scholarly background. Students should consult with the coordinator in designing a program. At least 3 credits must be taken in ARTH, and at least 9 credits must be taken outside of ARTH.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits, distributed as follows:

Preparatory work:

- GREE 150 - Classical Greek I Credits: 3
- GREE 160 - Classical Greek II Credits: 3

or one course (3 credits) in ancient literature chosen from:

- ARTH 102 - Symbols and Stories in Art Credits: 3
- CLAS 250 - Classical Mythology Credits: 3
- CLAS 260 - The Legacy of Greece and Rome Credits: 3
- RELI 211 - Religions of the Near (Middle) East Credits: 3

or at least one course (3 credits) of Greek, Latin, or a modern research language in addition to the basic two-year introductory language sequence

Two to three elective courses (6 to 9 credits) chosen from:

- ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity Credits: 3
- ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- ARTH 321 - Greek Art and Archaeology Credits: 3
- ARTH 322 - Roman Art and Archaeology Credits: 3
- ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World Credits: 3
- ARTH 333 - Early Christian and Byzantine Art Credits: 3
- ARTH 399 - Special Topics in the History of Art Credits: 3 (with approval of the coordinator)
- CLAS 340 - Greek and Roman Epic Credits: 3
- CLAS 350 - Greek and Roman Tragedy Credits: 3
- CLAS 360 - Greek and Roman Comedy Credits: 3
- CLAS 370 - Greek and Roman Historians Credits: 3
- CLAS 380 - Greek and Roman Novels Credits: 3
- CLAS 390 - Topics in Classical Literature and Culture Credits: 3
- HIST 301 - Classical Greece Credits: 3
- HIST 302 - Classical Rome Credits: 3
- HIST 480 - Alexander the Great Credits: 3
- PHIL 301 - History of Western Philosophy: Ancient Credits: 3
- RELI 351 - Religions of the Ancient Near East Credits: 3
- RELI 352 - Judaism from Exile to Talmud Credits: 3
- RELI 381 - Beginnings of Christianity Credits: 3

Note:

Any courses pertaining to the region and period may be used to fulfill this requirement with the prior written approval of the coordinator.

Seminar (3 credits) chosen from:

- ARTH 420 - Advanced Studies in Ancient Art Credits: 3 (if topic is appropriate)
- ARTH 430 - Advanced Studies in Medieval or Islamic Art Credits: 3 (if topic is appropriate)

Practicum (3 to 6 credits) chosen from:

- ARTH 394 - The Museum Credits: 3
  or
- ARTH 594 - The Museum Credits: 3
- ANTH 322 - Historical Archaeology Credits: 3
- ANTH 325 - Field Techniques in Archaeology Credits: 3-6
- ANTH 420 - Interpretation in Archaeology Credits: 3
- ANTH 430 - Research Methods in Archaeology Credits: 3

Note:

Archaeological field work done for credit or an appropriate ARTH 393 internship may be used to fulfill this requirement with the prior written approval of the coordinator.

Total: 18 credits

Applied Conservation Studies Minor

Banner Code: CONS

The minor in applied conservation studies is designed for students who wish to augment their academic programs with conservation studies taught in an experiential manner. Grounded in natural science, these interdisciplinary courses combine public policy, sociology, conflict resolution, and global awareness. Students work with Smithsonian researchers and Mason...
faculty at the Smithsonian’s Conservation Research Center in Front Royal, VA -- a facility that houses some of the world’s most endangered species.

Students may pursue this minor only as a part of the Smithsonian Mason Semester. It is offered jointly by the College of Humanities and Social Sciences and the Department of Environmental Science and Policy in the College of Science.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students receiving this minor complete 16 credits as distributed below, with a minimum grade of 2.00 in each course.

Five required courses (16 credits):

- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Science I: Conservation Theory Credits: 3
- CONS 402 - Conservation Science II: Conservation Practice Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
- CONS 490 - Integrated Conservation Strategies Credits: 3

Total: 16 credits

Asia-Pacific Studies Minor

Banner Code: APS

Phone: 703-993-2957

Faculty

Butler, Chang, Cuong, DeCaroli, Hinton, H. Nguyen (coordinator), Lin, Paden, Platt, Ro, Wan, Zhang

The interdisciplinary minor in Asia-Pacific studies is for students whose interests focus on the humanities and social sciences and Asia's role in global systems and the cultural mosaic of human experience. In particular, a new type of trans regionalism is explored: the links between Asia and North America.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete a minimum of 18 credits, distributed as follows:

Two required courses (6 credits) chosen from:
• Any single 200-level or higher course in an Asian language

• ARTH 203 - Survey of Asian Art Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• HIST 251 - Survey of East Asian History Credits: 3
• HIST 252 - Survey of East Asian History Credits: 3
• RELI 212 - Religions of the Orient Credits: 3

Four elective courses (12 credits), chosen from:

• Any course from the list of required course options not used to fulfill the requirement
• ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
• ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3
• ANTH 382 - Urban Anthropology Credits: 3
• ANTH 385 - Gender, Class, and Ethnicity in Latin America Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• HIST 353 - History of Traditional China Credits: 3
• HIST 354 - Modern China Credits: 3
• HIST 356 - Modern Japan Credits: 3
• HIST 357 - Postwar Japan Credits: 3
• RELI 314 - Chinese Philosophies and Religious Traditions Credits: 3
• RELI 315 - The Buddhist Tradition Credits: 3
• RELI 337 - Mysticism: East and West Credits: 3

Note:

Special topics courses, study abroad courses, or internships, when relevant, may be used to fulfill this requirement with the prior written approval of the coordinator. Language courses in Chinese, Korean, or Japanese are strongly recommended.

Total: 18 credits

Film and Media Studies Minor

Banner Code: FILM

Phone: 703-993-2768
Web: fams.gmu.edu

Faculty

Christensen, Fuchs (director), Gibson, Landsberg, Lont, Ricouart, Roan, Sample, Scarlata, Winkler

The Film and Media Studies (FAMS) interdisciplinary minor explores mass culture in its visual manifestations and helps students develop an informed awareness of culture and media, ideological tendencies, and effects on daily experience. Committed to
interdisciplinarity, the program addresses the increasing complexity and multiplicity of visual cultures and offers students the tools with which to read a variety of texts, including film, television, video, and new media.

Most course work is offered through the Departments of Communication and English, with other courses available through the Department of Modern and Classical Languages and the Program in Film and Video Studies. The two required courses provide an introduction to the languages of film and popular media and modes of analysis appropriate to each. They are prerequisites for all advanced work in the minor. Students select four additional courses designed to introduce a more specialized level of study. Students may decide to focus on film, television, or the study of mass culture, or they may choose some mix of courses that suits their interests.

Communication majors must choose at least 6 credits outside of communication for their FAMS elective courses.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits distributed as follows:

Two required courses (6 credits):

- ENGL 332 - Introduction to Film Credits: 3
- COMM 380 - Media Criticism Credits: 3

Four electives (12 credits) chosen from:

- COMM 302 - Foundations of Mass Communication Credits: 3
- COMM 350 - Mass Communication and Public Policy Credits: 3
- COMM 355 - Video Principles and Practices Credits: 3
- COMM 358 - Video Producing and Directing Credits: 3
- COMM 360 - Video Editing Credits: 3
- COMM 365 - Women and Media Credits: 3
- COMM 366 - Visual Communication Credits: 3
- COMM 452 - Media Production Practicum Credits: 3
- COMM 456 - Comparative Mass Media Credits: 3
- ENGL 327 - Introduction to Cultural Studies Credits: 3
- ENGL 331 - Introduction to Documentary Credits: 3
- ENGL 334 - Literary Approaches to Popular Culture Credits: 3
- ENGL 338 - Cultural Constructions of Sexualities Credits: 3
- ENGL 421 - Topics in Film History Credits: 3
- ENGL 422 - Topics in Film Theory Credits: 3
- ENGL 490 - Special Topics in Film Credits: 3
- ENGL 493 - Special Topics in Popular Literature Credits: 3
- ENGL 499 - Independent Study Credits: 1-3
- FREN 470 - Topics in French Cinema Credits: 3
- JAPA 320 - Japanese Cinema Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3
Note:

ENGL 327, 334, 338, 493, and 499 require prior written approval of FAMS coordinator
ENGL 421, 422, and 490 may be repeated if topic is different
FREN 470 requires permission of instructor and approval of FAMS coordinator

Total: 18 credits

Folklore and Mythology Minor

Banner Code: FOLK
Phone: 703-993-1172
Web: folklore.gmu.edu

Faculty

Burns, Decaroli, ffolliott, Fuchs, Johnsen-Neshati, Mattusch (co-coordinator), Owens, Rutledge, Shiner, Shutika, Todd, Winkler, Yocom (co-coordinator)

Stories told in both sacred and secular contexts, along with festivals, foods, music, material objects, and other traditional art forms, continue to influence our lives. This interdisciplinary minor offers students tools to explore the compelling meanings within these seemingly simple, everyday cultural texts, and helps them become more aware of the ways these texts are used by individuals and institutions for various goals. Students study folklore and mythology by juxtaposing the multiple viewpoints of anthropology, art history, classical studies, literary studies, and religious studies.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits with a minimum GPA of 2.00. If one of these courses is used to fulfill the 3 credits of literature required for general education, it may not be used to fulfill a requirement for the minor.

One course (3 credits) chosen from:

- ARTH 102 - Symbols and Stories in Art Credits: 3
- CLAS 250 - Classical Mythology Credits: 3
- RELI 100 - The Human Religious Experience Credits: 3
- RELI 211 - Religions of the Near (Middle) East Credits: 3
- RELI 212 - Religions of the Orient Credits: 3
Four to five courses (12 to 15 credits) chosen from:

- ANTH 427 - Historic Cemetery Survey Credits: 4
- ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3
- ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
- ARTH 321 - Greek Art and Archaeology Credits: 3
- ARTH 322 - Roman Art and Archaeology Credits: 3
- ARTH 382 - Arts of India Credits: 3
- ARTH 383 - Arts of Southeast Asia Credits: 3
- ARTH 384 - Arts of China Credits: 3
- ARTH 385 - Arts of Japan Credits: 3
- CLAS 340 - Greek and Roman Epic Credits: 3
- CLAS 350 - Greek and Roman Tragedy Credits: 3
- ENGL 311 - Writing Ethnography Credits: 3
- ENGL 333 - Folklore of the Americas Credits: 3
- ENGL 337 - Special Topics in Myth and Literature Credits: 3
- ENGL 491 - Special Topics in Folklore Credits: 3
- ENGL 498 - Internship: Special Topics Credits: 1-3
- ENGL 591 - Special Topics in Folklore Credits: 3
- RELI 351 - Religions of the Ancient Near East Credits: 3
- RELI 401 - Death and the Afterlife in World Religions Credits: 3
- RELI 408 - Ritual and Drama in Global Religions Credits: 3

Independent study and internships (0 to 3 credits) chosen from:

- Summer field work schools offered by the American Folklife Center at the Library of Congress and other institutions approved by faculty
- ANTH 299 - Independent Study Credits: 1-3
- ANTH 495 - Internship Credits: 3-6
- ARTH 393 - Art History Internships Credits: 3-6
- ARTH 490 - Independent Study in Art History Credits: 3
- ARTH 491 - Independent Study in Art History Credits: 3
- ENGL 498 - Internship: Special Topics Credits: 1-3
- ENGL 499 - Independent Study Credits: 1-3

Total: 18 credits

Note:

To avoid duplication of courses, English majors who choose the folklore and mythology interdisciplinary minor may not select the English Department’s folklore, mythology, and literature concentration.
Global Systems Minor

Banner Code: GLOS

Phone: 703-993-1400

Faculty

Harbour (coordinator)

The minor consists of 18 credits of non-region-specific courses that deal with global connections or transactions. It is ideal for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. At least 9 credits must be at the 300 level or above.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of the catalog.

Course Work

Students pursuing this minor must complete 18 credits distributed as follows:

One required course (3 credits) chosen from:

- GLOA 101 - Introduction to Global Affairs Credits: 3
- GOVT 132 - Introduction to International Politics Credits: 3
- HIST 130 - History of the Modern Global System Credits: 3

Five elective courses (15 credits) chosen from at least two of the following fields:

Field A: Government, geography, and administration of justice:

- ADJ 405 - Law and Justice around the World Credits: 3
- GEOG 101 - Major World Regions Credits: 3
- GEOG 301 - Political Geography Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- GEOG 305 - Economic Geography Credits: 3
- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 349 - Issues in the Analysis of Global Systems Credits: 1-3
- GOVT 444 - Issues in International Studies Credits: 1-3
Field B: Economics, anthropology, marketing, history, and sociology

- ANTH 300 - Civilizations Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 331 - Refugees Credits: 3
- ANTH 333 - Humanitarian Action Credits: 3
- ANTH 375 - Anthropological Perspectives on History Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- ECON 380 - Economies in Transition Credits: 3
- ECON 390 - International Economics Credits: 3
- HIST 125 - Introduction to World History Credits: 3
- HIST 130 - History of the Modern Global System Credits: 3
- HIST 387 - Topics in Global History Credits: 3
- MKTG 407 - International Marketing Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3

Field C: Environmental science, global health, systems engineering, urban and suburban studies, civil and infrastructure engineering

- BIOL 307 - Ecology Credits: 4
- BIOL 377 - Applied Ecology Credits: 3
- CEIE 100 - Environmental Engineering around the World Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3
- CEIE 456 - Environmental Law Credits: 3
- GCH 543 - Global Health: Trends and Policies Credits: 3
- USST 301 - Urban Growth in a Shrinking World Credits: 3

Field D: Modes of communication

- COMM 305 - Foundations of Intercultural Communication Credits: 3
- COMM 456 - Comparative Mass Media Credits: 3
- COMM 656 - Global Communication Credits: 3
- DANC 118 - World Dance Credits: 3
- MUSI 103 - Musics of the World Credits: 3
- MUSI 431 - Music History in Society III Credits: 3
- THR 359 - World Stages Credits: 3

Total: 18 credits

Immigration Studies Minor
The minor in immigration studies combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must take 15 credits with a minimum GPA of 2.00, distributed as follows:

One required course (3 credits):

- ANTH 340 - Comparative Perspectives on Immigration Credits: 3

One course (3 credits) focused on ethnicity in the United States chosen from:

- SOCI 308 - Racial and Ethnic Relations Credits: 3
- HIST 418 - Ethnic Groups in America Credits: 3
- ENGL 375 - Ethnic American Literature Credits: 3
- ENGL 479 - Ethnicity and Immigration in Folklore Credits: 3

One course (3 credits) focused on global perspectives on migration and ethnicity chosen from:

- ANTH 331 - Refugees Credits: 3
- GOVT 445 - Human Rights Credits: 3
- CONF 302 - Identity Conflicts and their Resolution Credits: 3

Two elective courses (6 credits) chosen from:

- FRLN 385 - Multilingualism, Identity, and Power Credits: 3
- NCLC 361 - Neighborhood, Community, and Identity Credits: 3-15
- SOCI 332 - Sociology of Urban Communities Credits: 3
- SPAN 430 - Spanish in the United States Credits: 3
Islamic Studies Minor

Banner Code: ISLM

Phone: 703-993-1261

Faculty

Amireh, Bakhash, Butler, Dakake, DeCaroli, Hamdani (coordinator), Hilmi, Katz, Lukacs, Mandaville, Paden, Sheers

The minor in Islamic studies is designed for students interested in the societies, culture, history, and politics of the Islamic world. It is available to currently enrolled undergraduates.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor complete 21 credits, distributed as follows:

Three core courses (9 credits):

- GOVT 345 - Political Islam Credits: 3
- HIST 281 - Survey of Middle Eastern Civilization Credits: 3
- RELI 272 - Islamic Religious Life Credits: 3

Three elective courses (9 credits) chosen from:

- ANTH 309 - Peoples and Cultures of India Credits: 3
- ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- ARTH 382 - Arts of India Credits: 3
- FREN 453 - Francophone Literature from North Africa Credits: 3
- GEOG 325 - Geography of North Africa and the Middle East Credits: 3
- GEOG 330 - Geography of the Soviet Succession States Credits: 3
- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
- HIST 282 - Survey of Middle Eastern Civilization Credits: 3
- HIST 462 - Women in Islamic Society Credits: 3
- HIST 465 - The Middle East in the 20th Century Credits: 3
• RELI 374 - Islamic Thought Credits: 3
• RELI 375 - Qur'an and Hadith Credits: 3

Note:

Special topics courses, when relevant, may be used to fulfill elective credits for the minor with prior written approval of the coordinator.

Foreign language requirement (3 credits)

• One course in a foreign language of any country with a significant Muslim population. While Arabic may be used to fulfill this requirement, other languages can be substituted with prior approval of the coordinator. Students may have this requirement waived by demonstrating proficiency in a relevant foreign language as determined by the Department of Modern and Classical Languages. Students who waive this requirement must complete 3 additional elective credits. Courses in another language of the Islamic world can also be applied toward elective credits.

Total: 21 credits

Linguistics Minor

Banner Code: LING

Phone: 703-993-1188
Web: linguistics.gmu.edu

Faculty

Chamberlain, Goldin, Holisky, Jones, Leeman, Levine, McCarthy, Ramos-Pellicia, Roman-Mendoza, Weinberger (coordinator), Wulf

Linguistics is the scientific study of language. Language is studied descriptively, theoretically, computationally, and psychologically, and as a social phenomenon. The field of linguistics thus informs and is informed by many other areas of study, including philosophy, psychology, sociology, computer science, the study of individual languages and literatures, literary studies, and education.

The interdisciplinary minor in linguistics may be combined with a major in one of the areas listed above or in any other field. This minor introduces the fundamental concepts of modern linguistic theory and explores how these concepts relate to various other disciplines.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 15 credits, distributed as follows.
One course (3 credits) in general linguistics

One course (3 credits) from syntactic theory, phonological theory, or linguistic semantics

Three elective courses (9 credits)
  • Chosen in consultation with the linguistics director

Total: 15 credits

Middle East Studies Minor

Banner Code: MES

Phone: 703-993-2926
Web: mes.gmu.edu

Faculty

Amireh, Bakhash, Bryant, Butler, Gopin, Haddad (director), Hamdani, Hilmi, Katz, Lukacs, Mandaville, Massi-Dakake, Paczynska, Rouhana

Today, more than ever before, Middle East politics has become intertwined with American politics and the lives of many Americans. The minor in Middle East studies is designed to equip undergraduates with a firm multidisciplinary grounding in the region, its history, and its international relations. It is available for enrolled Mason students.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits, distributed as follows:

Three core courses (9 credits):
  • HIST 282 - Survey of Middle Eastern Civilization Credits: 3
  • GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
  • ENGL 349 - Global Voices Credits: 3
    or
  • ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western Credits: 3
Three elective courses (9 credits) chosen from:

- GOVT 345 - Political Islam Credits: 3
- HIST 281 - Survey of Middle Eastern Civilization Credits: 3
- HIST 462 - Women in Islamic Society Credits: 3
- HIST 460 - Modern Iran Credits: 3
- HIST 461 - Arab-Israeli Conflict Credits: 3
- HIST 465 - The Middle East in the 20th Century Credits: 3
- HIST 387 - Topics in Global History Credits: 3
- ANTH 399 - Issues in Anthropology Credits: 3
- RELI 211 - Religions of the Near (Middle) East Credits: 3
- RELI 272 - Islamic Religious Life Credits: 3
- RELI 374 - Islamic Thought Credits: 3
- RELI 375 - Qur'an and Hadith Credits: 3
- ARTH 319 - Art and Archaeology of the Ancient Near East Credits: 3
- ARTH 320 - Art of the Islamic World Credits: 3
- GEOG 325 - Geography of North Africa and the Middle East Credits: 3
- ARAB 325 - Major Arab Writers/Stories Credits: 3
- ARAB 330 - Reading and Conversation I Credits: 3
- ARAB 331 - Reading and Conversation II Credits: 3

Note:

Other courses, when relevant, may be used to fulfill this requirement with the prior written approval of the director of the program.

Only one of the following courses may count as an elective:

- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 447 - Revolution and International Politics Credits: 3
- CONF 399 - Special Topics in Conflict Analysis and Resolution Credits: 3
- CONF 340 - Global Conflict Analysis and Resolution Credits: 3

Note:

Only one elementary or intermediate language course may count as an elective (relevant languages: Arabic, Hebrew, Farsi, Turkish). Students are strongly encouraged to sign up for one of the study tour courses on the Middle East offered by the Study Abroad Program at the Center for Global Education. Destinations include Egypt, Israel, Palestine, Syria, Lebanon, Turkey, Yemen, Morocco, Jordan, and the United Arab Emirates.

Total: 18 credits
Multimedia Minor

Banner Code: MM

Phone: 703-993-4318

Faculty

Cambridge (co-coordinator), Chung, Forche, Higgins, Lont, Martin, O’Connor, L. Smith (co-coordinator), Weinberger, White

In the multimedia minor, students learn how to create original work and communicate with others through the fusion of images, text, sound, and video. Students analyze and incorporate into their productions contemporary design principles and current software applications. As part of this process, students are encouraged to focus on how multimedia technologies, which offer new tools for investigating and disseminating ideas, can enhance undergraduate research and writing. These skills, now important in most academic disciplines, are also increasingly valuable not only in the specialized information technology industries, but also in business, education, and politics.

This minor is not available to students majoring in AVT with a concentration in digital arts.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 to 20 credits.

Core courses (8-10 credits):

- AVT 104 - Studio Fundamentals I Credits: 4
- COMM 157 - Video Workshop Credits: 1
  or
- NCLC 195 - Field-Based Work Credits: 1-15 (1 credit) (Students may not enroll in COMM 157 if they have already completed COMM 355.)

and one course chosen from:

- AVT 180 - Computers in the Creative Arts Credits: 3
- CHSS 101 - Presenting and Processing Information Using Technology Credits: 1-3
- NCLC 249 - The Internet: Literacy, HTML Tools, and Virtual Community Credits: 3-15

Elective courses (8-10 credits)

No more than six credits can be taken in any one college or department.
Native American and Indigenous Studies Minor

Banner Code: NAIS

Phone: 703-993-1161

Faculty

Anderson (coordinator), Benitez, Bullard, Moore, Scully, Snead, Tichy, Yocom

Native American and indigenous studies is an interdisciplinary field of study committed to understanding both the unity and the diversity of present and past Native American tribes, cultures, and experiences. This interdisciplinary minor will help students think critically and respectfully about the complex dynamics of Native American cultures, considered both individually and comparatively. In addition to practicing and developing critical thinking and writing skills, students in this interdisciplinary minor will learn how value systems operate in different cultures, examine the roots of conflict and resolution across a broad historical and cultural spectrum, better understand the importance of language as a means of cultural expression, and heighten their appreciation of the unique status of present-day Native American tribes as nations with certain sovereign powers within the boundaries of the United States.

In addition to a required course that introduces key concepts, events, figures, and methodological approaches, students will take five 3-credit elective courses from no fewer than three departments. The course work for this minor will enable students to examine Native American cultures from a variety of disciplinary perspectives, including those that are anthropological, historical, artistic, philosophical, and political.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.
Course Work

Students pursuing this minor must complete 18 credits distributed as follows:

One required course (3 credits):

- NAIS 201 - Introduction to Native American and Indigenous Studies Credits: 3

Five elective courses (15 credits), chosen from:

- ANTH 301 - Native North Americans Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 307 - Ancient Mesoamerica Credits: 3
- ANTH 399 - Issues in Anthropology Credits: 3
- ANTH 428 - Patterns in Prehistory Credits: 3
- ENGL 311 - Writing Ethnography Credits: 3
- ENGL 333 - Folklore of the Americas Credits: 3
- HIST 340 - History of American Racial Thought Credits: 3
- HIST 391 - History of Virginia to 1800 Credits: 3
- HIST 401 - Colonial America Credits: 3
- HIST 403 - Revolutionary Era in American History, 1763-1812 Credits: 3
- HIST 404 - Jacksonian America, 1812-1854 Credits: 3
- HIST 418 - Ethnic Groups in America Credits: 3
- MUSI 103 - Musics of the World Credits: 3
- SOCI 308 - Racial and Ethnic Relations Credits: 3

Notes:

Special topics courses and summer field work offerings, when relevant, may be used to fulfill elective credits for the minor with prior approval of the coordinator.

No more than two courses from a single department can be applied to the minor. No more than 3 credits can be applied to both university general education requirements and the minor. A minimum GPA of 2.00 is required for course work in this minor.

Total: 18 credits

New Europe Minor

Banner Code: NEU

Phone: 703-993-4973

Coordinator
This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete a minimum of 18 credits. Where relevant to the minor, special topics courses, seminars, independent study, internships, and study abroad may also be taken for elective credit, with prior approval by the coordinator.

One required course (3 credits) chosen from:

- GOVT 334 - Government and Politics of Europe Credits: 3
- GOVT 444 - Issues in International Studies Credits: 1-3 (With prior approval of the coordinator)

Five elective courses (15 credits), at least one from each field:

Field A: History, geography, and politics

- GEOG 320 - Geography of Europe Credits: 3
- GOVT 334 - Government and Politics of Europe Credits: 3 (if not taken as the required course)
- GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
- GOVT 338 - Government and Politics of Russia Credits: 3
- HIST 314 - History of Germany Credits: 3
- HIST 322 - Modern Britain Credits: 3
- HIST 329 - Modern Russia and the Soviet Union Credits: 3
- RUSS 354 - Contemporary Post-Soviet Life Credits: 3

Field B: Language, literature, and the arts

- ARTH 362 - Twentieth-Century European Art Credits: 3
- FREN 441 - Twentieth-Century Prose Fiction Credits: 3
- FREN 442 - Twentieth-Century Drama and Poetry Credits: 3
- FREN 470 - Topics in French Cinema Credits: 3
- FREN 580 - Contemporary French Society and Culture Credits: 3
- GERM 451 - Modern Literature: 1925 to the Present Credits: 3
- PHIL 336 - Twentieth-Century Continental Thought: Existentialism Credits: 3
- SPAN 484 - The Literature of Spain II Credits: 3
- SPAN 580 - Contemporary Hispanic Institutions Credits: 3

Total: 18 credits
Political Philosophy Minor

Banner Code: PPHL

Phone: 703-993-1265

Faculty

Bergoffen, Cherubin, De Nys, Feit, Harbour, Mandaville, Miller, Paden (coordinator), Snyder-Hall

The minor provides intensive study in the area of political philosophy and political theory and includes courses that focus on the history of political philosophy; the moral evaluation of political institutions; the ethical, social, and political issues raised by globalization; and the conceptual foundations of democracy and human rights. The minor provides the opportunity for students to study this field from a variety of interdisciplinary perspectives; develops a deeper philosophical perspective on political institutions; and lays the foundation for further graduate study in philosophy, government, or policy studies.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 15 credits distributed as follows:

Two core courses (6 credits) chosen from:

- PHIL 323 - Classical Western Political Theory Credits: 3
- GOVT 323 - Classical Western Political Theory Credits: 3
- PHIL 324 - Modern Western Political Theory Credits: 3
- GOVT 324 - Modern Western Political Theory Credits: 3
- PHIL 327 - Contemporary Western Political Theory Credits: 3
- GOVT 327 - Contemporary Western Political Theory Credits: 3

Three elective courses (9 credits) chosen from:

- PHIL 323 - Classical Western Political Theory Credits: 3
- GOVT 323 - Classical Western Political Theory Credits: 3
- PHIL 324 - Modern Western Political Theory Credits: 3
- GOVT 324 - Modern Western Political Theory Credits: 3
• GOVT 324 - Modern Western Political Theory Credits: 3
• PHIL 327 - Contemporary Western Political Theory Credits: 3
  or
• GOVT 327 - Contemporary Western Political Theory Credits: 3 (if not used to fulfill the core requirement)
• PHIL 427 - Feminist Political Thought Credits: 3
  or
• GOVT 427 - Feminist Political Thought Credits: 3
• PHIL 325 - Karl Marx's Social and Political Thought Credits: 3
• PHIL 429 - International Ethics Credits: 3
• GOVT 328 - Non-Western Political Theory Credits: 3
• GOVT 329 - Issues in Political Theories and Values Credits: 1-3
• GOVT 420 - American Political Thought Credits: 3
• GOVT 421 - Contemporary Political Ideologies Credits: 3
• GOVT 428 - Advanced Democratic Theory Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3

Note:

Special topics courses and independent studies courses, when relevant, may be used to fulfill elective credits with prior approval of the coordinator.

Total: 15 credits

Science and Society Minor

Banner Code: SCSO

Phone: 703-993-9621

Faculty

Bitler, Dunne (director), Fox, Jacobsen, Kinnaman, McAuley, Rutledge, Rowan, Smith, Thompson

Through the course work in this minor students explore the effect of science in their daily lives and develop an understanding of the multiple ways that science is integrated into different, nonscience disciplines. As a prerequisite to the minor, students should have completed their general education science requirement of 7 to 8 credits. In coordination with their minor advisor and through CHSS 200, students develop a core of five courses that revolves around a specific theme through which they connect science and society more closely. Possible themes include the environment, ethics, ethnography, faith, healing, justice and the law, media, and medicine, among others. The program of study must include one foundation course in the related field of study.

In addition to completing 15 credits of core courses, students start with CHSS 200 Introduction to Science and Society, which provides them with a broad overview of related topics and helps them to develop their individualized core of courses, and end
with a capstone CHSS 400 Perspectives on Science and Society, in which they demonstrate what they have learned through their
course of study.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete a minimum of 18 credits distributed as follows:

Two required courses:

- CHSS 200 - Introduction to Science and Society Credits: 2
- CHSS 400 - Perspectives on Science and Society Credits: 1

Individualized core (15 credits)

Sample Individualized Cores

Science, Society, and Ethnography

- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3 (foundation course)
- ANTH 365 - Race and Racism Credits: 3
- ENGL 311 - Writing Ethnography Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- HIST 418 - Ethnic Groups in America Credits: 3

Science, Society, and Faith

- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3 (foundation course)
- ANTH 496 - On Evolution Credits: 4
- PHIL 377 - Darwin: Biology and Beyond Credits: 3
- PHIL 378 - Reason, Science and Faith in the Modern Age Credits: 3
- RELI 100 - The Human Religious Experience Credits: 3 (foundation course)

Science, Society, and Humankind

- ANTH 120 - Introduction to Archaeology Credits: 3 (foundation course)
- BIOL 313 - Human Genetics for the Social Sciences Credits: 3
- ENGL 492 - Science Fiction Credits: 3
- PHIL 111 - Individual and Society Credits: 3
Science, Society, and the Environment

- ECON 335 - Environmental Economics Credits: 3
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4 (foundation course)
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- PHIL 343 - Issues in Environmental Ethics Credits: 3

Note:

Only 9 lower-level credits can be applied to the minor (7 within the core and the 2-credit CHSS 200), and no more than 3 credits can be applied to both university general education requirements and the minor. No more than two courses from a single department can be applied to the minor. A minimum GPA of 2.00 is required for course work in this minor.

Total: 18 credits

Urban and Suburban Studies Minor

Banner Code: USSD

Phone: 703-993-1418

Faculty

Clapsaddle, Clark, Dumont, Gifford, Hackler (coordinator), Haynes, Horton, Hysom, Mattusch, Samara, Schintler, Schrag, Sockett, Stough, Todd, Travis, Verheyen, Wong

The program offers all course work designated USST in the Courses chapter of this catalog.

This program of study is an interdisciplinary minor offered by the College of Humanities and Social Sciences.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete a minimum of 18 credits, distributed as follows:

Three core courses (9 credits):

- USST 301 - Urban Growth in a Shrinking World Credits: 3
- USST 390 - Special Topics in Urban and Suburban Studies Credits: 3
- USST 401 - Seminar: The Future of Metropolitan America Credits: 3

Three elective courses (9 credits)
- Chosen from a list of approved electives, which must be selected from more than one of the following categories: environment and culture, government and policy, and economy. Consult the coordinator for a list of approved courses in each category.

Total: 18 credits

■ Interdisciplinary Studies

Phone: 703-993-8762
Web: mais.gmu.edu

Executive Committee

Addleson, Burns, Hodzic, Kidd, Lont, Martin, O'Connor, Rodgers, Salmon, Shutika, Simmons, Snyder-Hall (director), Sorrell, Wood, Vitazkova, Yocom

Course Work

This program offers the courses designated MAIS in the Courses chapter of this catalog. However, students in the Master of Arts in Interdisciplinary Studies (MAIS) degree take most of their courses in the disciplines that they integrate as part of their degree program.

Graduate Programs

The master's degree program in interdisciplinary studies (MAIS) is designed for students who seek a degree that integrates knowledge from several disciplines. It addresses a rapidly evolving demand for for specialized and individualized graduate study. Students choose one of eight structured concentrations or devise an individualized program of study when traditional degree programs do not meet their evolving careers or life goals.

The degree requires course work from a home department and selected courses from other disciplines. Student complete their degrees with a project or thesis.

Concentrations

Students pursuing a master's degree program in interdisciplinary studies can choose a concentration in community college teaching or higher education, both sponsored by the Higher Education Program. They can do a concentration in folklore, sponsored by the faculty in English or one in religion, culture, and values, sponsored by Religious Studies. The video-based production concentration is sponsored by the Communication Department, while the concentration in women and gender studies is sponsored by the Women and Gender Studies Program and that in Zoo and Aquarium Leadership, by New Century College.

For a variety of reasons, traditional graduate programs are not able to meet the specific educational goals of some students. They can choose the individualized concentration. With the help of a faculty advisor, they design an individualized program of study that includes courses from several academic disciplines.

Master's Degree
Interdisciplinary Studies, MAIS

Banner Code: LA-MAIS-ISIN

This program is for students who seek a master’s degree that integrates knowledge from several disciplines. It addresses the rapidly evolving demand for unique graduate study by promoting advanced scholarship that transcends traditional disciplinary boundaries.

MAIS offers the following structured interdisciplinary concentrations:

- Community college teaching (in communication, English, information systems, math, Spanish, or TESL)
- Folklore
- Global interaction
- Higher education (administration or student affairs)
- Religion, culture, and values
- Video-based production
- Women and gender studies
- Zoo and aquarium leadership

The MAIS also offers students the opportunity to design an individualized concentration to meet the special needs of their careers.

This program of study is offered by the Interdisciplinary Studies Program.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Students must show a capacity for original thought in cross disciplinary research. Applicants must meet Mason admission standards and application requirements for graduate study. See the Admission chapter of this catalog. Additional requirements vary by concentration. Students will be admitted only if the program can assign a faculty advisor appropriate for the intended course of study.

Degree Requirements

Students pursuing this degree must successfully complete 36 credits of graduate course work in one of the following concentrations. Students must submit a curriculum contract that has been approved by their faculty adviser and the MAIS director.

Courses applied to the MAIS degree are subject to these restrictions: a maximum of 6 credits may be earned through independent study or directed readings and research courses; a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area; a maximum of 15 credits may be transfer credits; a maximum of 6 of the transfer credits may be from other accredited institutions (12 for students in the zoo and aquarium leadership concentration).

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason nondegree status) or credits taken at another institution after admission to the MAIS Program (which requires prior written approval of the MAIS program and the dean).

All students complete their work in the program with a project or thesis. Students admitted under this catalog are required to take MAIS 797 Proposal (1 credit) and either MAIS 798 Project (2–5 credits) or MAIS 799 Thesis (5 credits).
MAIS Concentration in Community College Teaching (CCT)

This concentration qualifies students to teach entry-level courses in rapidly growing fields at in community colleges. In addition, it is an appropriate graduate credential for some faculty currently teaching in community colleges.

Students pursuing this concentration must complete 36 credits of course work: 12 credits of courses in college teaching and 21 credits of graduate work in one of the following knowledge areas: communication, English, information systems, mathematics, Spanish, or teaching English as a second language (TESL). Students complete this concentration with a project.

Four required courses (12 credits) in college teaching:

- CTCH 601 - The Community College Credits: 3
- CTCH 602 - College Teaching Credits: 3
- CTCH 603 - Technology in Higher Education Credits: 3
- CTCH 685 - Practicum Credits: 3

Seven required courses (21 credits) in a knowledge area:

Communication

Four core courses (12 credits):

- COMM 602 - Theories and Research of Mass Communication Credits: 3
  or
- COMM 634 - Theories of Interpersonal Communication Credits: 3
- COMM 605 - Intercultural Communication Credits: 3
  or
- COMM 635 - Organizational Communication Credits: 3
- COMM 650 - Research Methodologies in Communication Credits: 3
- COMM 653 - Graduate Communication: Research and Teaching Credits: 3

Three elective courses (9 credits):

Electives are chosen from graduate-level communication courses in consultation with a faculty advisor. They may include core courses listed above not that are not use to meet 12 credit requirement.

English
Two to three core courses (6-9 credits):

- ENGL 701 - Research in English Studies Credits: 3
- ENGL 610 - Proseminar in Teaching the Reading of Literature Credits: 3
  and/or
- ENGL 615 - Proseminar in Composition Instruction Credits: 3

Four to five elective courses (12-15 credits):

Electives are chosen from graduate-level English courses in consultation with a faculty advisor.

Information Systems

Three core courses (9 credits):

- INFS 515 - Computer Organization Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3

Four elective courses (12 credits):

Electives must be graduate-level INFS or INFS-related courses chosen in consultation with a faculty advisor.

Mathematics

Two core courses (6 credits):

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis I Credits: 3

Five elective courses (15 credits):

Electives are from graduate-level courses in mathematics and related disciplines (including statistics) chosen in consultation with a faculty advisor.

Spanish
Three core courses (9 credits):

- SPAN 502 - Hispanic Sociolinguistics Credits: 3
- SPAN 505 - Applied Spanish Stylistics Credits: 3
- SPAN 510 - Introduction to the Graduate Study of Literature in Spanish Credits: 3

Four elective courses (12 credits):

At least three electives (9 credits) must be graduate-level SPAN courses, one (3 credits) may be a graduate-level FRLN courses. Electives should be chosen in consultation with a faculty advisor.

Teaching English as a Second Language

Six core courses (18 credits):

- LING 520 - Descriptive Linguistics Credits: 3
- LING 521 - Applied Linguistics: Teaching English as a Second Language Credits: 3
  or
- LING 507 - Field Work in Applied Linguistics Credits: 3
- LING 522 - Modern English Grammar Credits: 3
- LING 523 - Descriptive Aspects of English Phonetics and Phonology Credits: 3
- LING 525 - Practicum in ESL Credits: 3
- LING 582 - Second Language Acquisition Credits: 3

One elective course (3 credits):

Elective should be from graduate-level courses in linguistics or a related area chosen in consultation with a faculty advisor.

Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 credits):

- MAIS 798 - Individualized Studies Project Credits: 1-5
MAIS Concentration in Folklore (FLK)

This concentration explores the processes of tradition that move through multiple expressive forms, such as folktales, folk beliefs, folk medicine, folk art, folksong, and literature. A discipline based on ethnographic fieldwork, folklore offers students a chance to work in communities and collect living traditional materials that are critical to human identity and values.

Interdisciplinary by nature, folklore thrives on local particularities and compelling global connections. This course of study prepares students for careers in cultural agencies, governmental organizations, and teaching institutions, and advanced study in the humanities.

Students choose a specialization that draws on unique programs throughout Mason, such as museum studies, conflict resolution, nonprofit management, telecommunications, and writing. Internships in the many Washington, D.C., metropolitan area folklore organizations are central to students’ experiences.

Students pursuing this concentration must successfully complete 36 credits of graduate course work with at least 6 credits taken in courses from outside the English Department.

Six core courses (18 credits):

Special topics in folklore (9 credits)

Courses may be repeated.

- ENGL 591 - Special Topics in Folklore Credits: 3
- ENGL 798 - Directed Reading and Research Credits: 1-3

Pathways in folklore scholarship (3 credits) chosen from:

- ENGL 591 - Special Topics in Folklore Credits: 3
- ENGL 798 - Directed Reading and Research Credits: 1-3

Internship in folklore (3 credits)

- ENGL 604 - Internship in Folklore Credits: 1-6

Research methodology course (3 credits) chosen from:

- ENGL 701 - Research in English Studies Credits: 3
- HIST 610 - The Study and Writing of History Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3
Specialization (9 credits):

Students choose an area of specialization which must be approved by a faculty advisor. Specialization topics include public folklore (museums, archives, arts and humanities councils, and nonprofit organizations); folklore (ethnicity and immigration); folklore and literature; folklore and the teaching of writing and literature; folklore and history; and folklore and conflict resolution. Students also can opt for open specialization, with courses chosen in consultation with advisor. Possibilities include folklore and editing, applied storytelling, folklore and mythology, folklore and art history, folklore and gender studies, and folklore and communication.

One to two elective courses (3 to 6 credits):

Electives require the prior written approval of a faculty advisor.

Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 credits) or thesis (5 credits):

- MAIS 798 - Individualized Studies Project Credits: 1-5
  or
- MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Concentration in Global Interaction (GLOI)

This concentration in global interaction is not available on the Northern Virginia campuses. It is aimed at international students who wish to develop professional skills for functioning in English-language international settings, whether of business, government, education, or civil society. The curriculum provides a range of skills in such crucial areas as organizational structures, economic development, legal instruments, and multicultural communications. It does so with an emphasis on the language and topical skills that are basic to work and life in the global English-speaking community, which spans North America, Europe, Asia, and Africa. The program is explicitly interdisciplinary and multicultural, with an emphasis on course work and thesis development that will help position graduates in this broader global community.

Students pursuing this concentration must complete 36 credits.

Four core courses (12 credits):

- SOAN 500 - Communicating across the Disciplines Credits: 3
- GOVT 841 - Ethics and Human Rights in International Affairs Credits: 3
- PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3
- SOCI 804 - Sociology of Globalization Credits: 3
Three courses (9 credits) of specialization chosen from:

- ANTH 635 - Regional Ethnography Credits: 3
- ECON 676 - Comparative Economic Systems Credits: 3
- GEOG 525 - Economics of Human/Environment Interactions Credits: 3
- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- GOVT 833 - European Union and Political Integration Credits: 3
- HAP 609 - Comparative International Health Systems Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 1-3
- SOAN 510 - Culture and Globalization Credits: 3
- SOCI 633 - Special Topics in Sociology Credits: 3

Three elective courses (9 credits) chosen from:

- ANTH 617 - Political Economy Credits: 3
- ANTH 630 - Anthropology and Humanitarian Action Credits: 3
- ANTH 632 - International Migration in Comparative Perspective Credits: 3
- ANTH 640 - Applied Anthropology Credits: 3
- ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives Credits: 3
- CONF 720 - Ethnic and Cultural Factors in Conflict Resolution Credits: 3
- CONF 728 - Human Rights Theory and Practice in Comparative Perspective Credits: 3
- ECON 825 - Political Economy and Public Policy I Credits: 3
- ECON 842 - Labor Economics Credits: 3
- EDLE 610 - Leading Schools and Communities Credits: 3
- EDLE 614 - Managing Financial and Human Resources Credits: 3
- GEOG 533 - Issues in Regional Geography Credits: 1-6
- GEOG 553 - Geographic Information Systems Credits: 3
- GCH 543 - Global Health: Trends and Policies Credits: 3
- GOVT 540 - International Relations Credits: 3
- GOVT 725 - Democratic Theory and Democratization Credits: 3
- HAP 542 - Health Policy Credits: 3
- HAP 621 - Management of Health Service Organizations Credits: 3
- ITRN 603 - International Trade Relations Credits: 3
- JLCP 702 - Comparative Justice Credits: 3
- JLCP 760 - Crime and Crime Policy Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 643 - Public Policy Research Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
- PUBP 602 - Regional Economic Development: Strategies and Applications Credits: 3
- RELI 633 - Ethical Perspectives of World Religions Credits: 3
- SOAN 670 - Special Topics in Sociology and Anthropology Credits: 4-8
- SOCI 635 - Environment and Society Credits: 3
- SOCI 651 - Health Care Systems Credits: 3
Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Thesis (5 credits):

- MAIS 799 - Individualized Studies Thesis Credits: 1-5

Note:

Courses listed under specialization may also serve as electives subject to advisor approval.

▲ MAIS Concentration in Higher Education (HEDU)

This concentration prepares individuals for administrative and leadership positions in colleges and universities, associations, and government agencies whose activities affect higher education. Within the concentration, students may choose to emphasize administration or student affairs.

Students pursuing this concentration must complete 36 credits.

Four core courses (12 credits):

- Three courses (9 credits) chosen in consultation with advisor

One course (3 credits) chosen from:

- CTCH 621 - Higher Education in the United States Credits: 3
- CTCH 601 - The Community College Credits: 3

One course (3 credits) of research methodology

One course (3 credits) of specialization:

- CTCH 622 - Organization and Administration in Higher Education Credits: 3
  or
- CTCH 644 - Student Services in Higher Education Credits: 3
Three elective courses (9 credits) chosen in consultation with advisor

Practicum (3 credits):

- CTCH 685 - Practicum Credits: 3

Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project or thesis (5 credits):

- MAIS 798 - Individualized Studies Project Credits: 1-5
  or
- MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Individualized Concentration (IND)

This concentration is for students who wish to design a graduate program to meet the special needs of their careers and life plans. Students usually choose this option because traditional graduate programs do not meet their specific goals. Students, with help from faculty advisors, design unique programs of study that include courses from several academic departments.

Students have access to most graduate courses offered by Mason but must meet all course prerequisites. Each student must submit a curriculum contract approved by the student advisor and MAIS director during the first semester enrolled. Any subsequent amendments must have approval of the student advisor and the MAIS director.

Students pursuing this concentration must successfully complete 36 graduate credits.

Disciplinary focus (12 to 18 credits):

Students must complete minimum of 12 and a maximum of 18 credits in one discipline.

Complementary disciplines (9 to 18 credits):

Students take 9-18 courses in complementary disciplines. These require the approval of faculty advisor and MAIS director.

Research methods (3 credits):

Students take a research methods course approved by faculty advisor and MAIS director.
Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 credits) or thesis (5 credits):

- MAIS 798 - Individualized Studies Project Credits: 1-5
  or
- MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Concentration in Religion, Culture, and Values (RCV)

This concentration is particularly applicable to, but not restricted to, students who are interested in careers in law, national and international government, print and media journalism, library sciences, archives and museums, public and social service, teaching, advanced graduate studies, and religious communities and institutions. The Washington, D.C., metropolitan area is rich in the presence of many major religious traditions and their places of worship.

Students pursuing this concentration must complete a minimum of 36 credits.

Two core courses (6 credits) chosen from:

- RELI 630 - Approaches to the Study of Religion Credits: 3
- RELI 631 - Sacred as Secular in Modern Spirituality Credits: 3
- RELI 632 - World Religions in Conflict and Dialogue Credits: 3
- RELI 635 - World Religions in Transition and Transformation Credits: 3

Two or three courses (6 to 9 credits) in religious studies chosen from:

- RELI 591 - Special Topics in Religious Studies Credits: 3 (may be repeated for credit)
- RELI 633 - Ethical Perspectives of World Religions Credits: 3
- RELI 636 - Religion and the Natural Environment Credits: 3
- RELI 641 - Drama in the World's Religions Credits: 3
- RELI 642 - Sacred Language, Scripture, and Culture Credits: 3

One course in research methodology (3 credits) chosen from:

- HIST 610 - The Study and Writing of History Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3

Two or three courses in a specialization (6 to 9 credits):
Specialization in religion, culture, and communication:

- COMM 605 - Intercultural Communication Credits: 3
- COMM 656 - Global Communication Credits: 3

Specialization in religious traditions and conflict analysis and resolution:

- CONF 695 - Selected Topics Credits: 3 (if appropriate)
- CONF 702 - Peace Studies Credits: 3
- CONF 722 - Conflict and Religion Credits: 3

Specialization in religion, culture, and ethics:

- RELI 633 - Ethical Perspectives of World Religions Credits: 3
- PHIL 640 - History of Ethical Theory Credits: 3
- PHIL 643 - Environmental Ethics Credits: 3

Specialization in religion, values, and international politics:

- GOVT 540 - International Relations Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3 (if appropriate)

One to four elective courses (3 to 12 credits):

Electives are chosen in consultation with the student’s advisor, bearing in mind the student’s specialization, project, or thesis topic. Any of the courses listed under the specializations listed above or courses from other disciplines listed below may be used as an elective.

- ANTH 535 - Anthropology and the Human Condition: Seminar I Credits: 3
- ANTH 615 - Ritual and Power in Social Life Credits: 3
- ANTH 684 - Independent Study in Sociocultural Anthropology Credits: 1-6
- COMM 605 - Intercultural Communication Credits: 3
- COMM 656 - Global Communication Credits: 3
- CONF 695 - Selected Topics Credits: 3
- CONF 702 - Peace Studies Credits: 3
- CONF 722 - Conflict and Religion Credits: 3
- EDUC 537 - Foundations of Multicultural Education Credits: 3
- ENGL 591 - Special Topics in Folklore Credits: 3
- GOVT 540 - International Relations Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- HIST 510 - Approaches to Modern World History Credits: 3
- PHIL 604 - Augustine and Aquinas Credits: 3
• PHIL 617 - Movements and Issues in the History of Political Philosophy Credits: 3
• PHIL 640 - History of Ethical Theory Credits: 3
• PHIL 643 - Environmental Ethics Credits: 3
• SOCI 611 - Classical Sociological Theory Credits: 3
• SOCI 612 - Contemporary Sociological Theory Credits: 3
• SOCI 614 - Sociology of Culture Credits: 3
• WMST 640 - Women and Global Issues Credits: 3

Proposal (1 credit):

• MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 credits) or thesis (5 credits):

• MAIS 798 - Individualized Studies Project Credits: 1-5
  or
• MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Concentration in Video-Based Production (VBP)

The concentration emphasizes video production and its components including videoconferencing, multimedia, and editing. As low-end, high-quality video equipment becomes more affordable, more organizations (for profit and nonprofit) are investing in in-house production studios and staff. Their needs include traditional videography, videoconferencing, web design, multimedia, and linear editing.

Four academic units offer courses relevant to the concentration: Within the College of Humanities and Social Sciences, the Communication Department offers courses in the theory and practice of video production, and the English Department offers a course in film theory. College of Education and Human Development offers courses in interactive and distance learning, which provide a background for pedagogy and a wide spectrum of interactive skills. Within the College of Visual and Performing Arts, the Art and Visual Technologies Department offers courses on computer-mediated visual applications, including the study of multimedia tools and design, digital and electronic art, animation, and virtual reality.

Students must have a basic knowledge of video production. Students with little or no video experience must take COMM 590 Seminar in Video Production within the first 9 credits of the program. Students with video experience who wish to waive this requirement must provide a videotape of their past work.

Students pursuing this concentration must complete graduate 36 credits.

One required introductory course (3 credits):

This requirement may be waived by the director for students with a video production background. They take an additional 3 credits of electives.

• COMM 590 - Seminar in Communication Credits: 3
  When the topic is video production.
Five required core courses (15 credits):

- THR 599 - Independent Study Credits: 1-6
  When the topic is scriptwriting.
  or
- EDIT 704 - Instructional Technology Foundations and Theories of Learning Credits: 3
- COMM 655 - Theories of Visual Communication in Telecommunications Credits: 3
  or
- ENGL 670 - Visual Culture: Theories and Histories Credits: 3
- COMM 697 - Independent Production Credits: 1-3
  Students need 3 credits.
- EDIT 611 - Innovations in Distance Learning Credits: 3
  or
- EDIT 750 - Emerging Educational Technologies Credits: 3
- COMM 694 - Communication Internship Credits: 3-6
  Students need 3 credits.

Three to five elective courses (9 to 15 credits):

The number of elective credits will vary depending on whether required introductory course is waived and whether the student chooses to do a 2-credit project or a 5-credit thesis.

- AVT 676 - Sound and Music for Video and Animation Credits: 5
- COMM 554 - Telecommunications Policy and Regulation Credits: 3
- COMM 590 - Seminar in Communication Credits: 3
- COMM 602 - Theories and Research of Mass Communication Credits: 3
- COMM 621 - Media Advocacy for Nonprofit Organizations Credits: 3
- COMM 636 - Communication Consulting Credits: 3
- COMM 656 - Global Communication Credits: 3
  or
- COMM 696 - Directed Readings and Research Credits: 1-3
- EDIT 571 - Tools for Visual/Graphic Design Credits: 1-3
- EDIT 572 - Tools for Digital Video and Audio Credits: 1-3
- EDIT 575 - Authoring Tools Credits: 1-3
- EDIT 771 - Introduction to Multimedia/Hypermedia Credits: 1-3
- EDIT 772 - Web-Based Instructional Tools Credits: 1-3
- HIST 697 - Creating History in New Media Credits: 3

Proposal (1 credit):
MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 - 5 credits) or thesis (5 credits):

- MAIS 798 - Individualized Studies Project Credits: 1-5
  or
- MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Concentration in Women and Gender Studies (WGST)

This concentration is for students who wish to explore gender and women’s issues from a variety of disciplinary perspectives. The program combines graduate courses in women and gender studies with courses in a discipline of interest, such as history, literature, sociology, communication, health, education, or public policy. Expertise in the study of gender is increasingly applicable in a variety of professional and academic settings.

Students pursuing this concentration complete 36 credits.

Two core courses (6 credits):

- WMST 630 - Feminist Theories across the Disciplines Credits: 3
- WMST 640 - Women and Global Issues Credits: 3

Disciplinary focus (12 credits)

Students complete 12 credits in one discipline chosen in consultation with a faculty advisor, including 3 credits in a course cross-listed with WMST.

Elective courses (9 to 12 credits)

- Must take at least 6 credits in courses cross-listed with WMST that are not part of the disciplinary focus

Research methods (3 credits)

- Selected in consultation with advisor

Proposal (1 credit):

- MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2 credits) or thesis (5 credits):
• MAIS 798 - Individualized Studies Project Credits: 1-5  
  or  
• MAIS 799 - Individualized Studies Thesis Credits: 1-5

▲ MAIS Concentration in Zoo and Aquarium Leadership (ZAL)

This program prepares students for advanced careers in modern professional zoos and aquariums. The curriculum is designed to enhance relevant social and analytical skills involving critical thinking, problem solving, information technology, and group interaction, as well as advance necessary skills in leadership and fiscal and personnel management.

Applicants to this program must be members of the Association of Zoos and Aquariums (aza.org).

Students pursuing this concentration must successfully complete 36 graduate credits.

Four core courses (12 credits):

• PUAD 505 - Introduction to Management of Nonprofits Credits: 1-3  
• NCLC 510 - Institutional Records Keeping Credits: 3  
• NCLC 511 - Career Development Credits: 3  
• NCLC 520 - Conservation Education Credits: 3

Three cognate courses (9 credits):

The cognate courses are chosen in consultation with a faculty advisor and require the prior written approval of the director of the ZAL program.

Elective courses (9 to 12 credits)

• Approved by advisory committee and selected in consultation with faculty advisor

Proposal (1 credit):

Students must complete a minimum of 24 credits before enrolling in proposal.

• MAIS 797 - Interdisciplinary Studies Proposal Credits: 1

Project (2-5 credits) or thesis (5 credits):

• MAIS 798 - Individualized Studies Project Credits: 1-5  
  or  
• MAIS 799 - Individualized Studies Thesis Credits: 1-5
Note:

Admitted students who wish to take a course at another accredited institution and apply the credit to this concentration must receive prior approval from the ZAL program director, the MAIS program director, and the dean.

Latin American Studies

Phone: 703-993-1010
Web: las.gmu.edu

Faculty

Berroa (Modern and Classical Languages), Bristol (History and Art History), Burt (Public and International Affairs), Greet (History and Art History), Karush (History and Art History, director), Leeman (Modern and Classical Languages), Lepore (Dance), Meyer (Economics), Rabin (Modern and Classical Languages), Ramos-Pellicia (Modern and Classical Languages), Seligmann (Sociology and Anthropology), Shutika (English), Vivancos-Pérez (Modern and Classical Languages), Yocom (English)

Course Work

The Latin American Studies Program offers courses designated LAS in the Courses chapter of this catalog. As an interdisciplinary program, Latin American Studies offers many other courses across a range of departments that do not bear the LAS code. For the major and minor, students should consult with the director to determine whether a particular course may be used to fulfill a Latin American studies requirement or elective.

Undergraduate Programs

The bachelor's degree in Latin American studies presents students with the opportunity to study one of the world’s most diverse and fascinating regions. Contemporary Latin America is the product of a long and turbulent history of conquest, resistance, and cultural mixing. The result is a rich and unique amalgam of African, indigenous, and European cultures. Understanding these complex societies has never been more crucial than it is today since people of Latin American descent represent more than 13% of the population of the United States. Knowledge of Latin American history, culture, society, and politics is indispensable for anyone who seeks to understand the contemporary United States and its place in the world.

Majors in Latin American studies develop a broad expertise in the region while pursuing an individualized program of study that suits their own particular interests. Student improve their language skills and take courses in many disciplines including anthropology, dance, economics, folklore, geography, government, history, and literature. The course work cumulates in a seminar where students develop a research project under the mentorship of a faculty expert.

Honors in the Major

Latin American Studies majors who have completed 75 credits (a minimum of 15 in Latin American Studies, 6 of which must have been taken at Mason) with at least a 3.50 overall GPA and at least a 3.50 GPA within the major may apply to pursue advanced work leading to graduation with honors in the major. The application consists of a transcript, a recommendation from one member of the LAS faculty, and a brief description of a proposed research project.
Once accepted into the program, students then complete a two-course sequence – LAS 491 and LAS 492 – which must be taken in successive semesters. In this sequence, students complete an advanced research project under the guidance of an faculty member. To graduate with honors in the major, students must earn at least a 3.5 in these two courses. Students who complete LAS 491 and LAS 492 do take LAS 499, the regular capstone class in the major.

**Undergraduate Degree**

**Latin American Studies, BA**

*Banner Code: LA-BA-LAS*

This program of study is offered by the Latin American Studies Program.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

**Degree Requirements**

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 31 credits in Latin American studies with a minimum GPA of 2.00.

**One required course (1 credit):**

- LAS 100 - Introduction to Latin American Studies Credits: 1

**Two courses (6 credits) in history:**

- HIST 271 - Survey of Latin American History Credits: 3
- HIST 272 - Survey of Latin American History Credits: 3

**Two social science courses (6 credits) related to Latin America chosen from:**

- GOVT 331 - Government and Politics of Latin America Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ECON 361 - Economic Development of Latin America Credits: 3
- GEOG 316 - Geography of Latin America Credits: 3

**One humanities course (3 credits) related to Latin America chosen from:**

- ENGL 333 - Folklore of the Americas Credits: 3
- SPAN 322 - Introduction to Latin American Culture Credits: 3
- SPAN 325 - Major Hispanic Writers Credits: 3
One seminar course (3 credits):

- LAS 499 - Research Seminar in Latin American Studies Credits: 3

Four elective courses (12 credits) in Latin American studies

- Students may satisfy the electives requirement with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. In addition, students are strongly encouraged to use an internship (LAS 490) or a study-abroad program to fulfill some of these credits.

Note:

All Latin American studies majors must demonstrate reading, speaking, or writing knowledge of Spanish or Portuguese by exam or achieving a minimum grade of 2.00 in a 300-level course in the language selected. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

Undergraduate Interdisciplinary Minor

Latin American Studies Minor

Banner Code: LAS

Students minoring in Latin American Studies must demonstrate reading, speaking or writing knowledge of Spanish or Portuguese by exam or by achieving a minimum grade of 2.00 in a 300-level course in the language selected.

This program of study is offered by the Latin American Studies Program.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete a minimum of 18 credits, distributed as follows:

One course (3 credits) chosen from:

- HIST 271 - Survey of Latin American History Credits: 3
- HIST 272 - Survey of Latin American History Credits: 3
- GOVT 331 - Government and Politics of Latin America Credits: 3

Five elective courses (15 credits) in at least three departments
• Students may satisfy the electives requirement with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. Selection of courses should be made in consultation with the program director.

■ Modern and Classical Languages

Phone: 703-993-1220
Web: mcl.gmu.edu

Faculty

Professors: Gilbert, Ricouart, Winkler

Associate professors: Berroa, Chamberlain, Christensen (chair), Goldin, Leeman, Levine, Rabin, Roman-Mendoza

Assistant professors: Carreño-Rodriguez, Markx, Olson, Ramos-Pellicia, Sanusi, So, Vivancos-Perez

Term associate professors: Zhang

Term assistant professors: Apitz, Falcon, Fujiwara, Fyfe, Quintana, Ruiz-Ross, Salawdeh, Vasilyeva

Term instructors: Chen, Hilmi, Kirsch, Lamothe, Mircea-Pines, Planas, Sweet

Course Work

This department offers all course work designated ARAB, CHIN, CLAS, FREN, FRLN, GERM, GREE, HEBR, ITAL, JAPA, KORE, LATN, RUSS, and SPAN in the Courses chapter of this catalog.

The following courses are offered in English. Knowledge of a foreign language is not required: ARAB 325; CHIN 310, 311, 320, 325, 328; FREN 325, 329; GERM 301, 325; ITAL 325; JAPA 320; RUSS 325, 326, 327, 353, 354; SPAN 321, 322, 325, 329; and all courses designated CLAS and FRLN.

Courses numbered 325 may be repeated once for credit if the authors studied are different.

General Education Requirements

The department offers courses approved to fulfill university general education requirements: RUSS 354 and SPAN 322 fulfill the general education requirement in global understanding; FRLN 385, RUSS 353, and SPAN 388 fulfill the general education synthesis requirement; a number of courses fulfill the general education requirement in literature; RUSS 354 and SPAN 322, which are approved to fulfill the general education requirement in global understanding. See the University General Education chapter of the catalog.

College-Level Requirements

Language courses through the intermediate (200) level can be used to fulfill the college-level requirement in foreign languages for the bachelor of arts degree in the College of Humanities and Sciences and the College of Science. FREN 451, RUSS 353, and RUSS 354 fulfill the college-level requirement in non-Western culture.

Undergraduate Programs
The department offers a bachelor's degree in foreign languages with concentrations in French and Spanish.

The concentration in French is designed for students who want to increase their proficiency in French language and culture while learning about the history, politics, and economics of the many French-speaking countries around the world. Students can take a study abroad course or spend a summer in Paris or Quebec, earning credit towards their degree. They can participate in the many French-speaking activities sponsored by Mason's French Club.

The concentration in Spanish enables students to become proficient in speaking, reading, and writing Spanish while learning about Latin American, Latino and Spanish languages practices, literatures, histories, and cultures. Students are encouraged to do an internship or service learning project, where they can draw on their knowledge of Spanish, gain valuable work experience while working for social change in their communities. Students have many opportunities to study Spanish abroad for as little as a week and as long as a semester and at the same time, earn credit toward their degree.

Both concentrations prepare students for teaching careers at the secondary school level, graduate study in languages, and research and professional work in government and private enterprise.

Foreign Languages with a Second Major

Majors in foreign language are encouraged to complete a second major in another field. Students who want to pursue a second undergraduate major should plan a program of study in consultation with advisors from both degrees and be familiar with the relevant policies on more than one major. See the Academic Policies chapter of the catalog.

Minors

Language majors are encouraged to complete a minor in another field.

The department offers minors in classical studies, Japanese studies, Chinese, French, German, Latin, Russian, and Spanish. They are available to students in any major. Except for classical studies, all the minors have as a prerequisite the completion of an intermediate course in the relevant language.

Graduate Programs

The department offers a distinctive interdisciplinary master's degree in foreign languages designed to meet the needs and interests of prospective and practicing teachers and other professionals. It also prepares students for doctoral study at other institutions. Within the master's degree, students choose one of four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

Students are encouraged to participate in the many study abroad programs offered by Mason. These include short courses during winter and spring breaks as well as semester-long programs in the French and Spanish speaking regions of the world.

Funding

The department has a limited number of teaching assistantships for highly qualified graduate students with excellent language preparation. Students develop valuable language teaching experience by working with faculty experts in language teaching pedagogy.

Undergraduate Degree
Foreign Languages, BA

Banner Code: LA-BA-FRLN

The bachelor of arts degree in foreign languages, which offers concentrations in French and Spanish, prepares students for teaching careers at the secondary school level, graduate study in languages, and research and professional work in government and private enterprise. Language majors are encouraged to complete a minor or, if possible, a second major in another field. Students who want a double major in a language and another subject should plan a program of study in consultation with advisors from both disciplines.

This program of study is offered by the Department of Modern and Classical Languages.

Degree Requirements

▲ Concentration in French (FRN)

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this concentration must complete a minimum of 33 credits in French courses at the 300 level and above, each with a minimum grade of 2.00. Students are expected to complete a balanced program that includes courses in language, culture and civilization, and literature.

One advanced language course (6 credits):

- FREN 309 - Reading and Writing Skills Development Credits: 6

Two courses (6 credits) in literature and civilization chosen from:

- FREN 340 - Francophone Identities Credits: 3
- FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789 Credits: 3
- FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present Credits: 3

Three elective courses (9 credits) in FREN at the 300-level or above

Four courses (12 credits) of FREN courses at the 400-level or above

Note:

No more than one course (3 credits) conducted in English (e.g. FREN 325, 329) may be used to fulfill requirements for the concentration in French.

▲ Concentration in Spanish (SPN)
In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this concentration must complete a minimum of 33 credits in Spanish courses at the 300-level and above, each with a minimum grade of 2.00.

Core courses (6 credits):

- SPAN 305 - Spanish in Context I Credits: 3
- SPAN 306 - Spanish in Context II Credits: 3
  or
- SPAN 309 - Intensive Spanish in Context Credits: 6
  or
- SPAN 315 - Spanish for Heritage Speakers Credits: 3
- One elective course in Spanish (3 credits)

Three additional required courses (9 credits):

- SPAN 370 - Spanish Writing and Stylistics Credits: 3
- SPAN 385 - Introduction to Spanish Linguistics Credits: 3
- SPAN 390 - Introduction to Hispanic Literary Analysis Credits: 3

Four SPAN courses at the 400 level (12 credits)

Two elective courses (6 credits) in Spanish

- May include other SPAN courses not specifically required or not used to fulfill another requirement

Note:

With approval of the department, one course taught in English (3 credits) may be applied toward the concentration in Spanish.

Comparative Literature Emphasis

The English Department and the Modern and Classical Languages Department offer a BA in English with an emphasis in comparative literature. This program combines the study of literature in English with the study of one or more foreign literatures and with cross-cultural literary study. See the English Department section of this chapter.

- CL 300 - Introduction to Comparative Literature Credits: 3
- CL 514 - Theories of Comparative Literature Credits: 3

Notes:

Students should consult with their advisor to design a program of study focusing on a specific genre, period, issue, or other cross-cultural topic.
Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in foreign language may fulfill this requirement by successfully completing FREN 309 or SPAN 370.

Undergraduate Minor

Chinese Minor

Banner Code: CHIN

The minor in Chinese studies is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

Three courses (9 credits) chosen from:

- CHIN 300 - Reading Skills Development Credits: 3
- CHIN 301 - Advanced Grammar and Syntax Credits: 3
- CHIN 305 - Chinese for the Business World Credits: 3
- CHIN 480 - Fourth-Year Chinese I Credits: 3
- CHIN 481 - Fourth-Year Chinese II Credits: 3

One course (3 credits) chosen from:

- CHIN 318 - Introduction to Classical Chinese Credits: 3
- CHIN 355 - Readings in Chinese Poetry and Poetics Credits: 3
- CHIN 365 - Readings in Chinese Fiction after Mao Credits: 3

One additional Chinese course (3 credits) chosen from either of the above groups

One course (3 credits) chosen from:

- CHIN 310 - Survey of Chinese Literature Credits: 3
- CHIN 311 - Modern Chinese Literature in Translation Credits: 3
CHIN 320 - Contemporary Chinese Film Credits: 3
ARTH 384 - Arts of China Credits: 3
HIST 353 - History of Traditional China Credits: 3
HIST 354 - Modern China Credits: 3
HIST 355 - Women and Family in Chinese History Credits: 3
HIST 387 - Topics in Global History Credits: 3
RELI 314 - Chinese Philosophies and Religious Traditions Credits: 3

Classical Studies Minor

Banner Code: CLA

The minor in Classical studies is designed for students who wish to become familiar with the classical cultures and broaden their knowledge of the foundations of Western civilization and for students who are studying other areas of the humanities, especially English, languages, comparative literature, history, art history, philosophy, or religion. The minor provides enough flexibility for students to choose relevant courses according to their primary interests.

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits with a minimum grade of 2.00.

Two courses (6 credits) in classics, including:

- CLAS 250 - Classical Mythology Credits: 3

One course (3 credits) in classical history:

- HIST 301 - Classical Greece Credits: 3
- HIST 302 - Classical Rome Credits: 3
- HIST 304 - Western Europe in the Middle Ages Credits: 3
- HIST 388 - Topics in European History Credits: 3
- HIST 480 - Alexander the Great Credits: 3

One course (3 credits) in classical art history, classical philosophy, or religious studies

Two elective courses (6 credits)

- Chosen from classical art history, classics, classical history, classical philosophy, and religious studies
**French Minor**

*Banner Code: FRN*

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

One advanced language course (6 credits):

- **FREN 309 - Reading and Writing Skills Development** Credits: 6

Two courses (6 credits) in literature and civilization chosen from:

- **FREN 340 - Francophone Identities** Credits: 3
- **FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789** Credits: 3
- **FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present** Credits: 3

Three elective courses (9 credits) in FREN at the 300 level or above

**German Minor**

*Banner Code: GRM*

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

Three courses (9 credits) chosen from:

- **GERM 310 - Conversation and Composition** Credits: 3
- **GERM 316 - German for the Business World** Credits: 3
- **GERM 318 - Translation of Texts** Credits: 3
- **GERM 415 - Advanced Grammar and Style** Credits: 3
• GERM 418 - Advanced Composition Credits: 3

One course (3 credits) chosen from:

• GERM 301 - Culture and Civilization Credits: 3
• GERM 340 - Survey of German Literature Credits: 3

One course (3 credits) from genre courses at the 300 level or period courses at the 400 level

One German elective course (3 credits) at the 300 level or above

Japanese Studies Minor

Banner Code: JPNS

The minor in Japanese Studies enables students to advance their Japanese language skills and develop a sound understanding of Japanese culture and history from a global perspective. Students may focus their course work on language or on history and culture.

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 6 courses (18 credits) with a minimum grade of 2.00. Special topics courses, such as HIST 387, when relevant, may be applied to the minor with prior written approval of the coordinator.

Focus on language

Four courses (12 credits) in Japanese language:

• JAPA 330 - Advanced Reading and Speaking I Credits: 3
• JAPA 331 - Advanced Reading and Speaking II Credits: 3
• JAPA 440 - Integrated Study of Japanese Language and Society I Credits: 3
• JAPA 441 - Integrated Study of Japanese Language and Society II Credits: 3

One course (3 credits) of Japanese and Japan-related history chosen from:

• HIST 251 - Survey of East Asian History Credits: 3
• HIST 252 - Survey of East Asian History Credits: 3
• HIST 356 - Modern Japan Credits: 3
• HIST 357 - Postwar Japan Credits: 3
• ARTH 385 - Arts of Japan Credits: 3

One elective course (3 credits) chosen from:

• JAPA 320 - Japanese Cinema Credits: 3
• ARTH 482 - Advanced Studies in Asian Art Credits: 3
• CHIN 328 - Asian American Women Writers Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• RELI 212 - Religions of the Orient Credits: 3
• RELI 315 - The Buddhist Tradition Credits: 3

Focus on history and culture

Two courses (6 credits) in Japanese language chosen from:

• JAPA 330 - Advanced Reading and Speaking I Credits: 3
• JAPA 331 - Advanced Reading and Speaking II Credits: 3
• JAPA 440 - Integrated Study of Japanese Language and Society I Credits: 3
• JAPA 441 - Integrated Study of Japanese Language and Society II Credits: 3

Two courses (6 credits) in Japanese and Japan-related history chosen from

• HIST 251 - Survey of East Asian History Credits: 3
• HIST 252 - Survey of East Asian History Credits: 3
• HIST 356 - Modern Japan Credits: 3
• HIST 357 - Postwar Japan Credits: 3
• ARTH 385 - Arts of Japan Credits: 3

Two elective courses (6 credits) chosen from

• JAPA 320 - Japanese Cinema Credits: 3
• ARTH 482 - Advanced Studies in Asian Art Credits: 3
• CHIN 328 - Asian American Women Writers Credits: 3
• GOVT 333 - Government and Politics of Asia Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• RELI 212 - Religions of the Orient Credits: 3
• RELI 315 - The Buddhist Tradition Credits: 3
Latin Minor

Banner Code: LATN

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

Six courses (18 credits) chosen from:

- LATN 351 - Roman Prose Literature Credits: 3
- LATN 352 - Roman Poetry Credits: 3
- LATN 451 - Studies in Roman Literature Credits: 3
- LATN 452 - Studies in Roman Literature Credits: 3

Note:

Courses vary in content and may be repeated for credit.

Total: 18 credits

Russian Minor

Banner Code: RUS

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of the catalog.

Course Work

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

Three courses (9 credits) chosen from:

- RUSS 302 - Russian Conversation and Composition Credits: 3
  or
• RUSS 303 - Russian Advanced Conversation Credits: 3
• RUSS 380 - Advanced Russian I Credits: 3
• RUSS 381 - Advanced Russian II Credits: 3

One course (3 credits) chosen from:

• RUSS 310 - Readings in Russian Literature Credits: 3
• RUSS 311 - Contemporary Russian Short Fiction Credits: 3

One course (3 credits) chosen from:

• RUSS 353 - Russian Civilization Credits: 3
• RUSS 354 - Contemporary Post-Soviet Life Credits: 3

One Russian elective course (3 credits) at the 300 level or above

• Course must be conducted in Russian.

Spanish Minor

Banner Code: SPN

This program of study is offered by the Department of Modern and Classical Languages.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits beyond the intermediate proficiency level with a minimum grade of 2.00 in each course.

One or two required courses (6 credits):

• SPAN 305 - Spanish in Context I Credits: 3
• SPAN 306 - Spanish in Context II Credits: 3
  or
• SPAN 309 - Intensive Spanish in Context Credits: 6
  or
• SPAN 315 - Spanish for Heritage Speakers Credits: 3
• One elective course in Spanish (3 credits)

Two additional required courses (6 credits):
• SPAN 370 - Spanish Writing and Stylistics Credits: 3

and one course chosen from:

• SPAN 385 - Introduction to Spanish Linguistics Credits: 3
• SPAN 388 - Introduction to Latina/o Studies Credits: 3
• SPAN 390 - Introduction to Hispanic Literary Analysis Credits: 3

Two Spanish elective courses (6 credits) at the 300 or 400 level

• Not to include courses taught in English

Master’s Degree

Foreign Languages, MA

Banner Code: LA-MA-FRLN

This program meets the needs and interests of prospective and practicing teachers and other professionals, and prepares students for doctoral study at other institutions. The program offers four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

This program of study is offered by the Department of Modern and Classical Languages.

Application Requirements

In addition to satisfying general admission requirements for graduate study, applicants must hold a baccalaureate degree in French or Spanish, have at least a 3.00 GPA (on a 4.00 scale) in the field, and submit three letters of recommendation from people familiar with their academic qualifications.

Applicants whose baccalaureate degrees were earned in other fields or who otherwise do not meet the above requirements but who provide evidence of a capacity to pursue graduate study are encouraged to apply and may be admitted to the program with provisional status. Applicants in this category may be asked to appear for a personal interview and take the appropriate parts of the GRE. They may also have undergraduate deficiencies to make up before having the provisional qualifier removed.

Degree Requirements

Students who elect a concentration in one language must complete a program of 30 credits. Those who concentrate in two languages must complete a program of 42 credits. The concentration in Spanish/bilingual-multicultural education requires 36 credits. In all three concentrations, 6 of the total credits may be earned with a thesis. Regardless of the concentration selected, all students must meet the core and distribution requirements given below and pass a comprehensive exam or write a thesis.

▲ Concentration in French (FRN)
Students pursuing this concentration must complete 30 credits, with at least 18 credits earned in courses with the subject code FREN.

**Literature courses**

- At least 6 credits in literature courses covering two different periods

**Language and linguistics courses**

- At least 6 credits in language and linguistics courses

**French elective courses**

- At least 6 credits of French elective courses in literature or language

**Elective courses (12 credits), up to 6 credits may be used for directed reading and research, and thesis:**

- FREN 798 - Directed Reading and Research Credits: 3
- FREN 799 - Thesis Credits: 1-6

▲ Concentration in Spanish (SPN)

Students pursuing this concentration must complete 30 credits.

**Three core courses (9 credits):**

- SPAN 502 - Hispanic Sociolinguistics Credits: 3
- SPAN 505 - Applied Spanish Stylistics Credits: 3
- SPAN 510 - Introduction to the Graduate Study of Literature in Spanish Credits: 3

**Three courses (9 credits) in Spanish:**

- One course (3 credits) in the literature of Spain
- One course (3 credits) in the literature of Spanish America
- One course (3 credits) in Spanish language or Spanish linguistics

**Elective courses (12 credits) chosen from:**

- Additional courses in Spanish language and literature, including courses taken through the Consortium of Universities of the Washington Metropolitan Area
- Courses under the rubric FRLN
- Courses transferred from other universities, including study abroad
- Up to 6 credits of courses in related fields
Notes:

Full-time students must take the core courses in their first year. Part-time students must include these courses within their first 12 credits.

Students intending to go on for the PhD in linguistics or literature are strongly encouraged to pursue the thesis option. Independent studies courses are not available for graduate students of Spanish.

▲ Concentration in Spanish and French (SF)

Students pursuing this concentration must complete 42 credits.

French

- 18 credits in French distributed according to the requirements (not electives) for the concentration in French

Spanish

- 18 credits in Spanish distributed according to the requirements (not electives) for the concentration in Spanish

Elective courses (6 credits), which may include directed reading and research, or thesis:

A maximum of 6 credits of 798 and 799 may be applied to the elective courses.

- FREN 798 - Directed Reading and Research Credits: 3
- SPAN 798 - Directed Reading and Research Credits: 3
- FREN 799 - Thesis Credits: 1-6
- SPAN 799 - Thesis Credits: 1-6

▲ Concentration in Spanish/Bilingual-Multicultural Education (SBM)

Students pursuing this concentration must complete 36 credits.

At least 18 credits in SPAN distributed according to the requirements (not electives) for the concentration in Spanish

Bilingual education seminars (6 credits) chosen from:

- EDCI 516 - Bilingualism and Language Acquisition Research Credits: 3
- EDCI 519 - Methods of Teaching Multilingual Students Credits: 3
- EDCI 520 - Assessment of Language Learners Credits: 3
Elective courses (12 credits), of which up to 6 may include directed reading and research or thesis:

- SPAN 798 - Directed Reading and Research Credits: 3
- SPAN 799 - Thesis Credits: 1-6

**Philosophy**

Phone: 703-993-1290  
Web: philosophy.gmu.edu

**Faculty**

**Professors:** Bergoffen, Rothbart  
**Associate professors:** Cherubin, De Nys, Eckenwiler, Froman, Holman, Kinnaman (chair), Light, Paden  
**Term professor:** Boyd  
**Adjunct professors:** D. Gregory, J. Miller, Oberoi, Register, Sigrist, Sojka, Van Camp

**Course Work**

This department offers all course work designated PHIL in the Courses chapter of this catalog.

**Undergraduate Programs**

The department offers a bachelor's degree in philosophy, which covers the major issues and areas in philosophy. It is intended to serve the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Majors in philosophy take courses in a variety of philosophical traditions and study logic, ethics, and social and political philosophy. With the skills of critical thinking, skillful writing, and analytical reasoning that are the hallmark of philosophy majors, students are well-prepared for a wide range of careers including law, government service, or graduate study.

The philosophy program can complement other interests of students when they complete a second major in another field. Students who plan to pursue more than one undergraduate major should work out a program of study in consultation with advisors from both majors and be familiar with the relevant policies for completing more than one major. See the Academic Policies chapter of the catalog.

In addition to the general degree in philosophy, students can choose a concentration in philosophy and law. This concentration offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law.

**Honors in the Major**
Highly qualified students may apply to the honors program in the major. Students can apply in their second semester as a junior, before they have completed 90 credits and should have a minimum GPA in the major of 3.50. Eligible students should submit a transcript, one letter of recommendation from a member of the philosophy faculty, and one writing sample, a paper from one of the student’s courses in philosophy.

To receive honors in the major, students must complete 6 credits of honors course work in either PHIL 422, 425, or 471. To graduate with honors in philosophy, students must complete these courses with a minimum GPA of 3.50.

Minors

The department offers a minor in philosophy and a minor in philosophy and law. These minors are available to students in any major. The department, in cooperation with the Department of Public and International Affairs, coordinates the interdisciplinary minor in political philosophy. See the Interdisciplinary Minors section of this chapter.

Bachelor’s/Accelerated Master’s Program

The department offers highly qualified undergraduate majors in philosophy the opportunity to apply to an accelerated master’s degree program in philosophy. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, generally within five years.

Graduate Programs

The department offers a master’s degree in traditional and contemporary philosophy with specialized concentrations in philosophy and cultural theory and in professional ethics. The degree is designed for students who want to further their professional goals or foster their intellectual development. It provides a solid preparation for advanced work in philosophy or other fields such as women and gender studies, cultural studies, or law. The degree provides grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science.

With its focus on traditional and contemporary philosophy, the master's degree program provides students with a historical and pluralistic approach to philosophical questions. The concentration in professional ethics gives students the opportunity to explore the ethical and philosophical issues that arise in such professional fields of study and work as business, health care, scientific research, biomedical technology, and public policy. The concentration in philosophy and cultural theory provides students with a distinctive and important theoretical foundation for doctoral work in cultural studies.

Students are encouraged to pursue opportunities beyond the classroom such as study abroad, professional internships, and research with faculty members.

The department also offers a graduate certificate in professional ethics for those students interested in combining the study of ethics in a variety of career settings. Students may earn the certificate as a stand alone program or pursue it concurrently with a graduate degree program. Part of the coursework for the certificate may be able to be applied also to a degree program. Students must apply and be admitted to the graduate certificate program.

Undergraduate Degree

Philosophy, BA

Banner Code: LA-BA-PHIL
The degree program in philosophy covers the major issues and areas in philosophy and serves the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Students can use this major as preparation for such professions as law or government service, or complement other interests by taking a double major in philosophy and a related field of study.

This program of study is offered by the Department of Philosophy.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete at least 33 credits in philosophy earning a minimum grade of 2.00 in each course. At least 21 credits must be at the 300 level or above, including at least 6 credits at the 400 level or above. The credits must be distributed among area requirements as indicated below. No course may be used to fulfill more than one requirement.

When the subject matter is appropriate and with the prior written approval of the undergraduate director, PHIL 391, 392, 421, 425, or 426 may be used to fulfill the requirements in the analytic tradition, the continental tradition, or the ethics and social and political philosophy.

The following philosophy courses fulfill the general education synthesis requirement: PHIL 309, 343, 377, and 378.

One course (3 credits) in logic:

- PHIL 173 - Logic and Critical Thinking Credits: 3
- PHIL 376 - Symbolic Logic Credits: 3

Two courses (6 credits) in history of philosophy:

- PHIL 301 - History of Western Philosophy: Ancient Credits: 3
- PHIL 303 - History of Western Philosophy: Modern Credits: 3

One course (3 credits) in the analytic tradition chosen from:

- PHIL 332 - Twentieth-Century Analytic Philosophy Credits: 3
- PHIL 371 - Philosophy of Natural Sciences Credits: 3
- PHIL 373 - Theory of Knowledge Credits: 3
- PHIL 374 - Philosophy of Mind Credits: 3

One course (3 credits) in the continental tradition chosen from:

- PHIL 336 - Twentieth-Century Continental Thought: Existentialism Credits: 3
- PHIL 337 - Twentieth-Century Continental Thought: Phenomenology Credits: 3
- PHIL 340 - Hermeneutic Philosophy Credits: 3
One course (3 credits) in ethics and social and political philosophy chosen from

- PHIL 311 - Philosophy of Law Credits: 3
- PHIL 323 - Classical Western Political Theory Credits: 3
- PHIL 324 - Modern Western Political Theory Credits: 3
- PHIL 325 - Karl Marx's Social and Political Thought Credits: 3
- PHIL 327 - Contemporary Western Political Theory Credits: 3
- PHIL 355 - Theories of Ethics Credits: 3
- PHIL 429 - International Ethics Credits: 3
- PHIL 470 - Seminar: Philosophical Examination of Social Issues and the Law Credits: 3

Five elective courses (15 credits) in philosophy

- Chosen from any PHIL courses including those listed above that are not used to meet the specific requirement

▲ Concentration in Philosophy and Law (PHLW)

The concentration in philosophy and law offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law. In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in the College of Humanities and Social Sciences, students pursuing this concentration must successfully complete 33 credits, earning a minimum grade of 2.00 in each course, with at least 6 credits at the 400 level or above.

In addition to the specific courses listed below, other relevant courses may be applied to the requirements for this concentration with prior written approval of the undergraduate director.

Five courses (15 credits) from four of the area categories above

- logic (3 credits)
- history of philosophy (6 credits)
- the analytic tradition (3 credits)
- the continental tradition (3 credits)

One required course (3 credits) in philosophy and law:

- PHIL 311 - Philosophy of Law Credits: 3

At least two courses (6 credits) chosen from:

- PHIL 323 - Classical Western Political Theory Credits: 3
  or
- GOVT 323 - Classical Western Political Theory Credits: 3
- PHIL 324 - Modern Western Political Theory Credits: 3
At least three additional elective courses in philosophy (9 credits)

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. All senior seminars in philosophy are writing intensive. Philosophy majors should consult the undergraduate coordinator for other courses that can be taken to fulfill this requirement.

Undergraduate Minor

Philosophy and Law Minor

Banner Code: PHLW

The minor in philosophy and law offers students a course of study that emphasizes the philosophical analysis of legal issues. It acquaints students with the rich tradition of philosophical argument dealing with the justification of law, its relation to moral theory, the justifications for punishment, and the concepts of justice, rights, liberty, and legal responsibility. In addition, an education in philosophy in general, and these courses in particular, stress intellectual skills that are important in the study of law.

This program of study is offered by the Department of Philosophy.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits.

Four required courses (12 credits):

- PHIL 173 - Logic and Critical Thinking Credits: 3
• PHIL 301 - History of Western Philosophy: Ancient Credits: 3
• PHIL 303 - History of Western Philosophy: Modern Credits: 3
• PHIL 311 - Philosophy of Law Credits: 3

Two elective courses (6 credits) chosen from the list below

One elective course may be chosen from other course work in philosophy with prior written approval of the undergraduate director.

• PHIL 323 - Classical Western Political Theory Credits: 3
  or
• GOVT 323 - Classical Western Political Theory Credits: 3

• PHIL 324 - Modern Western Political Theory Credits: 3
  or
• GOVT 324 - Modern Western Political Theory Credits: 3

• PHIL 327 - Contemporary Western Political Theory Credits: 3
  or
• GOVT 327 - Contemporary Western Political Theory Credits: 3

• PHIL 428 - Advanced Democratic Theory Credits: 3
  or
• GOVT 428 - Advanced Democratic Theory Credits: 3

• GOVT 448 - Ethics and International Politics Credits: 3
• PHIL 429 - International Ethics Credits: 3
• PHIL 470 - Seminar: Philosophical Examination of Social Issues and the Law Credits: 3

Total: 18 credits

Philosophy Minor

Banner Code: PHIL

Students can take a general minor or one organized around specific emphases, each of which stresses a different aspect of philosophy. The emphasis in the history of philosophy is particularly useful to students in the humanities, especially those who wish to pursue graduate study. The emphasis in reality, knowledge, and science is especially beneficial for students majoring in the human and natural sciences. The emphasis in social and political philosophy is recommended for students who plan to pursue a career in law or politics.

This program of study is offered by the Department of Philosophy.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work
Students pursuing this minor must complete 18 credits in philosophy with a minimum grade of 2.00 in each course. No course may be used to fulfill more than one requirement.

One course (3 credits) in logic chosen from:

- PHIL 173 - Logic and Critical Thinking Credits: 3
- PHIL 180 - Logic and Law Credits: 3
- PHIL 376 - Symbolic Logic Credits: 3

Two courses (6 credits) in history of philosophy:

- PHIL 301 - History of Western Philosophy: Ancient Credits: 3
- PHIL 303 - History of Western Philosophy: Modern Credits: 3

Three elective courses (9 credits) in philosophy

At least 6 of the elective credits must be at the 300 level or above. Students may choose to focus their three electives in one of the emphases below.

Emphasis in history of philosophy

One course (3 credits) in the history of philosophy chosen from:

- PHIL 302 - History of Western Philosophy: Medieval Credits: 3
- PHIL 325 - Karl Marx's Social and Political Thought Credits: 3
- PHIL 332 - Twentieth-Century Analytic Philosophy Credits: 3
- PHIL 335 - Nineteenth-Century Philosophy Credits: 3
- PHIL 336 - Twentieth-Century Continental Thought: Existentialism Credits: 3
- PHIL 337 - Twentieth-Century Continental Thought: Phenomenology Credits: 3

Two elective courses (6 credits) in philosophy

Emphasis in reality, knowledge, and science

Two courses (6 credits) chosen from:

- PHIL 312 - Philosophy of Technology Credits: 3
- PHIL 337 - Twentieth-Century Continental Thought: Phenomenology Credits: 3
- PHIL 340 - Hermeneutic Philosophy Credits: 3
- PHIL 357 - Philosophy of the Social Sciences Credits: 3
- PHIL 371 - Philosophy of Natural Sciences Credits: 3
- PHIL 373 - Theory of Knowledge Credits: 3
- PHIL 374 - Philosophy of Mind Credits: 3
- PHIL 375 - Metaphysics Credits: 3
- PHIL 377 - Darwin: Biology and Beyond Credits: 3
- PHIL 378 - Reason, Science and Faith in the Modern Age Credits: 3

One elective course (3 credits) in philosophy

Emphasis in social and political philosophy

Three courses (9 credits) chosen from:

- PHIL 311 - Philosophy of Law Credits: 3
- PHIL 312 - Philosophy of Technology Credits: 3
- PHIL 323 - Classical Western Political Theory Credits: 3
- PHIL 324 - Modern Western Political Theory Credits: 3
- PHIL 325 - Karl Marx's Social and Political Thought Credits: 3
- PHIL 327 - Contemporary Western Political Theory Credits: 3
- PHIL 338 - Woman: The Philosophical Questions Credits: 3
- PHIL 470 - Seminar: Philosophical Examination of Social Issues and the Law Credits: 3

Total: 18 credits

Bachelor's/Accelerated Master's Program

Philosophy BA/Philosophy, Accelerated MA

Highly qualified Mason undergraduates may apply to the accelerated master’s degree program and obtain both bachelor’s and master’s degrees in philosophy after satisfactory completion of 144 credits, sometimes within five years.

Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits (courses at the 500 or 600 level) in partial fulfillment of requirements for the undergraduate degree. Students may also take a maximum of 6 additional graduate credits while they are still undergraduates but mark them as reserve graduate credit. Reserve graduate credits apply only to the master’s degree. On completion and conferral of the undergraduate degree with satisfactory performance in graduate courses (minimum grade of 3.00 in each course), students are given advanced standing in the master’s program. All other master’s degree requirements must be met. Interested students should contact the department for details about the application process.

Master's Degree
Philosophy, MA

Banner Code: LA-MA-PHIL

The master's degree in philosophy is designed for students who intend to pursue a doctorate in philosophy as well as for those who seek the master's as a terminal degree, either in pursuit of their intellectual interests or to further their professional expertise. Students can do a master's degree with a focus on traditional and contemporary philosophy or chose one of two concentrations. All provide grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science.

This program of study is offered by the Department of Philosophy.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to fulfilling university admission requirements for graduate study, applicants must submit three letters of recommendation, a statement of student goals in pursuing the degree, and a writing sample. GRE exams are not required. They are recommended, however, especially for those students planning to pursue a PhD in philosophy.

Degree Requirements

Students pursuing this degree must successfully complete 30 credits, which may include a project or thesis. Students need to identify an advisor on entering the program and meet regularly with that advisor during their course of study. With their advisor’s approval, students may apply up to 9 credits from other departments toward the degree.

Four courses (12 credits) of required course work:

One course (3 credits) in ancient or medieval philosophy

- PHIL 602 - Plato: Selected Dialogues Credits: 3
- PHIL 604 - Augustine and Aquinas Credits: 3
- PHIL 681 - Philosophical Figures Credits: 3
- PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in modern philosophy

- PHIL 605 - Mind-Body Problem in Early Modern Philosophy Credits: 3
- PHIL 608 - Hegel's Phenomenology of the Spirit Credits: 3
- PHIL 681 - Philosophical Figures Credits: 3
- PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in contemporary philosophy

- PHIL 610 - Contemporary Issues Credits: 3
- PHIL 611 - Contemporary Issues Credits: 3
- PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)
• PHIL 615 - Postmodernist Thought Credits: 3
• PHIL 616 - Phenomenology Credits: 3
• PHIL 618 - Contemporary French Feminism Credits: 3
• PHIL 681 - Philosophical Figures Credits: 3
• PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in an advanced seminar

• PHIL 720 - Nietzsche and his Readers Credits: 3
• PHIL 721 - Advanced Seminar in Philosophy Credits: 3
• PHIL 733 - Current Issues in Cognitive Science Credits: 3

Six elective courses (18 credits)

3-6 credits of thesis (optional)

Students who do a thesis take one or two fewer elective courses, depending on their number of thesis credits.

• PHIL 799 - Thesis Credits: 1-6

▲ Concentration in Philosophy and Cultural Theory (PHCT)

Four courses (12 credits) in philosophy:

One course (3 credits) in ancient or medieval philosophy

• PHIL 602 - Plato: Selected Dialogues Credits: 3
• PHIL 604 - Augustine and Aquinas Credits: 3
• PHIL 681 - Philosophical Figures Credits: 3
• PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in modern philosophy

• PHIL 605 - Mind-Body Problem in Early Modern Philosophy Credits: 3
• PHIL 608 - Hegel's Phenomenology of the Spirit Credits: 3
• PHIL 681 - Philosophical Figures Credits: 3
• PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in contemporary philosophy
• PHIL 615 - Postmodernist Thought Credits: 3
• PHIL 616 - Phenomenology Credits: 3
• PHIL 618 - Contemporary French Feminism Credits: 3
• PHIL 681 - Philosophical Figures Credits: 3
• PHIL 691 - Special Topics in Philosophy Credits: 1-6 (where appropriate)

One course (3 credits) in an advanced seminar

• PHIL 720 - Nietzsche and his Readers Credits: 3
• PHIL 721 - Advanced Seminar in Philosophy Credits: 3
• PHIL 733 - Current Issues in Cognitive Science Credits: 3

One required course (3 credits) in cultural studies

Students are encouraged to take this course as early in their program as possible.

• CULT 820 - After Colonialism: Race, Ethnicity, Nationalism Credits: 3

One elective course (3 credits) in cultural studies

Four elective courses (12 credits)

3-6 credits of thesis (optional)

Students who do a thesis take one or two fewer elective courses, depending on their number of thesis credits.

• PHIL 799 - Thesis Credits: 1-6

Total: 30 credits

▲ Concentration in Professional Ethics (PETH)

With prior written approval of the graduate director, PHIL 691 - Special Topics in Philosophy and PHIL 721 - Advanced Seminar in Philosophy, when relevant, may be able used to fulfill some of the requirements for this concentration.

One required course (3 credits) in the history of philosophy:
• PHIL 640 - History of Ethical Theory Credits: 3

One elective course (3 credits) in the history of philosophy chosen from:

• PHIL 602 - Plato: Selected Dialogues Credits: 3
• PHIL 604 - Augustine and Aquinas Credits: 3
• PHIL 605 - Mind-Body Problem in Early Modern Philosophy Credits: 3
• PHIL 608 - Hegel's Phenomenology of the Spirit Credits: 3
• PHIL 681 - Philosophical Figures Credits: 3
• PHIL 691 - Special Topics in Philosophy Credits: 1-6

One course (3 credits) in professional ethics

• PHIL 641 - Ethics and the Professions Credits: 3

Two courses (6 credits) in applied ethics chosen from:

• PHIL 642 - Biomedical Ethics Credits: 3
• PHIL 643 - Environmental Ethics Credits: 3
• PHIL 644 - Business and Organizational Ethics Credits: 3
• PHIL 645 - Research Ethics Credits: 3

Three to five elective courses (9-15 credits)

3-6 credits of thesis (optional)

Students who do a thesis take one or two fewer elective courses, depending on their number of thesis credits.

• PHIL 799 - Thesis Credits: 1-6

Total: 30 credits

Master's Level Certificate

Professional Ethics Graduate Certificate
Students must be admitted to graduate study or approved for graduate course enrollment in nondegree status. Students who initially enroll in the certificate program as nondegree students must apply for admission to the graduate program no later than the second semester of study. The certificate may be pursued concurrently with any other graduate program in the university.

This program of study is offered by the Department of Philosophy.

For policies governing all certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must successfully complete 15 graduate credits. In consultation with an advisor, students should select their courses to create a coherent program of study.

One course (3 credits) in the history of ethical theory:

- PHIL 640 - History of Ethical Theory Credits: 3

Two courses (6 credits) in applied ethics chosen from:

- PHIL 642 - Biomedical Ethics Credits: 3
- PHIL 643 - Environmental Ethics Credits: 3
- PHIL 644 - Business and Organizational Ethics Credits: 3

Two elective courses (6 credits)

- This requirement may be fulfilled by taking courses in philosophy, but students are encouraged to take courses in other disciplines.

Total: 15 credits

Psychology

Phone: 703-993-1342
Web: gmu.edu/departments/psychology

Faculty

Professors: Ascoli, Boehm-Davis (chair), Cortina (associate chair for graduate studies), Denham (director, Applied Developmental Program), Klimoski, Maddux, Mandes, Naglieri, Parasuraman (director, Human Factors/Applied Cognition Program), Pasnak, Riskind, Rojahn (director, School Psychology Program, director, Center for Cognitive Development), R. Smith (director, Biopsychology Program), Tangney, Tetrick (director, Industrial/Organizational Program), Winsler, Zaccaro
**Research professors:** Butler, Olds

**Associate professors:** Bitler, Blackwell, Buffardi, Flinn, Greenwood, Kello, Kozhevnikov, Peterson, Sanford (associate chair for undergraduate studies), Short (director, Clinical Program)

**Research associate professors:** Bachus, Warren

**Assistant professors:** Baldwin, Cattaneo, Dalal, Kashdan, Kaplan, King, McKnight, Mohr, Monk, Perez-Edgar, Rowe, Thompson

**Term associate professors:** Chrosniak, Wanschura

**Research assistant professors:** Bassett, Fu, McDonald, Stuewig, Tran

**Term assistant professors:** Battaglia, Hurley, Meier

**Affiliates:** Eby, Hunt

**Adjuncts:** Anderson, Bene, Curtin, Dechman, Hawley, Hirsch, Levitas, Mayfield, Perez, Pomeroy, Schumann, Shiraev, Stanhope, Steve, Werber

## Course Work

The Psychology Department offers all course work designated PSYC in the Courses chapter of this catalog.

### Undergraduate Programs

The department offers a bachelor of arts degree and a bachelor of science degree in psychology. All psychology majors complete a broad range of courses from social and abnormal psychology to cognitive and biopsychology. Students can also choose from special topics courses such as forensic psychology and romantic relationships.

Students in psychology may have the opportunity to do research with a faculty member or do a service learning course, which allows them to put into practice what they've learned in the classroom.

Students interested in graduate study should be aware that undergraduate research experience and letters of recommendation are major factors for admission to graduate study. Such students should distribute courses across a number of areas in psychology and work closely with one or more professors on individual projects during their junior and senior years.

### Honors in the Major

Highly qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses (PSYC 490, 491, and 492), which cumulates in the successful completion and presentation of an independent honors thesis. To graduate with honors, students must earn at least 3.50 in the three honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

### Minor

The department offers a minor in psychology available to students in any major.
Bachelor’s/Accelerated Master’s Program

The department offers highly qualified undergraduate majors the opportunity to apply to an accelerated master’s degree program in psychology with a concentration in biopsychology. If accepted, students will be able to earn both an undergraduate and a graduate degree in psychology, the master's with a concentration in biopsychology, after satisfactory completion of 146 credits, sometimes within five years.

Graduate Programs

The graduate programs in psychology are distinguished by an emphasis on basic research and the application of research to solving practical problems in families, schools, industry, government, and health care settings.

The department offers master's and doctoral degrees with concentrations in applied developmental psychology, biopsychology, human factors/applied cognition, and industrial/organizational psychology. They offer a doctoral degree with a concentration in clinical psychology. Finally, they offer a master's degree with a concentration in school psychology as well as a certificate of advanced graduate studies in school psychology.

Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Certificates

The department offers graduate certificates in aviation psychology, usability, and cognitive neuroscience. These have been designed to meet the needs of students who desire to upgrade their skills and earn a certificate as evidence of their skill attainment. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

The certificate programs are open to all students who hold a bachelor’s degree from an accredited university and meet the admissions requirements for the master's degree in psychology with a concentration in human factors and applied cognition.

Nondegree Status

Applicants who have not been admitted to a graduate degree program or a certificate program may apply for nondegree status. Nondegree students must meet the same admission requirements as degree-seeking students. Nondegree status is not intended as a way to qualify for admission as a degree-seeking student.

While it may be possible to transfer the credits earned in nondegree status to a degree program, such transfers are not automatic. They require the approval of the graduate director and the dean. If approved, a maximum of 12 credits earned in nondegree status may be applied to a degree program. Nondegree students who intend to transfer their credits to a degree program should discuss this with the appropriate program director.

Undergraduate Degree
Neuroscience, BS

Banner Code: LA-BS-NEUR

The bachelor of science in neuroscience is an interdisciplinary program emphasizing the relationship between the biology and chemistry of the nervous system and behavior of an organism. The BS in neuroscience prepares students for graduate-level study in both medical school and doctoral and master's-level programs in neuroscience and other health-related fields, and work in the neuroscience field.

This program of study is offered by the Department of Psychology.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students pursuing this degree must complete the following course work.

Two foundation courses in biology (8 credits):

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4

Two foundation courses in chemistry* (8 credits):

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

One foundation course in mathematics (3 or 4 credits) chosen from:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4 *
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

One foundation course in statistics (3 or 4 credits) chosen from:

- STAT 250 - Introductory Statistics I Credits: 3
- PSYC 300 - Statistics in Psychology Credits: 4
- MATH 352 - Statistics Credits: 3
- BIOL 312 - Biostatistics Credits: 4

Four foundation courses in physics (8 credits):
Take one of the following sequences of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

or

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Three foundation courses in psychology (9 credits):

- PSYC 100 - Basic Concepts in Psychology Credits: 3
- PSYC 375 - Brain and Behavior I Credits: 3
- PSYC 376 - Brain and Behavior II Credits: 3

One foundation course in computer science (4 credits):

- CS 112 - Introduction to Computer Programming Credits: 4

Two core courses in neuroscience (6 credits):

- NSCI 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience Credits: 3
- NSCI 335 - Molecular, Developmental, and Systems Neuroscience Credits: 3

One required psychology lab course (1 credit):

- PSYC 373 - Physiological Psychology Laboratory Credits: 1

Foundation area electives (12 credits)

- See advisor for list of elective courses in foundation areas.

Neuroscience electives (12 credits)

- See advisor for list of elective courses in neuroscience.

Notes:

The program requirements also meet the university general education requirements in quantitative reasoning, social and behavioral science, and natural science.
*Students intending to pursue a PhD program in neuroscience or an MD are advised to take CHEM 313 and 315 and MATH 114.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. See advisor for list of approved writing intensive courses for neuroscience.

Psychology, BA

Banner Code: LA-BA-PSYC

This program of study is offered by the Department of Psychology.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 36 credits in psychology, 24 credits at the 300 and 400 level. Students must have a minimum GPA of 2.00 in these 36 credits and a minimum grade of C- (1.67) in each of the courses.

One required introductory course (3 credits):

- PSYC 100 - Basic Concepts in Psychology Credits: 3

Four or five foundational courses (12 or 15 credits):

- PSYC 231 - Social Psychology Credits: 3
- PSYC 317 - Cognitive Psychology Credits: 3
- PSYC 325 - Abnormal Psychology Credits: 3
  and
- PSYC 211 - Developmental Psychology Credits: 3
  or two of the following:
  - PSYC 313 - Child Psychology Credits: 3
  - PSYC 314 - Adolescent Psychology Credits: 3
  - PSYC 415 - Psychological Factors in Aging Credits: 3

Two research methods courses (7 credits):
- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3

One or two courses in biopsychology (3 or 6 credits):

- PSYC 372 - Physiological Psychology Credits: 3
  or
- PSYC 375 - Brain and Behavior I Credits: 3
  and
- PSYC 376 - Brain and Behavior II Credits: 3

One course (3 credits) in history and systems:

- PSYC 465 - History and Systems in Psychology Credits: 3

2-8 credits of electives

Students complete the 36 required credits with electives in psychology (PSYC).

Notes

It is strongly recommended that students fulfill the general education natural science requirement by completing BIOL 103 and 104 because these courses are prerequisites to the requirement of PSYC 372 or PSYC 375, 376. Students who have limited technology skills are encouraged to take IT 103.

Students who receive transfer credit for a research methods course must take PSYC 304, PSYC 309, or PSYC 323 unless the transfer courses has been approved as writing intensive.

Any psychology course may be used to satisfy the 36-credit psychology requirement for the BA degree with the following restrictions:

- A maximum of 6 credits of 327, 328, 421, 422, 548, and 549 may be applied to required psychology credits
- A maximum of 6 credits of 260, 350, and 460 may be applied to required psychology credits
- No more than 9 credits can be taken from the courses listed in the two bullets above without written permission of the department chair
- PSYC 330 may not be taken for credit by psychology majors

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301, 304, 309, or 323.
Psychology, BS

Banner Code: LA-BS-PSYC

This program of study is offered by the Department of Psychology.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students pursuing this degree must complete the following coursework with a minimum GPA of 2.00.

38 credits in psychology:

24 of these credits must be at the 300 and 400 levels. Students must have a minimum grade of C- [1.67] in each of the courses used to fulfill this requirement.

One required introductory course (3 credits):

- PSYC 100 - Basic Concepts in Psychology Credits: 3

Four or five foundational courses (12 or 15 credits):

- PSYC 231 - Social Psychology Credits: 3
- PSYC 317 - Cognitive Psychology Credits: 3
- PSYC 325 - Abnormal Psychology Credits: 3
  and
- PSYC 211 - Developmental Psychology Credits: 3
  or two of the following:
  - PSYC 313 - Child Psychology Credits: 3
  - PSYC 314 - Adolescent Psychology Credits: 3
  - PSYC 415 - Psychological Factors in Aging Credits: 3

Two research methods courses (7 credits):

- PSYC 300 - Statistics in Psychology Credits: 4
- PSYC 301 - Research Methods in Psychology Credits: 3
One or two courses in biopsychology (3 or 6 credits):

- PSYC 372 - Physiological Psychology Credits: 3
  or
- PSYC 375 - Brain and Behavior I Credits: 3
  and
- PSYC 376 - Brain and Behavior II Credits: 3

One course (3 credits) in history and systems:

- PSYC 465 - History and Systems in Psychology Credits: 3

One of the following:

- PSYC 304 - Principles of Learning Credits: 4
- PSYC 309 - Sensation, Perception, and Information Processing Credits: 4
- PSYC 320 - Psychological Tests and Measurements Credits: 4
- PSYC 323 - Clinical and Social Psychology Research Techniques Credits: 4
- PSYC 373 - Physiological Psychology Laboratory Credits: 1

Elective credits

Students complete the 38 required credits in psychology (PSYC) with electives.

14 credits of natural science:

Two required science courses (8 credits):

- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4

6 credits of elective science courses chosen from:

Any course in ASTR, BIOL, CHEM, GEOL, PHYS or the following:
- GEOG 102 - Physical Geography Credits: 3
- GEOG 309 - Introduction to Meteorology and Climate Credits: 3
- UNIV 301 - Great Ideas in Science Credits: 3

6 credits of mathematics chosen from:

- MATH 108 - Introductory Calculus with Business Applications Credits: 3
- MATH 110 - Introductory Probability and Statistics Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

6 credits in social and behavioral sciences

Courses in psychology, GEOG 102, and GEOG 309 may not be used to fulfill this requirement.

3 credits in arts, philosophy, or religious studies

PHIL 173 and PHIL 376 may not be used to fulfill this requirement.

3 additional credits in arts, philosophy, religious studies, or social and behavioral sciences

Courses in psychology, GEOG 102, GEOG 309, PHIL 173, and PHIL 376 may not be used to fulfill this requirement.

One technical writing or psychology lab science course (3 or 4 credits) chosen from:

- ENGL 410 - Professional and Technical Writing Credits: 3
- PSYC 304 - Principles of Learning Credits: 4
- PSYC 309 - Sensation, Perception, and Information Processing Credits: 4
- PSYC 323 - Clinical and Social Psychology Research Techniques Credits: 4

Notes

Students who have limited technology skills are encouraged to take IT 103.

Students who receive transfer credit for a research methods course must take PSYC 304, PSYC 309, or PSYC 323 unless the transfer courses has been approved as writing intensive.
Any psychology course may be used to satisfy the 38-credit psychology requirement for the BS degree with the following restrictions:

- A maximum of 6 credits of 327, 328, 421, 422, 548, and 549 may be applied to required psychology credits
- A maximum of 6 credits of 260, 350, and 460 may be applied to required psychology credits
- No more than 9 credits can be taken from the courses listed in the two bullets above without written permission of the department chair
- PSYC 330 may not be taken for credit by psychology majors

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301, 304, 309, or 323.

Undergraduate Minor

Psychology Minor

Banner Code: PSYC

The minor in psychology is open to students who major in any other discipline.

This program of study is offered by the Department of Psychology.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits in psychology distributed as follows:

One required course (3 credits):

- PSYC 100 - Basic Concepts in Psychology Credits: 3

Three courses (9 credits) from three of the following five areas, at least one area must be cognition or physiological:

Developmental:

- PSYC 211 - Developmental Psychology Credits: 3
- PSYC 313 - Child Psychology Credits: 3

Social/personality:
• PSYC 231 - Social Psychology Credits: 3
• PSYC 324 - Personality Theory Credits: 3

Cognition:
• PSYC 317 - Cognitive Psychology Credits: 3

Abnormal:
• PSYC 325 - Abnormal Psychology Credits: 3

Physiological:
• PSYC 372 - Physiological Psychology Credits: 3
  or
• PSYC 375 - Brain and Behavior I Credits: 3
  and
• PSYC 376 - Brain and Behavior II Credits: 3

Additional psychology courses (6 credits):
No more than 3 credits taken from each.
• PSYC 260 - Basic Research Methods in Psychology Credits: 1-3
• PSYC 350 - Directed Reading and Research in Psychology Credits: 1-3
• PSYC 460 - Independent Study in Psychology Credits: 1-3

Notes:
Related course work in psychology can enhance many different majors. Please contact the Undergraduate Psychology Office or the Psychology Department web site for a list of suggested courses for students who are majoring in specific disciplines or areas of study that interact well with psychology.

Total: 18 credits

Bachelor's/Accelerated Master's Program

Psychology, BA or BS/Psychology, Accelerated MA (Biopsychology)
Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain a bachelor’s in psychology and a master’s in psychology with a concentration in biopsychology following satisfactory completion of 146 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory graduate-level performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met. This program is available only to students pursuing the concentration in biopsychology. Interested students should contact the department for details about the application process.

Master's Degree

Psychology, MA

Banner Code: LA-MA-PSYC

The master’s degree in psychology has concentrations in applied developmental psychology, biopsychology, human factors/applied cognition, industrial/organizational psychology, and school psychology. The department does not offer a master's degree in clinical or counseling psychology, but a master's degree in psychology with a concentration in clinical psychology is available for students who have been admitted to the doctoral program concentration in clinical psychology.

This program of study is offered by the Department of Psychology.

For policies governing all masters degree, see the Academic Policies chapter of the catalog.

Application Requirements

In addition to fulfilling admission requirements for graduate study, applicants must have 15 credits in psychology including a course in statistics and a laboratory course in psychology. In addition, school psychology requires courses in personality or abnormal psychology, developmental psychology, and tests and measurements. All applicants are required to submit results of the GRE taken within the past five years (applicants should plan to take the GRE at least two months before the deadline); three letters of reference from professors or supervisors; and a departmental application. Applicants are asked to submit a biographical statement outlining their background and experience and describing their future goals in psychology.

Successful applicants have an overall GPA of 3.00 for the last 60 undergraduate credits, generally a minimum GPA of 3.25 in undergraduate psychology courses, and combined GRE scores of 1,000 or above. Work experience, publications, or special recommendations may compensate for deficiencies in other qualifications. Because the number of students admitted to each program is limited, meeting these minimum requirements does not guarantee admission.

Provisional Admission

Students who are admitted provisionally are required to take 12 credits in psychology and earn a minimum GPA of 3.25 in those courses to qualify for removal of the provisional qualifier. Programs may add other conditions to provisional admission. Individualized study courses can not be used toward the 12 credits.

Degree Requirements

In addition to satisfying the requirements for all master’s degrees, students pursuing a master's degree in psychology must successfully complete 32 - 46 credits of required course work. They must complete this coursework in one of six concentrations.
A minimum of 9 credits of 798, 799, 597, or 792 may be applied toward the master's degree. A maximum of 6 credits of 798 and 799 may be applied to the master's degree.

▲ Concentration in Applied Developmental Psychology (APD)

The applied developmental psychology concentration focuses on child development. It provides basic knowledge about normal development, skills for assessing developmental level, and techniques for planning and evaluating programs that foster optimal development.

Students must complete 32 graduate credits.

Core courses (6 credits) chosen from:

Social:

- PSYC 667 - Behavior in Small Groups and Teams Credits: 3
- PSYC 668 - Personality: Theoretical and Empirical Approaches Credits: 3
- PSYC 703 - Social Bases of Behavior Credits: 3

Biological

- PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
- PSYC 559 - Behavioral Chemistry Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3

Cognitive:

- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Quantitative methods (8 credits):

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

Specialized content (8 credits) chosen from:

- PSYC 592 - Special Topics Credits: 3 (when the content is development)
- PSYC 648 - Developmental Psychopathology Credits: 3
- PSYC 666 - Cognitive and Perceptual Development Credits: 3
• PSYC 669 - Social and Emotional Development Credits: 3
• PSYC 704 - Life-Span Development Credits: 3
• PSYC 780 - Applied Developmental Psychology Credits: 3

Thesis research or practicum experience (4 credits) chosen from:

Thesis (4 credits)

• PSYC 798 - Thesis Proposal Credits: 1-6
• PSYC 799 - Master's Thesis Credits: 1-6

Practicum (4 credits)

Practicum is 3 credits of 792 and 1 credit of 597.

• PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology Credits: 1-6
• PSYC 597 - Directed Reading and Research Credits: 1-3

Professional seminar (2 credits):

• PSYC 591 - Professional Seminar Credits: 1-3

Electives (4 credits)

Students complete the 32 credits required for this degree through a content course, practicum, or directed reading and research.

▲ Concentration in Biopsychology (BP)

The biopsychology concentration emphasizes training in the neurobiological bases of behavior. Students are prepared for doctoral work or employment in government or industry research laboratories.

Students must complete 32 graduate credits.

Two courses (5 credits) of specialized content:

• PSYC 527 - Introduction to Neurobiology Credits: 2
• PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
One chemistry course (3 credits) chosen from:

- PSYC 556 - Chemistry and the Brain Credits: 3
- PSYC 559 - Behavioral Chemistry Credits: 3

Two quantitative methods courses (8 credits):

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

Professional seminar (1 credit):

- PSYC 591 - Professional Seminar Credits: 1-3

Two courses (6 credits) chosen from:

- BIOL 583 - General Biochemistry Credits: 4
- PSYC 561 - Behavioral Biology of Substance Abuse Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

Elective coursework

Students complete the 32 credits required for this degree through additional credits of course work or research.

Thesis (6 credits):

A thesis is normally required, but 6 credits of PSYC 792 - Practicum may serve as a substitute if approved by the advisor and program coordinator.

- PSYC 798 - Thesis Proposal Credits: 1-6
- PSYC 799 - Master's Thesis Credits: 1-6

▲ Concentration in Clinical Psychology (CLN)

The clinical psychology concentration trains students to have flexibility to fill the evolving functions of clinical psychologists, including research, direct provision of clinical services, supervision, program development and evaluation, and consultation.
The clinical psychology MA concentration is not a terminal degree. Students who have been admitted to the doctoral program with a concentration in clinical psychology may apply to receive the MA in psychology on completion of 32 credits of course work. Students must also be in good standing in the program, as determined by the director of clinical training.

Four required courses (14 credits):

- PSYC 810 - Psychological Assessment I Credits: 4
- PSYC 811 - Psychological Assessment II Credits: 4
- PSYC 822 - Scientific Foundations of Clinical Psychology I Credits: 3
- PSYC 823 - Scientific Foundations of Clinical Psychology II Credits: 3

Two courses (8 credits) in advanced statistics:

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

One course (3 credits) in practicum:

- PSYC 881 - Practicum in Clinical Psychology Credits: 3

One course (1 credit) in seminar:

- PSYC 890 - Seminar in Professional Psychology Credits: 1-3

Two courses (6 credits) chosen from:

**Biological Bases of Behavior:**

- PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
- PSYC 559 - Behavioral Chemistry Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3

**Developmental Bases of Behavior:**

- PSYC 666 - Cognitive and Perceptual Development Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

**Social and Cognitive Foundations of Clinical Psychology:**

- PSYC 833 - Social And Cognitive Foundations Of Clinical Psychology Credits: 3
History, Systems, and Theories of Personality and Psychotherapy:

- PSYC 830 - History, Systems, and Theories of Personality and Psychotherapy Credits: 3

Social-Cognitive Interventions in Clinical Psychology:

- PSYC 831 - Social-Cognitive Interventions in Clinical Psychology Credits: 3

Community Psychology I:

- PSYC 840 - Community Psychology I Credits: 3

Community Psychology II:

- PSYC 841 - Community Psychology II Credits: 3

▲ Concentration in Human Factors/Applied Cognition (HF)

The human factors/applied cognition concentration trains students in the application of cognitive science to real-world problems. Students gain expertise in such areas as human/computer interaction, cognitive system engineering, cognitive ergonomics, and transportation. Faculty members help place students who do not have real-world experience in a part- or full-time practicum before completing the degree.

Students must complete 32 graduate credits.

One core course (3 credits) chosen from:

- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 759 - Applied Decision Making Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Two courses (8 credits) of quantitative and research methods:

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

Two courses (6 credits) of specialized content:

- PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors Credits: 3
- PSYC 645 - Research Methods in Human Factors and Applied Cognition Credits: 3
Two courses (6 credits) which may be repeated, chosen from:

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Electives

Students complete the 32 credits required for this degree through additional course work, including courses not listed above within or outside the department, with prior written approval of the graduate director.

Practicum (optional) (6 credits)

Students need an advisor's approval to register for practicum.

- PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology Credits: 1-6

Thesis (optional) (6 credits)

Students need the chair's approval to register for thesis.

- PSYC 798 - Thesis Proposal Credits: 1-6
- PSYC 799 - Master's Thesis Credits: 1-6

▲ Concentration in Industrial/Organizational Psychology (IO)

The industrial/organizational psychology concentration trains students in the conduct and application of psychological research in work settings. Expertise can be developed in a variety of areas, including personnel selection, training, leadership, motivation, and human performance assessment.

Students pursuing this concentration must complete 32 graduate credits.

One core course (3 credits) chosen from:

- PSYC 667 - Behavior in Small Groups and Teams Credits: 3
- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 703 - Social Bases of Behavior Credits: 3

Two courses (8 credits) of quantitative and research methods:

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4
Four courses (12 credits) of specialized content:

- PSYC 636 - Survey of Industrial Psychology Credits: 3
- PSYC 639 - Survey of Organizational Processes Credits: 3

and one course (3 credits) chosen from:

- PSYC 592 - Special Topics Credits: 3
- PSYC 735 - Psychological Perspectives on Organizational Development Credits: 3
- PSYC 739 - Seminar in Industrial/Organizational Psychology Credits: 3
- PSYC 741 - Psychology of Work Motivation Credits: 3

and one course (3 credits) chosen from:

- PSYC 557 - Psychometric Methods Credits: 3
- PSYC 592 - Special Topics Credits: 3
- PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
- PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation Credits: 3
- PSYC 640 - Techniques in Industrial/Organizational Psychology Credits: 3
- PSYC 733 - Issues in Personnel Psychology Credits: 3
- PSYC 736 - Research in Human Performance Assessment Credits: 3

Electives

Students complete the 32 credits required for this degree through additional course work. A maximum of 6 credits may come from courses outside the department with prior written approval of the graduate director.

Practicum (optional) (1-6 credits)

Students need an advisor’s approval to register for practicum.

Thesis (optional) (3-6 credits)

Students need the chair’s approval to register for thesis.

▲ Concentration in School Psychology (SCH)

The concentration in school psychology consists of a combined master’s degree and the Certificate of Advanced Graduate Studies (CAGS).

The school psychology concentration is committed to an instructional model that combines a sound understanding of psychological theory and research with outstanding practicum and internship experiences. The curriculum imparts foundational knowledge in psychology, education, intervention and problem solving, statistics and research methodology, and professional school psychology, along with practicum and internship experiences.
The master’s degree concentration and certificate make up a degree program designed to prepare graduates for professional certification in school psychology. The program is approved by School Psychology Training Programs of the National Association of School Psychologists (NASP). Students completing the master’s degree and certification will be eligible for licensure in Virginia and certification or licensure in other states as a school psychologist. Please note that the certification or licensure as a school psychologist typically requires all course work for both the master’s degree and the certificate of advanced studies. (Students seeking licensure for independent practice as a school psychologist must meet the educational, residency, and exam requirements of the Commonwealth of Virginia Board of Psychology.)

Students who have not already earned a master’s degree in a related field must apply for admission to both the master’s program and the certificate. All students entering the master’s program are expected to complete the certificate of advanced graduate studies. In other words, the master’s degree is not a terminal degree. Students who are completing an internship in the local area and wish to enroll in the internship class may do so by enrolling in nondegree status.

With approval of the school psychology faculty, graduate coordinator, and dean, the number of credits required for the concentration may be reduced by a maximum of 18 credits on the basis of graduate course work completed before admission.

Students in the school psychology concentration are required to enroll full time unless an alternative arrangement is made with the permission of the director of the concentration.

All students must complete a research project and, as part of the Certificate of Advanced Graduate Studies, a full year of internship. An unsatisfactory evaluation at any time by the School Psychology Committee may result in termination from the School Psychology Program.

Students pursuing the combined concentration in school psychology and certificate of Advanced Graduate Studies must complete 61 credits, with a minimum grade of 3.00 in each course.

One required counseling course (3 credits):

- EDCD 603 - Counseling Theories and Practice Credits: 3

One required EDSE course (3 credits) chosen from:

- EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum Credits: 3
- EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum Credits: 3

One course (3 credits) chosen from:

- PSYC 506 - Theories of Personality Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

Additional required psychology courses (37 credits):
• PSYC 592 - Special Topics Credits: 3 (when topic is Diversity)
• PSYC 611 - Advanced Statistics Credits: 4
• PSYC 612 - Advanced Statistics Credits: 4
• PSYC 617 - Child Psychopathology Credits: 3
• PSYC 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy Credits: 3
• PSYC 671 - Role and Function of the School Psychologist Credits: 3
• PSYC 673 - Prevention, Intervention, and Consultation in Schools Credits: 4
• PSYC 709 - The Measurement of Intelligence Credits: 4
• PSYC 710 - Psychological Assessment Credits: 4
• PSYC 750 - School Psychology Practicum I Credits: 1
• PSYC 722 - Advanced Child Assessment Credits: 4

Mandatory completion of School Psychology Certificate of Advanced Graduate Studies (15 credits)

Master's Level Certificate

Aviation Psychology Graduate Certificate

Banner Code: LA-CERG-AVIP

This program of study is offered by the Department of Psychology.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must successfully complete five courses (15 credits), distributed as follows:

Three required courses (9 credits):

• PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors Credits: 3
• PSYC 645 - Research Methods in Human Factors and Applied Cognition Credits: 3
• PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3 (when aviation-related topic is approved for this certificate by the program director)

Two elective courses (6 credits) chosen from:

• PSYC 597 - Directed Reading and Research Credits: 1-3 (when topic is approved for this certificate)
• PSYC 768 - Advanced Topics in Cognitive Science Credits: 3
• PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
• SYST 560 - Introduction to Air Traffic Control Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3

Total: 15 credits

Cognitive Neuroscience Graduate Certificate

Banner Code: LA-CERG-CNEU

This program of study is offered by the Department of Psychology.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must successfully complete six courses (18 credits), distributed as follows:

Core courses (9 credits):

- PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3 (repeatable, when topic is cognitive neuroscience)

One course (3 credits) chosen from:

- PSYC 527 - Introduction to Neurobiology Credits: 2
- PSYC 531 - Mammalian Neurobiology Credits: 3
- PSYC 556 - Chemistry and the Brain Credits: 3
- PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
- PSYC 559 - Behavioral Chemistry Credits: 3

Two elective courses (6 credits) chosen from:

- PSYC 702 - Biological Bases of Human Behavior Credits: 3
- PSYC 597 - Directed Reading and Research Credits: 1-3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Note:

PSYC 597, 766, and 768, when topic is relevant, may be used to fulfill this requirement with prior written approval of the program director.
Total: 18 credits

School Psychology Certificate of Advanced Graduate Studies

Banner Code: LA-CERM-ASP

This program of study is offered by the Department of Psychology.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must have successfully completed the master’s degree in psychology concentration in school psychology. Students must complete 15 credits with a minimum grade of 3.00 in each course. All coursework for the master’s degree must be completed before registering for the internship (PSYC 790).

One required course (3 credits) chosen from:

- PSYC 592 - Special Topics Credits: 3 (when topic is Developmental Assessment)
- PSYC 630 - Developmental Disabilities Credits: 3
- EDCD 608 - Group Processes and Analyses Credits: 4

Two assessment practicum’s (4 credits):

- PSYC 751 - School Psychology Assessment Practicum II Credits: 2

6 credits of internship

- PSYC 790 - School Psychology Internship Credits: 3-12

2 credits of practicum:

- PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology Credits: 1-6
Total: 15 credits

Usability Graduate Certificate

Banner Code: LA-CERG-UBTY

This program of study is offered by the Department of Psychology.

For policies governing all graduate degrees, see the Academic Policies chapter of this catalog.

Certificate Requirements

Students pursuing this certificate must successfully complete five courses (15 credits), distributed as follows:

Three core courses (9 credits):

- PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors Credits: 3
- PSYC 645 - Research Methods in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Two elective courses (6 credits) chosen from:

- PSYC 597 - Directed Reading and Research Credits: 1-3 (when topic is approved for this certificate)
- PSYC 654 - Naturalistic Methods in Psychology Credits: 3
- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3 (when topic is approved for this certificate)
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3
- EDIT 526 - Web Accessibility and Design Credits: 3
- EDIT 571 - Tools for Visual/Graphic Design Credits: 1-3
- EDIT 705 - Instructional Design Credits: 3
- EDIT 773 - Human Computer Interface Design for Teaching and Learning Credits: 3

Total: 15 credits

Doctoral Degree

Psychology, PhD
The goal of the doctoral program is to train students in the principles and applications of psychology. The program provides knowledge of the basic content areas in psychology and practical experience in applying this knowledge to solving human problems in life, work, and school. The program offers the following concentrations: industrial/organizational psychology, human factors/applied cognition, clinical psychology, applied developmental psychology, and biopsychology.

This program of study is offered by the Department of Psychology.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Entering students are accepted only for fall semesters. The department does not usually consider applications that fail to meet the minimum criteria of 3.00 undergraduate GPA, 3.25 GPA in psychology course work, and combined GRE scores of 1,100. Applicants who meet this minimum receive continued consideration for the final candidate pool on the basis of experience, letters of recommendation, objective test scores, and (in some programs) an interview. No specific set of qualifications guarantees admission.

In addition to admission materials required by the university, applicants must submit the following:

- Completed Department of Psychology form
- Three letters of recommendation from individuals who have firsthand knowledge of the applicant’s academic capabilities or work experience
- A two- to three-page typewritten personal statement describing professional goals, training history, and reasons for seeking the PhD
- GRE results taken within the past five years and before the application deadline. Applicants should take the GRE by October because applications cannot be processed until these scores are received. Scores must be sent directly from Educational Testing Service, P.O. Box 955, Princeton, NJ 08541. Only the aptitude scores are required, but scores for the Advanced Test in Psychology may also be submitted.

Applicants are responsible for ensuring that all materials arrive before the application deadline. Also, applicants in the final candidate pool may be required to participate in an interview.

In addition to fulfilling admission requirements, applicants are expected to have the following:

- For the PhD with a concentration in industrial/organizational psychology or in human factors/applied cognition, at least 15 credits in psychology, including a statistics course and a laboratory course in psychology. A tests and measurements course is recommended.
- For the PhD with a concentration in clinical psychology, at least 15 credits in psychology, including a statistics course, laboratory science course, and abnormal psychology. Courses in developmental psychology, personality, physiological psychology, and tests and measurements are desirable.
- For the PhD with a concentration in applied developmental psychology, at least 15 credits in psychology, including statistics and a laboratory course in experimental psychology. Courses in personality, abnormal psychology, developmental psychology, and tests and measurements are also required for applicants to the school psychology concentration within the MA program.
- For the PhD with a concentration in biopsychology, at least 15 hours of psychology, including physiological psychology, statistics, and a lab course in experimental psychology.

Reduction of Credit
For students entering the doctoral program with a master’s degree, the number of credits required may be reduced by a maximum of 30 credits subject to the approval of the program faculty and the dean. Requests for reduction of credit are reviewed by a committee only after acceptance to the PhD program.

Core Courses

Core course requirements cover the basic subject matter identified by the profession as essential to doctoral training: biological bases of behavior, social bases of behavior, cognitive bases of behavior, individual behavior, and history of psychology.

Specialty Courses

The 700-, 800-, and 900-level courses provide doctoral candidates with greater depth of study in specific content areas.

Practica

The purpose of the practica is to provide a broad range of experiences in settings related to the students’ concentrations.

Advancement to Candidacy

To advance to candidacy, students must complete all required, nonelective course work on their approved program of study. Students must also successfully complete and pass written and oral comprehensive exams.

Dissertation

The dissertation requirement is designed to demonstrate the student’s ability to apply psychological principles to research problems. Students must take at least 3 credits of proposal (998) and 3 credits of research (999), and have at least 12 credits of 998 and 999 combined. (No more than 12 credits of 998 and 999 may be applied toward the degree.) Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by University Libraries.

Student Evaluation

Students in the doctoral program are evaluated on the basis of grades, comprehensive exams, research, and communication skills. In doctoral courses, A and B are the only acceptable grades. Students in the doctoral program must successfully complete comprehensive exams administered each year.

Degree Requirements

In addition to satisfying the requirements for all doctoral degrees, students must successfully complete 72 – 74 credits of required course work chosen in one of five concentrations. Each concentration consists of four educational components: core courses, upper-level specialty courses, supervised practica, and dissertation.

▲ Concentration in Applied Developmental Psychology (APD)

The applied developmental psychology concentration is concerned with enhancing developmental processes and preventing developmental disorders in individuals and families across the life span. It uses the knowledge base and methodologies of developmental science to assist the development of individuals who vary in cultural and ethnic backgrounds; economic and social
opportunities; physical, social, emotional, and cognitive abilities; and conditions of living (e.g., families, neighborhoods, communities, and physical settings). The program emphasis is on child development (infancy, early childhood, middle childhood, and adolescence), and students may focus their studies on the cognitive, social, emotional, language, personality, or physiological aspects of development.

The applied developmental concentration has two goals: to train students to teach and do research on basic and applied issues in child development for employment in such settings as universities, research institutes, and organizations, and to train students to do applied work in developmental psychology (consultation, program evaluation, assessment and evaluation, developmental interventions, and parent training) in such settings as schools, hospitals, courts, child care facilities, and other organizations. Applied developmental psychology doctoral students have the option of also completing course requirements for the MA concentration in school psychology.

Students pursuing this concentration must complete 72 credits.

**Developmental core (3 credits)**

- PSYC 704 - Life-Span Development Credits: 3

**Cognitive, biological, social, or history core (6 credits) chosen from:**

- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3
- PSYC 703 - Social Bases of Behavior Credits: 3
- PSYC 705 - Historical and Philosophical Issues in Psychology Credits: 3

**Quantitative methods (8 credits):**

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

**Advanced specialized methods (9 credits), including the following:**

**Quantitative methods (at least 3 credits):**

- PSYC 652 - Quantitative Methods II: Analysis of Variance Credits: 3
- PSYC 754 - Quantitative Methods III: Psychological Applications of Regression Techniques Credits: 3
- PSYC 756 - Quantitative Methods IV: Multivariate Techniques in Psychology Credits: 3

**Research methods (at least 3 credits):**

- PSYC 646 - Issues and Methods in Longitudinal Developmental Research Credits: 3
- PSYC 654 - Naturalistic Methods in Psychology Credits: 3
Specialized methods:

- PSYC 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy Credits: 3
- PSYC 673 - Prevention, Intervention, and Consultation in Schools Credits: 4
- PSYC 684 - Psychological Counseling Techniques Credits: 3
- PSYC 709 - The Measurement of Intelligence Credits: 4
- PSYC 710 - Psychological Assessment Credits: 4
- PSYC 722 - Advanced Child Assessment Credits: 4
- PSYC 786 - Assessment and Treatment in Gerontology Credits: 3
- EDSE 649 - Advanced Clinical Psycho-Educational Assessment in Special Education Credits: 3

Specialized content (15 credits):

Foundations (at least 9 credits):

- PSYC 666 - Cognitive and Perceptual Development Credits: 3 (required)
- PSYC 614 - The Psychology of Aging Credits: 3
- PSYC 615 - Language Development Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 892 - Special Topics in Psychology Credits: 3

Applications:

- PSYC 630 - Developmental Disabilities Credits: 3
- PSYC 648 - Developmental Psychopathology Credits: 3
- PSYC 780 - Applied Developmental Psychology Credits: 3

Professional seminar/professional ethics (3 credits)

- Taken during first year: fall, 2 credits; spring, 1 credit

Directed Reading and Research (8 credits):

- PSYC 897 - Directed Reading and Research Credits: 1-3

Dissertation (12 credits):

At least 3 credits of 998 and 3 credits of 999

- PSYC 998 - Doctoral Dissertation Proposal Credits: variable
- PSYC 999 - Doctoral Dissertation Credits: variable
Elective courses (0 to 8 credits)

Practicum (0 to 6 credits)

- PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology Credits: 1-6

Notes:

PSYC 703, 710, 722 can be taken only by students concurrently enrolled in school psychology MA concentration.

In addition, students are required to complete a second-year research project before they can take comprehensive exams. The expectation is that the research will be submitted for presentation at a national conference or to an appropriate journal for publication.

Total: 72 credits

▲ Concentration in Biopsychology (BP)

The biopsychology concentration focuses on studying the biological substrates of behavior. Core and affiliated faculty in the neuroscience and cognitive programs study areas as diverse as neural control of behavioral development; brain systems in substance abuse; animal models of learning and memory and their disorders (such as Alzheimer’s); human brain systems involved in cognition, perception, and movement; and computational models of neural functioning.

The program’s core facilities have well-equipped behavioral testing and histological/histochemical facilities. The program’s strong links to the Krasnow Institute for Advanced Study and the Center for Biomedical Genomics and Informatics allows opportunities for collaborative work as diverse as tissue slice preparations and molecular genetics. The doctoral program prepares students for research-based careers in academics, government, or industry.

Students pursuing this concentration must complete 72 graduate credits.

Biopsychology core (11 credits):

- PSYC 527 - Introduction to Neurobiology Credits: 2
- PSYC 531 - Mammalian Neurobiology Credits: 3
- PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3

and one of the following:

- PSYC 559 - Behavioral Chemistry Credits: 3
- PSYC 556 - Chemistry and the Brain Credits: 3
- PSYC 592 - Special Topics Credits: 3
Two courses (6 credits) chosen from:

Cognitive:

- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Developmental:

- PSYC 666 - Cognitive and Perceptual Development Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

Social:

- PSYC 667 - Behavior in Small Groups and Teams Credits: 3
- PSYC 668 - Personality: Theoretical and Empirical Approaches Credits: 3
- PSYC 703 - Social Bases of Behavior Credits: 3

Historical:

- PSYC 705 - Historical and Philosophical Issues in Psychology Credits: 3

Specialized content (15 credits) selected from an approved list, including:

- PSYC 561 - Behavioral Biology of Substance Abuse Credits: 3
- PSYC 592 - Special Topics Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3
- BIOL 572 - Human Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- CSI 739 - Topics in Bioinformatics Credits: 3

Three semesters of 1-credit research course (3 credits)

- PSYC 897 - Directed Reading and Research Credits: 1-3

Third year research project (3 credits) chosen from:
• PSYC 897 - Directed Reading and Research Credits: 1-3
• PSYC 798 - Thesis Proposal Credits: 1-6
• PSYC 799 - Master's Thesis Credits: 1-6

Quantitative and research methods (8 credits):

• PSYC 611 - Advanced Statistics Credits: 4
• PSYC 612 - Advanced Statistics Credits: 4

Quantitative or research methods (6 credits):

at least one course (3 credits) chosen from:

• PSYC 652 - Quantitative Methods II: Analysis of Variance Credits: 3
• PSYC 754 - Quantitative Methods III: Psychological Applications of Regression Techniques Credits: 3
• PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3

Neuroscience seminars (2 credits):

• NEUR 709 - Neuroscience@GMU Seminars Credits: 1
  and 1 credit of:
• PSYC 890 - Seminar in Professional Psychology Credits: 1-3

Elective credits

Students can complete the 72 credit requirement through credits of additional coursework, research, or seminar.

Dissertation (12 credits):

• PSYC 998 - Doctoral Dissertation Proposal Credits: variable
• PSYC 999 - Doctoral Dissertation Credits: variable

Total: 72 credits

▲ Concentration in Clinical Psychology (CLN)

The clinical psychology concentration is committed to the scientist–practitioner model. The goal of the program is to train clinical psychologists who are capable of integrating research and applied clinical activities. The program is unique in
approaching clinical psychology from social psychological and community perspectives. A social psychological approach uses theory and research from social psychology to understand emotional, cognitive, behavioral, and interpersonal functioning. A community approach stresses the impact of social and cultural factors on the individual and the impact of the individual on the community. Most of the faculty members employ cognitive–behavioral and interpersonal approaches to research and clinical practice.

Students pursuing this concentration must complete 72 graduate credits.

**One course (3 credits) of biological bases of behavior chosen from:**

- PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
- PSYC 559 - Behavioral Chemistry Credits: 3
- PSYC 702 - Biological Bases of Human Behavior Credits: 3

**One course (3 credits) of developmental bases of behavior chosen from:**

- PSYC 666 - Cognitive and Perceptual Development Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

**Thirteen required courses (45 credits):**

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4
- PSYC 810 - Psychological Assessment I Credits: 4
- PSYC 811 - Psychological Assessment II Credits: 4
- PSYC 822 - Scientific Foundations of Clinical Psychology I Credits: 3
- PSYC 823 - Scientific Foundations of Clinical Psychology II Credits: 3
- PSYC 830 - History, Systems, and Theories of Personality and Psychotherapy Credits: 3
- PSYC 831 - Social-Cognitive Interventions in Clinical Psychology Credits: 3
- PSYC 833 - Social And Cognitive Foundations Of Clinical Psychology Credits: 3
- PSYC 840 - Community Psychology I Credits: 3
- PSYC 841 - Community Psychology II Credits: 3
- PSYC 881 - Practicum in Clinical Psychology Credits: 3
- PSYC 890 - Seminar in Professional Psychology Credits: 1-3

**Three elective courses (9 credits)**

- Must be approved by advisor

**Dissertation (12 credits):**

At least 3 credits of each.

- PSYC 998 - Doctoral Dissertation Proposal Credits: variable
• PSYC 999 - Doctoral Dissertation Credits: variable

Internship

• Full-time, 12-month clinical psychology internship at a site accredited by the American Psychological Association

Externship (optional, but recommended)

• Part-time clinical psychology externship in the third or fourth year of the program

Total: 72 credits

▲ Concentration in Human Factors/Applied Cognition (HF)

The human factors and applied cognition concentration covers basic theoretical and empirical issues and emphasizes research that applies cognitive science to real-world problems. The program builds bridges between human factors engineering and cognitive psychology. Many applications of cognitive science are in the domain of human factors, and many doctoral students who complete our program go on to be human factors professionals.

Students pursuing this concentration must complete 72 graduate credits.

One course (3 credits) of cognitive core chosen from:

• PSYC 701 - Cognitive Bases of Behavior Credits: 3
• PSYC 759 - Applied Decision Making Credits: 3
• PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
• PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Two core courses (6 credits) chosen from:

Biological:

• PSYC 558 - Neuronal Bases of Learning and Memory Credits: 3
• PSYC 559 - Behavioral Chemistry Credits: 3
• PSYC 702 - Biological Bases of Human Behavior Credits: 3

Social:

• PSYC 667 - Behavior in Small Groups and Teams Credits: 3
• PSYC 668 - Personality: Theoretical and Empirical Approaches Credits: 3
• PSYC 703 - Social Bases of Behavior Credits: 3
Developmental:

- PSYC 666 - Cognitive and Perceptual Development Credits: 3
- PSYC 669 - Social and Emotional Development Credits: 3
- PSYC 704 - Life-Span Development Credits: 3

Historical:

- PSYC 705 - Historical and Philosophical Issues in Psychology Credits: 3

Two courses (8 credits) of quantitative and research methods:

- PSYC 611 - Advanced Statistics Credits: 4
- PSYC 612 - Advanced Statistics Credits: 4

Three courses (9 credits) of advanced statistics or qualitative methods

Two courses (6 credits) of specialized content:

- PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors Credits: 3
- PSYC 645 - Research Methods in Human Factors and Applied Cognition Credits: 3

Three courses (9 credits) of additional specialized content including:

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

One course (3 credits) of special topics in professional issues:

- PSYC 890 - Seminar in Professional Psychology Credits: 1-3

Dissertation (12 credits):

- PSYC 998 - Doctoral Dissertation Proposal Credits: variable
- PSYC 999 - Doctoral Dissertation Credits: variable
Options:

To reach the 72 credits required for the PhD, students may repeat 734, 737, 766, or 768, or they may take 3 to 6 credits of practicum (PSYC 730) with permission of the advisor. (Students who do not have work experience in applied cognition or human factors are encouraged to take up to 6 credits of practicum.)

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3
- PSYC 730 - Practicum in Applied Psychology Credits: 1-6

Notes:

Students are to take credits in PSYC 897 each semester. Students are strongly encouraged to develop competence in programming and computer science through course work or independent study.

Students are encouraged to identify and take relevant courses within or outside the department (with advisor’s approval).

Total: 72 credits

▲ Concentration in Industrial/Organizational Psychology (IO)

The industrial/organizational psychology concentration focuses on multiple aspects of behavior in organizational settings, including personnel selection, quantitative analysis, teams, leadership, work and family issues, and organizational health issues. Mason’s graduate work in this area emphasizes research as the key to knowledge in both academic and applied settings. The program fosters a peer-oriented environment whereby students collaborate on numerous projects in addition to working with faculty members, in many different areas of industrial/organizational psychology.

Students pursuing this concentration must complete 74 graduate credits.

Three courses (9 credits) of core chosen from:

One course from each core

Cognitive:

- PSYC 701 - Cognitive Bases of Behavior Credits: 3
- PSYC 759 - Applied Decision Making Credits: 3
- PSYC 766 - Advanced Topics in Sensation and Perception Credits: 3
- PSYC 768 - Advanced Topics in Cognitive Science Credits: 3

Social:
• PSYC 667 - Behavior in Small Groups and Teams Credits: 3
• PSYC 668 - Personality: Theoretical and Empirical Approaches Credits: 3
• PSYC 703 - Social Bases of Behavior Credits: 3

Historical:

• PSYC 705 - Historical and Philosophical Issues in Psychology Credits: 3

Two courses (8 credits) of quantitative and research methods:

• PSYC 611 - Advanced Statistics Credits: 4
• PSYC 612 - Advanced Statistics Credits: 4

Three courses (9 credits) of advanced quantitative and research methods:

• PSYC 557 - Psychometric Methods Credits: 3
• PSYC 754 - Quantitative Methods III: Psychological Applications of Regression Techniques Credits: 3
• PSYC 756 - Quantitative Methods IV: Multivariate Techniques in Psychology Credits: 3

Six courses (18 credits) of specialized content:

• PSYC 636 - Survey of Industrial Psychology Credits: 3
• PSYC 639 - Survey of Organizational Processes Credits: 3

and 6 credits chosen from:

• PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
• PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation Credits: 3
• PSYC 640 - Techniques in Industrial/Organizational Psychology Credits: 3
• PSYC 733 - Issues in Personnel Psychology Credits: 3
• PSYC 736 - Research in Human Performance Assessment Credits: 3
• PSYC 592 - Special Topics Credits: 3
• PSYC 892 - Special Topics in Psychology Credits: 3

and 6 credits chosen from:

• PSYC 667 - Behavior in Small Groups and Teams Credits: 3
• PSYC 735 - Psychological Perspectives on Organizational Development Credits: 3
• PSYC 739 - Seminar in Industrial/Organizational Psychology Credits: 3
• PSYC 741 - Psychology of Work Motivation Credits: 3
• PSYC 592 - Special Topics Credits: 3
• PSYC 892 - Special Topics in Psychology Credits: 3
One course (3 credits) of special topics in professional issues:

- PSYC 890 - Seminar in Professional Psychology Credits: 1-3

Three elective courses (9 credits)

- Courses can be from outside the department with advisor approval

Practicum (6 credits):

- PSYC 730 - Practicum in Applied Psychology Credits: 1-6

Dissertation (12 credits):

- PSYC 998 - Doctoral Dissertation Proposal Credits: variable
- PSYC 999 - Doctoral Dissertation Credits: variable

Total: 74 credits

■ Public and International Affairs

Phone: 703-993-1400
Web: pia.gmu.edu

Faculty

Robinson Professors: Heclo, Paden

Emeritus faculty: Brown, Clark, Early, Gortner, Hart-Nibbrig, Knight, White

Professors: Abramson, Cioffi-Revilla, Conant, Conlan, Druckman, Dudley (chair), Katz, Posner, Regan, Sockett, Wan, Wilsford

Associate professors: Balint, Burt, Dueck, Hackler, Harbour, Lukacs, Mahler, Mandaville, McDonald, McFerson, Miller, Nguyen, Sacco, Snyder-Hall, Toepler, Travis

Assistant professors: Benjamin, Bowie, Brigety, Haddad, Koblentz, Lopez-Santana, Ouagrham-Gormley, Robbins

Term assistant professors: Burroughs, Palubinskas, Walker

Affiliate faculty: Bushee, Casamayou, Connolly, Edner, Shogan
Course Work

The Public and International Affairs Department offers all course work designated BIOD, GOVT, and PUAD in the Courses chapter of this catalog.

Undergraduate Programs

The department offers two degrees for students interested in political science, government, and international relations: a BA in government and international politics and a BS in public administration. Majors in government and international politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American politics, international politics, political theory and law, or public policy. Majors in public administration take courses in government and nonprofit management, computer applications, and business administration.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning college credit.

Honors in the Major

Highly qualified students majoring in government and international politics and public administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence GOVT 491 and 496. To graduate with honors in the major, students must complete these courses with a GPA of at least 3.00.

Minors

The department offers minors in American government, international/comparative studies, legal studies, and public policy and management. In addition, it coordinates the Asia-Pacific Studies Minor, Global Systems Minor, and Urban and Suburban Studies Minor and participates with the Philosophy Department in the Political Philosophy Minor. See the Interdisciplinary Minors section in this chapter for descriptions of these minors.

Bachelor's/Accelerated Master's Programs

The department offers highly qualified undergraduates the opportunity to apply to an accelerated master's degree program in political science or public administration. If accepted, students will be able to earn both an undergraduate and a graduate degree after satisfactory completion of 150 credits, sometimes within five years.

Graduate Programs

The department offers masters and doctoral programs in biodefense and political science. They offer a master's of public administration (MPA), in which students can focus their electives to earn a concentration in administration of justice, emergency management and homeland security, environmental science and public policy, human resources management, international management, nonprofit management, policy studies, public management, publica and nonprofit finance, state and local government, or third-party governance.

Funding
The department offers teaching assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Certificate Programs

The department offers six graduate certificates. Students may pursue a certificate as a stand alone program or as part of another graduate degree. They must apply for admission to the certificate program and meet the admission standards set for degree-seeking graduate students in the department.

Master’s International (MI)

Graduate students can take advantage of Master’s International (MI), a joint program between Mason and the Peace Corps, which enables participants to combine Peace Corps volunteer service with the master's degrees in political science or public administration. See the degree programs below for more details.

Undergraduate Degree

Government and International Politics, BA

Banner Code: LA-BA-GVIP

This program of study is offered by the Department of Public and International Affairs.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 43 credits in GOVT. Students must earn a minimum grade of 2.00 in each course applied to the major. Up to 3 credits of GOVT 480 and 6 credits of GOVT 496 may be substituted for the requirements for the major with prior written approval of the undergraduate director.

Five core courses (16 credits):

- GOVT 101 - Democratic Theory and Practice Credits: 3
- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 133 - Introduction to Comparative Politics Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4

Eight advanced government field courses (24 credits)
Students must take at least one course (3 credits) in each of the four government fields. Up to 9 credits of GOVT 480 and 496 may be substituted for government field courses with prior written approval of the undergraduate director. GOVT 490 may not be used to fulfill a government field requirement.

**American politics:**

- GOVT 301 - Public Law and the Judicial Process Credits: 3
- GOVT 304 - American State and Local Government Credits: 3
- GOVT 305 - Contemporary American Federalism Credits: 3
- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 308 - The American Presidency Credits: 3
- GOVT 309 - Government and Politics of Metropolitan Areas Credits: 3
- GOVT 311 - Public Opinion and Electoral Behavior Credits: 3
- GOVT 312 - Political Parties and Campaigns Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 319 - Issues in Government and Politics Credits: 1-3
- GOVT 407 - Law and Society Credits: 3
- GOVT 409 - Virginia Government and Politics Credits: 3
- GOVT 412 - Politics and the Mass Media Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3

**Political theory and law:**

- GOVT 322 - International Relations Theory Credits: 3
- GOVT 323 - Classical Western Political Theory Credits: 3
- GOVT 324 - Modern Western Political Theory Credits: 3
- GOVT 327 - Contemporary Western Political Theory Credits: 3
- GOVT 328 - Non-Western Political Theory Credits: 3
- GOVT 329 - Issues in Political Theories and Values Credits: 1-3
- GOVT 420 - American Political Thought Credits: 3
- GOVT 421 - Contemporary Political Ideologies Credits: 3
- GOVT 422 - Constitutional Interpretation Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- GOVT 424 - Constitutional Law: Criminal Process and Rights Credits: 3
- GOVT 427 - Feminist Political Thought Credits: 3
- GOVT 428 - Advanced Democratic Theory Credits: 3
- GOVT 470 - Faith and Reason in the Making of the Modern Mind Credits: 3
- GOVT 471 - Millennialism and Philosophies of History in Western Culture Credits: 3
- GOVT 472 - Christianity, Secularism, and Democracy Credits: 3

**International and comparative politics:**

- GOVT 331 - Government and Politics of Latin America Credits: 3
- GOVT 332 - Government and Politics of the Middle East and North Africa Credits: 3
- GOVT 333 - Government and Politics of Asia Credits: 3
- GOVT 334 - Government and Politics of Europe Credits: 3
• GOVT 336 - Political Development and Change Credits: 3
• GOVT 337 - Ethnic Politics in Western Europe and North America Credits: 3
• GOVT 338 - Government and Politics of Russia Credits: 3
• GOVT 339 - Issues in the Politics of Advanced Industrial Societies Credits: 1-3
• GOVT 340 - Central Asian Politics Credits: 3
• GOVT 341 - Chinese Foreign Policy Credits: 3
• GOVT 342 - Diplomacy Credits: 3
• GOVT 343 - International Political Economy Credits: 3
• GOVT 344 - American Foreign Policy Credits: 3
• GOVT 345 - Political Islam Credits: 3
• GOVT 346 - American Security Policy Credits: 3
• GOVT 347 - International Security Credits: 3
• GOVT 349 - Issues in the Analysis of Global Systems Credits: 1-3
• GOVT 430 - Comparative Political Leadership Credits: 3
• GOVT 432 - Political Change and Social Development in Sub-Saharan Africa Credits: 3
• GOVT 433 - Political Economy of East Asia Credits: 3
• GOVT 434 - Democracy in Global Perspective Credits: 3
• GOVT 443 - Law and Ethics of War Credits: 3
• GOVT 444 - Issues in International Studies Credits: 1-3
• GOVT 445 - Human Rights Credits: 3
• GOVT 446 - International Law and Organization Credits: 3
• GOVT 447 - Revolution and International Politics Credits: 3
• GOVT 448 - Ethics and International Politics Credits: 3

Public policy and administration:

• GOVT 351 - Administration in the Political System Credits: 3
• GOVT 355 - Public Personnel Administration Credits: 3
• GOVT 356 - Public Budgeting and Finance Credits: 3
• GOVT 357 - Urban Governance and Planning Credits: 3
• GOVT 358 - Nonprofit Financial Planning Credits: 4
• GOVT 359 - Computers in Public Management Credits: 3
• GOVT 361 - Introduction to Environmental Policy Credits: 3
• GOVT 364 - Public Policy Making Credits: 3
• GOVT 365 - State and Regional Public Policy Credits: 3
• GOVT 366 - Public Policy Analysis Credits: 3
• GOVT 452 - Administrative Law and Procedures Credits: 3
• GOVT 460 - Surveillance and Privacy in Contemporary Society Credits: 3
• GOVT 464 - Issues in Public Policy and Administration Credits: 1-3

One senior seminar course (3 credits):

• GOVT 490 - Synthesis Seminar Credits: 3
• GOVT 491 - Honors Seminar Credits: 3
Concentrations

Students may choose to concentrate in one of the four advanced government fields by completing five courses in that field. They must still take one course (3 credits) in each of the other three fields. GOVT 490 may not be used to fulfill a requirement for a concentration.

▲ Concentration in American Politics (AMP)

Five courses (15 credits) chosen from:

- GOVT 301–319
- GOVT 401–419

▲ Concentration in Political Theory and Law (PTL)

Five courses (15 credits) chosen from:

- GOVT 320–329
- GOVT 420–429
- GOVT 446
- GOVT 470–472

▲ Concentration in International and Comparative Politics (ICOM)

Five courses (15 credits) chosen from:

- GOVT 330–349
- GOVT 430–449

▲ Concentration in Public Policy and Administration (PPA)

Five courses (15 credits) chosen from:

- GOVT 350–369
- GOVT 450–469

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in government and international politics may fulfill this requirement by successfully completing the 300-level GOVT courses in their major.

Public Administration, BS

Banner Code: LA-BS-PUAD
This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of science degree in the College of Humanities and Social Sciences, students majoring in public administration must complete the coursework below.

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses used to fulfill the requirements below. Only 3 credits of GOVT 480 may be substituted for a major requirement. STAT 250, GOVT 343, GOVT 358, and GOVT 464 may be applied to only one major requirement. With careful planning, some courses required for the major may also fulfill university general education requirements. See an advisor before registering.

Six core courses (19 credits):

- GOVT 101 - Democratic Theory and Practice Credits: 3
- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 132 - Introduction to International Politics Credits: 3
  or
- GOVT 133 - Introduction to Comparative Politics Credits: 3
- GOVT 300 - Research Methods and Analysis Credits: 4
- GOVT 304 - American State and Local Government Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3

Two required advanced government courses (6 credits):

- GOVT 355 - Public Personnel Administration Credits: 3
- GOVT 356 - Public Budgeting and Finance Credits: 3

One advanced government course (minimum 3 credits) chosen from:

- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 358 - Nonprofit Financial Planning Credits: 4
- GOVT 452 - Administrative Law and Procedures Credits: 3
- GOVT 464 - Issues in Public Policy and Administration Credits: 1-3
- NCLC 331 - The Nonprofit Sector Credits: 4

Four elective advanced government courses (12 credits) chosen from:

- 3 credits from GOVT 320s or 420s
- 3 credits from GOVT 360s or 460s
- 3 credits of upper-level GOVT taken outside of GOVT 350s and 450s (may include GOVT 480 or 496)

One senior seminar course (3 credits):

- GOVT 490 - Synthesis Seminar Credits: 3
- GOVT 491 - Honors Seminar Credits: 3

Two courses in analytical skills (minimum 6 credits) chosen from:

- OM 210 - Statistical Analysis for Management Credits: 4
- OM 301 - Operations Management Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 108 - Introductory Calculus with Business Applications Credits: 3
- MATH 110 - Introductory Probability and Statistics Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4

Three courses (9 credits):

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3

and one upper-level course chosen from:

- courses in economics (ECON)
- courses in finance (FNAN)
- GOVT 343 - International Political Economy Credits: 3

One course (minimum 3 credits) chosen from:

- courses in accounting (ACCT)
- GOVT 358 - Nonprofit Financial Planning Credits: 4

Courses in information technology (9 credits) or foreign language (up to 12 credits):
Information technology:

- courses in computer science (CS)
- courses in information systems (INFS)
- courses in information technology (IT)
- courses in management information systems (MIS)
- GOVT 359 - Computers in Public Management Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- SOCI 405 - Analysis of Social Data Credits: 4

Foreign language:

- One modern foreign language through the intermediate level. At Mason this is equivalent to successful completion of a foreign language course numbered 210.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in public administration may fulfill this requirement by successfully completing the 300-level GOVT courses in their major programs.

Undergraduate Minor

American Government Minor

Banner Code: AMGV

The minor in American Government develops knowledge of the principles, institutions, and behaviors of the American political system.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits in government, with a minimum grade of 2.0 in each course.

One core course (3 credits):

- GOVT 103 - Introduction to American Government Credits: 3

Five elective courses (15 credits) chosen from:
Any GOVT 301–309 political institutions
Any GOVT 310–319 political behavior
Any GOVT 409–420
GOVT 480 - Internship, when relevant, with prior written approval of the undergraduate director
GOVT 344 - American Foreign Policy Credits: 3

Total: 18 credits

International/Comparative Studies Minor

Banner Code:  ICS

This minor increases students’ awareness of the regions and current issues of the world on theoretical and practical levels.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits in government, with a minimum grade of 2.0 in each course.

One core course (3 credits) chosen from:

- GOVT 132 - Introduction to International Politics Credits: 3
- GOVT 133 - Introduction to Comparative Politics Credits: 3

Five elective courses (15 credits) chosen from:

- Any GOVT 330–339 comparative politics
- Any GOVT 340–349 international studies
- Any GOVT 430–439 comparative politics
- Any GOVT 440–449 international studies
- GOVT 480 - Internship, when relevant, with the prior written approval of the undergraduate director
- GOVT 103 - Introduction to American Government Credits: 3

Total: 18 credits

Legal Studies Minor
Banner Code: LGLS

The minor in legal studies focuses on the constitutional foundations, interpretation, processes, and functions of domestic and international law.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 18 credits in government, with a minimum grade of 2.0 in each course.

Two core courses (6 credits):

- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 301 - Public Law and the Judicial Process Credits: 3

Four elective courses (12 credits) chosen from the list below

GOVT 480 - Internship, when relevant, may be used to partially meet this requirement with prior written approval of the undergraduate director.

- GOVT 307 - Legislative Behavior Credits: 3
- GOVT 414 - Politics of Race and Gender Credits: 3
- GOVT 420 - American Political Thought Credits: 3
- GOVT 422 - Constitutional Interpretation Credits: 3
- GOVT 423 - Constitutional Law: Civil Rights and Liberties Credits: 3
- GOVT 424 - Constitutional Law: Criminal Process and Rights Credits: 3
- GOVT 446 - International Law and Organization Credits: 3
- GOVT 452 - Administrative Law and Procedures Credits: 3

Total: 18 credits

Public Policy and Management Minor

Banner Code: PPMG

This minor introduces students to the theory and process of policy formulation and implementation in the political and governmental arena.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all minors, see the Academic Policies chapter of this catalog.
Course Work

Students pursuing this minor must complete 18 credits in government, with a minimum grade of 2.0 in each course.

Two core courses (6 credits):

- GOVT 103 - Introduction to American Government Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3

Four elective courses (12 credits) chosen from:

- GOVT 350–359 public administration
- Any GOVT 360–369 public policy
- Any GOVT 450–459 public administration
- Any GOVT 460–469 public policy
- GOVT 480 - Internship, when relevant, with the prior written approval of the undergraduate director

Total: 18 credits

Bachelor's/Accelerated Master's Program

Government and International Politics, BA/Political Science, Accelerated MA

Highly qualified undergraduates may apply to the accelerated master's degree program and obtain both the BA in government and international politics and MA in political science after satisfactory completion of 150 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a cumulative GPA of 3.50 or higher and submit an application, two letters of recommendation (preferably from professors), and a résumé. The one-page application can be obtained at the graduate programs office in the Department of Public and International Affairs.

Public Administration, BS/Public Administration, Accelerated MPA

Highly qualified undergraduates may apply to the accelerated master’s degree program and obtain both the BS in public administration and MPA degree after satisfactory completion of 150 credits. Well-prepared undergraduates are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of
requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with satisfactory performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a cumulative GPA of 3.40 or higher and submit an application, two letters of recommendation (preferably from professors), and a résumé. The one-page application can be obtained at the graduate programs office in the Department of Public and International Affairs.

**Master's Degree**

**Biodefense, MS**

*Banner Code: LA-MS-BIOD*

The master's degree in biodefense prepares students to become the next generation of biodefense and biosecurity professionals and scholars. Our unique program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

**Application Requirements**

Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. Because of the breadth of the program, students with backgrounds in science or other areas, such as international affairs, political science, law, public policy, and conflict resolution, are encouraged to apply. In addition to fulfilling the admission requirements for graduate study, applicants must submit:

- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- A statement of purpose consistent with research interests or professional goals
- A current resume
- Scores from GRE taken within five years prior to date of application

**Degree Requirements**

Students pursuing the master's degree in biodefense must successfully complete 37 credits.

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student’s first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

**Seven core courses (19 credits):**

- **BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents** Credits: 3
- BIOD 605 - Introduction to Biodefense II: Viral Agents Credits: 3
- BIOD 609 - Biodefense Strategy and Policy Credits: 1-4
- BIOD 702 - Biodefense Colloquium Credits: 1
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- GOVT 500 - Research Methods in Political Science Credits: 3
- GOVT 540 - International Relations Credits: 3

Four to five elective courses (12-15 credits)

At least 9 credits of electives must be in biodefense. Up to 6 credits of non biodefense courses may be used to fulfill this requirement with prior written approval of the director. Students may choose to focus 12 of the 15 elective credits in one of the concentrations below. Students who chose a concentration and a project have 3 additional elective credits; students who choose a concentration and a thesis have no additional elective credits.

3 credits of project or 6 credits of thesis

Students must demonstrate the ability to conduct original, independent research by completing a research project or a thesis. The objectives of both the research project and thesis are to serve as a capstone for the student’s graduate education and to demonstrate the student’s research, analytical, and writing skills. Both options require the student to produce a substantial and original contribution to the fields of biodefense or biosecurity on the model of a paper suitable for presentation at a scholarly conference or an article in a peer-reviewed scholarly journal.

- BIOD 798 - Master's Research Project in Biodefense Credits: 3
- BIOD 799 - Master's Thesis in Biodefense Credits: 1-6

Concentrations

Students have the option of completing one of the 12-credit concentrations below.

▲ Concentration in Homeland Security (HMLS)

Four courses (12 credits) chosen from:

- BIOD 710 - Approaches to Bioweapon Medical Treatment and Response Credits: 3
- BIOD 722 - Examining Terrorist Groups Credits: 3
- BIOD 723 - Legal Dimensions of Homeland Security Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 726 - Agroterrorism and Food Security Credits: 3
- BIOD 751 - Biosurveillance Credits: 3
- BIOD 752 - The Role of the Military in Homeland Security Credits: 3
- BIOD 760 - National Security Technology and Policy Credits: 3
- BIOD 761 - Dispersal Patterns of Biological Agents Credits: 3
- BIOD 766 - Development of Vaccines and Therapeutics Credits: 3
- GOVT 510 - American Government and Politics Credits: 3
- GOVT 706 - Federalism and Intergovernmental Relations Credits: 3
- GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3
• PUAD 631 - Disaster Response Operations and Recovery Credits: 3
• PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
• PUAD 731 - Homeland/Transportation Security Administration Credits: 3
• PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
• PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3
• PHIL 642 - Biomedical Ethics Credits: 3

▲ Concentration in International Security (INLS)

Four courses (12 credits) chosen from:

• BIOD 620 - Health and Security Credits: 3
• BIOD 621 - Ethics and International Security Credits: 3
• BIOD 622 - Negotiating in the International Arena Credits: 3
• BIOD 705 - Intelligence: Theory and Practice Credits: 3
• BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
• BIOD 709 - Nonproliferation and Arms Control Credits: 3
• BIOD 722 - Examining Terrorist Groups Credits: 3
• BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
• BIOD 760 - National Security Technology and Policy Credits: 3
• BIOD 761 - Dispersal Patterns of Biological Agents Credits: 3
• GOVT 641 - Seminar in Global Systems Credits: 3
• GOVT 741 - Advanced Seminar in International Politics Credits: 3
• GOVT 745 - International Security Credits: 3
• GOVT 843 - Diplomacy Credits: 3
• PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3
• PUAD 701 - Cross-Cultural and Ethical Dimensions of International Management Credits: 3
• PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3

Political Science, MA

Banner Code: LA-MA-POS

This 36-credit degree program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations. Students may specialize in American government and politics, international relations, or comparative politics. In addition, interdisciplinary opportunities allow students to take up to 9 credits in related fields such as history or public policy.

The program is made up of four core courses in political science, two required seminars in a field of specialization, advanced seminars in the Department of Public and International Affairs, and elective courses in other departments.

The master's degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.
This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Admission is in the fall and spring. Late applications are considered on a space-available basis. In addition to university graduate application requirements, applicants to the master’s in political science should submit three letters of recommendation, preferably from recent professors; GRE scores; résumé listing employment and volunteer work; and a statement of interests and career goals. A writing sample is strongly recommended.

Degree Requirements

Students pursuing the master’s degree in political science must complete 36 credits.

Course work from other departments maybe selected to complement the student's chosen field of specialization and should reflect the ideas, institutions, or processes of contemporary governance. Courses should be approved in an education plan designed by students and their advisor. Students who wish to begin or alter their career in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Department of Public and International Affairs.

Four core courses (12 credits):

- GOVT 510 - American Government and Politics Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 530 - Comparative Politics Credits: 3
- GOVT 540 - International Relations Credits: 3

Three to five courses (9 to 15 credits) in one field of specialization:

American government and politics

Two required field seminars (6 credits) chosen from:

- GOVT 603 - Seminar in the Courts and Constitutional Law Credits: 3
- GOVT 604 - Seminar on Congress and Legislative Behavior Credits: 3
- GOVT 605 - Seminar on the Presidency Credits: 3
- GOVT 706 - Federalism and Intergovernmental Relations Credits: 3

One to three elective courses (3 to 9 credits)

Comparative politics
Two required field seminars (6 credits) chosen from:

- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3

One to three elective courses (3 to 9 credits)

International relations

Two required field seminars (6 credits) chosen from:

- GOVT 641 - Seminar in Global Systems Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 743 - International Political Economy Credits: 3
- GOVT 745 - International Security Credits: 3

One to three elective courses (3 to 9 credits)

Two courses (6 credits) of methods:

- GOVT 500 - Research Methods in Political Science Credits: 3
- GOVT 711 - Problem Solving and Data Analysis I Credits: 3

Up to three elective courses (9 credits)

Remaining credits required for the degree, if any, are chosen from other courses in the department, including an internship or additional courses in the field of specialization, or from course work offered by other departments.

3 credits of project or 6 credits of thesis

3 credits of GOVT 798 may be linked to an advanced specialty course to produce a final research project. If the thesis option is chosen, a thesis director and a committee of two additional faculty members read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

- GOVT 798 - Political Science Research Project Credits: 3
  or
- GOVT 799 - Political Science Thesis Credits: 1-6

Total: 36 credits
Master’s International

The Master’s International (MI), a joint program between Mason and the Peace Corps, enables participants to prepare for Peace Corps volunteer service while earning the MA. Students apply separately, but at the same time, to the Peace Corps and to Mason. Students must complete a minimum of 18 credits prior to their Peace Corps service; this will give the student a foundation to enhance their value as a Peace Corps volunteer. Six credits are earned as internship credits for the Peace Corps service. The internship requires a project, agreed upon by the student and his/her advisor, and includes a presentation delivered to faculty and students after the student returns to the US. Upon completion of the two years of service, the student will receive a tuition grant for the six internship credits. Students return to Mason after their two years of service to complete the remaining coursework required for the 36-credit MA.

Public Administration, MPA

Banner Code: LA-MPA-PUAD

This 36-credit program is designed to build the knowledge base and skills of people who are playing or intend to play a leadership role in organizations that develop or implement public policy. In addition, the program is among the first to address implications of the growing reliance of government on a wide range of third parties, including other governments, private contractors, and nonprofits, for public goals and accountability.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington Campuses during the week and on the weekend in an accelerated format.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Students are admitted for fall or spring semesters. Late applications are considered on a space-available basis. In addition to the graduate application requirements specified in the Admission chapter of the catalog, students should submit three letters of recommendation; test scores from the GRE, GMAT, or LSAT; a résumé listing work experience and volunteer activity, and a statement of professional goals. Applicants may petition the Admissions Committee by letter to waive the exam if they have a master’s degree or an undergraduate cumulative GPA of 3.30 or above from a U.S. institution of higher education. Students who want to be considered for an assistantship must submit a GRE score.

Transfer of Credits

Students may transfer credit into the MPA Program from graduate courses taken at other institutions or taken at Mason in nondegree status. Transfer credit is subject to university and college policies and must be approved by the MPA Program director and the dean. Students who enroll initially through nondegree studies should submit their application to the MPA Program in the first semester of study. Only 9 credits taken in nondegree status may be transferred to the degree program.
Degree Requirements

To receive an MPA, students must successfully complete 36 credits. The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

Six core courses (18 credits):

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 611 - Problem Solving and Data Analysis I Credits: 3
- PUAD 620 - Organization Theory and Management Behavior Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 700 - Ethics and Public Administration Credits: 3
- PUAD 703 - Third-Party Governance Credits: 3

One additional methods course (3 credits) chosen from:

- PUAD 612 - Problem Solving and Data Analysis II Credits: 3
- PUAD 613 - Economic Analysis in Public Administration Credits: 3
- PUAD 741 - Policy Analysis Credits: 3
- PUAD 742 - Program Evaluation Credits: 3

One course (3 credits) in accounting, budgeting, and financial management chosen from:

- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3

Four elective courses (12 credits)

Colloquium in public administration

Students are required to enroll at least twice in PUAD 798 in two different semesters.

- PUAD 798 - Colloquium in Public Administration Credits: 0

Total: 36 credits
Concentrations

Students may take their elective courses within one of the concentrations listed below. As an alternative, with the approval of their advisor, students may select their elective courses from several concentrations or fields. Students may declare only one concentration. PUAD 794 Internship and PUAD 796 Directed Reading and Research may be applied to a concentration where content is appropriate and with prior written approval of the MPA director. Other courses may also be applied to a concentration with prior written approval of the director.

▲ Concentration in Administration of Justice (ADJ)

Four courses (12 credits) chosen from:

- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- JLCP 509 - Justice Organizations and Processes Credits: 3
- JLCP 510 - Policing in a Democratic Society Credits: 3
- JLCP 691 - Justice Program Planning and Implementation Credits: 3
- JLCP 740 - Justice Organization and Administration Credits: 3
- JLCP 741 - Conduct of Justice Organizations at the Street Level Credits: 3
- JLCP 742 - Leadership in Justice and Security Organizations Credits: 3
- JLCP 743 - Changing Justice and Security Organizations Credits: 3
- JLCP 749 - Issues in Justice Administration Credits: 1-3
- JLCP 781 - Justice Program Evaluation Credits: 3
- SOCI 607 - Criminology Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- SOCI 609 - Sociology of Punishment and Corrections Credits: 3

Total: 36 credits

▲ Concentration in Emergency Management and Homeland Security (EMHS)

Four courses (12 credits) chosen from:

- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 632 - Terrorism: Theory and Practice Credits: 3
- PUAD 633 - Hazard Mitigation Policy Credits: 3
- PUAD 634 - Management of International Security Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
- PUAD 731 - Homeland/Transportation Security Administration Credits: 3
- PUAD 738 - Issues in International Security Credits: 1-3
• BIOD 723 - Legal Dimensions of Homeland Security Credits: 3
• BIOD 752 - The Role of the Military in Homeland Security Credits: 3
• COMM 637 - Risk Communication Credits: 3
• PUBP 742 - Transportation Safety and Security Credits: 3
• PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3

Total: 36 credits

▲ Concentration in Environmental Science and Public Policy (EVPP)

One required course (3 credits):

• PUAD 642 - Environmental Policy Credits: 3

Three elective courses (9 credits) chosen from:

• PUAD 741 - Policy Analysis Credits: 3 (if not already taken to meet core requirements)
• PUAD 742 - Program Evaluation Credits: 3 (if not already taken to meet core requirements)
• EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
• EVPP 607 - Fundamentals of Ecology Credits: 3
• EVPP 638 - Corporate Environmental Management and Policy Credits: 3
• EVPP 641 - Environmental Science and Public Policy Credits: 3
• EVPP 670 - Environmental Law Credits: 3
• CONF 695 - Selected Topics Credits: 3
• COMM 590 - Seminar in Communication Credits: 3

Note:
CONF 695 - Selected Topics and COMM 590 - Seminar in Communication, when topic is the environment, may be used to fulfill this requirement with the prior written approval of the MPA director.

Total: 36 credits

▲ Concentration in Human Resources Management (HRM)

One required course (3 credits):
• PUAD 670 - Human Resources Management in the Public Sector Credits: 3

Three elective courses (9 credits) chosen from:

• PUAD 623 - Managing Government Contracting Credits: 3
• PUAD 652 - Nonprofit Leadership and Change Credits: 3
• PUAD 671 - Public Employee Labor Relations Credits: 3
• PUAD 672 - Human Resources Reforms for Public Administration Credits: 3
• PUAD 729 - Issues in Public Management Credits: 1-3
• PUAD 730 - Professional Development Workshop Credits: 1-3
• PSYC 631 - Industrial and Personnel Testing and Evaluation Credits: 3
• PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation Credits: 3
• PSYC 639 - Survey of Organizational Processes Credits: 3
• PSYC 640 - Techniques in Industrial/Organizational Psychology Credits: 3
• PSYC 667 - Behavior in Small Groups and Teams Credits: 3

Total: 36 credits

▲ Concentration in International Management (IM)

One required course (3 credits):

• PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3

Three elective courses (9 credits) chosen from:

• CONF and ITRN courses with written prior approval of the director
• PUAD 634 - Management of International Security Credits: 3
• PUAD 636 - The NGO: Policy and Management Credits: 1-3
• PUAD 730 - Professional Development Workshop Credits: 1-3
• PUAD 738 - Issues in International Security Credits: 1-3
• PUAD 739 - Issues in International Management Credits: 1-3
• GOVT 540 - International Relations Credits: 3
• GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3

Total: 36 credits

▲ Concentration in Nonprofit Management (NPMG)
Two required courses (6 credits):

- PUAD 505 - Introduction to Management of Nonprofits Credits: 1-3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3

Two elective courses (6 credits) chosen from:

- PUAD 636 - The NGO: Policy and Management Credits: 1-3
- PUAD 652 - Nonprofit Leadership and Change Credits: 3
- PUAD 654 - The Community, Marketing, and Public Relations Credits: 3
- PUAD 655 - Philanthropy and Fund Raising Credits: 3
- PUAD 657 - Association Management Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 720 - Performance Measurement Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3

Total: 36 credits

▲ Concentration in Policy Studies (PS)

Four courses (12 credits) chosen from:

- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 741 - Policy Analysis Credits: 3
- PUAD 742 - Program Evaluation Credits: 3
- PUAD 749 - Issues in Public Policy Credits: 1-3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 781 - Information Management: Technology and Policy Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 605 - Seminar on the Presidency Credits: 3
Total: 36 credits

▲ Concentration in Public Management (PMG)

Four courses (12 credits) chosen from:

- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3
- PUAD 670 - Human Resources Management in the Public Sector Credits: 3
- PUAD 672 - Human Resources Reforms for Public Administration Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 720 - Performance Measurement Credits: 3
- PUAD 729 - Issues in Public Management Credits: 1-3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 781 - Information Management: Technology and Policy Credits: 3

Total: 36 credits

▲ Concentration in Public and Nonprofit Finance (PNF)

Four courses (12 credits) chosen from:

- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3
- PUAD 729 - Issues in Public Management Credits: 1-3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 769 - Issues in Public Financial Management Credits: 1-3
Total: 36 credits

▲ Concentration in State and Local Government (SLG)

Four courses (12 credits) chosen from:

- PUAD 505 - Introduction to Management of Nonprofits Credits: 1-3
- PUAD 615 - Administrative Law Credits: 3
- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 651 - Virginia Politics, Policy, and Administration Credits: 3
- PUAD 660 - Public and Nonprofit Accounting and Finance Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUAD 662 - National Budgeting Credits: 3
- PUAD 663 - State and Local Budgeting Credits: 3
- PUAD 680 - Managing Information Resources Credits: 3
- PUAD 729 - Issues in Public Management Credits: 1-3
- PUAD 730 - Professional Development Workshop Credits: 1-3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 759 - Issues in Local Government Administration Credits: 1-3
- PUAD 781 - Information Management: Technology and Policy Credits: 3

Total: 36 credits

▲ Concentration in Third-Party Governance (TPG)

Four courses (12 credits) chosen from:

- PUAD 613 - Economic Analysis in Public Administration Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 623 - Managing Government Contracting Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 636 - The NGO: Policy and Management Credits: 1-3
- PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise Credits: 3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3

Total: 36 credits
Master’s International

The Master’s International (MI), a joint program between Mason and the Peace Corps, enables participants to prepare for Peace Corps volunteer service while earning the MPA. Students apply separately, but at the same time, to the Peace Corps and to Mason. Students must complete a minimum of 18 credits prior to their Peace Corps service; this will give the student a foundation to enhance their value as a Peace Corps volunteer. Six credits are earned as internship credits for the Peace Corps service. The internship requires a project, agreed upon by the student and his/her advisor, and includes a presentation delivered to faculty and students after the student returns to the US. Upon completion of the two years of service, the student will receive a tuition grant for the six internship credits. Students return to Mason after their two years of service to complete the remaining coursework required for the 36-credit MPA.

Master's Level Certificate

Administration of Justice Graduate Certificate

Banner Code: LA-CERG-ADJ

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admission Policies section of the Admission chapter of the catalog.

This program of study is offered by the Department of Public and International Affairs.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows.

Three required courses (9 credits):

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- JLCP 509 - Justice Organizations and Processes Credits: 3
- JLCP 691 - Justice Program Planning and Implementation Credits: 3

Two elective courses (6 credits) in JLCP

Total: 15 credits

Association Management Graduate Certificate

Banner Code: LA-CERG-AM
Students interested in the graduate certificate in association management must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section of the catalog.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows:

Three required courses (9 credits):

- PUAD 657 - Association Management Credits: 3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3

Two elective courses (6 credits) in the nonprofit area

Critical Analysis and Strategic Responses to Terrorism Graduate Certificate

Banner Code: LA-CERG-CASR

The Certificate in Critical Analysis and Strategic Responses to Terrorism (CASR) is an interdisciplinary introduction to the phenomenon of modern terrorism and its implications for US domestic and foreign policy. It focuses on multidisciplinary analysis and holistic cross-sectoral approaches to long-term prevention of and response to terrorism.

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admissions Policies section of the catalog.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows:

Two required courses (6 credits):

- GOVT 541 - Introduction to Critical Analysis and Strategic Response to Terrorism Credits: 3
- GOVT 640 - Strategic Responses to Terrorism: Coordinated Decision Making Credits: 3
Three elective courses (9 credits) related to terrorism analysis or response

- Courses should be chosen in consultation with an advisor and approved in advance by the program director

Total: 15 credits

Emergency Management and Homeland Security Graduate Certificate

Banner Code: LA-CERG-EMHS

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Admission section of the catalog.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows:

Three required courses (9 credits):

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3
- PUAD 632 - Terrorism: Theory and Practice Credits: 3

Two elective courses (6 credits) in the emergency management and homeland security area

Total: 15 credits

Nonprofit Management Graduate Certificate

Banner Code: LA-CERG-NPMG

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admission Policies section of Admission chapter of the catalog.
This certificate is offered in class or online.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows:

Three required courses (9 credits):

- PUAD 505 - Introduction to Management of Nonprofits Credits: 1-3
- PUAD 659 - Nonprofit Law, Governance, and Ethics Credits: 3
- PUAD 664 - Nonprofit Financial Management Credits: 3

Two elective courses (6 credits) in the nonprofit area

Total: 15 credits

Public Management Graduate Certificate

Banner Code: LA-CERG-PMG

Students must apply for admission to the certificate program and meet the admission standards and application requirements for all graduate students as stated in the Graduate Admission Policies section of the Admission chapter of the catalog.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all certificates, see the Academic Policies chapter of the catalog.

Certificate Requirements

Students pursuing this certificate must complete five courses (15 credits) distributed as follows:

Three required courses (9 credits):

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 620 - Organization Theory and Management Behavior Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
Two elective courses (6 credits) in the public management area

Total: 15 credits

Doctoral Degree

Biodefense, PhD

Banner Code: LA-PHD-BIOD

The doctoral program in biodefense is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Application Requirements

Students must meet the admission standards and application requirements of the university. See the Graduate Admission Policies section of the catalog. Because of the breadth of the program, students with backgrounds in science and other areas, such as international affairs, political science, law, public policy, and conflict resolution, are encouraged to apply. In addition to fulfilling the admission requirements for graduate study, applicants must submit:

- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- A statement of purpose consistent with research interests or professional goals
- A current resume or curriculum vitae
- Scores from GRE taken within five years prior to date of application
- Writing sample such as a full-length research paper

Reduction of Credit

Students who enter the doctoral program with a master’s degree or other graduate credit may have their credit reduced by up to 30 credits at the discretion of the department with the approval of the dean.

Continuous Registration

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester, except for the summer term, until the dissertation is submitted to and accepted by the University Library.
Advancement to Candidacy

To advance to candidacy, students must complete all coursework required on their approved program of study. They must also successfully pass a qualifying exam.

Degree Requirements

Students pursuing the PhD in biodefense must successfully complete a minimum of 72 graduate credits.

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses that students plan on taking should be approved in an program of study designed by the student and their advisor during the student’s first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that can be used to fulfill some of the requirements below.

Seven required courses (19 credits):

- BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents Credits: 3
- BIOD 605 - Introduction to Biodefense II: Viral Agents Credits: 3
- BIOD 609 - Biodefense Strategy and Policy Credits: 1-4
- BIOD 702 - Biodefense Colloquium Credits: 1
- GOVT 540 - International Relations Credits: 3
- GOVT 500 - Research Methods in Political Science Credits: 3
- PUAD 630 - Emergency Planning and Preparedness Credits: 3

One additional advanced research course (3 credits)

Must be approved by the program director. May be focused on qualitative or quantitative research.

Four courses (12 credits) in a concentration:

▲ Concentration in International Security (INLS)

Four courses (12 credits) chosen from:

- BIOD 620 - Health and Security Credits: 3
- BIOD 621 - Ethics and International Security Credits: 3
- BIOD 622 - Negotiating in the International Arena Credits: 3
- BIOD 705 - Intelligence: Theory and Practice Credits: 3
- BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security Credits: 3
- BIOD 709 - Nonproliferation and Arms Control Credits: 3
- BIOD 722 - Examining Terrorist Groups Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 760 - National Security Technology and Policy Credits: 3
- BIOD 761 - Dispersal Patterns of Biological Agents Credits: 3
- GOVT 641 - Seminar in Global Systems Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 843 - Diplomacy Credits: 3
- PUAD 504 - Managing in the International Arena: Theory and Practice Credits: 3
- PUAD 701 - Cross-Cultural and Ethical Dimensions of International Management Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3

▲ Concentration in Homeland Security (HMLS)

Four courses (12 credits) chosen from:

- BIOD 710 - Approaches to Bioweapon Medical Treatment and Response Credits: 3
- BIOD 722 - Examining Terrorist Groups Credits: 3
- BIOD 723 - Legal Dimensions of Homeland Security Credits: 3
- BIOD 725 - Terrorism and Weapons of Mass Destruction Credits: 3
- BIOD 726 - Agroterrorism and Food Security Credits: 3
- BIOD 751 - Biosurveillance Credits: 3
- BIOD 752 - The Role of the Military in Homeland Security Credits: 3
- BIOD 760 - National Security Technology and Policy Credits: 3
- BIOD 761 - Dispersal Patterns of Biological Agents Credits: 3
- BIOD 762 - Into the Hot Zone: Working in a High Threat Environment Credits: 2
- BIOD 766 - Development of Vaccines and Therapeutics Credits: 3
- GOVT 510 - American Government and Politics Credits: 3
- GOVT 706 - Federalism and Intergovernmental Relations Credits: 3
- GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3
- PUAD 631 - Disaster Response Operations and Recovery Credits: 3
- PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination Credits: 3
- PUAD 727 - Seminar in Risk Assessment and Decision Making Credits: 3
- PUAD 731 - Homeland/Transportation Security Administration Credits: 3
- PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
- PUAD 758 - Environmental Politics Credits: 3
- PHIL 642 - Biomedical Ethics Credits: 3

Two courses (6 credits) from the field not chosen as the concentration

Electives

Students complete the remaining 72 credits through additional elective courses chosen in consultation with an advisor.

Dissertation proposal (6 to 9 credits) and research (15-18 credits):

Students must offer a successful public defense of the dissertation proposal before registering for BIOD 999. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.
A maximum of 24 credits of 998 and 999 may be applied to the degree.

- BIOD 998 - Doctoral Dissertation Proposal Credits: 1-12
- BIOD 999 - Doctoral Dissertation Credits: 1-12

**Political Science, PhD**

**Banner Code: LA-PHD-POS**

The doctoral program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association’s Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

This program of study is offered by the Department of Public and International Affairs.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

**Application Requirements**

Applications will be accepted for the fall semester only. In addition to university graduate admissions requirements, applicants should submit three letters of recommendation from faculty members or those who can evaluate the applicant’s academic potential, a statement of purpose of study, GRE scores, and a writing sample such as a full-length research paper. Usually, GRE scores up to five years old may be used.

**Reduction of Credit**

For students entering the program with a master’s or MPA degree, the number of credits required for the doctorate may be reduced by a maximum of 30 credits subject to approval of the graduate coordinator and the dean.

**Progress Review**

For students who have been admitted with a bachelor’s degree, the Faculty Review Committee will review each student’s progress after 30 credits of course work to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master’s degree, this review will occur after 12 credits in this program. Students that are not allowed to continue to work toward the PhD, will be allowed to complete the MA degree.

**Degree Requirements**

The degree requires 72 credits of course work divided among core courses, advanced courses in the student’s major and minor fields, supporting courses that can be outside the department, research methods courses, courses in political theory, experiential learning, and dissertation. The program allows students to specialize in two major fields. A total of 12 credits may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with approval of the director.
Three core courses (9 credits) chosen from:

- GOVT 510 - American Government and Politics Credits: 3
- GOVT 520 - Political Theory Credits: 3
- GOVT 530 - Comparative Politics Credits: 3
- GOVT 540 - International Relations Credits: 3
- GOVT 550 - Seminar in Theories of Public Administration Credits: 3

At least seven advanced courses (21 credits) divided between two major fields:

American government and politics

Two required field seminars (6 credits) chosen from:

- GOVT 603 - Seminar in the Courts and Constitutional Law Credits: 3
- GOVT 604 - Seminar on Congress and Legislative Behavior Credits: 3
- GOVT 605 - Seminar on the Presidency Credits: 3
- GOVT 706 - Federalism and Intergovernmental Relations Credits: 3

One to three elective courses (3 to 9 credits)

Comparative politics

Two required field seminars (6 credits) chosen from:

- GOVT 631 - Seminar in Comparative Politics and Institutions Credits: 3
- GOVT 731 - Advanced Seminar in Comparative Politics Credits: 3

One to three elective courses (3 to 9 credits)

International relations

Two required field seminars (6 credits) chosen from:

- GOVT 641 - Seminar in Global Systems Credits: 3
- GOVT 741 - Advanced Seminar in International Politics Credits: 3
- GOVT 743 - International Political Economy Credits: 3
One to three elective courses (3 to 9 credits)

Public administration

Two required field seminars (6 credits) chosen from:

- GOVT 753 - Third-Party Governance Credits: 3
- GOVT 755 - Seminar in Politics and Bureaucracy Credits: 3

One to three elective courses (3 to 9 credits)

At least 3 advanced courses (9 credits) in a minor field

The courses in the minor field are chosen by the student and advisor to complement the two major fields. They require the written approval of the advisor and are included on the student's program of study.

Three advanced methodology courses (9 credits):

The last of the three methodology courses should be tailored to the student’s dissertation research needs. Course work in language or to help achieve proficiency in research techniques (see below) may count as the third methodology course with approval of the program director.

- GOVT 500 - Research Methods in Political Science Credits: 3
- GOVT 711 - Problem Solving and Data Analysis I Credits: 3
- One additional course in quantitative or qualitative methods

Up to 6 credits of experience in government and politics

Students do 20 hours per week in the field for one semester or 10 hours per week for two semesters. They produce an academic paper at the conclusion of the experience discussing the implications of their observations for research in the field and how scholarship in the field might be applied to an issue faced by the organization.

3-6 credits of dissertation proposal

- GOVT 998 - Doctoral Dissertation Proposal Credits: 1-6

15 credits of dissertation research
Doctoral research skills

Students must demonstrate proficiency in the statistical, mathematical, and computational techniques used for political science research or in one foreign language at an advanced level of reading and comprehension. Proficiency will be determined by satisfactory course work in methods or exam given at the time of the qualifying exam for language proficiency. Certification that this requirement has been met must be completed before advancement to candidacy.

Advancement to Candidacy

To advance to candidacy, students must complete all course work required on their approved program of study. Students must also successfully complete and pass two qualifying exams in major fields. In addition, students must have an approved dissertation committee as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean’s Office before a student can advance to candidacy.

Continuous Registration

Once enrolled in 998, a student must maintain continuous registration in 998 or 999 each semester until the dissertation is submitted to and accepted by the University Library.

Religious Studies

Phone: 703-993-1290
Web: religious.gmu.edu

Faculty

Associate professors: Burns, M. Dakake, Farina, Nguyen, Rashkover, Ro (chair), Shiner

Adjuncts: Bond, D. Dakake, Dreyer, Hebbar, Hostetter, Padgett

Course Work

This department offers all course work designated RELI in the Courses chapter of this catalog.

Undergraduate Programs

The department offers a bachelor's degree in religious studies for students who are interested in learning more about the world's religious traditions. Majors explore the many dimensions of religion and study religion's spiritual, historical, cultural, and social aspects.

Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Though the required coursework, majors in religious studies develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.
The courses in the undergraduate program are writing intensive. They enable students to study and analyze religious ideas and symbols and give them the skills they need to present well-argued papers.

**Minors**

Students majoring in religious studies are encouraged to do one of the many minors offered by the college.

The department also offers minors in religious studies and Judaic studies, both of which are available to students in all majors.

**Graduate Programs**

The department sponsors the concentration in religion, culture, and values in the master's degree in individualized studies (MAIS). This concentration is designed for students who interested in exploring the world's major religions at the graduate level. Students study the development and interaction of the global religious traditions that influence human identity, behavior, culture, and values. They investigate the effects that historical crises and the forces of change have on religion, placing contemporary religious pluralism and inter-religious dialog in a global context.

See the Interdisciplinary Studies (MAIS) section of this chapter for details.

**Undergraduate Degree**

**Religious Studies, BA**

**Banner Code: LA-BA-RELI**

The goal of the major in religious studies is to bring students to an understanding of the major traditions of world religions. Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Students develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.

The courses in religious studies are writing intensive. They help students to study and analyze religious ideas and symbols and give them the skills to present well-argued papers.

This program of study is offered by the Department of Religious Studies.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

**Degree Requirements**

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, religious studies majors must complete at least 33 credits in religious studies, earning a minimum grade of 2.00 in each course. No course applied to the major in religious studies may be used to fulfill more than one requirement.

**Two introductory courses (6 credits) to the main world religions:**

- RELI 211 - Religions of the Near (Middle) East Credits: 3
• RELI 212 - Religions of the Orient Credits: 3

One seminar (3 credits) taken during the senior year:

Fulfills the university writing-intensive requirement.

• RELI 420 - Seminar Credits: 3

Two courses (6 credits) emphasizing comparative or methodological aspects of the study of religion chosen from the courses below:

RELI 376 - Special Topics in Religious Thought, when relevant, may be used to fulfill this requirement with the prior written approval of the undergraduate director.

• ANTH 313 - Myth, Magic, and Mind Credits: 3
• PHIL 313 - Philosophy of Religion Credits: 3
• RELI 337 - Mysticism: East and West Credits: 3
• RELI 341 - Global Perspectives on Spirituality and Healing Credits: 3
• RELI 490 - Comparative Study of Religions Credits: 3
• SOCI 385 - Sociology of Religion Credits: 3

Four courses (12 credits) in religious studies at the 300 and 400 level

Courses should be chosen from religious studies courses other than those used to fulfill the second and third requirements above.

Up to 6 credits of a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit) may be used to fulfill this requirement.

Two elective courses (6 credits)

Courses that meet this requirement should be chosen from courses in religious studies or related disciplines (including anthropology, art history, and history) selected in consultation with an advisor.

Up to 6 credits of a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit) may be used to fulfill this requirement.

Undergraduate Minor

Judaic Studies Minor

Banner Code: JS

The minor in Judaic studies is designed for students interested in the culture, history, and politics of Jewish communities across the world.
This program of study is offered by the Department of Religious Studies.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing this minor must complete 15 credits.

**Three core courses (9 credits):**

- RELI 352 - Judaism from Exile to Talmud Credits: 3
- RELI 370 - Judaism: Life and Thought Credits: 3
- RELI 371 - Classic Jewish Texts Credits: 3

**Two elective courses (6 credits) chosen from the list below:**

Special topics courses and independent studies courses, when relevant, may be used to fulfill this requirement with prior written approval of the undergraduate director.

- HEBR 150 - Introduction to Biblical Hebrew Credits: 3
- HEBR 160 - Readings in Biblical Hebrew Credits: 3
- HIST 465 - The Middle East in the 20th Century Credits: 3
- RELI 211 - Religions of the Near (Middle) East Credits: 3
- RELI 350 - Religion and History of Ancient Israel Credits: 3
- RELI 372 - American Judaism Credits: 3
- RELI 373 - Varieties Of Jewish Expression Credits: 3
- SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies Credits: 3

**Total: 15 credits**

---

**Religious Studies Minor**

**Banner Code:** RELI

The minor in religious studies introduces students to the world’s religious traditions. Within the minor, students may pursue religious traditions of Asia or the Near (Middle) East or comparative aspects of religion.

This program of study is offered by the Department of Religious Studies.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing this minor must complete 18 credits with a minimum grade of 2.00 in each course.
One course (3 credits) chosen from:

- RELI 100 - The Human Religious Experience Credits: 3
- RELI 211 - Religions of the Near (Middle) East Credits: 3
- RELI 212 - Religions of the Orient Credits: 3

Five elective courses (15 credits) in religious studies

At least three courses (9 credits) must be at the 300 level or above.

Total: 18 credits

Russian and Eurasian Studies

Phone: 703-993-1233
Web: russianstudies.gmu.edu

Faculty

Barnes (History and Art History), Bockman (Sociology and Anthropology), Boettke (Economics), Christensen (Modern and Classical Languages), Johnsen-Neshati (Theater), Katz (Public and International Affairs), Kelly (History and Art History), Korostelina (Institute for Conflict Analysis and Resolution), Levine (Modern and Classical Languages, director), McGlinchey (Public and International Affairs), Pacynska (Institute for Conflict Analysis and Resolution), Vasilyevna-Roberts (Modern and Classical Languages), Wade (History and Art History)

Coursework

As an interdisciplinary program, Russian and Eurasian Studies draws on many courses from across the university. Students should consult with the director to determine whether a particular course may be used to fulfill a requirement or elective in the degree program.

Undergraduate Programs

The bachelor's degree in Russian and Eurasian studies allows students to choose a concentration in one of three areas: Russian language and culture, Russia studies, or Eurasia studies.

Undergraduate Degree

Russian and Eurasian Studies, BA (pending SCHEV approval)

Banner Code: LA-BA-REST
This program of study is offered by the Russian and Eurasian Studies Program.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 33 credits in one of the concentrations below with a minimum GPA of 2.00.

▲ Concentration in Russian Language and Culture (RULC)

Students in the Russian language and culture concentration develop a high degree of competence in Russian language and culture and a basic familiarity with Russian and Eurasian history and politics.

Three required courses (9 credits) in advanced Russian:

- RUSS 380 - Advanced Russian I Credits: 3
- RUSS 381 - Advanced Russian II Credits: 3
- RUSS 480 - Fourth-Year Russian Credits: 3

Two courses (6 credits) in Russian culture or history:

- RUSS 353 - Russian Civilization Credits: 3
  or
- HIST 328 - Rise of Russia Credits: 3

- RUSS 354 - Contemporary Post-Soviet Life Credits: 3
  or
- HIST 329 - Modern Russia and the Soviet Union Credits: 3

Two courses (6 credits) in Russian literature or cinema in translation, chosen from:

- RUSS 325 - Major Russian Writers Credits: 3
- RUSS 326 - A Survey of Russian Literature Credits: 3
- RUSS 327 - A Survey of Russian Literature Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3

Three courses (9 credits) taught in Russian, chosen from:

- RUSS 302 - Russian Conversation and Composition Credits: 3
- RUSS 303 - Russian Advanced Conversation Credits: 3
- RUSS 310 - Readings in Russian Literature Credits: 3
- RUSS 311 - Contemporary Russian Short Fiction Credits: 3
- RUSS 401 - Readings in the Social Sciences Credits: 3
• RUSS 410 - Russian Poetry Credits: 3
• RUSS 481 - Fourth-Year Russian Credits: 3

One course (3 credits) in the social sciences dealing with Russia

• GOVT 338 - Government and Politics of Russia Credits: 3
• GEOG 330 - Geography of the Soviet Succession States Credits: 3
• ECON 380 - Economies in Transition Credits: 3

Note:
Any topically appropriate course in a social science discipline (ANTH, ECON, GEOG, GOVT, SOCI) may be used to fulfill this requirement with the prior written approval of the director.

▲ Concentration in Russia Studies (RUSS)

The Russia studies concentration is designed to provide students with in-depth interdisciplinary training in Russia and the Soviet Union. Students will develop a high degree of competence in Russian history, politics, society, and culture as well as a basic competence in the Russian language and the broader Eurasian context.

Two required language courses (6 credits):

• RUSS 250 - Gateway to Advanced Russian Credits: 3
• RUSS 380 - Advanced Russian I Credits: 3

Note:
Other relevant advanced language courses may be used to fulfill this requirement with the prior written approval of the director. Majors are encouraged to take additional advanced Russian language courses.

Two courses (6 credits) of Russian or Soviet history chosen from:

• HIST 328 - Rise of Russia Credits: 3
• HIST 329 - Modern Russia and the Soviet Union Credits: 3
• HIST 426 - The Russian Revolution Credits: 3

Note:
HIST 300 - Introduction to Historical Method, HIST 388 - Topics in European History, or HIST 499 - Senior Seminar in History, when relevant, may be used to fulfill this requirement with the prior written approval of the director.

Two courses (6 credits) of social sciences dealing primarily with Russia chosen from:
- GOVT 338 - Government and Politics of Russia Credits: 3
- GEOG 330 - Geography of the Soviet Succession States Credits: 3
- ECON 380 - Economies in Transition Credits: 3

Note:

Any topically appropriate courses in any social science discipline (ANTH, ECON, GEOG, GOVT, SOCI) may be used to fulfill this requirement with the prior written approval of the director.

Two courses (6 credits) of Russian literature or culture chosen from:

- RUSS 310 - Readings in Russian Literature Credits: 3
- RUSS 311 - Contemporary Russian Short Fiction Credits: 3
- RUSS 325 - Major Russian Writers Credits: 3
- RUSS 326 - A Survey of Russian Literature Credits: 3
- RUSS 327 - A Survey of Russian Literature Credits: 3
- RUSS 353 - Russian Civilization Credits: 3
- RUSS 354 - Contemporary Post-Soviet Life Credits: 3

Note:

Other relevant courses may be used to fulfill this requirement with the prior written approval of the director.

Three courses at the 300 and 400 level (9 credits) that focus predominantly on Eastern Europe, Russia, or Central Asia

Courses used to meet this requirement may be in any field of study including special topics courses and other courses that deal primarily with the geographic areas covered in the Russian and Eurasian studies major. To use a special topics course or other course with variable content to meet this requirement, students should seek the advanced written approval of the director. (Special topics courses may be repeated for credit when the topic is different.) Examples of courses that may meet this requirement:

- RUSS 302 - Russian Conversation and Composition Credits: 3
- RUSS 303 - Russian Advanced Conversation Credits: 3
- RUSS 310 - Readings in Russian Literature Credits: 3
- RUSS 311 - Contemporary Russian Short Fiction Credits: 3
- RUSS 325 - Major Russian Writers Credits: 3
- RUSS 326 - A Survey of Russian Literature Credits: 3
- RUSS 327 - A Survey of Russian Literature Credits: 3
- RUSS 353 - Russian Civilization Credits: 3
- RUSS 354 - Contemporary Post-Soviet Life Credits: 3
- RUSS 381 - Advanced Russian II Credits: 3
- RUSS 401 - Readings in the Social Sciences Credits: 3
- RUSS 407 - Russian Drama and Theater Credits: 3
- RUSS 410 - Russian Poetry Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3
The Eurasia studies concentration is designed to provide students with interdisciplinary training in the study of Eurasia, with special focus on Central Asia and secondarily on Russia/the Soviet Union and Eastern Europe. Students will develop a high degree of competence in the history, politics, and culture of Eurasia and a basic competence in a relevant language.

Two courses (6 credits) of Russian or other Eurasian-related language:

Courses used to meet this requirement may be in the same language that is used to meet the college language requirement, in which case the student needs to complete 6 credits beyond intermediate proficiency (beyond courses numbered 210 at Mason). With the approval of the director, courses used to meet this requirement may be in a Eurasian-related language that was not used to meet the college language requirement at a level approved by the director.

Two social science courses at the 300- and 400-level (6 credits):

Courses used to fulfill this requirement must focus primarily on Central Asia and Eurasia and may be in any social science discipline (ANTH, ECON, GEOG, GOVT, SOCI).

Two history courses at the 300- and 400-level (6 credits):

Courses used to fulfill this requirement must focus primarily on Central Asia and Eurasia.

Two literature or film courses at the 300- and 400-level (6 credits):

Courses used to fulfill this requirement must be Eurasian related.

Three courses at the 300- and 400-level (9 credits) that focus predominantly on Eurasia:
Courses used to meet this requirement may be in any field of study including special topics courses and other courses that deal primarily with the geographic areas covered in the Russian and Eurasian studies major. To use a special topics course or other course with variable content to meet this requirement, students should seek the advanced written approval of the director. (Special topics courses may be repeated for credit when the topic is different.) Examples of courses that may meet this requirement:

- ARTH 386 - The Silk Road Credits: 3
- HIST 328 - Rise of Russia Credits: 3
- HIST 329 - Modern Russia and the Soviet Union Credits: 3
- HIST 387 - Topics in Global History Credits: 3
- HIST 388 - Topics in European History Credits: 3
- HIST 460 - Modern Iran Credits: 3
- HIST 462 - Women in Islamic Society Credits: 3
- HIST 499 - Senior Seminar in History Credits: 3
- GOVT 338 - Government and Politics of Russia Credits: 3
- GOVT 340 - Central Asian Politics Credits: 3
- GOVT 345 - Political Islam Credits: 3
- GOVT 444 - Issues in International Studies Credits: 1-3
- GOVT 447 - Revolution and International Politics Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3
- GEOG 330 - Geography of the Soviet Succession States Credits: 3
- ECON 380 - Economies in Transition Credits: 3
- Any CONF course

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in Russian and Eurasian studies may fulfill this requirement by successfully completing RUSS 302, 325, or 407.

- Sociology and Anthropology

Phone: 703-993-1440
Web: sociology.gmu.edu
    anthropology.gmu.edu

Faculty

Emeritus faculty: Black, Dumont, Golomb (anthropology); Borkman (sociology)

Professors: Gusterson, Lancaster, Seligmann, Williams (anthropology); Dennis, Haines, Kurtz, Rosenblum, Scimecca (sociology)

Associate professors: Bryant, Palkovich, Snead, Trencher (chair) (anthropology); Best, Guagnano, Hanrahan, Jacobs, Rader (sociology)

Assistant professors: Benitez, Bickford, Mantz (anthropology); Bockman, Dale, Davis, Kim, Samara (sociology)

Term associate professor: Masters (sociology)
Term assistant professors and instructors: Arabandi, Zimmerman (sociology)

Affiliate professors: Avruch (anthropology); Bainbridge, Goldstone, Johnson, Levine, Zingraff (sociology)

Adjuncts: Minnich, Nambiar, Pearlman, Sandole-Staroste

Course Work

This department offers all course work designated ANTH, SOAN, and SOCI in the Courses chapter of this catalog.

Undergraduate Programs

Anthropology

The department offers a bachelor of arts degree in anthropology. The program draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

Honors in the Major

Highly qualified students may apply to graduate with honors in the major. Eligible students must have completed at least 60 credits, taken ENGL 302 for the social sciences, completed 15 credits of anthropology (including ANTH 114, 120, and 135), and have a minimum cumulative GPA of 3.50 and a minimum GPA of 3.75 in anthropology courses.

To graduate with honors in the major students must successfully complete a sequence of special honors sections: ANTH 492 (for those focusing on sociocultural anthropology) or ANTH 420 (for those interested in archaeology or biological anthropology) both plus ANTH 499, where they conduct additional research leading to the completion of an honors thesis. For more information, contact the anthropology undergraduate director.

Sociology

The department offers a bachelor's degree in sociology. Sociology majors study how social movements emerge from the collective efforts of individuals and the role that social forces play in defining racial identities and gender roles. They take courses in the theories that explain social phenomena and develop strong research skills, learning how to conduct surveys, interviews, systematic observation as well as how to evaluate sources.

With the strong research skills, critical thinking, and effective writing that are the hallmark of sociology graduates, they are prepared for a variety of career paths from teaching, human service, and human resource occupations to work in the criminal justice system, marketing, and social research. The sociology major is also excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Honors in the Major

Highly qualified students may apply to graduate with honors in the major. Eligible students must have completed at least 75 credits with a minimum of 15 credits in sociology (6 of which must have been taken at Mason) and have a minimum cumulative GPA of 3.50 and a minimum GPA of 3.75 in sociology courses.

To graduate with honors in sociology, students must complete SOCI 480 and 481 with a minimum GPA of 3.50 overall and in sociology courses presented for graduation. The 6 credits of honors courses may count toward the major requirement in sociology. For more information or application procedures, contact the department.
Bachelor’s/Accelerated Master’s Program

The department offers highly qualified majors in sociology the opportunity to apply to an accelerated master’s degree program in sociology. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 144 credits, sometimes within five years.

Minors

The department offers minors in anthropology and sociology available to students in any major.

The department coordinates the Immigration Studies Minor. See the Interdisciplinary Minors section of this chapter for more information.

Graduate Programs

Anthropology

The department offers a master's degree in anthropology. Students can choose one of three emphases: advanced training in sociocultural anthropology; culture, health and bioethics; or transnational and global issues. They can choose from many courses that are richly interdisciplinary, and cover such diverse topics as nationalism and transnationalism; bioethics; social movements, ethnicity and identity; conflict and violence; migration, displacement, and refugees; regional ethnography; and political economy and globalizationsation. Departmental specializations include the following regions: Central and South America, Europe, Africa, the Middle East, Asia, and the United States. Course work progresses from core courses to more advanced courses and culminates in a thesis.

Sociology

The department offers a master's and doctoral degree in sociology. Students pursuing a master’s degree in sociology take required courses in theory and methods and a host of electives. Students may choose to focus their electives in one of a number of emphases: sex and gender; crime, delinquency, and corrections; race and ethnicity; cultural studies; or conflict analysis and management.

The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Funding

The department has a limited number of teaching assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Cultural Studies
The master's degrees in anthropology and sociology provide excellent preparation for students interested in pursuing a doctorate in cultural studies who do not already hold a master's degree. Within the master's in sociology, the emphasis in sociology of culture is designed explicitly to prepare students for the doctoral program in cultural studies.

Nondegree Status

Applicants who do not wish to pursue a degree may apply for nondegree status. Nondegree students must meet the same admission requirements as degree-seeking students (minimum undergraduate GPA of 3.00, among other criteria). Nondegree students may later apply for admission to a degree program, and up to nine credits earned in nondegree status may transferred to the master’s degrees in anthropology or sociology, subject to the approval of the program director and dean.

Undergraduate Degree

Anthropology, BA

Banner Code: LA-BA-ANTH

Anthropology is the study of human beings and their cultures. The bachelor's degree in anthropology draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

In addition to satisfying university general education requirements and requirements for the bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 36 credits with a minimum GPA of 2.00.

Students are advised to consult with an advisor to learn how they can fulfill general education requirements in global understanding, information technology, and synthesis, as well as the college-level requirement in non-Western culture.

Three core courses (9 credits):

- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- ANTH 390 - Theories, Methods, and Issues I Credits: 3
- ANTH 490 - Theories, Methods, and Issues II Credits: 3

One course from each of the three fields listed below (9 credits):

Archaeology

- ANTH 120 - Introduction to Archaeology Credits: 3
- ANTH 420 - Interpretation in Archaeology Credits: 3
Biological anthropology

- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3
- ANTH 365 - Race and Racism Credits: 3

Linguistic anthropology

- ANTH 380 - Language and Culture Credits: 3
- LING 326 - General Linguistics Credits: 3

Six elective courses (18 credits):

Students should choose electives from ANTH courses at the 300- and 400-level. SOCI 311 and 313 may be applied toward this requirement. SOCI 311 may substitute for ANTH 390.

Students wishing to pursue careers in anthropology should consider taking ANTH 492 (or subfield specialty equivalents, such as ANTH 420, 450, 495, or 496) as one of their electives.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in anthropology may fulfill this requirement by successfully completing ANTH 490.

Sociology, BA

Banner Code: LA-BA-SOCI

Sociology involves the systematic study of social structures, cultural patterns, and human relationships. The sociological imagination combines rigorous methods with theory and observation, yielding insights that challenge commonly held assumptions about the social world. Sociology also informs the practice of social and public service, aiding efforts to address important social problems. Majoring in sociology positions students so they can pursue a varied set of career paths, ranging from teaching, human service, and human resource occupations to positions in the criminal justice system, marketing, and social research. The sociology major is excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all undergraduate degrees, see the Academic Policies chapter of this catalog.

Degree Requirements

In addition to satisfying university general education requirements and the requirements for a bachelor of arts degree in the College of Humanities and Social Sciences, students pursuing this degree must complete 35 credits of sociology courses with a minimum GPA of 2.00. No more than 6 credits of courses with unsatisfactory grades (C- or D) may be applied toward the degree, but students must have a minimum grade of 2.00 in the introductory course and the four core courses.
One introductory core course (3 credits) chosen from:

This course must be completed with a minimum grade of 2.00.

- SOCI 101 - Introductory Sociology Credits: 3
- SOCI 102 - Introduction to Sociological Inquiry Credits: 3

Four additional core courses (14 credits)

Each of these courses must be completed with a minimum grade of 2.00.

- SOCI 303 - Sociological Research Methodology Credits: 4
- SOCI 311 - Classical Sociological Theory Credits: 3
- SOCI 313 - Statistics for the Behavioral Sciences Credits: 4
- SOCI 412 - Contemporary Sociological Theory Credits: 3

Six elective courses (18 credits) in sociology at the 300 or 400 level

Students are strongly encouraged to focus four of their elective courses (12 credits) in one of the concentrations below chosen to suit their interests and career objectives. Students who choose a concentration will have two remaining electives.

Concentrations

Students have the option of completing one of the following 12-credit concentrations.

Students who graduate with honors in sociology may apply 3 credits of honors course work (SOCI 480, 481, 482) to their selected concentration where appropriate and with prior written approval of the undergraduate director.

▲ Concentration in Childhood and Youth (CYC)

This concentration focuses on the changing social realities, experiences, and identities of children and youth as they are formed in different social and historical contexts. It emphasizes children in peer groups, youth subcultural activities, youth and children and the media, schools, families, social movements, social policy, and the welfare state. This concentration is appropriate for students interested in working directly with children and youth or in organizations serving them in a broad range of fields, such as educational counseling, teaching, policy, advocacy or clinical work, family and community services, social work, early child development, and juvenile justice.

Students pursuing this concentration must complete 12 credits.

One required course (3 credits):

- SOCI 360 - Youth Culture and Society Credits: 3

Three courses (9 credits) chosen from:

- SOCI 302 - Sociology of Delinquency Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3
- SOCI 395 - Issues in Sociology Credits: 3
- SOCI 483 - The Sociology of Higher Education Credits: 3
- ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3

▲ Concentration in Culture (CLTR)

This concentration focuses on the social and institutional forces that shape religion, the arts, language, gender, and cultural norms and tastes. It is appropriate for students interested in the media, the arts and popular culture, identity, multiculturalism, and the problems of cultural difference, religion, education, and the construction of knowledge in contemporary societies. Cross-cultural work in this field is encouraged.

Students pursuing this concentration must complete 12 credits.

One required course (3 credits):
- SOCI 314 - Sociology of Culture Credits: 3

Three courses (9 credits) chosen from:
- SOCI 309 - Marriage, Families, and Intimate Life Credits: 3
- SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3
- SOCI 355 - Social Inequalities Credits: 3
- SOCI 377 - Art and Society Credits: 3
- SOCI 382 - Education in Contemporary Society Credits: 3
- SOCI 385 - Sociology of Religion Credits: 3
- SOCI 395 - Issues in Sociology Credits: 3
- SOCI 414 - Sociology of Language Credits: 3
- SOCI 505 - Sociology of Sex and Gender Credits: 3
- ANTH 332 - Cultures in Comparative Perspective Credits: 3
- ANTH 488 - Gender, Sexuality, and Culture Credits: 3

▲ Concentration in Deviance, Crime, and Social Control (DCSC)

This concentration focuses on the social, legal, and political systems that underpin social control in Western societies and beyond. The emphasis is on how norms, values, and common sense regulate human action and the social forces that produce deviant behavior and societal responses to it. This concentration is appropriate for students interested in the criminal justice system and the law.

Students pursuing this concentration must complete 12 credits.

One required course (3 credits):
• SOCI 300 - Social Control and Human Freedom Credits: 3

Three courses (9 credits) chosen from:

• SOCI 301 - Criminology Credits: 3
• SOCI 302 - Sociology of Delinquency Credits: 3
• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 308 - Racial and Ethnic Relations Credits: 3
• SOCI 310 - Sociology of Deviance Credits: 3
• SOCI 332 - Sociology of Urban Communities Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 352 - Social Problems Credits: 3
• SOCI 355 - Social Inequalities Credits: 3
• SOCI 395 - Issues in Sociology Credits: 3
• SOCI 402 - Sociology of Punishment and Corrections Credits: 3

▲ Concentration in Global Sociology (GSOC)

This concentration focuses on global interconnectedness and its effect on the nature of societies around the world. It emphasizes new technologies and social processes, migration, transnational communities, global cities, and social movements working across state borders. This concentration is appropriate for students interested in pursuing internationally oriented careers in social change, political reform, and international development.

Students pursuing this concentration must complete 12 credits.

One required course (3 credits):

• SOCI 320 - Social Structure and Globalization Credits: 3

Three courses (9 credits) chosen from:

• SOCI 307 - Social Movements and Political Protest Credits: 3
• SOCI 308 - Racial and Ethnic Relations Credits: 3
• SOCI 326 - Armed Conflict and Conflict Resolution Credits: 3
• SOCI 332 - Sociology of Urban Communities Credits: 3
• SOCI 340 - Power, Politics, and Society Credits: 3
• SOCI 523 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
• ANTH 332 - Cultures in Comparative Perspective Credits: 3

▲ Concentration in Inequality and Social Change (INSC)

The focus is on inequalities, such as those of race, class, and sex, and on the manner in which such inequalities become structurally rooted in a society. The emphasis is on understanding the rise of the struggle for human rights, democracy, and various social movements that have sought to reverse these inequalities through protests, demonstrations, counterorganizations,
and the ballot. This concentration is appropriate for students who seek careers in social justice organizations, social services, or teaching, and those who wish to participate in social and political movements.

Students pursuing this concentration must complete 12 credits.

**One required course (3 credits):**

- SOCI 355 - Social Inequalities Credits: 3

**Three courses (9 credits) chosen from:**

- SOCI 300 - Social Control and Human Freedom Credits: 3
- SOCI 308 - Racial and Ethnic Relations Credits: 3
- SOCI 310 - Sociology of Deviance Credits: 3
- SOCI 315 - Sex and Gender in Contemporary Society Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3
- SOCI 340 - Power, Politics, and Society Credits: 3
- SOCI 360 - Youth Culture and Society Credits: 3
- SOCI 390 - Sociology of Health, Illness, and Disability Credits: 3
- SOCI 395 - Issues in Sociology Credits: 3 (depending on topic)
- SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies Credits: 3
- SOCI 523 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students majoring in sociology may fulfill this requirement by successfully completing SOCI 412.

**Undergraduate Minor**

**Anthropology Minor**

**Banner Code:** ANTH

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**

Students pursuing this minor must complete 21 credits in anthropology with a minimum GPA of 2.00, distributed as follows:

**Four required courses (12 credits):**
• ANTH 114 - Introduction to Cultural Anthropology Credits: 3
• ANTH 120 - Introduction to Archaeology Credits: 3
  or
• ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3
• ANTH 332 - Cultures in Comparative Perspective Credits: 3
• ANTH 430 - Research Methods in Archaeology Credits: 3
  or
• ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research Credits: 3

One regional ethnography course (3 credits) chosen from:

• ANTH 301 - Native North Americans Credits: 3
• ANTH 302 - Peoples and Cultures of Latin America Credits: 3
• ANTH 303 - Peoples and Cultures of Selected Regions Credits: 3
• ANTH 304 - Peoples and Cultures of the Pacific Credits: 3
• ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
• ANTH 307 - Ancient Mesoamerica Credits: 3
• ANTH 308 - Peoples and Cultures of the Middle East Credits: 3
• ANTH 309 - Peoples and Cultures of India Credits: 3
• ANTH 311 - Peoples and Cultures of Mainland Southeast Asia Credits: 3

One topical course (3 credits) chosen from:

• ANTH 300 - Civilizations Credits: 3
• ANTH 305 - Foraging Societies Credits: 3
• ANTH 310 - Social Organization and Kinship Credits: 3
• ANTH 312 - Political Anthropology Credits: 3
• ANTH 313 - Myth, Magic, and Mind Credits: 3
• ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective Credits: 3
• ANTH 322 - Historical Archaeology Credits: 3
• ANTH 325 - Field Techniques in Archaeology Credits: 3-6
• ANTH 360 - Evolution, Sex, and Society Credits: 3
• ANTH 365 - Race and Racism Credits: 3
• ANTH 370 - Environment and Culture Credits: 3
• ANTH 371 - Psychological Anthropology Credits: 3
• ANTH 375 - Anthropological Perspectives on History Credits: 3
• ANTH 380 - Language and Culture Credits: 3
• ANTH 381 - Health, Healing, and Culture Credits: 3
• ANTH 399 - Issues in Anthropology Credits: 3

One course (3 credits) in anthropology at the 300- or 400-level
Total: 21 credits

Sociology Minor

Banner Code: SOCI

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 21 credits in sociology with a minimum GPA of 2.00 distributed as follows:

Two required courses (6 credits):

- SOCI 101 - Introductory Sociology Credits: 3
- SOCI 311 - Classical Sociological Theory Credits: 3

Five elective courses (15 credits)

- Students may select a focus to their minor from one of the five concentrations offered by the department.

Total: 21 credits

Note:

Academically strong undergraduate majors are encouraged to apply to the accelerated master’s program after they complete 90 credits. Applicants should have a 3.25 GPA, with a 3.50 in sociology courses. If not, they may submit two letters of reference from faculty in the department. For more information, see the sociology graduate coordinator.

Bachelor's/Accelerated Master's Program

Sociology, BA/Sociology, Accelerated MA

Highly qualified undergraduate majors in sociology may apply to the accelerated master’s degree program and obtain both a BA and an MA in sociology following satisfactory completion of 144 credits, sometimes within five years. Well-prepared students are encouraged to apply as they near completion of 90 credits. Admitted students are able to use up to 6 graduate credits in partial fulfillment of requirements for the undergraduate degree. On completion and conferral of the undergraduate degree with
satisfactory graduate-level performance (3.00 in each course, grade of B or better) in graduate courses, students are given advanced standing in the master’s program. All other master’s degree requirements must be met.

Applicants must have a minimum cumulative GPA of 3.25 with a GPA of 3.50 in sociology courses and submit two letters of reference from faculty in the department. Interested students should contact the department for details about the application process.

**Master's Degree**

**Anthropology, MA**

**Banner Code: LA-MA-ANTH**

The master’s degree program in anthropology prepares students for advanced work in anthropology through courses focusing on the study of culture. Students learn how to use participant-observation field work methods, as well as comparative and holistic knowledge and research methods. Areas of emphasis are advanced training in sociocultural anthropology; culture, health and bioethics; and transnational and global issues. Course work progresses from core courses to more advanced courses and culminates in a thesis.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

**Application Requirements**

In addition to fulfilling the applications requirements for graduate study at Mason, applicants for this degree must submit:

- Three letters of recommendation from faculty members or others who can evaluate the applicant’s academic potential. If possible, at least one letter should be from an academic setting.
- 1,000-word writing sample, such as an essay or full-length research paper
- A current résumé

**Degree Requirements**

Students pursuing the master's degree in anthropology must successfully complete 36 credits. They may take ANTH 690 - Internship as elective credit. An internship can serve as a primary field research site for the thesis. Courses in archaeology and biological anthropology may not be used to meet any requirements for the master's degree in anthropology.

**Six required core courses (16 credits):**

- ANTH 535 - Anthropology and the Human Condition: Seminar I Credits: 3
- ANTH 536 - Anthropology and the Human Condition: Seminar II Credits: 3
- ANTH 635 - Regional Ethnography Credits: 3
- ANTH 650 - Ethnographic Methods and Research Design Credits: 3
- ANTH 750 - Ethnographic Genres Credits: 3
- ANTH 797 - Anthropology Colloquium Credits: 1
Five elective courses (14 credits)

Electives should be advanced courses in anthropology chosen in consultation with an advisor. Students can focus their electives around an emphasis in these three areas: advanced training in sociocultural anthropology; culture, health and bioethics; and transnational and global issues. Up to six credits may be from other disciplines with the prior written approval of the graduate director.

Six credits of proposal and thesis

- ANTH 798 - Thesis Proposal Credits: 3-6
- ANTH 799 - Master's Thesis Credits: 1-5

Total: 36 credits

Sociology, MA

Banner Code: LA-MA-SOCI

Students pursuing a master’s degree in sociology may choose an emphasis in general sociology; sex and gender; crime, delinquency, and corrections; race and ethnicity; cultural studies; or conflict analysis and management. The general sociology emphasis allows maximum flexibility in the application of sociological knowledge to the analysis of social processes and systems. All emphases are appropriate for those anticipating further graduate study leading to the doctorate in sociology.

The department provides opportunities for students to develop expertise in a variety of areas, including applied methods, community, conflict analysis and management, development and social change, deviance, environmental sociology, gerontology, medical sociology, occupations and professions, policy analysis, race and ethnicity, sociology of science and technology, cultural studies, and survey research.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see the Academic Policies chapter of this catalog.

Application Requirements

In addition to meeting general admissions requirements for graduate study, applicants must present the following:

- Minimum of 3 credits each in undergraduate sociological theory, statistics, and research methods. Equivalent courses in other disciplines may be substituted for some of these requirements, with permission.
- Three letters of recommendation from people who have supervised the student’s work. Two should be from an academic setting.
- A written statement (approximately 600 words) explaining the student’s interest in sociology
- Writing sample, such as an essay or full-length research paper
- A current résumé

Degree Requirements
Students pursuing the master's degree in sociology must complete 33 credits.

**Two courses (6 credits) of social theory:**

- SOCI 611 - Classical Sociological Theory Credits: 3
- SOCI 612 - Contemporary Sociological Theory Credits: 3

**Three courses (9 credits) of research methods, including:**

- SOCI 530 - Methods and Logic of Social Inquiry Credits: 3

**Four to five elective courses (12 to 15 credits)**

Students may choose their electives from the full range of offerings in sociology or focus nine credits of electives in one of five emphases.

**Emphasis in Sex and Gender**

- One course (3 credits) in sex and gender
- SOCI 505 - Sociology of Sex and Gender Credits: 3
- SOCI 696 - Independent Study Credits: 3

**Emphasis in Conflict Analysis and Management**

- 9 credits in the sociology of conflict and conflict management

**Emphasis in Race and Ethnicity**

- 9 credits in race and ethnicity

**Emphasis in Crime, Delinquency, and Corrections**

- SOCI 607 - Criminology Credits: 3
- SOCI 608 - Juvenile Delinquency Credits: 3
- SOCI 609 - Sociology of Punishment and Corrections Credits: 3

**Emphasis in Sociology of Culture**

This emphasis prepares students for the doctoral program in cultural studies.

- a 3-credit master’s-level course in a department other than Sociology and Anthropology that serves as an introduction to cultural studies
- SOCI 614 - Sociology of Culture Credits: 3
• CULT 802 - Histories of Cultural Studies Credits: 3

Colloquium (0 credits):

• SOCI 797 - Sociology Colloquium Credits: 0

Three or six credits of thesis

A master’s thesis demonstrates the student's capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to the advancement of knowledge in sociology.

• Take 3 or 6 credits of SOCI 799 - Thesis Credits: 1-6

Total: 33 credits

Doctoral Degree

Sociology, PhD

Banner Code: LA-PHD-SOCI

The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

This program of study is offered by the Department of Sociology and Anthropology.

For policies governing all graduate degrees, see the Academic Policies chapter of this catalog.

Application Requirements

See the Application for Graduate Study for admission deadlines. In addition to materials required of all applicants for graduate study at Mason, applicants to the PhD in sociology should submit the following:

• A statement of purpose of academic study
• A writing sample such as a full-length research paper
• Three letters of recommendation from faculty members or those who can evaluate the applicant’s academic potential
• GRE scores (the general test is required; subject tests are optional)

Reduction of Credit
Students who enter the program with a master’s degree may be allowed a reduction of credit up to 30 credits subject to the approval of the graduate director and the dean.

Degree Requirements

Students pursuing the doctorate in sociology must successfully complete a minimum 72 credits.

Nine foundation courses (27 credits)

Two prosemarians (6 credits):
- SOCI 801 - Proseminar in Public and Applied Sociology Credits: 3
- SOCI 802 - Proseminar in Public and Applied Sociology II Credits: 3

Two courses (6 credits) of theory:
- SOCI 711 - Classical Sociological Theory Credits: 3
- SOCI 712 - Contemporary Sociological Theory Credits: 3

Three courses (9 credits) of methodology and analysis chosen from:
- SOCI 620 - Methods and Logic of Social Inquiry Credits: 3
- SOCI 636 - Statistical Reasoning Credits: 3
then
- SOCI 730 - Analytic Techniques of Social Research Credits: 3
or
- SOCI 634 - Qualitative Research Methods Credits: 3

Two courses (6 credits) of statistics/methods courses chosen from:
- SOCI 631 - Survey Research Credits: 3
- SOCI 632 - Evaluation Research for Social Programs Credits: 3
- SOCI 634 - Qualitative Research Methods Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- ANTH 613 - Ethnography Credits: 3
- ANTH 650 - Ethnographic Methods and Research Design Credits: 3
- WMST 610 - Feminist Approaches to Social Research Credits: 3

Two additional prosemarians (6 credits):
- SOCI 803 - Institutions and Inequality Credits: 3
• SOCI 804 - Sociology of Globalization Credits: 3

Three courses (9 credits) in a specialization

Up to two courses (6 credits) may be from courses that are not in sociology, chosen in consultation with the student’s advisor or the graduate director.

Specialization in institutions and inequalities

• SOCI 605 - Gender and Social Structure Credits: 3
• SOCI 840 - Work Organizations and Social Inequality Credits: 3
• SOCI 844 - Youth, Schooling, and Popular Culture Credits: 3
• SOCI 845 - Society and Education Credits: 3
• PUAD 620 - Organization Theory and Management Behavior Credits: 3
• PUAD 640 - Public Policy Process Credits: 3
• PUAD 651 - Virginia Politics, Policy, and Administration Credits: 3
• PUAD 750 - Federalism and Intergovernmental Relations Credits: 3
• GOVT 852 - Seminar in Political Leadership Credits: 3
• JLCP 749 - Issues in Justice Administration Credits: 1-3
• WMST 610 - Feminist Approaches to Social Research Credits: 3
• WMST 611 - Gender Research Project Credits: 3

Specialization in sociology of globalization

• SOCI 523 - Racial and Ethnic Relations: American and Selected Global Perspectives Credits: 3
• SOCI 850 - Sociology of Development Credits: 3
• SOCI 851 - Globalization and Social Movements Credits: 3
• SOCI 853 - Cities in a Global Society Credits: 3
• SOCI 857 - Sociology of Human Rights Credits: 3
• ANTH 630 - Anthropology and Humanitarian Action Credits: 3
• ANTH 631 - Refugees in the Contemporary World Credits: 3
• ANTH 632 - International Migration in Comparative Perspective Credits: 3
• ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives Credits: 3
• CONF 736 - Globalization and International Conflict Credits: 3
• PUBP 602 - Regional Economic Development: Strategies and Applications Credits: 3
• PUBP 758 - Global Threats and Medical Policies Credits: 3

Five courses (15 credits) of electives

Up to two courses (6 credits) may be from courses that are not in sociology, chosen in consultation with the student’s advisor or the graduate director.

15 credits of dissertation proposal and research
Students must complete a minimum of 3 credits of 999.

- SOCI 998 - Doctoral Dissertation Proposal Credits: 1-6
- SOCI 999 - Doctoral Dissertation Credits: 1-12

Research Proficiency

Students must demonstrate proficiency in a range of quantitative and qualitative research methods prior to taking the qualifying exams for candidacy. Proficiency is determined by satisfactory course work or an exam. Students in the specialization in sociology of globalization must also demonstrate proficiency in one foreign language at an advanced level of reading and comprehension.

Advancement to Candidacy

To advance to candidacy, doctoral students must complete all course work required on their approved program of study. Students must also successfully pass two written qualifying examinations. One examination is in the foundations of sociological inquiry, linking research methods and sociological theory to public concerns. The second examination is in the student’s area of specialization, administered by a faculty committee appointed by the graduate program director.

In addition, students must have a dissertation committee appointed by the dean and an approved dissertation proposal. Evidence of the approved proposal must be on file in the Dean’s Office before advancement.

Continuous Registration

Once enrolled in SOCI 998, students must maintain continuous registration for at least 1 credit; once enrolled in 999 students must follow the university continuous registration policy.

Women and Gender Studies

Phone: 703-993-2896
Web: wmst.gmu.edu

Faculty

Amireh, Baker, Beach, Bergoffen, Bernard, Best, Bullard, Burr, Carbonneau, Cattaneo, Censer, Cheldelin, Cherubin, Christensen, Cohen, Constantine, Copelman, Davidson, Davis, Deshmukh, Dunne, Eby, Fischer, Friedley, Fuchs, Fyfe, Gilbert, Gring-Pemble, Hamdani, Hanrahan (director), Harvey, Hodges, Hodzic, Jadallah, Johnsen-Neshati, Jordan, Kaplan, Karametou, King, Kirkland, Kirsch, Koch, Lont, Mann, Masters, Michals, Misencik, Muir, Palkovich, Pascarell, Pawloski, Rabin, Regan, Ricouart, Rosenblum, Samuelian, Sandole-Staroste, Scott, Seligmann, Snyder-Hall, Stearns, Tichy, Todd, Tolchin, Travis, Vivancos Perez, Yocom, Zawacki

Course Work

The Women and Gender Studies Department offers all course work designated WMST in the Courses chapter of this catalog.

About Women and Gender Studies at Mason
By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender roles in social, political, cultural, and economic life; gender roles in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people’s lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

**Undergraduate Programs**

The Women and Gender Studies Program offers an interdisciplinary minor open to students from any major. Students have the opportunity to earn credit towards the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason's campus. Students pursuing this minor can take advantage of the many activities and resources provided by the Women and Gender Studies Center.

**Graduate Programs**

The program sponsors the concentration in women and gender studies in the master’s degree in interdisciplinary studies (MAIS). This concentration promotes advanced scholarship that transcends traditional disciplinary boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, public policy, philosophy, social work, conflict analysis and resolution, environmental science, and the arts. See Interdisciplinary Studies, MAIS section of this chapter.

The program also offers a graduate certificate in women and gender studies. Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

**Women and Gender Studies Center**

The academic program is closely affiliated with the Women and Gender Studies Center. The center organizes a wide variety of lectures, conferences, workshops, and other public events throughout the year. The center hosts a library and functions as a community space for students and faculty. It supports the Gender Justice Research Group, a monthly forum for research on gender and global human rights, as well as the Gender Research Project, a methodology class and project focused on gender issues on the Mason campus.

**Undergraduate Interdisciplinary Minor**

**Women and Gender Studies Minor**

**Banner Code: WGST**

This is an interdisciplinary minor open to the entire undergraduate student body.

This program of study is offered by the Women and Gender Studies Program.

For policies governing all minors, see the Academic Policies chapter of this catalog.

**Course Work**
Students in this minor complete 18 credits with a minimum GPA of 2.00, distributed as follows:

Two required courses (6 credits):

- WMST 200 - Introduction to Women and Gender Studies Credits: 3
- WMST 330 - Feminist Theory Across the Disciplines Credits: 3

Four elective courses (12 credits)

- Chosen from courses in women and gender studies, courses cross-listed with women and gender studies, or course offerings in other departments approved by the director. No more than 6 credits may be taken in any one department.

Total: 18 credits

Master's Level Certificate

Women and Gender Studies Graduate Certificate

Banner Code: LA-CERG-WGST

The certificate may be taken alone or in conjunction with another graduate program. Courses taken toward the certificate may also be used in a degree program, subject to approval of the graduate coordinator in the respective program.

This program of study is offered by the Women and Gender Studies Program.

For policies governing all graduate certificates, see the Academic Policies chapter of this catalog.

Admission

The certificate is open to all students who meet university criteria for admission to graduate study. Students must submit an application for graduate study.

Transfer Credit

Students may transfer up to 3 graduate credits earned at another accredited institution, and 9 graduate credits earned at Mason in nondegree status toward the certificate, subject to approval of the director and the dean and in accordance with university policy.

Certificate Requirements

Students must complete 15 graduate credits and a capstone portfolio. The credits are distributed as follows:

Two required courses (6 credits):
• WMST 630 - Feminist Theories across the Disciplines Credits: 3
• WMST 640 - Women and Global Issues Credits: 3

Three electives (9 credits) chosen from relevant courses with approval of the director:

• These credits may be in departments across the university that address the study of women and gender, courses in the Women and Gender Studies Program, and appropriate directed readings or independent study courses.

Capstone portfolio

• Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous course work and a 7- to 10-page essay discussing them. Items selected may include course papers, performance videos, photos of exhibits, tapes of music, or other items as agreed on by the student and advisor. The portfolio must be approved by the advisor and submitted to the Women and Gender Studies where it will be presented, displayed, and archived.

Total: 15 credits

■ New Century College

Course Work

NCC offers all course work designated NCLC in the Courses chapter of this catalog.

About New Century College

An integral part of the College of Humanities and Social Sciences, New Century College (NCC) offers students a personalized, interdisciplinary education typical of a small college within the context of a large public university. Drawing on its own faculty, which is enriched regularly with others from across the university, New Century provides a learning environment that integrates interdisciplinary knowledge with workplace and lifelong learning. The programs enhance students' technology skills, improve their writing, and provide them with challenging opportunities.

New Century College students interact closely with faculty; engage in critical thinking, problem solving, creative activity, and leadership development; and participate in experiential education in the form of internships, field studies, service learning, or study abroad. They learn to develop original ideas, engage in active and reflective learning, master competency areas, and conduct independent inquiry with high ethical standards. Both the structure and curriculum of New Century College respond to the needs of civic and corporate communities and provide instruction for a rapidly changing society.

Undergraduate Programs

New Century College offers a bachelor of arts and a bachelor of science degree in integrative studies. The curriculum is based on intensive, interdisciplinary learning communities, coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self reflection.

Students who enroll in this degree program in their first year at Mason take Mason Cornerstones (see below). All students complete their degree programs with an interdisciplinary concentration. See the programs of study below. Students develop mastery of nine essential competencies (communication, valuing, global understanding, problem solving, group interaction, effective citizenship, aesthetic awareness, critical thinking, and information technology) assessed through freshman and graduation portfolios.

Mason Cornerstones

New Century College offers an interdisciplinary first-year program known as Mason Cornerstones. This is open to students in any major. Cornerstones is a 24-credit program that consists of a sequence of four courses: NCLC 101, 102, 103 and 203.

Students who successfully complete Mason's Cornerstones will have met the university general education requirements in lower-level written communication, oral communication, information technology, literature, arts, non-laboratory natural science, global understanding, and social and behavioral sciences.

Transfer Students

New Century College welcomes transfer students from other four-year institutions or community colleges, as well as from other academic units within Mason. Academic advisors work with students to best use transfer credits and provide a plan for timely completion of the bachelor’s degree. All transfer students are required to take NCLC 391 within their first two semesters and meet with an academic advisor as soon as possible.

Minors

New Century College offers minors in leadership studies and nonprofit studies. Both are available to students in any major.
The Sustainability Studies Minor is offered jointly by the Department of Environmental Science and Policy and New Century College. For details, see the Department of Environmental Science and Policy section of the College of Science chapter of this catalog.

Graduate Programs

The college sponsors the concentration in zoo and aquarium leadership in the master’s degree in interdisciplinary studies (MAIS). This concentration prepares students for advanced careers in modern, professional zoos and aquariums. Admission to the concentration and enrollment in the courses is restricted to members of the Association of Zoos and Aquariums.

See the MAIS section of this chapter for details.

Centers

New Century College houses the Center for Field Studies and the Center for Leadership and Community Engagement. The services of these centers are available to all students and faculty in the university.

Undergraduate Degree

Integrative Studies, BA

Banner Code: LA-BA-INTS

The bachelor’s degree program in integrative studies is based on intensive, interdisciplinary learning communities coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection.

Students who enroll in this degree program their first year of college take Mason Cornerstones. After the first year, students take learning communities, courses that feature experiential learning and faculty-student research addressing fundamental questions. Students complete their degree programs with an interdisciplinary concentration.

The degree program requires mastery of nine essential competencies: communication, valuing, global understanding, problem solving, group interaction, effective citizenship, aesthetic awareness, critical thinking, and information technology. The competencies are assessed through freshman and graduation portfolios.

Students in this degree program meet university general education goals in the following way:

- Completion of Mason Cornerstones: lower-level written communication (ENGL 101), oral communication, information technology, arts, natural science (non laboratory), global understanding, social and behavioral sciences.
- Completion of 24 credits of learning communities: upper-level written communication (ENGL 302), writing intensive course.
- Completion of coursework specifically approved for these requirements (in NCC or in other units): Western civilization or world history, quantitative reasoning, natural science (with laboratory).
- NCLC 491: synthesis.

Students must complete Cornerstones and the 24 credits of learning communities with a minimum GPA of 2.00 in order to be able to use these to fulfill the general education requirements.

Students who transfer into New Century College should consult with an advisor on what they need to take to complete university general education requirements.
This program of study is offered by New Century College.

Students must fulfill all requirements for bachelor's degrees. For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

Students pursuing a bachelor’s degree in integrative studies complete 120 credits with at least 24 credits in learning communities, 12 credits of experiential learning, and a concentration of at least 30 credits. Students must present a minimum GPA of 2.00 in the concentration courses, which may include learning communities, experiential learning, independent study, and traditional university courses. All students complete their program of study by producing a final cumulative portfolio and a college senior exposition, completed through NCLC 491.

4 courses (12 credits) of Mason Cornerstones

NCLC 101, 102, and 203 are writing intensive courses that emphasize written communication as a way of thinking, discovering, and expressing ideas. Students who complete these three courses with a minimum GPA 2.0 have fulfilled 3 credits of the general education requirement in written communication (equivalent to ENGL 101).

- NCLC 101 - Narratives of Identity Credits: 6
- NCLC 102 - Global Communities and Networks Credits: 6
- NCLC 103 - Human Creativity: Science and Art Credits: 6
- NCLC 203 - Inquiry for Action: Facilitating Change Credits: 6

At least 24 credits of learning communities

Learning communities are interdisciplinary courses that combine subjects often taught in separate courses into a single course of 3-9 credits. In learning communities, faculty and students explore various ways to understand a topic. Learning communities are structured to help promote a greater sense of identity with an academic community. Hallmarks of New Century College learning communities are team teaching, collaborative projects, emphasis on writing and critical thinking, and opportunity for independent study. They often include experiential learning, either as an integral part of the class or as an optional add on.

At least 12 credits of experiential learning

The requirement in experiential learning reflects New Century College’s commitment to provide educational experiences that prepare graduates for the workplace and the demands of active and responsible citizenship. The workplace is as viewed as a site of instruction, one where students are exposed to the variety of skills needed to succeed. Through experiential learning, students combine work experience with academic study so that each will enrich the other.

Experiential learning includes include internships, study abroad, community service learning, course field trips, and other field study opportunities. The learning sites may change each semester and are usually off campus. George Mason provides student liability insurance for the experiential learning internship, but students are responsible for their own transportation and health care. Accident and health insurance is available from George Mason.

No more than 24 credits of experiential learning can count toward a student’s total credits for graduation.

Cumulative portfolio

The cumulative portfolio is reviewed by New Century College faculty.
College senior exposition

Students complete their senior exposition through NCLC 491, which they must take the semester prior to graduation.

- NCLC 491 - The Senior Capstone Experience Credits: 3

At least 30 credits in a concentration

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established interdisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. The concentration consists of traditional courses, learning communities, independent study, and experiential learning.

Concentration Requirements

▲ Advertising (ADV)

- ACCT 203 - Survey of Accounting Credits: 3
- COMM 230 - Case Studies in Persuasion Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- MKTG 312 - Consumer Behavior Credits: 3
- MKTG 313 - Integrated Marketing Communications Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
  or
- MGMT 301 - Managing People and Organizations Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- NCLC 202 - Public Speaking and Critical Thinking Skills Credits: 4
- NCLC 249 - The Internet: Literacy, HTML Tools, and Virtual Community Credits: 3-15
- NCLC 345 - Introduction to Multimedia Credits: 3-15

One course chosen from:

- NCLC 331 - The Nonprofit Sector Credits: 4
- NCLC 350 - Cyberculture Credits: 6
- NCLC 420 - Work Effectiveness Skills Credits: 3-15
- NCLC 423 - Management in the Global Marketplace Credits: 6
- NCLC 431 - Principles of Fund Raising Credits: 4
- NCLC 445 - Multimedia Design Credits: 5
- NCLC 449 - Multimedia Research and Project Development Credits: 4

Two courses chosen from:
• ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 180 - Computers in the Creative Arts Credits: 3
• AVT 280 - Introduction to Digital Arts Credits: 4
• BULE 302 - Legal Environment of Business Credits: 3

- USST 390 - Special Topics in Urban and Suburban Studies Credits: 3
- USST 401 - Seminar: The Future of Metropolitan America Credits: 3

Total: minimum 30 credits

▲ Social Science for Education (SSED)

- 6 credits of ECON courses
- HIST 120 - U.S. History Credits: 3
  or
- HIST 121 - Formation of the American Republic Credits: 3
- HIST 321 - Early Modern England Credits: 3
  or
- HIST 322 - Modern Britain Credits: 3
- HIST 125 - Introduction to World History Credits: 3
  or
- HIST 130 - History of the Modern Global System Credits: 3
or
- NCLC 201 - The World Since 1945 Credits: 3-15
- HIST 391 - History of Virginia to 1800 Credits: 3
  or
- HIST 392 - History of Virginia Since 1800 Credits: 3
  or
- HIST 122 - Development of Modern America Credits: 3

6 credits chosen from:
- any upper-level HIST course
- NCLC 301 - Science in the News Credits: 3
- NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film Credits: 3-15

9 credits chosen from:
- any GEOG course
- NCLC 340 - Progress: Can America Figure Out What It Means? Credits: 3-15
- NCLC 341 - Progress: Washington, the New Edge City? Credits: 3-15
- NCLC 360 - The Built Environment Credits: 3-15

18 credits chosen from:
- any GOVT course
- NCLC 422 - An Experiential Approach to American Foreign Policy Credits: 3-15

Total: minimum 30 credits

▲ Individualized Concentration (IND)

With approval of the undergraduate director, students may construct an individualized concentration.

Total: minimum 30 credits

Integrative Studies, BS

Banner Codes: LA-BS-INTS
The bachelor’s degree program in integrative studies is based on intensive, interdisciplinary learning communities coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection.

Students who enroll in this degree program their first year of college take Mason Cornerstones. After the first year, students take learning communities, courses that feature experiential learning and faculty-student research addressing fundamental questions. Students complete their degree programs with an interdisciplinary concentration.

The degree program requires mastery of nine essential competencies: communication, valuing, global understanding, problem solving, group interaction, effective citizenship, aesthetic awareness, critical thinking, and information technology. The competencies are assessed through freshman and graduation portfolios.

Students in this degree program meet university general education goals in the following way:

- Completion of Mason Cornerstones: lower-level written communication (ENGL 101), oral communication, information technology, arts, natural science (non laboratory), global understanding, social and behavioral sciences
- Completion of 24 credits of learning communities: upper-level written communication (ENGL 302), writing-intensive course
- Completion of coursework specifically approved for these requirements (in NCC or in other units): Western civilization or world history, quantitative reasoning, natural science (with laboratory)
- NCLC 491: synthesis

Students must complete Cornerstones and the 24 credits of learning communities with a minimum GPA of 2.00 in order to be able to use these to fulfill the general education requirements.

Students who transfer into New Century College should consult with an advisor on what they need to take to complete university general education requirements.

This program of study is offered by New Century College.

Students must fulfill all requirements for bachelor's degrees. For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

Degree Requirements

Students pursuing a bachelor’s degree in integrative studies complete 120 credits with at least 24 credits in learning communities, 12 credits of experiential learning, and a concentration of at least 30 credits. Students must present a minimum GPA of 2.00 in the concentration courses, which may include learning communities, experiential learning, independent study, and traditional university courses. All students complete their program of study by producing a final cumulative portfolio and a college senior exposition, completed through NCLC 491.

4 courses (12 credits) of Mason Cornerstones

NCLC 101, 102, and 203 are writing intensive courses that emphasize written communication as a way of thinking, discovering, and expressing ideas. Students who complete these three courses with a minimum GPA 2.0 have fulfilled 3 credits of the general education requirement in written communication (equivalent to ENGL 101).

- NCLC 101 - Narratives of Identity Credits: 6
- NCLC 102 - Global Communities and Networks Credits: 6
- NCLC 103 - Human Creativity: Science and Art Credits: 6
- NCLC 203 - Inquiry for Action: Facilitating Change Credits: 6
At least 24 credits of learning communities

Learning communities are interdisciplinary courses that combine subjects often taught in separate courses into a single course of 3-9 credits. In learning communities, faculty and students explore various ways to understand a topic. Learning communities are structured to help promote a greater sense of identity with an academic community. Hallmarks of New Century College learning communities are team teaching, collaborative projects, emphasis on writing and critical thinking, and opportunity for independent study. They often include experiential learning, either as an integral part of the class or as an optional add on.

At least 12 credits of experiential learning

The requirement in experiential learning reflects New Century College’s commitment to provide educational experiences that prepare graduates for the workplace and the demands of active and responsible citizenship. The workplace is as viewed as a site of instruction, one where students are exposed to the variety of skills needed to succeed. Through experiential learning, students combine work experience with academic study so that each will enrich the other.

Experiential learning includes include internships, study abroad, community service learning, course field trips, and other field study opportunities. The learning sites may change each semester and are usually off campus. George Mason provides student liability insurance for the experiential learning internship, but students are responsible for their own transportation and health care. Accident and health insurance is available from George Mason.

No more than 24 credits of experiential learning can count toward a student’s total credits for graduation.

Cumulative portfolio

The cumulative portfolio is reviewed by New Century College faculty.

College senior exposition

Students complete their senior exposition through NCLC 491, which they must take the semester prior to graduation.

- NCLC 491 - The Senior Capstone Experience Credits: 3

At least 30 credits in a concentration

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established interdisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. The concentration consists of traditional courses, learning communities, independent study, and experiential learning.

Concentration Requirements

▲ Conservation Studies (CNST)

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 307 - Ecology Credits: 4

- BIOL 311 - General Genetics Credits: 4
  or
- BIOL 377 - Applied Ecology Credits: 3

- GEOG 303 - Conservation of Resources and Environment Credits: 3
- NCLC 211 - Introduction to Conservation Studies Credits: 6
- NCLC 311 - The Mysteries of Migration: Consequences for Conservation Credits: 3-15
- NCLC 401 - Conservation Biology Credits: 3-15
- STAT 250 - Introductory Statistics I Credits: 3

Two courses chosen from:

- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- ANTH 300 - Civilizations Credits: 3
- ANTH 305 - Foraging Societies Credits: 3
- ANTH 312 - Political Anthropology Credits: 3
- ANTH 370 - Environment and Culture Credits: 3

- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

Six courses chosen from:

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
- BIOL 124 - Human Anatomy and Physiology Credits: 4
- BIOL 125 - Human Anatomy and Physiology Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 307 - Ecology Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 332 - Physical Chemistry II Credits: 3
• CHEM 337 - Physical Chemistry Lab II Credits: 2
• CHEM 341 - Fundamental Inorganic Chemistry Credits: 3
• GEOG 102 - Physical Geography Credits: 3
• GEOG 309 - Introduction to Meteorology and Climate Credits: 3
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 309 - Introduction to Oceanography Credits: 3

Total: minimum 30 credits

▲ Individualized Concentration (IND)

With approval of the undergraduate director, students may construct an individualized concentration.

Total: minimum 30 credits

Undergraduate Minor

Leadership Minor

Banner Code: LSHP

Faculty

Holder, Lucas, Owen

The minor in leadership helps prepare students to lead effectively in the 21st century. It provides a broad understanding of leadership in contemporary society and emphasizes civic engagement. Through the required course work, students examine theories of leadership, analyze methods and styles of leadership, and participate in experiences to develop their own leadership skills. Students demonstrate what they have learned through community service-learning to Mason and the greater Washington, D.C., metropolitan area.

The minor in leadership may be pursued concurrently with any undergraduate major.

This program of study is offered by New Century College.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students in the minor complete at least 15 credits of course work.

Three required core courses (11 credits):
Students complete 4 credits of NCLC 375, when topic is appropriate and approved for the minor.

- NCLC 204 - Leadership Theory and Practice Credits: 3
- NCLC 375 - Special Topics Credits: 3-15
- NCLC 435 - Leadership in a Changing Environment Credits: 4

One course (at least 1 credit) of experiential learning:

May be fulfilled through an approved internship, community service course, or other course work that includes experiential learning. This may include offerings under NCLC 195, 395, or UNIV 300. Students need prior written approval of the director of the minor to apply an experiential learning course to this requirement.

At least one elective course (3 to 4 credits) chosen from:

- AVT 309 - Art as Social Action Credits: 3
- NCLC 346 - Art as Social Action Credits: 4
- AVT 370 - Entrepreneurship in the Arts Credits: 4
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- CVPA 305 - Seminar in Arts Management Credits: 3
- EDUC 303 - Politics of American Education Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3
- GOVT 430 - Comparative Political Leadership Credits: 3
- HEAL 323 - Program Leadership and Evaluation Credits: 3
- NURS 436 - Leadership and Management of Health Care Credits: 3
- IT 304 - IT in the Global Economy Credits: 3
- MGMT 413 - Organizational Development and Management Consulting Credits: 3
- MIS 435 - Knowledge Management Credits: 3
- MKTG 471 - Marketing Management Credits: 3
- MLSC 300 - Applied Leadership I Credits: 1
- MLSC 400 - Leadership and Management Credits: 3
- MLSC 401 - Leadership and Ethics Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3
- MSOM 306 - Managing Projects and Operations Credits: 3
- PRLS 316 - Outdoor Education and Leadership Credits: 3
- PSYC 231 - Social Psychology Credits: 3
- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- SOCI 307 - Social Movements and Political Protest Credits: 3
- TOUR 330 - Resort Management Credits: 3

Note:
Other courses may be applied to this requirement with prior written approval of the director.

Total: 15 credits

Nonprofit Studies Minor

Banner Code: NPS

Faculty

Benjamin, Sacco, Sweetman (coordinator), Toepler

The nonprofit minor introduces students to the theories and practical realities of working in the American nonprofit or charitable sector. The required course work highlights the historical, legal, and social foundations of nonprofit organizations and their operating characteristics, focusing on such distinctive issues as mission-drive management, earned and unearned revenue, and volunteerism. Elective courses and experiential learning encourage students to explore their professional and/or personal interests.

This program of study is offered by New Century College.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work

Students pursuing this minor must complete 16 credits distributed as follows:

Two required courses (8 credits):

- NCLC 331 - The Nonprofit Sector Credits: 4 *
- NCLC 431 - Principles of Fund Raising Credits: 4 *

One course (3 to 4 credits) chosen from:

- GOVT 358 - Nonprofit Financial Planning Credits: 4
- NCLC 435 - Leadership in a Changing Environment Credits: 4
- CONF 101 - Conflict and Our World Credits: 3
- CONF 300 - Conflict Resolution Techniques and Practice Credits: 3
- NCLC 305 - Conflict Resolution and Transformation Credits: 6

Note:

NCLC 375 or 395, when relevant, may fulfill this requirement with prior written approval of the coordinator.
One to two elective courses (3 to 4 credits) chosen from:

- AVT 370 - Entrepreneurship in the Arts Credits: 4
- COMM 300 - Foundations of Public Communication Credits: 3
- COMM 301 - Foundations of Interpersonal Communication Credits: 3
- COMM 335 - Organizational Communication Credits: 3
- CVPA 305 - Seminar in Arts Management Credits: 3
- ECON 309 - Economic Problems and Public Policies Credits: 3
- ENGL 410 - Professional and Technical Writing Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- NCLC 211 - Introduction to Conservation Studies Credits: 6
- NCLC 304 - Social Movements and Community Activism Credits: 4 *
- NCLC 340 - Progress: Can America Figure Out What It Means? Credits: 3-15
- NCLC 349 - Writing for Multimedia Credits: 4
- NCLC 410 - Contemporary Health Issues Credits: 3-15
- NCLC 422 - An Experiential Approach to American Foreign Policy Credits: 3-15
- SOCI 492 - Sociology of Organizations Credits: 3
- SOCW 352 - Social Policy and Social Justice II Credits: 3
- SOCW 483 - Selected Approaches to Social Work Intervention Credits: 3

Note:

NCLC 375 and 390/490* may be used to fulfill this requirement with prior written approval of the coordinator.

Total: 16 credits

Notes:

Each of the required courses is writing intensive with a requirement of at least 3,500 words in logs, essays, and analyses. Writing assignments are aggregated with a cover document at the end of the program into a portfolio that documents the student’s experience in studying the nonprofit world.

* These courses are approved to earn experiential learning credits.
School of Management

Enterprise Hall
Phone: 703-993-1807
Web: som.gmu.edu
College Code: BU

SOM faculty members have research and teaching expertise on topics such as executive compensation, effect of insider trading on stock prices and e-commerce, and international work groups and teams. Faculty members have provided testimony to nearly every federal agency and served as consultants to industry and organizations such as NASDAQ, the Federal Deposit Insurance Corporation, and the Department of Defense.

Today, more than 4,300 students are studying in five undergraduate majors, the business minor, and five graduate programs. SOM’s offerings provide a solid business core that emphasizes information technologies and communication, entrepreneurial thinking, and a global business strategy. We prepare students to lead with initiative, imagination, and innovation. The Mason MBA, Executive MBA, and MS in Technology Management are pioneers nationwide, being among the first graduate business programs to require a global residency program for all graduate business students.

Of all the business programs in the world, only 560 are fully accredited by the Association to Advance Collegiate Schools of Business (AACSB) International. SOM is one of only 168 business schools with both AACSB business and accounting accreditation.

A Mason business degree provides in-depth exposure in an area of specialization, as well as the skills required for success in a global business world. The school’s unique undergraduate keystone and capstone courses develop communication and analytical skills and provide students with opportunities to interact with regional business leaders.

More than 90 percent of the school’s graduate students study while employed, which gives them numerous opportunities to link classroom learning to real-world business challenges. Because our graduate programs emphasize learning in teams, each student has the opportunity to test classroom concepts against the best practices of some of the region’s premier organizations. SOM integrates teamwork, technology, and innovation into a state-of-the-art curriculum to prepare students for tomorrow’s business environment.

Administration

Jorge Haddock, Dean
David J. Harr, Senior Associate Dean
Alison S. O’Brien, Associate Dean, Undergraduate Programs
Angel J. Burgos, Director, MBA Program, MSA Program
Roy W. Hinton, Associate Dean, Executive Programs, and Director, Executive MBA Program
Karen Hallows, Academic Director, Executive MBA Program
Hilda M. Maness, Director, Development
Pamela A. Allen, Assistant Dean, Academic and Career Services

Faculty
Accounting
Aier, Blue, Buchanan, Chen, Dafashy, Douthett, Hasan, Hylton, Jones, Kitching, Lei, Magro, Nutter, Pevzner, Sengupta, Shen, Visvanathan, Warne, Zadeh, Zhang

Finance
Canterbury, Christophe, Crockett, Ferri, Gao, Hanweck, Hsieh, Johnston, Nikolova, Philipov, Stahel, Wang, Xie, Zhdanov

Information Systems and Operations Management
Bockstedt, C. Chen, Das, Druehl, Dutta, Hsu, Hutchison, Mazumdar, Mehta, Menon, Naor, Singer

Management
Coffinberger, Cramton, Cronin, Demory, Joshi, Klimoski, Kravitz, Langfred, C. Lee, H. Lee, Lei, Ling, O’Brien, Parker, Rockmann, Samuels, Wolf, Wolfe, Yasai

Marketing
Cheng, Entrikin, Harvey, Joiner, Jaju, Kulick, Li, Martin, Mcrohan, Meamber, Mouri, Philpot, Rose-Robinson, Scott, Sussan

Courses and Programs
SOM offers all course work designated ACCT, BULE, EMBA, FNAN, GSOM, MBA, MGMT, MIS, MKTG, MSOM, OM, SOM, and TECM in the Courses chapter of this catalog.

Undergraduate
The programs in management education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate
SOM offers an MBA, Executive MBA, MS in Accounting, MS in Taxation, and MS in Technology Management. Two graduate certificates are also available in Spatial Business Intelligence and Real Estate Finance.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Undergraduate Degree

Accounting, BS
A minimum of 120 credits of course work is required, of which at least 45 credits must be at the 300 or 400 level.

Students should consult the Baccalaureate Degree Requirements section in the Academic Policies chapter in this catalog for information concerning literacy, general education, residency, and other academic requirements.

Degree Requirements

All degree applicants must complete a minimum of 30 credits of SOM core and major courses at Mason. They must include at least 9 credits required for the specific major and SOM 498. A grade of C or higher must be earned in SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

University General Education

SOM students pursuing a BS degree must complete the university-wide general education program plus 1 additional credit of natural science. The natural science requirement must be fulfilled by completing two 4-credit laboratory sciences.

Acceptance into SOM

A student interested in pursuing a major in accounting, finance, information systems and operations management, management, or marketing must apply for acceptance to SOM during the semester in which the student will complete acceptance requirements. A student who has not received acceptance will have a degree status classified as “BPRE,” until the application is approved.

Acceptance is selective, based on completion of the following:

- At least 48 credits, with a minimum of 9 credits at Mason
- A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
- Successful completion of the following courses with a grade of C or better: ACCT 203 (prerequisite: C or better in ECON 103); OM 210 (prerequisite: C or better in MATH 108); SOM 301 (prerequisite/corequisite: C or better in ACCT 203 and OM 210); MATH 108
- A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application

Note: Students must meet the SOM acceptance requirements in effect at the time of application to the school.

Applications must be submitted by November 1 for the following spring semester; April 1 for the following summer term; and July 1 for the following fall semester. Students should file the application at the beginning of the semester in which they anticipate completing the requirements set forth above. For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Major Requirements - BS in Accounting
The BS in accounting (ACCT) prepares students for professional careers in the private and public sectors. Students learn how to evaluate fundamental value propositions for various types of organizations and transactions and convert financial and economic information from these organizations and transactions into information that is useful for making decisions. Students also learn how to design and test information systems that provide reliable and relevant information for planning and control. Furthermore, students learn how to identify value-creating opportunities and choose from among competing operating, investing, financing, and disclosure alternatives to maximize firm or organizational value.

The program emphasizes, but is not limited to, the accounting profession and its role in business and government including professional responsibilities and ethics. The program stresses conceptual understanding, technical competencies, analytic abilities, communication skills, and computer literacy. The accounting degree program is separately accredited by AACSB International.

In addition to general requirements for the BS degree, students must complete all required credits in upper-level accounting courses, with grades of C or better in each course. Students majoring in accounting must complete the following 18 credits. **A grade of B- or higher must be earned in ACCT 301 in order to move on to ACCT 311, 331, and 361.**

**Required Courses:**

- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3

**Electives:**

The following courses are available if students wish to take more than the 18 required accounting credits.

- ACCT 372 - Business Analysis and Valuation Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3

Materials are available in the Office of Academic and Career Services to provide guidance regarding recommended electives. Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

**Honors in Accounting**

Accounting majors with an A or better in ACCT 301 are eligible for the Accounting Honors Program. To graduate with honors in accounting, a student must actively participate in the accounting honor program events, receive a B or better in ACCT 462 and maintain a minimum GPA of 3.50 in all accounting courses above ACCT 301, earning no grade below a B-.
Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about making an appointment or walk-in advising hours, call 703-993-1880, or go to som.gmu.edu.

Major Requirements - BS in Information Systems and Operations Management

The BS in information systems and operations management (ISOM) prepares students for a range of career options by instilling skills that add value to organizations. Graduates will apply their knowledge of technology and business functions to design and improve existing operational and core business processes. They will integrate different business functions into seamless IT-enabled processes and collaborate with business users in defining requirements, identifying new IT-driven business opportunities, building prototypes to validate operations, and managing complex technology projects. The content of the ISOM major is at the intersection of technology, processes, and people.

In addition to general degree requirements for the major, students who major in ISOM must complete 18 credits of upper-level ISOM courses with a grade of C or better in each course. Of these, 9 credits in the required courses for the major are listed below. Students have considerable flexibility in their choice of electives and may choose from two tracks of study: one in management information systems, which prepares students for a career in the IT industry, and the other in management of business operations, which develops expertise in areas such as quality, project, and supply chain management and business process analysis. Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor. It is also strongly recommended that students planning to major in ISOM take MIS 302 as part of their program.

Required Courses:

• MIS 310 - Database Management Systems Credits: 3
• MIS 330 - Systems Analysis and Design Credits: 3
• OM 493 - Management of Technology Projects Credits: 3

Electives (choose three):

• OM 320 - Supply Chain Management and E-Business Credits: 3
• OM 352 - Methods and Models of Management Science Credits: 3
• OM 435 - Business Process Analysis and Simulation Credits: 3
• OM 452 - Business Forecasting Credits: 3
• OM 456 - Quality Management Credits: 3
• OM 499 - Independent Study in Operations Management Credits: 1-3
• MIS 302 - Introduction to Programming for Business Applications Credits: 3
• MIS 320 - Networks and Security Credits: 3
• MIS 411 - Management and Control of Information Systems Credits: 3
• MIS 412 - E-Business Systems Development Credits: 3
• MIS 430 - Data Warehousing and Data Mining Credits: 3
• MIS 435 - Knowledge Management Credits: 3
• MIS 440 - E-Commerce Business Models and Applications Credits: 3
• MIS 450 - Internet Architecture and Industry Credits: 3
• MIS 491 - Seminar in Management Information Systems Credits: 3
• MIS 499 - Independent Study in Management Information Systems Credits: 1-3

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about making an appointment or walk-in advising hours, call 703-993-1880, or go to som.gmu.edu.

Management, BS

Banner Code: BU-BS-MGMT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

A minimum of 120 credits of course work is required, of which at least 45 credits must be at the 300 or 400 level.

Students should consult the Baccalaureate Degree Requirements section in the Academic Policies chapter in this catalog for information concerning literacy, general education, residency, and other academic requirements.

Degree Requirements

All degree applicants must complete a minimum of 30 credits of SOM core and major courses at Mason. They must include at least 9 credits required for the specific major and SOM 498. A grade of C or higher must be earned in SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

University General Education

SOM students pursuing a BS degree must complete the university-wide general education program plus 1 additional credit of natural science. The natural science requirement must be fulfilled by completing two 4-credit laboratory sciences.

**Major* 18**

See following section for major requirements.

**General Electives 20**

**Total Credits 120**

* Completion with a grade of C or better is required for graduation.

**Acceptance into SOM**
A student interested in pursuing a major in accounting, finance, information systems and operations management, management, or marketing must apply for acceptance to SOM during the semester in which the student will complete acceptance requirements. A student who has not received acceptance will have a degree status classified as “BPRE,” until the application is approved.

Acceptance is selective, based on completion of the following:

- At least 48 credits, with a minimum of 9 credits at Mason
- A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
- Successful completion of the following courses with a grade of C or better: ACCT 203 (prerequisite: C or better in ECON 103); OM 210 (prerequisite: C or better in MATH 108); SOM 301 (prerequisite/corequisite: C or better in ACCT 203 and OM 210); MATH 108
- A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application

Note: Students must meet the SOM acceptance requirements in effect at the time of application to the school.

Applications must be submitted by November 1 for the following spring semester; April 1 for the following summer term; and July 1 for the following fall semester. Students should file the application at the beginning of the semester in which they anticipate completing the requirements set forth above. For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Major Requirements - BS in Management

The BS in management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse workforces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations. In addition to general degree requirements for the BS, students must complete 18 credits in upper-level management courses with a grade of C or better in each course.

Required Courses:

- MGMT 312 - Principles and Practices of Management Credits: 3
- MGMT 321 - Introduction to Human Resource Management Credits: 3

Electives (choose four):

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 413 - Organizational Development and Management Consulting Credits: 3
- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - Employee Relations Credits: 3
- MGMT 451 - New Venture Creation Credits: 3
- MGMT 461 - Cross Cultural and Global Management Credits: 3
- MGMT 462 - Honors Seminar in Management Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3
- MGMT 471 - Competitive Strategy Credits: 3
- MGMT 491 - Current Topics in Management Credits: 3
- BULE 402 - Commercial Law Credits: 3
Notes:

Management majors may focus their careers in several areas. In selecting four elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

Human Resource Management

- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - Employee Relations Credits: 3

Front-Line Manager or Management Trainee

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3

Entrepreneur

- MGMT 451 - New Venture Creation Credits: 3
- MGMT 471 - Competitive Strategy Credits: 3
- BULE 402 - Commercial Law Credits: 3

Honors Seminar:

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462, Management Honors Seminar, which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462, students must be accepted into SOM with a management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. Major Requirements - BS in Marketing

The BS in marketing prepares students for a broad range of global and domestic career options in market and consumer research, brand management, advertising, customer relationship management, new market and business development, and marketing
strategy. Marketing opportunities are increasing in the new economy as firms, government agencies, and nonprofit organizations adopt a market orientation.

A marketing major provides students with a solid background in marketing concepts and practices, with emphasis on market analysis and planning, research, and consumer behavior. Because marketing draws on a variety of disciplines for its foundation and is practiced globally, marketing majors are encouraged to take electives in related fields such as psychology, sociology, economics, public policy, international studies, computer science, and foreign languages. Students must complete 18 credits of upper-level marketing courses with a grade of C or better in each course.

**Required Courses:**

- MKTG 312 - Consumer Behavior Credits: 3
- MKTG 351 - Marketing Research Techniques and Applications Credits: 3
- MKTG 471 - Marketing Management Credits: 3

**Electives (choose three):**

- MKTG 311 - Sales Management Credits: 3
- MKTG 313 - Integrated Marketing Communications Credits: 3
- MKTG 315 - Internet Marketing Credits: 3
- MKTG 332 - Retailing and E-Commerce Management Credits: 3
- MKTG 333 - Business to Business Marketing Credits: 3
- MKTG 407 - International Marketing Credits: 3
- MKTG 451 - Competitive Intelligence and Information Security Credits: 3
- MKTG 481 - Marketing in the Nonprofit Sector Credits: 3
- MKTG 491 - Special Topics in Marketing Credits: 3
- MKTG 499 - Independent Study Credits: 1-3

**▲ Concentration in Internet Marketing Resiliency (IMR)**

Marketing also offers a concentration in Internet marketing resiliency within the marketing major. This concentration prepares students to enhance and protect the electronic marketing efforts of their firms.

**Required Courses (choose four):**

- MIS 320 - Networks and Security Credits: 3
- MKTG 315 - Internet Marketing Credits: 3
- MKTG 351 - Marketing Research Techniques and Applications Credits: 3
- MKTG 451 - Competitive Intelligence and Information Security Credits: 3
- MKTG 471 - Marketing Management Credits: 3
- MKTG 491 - Special Topics in Marketing Credits: 3

**Academic Advising**
Marketing majors are advised to work closely with their academic advisor to ensure that electives taken in related fields provide
the opportunity to gain proficiency in specific marketing-related areas. Academic planning for undergraduate students is available
in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an
advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree
requirements. For more information about making an appointment or walk-in advising hours, call 703-993-1880, or go to
som.gmu.edu.

Bachelor's Level Certificate

Accounting Undergraduate Certificate

Banner Code: BU-CERB-ACCT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform
CPA Examination in Virginia. The requirement for enrollment is a bachelor’s degree or higher from an accredited college or
university.

Students are required to complete a minimum of 30 credits of accounting courses. More than half of the required credits must be
taken at Mason after acceptance to the certificate program. Successful completion of the certificate program requires a grade of C
or better in accounting courses and a GPA of at least 2.00 in all courses. All students who want to sit for the Uniform CPA
Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with
courses in financial accounting, auditing, taxation, and management accounting, and at least 24 credits of nonaccounting business
courses. To receive the Mason accounting certificate, individuals must have completed the following required accounting courses
or their equivalents. **A grade of B- or higher must be earned in ACCT 301 in order to move on to ACCT 311, 331, and 361.**

Certificate Requirements

Required Courses:

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3

Electives (choose two):

- ACCT 372 - Business Analysis and Valuation Credits: 3
- ACCT 382 - Financial Analysis and the Business Life Cycle Credits: 3
ACCT 411 - Advanced Managerial Accounting Credits: 3
ACCT 433 - Advanced Financial Accounting Credits: 3
ACCT 451 - Advanced Federal Taxation Credits: 3
ACCT 462 - Honors Seminar in Accounting Credits: 3
ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
ACCT 491 - Seminar in Accounting Credits: 3
ACCT 499 - Independent Study Credits: 1-3

Note:

If a student has a previous degree in business or accounting, the faculty recommends that students take SOM courses above the 301 level to complete the 16 Mason credits needed after acceptance to the certificate program.

If a student has not previously studied business, the following courses are recommended:

- BULE 302 - Legal Environment of Business Credits: 3
- BULE 402 - Commercial Law Credits: 3
- FNAN 301 - Financial Management Credits: 3
- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4

Undergraduate Minor

Business Minor

Banner Code: BUS

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected. Prior to beginning the minor, students must have sophomore standing.

The minor consists of the following seven courses. Students must complete five of the seven courses for a total of 15 credits.

*required courses

- MSOM 300 - Managing Financial Resources Credits: 3

*Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see the Academic Policies chapter of this catalog.
• MSOM 301 - Managing People and Organizations Credits: 3
• MSOM 302 - Managing Information in a Global Environment Credits: 3
• MSOM 303 - Marketing in a Global Economy Credits: 3

Electives:

(choose one of the following)

• MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
• MSOM 305 - Managing in a Global Economy Credits: 3
• MSOM 306 - Managing Projects and Operations Credits: 3

Notes:

These courses may not be taken for credit by SOM majors, except for MSOM 305, which may be used only to fulfill the university general education global understanding requirement.

Students who have already taken and received credit for MGMT 301, MIS 301, MKTG 301, or OM 301 shall substitute courses as follows: MGMT 301 for MSOM 301, MIS 301 for MSOM 302, MKTG 301 for MSOM 303, and OM 301 for MSOM 306. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 301 shall substitute the combination for MSOM 300. All three courses cannot be taken for credit. Transfer students may transfer a maximum of 6 credits toward the business minor.

Master's Degree

Accounting, MS

Banner Code: BU-MS-ACCT

Phone: 703-993-2136
E-mail: msa@gmu.edu

The MS in accounting (MSA) is designed to meet the special needs of new professionals entering the accounting profession. The programs allow students to earn a state-of-the-art graduate degree in accounting and also meet requirements to take the Uniform CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and skills required by the accounting profession.

Admission Requirements

All students registering for SOM graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to qualified candidates holding a baccalaureate degree in accounting from an AACSB-accredited business school. Applicants are evaluated primarily on their undergraduate record and GMAT performance. For information on the GMAT, go to www.mba.com. Professional work experience is not required. Students begin the program in the fall or spring semester. The priority deadline for application is March 15 for the fall semester and October 15 for the spring semester.
Students can have part- or full-time status. Students completing the MS in accounting course work may elect to further develop their leadership potential by transferring to the MBA with a concentration in accounting. Please contact the department for details.

Degree Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

All MS in accounting students must complete the following 10 courses (3 credits each):

- ACCT 741 - Information Technology Auditing Credits: 3
- ACCT 742 - Corporate Governance and Ethics Credits: 3
- ACCT 743 - Corporate Financial Reporting Credits: 3
- ACCT 744 - Fraud Deterrence and Detection Credits: 3
- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3
- MBA 701 - Business Analysis and Valuation Credits: 3

Note:

Students must either graduate with an MSA degree on completion of 30 credits or opt into the Mason MBA program.

Business Administration, MBA

Banner Code: BU-MBA-BUAD

Phone: 703-993-2136
E-mail: mba@gmu.edu

The Mason MBA Program provides a high-level professional education in business administration. It is offered in both part- and full-time formats. The curriculum integrates functional areas with an emphasis on group work, information technology, and the global business environment.

Admissions Requirements

All students registering for SOM graduate courses must have graduate standing. Non degree student status is not available. Admission is highly competitive and available to all qualified candidates without regard to prior academic major. No previous course work in business administration is required, but a four-year undergraduate degree and a college-level calculus course must be successfully completed before matriculation. Admission is based on a combination of academic, professional, and leadership factors. No portion of the portfolio is considered more important than another; careful consideration is given to every part of the application packet to ensure that the Admission Committee has an accurate profile of a candidate’s professional and academic qualifications. For information on the GMAT, go to www.mba.com. A minimum of two years of professional work experience is required before entering the program.

The part-time MBA format commences twice a year: fall and spring semesters. Priority is given to applicants submitting their application by October 15 for the following spring semester and March 15 for the following fall semester. Applications for
admission received after October 15 and March 15 will be considered on a space-available basis. The full-time MBA format begins only in the fall and has an application deadline of March 15. International students have an application deadline of February 1.

**Degree Requirements**

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

**Program Information**

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core courses and 18 credits of elective courses. Students complete the degree program in two or three years depending on the cohort selected. Because of the cohort structure, part-time students commit to attending classes a minimum of two times per week and full-time students attend classes during the day four days each week. Part-time students are required to enroll in classes during the summer session to complete their degrees on a timely basis.

**Core Courses**

30 credits of core courses are completed prior to enrollment in electives. Part-time students enroll in at least 6 credits per semester and at least 3 credits each summer. Full-time students enroll in 12 credits per semester, with no expectation for enrollment in the summer session. All MBA students complete the following core courses:

- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 612 - Managing Costs and Evaluating Performance Credits: 1.5
- MBA 613 - Financial Reporting and Decision Making Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3
- MBA 673 - Legal Environment for Management Credits: 1.5
- MBA 678 - Strategy and Organizational Leadership Credits: 3
- MBA 798 - Global Business Perspectives Credits: 3
  Travel outside the United States is required. Most travel costs are included in the MBA program tuition and fees.

**Total:** 30 credits

**Elective Courses**

After completing the core courses, students must complete a series of market-driven elective courses (18 credits). A limited number of courses from outside the MBA Program or through the Consortium of Universities of the Washington Metropolitan Area may be taken as electives with the permission of the program director.
MBA students interested in pursuing the Spatial Business Intelligence Graduate Certificate may apply a maximum of 6 credits from the following eligible courses toward the certificate: MBA 603, MBA 623, MBA 638.

Concentrations

MBA students may use electives to complete courses leading to a concentration in accounting, financial management, entrepreneurship, marketing, information systems management, or project management.

▲ Accounting (ACCT)

Required courses

- MBA 741 - Information Technology Auditing Credits: 3
- MBA 742 - Corporate Governance and Ethics Credits: 3
- MBA 743 - Corporate Financial Reporting Credits: 3
- MBA 744 - Fraud Deterrence and Detection Credits: 3

One course from the following:

- MBA 701 - Business Analysis and Valuation Credits: 3
- MBA 702 - Corporate Financial Policy Credits: 3
- MBA 703 - Financial Markets Credits: 3
- MBA 706 - Investment Analysis Credits: 3
- MBA 708 - Taxes and Business Credits: 3
- MBA 717 - International Finance Credits: 3

Note:

One elective must be taken outside this concentration to total 18 credits.

▲ Entrepreneurship (ENTR)

Required courses

Choose any four courses from the following list to complete 12 credits.

- MBA 705 - Venture Capital and Private Finance Credits: 3
- MBA 711 - Entrepreneurship Credits: 3
- MBA 714 - Managing Growth of Small Businesses Credits: 3
- MBA 719 - Entrepreneurship Laboratory Credits: 1.5  
  (May be taken twice.)
- MBA 752 - Turning Ideas into Successful Companies Credits: 3
Note:

Six credits of MBA 700 level courses must be taken to complete degree requirements.

▲ Financial Management (FM)

Required courses

- MBA 701 - Business Analysis and Valuation Credits: 3
- MBA 702 - Corporate Financial Policy Credits: 3
- MBA 703 - Financial Markets Credits: 3

Two courses from the following:

- MBA 704 - Risk Management and Financial Innovation Credits: 3
- MBA 705 - Venture Capital and Private Finance Credits: 3
- MBA 706 - Investment Analysis Credits: 3
- MBA 717 - International Finance Credits: 3

Note:

One elective must be taken outside this concentration to total 18 credits.

▲ Information Systems Management (ISM)

Required courses

Choose any four courses from the following list to complete 12 credits.

- MBA 731 - Business Systems Development Credits: 3
- MBA 732 - Knowledge Management Credits: 3
- MBA 734 - Electronic Commerce and E-Business Credits: 3
- MBA 735 - Systems Thinking for Business Performance Credits: 3
- MBA 737 - Information Technology Governance and Policy Credits: 3
- MBA 738 - Business Intelligence and Data Management Credits: 3

Note:

Six credits of MBA 700 level courses must be taken to complete degree requirements.

MBA students interested in the Spatial Business Intelligence Graduate Certificate and choosing the ISM concentration may apply a maximum of 6 credits from the following eligible courses towards the certificate: MBA 603, MBA 623, MBA 638,
MBA 731, MBA 735. MBA students with the ISM concentration may use MBA 738 towards the certificate only if it is not used towards either earning the MBA concentration or MBA degree.

▲ Marketing (MKTG)

Required courses

- MBA 718 - International Marketing Credits: 3
- MBA 721 - Marketing Decision Systems Credits: 3
- MBA 722 - Consumer Behavior Credits: 3
- MBA 724 - Marketing Communications Credits: 3

Note:

Six credits of MBA 700 level courses must be taken to complete degree requirements.

▲ Project Management (PMGT)

Required courses

- MBA 712 - Project Management Credits: 3
- MBA 715 - Advanced Project and Program Management Credits: 3

Two electives from the following:

- MBA 726 - Negotiations Credits: 3
- MBA 725 - Leadership Credits: 3
- MBA 731 - Business Systems Development Credits: 3
- MBA 737 - Information Technology Governance and Policy Credits: 3

Note:

Six credits of MBA 700 level courses must be taken to complete degree requirements.

Specializations

MBA students may use electives to complete courses leading to a specialization. Specializations are not formally declared and are not recognized on a student's transcript.

International Business

Choose any three courses from the following list to complete 9 credits.
Executive MBA

Banner Code: BU-MBA-BUEX

Phone: 703-993-4457
Email: emba@gmu.edu

The Executive MBA Program is completed in 21 months, including a summer break between the first and second year. Students attend classes one day per week, on alternating Fridays and Saturdays for four semesters. The program’s focus is management decision making, strategic management of business resources, and leadership.

Dedicated faculty, an innovative and relevant curriculum, a global focus, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime.

Participants

The Executive MBA is designed for those with a minimum of 7 to 10 years of significant business and professional experience. Participants must have the support of their organizations to attend Friday classes and participate in global and domestic residencies.

Sponsoring organizations have included ATPCO, AMS, Apple Federal Credit Union, Blue Cross/Blue Shield, Booz Allen Hamilton, Case New Holland, the Center for Naval Analyses, Cisco, CSC, DISA, Department of Defense, Department of Homeland Security, EDS, Ernst & Young, Exxon-Mobil, Fannie Mae, Freddie Mac, GE Healthcare Financial Services, General Dynamics, HP, IBM, KPMG, Level (3) Communications, Lockheed Martin, ManTech International, Marriott, Nextel, Northrop Grumman, OPM, Orbital Sciences, PamAmSat, Pinkerton Computer Consultants, Raytheon, SAIC, SRA, Sunrise Senior Living, USA Today, the U.S. Army, the U.S. Marine Corps, the U.S. Navy, the U.S. Postal Service, Verizon, World Bank, WR Systems, and Xerox.

Diversity in Learning

Students encounter multiple approaches to learning in the Executive MBA Program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and domestic and international residencies all contribute to the creative learning environment delivered by the Mason Executive MBA.

Program Residencies

Five residency sessions complete the Executive MBA experience:

- **Opening Residency:** The Leader’s View—Focuses on developing a broad understanding of the economic environment of business and the development of high-performing teams.
- **Global Residency**: Global Business Strategies—Encompasses a trip to selected international locations. Professors from local universities provide an introduction to the business environment of each country visited and help prepare students for company visits and meetings with executives from local and multinational firms. Company presentations are delivered by directors and top managers. Housing is provided in business-class hotels, and time is provided for cultural excursions and other activities.

- **Mid Program Residency**: Professional Advancement and Organization Performance—Provides a comprehensive integrated learning experience designed to draw from the first year’s courses and prepare the student for the second year. The residency includes a workshop that pertains to career planning and development.

- **New York Residency**: Financial Markets—Trip to New York concludes EMBA 703 Financial Markets. During this residency, students hear from top managers of financial institutions and visit a number of those institutions to develop a comprehensive understanding of worldwide financial markets.

- **Oxford Residency**: Understanding the European Union—Includes faculty presentations on the European Union and the variety of European cultures and approaches to doing business worldwide. Site visits to local companies in London are also organized with presentations from senior managers and directors.

**Degree Requirements**

Successful completion of all coursework and residencies. Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

**Program Schedule**

**Eight Modules**

During each of our seven-week modules, students complete two to three courses in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

- Module 1 and 2: The Economic and Analytical Foundations of Management
- Module 3: Managing Resources for Performance
- Module 4: The Global Perspective
- Modules 5 and 6: Sustainable Business Performance
- Modules 7 and 8: Leadership and Strategy

**Academic Year I**

**Opening Residency Workshops**

- Building the High Performing Team
- A Strategic View of the Firm

**Courses Year One**
• EMBA 603 - Managerial Economics and the Decisions of the Firm Credits: 3
• EMBA 613 - Financial Reporting and Decision Making Credits: 3
• EMBA 623 - Marketing Management Credits: 3
• EMBA 633 - Statistics for Managers Credits: 3
• EMBA 638 - Strategies for Operations Management: Process and Supply Chain Leadership Credits: 3
• EMBA 643 - Managerial Finance Credits: 3
• EMBA 653 - Organizational Behavior Credits: 3
• EMBA 712 - International Macroeconomics: Concepts and Country Strategy Credits: 1.5
• EMBA 791 - The Regulatory and Business Environment of the European Union Credits: 1.5
• EMBA 798 - International Business Environment Credits: 1-3
(Taken at the end of the first year of the program.)

Academic Year II

Mid Program Residency Workshop

• Executive Leadership and Business Performance Workshop

Courses Year Two

• EMBA 612 - Managing Costs and Evaluating Performance Credits: 1-3
• EMBA 660 - Management of Information Technology Credits: 3
• EMBA 673 - Legal Environment for Management Credits: 1.5
• EMBA 678 - Strategic Management Credits: 3
• EMBA 703 - Financial Markets Credits: 3
(Includes the New York Residency in the fall of the second year.)
• EMBA 716 - Managing Change Credits: 1.5
• EMBA 725 - Leadership Credits: 1.5
• EMBA 735 - Systems Thinking for Business Performance Credits: 1-3
• EMBA 750 - Capstone Project: Action Learning Project Credits: 1.5
• EMBA 751 - Corporate Strategy and Policy Credits: 1.5
• EMBA 791 - The Regulatory and Business Environment of the European Union Credits: 1.5
(Oxford Residency in the spring of the second year.)

And two electives from:

• EMBA 708 - Taxation and Business Strategy Credits: 1-3
• EMBA 715 - Special Topics in Accounting Credits: 1-3
• EMBA 717 - Corporate Governance Credits: 1-3
• EMBA 724 - Marketing Communications Credits: 3
• EMBA 727 - Applied Macroeconomics Credits: 1-3
• EMBA 734 - Electronic Commerce Credits: 1-3
• EMBA 745 - Special Topics in Finance Credits: 1-3
• EMBA 755 - Special Topics in Management Credits: 1-3
• EMBA 765 - Special Topics in Management Information Systems Credits: 1-3
Additional Information

EMBA students interested in the Spatial Business Intelligence Graduate Certificate may apply a maximum of 6 credits from the following eligible courses toward the certificate:

- EMBA 603 - Managerial Economics and the Decisions of the Firm Credits: 3
- EMBA 623 - Marketing Management Credits: 3
- EMBA 638 - Strategies for Operations Management: Process and Supply Chain Leadership Credits: 3

Taxation, MS

Banner Code: BU-MS-TAX

Phone: Professor Anne Magro 703-993-1765
Email: amagro@gmu.edu

The objective of the M.S. in Taxation (MST) program is to provide a comprehensive, high-quality, and professionally oriented education for professionals who have made a career commitment to the field of taxation. It is built on a foundation that assumes an undergraduate degree in business and relevant accounting or taxation experience. The program is not for students who are changing careers or for those seeking an advanced degree solely to qualify for professional certification. Further, the program does not intend to serve full-time students or those who do not possess prior professional experience in accounting or taxation.

Admission Requirements

Students registering for graduate level courses numbered 600 or higher in the School of Management must have graduate standing. Non-degree student status is not available.

Admission to the Masters of Science in Taxation (MST) program is competitive and is based upon three criteria:

1. Professional experience in the fields of taxation or accounting, or licensure as a Certified Public Accountant;
2. Undergraduate academic performance; and
3. Performance on the GMAT

Degree Requirements

The MST program requires a minimum of 30 semester hours of graduate course work. However, students who have not earned a recent undergraduate degree in business administration from an AACSB-accredited school may be required to take additional credits to satisfy the business administration foundation requirements. The exact number of credit hours for an individual is based on an evaluation by the program director at the time of admission.

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Required Core Courses, 18 hours

Each candidate must complete the following core courses unless, in the opinion of the program director, the candidate has had previous comparable graduate-level course work that would justify substitution of other graduate courses.
Electives, 12 hours

Each student must complete 12 hours of acceptable elective course work including at least 9 credits in taxation selected from the courses listed below. The remaining 3 semester hours may be selected from any 700-level or higher graduate course and must be approved by the program director.

Progress Requirement

To ensure that each student is making satisfactory progress toward completion of his/her degree, each MST student must complete at least 12 credits during the first calendar year of enrollment and 21 credits by the end of the second calendar year of enrollment.

Foundation Courses, 21 hours

Students who have not earned a recent undergraduate degree in business administration from an AACSB accredited school may be required to take credits from the courses listed below in order to satisfy the business administration foundation requirements.

- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 613 - Financial Reporting and Decision Making Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3

Technology Management, MS

Banner Code: BU-MS-TECM

Phone: 703-993-1792
Email: techman@gmu.edu

The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to
succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

Students are from the major firms and organizations in the Washington, D.C., region. They average 14 years of work experience, and almost 30 percent of the students already have graduate degrees. Approximately two-thirds of the students work for the private sector, while the remainder works for federal government agencies or departments.

Program graduates receive chief information officer (CIO) certification, in partnership with the federal CIO Council, in addition to their MS degree. The program satisfies the requirements for federal government CIOs that were developed in response to the passage of the Information Technology Management Reform Act. Mason is one of only six institutions certified to offer this qualification and was one of the founding university partners with CIO University.

The program, designed for working professionals, starts in January and lasts for 18 months. Classes are held on the Fairfax Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management. Previous residency locations included: Australia, Taiwan, Japan, Thailand, India, Sweden, Belgium, England, Tunisia, Germany, Czech Republic and Ireland. Residency cost is included in the tuition.

Admission Requirements

Students must have a bachelor’s degree from an accredited institution, a minimum of three years professional work experience, two professional references, and a GMAT score or other evidence that they can perform graduate-level work.

Degree Requirements

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Course Work

- TECM 610 - Communications and Leadership Credits: 2
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 620 - Economics of Technology Management Credits: 2
- TECM 635 - Metrics and Statistics for Quality and Project Management Credits: 2
- TECM 640 - Management of Consulting and Technical Professionals Credits: 3
- TECM 700 - Business Engineering and Change Management Credits: 2
- TECM 702 - Interpersonal Dynamics and Teamwork Credits: 3
- TECM 703 - Technology Assessment, Evaluation, and Investment Credits: 3
- TECM 704 - Planning and Control of Projects Credits: 3
- TECM 720 - Analysis of IT Industries Credits: 2
- TECM 735 - Technology Management Capstone Project Credits: 2
- TECM 740 - Management of Client Relationships Credits: 3
- TECM 745 - Business Functions and Operations: Client Industries Credits: 3
- TECM 750 - Global IT Management Credits: 3

Total: 36 credits
Master's Level Certificate

Real Estate Finance Graduate Certificate

Banner Code: BU-CERG-REAF

Contact:
Nicholas Archer-Hamilton
Program Manager, Executive Programs
703-993-1832
narcher1@gmu.edu

This graduate certificate prepares students for high-level managerial positions within the real estate industry. The program delivers a multi-disciplinary approach to real estate with a focus on development, finance, investment, valuation, regulatory law, and entrepreneurship. It is designed to serve industry leaders from the National Capital Region as well as enrolled graduate students within SOM who seek to enhance their position as current or future program leaders in the field.

Admissions Requirements

Completion of a four-year curriculum resulting in a Bachelor's degree from an accredited institution and/or current graduate students. Applicants should have two years of professional work experience and demonstrate a language proficiency in English.

- On line application and fee
- Official copies of transcripts from all colleges and universities attended
- One professional letter of recommendation
- A current resume
- A brief personal statement related to post-certificate career goals

Certificate Requirements

Required Courses

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. The graduate certificate requires successful completion of the following courses for a total of 18 hours.

- GSOM 660 - Economics for Managers Credits: 3
- GSOM 610 - Methods and Uses of Financial Accounting Credits: 3
- GSOM 640 - Finance for Managers Credits: 3
- GSOM 746 - Real Estate Analysis and Valuation Credits: 3
- GSOM 747 - Real Estate Finance Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3

Program Note
Students who have completed MBA 746, MBA 747 and MBA 748 previously are not eligible for this certificate program.

Spatial Business Intelligence Graduate Certificate

Banner Code: BU-CERG-SBI

Contact:
Nicholas Hamilton-Archer
Program Manager, Executive Programs
703-993-1832
narcher1@gmu.edu

Spatial Business Intelligence (SBI) is an original powerful methodology that allows support traditional and spatial data through merging Geographic Information Systems (GIS) and Business Intelligence (BI) technologies. SBI approach allows integrating different systems, saving valuable resources, visualizing organization's assets, streamlining work flow processes, minimizing risk and enhancing business decision-making. Only recently has it been realized that the Spatial Component of Business operations through GIS Technology provides customer intelligence solutions that leads to better business decisions.

This 15-credit graduate certificate meets the needs of those with an undergraduate degree, who wish to complement their background with skills in innovative GIS technology application to business problems, spatial business modeling, business decision support, and business intelligence. A student will get the unique opportunity to become skilled in providing competitive advantage to businesses, governments, agencies and associations through merging GIS and Business Intelligence technologies.

Recent study proves that there is constant demand in business workforce with added knowledge in GIS technology and Spatial Intelligence from a Business Analyst and Manager to Chief Executive. In particular within the federal government and industries as: finance, insurance, telecommunication, real estate, retail, tourism, oil/gas, IT, HR, and consulting companies.

Certificate Requirements

The graduate certificate in Spatial Business Intelligence requires a total of 15 credit hours, or 5 academic graduate courses. Students must take 9 credit hours not counted towards any other graduate degree or certificate programs. A cumulative GPA of 3.0 is required for graduation. Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Required courses

- GSOM 570 - Spatial Technology Applications in Business and Management Credits: 3
- GSOM 571 - Advanced Spatial Information Systems: Applications in Business and Management Credits: 3
- GSOM 631 - Business Applications of Data Mining Credits: 3

Electives

Two courses from the following:

- GSOM 520 - Foundations of Marketing Credits: 3
- GSOM 530 - Foundations of Operations Management Credits: 3
- GSOM 531 - Managing Business Systems Development Credits: 3
Additional Requirements

The SBI certificate program is opened to all students who hold a bachelor’s degree from an accredited institution, meet admissions requirements with a minimum GPA of 3.00. Applicants must submit a completed GMU graduate application along with a copy of undergraduate degree, official transcripts, resume, and two letters of recommendation, VA domicile classification form, and TOEFL if they are foreign nationals.

GMAT scores are not required.
School of Public Policy

Rooted in the strong democratic government traditions of the commonwealth of Virginia, the School of Public Policy (SPP) is committed to transcending traditional conceptual boundaries of research and teaching by integrating real-world experience and problem solving into public policy education. The school’s programs focus on the interplay of culture, organizations, and technology to find alternative approaches to public policy decisions and policy making. Teaching and research are focused on the following principal themes: governance; regional and economic development; international commerce and policy; science and technology policy; transportation policy; entrepreneurship; and culture and values in public policy.

SPP contributes to new and innovative concepts in policy formation while building on the fundamental, pluralistic, and democratic characteristics of policy making in the United States. SPP endorses creativity and responsibility in governance, public management, and the development of economic policy.

Administration

Kingsley E. Haynes, Dean
James H. Finkelstein, Vice Dean
Jonathan L. Gifford, Associate Dean for Research and Development
Matthys van Schaik, Associate Dean for Academic Affairs
William H. Coester, Assistant Dean for Human Resources and Planning
Elizabeth C. Eck, Assistant Dean for Program Management
Jill V. Emerson, Assistant Dean for Student Services
Leslie Metzger Levin, Assistant Dean for Graduate Admissions and Marketing

Faculty

Associate Faculty

Avruch, Bernold, Conlan, Donahue, Flood, Frase, Friesz, Guagnano, Heclo, Hennessey, Mahler, Paden, Regan, Scimecca

Research and Term Faculty

Benson, Courtot, Davis, Ferrin, Ha, Holleman, Johnson, Keenan, Kil, Kingston, Leitch, Malur, Nicogossian, Paelinck, Regan, Riggle, Robb, Segerson, Spalding, Wheeler

Adjunct Faculty

Bensimon, Burrus, Fowler, Gaske, Gianturco, Gordon, Kewley, Muhlhausen, Robinson, Rogowsky, Stabile, Sullivan, Thompson, Varkonyi, Watkins

Faculty Emeritus

Kash, Warfield

Course Work

SPP offers courses designated PUBP, ITRN, MNPS, LRNG, and TELE in the Courses chapter of this catalog. Other academic courses are offered in conjunction with the research activities of the Mason Enterprise Center.

Law and Public Policy, Joint Degree Program

The School of Public Policy and the School of Law offer a joint JD/MPP degree program in law and public policy studies. For more information, go to www.law.gmu.edu/academics/llm.html.

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog.

Research Centers

Center for Regional Analysis
Director: Stephen Fuller, PhD

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

Center for Transportation Policy, Operations and Logistics
Director: Kenneth J. Button, PhD

This center works with federal and state authorities to find better ways to manage existing transport networks from surface to air to space. The center is active in the areas of intelligent transportation systems and aviation policy.
International Center for Applied Studies in Information Technology  
**Director:** Stephen Ruth, PhD

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

Mason Enterprise Center  
**Director:** Kingsley E. Haynes, PhD

Dedicated to creating and developing businesses in the Washington, D.C., area, the Mason Enterprise Center (MEC) is the synthesis of seven programs designed to meet the needs of growing businesses. The center focuses the energy, skills, and intellectual capital of the university on enterprise creation, expansion, and restructuring. MEC is highly geared on providing its clients with services that add value to their organizations. The center specializes in business development, entrepreneurship, government contracting, international business, technology ventures, and telework, making it a business-development center unlike any other. In addition, MEC conducts seminars and conferences related to its areas of expertise.

Center for Global Policy  
**Director:** Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and statebuilding, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.

Center for Science and Technology Policy  
**Director:** Philip Auerswald, PhD

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Center for the Study of International Medical Policies and Practices  
**Director:** Arnauld Nicogossian, MD

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

State Economic Development Center  
**Director:** Kingsley E. Haynes, PhD

This center’s focus is on providing education, training, and research support for state-level economic development policy and programs. While the primary goal is to provide assistance to agencies and organizations in Virginia, the center also works with other government organizations in the United States as well as abroad. Methods employed by the center include roundtable discussions, formal focus groups, survey research, statistical analysis, and mathematical models.

Center for Entrepreneurship and Public Policy  
**Director:** Zoltan Acs, PhD
Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurship approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

**Center for Aerospace Policy**  
**Director: Kenneth J. Button, PhD**

The mission of the Center for Aerospace Policy is to develop the U.S. aerospace sector by providing educational and research resources. The center helps national agencies, such as NASA, enhance their internal efficiency and smooth the interface between U.S. agencies and other government agencies, the private sector, and foreign counterparts.

**Terrorism, Transnational Crime and Corruption Center**  
**Director: Louise I. Shelley, PhD**

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

**Transportation and Economic Development Research Center**  
**Director: Brien Benson, PhD**

The Transportation and Economic Development Research Center is a University Transportation Center, funded by the Research and Innovative Technology Administration of the U.S. Department of Transportation. The Center conducts research in transportation finance, transportation and land use, and entrepreneurship and innovation in transportation.

**Master's Degree**

**International Commerce and Policy, MA**

**Banner Code: PP-MA-ICP**

Phone: 703-993-8200

The International Commerce and Policy (ICP) Program is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today’s world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.
Admission Requirements

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non business occupations to careers in the global economy.

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for non degree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

The ICP Program requires 42 credits of course work. All degree candidates must take 30 credits of work in the required courses, as described below. The remaining 12 credits consist of electives that may include internships, independent studies, and study abroad. Students entering the program first complete core courses to prepare for higher-level course work.

SPP Common Core (8 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

ICP Core Courses (22 credits)
Electives (12 credits)

Students have the option to declare a substantive area of emphasis and focus their electives accordingly. The following areas are offered:

- Global Development
- Global Financial Policy
- Global Governance
- Global Business and Policy
- Global Trade Policy

Total: 42 credits

New Professional Studies, MS

Banner Code: PP-MS-NPST

▲ Peace Operations (PSPO)

Phone: 703-993-8200

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

To apply, applicants must submit the following:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of goals and interest in the program
- Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
• For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
• Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).
Submission of GRE or GMAT scores is required only for students requesting funding consideration.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Course Requirements

Students must complete 39 credits as follows:

SPP Common Core (12 credits)

• PUBP 501 - Policy and Organizational Analysis Credits: 4
• PUBP 502 - Governance and Policy Processes Credits: 1-4
• PUBP 503 - Culture, Organization, and Technology Credits: 1-4

Peace Operations Core Courses (12 credits)

• MNPS 700 - The New Professionalism: Theory and Practice Credits: 3 *
• MNPS 702 - The New Professional as Reflective Practitioner Credits: 3 *
• MNPS 703 - Technology and Learning in the New Professions Credits: 3 *
• PUBP 550 - Topics in Public Policy Credits: 1-3
(Analysis for Peace Operations)

Electives (15 credits)

Electives must be approved by the program director or advisor.

Total: 39 credits

Note:

*Only those sections of MNPS 700, 702, and 703 designated for the Peace Operations Program will satisfy degree requirements.
Organization Development and Knowledge Management, MS

Banner Code: PP-MS-ODKM

Phone: 703-993-8200

The MS in Organization Development and Knowledge Management (ODKM) Program is an integrated, 18-month program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

Admission Requirements

Students are considered for admission for the fall term only. Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

ODKM is a 36- to 39-credit executive format program. Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office. Successful completion of the following courses is necessary to fulfill the course requirements of the program.
SPP Common Core (12 credits)

- PUBP 501 - Policy and Organizational Analysis Credits: 4
- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

Core Courses (9 credits)

- MNPS 700 - The New Professionalism: Theory and Practice Credits: 3
- MNPS 702 - The New Professional as Reflective Practitioner Credits: 3
- MNPS 703 - Technology and Learning in the New Professions Credits: 3

Note:

*Certain sections of MNPS 700, 702, and 703 are designated for the ODKM program, and only those will satisfy the degree requirements.

Additional Requirements (12 credits)

- LRNG 602 - Group Dynamics and Team Learning Credits: 3
- LRNG 672 - Organizational Learning Laboratory Credits: 3
- LRNG 762 - Strategic Knowledge Management Credits: 3
- MNPS 720 - Learning Community Credits: 3

Electives (3 credits)

The elective must be approved by the program director or advisor.

Experiential Requirement (0-3 credits)

A 3-credit internship is required. For students with appropriate work experience, this requirement can be waived with the approval of the program director or dean.

- PUBP 794 - Internship Credits: 1-6

Total: 36-39 credits

Public Policy, EMPP

Banner Code: PP-EMPP-PUBP

Phone: 703-993-8200
The executive master’s in public policy program offers a custom-designed degree for a select group of mid-career persons with a significant level of experience and professional promise in the field of public policy. Cohorts meet in executive format to allow for accelerated progress toward degree completion. Classes meet at the Arlington campus on a special schedule to accommodate the working professional.

**Admission Requirements**

Only applicants that are already successful in the public policy or related field are eligible for admission. Five years of experience and a 3.0 undergraduate GPA are the minimum requirements for consideration. For additional requirements and deadlines, please visit:

http://policy.gmu.edu/admissions

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

Students must complete 30 credits of course work through a combination of core and approved special topics courses.

**Required Core Courses (24 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
- PUBP 700 - Theory and Practice in Public Policy Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4

**Electives (6 credits)**

Students take two approved special topics courses to fulfill this requirement.

**Total: 30 credits**

**Public Policy, MPP**

Banner Code: PP-MPP-PUBP

Phone: 703-993-8200
The master’s program in public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

**Admission Requirements**

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waives)
- Two- to three-page written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

Students must complete 39 to 42 credits of course work through a combination of core courses, a sequence of courses in their area of emphasis, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment. One of the courses in the emphasis sequence will also have an international focus. The plan of study includes the following:

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
Required Public Policy Courses (19 credits)

- PUBP 700 - Theory and Practice in Public Policy Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4

and one of the following:
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3

or approved substitution.

Substantive Policy Emphases (12 credits)

Electives are chosen from one of the following policy emphases:

- Collaboration and Learning in Policy Organizations
- Culture, Values, and Social Policy
- Global Medical and Health Policy
- Governance Systems and Policy Management
- International Governance and Institutions
- National Security
- Regional Economic Development and Technology Policy
- Science and Technology Policy
- Terrorism, Transnational Crime and Corruption
- Transportation Policy, Operations, and Logistics

Professional Experience Requirement (0-3 credits)

Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or an approved internship.

- PUBP 794 - Internship Credits: 1-6

Total: 39-42 credits

Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL

Phone: 703-993-8200
The MA in Transportation Policy, Operations, and Logistics (TPOL) Program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from an accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

The degree requires completion of 36 credits as follows:

SPP Common Core (12 credits)

- PUBP 501 - Policy and Organizational Analysis Credits: 4
- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

TPOL Core Courses (15 credits)

- PUBP 715 - Introduction to Transportation Systems Credits: 3
- PUBP 716 - Transportation Operations and Logistics Credits: 3
- PUBP 718 - Transportation Planning and Policy Credits: 3
• PUBP 721 - Transportation Economics Credits: 3
• PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics Credits: 3

Electives (9 credits)

Electives must be approved by the program director or advisor.

Total: 36 credits

Master's Level Certificate

Collaboration and Learning in Policy Organizations Graduate Certificate

Banner Code: PP-CERG-CLPO

SPP offers certificate programs in conjunction with its master's programs. All certificates require the completion of at least 15 credits (five courses) of work, including a required core course and electives approved in consultation with a faculty advisor. Students already pursuing a master’s degree in the School of Public Policy may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master’s degree.

Participants have to be admitted to a certificate program. Admission requirements are the same as those for the master’s programs.

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Doctoral Degree

Public Policy, PhD

Banner Code: PP-PHD-PUBP

Phone: 703-993-8200

This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student’s program.

Admission Requirements

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to the first semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.
Applicants must hold a master’s degree from an accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admissions Policies section in this catalog and online at http://admissions.gmu.edu/grad/ for general information on graduate admission to George Mason University.

The following items should be included when applying:

- Graduate application with fee (no fee waivers)
- Two- to three-page written statement of goals and interest in advanced study in public policy
- Current résumé or vita
- Two official transcripts of all university work. International students must also submit a translation of all international transcripts into English, if applicable.
- GRE or GMAT results; scores should not be older than five years.
- Two letters of recommendation, with at least one from an individual qualified to attest to the candidate’s academic potential
- A writing sample approximately 10 to 20 pages in length, such as a technical report, professional publication, or term or seminar paper
- For international applicants, TOEFL results with a minimum score of 600 on the paper-based exam; 250 on the computer-based exam; or 100 with a minimum of 23 on each of the subsections on the Internet-based exam. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa)

**Deadlines**

The application deadline is February 1 for international students and March 1 for domestic students.

**Degree Requirements**

Students are required to complete a minimum of 82 credits of course work, of which no more than 12 may be dissertation credits. Up to 30 credits from a prior master’s degree may be applied toward the doctoral requirements at the program director’s discretion. Credit is not given for comprehensive exams passed at other universities.

Specific course work requirements include four foundational core courses, one semester of participation in the research colloquium, two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student’s research needs and interests. Courses are determined in collaboration with the student’s advisor and are drawn widely not only from SPP, but also from other programs at Mason.

At the completion of the first academic year of full-time study, students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. The program also requires that students pass a field exam structured around their specific field of proposed doctoral research. Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation.

A complete description of the program policies, procedures, and requirements is in the SPP student and faculty handbook, which is published annually.

**Areas of Program Specialization**

Students may choose one of the established areas of specialization or work with a faculty committee to create their own specialization. The established specializations in the doctoral program are: Regional Development and Transportation;
Technology, Science and Innovation; Entrepreneurship, Growth and Public Policy; U.S. Governance; Culture and Society; Organizational and Information Technology; and Global and International Systems.

Stage One - Core Skills

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in these three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant course work. Prerequisite courses will not count as part of the 82 credit requirement.

- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 730 - National Policy Systems and Theory Credits: 3

Core Courses

- PUBP 800 - Culture and Policy Credits: 2-4
- PUBP 801 - Macro Policy Credits: 2-4
- PUBP 804 - Multivariate Statistical Analysis in Public Policy Credits: 4
- PUBP 805 - Public Policy Systems and Theory Credits: 4
- *Students whose final paper in PUBP 801 is deemed unacceptable for a doctoral program must take PUBP 709 the following semester. PUBP 709 credit hours will not count as part of the 82 hours of course work. Failure to earn a grade of B or better in PUBP 709 may result in dismissal. Qualifying Exam taken upon completion of all course courses.

Stage Two - Policy Fields and Skills

- Three elective courses
- One advanced methods course
- PUBP 850 - Seminar in Public Policy Credits: 1

Stage Three - Research Foundations

- Field of Study (3 courses)
- Advanced Methods (1 course)
- Field Statement
- Field Exam

Area of Specialization Requirements
By end of their third semester, full time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan (max. 1000 words) will describe a proposed research area, including citations relevant to current research in that Field. The Plan must identify three substantive courses and at least one advanced methods course that the student intends to take that will serve as a foundation for the Field. The Plan must be approved by both the student's Field Committee Chair and the Director of the PhD program.

The three substantive courses must include at least one 800 level course offered in SPP (excluding those 700 level courses listed as not eligible for PhD Field credit), and no more than one substantive graduate course from outside SPP.

The advanced methods course must be chosen from the approved list for the SPP PhD program, or approved in writing by the Field Committee Chair and Director of the PhD program.

Where appropriate courses are not available from SPP, students may petition the Director of the PhD program for substitute courses to count for their Field of Study Plan.

Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Stage Four - Dissertation

- Proposal Oral Defense
- Dissertation Oral Defense
- PUBP 998 - Research/Proposal for Dissertation Credits: 1-9
- PUBP 999 - Dissertation Credits: 1-9 (998 + 999, 12 credits total, at least 6 credits from 999)

Advancement to Candidacy

To advance to candidacy, students must have completed all course work requirements, passed the comprehensive qualifying and field examinations, have an approved dissertation committee, and presented and successfully defended a dissertation proposal.
College of Science

College of Science

Phone: 703-993-3622
Web: cos.gmu.edu
College Code: SC

Departments

- Atmospheric, Oceanic and Earth Sciences
- Bioinformatics and Computational Biology
- Chemistry and Biochemistry
- Computational and Data Sciences
- Environmental Science and Policy
- Geography and Geoinformation Science
- Mathematical Sciences
- Molecular and Microbiology
- Physics and Astronomy

Additional Academic Units

- Biology Undergraduate Program
- Forensic Science Program
- Neuroscience Program

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at Mason. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its 9 departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate students and to undergraduates whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.

Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and able to adapt to an ever-changing world.

Administration
Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Graduate Degree Programs

COS offers 10 master’s degrees and 10 doctoral degrees. The requirements for each degree are described in the departmental and degree sections that follow. A complete listing of the graduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/degree_programs/graduate.

Undergraduate Degree Programs

COS offers 6 bachelor of arts degrees and 10 bachelor of science degrees. These undergraduate degree consist of course work in university-wide general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

A complete listing of the undergraduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/undergraduate/degree_programs.

College-Level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

Bachelor of Arts

The BA degree provides students with a breadth of knowledge, as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below, and the courses listed in the departmental sections that follow. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements, such as
university-wide general education requirements, college-level requirements, or requirements for the major. In some cases, the COS requirements below may be superceded by requirements of the major degree program.

- Philosophy or religious studies: 3 credits, fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement for a total of 6 credits. These two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by any course in ADJ, ANTH, ECON, GEOG (except GEOG 102 or 309), GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI.
- Science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). This requirement may be fulfilled by any of the following courses: ANTH 114, 300, 301, 302, 304, 305, 306, 311, 313, 330, 332, 396; ARTH 203, 204, 319, 320, 380, 381, 382, 383, 384, 385, 482; CHIN 318, 320, 325; DANC 118; ECON 361, 362; FREN 451; GEOG 101, 316, 325, 330, 399; GOVT 328, 332, 333, 340, 341, 345, 342, 433; HIST 130, 251, 252, 261, 262, 271, 281, 282, 328, 329, 353, 354, 355, 356, 365, 366, 367, 387, 426, 459, 460, 461, 465, 466; MUSI 103; RELI 211, 212, 272, 313, 314, 315, 337, 374, 375, 490; or RUSS 353, 354. Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210; or by successfully completing a 300- or 400-level course that requires intermediate-level proficiency and is taught in the foreign language; or by achieving a satisfactory score on an approved proficiency test; or by presenting for admission to George Mason University an approved score on the TOEFL and on the TOEFL essay (for students whose native language is not English). International students should consult the Undergraduate Academic Affairs Office about a possible waiver of the foreign language requirement.

Requirements for each BA major are listed in the departmental sections that follow.

**Bachelor of Science**

The BS degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the university-wide general education program plus the requirements for their major. Requirements for each BS major in COS are listed in the departmental sections that follow.

**Teacher Licensure**

Degree programs that prepare students for high school teaching careers are available in the following COS departments or programs: Atmospheric, Oceanic and Earth Science; Biology; Chemistry, Mathematics, and Physics. Students who wish to become K-12 teachers, and who plan to seek teacher licensure should also consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Minors**

George Mason University | 2009-2010 Official University Catalog | 836
Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.

**Undergraduate Policies**

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Questions about Academic Policies**

Students with questions regarding exceptions to academic policies and college-level requirements should contact the Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; cosdean@gmu.edu). Additional policy information and forms are available online at www.gmu.edu/student/academicaffairs.

**Registration**

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

**Academic Load**

The university limits undergraduate students with a cumulative GPA below 2.00 to 13 credit hours per semester. All undergraduate students returning from suspension are also limited to a maximum of 13 credit hours. Exceptions to this rule are very rare and only occur in exceptional cases.

Undergraduate students in good standing may enroll in up to 18 credit hours each semester. In exceptional circumstances, students may request an overload of the maximum credit hours. Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

**Withdrawals**

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the
semester as possible, and never after the last day of classes.

Credits graded “W” do not affect a student’s GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student’s academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

**University Consortium Registration**

Participation in consortium registration is available to degree-seeking juniors and seniors in good standing currently enrolled at Mason. Participation is limited to courses that are approved by the student’s department chair and academic dean, apply to the student’s program of study, are not offered during that semester at Mason, and have space available at the consortium institution. Students should consult with the Consortium Coordinator in the Registrar’s Office, as additional restrictions may apply. Students may take just one course per semester, with a career maximum of two courses. Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

**Credit to Be Earned at Other Institutions**

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean’s office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses can seldom be approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere.

Courses taken elsewhere that have been pre-approved by the dean’s office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar’s Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Additional information about study elsewhere can be found at www.gmu.edu/student/academicaffairs/policies.htm.

**Study Abroad**

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:

- Have a cumulative GPA of 2.25 or higher at Mason
- Have completed the immediately preceding semester at Mason with a 2.00 or higher
- Have completed the necessary forms and have obtained all required signatures and course equivalencies

The Center for Global Education (globaled.gmu.edu/index.html) may have higher academic standards and students must meet all eligibility requirements.
Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

**Academic Clemency**

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters. To be considered for this exception, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
- Submit their request in writing by the last day of classes for their first semester back at George Mason
- In order to make this request, students should (a) enroll in at least 6 hours during their first semester back at George Mason and (b) earn at least a 2.50 semester GPA with no grade below “C.” If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances

Additional information about clemency can be found at www.gmu.edu/student/academicaffairs/policies.htm.

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Dean’s Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the COS Associate Dean for Undergraduate Programs. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies chapter of this catalog.

Grade appeals should be made to the department or program, following the process specified in the Academic Policies chapter of this catalog. If they are resolved within the department or program, that unit is the final level of appeal. The departmental decision may be appealed to the dean only on the basis of procedural irregularity. Such appeals should be made through the Office of Undergraduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Undergraduate Academic Affairs. When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval.

The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester.

The COS Associate Dean for Undergraduate Programs is the final level of appeal for COS college level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal. The Associate Dean is the final level of approval.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.
Grievances

Grievances should be directed in writing to the Associate Dean for Undergraduate Programs. The COS Undergraduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS or AA&S degree from the Virginia Community College System (VCCS) with a curriculum grade point average (GPA) of at least 2.75 are considered to have met all of George Mason University’s lower level general education requirements. They are still required by the university to complete ENGL 302 and a synthesis course. Transfer students who meet the conditions above and are pursuing a degree in COS are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor’s degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

Excluded Courses

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in the College of Science. Students may use nonactivity PHED and PRLS courses for elective credit for college degrees. For a current list of PHED and PRLS courses that may be used for credit in the college, see the CHSS Undergraduate Academic Affairs Office Web site at http://www.gmu.edu/student/academicaffairs/. Military Science (MLSC) courses cannot be counted toward credits required for a degree in the college.

Once admitted to Mason, students may not take CLEP exams and apply credits from those exams to degrees in the College of Science. Students may apply credits from CLEP exams to degrees in the college only if those credits were awarded at the time of admission.

Atmospheric, Oceanic and Earth Sciences

Phone: 703-993-8958
Web: aoes.gmu.edu

Faculty

Professors: Diecchio, Hazen (Robinson Professor), Schneider, Schopf, Shukla (chair), Straus

Associate professors: DeSole, Harlan, Huang, Kinter, Klinger, McBride

Assistant professors: Jin, Kysar-Mattietti

Contract professor: Doty, Krishnamurthy, Nord-Cooper, Verardo

Course Work

The department offers all course work designated CLIM and GEOL in the Courses chapter of this catalog.

Honors Program for Earth Science and Geology
Earth science majors who have completed 16 credits of math and science, including GEOL 302 or BIOL 307, with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a B or better in GEOL 302 or BIOL 307 are also eligible. To graduate with honors in Earth Science students are required to maintain a minimum GPA of 3.00 in math and science and complete the following courses with an average GPA of 3.50 or better: GEOL 406, 410, and 411.

Undergraduate Degree

Earth Science, BS

Banner Code: SC-BS-ESCI

This degree is intended for students interested in studying the Earth and its environment. Recognizing that these are integrated disciplines, students receive a broad background in Earth and environmental sciences and select a specialty concentration. The concentrations in environmental science and in coastal oceanography and estuarine science are offered jointly with the department of Environmental Science and Policy where specific advising is available.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following course work with a minimum GPA of 2.00. Through the course work below, Earth science majors satisfy the university and college requirements in natural science and quantitative reasoning.

Degree Requirements

32 credits of core science and mathematics:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- GEOG 309 - Introduction to Meteorology and Climate Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
- GEOL 406 - Seminar in Earth and Environmental Science Credits: 3
  or
- GEOL 420 - Earth Science and Policy Credits: 3
- GEOL 309 - Introduction to Oceanography Credits: 3
  or
- BIOL 309 - Introduction to Oceanography Credits: 3

8 credits of physics:

either the sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
or the sequence
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

27–35 credits in one of the following concentrations:

▲ Coastal Oceanography and Estuarine Science (COES)

- GEOL 102 - Introductory Geology II Credits: 4
- EVPP 421 - Marine Conservation Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- EVPP 350 - Freshwater Ecosystems Credits: 4

and one of the sequences:

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4

and four of the following:

- BIOL 440 - Field Biology Credits: 1-4
  (ocean and estuarine themed topics only)
- BIOL 507 - Selected Topics in Ecology Credits: 1-4
- BIOL 536 - Ichthyology Credits: 4
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 401 - Structural Geology Credits: 4
- NCLC 395 - Field-Based Work Credits: 1-15
  (ocean and estuarine topics only)

▲ Earth Science Education (ESE)

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 303 - Field Mapping Techniques Credits: 3
- GEOL 408 - Practicum for Geology Laboratories Credits: 1
- GEOL 409 - Practicum for Geology Laboratories Credits: 1

and three of the following:

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 401 - Structural Geology Credits: 4

Optional Teacher Licensure Requirement (21 credits):

- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3

▲ Earth Surface Processes (EP)

- GEOL 102 - Introductory Geology II Credits: 4
  or
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• GEOL 302 - Mineralogy Credits: 4
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 306 - Soil Science Credits: 3
• GEOL 316 - Computers in Geology Credits: 3

or

• CS 112 - Introduction to Computer Programming Credits: 4 **
• GEOL 317 - Geomorphology Credits: 4

and four of the following:

• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 305 - Environmental Geology Credits: 3
• GEOL 313 - Hydrogeology Credits: 3
• GEOL 315 - Topics in Geology II Credits: 1-3
• GEOL 363 - Coastal Morphology and Processes Credits: 4
• GEOL 401 - Structural Geology Credits: 4
• GEOL 403 - Geochemistry Credits: 3
• GEOL 417 - Geophysics Credits: 3
• GEOG 311 - Introduction to Geographic Information Systems Credits: 3
• GEOG 412 - Aerial Photography Interpretation Credits: 3
• GEOG 416 - Satellite Image Analysis Credits: 3

▲ Environmental Science (EVSC)

• BIOL 307 - Ecology Credits: 4
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
• EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
• EVPP 336 - Human Dimensions of the Environment Credits: 3
• EVPP 377 - Applied Ecology Credits: 3
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 305 - Environmental Geology Credits: 3
• GEOL 306 - Soil Science Credits: 3

and two of the following:

• BIOL 345 - Plant Communities Credits: 4
• BIOL 449 - Marine Ecology Credits: 3
• EVPP 350 - Freshwater Ecosystems Credits: 4
• EVPP 363 - Coastal Morphology and Processes Credits: 4

▲ Geology (GEOL)

• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 302 - Mineralogy Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 317 - Geomorphology Credits: 4
• GEOL 401 - Structural Geology Credits: 4
• GEOL 404 - Geological Field Techniques Credits: 3-8 ***

Notes:

* Requires C or better in GEOL 302

** Satisfies general education information technology requirement

*** No longer offered regularly; 6-credit geology field camp is required as substitute (see advisor for details).

Geology, BA

Banner Code: SC-BA-GEOL

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in geology must complete additional college requirements for the BA degree in COS. Candidates for a degree in geology must also complete the following with a minimum GPA of 2.50. (Through the course work below, geology majors satisfy the university wide requirements in natural science and quantitative reasoning.)

Degree Requirements

• 9 credits of degree-related course work in a coherent program designed in coordination with advisor and approved by department chair
• MATH 110 - Introductory Probability and Statistics Credits: 3
  or
• MATH 111 - Linear Mathematical Modeling Credits: 3
  or
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• GEOL 316 - Computers in Geology Credits: 3
  or
• CS 112 - Introduction to Computer Programming Credits: 4
  or
• IT 103 - Introduction to Computing Credits: 3

38 credits in geology, including:

• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 302 - Mineralogy Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 317 - Geomorphology Credits: 4
• GEOL 401 - Structural Geology Credits: 4
• GEOL 404 - Geological Field Techniques Credits: 3-8 **

Notes:

* Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.
** No longer offered regularly; 6-credit geology field camp is required as substitute (see your advisor for details).

Undergraduate Minor

Earth Science Minor

Banner Code: ESCI

Course Work

To receive this minor, students must successfully complete 18 credits with a minimum GPA of 2.00, distributed as follows:

• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 309 - Introduction to Oceanography Credits: 3
• GEOG 309 - Introduction to Meteorology and Climate Credits: 3

Electives

• 8 credits of geology electives

Notes:

Eight credits of course work must be unique to the minor.

Students may not receive both the minor in geology and the minor in earth science. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 18 credits
Geology Minor

Banner Code: GEOL

Course Work

To receive the minor, students must successfully complete 20 credits with a minimum GPA of 2.00 to include:

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4

Two of the following courses (8 credits):

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4

Notes:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

*Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.

Total: 20 credits

Ocean and Estuarine Science Minor

Banner Code: OES

To receive this minor, students must successfully complete 20-21 credits with a minimum GPA of 2.00 as follows.

Course Work

14-15 credits of core courses:

- All students take:
  - GEOL 101 - Introductory Geology I Credits: 4
plus one of the following:
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4

and one of the following:
- GEOL 309 - Introduction to Oceanography Credits: 3
- BIOL 309 - Introduction to Oceanography Credits: 3

and one of the following:
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- BIOL 449 - Marine Ecology Credits: 3 *

6 credits of electives from the following:

- GEOL 363 - Coastal Morphology and Processes Credits: 4 *
  or
- EVPP 363 - Coastal Morphology and Processes Credits: 4 *

- BIOL 449 - Marine Ecology Credits: 3 *
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- NCLC 395 - Field-Based Work Credits: 1-15
- NCLC 495 - Field-Based Work Credits: 1-15
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 507 - Selected Topics in Ecology Credits: 1-4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3 **
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1 **

- BIOL 536 - Ichthyology Credits: 4
  or
- EVPP 536 - Ichthyology Credits: 4

Notes:

PHED 225 is strongly recommended but not required. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

*If not previously counted

**If chosen, must take both lecture and lab for a total of 4 credits

Total: 20-21 credits
Doctoral Degree

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

The mission of this program is to train the next generation of scientists in climate dynamics and related fields. While there is no unambiguous definition of “climate,” climate dynamics is generally considered to encompass processes that determine the behavior of the atmosphere, land, and oceans averaged over time scales of weeks to centuries and millennia. Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years.

Climate variability has important ramifications for society, from planning for next year’s electrical demand and forecasting agricultural production to answering complex questions involving long-term global change. While it is thought to be theoretically impossible to predict day-to-day weather more than a few weeks in advance, recent progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance.

Climate dynamics faculty members are varied and have a blend of expertise in dynamics, statistics, and computational methods. They cover the traditional areas of atmospheric dynamics, physical and dynamical oceanography, land surface physics, and hydrology. The faculty and students involved in the program work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA).

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; deforestation, desertification, and monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; abrupt climate change; and water and energy cycle dynamics.
