External research collaborations exist with federal agencies, private corporations, and other universities, exemplifying COS’ and the university’s commitment to the development of effective regional and national collaborations. The faculty is heavily involved with national and international climate science efforts, providing students with the opportunity for participation in research.

Admission Requirements

Applicants should have demonstrated high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in undergraduate work and a combined GRE score of 1,100 (verbal plus quantitative). To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.
The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding master’s degrees, the required 48 credits may be reduced by up to 30 credits, depending on graduate courses completed. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

The 48-credit curriculum requirement is divided into four areas: 12 credits of fundamental climate science courses, 9 credits of core computational methods, 3 credits of seminar, and a minimum of 24 credits of electives. The course work is organized as follows:

**Fundamental climate science courses:**

- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3

**Core computational courses:**

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3

**Climate seminar 3 credits of:**

- CLIM 991 - Climate Dynamics Seminar Credits: 1

**Electives**

- 24 credits of electives, including up to 5 credits of independent research

**Note:**

After completing the fundamental climate science courses, students take a two-part qualifying exam that includes core and specialty components. The core component is administered by an examination committee. After successfully completing the core component, students take the specialty component, which is administered by the dissertation committee that students typically form by the spring semester of their second year. Following successful completion of both parts of the qualifying exam, students present a written dissertation proposal to the committee. Students may enroll in CLIM 998 Doctoral Dissertation Proposal to complete this effort. After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

---

**Bioinformatics and Computational Biology**

Phone: 703-993-8400
Web: bioinformatics.gmu.edu
Faculty

Professors: Grefenstette, Jafri (chair), Willett

Associate professors: Kinser, Klimov, Seto, Vaisman

Contract assistant professor: Solka

Course Work

The department offers all course work designated BINF in the Courses chapter of this catalog.

Undergraduate Minor

Bioinformatics Minor

Banner Code: BNF

The bioinformatics minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

Students must complete the following courses (either 22 or 24 credits) with a minimum GPA of 2.00, distributed as follows:

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- BINF 402 - Bioinformatics and Computational Biology II Credits: 3
- BINF 403 - Bioinformatics and Computational Biology Lab I Credits: 1
- BINF 404 - Bioinformatics and Computational Biology Lab II Credits: 1
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
  or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
  or
- IT 108 - Programming Fundamentals Credits: 3
  and
- IT 208 - Program Design and Data Structures Credits: 3
Total: 22 or 24 credits

Master's Degree

Bioinformatics and Computational Biology, MS

Banner Code: SC-MS-BCB

This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor’s guidance, making the MS in bioinformatics especially relevant for students employed in today’s diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and the ability to develop new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master’s thesis.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation, and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required for all international applicants.

Degree Requirements

Candidates must successfully complete 31 credits as follows:

Bioinformatics core courses (12 credits):

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3
Advanced bioinformatics (3 credits):

- 3 credits of advanced bioinformatics courses numbered BINF 730 and above

Electives (12 or 9 credits):

- 12 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor
- Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

Bioinformatics seminar (1 credit):

- BINF 704 - Colloquium in Bioinformatics Credits: 1

Research component (3 or 6 credits):

Students must complete either a 3-credit research project or a 6-credit MS thesis. Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

- BINF 798 - Research Project Credits: 3
  or
- BINF 799 - Master's Thesis Credits: 1-6

Total: 31 credits

Bioinformatics Management, MS

Banner Code: SC-MS-BNFM

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The MS in bioinformatics management is intended for

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

Admission Requirements
Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Bioinformatics Core Courses (15 credits)

Foundational courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools.

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 730 - Biological Sequence Analysis Credits: 3

One of the following:

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 650 - Introduction to Bioinformatics Database Design Credits: 3

Management Core Courses (12 credits)

Foundational courses in management theory related directly to the management of scientific programs and personnel.

- MBA 638 - Operations Management Credits: 3
- MBA 712 - Project Management Credits: 3
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 3

Capstone research project (3 credits)

Focusing on bioinformatics management issues and techniques.

- BINF 798 - Research Project Credits: 3

Total: 30 credits
Master's Level Certificate

Bioinformatics and Computational Biology Graduate Certificate

Banner Code: SC-CERG-BCB

This graduate certificate program addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. The flexibility of the certificate structure permits students to custom design their curriculum under an advisor’s guidance, making the certificate in bioinformatics especially relevant for students employed in today’s diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from an accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours to the certificate program from another certificate, degree, or non degree program because of the differential (premium) tuition rate.

Program Requirements

The certificate in bioinformatics and computational biology requires a total of 15 credits, based on the set of core courses supporting the MS and PhD degree programs in bioinformatics and computational biology, along with a set of elective courses. Students are required to take three core courses, plus two courses selected from the list of electives indicated below.

Certificate Requirements

Required Core Courses (9 credits):

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
Elective Courses (6 credits):

Choose two of the following or other courses approved by the coordinator.

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 639 - Introduction to Biometrics Credits: 3
- BINF 730 - Biological Sequence Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
- BINF 733 - Gene Expression Analysis Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3
- BINF 739 - Topics in Bioinformatics Credits: 3

Total: 15 credits

Doctoral Degree

Bioinformatics and Computational Biology, PhD

Banner Code: SC-PHD-BCB

Recent advances in molecular biology have produced an avalanche of data, including DNA sequences and genetic maps that cover thousands of genes whose functions are poorly understood or completely unknown. These advances are having a profound effect on the biological sciences and have resulted in the development of the new discipline of bioinformatics. Bioinformatics uses computational approaches to analyze patterns in biological data and create complex models of biological activity, including attempts to elucidate the functions of genes and their interactions in genetic pathways. Widespread social benefits are expected from the exploitation of the wealth of new knowledge concerning the genetic mechanisms of life and related processes. The coming years will see major developments in medicine, functional genomics, and environmental sciences, as well as profound advances in understanding the fundamental processes of biology. These benefits are increasingly dependent on the application of advanced information technology to the analysis of biological information.

The program’s main objective is to train the next generation of computational biologists for careers in academia, industry, and government. The program provides students with an interdisciplinary academic environment, including fundamental biosciences courses and core and advanced courses in bioinformatics. In general, course requirements may be completed within the first two years. The program is structured to be accessible for full- and part-time students.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a minimum GPA of 3.25. Admission also requires minimum GRE scores of 1,100 (verbal plus quantitative) and 4.00 (analytical writing). Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses from the undergraduate curriculum. To apply, prospective students
should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate
ingstitution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center.
Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The
GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the
doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all
international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 24 credits of
dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending
on graduate courses completed. The curriculum is divided into four areas: 12 credits of fundamental biosciences courses; 13
credits of core bioinformatics courses; 23 credits of electives or independent research; and 24 credits of dissertation research. The
course work is organized as follows:

Fundamental bioscience courses:

- BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics
  Credits: 3
- BINF 702 - Research Methods Credits: 3

plus 3 credits each of:

- BINF 703 - Bioinformatics Lab Rotation Credits: 1
- BINF 704 - Colloquium in Bioinformatics Credits: 1

Core bioinformatics courses:

- BINF 690 - Numerical Methods for Bioinformatics Credits: 3
- BINF 705 - Research Ethics Credits: 1
- BINF 730 - Biological Sequence Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
  or
- BINF 740 - Introduction to Biophysics Credits: 3

General electives

Note:

Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF
701 Biochemical Systematics (Biochemistry). If the undergraduate record is otherwise insufficient, students may
be required to take prerequisite courses, some of which may not be applicable to the 48-credit course total for the bioinformatics PhD. By the end of the semester when course work is completed, the student must form a doctoral committee, which will supervise the candidacy exam. The exam includes written and oral components. On passing the candidacy exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy.

**Biology Undergraduate Program**

Phone: 703-993-1050  
Web: biology.gmu.edu

**Faculty**

**Director:** Rockwood  
**Assistant Director:** Beck  
**Professors:** Rockwood  
**Term associate professors:** Beck, Cressey, Polayes  
**Term assistant professors:** Coss, Fondufe, Kocache, Madden, Otto, Polayes  
**Adjunct faculty:** Henley, Jones, Kaminski, Laemmerzahl, McClintock, Oaks, Tondi, Wood-Salvesen

The Biology Undergraduate Program is a collaboration between the Department of Molecular and Microbiology (MMB) and the Department of Environmental Science and Policy (ESP). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Biology Program Director and the Assistant Program Director. It is governed by a Biology Program Committee consisting of the Program Director, two Biology Program faculty, two faculty from the MMB Department and two faculty from the ESP Department.

**Course Work**

The program offers all undergraduate course work designated BIOL and MTCH in the Courses chapter of this catalog.

**Undergraduate Degree Programs**

The bachelor degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allows students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science. The program also offers a BS in medical technology. Additional information can be found at the Biology Program’s web site at biology.gmu.edu or by contacting the Biology Program office, David J. King Hall, Room 3005, 703-993-1050.

**Advising**

All biology majors are strongly urged to see an academic advisor regularly to help them plan their schedule, so they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester and again as they complete
Residence Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any program research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Honors Program in Biology

Admission Requirements

Minimum requirements for invitation:

- GPA in biology courses must be 3.50 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of B or better in Biol 213

Ideally, we would like to recruit students in their freshman or sophomore year.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.50 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 7 credits in honors courses in BIOL including three semesters of BIOL 494 (honors seminar, 1 credit) or two semesters of Biol 494 and one semester of BIOL 493 (honors research, 1 credit). The GPA requirements are as follows:

- Minimum 3.50 GPA in honors biology courses
- Minimum 3.50 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
Minimum 3.00 GPA overall

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in medical technology fulfill this requirement by successfully completing BIOL 453. Students not taking BIOL 453 at Mason should consult the program director for a course to fulfill this requirement.

Notes:

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246. Professional study during the senior year involves clinical education at an affiliated school of medical technology. Thirty credits of course work are required, including MTCH 401, 402, 403, 404, 405, and 406. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu
Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required course work and overall preparation.

Teacher Licensure

Students who wish to become teachers should pursue either the BA in Biology with a Concentration in Education or the BS in Biology with a Concentration in Education and consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Biology for Nonmajors

Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in BIOL 103 and 104. With permission of the instructor, nonmajors may enroll in BIOL 213 and then take one of the following to complete the requirement: BIOL 303, 304, or 305/306. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.

Medical Laboratory Technician Articulation Program

A special program is available for Medical Laboratory Technicians (MLTs) who are graduates of associate degree programs. This program provides substantial credit for the scientific and clinical aspects of the associate degree but requires students to meet clinical requirements for national certifying exams through approved work experience. For details, contact the program director.

Major in Medical Technology as a Second Bachelor’s Degree

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor’s degree before entering the clinical program (4 + 1). Students who have completed a BS in biology or chemistry at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a
second bachelor’s degree with a major in medical technology. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a medical technology advisor.

**Premedical Honor Society**

Alpha Epsilon Delta Zeta Premedical Honor Society is a national student support group, providing professional school tours, educational programs, and lectures on health topics and the professional school admissions process to students interested in such health-related fields as medicine, dentistry, optometry, and veterinary medicine. Active membership is awarded to students who have completed at least three semesters with a minimum scholastic GPA of 3.00. Associate membership is also available.

**Predental Society**

Mason students who are interested in pursuing careers in dentistry are encouraged to participate in the Predental Society. This student organization organizes supplemental programming focused toward dentistry as a career.

**Biology, Bachelor's/Accelerated Master's Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

**Undergraduate Degree**

**Biology, BA**

**Banner Code: SC-BA-BIOL**

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in biology must complete additional college requirements for the BA degree in COS. Students must also complete the following credits with a minimum GPA of 2.50 in the 32 credits of BIOL courses and a minimum GPA of 2.00 in the supporting courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 32 credits of required BIOL courses. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.)

**Degree Requirements**
25 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 492 - Senior Seminar Credits: 1
  or
- BIOL 494 - Honors Seminar in Biology Credits: 1

7 credits of biology electives:

- 7 credits of additional biology courses

8 credits of chemistry:

- CHEM 103 - Chemical Science in a Modern Society Credits: 4
- CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
  or
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

6 credits of statistics and computer science:

- STAT 250 - Introductory Statistics I Credits: 3
- IT 103 - Introduction to Computing Credits: 3

6 credits chosen from:

- ASTR 103 - Astronomy Credits: 3
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3
Note:

Students expecting to enter graduate or professional school are strongly urged to complete MATH 113 and 114. Organic chemistry and PHYS 243, 244, 245, and 246 are recommended.

Concentrations

Students may choose to complete the requirements of the Education with Licensure concentration described below. Or, they may take biology elective courses of their choice to complete the requirement of 32 credits of biology. Students who choose to complete the concentration, must complete their course work with a minimum GPA of 2.50 in the BIOL courses presented for the major and a minimum GPA of 2.00 in the supporting requirements presented for the major. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 32 credits of required BIOL courses.

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary schools within 120 credits. Students must fulfill all requirements for a bachelor's degree. In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in COS, students majoring in biology with a concentration in education with licensure must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

30 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 425 - Human Physiology Credits: 3
- BIOL 471 - Evolution Credits: 3

2 credits of biology electives:

- 2 credits of additional biology courses

8 credits of chemistry:

- CHEM 103 - Chemical Science in a Modern Society Credits: 4
- CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
  or
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4

6 credits of statistics and computer science:

• STAT 250 - Introductory Statistics I Credits: 3
• IT 103 - Introduction to Computing Credits: 3

3 credits chosen from:

• ASTR 103 - Astronomy Credits: 3
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• PHYS 243 - College Physics Credits: 3
• PHYS 245 - College Physics Credits: 3

Teacher Licensure Requirement (21 credits):

• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3

Biology, BS

Banner Code: SC-BS-BIOL

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following course work with a minimum GPA of 2.50 in BIOL courses and a minimum GPA of 2.00 in the supporting courses. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the required BIOL courses. Several optional concentrations are available. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.)

Degree Requirements
Students who do not select an optional concentration complete the curriculum requirements listed below.

25 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 492 - Senior Seminar Credits: 1
  or
- BIOL 494 - Honors Seminar in Biology Credits: 1

19 credits of biology electives:

- 19 credits of additional biology courses

13 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.

- One chemistry course at the 300 or 400 level (3)
- CHEM 314 - Organic Chemistry Credits: 3
  and
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- GEOL 101 - Introductory Geology I Credits: 4
  and
- GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:
• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

• MATH 110 - Introductory Probability and Statistics Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

Note:

Students who wish to take biochemistry must take BIOL 483 to receive credit toward the major in biology.

Concentrations

Students may choose to complete the requirements of one of the concentrations described below. Students who choose to undertake a concentration must complete their course work with a minimum GPA of 2.50 in BIOL courses and a minimum GPA of 2.00 in the supporting requirements. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the required BIOL courses.

▲ Concentration in Biotechnology (BT)

The biotechnology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in biotechnology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

31 credits of biology core courses:
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

13 credits of biology electives chosen from:

- BIOL 312 - Biostatistics Credits: 4
- BIOL 322 - Developmental Biology Credits: 4
- BIOL 402 - Applied and Industrial Microbiology Credits: 3
- BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1 *
- BIOL 405 - Microbial Genetics Credits: 4
- BIOL 406 - Microbial Physiology and Metabolism Credits: 4
- BIOL 417 - Selected Topics in Molecular and Cellular Biology Credits: 1-4 **
- BIOL 418 - Current Topics in Microbiology Credits: 3 **
- BIOL 420 - Vaccines Credits: 3
- BIOL 421 - Genetics of Human Diseases Credits: 3
- BIOL 422 - Stem Cell Biology and Regenerative Medicine Credits: 3
- BIOL 425 - Human Physiology Credits: 3
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1 *
- BIOL 465 - Histology Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- BIOL 484 - Eukaryotic Cell Biology Credits: 3
- BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2
- BIOL 497 - Special Problems in Biology Credits: 1-4 **
- BIOL 506 - Selected Topics in Microbiology Credits: 1-4 **
- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism Credits: 3
- BIOL 563 - Virology Credits: 3
- BIOL 566 - Cancer Genomics Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 572 - Human Genetics Credits: 3
- BIOL 575 - Selected Topics in Genetics Credits: 1-4 **
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3

Notes:

*Laboratories associated with BIOL 403 and BIOL 453 are required.
**Registration for BIOL 417, 418, 497 or 575 subject to approval by program coordinator.

18 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

- MATH 110 - Introductory Probability and Statistics Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary schools within 120 credits.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in education with licensure must complete the following. (Through the course
work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and
information technology proficiency.)

30 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 425 - Human Physiology Credits: 3
- BIOL 471 - Evolution Credits: 3

8 credits of biology electives:

- 8 credits of additional biology courses

13 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

- One chemistry course at the 300 or 400 level (not CHEM 314)
  - CHEM 314 - Organic Chemistry Credits: 3
  - CHEM 318 - Organic Chemistry Lab II Credits: 2

- GEOL 101 - Introductory Geology I Credits: 4
  - GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

• MATH 110 - Introductory Probability and Statistics Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• BIOL 312 - Biostatistics Credits: 4

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

Teacher Licensure Requirement (21 credits):

• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology, and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students seeking the concentration in environmental and conservation biology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

33 credits of biology core courses:

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 303 - Animal Biology Credits: 4
• BIOL 304 - Plant Biology Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 307 - Ecology Credits: 4
• BIOL 311 - General Genetics Credits: 4
• BIOL 318 - Conservation Biology Credits: 3
• BIOL 377 - Applied Ecology Credits: 3
• BIOL 471 - Evolution Credits: 3

11 credits of biology electives chosen from:

• BIOL 309 - Introduction to Oceanography Credits: 3
• BIOL 326 - Animal Physiology Credits: 3
• BIOL 331 - Invertebrate Zoology Credits: 4
• BIOL 332 - Insect Biology Credits: 4
• BIOL 333 - Vertebrate Zoology Credits: 4
• BIOL 342 - Plant Morphology Credits: 4
• BIOL 344 - Taxonomy of Flowering Plants Credits: 4
• BIOL 345 - Plant Communities Credits: 4 *
• BIOL 440 - Field Biology Credits: 1-4
• BIOL 472 - Introductory Animal Behavior Credits: 3
• BIOL 449 - Marine Ecology Credits: 3
• EVPP 350 - Freshwater Ecosystems Credits: 4 *
• EVPP 451 - Fungi and Ecosystems Credits: 3
• NCLC 401 - Conservation Biology Credits: 3-15

Note:

*If not used for field course requirement.

4 credits of field work:

• EVPP 350 - Freshwater Ecosystems Credits: 4
or
• BIOL 345 - Plant Communities Credits: 4

13 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

• One chemistry course at the 300 or 400 level (3)
• CHEM 314 - Organic Chemistry Credits: 3
  and
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• GEOL 101 - Introductory Geology I Credits: 4
  and
• GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

• MATH 110 - Introductory Probability and Statistics Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.
Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students seeking the concentration in microbiology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

36 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 405 - Microbial Genetics Credits: 4
- BIOL 406 - Microbial Physiology and Metabolism Credits: 4
- BIOL 407 - Microbial Diversity Credits: 4

8 credits of biology electives chosen from:

- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 402 - Applied and Industrial Microbiology Credits: 3
- BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
- BIOL 404 - Medical Microbiology Credits: 3
- BIOL 418 - Current Topics in Microbiology Credits: 3
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1
- BIOL 459 - Fungi and Ecosystems Credits: 3
- BIOL 483 - General Biochemistry Credits: 4
- BIOL 506 - Selected Topics in Microbiology Credits: 1-4
- BIOL 563 - Virology Credits: 3
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3

18 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

- MATH 110 - Introductory Probability and Statistics Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Molecular Biology (MOB)

The molecular biology concentration provides basic knowledge of the structure of macromolecules, and chemical processes that occur in living cells. The concentration prepares students for employment or further advanced study in molecular biology.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in molecular biology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

36 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 483 - General Biochemistry Credits: 4
• BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2

8 credits of biology electives chosen from:

• BIOL 322 - Developmental Biology Credits: 4
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
• BIOL 452 - Immunology Credits: 3
• BIOL 453 - Immunology Laboratory Credits: 1
• BIOL 563 - Virology Credits: 3
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 575 - Selected Topics in Genetics Credits: 1-4
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3

18 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

• MATH 110 - Introductory Probability and Statistics Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3
3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Marine and Freshwater Biology (MFWB)

This concentration is offered to students seeking a biology degree that focuses on the biology of organisms in marine and freshwater environments.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

37 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 350 - Freshwater Ecosystems Credits: 4
- BIOL 449 - Marine Ecology Credits: 3
- EVPP 421 - Marine Conservation Credits: 3

6 credits of biology electives chosen from:

- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 472 - Introductory Animal Behavior Credits: 3
- BIOL 473 - Introductory Laboratory in Animal Behavior Credits: 1
- BIOL 536 - Ichthyology Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- NCLC 318 - Exploring Virginia's Watersheds Credits: 4

29 credits of physical sciences:
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

- MATH 110 - Introductory Probability and Statistics Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

Note:

PHED 255 is strongly recommended but not required.

Medical Technology, BS

Banner Code: SC-BS-MTCH

This program requires the equivalent of three years of full time preprofessional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to a biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the preprofessional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical technology majors and prospective majors are urged to enroll in MTCH.
200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300- to 400-level biology or chemistry course work taken at Mason. Students may present no more than 6 credits of D grades in biology and chemistry courses required in the three years of preprofessional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the preprofessional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements*. In addition, candidates must complete MTCH 200 and present the following courses in their preprofessional programs with a minimum GPA of 2.00. (Through the course work below, majors satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

*Note: Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

Degree Requirements

Biology:

Minimum 20 credits, including:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1

Chemistry:

Minimum 18 credits, including:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Mathematics:
Minimum 6 credits; STAT 250 or BIOL 312 recommended, MATH 106 not applicable.

Computer skills:

- IT 103 - Introduction to Computing Credits: 3

Professional Study:

30 credits of professional study during the senior year are awarded for clinical education at an affiliated school of medical technology. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Courses that may be awarded for the clinical year include:

- MTCH 401 - Orientation to the Problems and Practices of the Clinical Laboratory Credits: 1-2
- MTCH 402 - Clinical Hematology and Coagulation Credits: 1-8
- MTCH 403 - Clinical Microscopy Credits: 1-3
- MTCH 404 - Serology and Immunohematology Credits: 1-7
- MTCH 405 - Clinical Microbiology Credits: 1-8
- MTCH 406 - Clinical Chemistry Credits: 1-10

Notes:

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246.

Undergraduate Minor

Biology Minor

Banner Code: BIOL

Course Work

Candidates for the minor in biology must complete 19 to 20 credits in biology with a minimum GPA of 2.00, including:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 307 - Ecology Credits: 4
  or
- BIOL 311 - General Genetics Credits: 4
- one other 3- to 4-credit biology course at the 300, 400, or 500 level (not BIOL 301).
Note:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 19-20 credits

Bachelor's/Accelerated Master's Program

Biology, BS/Biology, Accelerated MS

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

■ Chemistry and Biochemistry

Phone: 703-993-1070
Web: chemistry.gmu.edu

Faculty

Professors: Cozzens, Davies, Foster (chair), Mose, Mushrush

Associate professors: Born, Honeychuck, Hussam, Schreifels, Slayden, Weatherspoon (associate chair)

Term associate professor: Hatton

Assistant professors: Bishop, Cooper, Couch

Term assistant professors: Kort, Pettigrew
Course Work

This department offers all course work designated CHEM in the Courses chapter of this catalog.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336, 337, or 465.

Honors Program in Chemistry

Chemistry majors who have completed prerequisites for CHEM 455 and 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 and 456 with a minimum GPA of 3.50.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required course work and overall preparation.

Prepharmacy Society

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Prepharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

Chemistry Club

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Graduate Degree Programs

The department offers an MS in chemistry with a research project (thesis option) or an all-course-work program (nonthesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the degrees in environmental science and policy, bioscience, and physical sciences. An area of emphasis in computational chemistry is available through the PhD in computational sciences and informatics program offered in conjunction with the Department of Computational and Data Sciences.
Chemistry, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Chemistry within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Undergraduate Degree

Chemistry, BA

Banner Code: SC-BA-CHEM

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. Students majoring in chemistry must complete additional college requirements for the BA degree in COS and the following. (Through the course work below, chemistry majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.)

Degree Requirements

37 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- 5 credits of electives in chemistry

11 credits of math:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

8–12 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

▲ Concentration in Biochemistry (BC)

This program is for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

In addition to satisfying the university-wide general education requirements and requirements for the BA degree in COS, students majoring in chemistry with a concentration in biochemistry must complete the following. (Through the course work below, majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.)

37 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 465 - Biochemistry Lab Credits: 2

11 credits of math and statistics:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

4 credits of biology:

- BIOL 213 - Cell Structure and Function Credits: 4

**Chemistry, BS**

**Banner Code:** SC-BS-CHEM

This program is approved by the American Chemical Society; on completion, students are certified to the society. Students planning professional careers in chemistry should choose this degree.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in chemistry must complete the following with a minimum GPA of 2.00. No more than two courses with a grade of D (1.00) may be applied to the major. (Through the course work below, chemistry majors satisfy the university-wide requirements in natural science, information technology, and quantitative reasoning.)

**Degree Requirements**

52 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 350 - Computer Techniques for Chemistry Credits: 3
- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2
• CHEM 463 - General Biochemistry I Credits: 4
• and 3 credits of electives in chemistry.

14 credits of math:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3

8–12 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

▲ Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the traditional BS in chemistry. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of electives.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in chemistry with a concentration in biochemistry must complete the following with a minimum GPA of 2.00. No more than two courses with a grade of D (1.00) may be applied to the major. (Through the course work below, they satisfy the university-wide requirements in natural science and quantitative reasoning.)

42 credits of chemistry courses:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
• CHEM 331 - Physical Chemistry I Credits: 3
• CHEM 336 - Physical Chemistry Lab I Credits: 2
• CHEM 350 - Computer Techniques for Chemistry Credits: 3
• CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 463 - General Biochemistry I Credits: 4
• CHEM 464 - General Biochemistry II Credits: 3
• CHEM 465 - Biochemistry Lab Credits: 2

8 credits of math:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

8–12 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

8 credits of biology:

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Approved Science Electives

• 9 credits of approved science electives chosen from chemistry or biology courses at 302 or above (Courses from other disciplines may be submitted as electives, subject to approval of the coordinator.)

▲ Concentration in Chemistry Education (CHME)

Those interested in teaching high school chemistry should choose this concentration. This degree is approved by the American Chemical Society and leads to state licensure to teach in Virginia on completion of the degree.
Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in chemistry education must present the following:

41 credits of chemistry courses:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4

- CHEM 331 - Physical Chemistry I Credits: 3
  or
- CHEM 333 - Physical Chemistry for the Life Sciences I Credits: 3

- CHEM 336 - Physical Chemistry Lab I Credits: 2
  or
- CHEM 465 - Biochemistry Lab Credits: 2

- CHEM 350 - Computer Techniques for Chemistry Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 470 - Laboratory Instructional Methods for Chemistry Credits: 3
- one 3- credit upper-level chemistry elective

11 credits of math:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

8–12 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
8 credits of other general science:

- BIOL 103 - Introductory Biology I Credits: 4
  or
- BIOL 213 - Cell Structure and Function Credits: 4
- GEOL 101 - Introductory Geology I Credits: 4

Teacher Licensure Requirement (21 credits):

- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3

Notes:

The course work above satisfies university-wide requirements in natural science, information technology, and quantitative reasoning.

During the sophomore year, students should contact the Graduate School of Education to arrange to attend an information session and take the PRAXIS I and II exams.

**Bachelor's Level Certificate**

**Environmental Chemistry Undergraduate Certificate**

**Banner Code:** SC-CERB-EVCH

The department offers an undergraduate certificate program in environmental chemistry. The program consists of 35 credits of course work dealing directly with environmental studies. To receive the certificate, students must hold a baccalaureate degree in any major or be earning one from Mason at the time they receive the certificate.

**Certificate Requirements**

Substitutions from the following list of required courses are allowed but require permission from the environmental chemistry certificate director:

- BIOL 377 - Applied Ecology Credits: 3
- CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4

• CHEM 331 - Physical Chemistry I Credits: 3
or
• CHEM 333 - Physical Chemistry for the Life Sciences I Credits: 3

• CHEM 505 - Hazardous Materials Waste Management Credits: 1-3
• CHEM 554 - Geochemistry of Environmental Hazards Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• electives (approved by certificate director) to bring the total to 35 credits

Note:

To optimize employment and graduate school opportunities, students are encouraged to take additional courses in natural science, computer science, and environmental law.

Total: 35 credits

Undergraduate Minor

Chemistry Minor

Banner Code: CHEM

The department offers a minor in chemistry. The program requires 16 credits of chemistry at the 300 level or above with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 16 credits

Bachelor's/Accelerated Master's Program

Chemistry, BS/Chemistry, Accelerated MS

A five-year bachelor’s/accelerated master’s degree program leads to a research-based MS degree following satisfactory completion of 144 credits. It allows academically strong undergraduates with a commitment to research to obtain BS and MS
degrees within five academic years plus the summer of the last year. On completion of this program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students can enter this program after completing 90 credits and enroll in graduate courses when they have successfully completed prerequisites. This flexibility makes it possible for students to complete some of their graduate classes during their junior and senior years. Consult the department for details on the program.

Admitted students are able to use up to 6 graduate credits in partial satisfaction of the requirements for the undergraduate degree. On completion of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and can complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

Master's Degree

Chemistry, MS

Banner Code: SC-MS-CHEM

The MS in chemistry provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

Admission Requirements

To be considered for admission to degree status, students must have a bachelor’s degree in chemistry, biochemistry, or a related field from an accredited institution and must meet general admission requirements for graduate study. Admission is based on a departmental evaluation of the applicant’s background as evidenced by transcripts and letters of recommendation. Applicants who received a bachelor’s degree more than five years before the application date must submit a résumé.

Degree Requirements

To receive an MS in chemistry, students must complete 30 credits of graduate work. The thesis option is for students planning to pursue a doctoral degree or a career in the chemical, biochemical, or pharmaceutical industry. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed during the first semester of registration in CHEM 799. Students who select the thesis option complete 6 credits of 799 and present a seminar followed by an oral defense. Students in this option are expected to choose a laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester.

The nonthesis option is for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students selecting this option are not required to complete a laboratory-based thesis. Instead, they are required to take an additional elective in chemistry (or biochemistry) and complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

CHEM 500 and 501 may not be applied toward the MS degree. CHEM 502 through 510 may be applied toward the MS degree only with prior written approval of the department.

Chemistry Core Course List

All students in the Chemistry MS program take 9 credits of chemistry core courses from the following list. Core courses may also be taken as electives beyond the stated credit requirement for each option:
• CHEM 513 - Synthetic and Mechanistic Organic Chemistry Credits: 3
• CHEM 521 - Theory of Analytical Processes Credits: 3
• CHEM 613 - Modern Polymer Chemistry Credits: 3
• CHEM 614 - Physical Organic Chemistry Credits: 3
• CHEM 617 - Organic Structural Spectroscopy Credits: 3
• CHEM 624 - Principles of Chemical Separation Credits: 3
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• CHEM 646 - Bioinorganic Chemistry Credits: 3
• CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
• CHEM 732 - Quantum Chemistry Credits: 3

Thesis Option, Chemistry

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the chemical industry. Students must complete the following requirements:

Chemistry Core Courses (12 credits):

• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• plus 9 credits of additional courses from the Chemistry Core Course List

Chemistry Electives (9 credits):

• 3 credits of CHEM designated courses
• 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Seminar/Thesis (9 credits):

• 3 credits of CHEM 790 - Graduate Seminar Credits: 1
• 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Nonthesis Option, Chemistry

This program is specifically designed for students seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students must complete the following requirements:

Chemistry Core Courses (12 credits):
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• plus 9 credits of additional courses from the Chemistry Core Course List

Chemistry Electives (12 credits):

• 6 credits of CHEM designated courses
• 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Teaching/Research (3 credits):

Any combination of CHEM 579 and CHEM 670 may be used to fulfill this requirement. However, CHEM 579 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

• CHEM 579 - Special Topics Credits: 1-6
• CHEM 670 - Teaching Practicum Credits: 1-2

Seminar (3 credits):

• 3 credits of CHEM 790 - Graduate Seminar Credits: 1

▲ Concentration in Biochemistry (BC)

Thesis Option

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the biochemical or pharmaceutical industry. Students must complete the following requirements:

Chemistry Core Courses (12 credits):

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee

• CHEM 531 - Elements of Physical Chemistry Credits: 3
  or
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• plus 9 credits of additional courses from the Chemistry Core Course List

Biochemistry Electives (6 credits):

• 6 credits of electives in biochemistry (see the department for the list of approved courses)

Chemistry Electives (3 credits):
• 3 credits of CHEM designated courses

Seminar/Thesis (9 credits):

• 3 credits of CHEM 790 - Graduate Seminar Credits: 1
• 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Nonthesis Option

This program is specifically designed for students seeking to go on to professional school, teach biochemistry in secondary schools, or pursue other careers in which advanced work in biochemistry is necessary or advantageous. Students must complete the following requirements:

Chemistry Core Courses (12 credits):

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee

• CHEM 531 - Elements of Physical Chemistry Credits: 3
  or
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• plus 9 credits of additional courses from the Chemistry Core Course List

Biochemistry Electives (9 credits):

• 9 credits of electives in biochemistry (see the department for the list of approved courses)

Chemistry Electives (3 credits):

• 3 credits of CHEM designated courses

Teaching/Research (3 credits):

Any combination of CHEM 579 and CHEM 670 may be used to fulfill this requirement. However, CHEM 579 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

• CHEM 579 - Special Topics Credits: 1-6
• CHEM 670 - Teaching Practicum Credits: 1-2

Seminar (3 credits):

• 3 credits of CHEM 790 - Graduate Seminar Credits: 1
Doctoral Degree

Chemistry and Biochemistry, PhD (pending SCHEV approval)

Banner Code: SC-PHD-CBCM

The Chemistry and Biochemistry doctoral program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD degree in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, followed by an independent research project under the guidance of a faculty advisor. The culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal. The program requires 72 total credits of coursework and dissertation (thesis).

Admission Requirements

The Chemistry and Biochemistry PhD program is intended for students who have completed an undergraduate program of study in chemistry, biochemistry, or a related field. Applicants are expected to have a BS degree with a minimum GPA of 3.00, and acceptable GRE and TOEFL scores (if applicable). Applicants with a BS degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted provisionally, and may be required to successfully complete selected remedial courses, some of which may not be applicable towards PhD requirements. Interested students should submit a completed GMU Graduate Application, three letters of reference, official reports of GRE and TOEFL exam scores, and a personal/goals statement outlining their general research interests and career plans.

Degree Requirements

Upon acceptance into the Chemistry and Biochemistry PhD program, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisors who will provide guidance in selecting courses that are consistent with the student’s area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advising to the student.

The program requires 72 total credits of coursework and dissertation (thesis). All students in the Chemistry and Biochemistry PhD program take a common core of four courses. By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as Analytical, Biochemistry, Environmental, Inorganic, Organic, or Physical Chemistry, or others according to his or her particular interests. By the end of their first year, all students will pair with a faculty advisor who will guide them toward candidacy. A student may choose up to 30 credits in general elective graduate courses that can be applied towards the degree requirements with the approval of the dissertation advisor and the program director. Core courses not used to satisfy the core requirement can be used as elective credits. Students are also required to take 3 credits of Graduate Seminar (CHEM 790).

By the end of their first year, students in the program are expected to have selected a dissertation/research supervisor and to have formed their dissertation committee. This committee will consist of at least 4 graduate faculty members (including the dissertation supervisor), with at least 2 members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the program director and the associate dean for graduate programs.

Advancement to Candidacy
Students advance to doctoral candidacy by fulfilling the following requirements:

- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- The student must successfully complete separate written and oral candidacy examinations prepared and administered by the dissertation committee.

Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy.

**Doctoral Dissertation**

Based upon the committee’s familiarity with the student’s progress in the research project, the committee will determine whether a candidate is ready to write and defend the dissertation. With the approval of the dissertation committee, the student will enroll in Doctoral Dissertation Proposal (CHEM 998) and Doctoral Dissertation Research (CHEM 999). The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

**Total: 72 credits**

**Physical Sciences, PhD**

*Banner Code: SC-PHD-PSCI*

This interdisciplinary doctoral program is offered by the Department of Physics and Astronomy and the Department of Chemistry and Biochemistry. The degree focuses on preparing scientists in the separate disciplines listed above or as members of interdisciplinary science teams, primarily involving astronomy, biochemistry and biophysics, chemistry, and physics. The main emphasis is on theoretical, experimental, or laboratory research. The program is not intended to produce graduates who are scientific generalists; however, the areas of specialization often cut across traditional disciplines, as in the research fields mentioned above.

The degree is built on a foundation of several interdisciplinary courses that expose students to fundamental research problems in modern science and provide them with an introduction to each of the general areas that compose the degree (physics, chemistry, biochemistry and biophysics, and astronomy). The program curriculum, however, has been designed to provide enough flexibility to accommodate students seeking a fully interdisciplinary program, as well as those with interests more closely aligned with one of the traditional physical science disciplines. Students who seek a program with a heavy emphasis on computational methods may alternatively consider the doctoral program in computational sciences. This program includes concentrations in computational physics and space sciences and computational astrophysics. See the Department of Computational and Data Sciences section for degree and admission requirements.

**Admission Requirements**

The physical sciences PhD program is intended for students who (1) have completed an undergraduate program of study in one of the physical sciences, (2) have taken math to the level of differential equations, and (3) are computer literate.

Applicants are expected to have a BS degree with minimum GPA of 3.00 and acceptable GRE and TOEFL scores. The undergraduate degree should be in a scientific field, such as physics, chemistry, astronomy, mathematics, or engineering. Applicants with insufficient undergraduate records may be accepted provisionally and required to successfully complete selected remedial courses, some of which may not be applicable to the 48-credit total for the PhD course work requirement.
Interested students should submit a completed Mason graduate application, three letters of recommendation, official reports of GRE and TOEFL scores, and a goals statement reflecting their general research interests and career plans. Mason’s Educational Testing Service code is 5827.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The Physical Sciences, PhD program requires 72 credits beyond the baccalaureate degree. All students in the physical sciences PhD program are required to take 48 credits of course work and 24 credits of dissertation research. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits. Of the 48 credits of course work, 9 credits will consist of core courses to be taken by all students in the program, and at least 15 hours will be selected as part of a student’s contract with a three-member faculty committee (explained below). At least five of the contract core courses will be selected from the list presented below. Thus, the program consists of:

- a minimum of 15 credits of course work chosen as part of a contract
- up to 24 credits of electives (approved by committee)
- 24 credits of dissertation research

- PSCI 703 - Frontiers of Physical Sciences Credits: 1 (a 1-credit course that must be repeated three times)

Additional Information

A three-member predissertation faculty committee will be formed by the student as soon as possible after admission but not later than after completion of the 9-credit core. The composition of the student’s committee must be approved by the program director. At this point, the student is expected to have selected a rather broad area of future research interest; typically, the area may not yet be specific enough to define an actual dissertation project.

Because students entering the program will have diverse backgrounds and goals and the program is explicitly designed to accommodate students preparing for a range of fields of research, it is not possible to have a completely standardized set of degree requirements. Instead, the student and his or her committee will decide on a set of at least five courses (15 credits) that will best meet the student’s goals and future research direction. This portion of the program will be set up in the form of a contract between the student and the committee. The contract will include courses that the student should take and books and articles that should be read. Fifteen of the contract credits must be chosen from the following list; however, no more than three classes can be taken in any one area, unless the student obtains special permission from the program director. Furthermore, no more than two classes at the 500 level can be selected.

Astronomy courses:

- ASTR 530 - Astrophysics Credits: 3
- ASTR 766 - Relativity and Cosmology Credits: 3

Biochemistry and biophysics courses:

- CHEM 646 - Bioinorganic Chemistry Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 661 - Antibiotic Chemistry and Resistance Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3
• CHEM 665 - Protein-Protein Interactions: Methods and Applications Credits: 3

Chemistry courses:

• CHEM 617 - Organic Structural Spectroscopy Credits: 3
• CHEM 625 - Electroanalytical Chemistry Credits: 3
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3

Physics courses:

• PHYS 684 - Quantum Mechanics I Credits: 3
• PHYS 685 - Classical Electrodynamics I Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3

Interdisciplinary courses:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 512 - Solid State Physics and Applications Credits: 3
• PHYS 533 - Modern Instrumentation Credits: 3
• PHYS 575 - Atmospheric Physics I Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• ASTR 760 - Space Plasma Physics Credits: 3
• ASTR 765 - High-Energy and Accretion Astrophysics Credits: 3
• CHEM 563 - General Biochemistry I Credits: 3
• CHEM 564 - General Biochemistry II Credits: 3
• CHEM 728 - Introduction to Solid Surfaces Credits: 3
• CHEM 732 - Quantum Chemistry Credits: 3

Electives

Students can choose their elective classes more widely, but these courses need to be approved by the faculty committee in order to be applied toward satisfaction of the degree requirements. As an example, a student planning to pursue interdisciplinary research in the general area of bioinorganic chemistry would form a committee headed by a bioinorganic scientist and would have a contract that probably required taking at least these five courses:

• CHEM 617 - Organic Structural Spectroscopy Credits: 3
• CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
• CHEM 646 - Bioinorganic Chemistry Credits: 3
• CHEM 660 - Protein Biochemistry Credits: 3
• CHEM 662 - Modern Methods of Drug Discovery Credits: 3
Additional Information

The contract is an interactive document agreed to between the student and the committee. It can be revised, but any revisions must be approved by the program director. For purposes of the written preliminary exam, the scope of the contract will be narrowed to cover particular courses, books, and such as the committee sees fit. The final contract must be signed by the student and by all committee members.

Students are encouraged to undertake research under close faculty supervision in a number of potential areas, including the following examples:

- Analysis of complex dynamical systems
- Studies of the role of greenhouse gases in Earth’s atmosphere
- Modeling astrochemical processes in star-forming regions
- Searches for extrasolar planets
- Modeling the production of high-energy gamma rays from cosmic sources
- Analysis and prediction of space weather
- Quantum computation: theory and applications
- Solid state physics, including applications to materials science
- Interaction of organic molecules with solid surfaces

Course Work

The department offers all course work designated CDS, CSI, CSS, and NANO in the Courses chapter of this catalog.

Undergraduate Degree
Computational and Data Sciences, BS

Banner Code: SC-BS-CDS

The BS degree in computational and data sciences represents a new direction for integrated science at Mason based on the combination of applied mathematics, real-world computer science skills, data acquisition and analysis, and scientific modeling. Graduates of the BS program in computational and data sciences will possess the mathematical, scientific, and computational skills necessary to participate effectively as members of the interdisciplinary scientific simulation and analysis groups that are becoming more and more common in the public and the private sectors, particularly in Northern Virginia. Graduates will also be qualified to pursue graduate education in the sciences. Any student who meets the university’s general eligibility requirements may apply to the BS degree in Computational and Data Sciences Program.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete a total of 18 credits in computational and data sciences core courses, 15 credits in computer science, 23 credits in mathematics, 6 credits in statistics, 21 to 25 credits in a science concentration, and 3 to 9 credits in computational and data sciences electives with a minimum GPA of 2.00. (Through the course-work below, computational and data sciences majors satisfy the university-wide requirements in natural science and quantitative reasoning.)

Degree Requirements

Six courses from the computational and data sciences core (18 credits):

- CDS 101 - Introduction to Computational and Data Sciences Credits: 3
- CDS 301 - Scientific Information and Data Visualization Credits: 3
- CDS 302 - Scientific Data and Databases Credits: 3
- CDS 401 - Scientific Data Mining Credits: 3
- CDS 410 - Modeling and Simulations I Credits: 3
- CDS 411 - Modeling and Simulations II Credits: 3

Six required computer science courses (15 credits):

- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 261 - Introduction to a Second Language Credits: 1
- CS 367 - Computer Systems and Programming Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

Seven required mathematics courses (23 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3  
• MATH 214 - Elementary Differential Equations Credits: 3  
• MATH 446 - Numerical Analysis I Credits: 3

Two required statistics courses (6 credits):
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3  
• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Science concentration (21–25 credits)

Computational and data sciences electives (3–9 credits)

Concentrations

In meeting the above requirements, students choose a concentration in physics, chemistry, or biology. The courses required for each concentration are listed below. Students should plan a program of study in consultation with their advisor as appropriate for their selected concentration.

▲ Concentration in Biology (BIOL)

This concentration is appropriate for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of biological processes and systems. To complete this concentration, students should take the following courses:
• CHEM 211 - General Chemistry Credits: 4  
• CHEM 212 - General Chemistry Credits: 4  
• CHEM 313 - Organic Chemistry Credits: 3  
• CHEM 315 - Organic Chemistry Lab I Credits: 2  
• BIOL 213 - Cell Structure and Function Credits: 4  
• BIOL 305 - Biology of Microorganisms Credits: 3  
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1  
• BIOL 311 - General Genetics Credits: 4

▲ Concentration in Chemistry (CHEM)

This concentration is intended for students who wish to pursue a career or graduate education that applies computers to the simulation of chemical processes and systems. To complete this concentration, students should take the following courses:
• PHYS 243 - College Physics Credits: 3  
• PHYS 244 - College Physics Lab Credits: 1  
• PHYS 245 - College Physics Credits: 3  
• PHYS 246 - College Physics Lab Credits: 1
CHEM 211 - General Chemistry Credits: 4
CHEM 212 - General Chemistry Credits: 4

plus either:

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
  or
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2

▲ Concentration in Physics (PHYS)

This concentration is designed for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of physical problems. To complete this concentration, students should take the following courses:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

and three of:

- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 328 - Introduction to Astrophysics Credits: 3

Undergraduate Minor

Computational and Data Sciences Minor

Banner Code: CDS

The minor in computational and data sciences (CDS) provides an attractive option for students majoring in mathematics, science, or engineering who wish to augment their major degree program with additional courses in scientific computing. The combination of computer science, numerical methods, science, and synthesis courses in computational and data sciences will significantly enhance the practical knowledge and computational skills of the students when compared with the major field alone. By absorbing the material in this curriculum, students will acquire the knowledge, skills, and techniques commonly used across
scientific disciplines, which will allow them to apply their Mason education in a practical way in industrial, government, and academic settings.

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in computational and data sciences consists of 18 credits of course work.

Course Work

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

9 credits—from:

- Any CDS or CSI courses

3 credits—from:

- Classes in physics, chemistry, biology, bioinformatics, environmental science and policy, geography, geology, astronomy, or statistics at the 300 level or above. Other discipline-based courses may be permitted with permission of the undergraduate program director.

Note:

Many of the courses listed above have additional prerequisites. Nonetheless, the CDS minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science, since these students will generally have the prerequisites for the classes listed above.

Total: 18 credits

Master's Degree

Computational Science, MS

Banner Code: SC-MS-COMP

The interdisciplinary master’s program in computational science addresses the growing national and regional demand for trained computational scientists. It combines a solid foundation in information technology skills with computational courses in a variety of scientific areas. All courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside the university.
The 30 credit hour curriculum is centered on a strong computational component, comprising 9 credits of course work, with the remaining 21 credits taken in a broad range of scientific areas, including mathematics, physics, chemistry, biology, and statistics. This provides students with a flexible set of options that can be used to create their own customized curriculum under the guidance of a faculty advisor. Students are encouraged to undertake an optional master’s thesis or research project that allows them to gain useful experience in the development of simulations and other aspects of computational science.

Admission Requirements

Applicants should have academic backgrounds in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Three courses from the computational core (9 credits):

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

Computational electives (15 credits):

- 15 credits of CSI courses not including CSI 796, 798, 799, and 996.

Scientific electives (6 credits):

- Two 3-credit courses approved by the student’s advisor.
- Students can apply 6 credits of CSI 799 (master's thesis) or 3 credits of CSI 798 (research project) towards the elective requirement.

Total: 30 credits

Master's Level Certificate
Computational Techniques and Applications Graduate Certificate

Banner Code: SC-CERG-CTA

This certificate program focuses on mastering a variety of basic computational skills. The certificate is independent of the doctoral and master’s programs and is designed primarily for professionals in technical fields who seek to upgrade their computer expertise. This program is also available as an option for prospective or currently enrolled doctoral or master’s degree students.

Admission Requirements

Applicants should have an academic background in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Program Requirements

The program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in modern computation. Topics include operating systems, environments, languages, graphics, databases, and applications. Special course schedules may be designed depending upon the background and qualifications of the student. Waived credits are to be replaced with applications courses approved by the director of the certificate program.

Certificate Requirements

The required courses may be selected as follows:

6 credits from:

- CSI 601-607

6 credits from:

- CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
- CSI 610 - Introduction to Computational Sciences Credits: 3
- CSI 700 - Numerical Methods Credits: 3

Elective (3 credits):

- one CSI elective

Total: 15 credits
Nanotechnology and Nanoscience Graduate Certificate

Banner Code: SC-CERG-NANO

This graduate certificate program focuses on mastering a variety of technical skills in the rapidly developing area of nanotechnology. The field highlights the effect of size on the physical and engineering properties of materials and the design of various devices and systems. The certificate enables students to acquire knowledge covering a broad range of instrumentation, modeling, analysis, and production methods that facilitate the solution of practical nanotechnology-related problems in the workplace.

Admission Requirements

Applicants should hold a BS degree in any branch of engineering, physics, chemistry, or materials science, with a minimum GPA of 3.00. Exceptions are reviewed on an individual basis. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants.

Program Requirements

The certificate program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in nanotechnology and nanoscience. Topics include nanomaterials, nanocharacterization, nanostructures, nanofabrication, nanoelectronics, and modeling for nanoscience. The prefix of the associated courses is NANO.

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program.

Certificate Requirements

9 credits of core courses:

- NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
- NANO 510 - Strategies for Nanocharacterization Credits: 3
- NANO 520 - Survey of Nanostructures Credits: 3

6 credits of electives:

- NANO 530 - Nanofabrication Credits: 3
- NANO 610 - Nanoelectronics Credits: 3
- NANO 620 - Computational Modeling in Nanoscience Credits: 3

Total: 15 credits
Doctoral Degree

Computational Sciences and Informatics, PhD

Banner Code: SC-PHD-CSI

The Computational Sciences and Informatics (CSI) doctoral program addresses the role of computation in science, mathematics, and engineering, and is designed around a core of advanced computer technology courses. Computational sciences is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach often leads to understanding that, in many cases, traditional theory or experimentation alone cannot provide. The close relationship of the CSI doctoral program to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening.

Overview of the CSI Program

Founded in 1992, the innovative Computational Sciences and Informatics (CSI) doctoral program at George Mason University addresses the role of computation in science, mathematics, and engineering. Computational sciences is defined as the development and application of computational methodologies and techniques to the modeling, simulation, and understanding of phenomena in the natural sciences and engineering. Informatics is defined as the design and implementation of complex software systems for the extraction of knowledge from large databases. The research and teaching activities associated with the CSI program reflect the recognized role of computation as part of a triad with theory and experimentation, leading to a better understanding of nature.

Areas of Emphasis within the PhD Program

Research opportunities leading to the doctoral degree are available in each of the following areas of emphasis:

- Computational Fluid Dynamics
- Computational Materials and Chemical Sciences
- Space Sciences and Computational Astrophysics
- Computational Mathematics
- Computational Physics
- Computational Statistics
- Computational Learning
- Quantum Information Science
- Computational Remote Sensing

Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with computational neuroscience, climate dynamics, bioinformatics, and remote sensing, which are now separate PhD programs.

The department’s research activities reflect the recognized role of computation as part of a triad with theory and experiment to generate new knowledge and a better understanding of nature. CDS maintains several weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. Doctoral students are encouraged to participate in national and international meetings where they can present their latest findings.

Program of Study
The list of research areas tells only part of the story because the greatest strength of the CSI doctoral program lies in its ability to foster and promote truly interdisciplinary research that crosses traditional domain boundaries. In the CSI doctoral program, each student is presented with an exciting opportunity to create a new area of interdisciplinary inquiry that would not fit into a traditional PhD program. Students in the CSI doctoral program use computationally intensive methods to solve current problems in these scientific areas.

The 72-credit doctoral program combines three intellectual elements:

- Core computational science topics
- Computational intensive courses in specific scientific areas
- Research leading to the dissertation

The doctoral program, designed to be completed in 4 to 5 years, includes:

- 12 credits of core computational courses (scientific computing, databases, visualization)
- 15 credits from courses in one of the science areas
- 18 credits in electives from science courses, with at least 9 credits of CSI courses
- 3 credits in colloquium/seminar
- 24 credits in dissertation research

**Admission Requirements**

Students interested in applying for admission into the CSI PhD program should have a bachelor’s degree in any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. All applicants to the PhD program should have a mathematics background up to and including differential equations. All applicants to the PhD program should also have knowledge of a computer programming language such as C, C++, FORTRAN, etc.

The GRE is required, unless the applicant holds a master’s degree from a school in the United States. A TOEFL score of 575 (paper-based exam) or 230 (computer-based exam) is required for international students. The ETS code for GMU is 5827.

Students should submit a completed graduate application along with three letters of recommendation, an expanded goals statement, and a $50 check to cover the application fee (payable to George Mason University) in addition to the items listed above.

Applications should be received by March 1 for fall semester and November 1 for spring semester. Applications requesting financial support must be received by February 1 for the fall semester. Please note that applications from local applicants may be accepted after these general deadlines.

Please send completed applications to the address below:

COS Graduate Applications Processing Center
George Mason University
4400 University Drive, MS 6A3
Fairfax, VA 22030

For additional information, phone 703-993-1988; fax 703-993-9300, or e-mail: blaisten@gmu.edu.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

**General core course requirements (12 credits)**
From the following:

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

**Emphasis core requirements (15 credits)**

In one of the following areas:

**Computational Fluid Dynamics**

- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3

One from:

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 729 - Topics in Continuum Systems Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3

**Computational Materials and Chemical Sciences**

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- CSI 787 - Computational Materials Science Credits: 3

One from:

- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3
- CSI 885 - Atomistic Modeling of Materials Credits: 3

**Space Sciences and Computational Astrophysics**
- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

Two from:

- CSI 661 - Astrophysics Credits: 3
- CSI 662 - Space Weather Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- PHYS 684 - Quantum Mechanics I Credits: 3

One from:

- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 761 - N-Body Methods and Particle Simulations Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 788 - Simulation of Large-Scale Physical Systems Credits: 3

Computational Mathematics

- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 747 - Nonlinear Optimization and Applications Credits: 3

Three from:

- CSI 740 - Numerical Linear Algebra Credits: 3
- CSI 746 - Wavelet Theory Credits: 3
- CSI 772 - Statistical Learning Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
- MATH 678 - Partial Differential Equations Credits: 3

Computational Physics

- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3

Three from:

- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3
• PHYS 684 - Quantum Mechanics I Credits: 3

Computational Statistics

• CSI 771 - Computational Statistics Credits: 3
  or
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
• CSI 876 - Measure and Linear Spaces Credits: 3
  or
• CSI 877 - Geometric Methods in Statistics Credits: 3
• CSI 972 - Mathematical Statistics I Credits: 3
• CSI 973 - Mathematical Statistics II Credits: 3

Computational Learning

• CSI 771 - Computational Statistics Credits: 3
• CSI 772 - Statistical Learning Credits: 3
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
• CSI 777 - Principles of Knowledge Mining Credits: 3
• CSI 873 - Computational Learning and Discovery Credits: 3

Quantum Information Science

• CSI 615 - Quantum Computation Credits: 3
• CSI 715 - Quantum Complexity Theory Credits: 3
• CSI 716 - Quantum Information Theory Credits: 3
• CSI 717 - Quantum Computer Programming Credits: 3
  or
• CSI 718 - Quantum Computer Realization Credits: 3
• CSI 783 - Computational Quantum Mechanics Credits: 3
  or
• PHYS 684 - Quantum Mechanics I Credits: 3

Computational Remote Sensing

Select five courses from:

• EOS 740 - Hyperspectral Imaging Systems Credits: 3
• EOS 747 - Satellite Data Reception and Product Generation Credits: 3
• EOS 753 - Observations of the Earth and Its Climate Credits: 3
• CSI 754 - Earth Science Data and Advanced Data Analysis Credits: 3
• EOS 756 - Physical Principles of Remote Sensing Credits: 3
• CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing Credits: 3
• EOS 758 - Earth Image Processing Credits: 3
Electives:

18 credits, with at least 9 credits of CSI courses.

Colloquium/Seminar: 3 credits

3 credits from CSI 898, CSI 899, or CSI 991 (courses may be repeated).

Interdisciplinary Studies

Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with Earth systems and geoinformation sciences, computational chemistry, climate dynamics, and bioinformatics, several of which are autonomous PhD programs within COS.

Academic Common Market

The CSI PhD degree has been approved for access by residents of Maryland through the Academic Common Market (ACM). The ACM allows full-time students who are certified residents of Maryland to enroll in the CSI PhD program while paying the Virginia in-state tuition rate, which is about one-third of the out-of-state tuition rate that residents of Maryland would otherwise have to pay. Details regarding Maryland’s participation in the ACM may be found at www.mhec.state.md.us/index.asp. The ACM program code for the CSI Doctoral Program is 300801. Interested students should contact the Office of the Registrar, Certifications Services, at 703-993-2448.

Environmental Science and Policy

Phone: 703-993-1043

Faculty

Professors: Jones, Lawrey

Term professor: Talbot

Associate professors: Balint, Birchard, Gillevet, Jonas (Chair), Macfarlane, McBride, Rockwood, Torzilli

Assistant professors: Ahn, Crate, Darnall, Edwards, Forkner, Kraus, Manca, Weeks

Term associate professors: Cresseey, Parsons, Sklarew

Term assistant professors: Largen, Peters

Research associate professor: Litchfield

Emeritus professors: Bradley, Ernst, Kelso, Shaffer, Skog
Other Environmental Program Faculty

**Professors:** Black, Chandhoke, Conlan, Diecchio, Foster, Gifford, Haack, Houck, Mose, Mushrush, Nadeau, Regan, Rowan, Sage, Schum, Wan, Willett, Wong

**Associate professors:** Beach, Christensen, Conant, deMonsabert, Fryxell, Guagnano, Honeychuck, Kozlowski, Mahler, McBride, Meyer, Paden, Palkovich, Rodgers, Royt, Seto, Stough, Wood

**Assistant professor:** Kysar-Mattietti, Parker

**Term associate professors:** Verardo

**Term assistant professors:** Nord-Cooper

**Affiliate faculty:** Bailey, Bartoldus, Baxter, Buchino, Burgess, Creque, Croisier, Hamdan, Jordan, Kriechevsky, Lebovitz, Leimgruber, Litchfield, Maldini, Maldonado, Marra, Maurakis, May-Collado, Megonigal, Noe, Oren, Ragen, Rybicki, Seidensticker, Sillett, Sladen, Smith, Songsasen, Strong, Wang

Course Work

This department offers all course work designated EVPP and numerous BIOL courses, listed in the Courses chapter of this catalog.

Other Undergraduate Programs

In addition to its own undergraduate programs, the Environmental Science and Policy department also works closely with and provides administrative input to other undergraduate programs.

In concert with the Biology Undergraduate Program, through which the BA and BS degrees in biology are offered, Environmental Science and Policy administers the environmental and conservation biology and the marine and freshwater biology concentrations.

The Concentration in Environmental and Conservation Biology (ESCB) within the BS in Biology is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology.

The Concentration in Marine and Freshwater Biology within the BS in Biology is offered to students seeking a biology degree that focuses on marine and freshwater biology and prepares them for graduate work or employment in aquatic, marine and fisheries fields.

Refer to the Biology Undergraduate Program section for more information on Biology, BS program and these two concentrations.

Environmental Science and Policy and the department of Geography and Geoinformation Sciences cooperatively offer the BS in Global and Environmental Change. This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from the other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth's systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. Refer to the GGS section for more information on the Global and Environmental Change, BS program.

The Concentration in Environmental Science (EVSC) within the BS in Earth Science degree program is offered by Environmental Science and Policy jointly with the Department of Atmospheric, Oceanic and Earth Sciences. It is intended for
students interested in studying the earth and its environment. Refer to AOES section for more information on the Earth Science, BS degree program and this concentration.

**Other Graduate Programs**

In addition to its own graduate programs, the Environmental Science and Policy department also participates in the MS in Earth Systems Science administered primarily through the Department of Geography and Geoinformation Science (GGS). Please see the GGS listing for program requirements.

The Environmental Science and Policy department also offers (jointly with the Institute for Conflict Analysis and Resolution) the Graduate Certificate in Environmental Conflict Resolution and Collaboration, which focuses on a systems approach to environmental conflict and how to understand its legal, regulatory, and ecological implications. Coursework addresses the strategic thinking that is required for assessing and designing appropriate environmental conflict resolution processes, as well as understanding the public interest and the intertwined questions of social justice and sustainability that make environmental conflict particularly important and challenging.

**Bachelor's Level Certificate**

**Environmental Management Undergraduate Certificate**

**Banner Code: SC-CERB-EVMG**

This undergraduate certificate in environmental management is for students interested in environmental issues. The program consists of a minimum of 27 credits, most of which, with appropriate planning, may be counted toward fulfilling BS or BA requirements in biology, geography, earth science, urban systems engineering, and other natural and social sciences.

The curriculum provides a substantive appreciation of the biological, physical, and social aspects of environmental problems and methods for their analysis and resolution. The program should particularly interest students wishing to pursue graduate work or seeking employment in the environmental field. Inquiries should be made to the director of the environmental management certificate program.

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. As an entry-level requirement, students must complete a two-semester laboratory science sequence in environmental science, biology, chemistry, or geology. Only courses with a grade of C or better are counted toward the certificate program.

Students select at least 27 credits of course work chosen in consultation with the certificate director. The courses are divided into five categories. Courses listed in more than one category can satisfy the requirements of only one. Any substitution in the following list requires permission from the certificate director.

**Certificate Requirements**

**Environmental certificate core (four courses):**

Choose one of the following:

- EVPP 377 - Applied Ecology Credits: 3
- BIOL 377 - Applied Ecology Credits: 3
and one of the following:

- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 503 - Problems in Environmental Management Credits: 3

and one of the following:

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3

- plus a course in statistics (BIOL 312 Biostatistics recommended)

Physical perspective (one or two courses*):

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemy: A Global Perspective Credits: 3
- GEOG 102 - Physical Geography Credits: 3
- GEOG 309 - Introduction to Meteorology and Climate Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 405 - Geology of Mineral and Energy Resources Credits: 3

Biological perspective (one or two courses*):

- BIOL 307 - Ecology Credits: 4
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 344 - Taxonomy of Flowering Plants Credits: 4
- BIOL 345 - Plant Communities Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 446 - Environmental Physiology Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- BIOL 471 - Evolution Credits: 3
- BIOL 532 - Animal Behavior Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- BIOL 536 - Ichthyology Credits: 4
- BIOL 537 - Ornithology Credits: 4
- BIOL 543 - Tropical Ecosystems Credits: 4
- BIOL 547 - Terrestrial Plant Ecology Credits: 4
- EVPP 318 - Conservation Biology Credits: 3
- EVPP 339 - Vertebrate Natural History Credits: 4
- EVPP 350 - Freshwater Ecosystems Credits: 4
- HEAL 450 - Epidemiology and Environmental Health Credits: 3
- EVPP 515 - Molecular Environmental Biology I Credits: 3
- EVPP 538 - Mammalogy Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3

Social perspective (one course):

- ANTH 305 - Foraging Societies Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 370 - Environment and Culture Credits: 3
- ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3
- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- ECON 350 - Regional and Urban Economics Credits: 3
- ECON 360 - Economics of Developing Areas Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- GEOG 301 - Political Geography Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- GEOG 305 - Economic Geography Credits: 3
- GEOG 306 - Urban Geography Credits: 3
- GEOG 316 - Geography of Latin America Credits: 3
- GEOG 325 - Geography of North Africa and the Middle East Credits: 3
- GEOG 406 - Suburban Geography Credits: 3
- GOVT 318 - Interest Groups, Lobbying, and the Political Process Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3
- GOVT 364 - Public Policy Making Credits: 3
- GOVT 366 - Public Policy Analysis Credits: 3
- MGMT 312 - Principles and Practices of Management Credits: 3
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3

Environmental methods (one course):

- BIOL 312 - Biostatistics Credits: 4
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1
- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOG 411 - Advanced Digital Cartography Credits: 3
• GEOG 412 - Aerial Photography Interpretation Credits: 3
• GEOG 416 - Satellite Image Analysis Credits: 3
• GEOG 463 - Applied Geographic Information Systems Credits: 3
• GEOG 550 - Geospatial Science Fundamentals Credits: 3
• GEOG 553 - Geographic Information Systems Credits: 3
• GEOG 579 - Remote Sensing Credits: 3
• GEOG 580 - Digital Remote Sensing Credits: 3
• GEOG 585 - Quantitative Methods Credits: 3

Note:

* Biology majors are required to complete two courses in physical or social perspective; geology or earth science majors are required to complete two courses in biological or social perspective. Social science majors are required to complete two courses in physical or biological perspective.

Total: 27 credits

Undergraduate Minor

Conservation Biology Minor

Banner Code: CBIO

This minor is intended for non-biology majors* with an interest in wildlife and habitat conservation issues. The minor may particularly suit Global and Environmental Change majors and Earth Science majors, as well as New Century College students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism.

Course Work

Candidates for the minor in conservation biology must complete at least 21 credits with a minimum GPA of 2.00, distributed as follows:

Core Biology Courses (15 credits)

• BIOL 303 - Animal Biology Credits: 4 **
• BIOL 304 - Plant Biology Credits: 4 **
• BIOL 307 - Ecology Credits: 4 **

and one from the following:

• EVPP 318 - Conservation Biology Credits: 3
• BIOL 318 - Conservation Biology Credits: 3
Electives (6 credits)

At least 6 credits of electives from the following courses:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 1-4
- NCLC 401 - Conservation Biology Credits: 3-15 (3 of 6 credits count toward electives)
- NCLC 520 - Conservation Education Credits: 3
- NCLC 522 - Developing an Institutional In Situ Conservation Strategy Credits: 3
- TOUR 312 - Ecotourism Credits: 3

Notes:

Other conservation-oriented classes may also be applicable as electives for this minor if approved by the faculty coordinator for the minor. Eight credits of courses must be unique to the minor and not counted toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

*This minor cannot be taken by biology majors.

**These courses may have prerequisites that need to be met. See advisor for details.

Total: 21 credits
- EVPP 377 - Applied Ecology Credits: 3
  or
- BIOL 377 - Applied Ecology Credits: 3

- PHIL 343 - Issues in Environmental Ethics Credits: 3

**Plus 9 credits from the following list:**

(or other appropriate courses approved by the coordinator of the minor)

- ANTH 370 - Environment and Culture Credits: 3
- ANTH 399 - Issues in Anthropology Credits: 3

- BIOL 318 - Conservation Biology Credits: 3
  or
- EVPP 318 - Conservation Biology Credits: 3

- BIOL 543 - Tropical Ecosystems Credits: 4
- CEIE 456 - Environmental Law Credits: 3
- EOS 306 - Sustainable Development Credits: 3
- EOS 322 - Issues in the Global Change Credits: 3
- EOS 455 - Environmental Impact Assessment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 1-4
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 399 - Selected Topics in Geography Credits: 3
- GEOL 420 - Earth Science and Policy Credits: 3
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3
- TOUR 312 - Ecotourism Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3
- TOUR 362 - Cultural and Environmental Interpretation Credits: 3
- TOUR 540 - Sustainable Tourism Management Credits: 3

**Note:**

At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

**Total: 21 credits**
Sustainability Minor

Banner Code: SUST

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines, and it also requires a re-examination of the relationship between human value systems and cultural practices and the associated long-term implications for the ecosystem. This interdisciplinary minor is housed jointly in the Department of Environmental Science and Policy (College of Science) and in the New Century College (College of Humanities and Social Sciences).

For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

Candidates for the minor in Sustainability Studies must complete 16 credits with a minimum GPA of 2.00, distributed as follows:

Core Courses (8 credits):

students take 4 credits of:

- NCLC 275 - Special Topics Credits: 3-15
- plus 4 credits of:
- EVPP 480 - Sustainability in Action Credits: 4

Electives (8 credits):

8 credits of electives are required to complete the minor. A maximum of 2 courses from a single department or program can be counted for elective credit. Preapproved courses are listed here and others may be substituted (see the program coordinator for further information).

- ANTH 370 - Environment and Culture Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3
- CEIE 456 - Environmental Law Credits: 3
- CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
- EOS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- EOS 304 - Population Dimensions of Global Change Credits: 3
- EOS 305 - Global Environmental Hazards Credits: 3
- EOS 306 - Sustainable Development Credits: 3
- EOS 312 - Physical Climatology Credits: 3
- EOS 322 - Issues in the Global Change Credits: 3
- EOS 353 - Observations of the Earth and Its Climate Credits: 3
- EOS 455 - Environmental Impact Assessment Credits: 3
- ECON 335 - Environmental Economics Credits: 3
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
EVPP 335 - People, Plants, and Culture Credits: 3
EVPP 336 - Human Dimensions of the Environment Credits: 3
EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
EVPP 361 - Introduction to Environmental Policy Credits: 3
EVPP 421 - Marine Conservation Credits: 3
GEOG 303 - Conservation of Resources and Environment Credits: 3
GEOL 305 - Environmental Geology Credits: 3
NCLC 220 - Energy and Environment Credits: 3-15
PRLS 250 - Wilderness Travel and Sustainability Credits: 2
PRLS 300 - People with Nature Credits: 3
PRLS 402 - Human Behavior in Natural Environments Credits: 3
PRLS 501 - Introduction to Natural Resources Law Credits: 3
PHIL 343 - Issues in Environmental Ethics Credits: 3
SOCI 320 - Social Structure and Globalization Credits: 3
TOUR 312 - Ecotourism Credits: 3
TOUR 340 - Sustainable Tourism Credits: 3
USST 301 - Urban Growth in a Shrinking World Credits: 3

Total: 16 credits

Master's Degree

Environmental Management, MEM ■ (pending SCHEV approval)

Banner Code: SC-MEM-EVMG

The Master of Environmental Management (MEM) degree combines the managerial and administrative skills developed in a traditional Master of Public Administration with the scientific knowledge and understanding normally found as a component of a Master of Science degree. The program serves as a terminal professional master’s for those individuals currently working in or aspiring to work as managers in the environmental field in both government and private industry. This degree addresses the needs of professional managers and staff who work at the interface between public administration and environmental science. The MEM is a non-thesis degree that provides balanced training to both full-time and part-time students who seek or currently occupy positions in this growing nexus. The program is offered jointly by the Department of Environmental Science and Policy (ESP) in the College of Science and the Department of Public and International Affairs (PIA) in the College of Humanities and Social Sciences.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.0 and should have taken at least two semesters of biology and/or chemistry. Applications are accepted for fall admission only and are due by March 15. All applicants must submit the following materials:

- Complete Application for Graduate Study
• Non-refundable application fee
• Application for Virginia In-State Tuition Rates if seeking in-state tuition
• Two copies of official transcripts from each institution attended
• Three letters of recommendation (at least two of which should be from former professors, job supervisors or others familiar with the applicant’s work)
• A recent resume
• A substantial statement of professional goals and interest in the program. This should also specify whether the student wishes to attend full or part-time.
• Scores from the aptitude portion of the GRE (Applicants with undergraduate GPA of 3.3 or higher may petition for a waiver of GRE requirement)
• International students must also submit an official TOEFL score report

Degree Requirements

This degree is designed to be completed by a full-time student in three semesters, or by part-time student in six semesters. Students must complete a total of 37 credit hours as follows:

Core Courses (18 credits):

• PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
• PUAD 640 - Public Policy Process Credits: 3
• PUAD 642 - Environmental Policy Credits: 3
• EVPP 607 - Fundamentals of Ecology Credits: 3
• EVPP 641 - Environmental Science and Public Policy Credits: 3
• PUAD 611 - Problem Solving and Data Analysis I Credits: 3

Environmental Law (3 credits):

• EVPP 670 - Environmental Law Credits: 3
  or
• CEIE 556 - Environmental Law Credits: 3
  or
• PRLS 501 - Introduction to Natural Resources Law Credits: 3

Field Ecology (4 credits):

either the sequence:
• EVPP 550 - Waterscape Ecology and Management Credits: 3
• EVPP 555 - Lab in Waterscape Ecology Credits: 1
or the sequence:
• EVPP 646 - Wetland Ecology and Management Credits: 3
• EVPP 647 - Wetland Ecology Lab and Field Credits: 1

Capstone (3 credits):

• EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Electives (9 credits):

• 9 credits of electives approved by the program director

Total: 37 credits

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

The MS in environmental science and policy meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global climate change/warming, and depletion of the stratospheric ozone. Areas of specific departmental focus include ecosystems; conservation; environmental biocomplexity; molecular ecology; sustainability science; environmental policy and management and human/environmental interactions.

Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary action in a setting in which research is an essential element supporting instruction.

Four concentrations are available in the master’s program: environmental science and policy, environmental biocomplexity, Earth surface processes and environmental geochemistry, and environmental management. The first three concentrations, designed for students who wish to obtain a research oriented master’s degree, serve as a training ground for students wishing to further their education by pursuing the PhD in environmental science and public policy at Mason or doctoral programs at other universities. The environmental science and policy concentration is the largest and serves as a home for a broad array of research foci. The environmental biocomplexity concentration is designed for students who wish to obtain a research-oriented master’s degree in population genetics, microbial ecology, and molecular systematics. The concentration in Earth surface processes and environmental geochemistry provides a specific research focus in the Earth science area.

The environmental management concentration serves as a terminal professional master’s degree for individuals working in or aspiring to work as managers in the environmental field in government or private industry. It combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree.
Admission Requirements

Applicants must complete a standard Mason graduate application form, available from the Graduate Admissions Office or online at admissions.gmu.edu. Applicants should hold a bachelor’s degree with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a related field with an environmental focus from an accredited institution. Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants should submit three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD. The aptitude portion of the GRE is required, and successful applicants usually have achieved a minimum score of 1,100 for verbal and quantitative combined. Applicants must also submit a statement of interest to the program, which should include the concentration to which they are applying, potential areas of environmental focus, research option preferred, a statement of interactions with potential faculty advisors, and an explanation of career goals. Prospective students must contact potential faculty advisors appropriate to their interests during the application process. The availability of an advisor in the student’s area of interest is a prerequisite for final admission. Students will choose their research skills option at the time of application but may change this option later with their advisor’s permission.

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator’s office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences. These introductory courses would be in addition to the degree requirements listed below.

Degree Requirements

▲ Earth Surface Processes and Environmental Geochemistry Concentration (ESEG)

This concentration is for students desiring an MS degree with an earth science geology theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason’s policy on master’s thesis committees. Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental and earth science issues. Course selection should support the research component of the student’s degree program.

Natural Sciences:

- At least 16 credits are required, including at least one course from each of the following areas (10 of the 16 credits): soils science, hydrogeology, and geochemistry.

The remainder may be chosen from a list of applicable EVPP, CHEM, and GEOL graduate courses, including:

- GEOL 500 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 501 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 601 - The Lithosphere Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 1-4
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 610 - Bioremediation: Theory and Applications Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 745 - Environmental Toxicology Credits: 3

Public Policy:

- At least 6 credits are required in environmental law, human dimension of global change, environmental ethics, human ecology, or planning.

Methods:

- At least 6 credits are required in remote sensing, GIS, statistics, instrumentation, or modeling.

Seminar:

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research:

At least 3 credits of Master's Thesis are required for this concentration. Students present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research component.

- EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives:

- If necessary, students take additional electives to bring the total to 33 credits.

Environmental Biocomplexity Concentration (EVBC)

This concentration is for students desiring an MS degree with a environmental biocomplexity theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees.
Course requirements may be fulfilled by completing courses from a variety of academic units at the university. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should support the research component of the student’s degree program.

Students are encouraged to complete at least 1 credit of directed studies (EVPP 693) as a lab rotation to broaden the scope of their experience in the concentration.

Natural Sciences:

- At least 6 credits are required in courses that cover ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

Public Policy:

- At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, and legal and ethical issues in science.

Methods and Statistics:

- At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, and phylogenetic methods.

Seminar:

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research:

This requirement may be satisfied in one of two ways. Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee. Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research skills component.

- EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3
  or
- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives:

- If necessary, students take additional electives to bring the total to 33 credits.
Environmental Management Concentration (EVMG)

Students must complete 37 credits for the environmental management concentration. Students will be assigned an advisor on admission. Full-time students can complete this degree in three semesters; part-time students take six semesters. Course work must include the following:

Administration and Policy:

At least 12 credits are required, including the following:

- EVPP 670 - Environmental Law Credits: 3
  or
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
  or
- PUAD 620 - Organization Theory and Management Behavior Credits: 3
- PUAD 640 - Public Policy Process Credits: 3 (with sections tailored to environmental science and policy)
- EVPP 642 - Environmental Policy Credits: 3

Environmental Science:

At least 12 credits are required, including the following:

- EVPP 550 - Waterscape Ecology and Management Credits: 3
  or
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3 (if student has not already taken a course in general ecology)
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Methods and Statistics:

At least 6 credits are required, including the following:

- PUAD 611 - Problem Solving and Data Analysis I Credits: 3 (research design)
- PUAD 612 - Problem Solving and Data Analysis II Credits: 3 (statistics)

Research/Seminar:

Fulfilled with

- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 1-4 Problems in Environmental Management
Electives:

Students may choose 3 credits (or more to complete 37) from the following list of approved electives. Other courses may be used subject to approval of the program committee.

- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 525 - Economics of Human/Environment Interactions Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 626 - Environment and Development in Asia Credits: 3
- EVPP 627 - Environmental Policy in Latin America Credits: 3
- EVPP 628 - Environment and Development in Africa Credits: 3
- EVPP 630 - Methods and Logic of Social Inquiry Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 675 - Environmental Planning and Administration Credits: 3
- GEOG 550 - Geospatial Science Fundamentals Credits: 3
- PUAD 509 - Justice Organizations and Processes Credits: 3
- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 657 - Association Management Credits: 3
- PUAD 729 - Issues in Public Management Credits: 1-3
- PUAD 741 - Policy Analysis Credits: 3
- PUAD 742 - Program Evaluation Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 712 - Project Management Credits: 3
- MBA 724 - Marketing Communications Credits: 3
- MBA 725 - Leadership Credits: 3

▲ Environmental Science and Policy Concentration (EVSP)

This concentration encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees.

Course requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in four categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should reflect a coherent individual program focus, which is stated and briefly described in the program of study, and support the research component of the student’s degree program.

Course selection should also support the research component of the student’s degree program and should be developed in close
consultation with the advisor and committee members. The advisor and thesis committee approve the course work program individually for each student.

**Natural Sciences:**

- At least 6 credits are required in biology, geology, geography, chemistry, or environmental engineering. For those students without previous course work in ecology, EVPP 607 is required in addition to the 6 credits.
- EVPP 607 - Fundamentals of Ecology Credits: 3

**Public Policy:**

- At least 6 credits are required in environmental law, human ecology, environmental ethics, planning, or public affairs.

**Methods and Statistics:**

- At least 9 credits are required in statistics, remote sensing, information systems, instrumental analysis, or modeling. A course in statistics is highly recommended.

**Seminar:**

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

**Research:**

This requirement may be satisfied in one of two ways. Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee. Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research skills component.

- EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3
  or
- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

**Electives:**

- If necessary, students take additional electives to bring the total to 33 credits.

**Master's Level Certificate**
Environmental Management Graduate Certificate

Banner Code: SC-CERG-EVMG

The graduate certificate allows students to expand their knowledge of the environment and environmental management beyond their undergraduate training. It offers a professional credential to students who might not have the time or background to enroll in a graduate degree program requiring a thesis or dissertation. Students who later obtain admission to the graduate degree programs in environmental science and policy may be able to use credits earned during the certificate toward their graduate degree program.

The curriculum provides a substantive exposure to the biological, physical, and social aspects of environmental problems, and methods for their analysis and resolution.

Admission

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator's office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences.

Applicants to the program should meet the following minimum requirements:

- Undergraduate (baccalaureate) degree, preferably in biology, chemistry, geology, geography, earth systems science, resource planning, environmental studies, or a related discipline with an environmental focus.
- Two semesters of college level general chemistry with a laboratory (see note above regarding introductory graduate environmental chemistry).
- Two semesters of college level general biology with a laboratory (see note above regarding introductory graduate environmental biology).
- Undergraduate course in general ecology; students who do not meet this requirement must take EVPP 607 Fundamentals of Ecology as their natural science elective.
- Three letters of reference and a statement of interest in the program.
- Aptitude portion of the Graduate Record Exam.

Certificate Requirements

The certificate is awarded after satisfactory completion of six graduate courses (a minimum of 18 semester credits) as specified below:

Environmental certificate core (three courses):

- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3
- GEOG 503 - Problems in Environmental Management Credits: 3

One of the following:

- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- SOCI 635 - Environment and Society Credits: 3
Three electives (one from each of the following areas):

Natural Sciences:

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 645 - Freshwater Ecology Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3
- GEOG 570 - The Hydrosphere Credits: 3

Social Sciences:

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- PHIL 643 - Environmental Ethics Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3

Environmental Methods:

- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- GEOG 550 - Geospatial Science Fundamentals Credits: 3
- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 579 - Remote Sensing Credits: 3
- GEOG 580 - Digital Remote Sensing Credits: 3
- GEOG 585 - Quantitative Methods Credits: 3
- SOCI 531 - Statistical Reasoning Credits: 3

Total: 18 credits

Doctoral Degree
Environmental Science and Public Policy, PhD

Banner Code: SC-PHD-EVPP

This interdisciplinary program draws on faculty and expertise from the Environmental Science and Policy departmental core faculty, as well as faculty from across the university. This includes the Departments of Atmospheric, Oceanic and Earth Sciences; Molecular and Microbiology; Public and International Affairs; Chemistry and Biochemistry; Economics; Geography and Geoinformation Science; and Sociology and Anthropology; as well as the School of Public Policy, the Volgenau School of Information Technology and Engineering, and the College of Education and Human Development.

Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. The application deadline is February 15 for admission to fall semester; admission to spring semester is usually not available.

In addition to the materials required of all applicants for graduate study at Mason, applicants should submit the following:

- Scores on aptitude portion of GRE (may be waived for applicants with a master’s degree in an appropriate field).
- Three letters of recommendation, with at least two from individuals with doctorates..
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.

Applicants with questions should contact the ESP Graduate Services office (703-993-3187). All students must obtain the consent of a faculty member willing to serve as an Advisor prior to being fully admitted to the program. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor.

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator’s office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences. These introductory courses would be in addition to the degree requirements listed below.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The doctoral program requires a minimum of 78 graduate credits beyond the bachelor’s degree. Students with a master’s degree in an appropriate field may obtain a reduction of credit for appropriate course work of up to 30 graduate credits. To ensure that all students obtain the necessary skills and knowledge to function as environmental professionals, the program requires all students to fulfill the following four category requirements:

Natural Sciences:
At least 12 credits are required in biology, chemistry, environmental science, geology, geography, or environmental engineering.

Public Policy:

At least 12 credits are required in public affairs, economics, sociology, and business. A course in environmental law is also required as part of this category.

Research Methods and Technology:

At least 9 credits are required in statistics, remote sensing, geographic information systems, analytical chemistry, modeling, or information technology. Students should carefully choose course work to ensure they have the necessary skills to support dissertation research. Course work for the first two categories, with a substantial methods component, may be used to meet some of this requirement, subject to approval of the student’s committee.

Doctoral Seminar:

Students must present a total of 4 graduate seminar credits, with EVPP 991 taken at least once.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1
- EVPP 991 - Advanced Seminar in Environmental Science Credits: 2

Course Work Emphasis:

Beyond the basic 12 hour natural science/public policy requirements, students usually will focus their study either on environmental science or environmental public policy. Those focusing on environmental science should usually take a total of 24 credits in natural science; those focusing on environmental public policy should usually take 24 credits of public policy course work. Previous thesis research courses may not be applied to this degree. See Advisor for further details.

Additional Information:

Before admission to the program, students are responsible for identifying a member of the environmental faculty willing to serve as their advisor. The advisor guides the student through initial course selection. An advisor may be changed by mutual consent of student and advisor, or petition to the graduate program director and the College of Science Dean. Students are required to complete a course work proposal by the end of the second semester of courses. The coursework proposal must be approved by the advisor and program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The students’ course work must provide the knowledge base from which original research projects in their specific areas of interest can be successfully completed.

Before the end of the fourth semester of course work, students, in consultation with their advisor should propose a dissertation committee of at least four members, three of whom must be from the Mason graduate faculty with representation from at least two governance units. The dissertation committee is appointed by the Dean of the College of Science. After reviewing the student’s course work proposal, progress to date, and area of research, the committee makes final recommendations concerning course work that will be codified in the program of study to be signed by all committee members and the graduate program director. Students are advised to work closely with their advisor and committee to develop the course work program in order to facilitate the process of course selection.
On completion of all or nearly all course work, students may request to take the qualifying or candidacy exam. The qualifying exam has both written and oral components. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student’s committee. Upon approval of the program of study, completion of all or nearly all course work, successful completion of the qualifying exam, the student is recommended for advancement to candidacy by the graduate program director. Students must advance to candidacy within six years of admission to the program.

Dissertation

Students must complete a dissertation (12 to 24 credits) by registering for credit in a combination of EVPP 998 and 999. No more than half the credits specified for dissertation credit on the student’s program of study may be taken as EVPP 998, Doctoral Dissertation Proposal. The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations, on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

Before students may enroll in dissertation research (EVPP 999), they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, department chairperson, and dean of the college. Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate program director, department chairperson, and dean. The dissertation and defense must be completed within five years of advancement to candidacy.

■ Forensic Science Program

Phone: 703-993-1050
Web: cos.gmu.edu/forensics

Faculty

Director: Whildin

Professors: Foster, Jafri, Mushrush, Willett

Associate professors: Born, Gillevet, Honeychuck, Kinser, Palkovich, Schreifels, Seto

Assistant professors: Couch, Forkner

Adjunct faculty: McClintock, Whildin

The Forensic Science Program is an interdisciplinary academic collaboration between the Department of Chemistry and Biochemistry; the Department of Molecular and Microbiology (MMB); the Department of Environmental Science and Policy (ESP); and the Department of Bioinformatics and Computational Biology (BCB). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Forensic Science Program Director, and governed by an interdepartmental Forensic Science Program Committee.

Course Work

The program offers all course work designated FSRC in the Courses chapter of this catalog.
Undergraduate Degree Programs

The Forensic Science Program oversees the undergraduate minor in Forensic Science.

Graduate Degree Programs

The Forensic Science Program oversees the MS and Graduate Certificate programs in Forensic Science.

Undergraduate Minor

Forensic Science Minor

Banner Code: FRSC

The minor in forensic science addresses the growing national and regional interest in forensics by introducing students to the technical, psychological, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, engineering, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry.

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in forensic science consists of 20 credits of course work.

Course Work

Foundation Science Courses (8 credits from the following):

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
  and
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- PHYS 160 - University Physics I Credits: 3
  and
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 243 - College Physics Credits: 3
  and
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
  and
• PHYS 246 - College Physics Lab Credits: 1
• PHYS 260 - University Physics II Credits: 3
  and
• PHYS 261 - University Physics II Laboratory Credits: 1

Forensic Science Courses (6 credits from the following):

• FRSC 420 - Forensic Toxicology Credits: 3
• FRSC 440 - Forensic Chemistry Credits: 3
• FRSC 460 - Forensic DNA Sciences Credits: 3

Supporting Courses (3 credits from the following):

• PSYC 231 - Social Psychology Credits: 3
• SOCI 301 - Criminology Credits: 3
• ADJ 100 - Introduction to Criminal Justice Credits: 3
• ADJ 400 - Applied Criminal Psychology Credits: 3

Electives (3 credits):

• Students select one additional class from the above lists of Forensic Science Courses and Supporting Courses

Total: 20 credits

Master's Degree

Forensic Science, MS (pending SCHEV approval)

Banner Code: SC-MS-FRSC

The interdisciplinary MS program in Forensic Science is designed to train students in the technical and legal aspects of the field, and it is especially relevant for the many area professionals holding positions in government and private laboratories specializing in the analytical investigation of criminal and terrorist activities. Graduates will be qualified to work in high-technology forensics
laboratories that analyze and interpret a wide variety of evidence and data in support of investigations and prosecutions. The demand for graduates with these skills is especially strong in the Northern VA region, where several new FBI and police forensics labs are being built or expanded.

The degree requires 21 credits of core courses covering crime scene analysis and fundamental forensic concepts, and an additional 6-9 credits of forensic science electives. Students also complete either a 3 credit research project or a 6 credit MS thesis for a total of 33 program credits. A unique element of the program is the “Forensics Capstone Course,” which is taken by all students in the program. In this class, students will combine their skills as members of interdisciplinary investigation teams as they analyze “real world” crime scenes.

The curriculum outlined below has been designed to meet the standards of the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Science. Students enrolled in this professional MS program are charged at a differential (premium) tuition rate, and therefore they may not enroll concurrently in any other graduate degree program or certificate program offered by COS, with the exception of the graduate certificate program in Forensics. However students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

**Admission Requirements**

Applicants to the Forensic Science MS program should hold a BA or BS degree in biology, chemistry, or a related field from an accredited university with a minimum GPA of 3.00. Applicants should submit a completed GMU graduate application, official score reports for the GRE-GEN exam, three letters of recommendation, two copies of official transcripts from each institution of higher learning attended, a current resume, a Virginia Domicile Classification form, and an official report of TOEFL (foreign nationals only).

**Degree Requirements**

The MS program in Forensic Science requires a total of 33 credit hours, comprising traditional 3-credit lecture courses (many with laboratory components), a seminar course, and a research project or thesis. The coursework is divided into forensics core courses and forensics electives. Students must complete 21 credits of core courses and 9 credits of forensic science electives; those undertaking the 6-credit thesis option take only 6 credits of electives.

An important element of the program is the “Forensics Capstone Course,” in which students combine their skills as members of multidisciplinary investigation teams in order to analyze “real world” crime scenes. This course will demonstrate in practice how students combine skills in the scientific/quantitative analysis and legal/anthropological areas to understand the nuances of the evidence presented at an actual crime scene. Waivers of specific course requirements will be considered for students who have taken equivalent courses elsewhere or have substantial practical experience in the subject areas covered by the particular course. Students complete 33 credits as follows:

**Forensics Core Courses (21 credits):**

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Crime Scene Analysis Credits: 3
- FRSC 520 - Toxicology Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 540 - Chemical Analysis Credits: 3
- FRSC 600 - Forensics Seminar Credits: 1 (taken 3 times)
- FRSC 690 - Forensics Capstone Course Credits: 3

**Forensics Electives (6 or 9 credits):**
• FRSC 550 - Issues in Forensic Anthropology Credits: 3
• FRSC 560 - Forensic DNA Sciences Credits: 3
• BINF 630 - Bioinformatics Methods Credits: 3
• BINF 633 - Molecular Biotechnology Credits: 3
• BINF 639 - Introduction to Biometrics Credits: 3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 761 - Dispersal Patterns of Biological Agents Credits: 3
• JLCP 760 - Crime and Crime Policy Credits: 3

Research Component (3 or 6 credits):

Students completing the 6 credit thesis option take only 6 credits of Forensics Electives.

• FRSC 610 - Forensics Research Project Credits: 1-3
• FRSC 799 - Master’s Thesis Credits: 1-6
  Note: students completing the 6 credit thesis option take only 6 credits of electives

Total: 33 credits

Master's Level Certificate

Forensics Graduate Certificate

Banner Code: SC-CERG-FORS

This collegewide interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics. Students enrolled in the forensic science concentration obtain the specific scientific skills necessary for laboratory employment in the field. Students enrolled in the general forensics concentration obtain a more general background in the field with a focus on criminal law and anthropology. At the time of completion, depending on the concentration, students will be able to

• Understand the basic principles of forensics.
• Perform a general crime scene analysis.
• Develop DNA profiles and interpret results of toxicological studies.
• Apply fundamental legal and anthropological concepts.
• Work collaboratively in interdisciplinary groups.

Admission Requirements
Applicants to the forensic science concentration should hold a BA or BS degree in biology or chemistry from an accredited university with a minimum GPA of 3.00. Applicants to the general forensics concentration should hold a BA or BS degree from an accredited university with a minimum GPA of 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS because this certificate program will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

**Program Requirements**

The certificate in forensics requires a total of 18 credits, comprising six 3-credit courses. A unique element of the program is the Forensics Capstone Course, which is shared by the two concentrations. In this class, students from the two concentrations will combine their skills as members of interdisciplinary investigation teams as they analyze a real-world crime scene. This unique course will demonstrate in practice how students with skills in the scientific/quantitative analysis or legal/anthropological areas can combine forces to understand and interpret the nuances of the evidence presented at an actual crime scene. The curriculum requirements for each concentration are listed below:

**Certificate Requirements**

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Crime Scene Analysis Credits: 3

▲ **Forensic Science Concentration (FRSC)**

**Required Courses (12 credits):**

- FRSC 520 - Toxicology Credits: 3
- FRSC 540 - Chemical Analysis Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3
  or
- BINF 637 - Forensic DNA Sciences Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3

Total: 18 credits

▲ **General Forensics Concentration (FRSG)**
Required Courses (12 credits):

- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 570 - Introduction to Biochemical Forensics Credits: 3
- FRSC 690 - Forensics Capstone Course Credits: 3

Total: 18 credits

Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212
Web: ggs.gmu.edu

Faculty

Professors: Agouris, Di, Falconer, Haack, Taylor, Waters, Wong
Associate professors: Beach, Chiu, Curtin, Houser, Qu, Stefanidis, R. Yang
Assistant professors: Cervone, Kronenfeld, Leslie, Manca, Rice, Sun, C. Yang, W. Yang, Zolnik
Research or contract professors: Gomez, Pilon, Self
Term instructors: Boudinot, Hallden

Course Work

This department offers all courses designated EOS and GEOG in the Courses chapter of this catalog.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GEOG 415. Students majoring in Global and Environmental Change fulfill this requirement by successfully completing EOS 304.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

PhD Studies in Other Programs
The department participates in other programs that provide opportunities for geographical, environmental, and earth science research. A popular example is the Environmental Science and Public Policy PhD Program where faculty members serve as both dissertation committee members and chairs. Geographic studies fit well with many issues related to public policy, planning, conservation, and sustainable development. Program description and degree regulations are listed under the Department of Environmental Science and Policy.

The department also participates in the Public Policy PhD Program, along with some of the university’s leading geographers who are members of the School of Public Policy. In addition, geography and geoinformation science faculty members provide joint supervision and serve as committee members to support those pursuing research primarily geographic in nature. Program description and degree regulations can be found under the School of Public Policy listing. Several departments participate in supervisory committees providing a rich opportunity for students to expand their interdisciplinary interests with these departments.

Undergraduate Degree

Geography, BA

Banner Code: SC-BA-GEOG

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in geography must complete additional college requirements for the BA degree in COS. Candidates for a degree in geography must also complete 28 credits of geography courses with a minimum GPA of 2.00 in addition to 18 credits of electives.

Degree Requirements

Core courses (16 credits):

- GEOG 102 - Physical Geography Credits: 3
- GEOG 103 - Human Geography Credits: 3 (GEOG 103 fulfills the university requirement in social science)
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 415 - Seminar in Geography Credits: 3

Systematics, applications, and regional courses (12 credits):

Choose from the following:

- GEOG 301 - Political Geography Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- GEOG 305 - Economic Geography Credits: 3
- GEOG 308 - Field Mapping Techniques Credits: 3
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOG 412 - Aerial Photography Interpretation Credits: 3
Electives (at least 18 credits):

- 18 or more credits consisting of an approved double major, disciplinary minor, interdisciplinary minor, or certificate, or any other coherent 18-credit (minimum) package of courses approved by the advisor and the department chair. No more than 7 credits used to meet the 28-credit requirement may be used to meet this requirement. (Some of these courses may fulfill university-wide general education or college-level requirements.)

Geography, BS

Banner Code: SC-BS-GEOG

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, candidates for a BS degree in geography must complete the following with a minimum GPA of 2.00 in the 46 credits of geography courses in the first group.

Degree Requirements

46 credits in geography, including:

16 credits of core courses:

- GEOG 102 - Physical Geography Credits: 3
- GEOG 103 - Human Geography Credits: 3 (fulfills the university requirement in social science)
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 415 - Seminar in Geography Credits: 3

12 credits of systematic and regional courses, chosen from:

(Some of the regional courses fulfill the college-level, non-Western culture requirement.)

- GEOG 301 - Political Geography Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- GEOG 305 - Economic Geography Credits: 3
- Regional GEOG courses at the 300 level or above

12 credits of applications and regional courses:
• GEOG 311 - Introduction to Geographic Information Systems Credits: 3
• GEOG 411 - Advanced Digital Cartography Credits: 3
• GEOG 412 - Aerial Photography Interpretation Credits: 3
and one of the following two courses:
• GEOG 416 - Satellite Image Analysis Credits: 3
  or
• GEOG 463 - Applied Geographic Information Systems Credits: 3

6 credits of electives:

• 6 additional credits of geography electives, which may also include an internship (GEOG 480) approved by the program advisor before enrollment

25 or 26 credits of required science, mathematics, statistics, and computer science courses:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
  (fulfills the university quantitative reasoning requirement)
• STAT 250 - Introductory Statistics I Credits: 3
• IT 103 - Introduction to Computing Credits: 3
  (fulfills the university information technology proficiency requirement)
  plus either:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• GEOL 317 - Geomorphology Credits: 4
  or
• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4
• BIOL 377 - Applied Ecology Credits: 3
  (fulfills the university general education requirement in natural science)

Global and Environmental Change, BS

Banner Code: SC-BS-GLEC

This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. In addition, it emphasizes the dynamic and changing Earth systems and the use of Earth observing and remote sensing and related geoinformation technologies in detecting changes. It is jointly offered with the Department of Environmental Science and Policy (esp.gmu.edu).

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. Through the course work listed below, global and environmental change majors satisfy university-wide general education requirements in natural science, quantitative reasoning, information technology, global understanding, social science, and synthesis:
Degree Requirements

Two required ecosphere core courses (8 credits):

- students take either the EOS sequence:
  - EOS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
  - EOS 122 - Dynamic Geosphere and Ecosphere Credits: 4
- or the EVPP sequence:
  - EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
  - EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Four required core courses in global and environmental change (12-13 credits):

- EOS 304 - Population Dimensions of Global Change Credits: 3
- EOS 353 - Observations of the Earth and Its Climate Credits: 3
- EOS 305 - Global Environmental Hazards Credits: 3
  or
- GEOL 305 - Environmental Geology Credits: 3
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
  or
- BIOL 312 - Biostatistics Credits: 4

Four required courses in geosphere and atmosphere (13-14 credits):

- either
  - GEOL 101 - Introductory Geology I Credits: 4
    or the sequence
  - PHYS 243 - College Physics Credits: 3
  - PHYS 244 - College Physics Lab Credits: 1

plus 3 courses from:

- EOS 310 - Severe and Unusual Weather Credits: 3
- EOS 312 - Physical Climatology Credits: 3
- EOS 320 - Air Pollution Credits: 3
- GEOG 309 - Introduction to Meteorology and Climate Credits: 3
- GEOG 399 - Selected Topics in Geography Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- GEOL 306 - Soil Science Credits: 3
- GEOL 309 - Introduction to Oceanography Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 1-4
Four required courses in ecosphere and sociosphere (12-13 credits):

Choose either
- EVPP 377 - Applied Ecology Credits: 3
  or
- EOS 321 - Biogeography: Space, Time and Life Credits: 3
  plus 1 of these three courses
- GLOA 101 - Introduction to Global Affairs Credits: 3
- GEOG 101 - Major World Regions Credits: 3
- CEIE 100 - Environmental Engineering around the World Credits: 3
  and 1 of these two courses
- GEOG 103 - Human Geography Credits: 3
- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3

and 1 from:
- BIOL 318 - Conservation Biology Credits: 3
- BIOL 345 - Plant Communities Credits: 4
- BIOL 449 - Marine Ecology Credits: 3
- EOS 322 - Issues in the Global Change Credits: 3
- EOS 306 - Sustainable Development Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- GEOG 303 - Conservation of Resources and Environment Credits: 3

Two required courses in applications and techniques of detecting global change, choose two from (6 credits):

- EOS 303 - GIS Applications for Earth Systems Credits: 3
- EOS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- EOS 410 - Introduction to Hyperspectral Imaging Credits: 3
- EOS 455 - Environmental Impact Assessment Credits: 3
- EOS 495 - Senior Research Credits: 3
- GEOG 412 - Aerial Photography Interpretation Credits: 3
- GEOG 416 - Satellite Image Analysis Credits: 3
- GEOG 463 - Applied Geographic Information Systems Credits: 3
- GEOL 303 - Field Mapping Techniques Credits: 3

Two required supporting sciences sequence courses beyond general education requirements (8 credits):

  take one of the sequences
Four required supporting mathematics and IT courses (14 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
- IT 103 - Introduction to Computing Credits: 3

General electives

- General electives (27–31)

Note:

In meeting the above requirements, students may choose a focus in environmental or global change.

Undergraduate Minor

Geographic Information Systems Minor

Banner Code: GIS

Course Work
To receive this minor, students must complete 18 or 19 credits in geography beyond the prerequisite of GEOG 102 or 103, with a minimum GPA of 2.00:

**Four required courses (12 credits):**

- GEOG 110 - Maps and Mapping Credits: 3
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOG 463 - Applied Geographic Information Systems Credits: 3

**Two elective courses chosen from (6–7 credits):**

- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 411 - Advanced Digital Cartography Credits: 3
- GEOG 412 - Aerial Photography Interpretation Credits: 3
- GEOG 416 - Satellite Image Analysis Credits: 3

**Note:**

With departmental permission, one course with significant geographic information systems (GIS) content may be substituted for one of the above. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

**Total: 18-19 credits**

**Geography Minor**

**Banner Code: GEOG**

**Course Work**

To receive the minor, students must complete 18 credits in geography, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

**Two core courses (6 credits):**

- GEOG 102 - Physical Geography Credits: 3 (nonlaboratory natural science credit)
- GEOG 101 - Major World Regions Credits: 3 (fulfills the university requirement in global understanding)
- GEOG 103 - Human Geography Credits: 3 (fulfills the university requirement in social science)
Four additional courses (12 credits):

Classes at the 300 and 400 level, including one systematic course and one regional course from the following lists.

**Systematic:**
- GEOG 301 - Political Geography Credits: 3
- GEOG 303 - Conservation of Resources and Environment Credits: 3
- GEOG 304 - Geography of Population Credits: 3
- GEOG 305 - Economic Geography Credits: 3
- GEOG 306 - Urban Geography Credits: 3
- GEOG 309 - Introduction to Meteorology and Climate Credits: 3

**Regional:**
- GEOG 315 - Geography of the United States Credits: 3
- GEOG 316 - Geography of Latin America Credits: 3
- GEOG 320 - Geography of Europe Credits: 3
- GEOG 325 - Geography of North Africa and the Middle East Credits: 3
- GEOG 330 - Geography of the Soviet Succession States Credits: 3
- GEOG 333 - Issues in Regional Geography Credits: 1-6
- GEOG 380 - Geography of Virginia Credits: 3

**Note:**

For policies governing all minors, see the Academic Policies section of this catalog.

Total: 18 credits

---

**Master's Degree**

**Earth Systems Science, MS**

**Banner Code:** SC-MS-ESSC

This interdisciplinary master’s program is offered jointly by the Department of Geography and Geoinformation Science and the Department of Environmental Science and Policy. The program addresses the growing demand for trained professionals in Earth systems science and applications. The degree emphasizes a research-oriented, global systems approach to studying the atmosphere, hydrosphere, and lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation and quantitative analysis of Earth systems. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools. Students are encouraged to undertake an optional master’s thesis for more in-depth studies or a research project. In the latter case, students must pass a comprehensive exam.

**Admission Requirements**
Applicants should have a BS degree in Earth, environmental, or physical science. Previous course work should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. They should have a minimum GPA of 3.00 in their undergraduate degree. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all foreign applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

### 9 credits of Earth science core:

- CSI 655 - Atmospheric Physics I Credits: 3
  or
- PHYS 575 - Atmospheric Physics I Credits: 3
- EOS 656 - The Hydrosphere Credits: 3
  or
- EVPP 652 - The Hydrosphere Credits: 3
- EOS 657 - The Lithosphere Credits: 3
  or
- GEOL 601 - The Lithosphere Credits: 3

### 3 credits of Earth observation courses:

- EOS 753 - Observations of the Earth and Its Climate Credits: 3
  or
- GEOG 579 - Remote Sensing Credits: 3

### 3 credits of quantitative techniques courses:

- CSI 654 - Data and Data Systems in the Physical Sciences Credits: 3
- EOS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
  or
- GEOG 585 - Quantitative Methods Credits: 3

### 3 credits of human and biological perspectives courses, one of:

- EOS 704 - Spatial Analysis and Modeling of Population Credits: 3
- EOS 721 - Biogeography Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
• EVPP 636 - Gender, Race, and the Natural World Credits: 3
• GEOG 575 - Reconstructing Past Environments: Seminar in Geoarchaeology Credits: 3

3 credits of colloquium/seminar:

• EOS 792 - Seminar in Earth Systems Science Credits: 2
• EOS 900 - Research Colloquium in Earth Systems and Geoinformation Sciences Credits: 1

3–6 credits of research:

• EOS 798 - Research Project Credits: 3
  or
• EOS 799 - Master's Thesis Credits: 1-6

General electives

• 3-6 credits of general electives

Total: 30 credits

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

The focus of this program is to prepare students for careers in geography, remote sensing, and GIS and its increasing applications in diverse fields, as well as cartography, visualization, and modeling. This expertise is useful to civil and defense federal agencies, state and local government agencies, private corporations, and educational institutions. Courses concentrate on the techniques of compilation, display and analysis of spatial data, and their applications. Students are also encouraged to select internships as part of their program. More than 400 of our alumni from this program have entered employment in the Washington, D.C., area since 1978.

Research Facilities

The department’s laboratories house SUN workstations, PCs, and Macs with multiple input and output devices to support ARCGIS, ARCMAP, ARCVIEW, IDRISI, ERDAS, and other cartography, GIS, and image-processing software packages. In addition, the department houses an extensive collection of spatial data in different formats. Enriching the program is a network of alumni, students, guest lecturers, and adjunct faculty who work in geography-related organizations in the greater Washington, D.C., area. Specialized instructional space for geographic information science is housed in Innovation Hall on the Fairfax Campus. The department also is home to the Center of Excellence in GIS.

Admission Requirements
In addition to meeting all admission requirements for graduate study at Mason, applicants should have a bachelor’s degree in geography, cartography, or equivalent. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE aptitude scores, three letters of recommendation, transcripts of all college course work, and a statement of interest in the degree. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required for all foreign applicants. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

Degree Requirements

Students must complete 30 graduate credits to include 3 to 6 credits of thesis or 36 graduate credits without a thesis. If the nonthesis option is selected, students are required to pass a comprehensive exam.

Four required courses (12 credits):

- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 579 - Remote Sensing Credits: 3
- GEOG 585 - Quantitative Methods Credits: 3
- GEOG 680 - Seminar in Thought and Methodology Credits: 3

Thesis or Comprehensive Exam:

- 3–6 credits of thesis (thesis option)
- Comprehensive exam (nonthesis option)

Electives (12–24 credits):

- 12–15 credits (thesis option) of elective courses in geography
  or
- 24 credits (nonthesis option) of elective courses in geography

Note:

Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Total: 30 or 36 credits

Geoinformatics and Geospatial Intelligence, MS ■ (pending SCHEV approval)

Banner Code: SC-MS-GEOI
The new MS program in geoinformatics and geospatial intelligence (GGI) addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data, in order to identify and monitor complex events and phenomena that manifest themselves over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

The MS program in geoinformatics and geospatial intelligence is designed to expose students to fundamental theoretical principles and practical applications involving:

- Geographic Information Science
- Digital image analysis as it applies to geoinformatics and geospatial intelligence
- Computational principles for geoinformatics and intelligence

The curriculum structure of the program reflects these three educational components. The GGI MS degree requires a minimum of 33 credits, including a 3-credit MS thesis.

**Admission Requirements**

Applicants to the MS program in geoinformatics and geospatial intelligence should hold a BA or BS degree in a discipline related to the program’s theme from an accredited university, with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program’s requirements, remedial or preparatory courses tailored to student’s needs may be recommended. Applicants must submit a completed GMU graduate application, along with official transcripts, resume, VA domicile classification form (when applicable), official GRE score reports, and TOEFL scores if they are foreign nationals.

**Degree Requirements**

The GGI MS degree requires 33 credit hours, comprising 10 courses plus a 3-credit MS thesis. The courses include 7 mandatory core courses and 3 electives to be selected from a list of offerings (and approved by the program coordinator).

**Core Courses (21 credits):**

- GEOG 550 - Geospatial Science Fundamentals Credits: 3
- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 664 - Spatial Data Structures Credits: 3
- EOS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- EOS 685 - Capstone Course in Geoinformatics Credits: 3
- EOS 758 - Earth Image Processing Credits: 3
- EOS 787 - Scientific Data Mining for Geoinformatics Credits: 3

**Thesis (3 credits):**

- EOS 799 - Master's Thesis Credits: 1-6 (3 credits)

**Electives (9 credits):**
Students select three courses from the groups below, with no more than two from a single group (i.e. courses are taken from at least two groups):

**Image Analysis:**

- GEOG 562 - Photogrammetry Credits: 3
- GEOG 579 - Remote Sensing Credits: 3
- EOS 740 - Hyperspectral Imaging Systems Credits: 3
- EOS 759 - Topics in Earth Systems Science Credits: 3
- EOS 760 - Advanced Remote Sensing Applications Credits: 3

**Geographic Information Science (GIS):**

- GEOG 533 - Issues in Regional Geography Credits: 1-6
- GEOG 631 - Spatial Agent-based Models of Human-Environment Interactions Credits: 3
- GEOG 653 - Geographic Information Analysis Credits: 3
- GEOG 795 - Seminar in Regional Analysis Credits: 3
- EOS 771 - Algorithms and Modeling in GIS Credits: 3
- EOS 772 - Distributed Geographic Information Systems Credits: 3
- EOS 791 - Advanced Spatial Statistics Credits: 3

**Computational Geoinformatics:**

- EOS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- EOS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- EOS 771 - Algorithms and Modeling in GIS Credits: 3
- EOS 773 - Interoperability of Geographic Information Systems Credits: 3

Total: 33 credits

**Master's Level Certificate**

**Geographic Information Sciences Graduate Certificate**

**Banner Code: SC-CERG-GISC**

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. Graduates have typically been employed in major mapping programs of the Department of the Interior and in the related land management agencies at the federal and state level. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.
Admission Requirements

Applicants should submit an application for graduate studies and must meet all requirements for graduate study at Mason. All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply, but students with a background in one of the physical sciences (atmospheric science, hydrology, or geology), geography, environmental science, or engineering are particularly well-suited to undertake this program.

Students with no knowledge of geospatial technology are required to take GEOG 550 prior to admission to the program.

Certificate Requirements

Students must successfully complete 15 graduate credits, distributed as follows:

9 credits of required core courses:

- GEOG 553 - Geographic Information Systems Credits: 3
  or
- CEIE 510 - Geographic Information Systems in Engineering Credits: 3

- GEOG 563 - Advanced Geographic Information Systems Credits: 3
  or
- EOS 771 - Algorithms and Modeling in GIS Credits: 3

- GEOG 653 - Geographic Information Analysis Credits: 3

6 credits of electives chosen from:

- GEOG 505 - Transportation Geography Credits: 3
- GEOG 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GEOG 556 - Automated Cartographic Generalization Credits: 3
- GEOG 655 - Map Design Credits: 3
- GEOG 664 - Spatial Data Structures Credits: 3
- EOS 772 - Distributed Geographic Information Systems Credits: 3
- EOS 773 - Interoperability of Geographic Information Systems Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3

Note:

Other courses may be used as electives with prior written approval of the department.

Total: 15 credits
Geospatial Intelligence Graduate Certificate

Banner Code: SC-CERG-GI

This graduate certificate program is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations.

Admission Requirements

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate’s theme from an accredited university with a minimum GPA of 3.00. Applicants must submit a completed Mason graduate application, along with official transcripts, résumé, Virginia domicile classification form, and TOEFL scores if they are foreign nationals. GRE scores and letters of recommendation are not required but will considerably strengthen an application, if available.

Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student’s needs. Students may not pursue this certificate concurrent with any other graduate degree programs or certificates offered by COS (because this certificate will charge students a differential tuition rate). However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently. Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Certificate Requirements

The Geospatial Intelligence (GI) certificate requires a total of 18 credits, or 6 courses. These comprise five mandatory core courses and one elective. The mandatory core courses reflect the three key science emphases areas of this program, namely geospatial image analysis, spatial analysis, and information technology, as reflected in the following list of mandatory core courses:

- EOS 758 - Earth Image Processing Credits: 3
- GEOG 553 - Geographic Information Systems Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- EOS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- EOS 685 - Capstone Course in Geoinformatics Credits: 3
- one 3-credit elective selected in consultation with advisor

Total: 18 credits

Remote Sensing and Earth Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP
The Certificate in Remote Sensing and Earth Image Processing Program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. The certificate requires students to complete 15 credits of EOS graduate courses. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

This professional certificate program charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from an accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Certificate Requirements

Required Core Courses (12 credits):

- EOS 740 - Hyperspectral Imaging Systems Credits: 3
- EOS 753 - Observations of the Earth and Its Climate Credits: 3
- EOS 757 - Techniques and Algorithms in Earth Observing and Remote Sensing Credits: 3
- EOS 758 - Earth Image Processing Credits: 3

Elective Courses (3 credits):

Choose one of the following or another course approved by coordinator

- EOS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- EOS 756 - Physical Principles of Remote Sensing Credits: 3
- EOS 760 - Advanced Remote Sensing Applications Credits: 3
- EOS 840 - Hyperspectral Imaging Applications Credits: 3
- GEOG 562 - Photogrammetry Credits: 3
- GEOG 580 - Digital Remote Sensing Credits: 3

Total: 15 credits

Doctoral Degree

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

The innovative PhD in Earth Systems and Geoinformation Sciences (ESGS) Program is based on the integration of the scientific disciplines in geosystems, geosciences, and geography, with the two slightly more technology-oriented scientific disciplines in geoinformation sciences: remote sensing, and geographic information systems (GIS). Graduates from the ESGS doctoral program will be qualified to serve as lead scientists in a wide range of activities involving geosciences, geography, GIS, and remote sensing.

The continual expansion of the NASA Earth observation satellite constellation, the development and expansion of the geospatial data infrastructure at federal agencies, and the need to analyze these Earth-oriented data to achieve environmental and economic objectives ensure a constant need in the foreseeable future for qualified scientists in these fields. Students receive broad-based training in the geosciences and geography, as well as concentrated courses in computation and geoinformation sciences.

The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today’s research arena. In addition, students also receive training in teaching, qualifying them to join academic units in more traditional disciplinary and instruction oriented settings or in multidisciplinary programs.

Admission Requirements

This program is intended for graduates who hold a BS or BA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing and Earth observing, hydrology, oceanography, geography, or a related field with a minimum GPA of 3.00. Applicants should have knowledge of calculus and a working proficiency with a computer programming language.

Knowledge of mathematics through ordinary differential equations is preferred. Interested applicants should contact the academic coordinator or the GGS chair for more specific advice. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center.

Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog. The curriculum consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program as long as those credits have not been applied toward a previous degree.

All students are required to take 18 credits of courses selected from a set of three core areas: computational-quantitative,
geosciences-geography, and geoinformation. Students also take 6 credits of courses in one of the four areas of emphasis listed below:

- Geosciences (GSC)
- Geography (GEOG)
- Remote Sensing and Earth Observation (RS)
- Geographic Information Systems (GIS)

Students also have the option of taking courses from two or more emphasis areas, subject to the program director’s approval. Additional requirements include a single credit of colloquium taken three times, and electives relevant to the student’s focus.

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved, the student is formally advanced to doctoral candidacy. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

**Computational-Quantitative Core (6 credits):**

Choose from the following:

- CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
- CSI 700 - Numerical Methods Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3
- EOS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- EOS 791 - Advanced Spatial Statistics Credits: 3
- GEOG 585 - Quantitative Methods Credits: 3

**Geosciences-Geography Core (6 credits):**

Choose from the following:

- EOS 657 - The Lithosphere Credits: 3
- EOS 704 - Spatial Analysis and Modeling of Population Credits: 3
- EOS 721 - Biogeography Credits: 3

- CSI 655 - Atmospheric Physics I Credits: 3
  or
- EOS 670 - Introduction to Atmosphere & Weather Credits: 3

- EOS 656 - The Hydrosphere Credits: 3
  or
- EOS 725 - Advanced Hydrosphere Credits: 3
Geoinformation Sciences Core (6 credits):

Choose one course from the GIS group:

- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 563 - Advanced Geographic Information Systems Credits: 3
- GEOG 653 - Geographic Information Analysis Credits: 3
- EOS 771 - Algorithms and Modeling in GIS Credits: 3

and one course from the Remote Sensing group:

- GEOG 579 - Remote Sensing Credits: 3
- GEOG 580 - Digital Remote Sensing Credits: 3
- EOS 753 - Observations of the Earth and Its Climate Credits: 3
- EOS 756 - Physical Principles of Remote Sensing Credits: 3
- EOS 758 - Earth Image Processing Credits: 3

Emphasis Courses (6 credits):

Two courses selected from those listed below for the desired area of emphasis. Students choosing not to select a specific area will be assisted by their faculty advisor in developing a curriculum plan by combining courses from two or more of the following areas (the curriculum plan must be approved by the program director):

Geosciences (GSC):

- EOS 656 - The Hydrosphere Credits: 3
- EOS 721 - Biogeography Credits: 3
- EOS 725 - Advanced Hydrosphere Credits: 3
- GEOG 670 - Applied Climatology Credits: 3
- CSI 655 - Atmospheric Physics I Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- GEOL 601 - The Lithosphere Credits: 3

Geography (GEOG):

- GEOG 503 - Problems in Environmental Management Credits: 3
- GEOG 505 - Transportation Geography Credits: 3
- GEOG 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GEOG 540 - Medical Geography Credits: 3
- GEOG 575 - Reconstructing Past Environments: Seminar in Geoarchaeology Credits: 3
- GEOG 585 - Quantitative Methods Credits: 3
- GEOG 674 - Environmental Impact Analysis Credits: 3
- GEOG 680 - Seminar in Thought and Methodology Credits: 3
- GEOG 785 - Geographic Field Work Credits: 3
- EOS 721 - Biogeography Credits: 3
- PUBP 810 - Regional Development and Transportation Policy Credits: 2-5
- PUBP 811 - Applied Methods in Regional Development and Transportation Policy Credits: 2-4
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 1-4

**Remote Sensing and Earth Observation (RS):**

- GEOG 562 - Photogrammetry Credits: 3
- GEOG 579 - Remote Sensing Credits: 3
- GEOG 656 - Terrain Mapping Credits: 3
- EOS 740 - Hyperspectral Imaging Systems Credits: 3
- EOS 753 - Observations of the Earth and Its Climate Credits: 3
- EOS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- EOS 756 - Physical Principles of Remote Sensing Credits: 3
- EOS 757 - Techniques and Algorithms in Earth Observing and Remote Sensing Credits: 3
- EOS 758 - Earth Image Processing Credits: 3

**Geographic Information Systems (GIS):**

- GEOG 553 - Geographic Information Systems Credits: 3
- GEOG 563 - Advanced Geographic Information Systems Credits: 3
- GEOG 590 - Selected Topics in Geography and Cartography Credits: 3
- GEOG 653 - Geographic Information Analysis Credits: 3
- GEOG 661 - Map Projections and Coordinate Systems Credits: 3
- GEOG 664 - Spatial Data Structures Credits: 3
- EOS 771 - Algorithms and Modeling in GIS Credits: 3
- EOS 772 - Distributed Geographic Information Systems Credits: 3
- EOS 773 - Interoperability of Geographic Information Systems Credits: 3

**Electives (21 credits):**

- 21 credits of approved electives

**Colloquium (3 credits):**

3 credits total, EOS 900 taken 3 times:

- EOS 900 - Research Colloquium in Earth Systems and Geoinformation Sciences Credits: 1
Dissertation Research (24 credits):

24 credits, with at least 12 credits in EOS 999:

- EOS 998 - Dissertation Proposal Credits: 1-12
- EOS 999 - Doctoral Dissertation Credits: 1-12

Total: 72 credits

Mathematical Sciences

Phone: 703-993-1460
Web: math.gmu.edu

Faculty

Professors: Alligood, Colonna, Fischer (chair), Kulesza, B. Lawrence, J. Lawrence, Levy, Morris, Polyak, Sachs, Saperstone, Sauer (COS Distinguished Scholar), Shapiro (undergraduate coordinator), Singman, Soltan, Walnut (graduate coordinator)

Associate professors: Agnarsson, Anderson, Gabel, Goldin, Kiley, Lamba, Lim, Lin, Sander, Seshaiyer, Wanner, Zoltek

Assistant professors: Emelianenko, Griva, Napoletani

Adjuncts: Crain, Gill, Lightbourne, Morse, Moumen, Nefessi, Roberts, Shaw, Wallace, Yazigi, Zampedro

Admin professional: O’Brien

Term instructors: Crossin, Goldman, Granfield, Matveev, Nuttall, O’Beirne

Affiliates: Loustaunau

Emeritus: Cabell

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or pursue a program focused on either actuarial mathematics or applied mathematics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Course Work

The Mathematical Sciences Department offers all course work designated MATH in the Courses chapter of this catalog.

Writing-Intensive Requirement
Mason policy requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290.

Math Tutoring Center

The department manages the Math Tutoring Center, which offers free tutoring for first- and second-year math courses (math.gmu.edu/tutorcenter.htm). Tutoring is given by advanced mathematics students and available on a drop-in basis with daytime and evening hours throughout the term.

Math Learning Center

The Math Learning Center (math.gmu.edu/mathlearningcenter.htm) for a small fee offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in Math 105, 106, 108, 110, 111, 112, or 125.

Honors Program in Mathematics

Mathematics majors who have maintained a GPA of at least 3.5 in Mathematics courses and a GPA of 3.5 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite. Admission to the program will be monitored by the undergraduate committee. To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.5 in mathematics courses and successfully complete MATH 405 and 406 with an average GPA of at least 3.5 in these two courses.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Certificate in College Teaching

A student enrolled in the MS or PhD program in mathematics who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the Higher Education Program’s College Teaching Graduate Certificate, offered through the College of Humanities and Social Sciences (LA-CERG-CTCH).

Students must complete 18 credits as follows: CTCH 602, 603, 604 or 605 (or equivalents with a specific disciplinary focus), 685, and 6 credits of CTCH electives, approved by the program director for higher education. Credit can be earned for CTCH 685 (practicum) by working one semester as a graduate teaching assistant in the Mathematics Department.

Mathematics, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Mathematics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.
Undergraduate Degree

Mathematics, BA

Banner Code: SC-BA-MATH

Students may select an optional concentration in mathematics education; students who do not select this concentration study traditional mathematics.

Students must fulfill all requirements for bachelor's degrees. In addition to satisfying university-wide general education requirements and requirements for the BA degree in COS, students must present the following:

Degree Requirements

Core Courses (26 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Vector Calculus Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3

Electives (12 credits):

- 12 credits of electives in MATH numbered above 300

Concentrations

Students may select an optional concentration in education.

▲ Concentration in Education (MTHE)

Students selecting the education concentration take the following coursework in place of the 12 credits of MATH electives listed above.
• EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
• MATH 302 - Foundations of Geometry Credits: 3
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 321 - Abstract Algebra Credits: 3
• MATH 351 - Probability Credits: 3

Note:

The above courses satisfy the university-wide requirement in quantitative reasoning. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.

Mathematics, BS

Banner Code: SC-BS-MATH

Students may select an optional concentration in actuarial mathematics (AMT), applied mathematics (ACTM), or education (MTHE). Students who do not select a concentration study traditional mathematics.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in mathematics must present the following. (These courses satisfy the university-wide requirement in quantitative reasoning and natural sciences. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.)

Degree Requirements

• Program and concentration-specific requirements

Mathematics Core (23 credits):

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3

• MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
• MATH 215 - Vector Calculus Credits: 3

• MATH 214 - Elementary Differential Equations Credits: 3
  or
• MATH 216 - Theory of Differential Equations Credits: 3

• MATH 290 - Introduction to Advanced Mathematics Credits: 3
• MATH 322 - Advanced Linear Algebra Credits: 3

Science (8 credits):

For all students, a one-year sequence of a laboratory science selected from one of the following:

Biology sequence:
• BIOL 213 - Cell Structure and Function Credits: 4
and
• BIOL 303 - Animal Biology Credits: 4
or
• BIOL 304 - Plant Biology Credits: 4

Chemistry sequence:
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4

Geology sequence:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4

Physics sequence:
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Computational Skills (4 or 7 credits):

• All students take  CS 112 - Introduction to Computer Programming Credits: 4
Students in the actuarial concentration also take:
• STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Additional Mathematics (24 credits):

• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 316 - Advanced Calculus II Credits: 3
• MATH 321 - Abstract Algebra Credits: 3
or
• MATH 431 - Topology Credits: 3
• 12 credits of course work above MATH 300
Departmental Non-mathematical Requirements

- Students with no selected concentration or those with the applied mathematics concentration must select a second year of science from one of the following three options: a second sequence from the list above; 6 credits from more advanced courses in biology, chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major); or the 4-credit option PHYS 262, 263.
- Students with an actuarial concentration must have 3 credits of ACCT 203 and 6 credits of economics, including ECON 103 (3 credits) and either ECON 306 or 310, or FNAN 321. (The Economics Department has agreed to waive ECON 104 as a prerequisite for ECON 306 for mathematics majors.)
- The department recommends proficiency in French, German, or Russian.

Concentrations

Students may select an optional concentration in applied mathematics (AMT), actuarial mathematics (ACTM), or education (MTHE). Students selecting a concentration take the courses listed below instead of the 24 credits of additional mathematics taken by students without a concentration. The concentration requirements comprise 24 credits for the AMT and ACTM concentrations, and 33 credits for the MTHE concentration.

▲ Concentration in Applied Mathematics (AMT)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 413 - Modern Applied Mathematics I Credits: 3
- MATH 414 - Modern Applied Mathematics II Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- 6 credits of course work above MATH 300

▲ Concentration in Actuarial Mathematics (ACTM)

- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 444 - Deterministic Operations Research Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3
▲ Concentration in Education (MTHE)

- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- MATH 302 - Foundations of Geometry Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 351 - Probability Credits: 3
- one 3-credit course above MATH 300

General Comments

For math majors:

MATH 105, 106, 108, 110, 111, 112, 271, and 272 cannot be used as substitutes for any requirements of the major in mathematics.

For non-math majors:

- MATH 108, 110, and 111 are designed for students in the social and behavioral sciences.
- Liberal arts majors are advised to take MATH 106, 110, or 111.
- Students in the natural sciences who plan to do graduate work are advised to add courses from MATH 313, 314, 351, 352, 382, 441, 442, 446, and 447.

For both math majors and non-math majors:

- MATH 105, 106, 108, 110, 111, 112, 113 have a qualifying score on the Math Placement Test as a prerequisite. The Math Placement Test is given frequently; for the schedule, inquire at the department office or check the Math Department web site.
- Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (see below), or they may study and retake the test on their own. If they do not complete the relevant program in the Learning Center or do not achieve the necessary score after retaking the test, they are dropped from the course. Depending on their test scores, students who do not place into MATH 113 will be advised to take MATH 105 or visit the Math Learning Center to prepare for MATH 105.
- MATH 105 does not fulfill the university quantitative reasoning requirement.
- Students may not receive credit for both MATH 214 and 216; both MATH 213 and 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.
- After receiving a grade of C or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right.
Undergraduate Minor

Mathematics for School of Management Students Minor

Banner Code: MSOM

Course Work

To receive this minor, students must complete 20 credits with a minimum GPA of 2.00, including:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 351 - Probability Credits: 3

One course chosen from:

- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 554 - Financial Mathematics Credits: 3

Note:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 20 credits

Mathematics Minor

Banner Code: MATH
To receive a minor in mathematics, students must complete 21 credits that include a total of 8 hours of math that are not applied toward the major. These courses must have a minimum GPA of 2.00. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work

Five required courses (15 credits):

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Vector Calculus Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3

One math elective course (3 credits):

- One 3-credit math course that requires MATH 290 as a prerequisite

One general elective course (3 credits):

- One 3-credit math course at the 300 or 400 level, or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Note:

Students must earn a 2.00 or better in MATH 290 and the courses chosen to fulfill the second requirement.

Total: 21 credits

Bachelor's/Accelerated Master's Program

Mathematics, BS/Mathematics, Accelerated MS
This five-year degree program allows academically strong students to obtain a BS and MS by successfully completing 144 credits within five academic years and one summer. Well-prepared students are admitted to this program on completion of 90 credits, take selected graduate courses during their senior year, and are able to use up to 6 graduate credits to partially satisfy requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory graduate-level performance (3.00) in graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

Master's Degree

Mathematics, MS

Banner Code: SC-MS-MATH

The Department of Mathematical Sciences offers courses in pure and applied mathematics leading to the master of science degree in mathematics. The program offers a standard mathematics program and an emphasis in computational and applied mathematics.

Assistantships

A limited number of merit-based teaching assistant ships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistant ships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and Math Learning Center.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the MS degree must have taken an upper-division course in advanced calculus (equivalent to MATH 315) and an upper-division course in linear algebra (equivalent to MATH 322). Students intending to go into the computational and applied mathematics emphasis must have some computer knowledge.

Degree Requirements

Standard Program

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
- Six approved graduate courses (18 credits), at least four of which are MATH. All six courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee. Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (see below).
- Research and creative component (6 credits; see below)

Total: 30 credits
Emphasis in Computational and Applied Mathematics

The emphasis in computational and applied mathematics provides students with the analytical skills and background in computational techniques most relevant to the needs of business, industry, and government. The large number of high-technology firms, telecommunications firms, and government laboratories in the Washington, D.C., metropolitan area gives students an opportunity to gain practical experience and secure employment after graduation.

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
- or
- MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Analysis Credits: 3
- Four approved graduate courses (12 credits), at least two of which are MATH courses. All four courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee.
- Research/creative component (6 credits; see below)

Total: 30 credits

Research and Creative Component

A student may fulfill the research and creative component of the MS degree in any one of the following three ways:

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799. A thesis proposal and thesis are submitted in accordance with university rules. The student must give an oral defense of the thesis to the committee and the Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

- MATH 799 - Thesis Credits: 1-6

Paper Presentation Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved
by the full committee. The chosen material must be distinct from work done in fulfillment of course requirements. Students choosing this option take 6 additional credits of electives. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

Preliminary Exam for the PhD

The research and creative component of the MS degree can also be fulfilled by passing the preliminary written examination for the Mathematics PhD degree.

Master's Level Certificate

Actuarial Sciences Graduate Certificate

Banner Code: SC-CERG-ACTS

The certificate in actuarial sciences is designed to serve students and professionals in the Washington, D.C., area who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the Society of Actuaries (SOA) Exam FM (formerly Course 2), SOA Exam M (formerly Course 3), SOA Exam C (formerly Course 4), VEE for applied statistics (formerly part of Course 4), and Exam A-1 and EA-1A (for those pursuing EA designation from the U.S. Treasury). The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Preparation for the first exam is achieved in meeting the prerequisites for the certificate courses in the area of probability and statistics. Students enrolling in the actuarial sciences certificate program must complete the 6 course (18 credit) curriculum requirement described below.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue a certificate in the actuarial sciences must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203), a calculus-based course in probability (equivalent to MATH 351), and statistics (equivalent to MATH 352). Completion of the SOA Exam P is also sufficient preparation for the certificate program.

Certificate Requirements

Core Courses (12 credits):

- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3
Electives (6 credits from the following):

- MATH 653 - Actuarial Modeling III Credits: 3
- MATH 654 - Construction and Evaluation of Actuarial Models Credits: 3
- MATH 655 - Pension Valuation Credits: 3 (recommended only for students who wish to pursue a career as a pension actuary)
- any other elective course approved by the Graduate Committee

Total: 18 credits

Notes:

The graduate certificate course work provides preparation for SOA and CAS exams as follows. MATH 551 is the SOA VEE for Applied Statistics and is preparation for part of the CAS Exam 3. MATH 554 covers all of the SOA Exam FM material (as well as CAS Exam 2). MATH 555, 556, and 653 cover all of the Exam M material and much of the CAS Exam 3 as well as the EA1 exam. MATH 654 covers most of the SOA Exam C material (as well as CAS Exam 4). MATH 655 covers all of the EA2-A Exam material and some of the SOA Exam 8.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the certificate program in actuarial sciences and another graduate degree program in mathematics can count actuarial mathematics courses toward that degree according to the following rules:

- None of the actuarial mathematics courses MATH 551, 554, 555, 556, 653, 654, and 655 can count toward the PhD degree in mathematics.
- None of the actuarial mathematics courses MATH 551, 554, and 655 can count toward the MS degree in mathematics.
- Up to four of the actuarial mathematics courses MATH 555, 556, 653, and 654 can count toward the MS degree in mathematics provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one actuarial mathematics course from the list toward the MS degree. In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator.

Counting Actuarial Courses toward the Statistical Sciences MS Degree

A student enrolled in the certificate program in actuarial sciences and in the MS program in statistical science can count MATH 555 and 556 as approved non-STAT elective courses and can count MATH 653 and 654 as STAT electives when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department advisor.

Doctoral Degree

Mathematics, PhD
The Department of Mathematical Sciences offers a PhD in mathematics. The program begins with graduate course work and advanced seminars and culminates in a thesis consisting of original research in mathematics. The PhD program in mathematics is designed to train students as research mathematicians for careers in academia, government, and private industry.

Fellowships and Assistantships

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

Admission Requirements

It is expected that all applicants have a recent bachelor’s degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322), an upper-division course in advanced calculus (equivalent to MATH 315), and familiarity with basic group theory (such as presented in MATH 321) are encouraged to apply to the MS program in mathematics. Such students may subsequently apply to the PhD program when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants. GRE scores are recommended but not required.

Preliminary Written and Qualifying Exams

Students are required to take a preliminary written exam after completing the core courses, usually by the end of their second year. The exam is based on material presented in three of the four required courses (the student may choose which topic to exclude). These exams are offered two times a year. Students may take the exam as often as they like. A grade of “pass” on the preliminary written exam is sufficient to satisfy the creative component of the master’s degree in mathematics.

Students are required to take a qualifying exam after passing the preliminary written exam. This exam will have oral and written components. After passing the preliminary written exam, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam will cover the equivalent of approximately four courses of material from the major area and three courses from the minor area.

Dissertation and Committee

Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 (Doctoral Dissertation Proposal). The proposal must be approved by the thesis committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the department. After successfully completing this requirement, the student advances to doctoral candidacy.

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.
Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 12–24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed. Students must complete the following curriculum requirements:

Core courses (12 credits):

- MATH 621 - Algebra I Credits: 3
- MATH 631 - Topology I: Topology of Metric Spaces Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3

Preliminary Written Exam

Students are required to take a preliminary written exam based on material in three core courses of their choice.

Qualifying Exam

Students take a qualifying exam after passing the preliminary exam. The qualifying exam will have oral and written components.

Seminar (6–9 credits):

- MATH 795 - Graduate Seminar Credits: 1

Dissertation proposal and research (12–24 credits):

- MATH 998 - PhD Thesis Proposal Credits: 1-12
- MATH 999 - PhD Thesis Credits Credits: 1-12

Note:

All PhD students are required to take a 1-credit seminar (MATH 795) each semester. A student entering without a master’s degree in mathematics should expect to take a total of 8 to 9 credits of MATH 795. Portions of the preliminary written exam may be waived with approval of the graduate coordinator if the student enters the PhD program with a master’s degree in mathematics. Graduate mathematics courses taken elsewhere may be counted toward the degree either as transfer credit or through reduction of credit. Classes at the 500 level and actuarial classes MATH 653, 654, and 655 cannot be used for credit toward a PhD in mathematics.

Molecular and Microbiology
Faculty

Chair: Willett

Professors: Bailey (distinguished), Liotta, Petricoin, Popov, Soyfer (distinguished university), Willett

Associate professors: Baranova, Christensen, Fryxell, Grant, Royt

Assistant professors: Cox, van Hoek, Wu

Term assistant professors: Beck (associate chair), Coss, Fonduefe, Fox, Jarrar, Kocache, Madden, Otto, Pelayes

Adjunct faculty: Baker, McClintock, Pitt, Tondi

Emeritus: Isbister

Course Work

The department offers all course work designated BIOL, BIOS, and MTCH in the Courses chapter of this catalog.

Other Undergraduate Programs

The Molecular and Microbiology department works closely with and provides administrative input to the Biology Undergraduate Program, through which the BA and BS degrees in Biology are offered. Refer to the Biology Undergraduate Program section for more information on bachelors degrees in Biology.

Policy on Using Departmental Laboratories

Only authorized experiments and exercises may be carried out in any departmental research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program.
and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is completed.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE general exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the exam.

**Master's Degree**

**Biology, MS**

*Banner Code: SC-MS-BIOL*

This program provides advanced training for college graduates or professionals seeking careers in the biotechnology industry or biodefense, as well as more traditional careers in biomedical research, teaching, evolutionary biology, and animal biology. Master’s level concentrations are available in molecular biology (MOB); microbiology and infectious disease (MID); bioinformatics and computational biology (BCB), and systematics and evolutionary biology (SEB). Alternatively, students may choose the program in general biological sciences, which allows flexibility to specialize in additional areas.

**Admission Requirements**

Applicants must have a bachelor’s degree in biology or its equivalent, except for students who choose the BCB concentration. Students who choose the BCB concentration must have an undergraduate degree in any natural science, mathematics, engineering, or computer science. It is preferred that students who choose the BCB concentration have some undergraduate course work in cell biology, molecular biology, genetics, and biochemistry (two to four upper-division courses), plus some undergraduate course work in computer science (two to four courses that include substantial programming projects). Students without this background may be asked to remedy their deficiencies. Students who choose the concentration in microbiology and infectious disease must have a lecture and lab course in microbiology and a lecture course in biochemistry. All MS concentrations require a GPA of 3.00 in biology course work or in the last 60 credits of undergraduate study is required. Students must also submit three letters of recommendation and scores on the general GRE. Successful applicants usually score at least 1,100 on the verbal and quantitative sections of the GRE. Admission is contingent on acceptance by a faculty research advisor.

**Degree Requirements**

An advisory committee and the student work together to develop a program of study that best fits the student’s background and interests. At least one member of the committee must be a member of the Molecular and Microbiology Department. The student must submit a program of study to the program director for approval within the first 12 credits of graduate work and must complete at least 30 graduate credits.

Students have the option to complete a thesis (3 to 6 credits of BIOL 799) or a research project (1 to 3 credits of BIOL 798). According to Mason graduate policies, the same quality of work is expected of students regardless of their chosen option; that is, the MS thesis option or the MS project option. In general, the MS thesis is most appropriate for students planning or considering a research career. The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. The requirements differ primarily at the conclusion of the project, when students pursuing the project option must successfully complete written and oral comprehensive exams.
Students pursuing the thesis option must write a formal thesis that meets the requirements of the graduate school, as well as defending their thesis and presenting their results in a public seminar.

Students in the molecular biology, microbiology and infectious disease, and the bioinformatics and computational biology concentrations are required to present one research paper at the Departmental Journal Club meeting any time before graduation.

Recommended Electives

The following list, for students in the molecular biology concentration or the bioinformatics and computational biology concentration, is provided as a suggestion only and is not intended to be complete. Note that two courses covering substantially similar topics may not both be counted in the student’s course plan. Students should consult their faculty research advisor or the graduate program coordinator when preparing a course plan.

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 575 - Selected Topics in Genetics Credits: 1-4
- BIOL 578 - Mutation, DNA Repair, and Environmental Contamination Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- BIOL 585 - Eukaryotic Cell Biology Laboratory Credits: 1-2
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 793 - Research in Biology Credits: 1-3
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3
- BIOS 767 - Molecular Evolution Credits: 3

Program in Biological Sciences

This program is for students who wish to specialize in an area not covered by the concentrations described below.

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

2 credits of seminar:

- BIOL 692 - Seminar in Biology Credits: 1
  or
• BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

  either 1-3 credits of:
  • BIOL 798 - Master's Research Project Credits: 1-3
    or 3-6 credits of:
  • BIOL 799 - Thesis Credits: 1-6

19–26 credits of electives:

  • 19–26 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

Concentrations

Master’s level concentrations are available in molecular biology (MOB); microbiology and infectious disease (MID); bioinformatics and computational biology (BCB), and systematics and evolutionary biology (SEB). The BCB, MOB, and SEB concentrations each require 2-4 credits of molecular techniques courses as explained below.

Molecular Techniques Requirement

Students in the BCB, MOB, and SEB concentrations must satisfy the molecular techniques requirement by taking 2-4 credits of BIOL 668 or BIOS 740. Special topics courses, such as BIOL 575 or 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

▲ Concentration in Bioinformatics and Computational Biology (BCB)

1–3 credits of research methodology:

  • BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
    or
  • BIOS 702 - Research Methods Credits: 3

9 credits of core biology:
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
  or
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BIOS 741 - Genomics Credits: 3

2–4 credits of molecular techniques:

- 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

  either 1-3 credits of:
  - BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of:
  - BIOL 799 - Thesis Credits: 1-6

6–15 credits of electives:

- 6–15 credits in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

▲ Concentration in Microbiology and Infectious Disease (MID)

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3
12 credits of core biology:

- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

2 credits of seminar:

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

either 1-3 credits of:
- BIOL 798 - Master's Research Project Credits: 1-3
or 3-6 credits of:
- BIOL 799 - Thesis Credits: 1-6

7–14 credits of electives to be chosen from the following:

- BIOL 564 - Techniques in Virology Credits: 1
- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 720 - Microbial Metabolism Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 710 - Current Topics in Bioscience Credits: 1-3

Total: 30 credits

▲ Concentration in Molecular Biology (MOB)

1–3 credits of research methodology:
• BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
• BIOS 702 - Research Methods Credits: 3

13 credits of core biology:

• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 583 - General Biochemistry Credits: 4
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
  or
• BIOS 767 - Molecular Evolution Credits: 3

3 credits of bioinformatics:

• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
  or
• BINF 630 - Bioinformatics Methods Credits: 3
  or
• BINF 634 - Bioinformatics Programming Credits: 3

2–4 credits of molecular techniques:

• 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:

• BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

  either 1-3 credits of:
• BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of:
• BIOL 799 - Thesis Credits: 1-6
0-8 credits of electives:

- 0-8 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

▲ Concentration in Systematics and Evolutionary Biology (SEB)

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
- BIOS 702 - Research Methods Credits: 3

9-10 credits of core biology:

- BIOL 574 - Population Genetics Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOS 767 - Molecular Evolution Credits: 3
  plus 3–4 credits of organismal biology

2–4 credits of molecular techniques:

- 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:

- BIOL 692 - Seminar in Biology Credits: 1
- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:
either 1-3 credits of:

- BIOD 798 - Master's Research Project in Biodefense Credits: 3

or 3-6 credits of:

- BIOD 799 - Master's Thesis in Biodefense Credits: 1-6

5–14 credits of electives:

- 5–14 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

Doctoral Degree

Biosciences, PhD

Banner Code: SC-PHD-BIOS

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. The area of emphasis in functional genomics and biotechnology includes microarray analysis of gene expression, sequencing and analysis of genes, gene family evolution, mechanisms of toxicology and mutagenesis, and biotechnological applications. The concentration in microbiology and infectious disease stresses molecular mechanisms of infectious disease, genomic and proteomic analysis of pathogens, and the physiology and metabolism of pathogens. The academic component is a three-tiered structure. The first tier provides a set of four core courses designed to advance research skills across all disciplines. The second tier comprises four or five core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the comprehensive exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

Admission Requirements

In addition to materials required of all applicants for graduate study, the following is also required:

- Minimum 3.25 GPA in previous course work with significant training in the biological sciences. A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general and biology or biochemistry subject exams taken within the past five years prior to date of application submission.

An interview may be required. Applications should be submitted by February 1 for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends. Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program’s fundamental courses, plus completion of missing prerequisites.
Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Candidates for the PhD in biosciences must complete a minimum of 72 graduate credits.

- Emphasis or concentration: 12–16 credits required courses (see below)
- Elective
- Two presentations at departmental Journal Club
- Qualifying exam

Core courses: 12 credits in

- BIOS 701 - Biochemical Systematics Credits: 3
- BIOS 702 - Research Methods Credits: 3
- BIOS 703 - Laboratory Rotation Credits: 1
- BIOS 704 - Topics in Biosciences Credits: 1

Dissertation: 12–24 credits in proposal and research

- BIOS 998 - Doctoral Dissertation Proposal Credits: 1-6
- BIOS 999 - Doctoral Dissertation Research Credits: 1-24

Notes:

On admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of course work, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction. On successful completion of the qualifying exam, the majority of all course work, and an accepted thesis proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (999). Students must present their dissertation results to their graduate committee on a regular basis until graduation. For graduation, students will present their results to their graduate committee and defend their dissertation publicly.

For students entering the doctoral program with a master’s of science degree, the number of credits required may be reduced by a maximum of 30 with approval of the advisor and the program director. Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the dean.
Students in the doctoral program are required to present two research papers at the departmental Journal Club meeting any time before graduation.

**Emphasis in Functional Genomics and Biotechnology**

This emphasis prepares students for significant contributions in an academic or industrial research career. Areas of emphasis include microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, and biotechnological applications.

**Requirements**

All students must take the following 15 graduate credits as their emphasis courses:

- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 741 - Genomics Credits: 3
- BIOS 742 - Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 744 - Molecular Genetics Credits: 3

**Note:**

Electives may include graduate-level courses relevant to the student’s research and authorized by the student’s advisor and program director.

▲ **Concentration in Microbiology and Infectious Disease (MID)**

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomics of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

**Requirements**

In addition to the degree requirements stated previously, students are required to take the following:

- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 720 - Microbial Metabolism Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

**Electives to complete 72 credits**

To be chosen from:
• BIOL 533 - Selected Topics in Plant Biology Credits: 1-4
• BIOL 564 - Techniques in Virology Credits: 1
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 578 - Mutation, DNA Repair, and Environmental Contamination Credits: 3
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOS 710 - Current Topics in Bioscience Credits: 1-3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3
• BIOS 760 - Seminar in Molecular Systematics Credits: 1-3
• BIOS 898 - Directed Studies in Biosciences Credits: 1-12
• BIOS 899 - Directed Research in Biosciences Credits: 1-12
• EVPP 551 - Fungi and Ecosystems Credits: 3
• BINF 633 - Molecular Biotechnology Credits: 3
• BINF 636 - Microarray Methodology and Analysis Credits: 3
• BINF 705 - Research Ethics Credits: 1

Neuroscience Program

Phone: 703-993-4333
Web: gmu.edu/departments/neuroscience

Faculty

Director: Jafri

Professors: Ascoli, Butler, Jafri, Olds, Smith, McCabe, Parasuraman

Associate professors: Blackwell, Cebral, Flinn, Fryxell, Greenwood, Houser, Kello, Klimov, Peterson, Sander, So

Assistant professors: Barreto, Cox, Dumas, Kabbani, Kalbfleisch, Kozhevnikov, Peixoto, Sikdar, Thompson

Neuroscience at George Mason University is an interdisciplinary field, grounded in biology, chemistry, and psychology. Research and education in neuroscience at Mason is conducted under the auspices of the Neuroscience Advisory Council (NAC). The BS degree in neuroscience is administered by the Psychology department in the College of Humanities and Social Sciences, and the PhD program in neuroscience is administered by the College of Science. The neuroscience faculty at Mason comprise a unique blend of traditional, experimental, and theoretical scientists. They include faculty in the Psychology; Molecular Neuroscience; Molecular and Microbiology; Physics and Astronomy; Bioinformatics and Computational Biology, and Electrical Engineering departments. Research in neuroscience focuses on the broad areas of behavior, anatomy, physiology, biochemistry, computational modeling, and informatics. Some of the key research initiatives currently underway at Mason include studies of:

• effects of drugs and alcohol on behavioral and neurological development
• cellular organization and connections of sensory processing areas in fish
• biochemical dynamics in disorders of the basal ganglia
• computational methods for simulation of complex biological systems
• description and generation of neuronal morphology
• adaptive control for stabilization of epilepsy
• role of metals in memory and Alzheimer's disease
• biochemical/metabolic simulations at the organism level
• cellular and sub-cellular models of associative learning

Course Work

The program offers all course work designated NEUR in the Courses chapter of this catalog.

Doctoral Degree

Neuroscience, PhD

Banner Code: SC-PHD-NEUR

The interdisciplinary doctoral program in neuroscience is offered jointly by the COS, CHSS, and the Krasnow Institute for Advanced Study.

The program focuses on the complexity of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, biochemistry, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level (including cognitive studies on great apes in collaboration with Great Ape Trust of Iowa).

Current research projects include the effects of drugs and alcohol on behavioral and neurological development, cellular organization and connections of sensory processing areas in fish, plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer’s disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

Admission Requirements

Applicants should have a bachelor’s degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and integral calculus. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicants Goals statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members. To apply, prospective students should forward to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application including the Goals statement, two copies of official transcripts from each college and graduate institution attended, and a current résumé. Applicants should also include three letters of recommendation and an official report of scores obtained on
the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. TOEFL scores are required of all international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The curriculum for the Neuroscience PhD consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous relevant master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program provided those credits have not been applied toward a previous degree. Additional requirements for graduation include a dissertation and at least one publication (in print or in press) in a refereed journal.

Two areas of emphasis are included in the program: behavioral, anatomical, and molecular neuroscience; and theoretical, computational, and physiological neuroscience (TCP). All students will follow almost the same curriculum for the first two years, although emphasis prerequisites may vary slightly. For example, students in the TCP emphasis must have basic knowledge of integral calculus. It is expected that the selection of elective thesis topics will vary widely between the two areas of emphasis; however, students will be allowed to mix and match electives from both areas, with guidance and consent from the advisor or program director.

The courses, seminars, and laboratory rotations and readings (comprising a total of 48 credits) are organized as follows:

Core science:

- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
- NEUR 604 - Ethics in Scientific Research Credits: 1-3
- NEUR 702 - Research Methods Credits: 3

Core neuroscience:

- NEUR 601 - Developmental Neuroscience Credits: 2
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 603 - Mammalian Neurobiology Credits: 3
- NEUR 701 - Neurophysiology Laboratory Credits: 2

9 credits of rotations and readings:

- NEUR 703

24 credits of dissertation research:

- NEUR 998 - Dissertation Proposal Credits: 1-12
- NEUR 999 - Doctoral Dissertation Credits: 1-12

Electives:
• 19 credits of electives

1 credit of seminar:

• NEUR 709 - Neuroscience@GMU Seminars Credits: 1

Note:

When course work is nearing completion, students should form a doctoral committee and prepare their thesis proposal. Candidacy exams include written and oral components. After passing the candidacy exam and receiving committee approval of the dissertation proposal, students are advanced to doctoral candidacy. The degree will be awarded after completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

■ Physics and Astronomy

Phone: 703-993-1280
Web: www.physics.gmu.edu

Faculty

Professors: Becker*, Blaisten-Barojas*, Dworzecka, Ehrlich (chair), Ellsworth, Lieb, Mishin, Satija, Summers, Trefil

Associate professors: Barreto, Ceperley, Opher, Rubin, Satyapal, Sauer, So, Wallin*, Weingartner

Assistant professors: Cressman, Rosenberg, Tian, Weigel*, Zhang*

Term associate professor: Goldman, Oerter

Term assistant professors: Geller, Iacoletti, Jazaeri, Wyczalkowski

Term instructors: Ericson, Ewell

Emeriti: Ceperley, Evans, Mielczarek

Research faculty: Duxbury, Gliozzi, Meier, Poland, Richards

*These guest faculty hold primary appointments in other departments.

Course Work

The Physics and Astronomy Department offers all course work designated ASTR and PHYS in the Courses chapter of this catalog.

Honors Program in Physics

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at Mason may apply to the departmental honors program when they complete the first semester of their junior year. To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and 406 with a GPA of at least 3.50 and a grade of at least A- in PHYS 406.
Honors Program in Astronomy

Astronomy majors who have completed the prerequisites for ASTR 405 Honors Thesis in Astronomy, have a GPA of at least 3.5 in ASTR and PHYS courses taken at GMU, and have a GPA of at least 3.5 in all courses taken at GMU may apply for admission to the Astronomy Honors Program. To graduate with honors in astronomy, a student must maintain a GPA of at least 3.5 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 and 406 with a GPA of at least 3.5 and a grade of A- or better in ASTR 406. Students in ASTR 405/406 will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, 161, 260, 261, 262, and 263). Students who decide to major in physics after completing PHYS 243, 244, 245, and 246 may do so but only with written permission of the Physics and Astronomy Department. Those students are required to take at least 4 additional credits in approved physics courses.

Physics for Nonmajors

PHYS 243, 244, 245, and 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, 102, 103, and 104 are intended for nonscience majors. PHYS 160, 161, 260, 261 or 265, 262, and 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, 244, 245, 246; PHYS 103, 104; or PHYS 160, 161, 260, 261, 262, 263.

Research Opportunities

The department offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research of interest to them, based on their examination of the Physics Department web site.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2078, e-mail gacline2@gmu.edu, or go to gse.gmu.edu.

Physics, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Physics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Undergraduate Degree
Astronomy, BA

Banner Code: SC-BA-ASTR

The BA in astronomy prepares students for a career in industry, business, science education, and science writing, where analytical skills and scientific background are necessary. This degree is not suitable for students who intend to pursue a graduate degree in astronomy.

Students in the fields of mathematics, science, computer science, and engineering who are considering a double major should discuss this option with the undergraduate coordinator. Some course substitutions are allowed for such majors, but they must be approved in writing in advance.

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in astronomy must complete additional college requirements for the BA degree in COS. Also required are a minimum of 26 credits in physics and astronomy and 6 credits in mathematics, with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy university wide requirements in natural science and quantitative reasoning. ASTR 402 also satisfies the university’s writing-intensive requirement.

Degree Requirements

Note: Students who take the 11-credit physics sequence and one of the 8-credit math sequences can count the additional 7 credits beyond required minimum credits toward elective credit in the major.

Core Astronomy Courses (20 credits):

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
- ASTR 301 - Astrobiology Credits: 3
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 3
- ASTR 490 - Astronomy Capstone Credits: 3

Physics Sequence (6 or 11 credits):

students take either this sequence:
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3

or this sequence:
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3

Mathematics Sequence (6 or 8 credits):

• MATH 106 - Quantitative Reasoning Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
  or
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
  or
• MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
• MATH 116 - Analytic Geometry and Calculus II (Honors) Credits: 4

Electives (15 credits):

At least 3 credits must be taken at or above 300-level

• ASTR 390 - Topics in Astronomy Credits: 1-4
• ASTR 403 - Planetary Sciences Credits: 3
• ASTR 408 - Senior Research Credits: 3
• PHYS 121 - Uses of Physics Credits: 1
• PHYS 122 - Inside Relativity Credits: 1
• PHYS 123 - Inside the Quantum World Credits: 1
• PHYS 124 - Experimental Explorations in Physics Credits: 1
• CS 112 - Introduction to Computer Programming Credits: 4
• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4
• BIOL 213 - Cell Structure and Function Credits: 4
• CHEM 101 - Introduction to Modern Chemistry Credits: 3
• CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 3
• CHEM 103 - Chemical Science in a Modern Society Credits: 4
• CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
• CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
• CHEM 156 - Introduction to Environmental Chemistry II Credits: 4
• CHEM 201 - Introductory Chemistry I Credits: 3
• CHEM 202 - Introductory Chemistry II Credits: 3
• CHEM 211 - General Chemistry Credits: 4
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
  or additional courses with permission of the department and course instructor

Astronomy, BS
The BS in astronomy prepares students for graduate school or one of the many careers in research or teaching positions, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major in the fields of mathematics, science, computer science, and engineering should talk to the undergraduate coordinator. Note that at least 18 credits used to fulfill an astronomy BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these must be approved in writing in advance.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. In addition, students must complete a total of 39 credits in physics and astronomy and 17 credits in mathematics with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy the university wide requirements in natural science and quantitative reasoning. Also, by taking ASTR 402, they satisfy the university’s writing-intensive requirement.

Degree Requirements

Seven required core astronomy courses (21 credits):

- ASTR 103 - Astronomy Credits: 3
  or
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 328 - Introduction to Astrophysics Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 3
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3
- ASTR 490 - Astronomy Capstone Credits: 3

Eight required physics courses (18 credits):

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Five required math courses (17 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
• MATH 313 - Introduction to Applied Mathematics Credits: 3
  or
• MATH 314 - Introduction to Applied Mathematics Credits: 3

9 credits from the following:

(at least 6 credits must be in upper-level courses)

• any preapproved BIOL, CHEM, MATH, or PHYS courses
• ASTR 302 - Foundations of Cosmological Thought Credits: 3
• ASTR 401 - Computer Simulation in Astronomy Credits: 3
• ASTR 408 - Senior Research Credits: 3
• ASTR 409 - Astronomy Internship Credits: 3
• ASTR 530 - Astrophysics Credits: 3
• ASTR 535 - Space Instrumentation and Exploration Credits: 3
• CS 112 - Introduction to Computer Programming Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3
• MATH 447 - Numerical Analysis II Credits: 3
• PHYS 121 - Uses of Physics Credits: 1
• PHYS 122 - Inside Relativity Credits: 1
• PHYS 123 - Inside the Quantum World Credits: 1
• PHYS 124 - Experimental Explorations in Physics Credits: 1
• PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
• PHYS 303 - Classical Mechanics Credits: 3
• PHYS 307 - Thermal Physics Credits: 3
• PHYS 510 - Computational Physics I Credits: 3
• PHYS 575 - Atmospheric Physics I Credits: 3

Areas of Emphasis

In meeting the above requirements, students may choose an area of emphasis. Students who wish to complete an emphasis should plan a program of study in consultation with their advisors. Some emphases listed below require more than 9 credits in the last category above.

Emphasis in Astrobiology

This emphasis prepares students for careers in research, teaching, or science journalism. Students must take the following, and complete a senior project or internship.

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 506 - Selected Topics in Microbiology Credits: 1-4

• ASTR 408 - Senior Research Credits: 3
  or
• ASTR 409 - Astronomy Internship Credits: 3

Emphasis in Computational Astronomy

This emphasis prepares students planning for computation and information-related jobs in industry and government labs. Students must take 9 credits of the following. In addition, they should complete a senior project or internship.

• ASTR 401 - Computer Simulation in Astronomy Credits: 3
• PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3  
or  
• PHYS 510 - Computational Physics I Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3  
or  
• MATH 447 - Numerical Analysis II Credits: 3
• ASTR 408 - Senior Research Credits: 3  
or  
• ASTR 409 - Astronomy Internship Credits: 3

Emphasis in Graduate School Preparation

This emphasis prepares students for graduate study in observational or theoretical astronomy. Student must take two courses from the following. They should complete a senior project or internship in the specialty that they intend to pursue in graduate school.

• ASTR 530 - Astrophysics Credits: 3  
or  
• ASTR 535 - Space Instrumentation and Exploration Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3
• ASTR 408 - Senior Research Credits: 3  
or  
• ASTR 409 - Astronomy Internship Credits: 3

Sample Schedule for Astronomy BS

(excluding general education courses)

First Semester

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• ENGL 101 - Composition Credits: 3
• ASTR 103 - Astronomy Credits: 3
• PHYS 122 - Inside Relativity Credits: 1
• PHYS 123 - Inside the Quantum World Credits: 1

Second Semester

• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1

Third Semester

• ASTR 302 - Foundations of Cosmological Thought Credits: 3
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

Fourth Semester

• ASTR 301 - Astrobiology Credits: 3
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1
• MATH 214 - Elementary Differential Equations Credits: 3

Fifth Semester

• ASTR 328 - Introduction to Astrophysics Credits: 3
• PHYS 305 - Electromagnetic Theory Credits: 3
• ENGL 302 - Advanced Composition Credits: 3

Sixth Semester

• MATH 313 - Introduction to Applied Mathematics Credits: 3
• PHYS 307 - Thermal Physics Credits: 3
• PHYS 308 - Modern Physics with Applications Credits: 3

Seventh Semester

• MATH 446 - Numerical Analysis I Credits: 3
• ASTR 401 - Computer Simulation in Astronomy Credits: 3
• ASTR 403 - Planetary Sciences Credits: 3
• ASTR 490 - Astronomy Capstone Credits: 3
Eighth Semester

- MATH 447 - Numerical Analysis II Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 408 - Senior Research Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3

Physics, BS

Banner Code: SC-BS-PHYS

The BS in physics prepares students for graduate school and careers in business or industry. Students in the fields of mathematics, science, and engineering who are considering a double major in physics should discuss this option with the undergraduate coordinator. Note that at least 18 credits used to fulfill a physics BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed in advance.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete a total of 45 credits in the major and 20 in mathematics, with a minimum GPA of 2.00, distributed as follows. Through the course work below, physics majors satisfy the university-wide requirements in natural science and quantitative reasoning, and the intensive writing requirement by taking PHYS 407.

Degree Requirements

Eleven required core physics courses (27 credits):

(Students double majoring in engineering and physics may substitute ECE 305 for PHYS 305.)

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3

Six credits from:

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 405 - Honors Thesis in Physics Credits: 3
  or
- PHYS 406 - Honors Thesis in Physics Credits: 3

- PHYS 408 - Senior Research Credits: 2-3
  or
- PHYS 409 - Physics Internship Credits: 3

- PHYS 416 - Special Topics in Modern Physics Credits: 1

- ASTR 328 - Introduction to Astrophysics Credits: 3
  or
- ASTR 428 - Relativity and Cosmology Credits: 3

12 credits from:

- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
- PHYS 124 - Experimental Explorations in Physics Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
  or any approved upper-level physics, astronomy, chemistry, electrical engineering, or mathematics courses

Six required math and statistics courses (20 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 313 - Introduction to Applied Mathematics Credits: 3
  or
- MATH 413 - Modern Applied Mathematics I Credits: 3
  or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Areas of Emphasis

In meeting the requirement for 6 credits outside the core, students have the option of electing an emphasis. The courses required for each emphasis are listed below. Students who wish to complete an emphasis should plan a program of study in consultation with their advisor.
Emphasis in Applied Solid State Physics

This emphasis is for students who wish to pursue a career in the semiconductor industry. To complete this emphasis, students should take the following courses:

- PHYS 512 - Solid State Physics and Applications Credits: 3
- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3

In addition, students should complete a senior project or honors thesis in applied solid state physics:

- PHYS 408 - Senior Research Credits: 2-3
  or
- PHYS 409 - Physics Internship Credits: 3
- PHYS 405 - Honors Thesis in Physics Credits: 3
  or
- PHYS 406 - Honors Thesis in Physics Credits: 3

Emphasis in Astrophysics

This emphasis is for students who are planning to attend graduate school in astrophysics or pursue a career in industry. To complete this emphasis, students should select four courses from the following:

- PHYS 428 - Relativity and Cosmology Credits: 3
- ASTR 328 - Introduction to Astrophysics Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 530 - Astrophysics Credits: 3
- ASTR 535 - Space Instrumentation and Exploration Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

In addition, students should complete a senior project or honors thesis on an astrophysics problem:

- PHYS 408 - Senior Research Credits: 2-3
  or
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3

Emphasis in Computational Physics

This emphasis is for students who wish to pursue a career that applies computers to the solution of physical problems and data analysis. To complete this emphasis, students should take at least 9 credits from the following courses:
• PHYS 510 - Computational Physics I Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3
• MATH 447 - Numerical Analysis II Credits: 3

In addition, they complete a senior project or honors thesis on a problem that involves using a computer for the solution of a physical problem:

• PHYS 408 - Senior Research Credits: 2-3
  or
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3

Emphasis in Electronics

This emphasis is for students who wish to pursue a career in industry, applying a strong background in electronics to physical problems. To complete this emphasis, students should take at least 9 credits from the following courses:

• ECE 301 - Digital Electronics Credits: 3
• ECE 333 - Linear Electronics I Credits: 3
• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 433 - Linear Electronics II Credits: 3

In addition, they should complete a senior project or honors thesis on an electronics problem:

• PHYS 408 - Senior Research Credits: 2-3
  or
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3

Emphasis on Graduate School Preparation

Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this emphasis is for students whose career goals definitely include graduate work in physics. To complete this emphasis, students should take at least 9 credits from the following courses:

• PHYS 410 - Computational Physics I Credits: 3
• PHYS 412 - Solid State Physics and Applications Credits: 3
• PHYS 440 - Nuclear and Particle Physics Credits: 3
• ASTR 530 - Astrophysics Credits: 3
In addition, a senior project or honors thesis in the specialty that they intend to pursue in graduate school:

- PHYS 408 - Senior Research Credits: 2-3
- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3

Emphasis in Medical Physics

Physics majors generally have an excellent acceptance record in applying to medical, dental, or veterinary schools. Although there is no formal set of courses within physics that is uniquely suitable, students should meet with a physics advisor and a health sciences advisor for information about the university’s Medical Sciences Advisory Committee. For more information, call 703-993-1050.

Because schools in the health sciences vary both in their philosophies and specific requirements, it is wise for students to become aware of such information well in advance of applying for admission. Although specific requirements vary, most programs do require applicants to complete at least one year of biology. Other requirements generally include organic chemistry:

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Emphasis in Physics Education

This emphasis is intended for students wishing to pursue a career teaching high school physics. The goal of the program is to allow students to receive a license to teach physics in Virginia secondary schools within 120 credits. In addition to the standard requirements for the physics major, students should enroll in 3 credits of directed study in physics laboratory instruction under:

- PHYS 390 - Topics in Physics Credits: 1-4

The students must also take the following education courses to qualify for the teaching license:

- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- pass the Praxis I and II exams
Sample Schedule for Physics BS
(excluding general education courses)

First Semester

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGL 101 - Composition Credits: 3
- CHEM 211 - General Chemistry Credits: 4
  or
- BIOL 213 - Cell Structure and Function Credits: 4
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1

Second Semester

- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4

Third Semester

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Fourth Semester

- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- MATH 214 - Elementary Differential Equations Credits: 3

Fifth Semester

- PHYS/MATH elective
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- MATH 313 - Introduction to Applied Mathematics Credits: 3
• ENGL 302 - Advanced Composition Credits: 3

Sixth Semester

• PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
• PHYS 307 - Thermal Physics Credits: 3
• PHYS 308 - Modern Physics with Applications Credits: 3
• MATH 314 - Introduction to Applied Mathematics Credits: 3

Seventh Semester

• PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
• PHYS 407 - Senior Laboratory in Modern Physics Credits: 3
• PHYS 416 - Special Topics in Modern Physics Credits: 1
• PHYS 410 - Computational Physics I Credits: 3

Eighth Semester

• PHYS 408 - Senior Research Credits: 2-3
• PHYS 412 - Solid State Physics and Applications Credits: 3
• PHYS 440 - Nuclear and Particle Physics Credits: 3

Undergraduate Interdisciplinary Minor

Renewable Energy Interdisciplinary Minor

Banner Code: RNRG

This college-wide interdisciplinary minor administered by the Physics and Astronomy Department is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines. Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The renewable energy minor is therefore ideally suited for students with majors in engineering, business, and basic science.

The minor in renewable energy comprises 20 credits of course work. 8 credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work
Core Courses (10 credits):

- PHYS 331 - Physics of Renewable Energy Credits: 3
- PHYS 385 - Materials Science with Applications to Renewable Energy Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Physics (3 credits):

students take one of the following:

- PHYS 245 - College Physics Credits: 3
- PHYS 262 - University Physics III Credits: 3

Chemistry (4 credits):

students take one of the following:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 251 - General Chemistry for Engineers Credits: 4

Internship (3 credits):

students take one of the following:

- PHYS 409 - Physics Internship Credits: 3 on renewable energy
- or a 3-credit internship focusing on renewable energy in another natural science or engineering field

Total: 20 credits

Undergraduate Minor

Astronomy Minor

Banner Code: ASTR

The minor requires completion of a physics prerequisite and 15 credits in astronomy, with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

Course Work
Physics Prerequisite

Students take either this sequence:
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

or this sequence:
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Astronomy Core (8 credits):

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

Astronomy Electives (7 credits from the following):

- ASTR 301 - Astrobiology Credits: 3
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- ASTR 328 - Introduction to Astrophysics Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 3
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3
- ASTR 530 - Astrophysics Credits: 3
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1

Total: 15 credits
Physics Minor

Banner Code: PHYS

Course Work

The minor requires 18 credits with a minimum GPA of 2.00, including:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Any two courses from:

- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 428 - Relativity and Cosmology Credits: 3

- PHYS 305 - Electromagnetic Theory Credits: 3
  or
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

Note:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 18 credits

Bachelor's/Accelerated Master's Program

Physics, BS/Physics, Accelerated MS
This program allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees by successfully completing 144 credits within five academic years plus summers their last two years. On completion, students are exceptionally well prepared for entry into a professional school or a PhD program in physics or a related discipline. Well-prepared students are encouraged to apply to this program after they complete 90 credits. Admitted students take selected graduate courses during their senior year (when they have successfully completed prerequisites) and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met. See the department for further details.

Master's Degree

Applied and Engineering Physics, MS

Banner Code: SC-MS-PHAE

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphases. The standard emphasis is intended for students who may wish to pursue further graduate study in physics leading to a PhD degree in preparation for a career in basic research. The applied physics emphasis is intended for those who wish to apply the techniques and subject areas of physics to multifaceted problems encountered in the workplace, particularly in physics, engineering, computational science, and other related areas. The engineering physics emphasis allows students to select a larger number of courses from electrical engineering or nanotechnology, and other areas.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to attend easily. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment related research may be conducted under an optional 3-credit research project or an optional 6-credit master’s thesis. Master’s students who are not employed full time may apply for financial aid or a limited number of research assistantships.

Admission Requirements

Individuals holding a baccalaureate degree in physics or a related field from an accredited institution and who earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor’s assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years. Those with less recent bachelor’s degrees may present a statement of their work experience in lieu of the GRE.

Degree Requirements

Candidates for the degree must successfully complete 30 credits in the categories shown below:

I. 6 credits of required core courses:

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
For the applied physics emphasis and the engineering physics emphasis, students may substitute:

- PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3 (for PHYS 684)
- PHYS 513 - Applied Electromagnetic Theory Credits: 3 (for PHYS 685)

II. 15 credits in one of three emphases (A, B or C):

A. Standard emphasis:

Students should take any five of the following courses:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- PHYS 540 - Nuclear and Particle Physics Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3
- PHYS 612 - Physics of Modern Imaging Credits: 3
- PHYS 613 - Computational Physics II Credits: 3
- PHYS 620 - Continuum Mechanics Credits: 3
- PHYS 676 - Atmospheric Physics Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- ASTR 530 - Astrophysics Credits: 3
- ASTR 765 - High-Energy and Accretion Astrophysics Credits: 3
- ASTR 766 - Relativity and Cosmology Credits: 3

Total: 15 credits

B. Engineering physics emphasis:

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- 9 credits of ECE graduate courses
Total: 15 credits

C. Applied physics emphasis:

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3

plus any 9 credits from this list:

- ASTR 535 - Space Instrumentation and Exploration Credits: 3
- ASTR 760 - Space Plasma Physics Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 740 - Introduction to Biophysics Credits: 3
- BINF 741 - Introduction to Computer Simulations of Biomolecules Credits: 3
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 713 - Atmosphere-Ocean Interactions Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
- CLIM 750 - Geophysical Fluid Dynamics Credits: 3
- CSI 660 - Space Instrumentation and Exploration Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
- CSI 763 - Statistical Methods in Space Sciences Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3
- ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 3
- NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
- NANO 510 - Strategies for Nanocharacterization Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3
- PHYS 540 - Nuclear and Particle Physics Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3
- PHYS 612 - Physics of Modern Imaging Credits: 3
- PHYS 613 - Computational Physics II Credits: 3
- PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
• PHYS 660 - Space Weather Credits: 3
• PHYS 676 - Atmospheric Physics Credits: 3
• PHYS 760 - Space Plasma Physics Credits: 3

Total: 15 credits

III. 9 credits of electives chosen from courses in:

Physics, chemistry, mathematics, engineering, information technology, and computational sciences and informatics. No more than 6 credits may be chosen from areas outside ASTR, CSI, ECE, NANO, and PHYS. Elective credits can include a project (PHYS 798) or thesis (PHYS 799).

• ECE 798 - Research Project Credits: 3
• ECE 799 - Master's Thesis Credits: 1-6
• PHYS 798 - Research Project Credits: 3
• PHYS 799 - Master's Thesis Credits: 1-6

Notes:

Students may choose to do either ECE/PHYS 798 Research Project (3 credits) or ECE/PHYS 799 Master’s Thesis (6 credits), but not both. The research project may be conducted at a student’s place of employment with the concurrence of a faculty advisor.

The thesis is a more substantial piece of work performed under the supervision of a faculty member and requires students to make an oral defense. ECE/PHYS 798 may be taken only once. No more than 6 credits of PHYS 799 may be applied to the degree.

In addition to the requirements stated above, students may also select a research focus in astrophysics, atmospheric physics, biological applications of physics, computational physics, condensed matter, instrumentation (engineering physics), or nonlinear dynamics. A focus requires that students complete 15 credits of approved courses.

Students in the master’s degree program can earn a graduate certificate in computational techniques and applications from the Department of Computational and Data Sciences by choosing an approved sequence of courses.

Total 30 credits

Sample course lists for various focus areas:

Astrophysics:

• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• ASTR 530 - Astrophysics Credits: 3
- ASTR 680 - Physics of Interstellar Media Credits: 3
- ASTR 760 - Space Plasma Physics Credits: 3

**Atmospheric physics:**

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 676 - Atmospheric Physics Credits: 3
- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 713 - Atmosphere-Ocean Interactions Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3

**Biophysics:**

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 630 - Introduction to Biophysics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

**Computational physics:**

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 780 - Advanced Selected Topics in Physics Credits: 3
- CSI 764 - Computational Astrophysics Credits: 3

**Instrumentation/engineering physics:**

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
- NANO 510 - Strategies for Nanocharacterization Credits: 3
- ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 3

**Material physics:**

- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
Nonlinear dynamics:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- MATH 673 - Dynamical Systems Credits: 3
- NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Physics:

- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

Doctoral Degree

Physics, PhD

Banner Code: SC-PHD-PHYS

All doctoral students accepted into the physics PhD program take a common core of four courses (see below). By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as astrophysics, biophysics, nonlinear physics, planetary sciences, material physics, space weather physics, or others according to his or her particular interests. By the end of their first year, all students should pair with a faculty advisor who will guide them toward candidacy.

Admission Requirements

Those holding a baccalaureate degree in physics or astronomy from an accredited institution, who earned a GPA of 3.00 (out of 4.00) in their last 60 credits, and received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is recommended for all interested applicants who received their baccalaureate degrees within the past five years. A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University, please refer to the Graduate Admission Policies and Admission of International Students sections of this catalog.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

All students in the physics PhD program must earn a minimum of 72 graduate credits. Of these, 48 are required course work and preliminary research credits, and 24 are doctoral dissertation proposal (PHYS/ASTR 998) and doctoral dissertation research
(PHYS/ASTR 999) credits. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits. The required 48 credits of course work are divided among core courses, physics and astronomy elective courses, general elective courses, and a seminar requirement. The 12 credits of core courses include PHYS 684, 685, 705, and 711. Note that doctoral candidacy (qualifying) examinations will be given on the topics covered in these core courses. The remaining 36 credits includes 3 credits of PHYS 703, a 1-credit seminar that is repeated three times, 6 credits of physics or astronomy specialty courses, and 27 credits of general electives, which may be chosen from physics and astronomy, or other related disciplines. These elective courses may include research credits (PHYS/ASTR 796, PHYS/ASTR 798) in preparation for the Doctoral Dissertation. These research courses may be repeated with the approval of the student’s advisor or Dissertation Committee in order to be applied toward the degree requirements.

- ASTR 796 - Directed Reading and Research Credits: 1-6
- ASTR 798 - Research Project Credits: 3
- ASTR 998 - Doctoral Dissertation Proposal Credits: 1-12
- ASTR 999 - Doctoral Dissertation Credits: 1-12
- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 703 - Seminar in Physics Credits: 1
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- PHYS 796 - Directed Reading and Research Credits: 1-6
- PHYS 798 - Research Project Credits: 3
- PHYS 998 - Doctoral Dissertation Proposal Credits: 1-12
- PHYS 999 - Doctoral Dissertation Credits: 1-12

Qualifying examinations

All students must successfully pass the qualifying examinations for the four core courses. The qualifying exam is offered once per year and is divided into four sections corresponding to the four topics in the core courses (Quantum Mechanics, Electromagnetic Theory, Classical Mechanics, and Statistical Mechanics). Grades of “Pass” or “Unsatisfactory” will be given individually for the four separate sections of the exam. If students receive a grade of “Unsatisfactory” in a given section of the exam, they will be allowed to retake that section a maximum of two times. Students can choose to take a particular section or a combination of sections at one sitting, but they must successfully pass all sections by the end of their third year. Students entering the program with equivalent courses taken at another institution can satisfy the core requirement by taking the qualifying exam directly. There is a written and an oral component for each section of the qualifying exam. A student must satisfactorily pass both components of the exam. The oral component may be waived by unanimous consent of the Qualifying Examination Committee for exceptional performance on the written component. At the beginning of each academic year, the program director will appoint members to the Qualifying Examination Committee, and this committee is responsible for creating and grading the qualifying exam offered that year.

Advancement to candidacy

After the successful completion of the qualifying examination, a Dissertation Committee should be formed as soon as possible. This committee consists of a graduate faculty member (see the Graduate Faculty section in the catalog) from the Department of Physics and Astronomy and at least two other members of the graduate faculty, one of whom must be from outside the student’s department or degree program. The composition of the committee must be approved by the program director. Qualified individuals who are not members of the graduate faculty (i.e., faculty at another university) may serve on a dissertation committee with the approval of the program director and the associate dean for graduate programs. The Dissertation Committee is responsible for directing students in their chosen field of research. The Dissertation Committee should work with the student to select specialty courses and electives to form a cohesive program of study. Preliminary research credits (PHYS/ASTR 796 and PHYS/ASTR 798) can be taken as a part of the electives to prepare for the student’s dissertation. Advancement to candidacy
implies that a doctoral student has demonstrated both breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge. Before doctoral students may be advanced to candidacy by the dean, they will need to have had completed all required course work, passed the qualifying examinations, and been recommended by the Dissertation Committee. A doctoral student has six years from the time of first enrollment as a degree-seeking student to advance to candidacy.

- ASTR 796 - Directed Reading and Research Credits: 1-6
- ASTR 798 - Research Project Credits: 3
- PHYS 796 - Directed Reading and Research Credits: 1-6
- PHYS 798 - Research Project Credits: 3

**Doctoral dissertation**

After advancing to candidacy, doctoral candidates will work with the Dissertation Committee to formalize their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in refereed scientific journals. A total of 24 credits in the following two courses must be taken: PHYS 998 or ASTR 998 Dissertation Proposal (0 to 12 credit hours), and PHYS 999 or ASTR 999 Doctoral Dissertation (12 to 24 credit hours). Note that before the student may enroll in PHYS/ASTR 999, the dissertation proposal must be approved by the Dissertation Committee and evidence of its approval sent to the dean for approval. Before that time, the student may enroll in PHYS/ASTR 998 (Dissertation Proposal). Students working on their Doctoral Dissertation (999) must register for a minimum of 3 credits of 999 per semester (excluding summers) until they have completed the 12-credit minimum requirement for 999, after which they must register for 1 credit of 999 until the dissertation is completed and accepted. The dissertation must be defended in a public forum before the Dissertation Committee and other interested faculty. After the candidate successfully defends the dissertation, the Dissertation Committee recommends to the Graduate Faculty of George Mason University the awarding to the candidate the degree of doctor of philosophy in physics. Students have five years from the time of advancement to candidacy to graduate.

- ASTR 998 - Doctoral Dissertation Proposal Credits: 1-12
- ASTR 999 - Doctoral Dissertation Credits: 1-12
- PHYS 998 - Doctoral Dissertation Proposal Credits: 1-12
- PHYS 999 - Doctoral Dissertation Credits: 1-12

“Mason is deeply committed to the arts and educating our students about the significance the arts have in all our lives. This is why the arts are integral to our institution. We encourage active student participation in the many programs and related courses in the arts that are scheduled throughout the year. Students are able to receive a more balanced education, develop a deeper appreciation of the arts, and achieve a more enlightened perspective of the world.”

—Alan G. Merten
President, George Mason University

The College of Visual and Performing Arts (CVPA) creates an academic environment in which the arts are considered as individual disciplines as well as interdisciplinary forms that strengthen each other. Courses of study are designed to lead to careers as creators, performers, teachers, managers, and scholars of the arts, as well as prepare students for the challenges of a rapidly changing world. In addition to providing strong programs for arts majors and minors, CVPA strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal arts education.

Studying the arts goes hand in hand with creation and performance. CVPA provides the theaters, studios, rehearsal spaces, computer laboratories, recital halls, and performance classrooms in which students hone their skills. Each major features strong academic preparation in the history and theory of the art form that supports discipline based technique courses. Creative work and performance are at the core of most courses of study. The college’s faculty of practicing artist-teachers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment. Students regularly perform, create, exhibit, and otherwise develop their art forms in a wide variety of public venues, enhancing their experience as working artists while enriching the cultural life of the campus community.
An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts, which comprises a variety of professional presenting and producing units that provide a diverse program of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform in the Concert Hall, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, TheaterSpace, the Fine Arts Building and Johnson Center Galleries, Harris Theater, and other campus venues make the arts pervasive at Mason and in our larger community.

**Administration**

William F. Reeder, Dean  
Linda G. Miller, Senior Associate Dean  
Brian Marcus, Associate Dean, Development and Alumni Affairs  
Andrew Bursten, Director Finance and Administration, CFO  
Thomas Reynolds, Director of Artistic Programming, Marketing and Audience Services  
Julie Thompson, Executive Director, Center for the Arts  
Jean Kellogg, Executive Director, Hylton Performing Arts Center  
Victoria N. Salmon, Assistant Dean, Graduate Studies  
Scott Martin, Assistant Dean, Research, Technology  
Rick Davis, Artistic Director, Center for the Arts and Co-Artistic Director, Theater of the First Amendment

**Undergraduate Degree Programs**

The undergraduate degree consists of course work in university general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

**Graduate Degree Programs**

CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described in the sections that follow.

**Academic Policies**

Students are ultimately responsible for their academic progress towards their degrees. Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

**Questions about Academic Policies**

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (Performing Arts Building, A407; 703-993-4551).

**Academic Course Load**

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Graduate students earning degrees in CVPA may register for a maximum of 13 credits per fall and spring semester. Students should be cognizant of the time commitment when they register for their courses, especially if they register for
high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Advising

Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits, or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.

Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

General Education Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the University General Education chapter (University General Education). Students accepted into the Honors Program in General Education fulfill their core general education requirements with completion of that program of study. Students are strongly advised to consult the University General Education chapter of this catalog for information concerning general education.

Minors

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. Some departments have more specific criteria for applying credits to a minor.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take nonactivity PHED courses for elective credit for CVPA degrees.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

Study Elsewhere

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean's office before enrolling in classes elsewhere.
To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses are seldom approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere review.

Courses elsewhere that have been pre-approved by the dean's office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar's Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

**Transfer of Credit**

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status into a degree program.

Graduate credit earned prior to admission to a certificate, master’s, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see the Graduate Policies/Transfer of Credit portion of the catalog for more detailed information about the requirements.

**Withdrawals**

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See University Academic Policies for further details.

**Appeals Process**

*Appeals of Academic Procedures:*

See Academic Policies in George Mason University's *University Catalog*.

*CVPA Procedures for Grade Appeal:*

Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor is unfair. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the *Schedule of Classes* (spring for fall grades, fall for spring and summer grades). The following are the College's steps in grade appeals:

1. The student meets with the professor to discuss the grade and class performance; this meeting should occur within two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Department or Program Chair.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the appeal, the student must submit a written appeal to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.

The Decision of the CVPA Associate Dean (undergraduate students), or Assistant Dean (graduate students) is final.

CVPA Procedures for Appeal of an Academic Action:

In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.
2. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.
3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.
4. A nonparticipating observer of the student's choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.
5. The student may follow University appeal procedures outlined in the University Catalog.

CVPA Procedure for Non-Academic Appeals or Grievance:

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator follows the following steps:

1. The student meets with the professor and Department Chair to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Chair only.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all non-academic appeals and grievances.

Academic Dismissal from a Graduate Program:

The Registrar's Office contacts students via e-mail if they earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. a written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.
4. The CVPA Assistant Dean for Graduate Programs reviews the appeal.
5. The final decision of the CVPA Assistant Dean is forwarded to the student and Registrar's Office.
6. The student may follow University appeal procedures outlined in the University Catalog.

For these, and any other academic concerns, students are encouraged to contact George Mason University's Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university. (Academic Policies).

CVPA Courses
Some CVPA courses transcend individual disciplines. These courses are administered by the Dean’s Office and are designated CVPA in the Courses chapter of this catalog.

**Undergraduate Interdisciplinary Minor**

**Arts Administration Minor**

**Banner Code: ARTA**

Performing Arts Building  
Room A407  
Phone: 703-993-1321

**Faculty**

Miller, Coordinator

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management.

University policy states that students must earn 8 distinct credits that are not used toward their major toward their minor.

**Course Work**

The minor in arts administration consists of 18 credits, including:

- CVPA 305 - Seminar in Arts Management Credits: 3
- CVPA 489 - Field Experience in the Arts Credits: 3-6

**Note:**

All other credits are selected in consultation with a program advisor from relevant courses in CVPA, the Nonprofit Management Program in the Department of Public and International Affairs, the School of Management, the Department of Communication, or other appropriate areas of study. The minor is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor. See the program coordinator for more information.

**Art and Visual Technology**

College Hall, Room C200  
Phone: 703-993-8898  
Web: www.avt.gmu.edu

**Faculty**

Harold Linton, Chair
Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (chair), Mandes, Sandell

Associate professors: Ashcraft (associate chair), Crawford, Feerick, Frenn, White

Assistant professors: Cooley, Cui, Endress, Karanetou, Rothstein, Sheridan, Winant (associate chair), Wrbican

Term assistant professors: Constantine, Del Popolo, Malone, Stanley, Starr

Adjunct faculty: Bradley, Bulisova, Carr-Shaffer, Castellana, Chao, Clements, Cushner, DeLuca, Dicicco, Fairfax, Ferreira, Goldman, Gorman, Guerrieri, Herce, Hicks, Ho, Hoffmann, Kerns, Kirk, Nahidian, Organ, Petzwinkler, Rodriguez, Rozario, Sapsford, Serafin, Tomhave, Watson, Wiseman

Mission

The Department of Art and Visual Technology (AVT) offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the AVT Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

Course Work

The Department of Art and Visual Technology offers all course work designated AVT in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

Undergraduate studio degrees offered by the Department of Art and Visual Technology include the bachelor of arts (BA) and the bachelor of fine arts (BFA). The department also offers an undergraduate minor in AVT, an interdisciplinary minor in multimedia, and a departmental honors program for selected AVT majors.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in AVT. Consult the course listings for prerequisites.

Admission to AVT Requirements

All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review. Students may be admitted to study in the BA or BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review

Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

**BFA Portfolio Review**

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the AVT Department. Please call the main office to schedule an appointment (703-993-8898).

For current Mason student in the AVT BA program who wish to change to the BFA program, or other current Mason students, application deadlines are at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their AVT concentration in the semester prior to their application to discuss the portfolio.

For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Student may alternatively be admitted to study in the BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the Department of Art and Visual Technology for an application and specific directions on presenting the portfolio.

**Artsbus Requirement**

All AVT majors must meet the department’s requirement of travel to galleries and museums through the AVT Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.
Visual Voices Requirement

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

Major GPA

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Studios

The Art and Visual Technology program is located in the arts building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

AVT Honors Program

Students interested in the Honors Program in Art and Visual Technology should contact the chair of the department. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

General Education (37 credits)

Foundation Requirements

- Witten Communication:
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3 (Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.)
- Oral communication (3)
- Quantitative reasoning (3)
- Information technology (3)

Core Requirements

- Literature (3)
- Arts* (3)
- Natural science (including at least one laboratory science) (7)
• Western civilization (3)
• Global understanding** (3)
• Social and behavioral sciences (3)

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (60-63 credits)

Studio Foundation (17 credits)

• AVT 101 - New Majors Colloquium Credits: 1
• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 105 - Studio Fundamentals II Credits: 4
• AVT 222 - Drawing I Credits: 4

• AVT 323 - Drawing II Credits: 4
  or
• AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (18 credits)

• ARTH 200 - Survey of Western Art Credits: 3
  or
• ARTH 203 - Survey of Asian Art Credits: 3
  or
• ARTH 204 - Survey of Latin American Art Credits: 3
  and
• ARTH 201 - Survey of Western Art Credits: 3
• ARTH 374 - Art Now Credits: 3
• AVT 301 - Visual Voices Colloquium Credits: 1
• AVT 307 - Aesthetics Credits: 3
• AVT 395 - Writing for Artists Credits: 3

Note

AVT 301 must be taken for a total of 3 credits or each semester enrolled, if less than three semesters.

Breadth and Experience (9-12 credits)
Choose three of the following classes; at least one course must be a 200-level studio course:

- AVT 215 - Typography Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Photography I Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to Digital Arts Credits: 4
- AVT 396 - Introduction to Art Teaching and Learning Credits: 3
- AVT 399 - Special Topics in Art and Visual Technology Credits: 1-6

Synthesis (4 credits)

- AVT 497 - Senior Project Credits: 4
  or
- AVT 498 - Senior Design Project Credits: 4

Concentration (12 credits)

12 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media, Painting, Photography, Printmaking or Sculpture

▲ Drawing (DRW)

- AVT 422 - Drawing III Credits: 4
- AVT 423 - Drawing IV Credits: 4

4 credits from:

- AVT 324 - Figure Drawing Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
- AVT 333 - Painting II Credits: 4
- AVT 336 - Experimental Painting Credits: 4
- AVT 337 - Figurative Painting Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

Note:

All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)
• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4

Graphic Design Note

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

• AVT 373 - Performance Studio Credits: 4
• AVT 473 - Advanced Performance Studio Credits: 4

4 credits from:

• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound and Vision Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

▲ New Media Art (NMA)

12 credits from:

• AVT 382 - Digital Art and Animation Credits: 4
• AVT 383 - Three-Dimensional Digital Art Credits: 4
• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
• AVT 483 - Internet Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4

▲ Painting (PNT)

• AVT 333 - Painting II Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

▲ Photography (PHO)

• AVT 353 - Photography II Credits: 4
• AVT 459 - About Photography: Practice and Research Credits: 4
4 credits from:

- AVT 452 - Advanced Photographic Printing I Credits: 4
- AVT 453 - Advanced Photographic Printing II Credits: 4
- AVT 454 - Alternative Photo Processes Credits: 4
- AVT 455 - Advanced Digital Photo Credits: 4
- AVT 456 - Large Format Photography Credits: 4
- AVT 457 - Documentary Photography Credits: 4
- AVT 458 - Advanced Studio Lighting Credits: 4 **

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

▲ Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4

8 credits from:

- AVT 345 - Artists' Books as Visual Language Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 442 - Printmaking III Credits: 4
- AVT 443 - Printmaking IV Credits: 4

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4

Concentration Electives

AVT 399 or AVT 491 may be taken with permission of respective Area Coordinator.

- AVT 399 - Special Topics in Art and Visual Technology Credits: 1-6
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

General Electives (20-23 credits)

BA students must use general electives to either complete a minor program outside the major field of study (15–20 credits) or demonstrate intermediate-level proficiency in one foreign language (0–12 credits)*. After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department. All students are required to take a minimum of 45
credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above.

AVT 393 Field Experience in the Arts and AVT 489 Internship are not required courses but are highly recommended as electives for BA students.

*See beginning of CVPA chapter for foreign language requirement.

**Total: 120 credits**

**Mission**

The Department of Art and Visual Technology (AVT) offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the AVT Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.
Course Work

The Department of Art and Visual Technology offers all course work designated AVT in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAM

This intensive, 120-credit studio production program emphasizes analytical, creative, and experiential aspects of studio and new media art. It is designed to prepare students professionally as visual artists or for graduate study in the fine arts. Students devote a significant portion of their college careers to an in-depth study in one of the following concentrations: drawing, graphic design, interdisciplinary arts (InterArts), new media art, painting, photography, printmaking, or sculpture.

Admission to AVT Requirements

All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review.

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the AVT Department. Please call the main office to schedule an appointment (703-993-8898).

Current Mason students in the AVT BA program who wish to change their degree program to a BFA, or other current Mason students, may apply for admission to the BFA degree program by presenting a substantive college level portfolio and other requested credentials during the department's designated application period at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their AVT concentration in the semester prior to their application to discuss the portfolio.

For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students may alternatively be admitted to study in the BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the Department of Art and Visual Technology for an application and specific directions on presenting the portfolio.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.
**Artsbus Requirement**

All AVT majors must meet the department’s requirement of travel to galleries and museums through the AVT Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

**Studios**

The Art and Visual Technology program is located in the arts building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**AVT Honors Program**
Students interested in the Honors Program in Art and Visual Technology should contact the chair of the department. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

General Education (37 credits)

Foundation Requirements

- Oral communication (3)
- Quantitative reasoning (3)
- Information technology (3)
- Written communication:
  - ENGL 101 - Composition Credits: 3
  - ENGL 302 - Advanced Composition Credits: 3 Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature
- Arts* (3)
- Natural science (including at least one laboratory science) (7)
- Western civilization (3)
- Global understanding** (3)
- Social and behavioral sciences (3)

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (78-81 credits)

Studio Foundation (17 credits)
• AVT 101 - New Majors Colloquium Credits: 1
• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 105 - Studio Fundamentals II Credits: 4
• AVT 222 - Drawing I Credits: 4
  and
• AVT 323 - Drawing II Credits: 4
  or
• AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (24 credits)

• ARTH 200 - Survey of Western Art Credits: 3
  or
• ARTH 203 - Survey of Asian Art Credits: 3
  or
• ARTH 204 - Survey of Latin American Art Credits: 3
  and
• ARTH 201 - Survey of Western Art Credits: 3

One course from the following:

• ARTH (300 or 400 level)*
  or
• AVT 305 - Creative Processes Credits: 3
• AVT 309 - Art as Social Action Credits: 3
• AVT 318 - History of Graphic Design Credits: 3
• AVT 371 - Visual Perception and the Arts Credits: 3
• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound and Vision Credits: 4
• AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3

Note:

*Students concentrating in graphic design must take AVT 318 to meet this requirement.

Plus

• ARTH 374 - Art Now Credits: 3
• AVT 301 - Visual Voices Colloquium Credits: 1
• AVT 307 - Aesthetics Credits: 3
• AVT 395 - Writing for Artists Credits: 3
• AVT 472 - Critical Theory in the Visual Arts Credits: 3

Breadth and Experience (12 credits)
Any three of the following:

- AVT 215 - Typography Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Photography I Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to Digital Arts Credits: 4
- AVT 396 - Introduction to Art Teaching and Learning Credits: 3
- AVT 399 - Special Topics in Art and Visual Technology Credits: 1-6

Synthesis (4 credits)

- AVT 497 - Senior Project Credits: 4
  or
- AVT 498 - Senior Design Project Credits: 4

Concentration (24 credits)

24 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking or Sculpture

▲ Drawing (DRW)

- AVT 422 - Drawing III Credits: 4
- AVT 423 - Drawing IV Credits: 4

4 credits from:

- AVT 324 - Figure Drawing Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
- AVT 333 - Painting II Credits: 4
- AVT 336 - Experimental Painting Credits: 4
- AVT 337 - Figurative Painting Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

12 credits from:

- AVT 300–499

Note:
All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)

- AVT 311 - Graphic Design Methods and Principles Credits: 4
- AVT 313 - Editorial Design Credits: 4
- AVT 414 - Corporate Design and Branding Credits: 4
- AVT 415 - Web Design and Usability Credits: 4

8 credits of:

- AVT 419 - Topics in Graphic Design Credits: 1-6

Graphic Design Notes:

AVT 399 or AVT 491 may be taken with permission of the Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

- AVT 373 - Performance Studio Credits: 4
- AVT 473 - Advanced Performance Studio Credits: 4

12 credits from:

- AVT 372 - Hip Hop Culture Credits: 3
- AVT 374 - Sound and Vision Credits: 4
- AVT 376 - Live Movies Credits: 4
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

4 credits from:

- AVT 300–499

▲ New Media Art (NMA)

12 credits from:

- AVT 382 - Digital Art and Animation Credits: 4
- AVT 383 - Three-Dimensional Digital Art Credits: 4
- AVT 390 - Digital Media and Video Art Credits: 4
- AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
- AVT 483 - Internet Art Credits: 4
- AVT 487 - Advanced Digital Media Credits: 4

12 credits from:
- AVT 300–499

▲ Painting (PNT)

- AVT 333 - Painting II Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

12 credits from:
- AVT 300–499

▲ Photography (PHO)

- AVT 353 - Photography II Credits: 4
- AVT 459 - About Photography: Practice and Research Credits: 4

8 credits from:
- AVT 452 - Advanced Photographic Printing I Credits: 4
- AVT 453 - Advanced Photographic Printing II Credits: 4
- AVT 454 - Alternative Photo Processes Credits: 4
- AVT 455 - Advanced Digital Photo Credits: 4
- AVT 456 - Large Format Photography Credits: 4
- AVT 457 - Documentary Photography Credits: 4
- AVT 458 - Advanced Studio Lighting Credits: 4

8 credits from:
- AVT 300–499

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience

▲ Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4
8 credits from:

- AVT 345 - Artists' Books as Visual Language Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 442 - Printmaking III Credits: 4
- AVT 443 - Printmaking IV Credits: 4

12 credits from:

- AVT 300–499

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4

12 credits from:

- AVT 300–499

General Electives

- General Electives (2-5 credits)

Total: 120 credits

Art and Visual Technology, BFA Curriculum for Students Intending to Pursue the MAT Degree in Art Education

Banner Code: AR-BA-AVT

College Hall, Room C200
Phone: 703-993-8898
Web: www.avt.gmu.edu

Faculty

Harold Linton, Chair

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (chair), Mandes, Sandell

Associate professors: Ashcraft (associate chair), Crawford, Feerick, Frenn, White
Assistant professors: Cooley, Cui, Endress, Karametou, Rothstein, Sheridan, Winant (associate chair), Wrbican

Term assistant professors: Constantine, Del Popolo, Malone, Stanley, Starr

Adjunct faculty: Bradley, Bulisova, Carr-Shaffer, Castellana, Chao, Clements, Cushner, DeLuca, Dicicco, Fairfax, Ferreira, Goldman, Gorman, Guerrieri, Herce, Hicks, Ho, Hoffmann, Kerns, Kirk, Nahidian, Organ, Petzwinkler, Rodriguez, Rozario, Sapsford, Serafin, Tomhave, Watson, Wiseman

**Mission**

The Department of Art and Visual Technology (AVT) offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students' appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty's ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the AVT Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

**Course Work**

The Department of Art and Visual Technology offers all course work designated AVT in the Courses chapter of this catalog.

**UNDERGRADUATE PROGRAM**

Students who intend to seek licensure to teach art in Virginia public schools or apply for entrance to the master of arts in teaching program for art education are required to pursue a BFA (any concentration) with the following suggested course work listed below. Requirements for acceptance into the BFA program follow the program description listed here.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.

**Admission to AVT Requirements**

All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review.

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the AVT Department. Please call the main office to schedule an appointment (703-993-8898).

Current Mason students in the AVT BA program who wish to change their degree program to a BFA, or other current Mason students, may apply for admission to the BFA degree program by presenting a substantive college level portfolio and other requested credentials during the department's designated application period at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their AVT concentration in the semester prior to their application to discuss the portfolio.
For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students may alternatively be admitted to study in the BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the Department of Art and Visual Technology for an application and specific directions on presenting the portfolio.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.

**Artsbus Requirement**

All AVT majors must meet the department’s requirement of travel to galleries and museums through the AVT Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**
Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

**Major GPA**

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

**Studios**

The Art and Visual Technology program is located in the arts building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**AVT Honors Program**

Students interested in the Honors Program in Art and Visual Technology should contact the chair of the department. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

**General Education (38 credits)**

**Foundation Requirements**

- Oral communication (3)
- Quantitative reasoning (3)
- Written communication:
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.
Information technology: (Option recommended for BFA/MAT)

- AVT 180 - Computers in the Creative Arts Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
  or
- PHIL 112 - Ethics and the Cybersociety Credits: 1

Core Requirements

- Literature (3)
- Natural science (including at least one laboratory science) (7)
- Western civilization (3)
- Arts: ARTH 200 counted under AVT major requirements
- Global Understanding: ARTH 203 recommended
- Social and Behavioral Sciences: PSYC 100 recommended
- Synthesis options are specified and counted under AVT major requirements
  Arts (outside the major): (Required for BFA/MAT)
- ARTH 200 - Survey of Western Art Credits: 3

  Global understanding: (Option recommended for BFA/MAT)
- ARTH 203 - Survey of Asian Art Credits: 3

  Social and behavioral sciences: (Option recommended for BFA/MAT)
- PSYC 100 - Basic Concepts in Psychology Credits: 3

AVT Major Requirements (78-80 credits)

Studio Foundation (17 credits)

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 4
  or
- AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (24 credits)

Only for students who complete all five of the required undergraduate art education courses (AVT 396, 493, 494, EDUC 301, 302), credits for ARTH 200 may be counted toward the major and the arts university general education requirement

- ARTH 200 - Survey of Western Art Credits: 3
- ARTH 201 - Survey of Western Art Credits: 3
- ARTH 374 - Art Now Credits: 3
• AVT 301 - Visual Voices Colloquium Credits: 1
• AVT 307 - Aesthetics Credits: 3
• AVT 472 - Critical Theory in the Visual Arts Credits: 3
• AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3 (Meets the ARTH 300+ requirement)
• AVT 494 - Teaching Critical Response to Art, PK-12 Credits: 3 (Meets the AVT 395 writing-intensive requirement)

Note:

AVT 301 must be taken for a total of 3 credits or each semester enrolled, if less than three semesters.

Breadth and Experience (three classes: 9-11 credits)

• AVT 262 - Sculpture I Credits: 4
  or another three dimensional-focused course
• AVT 396 - Introduction to Art Teaching and Learning Credits: 3

One of the following courses: (4 credits)

• AVT 215 - Typography Credits: 4
• AVT 232 - Painting I Credits: 4
• AVT 243 - Printmaking I Credits: 4
• AVT 252 - Photography I Credits: 4
• AVT 253 - Introduction to Digital Photography Credits: 4
• AVT 272 - Interdisciplinary Arts Credits: 4
• AVT 280 - Introduction to Digital Arts Credits: 4
• AVT 399 - Special Topics in Art and Visual Technology Credits: 1-6

Synthesis (4 credits)

• AVT 497 - Senior Project Credits: 4
  or
• AVT 498 - Senior Design Project Credits: 4

Concentration (24 credits)

24 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking or Sculpture.

▲ Drawing (DRW)

• AVT 422 - Drawing III Credits: 4
• AVT 423 - Drawing IV Credits: 4
4 credits from:

- AVT 324 - Figure Drawing Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
- AVT 333 - Painting II Credits: 4
- AVT 336 - Experimental Painting Credits: 4
- AVT 337 - Figurative Painting Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

12 credits from:

- AVT 300–499

Note:

All AVT majors concentrating in drawing must complete AVT 232 Painting I under Breadth and Experience.

▲ Graphic Design (GD)

- AVT 311 - Graphic Design Methods and Principles Credits: 4
- AVT 313 - Editorial Design Credits: 4
- AVT 414 - Corporate Design and Branding Credits: 4
- AVT 415 - Web Design and Usability Credits: 4

8 credits of:

- AVT 419 - Topics in Graphic Design Credits: 1-6
  or
- AVT 399 - Special Topics in Art and Visual Technology Credits: 1-6
  or
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

Graphic Design Notes:

AVT 399 or AVT 491 may be taken with permission of Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

- AVT 373 - Performance Studio Credits: 4
- AVT 473 - Advanced Performance Studio Credits: 4
12 credits from:

- AVT 372 - Hip Hop Culture Credits: 3
- AVT 374 - Sound and Vision Credits: 4
- AVT 376 - Live Movies Credits: 4
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

4 credits from:

- AVT 300–499

▲ New Media Art (NMA)

12 credits from:

- AVT 382 - Digital Art and Animation Credits: 4
- AVT 383 - Three-Dimensional Digital Art Credits: 4
- AVT 390 - Digital Media and Video Art Credits: 4
- AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
- AVT 483 - Internet Art Credits: 4
- AVT 487 - Advanced Digital Media Credits: 4

12 credits from:

- AVT 300–499

▲ Painting (PNT)

12 credits from:

- AVT 333 - Painting II Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

12 credits from:

- AVT 300–499

▲ Photography (PHO)

12 credits from:

- AVT 353 - Photography II Credits: 4
- AVT 459 - About Photography: Practice and Research Credits: 4
8 credits from:

- AVT 452 - Advanced Photographic Printing I Credits: 4
- AVT 453 - Advanced Photographic Printing II Credits: 4
- AVT 454 - Alternative Photo Processes Credits: 4
- AVT 455 - Advanced Digital Photo Credits: 4
- AVT 456 - Large Format Photography Credits: 4
- AVT 457 - Documentary Photography Credits: 4
- AVT 458 - Advanced Studio Lighting Credits: 4

8 credits from:

- AVT 300–499

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience

▲ Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4

8 credits from:

- AVT 345 - Artists' Books as Visual Language Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 442 - Printmaking III Credits: 4
- AVT 443 - Printmaking IV Credits: 4

12 credits from:

- AVT 300–499

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4

12 credits from:

- AVT 300–499
General Electives (2-4 credits)

Take the following art education foundation courses to meet state education requirements:

- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3

Total: 120 credits

Note:

Following this curriculum does not guarantee entry into the MAT Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog.

Undergraduate Minor

Art and Visual Technology Minor

Banner Code: AVT

College Hall, Room C200
Phone: 703-993-8898
Web: www.avt.gmu.edu

The minor in AVT requires 20 credits and offers a core of foundational studies with the opportunity for further study in the following areas: drawing, graphic design, InterArts, new media arts, painting, photography, printmaking, or sculpture.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

The requirements are as follows:

- AVT 200–299 (4)
- AVT 300–399 (4)
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4

Total: 20 credits
Master's Degree

Art and Visual Technology, MFA

Faculty

Harold Linton, Chair

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (chair), Mandes, Sandell

Associate professors: Ashcraft (associate chair), Crawford, Feerick, Frenn, White

Assistant professors: Cooley, Cui, Endress, Karametou, Rothstein, Sheridan, Winant (associate chair), Wrbican

Term assistant professors: Constantine, Del Popolo, Malone, Stanley, Starr

Adjunct faculty: Bradley, Bulisova, Carr-Shaffer, Castellana, Chao, Clements, Cusnher, DeLuca, Dicicco, Fairfax, Ferreira, Goldman, Gorman, Guerrieri, Herce, Hicks, Ho, Hoffmann, Kerns, Kirk, Nahidian, Organ, Petzwinkler, Rodriguez, Rozario, Sapsford, Serafin, Tomhave, Watson, Wiseman

GRADUATE PROGRAM

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits of which 45 credits are made up from both core and studio requirements. An additional 15 credits are based on comprehensive experience.

MFA students may choose an emphasis in digital arts, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the AVT Graduate Committee and with prior approval of the CVPA dean, craft an individualized program that meets curricular requirements.

Admission Requirements

In addition to meeting the general university requirements for admission for graduate study, candidates for the MFA must hold a BA or BFA degree. Upon applying, they must submit a portfolio, statement of intent and professional goals, and three letters of reference. Applications will be accepted for the fall semester only. The deadline for receipt of application materials is January 15.

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core courses.
Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work. Portfolio requirements are different for each graduate area of emphasis.

All portfolios must include a slide sheet or CD containing the candidate's images plus an accompanying printed informational sheet that lists the corresponding number, title, date, medium, and size of each work. If slides are included, each image must be labeled with slide number, applicant’s name, title of work, and date. CD's must be labeled with the candidate's name. Incomplete portfolios will not be considered.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the AVT Department at 703-993-8898.

Portfolio requirements by area of emphasis:

Digital Arts: 20 images on a Mac (Apple Macintosh platform)- compatible CD. All images on the CD must be numbered and correspond to the accompanying printed list submitted on a separate sheet. Videos (no more than four minutes for each selection) must be playable from a Mac-compatible CD or DVD. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. Digital arts applicants should not submit slides.

Photography and Printmaking: 20 images on a Mac-compatible CD or slides. All images on the CD must be numbered and correspond to the accompanying printed list submitted on a separate sheet. Printmaking also requires a print portfolio of 12 original prints.

Sculpture and Painting: 20 slides only. All slides must be numbered and labeled and correspond to the accompanying printed list on a separate sheet.

InterArts: 20 images (on a Mac-compatible CD or slides), videos, or writing-based materials. All images on the CD must be numbered and correspond to the accompanying printed list submitted on a separate sheet. If videos are included, they must contain no more than four minutes for each selection. Also, they must be on a Mac-compatible CD or DVD or, if videotape, VHS in NTSC format. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

Supplementary material for all applicants, but not specifically requested by the review committee, such as CDs (Mac compatible only), videos (DVD, VHS in NTSC format), film, web addresses, press clippings, or reviews of exhibitions may be submitted but will be reviewed only at the discretion of the AVT graduate application reviewers. Supplementary material should be clearly marked as such.

Studios

The Art and Visual Technology program is located in the arts building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.
Degree Requirements

Core Requirements (30 credits)

- AVT 500+ Art and Visual Technology Course Work (10)
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6
- AVT 600 - Research Methodologies Credits: 3
- AVT 610 - Graduate Seminar Credits: 1-4 (1 credit repeated for 4 credits)
- AVT 620 - Theory, Criticism, and the Visual Arts Credits: 3
- AVT 670 - Teaching Practicum Credits: 3 or 6

Note

AVT 599 must be taken for a total of 4 credits

Studio Emphases (15 credits)

MFA students must complete 15 credits in digital arts, InterArts, painting, photography, printmaking, or sculpture, as follows:

Digital Arts Emphasis

Any three of the following courses:

- AVT 616 - Networked Art Practice Credits: 5
- AVT 676 - Sound and Music for Video and Animation Credits: 5
- AVT 678 - Interface and CD-ROM Design Credits: 5
- AVT 684 - Two-Dimensional Digital Art Credits: 5
- AVT 686 - Three-Dimensional Digital Art Credits: 5
- AVT 688 - Digital Animation Credits: 5

InterArts Emphasis

Any three graduate studio courses as approved by the division director of InterArts, for a total of 15 credits. InterArts graduate students may combine courses from the studio areas of emphasis and work with faculty to design an interdisciplinary thesis project.

Painting Emphasis

All three of the following courses:

- AVT 632 - Graduate Painting I Credits: 5
- AVT 633 - Graduate Painting II Credits: 5
• AVT 634 - Advanced Graduate Painting Credits: 5

Photography Emphasis

All three of the following courses:

• AVT 652 - Graduate Photography I Credits: 5
• AVT 653 - Graduate Photography II Credits: 5
• AVT 654 - Advanced Graduate Photography Credits: 5

Printmaking Emphasis

All three of the following courses:

• AVT 642 - Graduate Printmaking I Credits: 5
• AVT 643 - Graduate Printmaking II Credits: 5
• AVT 644 - Advanced Graduate Printmaking Credits: 5

Sculpture Emphasis

All three of the following courses:

• AVT 662 - Graduate Sculpture I Credits: 5
• AVT 663 - Graduate Sculpture II Credits: 5
• AVT 664 - Advanced Graduate Sculpture Credits: 5

MFA Comprehensive Experience (15 credits)

Candidates must complete all of the above core and studio requirements as well as the following:

• AVT 796 - Directed Project, Directed Reading, Thesis Credits: 1-9
• AVT 798 - Directed Project, Directed Reading, Thesis Credits: 3
• AVT 799 - Directed Project, Directed Reading, Thesis Credits: 1-3

Note:

The comprehensive experience involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

AVT 796 must be taken for a total of 9 credits

AVT 799 must be taken for a total of 3 credits

Total: 60 credits
Art Education

Renee Sandell, Program Director
Phone: 703-993-8562
Web: arteducation.gmu.edu

The master of arts in teaching in art education is a preservice degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, and studio work prior to preservice teaching internship and seminar.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Master's Degree

Art Education, MAT

Banner Code: AR-MAT-ARTE

Renee Sandell, Program Director
Phone: 703-993-8562
Web: arteducation.gmu.edu

GRADUATE PROGRAM

The master of arts in teaching in art education is a pre-service degree program that prepares students with a BFA degree, or equivalent, for Pre K–12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, and studio work prior to pre service teaching internship and seminar.

The MAT in Art Education Program fosters the quality studio breadth and expertise; comprehensive art historical knowledge; access to contemporary, local, and global art forms and artists; and proficiency in art education theory and practice needed to prepare highly qualified art teachers for a lifetime of professional teaching, learning, and leadership.

Admission Requirements

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in art, or approved equivalent. Also, candidates must have a minimum 3.00 cumulative undergraduate GPA; any exceptions will be considered on an individual basis. Eligibility for the MAT in Art Education Program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy will be required to satisfy prerequisite courses prior to the required graduate courses.
Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 15 and March 15. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
- Official score on Praxis I or SAT equivalent
- TOEFL score, if required by Mason policies
- Portfolio of 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be in Power Point format on a Mac-compatible CD. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. Qualified applicants will be invited to an on-campus interview, portfolio review of original art works, and in-person writing sample.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core, and studio and art history courses.

MAT matriculants who earned a BFA at an institution other than Mason may be required to take additional undergraduate credits as post baccalaureate core requirements before acceptance into the program. Without equivalent courses, they will be required to take a set of five BFA foundational courses in art education and education: AVT 396, 493 and 494 and EDUC 301 and 302.

In addition, applicants who did not take equivalent undergraduate courses must also take AVT 472 Critical Theory in the Visual Arts and AVT 180 Computers in the Creative Arts, plus any additional studio or art history course work to meet Virginia licensure requirements.

**Professional Teaching Portfolio and Qualifications Review**

The comprehensive experience for the MAT includes the following: (1) a group exhibition, “The Art of Teaching Art Showcase,” in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate’s own artwork, and (2) a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching. All process folios, lesson plans, explanations of projects, visual images, and other relevant materials must be made available for the project committee to review. Artworks and all materials should be exhibited in a manner that reveals the student’s aesthetic accomplishments. This exhibition and review will assess the MAT candidate’s final professional teaching portfolio that may be used at interviews for employment. These requirements will be accomplished during the internship seminar course that accompanies student teaching. A committee of MAT faculty will determine whether the student has mastered the field of study. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education Program.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Degree Requirements**

- AVT 605 - Issues and Research in Art Education Credits: 3
- AVT 615 - Technology for Art Teachers Credits: 3
AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 4
AVT 668 - Three-Dimensional Art Making across Cultures Credits: 4
AVT 691 - Elementary Art Education Credits: 3
AVT 692 - Secondary Art Education Credits: 3
AVT 695 - Internship in Art Education (Student Teaching) Credits: 6
AVT 696 - Seminar for Student Teachers Credits: 1
EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3

Total: 30 credits

Notes:

MAT students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Arts Management

4260 Chain Bridge Road
Fairfax, VA 22030
Phone: 703-993-8926
Web: artsmanagement.gmu.edu

Faculty

Richard Kamenitzer, Program Director

Professor: Reeder

Associate professors: Brindle, Marcus, Martin

Term associate professor: Kamenitzer (program director)

Adjunct faculty: Allen, Berardelli, Bienvenu, Case, Coppage, Dawn, Denhardt, Haputle, Hill, Huschle, Kaiser, Kraft, Lopez, Madden, Murray, Richard, Simpson, Smyers, Thompson

Course Work

The Arts Management Program offers all course work designated MAM in the Courses chapter of this catalog.

Graduate Certificates:

Arts Entrepreneurship
The Arts Entrepreneurship certificate is for early to mid-career professionals working at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the actual execution of business models.

**Fund Raising and Development in the Arts**

The Fund Raising and Development certificate is especially helpful for mid-career professionals. It focuses on the practical application of development principles, writing and communication skills, and strategic planning.

**Public Relations and Marketing in the Arts**

The Public Relations and Marketing in the Arts certificate focuses on strategic planning, development and implementation of public relations and marketing in arts organization for the beginning and mid-level professional.

**Special Events Management in the Arts**

The Special Events Management in the Arts certificate is for the entry level or mid-level professional to increase their skills in the fast paced and creative field of events management.

**PROGRAM**

The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the world of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of performing and visual arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship-building management among the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 23-credit core and then select courses from a cluster: entrepreneurship in the arts and management; finance and budgeting for the arts; marketing and public relations; or an arts-specific cluster. Students also take internal and external internships. The internal internship affords an in-depth opportunity to work with professionals in residence at Mason’s Center for the Arts. The external internship provides the opportunity to work at more than 60 different visual and performing arts venues in the Washington, D.C. metropolitan area.

**Admissions Requirements**

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that applicants will come from the arts community, with experience and training in music, dance, theater, and visual and technical arts and wish to add the skills of marketing, finance, strategy, entrepreneurship, and management to their repertoire. It is also expected that students will enter with more developed skills in the business side of the arts and wish to unite these skills with prior experiences in the arts. Completed applications must be received by March 1 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution
Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities

A two-page (maximum) statement of intent and goals

Applicants might be asked to interview with at least one member of the program faculty or Admissions Committee. In addition, applicants may submit a portfolio that demonstrates work experience. Internship experience for recent graduates will also be considered.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

Core Requirements (23 credits)

- MAM 601 - Fund Raising/Development in Arts Credits: 3
- MAM 602 - Seminar in Arts Management Credits: 3
- MAM 603 - Arts in Society Credits: 3
- MAM 604 - Public Relations and Marketing Strategies for the Arts Credits: 3
- MAM 606 - Board of Directors Management Credits: 3
- MAM 704 - Finance and Budgeting for Arts Organizations Credits: 3
- MAM 705 - Budgeting/Finance for Arts Organizations II Credits: 2
- MAM 710 - Arts Policy Credits: 3

Internships (6 credits)

- MAM 740 - Internal Internship-Laboratory Rotation Credits: 2
• MAM 790 - External Internship Credits: 2-4

Clusters of Electives (7 credits)

Select a cluster of electives:

Entrepreneurship in the Arts and Management

• MAM 712 - Grant Writing in the Arts Credits: 1
• MAM 750 - Arts Entrepreneurship I Credits: 3
• MAM 751 - Arts Entrepreneurship II Credits: 3

Finance and Budgeting for the Arts

• MAM 712 - Grant Writing in the Arts Credits: 1
• MAM 711 - Directed Readings and Project Course Credits: 1-6

Marketing and Public Relations

Select from the following courses:

• MAM 599 - Special Topics in Arts Management Credits: 1-6
• MAM 607 - Fund Raising/Development in Arts II Credits: 3
• MAM 608 - Executive Management of Arts Communications Credits: 3
• MAM 711 - Directed Readings and Project Course Credits: 1-6

Arts/Arts Management Specific Cluster

• MAM 599 Gallery Management (3)

Four credits of course work in arts management, art and visual technology, dance, music, and theater determined in conjunction with the program director.

Total: 36 credits

Master's Level Certificate

Arts Entrepreneurship Graduate Certificate

Banner Code: AR-CERG-AENT
The 15-credit Graduate Certificate in Arts Entrepreneurship is for early to mid-career professionals working at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the executing business models. Certificate courses will address areas of idea generation, market analysis and testing, arts business and revenue modeling, public relations and marketing strategies, budgeting and finance, public policy, and government relations. Learning together in a cohort-modeled certificate program, students will develop strong interpersonal skills, public communication strategies, and team-based problem-solving strategies.

**Admission Requirements**

For admission into the arts entrepreneurship certificate, prospective students must show graduation from a bachelor’s program (or equivalent) and related work experience. Students apply through Mason’s Office of Admissions, and applications will be approved by a committee established by the Arts Management Program. Courses taken in pursuit of the certificate are eligible to be applied toward the master of arts in arts management, if these courses meet approval.

**Certificate Requirements**

- Electives as approved by the Arts Management Program Credits: 3
- MAM 604 - Public Relations and Marketing Strategies for the Arts Credits: 3
- MAM 704 - Finance and Budgeting for Arts Organizations Credits: 3
- MAM 750 - Arts Entrepreneurship I Credits: 3
- MAM 751 - Arts Entrepreneurship II Credits: 3

Total: 15 credits

**Fund Raising and Development in the Arts Graduate Certificate**

**Banner Code: AR-CERG-FRDA**

The ability to create, direct, and manage fundraising and development departments within not-for-profit organizations can be most challenging for Arts Managers. The 18 credit Fund Raising and Development in the Arts Graduate Certificate Program, especially helpful for mid-career professionals, focuses on the practical application of development principles, writing and communication skills, and strategic planning. A grants writing class adds to the much needed knowledge of not only how to write grants but also how funders are most motivated to fund operating expenses, management training, and special projects. Both of the budget and finance classes equip professionals with the skills to keep arts organizations financially sound and meet the goals of contributed and non-contributed income.

**Admission Procedures and Requirements**

For admission into the Fund Raising and Development in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason’s Office of Admissions, and applications will be approved by a committee established by the Arts Management Program.

**Core Courses (18 credits)**
Public Relations and Marketing in the Arts Graduate Certificate

Banner Code: AR-CERG-PRMA

The Public Relations and Marketing in the Arts Graduate Certificate Program focuses on strategic planning, development and implementation of public relations and marketing in arts organizations for the beginning and mid-level professional. Specific areas of audience, community, and markets in relation to applied marketing media and advertising are studied to improve continuance of current audiences and connecting new patrons. Creative and sound practices in both executing and managing communications are presented. Budget and finance courses round out the 18 credit program to safeguard arts organizations to be financially healthy with both short term and long term goals strategically in place.

Admission Procedures and Requirements

For admission to the Public Relations and Marketing in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason's Office of Admissions, and applications will be approved by a committee established in the Arts Management Program.

Core Courses (18 credits)

- MAM 601 - Fund Raising/Development in Arts Credits: 3
- MAM 602 - Seminar in Arts Management Credits: 3
- MAM 604 - Public Relations and Marketing Strategies for the Arts Credits: 3
- MAM 608 - Executive Management of Arts Communications Credits: 3
- MAM 704 - Finance and Budgeting for Arts Organizations Credits: 3
- MAM 705 - Budgeting/Finance for Arts Organizations II Credits: 2
- MAM 711 - Directed Readings and Project Course Credits: 1-6
- MAM 712 - Grant Writing in the Arts Credits: 1

Special Events Management in the Arts Graduate Certificate

Banner Code: AR-CERG-SEMA
The 17 credit Special Events Management in the Arts Graduate Certificate Program is for the entry level or mid-level professional to increase their skills in the fast paced and creative field of events management. Whether as an addition to a performing arts event or a stand alone gala, festival or fund raiser, the special events manager must combine their professional perspective with much creativity and marketability. The Festival and Special Events course specifically focuses on the different stages of creative idea development, planning, budgeting, marketing, networking, gaining financial and volunteer support, design, decor, and additional special attention to details to make an event successful and memorable.

Admission Procedures and Requirements

For admission into the Special Events Management in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason's Office of Admission and applications will be approved by a committee established by the Arts Management Program.

Core Courses (17 credits)

- MAM 601 - Fund Raising/Development in Arts Credits: 3
- MAM 602 - Seminar in Arts Management Credits: 3
- MAM 604 - Public Relations and Marketing Strategies for the Arts Credits: 3
- MAM 704 - Finance and Budgeting for Arts Organizations Credits: 3
- MAM 705 - Budgeting/Finance for Arts Organizations II Credits: 2
- MAM 706 - Festivals and Special Events Credits: 3

UNDERGRADUATE PROGRAM

The 120 credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability postgraduation.

Course Work
The Computer Game Design Program offers all course work designated GAME in the Courses chapter of this catalog.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students seeking a BFA in computer game design should speak with the program director about this requirement.

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

**Major GPA**

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

Course Work

The Department of Dance offers all course work designated DANC in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

The Dance Department offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the department web page, dance.gmu.edu, or by calling the department office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Certification to Teach
This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.
- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).
- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.
- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.
- With committee approval, register for and complete EDUC 300 and 302 and EDRD 300.
- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a postbaccalaureate semester.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**GRADUATE PROGRAM**

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching in higher education. Candidates are expected to enter the program with significant professional performance at the national or international level, advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.

**Admission Requirements**

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the Dance Department a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the Dance Department at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

UNDERGRADUATE PROGRAM

The Dance Department offers a BFA. Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the department web page, dance.gmu.edu, or by calling the department office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Because of the professional nature of the BFA degree, the program requires completion of 126 credits of course work. The BFA in dance is a performance-oriented program designed to prepare students professionally as performers, choreographers, and teachers, as well as prepare them for graduate study. Students in this program demonstrate significant technical mastery and devote a large portion of their college study to an intensive and comprehensive dance curriculum.

The BFA degree offers a modern dance major that allows for concentrated study in performance, choreography, or teaching. Daily technical training includes ballet, a strong emphasis on modern dance, and opportunities to study jazz and world dance forms. Students may request admission into the BFA program during the candidate’s freshman year. Student progress in the BFA program is assessed annually.

Course Work

The Department of Dance offers all course work designated DANC in the Courses chapter of this catalog.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Academic Policies
Certification to Teach

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.**
- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).
- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.
- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.
- With committee approval, register for and complete EDUC 300 and 302 and EDRD 300.
- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a postbaccalaureate semester.

- DANC 445 - Advanced Ballet Credits: 1-3
- DANC 453 - Teaching Creative Movement Credits: 3
- DANC 455 - Teaching Practicum Credits: 1-6

Note:

Additional technique and performance credits beyond those required in the major core may be applied to dance electives.

Electives

- Electives (3)

Total: 126 credits

Undergraduate Minor
Dance Appreciation Minor

Banner Code: DANC

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

The minor (21 credits) offers students an opportunity to study a variety of movement styles and understand dance in its historical and cultural context. A maximum of 4 transfer credits may be applied to the dance minor.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

All minors must complete the following courses:

Core (6 credits):

All minors must complete the following courses:

- DANC 101 - Dance Appreciation Credits: 3
- DANC 118 - World Dance Credits: 3

Students must complete three of the following courses (9 credits):

- DANC 125 - Beginning Modern Dance Credits: 3
- DANC 145 - Beginning Ballet Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3

Note:

Students with prior experience in ballet and/or modern dance may, with permission of instructor, take all nine credits of technique courses at the 200 level.

All minors must demonstrate a basic level of training in both modern dance and ballet, and therefore, complete nine credits of modern and ballet technique.

Students must choose two or more courses from the following (6 credits):

- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 301 - What is Dance? Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 420 - Special Topics in Dance Credits: 1-3

Total: 21 credits

Notes:

Substitutions may be proposed to department faculty for approval.

* DANC 118 fulfills the global understanding requirement. Students who choose to take this course twice for the minor must select two different world cultures.

GRADUATE PROGRAM

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching in higher education. Candidates are expected to enter the program with significant professional performance at the national or international level, advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.
Admission Requirements

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the Dance Department a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the Dance Department at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

- DANC 501 - Graduate Dance Seminar Credits: 3
- DANC 525 - Advanced Modern Dance Credits: 1-3
- DANC 545 - Advanced Ballet Credits: 1-3
- DANC 560 - Advanced Choreography Credits: 3
- DANC 570 - Advanced Dance Performance Credits: 1-3
- DANC 571 - Residency Workshop Credits: 1
- DANC 580 - Laban Movement Analysis Credits: 3
- DANC 598 - Philosophy and Aesthetics of Dance Credits: 3
- DANC 615 - Contemporary Trends Credits: 3
- DANC 627 - Advanced Teaching Seminar Credits: 3
- DANC 680 - Dance Management Credits: 3
- DANC 790 - Internship Credits: 1-3
- DANC 799 - Thesis Credits: 1-6

Technique and Performance Credits

All MFA majors are required to take 18 credits of technique classes distributed as follows:

DANC 525 Modern Technique (9-12 credits)
DANC 545 Ballet Technique (6-9 credits)

Electives (6 credits)

Total: 60 credits

Note:
Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

■ **Film and Video Studies**

Performing Arts Building, Room A407  
Phone: 703-993-1992

**Faculty**

Cynthia Lont, Program Director

Clayton Austin, Theater; Thomas Britt, Film and Video Studies; Julie Christensen, Modern and Classical Languages; Mark Cooley, Art and Visual Technology; Lynne Constantine, Art and Visual Technology; Edgar Endress, Art and Visual Technology; Peggy Feerick, Art and Visual Technology; Cynthia Fuchs, English; Edward Gero, Theater; Timothy Gibson, Communication; Carma Hinton, Robinson Professor; Richard Kamenitzer, Arts Management; Howard Kurtz, Theater; Alison Landsberg, History and Art History; Scott Martin, Arts Management; Kristina Olsen, Modern and Classical Languages; Paula Petrik, History and Art History; Janine Ricouart, Modern and Classical Languages; Mark Sample, English; Jessica Scarlata, English; Gail Scott White, Art and Visual Technology; Martin Winkler, Modern and Classical Languages; Sue Wrbican, Art and Visual Technology

**Course Work**

The Film and Video Studies Program offers all course work designated FAVS in the Courses chapter of this catalog.

**PROGRAM**

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, English, History and Art History, Modern and Classical Languages, New Century College, and Theater. Students study film and video production, theory, criticism, ethics, screenwriting, and business.

The vocabulary of film (broadly defined) now pervades the intellectual, cultural, political, and social landscape. The tools the filmmaker wields apply to an ever-widening range of tasks across the fields of human endeavor, from traditional narrative and documentary productions to academic research and pedagogical applications to projects of personal expression. Emerging technology makes the means of production available to anyone with access to a moderate level of computing power. This combination of factors makes film an important subject for academic inquiry and training.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students seeking a BA in film and video studies fulfill this requirement by completing THR 482.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

General Education (40 credits)

Foundation Requirements

- Oral communication (3)
- Information technology (3)

Quantitative reasoning:
  - Either appropriate placement score on quantitative skills and one of
    - MATH 108 - Introductory Calculus with Business Applications,
    - MATH 110 - Introductory Probability and Statistics,
    - MATH 111 - Linear Mathematical Modeling,
    - MATH 113 - Analytic Geometry and Calculus I,
    - MATH 115 - Analytic Geometry and Calculus I (Honors),
    - MATH 125 - Discrete Mathematics I;
    - or
    - IT 250;
    - or
    - STAT 250 - Introductory Statistics I;
    - or
    - lower placement score requiring MATH 106.

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Core Requirements

- Literature (3)
- Arts (3)
- Natural science (including one laboratory science) (7)
- Western civilization (3)
- Global understanding (3)
- Social and behavioral sciences (3)
- Synthesis requirement (3)
- Foreign language or a minor (see College of Visual and Performing Arts for foreign language requirements)

Notes:

FAVS majors may not double-count courses toward both the FAVS major and university general education requirements.

Major (48 credits)

Film and Video Studies Core Requirements (30 credits)
Students must earn a minimum grade of C in all core courses (AVT 204; COMM 355, 454; ENGL 331, 332; FAVS 100, 355, 450, 499; THR 482).

- AVT 204 - Visual Thinking Credits: 3
- COMM 355 - Video Principles and Practices Credits: 3
- COMM 454 - Free Speech and Ethics Credits: 3
  or
- FAVS 352 - Ethics of Film and Video Credits: 3
- ENGL 331 - Introduction to Documentary Credits: 3
- ENGL 332 - Introduction to Film Credits: 3
- FAVS 100 - Film and Video Studies Colloquium Credits: 1
- FAVS 355 - Film Business Practices Credits: 3
- FAVS 450 - Internship in Film and Video Studies Credits: 3
- FAVS 499 - Senior Project Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3

Note:
FAVS 100 must be taken for a total of 3 credits.

**Analysis, History, Theory (6 credits)**

Take 6 credits from the following:

- CHIN 320 - Contemporary Chinese Film Credits: 3
- COMM 255 - Introduction to Media Literacy Credits: 3
- COMM 365 - Women and Media Credits: 3
- COMM 380 - Media Criticism Credits: 3
- ENGL 334 - Literary Approaches to Popular Culture Credits: 3
- ENGL 421 - Topics in Film History Credits: 3
- ENGL 422 - Topics in Film Theory Credits: 3
- ENGL 490 - Special Topics in Film Credits: 3
- ENGL 493 - Special Topics in Popular Literature Credits: 3
- FREN 470 - Topics in French Cinema Credits: 3
- HIST 393 - Topics in Film and History Credits: 3
- JAPA 320 - Japanese Cinema Credits: 3
- RUSS 470 - Topics in (Post) Soviet Film Credits: 3

**Video Production (6 credits)**

Take 6 credits from the following:

- AVT 354 - Digital Photo Credits: 4
- AVT 356 - Studio Lighting I Credits: 4
- AVT 374 - Sound and Vision Credits: 4
- AVT 376 - Live Movies Credits: 4
- AVT 382 - Digital Art and Animation Credits: 4
• AVT 383 - Three-Dimensional Digital Art Credits: 4
• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 457 - Documentary Photography Credits: 4
• AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4
• COMM 358 - Video Producing and Directing Credits: 3
• COMM 360 - Video Editing Credits: 3
• COMM 363 - Media Career Seminar Credits: 1
• COMM 366 - Visual Communication Credits: 3
• COMM 399 - Special Topics in Communication Credits: 1-3
• FAVS 365 - Documentary Filmmaking I Credits: 3
• THR 230 - Introduction to Technical Theater Credits: 3
• THR 235 - Fundamentals of Costume Construction Credits: 3
• THR 314 - Lighting Stagecraft Credits: 3
• THR 334 - Lighting Design Credits: 3
• THR 336 - Advanced Theater Technology Credits: 3
• THR 423 - Audition Techniques: Stage and Camera Credits: 3

Note:

See Program Director for COMM 399 specifics.

Electives in Area of Specialization (6 credits)

Students are required to take two courses demonstrating a focus in subject matter, possibly from the following departments:

• History,
• Music,
• Psychology,
• Sociology and Anthropology,
  or
• Theater.

General Electives (32)

Students must use general electives to either complete a minor program outside the major field of study or demonstrate intermediate-level proficiency in one foreign language.

Total: 120 credits

■ Music
Faculty

James Gardner, Chair

Professors: Camphouse, Carroll, Engebretson, J. Gardner (chair), Maiello, Miller, Monson (associate chair), Smith

Term professor: Balakerskaia, Hearden, Johonnott, Lapple

Associate professors: Billingham, T. Owens

Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Hughes, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner

Course Work

The Music Department offers all course work designated MUSI in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

The two undergraduate degree programs offered through the Department of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the department enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The department also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the department provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The department also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The department seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the music department web site: gmu.edu/departments/music.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the Department of Music at 703-993-1380 for additional information.
Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

**Teacher Licensure**

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this chapter. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

**GRADUATE PROGRAMS**

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

**Graduate Certificates**

**Instrumental Performance Artist Graduate Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Piano Performance Artist Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Vocal Performance Artist Graduate Certificate**

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

**Music, MM**

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of
the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance (single or multiple instruments), music education, composition, conducting, and pedagogy and performance. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

**PhD in Music Education (pending SCHEV approval)**

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

**Doctor of Music Arts (pending SCHEV approval)**

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline. DMA graduates are qualified to teach music at the college or university level, as well as K–12.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Undergraduate Degree**

**Music, BA**

 **Banner Code:** AR-BA-MUSI

Performing Arts Building, Room A417  
Phone: 703-993-1380  
Web: gmu.edu/departments/music

**Faculty**

James Gardner, Chair  

**Professors:** Camphouse, Carroll, Engebretson, J. Gardner (chair), Maiello, Miller, Monson (associate chair), Smith  

**Term professor:** Balakerskaia, Hearden, Johonnott, Lapple  

**Associate professors:** Billingham, T. Owens
Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Hughes, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner

The bachelor of art (BA) in music prepares students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the music department web site: gmu.edu/departments/music.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the Department of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Students pursuing a BA must complete the general education program outlined below. This distribution enables students to develop a breadth of knowledge, as well as the necessary skills to make the in-depth study of a major truly meaningful. In addition to general education requirements, students must also demonstrate intermediate-level proficiency in one foreign language or complete a minor program. A minimum of 57 credits in music course work is required for the music major. A total of 120 credits is required.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing-intensive requirement.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (25-46 credits)

Foundation Requirements

- Quantitative reasoning (mathematics)* (3)
- Written Communication:
- ENGL 101 - Composition Credits: 3
ENGL 302 - Advanced Composition Credits: 3
Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature* (3)
- Natural science* (two classes; one must contain a lab) (7)
- Western civilization (3)
- Social or behavioral science* (3)

Notes:

* Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Other (0-21 credits)

- Intermediate-level language proficiency* or an academic minor

Note:

* See beginning of CVPA chapter for foreign language requirement.

Music Major (57 credits)

Musicianship (28 credits)

- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Form and Analysis Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2

(Pianists substitute MUSI 371 and 372 for MUSI 171 and 172)
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 172 - Keyboard Skills II Credits: 1
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 431 - Music History in Society III Credits: 3 (Meets university general education global understanding requirement)

Music History Courses:
MUSI 331 and 332 Music History in Society I and II
or MUSI 331 and 432 I and IV
or MUSI 332 and 432 II and IV (6 credits)

Performance and Music Electives (29 credits)

- Applied music (PMI) (8)
- Large ensemble (Transfer students must earn at least 2 credits at Mason) (4)
- Additional ensembles (Large or small; meets university general education arts requirement) (3)
- MUSI 415 - Music in Computer Technology Credits: 3 (Meets university general education information technology requirement)
- MUSI 251 - The Art of Teaching Music Credits: 3 (Meets university general education communication requirement)
- MUSI 351 - Keyboard Pedagogy Credits: 3
  or
- MUSI 352 - Vocal Pedagogy and Lab Credits: 3
  or
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 395 - Teaching Internship Credits: 1-4
- MUSI 490 - Musical Communication in Context Credits: 3 (Meets university general education synthesis requirement)
- MUSI 300 - Recital Attendance Credits: 0 (five semesters)

Note

MUSI 395 must be taken for 2 credits

Electives (17-38 credits)

Can include additional music courses.

Total: 120 credits

Music, BM

Banner Code: AR-BM-MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380

The bachelor of music (BM) prepares students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the Department of Music before the scheduled audition date.

Auditions are held approximately once per month. Audition dates and audition application forms are available through the music department web site: gmu.edu/departments/music

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the Department of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

One hundred twenty credits are required for the BM degree. Four concentrations are offered: composition, jazz, music education, and performance. Students are required to complete core courses in one of the concentrations plus courses listed below in one of the points of emphasis relative to the concentration. Eligibility to continue in upper-level courses will be assessed during the sophomore year of study.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Teacher Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this chapter. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

Academic Policies

Degree Requirements

▲ Concentration in Composition (CPO):

General Education (21 credits)

Foundation Requirements

- Analytical reasoning (mathematics)* (3)
- Written Communication:
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

- Literature* (3)
- Natural science* (3)
- Western civilization (3)
- Social or behavioral science* (3)

Notes:

*Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Music Core Courses (72 credits)

- MUSI 485 M3E or Healing Arts Ensemble (4)
  (four semesters)
- MUSI 251 - The Art of Teaching Music Credits: 3 (general education communications)
- MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
- MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)
- MUSI 324 - Junior Recital Credits: 1
- MUSI 424 - Senior Recital Credits: 1
- MUSI 491 - Musical Communication in Performance Credits: 1 (Synthesis)
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2
- MUSI 213 - Sight Singing and Ear Training III Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
MUSI 215 - Theory III Credits: 3
MUSI 216 - Form and Analysis Credits: 3
MUSI 273 - Keyboard Skills III Credits: 1
MUSI 319 - Class Composition and Arranging Credits: 3
MUSI 379 - Introduction to Jazz Improvisation Credits: 1
MUSI 419 - Orchestration Credits: 3
MUSI 331 - Music History in Society I Credits: 3
MUSI 332 - Music History in Society II Credits: 3
MUSI 432 - Music History in Society IV Credits: 3
MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
MUSI 363 - Class Woodwinds: Flute and Clarinet Credits: 1
or
MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1
MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1
or
MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1
MUSI 366 - Class Percussion Credits: 1
MUSI 454 - Jazz Arranging Credits: 3
or
MUSI 485 - Chamber Ensembles Credits: 1
MUSI 300 - Recital Attendance Credits: 0 (five semesters)
MUSI 248 - PMI Composition Credits: 2
MUSI 448 - PMI Composition Credits: 2-3 (four semesters)

Note:

MUSI 448 must be taken for four semesters for a total of 12 credits
MUSI 485 option must be taken for 3 credits

Emphasis Requirement (complete one) (27 credits)

Composition: Brass emphasis

- MUSI 245 Applied Music: Brass (three semesters) (6)
- MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (1)
- MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) (3)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- MUSI 353 Instrumental Pedagogy and Literature (3)
- MUSI 391 and MUSI 396 Instrumental Conducting I and II (4)
- General Electives (8)
Composition: Guitar emphasis

- MUSI 246 Applied Music: String (three semesters) (6)
- MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble (1)
- MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) (3)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- MUSI 353 Instrumental Pedagogy and Literature (3)
- MUSI 391 and MUSI 396 Conducting I and II (4)
- General Electives (8)

Composition: Keyboard emphasis

- MUSI 242 Applied Music: Keyboard (three semesters) (6)
- MUSI 381, MUSI 384, or MUSI 385 Chorus (1)
- MUSI 381, MUSI 384, or MUSI 385 Chorus (three semesters) (meets general education fine arts requirement) (3)
- MUSI 351 Keyboard Pedagogy (3)
- MUSI 371 and MUSI 372 Accompanying I and II (2)
- MUSI 391 and MUSI 396 Conducting I and II (4)
- General electives (8)

Composition: Percussion emphasis

- MUSI 247 Applied Music: Percussion (three semesters) (6)
- MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (1)
- MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) (3)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- MUSI 353 Instrumental Pedagogy and Literature (3)
- MUSI 391 and MUSI 396 Conducting I and II (4)
- General electives (8)

Composition: String emphasis

- MUSI 246 Applied Music: String (three semesters) (6)
- MUSI 387 Ensemble (1)
- MUSI 387 Ensemble (three semesters) (meets general education fine arts requirement) (3)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- MUSI 353 Instrumental Pedagogy and Literature (3)
- MUSI 391 and MUSI 396 Conducting I and II (4)
- General electives (8)

Composition: Voice emphasis

- MUSI 243 Applied Music: Voice (three semesters) (6)
- MUSI 381, MUSI 384, or MUSI 385 Chorus (1)
- MUSI 381, MUSI 384, or MUSI 385 Chorus (three semesters) (meets general education fine arts requirement) (3)
• MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
• MUSI 352 Vocal Pedagogy (3)
• MUSI 391 and MUSI 396 Choral Conducting I and II (4)
• General electives (8)

Composition: Woodwind emphasis

• MUSI 244 Applied Music: Woodwind (three semesters) (6)
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (1)
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) (3)
• MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
• MUSI 353 Instrumental Pedagogy and Literature (3)
• MUSI 391 and MUSI 396 Choral Conducting I and II (4)
• General electives (8)

Total: 120 credits

▲ Concentration in Jazz (JACZ):

General Education (21 credits)

Foundation Requirements

• Quantitative reasoning (mathematics)* (3)
• Written Communication:
• ENGL 101 - Composition Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

• Literature* (3)
• Natural science* (3)
• Western civilization (3)
• Social or behavioral science* (3)

Notes:

*Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.
Music Core Courses (74 credits)

- MUSI 251 - The Art of Teaching Music Credits: 3 (general education communications)
- MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
- MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)
- MUSI 389 - Jazz Ensemble Credits: 1 (three semesters) (general education fine arts)
- MUSI 324 - Junior Recital Credits: 1
- MUSI 424 - Senior Recital Credits: 1
- MUSI 491 - Musical Communication in Performance Credits: 1 (Synthesis)
- MUSI 389 - Jazz Ensemble (5 semesters)
- MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (5 semesters)
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2
- MUSI 213 - Sight Singing and Ear Training III Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Form and Analysis Credits: 3

- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 432 - Music History in Society IV Credits: 3
- MUSI 492J - Selected Topics in Music Credits: 1-3 (Topics in Jazz Studies 3 credits)
- MUSI 391 - Conducting I Credits: 2
- MUSI 450 - Jazz Improvisation I Credits: 2
- MUSI 452 - Jazz Improvisation II Credits: 2

Note

Students concentrating in Jazz Studies must take MUSI 389 Jazz Ensemble for a total of 8 credits

Emphasis Requirement (complete one) (25 credits)

Jazz: Brass emphasis

- MUSI 245 Applied Music (four semesters) (8)
- MUSI 445 Applied Music (four semesters) (12)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- General electives (3)
Jazz: Guitar emphasis

- MUSI 246 Applied Music (four semesters) (8)
- MUSI 446 Applied Music (four semesters) (12)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- General electives (3)

Jazz: Keyboard emphasis

- MUSI 242 Applied Music (four semesters) (8)
- MUSI 442 Applied Music (four semesters) (12)
- MUSI 371 and MUSI 372 Accompanying I–II (2)
- General electives (3)

Jazz: Percussion emphasis

- MUSI 247 Applied Music (four semesters) (8)
- MUSI 447 Applied Music (four semesters) (12)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- General electives (3)

Jazz: Woodwind emphasis

- MUSI 244 Applied Music (four semesters) (8)
- MUSI 444 Applied Music (four semesters) (12)
- MUSI 171 and MUSI 172 Keyboard Skills I and II (2)
- General electives (3)

Total: 120 credits

▲ Concentration in Music Education (MUE):

Certification to Teach

The music education concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Minimum scores on the Praxis I and II, and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the music education concentration by the department’s Music Teacher Education Committee. They must have earned 45 to 60 credits and completed Sight Singing and Ear Training III, Keyboard Skills III, and Theory III with a grade of C or higher. Other requirements are as follows:

- Submit scores for the Praxis I (Reading, Writing, and Mathematics) tests to the committee. It is strongly recommended that students take the Praxis I tests as soon as ENGL 302, a course in literature, and a course in mathematics have been completed.
• Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
• Earn no grade lower than a C in music and professional education courses needed for graduation.
• Successfully pass sight singing, ear training, keyboard, and conducting proficiency exams during the first music methods course (MUSI 461, 463, 464, 466, or 467). Students in the voice emphasis must also pass a voice proficiency exam, and students in the instrumental emphasis must pass a musical instrument fingering proficiency exam during the first music methods course.
• Complete all course work in the program sequence.

On fulfilling the above requirements, students must complete 15 weeks of a full-time internship or student teaching. Applications for placement, subject to approval of the committee, are submitted to the Office of Teacher Education at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching and the Praxis II (Music: Content Knowledge) test during the internship semester.

General Education (21 credits)

Foundation Requirements

• Quantitative reasoning (mathematics)* (3)
• ENGL 101 - Composition Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

• Literature* (3)
• Natural science* (3)
• Western civilization (3)
• Social or behavioral science* (3)

Notes:

*Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Music Core Courses (59 credits)

• MUSI 251 - The Art of Teaching Music Credits: 3 (general education communications)
• MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
• MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)
• MUSI 495 - Internship in Music Education: Student Teaching Credits: 6 (general education synthesis)
• MUSI 323 - Music Education Recital Credits: 0
• MUSI 113 - Sight Singing and Ear Training I Credits: 2
• MUSI 114 - Sight Singing and Ear Training II Credits: 2
• MUSI 213 - Sight Singing and Ear Training III Credits: 2
• MUSI 115 - Theory I Credits: 3
• MUSI 116 - Theory II Credits: 3
• MUSI 215 - Theory III Credits: 3
• MUSI 216 - Form and Analysis Credits: 3
• MUSI 273 - Keyboard Skills III Credits: 1
• MUSI 319 - Class Composition and Arranging Credits: 3
• MUSI 331 - Music History in Society I Credits: 3
• MUSI 332 - Music History in Society II Credits: 3
• MUSI 432 - Music History in Society IV Credits: 3
• MUSI 300 - Recital Attendance Credits: 0
  (five semesters)
• MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
• MUSI 366 - Class Percussion Credits: 1
• MUSI 393 - Music Administration and Management Credits: 2
• EDRD 300 - Literacy and Curriculum Integration Credits: 3
• EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3

• EDUC 302 - Human Growth and Development Credits: 3
  or
• EDUC 539 - Human Development and Learning PK-12 Credits: 3

**Emphasis Requirement (complete one) (40 credits)**

Total: 120 credits

Undergraduate Interdisciplinary Minor

World Music Minor

Banner Code: WMUS

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: gmu.edu/departments/music

Faculty

Carroll, Lepore, Owens, Robinson (coordinator)

Requirements

Students must complete 16 to 18 credits, with a 10-credit core and opportunities to take electives in several departments at Mason.

Prerequisite

Students must first demonstrate to the coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 or 431. Prerequisites for specific courses are indicated below.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

This program is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world’s peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic enquiry.
Core (10 credits)

- MUSI 103 - Musics of the World Credits: 3
- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- MUSI 497 - Independent Study Credits: 1-3

One of the following two courses (1 credits):

- Applied Music (PMI)
  or
- Ensembles (Selection of private music instruction or ensemble must be approved by minor coordinator.)

Electives (6-8 credits)

Electives must be approved by the minor coordinator and should be selected from the following:

- Applied Music (PMI) (1-3)
- MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 102 - Popular Music in America Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- COMM 157 - Video Workshop Credits: 1
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- ENGL 333 - Folklore of the Americas Credits: 3
- AFAM 200 - Introduction to African American Studies Credits: 3
- AFAM 390 - Special Topics in African and African American Studies Credits: 3
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3

Note:

Additional electives may include summer travel courses, as appropriate, and must be approved by the minor coordinator.

Undergraduate Minor

Jazz Studies Minor

Banner Code: JAZZ
This minor is open to music and non music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz. No prior experience in jazz is needed, but candidates must pass a music audition. Jazz studies minors in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

**Course Work**

- Applied Music (PMI) (2)
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*
- MUSI 311 - Jazz Studies Credits: 3
- MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1

**Note:**

Jazz studies minors must take MUSI 485 for 3 credits

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

**Total: 21 credits**

**Music and Technology Minor**

**Banner Code: MUTC**

This minor is open to majors from throughout the university who seek to expand their knowledge and skill in this area of study.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

**Course Work (18 credits)**
- MUSI 100 - Fundamentals of Music Credits: 3
  or
- MUSI 115 - Theory I Credits: 3
- MUSI 315 - Music Technology Credits: 3

Applied Music and Ensemble (3 credits)

- Applied Music (PMI) or Class Voice, Guitar, or Keyboard (1-2 credits)
- MUSI 38X or 485 (Ensemble) (1-2 credits)

2 Semesters of (6 credits):

- MUSI 300 - Recital Attendance Credits: 0
- MUSI 316 - Topics in Music Technology Credits: 3

Choose one of the following (3 credits):

- MUSI 102 - Popular Music in America Credits: 3
- MUSI 103 - Musics of the World Credits: 3
- MUSI 104 - Introduction to Twentieth-Century Music Credits: 3
- MUSI 105 - Music in the United States Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3

Note:

Entrance requirements: MUSI 100 or 115 with a grade of B or higher. A music audition and interview with music technology faculty is required.

Total: 18 credits

Music Minor

Banner Code: MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: gmu.edu/departments/music

All music minors must pass a music audition. Music minors in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree.
Course Work

- Applied Music (PMI) (6)
- Ensembles (3)
- MUSI 101 - Introduction to Classical Music Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 21 credits

Master's Degree

Music, MM

Banner Code: AR-MM-MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: gmu.edu/departments/music

Faculty

James Gardner, Chair

Professors: Camphouse, Carroll, Engebretson, J. Gardner (chair), Maiello, Miller, Monson (associate chair), Smith

Term professor: Balakerskaia, Hearden, Johonnott, Lapple

Associate professors: Billingham, T. Owens

Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Hughes, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner
The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance (single or multiple instruments), music education, composition, conducting, and pedagogy and performance. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

- Performance: audition (single or multiple instruments)
- Conducting: audition
- Composition: submission of a portfolio of compositions
- Music education: interview with music faculty and submission of a two- to three-page paper on the applicant’s philosophy of music education
- Pedagogy and performance: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and presented a full solo recital or equivalent. All music teaching experience should be summarized.

Diagnostic Entrance Exam

All students are required to complete placement examinations in music theory, sight singing and ear training, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period, usually on the Saturday before the first day of classes of the fall and spring semesters. For the summer schedule, see the director of graduate studies.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525, 526 Performance Seminar for Singers and Accompanists I, II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

Academic Policies
Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the department, 3 nonmusic graduate credits may be taken.

The student is admitted as concentrating in one of five areas: performance (single or multiple instrument/voice), music education, composition, conducting, or pedagogy/performance. All students are required to complete the 11 credits described below as General Requirements plus 19 credits in one of the six areas identified below as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

**General Requirements for the MM (for all six options) (11 credits):**

- Ensemble (2)
- MUSI 611 - Analytical Techniques Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 662 - Introduction to Research in Music Credits: 3

**Additional Requirements**

▲ **Concentration in Composition (CPO):**

- 9 credits of MUSI 728 - PMI Composition Credits: 2-3 (repeatable)
- MUSI 613 - Graduate Orchestration Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 790 - Graduate Recital Credits: 1

**Electives**

- Electives (3)

▲ **Concentration in Conducting (CDC):**

- 9 credits of MUSI 729 - PMI Conducting Credits: 2-3 (repeatable)
- MUSI 613 - Graduate Orchestration Credits: 3
- MUSI 610 - Topics in Music Theory Credits: 3
  or
- MUSI 630 - Topics in Music History and Literature Credits: 3
  or
- MUSI 712 - Composition for Conductors and Performers Credits: 3
Electives

- Electives (3)

Note:

The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience. In most cases, each student accepted is offered an opportunity to gain conducting experience by serving as an assistant conductor of a university ensemble.

▲ Concentration in Music Education (MUE):

- MUSI 661 - Psychology of Music Teaching and Learning Credits: 3
- MUSI 663 - Aesthetics of Music Education Credits: 3

Choose one of the three pathways: elementary-level teaching, secondary-level teaching, or thesis

- MUSI 563 - Orff Schulwerk I Credits: 3
- MUSI 564 - Orff Schulwerk II Credits: 3
- MUSI 565 - Orff Schulwerk III Credits: 3
- MUSI Electives (4 credits)
  or
  9 advisor-approved credits from:
  - MUSI 630 - Topics in Music History and Literature Credits: 3
  - MUSI 640 - Topics in World Musics Credits: 3
  - MUSI 654 - Graduate Conducting Credits: 3
  - 3 credits of MUSI 660 - Topics in Music Education Credits: 1-6
  - Electives (4 credits)
    or
  - 6 credits of MUSI 799 - Thesis Credits: 1-6
  - MUSI Electives (7 credits)

▲ Concentration in Performance (PFM):

- MUSI 72X Graduate PMI (9)

Web: gmu.edu/departments/music

Faculty

James Gardner, Chair

Professors: Camphouse, Carroll, Engebretson, J. Gardner (chair), Maiello, Miller, Monson (associate chair), Smith

Term professor: Balakerskaia, Hearden, Johonnott, Lapple

Associate professors: Billingham, T. Owens
Term associate professors: Casagrande, Ker-Hackleman, Rendler

Assistant professors: Bergman, Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Hughes, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

Admission Requirements

- An artist certificate application and current résumé
- A bachelor’s degree in music or equivalent (as evaluated by the Music Department Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student’s goals and interest in the program
- Two letters of recommendation
- A CD (preferred), audiocassette, or videotape of a live performance of solo works from the standard repertory.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

Certificate Requirements

Studies in Performance (17 credits)

- MUSI 72X Graduate PMI (over four semesters) (12)
- MUSI 592 - Topics in Music Credits: 1-6
- MUSI 790 - Graduate Recital Credits: 1

Note:

MUSI 592 must be taken for 2 credits
MUSI 790 (Graduate Recital) must be taken for 3 semesters with two solo recitals and one chamber recital

Support Studies in Literature and Pedagogy (8 credits)

- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 551 - Keyboard Pedagogy I Credits: 3
  or
- MUSI 553 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 695 - Teaching Internship Credits: 2
Support Studies in Accompanying or Ensemble plus Electives (7 credits)

(choose A or B)

A

- MUSI 571 - Techniques of Accompanying I Credits: 1
- MUSI 685 - Graduate Chamber Ensemble Credits: 1

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting)
- Three recommendations
- Satisfactory scores on GRE
- A sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
- Composition students must present a portfolio of recent compositions and recordings of performances.
- Music education majors must present a dossier of their teaching experience and activities, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.
- There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including sight singing, ear-training, and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Academic Progress

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.

Residency

One year (fall and spring) of consecutive full-time study (9 credits per semester) is required (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term).
Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

**Language Requirements**

Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. The DGS and the student’s Faculty Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

**Faculty Committee**

During the first semester of study, the college’s director of graduate studies will recommend to the dean of the College of Visual and Performing Arts five faculty members to serve as the student’s Faculty Committee: two from the student’s area of specialization (performance, conducting, or composition), one from music theory, one from music history, and one at large. The student’s major professor will chair the committee. The director of graduate studies of the Department of Music may be part of the committee; if not, he or she will serve ex officio. All Faculty Committee members will have graduate faculty status, as approved by the university provost.

The Faculty Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group. Performance and composition recitals and projects moving toward the dissertation are also subject to approval of the committee.

**Comprehensive Exams**

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

**Advancement to Candidacy**

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Faculty Committee, the director of graduate studies, and the chair of the Department of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

**Dissertation**

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee. This group may be the student’s Faculty Committee as described above, plus a faculty member from beyond the Department of Music. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

**Final Defense and Graduation**
When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the chair of the Department of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements (60 credits)**

- Research Courses (advisor-approved CEHD) (9)
- MUSI 860 - Doctoral Seminar in Music Education Credits: 3
- MUSI 660 - Topics in Music Education Credits: 1-6
  or
- MUSI 880 - Doctoral Major Ensemble Credits: 1
- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
- MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
  or
- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- MUSI 998 - Dissertation Proposal Credits: 1-3
- MUSI 999 - Dissertation Credits: 1-6

**Approved Electives**

- Approved Electives* (6)

**Note:**

MUSI 610 and/or MUSI 710 must be taken for 6 credits
MUSI 630/640/730 must be taken for 6 credits
MUSI 660 option must be taken for 3 credits
MUSI 860 must be taken for 12 credits
MUSI 880 must be taken for 3 credits
MUSI 998 must be taken for 3 credits
MUSI 999 must be taken for 9 credits

Note:

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary PMI, ensemble (including chamber music), or relevant nonmusic courses.

Musical Arts, DMA (pending SCHEV Approval)

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline. DMA graduates are qualified to teach music at the college or university level, as well as K–12.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university

MUSI 630 and/or MUSI 730 must be taken for 6 credits

MUSI 998 must be taken for 1 credit

MUSI 999 must be taken for 12 credits

Note:
Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary PMI, ensemble (including chamber music), or relevant nonmusic courses.

**Theater**

Performing Arts Building, Room A407  
Phone: 703-993-1120  
Web: gmu.edu/departments/theater

**Faculty**

Clayton Austin, Chair  
**Professors:** D’Andrea (Robinson professor), Davis  
**Associate professors:** Austin, Elston, Gero, Johnsen-Neshati, Kurtz, McDonald  
**Term associate professor:** Chew  
**Adjunct Faculty:** Cetron, Lechter, Lee, McManus, Mountain, Murray, Nanni-Messegee, Wallace

**Course Work**

The Theater Department offers all course work designated THR in the Courses chapter of this catalog.

**UNDERGRADUATE PROGRAM**

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in the theater. Students electing to major in theater complete the theater core, which is a group of courses providing a broad introduction to the various theater arts and striving to create a shared body of knowledge within the department’s student population.

To organize their advanced work within the major, students elect a course of study that includes classes in at least two of three areas: performance, design and technical theater, and theater studies. The department aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements including foreign language. Students must earn a minimum 2.00 cumulative GPA in their major.

**Theater Concentrations**

Theater majors may apply to complete their degree in one of the following concentrations: Design and Technical Theater, Performance, Playwriting and Dramaturgy, or Theater Studies.

To apply for admission into a concentration a student must have:

- completed 45 credits including THR credits as specified in the concentration
- cumulative GPA minimum of 2.5
**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated writing-intensive in their majors at the 300 level or above. Students seeking a BA in theater fulfill this requirement by successfully completing THR 350 or THR 351.

**Honors in Theatre**

Students wishing to pursue Honors in Theater should contact the department chair.

**Production Opportunities**

Participation in Theater Department productions with the GMU Players is expected of all declared majors. Up to 4 practicum credits, 1 credit per assignment can be awarded for satisfactory completion of performance and production assignments in the major, including faculty or guest-directed GMU Players main stage, studio, or Theater of the First Amendment (TFA) productions.

TFA, a professional theater in residence within CVPA, offers students the chance to work closely with professional artists. TFA productions regularly employ student assistants in stage management, directing, design, dramaturgy, technical crews, and production and company management. Students are eligible to audition for age-appropriate roles or understudy assignments in TFA productions and may participate in the Membership Candidate Program through the Actors’ Equity Association.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

General Education (40 credits)

Foundation Requirements

- Oral communication (3)
- Information technology (3)

  Quantitative reasoning:
  - Either appropriate placement score on quantitative skills and one of
  - MATH 108 - Introductory Calculus with Business Applications
  - MATH 110 - Introductory Probability and Statistics
  - MATH 111 - Linear Mathematical Modeling
  - MATH 113 - Analytic Geometry and Calculus I
  - MATH 115 - Analytic Geometry and Calculus I (Honors)
  - MATH 125 - Discrete Mathematics I
    or
  - IT 250
    or
  - STAT 250 - Introductory Statistics I
    or
  - lower placement score requiring MATH 106.
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Core Requirements

- Literature (3)
- Arts (outside the major) (students earning a concentration in Design and Technical Theater must take ARTH 101, 102, 200 or 201) (3)
- Natural science (including one laboratory science) (7)
- Western civilization (3)
- Global understanding (3)
- Social and behavioral sciences (3)
- Synthesis requirement (see concentration for specific requirement) (3)
Major (56-78 credits)

Foreign Language or Minor (0–21 credits)

See beginning of CVPA chapter for foreign language requirement.

Students may complete an academic minor in lieu of the foreign language requirement.

Theater Core Requirements (32-33 credits)

- Additional literature (3)
- Additional arts (outside the major) (students earning a concentration in Design and Technical Theater must take AVT 104 or 222) (3–4)
- THR 150 - Drama, Stage, and Society I Credits: 3
- THR 151 - Drama, Stage, and Society II Credits: 3
- THR 196 - Performance and Design Practicum Credits: 1
- THR 197 - Management/Literary Practicum Credits: 1
- THR 198 - Theatrical Construction Practicum Credits: 1
- THR 199 - Production Run Crew Practicum Credits: 1
- THR 210 - Acting I Credits: 3
- THR 230 - Introduction to Technical Theater Credits: 3
- THR 329 - Directing I Credits: 3
- THR 350 - Script Analysis Credits: 3

One upper-level dramatic literature course (3 credits)

Students earning a concentration in Playwriting and Dramaturgy must take THR 351

- THR 351 - Dramatic Theory and Criticism Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3 (THR 359 may be applied to fulfill either the global understanding or upper-level dramatic literature requirement but not both.)
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3

One from the following group of 1-credit minicourses:

Students earning a concentration in Playwriting and Dramaturgy must take THR 202

- THR 201 - Stage Management Credits: 1
- THR 202 - Literary Management Credits: 1
- THR 203 - Production/Company Management Credits: 1

Practicum
Students must complete 1 assignment in each of the following areas to earn a total of 4 practicum credits.

THR 196 assignments include actor, designer, assistant designer, stage manager, and assistant stage manager

THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity

THR 198 assignments include scenery construction and painting, costume construction, electrician, and props

THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew

- THR 196 - Performance and Design Practicum Credits: 1
- THR 197 - Management/Literary Practicum Credits: 1
- THR 198 - Theatrical Construction Practicum Credits: 1
- THR 199 - Production Run Crew Practicum Credits: 1

Upper-Level Units:

- 24 credits of 300- and 400-level courses, chosen from at least two of the following areas: performance, design and technical theater, and theater studies. These credits are in addition to upper-level credits taken to fulfill theater core requirements.

Performance

This emphasis is designed for the serious student of acting with performance aspirations. Solid grounding in the fundamentals of analysis and basic training of the actor’s instrument are complemented by intensive, individualized instruction in the various facets of the actor’s craft.

- THR 300 - Voice and Speech Fundamentals Credits: 3
- THR 301 - Voice and Speech for the Performer Credits: 3
- THR 303 - Movement for the Actor I Credits: 3
- THR 304 - Movement for the Actor II Credits: 3
- THR 305 - Stage Combat Credits: 3
- THR 310 - Acting II Credits: 3
- THR 320 - Beginning Modern Acting Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 345 - Puppetry: History and Technique Credits: 4
- THR 365 - Characterization Credits: 3
- THR 420 - Advanced Modern Acting Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 423 - Audition Techniques: Stage and Camera Credits: 3
- THR 425 - Verse Speaking Credits: 3

Design and Technical Theater

This emphasis prepares students for further study and work in the design and technical fields. Courses in this area are also strongly recommended for students interested in directing.
Theater Studies

This emphasis is designed to provide the theater generalist with thorough preparation for further study and work in directing, dramaturgy, theater criticism, theater scholarship, playwriting, and teaching. For specific teacher certification requirements, students are directed to the Office of Teacher Education.

- THR 340 - Directing II Credits: 3
- THR 351 - Dramatic Theory and Criticism Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3
- THR 380 - Playwriting I Credits: 3
- THR 381 - Playwriting II Credits: 3
- THR 382 - Screenplay Workshop Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- THR 480 - Advanced Playwriting Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3
- THR 484 - Translation & Adaptation for Stage & Screen Credits: 3
- THR 491 - Major's Seminar on the Profession Credits: 3
- THR 496 - Text in Production Credits: 3

May be applied to the appropriate area:

- THR 490 - Special Topics in Drama Credits: 1-6
- THR 494 - Field Experience Credits: 1-6
- THR 497 - Independent Study Credits: 1-6

Theater Concentrations
Theater majors may apply to complete their degree in one of the following concentrations: Design and Technical Theater, Performance, Playwriting and Dramaturgy, or Theater Studies.

Theater majors are not required to complete a concentration to graduate with a Theater BA.

To apply for admission into a concentration, a student must have:

- completed 45 credits including THR credits as specified in the concentration
- cumulative GPA minimum of 2.5

Please see the concentration advisor in your area of interest for specific application details.

To graduate with a concentration, student must have a minimum cumulative program GPA of 3.0.

▲ **Concentration in Design and Technical Theater (DTT) (36 credits)**

The Design and Technical Theater concentration provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Synthesis fulfilled by THR 440 or THR 496

Prerequisites to apply: THR 198, 199, 230, and 9 additional THR credits

**Required Core Courses:**

- THR 314 - Lighting Stagecraft Credits: 3
- THR 331 - Drafting and Model Making Credits: 3
- THR 332 - Seminar in Costume History Credits: 3
- THR 339 - Theatrical Design Concepts Credits: 3
- THR 495 - Senior Capstone Project Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
  or
- THR 496 - Text in Production Credits: 3

**Design Courses**

Take two design courses:

- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 337 - Sound Design Credits: 3

**Design and Technical Theater Concentration Electives:**

Select four courses from (maximum of 6 credits of THR 330 and maximum of 3 credits of THR 494):

- THR 315 - Sound Engineering Credits: 3
- THR 330 - Seminar in Technical Theater Credits: 3
THR 336 - Advanced Theater Technology Credits: 3
THR 342 - Makeup Design Credits: 3
THR 343 - Costume Draping and Drafting Credits: 3
THR 345 - Puppetry: History and Technique Credits: 4
THR 434 - Advanced Lighting Design Credits: 3
THR 494 - Field Experience Credits: 1-6

▲ Concentration in Performance (PFM) (39 credits)

This area is designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Synthesis fulfilled by THR 440 or THR 496

Prequisites to apply: THR 210, 310, 329, and 3 additional THR credits

Required Core Courses:

- THR 300 - Voice and Speech Fundamentals Credits: 3
- THR 303 - Movement for the Actor I Credits: 3
- THR 320 - Beginning Modern Acting Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 340 - Directing II Credits: 3
- THR 365 - Characterization Credits: 3
- THR 420 - Advanced Modern Acting Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- or
- THR 496 - Text in Production Credits: 3

Performance Concentration Electives

Select four courses from the following:

- THR 301 - Voice and Speech for the Performer Credits: 3
- THR 304 - Movement for the Actor II Credits: 3
- THR 305 - Stage Combat Credits: 3
- THR 423 - Audition Techniques: Stage and Camera Credits: 3
- THR 425 - Verse Speaking Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- THR 490 - Special Topics in Drama Credits: 1-6
• THR 494 - Field Experience Credits: 1-6
• THR 496 - Text in Production Credits: 3
• THR 497 - Independent Study Credits: 1-6

▲ Concentration in Playwriting and Dramaturgy (PWD) (30 credits)

The Playwriting and Dramaturgy concentration acknowledges a creative and practical connection between the work of the playwright and dramaturg. Students choosing this area of specialization will focus on the literary aspects of theater, such as playwriting, dramaturgy, screenwriting, translation, adaptation, season planning, and theater criticism. Students seeking specialized experience as a playwright or dramaturg will choose from a selection of required and recommended courses designed to expose students to a broad range of contemporary and classical texts, deepen their understanding of dramatic structure, encourage collaboration, and foster opportunities for new play development. Students are encouraged to consult their advisors on complementary courses of interest outside the major, such as in the visual and performing arts, Film and Video Studies, English and Foreign Language. This concentration gives students access to a variety of hands-on opportunities within the Department and the professional world.

Synthesis fulfilled by THR 440

Prerequisites to apply: THR 150 or 151 and 9 additional THR credits

Required Core Courses:

• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 380 - Playwriting I Credits: 3
• THR 381 - Playwriting II Credits: 3
• THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
• THR 484 - Translation & Adaptation for Stage & Screen Credits: 3
• THR 495 - Senior Capstone Project Credits: 3

Playwriting and Dramaturgy Concentration Electives:

Take four courses from the following:

• THR 340 - Directing II Credits: 3
• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3
• THR 382 - Screenplay Workshop Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 421 - One-Person Show Credits: 3
• THR 424 - Contemporary Women Playwrights Credits: 3
• THR 480 - Advanced Playwriting Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3
• THR 490 - Special Topics in Drama Credits: 1-6

▲ Concentration in Theater Studies (THST) (33 credits)
This concentration is designed to provide the theater generalist with a thorough preparation for further study and work in directing, scholarship or teaching.

Synthesis fulfilled by THR 440 or THR 496

THR 494 requires 3 credits

Prerequisites to apply: THR 198 or 199, 150 or 151, 210 and 230

Required Core Courses:

- THR 494 - Field Experience Credits: 1-6
- THR 495 - Senior Capstone Project Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
  or
- THR 496 - Text in Production Credits: 3

Theater Studies Concentration Electives:

Select three of the following courses:

- THR 351 - Dramatic Theory and Criticism Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3
- THR 380 - Playwriting I Credits: 3
- THR 382 - Screenplay Workshop Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3

Theater Elective:

Select one course from the following:

- THR 310 - Acting II Credits: 3
- THR 340 - Directing II Credits: 3
- THR 381 - Playwriting II Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3

Design Elective:

Select one course from the following:

- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 337 - Sound Design Credits: 3
- THR 342 - Makeup Design Credits: 3
Theater Studies Electives:

THR 300-499 (9 cr)

Electives

- Electives (2-24 credits)

Total: 120 credits

Undergraduate Minor

Theater Minor

Banner Code: THR

Performing Arts Building, Room A407
Phone: 703-993-1120
Web: gmu.edu/departments/theater

The theater minor consists of 18 credits in theater, selected in consultation with a faculty advisor and approved by the department chair.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree.
The Volgenau School of Information Technology and Engineering

Graduate Admissions: 703-993-1512
Graduate Student Services: 703-993-1505
Undergraduate Student Services: 703-993-1511
Web: volgenau.gmu.edu
College Code: VS

Administrative Units

Applied Information Technology (AIT)
Civil, Environmental, and Infrastructure Engineering (CEIE)
Computer Science (CS)
Electrical and Computer Engineering (ECE)
Interdisciplinary Programs
Statistics (STAT)
Systems Engineering and Operations Research (SEOR)

The mission of the Volgenau School of IT & Engineering is to provide our students with a high-quality education that emphasizes the importance of ethical behavior, integrity, and entrepreneurship. In addition, the School seeks to develop and disseminate leading-edge research that significantly advances the field of knowledge.

The Volgenau School of Information Technology and Engineering is concerned primarily with study areas that involve integrating the information basis for modern engineering with the more conventional physical and materials science approach. The careful integration of these areas results in a unique academic experience for highly motivated students.

The Volgenau School offers several degree programs that concentrate on important contemporary technological issues and needs. Bachelor’s degree programs are offered in the areas of applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, information technology, and systems engineering. Minors in information technology, computer science, software engineering, data analysis, and systems engineering and operations research are also available.

Master’s degree programs are available in the following areas: applied information technology, civil and infrastructure engineering, computer engineering, computer forensics, computer science, electrical engineering, information security and assurance, information systems, operations research, software engineering, statistical science, systems engineering, and telecommunications. Several doctoral programs are offered, including a cross-disciplinary program in information technology and more focused programs in civil and infrastructure engineering, computer science, electrical and computer engineering, systems engineering and operations research, and statistical science. In addition, the engineer degree in information technology provides post-master’s training in an application area.

Undergraduate certificates are offered in applied statistics, information technology, postbachelor computer science, and operations research and engineering. For graduate students, certificate programs are offered in advanced network protocols for
telecommunications; architecture-based systems engineering; biometrics; e-commerce; command, control, communications, computing, and intelligence; intelligent agents; communications and networking; computational modeling; systems engineering of software intensive systems; federal statistics; biostatistics; information engineering; information security and assurance; military operations research; signal processing; software engineering; telecommunications forensics and security; networks, systems integration and testing; very-large-scale-integration (VLSI) design and manufacturing; civil infrastructure and security engineering; discovery, design, and innovation; computer networking; network technologies and applications; wireless communications; telecommunications systems modeling; data mining; database management; and web-based software engineering.

The undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor’s degrees include required and elective courses in mathematics, humanities, and general education, and specialty courses in applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, information technology, and systems engineering. Each program strongly emphasizes English composition and communication.

Students also have opportunities to develop interest areas in other fields within the Volgenau School that offer undergraduate courses but do not have undergraduate majors. The bachelor of individualized study (BIS) degree program may appeal to adult students who have completed a substantial portion of their studies at other institutions.

Bioengineering has been increasingly represented at the Volgenau School. New faculty members are working with other departments, schools, and institutes at Mason to provide a quality education to students interested in this rapidly growing field. The faculty at the Volgenau School hopes to work with numerous Washington-area organizations dedicated to health oriented research or clinical service.

Administration

Lloyd Griffiths, Dean
Daniel A. Menascé, Senior Associate Dean
E. Bernard White, Associate Dean for Undergraduate Studies
Sharon Caraballo, Assistant Dean for Academic Affairs
Jennifer Lamb, Assistant Dean for Development
Melinda Barnhart, Executive Director, Finance and Administration
Pete Farrell, Director, Business Development
Jonathan Goldman, Director, Computing Resources
Terri Mancini, Director, Sponsored Research Administration
Lisa Nolder, Director, Graduate Student Services
Nicole Sealey, Director, Graduate Admissions and Enrollment Management

Bachelor of Science Programs

The Volgenau School offers seven programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

Undergraduate Mission, Goals

The undergraduate mission is to provide a quality education to support the needs of Virginia and the nation. The goal is to graduate students who are technically competent; prepared for ethical professional practice and a lifetime of learning; communicate effectively and work as members or leaders of technical teams; and understand the global nature and effect of information technology and engineering.

Degree Requirements

The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above)
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (university general education electives)
- At least 3 credits of arts, 3 credits of Western civilization, 3 credits of social and behavioral science, and 3 credits of global understanding issues (university general education electives)
- At least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education courses described above
- All requirements listed in the following sections for specific Volgenau School majors, including university requirements for mathematics, natural science, information technology competency and ethics, and synthesis

Freshmen who are undecided about their specific majors may select Volgenau School undeclared as their major. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments. With approval of department advisors, some courses may be taken out of the indicated sequences, particularly English, literature and social science courses.

The requirements for the BIS degree can be found in the College of Humanities and Social Sciences chapter. Requirements for the applied computer science, civil and infrastructure engineering, computer engineering, computer science, electrical engineering, IT, and systems engineering undergraduate degree programs are provided in the academic departments’ sections of this chapter.

Academic Policies

Students should become familiar with the University's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog. That chapter also lists additional university requirements for minor programs and additional (double) majors.

Academic Progression, Course Repeat

Students majoring in the Volgenau School programs are expected to have an acceptable plan of study formulated with assistance from the department advisor on file. They are expected to make reasonable progress toward their degree during each semester they are enrolled. Undergraduate students may be required to obtain permission from the Volgenau School Student Services Office to repeat some courses required for the major in which they have previously received a grade of D or F. Individual Volgenau School programs may disallow students from retaking certain high-demand courses in which they have already earned a grade of C or better if they want to retake the course to improve their GPA.

Restricted Courses
Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for the Volgenau School undergraduate programs may not include credits earned in activity courses in any department. Exceptions are many of the courses listed under the catalog designations of art, dance, music, or theater; individual sports, physical education, or team sports; and recreational activities. Exceptions in these categories are courses that meet the university general education requirements for the major, including global understanding or Arts. Whenever there is uncertainty, students must consult with an academic advisor in their departments. Generally, degree requirements for computer science and engineering majors may not be met by 100- to 400-level courses designated “IT” (and any associated cross-listed courses) in the Course Descriptions chapter of this catalog. The respective computer science or engineering student’s department might approve requests for some IT courses, such as IT 350, 362, 462, and 466, to satisfy degree requirements. For more information, contact the department or the Volgenau School Student Services Office at 703-993-1511.

Writing-Intensive Requirement

The university requires all undergraduate students to successfully complete a course, or combination of courses, designated “writing-intensive” in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

BS/Accelerated MS Programs

Many of the BS degree programs offered within the Volgenau School may be packaged with some of the MS degree programs in ways that reduce the total number of credits required. Details may be found in the individual department sections.

Master of Science Programs

Degree Requirements

The Volgenau School offers 15 master of science programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow.

Doctor of Philosophy Programs

The Volgenau School offers 5 PhD programs in its academic units. Policies regarding admission and degree requirements are provided in the department sections that follow with the exception of the Information Technology PhD program. The PhD in information technology is a program that builds on a fundamental core and emphasizes cross-disciplinary efforts among the 15 master’s programs in the Volgenau School, as well as with related units at Mason. Specific entrance and degree requirements for this doctoral program are found in the Interdisciplinary Programs section of this chapter.

Engineer Degree in Information Technology

The engineer degree is a post-master’s degree, but it does not confer a doctorate. Students pursuing the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements. Students who are awarded an engineer degree will be able, at a later date, to work toward a PhD in information technology. Details about the engineer degree can be found in the Interdisciplinary Programs section of this chapter.

Commonwealth Graduate Engineering Program

The Commonwealth Graduate Engineering Program (CGEP) is a cooperative program of Mason, the University of Virginia (UVA), Virginia Tech, Old Dominion University (ODU), and Virginia Commonwealth University (VCU) designed to make graduate engineering education available in locations throughout Virginia through distance learning. CGEP offers graduate degree programs in engineering and information technology. Instruction takes place through a mix of videoconferencing and web-based courses available at educational and corporate receive sites around the state.

Each degree program is taught by one of the five participating universities, and prospective students should apply directly to the university offering the degree of interest. Mason’s master of science in computer science degree is available through CGEP. Courses from the other institutions may be offered at Mason’s Fairfax or Prince William campuses. For more information, go to volgenau.gmu.edu/graduates/commonwealth_graduate_engineering.php.

Applied Information Technology
School: The Volgenau School of Information Technology and Engineering

**Faculty**

**Professors:** Gantz (chair), Jajodia, Marchant

**Associate professor:** Snow (associate chair)

**Assistant professors:** Aksoy, Boicu, Bruno, Rytikova, Wang

**Instructors:** D’Alessandro, Garrison, Islam, Lyons, Quinn, Sanghera

**Adjunct professors:** Alper, Angelone, Curts, Enochson, Farrell, Haliyur, Hammond, Jalinous, Kahrl, Khan, Long, Lord, Montana, Moody, Phung, Raymond, Reo, Ronk, Santucci, Schorling, West, Zabin

Applied Information Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, technical and leadership skills.

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating new IT workers in current principles and practices, and in its applications. The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates fill jobs that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration, information security, information systems, telecommunications, web development, and computer graphics.

The MS in AIT emphasizes elements of productive, effective and ethical leadership of major IT projects, in both the federal and private sectors.

The department also offers a number of certificate programs for students seeking to add an AIT certification to their existing credentials. Students currently pursuing undergraduate degrees in other disciplines may choose to add a minor in AIT.

**Course Work**

The AIT Department offers all 100 - 400 IT courses and many 500/600 level IT courses in the Courses chapter of this catalog.

**Undergraduate Degree**

**Information Technology, BS**

**Banner Code:** VS-BS-INFT

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Applied Information Technology

The BS in information technology prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objective of the degree is to provide students with the following:
• Fundamental knowledge regarding concepts, tools, and methods of IT, including the opportunity to learn appropriate conceptual and computational tools essential for a successful career
• A broad background across fundamental areas of IT along with a depth of understanding in a particular area of interest
• Skills for effective written and oral communication with technical and nontechnical people in the IT field and the chosen area of interest, as well as skills and strategies for facilitating group projects and activities
• Working knowledge of leading-edge technologies and advanced systems through computer laboratory courses
• Industry-validated curriculum that maintains currency with business needs
• Preparation for graduate studies in information security, information systems, telecommunications, and related IT areas
• Appreciation for the global influence of IT on society and an understanding of the ethical and social responsibilities of IT professionals

The BS in information technology aims to meet the existing and emerging needs of the IT industry by educating new IT workers in current principles and practices in IT and its applications. Graduates fill jobs that focus on the application of IT in an increasing number of emerging sub disciplines, including network administration, information security, information systems, telecommunications, web development, and computer graphics.

Admission Requirements

Students who meet Mason’s general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student’s academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester, as shown in the sample schedule below. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason general education requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. The Applied Information Technology Department is based at the Prince William Campus.

Degree Requirements

Students must fulfill all requirements for bachelors degrees. General education requirements, including humanities, social sciences, mathematics and basic sciences must be met and the BS in information technology also requires IT foundation, core, and concentration courses as described below. The IT major requires a 7-credit capstone design project to be completed over two consecutive semesters.

Foundation Courses

• IT 101 - Introduction to Information Technology Credits: 3
• IT 103 - Introduction to Computing Credits: 3
• IT 108 - Programming Fundamentals Credits: 3
• IT 212 - Computer Hardware Fundamentals Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3

Core Courses

• IT 207 - Applied IT Programming Credits: 3
• IT 213 - Multimedia and Computer Graphics Credits: 3
• IT 214 - Database Fundamentals Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• IT 300 - Modern Telecommunications Credits: 3
• IT 304 - IT in the Global Economy Credits: 3
  OR both of the following:
  • CS 105 - Computer Ethics and Society Credits: 1
  • CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• IT 341 - Data Communications and Network Principles Credits: 3
• IT 343 - IT Resources Planning Credits: 3
• MSOM 300 - Managing Financial Resources Credits: 3
• MSOM 301 - Managing People and Organizations Credits: 3
• SYST 469 - Human Computer Interaction Credits: 3

Two-semester sequence of approved capstone design courses

• IT 492 - Senior Design Project I Credits: 3
• IT 493 - Senior Design Project II Credits: 4

Information Technology Concentrations

Students choose one of four concentrations from the list below. To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the four concentrations.

▲ Database Technology and Programming (DTP)

• IT 208 - Program Design and Data Structures Credits: 3
• IT 308 - Event-Driven Programming Credits: 3
• IT 314 - Database Management Credits: 3
• IT 414 - Advanced Database Credits: 3

▲ Information Security (INFS)

• IT 353 - Information Defense Technologies Credits: 3
• IT 357 - Computer Crime, Forensics, and Auditing Credits: 3
• IT 366 - Network Security I Credits: 3
• IT 462 - Information Security Principles Credits: 3
• IT 466 - Network Security IT Credits: 3

▲ Network and Telecommunications (NTEL)

• ECE 303 - Digital Design/Intro Assembly Language Credits: 4
• IT 342 - Operating Systems Fundamentals Credits: 3
• IT 366 - Network Security I Credits: 3
• IT 441 - Network Servers and Infrastructures Credits: 3
• IT 445 - Advanced Networking Principles Credits: 3
• IT 455 - Wireless Communications and Networking Credits: 3
• IT 481 - Concepts of Multimedia Processing and Transmission Credits: 3
• IT 484 - Voice Communications Technologies Credits: 3
• IT 488 - Fundamentals of Satellite Communications Credits: 3

▲ Web Development and Multimedia (WDM)
• IT 331 - Web I: Web Development Credits: 3
• IT 332 - Web Site Administration Credits: 3
• IT 413 - Digital Media Editing Credits: 3
• IT 415 - Information Visualization Credits: 3
• IT 431 - Web II: Advanced Web Development Credits: 3

Other Requirements
• Natural Science: 11 credits of natural science, including a sequence of two 4-credit courses with labs. Students should choose these from the list of courses approved for general education (7 of these credits apply toward general education requirements)
  • COMM 100 - Public Speaking Credits: 3
  • MATH 108 - Introductory Calculus with Business Applications Credits: 3
  • MATH 112 - Discrete Mathematics for BSIT Credits: 3 (3 of these credits apply toward general education requirements)

Sample Schedule

First Semester
• ENGL 101 - Composition Credits: 3
• HIST 100 - History of Western Civilization Credits: 3
• IT 101 - Introduction to Information Technology Credits: 3
• IT 103 - Introduction to Computing Credits: 3
• MATH 108 - Introductory Calculus with Business Applications Credits: 3

Total: 15 credits

Second Semester
• Nonlab natural science (3)
• Literature (3)
• COMM 100 - Public Speaking Credits: 3
• IT 108 - Programming Fundamentals Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3

Total: 15 credits

Third Semester

• Natural science with lab (4)
• Social/behavioral science (3)
• IT 207 - Applied IT Programming Credits: 3
• IT 212 - Computer Hardware Fundamentals Credits: 3
• IT 214 - Database Fundamentals Credits: 3

Total: 16 credits

Fourth Semester

• Natural science with lab (4)
• Arts (3)
• IT 213 - Multimedia and Computer Graphics Credits: 3
• IT 223 - Information Security Fundamentals Credits: 3
• MATH 112 - Discrete Mathematics for BSIT Credits: 3

Total: 16 credits

Fifth Semester

• Elective (3)
• ENGL 302 - Advanced Composition Credits: 3
• IT 341 - Data Communications and Network Principles Credits: 3
• MSOM 300 - Managing Financial Resources Credits: 3
• SYST 469 - Human Computer Interaction Credits: 3

Total: 15 credits

Sixth Semester
• IT concentration course (3)
• IT 300 - Modern Telecommunications Credits: 3
• IT 304 - IT in the Global Economy Credits: 3
• IT 343 - IT Resources Planning Credits: 3
• MSOM 301 - Managing People and Organizations Credits: 3

Total: 15 credits

Seventh Semester

• IT concentration course (3)
• IT concentration course (3)
• Global understanding (3)
• Elective (3)
• IT 492 - Senior Design Project I Credits: 3

Total: 15 credits

Eighth Semester

• IT concentration course (3)
• IT concentration course (3)
• Elective (3)
• IT 493 - Senior Design Project II Credits: 4

Total: 13 credits

Writing-Intensive Requirement

The university writing-intensive requirement is satisfied by IT 343.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in information technology, students must have a GPA of 2.50 or better across the IT foundation, core, capstone, and concentration courses.

Bachelor's Level Certificate
Information Technology Undergraduate Certificate

Banner Code: VS-CERB-INFT

School: The Volgenau School of Information Technology and Engineering

Department: Applied Information Technology

This certificate is designed primarily for those students who have earned a nontechnical bachelor’s degree. It allows students with nontechnical backgrounds to augment the knowledge gained through their major-related courses with additional computer and IT knowledge, and skills to improve their attractiveness to employers in the high-technology community. This certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, the student is free to define a technical focus area. The focus area must be composed of at least three courses (9 credits). Elective courses selected for the technical focus area must be approved by an IT advisor.

Certificate Requirements

Core Courses (15 credits)

- IT 101 - Introduction to Information Technology Credits: 3
- IT 103 - Introduction to Computing Credits: 3
- IT 108 - Programming Fundamentals Credits: 3

AND select two of the following:

- IT 212 - Computer Hardware Fundamentals Credits: 3
- IT 213 - Multimedia and Computer Graphics Credits: 3
- IT 214 - Database Fundamentals Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3

Course Work

- Technical Focus Area Credits: 9

Undergraduate Minor

Information Technology Minor

Banner Code: AIT

School: The Volgenau School of Information Technology and Engineering

Department: Applied Information Technology
The minor is designed primarily for those non-Volgenau School majors who desire to augment the knowledge gained through their major-related courses with additional computer and IT knowledge. It also gives students the necessary skills to improve their attractiveness to employers in the high-technology community. The minor requires a minimum of 15 credits, including 9 credits of core courses. Beyond these requirements, the student is free to define a technical focus area, for example, information security. Focus areas are composed of at least two courses (6 credits). Students pursuing the IT minor should obtain a list of approved electives from the Applied Information Technology Department.

**Minor Requirements**

**Core Courses (9 credits)**

- IT 101 - Introduction to Information Technology Credits: 3
- IT 103 - Introduction to Computing Credits: 3
- IT 108 - Programming Fundamentals Credits: 3

**Course Work**

- Technical Focus Area Credits: 6

**Bachelor's/Accelerated Master's Program**

**Information Technology, BS/Telecommunications, Accelerated MS**

*School: The Volgenau School of Information Technology and Engineering*

*Department: Applied Information Technology*

Students in the BS in Information Technology Program may elect to enter the Accelerated MS in Telecommunications (MS in TCOM) Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the information technology program who would like to proceed directly into the MS in TCOM Program, completing the two degrees with 144 credits. Students must satisfy requirements for the undergraduate degree (120 credits) and the MS degree (30 credits), with 6 credits of overlap permitted. The MS in TCOM is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows and will be substituted for BS degree concentration electives, subject to prior approval by an advisor. Note: Students in the accelerated program must take ECE 301 as one of their BS in information technology concentration electives.

Applicants must be Mason undergraduate students in the BS in Information Technology Program. Students may apply for the accelerated program during the semester after which they will have completed 90 or more credits applicable toward the BS degree. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission into the accelerated program are identical to criteria for admission into the MS in TCOM Program, except that students do not need to have completed an undergraduate degree prior to admission.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, after students have been accepted into the accelerated program, they must maintain a 3.25 GPA
until they have satisfied requirements for the undergraduate degree. They must then maintain a minimum 3.00 GPA in the graduate segment of the accelerated program. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program, and those graduate TCOM courses taken and applied to the BS in information technology will no longer be admissible for the MS in TCOM. If students are dropped from the accelerated program and have taken and applied TCOM core courses toward the BS degree, then they need not repeat those courses for the regular MS in TCOM Program if they obtained a grade of B or higher in those courses. But they will need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in TCOM.

Similarly, if students are dropped from the accelerated program and have taken and applied non core TCOM courses toward the BS degree, then they do not need to repeat those courses for the regular MS in TCOM Program if they obtained a grade of C or higher for those courses. Elective courses will be required to replace TCOM courses already taken and dropped from the program. Note: Up to two C grades may be carried in the regular TCOM program in non mandatory core courses. A minimum GPA of 3.00 is required to graduate with an MS in TCOM.

Students must complete all requirements for the BS degree. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in TCOM is granted on completion of all requirements for the accelerated degree.

TCOM courses that may be taken as an undergraduate student as part of the Accelerated BS in Information Technology/MS in TCOM Program are noted in the listing below. Note: All of the prerequisite courses indicated below must be passed with a grade of B or higher.

### Degree Requirements

#### Telecommunications courses:

- **TCOM 500 - Modern Telecommunications** Credits: 3
- **TCOM 501 - Data Communications and Local Area Networks** Credits: 1.5 (prerequisite: acceptance into the Accelerated BSIT/ MS TCOM Program)
- **TCOM 502 - Wide Area Networks and Internet** Credits: 1.5 (prerequisites: TCOM 501, IT 341, or equivalent)
- **TCOM 503 - Fiber Optic Communications** Credits: 1.5 (prerequisite: TCOM 500 or equivalent)
- **TCOM 504 - Asynchronous Transfer Mode Networks** Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- **TCOM 505 - Networked Multicomputer Systems** Credits: 1.5 (prerequisite: TCOM 501, IT 341, or equivalent)
- **TCOM 509 - Internet Protocols** Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- **TCOM 510 - Client-Server Architectures and Applications** Credits: 1.5 (prerequisite: TCOM 505)
- **TCOM 513 - Optical Communications Networks** Credits: 1.5 (prerequisite: TCOM 503)
- **TCOM 519 - Voice over IP** Credits: 1.5 (prerequisites: TCOM 509, IT 341, or equivalent)
- **TCOM 529 - Advanced Internet Protocols** Credits: 1.5 (prerequisite: TCOM 509)
- **TCOM 539 - Advanced Voice over IP** Credits: 1.5 (prerequisite: TCOM 519)
- **TCOM 551 - Digital Communication Systems** Credits: 3 (prerequisite: TCOM 500 or equivalent)
- **TCOM 607 - Satellite Communications** Credits: 3 (prerequisite: TCOM 551, ECE 463, or equivalent)

**Note:**

Students in the accelerated program who have passed IT 341 with a grade of B or higher will not be required to take TCOM 501 in the MS in TCOM core and may take an elective 1.5-credit course instead.
Master's Degree

Applied Information Technology, MS

Banner Code: VS-MS-AIT

School: The Volgenau School of Information Technology and Engineering

Department: Applied Information Technology

We propose to provide the very best graduate education in IT for high-potential leaders, especially those working with IT solutions that affect the federal government. Our objective is to graduate men and women of competence and character who can lead multidisciplinary teams in the design, justification, development, and the management of mega-systems from data to decision in the private and federal sectors. Faculty includes professors from the Volgenau School, the School of Management, and the College of Humanities and Social Sciences, plus industry leaders with unique reputations in the subject as adjunct professors and guest lecturers. The faculty exposes students to the pragmatic issues of IT, not just the theory.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and have earned a GPA of 3.00 or better over their 60 highest-level credits. They must be experienced in the fundamentals of IT, quantitative methods, and finance. In addition, applicants must

- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant’s professional accomplishments.
- Provide a detailed statement of career goals and professional aspirations.
- Show satisfactory performance on the GRE if they have not earned a bachelor’s degree from a U.S. university.
- Earn a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam (a minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship) if their native language is not English.

Degree Requirements

Core Courses (12 credits)

- ECE 590 - Selected Topics in Engineering Credits: 3
- SYST 659 - Topics in Systems Engineering Credits: 3
- IT 665 - Managing Information Technology Programs in the Federal Sector Credits: 3
- NCLC 504 - Leadership Theory, Praxis, and Development for the Information Technology Professional Credits: 3

Course Electives (15 credits)

Information Technology (choose 3):
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- Elective approved by program director Credits: 3

**Analysis & Management (choose 1):**

- GSOM 540 - Analysis of Financial Decisions Credits: 3
- SWE 625 - Software Project Management Credits: 3

**Leadership and Ethics (choose 1):**

- PHIL 644 - Business and Organizational Ethics Credits: 3
- PHIL 640 - History of Ethical Theory Credits: 3

**Capstone Course (mandatory 3 credits)**

- IT 685 - Capstone Seminar Credits: 3

---

**Civil, Environmental, and Infrastructure Engineering**

Phone: 703-993-1675  
Web: civil.gmu.edu

*School: The Volgenau School of Information Technology and Engineering*

**Faculty**

**Professors:** Arciszewski, Bronzini (chair), Houck

**Associate professors:** deMonsabert, Flannery, Venigalla

**Assistant professors:** Casey, Urgessa

**Research professor:** Hero

**Adjunct professors:** Adler, Ali, Bhargava, Binning, Chase, Chipley, Choudhury, Donahue, Doyle, Gagne, Goode, Hartmann, Harrop-Williams, Matusik, McDaniel, Miller, Rodriguez, Suydam, Ward, Zobel

The Civil, Environmental, and Infrastructure Engineering (CEIE) Department offers a BS and an MS in civil and infrastructure engineering. These degree programs complement the study of civil and environmental engineering with advances in information technology (IT), and they focus on the physical and organizational infrastructure essential to the functioning of an urban society. The bachelor’s program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. Students interested in pursuing doctoral education in civil and infrastructure engineering are encouraged to read the sections on the interdisciplinary PhD in information technology and PhD study in civil and infrastructure engineering.
Civil and infrastructure engineering is the study of land, transportation, water, environmental, structural, energy, and telecommunications systems from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment such as the Washington, D.C., metropolitan area.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities, and structures; and solid waste management.

Course Work

The department offers all courses designated CEIE and some of the ENGR and IT courses in the Courses chapter of this catalog.

Undergraduate Degree

Civil and Infrastructure Engineering, BS

Banner Code: VS-BS-CEIE

School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental and Infrastructure Engineering

The bachelor’s degree program provides a solid foundation in the theory of civil and infrastructure engineering. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. Students also have the opportunity to work as engineering interns each summer. The goal of the department is to graduate students who are prepared to

- Solve problems in the civil engineering domain, such as integrating the traditional civil engineering disciplines of transportation, environment, structures, construction, and water; incorporating social, political, and economic considerations; and including a conscious life-cycle costing philosophy.
- Develop and apply IT to civil engineering problems.
- Communicate effectively in written, oral, and visual ways.
- Pursue a lifelong process of learning.
- Enter the civil engineering profession as productive engineers.

Civil engineering students can look forward to a career in local, state, and federal government organizations and architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, construction, and other related fields. The program also prepares students for continuing graduate studies.

Degree Requirements

Degree requirements include 120 credits distributed in courses in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete each CEIE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.
The prerequisite structure for these courses is extensive. The sample schedule below provides a listing of major and general education course requirements, as well as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their faculty advisor at least once each semester to plan for the next semester’s registration. Each student is expected to complete an approved plan of study, which constitutes a learning plan for the degree program.

A variety of classes will count for credit as CEIE technical electives. All electives must be selected with the advice and approval of the academic advisor. Paid internships during the summer (CEIE 197, 198, and 199; 297, 298, and 299; and 397, 398, and 399) may also be used as technical electives.

Writing-Intensive Requirement

The university’s writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 360.

Sample Schedule

First Semester

- ENGR 107 - Introduction to Engineering Credits: 2
- CHEM 251 - General Chemistry for Engineers Credits: 4
- ENGL 101 - Composition Credits: 3
- ENGR 183 - Engineering Computer Graphics Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Note:

CHEM 211 will substitute for CHEM 251

Total: 16 credits

Second Semester

- ENGR 117 - Information Technology for Engineering Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- General Education Course1 Credits: 3

Total: 14 credits

Third Semester
• CEIE 290 - Engineering Computation and Design Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• Literature - general education course Credits: 3

Total: 16 credits

Fourth Semester

• CEIE 230 - Hydraulics Credits: 3
• COMM 100 - Public Speaking Credits: 3
• ENGR 210 - Statics and Dynamics Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Total: 15 credits

Fifth Semester

• CEIE 301 - Engineering and Economic Models in Civil Engineering Credits: 3
• CEIE 340 - Water Resource Engineering Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
• ENGR 310 - Mechanics of Materials Credits: 3
• CEIE 305 - Soil Mechanics Credits: 3
• PHYS 266 - Introduction to Thermodynamics Credits: 1

Total: 16 credits

Sixth Semester

• CEIE 355 - Environmental Engineering and Science Credits: 3
• CEIE 311 - Structural Analysis Credits: 3
• CEIE 360 - Introduction to Transportation Engineering Credits: 3
• BIOL 377 - Applied Ecology Credits: 3
• CEIE 370 - Construction Systems Credits: 3

Total: 15 credits
Seventh Semester

- CEIE 400 - Civil Engineering Planning and Management Credits: 3
- ENGR 401 - Professional Practice and Management in Engineering Credits: 1
- CEIE 4xx - CEIE Technical elective Credits: 3
- CEIE 4xx - CEIE Technical elective Credits: 3
- General Education Course Credits: 3

Total: 13 credits

Eighth Semester

- CEIE 490 - Senior Design Project Credits: 3
- CEIE 4xx - CEIE Technical elective Credits: 3
- CEIE 4xx - CEIE Technical elective Credits: 3
- CEIE 4xx - CEIE Technical elective Credits: 3
- CEIE 4xx - CEIE Technical elective Credits: 3

Total: 15 credits

Note:

1 Each student must satisfy General Education requirements in two of these three areas: Arts, Global Understanding, and Western Civilization/World History. The two General Education areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the general education needs of the student.

2 A total of six CEIE Technical Elective courses must be selected. The first four CEIE technical elective courses must be selected to satisfy a requirement of at least one additional course in four of these five technical areas: structural engineering (CEIE 412 or 413), water resources engineering (CEIE 440 or 442), environmental engineering (CEIE 450, 452, or 456), construction engineering (CEIE 471 or 472), and transportation engineering (CEIE 461 or 462). The fifth CEIE Technical Elective course may be selected from any CEIE 4xx course. The sixth CEIE Technical Elective course may be selected from any CEIE 4xx course or related advanced science or engineering course approved by the student's faculty advisor.

Bachelor's/Accelerated Master's Program

Civil and Infrastructure Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental, and Infrastructure Engineering
This option provides a way for Mason students to earn an MS in civil and infrastructure engineering in less time than if they graduated from the BS program and then applied to the MS program. This program can be completed in 144 credits.

**Admission Requirements**

Mason students in the BS in Civil and Infrastructure Engineering Program may apply for the BS/accelerated MS if they have earned 90 undergraduate credits with an overall GPA of at least 3.30 or their GPA in ENGR and CEIE courses is at least 3.30. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. All other criteria for admission are identical to criteria for admission into the MS program.

**Conferral of Degrees**

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The master's degree is granted on completion of MS requirements.

**Degree Requirements**

Students must complete 144 credits that satisfy requirements for both the BS and MS programs. Students register for 6 credits of CEIE 500-level courses in place of undergraduate technical elective courses. The CEIE 500-level courses selected for this purpose must be approved by the academic advisor. Students complete all MS requirements and may apply the two CEIE 500-level courses included in the BS program toward satisfaction of these requirements.

**Master's Degree**

**Civil and Infrastructure Engineering, MS**

**Banner Code:** VS-MS-CEIE

*School: The Volgenau School of Information Technology and Engineering*

*Department: Civil, Environmental, and Infrastructure Engineering*

The MS program educates students in the theory and practice of civil, environmental, and infrastructure engineering. IT and automated tools for analyzing and solving urban systems problems are important components of the program. The civil and infrastructure engineer can look forward to pursuing a career in the private or public sector or continuing graduate study toward the PhD.

**Admission Requirements**

To be considered for admission to the program, a candidate must:

- Satisfy general university requirements for admission to a graduate program.
- Have earned a baccalaureate degree in engineering, physical sciences, economics, or other civil and infrastructure engineering-related field.
- Provide three letters of reference, submitted by former professors or supervisors.
Acceptance to the degree program is based on an assessment of the applicant’s capacity to pursue these graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, reference letters, and any recent GRE scores, which are required for international students. Well-qualified students with minor admission deficiencies may be admitted subject to completing an articulation program. Courses taken in the articulation program extend the minimum requirements for the degree.

Degree Requirements

The program includes three core courses, electives selected by the student with the aid of a faculty advisor, a thesis or civil and infrastructure engineering project, and a seminar requirement. Students must complete a faculty-approved plan of study with a minimum of 30 credits of graduate work, including the thesis (6 credits) or the research project (3 credits).

Core Courses

Students must complete the following three core courses. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering, and introducing the application of IT and the systems approach to analyzing and solving problems in civil and infrastructure engineering.

- CEIE 601 - Infrastructure Modeling Credits: 3
- CEIE 605 - Infrastructure Systems Analysis Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3

Emphases

Students must select an additional five or six electives that together constitute an emphasis area. With prior approval of a faculty advisor, students may design their own emphasis or select from one of several standard emphases, including the following:

- Water and environmental systems
- IT in civil engineering
- Infrastructure management
- Civil infrastructure and security engineering
- Real estate development
- Transportation engineering

Project or Thesis

Students must complete a project (3 credits) or thesis (6 credits) under the direction of a CEIE faculty member. Under the project option, students complete 3 credits of CEIE 798, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected under the guidance of a faculty advisor. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the CEIE graduate seminar (CEIE 795).

Under the thesis option, students complete 6 credits of CEIE 799. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor, and the final written thesis and oral defense are approved by a three-member faculty committee. In addition, students must make a satisfactory presentation of the thesis in the CEIE graduate seminar. The thesis is particularly recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program.

Seminar Requirement
All degree candidates must attend a minimum of 10 graduate seminars approved by the CEIE Department for the degree program.

**Real Estate Development, MS**

**Banner Code: VS-MS-REAL**

**School: The Volgenau School of Information Technology and Engineering**

**Department: Civil, Environmental and Infrastructure Engineering**

The MS in Real Estate Development program is designed to prepare prospective real estate professionals for professional careers and for research and teaching positions by combining academic education with opportunities for experience within real estate development organizations throughout the region. Emphasis is placed in the program on educating and training students using live case studies, in partnership with leading real estate development companies. The distinctiveness of the Master’s program in Real Estate Development offered by Mason lies in its curriculum, which has been tailored to strengthen the employment opportunities or mobility of students in non-academic kinds of jobs, as well as to prepare the minority of students who might wish to complement their studies with doctoral study in related fields. Students pursue one of three emphases: real estate development, real estate finance or environment and sustainability.

**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher. In addition, this civil engineering/real estate graduate program requires students to have a basic understanding of real estate development, significant experience in the real estate industry, and/or completion of REAL 500 Real Estate Development Fundamentals.

The 36 hour curriculum includes the following:

**Core consists of the following 5 courses:**

- REAL 500 - Real Estate Development Fundamentals Credits: 3
- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- REAL 630 - Innovative Land Use, Approvals and Real Estate Development Credits: 3
- GSOM 746 - Real Estate Analysis and Valuation Credits: 3
- PUBP 780 - Evolution of the Washington Metropolitan Economy Credits: 3

**Real Estate Development Emphasis (Take 3 of the following 5 courses):**

- CEIE 500 - Land Development Engineering Credits: 3
- CEIE 511 - Introduction to Design and Inventive Engineering Credits: 3
- CEIE 516 - Engineering Law and Ethics Credits: 3
- CEIE 610 - Construction Systems and Management Credits: 3
- PUBP 770 - Topics in Regional and Urban Development Policy Credits: 3
Real Estate Finance Emphasis (Take 3 of the following 4 courses):

- GSOM 747 - Real Estate Finance Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
- PUBP 745 - Transportation and the Environment Credits: 3

Environment and Sustainability Emphasis (Take 3 of the following 5 courses):

- CEIE 501 - Sustainable Development Credits: 3
- CEIE 550 - Environmental Engineering Systems Credits: 3
- CEIE 555 - Introduction to Environmental Engineering Credits: 3
- PUBP 745 - Transportation and the Environment Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3

Electives (Take 3 courses outside of your selected Track)

The following courses may be included as electives:

- REAL 690 - Topics in Real Estate Development Credits: 1-6
- REAL 796 - Directed Reading Credits: 1-6

Capstone Course (Final project):

- REAL 750 - MSRED Capstone Credits: 3

Master's Level Certificate

Civil Infrastructure and Security Engineering Graduate Certificate

Banner Code: VS-CERG-CISE

School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental and Infrastructure Engineering

This program is appropriate for civil infrastructure (such as transportation, water and waste water, and utilities) owners and operators, designers, planners, maintenance staff, and other technical workers in the public and private sectors who are responsible for improving facility and equipment performance, reliability, security, efficiency, and management practices.

New approaches to civil infrastructure problems are emerging that use traditional civil engineering domain knowledge in the context of IT with a systems approach to analyze the complexity of and interaction among various infrastructure components and their performance. Currently, the most important challenge to infrastructure engineering is to improve the quality of stewardship,
which falls far short of public expectations, and improve immediately the security of critical civil infrastructure. The certificate is intended to respond uniquely to the need for broad training in the holistic and systems approach to the long term management of infrastructure, with specific attention to risk and vulnerability assessments, and creative solutions to providing improved system security. The certificate program is flexible and can be tailored to the needs of students within the infrastructure engineering community, but it is also intended to be responsive to the needs of infrastructure owners, operators, and other technical staff.

**Admission Requirements**

Candidates should have a bachelor’s degree in engineering, architecture, mathematics, science, or other related technical field, and must be computer literate. Candidates should inquire with the certificate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

**Certificate Requirements**

The certificate program consists of 15 credits (five courses) selected from certificate program courses and elective courses. The certificate courses are aimed at building the foundations of asset management methods based on a holistic and systems approach. The certificate program courses consist of the following:

**One core course**

- CEIE 680 - Introduction to Infrastructure and Security Engineering Credits: 3

**Minimum of two of the following specific sector courses:**

- CEIE 681 - Security of Structural Systems Credits: 3
- CEIE 683 - Water and Wastewater Systems Security Credits: 3
- CEIE 686 - Transportation System Security and Safety Credits: 3

**Remaining elective credits selected from the following:**

- CEIE 510 - Geographic Information Systems in Engineering Credits: 3
- CEIE 511 - Introduction to Design and Inventive Engineering Credits: 3
- CEIE 670 - Civil Engineering Decision Methods and Tools Credits: 3
- CEIE 671 - Best Engineering Management Practices Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3
- CEIE 690 - Topics in Civil Engineering Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 661 - Public Budgeting Systems Credits: 3
- PUBP 729 - Transportation Asset Management Credits: 3
- PUBP 752 - Infrastructure Finance Credits: 3

**Note:**
Selection of courses is subject to approval of the certificate coordinator to ensure cohesiveness and compatibility. Some courses may have prerequisites for which the student must qualify or seek a waiver from the appropriate instructor. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate.

**Foundations of Real Estate Development Graduate Certificate**

Banner Code: VS-CERG-FRED

*School: The Volgenau School of Information Technology and Engineering*

*Department: Civil, Environmental and Infrastructure Engineering*

This new Graduate Degree Certificate is the first in a series of Graduate Degree Certificates with a principal focus on the Real Estate industry. In conjunction with the Volgenau School of Information Technology and Engineering, the School of Public Policy and the School of Management, the Center for Real Estate Entrepreneurship integrated the most advanced and innovative thinking from across George Mason to create an in-depth certificate exploring the fundamentals of real estate development.

The principal focus of the Certificate is to provide a thorough understanding of Real Estate concepts. The graduate certificate will educate the student in three major disciplines: leadership and management challenges in real estate development, fundamentals of real estate development and construction management, and economic evolution and development concepts.

**Admissions Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher. In addition, this civil engineering/real estate graduate certificate requires students to have a basic understanding of real estate development, significant experience in the real estate industry, and/or completion of REAL 500 Real Estate Development Fundamentals.

**Course Requirements**

- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- CEIE 610 - Construction Systems and Management Credits: 3
- CEIE 671 - Best Engineering Management Practices Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
- PUBP 785 - Urban Development Economics Credits: 3

**Leading Technical Enterprises Graduate Certificate**

Banner Code: VS-CERG-LTE

*School: The Volgenau School of Information Technology and Engineering*

*Department: Civil, Environmental and Infrastructure Engineering*

This graduate certificate is a professional program tailored to meet the needs of engineering companies and technical organizations. It targets engineering and other technical employees who wish to align themselves with the learning organization doctrine of developing leaders and other employees interested in increasing their understanding of new business opportunities may be identified, successfully marketed, planned and managed. Since 2003, a comparable program has been offered under
contract through the Office of Continuing Professional Education (OCPE) to the Headquarters, US Army Corps of Engineers and The Dewberry Companies.

Technological change and the increase in privatization and enterprise development trends within the private sector require a wide variety of multidisciplinary skills for the successful management of technical programs and projects. This certificate is intended to respond to the need for broad training in technical leadership, entrepreneurial development, performance measurement, engineering information management, and infrastructure financial planning. The certificate program is flexible and can be adapted to the needs of engineering professionals who provide technical services to both the public and private sectors.

**Admission Requirements**

Potential candidates should have a bachelor's degree in Engineering, Architecture, Mathematics, Science, Business, or other related field. Courses are offered weekly on campus or at previously arranged facilities and are intended for part-time students. Some of the courses may be offered in a distance learning format.

**Certificate Requirements**

The certificate program consists of a core course, *CEIE 675 Developing the Technical Enterprise* (3 credits), and 12 elective credits (four courses) selected from the certificate program course listing or other approved MS Degree course offerings. These courses are aimed at building the foundations of engineering enterprise development and engineering leadership. The elective certificate program courses consist of the following:

One core course:

- CEIE 675 - Developing the Technical Enterprise Credits: 3

and 12 elective credits (four courses) selected from the certificate program course listing:

- CEIE 671 - Best Engineering Management Practices Credits: 3
- CEIE 673 - Leading Engineering Innovation Credits: 3
- CEIE 674 - Infrastructure Finance Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3

**Note:**

These courses are accepted for credit towards the George Mason University M.S. in Civil and Infrastructure Engineering. Some courses may have prerequisites for which the student must qualify or seek a waiver from the appropriate instructor. A cumulative GPA of 3.00 is required, and no more than one course with a grade of C may be applied toward the certificate.

**Sustainability and the Environment Graduate Certificate**

*Banner Code: VS-CERG-SENV*
School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental and Infrastructure Engineering

The principal focus of this advanced certificate is to provide a detailed understanding of evolving real estate concepts, particularly as relating to land development, sustainability, and the impact of evolving development on the environment. The five course series will give the student a detailed understanding of land analysis and valuation, engineering concepts related to land development, the impact of the environment on development, and the key concepts of sustainable development.

Admissions Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher. In addition, this civil engineering/real estate graduate certificate requires students to have a basic understanding of real estate development, significant experience in the real estate industry, and/or completion of REAL 500 Real Estate Development Fundamentals.

Certificate Requirements

Students must complete the following five courses, with an average grade of B or better, for a total of 15 credits of graduate study.

- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- CEIE 500 - Land Development Engineering Credits: 3
- CEIE 501 - Sustainable Development Credits: 3
- CEIE 555 - Introduction to Environmental Engineering Credits: 3
- CEIE 673 - Leading Engineering Innovation Credits: 3

Water Resources Engineering Graduate Certificate

Banner Code: VS-CERG-WRE

School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental and Infrastructure Engineering

Water resources engineering is the application of the sciences of hydrology and hydraulics to serve society. This includes planning, designing and managing systems to provide reliably dry places for society’s activities; dependable, high quality water supplies for industrial, municipal, residential, and other uses; sustainable water-related ecologies; and other uses of our water resources. This program is designed for engineers and others interested in pursuing advanced study of water resources.

Admission Requirements

Candidates should have a bachelor’s degree in engineering, architecture, mathematics, science, or other related technical field, and must be computer literate. Candidates should inquire with the
Certificate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements

The certificate program consists of 15 credits (five courses) including two required courses (6 credits), and three elective courses (9 credits). Specific requirements are:

Required Certificate Courses (take both courses for a total of 6 credits):

- CEIE 631 - Water Resources Engineering I: Principles and Practice Credits: 3
- CEIE 732 - Water Resources Engineering II: Water Resource Systems Credits: 3

Elective Certificate Courses:

(These courses are divided into three categories; a student must take a minimum of one course from the methods group, and a minimum of two courses from either the policy group or the practice group. A minimum of three elective courses (9 credits) are required for the certificate).

Methods

- CEIE 510 - Geographic Information Systems in Engineering Credits: 3
- CEIE 605 - Infrastructure Systems Analysis Credits: 3
- CEIE 690 - Topics in Civil Engineering Credits: 3

Policy

- CEIE 501 - Sustainable Development Credits: 3
- CEIE 550 - Environmental Engineering Systems Credits: 3
- CEIE 556 - Environmental Law Credits: 3
- CEIE 683 - Water and Wastewater Systems Security Credits: 3

Practice

- CEIE 500 - Land Development Engineering Credits: 3
- CEIE 540 - Water Supply and Distribution Credits: 3
- CEIE 542 - Open Channel Flow Credits: 3
- CEIE 632 - Groundwater Systems Modeling Credits: 3

Doctoral Degree
Civil and Infrastructure Engineering, PhD (pending SCHEV approval)

Banner Code: VS-PHD-CEIE

School: The Volgenau School of Information Technology and Engineering

Department: Civil, Environmental and Infrastructure Engineering

The doctoral program offered by the CEIE Department is unique in Virginia, incorporating the varied areas of civil engineering with a focus on infrastructure operation and management. The program is structured to prepare students for advanced leadership positions in research and development in the public or private sector, academics, and government. Students may elect to study in the areas of IT and computing in civil engineering, environmental engineering, water and waste water engineering, construction engineering and management, infrastructure security and engineering, structural engineering, or transportation engineering. Requirements include course work, qualifying exams, a teaching requirement, dissertation proposal defense, and dissertation research and defense.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work
- For applicants whose native language is not English, official TOEFL results showing a minimum score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for students who wish to be considered for a graduate teaching assistantship.
- Three letters of recommendation, with at least two from individuals with doctorates
- Recent résumé
- Substantial statement of interest that includes a description of specific area of proposed dissertation research, contacts they have made with potential faculty advisors, and an explanation of career and research goals
- Official results of the GRE general test are recommended for students with BS or MS degrees obtained outside the United States

Applicants will be encouraged to schedule an interview with the graduate coordinator or faculty member in their proposed area of research. Admission decisions will be based on the student’s qualifications and the availability of a faculty advisor. The application material will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

The application material will be reviewed by the graduate admissions officer for the department and decisions made with input from appropriate faculty members and/or the department chair.

Degree Requirements

With the completion of a BS degree, 72 additional credits are required to complete a PhD in civil and infrastructure engineering. Of these 72 credits, 24 are required for dissertation research. Students may apply up to 24 credits from their MS degree toward their required 72 credits beyond the BS subject to the approval of the dissertation committee and the CEIE Department chair. Students with degrees earned outside the United States may use some course credit toward the required 72 credits but not more than 24 credits.
Of the 72 credits beyond the BS, 48 credits of course work are required. Of these 48 hours, a maximum of 18 credits (normally part of the MS or equivalent program) may be at the 500 level, and a minimum of 9 credits at the 700 level or higher must be completed. For courses taken elsewhere, the PhD director must determine equivalent levels and obtain approval from the CEIE Department chair to apply these courses to the required 48 credits of course work. Individualized reading courses at any level cannot exceed 6 credits. A minimum GPA of 3.50 is required and no C grades are allowed for the 24 credits earned beyond the MS.

Students are also required to take a minimum of 3 credits of statistics at the 500 level or above outside the CEIE Department. Substitution of quantitative or scientific course work in some other discipline that is more relevant to the intended doctoral research may be approved by the dissertation committee and the department chair.

Research work in the PhD program is to be completed in courses CEIE 998 and CEIE 999. A minimum of 12 credits of CEIE 998 (Doctoral Dissertation Proposal Preparation) and 12 credits of CEIE 999 (Doctoral Dissertation) are to be completed. Students cannot enroll in CEIE 999 before the research proposal is presented and approved by the dissertation committee.

Qualifying Exam

Qualifying exams will be offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test the student’s familiarity with concepts presented at the MS level or post-BS level and serve as guidance for the dissertation director to help shape the student’s course work needs at the PhD level.

Students entering with an MS degree must take the qualifying exam on completion of 18 credits of study. Students entering without an MS degree must take the qualifying exam on completion of 24 credits. The qualifying exam consists of a written exam taken in an eight-hour period and an oral interview attended by an examining committee of at least five members of the CEIE faculty. The qualifying exam may be repeated once. A student failing the qualifying exam twice will be removed from the program.

The qualifying exam includes information from the following focus areas:

- Area A: Water and Environmental Engineering
- Area B: Information Technology and Computing in Civil Engineering
- Area C: Construction Engineering and Management
- Area D: Land Development Engineering
- Area E: Transportation Engineering
- Area F: Infrastructure and Security Engineering
- Area G: Structural Engineering

Prior to the exam, students are required to select two focus areas for examination. Candidates for the PhD in information technology and engineer degree in information technology who wish to transfer to the PHD-CEIE program who have successfully completed two qualifying exams based on CEIE courses are not required to take the CEIE qualifying exam.

Dissertation Committee

A dissertation committee is recommended to be formed within the first semester following successful completion of the qualifying exams. The dissertation committee is to consist of the CEIE Department dissertation director, two or more CEIE Department faculty members, and at least one committee member from outside the department. At least three members of the committee are to be members of the Mason graduate faculty. The composition of the dissertation committee must be approved by the CEIE Department chair.

Research Competency Exam, Dissertation Proposal Defense
Students may not schedule their dissertation proposal defense (research competency exam) before successful completion of the qualifying exam. On completing all course work and successfully passing the qualifying exam, students are to present their written dissertation proposal to their dissertation committee. The dissertation proposal defense includes a written proposal and presentation of the intended direction of the dissertation research. The dissertation proposal defense is not to include completed research because the dissertation committee is to use the dissertation proposal defense to provide input and guidance to the student prior to beginning dissertation research. The dissertation proposal defense is also an opportunity for dissertation committee members to examine the student’s knowledge in higher-level course work and familiarity with existing and emerging research related to the student’s research area. The exam is administered by the student’s dissertation committee and must be attended by all dissertation committee members and the department chair.

In preparation for the dissertation proposal defense, the student shall prepare a written dissertation proposal outlining the intended direction of the research and the review of existing research previously published on the topic. The dissertation proposal shall be submitted to the dissertation committee for review at least two weeks prior to the dissertation proposal defense date. The dissertation proposal is then presented by the student as part of the research competency exam. If a student fails the competency exam, the student may request to take the exam again through a formal written request to the doctoral dissertation director within 60 days of receiving notice of the exam result. If the student fails the competency exam and does not request to take the exam again within 60 days of the original date, the student will be dismissed from the PhD program. After successful completion of this requirement, the student is formally admitted as a PhD candidate.

**Teaching Requirement**

Because one of the characteristics of a good researcher and scholar is the ability to express ideas and concepts to a broader audience in a clear manner, each doctoral candidate will be required to organize and deliver a series of lectures and recitations in the CEIE Department to undergraduate students. Working with his or her doctoral dissertation advisor, the candidate will gain experience in the classroom that will benefit the student should he or she decide to pursue an academic or an advanced research career.

**Dissertation Research and Defense**

On successful completion of the dissertation proposal, students are to conduct research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after a successful proposal defense. During the dissertation research period, students must present their research at least once in the form of a department seminar. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft dissertation to the doctoral dissertation committee and schedule an oral predefense with the doctoral dissertation committee. The predefense is to be attended by the doctoral dissertation committee and the department chair.

A final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, which will allow for a minimum of two weeks to advertise the defense. The final defense is to be attended by the doctoral dissertation committee and the department chair. On successful completion of the oral defense, students must submit a final publishable dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. An additional predefense is not required; however, the student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

**Concentration**
Concentration in Civil and Infrastructure Engineering (CEIE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is a PhD in information technology with a concentration in civil and infrastructure engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology degree. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the CEIE Department chair.

Doctoral Supervisory Committee

The dissertation director must be a CEIE Department faculty member. The composition of the doctoral supervisory committee is to be approved by the CEIE Department chair and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and the dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the CEIE Department chair.

Computer Science

Phone: 703-993-1530
Web: cs.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Barbara, J. Chen, DeJong, Gomaa (chair), Kerschberg, Menascé, Motro, Offutt, Pullen, Sibley, Sood, Tecuci, Wechsler

Assistant professors: S. Chen, Li, Lien, Lin, T. Maddox, Malek, Rangwala, Shehu, Sousa, Stavrou, X. Wang, Zhong

Instructors: Fleck, Heishman, Nordstrom

Adjunct professors: Abdurazik, Ahmed, Alazzawe, Armour, Baldo, Dean, Ellis, Foxwell, Geldon, Gravatt, Howard, Hwang, Kakarlamudi, Kodalı, M. Maddox, Martin, Masiyoswski, Nidiffer, Olimpiew, Pettit, Ritchey, Scoggins, Sharif, Smeltzer, Smith

Emeritus faculty: Baum, Hamburger, Rine

Introduction
Computer science is at the center of the information revolution in the 21st century. Advanced computation tools and techniques are revolutionizing and transforming the way we work, play, communicate, collaborate, and conduct business. In addition, computation is creating new scientific and engineering fields; such as robotics, computational sciences, bioinformatics, astroinformatics, and health informatics, to name a few. Computer science is a discipline concerned with the analysis, design, implementation, maintenance, and evolution of computer-based systems used in almost all walks of life.

Computer scientists must be well-grounded not only in the theory of computing, but also in its application to diverse application areas, for example, web-based applications such as e-mail, wireless networking, online group gaming, social networks, and e-commerce. Computer scientists must be capable of working closely with members of other professions associated with computing. Students who pursue this discipline will learn (1) theories of computation, analysis of algorithms, operating systems, and artificial intelligence; (2) communication and coordination via advanced computer networks; (3) storage, retrieval, and management of large databases; and (4) analysis, design, and implementation of reliable software systems.

Course Work

The Department of Computer Science (CS) offers courses designated CS, INFS, ISA, and SWE, as well as some IT courses, in the Courses chapter of this catalog. The department offers undergraduate programs in computer science and applied computer science. A double major is offered in computer science and computer engineering. Students may also elect a minor in computer science or software engineering. Several accelerated BS Computer Science/MS Programs are offered. Graduate programs offered are an MS in computer science, an MS in information security and assurance, an MS in information systems, an MS in software engineering, a PhD in computer science, and several graduate certificate programs. The department also participates in the PhD in Information Technology Program with the following concentrations: PhD study in information security and assurance, PhD study in information systems, and PhD study in software engineering.

Undergraduate Degree

Applied Computer Science, BS

Banner Code: VS-BS-ACS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing, but create new and interesting problems for computer scientists.

Degree Requirements

For the BS-ACS degree, students must complete 120 credits, including the university general education requirements, consisting of humanities, social sciences, synthesis, and basic science requirements (if needed), the program requires foundation, core, and concentration courses as described below. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

ACS foundation courses (24 credits):

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3

**ACS core (22 credits):**

- ECE 301 - Digital Electronics Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

**ACS elective (3 credits):**

- One CS course numbered above 400

**Concentration (At least 36 credits):**

At least 36 additional credits to meet course requirements of one of the concentrations. These credits include either STAT 344 or a course in statistics relevant to the concentration. Current concentrations are biology, computer game design, geography, and software engineering.

▲ **Concentration in Biology (BIOL)**

**Foundation (24 credits):**

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
Core (16-17 credits):

- BIOL 311 - General Genetics Credits: 4
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3

AND one of the following:

- BIOL 312 - Biostatistics Credits: 4
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

One BIOL course numbered above 300 (3-4 credits)

▲ Concentration in Computer Game Design (CGDS)

Foundation (13 credits):

- CS 225 - Culture and Theory of Games Credits: 3
- CS 325 - Introduction to Game Design Credits: 3
- AVT 104 - Studio Fundamentals I Credits: 4
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (17 credits):

- CS 425 - Game Programming I Credits: 3
- CS 426 - Game Programming II Credits: 3
- CS 451 - Computer Graphics Credits: 3
- AVT 382 - Digital Art and Animation Credits: 4
- AVT 383 - Three-Dimensional Digital Art Credits: 4

Two approved electives related to game design (6 credits)

A list of relevant courses can be obtained from the department office.

(Natural science requirement will include PHYS 160/161 and 260/261.)
▲ Concentration in Geography (GEOG)

Foundation (18 credits):

- GEOG 101 - Major World Regions Credits: 3
- GEOG 102 - Physical Geography Credits: 3
- GEOG 103 - Human Geography Credits: 3
- GEOG 110 - Maps and Mapping Credits: 3
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Core (19 credits):

- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOG 411 - Advanced Digital Cartography Credits: 3
- GEOG 412 - Aerial Photography Interpretation Credits: 3
- GEOG 416 - Satellite Image Analysis Credits: 3
- GEOG 463 - Applied Geographic Information Systems Credits: 3

One GEOG course numbered above 300 (3 credits)

▲ Concentration in Software Engineering (SWE)

Foundation (6 credits):

- STAT 250 - Introductory Statistics I Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Core (10 credits):

- SWE 205 - Software Usability Analysis and Design Credits: 3
- SWE 301 - Internship Preparation Credits: 0
- SWE 401 - Internship Reflection Credits: 1
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3

SWE related (15 credits) chosen from:
- CS 363 - Comparative Programming Languages Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 443 - Software Architectures Credits: 3

Cross-disciplinary (6 credits):

- ENGL 410 - Professional and Technical Writing Credits: 3

AND one of the following:

- PSYC 333 - Industrial and Organizational Psychology Credits: 3
- COMM 320 - Business and Professional Communication Credits: 3
- COMM 335 - Organizational Communication Credits: 3

Note:

Students should consult the sample schedules below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

Sample Schedules

Biology Concentration Sample Schedule

First Semester

- BIOL 213 - Cell Structure and Function Credits: 4
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGL 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 17 credits

Second Semester
• BIOL 303 - Animal Biology Credits: 4
• COMM 100 - Public Speaking Credits: 3
• CS 105 - Computer Ethics and Society Credits: 1
• CS 211 - Object-Oriented Programming Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 15 credits

Third Semester

• CHEM 211 - General Chemistry Credits: 4
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• ECE 301 - Digital Electronics Credits: 3
• MATH 125 - Discrete Mathematics I Credits: 3

Total: 14 credits

Fourth Semester

• Western civilization course Credits: 3
• BIOL 304 - Plant Biology Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CS 367 - Computer Systems and Programming Credits: 3

Total: 14 credits

Fifth Semester

• Literature course Credits: 3
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• CS 330 - Formal Methods and Models Credits: 3
• CS 465 - Computer Systems Architecture Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Total: 16 credits
Sixth Semester

- Arts course Credits: 3
- BIOL 311 - General Genetics Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Total: 16 credits

Seventh Semester

- Global understanding course Credits: 3
- Social science course Credits: 3
- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

AND one of the following:

- BIOL 312 - Biostatistics Credits: 4
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Total: 15-16 credits

Eighth Semester

- BIOL Senior course Credits: 3
- CS Senior course Credits: 3
- Synthesis course Credits: 3
- Elective Credits: 1
- BIOL 580 - Computer Applications for the Life Sciences Credits: 3

Total: 13 credits

Computer Game Design Concentration Sample Schedule

First Semester
• CS 101 - Preview of Computer Science Credits: 2
• CS 112 - Introduction to Computer Programming Credits: 4
• ENGL 101 - Composition Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• COMM 100 - Public Speaking Credits: 3

Total: 16 credits

Second Semester

• Western civilization course Credits: 3
• AVT 104 - Studio Fundamentals I Credits: 4
• CS 105 - Computer Ethics and Society Credits: 1
• CS 211 - Object-Oriented Programming Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 15 credits

Third Semester

• Social and behavioral science course Credits: 3
• CS 225 - Culture and Theory of Games Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• ECE 301 - Digital Electronics Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Total: 16 credits

Fourth Semester

• Literature elective Credits: 3
• CS 325 - Introduction to Game Design Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• MATH 125 - Discrete Mathematics I Credits: 3

Total: 15 credits
Fifth Semester

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- AVT 382 - Digital Art and Animation Credits: 4
- CS 330 - Formal Methods and Models Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3

Total: 14 credits

Sixth Semester

- Global understanding course Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- AVT 383 - Three-Dimensional Digital Art Credits: 4
- ENGL 302 - Advanced Composition Credits: 3

Total: 14 credits

Seventh Semester

- Game elective Credits: 3
- Elective Credits: 3
- CS 425 - Game Programming I Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3

Total: 15 credits

Eighth Semester

- CS Senior course Credits: 3
- Game elective Credits: 3
- Synthesis Credits: 3
- CS 426 - Game Programming II Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
Total: 15 credits

Geography Concentration Sample Schedule

First Semester

- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGL 101 - Composition Credits: 3
- GEOG 102 - Physical Geography Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- COMM 100 - Public Speaking Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- GEOG 103 - Human Geography Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 14 credits

Third Semester

- Western civilization course Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 310 - Data Structures Credits: 3
- ECE 301 - Digital Electronics Credits: 3
- GEOG 101 - Major World Regions Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3

Total: 16 credits

Fourth Semester
- Arts course  Credits:  3
- CS 367 - Computer Systems and Programming Credits: 3
- GEOG 311 - Introduction to Geographic Information Systems Credits: 3
- GEOG 110 - Maps and Mapping Credits: 3
- MATH 203 - Linear Algebra Credits: 3

Total: 15 credits

**Fifth Semester**

- Natural science course  Credits:  4
- CS 330 - Formal Methods and Models Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GEOG 412 - Aerial Photography Interpretation Credits: 3

Total: 16 credits

**Sixth Semester**

- Literature course  Credits:  3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- GEOG 310 - Introduction to Digital Cartography Credits: 4
- GEOG 416 - Satellite Image Analysis Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Total: 16 credits

**Seventh Semester**

- GEOG Senior  Credits:  3
- Elective  Credits:  3
- CS 483 - Analysis of Algorithms Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
- GEOG 411 - Advanced Digital Cartography Credits: 3

Total: 15 credits
Eighth Semester

- CS Senior course Credits: 3
- Synthesis course Credits: 3
- Electives Credits: 3
- GEOG 463 - Applied Geographic Information Systems Credits: 3

Total: 12 credits

Software Engineering Concentration Sample Schedule

First Semester

- Western civilization course Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGL 101 - Composition Credits: 3

Total: 16 credits

Second Semester

- Literature course Credits: 3
- COMM 100 - Public Speaking Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 14 credits

Third Semester

- Natural science course Credits: 4
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 310 - Data Structures Credits: 3
- ECE 301 - Digital Electronics Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3

Computer Science, BS

Banner Code: VS-BS-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:

• Foundation for successful careers in industry: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.
• Foundation for graduate study: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.
• Professional preparation: Graduates will have effective written and oral communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor’s degree program is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012, telephone 410-347-7700.

Degree Requirements

For the BS-CS degree, students must complete 120 credits, including the university general education requirements and all the following:

Computer science core (33 credits):
- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Note:

Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the university general education synthesis requirement.

Senior computer science (12 credits):

Any four of the following:

- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 482 - Computer Vision Credits: 3
- CS 484 - Data Mining Credits: 3
- CS 499 - Special Topics in Computer Science Credits: 3

Note:

Only three credits of CS 499 can be used toward the Senior computer science requirement.

Mathematics (23 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

And one of the following:

• MATH 446 - Numerical Analysis I Credits: 3
• OR 481 - Numerical Methods in Engineering Credits: 3

Note:

MATH 105 and MATH 108 cannot be counted toward this degree.

Computer science-related courses (6 credits):

Two courses chosen from:

• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
• OR 335 - Discrete Systems Simulation Modeling Credits: 3
• OR 441 - Deterministic Operations Research Credits: 3
• OR 442 - Stochastic Operations Research Credits: 3
• ECE 280 - Electric Circuit Analysis Credits: 5
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 450 - Introduction to Robotics Credits: 3
• ECE 511 - Microprocessors Credits: 3
• SWE 432 - Design and Implementation of Software for the Web Credits: 3
• SWE 437 - Software Testing and Maintenance Credits: 3
• SWE 443 - Software Architectures Credits: 3
• SYST 371 - Systems Engineering Management Credits: 3
• SYST 470 - Human Factors Engineering Credits: 3
• PHIL 371 - Philosophy of Natural Sciences Credits: 3
• PHIL 376 - Symbolic Logic Credits: 3
• Any MATH or CS course numbered above 300 (except MATH 351)

Note:

Students may need to choose electives to satisfy prerequisites for these courses. Those planning to take MATH 352 may replace STAT 344 with MATH 351.

Natural Sciences:

• 12 credits in courses intended for scientists and engineers. Two of the courses for this requirement must have laboratory components and constitute a sequence. A list of relevant courses can be obtained from the department office.
COMM 100 (3 credits):

Computer science students must make a technical presentation. The course fulfills the general education requirement in oral communication for Volgenau School students.

And:

Three credits in arts, humanities, or social science in addition to the general education requirements.

Additional Information:

Students should consult the sample schedule below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

Sample Schedule

First Semester

- Western civilization course Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGL 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- Arts course Credits: 3
- Literature course Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 14 credits

Third Semester

- Natural science course Credits: 4
- Social and behavioral science course Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- ECE 301 - Digital Electronics Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Total: 14 credits

Fourth Semester

- Natural science course Credits: 4
- General elective Credits: 3
- COMM 100 - Public Speaking Credits: 3
- CS 310 - Data Structures Credits: 3
- MATH 125 - Discrete Mathematics I Credits: 3

Total: 16 credits

Fifth Semester

- Global understanding course Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
- MATH 203 - Linear Algebra Credits: 3

Total: 15 credits

Sixth Semester

- Humanities course Credits: 3
- Natural science course Credits: 4
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Total: 16 credits

Seventh Semester
• Senior computer science course Credits: 3
• Computer science-related elective Credits: 3
• CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
• CS 483 - Analysis of Algorithms Credits: 3

AND one of the following:

• OR 481 - Numerical Methods in Engineering Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3

Total: 15 credits

Eighth Semester

• Senior computer science course Credits: 3
• Senior computer science course Credits: 3
• Senior computer science course Credits: 3
• Computer science-related elective Credits: 3
• General elective Credits: 2

Total: 14 credits

Change of Major

Students requesting a change of major to computer science must have a GPA of at least 2.75 and successfully completed two of the following: CS 112, CS 211; MATH 113, MATH 114, or MATH 125.

Advanced Placement, Credit by Exam

Some students may receive credit for CS 112 by passing departmentally administered exams. In addition, a score of 3 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112. An AP score of 4, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on the International Baccalaureate computer science exam qualifies students for credit in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and 421. Faculty members provide feedback on students' expository writing.

Grades
Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Cooperative Education

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

Computer Science, Computer Engineering Double Major

Computer science majors can earn a double major in computer science and computer engineering if they complete an additional 28 credits of courses beyond the 120 credits required for the computer science degree. The additional 28 credits must be part of an approved plan of study. For more information, visit the department web site.

Bachelor's Level Certificate

Computer Science Post-Bachelor's Certificate

Banner Code: VS-CERB-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

Admissions Requirements

Students must have programming experience at the level of CS 112 and CS 211, and either a BS in a technical field with a 3.00 GPA or higher, or current enrollment in a technical undergraduate minor.

Certificate Requirements

Basic Computer Science:

- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- ECE 301 - Digital Electronics Credits: 3
Math:

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Completion of one of the following:

- CS 483 - Analysis of Algorithms Credits: 3

AND two of the following:

- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 484 - Data Mining Credits: 3

OR:

- CS 583 - Analysis of Algorithms Credits: 3

AND two of the following:

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3

Undergraduate Minor

Computer Science Minor

Banner Code: CS

School: The Volgenau School of Information Technology and Engineering
Department: Computer Science

Course Requirements

The minor requires completion of at least 17 credits. Required courses are:

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 310 - Data Structures Credits: 3

One of the following:

- CS 105 - Computer Ethics and Society Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Two additional computer science courses should be selected from the following:

- CS 330 - Formal Methods and Models Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 363 - Comparative Programming Languages Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 484 - Data Mining Credits: 3

For policies governing all minors, see the Academic Policies chapter of this catalog.

Students should pay careful attention to prerequisites when selecting courses.

Software Engineering Minor

Banner Code: SWE
Course Requirements

Candidates for the minor in software engineering must complete 16 credits in software engineering with a minimum GPA of 2.00, comprising:

- CS 112 - Introduction to Computer Programming Credits: 4

One of the following:

- CS 211 - Object-Oriented Programming Credits: 3
- CS 222 - Computer Programming for Engineers Credits: 3

and three from:

- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3

At least 8 credits must be used only for the minor and not for the student's major.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Bachelor's/Accelerated Master's Program

Computer Science, BS/Computer Science, Accelerated MS

This program is for those interested in immediately continuing on to graduate studies in computer science.

Admission Requirements
Students in a BS program in computer science or a related area may apply for the BS/accelerated MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.50. Criteria for admission are identical to criteria for admission to the MS program.

**Degree Requirements**

Students must complete 144 credits that satisfy requirements for the BS program and the MS program, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. That is, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

**Degree Conferral**

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, a master’s degree is granted.

**Computer Science, BS/Information Security and Assurance, Accelerated MS**

*School: The Volgenau School of Information Technology and Engineering*

*Department: Computer Science*

This program is for students interested in immediately continuing their undergraduate studies in computer science with graduate studies in information security and assurance.

**Admission Requirements**

Students in the BS in Computer Science Program can apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Information Security and Assurance Program.

**Degree Requirements**

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Security and Assurance Program, with 6 credits overlapping.
Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in information security and assurance core courses and apply the two courses from the above list toward the MS in information security and assurance requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information security and assurance requirements, a master’s degree will be granted.

Computer Science, BS/Information Systems, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in information systems.

Admission Requirements

Students in the BS in computer science program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the MS in Information Systems Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Systems Program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:
Students complete all MS in information systems core courses and apply the two courses from above toward the MS in information systems elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information systems requirements, a master’s degree is granted.

Computer Science, BS/Software Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in software engineering.

Admission Requirements

Students in the BS in Computer Science Program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Software Engineering Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Software Engineering Program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in software engineering core courses and apply the two courses from the above list toward the MS in software engineering elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in software engineering requirements, a master’s degree is granted.
Information Technology, BS/Information Security and Assurance, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing on to graduate studies in information security and assurance.

Admission Requirements

Students in the BS in Information Technology Program may apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. In addition, students must have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to criteria for admission to the MS program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program and those for the MS program, with 6 credits overlapping.

Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master’s degree is granted.

Information Technology, BS/Information Systems, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing on to graduate studies in information systems.

Admission Requirements

Students in the BS in Information Technology Program may apply if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. In addition, students must have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to the criteria for admission to the MS program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program as well as those for the MS program, with 6 credits overlapping.
Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master's degree is granted.

Information Technology, BS/Software Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing on to graduate studies in software engineering.

Admission Requirements

Students in the BS in Information Technology Program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. In addition, students must have completed INFS 515 and 519 with a 3.00 or better. Criteria for admission are identical to criteria for admission to the MS in Software Engineering Program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program and those for the MS in Software Engineering Program, with 6 credits overlapping with SWE 619 and 622.

Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master's degree is granted.

Master's Degree

Computer Science, MS

Banner Code: VS-MS-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The graduate program leading to an MS in computer science prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which do not have a graduate class as prerequisite,
and advanced classes, which have a graduate class as prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

**Plan of Study**

Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

**Admission Requirements**

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310), Automata Theory and Formal Languages (CS 330), and Computer Architecture including Assembly Language (CS 465). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.
- Have earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all post secondary education, a self assessment form (included in the application package or available from the department), three letters of recommendation, and an official GRE report.

**Degree Requirements**

In addition to general university requirements, completion of this program requires 30 credits of graduate courses as follows:

- At least five classes (15 credits) must qualify as “advanced” by having suitable graduate courses as prerequisites.
- Advanced classes must be taken from three different areas. The list of preapproved classes with the areas they belong to is provided below.
- At least six classes, including two advanced classes, must be designated CS.
- At least eight classes have to be taken from the list of preapproved classes. Up to two computer science-related classes that are not on the list of preapproved classes may be taken with Computer Science Department approval.
- All prerequisites must be satisfied. In some cases, basic classes (including CS 583) may be skipped with approval of the Computer Science Department if equivalent undergraduate classes were taken previously.
- CS 583 - Analysis of Algorithms Credits: 3

**Preapproved MS CS Courses by Area**

**Artificial Intelligence and Databases**

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 650 - Database Engineering Credits: 3
- CS 667 - Biometrics Credits: 3
- CS 680 - Natural Language Processing Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
• CS 685 - Intelligent Systems for Robots Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 771 - Neural Networks Credits: 3
• CS 775 - Advanced Pattern Recognition Credits: 3
• CS 780 - Data Mining in Multimedia Databases Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• INFS 614 - Database Management Credits: 3
• INFS 623 - Classical and Web Information Retrieval Credits: 3
• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 755 - Data Mining Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 764 - Object-Oriented Database Systems Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 795 - Special Topics in Data Mining Applications Credits: 3
• ISA 765 - Database and Distributed Systems Security Credits: 3
• CS 811 - Research Topics in Machine Learning and Inference Credits: 3
• CS 880 - Research Topics in Artificial Intelligence Credits: 3
• CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3

Programming Languages and Software Engineering

• CS 540 - Language Processors Credits: 3
• CS 631 - Object-Oriented Design Patterns Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 645 - Programming Language Semantics Credits: 3
• CS 719 - Scaling Technologies for E-business Credits: 3
• CS 732 - Software Maintenance and Reuse Credits: 3
• ISA 640 - Programming Language Security Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 622 - Distributed Software Engineering Credits: 3
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 637 - Software Testing Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
Systems and Networks

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 635 - Foundations of Parallel Computation Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 668 - Computer Architecture Systems Credits: 3
- CS 671 - Advanced Operating Systems Credits: 3
- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- CS 818 - Topics in Computer Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 697 - Topics in Information Security Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3

Theoretical Computer Science

- CS 583 - Analysis of Algorithms Credits: 3
- CS 600 - Theory of Computation Credits: 3
- CS 633 - Computational Geometry Credits: 3
- CS 683 - Parallel Algorithms Credits: 3
- CS 684 - Graph Algorithms Credits: 3
- CS 735 - Concurrency Credits: 3
- CS 753 - Parallel Computation Credits: 3
- CS 850 - Research Topics in Parallel Computation Credits: 3

Visual Computing

- CS 652 - Computer Graphics Credits: 3
- CS 662 - Computer Graphics Game Technologies Credits: 4
- CS 667 - Biometrics Credits: 3
- CS 682 - Computer Vision Credits: 3
Project/Thesis (optional):

Three to six of the advanced classes may be replaced by a project. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

3 credits of:
- CS 798 - Project Seminar Credits: 3

6 credits of:
- CS 799 - Thesis Credits: 3-6

Note:

These courses are not classified by area. Note that CS 695/CS 795 can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

- CS 695 - Topics in Computer Science Credits: 3
- CS 697 - Independent Reading and Research Credits: 1-3
- CS 795 - Advanced Topics in CS Credits: 3
- CS 798 - Project Seminar Credits: 3
- CS 799 - Thesis Credits: 3-6
- CS 895 - Research Topics in CS Credits: 3

Information Security and Assurance, MS

Banner Code: VS-MS-ISA

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The Department of Computer Science’s master of science degree program in information security and assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation’s information infrastructure. The master of science in information security and assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.
Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Show proof of a satisfactory score on the GMAT or GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GMAT or GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
- Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.
- International students must submit their TOEFL score.

Foundation Requirements

To ensure that students have an adequate background in mathematical methods and computer technology, the program requires the following four foundation courses, or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite knowledge for those foundations of INFS 501, 515, and 519. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified with some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.
The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Degree Requirements

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). To provide the necessary background and fundamentals of information systems security and assurance, the program has four courses that are required of all students:

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 563 - Fundamentals of Systems Programming Credits: 3

Note:

To continue in the program, students are required to obtain a B- or better grade in the required courses. Students are allowed to repeat the required classes. Students are encouraged to complete the required courses before pursuing the electives.

Elective Courses

Security Electives

To provide breadth and depth of knowledge in information security and assurance, the degree program requires four electives to be taken from the following list of ISA courses:

- ISA 564 - Security Laboratory Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- IT 862 - Computer Security Models and Architectures Credits: 3
- IT 962 - Advanced Topics in Computer Security Credits: 3

Other Electives
The remaining two courses may be chosen from any combination of (1) courses at the ISA 600 and 700 level, including ISA 697, ISA 796, ISA 797, and ISA 798; (2) courses at the CS 500, 600, and 700 level; and (3) from the list of preapproved electives provided below. A thesis option is available whereby a student may elect to complete a 6-credit thesis.

**Approved Electives**

A full list of approved electives is given below by program:

### Information Systems (INFS)

- INFS 614 - Database Management Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 3

### Information Security and Assurance (ISA)

- ISA 564 - Security Laboratory Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 697 - Topics in Information Security Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 797 - Advanced Topics in Information Security Credits: 3

### Software Engineering (SWE)

- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 630 - Software Engineering Economics Credits: 3
• SWE 631 - Object-Oriented Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 723 - Precise Modeling Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 781 - Secure Software Design and Programming Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3

Computer Science (CS)

• CS 540 - Language Processors Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 631 - Object-Oriented Design Patterns Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Database Engineering Credits: 3
• CS 652 - Computer Graphics Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 4
• CS 668 - Computer Architecture Systems Credits: 3
• CS 671 - Advanced Operating Systems Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Intelligent Systems for Robots Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Switching and Routing in Communication Networks Credits: 3
• ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3

• SYST 573 - Decision and Risk Analysis Credits: 3
Information Systems, MS

Banner Code: VS-MS-ISYS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This professional degree program focuses on the technical, managerial, and policy issues associated with designing, building, and maintaining information systems in organizations. Data, information, and knowledge are crucial to the modern enterprise, and the MS in information systems (MS-ISYS) addresses both the theoretical and engineering aspects of specifying, designing, implementing, and managing large-scale information systems.

The goals of the MS-ISYS are to provide a high-quality program that allows students with diverse baccalaureate and professional backgrounds to obtain the MS degree; provide a technical body of knowledge, together with hands-on project experience, that will allow students to analyze, design, build, deploy, maintain, and manage information systems in large organizations such as industry, government, and nonprofits; and provide a course of study that allows professionals to pursue a technical or a managerial approach to information systems.

The career paths open to graduates include technical and management positions. Technical positions include systems analyst, data administrator, information architect, database administrator, systems architect, decision analyst, data warehouse administrator, database programmer, web-based information systems designer and programmer, information engineer, and knowledge engineer. Management positions include chief information officer, chief knowledge officer, chief privacy officer, project manager, and webmaster.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Show proof of a satisfactory score on the GMAT or GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GMAT or GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B or better grade in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
• Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.
• International students must submit their TOEFL score.

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundations of SWE 510, INFS 501, 515, and 519. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Degree Requirements

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information systems, the following four courses are required of all students:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

Notes:

For students taking the emphasis area and/or graduate certificate in software engineering, SWE 620 must be substituted for INFS 622.
The core courses constitute the technical body of knowledge for the program. The elective courses are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

Elective Courses

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list is provided at the end of this section. Special courses may be used as electives with prior approval of the student’s academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Listed below are the emphasis areas and the approved elective courses in each area.

Database Management

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3

Data Mining

- CS 780 - Data Mining in Multimedia Databases Credits: 3
- CS 782 - Machine Learning Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3

Electronic Commerce

- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
Software Engineering

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3

Knowledge Management

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 650 - Development Frameworks for Information Systems Applications Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3

Information Security and Assurance

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 796 - Directed Readings in Information Security Credits: 3
Certificates

Certificates may be also obtained in the following areas: database management, data mining, electronic commerce, information engineering, information security and assurance, intelligent agents, software architecture, software engineering, foundations of information systems, web-based software engineering, biometrics, computer games technology, and computer networking. These certificates are described in the computer science certificates section of this catalog.

Approved Electives

A full list of approved electives is given below by program:

Information Systems (INFS)

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 650 - Development Frameworks for Information Systems Applications Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 3

Information Security and Assurance (ISA)

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 697 - Topics in Information Security Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
• ISA 767 - Secure Electronic Commerce Credits: 3  
• ISA 785 - Research in Digital Forensics Credits: 3  
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3  
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3  
• SWE 625 - Software Project Management Credits: 3  
• SWE 626 - Software Project Laboratory Credits: 3  
• SWE 630 - Software Engineering Economics Credits: 3  
• SWE 631 - Object-Oriented Design Patterns Credits: 3  
• SWE 632 - User Interface Design and Development Credits: 3  
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3  
• SWE 642 - Software Engineering for the World Wide Web Credits: 3  
• SWE 645 - Component-Based Software Development Credits: 3  
• SWE 699 - Special Topics in Software Engineering Credits: 3  
• SWE 720 - Advanced Software Requirements Credits: 3  
• SWE 721 - Reusable Software Architectures Credits: 3  
• SWE 723 - Precise Modeling Credits: 3  
• SWE 727 - Quality of Service for Software Architectures Credits: 3  
• SWE 763 - Software Engineering Experimentation Credits: 3  
• SWE 781 - Secure Software Design and Programming Credits: 3  
• SWE 795 - Advanced Topics in Software Engineering Credits: 3  
• SWE 796 - Directed Readings in Software Engineering Credits: 3  
• SWE 798 - Research Project Credits: 3

Computer Science (CS)

• CS 540 - Language Processors Credits: 3  
• CS 580 - Introduction to Artificial Intelligence Credits: 3  
• CS 583 - Analysis of Algorithms Credits: 3  
• CS 631 - Object-Oriented Design Patterns Credits: 3  
• CS 635 - Foundations of Parallel Computation Credits: 3  
• CS 640 - Advanced Compilers Credits: 3  
• CS 650 - Database Engineering Credits: 3  
• CS 652 - Computer Graphics Credits: 3  
• CS 662 - Computer Graphics Game Technologies Credits: 4  
• CS 668 - Computer Architecture Systems Credits: 3  
• CS 671 - Advanced Operating Systems Credits: 3  
• CS 672 - Computer System Performance Evaluation Credits: 3  
• CS 673 - Multimedia Computing and Systems Credits: 3  
• CS 680 - Natural Language Processing Credits: 3  
• CS 681 - Designing Expert Systems Credits: 3  
• CS 682 - Computer Vision Credits: 3
- CS 683 - Parallel Algorithms Credits: 3
- CS 684 - Graph Algorithms Credits: 3
- CS 685 - Intelligent Systems for Robots Credits: 3
- CS 686 - Image Processing and Applications Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 735 - Concurrency Credits: 3
- CS 750 - Theory and Applications of Data Mining Credits: 3
- CS 752 - Interactive Graphics Software Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- CS 777 - Human-Computer Intelligent Interaction Credits: 3
- CS 782 - Machine Learning Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

- ECE 511 - Microprocessors Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3
- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3
- ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3
- ECE 586 - Digital Integrated Circuits Credits: 3
- ECE 611 - Advanced Microprocessors Credits: 3
- ECE 612 - Real-Time Embedded Systems Credits: 3
- ECE 620 - Optimal Control Theory Credits: 3
- ECE 621 - Systems Identification Credits: 3
- ECE 624 - Control Systems Credits: 3
- ECE 633 - Coding Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 645 - Computer Arithmetic Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
- ECE 641 - Computer System Architecture Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Switching and Routing in Communication Networks Credits: 3
- ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 650 - Robotics Credits: 3
- ECE 680 - Physical VLSI Design Credits: 3
- ECE 681 - VLSI Design for ASICs Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
- ECE 735 - Data Compression Credits: 3
- ECE 741 - Wireless Networks Credits: 3
- ECE 744 - Computer Vision and Expert Systems Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ECE 749 - Neural Networks for Control Credits: 3

## Operations Research (OR)

- OR 540 - Management Science Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3

- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 659 - Topics in Systems Engineering Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 685 - Estimation and Tracking: Principles and Techniques Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Software Engineering, MS

Banner Code: VS-MS-SWE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and management aspects of software engineering development. Software engineering is an established discipline based on requirements analysis, design, construction, testing, maintenance, economics, and management issues. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective and efficient.

Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers, research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The master’s program is concerned with technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program is revised on a regular basis to stay abreast of the latest developments in information technology (IT). The program introduced a major revision for fall 2005; recent additions include software construction with the object-oriented Java programming language, requirements analysis with use cases and the Unified Modeling Language (UML), object-oriented software design with the UML, graphical user interface design, software engineering for the web, software project management using the spiral life cycle model and the Capability Maturity Model, software architecture, design patterns, system testing and testing of object-oriented components, and formal methods using the Object Constraint Language. All classes are scheduled in the late afternoon and early evening to accommodate employed students.
Foundation Requirements

Students entering the MS program must have course work or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Admission Requirements

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Submit a department self-evaluation form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.
- Show proof of a satisfactory score on the GRE, if required. The test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application form with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with specified course work to be completed within a specified time.

Advising
The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide for the student.

Degree Requirements

In addition to the general requirements of the university, the MS in software engineering requires a minimum of 30 graduate credits. The course work is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Four Core Courses (12 credits)

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

Emphasis Courses (9 credits)

Students may choose an emphasis by taking three courses from one of the emphasis areas of software design, software assurance, software management, and web applications. With permission from the advisor, a student may choose to not take an emphasis. The emphasis area courses are:

Software Design

- SWE 626 - Software Project Laboratory Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3

Software Assurance

- ISA 562 - Information Security Theory and Practice Credits: 3
- SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
- SWE 723 - Precise Modeling Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3

Software Management
Web Applications

- INFS 614 - Database Management Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3

Elective Courses (9 credits)

Students may select the remaining courses from the list of approved courses, including other emphasis areas, available from the department office and department web site. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in software engineering. The course designations are:

- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 796 - Directed Readings in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3
- SWE 799 - Thesis Credits: 6

Approved Electives

Below is the list of approved electives organized by academic program. Students should note that a maximum of two 500-level courses are allowed as electives. Courses not on this list may only be taken with explicit signed permission from the MS-SWE advisor.

Information Systems (INFS)

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3
• INFS 785 - Data Mining for Homeland Security Credits: 3
• INFS 790 - Information Systems Policy and Administration Credits: 3
• INFS 795 - Special Topics in Data Mining Applications Credits: 3
• INFS 797 - Advanced Topics in Information Systems Credits: 3

Information Security and Assurance (ISA)

• ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 563 - Fundamentals of Systems Programming Credits: 3
• ISA 564 - Security Laboratory Credits: 3
• ISA 640 - Programming Language Security Credits: 3
• ISA 650 - Security Policy Credits: 3
• ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 3
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 765 - Database and Distributed Systems Security Credits: 3
• ISA 767 - Secure Electronic Commerce Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 630 - Software Engineering Economics Credits: 3
• SWE 631 - Object-Oriented Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 723 - Precise Modeling Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 781 - Secure Software Design and Programming Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3
• SWE 799 - Thesis Credits: 6

Computer Science (CS)

• CS 540 - Language Processors Credits: 3
• CS 555 - Computer Communications and Networking Credits: 3
• CS 571 - Operating Systems Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Database Engineering Credits: 3
• CS 652 - Computer Graphics Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 4
• CS 668 - Computer Architecture Systems Credits: 3
• CS 671 - Advanced Operating Systems Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Intelligent Systems for Robots Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)
• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
• ECE 542 - Computer Network Architectures and Protocols Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Switching and Routing in Communication Networks Credits: 3
• ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3
• ECE 646 - Cryptography and Computer Network Security Credits: 3
• ECE 650 - Robotics Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 681 - VLSI Design for ASICs Credits: 3
• ECE 732 - Mobile Communication Systems Credits: 3
• ECE 735 - Data Compression Credits: 3
• ECE 741 - Wireless Networks Credits: 3
• ECE 744 - Computer Vision and Expert Systems Credits: 3
• ECE 746 - Advanced Applied Cryptography Credits: 3
• ECE 749 - Neural Networks for Control Credits: 3

Operations Research (OR)

• OR 540 - Management Science Credits: 3
• OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 542 - Operations Research: Stochastic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• OR 640 - Global Optimization and Computational Intelligence Credits: 3
• OR 641 - Linear Programming Credits: 3
• OR 642 - Integer Programming Credits: 3
• OR 643 - Network Modeling Credits: 3
• OR 644 - Nonlinear Programming Credits: 3  
• OR 645 - Stochastic Processes Credits: 3  
• OR 647 - Queuing Theory Credits: 3  
• OR 648 - Production and Inventory Systems Credits: 3  
• OR 681 - Decision and Risk Analysis Credits: 3  
• OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

• PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3  
• PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Statistics (STAT)

• STAT 544 - Applied Probability Credits: 3  
• STAT 554 - Applied Statistics Credits: 3  
• STAT 652 - Statistical Inference Credits: 3  
• STAT 655 - Analysis of Variance Credits: 3  
• STAT 656 - Regression Analysis Credits: 3  
• STAT 662 - Multivariate Statistical Methods Credits: 3  
• STAT 663 - Statistical Graphics and Data Exploration Credits: 3  
• STAT 664 - Bayesian Inference and Decision Theory Credits: 3  
• STAT 674 - Survey Sampling II Credits: 3  
• STAT 677 - Statistical Process Control Credits: 3

Systems Engineering (SYST)

• SYST 520 - System Engineering Design Credits: 3  
• SYST 530 - System Management and Evaluation Credits: 3  
• SYST 542 - Decision Support Systems Engineering Credits: 3  
• SYST 560 - Introduction to Air Traffic Control Credits: 3  
• SYST 573 - Decision and Risk Analysis Credits: 3  
• SYST 611 - System Methodology and Modeling Credits: 3  
• SYST 620 - Discrete Event Systems Credits: 3  
• SYST 659 - Topics in Systems Engineering Credits: 3  
• SYST 660 - Air Transportation Systems Modeling Credits: 3  
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3  
• SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3  
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3  
• SYST 684 - Sensor Data Fusion Credits: 3  
• SYST 685 - Estimation and Tracking: Principles and Techniques Credits: 3  
• SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
Master's Level Certificate

Biometrics Graduate Certificate

Banner Code: VS-CERG-BMCS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Biometrics, the science of recovering or verifying a person’s identity, measures the physical characteristics that make people unique (including fingerprints, an eye’s retina or iris, face, hand geometry, signature, and voice) and uses those measurements for person recognition or authentication. Biometrics are related to the science of forensics, which uses and interprets physical evidence for legal purposes. The importance of biometrics lies in the fact that traditional means of identification and verification are often unreliable or cumbersome. Passwords are difficult to remember and easy to steal. Keys, driver’s licenses, and passports can be lost or forged. The human body and its behavior, on the other hand, can’t be forgotten, stolen, forged, or misplaced.

Practical uses for such biometrics are widespread and include maintaining the security for physical space and cyberspace. In particular, biometrics aids in controlling access to an office, computer network or an ATM, smart cards, and wireless communication; confirming the identity of buyers and sellers to make electronic commerce safe and reliable; confirming student identity for distant learning; and safeguarding electronic records related to health care services.

The certificate requires completion of 15 credits and consists of two required courses and three courses of choice. Projects (3 credits) can substitute for one of the choice courses. One of the three courses of choice can be taken from another department, with the advisor’s approval, provided that it belongs to the certificate’s area.

Admission Requirements

The program is open to all students who are eligible for entrance into the master's degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Required Courses (6 credits):

- CS 667 - Biometrics Credits: 3
- CS 688 - Pattern Recognition Credits: 3

Choose from the following elective courses (9 credits):
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 652 - Computer Graphics Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 682 - Computer Vision Credits: 3
- CS 686 - Image Processing and Applications Credits: 3
- CS 750 - Theory and Applications of Data Mining Credits: 3
  or
- INFS 755 - Data Mining Credits: 3
- CS 774 - Computational Vision Credits: 3
- CS 775 - Advanced Pattern Recognition Credits: 3
- CS 777 - Human-Computer Intelligent Interaction Credits: 3

Note:

Students may take either CS 750 or INFS 755 but not both.

Computer Games Technology Graduate Certificate

Banner Code: VS-CERG-CGT

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Admission Requirements

The certificate program in computer games technology is open to all students who are eligible for entrance into the master's degree program in computer science or any scientific or engineering discipline at Mason. To obtain the certificate, candidates must complete the following courses for a total of at least 15 credits. Transfer credit may substitute for at most one of these courses, subject to department approval.

Certificate Requirements

Required courses (13 credits):

- CS 652 - Computer Graphics Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 662 - Computer Graphics Game Technologies Credits: 4
- CS 777 - Human-Computer Intelligent Interaction Credits: 3

Plus one course from the following:

- AVT 616 - Networked Art Practice Credits: 5
- AVT 676 - Sound and Music for Video and Animation Credits: 5
Computer Networking Graduate Certificate

Banner Code: VS-CERG-CNET

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

When brought together to form computer networks, the technologies of computing and communications exhibit a synergy that is revolutionizing our world. In-depth knowledge of the new discipline of computer networking increasingly is in demand as a basis for design and deployment of new information systems ranging from aspects of the global Internet to distributed systems in a variety of application domains. The courses for this certificate have been selected to provide a solid basis for understanding the core software and communications technologies on which today’s networks are based and how they may be combined to create effective computer networks. Courses cover mainstream and leading edge technology considerations, ensuring that students are prepared to function at the professional level in this fast moving and technologically challenging field.

Admission Requirements

The certificate program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Students must complete the following courses, for a total of 15 credits:

Required courses (6 credits):

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3

At least one of the following (3-6 credits):

- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3

One or two of the following electives (3 or 6 credits):
Data Mining Graduate Certificate

**Banner Code:** VS-CERG-DTM

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Computer Science

This graduate certificate program is intended for people interested in the analysis and knowledge discovery from large and diverse data sources. The goal of the program is to study data mining concepts and successful applications. The certificate in data mining may be pursued concurrently with any of the graduate programs in the Volgenau School.

**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. In addition, applicants must complete a self assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Each applicant must possess knowledge equivalent to that provided by the following courses at Mason: CS 310 Computer Science III, and STAT 344 Probability and Statistics for Engineers and Scientists.

Students not enrolled in a graduate degree program at Mason should apply for the data mining certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

**Certificate Requirements**

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. At least one course from three of the following groups must be taken to obtain the certificate:

**Group I**

- CS 750 - Theory and Applications of Data Mining Credits: 3
- CS 780 - Data Mining in Multimedia Databases Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- IT 844 - Advanced Pattern Recognition Credits: 3

**Group II**

- IT 875 - Scientific and Statistical Visualization Credits: 3

or
• CSI 703 - Scientific and Statistical Visualization Credits: 3
• IT 871 - Statistical Data Mining Credits: 3
• STAT 663 - Statistical Graphics and Data Exploration Credits: 3
  or
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
• STAT 753 - Computer Intrusion Detection Credits: 3

Group III

• INFS 755 - Data Mining Credits: 3
• INFS 795 - Special Topics in Data Mining Applications Credits: 3

Group IV

• SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  or
• STAT 664 - Bayesian Inference and Decision Theory Credits: 3

Database Management Graduate Certificate

Banner Code: VS-CERG-DBM

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The area of databases is considered by most experts to be a fundamental area of computer and information science, and this graduate certificate program provides comprehensive coverage that includes theoretical foundations, practical experience, and recent advances.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a graduate degree program at Mason should apply for the database management certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.
Certificate Requirements

Students must complete five courses in information systems and IT with an average grade of B or higher, for a total of 15 credits of graduate study. To obtain the certificate, students must take the following:

Required courses (6 credits):

- INFS 614 - Database Management Credits: 3
- INFS 760 - Advanced Database Management Credits: 3

Three from the following courses (9 credits):

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 764 - Object-Oriented Database Systems Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- IT 861 - Distributed Database Management Systems Credits: 3
- IT 864 - Scientific Databases Credits: 3

E-Commerce Graduate Certificate

Banner Code: VS-CERG-ECOM

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The Internet is having a significant effect on the way people interact with each other, with government, and with business. This graduate certificate program is for people who are interested in the use of Internet-based technology by people, government, and industry. We are witnessing the emergence of e-tailing, e-government, e-business, and business-to-business applications that are transforming society. The influence of electronic commerce is also being felt across international boundaries where it affects the management and administration of international business. The goal of the certificate in electronic commerce is to study the concepts, tools, policies, and underlying technology that enable Internet-based applications.

Admission Requirements

Applicants must hold a BS degree with a 3.00 or higher in the last 60 credits. They also must possess knowledge equivalent to the following four Mason courses, which are considered foundation courses: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java. Applicants also must possess equivalent knowledge of INFS 612 and 614; SWE 619, 620, and 621; or the prerequisite courses required for the selected electives.
Applicants must submit a one- to two-page statement of educational and work experience in the computing field. Applicants also need to complete a self-assessment form. The form provides summary information concerning background and preparation for the program.

For those students not enrolled in a Mason graduate degree program, application for the certificate program is made through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission into any MS program.

Certificate Requirements

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, a student must complete the following:

Two courses (6 credits):

- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3

Three additional courses (9 credits) from the following:

Electives have been organized into emphasis areas, but students may also mix and match elective courses subject to satisfying course prerequisites:

**Information Security**

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3

**Database Management**

- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3

**Internet Software Engineering**

- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
Health Medical Information Systems

- HAP 678 - Introduction to the U.S. Health System Credits: 3
- HAP 706 - Integrated Health Systems Management Credits: 3
- HAP 709 - Health Care Databases Credits: 3
- HAP 740 - Management of Health Information Systems Credits: 3

Notes:

The course HAP 678 may be waived for a person with experience in health care systems management and permission of the instructor.

Foundations of Information Systems Graduate Certificate

Banner Code: VS-CERG-FIS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This certificate program is designed primarily for students who earned an undergraduate degree in an area other than information systems and are interested in acquiring solid foundations to pursue further education and a career in information systems, software engineering, information security and assurance, or a related discipline.

Admission Requirements

The admission requirements for the certificate in foundations of information systems is a four-year bachelor’s degree with a GPA of 3.00 or higher. Also, the admission to the MS in Information Systems Program allows automatic admission to the certificate program.

Certificate Requirements

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, a student needs to complete the following:

Required courses (12 credits)

Take each one of the following foundation courses (no replacement is allowed):

- INFS 501 - Discrete and Logical Structures for Information Systems Credits: 3
- INFS 515 - Computer Organization Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- SWE 510 - Object-Oriented Programming in Java Credits: 3
Elective (3 credits)

- Take any one course from the INFS, SWE, or ISA programs that does not require any prerequisites other than the above foundation courses.

Information Engineering Graduate Certificate

Banner Code: VS-CERG-INFE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program is tailored for people involved in the specification, design, implementation, and management of data- and knowledge-intensive information systems. The certificate program prepares students for research, development, and professional practice in information engineering by offering a hands-on set of courses providing theoretical knowledge and practical experience with methods and tools associated with database management systems, data modeling, knowledge acquisition, data and knowledge representation, and software engineering.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply for the information engineering certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. To obtain the certificate, students must complete the following:

Four required courses (12 credits):

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3

One of the following courses (3 credits):
- INFS 770 - Knowledge Management for E-Business Credits: 3
- SWE 625 - Software Project Management Credits: 3

**Note:**

Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded. For more information, contact the department or visit the department web site.

**Information Security and Assurance Graduate Certificate**

**Banner Code:** VS-CERG-ISA

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Computer Science

This graduate certificate program is for people who are interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students must also possess the equivalent knowledge of CS 571 and CS 555, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

**Certificate Requirements**

Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

**Two required courses (6 credits):**

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3

**Three additional courses (9 credits):**
Three electives to be taken from the following, excluding ISA 697, ISA 796, ISA 797, and ISA 798.

- Courses at the ISA 600 and 700 level
- ISA 564 - Security Laboratory Credits: 3

Intelligent Agents Graduate Certificate

Banner Code: VS-CERG-INAG

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This certificate concentrates on the theory and practice of designing and developing systems that rely on knowledge and reasoning, generically called intelligent agents: expert systems, knowledge-based systems, knowledge-based decision support systems, expert database systems, intelligent tutoring systems, and so on. Capturing, using, preserving, transferring, and sharing knowledge is of critical importance to any organization as society evolves from an information society to a knowledge society. Therefore, the ability to design and develop intelligent agents for a wide variety of domains is becoming a highly valuable expertise. The courses in this certificate program cover the basics of knowledge engineering and intelligent agents, as well as advanced research topics. Basic topics include knowledge representation, knowledge acquisition, heuristic search, problem solving and planning, uncertainty reasoning, machine learning, natural language processing, design of expert systems, human computer interaction, data mining, knowledge discovery, and knowledge management. Advanced topics include the development of multiagent systems, mixed-initiative intelligent systems, web-based intelligent agents, and distributed ontologies.

Admission Requirements

The program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Students must complete the following courses for a total of 15 credits:

Required (3 credits):

- CS 580 - Introduction to Artificial Intelligence Credits: 3

Plus four of the following elective courses (12 credits):

- CS 680 - Natural Language Processing Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 685 - Intelligent Systems for Robots Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 750 - Theory and Applications of Data Mining Credits: 3
- CS 777 - Human-Computer Intelligent Interaction Credits: 3
- CS 780 - Data Mining in Multimedia Databases Credits: 3
- CS 782 - Machine Learning Credits: 3
Note:

One of the four courses may be taken from another MS or PhD program in the Volgenau School with advisor approval, provided it belongs to the certificate area.

Software Architecture Graduate Certificate

Banner Code: VS-CERG-SWA

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working or planning to work in software architecture but do not want to complete the requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Software architecture is an essential part of a software system and can be considered the backbone for such a system. Many industrial organizations recognize the important role of software architecture and have requested specific courses and graduate certification in this area. This proposed graduate certificate program addresses this industrial need. Mason is well-positioned to address this need because the university already offers several relevant courses and has the faculty with the necessary expertise to teach them.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science office for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.
Certificate Requirements

Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

Required courses (9 credits):

- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

Elective Courses (Select two courses) (6 credits):

- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 732 - Software Maintenance and Reuse Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- IT 823 - Software for Critical Systems Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 631 - Object-Oriented Design Patterns Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3

Software Engineering Graduate Certificate

Banner Code: VS-CERG-SWE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and
Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one-to-two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science Department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete five courses with an average grade of B or better for a total of 15 credits of graduate study.

Three required courses (9 credits):

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3

Two additional courses (6 credits):

(subject to satisfying their prerequisites) from the following

- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 735 - Concurrency Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 630 - Software Engineering Economics Credits: 3
- SWE 631 - Object-Oriented Design Patterns Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 720 - Advanced Software Requirements Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 723 - Precise Modeling Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 763 - Software Engineering Experimentation Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3
Notes:

Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any five SWE courses. If CS/SWE 706 is included, it is possible to complete the MS in computer science and the certificate in software engineering within 30 hours.

Web-Based Software Engineering Graduate Certificate

Banner Code: VS-CERG-WBSE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply to the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Certificate Requirements

Students must complete five courses with an average grade of B or higher for a total of 15 credits of graduate study.

Three required courses (9 credits):

- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3

One of the following courses (3 credits):

-
One of the following courses (3 credits):

- CS 675 - Distributed Systems Credits: 3
- INFS 614 - Database Management Credits: 3
- ISA 656 - Network Security Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3

Doctoral Degree

Computer Science, PhD

Banner Code: VS-PHD-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The PhD program requires course work, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason’s general doctoral requirements apply to this program.

Admission Requirements

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, they must have taken the GRE exams: the General Test is required from every applicant; the Subject Test in Computer Science is not required but is recommended. Finally, each applicant must provide a brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Qualifying Exams

Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Each student must take a set of four exams no later than the first opportunity following the completion of 24 credits. If a student enters the program without a master’s
degree in computer science or a related area, then the exams must be taken no later than the first opportunity following the completion of 36 credits.

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member must be from outside the department. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department and the associate dean for graduate studies of the Volgenau School.

Comprehensive Exam

Students must pass an oral comprehensive exam, in which they demonstrate depth of knowledge in their intended area of research, and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee prior to the exam and becomes part of the student’s record. The duration of the oral exam is typically two hours.

Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and possibly the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than general time limits for the doctoral degree, and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

PhD Study in Information Technology with CS Concentrations
Doctoral study in information systems, software engineering, and information security is available through the PhD in Information Technology Program, which offers advanced courses in these disciplines. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas including information systems, software engineering, and information security.

Degree Requirements

The course requirement for the degree is 72 credits. Of these, 30 credits, at most, may be granted for an approved MS degree.

The following courses, totaling 30 credits, are required from all students:

- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 800 - Computer Science Colloquium Credits: 1
- CS 990 - Dissertation Topic Presentation Credits: 1
- CS 998 - Doctoral Dissertation Proposal Credits: 1-12
- CS 999 - Doctoral Dissertation Credits: 1-12

Note:

Students must enroll in two sections of CS 800 for a total of 2 credits.

Students may enroll in 1-to-12 credits of CS 998 and CS 999 over several semesters; the total number of credits for sections of each course must sum to 12, giving a total of 24 credits for CS 998 and CS 999.

The remaining 12 credits must be obtained in advanced graduate courses (an advanced graduate course is a graduate course that requires another graduate course as a prerequisite).

Concentration

▲ Concentration in Information Security and Assurance (ISA)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information security. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of Computer Science doctoral coordinator.

Doctoral Supervisory Committee
The dissertation director must be a faculty member of the Volgenau School. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator and department chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲ Concentration in Information Systems (ISYS)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information systems. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a Computer Science faculty member. The composition of the doctoral supervisory committee must be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and the dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲ Concentration in Software Engineering (SWE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in software engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study
All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

**Doctoral Supervisory Committee**

The dissertation director must be a faculty member of the Computer Science Department. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

**Electrical and Computer Engineering**

*School: The Volgenau School of Information Technology and Engineering*

**Faculty**

**Professors:** Allnutt, Cook, Ephraim, Gertler, Griffiths, Ioannou, Jabbari, Levis, Manitius (chair), Mulpuri  
**Associate professors:** Berry, Chang, Gaj, Hintz, Mark, Pachowicz, Paris, W. Sutton, Wage  
**Assistant professors:** Hwang, Ikonomidou, Kaps, Li, Nelson, Peixoto, Sikdar  
**Research professors:** Katona, Wagenhals, Zaidi  
**Instructor:** Pandula  
**Adjunct professors:** Abgariah, Allen, Alper, Beatty, Bollino, Brooks, Follendore, Fowler, Gong, Hibey, Hockensmith, Hrnjej, Lazarevich, Leaf, Lorie, Osgood, Sabzevari, Tham, Tran, Van Meter T, West S, Williams, Wilson, Wu, Young  
**Emeritus faculty:** Baraniecki, Beale, Black, Schaefer, Tabak, Van Trees

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation. The objectives of undergraduate programs within the ECE Department relate to the abilities of our graduates three to five years after graduation. These objectives include:

- Technical knowledge: Graduates will be able to apply the fundamentals in the appropriate engineering discipline as demonstrated by success as productive engineers in industry, government, or graduate school.
- Preparation for further study: Graduates will have the knowledge and skills to engage in lifelong learning.
- Professionalism: Graduates will have the skills and understanding needed to fulfill their professional responsibilities as engineers, including written and oral communication, ethics, and teamwork.

Graduate programs leading to MS and PhD degrees in engineering prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. ECE offers the PhD in electrical and computer engineering, MS degrees in computer engineering.
and electrical engineering, and certificates in communications and networking, signal processing, and very large-scale integration design and manufacturing. The PhD in information technology is offered by The Volgenau School and includes a number of courses with an electrical engineering or computer engineering emphasis. Details about these programs are available at ite.gmu.edu.

ECE is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, intelligent systems and microelectronics. The department recognizes the need to augment and enhance these areas through the use of modern IT. Graduate students are offered a progressive environment with ample opportunities for the type of advanced engineering research needed to confront the complex realities of the 21st century.

The courses in these programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

Course Work

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE, BENG and CRFS in the Courses chapter of this catalog. The department also offers most of the courses designated TCOM and some ENGR and IT courses.

Undergraduate Degree

Computer Engineering, BS

Banner Code: VS-BS-CPE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

The objectives of undergraduate programs within the ECE Department relate to the abilities of our graduates three to five years after graduation. These objectives include:

- Technical knowledge: Graduates will be able to apply the fundamentals in the appropriate engineering discipline as demonstrated by success as productive engineers in industry, government, or graduate school.
- Preparation for further study: Graduates will have the knowledge and skills to engage in lifelong learning.
- Professionalism: Graduates will have the skills and understanding needed to fulfill their professional responsibilities as engineers, including written and oral communication, ethics, and teamwork.

The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.
Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

The bachelor’s program in computer engineering at Mason is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The computer engineering program is staffed by 25 full-time professors, including five fellows of IEEE or other professional societies.

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective concentrations are offered, ranging from strongly hardware-oriented concentrations to strongly software-oriented ones. A major project with appropriate planning, documentation, and oral and written reports is required.

The requirements for the degree may be satisfied on a part-time or co-op basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

Degree Requirements

All computer engineering students are strongly encouraged to see their major advisor each semester before course registration. Students interested in computer engineering who have not declared a major are also invited to obtain advising at the ECE Department office. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, ENGR, and CS course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in computer engineering are as follows:

**Electrical and computer engineering:**
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 445 - Computer Organization Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2

**Technical Electives Credits: 9**
Computer science:
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 367 - Computer Systems and Programming Credits: 3
- CS 471 - Operating Systems Credits: 3

Engineering:
- ENGR 107 - Introduction to Engineering Credits: 2

Literature general education course Credits: 3
Arts general education course Credits: 3
Global understanding general education course Credits: 3

English:
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
- COMM 100 - Public Speaking Credits: 3

Economics:
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Western Civilization: (choose one of these)
- HIST 100 - History of Western Civilization Credits: 3
- HIST 125 - Introduction to World History Credits: 3

Mathematics:
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 346 - Probability for Engineers Credits: 3

Physics:
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3

Note:
The general education synthesis requirement is satisfied by ECE 492 plus ECE 493. General education courses should be selected from the department’s list of approved courses. The Synthesis general education requirement is satisfied by ECE 492 plus ECE 493. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above. Technical electives
should be selected from the department’s list of approved technical elective concentrations. Students are also encouraged to propose additional technical elective concentrations for approval.

Sample Schedule

The following presents a sample schedule that undergraduate computer engineering majors would pursue to obtain a bachelor’s degree.

First Semester

- CS 112 - Introduction to Computer Programming Credits: 4
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Total: 14 credits

Third Semester

- Literature course (3 credits)
- ECE 201 - Introduction to Signal Analysis Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Total: 16 credits

Fourth Semester
• ECE 220 - Signals and Systems I Credits: 3
• ECE 280 - Electric Circuit Analysis Credits: 5
• ECE 331 - Digital System Design Credits: 3
• ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
• MATH 214 - Elementary Differential Equations Credits: 3

Total: 15 credits

Fifth Semester

• ECE 333 - Linear Electronics I Credits: 3
• ECE 334 - Linear Electronics Lab I Credits: 1
• ECE 445 - Computer Organization Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
• STAT 346 - Probability for Engineers Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1

Total: 14 credits

Sixth Semester

• COMM 100 - Public Speaking Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• ECE 465 - Computer Networking Protocols Credits: 3
• CS 471 - Operating Systems Credits: 3
• PHYS 262 - University Physics III Credits: 3

Total: 15 credits

Seventh Semester

• Technical elective Credits: 3
• Global understanding course Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1

• HIST 100 - History of Western Civilization Credits: 3
  OR
• HIST 125 - Introduction to World History Credits: 3
Total: 15 credits

Eighth Semester

- Technical elective Credits: 3
- Technical elective Credits: 3
- Arts course Credits: 3
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 493 - Senior Advanced Design Project II Credits: 2

Total: 15 credits

Change of Major

Students who want to change their majors to computer engineering or electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by completion of ECE 492 and 493, or BENG 492 and BENG 493, Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.

Double Major Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at The Volgenau School web site ite.gmu.edu.

Electrical Engineering, BS

Banner Code: VS-BS-ELEN

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, from integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks.
The bachelor’s program in electrical engineering at Mason is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The electrical engineering program is staffed by 25 full-time professors, including five fellows of IEEE or other professional societies. The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further concentration in one of these areas.

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Degree requirements may be satisfied on a part-time or co-op basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

Degree Requirements

All electrical engineering students are strongly encouraged to see their major advisor before course registration each semester. Students interested in electrical engineering who have not declared a major also are invited to obtain advising from the ECE Department. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in electrical engineering are as follows:

**Electrical and computer engineering:**

- ECE 101 - Information Technology for Electrical Engineers Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 320 - Signals and Systems II Credits: 3
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
- ECE 445 - Computer Organization Credits: 3
- ECE 460 - Communication and Information Theory Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2

**Advanced Engineering Labs Credits:** 2
Technical Electives  Credits: 9

Computer science:
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 222 - Computer Programming for Engineers Credits: 3

Engineering:
- ENGR 107 - Introduction to Engineering Credits: 2

Literature general education course  Credits: 3
Arts general education course  Credits: 3
Global understanding course  Credits: 3

English:
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
- COMM 100 - Public Speaking Credits: 3

Economics:
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Western civilization (choose one):
- HIST 100 - History of Western Civilization Credits: 3
  OR
- HIST 125 - Introduction to World History Credits: 3

Mathematics:
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 346 - Probability for Engineers Credits: 3

Physics:
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Note:
The general education synthesis requirement is satisfied by ECE 492 plus ECE 493 or by BENG 492 plus BENG 493. General education courses should be selected from the department’s list of approved courses. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above. Technical electives should be selected from the department’s list of approved courses. The required design content must be satisfied by the technical electives.
Concentrations

Concentrations are available within the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student’s transcript on graduation.

▲ Concentration in Bioengineering (BIOE)

In place of 13 credits of PHYS 262, PHYS 263, ECE 460, ECE 492, ECE 493, and one 3-credit technical elective as listed under the Degree Requirements section above, take 13 credits of:

- BIOL 213 - Cell Structure and Function Credits: 4
- BENG 401 - Bioengineering Instrumentation and Design Credits: 4
- BENG 402 - Bioengineering Instrumentation and Design Laboratory Credits: 1
- BENG 492 - Senior Advanced Design Project I Credits: 2
- BENG 493 - Senior Advanced Design Project II Credits: 2

▲ Concentration in Communications and Signal Processing (CSP)

Students must complete:

- ECE 461 - Communication Engineering Laboratory Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a communications and signal processing topic)

And three courses from:

- ECE 410 - Principles of Discrete-Time Signal Processing Credits: 3
- ECE 462 - Data and Computer Communications Credits: 3
- ECE 463 - Digital Communications Systems Credits: 3
- ECE 464 - Modern Filter Design Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (communications and signal processing topic only)
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (communication and signal processing topic only)
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3

▲ Concentration in Computer Engineering (CPE)

Students must complete:

- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 492 - Senior Advanced Design Project I Credits: 1  
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a computer engineering topic)

And two courses from:

- ECE 431 - Digital Circuit Design Credits: 3  
- ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3  
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4  
- ECE 450 - Introduction to Robotics Credits: 3  
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (computer engineering topic only)  
- ECE 548 - Sequential Machine Theory Credits: 3  
- ECE 590 - Selected Topics in Engineering Credits: 3  
- CS 471 - Operating Systems Credits: 3  

▲ Concentration in Control Systems (CON)

- ECE 429 - Control Systems Lab Credits: 1  
- ECE 492 - Senior Advanced Design Project I Credits: 1  
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a control systems topic)

And three courses from:

- ECE 422 - Digital Control Systems Credits: 3  
- ECE 447 - Single-Chip Microcomputers Credits: 4  
- ECE 450 - Introduction to Robotics Credits: 3  
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (control systems topic only)  
- ECE 511 - Microprocessors Credits: 3  
- ECE 521 - Modern Systems Theory Credits: 3  
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3  
- ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3  
- ECE 590 - Selected Topics in Engineering Credits: 3 (control systems topic only)

▲ Concentration in Electronics (ELE)

Students must complete

- ECE 434 - Linear Electronics II Laboratory Credits: 1  
  OR  
- ECE 435 - Digital Circuit Design Laboratory Credits: 1

  AND

- ECE 492 - Senior Advanced Design Project I Credits: 1
• ECE 493 - Senior Advanced Design Project II Credits: 2 (with an electronics topic)

And three courses from:

• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
• ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
• ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (electronics topic only)
• ECE 513 - Applied Electromagnetic Theory Credits: 3
• ECE 520 - Applications of Analog and Digital Integrated Circuits Credits: 3
• ECE 563 - Introduction to Microwave Engineering Credits: 3
• ECE 565 - Introduction to Optical Electronics Credits: 3
• ECE 567 - Optical Fiber Communications Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 587 - Design of Analog Integrated Circuits Credits: 3
• ECE 590 - Selected Topics in Engineering Credits: 3 (electronics topic only)
• PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
• PHYS 308 - Modern Physics with Applications Credits: 3

Sample Schedule

The following is a sample schedule that an undergraduate electrical engineering major would follow to obtain a bachelor’s degree.

First Semester

• CS 112 - Introduction to Computer Programming Credits: 4
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ENGR 107 - Introduction to Engineering Credits: 2
• ENGL 101 - Composition Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

• CS 222 - Computer Programming for Engineers Credits: 3
• ECE 101 - Information Technology for Electrical Engineers Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1

Total: 14 credits

Third Semester

• Literature course Credits: 3
• ECE 201 - Introduction to Signal Analysis Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 203 - Linear Algebra Credits: 3
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Total: 16 credits

Fourth Semester

• ECE 280 - Electric Circuit Analysis Credits: 5
• ECE 220 - Signals and Systems I Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Total: 15 credits

Fifth Semester

• Arts course Credits: 3
• ECE 320 - Signals and Systems II Credits: 3
• ECE 331 - Digital System Design Credits: 3
• ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
• ECE 333 - Linear Electronics I Credits: 3
• ECE 334 - Linear Electronics Lab I Credits: 1
• STAT 346 - Probability for Engineers Credits: 3

Total: 17 credits

Sixth Semester
• COMM 100 - Public Speaking Credits: 3
• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 433 - Linear Electronics II Credits: 3
• ECE 445 - Computer Organization Credits: 3
• ECE 460 - Communication and Information Theory Credits: 3

Total: 15 credits

Seventh Semester

• Advanced engineering lab  Credits: 1
• Technical elective  Credits: 3
• Global understanding course  Credits: 3
• ECE 305 - Electromagnetic Theory Credits: 3
• ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ENGL 302 - Advanced Composition Credits: 3

Total: 15 credits

Eighth Semester

• Advanced engineering lab  Credits: 1
• Technical elective  Credits: 3
• Technical elective  Credits: 3
• ECE 493 - Senior Advanced Design Project II Credits: 2
  AND, either
• HIST 100 - History of Western Civilization Credits: 3
  OR
• HIST 125 - Introduction to World History Credits: 3

Total: 12 credits

Change of Major

Students who want to change their majors to computer engineering or electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by completion of ECE 492 and 493, or BENG 492 and BENG 493, Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.

Double Major Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site ite.gmu.edu.

Bachelor's/Accelerated Master's Program

Computer Engineering, BS/Computer Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering
Department: Electrical and Computer Engineering

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in computer engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in computer engineering in five years with 144 credits.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.50 undergraduate GPA.

Degree Conferral

Students must apply to have the BS in computer engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Degree Requirements

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.50 during the entire BS/MS program and present a GPA of at least 3.50 for the 24 credits of graduate work submitted for the MS degree.

Master's Degree

Computer Engineering, MS

Banner Code: VS-MS-CPE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The computer engineering field is at the interface of the computer science and electrical engineering disciplines because it involves knowledge of hardware and software development. The major distinction between computer engineering and computer science is that the computer engineer is more concerned with the physical implementation of computing devices, the interaction between hardware and software, and the methodologies for designing digital systems. The major distinction between computer engineering and electrical engineering is that the computer engineer is more concerned with the computational aspects of
electrical engineering problems and the implementation of these solutions in digital devices. The computer engineering program offers the following emphases: digital systems design, computer networks, distributed computing systems, microprocessor and embedded systems, and network and system security.

Admission

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

Admission Categories

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive Bs or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Admission Requirements for Computer Engineering or Electrical Engineering Masters Program

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one emphasis area of computer engineering; it cannot be a set of disjointed courses.
The plan of study for the degree must include the following:

Two core courses (with B or better in each) from the following:

- CS 571 - Operating Systems Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3

Minimum of 3 courses:

With a grade of B or better in each, at the 600 level and above (not including ECE 798 or 799), including approved doctoral courses (800 and 900 levels).

Electives:

The remaining courses must be taken from the list of approved computer engineering courses (available through the ECE and Computer Science Department offices and on the web), which includes selected courses offered by both departments.

The plan of study usually has no fewer than 15 credits of courses designated ECE.

Lists of courses appropriate for emphasis areas, such as digital systems design, computer networks, network and system security, and microprocessor and embedded systems, are available from the department office. A self-defined emphasis may be created when appropriate, with the approval of the computer engineering graduate program coordinator. This emphasis must include components of hardware and software development and the corresponding plan of study must comprise courses from ECE and the Computer Science Departments.

Common Degree Requirements for CPE or ELEN Master's Program

The following policies apply to students pursuing the MS in computer engineering or the MS in electrical engineering.

Student Advising

Newly admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an emphasis from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.
Seminar Requirement

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Graduation Requirements

To complete requirements for graduation, students may select one of the following options:

Thesis Option

Students must complete ECE 799 Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major emphasis, and one from outside the emphasis. For the Computer Engineering Program, this committee includes faculty members from the ECE and the Computer Science Departments, including at least two affiliated with the MS in Computer Engineering Program, one of whom must be from ECE and one from outside the MS in Computer Engineering Program. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

Computer Forensics, MS

Banner Code: VS-MS-CFRS

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

Computer forensics is a new discipline addressing the collection, processing, and analysis of digital information so that this information can be admitted as evidence in a court of law. It is interdisciplinary in its nature with the inclusion of computer
engineering, computer science, information technology, law, and ethics. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information there has been an increase in cyber crime. In response to this, computer forensics has become an important profession serving both public and private sectors. The M.S. in Computer Forensics will prepare graduates for careers in law enforcement and various other branches of government, and in the corporate sector such as banking and finance, by combining academic education with real world practical techniques, and by offering advanced training in analyzing digital evidence, in intrusion forensics, and in legal and ethical issues.

Admission Requirements

Students who hold a B.S. degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, or students who have equivalent work experience indicating analytical aptitude, may apply to the M.S. in computer forensics. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes an 18-credit required Core component which includes a mandatory capstone course and a 12-credit elective component as shown below:

Core courses (18 credits):

- CFRS 500 - Introduction to Technologies of Forensics Value Credits: 3
- ISA 522 - Information Security Essentials Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- CFRS 660 - Network Forensics Credits: 3
- CFRS 661 - Digital Media Forensics Credits: 3
- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3
- CFRS 790 - Advanced Computer Forensics Credits: 3

Elective courses (12 credits):

- CFRS 664 - Incident Response Forensics Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3 *
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3 *
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
Please note:

*Both CFRS 760 and CFRS 770 may be taken but only one may be used in the core component.

Other courses may be appropriate as elective courses in the degree program, but they must be approved prior to registration.

### Electrical Engineering, MS

**Banner Code:** VS-MS-ELEN

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Electrical and Computer Engineering

The electrical engineering program offers the following emphases: bioengineering, communications, signal processing, control and robotics, and microelectronics.

### Admission

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

### Admission Categories

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive Bs or better in two core courses specific to the student’s selected program and emphasis. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

### Admission Requirements for Computer Engineering or Electrical Engineering Masters Program

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- SOCI 607 - Criminology Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
• Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
• Detailed statement of career goals and aspirations
• For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
• For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

Two core courses, with a B or better in each, from the following:

• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
  OR
• ECE 511 - Microprocessors Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
  OR
• ECE 565 - Introduction to Optical Electronics Credits: 3

and

Minimum of three courses, with a B or better in each, at the 600 level or above (not including ECE 798 or 799) from a chosen specialization, including approved doctoral courses (800 and 900 levels).

Note:

A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval. Approved IT courses (including doctoral 800- and 900-level courses) that cover ECE topics may be taken for credit toward an MS in electrical engineering, subject to prior department approval, in addition to the 6 credits of non-ECE courses.

Common Degree Requirements for CPE or ELEN Master's Program
The following policies apply to students pursuing the MS in computer engineering or the MS in electrical engineering.

Student Advising

Newly admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an emphasis from those available in each MS degree program. Students then are assigned an academic advisor from that emphasis area.

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Seminar Requirement

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Graduation Requirements

To complete requirements for graduation, students may select one of the following options:

Thesis Option

Students must complete ECE 799 Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee includes faculty members from the ECE and the Computer Science Departments, including at least two affiliated with the MS in Computer Engineering Program, one of whom must be from ECE and one from outside the MS in Computer Engineering Program. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option
Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

**Telecommunications, MS**

**Banner Code:** VS-MS-TCOM

**School: The Volgenau School of Information Technology and Engineering**

**Department: Electrical and Computer Engineering**

The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, law, business, international aspects, and other fields. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on the theoretical approach. It focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications law and policy. More than 30 new engineering and IT courses have been designed specially for this program, including five certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications. Two of the certificates are at an advanced level: the telecommunications forensics and security certificate and the advanced networking protocols for telecommunications certificate.

A novelty of the program is its structure, which consists of five specialty modules corresponding to areas of emphasis. The program offers a mix of 3-credit full-semester courses together with 1.5-credit half-semester courses. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility because they are able to design their master’s programs to fit their technical preferences, including the option of taking courses in other programs at Mason.

A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, ATM, and Internet protocols; network applications, such as networked multicomputer systems,client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, PCS, and GPS.

Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, capacity modeling, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications.

The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.
Format

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500, 501, 502, and 521); 6 credits of electives drawn from an interdisciplinary group of core courses common with the former MA in telecommunications (PUBP 726, LAW 181, and TELE 750 or TCOM 750), and a basic switching lecture and laboratory course (TCOM 514) or an Internet protocol routing lecture and laboratory course (TCOM 515); and five specialty modules (areas of emphasis). Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 509 and TCOM 529 for TCOM 501 and TCOM 502 in their mandatory core program, respectively.

Students must complete 30 credits of course work through a combination of core courses and specialty modules. The core consists of 15 credits, with the remaining 15 credits earned in specialty modules. The specialty modules are subareas of telecommunications that provide the necessary depth in the selected areas of emphasis.

Students are usually expected to take courses from at least two specialty modules. Up to 6 credits from the core program may be carried forward into the specialty modules, thus permitting up to 6 credits of electives to be taken inside or outside the prime specialty module chosen by the student. TCOM 501/502 may be carried forward into specialty module 1, 2, or 3; TCOM 521 may be carried forward into specialty module 4 or 5. Double counting is not permitted, but the courses carried forward into a given module may permit that module’s credit requirement to be satisfied, thus allowing elective courses to be taken outside that module. Usually, a minimum of 6 credits is needed to satisfy one specialty module. Credit for each specialty module can be obtained by taking an appropriate combination of full-semester courses (3 credits) and half-semester courses (1.5 credits). In many cases, a pair of coordinated, half-semester courses (for example, TCOM 503/513 on fiber optic communications and networks) permits students to take a half-semester course to get an introduction to the field or the equivalent of a full-semester course for a more complete knowledge of that topic.

Admission Requirements

Courses are open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 575, the foundation course that prepares students for TCOM 500, prior to being allowed to take TCOM 500. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

Degree Requirements

Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500, 501, 502, and 521. Up to 6 credits of a combination of C or B- grades may be carried within the program from the remaining core courses or from the specialty module courses, provided the overall GPA is 3.00 or higher.

The plan of study includes the following:

15 credits of core courses, subject to the following constraints:
Mandatory core courses (9 credits):

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5
  or
- TCOM 509 - Internet Protocols Credits: 1.5 *
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5
  or
- TCOM 529 - Advanced Internet Protocols Credits: 1.5 *
- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3

Note:

*Students must receive prior permission to substitute TCOM 509 for TCOM 501 or TCOM 529 for TCOM 502.

Elective core courses (6 credits selected from the following):

- Law 181 Telecommunications Law and Regulation Credits: 3
  www.law.gmu.edu/academics/courses/law181
- PUBP 726 - Telecommunications Policy Credits: 3
- TCOM 514 - Basic Switching: Lecture and Laboratory Course Credits: 3 *
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3 *
- TCOM 750 - Coordinating Seminar Credits: 3

Note:

*Both TCOM 514 and TCOM 515 may be taken for credit, but only one may be used to satisfy a core elective requirement.

Students must take a minimum of 15 credits of courses listed under the following specialty modules:

Students usually take 15 credits from at least two of the five specialty modules, or they may elect to take all 15 credits from the systems engineering of telecommunications module (module 5). Students electing to carry forward a core course (TCOM 501/502 or TCOM 521) into an appropriate specialty module have the option of taking an elective course in that module or another module to bring the total number of credits in the specialty modules to 15.

A specialty module (group of courses in an area of emphasis) can be completed by a combination of full-semester courses and half-semester courses listed under the module or considered applicable to that module for a total of at least 6 credits in that module. Some specialty module courses are in more than one module; for example, TCOM 509 Internet Protocols is in module 1, network technologies, and module 2, network applications. Half-semester 1.5-credit courses may only be counted in one module,
even if they apply to more than one. Full-semester 3-credit courses may be counted in one module or split between two modules. For example, TCOM 551 Digital Communication Systems, which is in modules 1 and 3, may be counted as 3 credits in either module, or 1.5 credits in each module.

Basic courses in each module have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each specialty module by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five modules. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into modules 4 and 5 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

A capstone project course, TCOM 699, is required under the systems engineering of telecommunications module (module 5) should the student elect to take all 15 credits in this specialty module. Students taking only 7.5 credits in modules 4 or 5 have the option of taking TCOM 699, but the course is not required unless the student takes all 15 credits in module 5.

List of Specialty Modules

Courses listed below from other graduate programs in the Volgenau School listed below can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.

Module 1, Network Technologies

- TCOM 503 - Fiber Optic Communications Credits: 1.5
- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 513 - Optical Communications Networks Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 556 - Applied Cryptography Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
Module 2, Network Applications

- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 513 - Optical Communications Networks Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 541 - Network Design and Pricing Credits: 1.5
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 555 - Network Management Foundations and Applications Credits: 3
- TCOM 556 - Applied Cryptography Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 603 - Standards for Advanced Optical Networks Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
- TCOM 611 - Multi-Protocol Label Switching (MPLS) Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3

Module 3, Wireless Communications

- TCOM 506 - Personal Communication Systems (PCS) Credits: 1.5
- TCOM 516 - Global Positioning System (GPS) Credits: 1.5
- TCOM 517 - Introduction to Propagation Effects Credits: 1.5
- TCOM 518 - Third Generation Cellular Telephony Credits: 1.5
- TCOM 526 - Advanced Global Positioning System (GPS) Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
Module 4, Modeling of Telecommunications Systems

- TCOM 541 - Network Design and Pricing Credits: 1.5
- TCOM 542 - Stochastic Models in Telecommunications Credits: 1.5
- TCOM 545 - Reliability and Maintainability of Networks Credits: 3
- TCOM 546 - Financial Models of Telecommunications Systems Credits: 3
- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 699 - Telecommunications Project Course Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

Module 5, Systems Engineering of Telecommunications

This module can be taken as one of two specialty modules or as one 15-credit module. No more than two SYST courses can be taken within this module.

- TCOM 520 - Economics of Telecommunications Credits: 3
- TCOM 546 - Financial Models of Telecommunications Systems Credits: 3
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 699 - Telecommunications Project Course Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- ITRN 772 - International Telecommunications Credits: 3

Applicable BS/Accelerated MS in Telecommunications Programs
These degree programs may be taken as part of an accelerated MS in Telecommunications Program with three undergraduate degree programs: BS in systems engineering, information technology, and individualized studies. See respective undergraduate degree information for details.

Systems Engineering, BS/Telecommunications, Accelerated MS
Information Technology, BS/Telecommunications, Accelerated MS
Individualized Study, BIS/Telecommunications, Accelerated MS

Telecommunications Certificates

Five 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.

Advanced Networking Protocols for Telecommunications Graduate Certificate
Network Technologies and Applications Graduate Certificate
Telecommunications Forensics and Security Graduate Certificate
Telecommunications Systems Modeling Graduate Certificate
Wireless Communications Graduate Certificate

Master's Level Certificate

Advanced Networking Protocols for Telecommunications Graduate Certificate

Banner Code: VS-CERG-ANPT

College: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides an in-depth understanding of advanced protocols used in a variety of telecommunications networks.

Certificate Requirements

To obtain the certificate, students must complete the following for a total of 15 credits:
Core Courses

Choose 9 credits from the following:

- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3

Elective Courses

Choose 6 credits from following:

- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 611 - Multi-Protocol Label Switching (MPLS) Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3

Note:

TCOM 509/529 and TCOM 515 cannot be taken twice. If a student takes TCOM 509 and 529 or TCOM 515 in the core element, the course(s) may not be taken again in the elective element.

Communications and Networking Graduate Certificate

Banner Code: VS-CERG-CONE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate’s primary purpose is to provide a well-defined target for students who want to advance their knowledge of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements
The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
  or
- ECE 542 - Computer Network Architectures and Protocols Credits: 3

Elective courses (9 credits):

After completing the foundation courses, students choose electives by taking three courses from the following:

- ECE 535 - Digital Signal Processing Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 633 - Coding Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Switching and Routing in Communication Networks Credits: 3
- ECE 646 - Cryptography and Computer Network Security Credits: 3
- ECE 665 - Fourier Optics and Holography Credits: 3
- ECE 731 - Digital Communications Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
- ECE 735 - Data Compression Credits: 3
- ECE 737 - Spread Spectrum Communications Credits: 3
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- ECE 739 - Satellite Communications Credits: 3
- ECE 741 - Wireless Networks Credits: 3
- ECE 742 - High-Speed Networks Credits: 3
- IT 834 - Telecommunications Networks Credits: 3
- IT 886 - Information Theory Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 647 - Queuing Theory Credits: 3
The certificate provides a broad understanding of the technologies used in telecommunications networks and the various applications of telecommunications networks. To obtain the certificate, students must complete the following, for a total of 15 credits:

**Certificate Requirements**

Choose 9 credits from the following:

- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 555 - Network Management Foundations and Applications Credits: 3

**Elective Requirements**

Six credits are required. Students may elect to take any additional 6 credits from the Telecommunications MS specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

**Networks, System Integration and Testing Graduate Certificate**

**Banner Code: VS-CERG-NSIT**

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in computer networks, system integration, and software testing. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate's primary purpose is to provide a well-defined program for students who want to advance their knowledge of modern networks, systems integration and testing, but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

**Admission Requirements**

The networks, system integration, and testing certificate program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities, with a GPA minimum established by The Volgenau School for all MS programs.
Certificate Requirements

The certificate is awarded on successful completion of five graduate courses (15 credits) from the list of courses given below. A cumulative GPA of 3.00 is required, one course with a grade of C at most may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

The certificate in networks, systems integration, and testing consists of the following five, 3-credit courses:

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 673 - Discrete Event Systems Credits: 3
- ECE 674 - Systems Architecture Design Credits: 3

- ECE 675 - System Integration and Architecture Evaluation Credits: 3
  or
- ECE 525 - Hardware/Software Integration Credits: 3
- SWE 637 - Software Testing Credits: 3

Signal Processing Graduate Certificate

Banner Code: VS-CERG-SIGP

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the certificate in signal processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal processing. Course work for the graduate certificate can be used for credit toward the MS in statistical science as well as the MS in electrical or computer engineering. However, the certificate’s primary purpose is to provide a well-defined target for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
Elective courses (9 credits):

After completing the two foundation courses, students choose electives by taking three courses from the following list:

- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- ECE 621 - Systems Identification Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
  or
- ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
- ECE 722 - Kalman Filtering with Applications Credits: 3
  or
- IT 841 - Kalman Filtering with Applications Credits: 3
- ECE 728 - Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
  or
- IT 830 - Detection and Estimation Theory Credits: 3
- ECE 735 - Data Compression Credits: 3
  or
- IT 832 - Data Compression Credits: 3
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- ECE 751 - Information Theory Credits: 3
  or
- IT 886 - Information Theory Credits: 3
- ECE 752 - Spectral Estimation Credits: 3
  or
- IT 885 - Spectral Estimation Credits: 3
- ECE 754 - Optimum Array Processing I Credits: 3
  or
- IT 837 - Optimum Array Processing I Credits: 3
- ECE 755 - Optimum Array Processing II Credits: 3
  or
- IT 937 - Optimum Array Processing II Credits: 3
• IT 838 - Signal Processing Algorithms and Architectures Credits: 3
• IT 844 - Advanced Pattern Recognition Credits: 3
• ECE 749 - Neural Networks for Control Credits: 3
• CS 775 - Advanced Pattern Recognition Credits: 3
• IT 978 - Statistical Analysis of Signals Credits: 3
• CSI 978 - Statistical Analysis of Signals Credits: 3
• STAT 652 - Statistical Inference Credits: 3
• CSI 672 - Statistical Inference Credits: 3
• STAT 658 - Time Series Analysis and Forecasting Credits: 3
• CSI 678 - Times Series Analysis and Forecasting Credits: 3

Telecommunications Forensics and Security Graduate Certificate

Banner Code: VS-CERG-TFAS

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The objective of this certificate is to provide an in-depth understanding of security and forensics as they apply to networks and digital storage media.

Certificate Requirements

Students must complete the following for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

• TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
  and
• TCOM 556 - Applied Cryptography Credits: 1.5
  or
• TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
• TCOM 562 - Network Security Fundamentals Credits: 3
  or
• ISA 562 - Information Security Theory and Practice Credits: 3
Elective Courses

Choose 6 credits from the following:

- ISA 562 - Information Security Theory and Practice Credits: 3 (formerly ISA 662, and prior to that INFS 762)
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3

Note:

TCOM 660, 661, 663, and 664 cannot be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Telecommunications Systems Modeling Graduate Certificate

Banner Code: VS-CERG-TESM

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides a broad understanding of the end to end systems engineering approach to telecommunications projects.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3
- TCOM 541 - Network Design and Pricing Credits: 1.5
Elective Courses

- Six credits are required. Students may earn the credits from the Telecommunications MS specialty modules 4 and 5, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

VLSI Design/Manufacturing Graduate Certificate

Banner Code: VS-CERG-VLSE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate’s primary purpose is to provide a well-targeted graduate continuing education opportunity for people working in Northern Virginia’s semiconductor and intellectual property industry. This certificate is intended for students who want to advance their knowledge of very large scale integration (VLSI) design or manufacturing, but who do not necessarily wish to complete requirements for the MS in electrical engineering or computer engineering. The course work is designed so that graduate students can reach a demonstrated level of competence in VLSI design or VLSI manufacturing. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The program is open to all students who hold a BS degree in scientific and engineering disciplines and hold graduate student status (degree or non-degree) in the Volgenau School. Students with nonscientific and nonengineering degrees are required to take remedial courses before being admitted into the certificate program.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits): a required foundation course, a compulsory core course, and three electives. A cumulative GPA of 3.00 is required, and only one course with a grade of C may be applied toward the certificate. At most, one course may be transferred from graduate course work completed at another accredited university.

After completing the foundation course (ECE 684), students choose one of the two emphases, VLSI design or VLSI manufacturing, by taking four courses in that emphasis, one of which will be the core course in that area.

Foundation course (3 credits):

- ECE 684 - MOS Device Electronics Credits: 3

VLSI Design Emphasis (12 credits):

Core course:
Electives

Take 9 credits from the following:

- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 587 - Design of Analog Integrated Circuits Credits: 3
- ECE 645 - Computer Arithmetic Credits: 3
- ECE 680 - Physical VLSI Design Credits: 3
- ECE 681 - VLSI Design for ASICs Credits: 3
- ECE 682 - VLSI Test Concepts Credits: 3

VLSI Manufacturing Emphasis (12 credits):

Core course:

- ECE 689 - VLSI Processing Credits: 3

Electives

- ECE 586 - Digital Integrated Circuits Credits: 3
- ECE 680 - Physical VLSI Design Credits: 3
- ECE 745 - ULSI Microelectronics Credits: 3

Wireless Communications Graduate Certificate

Banner Code: VS-CERG-WIRE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides a broad understanding of the technologies, applications, and systems used in all forms of wireless communications.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses

Choose 9 credits from the following:
Elective Courses

- Six credits are required. Students may earn the credits from the Telecommunications MS specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Doctoral Degree

Electrical and Computer Engineering, PhD

Banner Code: VS-PHD-ECE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This program, offered by ECE, is the only combined electrical engineering and computer engineering doctoral program in Virginia. The program prepares students for leadership positions in research and development in industrial, government, and academic settings. It includes course requirements; a qualifying exam testing fundamental concepts and the ability to think creatively; a teaching requirement; a research competency exam; and dissertation proposal defense, dissertation research, and dissertation defense. Students may choose an emphasis such as communications, networking, computer engineering, control and robotics, signal processing, microelectronics or nanoelectronics. These emphasis areas may include biological or medical applications. Mason’s general doctoral requirements apply to this program.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. In addition, all applicants, including Mason undergraduates, must submit official transcripts (undergraduate and graduate) and official results of the GRE General Test. Applicants whose native language is not English must submit official TOEFL results showing a minimum score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship. Students typically admitted to the program hold MS degrees in electrical engineering, computer engineering, and other related areas. Students holding European (or equivalent) diploma degrees may also be considered for admission. The application material for each student is reviewed by the department doctoral committee, which makes a recommendation to the department chair.

Advisor and Dissertation Director

On admission to the program, each student is assigned a faculty member as advisor. On passing the qualifying exam, the advisor is replaced by or becomes the dissertation director. All decisions concerning the student’s course requirements and selections must be approved by the PhD advisor with the consent of the ECE Department chair.
A dissertation committee is formed within a year after the student has passed the qualifying exam. The committee is headed by the dissertation director and includes two more graduate faculty members from ECE Department and one from outside the department. One more member, from outside the university, may be added to the dissertation committee if justified by the subject of the dissertation. The composition of the dissertation committee must be approved by the ECE Department chair.

Course Requirements

After the BS degree, 72 credits are required; dissertation research is usually 24 credits. Students entering with an MS degree may use up to 30 credits of course work from their MS program, subject to approval. Students entering with European diploma degrees may use some course credit, subject to individual consideration, but not more than 30 credits.

Of the required course work, a maximum of 6 credits may be at the 500 level and at least 9 credits must be at the 700 level or higher. For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair. Individualized reading courses at any level cannot account for more than 6 credits.

ECE 798 Research Project is primarily an MS course and is not intended to be part of the PhD course work. Research in the PhD program should be included in ECE 998 and ECE 999 courses.

Students are required to take one graduate course (3 credits) at the 600 level outside the department in a subject considered foundational for their area of emphasis. Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in signal processing or control, physics courses for those desiring an emphasis in electronics, and computer science courses for those pursuing the computer engineering emphasis. Because such courses are usually not taken for MS degrees, this requirement can rarely be satisfied with a course taken previously.

Students are required to take two courses (6 credits) within the department but outside their area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval. Candidates must complete a minimum of 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999). A maximum of 24 credits of ECE 998 and ECE 999 may be applied to the degree. At least half of the total of ECE 998 and ECE 999 credits must come from ECE 999. Students who choose to take fewer than 24 credits of ECE 998 and ECE 999 may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 before their research proposal is accepted and approved by the dissertation committee.

Qualifying Exam

The department offers a doctoral qualifying exam once each year. The exam is primarily for testing the student’s familiarity with fundamental concepts and the ability to think creatively. Students must take the exam within the first year after they have entered the program with an MS degree, typically in late August, prior to the start of the Fall semester.

Students who enter with a BS degree must take the exam within the first year after they have completed 24 credits beyond the BS degree. The qualifier consists of a written in-class exam and an oral interview. Students must select one area from the list below for their qualifying exam. The qualifying exam may be repeated once. A student failing the exam twice is removed from the program. The qualifying exam is not tied to any particular course. It is offered in the following areas, and each area consists of four subjects:

- Area A: Communications, Controls, and Signal Processing
- Area B: Computer Engineering
- Area C: Electronics and Devices

The written exam consists of two problems in each subject. Students must solve five problems from no more than three subjects in their selected area. Subject to ECE Department approval, students with a non-ECE background may substitute one subject compatible with their background and relevant to their planned research in the ECE PhD program. Information technology PhD transfer students are required to take the ECE qualifying exam.
Teaching Requirement

To acquire lecturing and teaching experience, each doctoral student is required to participate in the department’s teaching activity. This typically takes the form of working as a recitation instructor. The minimum requirement is one full semester of such activity in one course or equivalent arrangements approved by the doctoral coordinator.

Research Competency Exam, Dissertation Proposal, Advancement to Candidacy

On completing all course work requirements, students take an oral research competency exam to demonstrate their preparation for dissertation research. The exam comprises a presentation of the research dissertation proposal and competency in the knowledge derived from higher-level courses relevant to the student’s research and familiarity with technical literature. The exam is administered by the student’s dissertation committee.

The student prepares a written dissertation proposal outlining the contents of the dissertation and the research activities leading up to it. The dissertation proposal is submitted to the dissertation committee for approval. The proposal is orally presented as part of the research competency exam. Upon passing this exam, the student is advanced to candidacy.

Dissertation Research and Defense

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation, a public defense is administered by the dissertation committee, which may be preceded by a predefense in the presence of the committee members only at the committee’s discretion. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Interdisciplinary Programs (VSITE)

School: The Volgenau School of Information Technology and Engineering

The Volgenau School offers two interdisciplinary post-master programs: the PhD in Information Technology and the Engineer in IT degree. The first is designed for students who seek a doctoral program in Information Technology and want to be able to customize it to their needs. The second is a professional degree with the flexibility to integrate knowledge from all of the disciplines offered in our School. The programs are managed by the Graduate Student Services Office under the purview of the Senior Associate Dean.

Doctoral students may conduct their doctoral research under the supervision of any eligible faculty member of any of the school's departments. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas, including information systems, software engineering, and information security.

The Engineer in IT degree program allows a student to combine the advanced course work of the PhD degree in IT with an applied project. It is designed to meet the needs of working professionals seeking advanced and up-to-date training in IT areas, but who are not planning a research career.

Professional Degree
Information Technology Engineer Degree

Banner Code: VS-ENGR-INFT

School: The Volgenau School of Information Technology and Engineering

Department: Interdisciplinary Programs

The engineer degree is a post-master’s degree but does not confer a doctorate. Students in the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements.

Admission Requirements

Admission requirements for the engineer degree are the same as for the PhD in information technology.

Plan of Study

The program is made up of specialized course work followed by completion of an applied project summarized in a project report. Under the guidance of the supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and their expected timing. The plan should also contain a tentative subject for the applied project.

Specialized Course Work

Students must include in the plan of study a well-defined advanced concentration area. Successful completion of this requirement should enable students to conduct applied research in a significant contemporary area in IT.

The supervisory committee and the Volgenau School senior associate dean for research and graduate studies must approve a plan of study. These approvals must occur before a student completes the courses in the area of concentration. There is no guarantee that a course taken before this approval will be accepted. Students must take 30 credits of graduate-level course work. A GPA of 3.50 is required in these credits.

Students may waive up to 6 credits of course work by passing two of the qualifying exams (3 credits for each exam) from any of the PhD programs offered by the Volgenau School. The plan of study may include at most 3 credits of directed reading course work. At least 12 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, a project, or thesis courses.

Courses that cannot be included in any plan of study are any INFS 500-level courses; IT 500 and 599; OR 540; and SYST 500. The senior associate dean must approve exceptions to any of these rules in advance.

Supervisory Committee

On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they select a project director and a supervisory committee. It is recommended that a student form a supervisory committee as soon as feasible. The supervisory committee includes the project director plus at least two additional members. The committee must contain at least two graduate faculty members from the Volgenau School. It is strongly recommended that the committee include at least one person from outside the university who is knowledgeable in the subject area of the project. The supervisory committee supervises the project proposal presentation and the project defense.

Project Proposal Presentation
Near the end of the course work, each student prepares a written project proposal, which is presented to the supervisory committee. Students may enroll in IT 996 Engineer Project Proposal to complete this effort. During the term students expect to present the project proposal to the committee, they should enroll in IT 991 Engineer Project Presentations. After successfully completing this requirement, students are formally admitted as candidates for the engineer degree. The application for candidacy is submitted to the office of the senior associate dean on a standard form.

**Project and Final Defense**

With the concurrence of the supervisory committee, students proceed with the project research, during which time they must continuously enroll in IT 997 Engineer Project. Students must complete a minimum of 12 credits from among IT 991, 996, and 997, with a minimum of 6 credits of IT 997. When the central portions of the project work have been completed to the point that students are able to describe the contributions of the project effort, they submit the written project report to the supervisory committee. Once the committee believes the student is ready, a final public oral defense may be scheduled; the application for the defense must be submitted to the senior associate dean at least one month in advance of the defense so that the announcement is posted for at least two weeks.

Following a satisfactory evaluation of the oral defense of the project by the supervisory committee, the student must submit, with supervision from the project director, a final project that represents a definitive contribution to applied knowledge in IT. This document must meet format guidelines specified by the *Guide for Preparing Graduate Theses, Dissertations, and Projects* and must be submitted to the library. If the candidate successfully defends the project, the supervisory committee recommends that the final form of the project be completed and Volgenau School faculty and the graduate faculty of Mason accept the candidate for the engineer degree.

**Applying and Completing a PhD Program**

Students who are awarded an engineer degree are able, at a later date, to work toward a PhD in information technology. Some restrictions and limitations apply. After applying and being accepted into the PhD in Information Technology Program, students will be able to apply for a reduction of up to 12 credits in course requirements. The request must satisfy the rules for transfer credit at Mason, and courses must be relevant to the student’s planned dissertation research. In addition, the qualifying exams for the doctoral program will be waived for such students. All other requirements for the doctoral program must be satisfied.

**Doctoral Degree**

**Information Technology, PhD**

*Banner Code: VS-PHD-INFT*

*School: The Volgenau School of Information Technology and Engineering*

*Department: Interdisciplinary Programs*

The general doctoral requirements of Mason apply to this program.

When the term “information technology (IT) and engineering” is used at Mason to describe the school and its activities, it is intended to mean information technology and the branches of engineering most closely associated with information use and management. These aspects of technology are emphasized in this geographic region, and the relevance of the IT doctoral program has grown with the increasing dependence of the nation’s commerce on the effective use of information. Our focus on the science
and technology of information processing complements and enhances the more traditional approaches to engineering that are more strongly based on the physical and material sciences.

**Course Work**

The PhD in Information Technology Program offers courses designated IT in the Course Descriptions section of this catalog.

**Admission Requirements**

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing. Generally, a master’s degree in an information technology-related area, such as engineering, computer science, operations research, statistics, mathematics, physical sciences, economics, and psychology, is required for admission to the program.

In addition, well-qualified students without an appropriate master’s degree may apply directly to the PhD program. Such students will have to complete the equivalent of an appropriate Mason master’s degree as part of their program of study. In some cases, it may be possible to obtain transfer credit for graduate course work taken elsewhere, subject to meeting requirements for transfer credit imposed by the university. (The description here assumes that a student has already received an appropriate master’s degree.)

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 scale are basic requirements for applicants. The admission process involves submitting the following materials: application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results when available or if required by the specific concentration, three letters of reference, a résumé, a short statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided if they are not in English. In some cases, applicants will be required to have documents evaluated by an external agency. An applicant’s entire background is examined before an admission decision is made.

Students who wish to be considered for Mason’s President Scholarship, which provides a stipend and tuition support for three years, must submit GRE scores with a score of at least 1,200 with their application. One President Scholarship is awarded per PhD program per year.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the course work within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly qualified students who do not present evidence of appropriate course work may be admitted and then required to take appropriate articulation courses.

**Plan of Study**

The program is made up of a breadth requirement (assessed via qualifying exams) and specialized coursework (assessed via the comprehensive exam), followed by preparation of a dissertation. Generally, students have already obtained a master’s degree in a field appropriate to IT, which prepares them for the qualifying exams.

Under the guidance of the doctoral supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and expected timing. The plan should also contain the intended dates of the qualifying and comprehensive exams, and a tentative subject of the dissertation research.

**Qualifying Exams**
To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. These exams correspond to a set of disciplines related to the individual master’s programs in the Volgenau School. Each exam is based on a reading list posted on the school’s web site. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year at specified locations on campus, typically near the beginning of the fall and the spring semesters. Each exam is allocated two hours. The exams are graded on a pass or fail basis.

Students must indicate which exams are being requested through an appropriate form signed by the student and the supervisor and submitted to the office of the senior associate dean.

Each student must pass a set of four different exams in two consecutive offerings of the exams. Four exams must be attempted in the first offering. Thus, the following passing scenarios are allowed: (1) pass all four on the first attempt, (2) pass three in the first attempt and one in the next, (3) pass two in the first attempt and two in the next, (4) pass one in the first attempt and three on the second, and (5) pass all four on the second attempt. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass the qualifying exams under any of these scenarios is subject to termination from the program.

Students must take the qualifying exams within two years of enrolling in the program, unless fewer than 24 credits of course work have been completed in that time. Otherwise, the exams must be taken no later than the first opportunity after completion of 24 credits. If a student enters the program without a master’s degree, these time limits are measured from the date when the student completes the equivalent of an appropriate Mason master’s degree.

**Advanced Emphasis Requirement**

Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.

The doctoral supervisory committee and the Volgenau School senior associate dean for graduate studies and research must approve the plan of study. These approvals must occur before a student completes courses in the area of concentration or specialization. There is no guarantee that courses taken before this approval will be accepted.

Students must take a set of 24 credits of graduate-level course work independent of the qualifying exams they take. That is, if a student takes a qualifying exam related to OR 541, then OR 541 cannot be counted as 3 credits of specialty course work. A GPA of 3.50 is required in these 24 credits. The plan of study may include a maximum of 3 credits of directed reading course work. At least 12 of the 24 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.

The following courses cannot be included in any plan of study: any INFS 500-level courses; IT 500 and 599; OR 540; and SYST 500. Exceptions must be approved in advance by the senior associate dean.

Each PhD student is allowed to designate an emphasis from among the titles of the MS degree programs offered by the Volgenau School. For more information, see department sections.

**Doctoral Supervisory Committee**

On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and an advisory committee. Students should make this selection as soon after admission as possible. This is especially important for students who have completed a considerable amount of graduate work elsewhere.

Students work collaboratively with the program director and faculty to form the dissertation committee, with the understanding that some areas of research may be impossible to support due to available faculty expertise. Program personnel will facilitate the formation of the dissertation committee to the extent possible, but there can be no guarantee of successful formation.
The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in IT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the "at least 50% rule". At least three committee members must be from the Volgenau School and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School senior associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

Comprehensive Examination

The comprehensive exam is an oral exam taken after students have satisfactorily completed all course work requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire supervisory committee, to be forwarded to the senior associate dean for final approval. The exam committee consists of the doctoral supervisory committee plus any outside examiners considered appropriate. The permission form should contain the following items: a) a one page description of the intended area of research; and b) a reading list on which the student will be examined. The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area. This exam is to be taken at a designated place on campus.

The objective of the comprehensive exam is to allow the exam committee to assess the student’s readiness to complete doctoral research in an area of concentration. The result of the comprehensive exam is a grade of pass or fail with recommendations for removing any deficiencies. Students must pass the comprehensive exam and dissertation proposal defense before being advanced to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all course work requirements.

Students who fail the comprehensive exam may request a re-exam within 60 days of receiving notice of the exam result. The request should be made in writing to the senior associate dean. A student may request a new exam in a different format if the intended area of research has changed, but the request must comply with the rules specified above. If the student fails again, or does not request a re-exam within 60 days, the student will be dismissed from the PhD program. Appeals on any of the two attempts must be submitted in writing to the senior associate dean within 15 days of the date the decision was communicated to the student.

Dissertation Proposal Presentation

Near the end of the course work, doctoral students prepare a written dissertation proposal, which is presented to the doctoral supervisory committee. Students may enroll in IT 998 Doctoral Dissertation Proposal to complete this effort. During the term the student expects to present the dissertation proposal to the committee, the student should enroll in IT 990 Dissertation Topic Presentations. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the senior associate dean on a standard form.

Dissertation & Final Defense

With the concurrence of the advisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. Students must complete a minimum of 24 credits from among IT 990, 998, and 999, with a minimum of 12 credits of IT 999. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the supervisory committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public
oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee must be present at the defense, unless an exception is approved by the senior associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the candidate successfully defends the dissertation, the dissertation defense committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the program.

Concentrations

Choosing a concentration narrows program flexibility, so it is not necessary to choose a concentration. In particular, a concentration may be inappropriate for students doing interdisciplinary research. Students who do declare a concentration will have the concentration noted on their transcript.

▲ Concentration in Civil and Infrastructure Engineering (CEIE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is a PhD in information technology with a concentration in civil and infrastructure engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology degree. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the CEIE Department chair.

Doctoral Supervisory Committee

The dissertation director must be a CEIE Department faculty member. The composition of the doctoral supervisory committee is to be approved by the CEIE Department chair and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and the dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the CEIE Department chair.

▲ Concentration in Information Security and Assurance (ISA)
Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information security. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Volgenau School. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator and department chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲Concentration in Information Systems (ISYS)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information systems. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a Computer Science faculty member. The composition of the doctoral supervisory committee must be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.
Concentration in Software Engineering (SWE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in software engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Computer Science Department. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

Statistics

Phone: 703-993-3645
Web: statistics.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Carr, Gentle, Rosenberger (chair), Wegman

Associate professors: Bell, Davis (associate chair), Miller, C. Sutton

Assistant professors: Diao, Tang

Instructors: Sims (visiting), Surina

Emeritus faculty: Bolstein

Course Work
The Statistics Department offers all courses designated STAT in the Courses chapter of this catalog. Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and engineering applications of statistics and data analysis.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer an undergraduate certificate program in applied statistics and a minor in data analysis. Also, a variety of advanced undergraduate courses is available for inclusion in other degree programs.

**Bachelor's Level Certificate**

**Applied Statistics Undergraduate Certificate**

**Banner Code: VS-CERP-ASTA**

**School: The Volgenau School of Information Technology and Engineering**

**Department: Statistics**

This program complements undergraduate degree programs in computer science, systems engineering, electrical engineering, civil and infrastructure engineering, and mathematics. Undergraduates majoring in other discipline areas may be admitted to the certificate program at the discretion of the department.

The program expands career options available to students because the demand is great in the Washington, D.C., metropolitan area for people with interdisciplinary training, which includes a background in statistics and data analysis. Inquiries should be directed to the Statistics Department. Students who plan to work toward the certificate should seek advice from the department’s undergraduate coordinator.

**Certificate Requirements**

The certificate program requires 24 credits: 12 credits of certificate courses plus 12 credits of electives.

**Certificate Courses (12 credits)**

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 346 - Probability for Engineers Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
Elective Courses (12 credits)

Choose 12 credits from the following courses:

- STAT 435 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 455 - Experimental Design Credits: 3
- STAT 457 - Applied Nonparametric Statistics Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 498 - Independent Study in Statistics Credits: 1-3
- STAT 499 - Special Topics in Statistics Credits: 3
- ECON 445 - Design and Analysis of Experiments Credits: 3
- OR 335 - Discrete Systems Simulation Modeling Credits: 3 (or crosslisted course SYST 335)
- OR 441 - Deterministic Operations Research Credits: 3 (or crosslisted course MATH 441)
- OR 442 - Stochastic Operations Research Credits: 3 (or crosslisted course MATH 442)
- OR 481 - Numerical Methods in Engineering Credits: 3 (or crosslisted course MATH 446)
- SYST 473 - Decision and Risk Analysis Credits: 3

Undergraduate Minor

Data Analysis Minor

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially computer science, economics, environmental engineering, geography, mathematics, public administration, sociology, and systems engineering.

Course Requirements

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student’s major.

Core Sequence (6 credits)

To satisfy the core requirement, students must complete one of these sequences with grades of C or better:

- STAT 250 - Introductory Statistics I Credits: 3
- STAT 350 - Introductory Statistics II Credits: 3
OR

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

OR

Provided the 9 elective credits are all STAT courses, mathematics majors may substitute:
- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3

Elective Courses (9 credits)

The 9 elective credits must be chosen from a list of courses approved by the department's undergraduate coordinator. Courses currently approved for the minor are the following:

- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
- STAT 435 - Analysis of Experimental Data Using SPSS Credits: 3
- STAT 455 - Experimental Design Credits: 3
- STAT 457 - Applied Nonparametric Statistics Credits: 3
- STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
- STAT 474 - Introduction to Survey Sampling Credits: 3
- STAT 499 - Special Topics in Statistics Credits: 3
- CEIE 410 - Geographic Information Systems in Engineering Credits: 3
- CS 450 - Database Concepts Credits: 3
- ECON 445 - Design and Analysis of Experiments Credits: 3
- GEOG 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GOVT 400 - Political Research and Data Analysis Credits: 3
- OR 335 - Discrete Systems Simulation Modeling Credits: 3 (or crosslisted course SYST 335)
- SOCI 405 - Analysis of Social Data Credits: 4
- SYST 473 - Decision and Risk Analysis Credits: 3

Bachelor's/Accelerated Master's Program

BS/Statistical Science, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This degree option allows Mason students to earn an MS in statistical science in less time than if they had first graduated from a suitable Mason BS program and then applied to the MS program.

Admission Requirements
Students must begin MS work within six months following completion of a BS degree in any one of the Volgenau School major areas or a BS in mathematics from the College of Science. Admission is guaranteed to any student with an overall GPA of 3.00 in courses taken after the first two undergraduate years (60 credits) with grades of B or better in the two 500-level STAT courses selected from STAT 544, 554, and 574.

Degree Requirements

The program consists of a minimum of 144 credits that satisfy the requirements for both the BS in the undergraduate major and the MS in statistical science with 6 credits of overlap. Twenty-four credits are required for the MS, provided that students have taken two of STAT 544, 554, and 574 as part of their BS course work.

Master's Degree

Epidemiology and Biostatistics, MS (VSITE)

Banner Code: HH-MS-EBST

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program prepares participants to apply epidemiological and statistical principles to quantitative analysis of health issues. It will prepare health scientists to work as professionals in government agencies, such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other health-related organizations that need to analyze data and design experiments for medical and public health research. Graduates are expected to analyze and interpret increasingly complex health data. The degree is taught jointly by faculty from the Department of Statistics in The Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in the College of Health and Human Services.

Admission Requirements

Applicants must hold a baccalaureate degree in a discipline related to health science or statistics, with a minimum GPA of 3.0 in the last 60 credits. Courses in calculus at the undergraduate level through multivariate calculus equivalent to Math 113, 114, and 213 with a grade of B or better are required for admission to the program. Some background in statistics and biology is preferred. Applications to the degree program are made through the College of Health and Human Services. Admission decisions are made by a joint faculty committee from the Department of Statistics and the Department of Global and Community Health.

Degree Requirements

Students must complete 36 credits of graduate course work. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a 3.00 GPA to graduate.

Core Requirements (15 credits)

- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3

Epidemiology Electives (6 credits)

Select a minimum of two courses from the following:

- GCH 551 - Research Methods in Rehabilitation Science Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 726 - Advanced Seminar in Epidemiology Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3

Statistics Electives (9 credits)

Select a minimum of three courses from the following:

- STAT 544 - Applied Probability Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3

Additional Elective Courses (6 credits)

Choose two electives (6 credits) in consultation with the academic advisor. Students may choose to work with their advisor to conduct an epidemiology/biostatistics research project.

Statistical Science, MS

Banner Code: VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.
The MS program offers a choice of the following emphasis areas: applied statistics, biostatistics, computational statistics, engineering statistics, federal statistics, and statistical signal processing. Students may select one of these emphases or design a customized curriculum in conjunction with a faculty advisor. Students also select the research or the professional option. The research option is for students planning to continue with a PhD degree or begin or continue careers in statistical methodology research. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career.

Admission Requirements

In addition to satisfying general admission requirements for graduate study, all applicants must demonstrate basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes course work in calculus or real analysis, matrix or linear algebra, and calculus-based probability and statistics. Applicants with degrees in such fields as mathematics, computer science, statistics, and engineering usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, 114, 213; MATH 203 or 322; and STAT 346 or MATH 351. Course work taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

While the GRE is not required for admission, it is recommended for students competing for graduate teaching assistantships, fellowships, and research assistantships. International students from non-English-speaking countries who seek a graduate teaching assistantship should take the Test of Spoken English in addition to the TOEFL, which is required for admission.

Degree Requirements

In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 12-credit core requirements for the degree. Students build on these core requirements by choosing 12 credits of emphasis area courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. This choice must be made no later than the end of the semester in which 15 credits have been completed.

Professional Option:

The professional option focuses on completing coursework in modern statistical theory and practice. Thirty credits are required for the degree: 12 credits of core courses (taken by all MS students), 12 credits of emphasis area courses, and 6 credits of electives. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to write a master’s essay. This piece is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The essay is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The essay is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their essay to develop their skills in preparing reports on technical subjects. The essay is usually written in the context of 3 credits of STAT 798 Master’s Essay, which count as elective credits. Students opting not to write an essay must take 30 credits of coursework.

Research Option:

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master's Thesis, which count as elective credits. The remaining 24 credits include the 12 core credits and 12 emphasis area credits.
In addition to satisfying general university requirements for a master’s degree, candidates with the research option must submit a thesis or report based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis or report is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

**Core Courses (12 credits)**

The core course work covers the basic elements of statistics at the graduate level. STAT 544 covers the major mathematical framework for statistical theory and practice. STAT 652 provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 656, which focuses on the theory and application of linear regression analysis.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

**Emphasis Area Courses (12 credits)**

Emphasis area courses may be chosen from any of the remaining 600-level graduate STAT courses except 645, 664, 677, and 678. In addition, STAT 574, 751, 758, and 760 may be chosen as emphasis area courses.

**Elective Courses (6 credits)**

Elective courses may be chosen from any graduate STAT courses except STAT 535, 700, 701, and STAT courses numbered 876 or higher. STAT 779 and 789 may be repeated for credit with prior written approval from the department’s graduate coordinator. Also, certain courses from other departments may be used as elective credits in a customized curriculum designed in conjunction with a faculty advisor and approved in writing by the department’s graduate coordinator. Customized curriculum must be submitted and approved no later than the end of the semester in which 15 credits have been completed.

**Suggested Programs of Study**

Following are some emphasis area and elective courses students might consider taking depending on their particular area of interests. Students do not have to select all of their courses from any one of these lists; they are provided only as a guide.

**Applied Statistics:**

- STAT 574 - Survey Sampling I Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3

Biostatistics:
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3

Computational Statistics:
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration Credits: 3
- STAT 751 - Computational Statistics Credits: 3
- STAT 875 - Scientific and Statistical Visualization Credits: 3
- CS 652 - Computer Graphics Credits: 3

Engineering Statistics:
- STAT 645 - Stochastic Processes Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3
- OR 635 - Discrete System Simulation Credits: 3

Federal Statistics:
- STAT 574 - Survey Sampling I Credits: 3
- STAT 634 - Case Studies in Data Analysis Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Statistical Signal Processing:
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3

Note:
A student concurrently enrolled in the Certificate in Actuarial Sciences Program and the MS in Statistical Sciences Program may count MATH 555 and 556 as approved elective courses and may count MATH 653 and 654 as emphasis area courses when designing a curriculum for the MS in Statistical Science. Credit toward the MS in Statistical Sciences will not be given for both MATH 654 and STAT 668. The full curriculum should be designed with the approval of the student’s statistics academic advisor and the statistics graduate coordinator. The Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Sciences. Otherwise, at most two of MATH 555, 556, 653, and 654 can be counted toward the MS in Statistical Sciences as elective courses; none can be applied as emphasis area courses.

Dual Master’s

Mathematics and Statistical Science Dual-Degree MS

Banner Codes: SC-MS-MATH, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program allows students to earn an MS degree in mathematics and an MS degree in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics Program and the MS in Statistical Science Program. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

• MATH 621 - Algebra I Credits: 3
• MATH 675 - Linear Analysis I Credits: 3
• MATH 677 - Ordinary Differential Equations Credits: 3
  OR
• MATH 678 - Partial Differential Equations Credits: 3
• MATH 685 - Numerical Analysis Credits: 3
• STAT 544 - Applied Probability Credits: 3
• STAT 554 - Applied Statistics Credits: 3
• STAT 652 - Statistical Inference Credits: 3
Elective Credits

- 12 elective credits in MATH courses numbered 610 or higher, excluding MATH 653, 654, 655 and 799. Courses must be approved in advance by the student's mathematical sciences academic advisor and the mathematical sciences graduate coordinator.
- 12 elective credits in STAT courses numbered 574 or higher, excluding STAT 700, 701, and 799. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Notes:

- Students in either the BS/Accelerated MS in Mathematics Program or the BS/Accelerated MS in Statistics Program, cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in mathematics or the MS in statistical science.

Operations Research and Statistical Science Dual-Degree MS (STAT)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
Elective Credits in OR Courses

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 648 - Production and Inventory Systems Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Elective Credits in STAT Courses

12 elective credits in STAT courses numbered 574 or higher, excluding STAT 700 and 701. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Notes:

- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS in Statistics Program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

**Master's Level Certificate**

**Biostatistics Graduate Certificate (VSITE)**

Banner Code: VS-CERG-BSTA
School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This certificate, a joint program with CHHS, prepares participants to apply statistical methods to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations that design medical experiments and analyze and interpret increasingly complex health care data. The program will also help prepare students begin careers in such organizations. The certificate is taught jointly by faculty from the Department of Statistics and Department of Global and Community Health.

Admission Requirements

Applicants must hold a bachelor’s degree from a regionally accredited institution of higher education in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. A course in college algebra with a grade of B or higher is required for admission to the program.

Certificate Requirements

Students must complete one course from each of the five groups. All listed STAT courses except STAT 535 and STAT 660 require three semesters of calculus.

- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
  or
- STAT 554 - Applied Statistics Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
- GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
  or
- NURS 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
  or
- STAT 656 - Regression Analysis Credits: 3
  or
- STAT 668 - Survival Analysis Credits: 3
- GCH 805 - Advanced Quantitative Data Analysis for Health Care Research II Credits: 3
  or
- NURS 805 - Advanced Quantitative Data Analysis for Health Care Research II Credits: 3
  or
- STAT 662 - Multivariate Statistical Methods Credits: 3
- GCH 712 - Introduction to Epidemiology Credits: 3

Federal Statistics Graduate Certificate

Banner Code: VS-CERG-FSS
This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics; survey methods; data analysis, including graphics and data visualization; databases and data security; parallel computation and related technology; geographic information systems; and issues of statistics and public policy. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admission Requirements

Potential candidates should hold a bachelor’s degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These requirements are normally satisfied by students that have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, and STAT 344. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department’s graduate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements

The certificate program consists of 15 credits: 9 credits of certificate courses plus 6 credits of electives.

Certificate Courses (9 credits)

The certificate courses build the foundations of statistical analysis and survey methods. They consist of the following:

- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
  OR
- STAT 554 - Applied Statistics Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3
- STAT 779 - Topics in Survey Design and Analysis Credits: 1-3

All of these courses, except for STAT 535, may be used for credit toward the MS in statistical science. Credit is granted for only one of STAT 535 and 554.

Elective Courses (6 credits)
The elective courses are intended to provide a broad background supportive of the multidisciplinary needs of complex statistical systems. Elective courses may be chosen from any graduate STAT courses numbered below 876, except that only one of STAT 501-503 can be applied toward the certificate. Only 3 credits may be from other departments and must be approved in advance by the department’s graduate coordinator.

Suggested electives include:

- STAT 544 - Applied Probability Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 751 - Computational Statistics Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3
- ECON 637 - Econometrics I Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- PUAD 742 - Program Evaluation Credits: 3
- SOCI 631 - Survey Research Credits: 3

*Some courses may have prerequisites for which students must qualify or seek a waiver from the appropriate instructor.*

**Doctoral Degree**

**Statistical Science, PhD**

**Banner Code:** VS-PHD-STAT

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Statistics

The terminal degree PhD in statistical science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. Current research areas of key department faculty in the program include sampling, statistical signal processing, biometric identification, biostatistics, statistical genetics, statistical graphics, and data exploration.

**Degree Requirements**

Students are required to complete 72 credits. Typically, a student entering with a master’s degree in statistics, mathematics, or similar discipline is able to receive a reduction of up to 24 credits from approved course work. In particular, students entering with a master’s degree in statistics are expected to have completed course work equivalent to STAT 544, 554, 652, and 656 with a 3.50 GPA. The program also requires a course in advanced calculus (MATH 315 or equivalent) with a B or better. In exceptional circumstances, talented students with a mathematically intensive undergraduate degree may be admitted.

**Written qualifying exams will be taken in the following areas:**
Students are required to complete 24 credits of advanced emphasis course work, including three core courses:

- STAT 876 - Measure and Linear Spaces Credits: 3
- OR
- STAT 971 - Probability Theory Credits: 3
- STAT 972 - Mathematical Statistics I Credits: 3
- STAT 973 - Mathematical Statistics II Credits: 3

Additional Information:

The remaining five courses are selected and approved by the doctoral supervisory committee and the Statistics Department chair and should be numbered 600 or above. For STAT courses, qualified electives must be numbered 655 or above. STAT 700–701 do not count as electives for the PhD program.

Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, 2 members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.

Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the three core courses and five advanced emphasis courses, and a dissertation proposal. The student is evaluated as pass, conditional pass, or fail. A student who fails the comprehensive exam may take it a second time. If the student fails a second time, the student is terminated from the program.

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

For more information, e-mail specific questions to statistics@gmu.edu.

Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Adelman, Chang, Chen, Donohue, Hoffman, Nash, Polyak, Schum, Sage, Sofer (chair)

Associate professors: Brouse, Laskey, Loerch, Shortle, Speller, White
Assistant professors: Ganesan, Liu

Affiliated faculty members: Houck, VanTrees

Research and term professors: Costa, Gross, Sherry, Wagenhals, Wagner, Wolman

Adjunct professors: Alexander, Barry, Camp, Carley, Durbin, Fischer, Humphrey, Killam, Laveson, McDevitt, Rothwell, Soller, Stephenson, Wieland, Yost

Emeritus faculty: Palmer

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a minor in systems engineering and operations research, master’s degrees in systems engineering and in operations research, and a PhD degree in systems engineering and operations research. In addition, the department offers five certificate programs at the master’s level: architecture-based systems engineering; command, control, communications, computing, and intelligence (C4I); military operations research; computational modeling; and systems engineering of software intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

Systems engineers determine the most effective ways for an organization to use all of a given system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, automobiles, intelligent robots, stereos, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations research is the professional field that deals with using scientific methods in engineering and management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, and procedures. The overall purpose is to provide a rational basis for decision making.

Mason’s operations research faculty members are principally involved in the theoretical and empirical study of managerial and operational processes, and the use of mathematical and computer models to optimize these systems. Models are needed for a variety of decision-making purposes in business, industry, scientific research, and government to describe different environments and relate alternative plans of action. Thus, the courses in operations research focus on quantitative modeling and the analysis of complex systems. Courses stress the use of contemporary computer hardware and software in modeling and analysis. The Bureau of Labor Statistics predicts that the field of operations research will be one of the fastest-growing professions of the next decade.

Obviously, there is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Course Work

The department offers all courses designated SEOR, SYST, and OR in the Courses chapter of this catalog.

Undergraduate Degree

Systems Engineering, BS
The program leading to the BS in systems engineering prepares students for a professional career in systems engineering. The educational program reflects the systems engineer’s unique perspective, which considers all aspects of a system throughout its lifetime. Mason’s systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year long senior design project provides hands-on experience in applying various systems engineering methods and tools.

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term “system” is interpreted broadly to include information, telecommunication, defense, health delivery, transportation and manufacturing systems, and corporate processes.

Specifically, the objectives of the systems engineering program are that graduates of the program will be able to:

- Apply fundamental concepts of mathematics, science, information technology, and engineering to contemporary and future systems.
- Contribute to the development of systems using systems engineering methods, processes, models, and tools.
- Work effectively as a member of multidisciplinary teams and behave in a professional, ethical, and responsible manner (including establishing a foundation for lifelong learning in systems engineering and related areas).
- Communicate effectively with team members and decision makers orally and in writing.

This program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The requirements for the degree may be satisfied on a part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning.

Degree Requirements

In addition to Mason’s general education requirements, students must meet specific requirements for this degree. In the first two years, students obtain a basic foundation in mathematics, the natural sciences, computing, writing, humanities, Arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Degree requirements for the systems engineering major include 120 credits. Students must complete the following:

Mathematics and statistics:

- \text{MATH 113} - Analytic Geometry and Calculus I Credits: 4
- \text{MATH 114} - Analytic Geometry and Calculus II Credits: 4
- \text{MATH 203} - Linear Algebra Credits: 3
- \text{MATH 213} - Analytic Geometry and Calculus III Credits: 3
- \text{MATH 214} - Elementary Differential Equations Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3  
• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Natural sciences:

• PHYS 160 - University Physics I Credits: 3  
• PHYS 161 - University Physics I Laboratory Credits: 1  
• PHYS 260 - University Physics II Credits: 3  
• PHYS 261 - University Physics II Laboratory Credits: 1  
• CHEM 251 - General Chemistry for Engineers Credits: 4  
  or  
• CHEM 211 - General Chemistry Credits: 4

Computer science:

• CS 112 - Introduction to Computer Programming Credits: 4  
• CS 211 - Object-Oriented Programming Credits: 3

Humanities and social sciences:

• Approved courses in literature, Western civilization, global understanding, arts, and synthesis to satisfy the university’s general education requirement. Note that all general education courses should be selected from the department's list of approved courses.  
• COMM 100 - Public Speaking Credits: 3  
• ECON 103 - Contemporary Microeconomic Principles Credits: 3  
• ENGL 101 - Composition Credits: 3  
• ENGL 302 - Advanced Composition Credits: 3 for the natural sciences and technology

Engineering:

• ENGR 107 - Introduction to Engineering Credits: 2

Systems engineering:

Students must complete each of these courses with a grade of C or better.

• SYST 101 - Understanding Systems Engineering Credits: 3  
• SYST 210 - Systems Design Credits: 3  
• SYST 220 - Dynamical Systems I Credits: 3  
• SYST 221 - Systems Modeling Laboratory Credits: 1  
• SYST 320 - Dynamical Systems II Credits: 3  
• SYST 330 - Systems Methods Credits: 3
• SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
• SYST 371 - Systems Engineering Management Credits: 3
• SYST 470 - Human Factors Engineering Credits: 3
• SYST 473 - Decision and Risk Analysis Credits: 3
• SYST 489 - Senior Seminar Credits: 3
• SYST 490 - Senior Design Project I Credits: 3
• SYST 495 - Senior Design Project II Credits: 3
• OR 441 - Deterministic Operations Research Credits: 3
• OR 442 - Stochastic Operations Research Credits: 3
• 3 approved technical electives

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, contained in the detailed pamphlet available from the SEOR office, constitutes a learning plan for the degree program. The advisor must approve changes to the plan of study. All students in systems engineering are required to see their advisor at least once each semester to plan for the next semester’s registration.

Technical Emphasis Areas

The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical emphases, each containing three courses.

Aviation Systems

• SYST 420 - Network Analysis Credits: 3
• SYST 460 - Introduction to Air Traffic Control Credits: 3
• SYST 461 - Air Transportation System Engineering Credits: 3

Control Systems

• ECE 201 - Introduction to Signal Analysis Credits: 3
• ECE 220 - Signals and Systems I Credits: 3
• SYST 421 - Classical Systems and Control Theory Credits: 3

Computer Network Systems

• SYST 420 - Network Analysis Credits: 3
• ECE 465 - Computer Networking Protocols Credits: 3
• TCOM 500 - Modern Telecommunications Credits: 3

Engineering Systems
• CEIE 230 - Hydraulics Credits: 3
• ENGR 210 - Statics and Dynamics Credits: 3
• ENGR 310 - Mechanics of Materials Credits: 3

Operations Research

• OR 481 - Numerical Methods in Engineering Credits: 3
• SYST 420 - Network Analysis Credits: 3
• SYST 465 - Pricing in Optimization and Game Theory Credits: 3

Software-Intensive Systems

• CS 310 - Data Structures Credits: 3
• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• CS 421 - Software Requirements and Design Modeling Credits: 3

Synthesis Requirement

Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495.

Writing-Intensive Requirement

Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489.

General Education Electives

General education electives should be selected from the department’s list of approved courses.

Sample Schedule

The following sample schedule shows the required and elective courses in the program. Students are strongly encouraged to follow this sample schedule to ensure that prerequisites are satisfied. For students who do not place into MATH 113 by taking the math placement exam, an alternative schedule is available. The position of the technical elective courses within the schedule will vary depending on the emphasis, and the position of some general education classes may vary as well. Please consult with your advisor to plan the correct sequence.

First Semester

• COMM 100 - Public Speaking Credits: 3
• ECON 103 - Contemporary Microeconomic Principles Credits: 3
• ENGL 101 - Composition Credits: 3
• ENGR 107 - Introduction to Engineering Credits: 2
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
Total: 15 credits

Second Semester

- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- SYST 101 - Understanding Systems Engineering Credits: 3

Total: 15 credits

Third Semester

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- SYST 210 - Systems Design Credits: 3
- Literature course (3)

Total: 16 credits

Fourth Semester

- CHEM 251 - General Chemistry for Engineers Credits: 4
  or
- CHEM 211 - General Chemistry Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1

Total: 14 credits

Fifth Semester
• ENGL 302 - Advanced Composition Credits: 3 (for natural sciences and technology)
• OR 441 - Deterministic Operations Research Credits: 3
• SYST 320 - Dynamical Systems II Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• Arts course. Credits: 3

Total: 15 credits

Sixth Semester

• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
• SYST 330 - Systems Methods Credits: 3
• SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
• SYST 371 - Systems Engineering Management Credits: 3
• Technical elective. Credits: 3

Total: 15 credits

Seventh Semester

• SYST 470 - Human Factors Engineering Credits: 3
• SYST 489 - Senior Seminar Credits: 3
• SYST 490 - Senior Design Project I Credits: 3
• SYST 473 - Decision and Risk Analysis Credits: 3
• Technical elective. Credits: 3

Total: 15 credits

Eighth Semester

• OR 442 - Stochastic Operations Research Credits: 3
• SYST 495 - Senior Design Project II Credits: 3
• Technical elective Credits: 3
• Global understanding course. Credits: 3
• Western civilization or world history course (HIST 100 or HIST 125). Credits: 3

Total: 15 credits
Change of Major

Students who want to change their major to systems engineering must have a GPA of at least 2.75 in all math, physics, engineering, and computer science courses taken to fulfill requirements for the systems engineering degree and should have completed MATH 114 with a grade of B or better.

Interdisciplinary Minor Programs

By taking appropriate sequences of technical electives and, in some cases, a few courses in addition to the 120 credits required for graduation, students in the systems engineering program can obtain a minor in an interdisciplinary program. Available minors include data analysis and computer science. Students should see their advisor and the departments offering the minors for specific requirements.

Bachelor's Level Certificate

Operations Research and Engineering Undergraduate Certificate

Banner Code: BS-CERB-OR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This certificate program is open to students enrolled in the computer science, decision sciences, and mathematics undergraduate degree programs. The certificate augments the standard curricula with material on the computational aspects of operations research. Because the demand for people trained in this area is great, this program expands the career options available to students.

Certificate Requirements

- MATH 313 - Introduction to Applied Mathematics Credits: 3
- OR 335 - Discrete Systems Simulation Modeling Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Plus two of the following courses:

- Any 400-level STAT class
- OR 481 - Numerical Methods in Engineering Credits: 3
- OR 498 - Independent Study in Operations Research Credits: 1-3
- OR 499 - Special Topics in Operations Research Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
Note:

Students seeking the certificate must apply to the SEOR Department.

Undergraduate Minor

Systems Engineering and Operations Research Minor

Banner Code: SEOR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

The minor in Systems Engineering and Operations Research consists of 15 credit hours of coursework. The specific requirements are as follows:

Two required SEOR courses:

- SYST 101 - Understanding Systems Engineering Credits: 3
  or
- SYST 210 - Systems Design Credits: 3
  and
- OR 335 - Discrete Systems Simulation Modeling Credits: 3

Three additional courses from the following:

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3
  or
- SYST 470 - Human Factors Engineering Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
  or
- MATH 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
  or
- MATH 442 - Stochastic Operations Research Credits: 3
• OR 481 - Numerical Methods in Engineering Credits: 3
  or
• MATH 446 - Numerical Analysis I Credits: 3

Prerequisites:

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses. For policies governing all minors, see the Academic Policies chapter of this catalog.

Bachelor's/Accelerated Master's Program

BS/Operations Research, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

Qualified undergraduate students may apply for this five-year program leading to a BS in an engineering discipline and an MS degree in operations research. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply for the program after they have completed at least 90 credits applicable to the BS degree. Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission into the MS program, with the exception that students do not need to have completed an undergraduate degree before admission.

Students must complete all requirements for the BS in their chosen major. Students must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.
BS/Systems Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

Qualified undergraduate students may apply for this five-year program, which leads to a BS in an engineering discipline and an MS in systems engineering. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply after they have completed at least 90 credits applicable to the BS degree.

Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have successfully completed all MATH and PHYS requirements. Students must complete all requirements for the BS in their chosen major. Students in the accelerated program must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

Systems Engineering, BS/Telecommunications, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

Students in the BS in Systems Engineering Program may elect to enter an accelerated MS in Telecommunications Program while they are undergraduate students. The program is designed for qualified undergraduate students in the systems engineering program who would like to proceed directly into the MS program, completing the two degrees with 144 credits. Students must satisfy requirements for the BS (120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits completed as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows.

Applicants must be Mason undergraduate students who preferably have chosen to take the systems engineering of telecommunications elective sequence. Other students will be considered on their individual merit. Students may apply for the accelerated program during a semester after which they will have completed 90 or more credits applicable toward the BS in systems engineering. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet
finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission into the MS in Telecommunications Program, except that students do not need to have completed an undergraduate degree prior to admission into the accelerated program.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, students who have been accepted into the program must maintain a 3.25 average until they have satisfied all requirements for the BS in systems engineering. They must then maintain a minimum 3.00 GPA in the graduate segment.

Students must complete all requirements for the BS in systems engineering. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in telecommunications is granted on completion of all requirements for the accelerated degree.

Degree Requirements

Telecommunications courses

The following courses may be taken by a systems engineering undergraduate student as part of the accelerated program:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5
- OR 541 - Operations Research: Deterministic Models Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3 (if taken, replaces TCOM 521 in the telecommunications core requirements)

Master's Degree

Operations Research, MS

Banner Code: VS-MS-OPRS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.
Admission Requirements

To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have a satisfactory score on the TOEFL.
- Provide three letters of recommendation submitted by former professors or supervisors.

The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500. A sample test is available from the department.

Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500) extend minimum requirements for the degree. Students whose undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500.

Degree Requirements

The program consists of 30 credits. Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of four concentration areas or in an individual plan approved by the student's advisor.

Core Courses, Project

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3

*Students who have performed well in their undergraduate calculus-based probability class may take OR 645 Stochastic Processes instead.

OR Electives

At least three 600-level or higher OR courses must be taken. These include at least one deterministic methods and one stochastic methods course.

Deterministic methods courses:

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
• OR 643 - Network Modeling Credits: 3
• OR 644 - Nonlinear Programming Credits: 3

**Stochastic methods courses:**
• OR 645 - Stochastic Processes Credits: 3
• OR 647 - Queuing Theory Credits: 3
• OR 648 - Production and Inventory Systems Credits: 3
• OR 675 - Reliability Analysis Credits: 3
• OR 674 - Dynamic Programming Credits: 3
• OR 677 - Statistical Process Control Credits: 3

**Additional Electives**

Up to two additional elective courses may be chosen with written concurrence of the advisor. These courses should be taken in an area appropriate to the student’s interests, such as operations research, statistics, computer science, information systems, systems engineering, electrical and computer engineering, economics, and mathematics. At least one of these electives must be taken from SEOR’s course offerings.

With the advisor’s permission, a qualified student may elect to write a thesis in place of 3 credits of course work from the methodological or applications area.

**Concentrations**

Students may construct concentration areas by choosing electives from among special groupings. The four concentrations available are decision analysis, military operations research, optimization, and stochastic modeling.

▲ **Concentration in Decision Analysis (DA)**

Students concentrating in decision analysis must complete the following. The remaining two electives are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

• OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
• OR 681 - Decision and Risk Analysis Credits: 3
• SYST 664 - Bayesian Inference and Decision Theory Credits: 3

▲ **Concentration in Military Operations Research (MOR)**

Students concentrating in military operations research must complete the following. The remaining two courses are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

• OR 651 - Military Operations Research I: Cost Analysis Credits: 3
• OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3

▲ **Concentration in Optimization (OPT)**
Students whose primary interest is in optimization may complete a concentration by choosing three courses from the following. The remaining two courses are chosen with written concurrence of the advisor. They should be tailored to the student’s interest and must include at least one stochastic methods course. The other course may be chosen from the department’s offerings, appropriate offerings in other departments within the Volgenau School, and appropriate courses from other university departments. A sample of possible courses outside SEOR is available from the department office.

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- OR 741 - Advanced Linear Programming Credits: 3

▲ Concentration in Stochastic Modeling (STM)

Students concentrating in stochastic modeling must complete one 600-level statistics course (numbered 634 or above) and two courses from the following. The remaining two courses are chosen with written concurrence of the student’s advisor and must include at least one deterministic methods course.

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 648 - Production and Inventory Systems Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Dual-Degree MS in Operations Research and Statistical Science

The program allows students to earn an MS in Operations Research and and MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required of the degrees were sought independently. See the corresponding catalog entry.

Systems Engineering, MS

Banner Code: VS-MS-SYST

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

Mason's educational and research program in Systems Engineering addresses a broad range of issues relevant to the design, implementation, analysis and management of systems. Specialization areas include Architecture-Based Systems Integration; Air Transportation; Systems Engineering Analysis; Systems Management; Command, Control, Communications, Computing, and Intelligence; and Systems Engineering of Software-Intensive Systems. Research activities include both fundamental and applied research. GMU's graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems "perspective".

The program prepares students for a professional career in systems design, development, and management, associated with problem formulation, issue analysis, and evaluation of alternative courses of action. The program emphasizes both analytical and
practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems design, engineering, and management. The program prepares students for careers in research and development, and pursuing advanced graduate study leading to the PhD in information technology.

Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include three core courses, two methods courses, three to four electives in an emphasis area, and a thesis or systems engineering project. The plan of study must include 30 graduate credits. Either a thesis (6 credits) or research project (3 credits) is required for the degree. Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

Foundation and Admission Requirements

Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.
- Three letters of recommendation submitted by former professors or supervisors
- Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

Degree Requirements

Project or Thesis

Each student must complete a project (3 credits); under certain circumstances students may complete a thesis (6 credits). Under the project option, students complete 3 credits of SYST 798, in which students propose and conduct an approved team project. A project report is submitted at the end of the semester, and a final presentation is made to the Systems Engineering and Operations Research Department faculty. Under the thesis option, students complete 6 credits of SYST 799. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor from the Systems Engineering and Operations Research Department, and the final written thesis and oral defense are approved by a three member faculty committee and submitted to the Volgenau School. The thesis work is expected to be completed while taking 6 credits of SYST 799. Although students may register for more than 6 credits, only 6 credits can be applied toward the degree.

Core Courses
Students must complete the following three core courses (9 credits):

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3

Methods Courses

Students must complete two basic methods courses, including SYST 611 System Methodology and Modeling. The other basic methods course may depend on the emphasis chosen by the student and must be selected from the following list:

- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3

Emphasis Courses

Students must complete a set of elective courses that, together with the basic methods courses, constitute a clearly defined emphasis within systems engineering. Students pursuing the thesis option complete three electives in an emphasis; students pursuing the project option complete four electives in an emphasis.

Students may create their own emphasis with the approval of their advisor, or they may choose one of the following six emphases: systems engineering analysis, systems management, architecture-based systems integration, C4I, systems engineering of software-intensive systems, and advanced transportation systems. Approved basic methods courses and electives for the major emphases are as follows.

**Systems Engineering Analysis Emphasis**

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This emphasis provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

**Basic methods courses:**

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses

**Emphasis-specific courses:**

Students must complete the following course:
- SYST 542 - Decision Support Systems Engineering Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and must be approved by the student’s advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 671 - Judgment and Choice Process and Decision Making Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

Systems Management Emphasis

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This track emphasizes the theory and practice of systems management and prepares students for careers in managing the development of complex systems.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

Emphasis-specific courses:

Students must take the following:

- SYST 571 - Systems Engineering Management Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and must be approved by the advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 540 - Analysis for Systems Management Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 622 - System Integration and Architecture Evaluation. Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
  or
- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 677 - Statistical Process Control Credits: 3
Architecture-Based Systems Integration Emphasis

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This emphasis covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3

Emphasis-specific courses:

Students must complete the following courses:

- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 622 - System Integration and Architecture Evaluation. Credits: 3

The remaining course is an elective taken from the list below. Courses designated as basic methods courses may also be used as an elective.

- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

Command, Control, Communications, Computing, and Intelligence Emphasis

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.
Basic methods courses:

- OR 542 - Operations Research: Stochastic Models Credits: 3
  or
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3

Emphasis-specific courses:

Students must take the following:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
  or
- ECE 670 - Principles of C4I Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 685 - Estimation and Tracking: Principles and Techniques Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Systems Engineering of Software-Intensive Systems Emphasis

This emphasis addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

Emphasis-specific courses:
Students must take the following:

- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and approved by the student's advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

- CS 571 - Operating Systems Credits: 3
- CS 631 - Object-Oriented Design Patterns Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SYST 540 - Analysis for Systems Management Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3

At most one of the following:

- CS 555 - Computer Communications and Networking Credits: 3
  or
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
  or
- INFS 612 - Principles and Practices of Communication Networks Credits: 3

---

### Advanced Transportation Systems Emphasis

The air transportation system is among the most complex networked systems. This specialization is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

#### Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

#### Emphasis-specific courses:

Students must complete the following:

- SYST 560 - Introduction to Air Traffic Control Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3

The remaining courses are electives taken from the list below. The set of electives must constitute a well-defined focus and must be approved by the student's advisor. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

- SYST 571 - Systems Engineering Management Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
CSS 610 - Computational Analysis of Social Complexity Credits: 3
OR 647 - Queuing Theory Credits: 3

Dual Master's

Operations Research and Statistical Science Dual- Degree MS (OPRS)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering
Department: Systems Engineering and Operations Research

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual degree program requires a total of 48 credits as specified below:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Elective Credits in OR Courses

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

Deterministic Methods Courses:
- OR 641 - Linear Programming Credits: 3
Elective Credits in STAT Courses

12 elective credits in STAT courses numbered 574 or higher, excluding STAT 700 and 701. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Notes:

- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS in Statistics Program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

Master's Level Certificate

Architecture-Based Systems Integration Graduate Certificate

Banner Code: VS-CERG-ABSI

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

Certificate Requirements

The following courses must be completed with a GPA of B or better:

- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering. Credits: 3
Completing the ABSI Certificate within the MS/SE Program

In addition to the ABSI Certificate courses students must take 5 courses (15 credits) including:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 798 - Systems Engineering Project Credits: 3
- One approved elective from the ABSI Emphasis. Credits: 3

Command, Control, Communications, Computing, and Intelligence Graduate Certificate

Banner Code: VS-CERG-C4I

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The C4I certificate program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

The program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

Certificate Requirements

The certificate consists of 15 credits (5 courses). Students must complete the following with an average grade of B or better:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
  or
- ECE 670 - Principles of C4I Credits: 3
  and
- OR 542 - Operations Research: Stochastic Models Credits: 3
  or
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
and three courses out of the following:

- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 685 - Estimation and Tracking: Principles and Techniques Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Completing the C4I Certificate within the MS/SE Program

In addition to the 5 certificate courses, students must complete the following five courses:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 798 - Systems Engineering Project Credits: 3

Computational Modeling Graduate Certificate

Banner Code: VS-CERG-CCM

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This certificate program provides knowledge, tools, and techniques to those who work or plan to work in the field of computational modeling. Courses taken for this certificate program can count toward a master’s degree in operations research or statistics or a PhD in computational sciences and informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

For admission into the certificate program, applicants must meet minimum entrance requirements for the MS in operations research, the MS in statistical science, or the PhD in computational sciences and informatics.

Certificate Requirements

- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
  or
- CSI 700 - Numerical Methods Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• STAT 634 - Case Studies in Data Analysis Credits: 3

In addition, candidates must choose any two of the following electives:

• CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
• CSI 773 - Statistical Graphics and Data Exploration Credits: 3
• OR 542 - Operations Research: Stochastic Models Credits: 3
• OR 680 - Project Course in Operations Research Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3

Note:

Students who have already taken the equivalent of any of the required courses may, with permission of the department chair, complete the certificate program by taking only 15 credits of course work.

Discovery, Design, and Innovation Graduate Certificate

Banner Code: VS-CERG-DDI

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program responds to the growing need for professional knowledge in innovation. It provides a balanced understanding of the entire process: discovery of knowledge, use in inventive problem solving, development of inventions, and familiarity with using various inventive design methods and tools. The program is available to students who hold master’s degrees in engineering and scientific disciplines or who are in such graduate programs. Students may pursue the certificate concurrently with any of the graduate programs in the Volgenau School; however, the certificate is not awarded until all requirements have been completed.

Certificate Requirements

Certificate candidates must complete at least 15 credits with an average grade of B or better.

To obtain the certificate, students must take:

• SYST 520 - System Engineering Design Credits: 3
• IT 894 - Design and Inventive Engineering Credits: 3
• IT 944 - The Process of Discovery and Its Enhancement in Engineering Applications Credits: 3

and two of the following:

• CEIE 601 - Infrastructure Modeling Credits: 3
  or
• CEIE 670 - Civil Engineering Decision Methods and Tools Credits: 3
• SYST 573 - Decision and Risk Analysis Credits: 3 (recommended if going on for MS in civil and infrastructure engineering)

• SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  or
• STAT 664 - Bayesian Inference and Decision Theory Credits: 3

• SYST 781 - Data Mining and Knowledge Discovery Credits: 3
  or
• STAT 781 - Data Mining and Knowledge Discovery Credits: 3

• STAT 652 - Statistical Inference Credits: 3
• STAT 700 - Advanced Quantitative Data Analysis for Health Care Research II Credits: 3
• STAT 701 - Advanced Multivariate Statistics and Data Analysis in Health Care Research Credits: 3

• OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
  or
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3

• IT 819 - Computational Models for Probabilistic Inference Credits: 3

Military Operations Research Graduate Certificate

Banner Code: VS-CERG-MOR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master’s degree in operations research, but who want a concentrated study of military modeling. Admissions requirements are identical to those for the master’s degree in operations research.

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

Certificate Requirements

To obtain the certificate, a student needs to complete the following:

• OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• OR 651 - Military Operations Research I: Cost Analysis Credits: 3
• OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3
Systems Engineering of Software-Intensive Systems Graduate Certificate

Banner Code: VS-CERG-SIS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This certificate is available to any student who holds a bachelor’s degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the master’s degree in systems, except that the math requirements include only MATH 113, MATH 114, and a probability and statistics course. Note: Some certificate electives may require stronger math requirements.

Certificate Requirements

To be eligible for a certificate, students must complete with an average grade of B or better the following:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- And two out of the following:
  - SYST 542 - Decision Support Systems Engineering Credits: 3
  - SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
  - SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
  - ECE 542 - Computer Network Architectures and Protocols Credits: 3
  - CS 555 - Computer Communications and Networking Credits: 3
  - INFS 612 - Principles and Practices of Communication Networks Credits: 3

Only one of ECE 542, CS 555 and INFS 612 may be taken.

Completing the Certificate within the MS in Systems Engineering:

Students studying for the MS in systems engineering in conjunction with the certificate will need to complete the following courses in addition to the certificate courses:

- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 798 - Systems Engineering Project Credits: 3
- One additional methods course
- One additional elective approved for the Software Intensive Systems emphasis

Doctoral Degree
Systems Engineering and Operations Research, PhD

Banner Code: VS-PHD-SEOR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

The doctoral program in Systems Engineering and Operations Research offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.

The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

Admissions

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering mathematics and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for nonnative English speakers. All of an applicant’s background is examined before an admission decision is made.

Program Requirements

Course Requirement

Students entering with a master's degree in a related discipline will be require to complete at least 48 credits. In particular, students entering with a master's degree will be required to complete at least 24 credits of advanced emphasis course work and at least 24 research credits from SEOR 998 Doctoral Dissertastion Proposal and SEOR 999 Doctoral Dissertation, with at least 12 credits of SEOR 999. Students entering without an MS will need at least 24 additional credits of coursework.
Coursework Requirement (Students with MS)

Students are required to complete at least 24 credits of advanced coursework including:

- STAT 554 - Applied Statistics Credits: 3
- SYST 763 - Research Methods in Systems Engineering and Information Technology Credits: 3
- 12 credits of 700-level SEOR approved courses, a list of approved courses is available from the department
- 6 credits in SYST or OR courses numbered 600 or higher, excluding SYST 798 Project in Systems Engineering and OR 680 Project in Operations Research

No more than 3 credits are allowed for a directed reading course. All courses must be approved by the student's dissertation committee chair. Course substitutions must be approved by the dissertation committee chair and SEOR department chair. A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits. Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.

Coursework Requirement (Students without MS)

Students entering without a master's degree are required to complete an additional 24 credits of master's level courses, including the following:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3

and

- 12 additional credits from one of two alternatives (systems engineering or operations research). Consult the SEOR Department for the list of allowable courses.

With appropriate selection of courses, students may obtain the MS degree in Systems Engineering or Operations Research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 798 or OR 680. Consult the SEOR Department for further detail. Credits taken in the courses SYST 798 or OR 680 may not be applied towards the PhD degree program requirements.

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Qualifying Exam

Each student must take four exams within two years of enrolling in the program. The exam is primarily for testing the students’ familiarity with fundamental concepts.

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
Note:

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Doctoral Supervisory Committee

Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least four members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least three members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include SEOR faculty and the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a master's degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. the supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, to have an announcement posted for at least two weeks. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. there is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee.
before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

Concentration

▲ Concentration in Operations Research (OPRS)

Admissions

Students are usually admitted with an MS degree in systems engineering, operations research, or some related engineering or information technology area. The admissions materials are similar to those of the PhD in information technology; however, submittal of GRE scores is mandatory.

Requirements

Students seeking one of these concentrations must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Doctoral Supervisory Committee

The committee chair should be selected from the list of approved chairs of SEOR, and the dissertation director must be a member of SEOR. The doctoral supervisory committee must include at least three members from SEOR. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the department’s doctoral coordinator.

Qualifying Exams

Each student must take a set of four exams from three different degree programs from the following:

- OR 541 - Operations Research: Deterministic Models
- OR 542 - Operations Research: Stochastic Models
- STAT 544 - Applied Probability
- STAT 554 - Applied Statistics
- SYST 520 - System Engineering Design
- SYST 573 - Decision and Risk Analysis

Advanced Emphasis Requirement
For students specializing in operations research, at least 18 of the 24 credits in the advanced emphasis requirement must be in OR courses numbered 600 or higher or in IT courses with an OR designation. For students specializing in systems engineering, at least 18 of the 24 credits must be in SYST courses numbered 600 or higher, or in IT courses with a SYST designation. All exceptions to this rule must be approved by the student’s doctoral supervisor committee and the department’s doctoral coordinator. The doctoral supervisory committee and the associate dean for graduate studies and research of the Volgenau School must approve the overall plan of study. A list of IT courses with an OR or SYST designation is available from the SEOR office.

▲ Concentration in Systems Engineering (SYST)

Admissions

Students are usually admitted with an MS degree in systems engineering, operations research, or some related engineering or information technology area. The admissions materials are similar to those of the PhD in information technology; however, submittal of GRE scores is mandatory.

Requirements

Students seeking one of these concentrations must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Doctoral Supervisory Committee

The committee chair should be selected from the list of approved chairs of SEOR, and the dissertation director must be a member of SEOR. The doctoral supervisory committee must include at least three members from SEOR. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the department’s doctoral coordinator.

Qualifying Exams

Each student must take a set of four exams from three different degree programs from the following:

- OR 541 - Operations Research: Deterministic Models
- OR 542 - Operations Research: Stochastic Models
- STAT 544 - Applied Probability
- STAT 554 - Applied Statistics
- SYST 520 - System Engineering Design
- SYST 573 - Decision and Risk Analysis

Board of Visitors

Ernst Volgenau, Rector, PhD, University of California at Los Angeles; McLean, Va.
J. Knox Singleton, Vice Rector, BS, University of North Carolina; MHA, Duke University; Oakton, Va.
William Soza, BBA, University of Texas, Austin; Annandale, Va.
Anne K. Altmann, BS, George Mason University; Oakton, Va.
Diedra Bailey, (student representative) undergraduate student in the College of Humanities and Social Sciences, Va.
Terri Cofer Beirne, BA, JD, George Mason University; Richmond, Va.
Vincent F. Callahan Jr., BS, Foreign Service, Georgetown University; McLean, Va.
Kathleen de Laski, BA, Duke University; MA, Harvard University; Reston, Va.
C. Gibson Dunn, BA, University of Virginia; MD Harvard Medical School; Great Falls, Va.
Dennis García, BA, MA, George Washington University; Alexandria, Va.
Lovey Hammel, BS, Business Administration, George Mason University; Oakton, Va.
Glenn C. Lewis, BA, University of Miami; JD, George Mason University; Vienna, Va.
Byron F. Marchant, BS, U.S. Naval Academy; JD, University of Virginia; Arlington, Va.
Charlie H. Mills, BS, U.S. Naval Academy; Sterling, Va.
Long Nguyen, BS, North Carolina State University; MS, University of Virginia; PhD, Iowa State University; McLean, Va.
Aline Sandouk, (student representative), undergraduate student in the College of Science; Vienna, Va.
Sudhakar Shenoy, BTech, Indian Institute of Technology; MS, MBA, University of Connecticut; Great Falls, Va.
Suzanne Slayden, (faculty representative), BS, PhD, University of Tennessee; Fairfax, Va.
D. Jean Wu, BS, University of Virginia; MA, George Mason University; Arlington, Va.

Administration

University President: Alan G. Merten, PhD
Chief of Staff: J. Thomas Hennessey Jr., PhD
Provost and Executive Vice President for Academic Affairs: Peter N. Steams, PhD

Vice Presidents

Senior Vice President: Maurice W. Scherrens, JD, EdD
Vice President for Facilities: Thomas G. Calhoun, BE, MS
Vice President for Information Technology: Joy R. Hughes, PhD
Vice President for Metropolitan Relations: Stanley E. Taylor, MArch
Vice President for Administration: Lawrence D. Czarda, PhD
Vice President for Research and Economic Development: Roger Stough, PhD
Vice President for University Development and Alumni Affairs: Marc Broderick, BA
President, GMU Foundation Inc.: David Roe, MBA
Vice President for University Life: Sandra Hubler, EdD
Vice President for University Relations: Christine M. LaPaille, MA
Deans and Directors
Director, Institute for Conflict Analysis and Resolution: Andrea Bartoli, PhD
Dean, College of Education and Human Development: Gary Galluzzo, PhD
Dean, College of Health and Human Services: Shirley Travis, PhD
Dean, College of Humanities and Social Sciences: Jack Censer, PhD
Dean, The Volgenau School of Information Technology and Engineering: Lloyd J. Griffiths, PhD
Director, Krasnow Institute for Advanced Study: James Olds, PhD
Dean, School of Law: Daniel Polsby, JD
Dean, School of Management: Jorge Haddock, PhD
Dean, School of Public Policy: Kingsley Haynes, PhD
Dean, College of Science: Vikas Chandhoke, PhD
Dean, College of Visual and Performing Arts: William F. Reeder, MM
Assistant to the President and Director of Office of Equity and Diversity Services: Corey Jackson, JD

Academic Affairs
Vice Provost for Academic Affairs: Linda A. Schwartzstein, JD, PhD
Associate Provost for Distance Education: Goodlet McDaniel, EdD
Associate Provost for Education Improvement and Innovation: Kimberly Eby, PhD
Associate Provost for Global Education: Yehuda Lukacs, PhD
Associate Provost for Graduate Education: Michelle Marks, PhD
Associate Provost for Institutional Effectiveness: Karen Gentemann, PhD
Associate Provost for Institutional Research and Reporting: Kris Smith, PhD
Associate Provost for International Relations: Sharon Siverts, PhD
Associate Provost for Undergraduate Education: Rick Davis, DFA
Assistant Provost for Academic Affairs: Wendy Payton, BA
Assistant Provost for Enrollment Planning and Administration: Renate Guilford, MA

Enrollment Services
Associate Vice President for Enrollment Development and Dean of Admissions: Andrew Flagel, PhD
Assistant Dean and Executive Director of Admissions: Eddie Kent Tallent, BFA
Assistant Dean of Admissions: Daniel J. Robb, MBA, MS
Assistant Dean of Admissions: Carolina Figueroa, PhD
Director of Undergraduate Recruitment: Kevin Holmes, MEd
Director of Admissions Operations: Darren Troxler, MEd
University Registrar: Susan H. Jones, MS, MEd
Director of Student Financial Aid: Jevita deFreitas, BA

University Libraries
University Librarian: John Zenelis, MLS, MA

University Life
Vice President for University Life: Sandra Hubler, EdD
Associate Vice President, University Life: Rose Pascarell, MA
Dean of Students and Assistant Vice President: Pam Patterson, MS
Associate Vice President, University Life: Patricia Carretta, MA
Associate Dean, Office for Academic Integrity: Donna Fox, PhD
Associate Dean, University Life, International Affairs: Kathy Trump, MA
Associate Dean, University Life, Academic Initiatives: Mark Kidd, PhD
Associate Dean, University Life: Dennis Webster, PhD
Associate Dean, University Life: Amy Snyder, MEd
Assistant Dean, University Life at Prince William: Charvis Campbell, MA
Executive Director, Student Health Center: Gigi Abdalla, MD
Administrative Director, Student Health Services: Carol Filak, RN, MSN
Coordinator, Student Media for Literary Journals: Michele Braithwaite, MS
Director, Arlington Campus: Lori Cohen, MA
Director, Development and Community Relations: Colandra Coleman, BA
Director, Special Projects: Kara Danner, MS
Director, Orientation and Family Programs and Services: Douglas Little,
Director, Student Activities: Lauren Long, MA
Director, Office of Disability Services: Christopher Moy, MS
Interim Director of Judicial Affairs: Hortense Rascoe, MA
Director of Leadership Education and Development: Juliet Blank-Godlove, MA
Interim Director, Alcohol, Drug, and Health Education: Mary Ann Sprouse, MSW, LCSW
Director, University Career Services: Janice Sutera, PhD
Director, Early Identification Program: Tensie Cadenas, MA
Director, Counseling and Psychological Services: Jeff Pollard, PhD, ABPP
Director, Diversity Programs and Services: Joya Crear, MA
Director, Sexual Assault Services: Connie Kirkland, MA
Director, Women and Gender Studies Center: Nancy Hanrahan, PhD
Director, International Programs and Services: Judith Green, MA
Director, English Language Institute: John Pope, MA
Faculty Coordinator, Student Media Group: Kathryn Mangus, MA

Nicholas Tavani, Associate Professor Emeritus of Sociology and Anthropology
Anita Taylor, BS, MS, PhD, Professor Emerita of Communication
Wayne Thomas, BA, MEd, PhD, Professor Emeritus of Education
Hale Tongren, MBA, DBA, Professor Emeritus of Management
Gordon Tullock, PhD, JD, Professor Emeritus of Law and Economics
Zita Tyer, PhD, Professor Emerita of Psychology
James D. Vail, BSN, MSN, PhD, University Professor Emeritus
Harry Van Trees, BSc, MS, ScD, University Professor Emeritus of Electrical Engineering
Karen Vaughn, BA, MA, PhD, Professor Emerita of Economics
Irmgard Wagner, MA, PhD, Professor Emerita of German
Dorothy J. Walker, BSNE, MSNE, PhD, JD, Professor Emerita of Nursing
Gerald Wallace, BS, MEd, EdD, Professor Emeritus of Education
C. Robert Walter Jr., BA, PhD, Professor Emeritus of Chemistry
John Warfield, AB, BSEE, MSEE, PhD, Professor Emeritus of Public Policy and Integrative Studies
Keith Q. Warner, D.de l'U Professor Emeritus of French
Lenore J. Weitzman, BS, PhD, Clarence J. Robinson Professor of Sociology and Law Emerita
Inge Wekerle, BA, AM, PhD, Assistant Professor Emerita of German
Louise White, PhD, Professor Emerita of Public and International Affairs
Roger W. Wilkins, AB, LLB, Clarence J. Robinson Professor Emeritus
William Scott Willis, BA, MA, PhD, Professor Emeritus of French
Norman A. Yance, BS, BD, ThM, MAPhil, PhD, Associate Professor Emeritus of Religious Studies
George A. Zaphiriou, Professor Emeritus of Law

Instructional and Administrative Faculty 2009 - 10

The faculty list reflects appointments as of February 2009.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

A

Abdalla, Wagida, Physician and Executive Director, Student Health Services. MD 1972, Alexandria University, Egypt; Diplomate of the American Board of Pediatrics, 1982.

Abramson, Alan J., Professor, Department of Public and International Affairs. BA 1976, Wesleyan University; MA 1977, MPhil 1979, PhD 1990, Yale University.

Acs, Zoltan J., University Professor of Public Policy and Director, Center for Entrepreneurship and Public Policy. BA 1972, Cleveland State University; MA 1974, PhD 1980, The New School.

Addleson, Mark S., Associate Professor, School of Public Policy. BA 1972, 1973, Rhodes University; MA 1980, University of Natal, Pietermaritzburg; PhD 1992, University of Witwatersrand.

Agnarrson, Geir, Associate Professor of Mathematical Sciences. BS 1990, University of Iceland; PhD 1996, University of California, Berkeley.

Agouris, Peggy, Chair and Professor of Geography and Geoinformation Systems. Dipl Eng 1986, National Technical University of Athens, Greece; MS 1988, PhD 1992, Ohio State University.

Ahn, Changwoo, Assistant Professor, Environmental Science and Policy. BS 1992, MS 1996, Seoul National University; PhD 2001, Ohio State University.

Aksoy, Pelin A., Assistant Professor of Applied Information Technology. BS 1994, MS 1997, Ankara University, Turkey; PhD 2005, George Mason University.

Albanese, Denise, Associate Professor of English. BA 1978, New York University; PhD 1987, Stanford University.

Alberts, David S., Research Associate Professor, Electrical and Computer Engineering. BBA 1964, City College of New York; MS 1966, PhD 1969, University of Pennsylvania.

Aldrich, Margaret, Associate Registrar for Distributed Campuses. BS 1970, University of Vermont; MEd 1996, George Mason University.

Allen, Amanda Marie, Assistant Professor of Athletic Training. BS 1994, Ashland University; MS 1995, California University of Pennsylvania; PhD 2004, Ohio University.

Allen, Melissa, Core Faculty Member, English Language Institute. BA 1975, MA 1979, San Francisco State University.

Allen, Pamela A., Assistant Dean of Academic and Career Services, School of Management. BS 1972, University of Illinois; MA 1988, Hunter College, City University of New York.

Alligood, Kathleen T., Associate Dean, Honors College. BA 1970, George Washington University; MS 1974, PhD 1979, University of Maryland.

Allnutt, Jeremy E., Professor, Electrical and Computer Engineering. BSc 1966, PhD 1970, Salford University.

Almond, Sonya, Term Instructor of Nursing. BSN 2001, Norfolk State University; MSN 2006, George Mason University.

Al-Ubaydli, Omar, Assistant Professor of Economics. BA 2001, MA 2003, PhD 2007, University of Chicago.

Ambegaonkar, Jatin, Assistant Professor of Athletic Training. BS 1998, T. N. Medical College, India; MS 2003, Springfield College; PhD 2006, University of North Carolina, Greensboro.
Amireh, Amal, Associate Professor, English. BA 1983, Birzeit University, Palestine; MA 1987, PhD 1997, Boston University.

Ammann, Paul E., Associate Professor, Computer Science. AB 1983, Dartmouth College; MS 1985, PhD 1988, University of Virginia.

Ancekewicz, Elaine M., Term Assistant Professor of French. BA 1974, MA 1975, MPh 1977, Cornell; PhD 1984 Yale.

Anderson, Daniel M., Associate Professor of Mathematical Sciences. BA 1989, St. Olaf College; PhD 1993, Northwestern University.

Anderson, David S., Professor of Education. BS 1971, Duke University; MA 1973, Ohio State University; PhD 1983, Virginia Polytechnic Institute and State University.

Anderson, Dawn, Associate Registrar for Operations. BBA 1994, Marymount University.

Anderson, LeKesha N., Advising Coordinator, Department of Communication. BS, University of Virginia’s College, Wise; MA 2004, East Tennessee State University.

Andronikov, Sergei, Director of Executive Programs in GIS Spatial Business Intelligence, School of Management. MSc 1980, Moscow State University; PhD 1988, Russian Academy of Sciences.

Antrim, James, Facilities Manager, College of Visual and Performing Arts. BFA 1976, University of Wisconsin; MA 1978, University of Minnesota.

Apitz, Anja, Term Assistant Professor of German. Magister in DaF 2002, Leipzig; PhD 2008, University of Iowa.

Appleton, Betsy, Electronic Resources Librarian. BA 2005, Gustavus Adolphus College; MSLS 2007, University of North Carolina, Chapel Hill.

Arabandi, Bhavani, Instructor, Sociology. MSW 1995, Tata Institute of Social Sciences; MA 2000, George Mason University.

Araujo, Robyn P., Research Associate, Center for Applied Proteomics, Molecular Medicine. BEng 1997, University of Southern Queensland; PhD 2003, Queensland University of Technology, Australia.

Arciszewski, Tomasz, Professor, Civil, Environmental, and Infrastructure Engineering. BS 1970, MSc 1970, PhD 1975, Warsaw University of Technology.

Armor, David J., Professor, School of Public Policy. BA 1961, University of California, Berkeley; PhD 1966, Harvard University.

Arthurs, Joshua W., Postdoctoral Teaching Fellow, History and Art History. BA 1997, Wesleyan University; MA 1999, PhD 2007 University of Chicago.

Ascoli, Giorgio A., University Professor, Department of Molecular Neuroscience; Director, Center for Neural Informatics, Structures, and Plasticity. BS 1991, Scuola Normale Superiore, Italy; MS 1993, Pisa University, Italy; PhD 1996, Scuola Normale Superiore.
Ashcraft, Thomas D., Associate Professor, Art and Visual Technology. BA 1978, University of South Florida; MFA 1982, Indiana University.

Atkins, David C., Director, Johnson Center and Student Union Operations. BS 1990, MA 1998, George Mason University.

Atkinson, Jennifer H., Associate Professor, English. BA 1978, Wesleyan University; MFA 1984, MA 1985, University of Iowa.

Auerswald, Philip E., Assistant Professor and Director, Center for Science and Technology Policy, School of Public Policy. BA 1988, Yale University; MA 1995, PhD 1999, University of Washington.

Austin, Clayton, Chair, Department of Theater; Associate Professor of Theater. BA 1973, Brandeis University; MFA 1986, Yale School of Drama.

Avruch, Kevin Andrew, Professor of Conflict Resolution and Anthropology. BA 1972, University of Chicago; MA 1973, PhD 1978, University of California, San Diego.

Axtell, Robert, Associate Professor, Department of Computational Social Science, Krasnow Institute for Advanced Study. BS 1983, University of Detroit; PhD 1992, Carnegie Mellon University.

Baghi, Heibatollah, Associate Professor of Global and Community Health. BA 1974, University of Isfahan; MS 1976, PhD 1980, Iowa State University; PhD 1988, Florida State University.

Bai, Chunhong, Assistant Research Associate, Life Science. BS 1987, Peking University; MS 2004, State University of New York, Albany.

Bailey, Charles, Distinguished Professor of Biology. BS 1965, MS 1966, PhD 1968, Oklahoma State University.

Baker, Ann C., Associate Professor. BS 1966, College of Charleston; MPA 1975, University of Tennessee; PhD 1995, Case Western Reserve University.

Baker, Max A., Executive Director of the Patriot Club. BS 1995, Virginia Polytechnical Institute and State University.

Baker, Pamela H., Assistant Professor of Special Education. BS 1984, MEd 1987, College of William and Mary; EdD 2002, Bowling Green State University.

Baker, Robert E., Associate Professor of Education. BS 1979, MS 1985, Pennsylvania State University; EdS 1986, EdD 1995, College of William and Mary.

Bakhash, Shaul, Robinson Professor of History; BA 1959, MA 1968, Harvard University; PhD 1972, Oxford University.

Balakrskaia, Anna, Term Professor of Music. MM 1969, DMA 1974, St. Petersburg State Conservatory, Russia.

Baldwin, Carrey L., Assistant Professor of Psychology. BA 1987, University of Nebraska, Lincoln; MA 1994, PhD 1997 University of South Dakota.

Balint, Peter John, Associate Professor of Environmental Policy and Government and Politics. BA 1971, Haverford College; MA 1972, State University of New York, Albany; MS 1998, PhD 2000, University of Maryland.

Bannan-Ritland, Brenda, Associate Professor of Education. BS 1986, Millersville University; MS 1991, Bloomsburg University; PhD 1996, Pennsylvania State University.
Banville, Dominique, Associate Professor of Physical Education. BPE 1990, MSc 1994, PhD 1998, Laval University, Canada.

Baranova, Anna, Associate Professor of Biology. MS 1995, PhD 1998, Moscow State University; DSci 2004, Vavilov Institute of General Genetics, Russian Academy of Sciences.

Barcher, Peter, Associate Dean. BA 1968, MA 1972, PhD 1973, Syracuse University.

Barna, Adrienne M., Associate Director, Counseling and Psychological Services. AB 1970, Drew University; MEd 1972, Rutgers University; MA 1976, PhD 1980, University of Maryland.

Barnes, Steven, Assistant Professor, History and Art History. BA 1993, Harvard University; MA 1997, PhD 2003, Stanford University.

Barnhart, Melinda N., Executive Director, Finance and Administration, The Volgenau School of Information Technology and Engineering. BA 1973, Miami University; MEd 1992, George Mason University.

Barreto, Ernest, Associate Professor, Physics and Astronomy. BS 1990, University of Chicago; MS 1995, PhD 1996, University of Maryland.

Bartoli, Andrea, Director, Institute for Conflict Analysis and Resolution; Drucie French Cumbie Professor of Conflict Analysis and Resolution. Laurea 1980, University of Rome; Dottorato di Ricerca 1994, University of Milan.

Baruzzi, Andrea, Biology, Psychology, Environmental Sciences & Policy Liaison Librarian. BA, University of North Carolina, Greensboro; MLIS, Drexel University.

Battaglia, Marjorie M., Assistant Term Professor of Psychology, BS D'Youville College; MBA Marymount University; PhD 2002, Virginia Polytechnic Institute and State University.

Bauer, Colleen, Associate Registrar. BS 1982, Indiana State University.

Bauer, Scott, Associate Professor, Education Leadership. BS 1981, MS 1983, PhD 1996, Cornell University.

Baum, Evan S., Assistant Dean for Academic Programs, College of Humanities and Social Sciences. BA 2003, University of Richmond; MA 2005, University of Maryland, College Park.

Baylor, David M., Audience Services Manager, College of Visual and Performing Arts. BA 1989, George Mason University.

Beach, David R., Term Instructor, English. BA 1993, Marymount University; MA 1995, George Mason University.

Beach, Sheryl L., Associate Professor, Earth Systems and Geoinformation Sciences. BA 1982, California State University; MA 1984, PhD 1990, University of Minnesota.

Beck, Cynthia L., Term Assistant Professor of Biology. BS 1980, Michigan State University; MS 1992, PhD 2000, George Mason University.

Becker, Peter A., Professor of Astrophysical, Planetary, and Space Sciences; Associate Dean for Graduate Programs, College of Science. BA 1982, Rutgers University; MS 1985, PhD 1987, University of Colorado, Boulder.
**Bedore, Joani**, Term Assistant Professor, Communication. BA 1979, St. Leo College; MA 1984, University of Baltimore; PhD 1994, University of Oklahoma.

**Beers, Shane**, Digital Repository Services Librarian. BS 2003, University of Cincinnati; MSLIS 2006, University of Illinois, Urbana-Champaign.

**Behrman, Michael Mitts**, Helen A. Kellar Professor of Special Education. BS 1971, MEd 1972, University of Cincinnati; EdD 1978, Teachers College, Columbia University.

**Bell, Kristine L.**, Associate Professor, Statistics. BSEE 1985, Rice University; MSEE 1990, PhD 1995, George Mason University.

**Bemak, Frederick P.**, Professor of Education. BA 1970, Boston University; MEd 1971, EdD 1975, University of Massachusetts.

**Benitez, Alexander V.**, Assistant Professor, Sociology and Anthropology. BA 1992, University of Arizona, Tucson; MA 1999, PhD 2006, University of Texas, Austin.

**Benjamin, Lehn**, Assistant Professor, Public and International Affairs. BA 1990, University of Minnesota; MRP 1998, PhD 2004, Cornell University.

**Bennett, James T.**, William P. Snavely Professor of Political Economy and Public Policy. BS 1964, MS 1966, PhD 1970, Case Western Reserve University.

**Bennington, Tammy L.**, Assistant Professor of Economics and Program on Social and Organizational Learning. BA, MA 1984, Washington University; PhD 1995, State University of New York, Binghamton.

**Benson, Brien**, Research Associate Professor of Public Policy. BA 1964, Harvard University; MBA 1968, Stanford University; PhD 1998, George Mason University.

**Berg, Scott**, Term Assistant Professor, English. BA 1992, University of Minnesota; MA 1995, Miami University; MFA 1997, George Mason University.

**Bergman, Rachel**, Assistant Professor of Music. BA 1992, Skidmore College; PhD 2001, Yale University.

**Bergoffen, Debra Beth**, Professor, Philosophy. AB 1962, Syracuse University; MA 1966, PhD 1974, Georgetown University.

**Berry, Alok K.**, Associate Professor, Electrical and Computer Engineering. BS 1967, MS 1969, University of Delhi; MS 1981, PhD 1985, University of Missouri.

**Bethea, Robert Harrison**, Assistant Professor of Communication. BA 1988, JD 1991, University of Oklahoma; LLM 1999, Georgetown University.

**Bever, David L.**, Associate Professor of Health Education. BS 1970, University of Dayton; MA 1973, Ball State University; PhD 1978, Purdue University.

**Bickford, Andrew**, Assistant Professor, Sociology and Anthropology. BA 1993, George Mason University; MA 1995, Columbia University; PhD 2002, Rutgers University.
Billingham, Lisa A., Associate Professor of Music. BMEd 1986, Indiana University; MM 1994, University of Missouri, Kansas City Conservatory; DMA 2001, University of Arizona.

Binninger, Pamela, Career Consultant, Career Services. BA 1970, Georgia State University; MEd 1979, George Mason University.

Birchard, Geoffrey French, Associate Professor of Biology. BA 1975, Colorado College; MA 1979, University of Montana; PhD 1985, Dartmouth Medical School.

Bishop, Barney, Assistant Professor of Biochemistry. BS 1991, College of William and Mary; PhD 1997, University of North Carolina, Chapel Hill.

Bitler, Doris, Associate Professor, Psychology, College of Humanities and Social Sciences. BA 1982, Dickinson College; MA 1984, Hollins College; PhD 1991, American University.

Blackwell, Kim Avrama, Professor, Department of Molecular Neuroscience, Krasnow Institute for Advanced Study. BS 1981, Boston University; VMD 1986, MSE 1987, PhD 1988, University of Pennsylvania.

Blaisten-Barojas, Estela, Professor of Computational Sciences and Informatics, Physics and Chemistry. BS 1964, Universidad Tecnologica de Tucuman; MS 1970, PhD 1974, Universite de Paris VI.

Blaser, Christine, Term Instructor of Nursing. BSN 1993, MSN 1997, George Mason University.

Bockman, Johanna K., Assistant Professor of Global Affairs and Sociology. BA 1991, University of California, Los Angeles; MA 1995, PhD 2000, University of California, San Diego.

Boehm-Davis, Deborah A., Chair, Department of Psychology, and University Professor of Psychology. AB 1975, Rutgers University; MA 1977, PhD 1980, University of California, Berkeley.

Boettke, Peter, J., University Professor of Economics. BA 1983, Grove City College; PhD 1989, George Mason University.

Bohn, Debbie, Academic Advisor. BA 1998, University of Utah; MEd 2002, George Mason University.

Boicu, Mihai, Assistant Professor of Applied Information Technology. PhD 2002, George Mason University.

Boileau, Don Michael, Professor of Communication. AB 1964, Stanford University; MA 1965, PhD 1972, University of Oregon.

Boland, M. Lucille, Assistant Professor of Nursing. BSN 1968, University of Maryland; MSN 1977, Catholic University of America.

Bon, Susan C., Associate Professor. BA 1989, Toledo University; JD 1992, PhD 1996, Ohio State University.

Born, Timothy Lee, Associate Professor of Chemistry. BS 1990, Calvin College; PhD 1996, Mayo Graduate School.

Borne, Kirk, Associate Professor of Computational and Data Sciences. BS 1975, Louisiana State University; MS 1980, PhD 1983, California Institute of Technology.

Botan, Carl, Professor, Communication. BA 1972, Western Michigan University; MA 1982, PhD 1985, Wayne State University.
Bott, Leslie D., Director, Financial Education Center for Women Entrepreneurs at the Community Business Partnership. BS 2004, University of Hawaii (Laie).

Bottoms, D. Michael, Assistant Professor, History and Art History. BA 1993, University of California, Berkley; MA 1998, PhD 2005, University of California, Los Angeles.

Boudinot, Patricia, Instructor, Geography. BS 1976, MS 1978, University of Nice.

Boudreaux, Donald J., Professor and Chair, Economics. BA 1980, Nicholls State University; MA 1982, New York University; PhD 1986, Auburn University; JD 1992, University of Virginia.

Bousel, Paul, Assistant Director, Academic Advising Center. BA 1975, Hofstra University; MA 1977, George Washington University.

Bowden, Paul C., Associate Athletic Director of Compliance, Intercollegiate Athletics. BA 1991, Hampton University.

Bowdoin, Jessica, Head, Interlibrary Loan and Document Delivery. BA 1996, College of William and Mary; MLIS 1999, University of Illinois, Urbana-Champaign.

Bowie, Jennifer B., Assistant Professor of Government and Politics. BA 2000, University of Vermont; PhD 2008, University of South Carolina.

Boybeyi, Zafer, Associate Professor, Earth Systems and Geoinformation Sciences. BS 1984, Istanbul Technical University; MS 1990, San Jose State University; PhD 1993, North Carolina State University.

Bradshaw, Duane D., Associate Director for Career Development and Alumni Relations, School of Public Policy. BA 1996, MEd 1998, Clemson University.

Braithwaite, Michele L., Director of Student Media, University Life. BA 1971, University of Minnesota; MS 1975, Brooklyn College, City University of New York.

Brayley, Russell E., Professor of Tourism and Events Management. BS 1977, MA 1986, Brigham Young University; PhD 1990, Texas A&M University.

Brazer, David S., Associate Professor of Education. AB 1979, MA 1986, PhD 1988, Stanford University.

Breglia, Lisa, Assistant Director of Global Affairs Program, Term Assistant Professor of Global Affairs. BA 1994, MA 1996, University of Florida; PhD 2003, Rice University.

Brigham, Frederick J., Associate Professor of Education. BS 1978, MEd 1983, Bowling Green State University; PhD 1992, Purdue University.

Bristol, Joan C., Associate Professor, History and Art History. BA 1990, Bryn Mawr College; MA 1994, San Francisco State University; PhD 2001, University of Pennsylvania.

Britt, Thomas, Term Assistant Professor, Film and Video Studies. BA 2002, Emory & Henry College; MFA 2005, Ohio University.

Brkic, Courtney A., Assistant Professor, English. BA 1994, College of William and Mary; MFA 2001, New York University.

Brock, Elizabeth A., Associate Vice President and Controller, Fiscal Services. MA 1992, Georgetown University.
Broderick, Marc, Vice President for University Development and Alumni Affairs. BA 1993, George Washington University.

Brodsky, Alexander, Associate Professor, Computer Science. BSc 1982, MSc 1983, PhD 1991, Hebrew University.

Bronzini, Michael S., Dewberry Chair and Chair of Civil, Environmental, and Infrastructure Engineering. BS 1967, Stanford University, MS 1969, PhD 1973, Pennsylvania State University.

Brouse, Peggy S., Associate Professor, Systems Engineering and Operations Research. BS 1978, American University; MBA 1986, Marymount University; PhD 1992, George Mason University.

Brown Leonard, Jeannie, Director, Bachelor of Individualized Study. AB 1985, Mount Holyoke College; MEd 1990, University of Vermont; PhD 2007, University of Maryland.

Brown III, William Thomas, Instructor; Baseball Coach; and Assistant Manager, Recreation Sports Complex. BA 1980, George Mason University.

Brozo, William, Professor of Education. BA 1977, University of North Carolina; MEd 1979, PhD 1982, University of South Carolina.

Bruce, Heidi A., Director of Planned Giving and Associate Director of Leadership Gifts, University Development. BA 1995, Morgan State University; CFRM 2002, Indiana University; MBA 2005, University of Phoenix.

Bruno, Irene, Assistant Professor, Applied Information Technology. BS 1994, University of Pittsburgh; MEd 1991, Pennsylvania State University; PhD 2003, Capella University.

Bryant, Rebecca, Associate Professor, Sociology and Anthropology. BA 1988, MA 1992, PhD 1998, University of Chicago.

Buchanan, Phillip G., Associate Professor of Accounting. BS 1970, Susquehanna University; MS 1973, Pennsylvania State University; PhD 1982, Temple University; CPA, New York and Pennsylvania.

Buehl, Michelle, Assistant Professor of Education. BA 1997, Hollins University; MA 2002, PhD 2003, University of Maryland.

Buffardi, Louis C., Associate Professor of Psychology. AB 1964, University of Rochester; MA 1966, Fordham University; PhD 1970, Kansas State University.

Burnham, Philip, Term Assistant Professor of English. BA, Beloit College; MFA, University of Massachusetts; PhD 1987, University of New Mexico.

Burns, John Barclay, Associate Professor, Religious Studies. MA 1964, St. Andrew’s University, Scotland; BD 1967, Glasgow University, Scotland; PhD 1971, St. Andrew’s University, Scotland.

Burns, M. Susan, Associate Professor of Education. BS 1974, Pennsylvania State University; MA 1980, PhD 1983, Vanderbilt University.

Burr, Zofia A., Dean, Honors College; Associate Professor, English. BA 1982, Sonoma State University; MFA 1987, MA 1990, PhD 1992, Cornell University.

Burroughs, James N., Term Assistant Professor, Department of Public and International Affairs. BS 1977, James Madison University; JD 1981, College of William and Mary; MPA 1994, George Mason University.

Bursten, Andrew, Director of Finance and Administration and Chief Financial Officer, College of Visual and Performing Arts. BA 1979, Grinnell College; MBA 1981, American University.

Bushey, Keith R., Assistant Vice President for Special Projects, University Operations. MA 1995, Marymount University.

Butler, Ann B., Professor of Molecular Neuroscience, Krasnow Institute for Advanced Study. BA 1967, Oberlin College; PhD 1971, Case Western Reserve University.

Butler, Douthard R., Associate Athletic Director for Academics, Intercollegiate Athletics. BS 1995, Prairie View A&M University; MA 1976, Central Michigan University; PhD 1992, George Mason University.

Butler, Lawrence E., Associate Professor of Art History. BA 1978, MA 1980, Oberlin College; PhD 1989, University of Pennsylvania.

Button, Kenneth J., University Professor of Public Policy and Director, Center for Aerospace Policy and Management. BA 1970, University of East Anglia, United Kingdom; MA 1971, University of Leeds, United Kingdom; PhD 1981, Loughborough University, United Kingdom.

C

Cadenas, Hortensia B., Executive Director Early Identification Program, University Life. BA 1980, MA 1993, George Mason University.

Cai, Xiaomei, Assistant Professor, Communication. BA 1993, Jilin University; MA, Peking University; MA 1998, PhD 2001, Indiana University.

Calcagno, Theresa, Information Technology and Engineering Liaison Librarian. BA 1979, Case Western Reserve University; MS 1982, Rutgers University; MLIS 1999, University of Maryland.

Calhoun, Thomas G., Vice President, Facilities. BE 1978, Vanderbilt University; MS 1987, Stanford University.

Cambridge, Darren, Assistant Professor, New Century College. BA 1996, Wabash College; MA 1998, PhD 2003, University of Texas, Austin.

Camelli, Fernando, Assistant Professor of Computational and Data Sciences. PhD 2002, George Mason University.

Campbell, Charvis V., Assistant Dean, University Life, Prince William Campus. BA 1993, Howard University; MA 2003, New York University.

Camphouse, Mark D., Professor of Music. BM 1975, MM 1976 Northwestern University.

Campo, Lisa, Term Instructor of Nursing. BSN 1985, Lynchburg College; MSN 1994, Seton Hall University.

Camus, Adele C., Instructor of English as a Second Language, English Language Institute. BA 1969, University of South Wales, Cardiff, United Kingdom; MA 1982, University of Texas, Austin.

Cangelosi, Pamela R., Associate Professor of Nursing, College of Health and Human Services. BSN 1989, Shenandoah University; MSN 1994, Marymount University; PhD 2002, George Mason University.

Canterbury, Shelly L., Instructor of Finance. BS 1985, George Mason University; MBA 1995, Virginia Polytechnic Institute and State University.
Cantor, Joshua, Director of Parking and Transportation. BA 1994, Cornell University; MA 1997, University of Kentucky.

Caplan, Bryan, Assistant Professor of Economics. BA 1993, University of California, Berkeley; MA 1995, PhD 1997, Princeton University.

Caraballo, Sharon, Assistant Dean for Academic Affairs, The Volgenau School of Information Technology and Engineering, Associate Professor, Applied Information Technology. BA 1994, Rutgers University; ScM 1996, PhD 2001, Brown University.

Carbonneau, Suzanne, Professor of Performance Studies. BA 1976, Bates College; MA 1978, American University; CMA 1979, Laban Institute of Movement Studies; PhD 1990, New York University.

Carle, Andrew J., Assistant Professor of Health Administration and Policy. BS 1981, State University of New York, Buffalo; MHSA 1985, George Washington University.

Carr, Daniel B., Professor, Statistics. BA 1968, Whitman College; MEd 1972, Idaho State University; MS 1972, Oregon State University; PhD 1976, University of Wisconsin.

Carretta, Patricia J., Assistant Vice President, University Life. BA 1968, MA 1974, Binghamton University; MA 1977, University of Iowa.

Carton, Benedict, Associate Professor, History and Art History. BA 1987, Wesleyan University; MA 1994, PhD 1996, Yale University.

Cartwright, William, Assistant Professor of Health Administration and Policy. BA 1967, Rutgers University; MA 1972, PhD 1980, Indiana University.

Carver, Richard H., Associate Professor, Computer Science. BS 1982, Ohio State University; MS 1985, PhD 1989, North Carolina State University.

Casagrande, John, Visiting Associate Professor of Music. BS 1963, MS 1967, Ithaca College.

Casey, John, Director, Fairfax Small Business Development Center, Mason Enterprise Center. BA 1979, Colgate University; MS 1985, George Washington University.

Casey, Michael J., Assistant Professor, Civil, Environmental, and Infrastructure Engineering. BS 1997, Rutgers University; MS 1999, PhD 2005, University of Maryland.

Castle, Sharon D., Associate Professor of Education. BA 1975, William Penn College; MS 1978, Iowa State University; PhD 1989, University of Maryland.

Cashon, Cara, Assistant Professor, Psychology. BS 1995, University of Iowa; MA 1999, PhD 2004, University of Texas, Austin.

Caswell, Shane Vincent, Assistant Professor of Athletic Training. BS 1999, State University of New York, Brockport; MS 2000, PhD 2003, Ohio University.

Cattaneo, Lauren, Assistant Professor of Psychology. BA 1992, University of Michigan, Ann Arbor; MA 1997, PhD 2001, University of Maryland, College Park.

Cebral, Juan R., Associate Professor, Computational and Data Sciences. BS 1991, University of Buenos Aires; PhD 1996, George Mason University.
**Censer, Jack Richard**, Professor of History and Dean, College of Humanities and Social Sciences. AB 1968, Duke University; MA 1971, PhD 1973, Johns Hopkins University.

**Censer, Jane Turner**, Professor of History. BA 1973, Transylvania University; MA 1975, PhD 1980, Johns Hopkins University.

**Cervone, Guido**, Assistant Professor, Earth Systems and Geoinformation Sciences. BS 1998, Catholic University; MS 2000, PhD 2004, George Mason University.

**Chamberlain, Jeffrey T.**, Associate Professor of French. BA 1971, Capital University; MA 1973, University of Rhode Island; PhD 1982, University of Illinois, Urbana-Champaign.

**Chandhoke, Vikas**, Professor of Biology and Dean, College of Science. BPharm 1986, MDSc 1986, Birla Institute of Technology and Science; PhD 1991, University of Maine.

**Chang, Michael G.**, Associate Professor, History and Art History. AB 1992, Princeton University; PhD 2001, University of California, San Diego.

**Chang, Shih-Chun**, Associate Professor, Electrical and Computer Engineering. BS 1970, National Cheng Kung University; PhD 1977, University of Hawaii.

**Chang, Yoonmee**, Assistant Professor, English. BA 1992, Tufts University; PhD 2003, University of Pennsylvania.

**Chao, Frederick S.**, Head Coach Men’s Volleyball, Intercollegiate Athletics. BA 1994, George Mason University.

**Charleza, Mary**, Instructor of English as a Second Language, English Language Institute. BSN 1977, Loyola University; MPH 1988, Benedictine University; MA 1999, DePaul University.

**Chen, Chien-Yu**, Assistant Professor, Information Systems and Operations Management. BA 1989, National Taiwan University; MS 1995, PhD 2003, University of Maryland.

**Chen, Chun-Hung**, Professor, Systems Engineering and Operations Research. BS 1987, National Chiao-Tung University; MS 1989, National Taiwan University; PhD 1994, Harvard University.

**Chen, Jim X.**, Professor, Computer Science. BS 1983, MS 1986, Southwest Jiaotong University; PhD 1995, University of Central Florida.

**Chen, Long**, Assistant Professor of Accounting. BS 2000, Beijing Technology and Business University; MS 2005, PhD 2008, Washington University, St. Louis.

**Chen, Songqing**, Assistant Professor, Computer Science. BS 1997, MS 1999, Huazhong University; PhD 2004, College of William and Mary.

**Chen, Xi**, Term Instructor of Chinese. BA 1999, East China Normal University, Shanghai; MEd 2002, George Mason University.

**Cheng, Constant**, Assistant Professor, Marketing. BS 1982, Brigham Young University, Hawaii; MBA 1983, Arizona State University; DES 1994, The Graduate Institute.
Cherubin, Rose M., Associate Professor of Philosophy. BFA 1984, School of Visual Arts, New York City; PhD 1996, Graduate School, City University of New York.

Cheuse, Alan, University Professor of English. BA 1961, PhD 1974, Rutgers University.

Chew, Timothy, Term Associate Professor of Theater. BFA 1983, Southwest Missouri State University; MFA 1987, University of Georgia.

Chiu, Long, Associate Professor, Earth Systems and Geoinformation Sciences. BS 1974, University of Miami; ScD 1980, Massachusetts Institute of Technology.

Chollar, Richard, Associate Director, Diversity Programs and Services for Lesbian, Gay, Bisexual, Transgender, and Questioning Student Affairs. BA 1978, Wittenberg University; MSW 1982, University of Michigan; LCSW 1999, Commonwealth of Virginia.

Chong, Elizabeth, Associate Professor of Nursing. BSN 1975, MSN 1977, PhD 1981, University of Texas.

Christensen, Alan H., Associate Professor of Biology. BS 1977, Buena Vista College; PhD 1983, Michigan State University.

Christensen, Julie A., Chair, Modern and Classical Languages; Associate Professor of Russian. BA 1970, University of Iowa; MA 1972, PhD 1978, University of California, Berkeley.

Christophe, Stephen, Associate Professor of Finance. BA 1980, Colby College; MBA 1982, College of William and Mary; PhD 1992, University of North Carolina.

Chrosniak, Linda D., Term Associate Professor of Psychology. BA 1981, University of Texas, Dallas; PhD 1991, George Washington University.

Chuck, Emil T., Term Assistant Professor of Biology and Health Professions Advisor. BSE 1993 Duke University; PhD 1998, Case Western Reserve University.

Chung, Myung-Chul, Research Associate, Center for Biodefense. BS 1986, PhD 1996, Seoul National University; MS 1988, Gyeongsang National University.

Chung, Yoo Sun, Research Assistant Professor. BS 1995, George Mason University; MEng 1996, Cornell University; PhD 2004, George Mason University.

Cioffi, Dennis F., Research Associate Professor, School of Public Policy. BS 1976, State University of New York, Albany; MA 1978, University of Virginia; PhD 1985, University of Colorado.

Cioffi-Revilla, Claudio, Director, Center for Social Complexity; Professor, Department of Computational Social Science, Krasnow Institute for Advanced Study. BS 1969, Instituto Patria, Mexico City; PhD 1975, University of Florence, Italy; PhD 1979, State University of New York.

Clark, Keith S., Associate Professor of English. BA 1985, College of William and Mary; MA 1987, University of Kentucky; PhD 1993, University of North Carolina, Chapel Hill.

Clark, Kevin, Associate Professor of Education. BS 1989, MS 1991, North Carolina State University; PhD 1994, Pennsylvania State University.

Clark, Paul G., Term Instructor of Social Work. BA 1981, Christopher Newport College; MSW 1985, Norfolk State University; PhD 2008, Virginia Commonwealth University.

Clark-Talley, Christine, Associate Vice President of Alumni Affairs. BS 1984, James Madison University; MEd 1986, University of South Carolina.
Cleaveland, Carol, Assistant Professor of Social Work. BA 1980, American University; MSS 1994, PhD 2002, Bryn Mawr.

Cobb, Sara, Associate Professor, Institute for Conflict Analysis and Resolution. BA 1973, Albertus Magnus College; MEd 1980, University of Puget Sound; PhD 1988, University of Massachusetts, Amherst.

Coester, William H., Assistant Dean for Human Resources and Planning, School of Public Policy. BBA 1975, Gonzaga University; MS 1988, University of LaVerne.

Coffinberger, Richard L., Associate Professor of Business Legal Studies. BA 1970, University of Florida; MS 1979, Virginia Polytechnic Institute and State University; JD 1974, Wake Forest University.

Cohen, Daniel J., Associate Professor, History and Art History; Director, Center for History and New Media. BA 1990, Princeton University; MTS 1992, Harvard University; PhD 1999, Yale University.

Cohen, Lori D., Director, University Life, Arlington Campus. BA 1998, Washington University; MA 2000, University of Minnesota.

Coleman, Colandra, Director of Development and Community Relations, University Life. BA 1990, George Washington University.

Colgan Bartoldus, Candy, Research Assistant Professor, Environmental Science and Policy. BA 1978, MS 1985, Queens College, City University of New York; PhD 1990, George Mason University.

Collier, Daniel L., Director of Information Technology, College of Humanities and Social Sciences. BA 1990, University of Tennessee; MFA 1994, George Mason University.

Collins, Samuel W., Assistant Professor of History and Art History. BA 1991, Whitman College; MA 1996, University of Durham, United Kingdom; PhD 2005, University of California, Berkeley.

Collins, Susan Alice, Associate Professor; Senior Associate Athletic Director of Athletics. BS 1970, University of Dayton; MS 1973, Northern Illinois University.

Colonna, Flavia, Professor of Mathematical Sciences. Laurea 1976, Universita degli Studi di Bari; MA 1980, PhD 1985, University of Maryland.

Conant, James K., Professor of Government and Politics. BA 1971, MA 1974, PhD 1983, University of Wisconsin, Madison.

Congleton, Roger D., Professor of Economics. BA 1974, MA 1976, PhD 1978, Virginia Polytechnic Institute and State University.

Coniglio, Jamie, Head of Reference, Fenwick Library, University Libraries. BA 1974, Saint Mary College; MLS 1976, Indiana University.

Conlan, Timothy J., University Professor of Public and International Affairs. AB 1974, University of Chicago; PhD 1982, Harvard University.

Constantine, Lynne M., Term Assistant Professor of Art and Visual Technology. BA 1973, Canisius College; MA 1975, MPhil 1977, Yale University.

Conwell, Nancy C., Director, Facilities Planning and Special Projects, College of Science. BA, Sweet Briar College.

Cook, Gerald, Earle C. Williams Professor of Information Technology and Electrical Engineering. BS 1961, Virginia Polytechnic Institute and State University; SM 1962, ScD 1965, Massachusetts Institute of Technology.
Cooke, Benson George, Assistant Professor; Counselor, Counseling Center. BA 1975, Morehouse College; MS 1978, EdD 1981, University of Massachusetts.

Cooley, Mark, Assistant Professor, Art and Visual Technology. BFA 1995, University of Southern Maine; MFA 1998, East Carolina University.

Coppage, Diane, Director of Foundation Relations, University Development. BA 2002, MA, George Mason University.

Cooper, Bruce B., Instructor; Assistant Athletic Director, Facilities, Intercollegiate Athletics. BS 1967, North Carolina State University.

Cooper, Jamie S., Associate Dean of Undergraduate Academic Affairs, College of Humanities and Social Sciences. BS 1995, MA 1996, Tennessee Tech University; MS 1998, PhD 2001, Virginia Polytechnic Institute and State University.

Cooper, Julia Nord, Term Assistant Professor, Environmental Science and Policy. BS 1981, University of Birmingham; MS 1984, University of Minnesota, Duluth; PhD 1989, City University of New York, Brooklyn College.

Cooper, Paul D., Assistant Professor of Chemistry and Biochemistry. BS 1999, PhD 2005, University of Western Australia.

Copelman, Dina, Associate Professor of History. AB 1975, Barnard College; MA 1977, University of Warwick, England; MA 1980, PhD 1985, Princeton University.

Copley, Steve, Instructor of English as a Second Language, English Language Institute. BS 1982, Georgetown University; MEd 1995, George Mason University.

Coppage, Diane, Director of Foundation Relations, University Development. BA 2002, MA 2006, George Mason University.

Cortina, Jose M., Professor of Psychology. BA 1989, Tulane University; MA 1991, PhD 1994, Michigan State University.

Cosgrove, Laura R., Associate Director of Operations, Office of Admissions. BA 1997, Ohio State University; MS 2002, Miami University.

Coss, Marcia C., Term Assistant Professor, Medical Technology Program Director, Biology Department. BS 1988, George Mason University; PhD 1993, George Washington University.

Couch, Robin, Assistant Professor of Chemistry. BSc 1994, PhD 1999, University of Calgary.

Coughter, Jerald, Director, Life Sciences Management. BS 1982, Clemson University; MS 1986, Virginia Commonwealth University; MBA 1992, Shenandoah University.

Cowan, Friedgard, Cataloging Librarian, Bibliographic Services Department. BA 1975, MA 1979, University of Calgary; MLS 1994, Catholic University of America.

Coven, Tyler, Holbert L. Harris Chair in Economics and Professor of Economics. BS 1983, George Mason University; PhD 1987, Harvard University.

Cox, Cara, Term Instructor of Nursing. BSN 1979, Valparaiso University; MSN 1986, Indiana University.

Cox, Daniel N., Assistant Professor, Molecular and Microbiology. BS 1992, Wake Forest University; PhD 1999, Duke University.

Cozart, Sheryl Conrad, Assistant Professor of Education. BA 1992, University of North Carolina, Charlotte; PhD 1999, University of North Carolina, Chapel Hill.

Cozzens, Robert Francis, Professor of Chemistry. BS 1963, PhD 1966, University of Virginia.

Cramton, Catherine D., Associate Professor of Management. AB 1979, Harvard University; PhD 1994, Yale University.

Crawford, Paula, Associate Professor of Art and Visual Technology. BFA 1983, MFA 1988, San Francisco Art Institute.

Crear, Joya A. Ph.D., Director, of the Office of Diversity Programs and Services, University Life. BS 1991, Howard University; MS 1995, University of Wisconsin, Madison; PhD 2002, The Pennsylvania State University.

Cressey, Hillary B., Term Associate Professor of Biology. BA 1971, Dunbarton College of Holy Cross; MS 1976, Georgetown University; DA 2002, George Mason University.

Cressman, John R., Assistant Professor of Physics. BS 1995, Union College; PhD 2003, University of Pittsburgh.

Crew, Spencer, Clarence J. Robinson Professor of History. BA 1971, Brown University; MA 1973, PhD 1979, Rutgers University.

Crocker, I. Caroline, Term Assistant Professor of Biology. BS 1979, University of Warwick; MS 1993, University of Birmingham; PhD 1999, University of Southampton.

Crockett, John H., Jr., Professor of Finance. BA 1970, Washington and Lee University; PhD 1975, University of North Carolina.

Cronin, Matthew, Assistant Professor, Management. BA 1993, Rutgers University; MA 1997, Columbia University; MS 2000, PhD 2004, Carnegie Mellon University.

Cuellar, Alison E., Associate Professor of Health Administration and Policy. BA 1987, MBA 1989, University of Texas, Austin; PhD 2001, University of California, Berkeley.

Cui, Shanshan, Assistant Professor of Art and Visual Technology. BFA 1985, MFA 1988, Sichuan Institute of Fine Arts, China; MFA 1998, Iowa State University.

Curby, Timothy, Assistant Professor of Psychology. PhD 2008, University of Virginia.

Curtin, Kevin M., Associate Professor of Geography. BA 1994, MA 1995, University of Illinois, Chicago; PhD 2002, University of California, Santa Barbara.

Curtis, Elizabeth, Manager, Potomac Academy. BA 1981, Blackburn College.

Czarda, Lawrence D., Vice President for Administration. BA 1974, Bridgewater College; MPA 1977, American University; PhD 1997, George Mason University.

D

Dabbagh, Nada, Associate Professor of Education. BA 1976, Iona College; MS 1978, Columbia University; PhD 1996, Pennsylvania State University.

Dafashy, Wagih G., Professor of Accounting. B. Com. 1959, Ein Shams University, Cairo, Egypt; Master of Accounting 1962, University of Texas, Austin; PhD 1966, University of Arkansas, Fayetteville.

Dakake, Maria, Associate Professor, Religious Studies. BA 1990, Cornell University; MA 1998, PhD 2000, Princeton University.

Dalal, Reeshad S., Assistant Professor of Psychology. BA 1998, Hanover College; MA 2001, PhD 2003, University of Illinois, Urbana-Champaign.
Dale, John G., Assistant Professor, Sociology and Anthropology. BA 1987, Wheaton College; MA 1991, New School for Social Research; PhD 2003, University of California, Davis.

D’Andrea, Paul Philip, Robinson Professor of Theater and English. BA 1960, MA 1962, PhD 1966, Harvard University.

D’Angelo, Jessica, Production Manager, College of Visual and Performing Arts. BFA 2001, University of North Carolina; MA 2007, George Mason University.

Daniels, Margaret, Associate Professor of Tourism and Event Management. BA 1991, Miami University of Ohio; MA 1993, University of Georgia; PhD 2002, Clemson University.

Danner, Kara M., Director, Portal Project Management, University Life. BS 1994, University of Wisconsin; MS 2003, George Mason University.

Darnall, Nicole, Assistant Professor, Environmental Science and Policy. BA 1991, New Mexico State University; MA 1995, University of Texas; MS 1998, Vanderbilt University; PhD 2002, University of North Carolina, Chapel Hill.

Das, Sidhartha R., Associate Professor of Information Systems and Operations Management. BS 1979, India; MS 1980, University of Mississippi; MBA 1985, PhD 1987, University of Houston.

Davidson, Janine A., Assistant Professor of Public Policy, School of Public Policy. BS 1988, University of Colorado, Boulder; MA 2002, PhD 2005, University of South Carolina.

Davidson, Michele R. McPhee, Associate Professor of Nursing. BS 1993, George Mason University; MSN 1995, Case Western Reserve University; PhD 1998, George Mason University.

Davies, Keith Maurice, Professor of Chemistry. BS 1964, PhD 1967, University of Wales.

Davis, David F., Research Assistant Professor, School of Public Policy. BS 1972, Colorado School of Mines; MS 1981, MS 1981, Naval Postgraduate School.

Davis, Linda, Term Associate Professor and Associate Chair, Statistics. BS 1979, George Mason University; MS 1981, PhD 1983, Rutgers University.

Davis, Mary Lou, Term Instructor of Nursing. BSN 1997, State University of New York, Institute of Technology; MSN 1999, State University of New York.

Davis, Molly E., Term Associate Professor; Director of Field Instruction, Bachelor Social Work Program. BA 1971, Louisiana State University; MSW 1973, Tulane University; EdD 1984, Florida State University.

Davis, Rick, Associate Provost for Undergraduate Education; Artistic Director, Center for the Arts/Theater of the First Amendment; Professor of Theater. BA 1980, Lawrence University; MFA 1983, DFA 2003, Yale School of Drama.

Davis, Shannon N., Assistant Professor, Sociology and Anthropology. BA 1997, University of North Carolina, Asheville; MS 2000, PhD 2004, North Carolina State University.

Day, Monimalika, Assistant Professor of Education. BA 1987, MS 1989, MEd Jadavpur University, India; PhD 2000, University of Maryland, College Park.

DeCaroli, Robert D., Associate Professor, History and Art History. BA 1992, Loyola Marymount University; MA 1995, PhD 1999, University of California, Los Angeles.
Decker, Warren Dale, Professor of Communication. BA 1968, Kansas State Teachers College of Emporia; MA 1969, Southwest Missouri State College; PhD 1977, Temple University.

DeFaxio, Albert, Term Assistant Professor of English. BA 1979, MA 1985, Virginia Polytechnic Institute and State University; PhD 1992, University of Virginia.

De Jong, Kenneth A., University Professor, Computer Science. BA 1966, Calvin College; MA 1967, PhD 1975, University of Michigan.

Del Popolo, Mary, Term Assistant Professor, Art and Visual Technology. BA 1980, Marymount University; MFA 1988, Virginia Commonwealth University.

DeSole, Timothy, Associate Professor of Climate Dynamics. BS 1988, MS 1989, PhD 1993, Harvard University.

deMonasbert, Sharon, Associate Professor, Civil, Environmental, and Infrastructure Engineering. BS 1979, University of Maryland; PhD 1982, Purdue University.

Demory, M. Yvonne, Assistant Professor of Business Legal Studies. BA 1987, University of Virginia; JD 1990, Columbus School of Law, Catholic University of America; LLM 1994, Georgetown University Law Center.

DeMulder, Elizabeth K., Associate Professor of Education. BS 1984, Wright State University; PhD 1989, St. John’s College, Cambridge University.

Denham, Susanne Ayers, University Professor of Psychology; Director, Applied Developmental Psychology Program. BA 1972, Western Maryland College; MA 1974, Johns Hopkins University; PhD 1985, University of Maryland, Baltimore County.

Denis, Milagros, Instructor, History and Art History. BA 1995, University of Puerto Rico; MPS 1999, Cornell University.

Dennis, Rutledge M., Professor of Sociology. BA 1966, South Carolina State College; MA 1969, PhD 1975, Washington State University.

De Nys, Martin John, Associate Professor of Philosophy. AB 1967, MA 1969, PhD 1974, Loyola University, Chicago.

De Nys, Mary, Term Assistant Professor of English. BS 1967, MA 1971, Loyola University; PhD 1981, George Washington University.

Dere, Kenneth, Research Professor, CEOSR. BA 1969, MS 1971, Cornell University; PhD 1980, Catholic University of America.

Deshmukh, Marion F., Associate Professor, of History and Art History. BA 1966, University of California, Los Angeles; MA 1967, PhD 1975, Columbia University.

Di, Liping, Professor, Earth Systems and Geoinformation Sciences. BS 1982, Zhejiang University; MS 1985, Chinese Academy of Sciences; PhD 1991, University of Nebraska, Lincoln.

Diao, Guoqing, Assistant Professor, Statistics. BE 1998, MS 2001, University of Science and Technology of China; PhD 2005, University of North Carolina, Chapel Hill.

Dickerson, Michael A., Term Instructor and Internship Coordinator. Department of Communication. BFA 1960, Ohio University; MA 1974, Loyola University; MA 1979, U.S. Army War College.

Dickerson, Nancy A., Director, Academic Advising Center. BFA, Ohio University; MS 1976, Shippensburg State University.

Dickman, Kathleen, Term Instructor of Nursing. BSN 1975, Georgetown University; MSN 1996, George Mason University.
Diecchio, Richard Joseph, Professor of Geology; Director, Geology and Earth Systems Science Programs; Associate Dean for Undergraduate Programs, College of Science. BS 1970, Rensselaer Polytechnic Institute; MS 1974, Duke University; PhD 1980, University of North Carolina, Chapel Hill.

Dieke, Peter U.C., Associate Professor of Tourism and Event Management. BA 1975, University of Nigeria; MSc 1981, University of Massachusetts; PhD 1988, University of Strathclyde (U.K.).

Dight, Kimberly, Director, Special Projects, Fiscal Services. BA 1990, The Ohio State University; MBA 1993, University of Connecticut.

Dillard, Geoff, Head Coach, Women's Rowing. BS 2000, University of Dayton.

Dillon, Francis H., III, Term Instructor of Geography. BA 1972, College of William and Mary; MS 1996, George Mason University.

Dimitrov, Dimiter M., Professor of Education. BS, PhD 1984, University of Sofia Kliment Ohridski; PhD 1995, Southern Illinois University, Carbondale.

Dinan, Desmond, Jean Monnet Professor, School of Public Policy. BA 1978, National Institute for Higher Education; MA 1981, Georgetown University; PhD 1985, National University of Ireland.

Dinapoli, Constance, Term Assistant Professor of Dance. BA 1983, Stanford University.

Dixon, Christopher, Assessment, Planning and Organizational Development Coordinator. BA 2001, Pennsylvania State University; MSLIS 2008, Drexel University.

Domeniconi, Carlotta, Associate Professor, Computer Science. BASc 1992, University of Milano; MSSc 1997, International Institute for Advanced Scientific Studies, Salerno, Italy; PhD 2002, University of California, Riverside.

Donini, Patricia, Employee Relations Director/Deputy Director HR/Payroll. BA 1974, College of New Rochelle.

Donohue, George L., Professor, Systems Engineering and Operations Research. BSME 1967, University of Houston; MS 1968, PhD 1972, Oklahoma State University.

Dorick, Lucy B., Director of Development, Institute for Conflict Analysis and Resolution. BS 1974, George Mason University; MEd 1979, Lesley College.

Douglas, Charlene, Associate Professor of Nursing. BA 1975, BSN 1978, Case Western Reserve University; MPH 1981, PhD 1992, Johns Hopkins Bloomberg School of Public Health.

Douthett, Edward B., Associate Professor, Accounting. BA 1979, Pennsylvania State University; MBA 1991, PhD 1995, University of Georgia.

Drake, Diane C., Head Coach, Women's Soccer. BA 1993, University of Dayton; MS 1996, Louisiana State University.

Druckman, Daniel, Professor of Government and Politics. BA 1961, Michigan State University; MS 1965, PhD 1966, Northwestern University.

Druehl, Cheryl T., Assistant Professor of Operations Management. BS 1990, University of California, Los Angeles; MBA 1995, University of Pittsburgh; MAB 2000, PhD 2003, Stanford University.

Drumney, David G., Associate University Counsel. BS 1996, JD 1999, George Mason University.

Du, Tai C., Term Instructor, Communication. BS 1998, Northern Arizona University; MA 1999, Ball State University.

Duck, Lloyd Earl, Associate Professor of Education. AB 1966, College of William and Mary; MAT 1968, PhD 1974, University of Virginia.
Dudley, Robert L., Professor of Government and Politics; Chair of Public and International Affairs. BA 1970, Western Illinois University; MA 1974, PhD 1980, Northern Illinois University.

Dueck, Colin, Associate Professor of Political Science. BA 1990, MA 1993, University of Saskatchewan; MPhil 1995, Oxford University; PhD 2001, Princeton University.

Dukes, E. Franklin, Research Faculty, Conflict Analysis and Resolution. BA 1975, University of Virginia, MS 1988, PhD 1992, George Mason University.

Dumas, Theodore, Assistant Professor of Molecular Neuroscience. BS 1991, University of Connecticut; MS 1996, PhD 1997, University of Virginia.

Dunham, Nancy, Assistant Director of Master’s Student Services, School of Public Policy. BA/BBA 2000, The College of William and Mary; MS 2005, Northwestern University.

Dunne, Kelly B., Term Assistant Professor of Integrative Studies. BA 1991, College of William and Mary; MA 1997, George Mason University.

Duric, Zoran, Associate Professor, Computer Science. BS 1982, MS 1986, University of Sarajevo, Bosnia and Herzegovina; PhD 1995, University of Maryland.

Dutta, Amitava, Chair, Information Systems and Operation Management and Eakin Chair in E-Commerce, Professor of Decision Sciences and Operations Management. BS 1976, Indian Institute of Technology; MS 1978, University of California, Santa Barbara; PhD 1981, Purdue University.

Duxbury, Thomas, Research Professor of Physics. BS 1965, MS 1966, Purdue University.

Dworzecka, Maria, Professor of Physics and Astronomy, Senior Associate Dean, Academic Planning and Facilities, College of Science. MSc 1954, PhD 1969, Warsaw University, Poland.

Dyre, Leslie S., Director, Finance and Human Resources, College of Humanities and Social Sciences. BS 1980, University of Virginia; CPA 1980.

E

Earley, Penelope McGraw, Professor of Education Policy. BA 1967, University of Michigan; MEd 1984, University of Virginia; PhD 1994, Virginia Polytechnic Institute and State University.

Eby, Kimberly K., Associate Provost for Educational Improvement and Innovation; Director, Center for Teaching Excellence; Associate Professor, New Century College; Affiliate, Department of Psychology. BA 1989, Indiana University; MA 1992, PhD 1996, Michigan State University.

Eck, Elizabeth C., Assistant Dean, Graduate Program Management, School of Public Policy. BS 1993, Georgetown University; MA 1998, University of London.

Eckenwiler, Lisa, Associate Professor of Philosophy, Associate Professor of Health Administration and Policy, Director of Health Care Ethics. BA 1989, University of Wisconsin, Madison; MA 1991, PhD 1997, University of Tennessee, Knoxville.

Edwards, Cody, Assistant Professor, Environmental Science and Policy. BS 1995, MS 1997, Angelo State University; PhD 2000, Texas Tech University.

Ehrlich, Robert, Professor of Physics and Chair, Department of Physics and Astronomy. BS 1959, Brooklyn College; PhD 1964, Columbia University.

Ellsworth, Robert Waldo, Professor of Physics and Astronomy. BS 1960, Yale University; PhD 1966, University of Rochester.

Elston, Ken D., Associate Professor of Theater. BA 1988, Temple University; MFA 1996, Ohio State University.

Emelianenko, Maria, Assistant Professor of Mathematical Sciences. BS 1999, MS 2001, Moscow State University; MA 2002, PhD 2005, Pennsylvania State University.

Emerson, Jill V., Assistant Dean of Student Services, School of Public Policy. BA 1995, George Mason University; MSW 2000, Virginia Commonwealth University.

Endebrock, Robert N., Director, Facilities Construction. BS 1962, Tulane University; MS 1968, Pennsylvania State University.

Endress, Edgar, Assistant Professor, Art and Visual Technology. BS 1992, Universidad Tecnologica Metropolitana, Chile; BA 1997, Artes de las Comunicaciones, Chile; MFA 2001, Syracuse University.

Entrikin, Richard Lee, Associate Professor of Marketing. BA 1966, Western Illinois University; MS 1967, Northern Illinois University; PhD 1976, St. Louis University.

Ephraim, Yariv, Professor, Electrical and Computer Engineering. BSc 1977, MSc 1979, DSc 1984, Technion, Haifa, Israel.

Ericson, Carolyn, Assistant Professor, Physics and Astronomy. BA 1969, Clark University; MSW 1973, PhD 1998, University of Maryland.

Ericson, Rebecca J., Term Instructor, Physics and Astronomy. BA 1970, Macalester College; MS 1975, Creighton University.

Ermler, Walter, Research Professor, Academic Administrative and Student Services. BS 1969, Northern Illinois University; MS 1970, PhD 1972, Ohio State University; Master of Engineering 1989, Stevens Institute of Technology.

Esherick, Craig R., Assistant Professor of Sport Management. BSBA 1978, JD 1982, Georgetown University.

Esposito-Smythers, Christianne, Assistant Professor, Psychology. PhD 2000, Virginia Polytechnic Institute and State University.

Evans, Cathy, Director, Summer Term. BS 2001, George Mason University; MBA 2006, Walden University.

Evmenova, Anna S., Research Assistant Professor. BA 2001, MA 2001, Saratov State University; MAEd 2003, East Carolina University; PhD 2008, George Mason University.

Ewell, Mary S., Term Instructor of Physics and Astronomy. BS 1994, George Mason University.

F

Fahey, Sheryl, Technical Assistance Specialist. BS 1971, Syracuse University; MA 1972, George Washington University.

Fairclough, Ian, Catalog/Metadata Librarian. BA 1972, University of Liverpool; MA 1977 University of Toronto; MPhil 1985, Columbia University; MLS 1989, Queen College, City University of New York.

Falcon, Sandra, Term Assistant Professor of Spanish. MS 1999, PhD 2004, Georgetown University.
Falconer, Allan, Professor, Geography. BS 1965, PhD 1970, University of Durham, Institute of Education, United Kingdom.

Falconer, Renee, Associate Professor of Education. BEd, University of Durham, Institute of Education, United Kingdom; MEd 1987, University of South Carolina; PhD 1998, Utah State University.

Falen, Douglas, Assistant Professor, Sociology and Anthropology. BA 1992, Emory University; PhD 2003, University of Pennsylvania.

Fang, Adriane, Term Assistant Professor of Dance. BA 1994, University of Wisconsin, Steven’s Point.

Fanshaw, Charles W., Director, Facilities Administration. BS 1982, Virginia Military Institute; ME 1990, University of Florida.

Farina, John, Associate Professor of Religious Studies. BA 1972, Vassar College; MD 1976, Yale University; PhD 1979 Columbia University; JD 1996, New York University School of Law.

Farnsworth, Steve, Assistant Professor of Communication BA 1983, Dartmouth College; BA 1990, University of Missouri; MA 1993, PhD 1997, Georgetown University.

Farrell, Peter J., Director, Business Development, The Volgenau School of Information Technology and Engineering. BS 1979, MBA, 1985, George Mason University.

Fauntroy, Michael K., Assistant Professor, School of Public Policy. BA 1988, Hampton University; MA 1993, PhD 2001, Howard University.

Feerick, Peggy, Associate Professor of Art and Visual Technology. BFA 1976, Rochester Institute of Technology; MA 1980, MFA 1989, University of New Mexico.

Fenza, David W., Executive Director, Association of Writers and Writing Programs. MA 1978, MFA 1981, University of Iowa.

Ferri, Michael G., Eminent Scholar, Professor of Finance. AB 1967, Xavier University; MA 1969, University of Notre Dame; PhD 1975, University of North Carolina, Chapel Hill.

Ferrin, Marshall, Director, International Business Development, School of Public Policy. MA 1978, American University.

ffolliott, Sheila, Professor of Art History. AB 1967, Vassar College; PhD 1979, University of Pennsylvania.

Finkelstein, James H., Vice Dean and Professor of Public Policy. BS 1974, Miami University; MA 1977, PhD 1980, Ohio State University.

Finn, Andrew, Term Associate Professor, Communication. BS 1972, St. John Fisher College; MA 1977, State University of New York, Geneseo; MA 1981, PhD 1983, Washington University, St. Louis.

Fischer, Klaus Gunter, Professor of Mathematical Sciences; Chair, Department of Mathematical Sciences. BS 1966, Lafayette College; MA 1968, Syracuse University; PhD 1973, Northwestern University.

Flagel, Andrew, Associate Vice President for Enrollment Development; and Dean, Admissions. BA 1990, MA 1994, George Washington University; PhD 2008, Michigan State University.

Flagel, Jennifer R., Director of Technical Projects, Office of the Provost. BBA/MBA 1997, University of Michigan, Flint.
Flannery, Aimee, Associate Professor, Civil, Environmental, and Infrastructure Engineering. BS 1993, MS 1994, Wayne State University; PhD 1998, Pennsylvania State University.

Fleck, Daniel, Instructor, Computer Science. BS 1997, University of Texas; MS 2001, George Mason University.

Flinn, Jane M., Associate Professor of Psychology. BA 1960, Oxford University; MS 1962, University of California; PhD 1969, Catholic University of America; PhD 1974, George Washington University.

Fontana, Judith L., Technical Assistance Specialist, Kellar Institute for Human disAbilities. BA 1969, Niagara University; MEd 1973, University of Rochester; PhD 2003, George Mason University.

Forcier, Mary Frances, Director, Colonial Academic Alliance. BA 1983, Lehigh University; MS 1989, PhD 2005, Carnegie Mellon University.

Ford, Martin Eugene, Senior Associate Dean and Professor of Education. BS 1975, Pennsylvania State University; PhD 1980, University of Minnesota.

Forkner, Rebecca, Assistant Professor, Environmental Science and Policy. BS 1993, University of Cincinnati; PhD 1998, University of Georgia.

Fortney, Amanda, Research Associate, Center for Bioresource Development. BS 2001, George Mason University.

Foster, Gregory D., Professor of Chemistry. BS 1978, University of California, Davis; MS 1981, California State University, Hayward; PhD 1985, University of California, Davis.

Foster, John Burt, Jr., University Professor of English. BA 1967, Harvard University; MPhil 1971, PhD 1974, Yale University.

Fox, Donna M., Associate Dean, Office for Academic Integrity, University Life. BS 1985, Kansas State University; MS 1992, George Mason University.

Fox, Rebecca, Associate Professor of Education. AB 1972, Randolph-Macon Women’s College; MA 1993, PhD 1999, George Mason University.

Frazier, Wendy, Assistant Professor of Education. BA 1992, Rice University; MEd 1997, University of Houston; EdD 2001, Columbia University.

Frederick, Helen, Professor of Art and Visual Technology. BFA 1967, MFA 1969, Rhode Island School of Design.

Freeman, Elizabeth, Assistant Professor, New Century College. BS 1992, Vanderbilt; MS 2000, Virginia Commonwealth University; PhD 2005, George Mason University.

Frendak-Blume, Allison, Assistant Dean of Admissions. BA 1989, Seton Hall University; MA 1998, Montclair State University; PhD 2004, George Mason University.

Frenn, Chawky, Associate Professor of Art and Visual Technology. BFA 1985, Massachusetts College of Art; MFA 1988, Temple University.

Friedley, Sheryl Ann, Professor, Communication. BS 1971, MA 1972, Ball State University; PhD 1977, Purdue University.

Fritschler, A. Lee, Professor of Public Policy. BA 1959, Union College; MPA 1960, Syracuse University; PhD 1965, Maxwell School of Citizenship and Public Affairs, Syracuse University.

Froman, Wayne J., Associate Professor, Philosophy. BA 1966, Yale University; MA, PhD 1975, Fordham University.

Fryxell, Karl J., Associate Professor of Biology. BA 1975, BS 1975, University of Texas, Austin; PhD 1983, California Institute of Technology.

Fu, Shimin, Research Assistant Professor, Psychology. BS 1991, Beijing Normal University; MS 1994, Chinese Academy of Sciences; PhD 1998, University of Science and Technology of China.

Fuchs, Cynthia J., Associate Professor of English. BA 1984, MA 1985, University of Pennsylvania; PhD 1989, University of Connecticut.

Fujiwara, Manako, Term Assistant Professor of Japanese. MA 1993, Arkansas State University; PhD 2004, University of Minnesota.

Fulcher, Amie, Director of Academic Operations. BS 1985, East Carolina University; MEd 1997, PhD 2007, George Mason University.

Fuller, Stephen F., University Professor of Public Policy; Dwight C. Schar Endowed Faculty Chair; Director, Center for Regional Analysis. BA 1962, Rutgers University; MCP 1964, University of Mississippi; PhD 1969, Cornell University.

Fyfe, Laura, Term Assistant Professor of French. BA 1992, MA 1994, Syracuse University; PhD 2003, University of Illinois, Urbana-Champaign.

Gabel, Michael Randy, Associate Professor of Interdisciplinary and Integrative Studies; Associate Professor of Mathematical Sciences. BS 1965, Massachusetts Institute of Technology; MA 1968, PhD 1972, Brandeis University.

Gaffney, Kathleen F., Professor of Nursing. BS 1967, St. Joseph College; MS 1971, PhD 1984, University of Maryland.

Gaj, Krzysztof, Associate Professor, Electrical and Computer Engineering. MS 1988, PhD 1992, Warsaw University of Technology.

Gallagher, Catherine A., Associate Professor, Administration of Justice. BA 1991, College of Wooster; MA 1996, PhD 2000, University of Maryland.

Gallehr, Donald Raymond, Associate Professor of English. BA 1964, St. Bonaventure University; MA 1966, Fordham University; PhD 1974, Catholic University of America.

Galluzzo, Gary R., Dean, College of Education and Human Development; Professor of Education. BA 1973, Utica College; MS 1975, PhD 1983, Syracuse University.

Ganesan, Rajesh, Assistant Professor, Systems Engineering and Operations Research. BS 1996, National Institute of Technology, India; MS 2002, MA, PhD 2005, University of South Florida.

Ganley, Kristine F., TTAC Early Childhood Coordinator. BS 1967, University of Maryland, MEd 1989, George Mason University.

Gantz, Donald Thomas, Professor and Chair, Applied Information Technology. AB 1966, Fordham University; MA 1971, PhD 1974, University of Rochester.

Gao, Yuan, Assistant Professor, Finance. BS 1995, Wuhan University; MS 1998, MA 2004, PhD 2005 Cornell University.

Gardner, James E., Chair, Department of Music, Professor of Music. BM 1975, Oklahoma City University; MM 1978, DMA 1982, Southwestern Baptist Theological Seminary.
Garner, Pamela W., Associate Professor, New Century College. BSW 1982, University of Tennessee; MA 1988, University of Houston; PhD 1992, Texas A&M University.

Gaston, Whitney, Academic Advisor and Term Instructor, Student Affairs, College of Health and Human Services. BA 1990, MPH 1993, University of South Florida.

Gentle, James, University Professor, Computational and Data Sciences and Statistics. BS 1966, University of North Carolina; MA 1969, Louisiana State University; MCS 1973, PhD 1974, Texas A&M University.

Gentry, Anne G., Associate University Counsel. BA 1991, College of William and Mary; 1994 JD, George Mason University.

George, Cindy L., Instructor of Education. BA 1979, Peabody College.

Gerard, Andrew L., Director, Men’s and Women’s Track and Field. BS 1992, Colgate University.

Gerber, Naomi Lynn H., University Professor and Director, Center for the Study of Chronic Illness and Disability. BA 1965, Smith College; MD 1971, Tufts University School of Medicine.

Gerber, Steven, Reference and Liaison Librarian, University Libraries. BA 1973, University of Minnesota, Duluth; MA 1975, University of California, San Diego; MLS 2003, University of Buffalo.

Gero, Edward, Associate Professor of Theater. BA 1976, Montclair State College.

Gewa, Constance, Assistant Professor of Global and Community Health. BS 1994, Egerton University, Kenya; MS 1998, University of Nairobi, Kenya; MPH 2003, PhD 2006, University of California, Los Angeles.

Gibson, J. Craig, Associate University Librarian for Public Services. BA 1976, West Texas State University; MA 1980, University of Mississippi; MA 1984, University of Denver.

Gibson, Timothy A., Associate Professor, Communication. BA 1992, Evergreen State College; MA 1995, University of Massachusetts; PhD 2001, Simon Fraser University.

Gifford, Jonathan L., Professor of Government and Politics and Associate Dean for Research and Development. BS 1976, Carnegie Mellon University; MS 1979, PhD 1983, University of California, Berkeley.

Gilbert, Paula Ruth, Professor of French, Canadian and Women and Gender Studies. BA 1967, New York University; MA 1969, PhD 1973, Columbia University.

Gillette, Brian, Coordinator and Term Instructor, Student Affairs, College of Health and Human Services. BS 1992, Radford University; MEd 2002, George Mason University.

Gillette, Kathy, Director of Classroom Technologies. BS 1978, George Mason University.

Gilleveet, Patrick M., Affiliate Professor, Bioinformatics and Computational Biology; Associate Professor of Environmental Science and Policy. BS 1976, University of Toronto; PhD 1982, University of Manitoba.

Gilmore, Michael, Assistant Professor, New Century College. BS 1995, Colorado State University; PhD 2005, Miami University.
Gliozzi, Mario, Assistant Professor, Physics. Laurea 1994, PhD 1999, Torino University, Italy.

Goldberg, C. Noel, Program Manager, Center for the Advancement of Public Health. BA 1993, MS 1995, West Virginia University.

Goldin, Mark G., Associate Professor of Spanish. BS 1965, PhD 1968, Georgetown University.

Goldin, Rebecca F., Associate Professor of Mathematical Sciences. BA 1993, Harvard University; PhD 1999, Massachusetts Institute of Technology.

Goldman, Neil, Associate Professor, Physics and Astronomy; Associate Professor of Mathematical Sciences. BS 1962, College of the City of New York; MS 1964, University of Nebraska; PhD 1982, Rensselaer Polytechnic Institute.

Goldstone, Jack A., Hazel Professor of Public Policy and Director, Center for Global Policy, School of Public Policy. BA 1976, MA 1979, PhD 1981, Harvard University.

Gomaa, Hassan, Professor and Chair, Computer Science. BSc 1967, University College, London University; DIC 1968, PhD 1976, Imperial College, London University.

Gomez, Richard B., Research Professor, Computational and Data Sciences, and Earth Systems and Geoinformation Sciences. PhD 1976, New Mexico State University.

Gomez-Moran, Dolores, University Ombudsman. BA 1987, University of Oviedo, Spain; MA 1990, Boston College.

Goodale, Mark, Assistant Professor of Conflict Analysis and Resolution. BA 1990, University of California, Los Angeles; MSe 1991, London School of Economics; JD 1994, University of the Pacific, McGeorge School of Law; LLM 1998, University of Wisconsin Law School; PhD 2001, University of Wisconsin.

Goodman, Lisa Y., Director, Women’s Business Center. BS 1992, Clemson University; MA 1997, Webster University.

Goodwin, Stephen Hardy, Professor of English. AB 1965, Harvard University; MA 1969, University of Virginia.

Gopin, Marc, James H. Laue Professor of World Religions, Diplomacy, and Conflict Resolution. BA 1979, Columbia University; MA 1988, PhD 1992, Brandeis University.

Gorrell, Jeffrey, Professor of Education, College of Education and Human Development. BA 1968, Vanderbilt University; MA 1970, PhD 1975, University of Florida.

Gorreta, Francesco, Term Research Associate, Center for Bioresource Development. BS 2000, University of Milan, Italy.

Gorski, Paul, Assistant Professor of Interdisciplinary and Integrative Studies, New Century College. BA 1994, MEd 1995, PhD 1998, University of Virginia.

Gould, Jon B., Associate Professor, Administration of Justice. AB 1985, University of Michigan; JD/MPP 1989, Harvard University; PhD 1999, University of Chicago.

Graff, Heidi, Director, Mason LIFE Program. BS 1986, State University of New York; MA 1987, Long Island University; PhD 2007, George Mason University.

Granfield, Patricia G., Term Instructor, Department of Mathematical Sciences. BA 1972, Swarthmore College; JD 1978, University of Virginia School of Law; MS 2003, George Mason University.

Grant, Geraldine M., Associate Professor, Biology. BA 1987, Trinity College, Ireland; PhD 1993, Dublin City University, Ireland.
Grant, Rachel, Associate Professor of Education. BA 1973, Howard University; MA 1977, University of the District of Columbia; PhD 1990, University of Maryland.

Gray, Laurel, Instructor of Dance. BA 1975, Occidental College; MA 1976, University of Waterloo.

Green, Judith A., Director, Office of International Programs and Services. B.A. 1978, University of Massachusetts, Amherst; M.Ed. 1979, Framingham State College.

Greenwood, Pamela, Research Associate Professor, Psychology. BS 1969, University of Illinois; PhD 1977, State University of New York, Stony Brook.

Greet, Michele, Assistant Professor, History and Art History. BA 1993, Bowdoin College, MA 1998, City University of New York, Hunter College; PhD 2004, New York University.

Grefenstette, John J., Professor, Bioinformatics and Computational Biology. BS 1975, Carnegie Mellon University; PhD 1980, University of Pittsburgh.

Gregg, Christopher A., Term Assistant Professor, Art History. BA 1989, University of Georgia; MA 1991, PhD 2000, University of North Carolina, Chapel Hill.

Griffiths, Lloyd J., Dean, The Volgenau School of Information Technology and Engineering. BS 1963, University of Alberta; MS 1965, PhD 1968, Stanford University.

Gring-Pemble, Lisa, Associate Professor, New Century College. BA 1992, St. Olaf College; MA 1996, PhD 2000, University of Maryland, College Park.

Griva, Igor, Assistant Professor of Mathematical Sciences. BS 1993, MS 1994, Moscow State University; PhD 2002, George Mason University.

Grogan-Barone, Barbara, Lecturer of English. BA 1971, LaSalle University; MA 1976, Purdue University.

Grotophorst, C. Wally, Associate University Librarian for Automated Systems, University Libraries. BA 1976, Western Carolina University; MLS 1977, University of Tennessee, Knoxville; MA 1982, Central Michigan University.

Guagnano, Gregory, Associate Professor of Sociology. BS 1971, Pennsylvania State University; PhD 1986, University of California, Davis.

Guardia, Juan, R., Assistant Director, Diversity Programs and Services. BS 1997, MS 2001, Florida State University.

Guessford, Jesse, Assistant Professor, Department of Music. BS 1995, West Chester University; MM 1997, Crane School of Music, State University of New York, Potsdam; DMA 2006, University of Illinois.

Guilford, Renate H., Assistant Provost for Enrollment, Planning, and Administration. MA 1995, George Mason University.

Guillory, John, Senior Contract Professor of Computational Sciences and Informatics and Space Sciences. BS 1962, Rice University; PhD 1970, University of California.

Gusterson, Hugh, Professor of Anthropology. BA 1980, Cambridge University; MA 1982, University of Pennsylvania; PhD 1992, Stanford University.

H

Haack, Barry Norbert, Professor of Geographic and Cartographic Sciences. BS 1969, University of Wisconsin; MA 1972, San Diego University; PhD 1977, University of Michigan.
Habib, Anna S., Term Assistant Professor, English. BA 2003, MFA 2006, George Mason University.

Habila, Helon, Assistant Professor, English. BA 1995, University of Jos; PhD 2006, University of East Anglia.

Hackler, Darrene L., Associate Professor of Government and Politics. BA 1992, Albertson College of Idaho; MA 1996, PhD 2000, Claremont Graduate University.

Haddad, Bassam, Assistant Professor, Department of Public and International Affairs. BA 1992, George Mason University; MA 1994, PhD 2002, Georgetown University.

Haddock, Jorge, Dean School of Management. BS 1978, University of Puerto Rico; MS 1979, Rensselaer Polytechnic Institute; PhD 1981, Purdue University.

Hadley, Jack, Professor of Health Administration and Policy. BA 1968, Brandeis University; PhD 1975, Yale University.

Haegele, Tennille J., Assistant Director of Graduate Admissions, School of Public Policy. BA 1999, Minnesota State University; MA 2003, San Diego State University.

Hahn, Joyce, Term Assistant Professor of Nursing. BS 1976, Mercy College; BSN 1982, State University of New York; MSN 1997, PhD 2004, George Mason University.

Haines, David W., Professor of Anthropology. BA 1971, Denison University; MA 1973, PhD 1976, American University.

Haley, Marjorie H., Professor of Education. BS 1974, Hampton Institute; MEd 1976, Towson State University; PhD 1986, University of Maryland.

Hall, Lena (Libby), Professional Development Initiatives Coordinator. BA 1970, University of Alabama; MEd 1979, University of Hawaii; EdD 1988, Virginia Polytechnic Institute and State University.

Hallows, Karen, Academic Director, Executive Programs, Associate Professor of Finance, School of Management. BS 1973, Central Missouri State; MAT 1984, Purdue University; PhD 1988, University of Nebraska.

Hamdani, Sumaiya A., Associate Professor of History. BA 1984, Georgetown University; MA 1989, PhD 1995, Princeton University.

Hamner, Christopher H., Assistant Professor, History and Art History. AB 1995, Dartmouth College; MA 1998, PhD 2004, University of North Carolina, Chapel Hill.

Hanley, Mary, Assistant Professor of Education. BA 1975, MEd 1987, PhD 1998, University of Washington.

Hannan, Heather Groves, Prince William Campus Librarian, University Libraries. BA 1975, University of Virginia; MA 1990, MLS 1994, Catholic University of America.

Hanrahan, Nancy Weiss, Director, Women and Gender Studies, Associate Professor of Sociology. BA 1976, Wesleyan University; MA 1989, PhD 1994, New School for Social Research.

Hanson, Robin D., Associate Professor of Economics. BS 1981, University of California, Irvine; MS, MA 1984, University of Chicago; PhD 1997, California Institute of Technology.
Hanweck, Gerald Alfred, Professor of Finance. BA 1964, Stanford University; MA 1967, PhD 1971, Washington University, St. Louis.

Harber, Linda, Associate Vice President for Human Resources and Chief Human Resources Officer. BA 1974, Indiana University; MS 1978, University of Kansas.

Harbour, Frances V., Associate Professor of Government and Politics. BA 1975, Barnard College; MA 1977, PhD 1986, Columbia University.

Hardiman, William R., Director, Purchasing and Accounts Payable. BS 1975, MPS 1990, Western Kentucky University.

Hardy, Shanon, Assistant Professor of Education. BEd 1972, University of South Florida; MEd 1974, University of Miami; PhD 2001, George Mason University.

Hare, Heather, Associate Director, Center for Leadership and Community Engagement. BA 1988, MA 1989, Columbia University; MS 2004, George Mason University.

Harlan, Stephen S., Associate Professor of Geology. BS 1980, Evergreen State College; MS 1986, Montana State University; PhD 1992, University of New Mexico.

Harr, David J., Senior Associate Dean, School of Management. BBA 1968, University of Wisconsin, Madison; MS 1969, Naval Postgraduate School; PhD 1978, University of Wisconsin, Madison; CPA, Virginia.

Hart, David, Associate Professor. BA 1983, Wesleyan University; PhD 1995, Massachusetts Institute of Technology.

Harvey, Diane Hollern, Term Assistant Professor of Government and Politics. BA 1993, Frostburg State University; MA 1995, PhD 1998, University of Maryland.

Harvey, Tamara, Assistant Professor, English. BA 1988, Harvard University; MA 1991, University of Wisconsin, Madison; PhD 1998, University of California, Irvine.

Harvey, James William, Chair and Associate Professor of Marketing. BS 1966, University of Illinois, Urbana-Champaign; MBA 1968, University of Miami; PhD 1977, Pennsylvania State University.

Hathaway, Dawn, Instructor of Education. BS 1986, Purdue University; MEd 2003, George Mason University.

Hatton, Kimi S., Term Associate Professor of Chemistry. BS 1979, George Mason University; PhD 1983, Ohio State University.

Hawk, Byron K., Associate Professor, English. BA 1990, MA 1995, PhD 2000, University of Texas, Arlington.

Haynes, Christine, Term Faculty, Communication. BA 2004, George Mason University; MA 2007, Texas State University, San Marcos.

Haynes, Kingsley E., Ruth D. Hazel and John T. Hazel, M.D. Faculty Chair in Public Policy; Eminent Scholar, Professor and Dean, School of Public Policy. BA 1964, Western Michigan University; MA 1965, Rutgers University; PhD 1971, Johns Hopkins University.

Hazen, Robert M., Robinson Professor of Earth Sciences. BS 1970, SM 1971, Massachusetts Institute of Technology; PhD 1975, Harvard University.

Heclo, Hugh, Robinson Professor of Public Affairs. AB 1965, George Washington University; MA 1967, Manchester University, England; PhD 1970, Yale University.

Heerschap, Marcelle, Dean, Student Academic Affairs and Advising. BA 1977, Brock University; MA 1980, University of South Florida.

Heineman-Pieper, Jessica, Assistant Professor, School of Public Policy. BA 1994, Oxford University; MA 1997, PhD 2005, University of Chicago.

Heiner, Ronald A., Professor of Economics. PhD 1975, University of California, Los Angeles.

Heishman, Ricci, Term Assistant Professor, Computer Science. BS 1982, University of Cincinnati; MS 1997, American University; PhD 2007, George Mason University.

Henderson, Thomas (Tim), Term Instructor of Health Administration and Policy. BA 1974, North Carolina State University; MS 1979, University of North Carolina; MA 1986, University of Florida.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.

Hennessey, James T., Jr., Chief of Staff. BA 1965, MPA 1973, Eastern Kentucky University; PhD 1997, George Mason University.
Hodges, Devon Leigh, Professor of English; Associate Director of the Honors Program in General Education. BA 1972, University of California, Berkeley; MA 1977, PhD 1979, SUNY, Buffalo.

Hodzic, Saida, Associate Professor, Women and Gender Studies. MA 2002, Cologne University, Germany; PhD 2006, University of California, Berkeley.

Hoffmann, Beth, Assistant Professor, English. BA 2002, University of Notre Dame; C Phil 2006, PhD 2008, University of California, Berkeley.

Holisky, Dee Ann, Senior Associate Dean, College of Humanities and Social Sciences; Associate Professor of English. BA 1969, MA 1974, PhD 1980, University of Chicago.

Holm, Claudia C., Head, Copyright Resources Office and Sociology/Anthropology Liaison Librarian. BA 1979, Florida State University; MA 1986, MLIS 1989, Louisiana State University.

Holleman, Willem, F.S., Term Research Scholar, School of Public Policy. BS 1980, Utrecht University; MS 1985, Erasmus University.

Holman, Emmett Lou, Associate Professor of Philosophy. BS 1963, Pennsylvania State University; MA 1967, PhD 1973, University of Maryland.

Holmes, Kevin, Director of Undergraduate Recruitment, Office of Admissions. BS 2002, MS 2007, George Mason University.

Holt, Cynthia, Head, Collection Development and Preservation. BS 1991, St. Francis Xavier University; MLIS 1993, University of Western Ontario.

Holt, Mack P., Professor of History. BA 1971, MA 1973, Georgia State University; PhD 1982, Emory University.

Honeychurch, Robert V., Associate Professor of Chemistry. BS 1977, Ohio State University; MS 1982, PhD 1984, Michigan State University.

Hoover, Catherine M., Director, Prince William Professional Center, Office of Continuing Professional Education. MA 1986, Virginia Polytechnic Institute and State University.

Hopson, Mark C., Assistant Professor, Communication. BS 1993, Western Michigan University; MA 2002, PhD 2005, Ohio University.

Hosek, Timothy J., Instructor of Geography. BA 1984, State University of New York, Stony Brook; MS 2004, George Mason University.

Houck, Mark H., Professor, Civil, Environmental, and Infrastructure Engineering. BES 1972, PhD 1976, Johns Hopkins University.

Houser, Daniel E., Professor, Economic Science Laboratory. BA 1989, University of Wisconsin, Madison; PhD 1998 University of Minnesota.

Houser, Paul, Associate Professor, Climate Dynamics. BS 1992, PhD 1996, University of Arizona.

Howell, Keith, Associate Dean for Research and Program Evaluation; Professor of Global and Community Health. BS 1967, Pikeville College; MA 1968, Eastern Kentucky University; PhD 1973, University of Toledo.

Howell, Peter, Jr., Research Assistant Professor, Shared Research Instrumentation Facility. BA 1990, Cornell University; PhD 2002, Florida State University.

Hruby, Alison H., Assistant Professor of Education. BS 1991, State University of New York, Plattsburgh; MA 1997, Hofstra University; PhD 2002, University of Georgia.

Hsieh, Jim, Associate Professor, Finance. BS 1991, National Chiao Tung University, Taiwan; MBA 1996, University of Rochester; MS 1997, Carnegie Mellon University; PhD 2002, Ohio State University.

Hsu, Vernon, Professor of Information Systems and Operations Management. BS 1982, Fujian Normal University; MA 1989, PhD 1993, University of Iowa.

Huang, Bohua, Associate Professor, Climate Dynamics. BS 1982, MS 1985, Peking University; PhD 1992, University of Maryland.

Huang, Mei-Ling, Assistant Director, English Language Institute. BA 1961, National Taiwan University; MA 1970, University of Hawaii, Manoa.

Hubler, Sandy, Vice President, University Life. BA 1980, College of Wooster; MA 1983, Ohio State University; EdD 1998, University of San Francisco.

Hudgins, Nicole, Postdoctoral Teaching Fellow, History and Art History. BA 1996, Northwestern University; MA 1998, PhD 2003, University of Virginia.

Hughes, Joy R., Vice President for Information Technology. PhD 1990, Union Institute.

Hughes Hallett, Andrew, Professor of Public Policy and Economics. BA 1969, University of Warwick; MSc 1971, London School of Economics; DPhil 1976, University of Oxford (Nuffield College).

Huheey, Cynthia A., Director, OCPE Herndon. BS 1969, MS 1971, Purdue University.

Humbertson, Donald, Lecturer of English. BA 1970, MA 1975, University of Maryland; DAEd 1988, George Mason University.

Hunt, Dennis J., Affiliate Professor of Psychology. BA 1969, University of Texas, Austin; MPhil 1986, PhD 1988, George Washington University.

Hurley, Michael E., Term Assistant Professor of Psychology, Undergraduate Advisor. BA 1984, Hofstra University; MA 1988, College of William and Mary; PhD 1993, University of Miami.

Hussam, Abul, Professor of Chemistry. BSc 1975, MSc 1976, University of Dacca; PhD 1982, University of Pittsburgh.

Hussein, Khaled, Term Assistant Professor of Geography. BS 1981, MS 1988, PhD 1994 University of Minia, Egypt.

Hutchison, James, Assistant Professor, DMIS. BS 1972, Louisiana State University; MBA 1982, PhD 1990, University of Houston.

Hwang, David D., Assistant Professor, Electrical and Computer Engineering. BS 1997, MS 2001, PhD 2005, University of California, Los Angeles.

Hwang, Hyun-Min, Postdoctoral Research Scientist, Chemistry. BS 1993, MS 1995, Hanyang University, Korea; PhD 2001, Texas A&M University.

Hylton, Constance Malone, Instructor of Accounting. BS 1972, Virginia Polytechnic Institute and State University; MBA 1981, Arizona State University.
Iannaccone, Laurence R., Professor of Economics. BS 1975, Stanford University; MS 1977, MA 1982, PhD 1984, University of Chicago.

Ihara, Emily, Assistant Professor of Social Work. AB 1990, University of California, Berkeley; MSW 1993, University of California, Los Angeles; MA 2002, PhD 2005, Brandeis University.

Ingram, Karen, Coordinator LIFE Program. BIS 2001, George Mason University.

Ioannou, D.E., Professor, Electrical and Computer Engineering. BS 1974, University of Thessaloniki; MS 1975, PhD 1978, University of Manchester.

Isenberg, Joan P., Associate Dean and Professor of Education. BS 1963, MS 1968, Wheelock College; EdD 1978, Rutgers University.

Islam, Khondkar, Instructor of Applied Information Technology. BS 1988, George Mason University; MS 1992, American University.

Jackson, Corey, Director, Equity and Diversity Services and Assistant to the President. BS Virginia Polytechnic Institute and State University; JD University of Miami School of Law.

Jacobs, Mark D., Associate Professor of Sociology. BA 1968, Columbia College, Columbia University; MA 1977, PhD 1987, University of Chicago.

Jafri, M. Saleet, Professor, Chair, Department of Bioinformatics and Computational Biology. BS 1986, Duke University; MS 1988, New York University; PhD 1993, City University of New York, Mount Sinai School of Medicine.

Jajodia, Sushil, Professor, Applied Information Technology. BA 1969, MS 1971, Southern Illinois University; PhD 1977, University of Oregon.

Jaju, Anupam, Associate Professor, Marketing. BE 1994, Regional Engineering College, India; MTech 1996, Indian Institute of Technology, India; PhD 2002, University of Georgia.

Jamison, D. Curtis, Affiliate Faculty, Bioinformatics and Computational Biology. BA 1985, University of Colorado, Boulder; PhD 1992, University of Denver.

Jang, Soojin, Instructor of Education. BA 1997, Seoul Women’s University; MEd 2006, Dankook University.

Jann, Rosemary, Professor of English. BA 1971, Duke University; MA 1972, PhD 1975, Northwestern University.

Jazaeri, Amin, Assistant Professor, Physics and Astronomy. BS 1991, George Mason University; MS 1994, University of Southern California; MS 1996, PhD 2007, George Mason University.
Jenemann, Laura, Media Services/Film Studies Liaison Librarian. BA, Temple University; MLIS, Drexel University.

Jeong, Ho-Won, Professor of Conflict Resolution. BA 1981, Hankuk University; MA 1988, PhD 1993, Ohio State University.

Jerome, Marci Kinas, Assistant Professor of Education. BS 1999, College of New Jersey; MEd 2001, PhD 2008, George Mason University.

Jin, Emilia K., Research Assistant Professor of Climate Dynamics. PhD 2005, Seoul National University.

Johnsen-Neshati, Kristin, Dramaturg/Artistic Associate, Theater of the First Amendment, College of Visual and Performing Arts; Associate Professor of Theater. BA 1987, Swarthmore College; MFA 1992, DFA 2002, Yale School of Drama.

Johnson, Devon, Assistant Professor, Administration of Justice. BA 1994, University of California, Santa Cruz; MA 1996, PhD 2002, University of California, Los Angeles.

Johnson, Noel, Assistant Professor of Economics, BA 1995, PhD 2004 Washington University, St. Louis.

Johnson, Susan, Director, Hemlock Overlook. BS 1979, University of North Carolina; MS 1982, Pennsylvania State University.

Johnson, Twila, Term Assistant Professor, English. BA 2005, Oklahoma Baptist University; MFA 2008, George Mason University.

Johnson, Wallace, Director, Mentor-Protege Program, the Mason Enterprise Center for Regional Analysis and Entrepreneurship, School of Public Policy. BSc 1961, University of Oklahoma; MBA 1973, Alabama A&M University.

Johnston, Joyce, Lecturer of English. BA 1969, Dickinson College; MA 1971, Emory University.

Johnston, Robert Dail, Associate Professor of Finance. BS 1966, MS 1967, PhD 1974, University of Alabama.

Johnnott, Edwin, Term Professor of Music.

Joiner, Christopher, Associate Professor, Marketing. BA 1988, Duke University; MBA 1992, Wake Forest University; PhD 1997, University of Minnesota.

Jolly, Elizabeth, Director of State Government Relations. Office of the Senior Vice President. BA, MA 1973, James Madison University.

Jonas, Robert B., Associate Professor of Environmental Science and Public Policy. BS 1971, University of Miami; PhD 1981, University of North Carolina.

Jones, Charles, Associate Professor of English. BA 1979, St. John’s College, Maryland; PhD 1985, University of Massachusetts.

Jones, Garett, Assistant Professor of Economics. BA 1992, MPA 1993, MA 1994, PhD 2000, University of California, San Diego.

Jones, Keith, Assistant Professor, Accounting. BA 1995, Brigham University; PhD 2004, University of Arizona.

Jones, R. Christian, Professor of Environmental Science and Public Policy. BA 1973, Rice University; MA 1977, Vanderbilt University; PhD 1980, University of Wisconsin.

Jones, Susan H., University Registrar. BA 1968, MEd 1971, University of Delaware; MS 1977, State University of New York College, Brockport.

Jordan, Yevette Richards, Associate Professor, Women and Gender Studies. BA 1982, College of William and Mary; MA 1988, MA 1990; MPhil 1991, PhD 1994, Yale University.
Joshi, Mahesh P., Associate Professor, Management. BS 1981, Diploma in Business Management 1984, St. Xavier’s College, India; PhD 1996, Temple University.

Joyce, James D., Assistant Professor of Dance. BFA 1983, North Carolina School of the Arts; MFA 2003, George Mason University.

Justus, Marianne D., Director, Office of Continuing Professional Education/Herndon. BA, University of British Columbia; MA 1991, Simon Fraser University of British Columbia.

K

Kabbani, Nadine, Assistant Professor, Molecular Neuroscience. BS 1997, George Mason University; PhD 2003, Pennsylvania State University.

Kaffenberger, Carol, Associate Professor of Education. BA 1967, Douglass College; MEd 1973, American University; PhD 1999, George Mason University.

Kalba, Laura, Postdoctoral Fellow, History and Art History. BA 2000, Concordia University; MA 2001, McGill University; PhD 2009, University of South Carolina.

Kalbfleisch, M. Layne, Pomata Term Professor in Cognitive Neuroscience. BA 1991, Kent State University; MEd 1995, PhD 2001, University of Virginia.

Kamenitzer, Richard, Director, Master of Arts in Arts Management; Associate Professor of Arts Management. BS 1968, MBA 1992, Seton Hall University; LLB 1971, La Salle Extension University.

Kamens, David H., Research Professor, School of Public Policy. BA 1960, Harvard College; PhD 1968, Columbia College.

Kaplan, Deborah, Chair, English; Associate Professor, English. BA 1972, Sarah Lawrence College; MA 1974, PhD 1979, Brandeis University.

Kaplan, Seth, Assistant Professor, Psychology. BS 1998, University of Florida; MS 2003, PhD 2006, Tulane University.

Kaposy, Timothy, Assistant Professor of Cultural Studies. PhD 1998, University of Virginia.

Karametou, Maria, Assistant Professor, Art and Visual Technology. BA 1974, University of Maryland; MFA 1979, Maryland Institute College of Art.

Karton, Alissa, Assistant to the Vice President, University Life. BA 1992, MA 1993, University of Rochester.

Karush, Matthew B., Director, Global Interdisciplinary Programs and Associate Professor, History and Art History. BA 1990, Columbia University; MA 1992, PhD 1997, University of Chicago.

Kashdan, Todd, Associate Professor, Psychology. BS 1996, Cornell University; MA 2000, PhD 2004, State University of New York, Buffalo.

Katona, Peter G., Professor, Electrical and Computer Engineering. BS 1960, University of Michigan; MS 1962, PhD 1965, Massachusetts Institute of Technology.

Katz, Mark N., Professor of Government and Politics. BA 1976, University of California, Riverside; MA 1978, Johns Hopkins University; PhD 1982, Massachusetts Institute of Technology.

Kaufmann, David, Associate Professor of English. AB 1980, Princeton University; PhD 1989, Yale University.
 **Keaney, Winifred Gleson**, Associate Professor of English. BA 1964, Good Counsel College; MA 1966, Duquesne University; PhD 1975, University of Maryland.

 **Keenan, Jody A.**, Director, Small Business Development Center, Center for Enterprise Research and Development, School of Public Policy. BS 1986, College of William and Mary; MBA 1990, La Salle University.

 **Keene, Deborah M.**, Director, Law Library. BA 1974, MLS 1975, Vanderbilt University; JD 1980, University of Tennessee.

 **Kehoe, Kathleen M.**, Associate Director, Development Office. BS 1969, University of Dayton; MEd 1997, DEd 2000, George Mason University.

 **Kehoe, Susan S.**, Director of Educational Media and Executive Producer, GMU-TV. BA, Illinois College; MS Northwestern University; DA 2000, George Mason University.

 **Keith, Sarah**, Assistant Professor, English. BA 1996, Bucknell University; MFA 2000, University of Iowa.

 **Keleher, Anne K.**, Technical Operations Manager, Center for Biodefense and Infectious Diseases. BS 1993, American University.

 **Kelley, Michael R.**, Executive Director, Capitol Connection; Distinguished Service Professor. BA 1962, MFA 1965, PhD 1970, Catholic University of America.

 **Kellogg, Jean**, Director of Community Arts Partnerships, College of Visual and Performing Arts. BM 1979, Florida State University; MM 1983, Westminster Choir College.

 **Kelly, Anthony Eammon**, Professor of Education. BA 1979, St. Patrick’s College, Dublin; MA 1984, California State University; PhD 1988, Stanford University.

 **Kelly, T. Mills**, Associate Dean for Enrollment Development and Associate Professor, History and Art History. BA 1981, University of Virginia; MA 1988, PhD 1996, George Washington University.

 **Kendrick, Patricia A.**, Head Coach, Women’s Volleyball. BS 1983, George Mason University.

 **Kerschberg, Larry**, Professor, Computer Science. BS 1964, Case Institute of Technology; MS 1966, University of Wisconsin; PhD 1969, Case Western Reserve University.

 **Kettlewell, Gail**, Principle, International Center for Arts Culture and Education, College of Visual and Performing Arts. BA 1961, Muskingum College; MA 1973, Old Dominion University; EdD 1985, Virginia Polytechnic Institute and State University.

 **Keyser, Randall**, Associate Professor, Center for the Study of Chronic Illness and Disability. BS 1979, MA 1981, Kent State University; PhD 1985, University of Toledo.

 **Khan, Shahamat U.**, Research Affiliate Professor, Chemistry. BSc 1957, Agra University, India; MSc 1959, Ahgarh Muslim University, India; MSc 1964, PhD 1967, Alberta University, Canada.

 **Khattab Salawdeh, Omar**, Term Assistant Professor of Arabic. BA 1990, Kuwait University; MA 1997, Universidade Estadual de Campinas; PhD 2007, Universidad de Cadiz.

 **Kianpour, Ahmad**, Lecturer of Chemistry. BS 1945, College of Technology; MS 1950, University of Oklahoma; PhD 1953, University of Colorado.

 **Kidd, Donna L.**, Associate Vice President of Budget and Planning. BA 1972, College of William and Mary; MPA 1994, George Mason University.
Kidd, Julie, Associate Professor of Education. BA 1980, University of Richmond; MEd 1992, James Madison University; PhD 1992, Virginia Polytechnic Institute and State University.

Kidd, Mark A., Associate Dean, University Life; Affiliate Professor of Higher Education. BS 1988, MBA 1989, University of Southern Mississippi; PhD 1997, University of Mississippi.

Kierner, Cynthia Anne, Professor, History and Art History. BA 1980, McGill University; MA 1982, PhD 1986, University of Virginia.

Kiley, William Thomas, Associate Professor of Mathematical Sciences. BS 1960, St. Mary’s College; PhD 1969, Brown University.

Kilmer, Claudia, Instructor, English Language Institute. BS 1975, Virginia Polytechnic Institute and State University; MEd 1996, George Mason University.

Kim, Dae Young, Assistant Professor of Sociology, BA 1991, State University of New York, Binghamton; MPhil 1998, PhD 2001, City University of New York Graduate Center.

King, Eden, Assistant Professor, Psychology. BA 2001, MA 2004, PhD 2006, Rice University.

King, Sara M., Term Assistant Professor, English. AB 1983, Cornell University; MFA 1989, University of Arkansas.

King-Sears, Margaret (Peggy) F., Professor of Education. BS 1977, Valdosta State College; MA 1980, University of North Florida; PhD 1989, University of Florida.

Kingston, William, Affiliate Research Professor. BA 1948, MA 1949, University College, Dublin.

Kinnaman, Theodore, Chair, Department of Philosophy, and Associate Professor of Philosophy. BA 1985, Carleton College; MA 1988, PhD 1995, University of Wisconsin, Madison.

Kinser, Jason M., Associate Professor, Bioinformatics and Computational Biology. BA 1985, William Jewell College; MS 1987, University of Alabama, Huntsville; DSc 1993, South Eastern Institute of Technology.

Kinter, James L., Associate Professor, Climate Dynamics. AB 1979, MA 1981, PhD 1984, Princeton University.

Kirkland, Connie J., Director, Sexual Assault Services, University Life. BS 1968, Bowling Green State University; MA 1972, Ohio State University.

Kirsch, Allison, Term Instructor of Spanish. BA 1999, James Madison University; MA 2002, University of Virginia.

Kirsch, Vicki, Associate Director, Women and Gender Studies. BA 1978, Georgetown University; MA 1980, The University of Chicago; PhD 1990, Emory University; MSW 1997, Boston University.

Kitsantas, Anastasia, Associate Professor of Education. BA 1992, BS 1992, MS 1993, Queens College, City University of New York; MA 1995, PhD 1996, Graduate School and University Center, City University of New York.
Kitsantas, Panagota, Assistant Professor of Health Administration and Policy. BA 1996, Queens College (CUNY); MS 1999, James Madison University; MS 2000, PhD 2003, Florida State University.

Klein, Alexander, Research Professor, Systems Engineering and Operations Research. BS 1978, Moscow State University; PhD 1982, Institute of Mechanics.

Klein, Daniel B., Professor of Economics, BS 1983, George Mason University; PhD 1990, New York University.

Klein, Margaret L., Technical Assistance Specialist, Kellar Institute for Human disAbilities. MA 1982, Marymount University.

Klein, Steven M., Term Instructor of Communication. BA 1989, University of Wisconsin; MA 1997, Michigan State University.

Klimoski, Richard J., Professor of Management and Psychology. BA 1965, University of Massachusetts; MS 1968, PhD 1970, Purdue University.

Klimov, Dmitri, Associate Professor, Bioinformatics and Computational Biology. MS 1989, PhD 1992, Moscow State University.

Klinger, Barry, Associate Professor, Climate Dynamics. BS 1985, PhD 1992, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution.

Kluger, Matthew J., Vice President for Federal and Corporate Relations. BS 1967, Cornell University; MS 1969, PhD 1970, University of Illinois; Postdoctoral 1972, Yale University; MBA 1997, Anderson Schools of Management, University of New Mexico.

Knight, G. Diane, Assistant Professor; Counselor, Counseling and Psychological Services. BA 1966, Bethany College; MDiv 1970, Yale University; MS 1978, Loyola College; PhD 1985, University of Maryland.

Kohlenz, Gregory D., Assistant Professor of Government and Politics and Deputy Director of Biodefense. BA 1996, Brown University; MPP 1999, Harvard University; PhD 2004, Massachusetts Institute of Technology.

Kocache, Malda, Term Assistant Professor of Biology. BS 1984, American University of Beirut; 1989 PhD, Georgetown University.

Koch, Lisa, Term Associate Professor of English. BA 1987, Washington University; MA 1992, PhD 2000, University of Maryland.

Kodadek, Marie, Assistant Professor of Nursing. BSN 1974, College of St. Teresa; MSN 1976, University of Colorado, Boulder; PhD 1988, University of Texas, Austin.

Kohn, Ellen, Core Faculty Member, English Language Institute. AB 1972, University of Michigan; MS 1979, Georgetown University.

Koizumi, Naoru, Assistant Professor of Public Policy. BA 1992, Aoyama-Gakuin University; MA 1994, PhD 2002, University of Pennsylvania; PhD 2005, Hyogo Medical College.

Kopf, Jennifer, Instructor of Geography. BA 1989, Miami University; MA 1993, University of Texas, Austin.

Korjus, Jennifer L. W., Director, Learning Support Services, DoIT. BA 1985, Baylor University; JD 1998, University of Texas; MEd 21001, George Mason University.

Korostelina, Karyna, Research Professor, Institute for Conflict Analysis and Resolution. BA 1990, MA 1991, National Kiev University; PhD 1994, Odessa State University; Dr.of Sc. 2003, Ukrainian Academy of Science.
Kosecka, Jana, Associate Professor, Computer Science. MSE, EECS 1988, Slovak Technical University, Bratislava, Slovakia; PhD 1996, University of Pennsylvania.

Koslowsky, Meni, Term Professor, Psychology. BA 1968, City College of New York; PhD 1972, Columbia University.

Kovac, S. Linda, Associate Director of Corporate Relations, The Volgenau School of Information Technology and Engineering. BA 2007, Burlington College.

Kozhevnikov, Maria, Associate Professor, Psychology. BS 1988, Moscow Institute of Physics and Technology, Russia; MS 1991 Uzhgorod State University, the Ukraine; MS 1998 Technion–Israel Institute of Technology; PhD 1998, University of California.

Kozlowski, James, Associate Professor of Parks, Recreation, and Leisure Studies. BA 1972, Johns Hopkins University; MA 1973, University of Chicago; MS 1976, University of Illinois; JD 1980, University of Maryland School of Law; PhD 1986 University of Maryland.

Kraus, Richard T., Assistant Professor, Environmental Science and Policy. BS 1994, College of Charleston; MS 1998, College of William and Mary; PhD 2003, University of Maryland.

Kravitz, David A., Chair and Professor of Management. BA 1974, Carleton College; MA 1978, PhD 1980, University of Illinois, Urbana-Champaign.

Kravitz, Edward Walter, Professor of Art and Visual Technology. BFA 1964, School of the Art Institute of Chicago; MFA 1967, Syracuse University.

Kreps, Gary, Chair of Communication and Eileen P. and Steve A. Mandell Term Professor of Health Communication. BA 1975, MA 1976, University of Colorado; PhD 1979, University of Southern California.

Krishnamurthy, V., Contract Professor of Climate Dynamics. BS 1969, University of Mysore; BS 1970, MS 1972, Bengalore University; MS 1978, PhD 1985, Massachusetts Institute of Technology.

Kronenfeld, Barry, Assistant Professor, Geography. BS 1993, Cornell University; PhD 2004, State University of New York, Buffalo.

Kuebrich, David Lawrence, Associate Professor of English. AB 1966, Washington University; MA 1969, PhD 1973, University of Chicago.

Kulesza, John S., Professor of Mathematical Sciences. BS 1978, Bucknell University; MA 1981, PhD 1987, State University of New York, Binghamton.

Kulick, Jeffrey, Instructor of Marketing. BA 1970, Oakland University; MBA 1977, Keller Graduate School of Management.

Kurtz, Lester R., Professor of Sociology, BA 1972, Westmar College; MAR 1974, Yale University; PhD 1980, University of Chicago.

Kysar-Mattietti, Giusepinna, Assistant Professor of Earth Science/Geology. BS 1989, Universita’ degli Studi di Roma; MPhil 1997, PhD 2001, George Washington University.

L

Labbe, Jennifer, Mason LIFE Job Coach. BS 2000, Texas Christian University.

Lair, Meredith H., Assistant Professor, History and Art History. BA 1994, Ohio University; PhD 2004, Pennsylvania State University.

Lamb, Jennifer, Assistant Dean for Development, The Volgenau School of Information Technology and Engineering. BA 1989, University of Maryland, College Park; MS 1993, University of Pennsylvania.

Lamba, Harbir, Associate Professor of Mathematical Sciences. BA 1988, Cambridge University; PhD 1993, Bristol University.

Lamothe, Winnie, Term Instructor, Spanish. JD 1987, Universidad San Martin de Porres; MA 1996, Monterey Institute of International Studies.

Lancaster, Roger N., Director, Cultural Studies Program; Professor of Anthropology and Cultural Studies. BA 1982, University of North Carolina; MA 1983, PhD 1987, University of California, Berkeley.

Landeros, Estella C., Technical Assistance Specialist. BA 1973, Direcccion General de Mejoramiento Profesional, Mexico, D.F; BA 1978, School for Special Studies, Mexico, D.F.; MA 1985, Ohio State University.

Landry, Elena, Global Programs and Foreign Languages Liaison Librarian. BA, MS, Tbilisi State University, MLIS, Louisiana State University.

Landsberg, Alison, Associate Professor, History and Art History. BA 1989, Williams College; MA 1991, PhD 1996, University of Chicago.

Langfred, Claus W., Associate Professor, Management. BS 1993, Washington University, St. Louis; MS 1995, PhD 1998, Northwestern University.

LaPaille, Christine, Vice President for University Relations. BA 1981, Eastern Illinois University; MA 1989, University of Illinois.

La Porte, Todd M., Associate Professor, School of Public Policy. BA 1980, Swarthmore College; MA, PhD 1989, Yale University.

Lapple, Judith, Term Professor of Music. BM 1975, Eastman School of Music; MM 1977, Northeast Louisiana University.

Largen, Kim, Term Assistant Professor, Environmental Science and Policy. BA 1980, University of Virginia; MS 1988, PhD 2000, George Mason University.

Larranaga, James J., Head Coach, Men’s Basketball. BA 1971, Providence College.

Laskey, Kathryn Blackmond, Associate Professor, Systems Engineering and Operations Research. BS 1976, University of Pittsburgh; MS 1978, University of Michigan; PhD 1985, Carnegie Mellon University.

Lathbury, Roger Delaire, Professor of English. BA 1967, Middlebury College; MA 1968, Indiana University.

Lattanzi Shutika, Debra L., Associate Professor, English. BSN 1987, West Virginia University School of Nursing; MA 1993, George Mason University; MA 1998, PhD 2001, University of Pennsylvania.

Lawrence, James Franklin, Professor of Mathematical Sciences. BS 1972, Oklahoma State University; PhD 1975, University of Washington.

Lawrence, L. Brian, Professor of Mathematical Sciences. BA 1976, PhD 1984, State University of New York, Binghamton.
Lawrence, Susan, Assistant Professor, English. BA 1982, College of William and Mary; MA 1993, University of Wisconsin, Madison; PhD 2005, Carnegie Mellon University.

Lawrey, James D., Professor of Biology. BS 1971, Wake Forest University; AM 1973, University of South Dakota; PhD 1977, Ohio State University.

Lee, Chi-Hyon, Assistant Professor of Management. BA 1987, University of California; MBA 1991, University of Southern California; PhD 2001, Boston University.

Lee, Fu-Lin Y., Assistant Professor; Counseling Psychologist, Counseling Center. BA 1982, National Taiwan University; MA 1986, PhD 1991, University of Illinois, Urbana-Champaign.

Lee, Hun, Associate Professor of Management. BS 1986, Georgia Institute of Technology; MBA 1988, Thunderbird School of Global Management; PhD 1995, University of Maryland.

Lee, Seungwon (Shawn), Instructor of Tourism and Events Management. BEng 1995, In-Ha University; MTA 2001, George Washington University.

Leeman, Jennifer, Associate Professor, Modern and Classical Languages. BA 1986, University of Pennsylvania; MA 1988, New York University; MAT 1993, PhD 2000, Georgetown University.

Leeson, Peter, Assistant Professor of Economics. BA 2001; PhD 2005, George Mason University.

Lei, Ling, Assistant Professor of Accounting. Bachelor 1998, Shanghai Jiao Tong University, China; MPhil 2000, Hong Kong University of Science and Technology; MS 2003, University of Rochester; PhD 2008, University of Connecticut.

Lei, Zhike, Assistant Professor, Management. BA 1997, Beijing Institute of Business; MBA 2000, Illinois State University; PhD 2005, University of North Carolina, Chapel Hill.

Leighton, Kimberly, Assistant Professor of Philosophy. BA 1989, Sarah Lawrence College; PhD 2003, University of Massachusetts, Amherst.

Leitch, Pauline, Director, Business Finance Center, Mason Enterprise Center. BA 1967, St. Mary’s College.

Leon, Sharon, Research Instructor, History and Art History. BA 1997, Georgetown University.

Lepore, Jim, Professor of Dance. BA 1987, State University of New York; MFA 1989, Temple University.

Leslie, Timothy, Assistant Professor of Geography. BA 2002, University of Miami; MA 2004, PhD 2007, Arizona State University.

Lester, Jaime Renee, Assistant Professor, Higher Education Program. BA, University of Michigan; MEd 2003, PhD 2006, University of Southern California.

Levine, James Steven, Associate Professor of Russian. BA 1971, BA 1972, State University of New York, Buffalo; MA 1974, PhD 1977, University of Illinois, Urbana-Champaign.

Levy, David M., Professor of Economics. BA 1966, University of California, Berkeley; MA 1970, PhD 1979, University of Chicago.

Levy, Lynn W., Administrative Coordinator for FAST TRAIN. BIS 1997, MEd 2000, George Mason University.

Lewis, Edward Miller, Director, of Technology Management Program. BS 1973, University of Maryland; MS 2001, Virginia Polytechnic Institute and State University.

Lewis, Virginia Ann, Director, Retention Initiatives. BS 1975, Towson State University; MA 1979, University of Maryland.

Li, Fei, Assistant Professor, Computer Science. BSc 1997, Jilin University; MS 2002, PhD 2007, Columbia University.

Li, Ning, Assistant Professor, Marketing. BS 1992, Nanjing Institute of Meteorology; MS 2002, PhD 2002, Duke University.

Li, Qiliang, Assistant Professor, Electrical and Computer Engineering. BS 1996, Wuhan University; MS 1999, Nanjing University; PhD 2004, North Carolina State University.

Lichter, Samuel, Professor, Communication. BA 1969, University of Minnesota; PhD 1977, Harvard University.

Lieb, Bernard Joseph, Jr., Professor of Physics and Astronomy. BS 1965, MS 1967, PhD 1971, College of William and Mary.

Lien, Jyh-Ming, Assistant Professor, Computer Science. BS 1999, National Cheng-Chi University; PhD 2006, Texas A&M University.

Light, Andrew, Associate Professor, Philosophy. BA 1989, Mercer University; MA 1992, PhD 1996, University of California, Riverside.

Lim, Teck Cheong, Associate Professor of Mathematical Sciences. BS 1972, Nanyang University; MA 1971, PhD 1974, Dalhousie University.

Lin, Baochuan, Research Assistant Professor, Center for Bioresource Development. BSc 1986, Yang Ming Medical College, Taiwan; MSc 1991, Tsing Hua University, Taiwan; PhD 1998, George Washington University.

Lin, Jeng-Eng, Associate Professor of Mathematical Sciences. BS 1969, National Tsing Hua University; PhD 1976, Brown University.

Lin, Jessica H., Assistant Professor, Computer Science. BS 1999, MS 2002, PhD 2005, University of California, Riverside.

Linehan, Tere, Aignore Development, College of Science. BS 1970, Colorado State University.

Ling, Yan, Assistant Professor, Management. BA 1997, Central University of Finance and Economics; PhD 2004, University of Connecticut.

Linton, Harold, Chair, Department of Art and Visual Technology, and Professor. BFA 1969, Syracuse University; MFA 1972, Yale University.
Liotta, Lance, Codirector, Center for Applied Proteomics and Molecular Medicine, University Professor of Molecular and Microbiology. BA 1969, PhD 1974, MD 1976, Case Western Reserve University.

Liss, Cynthia A., Term Instructor of Nursing. BSN 1978, Lewis University; MHSA 1987, Georgetown University.

Lister, Lisa M., Term Assistant Professor, English. BA 1997, Lewis and Clark College; MFA 2005, American University.

Listokin, Siona R., Assistant Professor of Public Policy. BS 2000, University of Pennsylvania; PhD 2007, University of California, Berkeley.

Litchfield, Carol, Research Associate Professor, Environmental Science and Policy. BSMT 1958, MS 1960, University of Cincinnati; PhD 1969, Texas A&M University.

Liu, Yifan, Assistant Professor, Systems Engineering and Operations Research. BS 1998, Fudan University, Shanghai, China; MS 2005, PhD 2006, Stanford University.

Liu, Zhong, Research Associate Professor, Environmental Science and Policy. BS 1983, Shandong College of Oceanography; MS 1990, SD School of Mines and Technology; PhD 1995, Ohio State University.

Lobanova, Ekaterina, Assistant Research Associate, National Center for Biodefense and Infectious Diseases. MD 1998, State Pediatric Medical Academy.

Lockwood, J. Samaine, Assistant Professor, English. BA 1996, Vassar College; MA 1997, University of Michigan, Ann Arbor; PhD 2006, University of California, Davis.

Loerch, Andrew G., Associate Professor of Systems Engineering and Operations Research. BS 1974, Polytechnic Institute of Brooklyn; MS 1980, Naval Postgraduate School; MS 1989, PhD 1990, Cornell University.

Lohner, Rainald, Distinguished Professor of Fluid Dynamics, Department of Computational and Data Sciences. MS 1982, Technische Universitat, Braunschweig, West Germany; PhD 1984, University College of Swansea, Wales.

Long, Lauren, Director of the Office of Student Activities. BS 1994, State University of New York; MA 1996, Indiana State University.

Lont, Cynthia, Professor of Communication, Director of Film and Video Studies. BA 1974, State University of New York; MA 1976, Southern Illinois University; PhD 1984, University of Iowa.

Loomis, Diane M., Transition Coordinator. BA 1974, Florida State University; MS 1977, University of Tennessee; PhD 2007, George Mason University.

Lopez-Santana, Mariely, Assistant Professor, Department of Public and International Affairs. BA 1997, University of Puerto Rico Piedras; PhD 2006 University of Michigan.

Louh, Nyla, Assistant Director, Development, College of Visual and Performing Arts. BM 2003, James Madison University; MM 2006, George Mason University.

Loustaunau, Philippe, Affiliate Associate Professor of Mathematics. DEUG 1980, Universite de Paris; BA 1983, MS 1985, PhD 1988, University of Wisconsin.

Lowry, Beverly F., Professor of English. BA 1960, Memphis State University.

Lu, Jian, Assistant Professor of Atmospheric, Oceanic and Earth Sciences. BS 1992, MS 1996, PhD 1999, University of Qingdao; PhD 2004, Dalhousie University.
Lucas, Nance, Associate Dean, New Century College. BA 1982, MA 1984, Pennsylvania State University; PhD 1999, University of Maryland.

Ludwick, Ann M., Graduate Student Coordinator, Public and International Affairs Graduate Programs. BA 1988, Longwood University; MPA 1995 George Mason University.

Lukacs, Yehuda, Associate Provost for Global Education; Director, Center for Global Education; Professor Public and International Affairs. BA 1980, MS 1982, PhD 1989, American University.

Luke, Sean, Associate Professor, Computer Science. BS 1993, Brigham Young University; PhD 2000, University of Maryland.

Lum, Cynthia, Assistant Professor, Administration of Justice. BA 1995, University of California; MS 1996, London School of Economics and Political Science; PhD 2003, University of Maryland.

Lynch, Michael F., Director of University Police. BA 1978, University of Maryland; MA 1992, University of Baltimore; MS 1997, Johns Hopkins University.

Lyons, Michael, Instructor of Applied Information Technology. BAppSc, Chisholm Institute of Technology; MS, University of Maryland University College.

Lyons, Terrence P., Associate Professor of Conflict Analysis and Resolution. BA 1981, University of Virginia; MA 1985, Michigan State University; PhD 1993, Johns Hopkins University.

Lytton, Randolph Hoopes, Associate Professor of History. BA 1966, Pennsylvania State University; MA 1968, University of Washington; PhD 1973, Pennsylvania State University.

Macfarlane, Allison, Associate Professor, Environmental Science and Policy. BS 1986, University of Rochester; PhD 1992, Massachusetts Institute of Technology.

Madden, Charles, Term Assistant Professor of Biology. BS 1989, Kansas State University; PhD 1996, Louisiana State University.

Maddox, Peggy Jo, Professor and Chair, Health Administration and Policy. BSN 1974, University of Nevada; MSN 1981, Catholic University of America; EdD 1995, Columbia University.

Maddox, Tamara A., Term Assistant Professor, Computer Science. BS 1987, George Mason University; JD 1991, College of William and Mary.

Maddux, James Eugene, University Professor of Psychology; Director, Clinical Psychology Program. BA 1976, University of Richmond; MA 1979, PhD 1982, University of Alabama.

Magro, Anne M., Chair and Associate Professor, Accounting. BA 1987, The University of Michigan, Ann Arbor; MS 1991, PhD 1998, University of Illinois, Urbana-Champaign.

Mahler, Julianne G., Associate Professor of Government and Politics. BA 1968, Macalester College; MA 1970, PhD 1976, State University of New York, Buffalo.

Mahon, Margaret M., Associate Professor of Nursing. BSN 1980, Loyola University; MSN 1982, PhD 1992, University of Pennsylvania.

Maibach, Edward, Professor and Director of Center of Excellence in Climate Change Communication Research; BA 1980, University of California; MPH 1983, San Diego State University; PhD 1990, Stanford University.

Maiello, Anthony Joseph, University Professor of Music. BS 1965, MS 1967, Ithaca College.
Maiwurm, Jr. James, Center For the Arts Festival Manager. BA 2003, George Mason University; MFA 2006, State University of New York, Stony Brook.

Malawer, Stuart S., Distinguished Service Professor of Law and International Trade. BA, University of Buffalo; MA, PhD 1976, University of Pennsylvania.

Malek, Sam, Assistant Professor, Computer Science. MS 2004, PhD 2007, University of Southern California.

Malloy, Jacquelynn A., Assistant Professor of Education. BA 1979, Duquesne University; MS 1980, West Virginia University; PhD 2008, Clemson University.

Maloney, Kirby, Term Assistant Professor, Art and Visual Technology. BA 1975, Antioch College; MFA 2005, George Mason University.

Manca, Germana, Assistant Professor of Geography. PhD 1998, University of Sassari, Italy.

Mancini, Terri A., Director, Sponsored Research Administration, The Volgenau School of Information Technology and Engineering. BS 1993, Strayer University; MPA 2008, George Mason University.

Mandaville, Peter P., Assistant Professor, Public and International Affairs. MA 1994, University of St. Andrews, Scotland; MA 1995, PhD 1999, University of Kent, Canterbury, United Kingdom.

Manes, Evans John, Professor of Psychology and Interdisciplinary Arts; Senior Associate Dean for Budget and Personnel, College of Science. AB 1961, MS 1963, PhD 1966, George Washington University.

Maness, Hilda M., Director of Development, School of Management. BIS 1991, George Mason University.

Mangus, Kathryn K., Term Instructor of Communication; Assistant Director for Student Media. BIS 1987, MAIS 1990, George Mason University.

Maniatis, A.Z., Professor and Chair, Electrical and Computer Engineering Department. MSEE 1960, Academy of Mining and Metallurgy, Krakow, Poland; PhD 1968, Polytechnical School of Warsaw.

Mann, Troy, Shared Research Instrumentation Facility. BA 1997, St. Mary’s College.

Mann, Wendy, Education and New Century College Liaison Librarian. BA, MLS, University of Pittsburgh.

Mantz, Jeffrey W., Assistant Professor of Anthropology. BA 1993, University of Massachusetts; MA 1996, State University of New York, Binghamton; PhD 2003, University of Chicago.

Manuel Scott, Wendi N., Director, African and African American Studies Program and Term Associate Professor, History and Art History. BA 1994, College of Charleston; MA 1997, PhD 2003, Howard University.

Maradiegue, Ann, Assistant Professor of Nursing. BSN 1992, MSN 1995, PhD 2007, George Mason University.

Marcantonio, Carla, Assistant Professor, English. BA 1995, MA 1998, University of Colorado, Boulder; PhD 2007, New York University.

Marchant, Anne J., Associate Director, Mason Center for Conservation Studies; and Professor, Applied Information Technology. BA 1979, University of New Hampshire; MA 1982, PhD 1990, University of California, Berkeley.

Marcus, Brian, Associate Dean, Development, and Associate Professor, Arts Management. BA, Brandeis University; MAT 1970, Harvard University.
Mark, Brian L., Associate Professor, Electrical and Computer Engineering. BASc 1991, University of Waterloo; MA 1993, PhD 1995, Princeton University.

Marks, Michelle A., Associate Provost for Graduate Education. BS 1991, James Madison University; MA 1993, PhD 1997, George Mason University.

Markx, Francien, Assistant Professor of German. MA (Doctoraal Examen) 1994, MA (Doctoraal Examen) 1994, Universiteit van Amsterdam (The Netherlands); PhD 2003, University of Illinois, Urbana-Champaign.

Marshall, Monty G., Research Professor, School of Public Policy. BA 1988, University of Colorado; MA 1990, University of Maryland; PhD 1996, University of Iowa.

Masters, Patricia, Term Assistant Professor, Sociology. BA 1990, George Mason University; MA 1993, PhD 1998, American University.

Martin, Melissa A., Assistant Professor of Marketing. BA, 1977, Bucknell University; MBA 1980, University of Pittsburgh; PhD 2004, Kenan-Flagler Business School, University of North Carolina.

Martin, Scott, Assistant Dean, Research, Technology, and Institutional Development, College of Visual and Performing Arts; Associate Professor of Arts Management. BM 1988, MM 1989, Johns Hopkins University; DMA 2000, University of Maryland.

Martin-Vermilyea, Laurie, Term Instructor. BS 1985, Duke University; MS 1987, PhD 1992, University of South Carolina, Columbia.

Masters, Patricia, Term Assistant Professor, Sociology. BA 1990, George Mason University; MA 1993, PhD 1998, American University.

Mastrofski, Stephen D., University Professor Administration of Justice. BA 1969, University of Iowa; PhD 1981, University of North Carolina, Chapel Hill.

Mastropieri, Margo, University Professor of Education, BA 1978, MEd 1976, University of Massachusetts; PhD 1983, Arizona State University.

Matthews, Jessica, Term Assistant Professor, English. BS 1972, Drexel University; MA 1992, Austin Peay State University; PhD 2005, George Washington University.

Matthews, Tansy, Associate Director, VIVA. BFA 1999, Savannah College of Art and Design; MLIS 2004, Drexel University.

Mattson, Janna, Social Sciences Liaison Librarian. BA 1997, Virginia Commonwealth University; MSL 2004, Queens College, City University of New York.

Mattusch, Carol C., Mathy Professor of Art History. BA 1969, Bryn Mawr College; PhD 1975, University of North Carolina.

Matveev, Mikhail, Term Assistant Professor of Mathematical Sciences. MSc 1981, PhD 1985, Moscos “M. V. Lomonosov” State University.

Matz, Robert, Chair of English and Associate Professor of English. AB 1986, Cornell University; MA 1988, PhD 1994, Johns Hopkins University.

Maulden, Patricia, Assistant Professor of Conflict Analysis and Resolution, BA 1999, University of California, Santa Cruz; MS 2002, PhD 2007, George Mason University.
Maxwell, Joseph A., Professor of Education. BA 1965, Reed College; MA 1971, PhD 1986, University of Chicago.

Mayer, Jeremy D., Associate Professor, School of Public Policy. BA 1990, Brown University; PhD 1996, Georgetown University.

Mazumdar, Prosenjit, Assistant Professor of MIS and Decision Sciences. BSc (Honors) 1979, Presidency College, Calcutta; MS 1984, PhD 1986, University of Maryland, College Park.

McAfee, Melissa, Head, Special Collections and Archives. BA, University of Wisconsin, Madison; MLS, Columbia University.

McAuley, William J., Professor, Communication. BA 1968, University of North Carolina, Charlotte; PhD 1974 Pennsylvania State University.

McBride, Randolph A., Associate Professor of Geology. BA 1982, Wittenberg University; MS 1986, PhD 1997, Louisiana State University.

McCabe, Kevin A., Professor, Economic Science Laboratory. BS 1976, Villanova University; PhD 1985, University of Pennsylvania.

McCarthy, Corrine, Assistant Professor, English. BS 1996, University of Illinois, Urbana-Champaign; MA 1999, University of Pittsburgh; PhD 2007, McGill University.

McClain, John, Deputy Director and Coordinator, Center for Regional Analysis. BS 1965, Duke University; Master’s Degree of City and Regional Planning 1968, University of North Carolina, Chapel Hill.

McCord, Theodore B., Term Assistant Professor of History. BA 1968; MA 1976; George Mason University; PhD 1991, American University.

McCreadie, Jennifer, Director of Program Evaluation and Assessment. BA 1970, University of Wisconsin, Madison; MS 1971, University of Wisconsin, Milwaukee.

McCrohan, Kevin F., Professor of Marketing. BS 1967, New York University; MBA 1971, MBA 1974, Baruch College; PhD 1978, City University of New York.

McCutcheon, Megan E., Research Instructor, Sociology and Anthropology. BS 2000, Ohio State University; MA 2002, University of North Carolina, Charlotte.

McDade, Charles F., Senior Associate Athletic Director of Aquatics and Recreational Sports. University of Arkansas. BS, Virginia Polytechnic Institute and State University; MS, University of Arkansas.

McDaniel, James Goodlett, Associate Provost for Distance Education, Office of the Provost and Associate Dean and Associate Professor, College of Health and Human Services. BSN 1980, Bartlett College; MSN 1985, East Carolina University; EdD 1988, North Carolina State University; MBA 2002, Jacksonville University.

McDonald, Craig G., Assistant Professor, Psychology. BSc 1989, MSc 1994, PhD 2001, University of Victoria.

McDonald, Heather, Associate Professor of Theater. BA 1981, Florida State University; MFA 1984, New York University.

McDonald, Michael P., Associate Professor of Government and Politics. BS 1989, California Institute of Technology; PhD 1999 University of California, San Diego.

McDonald, Suzanne, Assistant Professor. PhD 2003, The State University of New York, Stony Brook.

McDow, Thomas F., Assistant Professor of History. BA 1993, MA 2003, PhD 2008 Yale University.
McElwain, Michal J., Program Development and Outreach Director of Continuing Education and Public Relations, Mason Enterprise Center, School of Public Policy. BA 1996; MA 1998, George Mason University.

McFerson, Hazel M., Associate Professor of Public and International Affairs. BA 1969, University of Massachusetts; MA 1970, Fletcher School of Law and Diplomacy, Tufts University; PhD 1976, Brandeis University.

McGeenan, Rebecca, Term Assistant Professor of English. BA Catholic University of America; MFA 2006, American University.

McKeough, Emily O’Brien. Assistive Technology Coordinator. BS 2005, Bridgewater College; MEd 2006, George Mason University.

McKnight, Patrick E., Assistant Professor Quantitative/ Clinical Psychology. BS 1988, University of Notre Dame; MS 1992, PhD 1997, University of Arizona.

McNamee, Kevin W., Senior Associate Athletic Director for Intercollegiate Sports. MA 1977, Indiana University.

McNay, Curtis L., Director of Information Technology Security, ITU.

McNeely, Connie L., Associate Professor, School of Public Policy. BA 1973, MA 1976, University of Pennsylvania; MA 1985, PhD 1990, Stanford University.

McQuiggan, Lisa S., Assistant Sports Information Director, Sports Information Department. BS 1993, East Carolina University.

McVicker, Carrie, Events Coordinator, Prince William Campus. BA 1992, Bloombwer University of Pennsylvania.

Meamber, Laurie A., Associate Professor of Marketing. BA 1988, University of California, Davis; MBA 1991, University of California, Riverside; PhD 1997, University of California, Irvine.

Medford, Jeanne D., Assistant Athletic Director for Finance, Intercollegiate Athletics. BS 1982, George Mason University.

Megenigal, J. Patrick, Assistant Professor of Environmental Science and Public Policy. BS 1982, MS 1986, Old Dominion University; PhD 1996, Duke University.

Mehta, Kumar, Assistant Professor, Information Systems and Operations Management. BS 1993, Indian Institute of Technology; MS 1996, Southern Illinois University; PhD 2002, University of Illinois.

Meier, Lisa J., Term Assistant Professor, Psychology. BS 1984, Georgetown University; MA 1989, PhD 1993, George Mason University.

Meier, Robert, Research Professor, Academic Administrative and Student Services. BS 1962, Duquesne University; PhD 1966, University of Pittsburgh.

Meiners, Mark, Professor of Health Administration and Policy Director, Center for Health Policy, Research, and Ethics. BA 1969, University of Wisconsin; MA 1972, PhD 1978, Georgetown University.

Menascé, Daniel A., Senior Associate Dean for Research and Graduate Studies, The Volgenau School of Information Technology and Engineering, and Professor of Computer Science. BS 1974, MS 1975, Pontificia Universidade Catolica do Rio de Janeiro; PhD 1978, University of California, Los Angeles.

Merola, Linda M., Assistant Professor, Administration of Justice. BA 1995, Wesleyan University; JD 1998, George Washington University National Law Center; PhD 2007, Georgetown University.

Merten, Alan G., President. BS 1963, University of Wisconsin; MS 1964, Stanford University; PhD 1970, University of Wisconsin.

Meyer, Carrie A., Associate Professor of Economics. PhD 1988, University of Illinois.

Michals, Teresa, Assistant Professor, English. AB, Cornell University; MA 1988, PhD 1996, Johns Hopkins University.

Middle, Beverly, Term Instructor of Nursing. BS 1979, Radford University; MS 1988, Catholic University of America.

Miklancie, Margaret, Assistant Professor of Nursing. BSN 1986, MSN 1992, PhD 2001, George Mason University.

Miller, Char R., Associate Professor of Government and Politics. BA 1990, BS 1990, Idaho State University; PhD 1999, Johns Hopkins University.

Miller, John James, Associate Professor, Statistics. AB 1968, University of Rochester; MS 1969, PhD 1974, Stanford University.

Miller, Katharine, Research Assistant, Life Sciences. BA 1999, University of Virginia.

Miller, Linda Garner, Senior Associate Dean, Academic Affairs, College of Visual and Performing Arts; Professor of Dance. BFA 1972, University of Cincinnati; MFA 1980, University of Hawaii.

Miller, Nikki, Technical Assistance Specialist. BA 1965, University of Denver; MA 1966, Ohio State University; EdD 1996, University of San Francisco.

Miller, William B., Term Associate Professor of English. BA 1973, University of North Carolina; MFA 1986, George Mason University.

Miller, William, G., Jr., Assistant Director of the Office of Code Compliance. Virginia Apprenticeship Program, George Mason University, Lord Fairfax Community College, and Northern Virginia Community College.

Mircea-Pines, Walter, J., Instructional Technologist and Language Lab Director, Modern and Classical Languages. BA 1985, University Babes-Bolyai; MA 1996, State University of New York, Buffalo.

Mishin, Yuri, Professor, Physics and Astronomy. MSc 1979, PhD 1985, Moscow Institute of Steel and Alloys.

Mitcho, Sara R., Term Instructor, English. BA 2000, James Madison University; MA 2002, Penn State University.
Mobley, Phillip M., Lecturer of Geography. BA 1977, Kutztown University; MA 1980, University of Akron.

Mohr, Jonathan J., Assistant Professor, Psychology. BA 1988, University of California, Santa Cruz; MS 1995, California State University; PhD 2001, University of Maryland.

Moidu, Khalid, Associate Professor of Health Administration and Policy. MD 1972, University of Poona, India; MPhil 1989, PhD 1992, Linkoping University, Sweden.

Moncure, Thomas, University Counsel. BA, Virginia Military Institute; MA, George Mason University.

Monk, Christopher A., Assistant Professor, Psychology. BA 1992, University of California, Santa Barbara; MA 1997, California State University; PhD 2004, George Mason University.

Monson, Linda Apple, Professor, Associate Chair, Department of Music. BMEd 1979, MM 1981, DMA 1986, Peabody Conservatory of Music of the Johns Hopkins University; Diploma (piano performance), Santiago de Compostela, Spain.

Montgomery, Jennifer, Director of Major Gifts, Patriot Club. BA 1999, University of Virginia; MA 2003, Georgetown University.

Moore, Jean Burley, Professor of Nursing. BSN 1964, University of North Carolina, Chapel Hill; MSN 1977, PhD 1984, Catholic University of America.

Moore, Joseph D., Director, Hampton Roads Procurement Technical Assistance Center, Mason Enterprise Center. BS 1975, Loma Linda University; MBA 1990, Webster University; MS 2002, Florida Institute of Technology.

Morelli, Julia G., Director of Operations, Capitol Connection. MA 1995, George Mason University.

Morgan, Glenda, Director of Technology and Learning Initiatives, College of Humanities and Social Sciences. BA 1986, University of Cape Town, South Africa; MA 1992, Rhodes University; PhD 2002, University of Minnesota.

Mori, Kyoko, Associate Professor, English. BA 1979, Rockford College; MA 1981, PhD 1984, University of Wisconsin, Milwaukee.

Morowitz, Harold J., Robinson Professor of Biology and Natural Philosophy. BS 1947, MS 1950, PhD 1951, Yale University.

Morris, Walter D., Jr., Professor of Mathematical Sciences. BS 1980, Iowa State University; MS 1984, PhD 1986, Cornell University.

Mose, Douglas, Professor of Geochemistry. BS 1965, University of Illinois; MS 1968, PhD 1971, University of Kansas.

Moss, Margaret M., Assistant Professor of Nursing. Diploma in Nursing 1965, Whidden Memorial Hospital School of Nursing; BSN 1982, MSN 1991, PhD 2007, George Mason University.

Motro, Amihai, Professor, Computer Science. BS 1972, Tel Aviv University; MS 1976, Hebrew University of Jerusalem; PhD 1981, University of Pennsylvania.
Mouri, Nacef, Assistant Professor of Marketing. BS 1993, Higher International Institute of Tourism Studies; MBA 1997, PhD 2005, University of Central Florida.

Moy, Christopher T., Director, Office of Disability Services. BS 1996, MS 1998, Boston University.

Moye, Allen R., Associate Director for Public Services, University Libraries. BA 1982, Howard University; JD 1990, University of Richmond; MLS 1999, Catholic University of America.

Muir, Janette Kenner, Associate Professor, New Century College and Communication. BS 1979, Palm Beach Atlantic College; MA 1983, Wake Forest University; PhD 1986, University of Massachusetts.

Muir, Star A., Associate Professor of Communication. BA 1980, Wake Forest University; MA 1982, University of Central Florida; PhD 1990, University of Pittsburgh.

Mulpuri, V.R., Professor, Electrical and Computer Engineering. MS 1983, PhD 1985, Oregon State University.

Murphy, James Owen, Jr., Instructor; Director of Intramural Recreation. BS 1975, George Mason University.

Murphy, Jennifer O., Assistant Vice President of Research and Economic Development, Director of Technology Transfer. MBA 1982, American University.

Murphy, Una M., Associate Director, Development Office. BA 1989, Brooklyn College.

Murray, Kevin P., Managing Director, Theater of the First Amendment. BA 1975, University of Maryland.

Mushrush, George William, Professor of Chemistry; BS 1962, Indiana University of Pennsylvania; MS 1965, PhD 1968, George Washington University.

Muthuswamy, Nithya, Assistant Professor, Communication. BA 1996, Maharaja Sayaji Rao University, India; MA 1998, Tata Institute of Social Sciences, India; MA 2003, PhD 2005, Michigan State University.

N

Nadeau, Robert Lee, Professor of English. BA 1966, University of the South; MA 1967, PhD 1970, University of Florida.

Naglieri, Jack A., Professor of Psychology; Director, School Psychology Program. BA 1972, C.W. Post of Long Island University; MA 1975 St. John’s University; PhD 1979, University of Georgia.

Nakles, Robert E., Director, Information Technology Project Office, Information Technology Unit. BS, Indiana University of Pennsylvania; MS, Shippensburg University of Pennsylvania.

Nambiar, Kannan, Advisor, Student Services. BA 1974, Herbert H. Lehman College, City University of New York; MA 1979, PhD 1984, State University of New York, Stony Brook.

Nan, Susan H. Allen, Assistant Professor of Conflict Analysis and Resolution. BA 1992, University of Virginia; MS 1995, PhD 2000, George Mason University.

Nanian, Richard A., Term Assistant Professor of English. BA 1984, Simon’s Rock College; MA 1995, Salem State College; PhD 2000, University of Wisconsin, Milwaukee.

Naor, Michael, Assistant Professor, Information Systems and Operations Management. BS 1994, Israel Institute of Technology; MBA 1998, Tel-Aviv University; PhD 2005, University of Minnesota.

Napoletani, Domenico, Assistant Professor of Mathematical Sciences. MS 1999, PhD 2005, George Mason University.
Nash, Stephen G., Professor, Systems Engineering and Operations Research. BSc 1977, University of Alberta, Canada; PhD 1982, Stanford University.

Nasser, Ilham, Assistant Professor of Education. BA 1985, MA 1987, Hebrew University, Jerusalem; PhD 1997, University of Maryland.

Nauright, John, Professor of Education. BA 1985, MA 1988, University of South Carolina; Ph.D. 1992 Queen’s University, United Kingdom.

Ndura, Elavie, Associate Professor of Education. BA 1983, University of Burundi; MEd 1987, University of Exeter; EdD 1994, Northern Arizona University.

Nelson, Jill Karen, Assistant Professor, Electrical and Computer Engineering. BS 1998, Rice University; MS 2001, PhD 2005, University of Illinois, Urbana-Champaign.

Nemon, Howard, Assistant Professor, BA 1995, MSW 1996, University of Michigan; PhD 2002, University of Pennsylvania.

Newmark, Lisa C., Term Assistant Professor, Administration of Justice. BA 1982, MA 1985, PhD 1989, University of Connecticut.

Ngalabak, Helon Habila, Assistant Professor, English. BA 1995, University of Jos.

Nguyen, Baotran, Assistant Director, English Language Institute. BA 1997, MA 2000, George Mason University.

Nguyen, Cuong T., Associate Professor of Religious Studies. BA 1970, Van Hanh University, Vietnam; MA 1979, University of California, Santa Barbara; AM 1982, PhD 1990, Harvard University.

Nguyen, Hung M., Associate Professor of Government and Politics. LLB 1960, University of Saigon; MA 1963, PhD 1965, University of Virginia.

Niblock, Janet R., Executive Director, Office of Continuing Professional Education. MA 1992, Virginia Polytechnic Institute and State University.

Nichols, Melissa M., Assistant Professor, English. BA 1993, Northern Kentucky University; MFA 1999, George Mason University.

Nicogossian, Arnauld E.T., Distinguished Research Professor and Center for the Study of International Medical Policies and Practices, School of Public Policy. BA 1956, Lycée Franco-Iranian Razi, Iran; MD 1964, Tehran University; MS 1972, Ohio State University.

Nicotera, Anne Maydan, Associate Professor, Communication. BA 1985, Utica College of Syracuse University; MA 1987, State University of New York, Albany; PhD 1990, Ohio University.

Nikoi, Andrea H., Director of Finance and Human Resources. BS 1987, MBA 1991, Louisiana State University, New Orleans.

Nikolova, Stanislava, Assistant Professor of Finance. BS 1998, State University of New York, Geneseo; PhD 2004, University of Florida.

Nickens, Michael, Assistant Professor of Music. BM 1998, Manhattan School of Music; MM 2001, Yale University; DMA 2006, University of Michigan.

Nolder, S. Lisa, Director of Graduate Student Services, The Volgenau School of Information Technology and Engineering. BA 1995, Hawaii Pacific University; MA 2008, George Mason University.

Norden, Luanne, Instructor and Coordinator of Student Teaching. BS 1981, MA 1984, University of Nebraska.

Nordstrom, David, Term Assistant Professor, Computer Science. BA 1971, University of Michigan; PhD 1976, University of California, Berkeley.

Normile, Loretta A., Associate Professor of Nursing. BSN 1972, MN 1977, University of Pittsburgh; PhD 1989, American University.

Norris, Eugene Michael, Associate Professor of Computer Science. BA 1962, University of South Florida; PhD 1969, University of Florida.

Norton, Priscilla, Professor of Education. BS 1972, Lewis and Clark College; MS 1978, Oregon College of Education; EdD 1982, United States International University.

Nuttall, Thomas J., Term Instructor, Mathematical Sciences. BS 1965, State University of New York, Oneonta; MS 1971, Rutgers University.

Nutter, Sarah E., Associate Professor of Accounting. BS 1980, Ferris State; MBA 1983, PhD 1993, Michigan State University.

Nye, John, Professor of Economics. BS 1981, MA 1983, PhD 1985, Northwestern University.

O

O’Beirne, Richard C., Term Instructor of Mathematics. BA 1971, Fordham University; MA 1972, St. John’s University.

Oberle, George, Head, Johnson Center Library. BA 1996, MA 1999, George Mason University; MLS 2003, University of Maryland.

O’Brien, Alison S., Assistant Professor and Associate Dean of Undergraduate Programs, School of Management. BS 1982, University of Florida; MBA 1986, Brenau College; BS 1995, MA 1998, PhD 2000, George Mason University.

O’Brien, Tami, Director of Communications, College of Health and Human Services. BA 1995, George Mason University.

O’Connor, John Sylvester, Professor, New Century College. AB 1968, University of Michigan; MA 1969, PhD 1974, University of Virginia.

Oerter, Robert N., Term Associate Professor, Physics and Astronomy. BA 1983, Swarthmore College; MS 1987, PhD 1989, University of Maryland.

O’futt, A. Jefferson, Professor, Computer Science. BS 1982, Morehead State University; MS 1985, PhD 1988, Georgia Institute of Technology.

Oh, Kyeung Mi, Assistant Professor of Nursing. BA 1998, University of Newcastle; MS 1999, University of Sydney; PhD 2005, University of Sheffield.

Olds, James, Director, University Professor of Neuroscience, Krasnow Institute for Advanced Study. BA 1978, Amherst College; PhD 1987, University of Michigan.

Olmstead, Todd A., Assistant Professor of Public Policy, School of Public Policy. BS 1987, MS 1989, State University of New York, Buffalo; MS 1994, University of North Carolina; PhD 2000, Harvard University.

Olson, Kristina M., Assistant Professor of Italian. BA 1998, Bard College; MA 2001, PhD 2006, Columbia University.

O’Malley, Michael, Associate Professor of History. BA 1981, Temple University; MA 1984, PhD 1988, University of California, Berkeley.

Opher, Merav, Associate Professor, Physics and Astronomy. BS 1992, PhD 1998, University of Sao Paulo.

Orens, John, Term Associate Professor of History. BS 1965, University of Wisconsin; MA 1968, PhD 1976, Columbia University.

Osborne, Catherine J., Term Instructor, Modern and Classical Languages. BA 1995, Ohio Wesleyan University; MA 1999, University of Florida.

O’Shaughnessy, Thomas J., Research Assistant Professor, Center for Bioresource Development. BS 1990, Johns Hopkins University; MS 1992, PhD 1997, University of Virginia.

Osterling, Jorge P., Associate Professor of Education. BS 1971, Catholic University of Peru; MS 1973, PhD 1978, University of California, Berkeley.

Otto, Ray, Assistant Professor of Genetics, Molecular and Microbiology. BS 1981, PhD 1987, University of North Carolina, Chapel Hill.

Owen, Julie E., Assistant Professor of New Century College., BA 1993, College of William and Mary; MEd 1996, James Madison University.

Owens, Thomas C., Associate Professor of Music. BA 1991, University of North Carolina, Greensboro; MA 1994, PhD 1999, Yale University.

P

Pachowicz, Peter W., Associate Professor, Electrical and Computer Engineering. MS 1981, PhD 1984, Stanislaw Staszic University of Mining and Metallurgy.

Paczynska, Agnieszka, Associate Professor of Conflict Analysis and Resolution, BA 1989, MA 1991, New York University; PhD 2002, University of Virginia.

Paden, John, Robinson Professor of International Studies. BA 1959, Occidental College; MA 1961, Oxford University; PhD 1968, Harvard University.

Paden, Roger K., Associate Professor of Philosophy. BS 1974, MA 1977, PhD 1981, University of Illinois.

Paelinck, Jean P.H., Distinguished Term Professor, School of Public Policy. Doctor of Law, Master in Economics 1948–54, University of Liege, Belgium.
Paez, Deborah, Assistant Director, Development, College of Visual and Performing Arts. BA 2003, University of South Carolina; MA 2007, George Mason University.

Palkovich, Ann M., Associate Professor of Anthropology. AB 1974, University of Chicago; MA 1976, PhD 1978, Northwestern University.

Palubinskas, Ginta, Undergraduate Program Coordinator. BA 1986, Loyola Marymount University; MPA 1993, George Washington University; PhD 2003, George Mason University.

Pankey, Eric, Professor of English, Heritage Chair in Writing. BS 1981, University of Missouri; MFA 1983, University of Iowa.

Pant, Ramesh R., Term Assistant Professor, Chemistry. BSc 1989, MSc 1993, Tribhuvan University, Nepal; MPhil 2000, Kathmandu University, Nepal.

Panniers, Teresa L., Associate Professor of Nursing. AAS 1972, Monroe Community College; BS 1976, Empire State College; MS 1979, PhD 1991, University of Rochester.

Paolitto, Anthony Jr., Associate Professor, Psychology. BS 1980, MA 1983, PhD 1988, University of Connecticut.

Papaconstantopoulos, Dimitrios A., Professor of Physics and Chair, Department of Computational and Data Sciences. BS 1961, University of Athens; DIC 1963, Imperial College of London; MS 1964, PhD 1967, University of London.

Parasuraman, Raja, University Professor, Psychology; Director, Human Factors/Applied Cognitive Psychology Program. BS 1972, University of London; MS 1973, PhD 1976, Aston University.

Parham, Candace S., Instructor of Athletic Training. BS 2003, University of Virginia; MS 2005, George Mason University.

Paris, Bernd-Peter, Associate Professor, Electrical and Computer Engineering and Director, MS in Telecommunications. Dipl-Ing 1986, Ruhr University, Germany; PhD 1990, Rice University.

Park, Chong (Holly), Director of Fiscal Services. BS 1997, MBA 2001, Old Dominion University.

Park, Julie Kim, Term Assistant Professor of English. BA 1993, MS 1994, PhD 2000, University of Pennsylvania.

Park, Minkyung, Assistant Professor of Tourism and Event Management. BA 1990, MA 1993, Han Yang University, Korea; MS 1996, Pennsylvania State University; PhD 2000, Texas A&M University.

Parker, Cindy W., Assistant Professor, Management. BS 1992, MA 1994, PhD 1998, George Mason University.

Parker, Shernita Rochelle, Director of Development, College of Education and Human Development. BA 1992, Boston College; JD 1995, University of Maine Law School.

Parsons, E.C.M., Term Associate Professor, Environmental Science and Policy. BA 1991, MA 1997, Oxford University; PhD 1996, University of Hong Kong.

Parsons, Seth A., Assistant Professor of Education. BA 2002, Centre College; MEd 2005, PhD 2008, University of North Carolina, Greensboro.

Pasnak, Robert, Professor of Psychology. BS 1964, University of Maryland; MS 1965, PhD 1969, Pennsylvania State University.

Patrick, Sondra, Director of Enrollment Development, Regional Campuses. BA, University of Texas; MA, University of Oklahoma; PhD, George Mason University.

Patterson, Pamela, Assistant Vice President and Dean of Students. BS 1989, MS 1991, Eastern Illinois University.
Patton, Sarah, University Dissertation and Thesis Coordinator. BA 2000, University of Pittsburgh; MSLS 2006, Catholic University of America.

Patty, William Jordan, Processing Archivist and Librarian. BA 1998, University of the South; MA 2003, University of Arkansas; MLS 2005, University of Maryland.

Pawloski, Lisa R., Associate Professor and Chair, Global and Community Health. BA 1991, Texas A&M University; MA 1995, PhD 1999, Indiana University.

Payton, Wendy, Assistant Provost for Academic Affairs. BA 1987, University of North Carolina, Chapel Hill.

Peacock, Patricia, Director, Small Business Development Center, Mason Enterprise Center. BA 1976, University of Southern Colorado; MEd 1978, Colorado State University; EdD 1986, Rutgers State University of New Jersey.

Pearson, Jane, Director of Donor Relations and Communications, Development Office. BA 1970, DePauw University.

Pecini, Silva, Assistant Director of Master’s Student Services, School of Public Policy. BA 2004, University of South Florida; MPP 2007, George Mason University.

Pedrick, Merritt W., Assistant Director for Operations, Physical Plant. BS 1978, Pennsylvania State University; MS 1989, University of Florida.

Peixoto, Nathalia, Assistant Professor, Electrical and Computer Engineering. BS 1996, MS 1997, Universidade Estadual de Campinas (UNICAMP), SP, Brazil; DSc 2001, Universidade de Sao Paulo (USP), SP Brazil.

Perdiou, Thomas, Counselor, Student Financial Aid. BA 1987, University of Iowa.

Perlin, Martin, Senior Health Care Executive in Residence and Assistant Professor of Health Administration and Policy. BS 1962, Emory University; MBA 1966, DBA 1971, George Washington University.

Perry, Erek, Director, University Scholars Program. BA 1992, Shawnee State University; MEd 1995, Ohio State University.

Perry, Katherine Ann, Director, VIVA Project, University Libraries. BA 1972, MLS 1974, University of California, Los Angeles.

Perry, Mary Esther, Data Solutions Coordinator, Information Technology. BA 1974, Mount Holyoke College.

Perry, Wayne D., Professor of Public Policy and Operations Research, School of Public Policy. BS 1967, Tuskegee University; MS 1969, University of New Mexico; PhD 1975, Carnegie Mellon University.

Peters, Erin, Assistant Professor of Education. BS 1990, University of Illinois, Urbana-Champaign; MEd 2004, University of Virginia; PhD 2008, George Mason University.
Peters, Esther C., Term Assistant Professor of Environmental Science and Policy. BS 1974, Furman University; MS 1978, University of South Florida; PhD 1984, University of Rhode Island.

Petersen, John E., Professor, School of Public Policy. BA 1962, Northwestern University; MBA 1964, PhD 1967, University of Pennsylvania, Philadelphia.

Peterson, Matthew S., Associate Professor of Psychology. BA 1992, University of Tennessee, Knoxville; MA 1994, PhD 1997, University of Kansas.

Peterson, Todd E., Affiliate Professor of Mathematics. AB 1983, MA 1987, PhD 1990, Cornell University.

Petricoin, Emanuel F., Codirector, Center for Applied Proteomics and Molecular Medicine; Chair, Molecular and Microbiology. BS 1985, PhD 1990, University of Maryland.

Petrik, Paula E., Professor, History and Art History. AB 1969, Cornell University; MFA 1973, University of Montana; MA 1979, PhD 1982, State University of New York, Binghamton.

Pettigrew, Katherine, Term Assistant Professor, Chemistry. BS 1999, California State University, Sacramento; PhD 2004, University of California, Davis.

Pevzner, Mikhail B., Assistant Professor, Accounting. BSB 1999, University of Minnesota; MSBA 2004, PhD 2007, Washington University, St. Louis.

Pfiffner, James P., University Professor, School of Public Policy. BA 1968, MA 1972, PhD 1975, University of Wisconsin, Madison.

Philipov, Alexander, Assistant Professor, Finance. MS 1996, University of Massachusetts, Amherst; PhD 2003, Boston College.

Philpot, Frank Allen, Assistant Professor of Marketing. BA 1967, Vanderbilt University; MA 1968, PhD 1972, Stanford University.

Pierce, Lorraine V., Associate Professor of Education. BS 1974, University of Texas, Austin; MA 1976, University of Texas, San Antonio; PhD 1984, Georgetown University.

Pilon, Jean, Associate Professor of Geography. BA 1969, MA 1974, University of Ottawa; PhD 1983, Université de Montreal.

Pirhalla, Karen C., Arlington Campus executive officer. BS 1980, George Mason University.

Planas, Ramon E., Jr. Term Instructor, Spanish. MA 1978, George Mason University.

Platt, Brian W., Chair, Department of History and Art History; Associate Professor of History. BA 1992, Guilford College; PhD 1998, University of Illinois.

Pober, Peter M., Director of Forensics and Term Professor of Communication. BA 1984, University of Pennsylvania; MA 1991, PhD 1996, University of Texas, Austin.

Pelayes, Deborah, Term Associate Professor, Molecular and Microbiology. BS 1978, University of Connecticut; PhD 1983, Michigan State University.

Pollard, Jeffrey, Director, Counseling Center. BS 1970, MS 1974, Old Dominion University; PhD 1978, University of Virginia.
Polsby, Daniel, Dean and Foundation Professor of Law. BA 1964, Oakland University; JD 1971, University of Minnesota.

Polyak, Roman A., Professor, Systems Engineering and Operations Research; and Professor, Department of Mathematical Sciences. PhD 1966, Central Institute for Economics and Mathematics, USSR Academy of Sciences, Moscow.

Pomietto, Blakely R., Public Health Specialist, Center for the Advancement of Public Health. BS 1999, George Mason University; MPH 2001, University of Maryland, College Park.

Pommerening, Christine, Research Assistant Professor, School of Public Policy. BA 1993, MA 1996, Ruhr-Universitat; PhD 2004, George Mason University.

Pope, John R., Director, English Language Institute. BA 1966, University of New Mexico; MA 1996, George Mason University.

Popov, Serguei, Professor, National Center for Biodefense and Infectious Diseases. MS 1972, PhD 1977, ScD 1992.

Popova, Taissia, Associate Professor, National Center for Biodefense and Infectious Diseases. BA 1972, Novosibirsk University; PhD 1986, All-Union Research Institute for Applied Molecular Biology.

Porter, Jeri W., Head Coach, Women's Basketball. BS 1991, Liberty University.

Portillo, Shannon K., Assistant Professor, Administration of Justice. BA 2004, PhD 2008, University of Kansas.

Price, Elizabeth, Chair of Dance Department and Associate Professor of Dance. BA 1972, Randolph-Macon Women's College; MA 1978, New York University.

Price, James, Research Faculty, Conflict Analysis and Resolution. BA 1972, Lawrence University; MA 1976, PhD 1980, University of Chicago.

Pullen, J. Mark, Professor, Computer Science. BS 1970, MS 1972, West Virginia University; PhD 1981, George Washington University.

Putnam, Nathan, Catalog/Metadata Librarian. BM 2000, University of Wisconsin; MM 2002, Michigan State University; MLIS 2006, Wayne State University.

Q

Qu, John, Associate Professor, Earth Systems and Geoinformation Sciences. BS 1983, Nanjing Institute of Meteorology; MS 1993, PhD 1997, Colorado State University.

Quesnell, Harris, Research Associate, Center for Secure Information Systems. BS 1973, San Diego State University.

Quinn, Patrick J., Director of Student Accounts. BS 1997, University of Phoenix; MBA 2001, Arizona State University.

Quintana, Marian, Director of the Basic Spanish Program and Term Assistant Professor of Spanish. BA 1993, Universidad Complutense, Madrid; MA 1995, Marquette University; PhD 2001, University of Houston.

Quirroz-Maday, Brenda D., Director, Small Business Development Center at the Community Business Partnership, Mason Enterprise Center, School of Public Policy. BS 2000, National Polytechnic Institute; MBA 2005, Georgetown University.

R
Rabin, Lisa Marie, Associate Professor of Spanish. BA 1986, Pomona College; MA 1990, PhD 1993, Yale University.

Rader, Victoria Fries, Associate Professor of Sociology. BA 1966, University of California, Berkeley; MA 1968, PhD 1973, University of Chicago.

Raffel, Dorothy, Term Instructor, English. MA 1974, MBA 1978, University of California, Los Angeles.

Rainer, Ilia, Assistant Professor, Economics. BA 1997, MA 1999, Hebrew University, Israel; PhD 2005, Harvard University.

Rajan, Ramkishen S., Associate Professor of Public Policy. BS 1993, National University of Singapore; MA 1998, University of Michigan; MA 1996, PhD 2000, Claremont Graduate University.

Ramirez, Carlos D., Associate Professor of Economics. BA 1987, Wittenberg University; AM 1991, PhD 1993, Harvard University.

Ramos-Pellicia, Michelle F., Assistant Professor, Modern and Classical Languages. BA 1995, University of Puerto Rico; MA 1999, PhD 2004, Ohio State University.

Rangwala, Huzefa, Assistant Professor, Computer Science. BE 2003, Mumbai University; MS 2005, PhD 2008, University of Minnesota, Twin Cities.

Rappaport, Jocelyn S., Director of Communications, School of Public Policy. BA 1984, University of Virginia; MFA 1991, Sarah Lawrence College.

Rashkover, Randi, Assistant Professor, Religious Studies. BA 1987, Barnard College, Columbia University; MTS 1990, Harvard Divinity School, Harvard University; PhD 2000, University of Virginia.

Razeghi, Jane Ann, Associate Professor of Education. BA 1965, Malone College; MA 1978, EdD 1987, George Washington University.

Rector, Eric, Associate Director, VIVA Project, University Libraries. BA 1993, Southwest Missouri State University; MA 1996, University of Iowa.

Reedy, Karen, Term Assistant Professor of Dance. BFA 1995, George Mason University.

Regan, James D., Director, Procurement Technical Assistance Program, Mason Enterprise Center for Regional Analysis and Entrepreneurship, School of Public Policy. BS 1959, U.S. Naval Academy; MS 1965, U.S. Naval Postgraduate School.

Regan, Kelley, Assistant Professor, College of Education and Human Development. BS 1996; MS 1997, Longwood College; PhD 2005, George Mason University.

Regan, Priscilla M., Professor of Government and Politics. BA 1972, Mount Holyoke College; MA 1975, New York University; MA 1977, PhD 1981, Cornell University.

Reid, Joseph, Associate Professor in Economics. BA 1963, Michigan State University; MBA 1965, MA 1970, PhD 1974, University of Chicago.

Reid, Shelley, Assistant Professor, English. BA 1988, Grinnell College; MA 1991, PhD 1994, State University of New York, Buffalo.

Reinert, Kenneth J., Professor of Public Policy. BA 1980, MA 1982 Boston University; MA 1985, PhD 1988 University of Maryland.
Remsburg, Robin E., Associate Dean, College of Health and Human Services; Director and Professor, School of Nursing. BSN 1978, MSN 1982, University of North Carolina; PhD 1994, University of Maryland.

Rendler, Elaine, Visiting Associate Professor of Music. BMEd 1968, Immaculata College; MM 1972, DMA 1978, Catholic University.

Rennick, Walter L., Lecturer of Geography. BS 1965, Stanford University; MA 1973, University of California, Santa Barbara.

Resmini, Ronald G., Research Professor, Earth Systems and Geoinformation Sciences. BS 1984, Northeastern University; MA 1989, Boston College; PhD 1993, Johns Hopkins University.

Reybald, L. Earle, Associate Professor of Education. BA 1990, MA 1992, PhD 1996, University of Georgia.

Reynolds, Gretchen, Social Sciences Liaison Librarian. BSW, University of Texas; MSI, University of Michigan.

Reynolds, Thomas, Director of Artistic Programming, Marketing and Audience Services, College of Visual and Performing Arts. BA 1979, Luther College.

Rice, Matthew, Associate Professor of Geography and Geoinformation Science. BS 1995, Brigham Young University; PhD 2005, University of California, Santa Barbara.

Richards, Dana S., Associate Professor, Computer Science. MS 1976, University of Virginia; PhD 1984, University of Illinois.

Richards, Phillip, Research Professor of Physics. BS 1972, PhD 1978, La Trobe University.

Richardson, Margaret A., Term Assistant Professor, Art History. BA 1998, Mary Baldwin College; MA 2000, PhD 2005, Virginia Commonwealth University.

Ricouart, Janine M., Professor of French. Eng Lic 1973, Universite de Lille, France; PhD 1986, University of California, Davis.

Riddick, David, Director, Business Development, Executive Programs, School of Management. BA 1974, Monmouth College; MBA 1976, Thunderbird School of Global Management.

Riggle, James D., Associate Research Professor, School of Public Policy. BA 1978, MPA 1980, Northern Illinois University; PhD 2002, George Mason University.

Rikard, G. Linda, Associate Professor of Physical Education. BS 1970, Winthrop University; MEd 1972, University of Georgia; EdD 1979, University of North Carolina, Greensboro.

Rioux-Bailey, Carmen, Instructor of Special Education. BA 1986, Marymount University; MEd 1997, George Mason University; EdS 2003, George Washington University.

Riskind, John Haskell, Professor of Psychology. BA 1970, University of Texas, Austin; PhD 1977, Yale University.

Ro, Young-chan, Chair, Department of Religious Studies, and Associate Professor of Religious Studies. BTh 1965, MTh 1969, Yonsei University; MTh 1973, Union Theological Seminary; PhD 1982, University of California, Santa Barbara.

Robb, Charles S., Distinguished Professor of Law and Public Policy. BBA 1961, University of Wisconsin; JD 1973, University of Virginia.

Robb, Daniel, Director of Graduate Admissions. BA 1984, State University of New York, Albany; MA 1985, Columbia University; MBA 1997, University of Massachusetts, Boston.
Robbins, Suzanne, Assistant Professor, Public and International Affairs. BA 1990, University of Tennessee; MA 1997, University of South Carolina; MA 1999, PhD 2003, State University of New York, Stony Brook.

Roberts, Francine E., Assistant Professor of Nursing. BS 1967, Brigham Young University; MS 1971, State University of New York, Buffalo; PhD 1997, George Mason University.

Roberts, Russell D., Professor of Economics. BA 1975, University of North Carolina; PhD 1981, University of Chicago.

Robinson, David M., Director, Client Relations, ITU. MS 1976, State University of New York, Albany.

Robinson, Gregory, Associate Professor of Ethnomusicology. BA 2002, Colby College; PhD 2008 University of Pennsylvania.

Robinson, Iris M., Associate Registrar for Graduation. AB, Vassar College; MPA, State University of New York, Albany.

Rockmann, Kevin, Assistant Professor, Management. BS 1999, PhD 2004, University of Illinois, Urbana-Champaign.

Rockwood, Larry Lewis, Associate Professor of Biology and Environmental Science and Policy. BS 1965, PhD 1972, University of Chicago.

Rodgers, Ellen B. Drogin, Associate Dean, Associate Professor of Parks, Recreation, and Leisure Studies. BA 1982, Hood College; MA 1985, University of Maryland; PhD 1991, Pennsylvania State University.

Rodgers, R. Pierre, Associate Professor of Sports Management. BA 1984, University of Alabama; MA 1986, Memphis State University; PhD 1991, Pennsylvania State University.

Roe, David A., President, GMU Foundation Inc. MBA 1995, George Mason University.

Rogers, Paul M., Assistant Professor, English. BA 2000, MA 2003, Humboldt State University; MA 2006, PhD 2008, University of California, Santa Barbara.

Rojahn, Johannes, Director, School Psychology Program; Professor, Psychology. Bachelor, PhD 1976, University of Vienna, Austria.

Roman-Mendoza, Esperanza, Associate Professor of Spanish. BA 1989, Universidad Complutense de Madrid, Spain; PhD 1997, Universidad Nacional de Educación a Distancia, Spain.

Rome, Sunny Harris, Associate Professor of Social Work. BA 1976, Occidental College; MSW 1978, University of Michigan; JD 1984, Georgetown University.

Root, Hilton L., Professor of Public Policy. BA 1974, State University of New York, Buffalo; MA 1977, PhD 1983, University of Michigan.

Roper, William, Instructor, Geography. BS 1965, MS 1966, University of Wisconsin; PhD 1969, Michigan State University.

Rose-Robinson, Sia, Assistant Professor of Marketing and Business Communications. BS 1984, University of Maryland; MA 1990, PhD 1999, Howard University.

Rose, Steven R., Professor of Social Work. BA 1973, Brooklyn College, City University of New York; MSW 1975, Washington University; PhD 1981, University of Wisconsin, Madison.

Rosenberg, Jessica, Assistant Professor of Physics and Astronomy. BA 1993, Wesleyan University; PhD 2000, University of Massachusetts.

Rosenberger, William F., Professor and Chair, Statistics. BA 1986, Towson State University; MPhil 1990, PhD 1992, George Washington University.

Rosenblum, Karen E., Professor of Sociology. BA 1970, PhD 1979, University of Colorado.
Roser Renouf, Connie, Term Assistant Research Professor, Communication. BFA 1975, United States International University; MS 1981, San Diego State University; PhD 1986, Stanford University.

Roszkowski, Beth, Public Policy and Management Studies Liaison Librarian. BA 2002, Pennsylvania State University; MLIS 2006, Rutgers University.

Roth, Lori A., Director of Training and Development, Human Resources. BA 1985, MA 1987, Michigan State University; PhD 2003, Virginia Polytechnic Institute and State University.

Rothbart, Daniel, Professor of Philosophy and Conflict Analysis. BA 1972, Faileigh Dickinson University; MA 1975, State University of New York, Binghamton; PhD 1978, Washington University.

Rothstein, Jandos, Assistant Professor of Art and Visual Technology. BA 1986, Antioch College; MFA 1990, Northwestern University.

Rowan, Katherine, Professor of Communication. BA 1975, George Mason University; MA 1978, University of Illinois; PhD 1985, Purdue University.

Rowe, Ellen W., Assistant Professor, Psychology. BA 1983, Davidson College; MA 1995, College of William and Mary; PhD 2005, University of Georgia.

Rowley, Charles, Professor of Economics. PhD 1964, University of Nottingham.

Rozell, Mark, Professor, MPP Program. BA 1982, Eisenhower College; MA 1983, PhD 1987, University of Virginia.

Rubenstein, Richard E., University Professor of Conflict Resolution and Public Affairs. BA 1959, Harvard University; MA 1961, Oxford University; JD 1963, Harvard University.

Rubin, Philip D., Associate Professor, Physics and Astronomy. AB 1976, University of Pennsylvania; MA 1980, MS 1986, PhD 1989, University of California, Los Angeles.

Rudder, Catherine E., Professor, School of Public Policy. BA 1969, Emory University; MA 1972, PhD 1973, Ohio State University.

Rudnicki, Mark S., Term Assistant Professor, English. BA 1991, St. Bonaventure University; MA 1993, University of Memphis; PhD 2003, State University of New York, Buffalo.

Ruiz-Ross, Julia, Term Assistant Professor of Spanish. MA 1990, PhD 1996, Florida State University.

Rustici, Thomas, Term Instructor of Economics. BS 1985, MA 1987, George Mason University.

Ruth, Stephen Ruddy, Professor and Director, International Center for Applied Studies in Information Technology, School of Public Policy. BS 1955, U.S. Naval Academy; MS U.S. Naval Postgraduate School; PhD 1971, University of Pennsylvania.

Rutledge, Amelia Ann, Associate Professor of English. BA 1968, Michigan State University; MPhil 1972, PhD 1974, Yale University.
Rytikova, Ioulia, Assistant Professor, Applied Information Technology. BS 1993, MS 1993, PhD 1997, Technological University, Moscow, Russia.

Rywak, Lauren, Head Coach, Women's Lacrosse. BA 2002, George Mason University.

S

Sacco, John F., Associate Professor of Government and Politics. BA 1965, Pennsylvania State University; MPA 1968, New York University; PhD 1973, Pennsylvania State University.

Sachs, Robert L., Professor, Mathematical Sciences. BA 1976, Harvard University; PhD 1980, Courant Institute, New York University.

Sage, Andrew P., Professor, Systems Engineering and Operations Research. University Professor and First American Bank Professor; Founding Dean Emeritus, The Volgenau School of Information Technology and Engineering. BSEE, Citadel; MSEE, Massachusetts Institute of Technology; PhD 1960, Purdue University; DEngr 1986, University of Waterloo; 1997, Dalhouse University.

Salamonowicz, Paul H., Instructor of Geography. BS 1976, Cornell University; ME 1983, Virginia Polytechnic Institute and State University; MS 1990, PhD 1999, George Mason University

Salinas, Claire, Postdoctoral Fellow, History and Art History. BA 1995, University of Sydney; MPhil 1998, Cambridge University; MA 2000, PhD 2005, Stanford University.

Salisbury, Mona A., Assistant Director, Small Business Development Center, Mason Enterprise Center, School of Public Policy. BS 2004, Cornell University; MS 2008, University of Virginia.

Samara, R. Tony, Assistant Professor, Sociology and Anthropology. BA 1992, St. Lawrence University; MA 1995, City University of New York; MA 1997, University of California, Santa Barbara.

Samaras, Anastasia P., Associate Professor of Education. BA 1972, MEd 1976, PhD 1990, University of Maryland.

Sample, Mark, Assistant Professor, English. BS 1994, Miami University; MA 1998, Georgetown University; MA 2000, PhD 2004, University of Pennsylvania.

Samuelian, Kristin F., Term Associate Professor, English. BA 1983, Catholic University of America; MA 1984, PhD 1992, Boston University.

Samuels, Linda Bartman, Professor of Business Legal Studies. BA 1970, Queens College; MPA 1971, State University of New York, Albany; JD 1975, University of Virginia.

Sanchez, Sylvia Y., Associate Professor of Education. BS 1969, Long Island University; MS 1975, Brooklyn College; EdD 1985, University of Houston.

Sandell, Renee, Professor, Art and Visual Technology. BA 1972, City College of New York; MA 1974, PhD 1978, Ohio State University.

Sander, Evelyn, Associate Professor of Mathematical Sciences. BA 1990, Northwestern University; PhD, 1996, University of Minnesota.

Sandole, Dennis J.D., Professor of Conflict Resolution and International Relations. BA 1967, Temple University; PhD 1979, University of Strathclyde.
Sanford, James Francis, III, Associate Professor of Psychology; Associate Chair for Undergraduate Studies, Department of Psychology. BA 1966, Ohio Wesleyan University; MS 1968, PhD 1973, Kansas State University.

Sanghera, Kamaljeet, Instructor of Applied Information Technology. BA 1996, Delhi University; MS 2001, George Mason University.

Saperstone, Stephen Harold, Professor of Mathematical Sciences. BEP 1962, Cornell University; MA 1965, PhD 1970, University of Maryland.

Satyapal, Shobita, Associate Professor. Physics and Astronomy. BA 1988, Bryn Mawr College; MA 1990, PhD 1995, University of Rochester.

Sauer, Karen L., Associate Professor. BS 1992 Cornell University; MA 1995, PhD 1998, Princeton University

Sauer, Timothy D., COS Distinguished Scholar; Professor of Mathematical Sciences. BS 1977, Michigan State University; PhD 1982, University of California, Berkeley.

Saunders, Catherine E., Term Assistant Professor of English. BA 1986, Harvard University; MA 1998, PhD Candidate, Princeton University.

Saunders, Karen L., Research Instructor, School of Public Policy. BA 1995, Tufts University; MA 2002, American University.

Scales, Rebecca P., Postdoctoral Teaching Fellow, History and Art History. BA 1998, Hollins College; MA 2000, University of Georgia; PhD 2006, Rutgers University.

Scarlata, Jessica, Assistant Professor, English. BA 1993, Tufts University; MA 1998, PhD 2004, New York University.

Schack, Frederick K., Associate Professor of Health and Physical Education. BA 1965, MA 1972, California State University; PhD 1976, Ohio State University.

Schindfeldt, Joseph, Managing Director of the Center for History and New Media. AB 1996, Harvard University; MS 1999, PhD 2003, Oxford.

Scherrens, Maurice William, Associate Professor; Senior Vice President. BS 1970, MBA 1971, Central Michigan University; JD 1976, George Washington University; EdD 1986, University of Southern California.

Schintler, Laurie Ann, Associate Professor, School of Public Policy. BA 1989, University of Iowa; MA 1992, PhD 1995, University of Illinois, Urbana-Champaign.

Schneider, Edwin K., Professor of Climate Dynamics. AB 1970, PhD 1976, Harvard University.

Schoeny, Mara L., Assistant Professor of Conflict Resolution. BA 1986, University of Virginia; MS 1996, PhD 2006, George Mason University.

Schrag, Zachary, Assistant Professor, History and Art History. BA 1992, Harvard University; MA 1997, MPhil 1999, PhD 2002, Columbia University.

Schreifels, John A., Chair and Associate Professor of Chemistry. BS 1975, PhD 1979, University of South Florida.

Schrum, Kelly, Term Assistant Professor, History and Art History. BA 1991, University of California, Berkeley; MA 1996, PhD 2000, Johns Hopkins University.
**Schrum, Lynne R.**, Professor of Education. BS 1968, Southern Illinois University; MA 1976, University of Evansville; PhD 1991, University of Oregon.

**Schum, David A.**, Professor, Systems Engineering and Operations Research. BA 1956, MA 1961, Southern Methodist University; PhD 1964, Ohio State University.

**Schwartzstein, Linda A.**, Professor of Law; Vice Provost for Academic Affairs. AB 1973, Brandeis University; JD 1976, University of Michigan; LLM 1977, New York University; PhD 1994, George Mason University.

**Scimecca, Joseph Andrew**, Professor of Sociology. BA 1962, Hunter College; MA 1965, PhD 1972, New York University.

**Scolaro, Margaret J.**, Term Instructor, English. BA 1994, Mary Washington College; MA 1996, George Mason University.

**Scott, Laura**, Term Associate Professor of English. BA 1986, Kent State University; MFA 1993, George Mason University.

**Scott, Suzanne**, Term Associate Professor, New Century College. BA, Eastern Mennonite College; MA 2000, James Madison University; MFA, Goddard College.

**Scruggs, Thomas**, University Professor of Education, BA 1971, Pennsylvania State University; MEd 1978, Lesley College; PhD 1982, Arizona State University.

**Scully, Randolph**, Associate Professor, History and Art History. BA 1992, Williams College; PhD 2002, University of Pennsylvania.

**Sealey, Nicole J.**, Director of Graduate Admissions & Enrollment Services, The Volgenau School of Information Technology and Engineering. BIS 2001, Virginia State University; MA 2009, George Mason University.

**Sebenick, Carole W.**, Assistant Professor; Counselor, Counseling Center. BA 1984, Dickinson College; MEd 1989, PhD 1998, University of Maryland.

**Segerson, Keith B.**, Assistant Dean for Research Administration and Outreach, School of Public Policy. BBA 1980, MSc 1989, Houston Baptist University; MS 2001, George Mason University.

**Self, Burl**, Professor of Geography. BA, East Central State University; MA, EdD 1978, University of Oklahoma.

**Seligmann, Linda J.**, Professor of Anthropology. BA 1975, Pomona College; MA 1978, University of Texas, Austin; PhD 1987, University of Illinois, Urbana-Champaign.

**Selinsky, Brian**, Director, Registrar IT Services. BA 1969, MA 1971, Michigan State University.

**Sengupta, Partha**, Associate Professor, Accounting. BSc 1983, University of Calcutta; MA 1986, State University of New York, Stony Brook; PhD 1991, Virginia Polytechnic Institute and State University; PhD 1995, University of Florida.

**Seshaiyer, Padmanabhan**, Associate Professor of Mathematical Sciences. BA, MS 1994, Birla Institute of Technology & Science; PhD 1998, University of Maryland.

**Setia, Sanjeev**, Associate Professor, Computer Science. MSc 1987 Birla Institute of Technology and Science (Pilani); MS 1990, PhD 1993, University of Maryland.

**Setto, Donald**, Associate Professor, Bioinformatics and Computational Biology. BA 1980, University of California, San Diego; PhD 1987, Johns Hopkins University.

**Shafighi, Daryoush**, Staff Instructor, Dean’s Office, School of Information Technology and Engineering. BA 1972, University of Isfahan; BS 1980, University of the District of Columbia; MS 1983, George Washington University.

Shaklee, Beverly, Professor of Education. BS 1975, MS 1981, University of Kansas; EdD 1985, Mississippi State University.

Shapiro, Jay A., Professor of Mathematical Sciences. BA 1971, Rider College; PhD 1975, Rutgers University.

Sharp, Joyce L., VATS I&R Coordinator. BS 1989, Longwood College.

Shaw, Lisa E., Undergraduate Student Services Coordinator, Institute for Conflict Analysis and Resolution. BA 1994, Regis University; MS 2009, George Mason University.

Shedd, Juliette R. Rouge, Associate Director for Administration, Institute for Conflict Analysis and Resolution. BA 1998, George Washington University; MS 2005, George Mason University.

Sheehan, Sarah E., Social Sciences Reference/Liaison Librarian, University Libraries. BA 1988, MS 1990, Catholic University of America.

Shehu, Amarda, Assistant Professor of Computer Science. BS 2002, Clarkson University; MS 2005, PhD 2008, Rice University.

Shelby, Lori B., Assistant Professor of Parks, Recreation and Leisure Studies. BA 1994, Wartburg College; MA 1995, University of Wisconsin; PhD 2006, Colorado State University.

Shelley, Louise I., Professor of Public Policy and Director, Terrorism, Transnational Crime, and Corruption Center. BA 1972, Cornell University; MA 1973, PhD 1977, University of Pennsylvania.

Shelton, Victoria, Sciences Reference and Instruction Librarian. BA 1984, Saint Petersburg State University, Russia; MLS 2000, School of Library and Information Studies, Texas Woman’s University.

Shen, Min, Assistant Professor, Accounting. BA 1998, Shanghai University of Finance and Economics; MS 2003, PhD 2005, Michigan State University.

Sheng, Hongwei, Assistant Professor of Computational and Data Sciences. PhD 1997, Shenyang National Laboratory for Materials Science, Chinese Academy of Sciences.

Sheridan, Kimberly, Assistant Professor of Education. BA 1992, Kalamazoo College; EdD 2006, Harvard University.

Sherrard, Donna O., Executive Assistant to the Associate Dean for Research, School of Public Policy. BS 1973, East Carolina University.

Sherwin, Martin J., University Professor of History and Public Policy. AB 1959, Dartmouth College; PhD 1971, University of California, Los Angeles.

Shields, Susan, Professor of Dance. BA 1996, State University of New York, Empire State College; MFA 2003, George Mason University.

Shiner, Whitney T., Associate Professor of Religious Studies. BA 1971, University of Chicago; MA 1980, University of Chicago Divinity School; PhD 1992, Yale University.
Shipley, Scott T., Affiliate Assistant Professor of Earth Systems Science. BA 1971, Beloit College; MS 1973, PhD 1978, University of Wisconsin.

Shiver, John M., Term Instructor of Health Administration and Policy. BS 1968, The Citadel; MS 1975, Virginia Commonwealth University, Medical College of Virginia.

Shockley, K. Gerald, Assistant Professor of Education. BA 1996, BS 1997, MEd 1998, University of Cincinnati; PhD 2003, University of Maryland, College Park.

Short, Jerome L., Associate Chair for Graduate Studies, Associate Professor, Psychology. BA 1984, St. Norbert College; MA 1987, PhD 1990, Arizona State University.

Shortle, John F., Associate Professor, Systems Engineering and Operations Research. BS 1992, Harvey Mudd College; MS 1993, PhD 1996, University of California, Berkeley.

Shukla, Jagadish, Chair, Atmospheric Oceanic and Earth Science and University Professor of Climate Dynamics and Chair, Department of Climate Dynamics. BSc 1962, MSc 1964, PhD 1971, Banaras Hindu University; ScD 1976, Massachusetts Institute of Technology.

Sibley, Edgar H., University Professor, Computer Science and School of Public Policy. BSc, University of London; SM, ME, ScD 1967, Massachusetts Institute of Technology.

Sikdar, Siddhartha, Assistant Professor, Electrical and Computer Engineering. BTEE 1997, Indian Institute of Technology; MS 2001, University of Washington; PhD 2005, University of Washington.

Simmons, Solon J., Assistant Professor of Conflict Resolution. BA 1991, University of Chicago; MS 1999, PhD 2005, University of Wisconsin, Madison.

Simon, Robert, Associate Professor, Computer Science. BA 1981, University of Rochester; PhD 1996, University of Pittsburgh.

Singer, Harvey, Assistant Professor of Information Systems and Operations Management. BA 1978, Queens College of the City University of New York; MA 1984, PhD 1987, Johns Hopkins University.

Singman, David H., Professor of Mathematical Sciences. BS 1972, MS 1976, PhD 1980, McGill University.

Sipes, Jacqueline, Instructional Design Librarian. BA 2003, MSLS 2008, University of North Carolina, Chapel Hill.

Sistek, Mark A., Advising Director, BIS. BFA 1979, Cleveland Institute of Art.

Sizemore, Rachna S., Term Assistant Professor, Administration of Justice. BA 1992, JD, 1995, University of California, Berkeley.

Siverts, Sharon A., Associate Provost for International Relations. BS 1967, MS 1970, Ohio University; PhD 1974, Pennsylvania State University.

Sizemore, Rachna S., Term Assistant Professor, Administration of Justice. BA 1992, JD 1995, University of California, Berkeley.

Sklarew, Daniel M., Term Associate Professor, Environmental Science and Policy. BA 1991, University of Pennsylvania; MA 1993, Boston University; PhD 2000, George Mason University.

Slayden, Suzanne Weems, Associate Professor of Chemistry. BS 1970, PhD 1976, University of Tennessee.
Sluzki, Carlos E., Professor of Global and Community Health, Institute for Conflict Analysis and Resolution, Krasnow Institute for Advanced Study. MD 1960, University of Buenos Aires School of Medicine.

Smith, Colin, Director of Corporate Relations, Intercollegiate Athletics. BA 2003, Lynchburg University.

Smith, Glenn Edward, Professor of Music. BA 1968, MA 1969, California State University; DM 1973, Indiana University.

Smith, Kris M., Associate Provost for Institutional Research and Reporting. BS 1973, Northwest Missouri State University; MEd 1981, South Dakota State University; PhD 1992, University of Michigan.

Smith, Lesley M., Associate Professor, New Century College. BA 1976, University of St. Andrews, Scotland; PhD 1980, Brasenose College, Oxford University, England; MFA 1998, George Mason University.

Smith, Robert F., Professor of Psychology, Director, Biopsychology Program. BS 1971, University of Florida; MA 1976, University of Wisconsin.

Smith, Rodger, Visiting Instructor, Department of Communication; Faculty Advisor, WGMU. BS 1986, James Madison University; MBA 1992, Shenandoah University.

Smith, Suzanne E., Associate Professor of History. BA 1986, University of California, Los Angeles; MA 1988, Carnegie Mellon University; PhD 1996, Yale University.

Smoczynski, Florence I., Assistant Professor of Nursing. BSN 1962, Villanova University; MSN 1978, Catholic University of America; EdD 1998, Virginia Polytechnic Institute and State University.

Snead, James E., Associate Professor of Anthropology. BA 1984, Beloit College; MA 1987, PhD 1995, University of California, Los Angeles.

Snodgrass, Paul, Technology and Web Services Director, Institute for Conflict Analysis and Resolution. BA 2003, University of Arizona; MS 2007, George Mason University.

Snow, Charles, Associate Professor and Associate Chair, Applied Information Technology. BS 1980, MS 1987, PhD 1998, McGill University.

Snyder, Amy M., Assistant Dean, University Life. BS 1995, Clarion University; MA 1997, Clemson University.

Snyder-Hall, R. Claire, Associate Professor of Government and Politics and Director of MAIS Program. BA 1986, Smith College; PhD 1997, Rutgers University.

Snyder, Sondra, Academic Advisor, Academic Support and Advising Services. BA 1960, MEd 1983, University of Maryland.

So, Paul T., Associate Professor of Physics and Astronomy. BA 1988, Scripps College; BS 1988, Harvey Mudd College; PhD 1995, University of Maryland.

So, Sufumi, Assistant Professor of Japanese, Modern and Classical Languages. BA 1980, MA 1982, Seinan Gakuin University; MA 1989, University of Hawaii, Manoa; PhD 1997, University of Toronto.

Sobieralski, Joseph, Director of Finance, University Operations. BS 2001, MA 2003, University of South Carolina.

Sockett, Hugh T., Professor of Public and International Affairs. BA 1959, Christ Church, University of Oxford; MA 1963, University of Oxford; PhD 1974, University of London.

Sofer, Ariela, Professor, Systems Engineering and Operations Research; Chair, Department of Systems Engineering and Operations Research. BS 1972, MS 1979, Technion, Israel Institute of Technology; DSc 1984, George Washington University.

Sokol, Jeffrey L., Contract Assistant Professor, Bioinformatics and Computational Biology. BS 1978, MS 1981, James Madison University; MS 1989, Virginia Polytechnic Institute and State University; PhD 1995, George Mason University.
**Soltan, Valeriu**, Professor of Mathematical Sciences. Foreign degree 1973, State University, Moldovia; Doctorate 1975, Mathematical Institute of the Academy of Sciences of Moldovia.

**Sommer, Rainer**, Associate Professor of Public Policy and Enterprise Engineering, School of Public Policy. BIS 1987, Virginia State University; MS 1989, PhD 1998, George Mason University; PhD 1991, Columbia Pacific University.

**Sommers, William T.**, Research Professor, Co-Director, EastFIRE Laboratory, Earth Systems and Geoinformation Sciences. BS 1965, City College of New York; MS 1967, Massachusetts Institute of Technology; PhD 1972, State University of New York, Albany.

**Sorrell, Jeanne L.**, Professor of Nursing. BSN 1962, University of Michigan; MSN 1975, University of Wisconsin; PhD 1987, George Mason University.

**Souza, João P.**, Assistant Professor, Computer Science. MS 1994, Technical University of Lisbon, Portugal; MS 2003, PhD 2005, Carnegie Mellon University.

**Soyfer, Valery N.**, Distinguished University Professor of Molecular Genetics. BA 1957, Timiryazev Agricultural Academy; MA 1961, Lomonosov State University; PhD 1964, Kurchatov Institute of Atomic Energy, Russia.

**Spaine, Lawrence F.**, Director of the Physical Plant. BS 1968, Virginia Polytechnic Institute and State University.

**Speller, Thomas H. Jr.**, Associate Professor, Systems Engineering and Operations Research. AB 1972, Ohio University; MBA 1974, University of Chicago; MS 2001, PhD 2008, Massachusetts Institute of Technology.

**Spencer, Vicky G.**, Assistant Director of Operations. BS 1982, University of Texas, Dallas; MS 1986, Texas A&M–Commerce; PhD 2002, George Mason University.

**Spousta, Robert F.**, Head Coach of Crew/Rowing Coordinator. MS 1976, University of Massachusetts.

**Sprague, Debra R.**, Associate Professor of Education. BA 1984, Buffalo State College; MA 1991, PhD 1995, University of New Mexico.

**Stahel, Christof**, Assistant Professor, Finance. MA 1997, PhD 2004, Ohio State University.

**Stahley, Susan E.**, Director, Office of Alcohol, Drug, and Health Education. BSW 1979, University of Georgia; MSW 1985, University of Hawaii.

**Stampf, James A.**, Director of Capital Finance, Budget Office. MA 1971, State University of New York, Buffalo.

**Stanica, Miruna**, Assistant Professor, English. BA 2000, University of California, Berkeley; MA 2004, PhD 2008, Stanford University.

**Stanley, Thomas T.**, Term Assistant Professor of Art and Visual Technology. BA 1981, Brown University; MA 2003, University of Maryland.

**Starr, Don**, Academic Advisor and Term Assistant Professor of Art and Visual Technology. BS 1993, University of Maryland.

**Stavrou, Angelos**, Assistant Professor, Computer Science. MSc 2001, National University of Athens, Greece; MS 2002, PhD 2007, Columbia University.

Stearns, Peter N., Provost and Executive Vice President for Academic Affairs. AB 1957, AM 1959, PhD 1963, Harvard University.

Stedman, Diann, Director, of Laboratory Safety, Environmental Health, and Safety Office. BA 1993, University of Pittsburgh; MS 1997, Virginia Commonwealth University.

Steeley, Sherry L., FAST TRAIN Program Field Coordinator. BA 1988, Mount St. Mary’s University; MA 1990, Johns Hopkins School of Advanced International Studies; PhD 2005, George Mason University.

Stefanidis, Anthony, Associate Professor, Earth Systems and Geoinformation Sciences. Dipl Eng 1986, National Technical University of Athens, Greece; MS 1988, PhD 1993, Ohio State University.

Stevens, Andrew, Web Services Librarian, University Libraries. BA, Ohio University; MIS, MSIS, Indiana University.

Stevens, Jen, Reference and Liaison Librarian, University Libraries. BA 1993, MA 1996, University of Colorado; MLIS 2000, University of Texas, Austin.

Stewart, Jeffrey C., Professor of History. BA 1971, University of California, Santa Cruz; MA 1974, PhD 1979, Yale University.

Stockwell, Susan V., Director, Administrative Services Director, ITU. BA 1978, University of Maryland.

Stoehr, Ana Marie, Term Instructor of Nursing. BSN 1998, MSN 2000, George Mason University.

Stoica, Andrei, Assistant Professor, Information and Software Engineering. BS 1997, Polytechnica University of Bucharest; MS 2000, PhD 2004, University of South Carolina.

Stough, Roger R., Vice President for Research and Economic Development, Office of the Provost and Northern Virginia Endowed Chair in Public Policy and Eminent Scholar, School of Public Policy. BS 1964, Ohio State University; MA 1971, University of South Carolina; PhD 1978, Johns Hopkins University.

Stratmann, Thomas, Professor of Economics. BA 1985, Free University of Berlin, Germany; MA 1988, PhD 1990, University of Maryland.

Straus, David M., Professor of Climate Dynamics. PhD 1977, Cornell University.

Studd, Karen, Associate Professor of Dance. BS 1978, MS 1983, University of Oregon; CMA 1987, Laban Institute of Movement.

Stull, Peggy, Research and Evaluation Associate. BSW 1976, MEd 2007, George Mason University.

Sturgis, Jennifer, Staff Director, Krasnow Institute. BA 1984, Knox College; MLS 1986, MS 1988, University of Illinois.

Sturtevant, Elizabeth G., Professor of Education. BA 1972, State University of New York, Oswego; MS 1975, State University of New York, Albany; PhD 1992, Kent State University.

Suh, Hyon-Sook (Joy), Government Documents Librarian, University Libraries. BA 1973, MA 1975, Ewha Women’s University; MA 1980, University of Wisconsin, Milwaukee; MLS 1995, University of Iowa.

Suh, Jennifer M., Assistant Professor of Education. BA 1994, MEd 1994, University of Virginia; PhD 2005, George Mason University.

Summerall, Marjorie, Program Coordinator, Dance. BA 1967, College of Notre Dame of Maryland.
Summers, Michael, Professor of Physics and Astronomy. BA 1976, Murray State University; MS 1987, University of Texas, Dallas; PhD 1985, California Institute of Technology.

Sun, Donglian, Assistant Professor, Earth Systems and Geoinformation Sciences. BS 1986, Nanjing University of Information Science and Technology; MS 1989, Chinese Academy of Meteorological Sciences; PhD 2003, University of Maryland, College Park.

Surina, Susan C., Term Instructor, Statistics. BA 1987, BS, 1987, University of North Carolina, Wilmington; MS 1989, Georgia Institute of Technology.

Sussan, Fiona K., Assistant Professor, Marketing. BA, International Christian University, Japan; MPhil, City University of New York; MBA 2004, PhD 2005, Baruch College, City University of New York.

Sutera, Janice L., Director, University Career Services. BA 1975, University of Delaware; MA 1977, Ohio State University; PhD 1991, University of Maryland.

Sutton, Clifton D., Associate Professor, Statistics. BS 1983, University of Virginia; MS 1985, PhD 1987, Stanford University.

Sutton, William G., Associate Professor of Electrical and Computer Engineering and Associate Chair. BSEE 1965, Syracuse University; MSEE 1968, Case Western Reserve University; PhD 1981, Air Force Institute of Technology.

Svetlana, Nazarenko, Assistant Research Associate, Life Sciences. MS 2001, Kuban State University.

Sweet, Colleen, Term Assistant Professor, Spanish. BA 2000, Roanoke College; MA 2004, Catholic University of America.

Swett, Susan J., Assistant Dean of Student Affairs, College of Health and Human Services. AB 1972, Lafayette College; MEd 1979, Lehigh University.

Tabarrok, Alexander, Associate Professor of Economics. BA 1989, University of Victoria, Canada; PhD 1994, George Mason University.

Taboada, Ana, Assistant Professor of Education. BA 1991, Centro de Altos Estudios en Ciencias Exactas, Buenos Aires, Argentina; MEd 1998, Temple University; PhD 2003, University of Maryland.

Taciuch, Dean F., Term Associate Professor of English. BA 1985, Kent State University; MA 1988, Ohio University; PhD 1991, University of Southwestern Louisiana.

Takats, Sean, Assistant Professor of History. BA 1996, Yale University; PhD 2005, University of Michigan.

Talbot, Lee M., Term Professor of Environmental Science and Public Policy. AB 1953, MA 1963, PhD 1963, University of California, Berkeley.

Talkington, Brigit, Term Instructor and Basic Course Coordinator, Communication. BA 1995, MA 1997, Kansas State University.

Tallent, Eddie Kent, Director of Admissions. BFA 1985, Ringling School of Art and Design.

Talleyrand, Regine, Associate Professor of Education. BA 1991, University of Pennsylvania; MA 1993, PhD 2001, University of Maryland.

Tang, Liansheng, Assistant Professor, Statistics. BS 2000, University of Science and Technology of China; MS 2003, PhD 2005, Southern Methodist University.
Tangney, June Price, University Professor of Psychology. BA 1979, State University of New York, Buffalo; MA 1981, PhD 1985, University of California, Los Angeles.

Tate, Jeannine S., Director of Field Relations, College of Education and Human Development. BS 1972, Oklahoma State University; MEd 1973, University of Oklahoma; PhD 2002, George Mason University.

Taxman, Faye S., University Professor, Administration of Justice. BA 1977, University of Tulsa; MA 1981, PhD 1982, Rutgers University.

Taylor, Eugene, Term Assistant Professor, English. BA 1990, Yale University; MA 2003, North Carolina State University; MFA 2006, George Mason University.

Taylor, George E., Jr., Professor, Earth Systems and Geoinformation Sciences. BS 1971, Randolph-Macon College; PhD 1976, Emory University.

Taylor, Stanley E., Vice President for Metropolitan Relations. BArch 1970, Hampton University; MArch 1976, University of Nebraska, Lincoln.

Tecuci, Gheorghe, Professor, Computer Science. MS 1979, PhD 1988, Polytechnic Institute of Bucharest, Romania; PhD 1988, University of Paris South, Orsay, France.

Ternus, Mona P., Director of Academic Outreach and Associate Professor, College of Health and Human Services. BA 1982, New York University; MSN 1986, Pace University; PhD 2003, Auburn University.

Tetrick, Lois, University Professor of Psychology; Director of Center for Consciousness, Transformation and Human Potential. BA 1971, Drury College; MGA 1978, Georgia State University; MS 1981, PhD 1983, Georgia Institute of Technology.

Thach, Dzung, Research Assistant Professor, Center for Bioresource Development. BS 1996, Virginia Polytechnic Institute and State University; PhD 2001, Johns Hopkins University.

Thatchenkery, Tojo Joseph, Professor and Director, Organization Development and Knowledge Management. BA 1980, MA 1982, University of Delhi; PhD 1993, Case Western Reserve University.

Thomas, Charles Leo, Associate Professor of Education. AB 1963, Harris Teachers College; MA 1966, St. Louis University; PhD 1971, Johns Hopkins University.

Thomas, Gary Lee, Assistant Research Associate, Center for Secure Information Systems. AA 1996, Solano Community College.

Thompson, James, Assistant Professor, Psychology. BA 1996, PhD 2002, Swinburne University of Technology in Melbourne, Australia.

Thompson, Julie E., Operations Manager, Center for the Arts. BA 1981, Lawrence University.

Thompson, Kenneth, Term Associate Professor of English. BA 1972, Williams College; PhD 1993, University of Virginia.

Thorbecke, Willem, Associate Professor of Economics. AB 1982, PhD 1988, University of California, Berkeley.

Thor, Eva K., Associate Professor of Education. BA 1976, Northwestern University; MA 1977, EdD 1987, George Washington University.

Tian, Mingzhen, Assistant Professor of Physics. BS 1984, Nankai University; MS, Changchun Institute of Physics; PhD 1997, Paris-Sud University.

Tichy, Susan, Professor of English. BA 1975, Goddard College; MA 1979, University of Colorado.
Titarchuk, Lev, Research Professor, Computational and Data Sciences. Dr. of Sc. 1972, Space Research Institute (Moscow).

Todd, Ellen Wiley, Associate Professor of Art History. BA 1969, Wells College; MA 1976, University of Colorado, Boulder; PhD 1987, Stanford University.

Toepfer, Stefan, Associate Professor of Government and Politics. PhD 1995, Free University of Berlin.

Tolchin, Susan, University Professor, School of Public Policy. BA 1961, Bryn Mawr College; MA 1962, University of Chicago; PhD 1968, New York University.

Tomasovic, Susan K., Term Instructor, Department of Communication. BS 1969, University of Missouri; MA 1990, George Mason University.

Tomkins, Catherine, Assistant Professor of Social Work and BSW Program Director. BA 1987, University of Maryland, College Park, MSW 1991; PhD 1995, University of Maryland, Baltimore.

Torzilli, Albert Phillip, Associate Professor of Biology. BA 1967, University of Connecticut; PhD 1976, University of Georgia.

Toulouse, Cheryl, Term Instructor of Nursing. BSN 1982, University of Tennessee; MSN 1998, George Mason University.

Trafton, J. Gregory, Affiliate Professor of Psychology. BS 1989, Trinity University; MA 1991, PhD 1994, Princeton University.

Travis, Shirley, Dean and Professor, College of Health and Human Services. BS 1976, MS 1978, Georgia State University; PhD 1985, Virginia Tech.

Travis, Toni-Michelle C., Associate Professor of Government and Politics. AB 1969, Bard College; AM 1973, PhD 1983, University of Chicago.

Trechter, Sherry, Core Faculty Member, English Language Institute. BA 1973, University of California, Irvine; MA 1982, University of California, Los Angeles.

Trefil, James, Robinson Professor of Physics. BS 1960, University of Illinois; BA, MA 1962, Oxford University, England; MS 1964, PhD 1966, Stanford University.

Trencher, Susan, Chair of Sociology and Anthropology; Associate Professor of Anthropology. BA 1969, MA 1972, George Washington University; PhD 1993, Catholic University of America.

Trotman, Adria, Research Associate, Administration of Justice. BA 1999, Spelman College; MA 2004, University of Maryland.

Troxler, Darren, Director of Admissions Operations. BS 1993 East Carolina University; MEd 1995 University of Southern Mississippi.

Trump, Kathryn A., Associate Dean, International, University Life. BA 1968, Carroll College; MA 1982, George Mason University.

Tsvetovat, Maksim, Assistant Professor, Department of Computational Social Science, Krasnow Institute for Advanced Study. BS 1996, MS 1999, University of Minnesota; PhD 2005, Carnegie Mellon University.

Turner, C. Allan, Research Professor of Administration of Justice. BS 1967, Frederick College; MA 1976, University of Missouri; MPA 1984, PhD 1995, University of Southern California.
Uchida, Craig D., Affiliate Faculty, Administration of Justice. BA 1976, University of California, San Diego; MA 1978, State University of New York, Stony Brook; PhD 1982, State University of New York, Albany.

Upperman, James, Associate Professor of Education. BA 1968, Bridgewater College; MEd 1973, University of Virginia; EdD 1995, Virginia Polytechnic Institute and State University.

Urban, Carol Q., Assistant Dean for Undergraduate Programs, School of Nursing; Assistant Professor of Nursing. AA 1978, AS 1978, Glendale Community College; AA in Nursing 1980, Los Angeles Pierce College; BSN 1985, University of Phoenix; MSN 1991, PhD 2006, George Mason University.

Urgessa, Girum, Assistant Professor, Civil, Environmental, and Infrastructure Engineering. BSc 2000, Addis Ababa University, Ethiopia; MSc 2002, PhD 2006, University of New Mexico.

Vaisman, Iosif, Associate Professor, Bioinformatics and Computational Biology. MS 1984, Moscow Institute of Chemical Engineering; PhD 1990, USSR Academy of Sciences.

Vakalahi, Halaevalu, Associate Professor of Social Work and MSW Program Director. BS 1988, Brigham Young University, Hawaii; MSW 1993, University of Hawaii; MEd 1997, PhD 1998, University of Utah.

van Schaik, Matthys K., Associate Dean for Academic Affairs, School of Public Policy. BA 1982, University of Pretoria; MS 1984, Georgetown University; PhD 1995, MLIS 1996, University of South Carolina.

van Hoek, Monique L., Assistant Professor, Molecular and Microbiology. BSc 1990, University of Victoria; PhD 1997, University of Virginia.

VanMeter, Amy J., Research Assistant, Life Sciences. BS 2003, George Mason University.

Vasilyeva, Tatiana M., Term Assistant Professor of Russian. BS 1973, PhD 1984, St. Petersburg State University.

Velea, Luminita M., Research Assistant Professor, Center for Bioresource Development. MS 1993, Polytechnic University of Bucharest, Romania; PhD 2001, University of Mississippi.

Venigalla, Mohan M., Associate Professor, Civil, Environmental, and Infrastructure Engineering. BTech 1985, Sri Venkateswara University; MS 1988, Indian Institute of Technology, Chennai; MS 1990, PhD 1994, University of Tennessee, Knoxville.

Venzke, Margaret, Term Instructor of Nursing. BSN 1979, University of Virginia; MS 1983, Medical College of Virginia Commonwealth University.

Verardo, Stacey, Term Associate Professor of Geology. BS 1986, C.W. Post, Long Island University; PhD 1995, City University of New York.

Verbanic, Joseph R. II., Head Coach, Softball. BS 1982, San Diego State University; MPe, Azusa Pacific University.

Verhoeven, Claudia, Assistant Professor, History and Art History. BA 1994, University of California, Santa Cruz; MA 1999, PhD 2004, University of California, Los Angeles.

View, Jenice, Assistant Professor of Education. BA 1980, Syracuse University; MPA-URP 1982, Princeton University; PhD 1997, Union Institute and University.

Villagran, Melinda, Associate Professor, Communication. BA 1995, University of Texas, Dallas; MA 1997, PhD 2001, University of Oklahoma.
Visvanathan, Gnanakumar, Associate Professor, Accounting. BComm 1981, University of Madras, India; PhD 1996, New York University.

Vivancos Perez, Ricardo, Assistant Professor, Spanish. BA 1996, University of Málaga; MA 2002, Texas A&M University; PhD 2006, University of California, Santa Barbara.

Vlaicu, Sorina O., Assistant Research Professor, School of Public Policy. MD 1996, Carol Davila University of Medicine and Pharmacy; MPH 2001, George Washington University; PhD 2003, George Mason University.

W

Waddington, Daniel, Research Assistant Professor, Administration of Justice. BS 1981, Brigham Young University; MPA 1987, California State University.

Wade, Rex A., University Professor of History. BA 1958, Southwestern College; MA 1960, PhD 1963, University of Nebraska.

Wage, Kathleen E., Associate Professor, Electrical and Computer Engineering. BS 1990, University of Tennessee, Knoxville; SM 1994, EE 1996, PhD 2000, Massachusetts Institute of Technology.

Wagner, Richard E., Harris Professor of Economics. BS 1963, University of Southern California; PhD 1966, University of Virginia.

Walker, Ava J., Associate Professor of Exercise Science. BS 1977, MS 1978, PhD 1991, University of Tennessee.

Walker, Laura M. B., Term Assistant Professor, Public and International Affairs. BA 1974, University of Cincinnati; JD 1977, University of Toledo.

Wallin, John F., Associate Professor of Computational Sciences and Space Sciences. BS 1984, Mankato State University; PhD 1989, Iowa State University.

Walmsley, Janet M. C., Term Assistant Professor, History. BA 1978, University of Maine; MA 1989, State University of New York; PhD 2000, University of California, Riverside.

Walnut, David F., Professor of Mathematical Sciences. AB 1983, Haverford College; MA 1986, PhD 1989, University of Maryland.

Walsch, Daniel L., Press Secretary, Media Relations. BS 1972, University of Tennessee; MEd 1979, Bowie State University; MA 1982, Towson State University.

Walsh, John C., Associate University Librarian for Resources and Collection Management Services, University Libraries. BA 1979, Yale University; MA 1982, MLS 1987, University of Iowa.

Walther, Brian E., Senior Associate University Counsel. AB 1991, Harvard University; JD 1994, George Washington University National Law Center.

Wan, Ming, Director of Global Affairs Program; Professor, Public and International Affairs. BA 1985, Beijing Foreign Languages Institute; MA 1988, Acadia University; PhD 1993, Harvard University.

Wang, Diane, 1-2-1 Coordinator for China. BS, Shen Yang Industrial University; MS, Queens College.

Wang, George H. K., Research Professor of Finance. MA 1968, Northern Illinois University; PhD 1976, Iowa State University.

Wang, Pearl Yun, Associate Professor, Computer Science. BA 1971, Wheaton College; MA 1973, PhD 1980, University of Wisconsin, Milwaukee.
Wang, Shuangbao, Assistant Research Associate, Kellar Institute for Human disAbilities. BS 1984, MS 1992, Southwest Jiao tong University; PhD 1999, Tsinghua University; PhD 2004, George Mason University.

Wang, Xinyuan (Frank), Assistant Professor, Computer Science. BS 1987, Peking University; MS 1990, Chinese Academy of Space Technology; PhD 2004, North Carolina State University.

Wang, Y. Diana, Assistant Professor, Applied Information Technology. MS 2002, PhD 2006, University of Maryland, Baltimore County.

Wanner, Thomas, Associate Professor of Mathematical Sciences. BSc 1989, MSc 1991, PhD 1993, Universität Augsburg.

Wanschura, Patricia B., Term Associate Professor of Psychology. BA 1969, St. Mary’s College; MA 1973, PhD 1974, University of Notre Dame.

Ward, Peter F., Head Coach, Men’s and Women’s Swimming and Diving. BA 1989, University of Arkansas.

Warfield, Wallace, Associate Professor of Conflict Resolution. BA 1962, Howard University; MPA 1986, University of Southern California; PhD 2001, George Mason University.

Warne, Rick, Assistant Professor of Accounting. BS 2002, MA 2002, Brigham Young University; PhD 2008, University of Utah.

Warren, Jason, Term Instructor and Assistant Director of Forensics, Communication. BA 2004, Northwestern University; MA 2006, University of Texas, Austin.

Waters, Nigel, Director, Center for Excellence in Geographic Information Science, Professor of Geography. BA 1972, Cambridge University; MA 1973, PhD 1977, University of Western Ontario.

Weader, Mark S., Head Coach, Wrestling. BA 1999, George Mason University.

Weatherspoon, Gerald L., Assistant Professor of Chemistry. BS 1984, Jackson State University; PhD 1995, University of California, Davis.

Webster, Dennis Wayne, Associate Dean, University Life; Adjunct Faculty, Higher Education Program. BA 1974, Seton Hall University; MA 1977, PhD 1982, University of Maryland.

Webster, J. DeWitt, Assistant Professor of Global and Community Health. BA 1983, MPH 1986, University of Minnesota; PhD 2003, Pennsylvania State University.

Wechsler, Harry, Professor, Computer Science. BS 1971, Tel Aviv University, Israel; MS 1973, Weizmann Institute of Science, Israel; PhD 1975, University of California, Irvine.

Wedel, Janine R., Professor, School of Public Policy. BA 1978, Bethel College; MA 1980, Indiana University; PhD 1985, University of California, Berkeley.

Weeks, Andrea, Assistant Professor, Environmental Science and Policy. BS 1997, Cornell University; PhD 2003, University of Texas, Austin.
Wegman, Edward J., Bernard J. Dunn Professor of Information Technology and Applied Statistics. BS 1965, St. Louis University; MS, PhD 1968, University of Iowa.

Weigel, Robert S., Assistant Professor of Physics. BS 1995, University of Wisconsin, Platteville; MS 1997, University of Illinois, Urbana-Champaign; PhD 2000, University of Texas, Austin.

Weinberger, Steven H., Associate Professor of English. BA 1978, University of Pittsburgh; PhD 1988, University of Washington.

Weingartner, Joseph C., Associate Professor of Physics and Astronomy. BS 1994, State University of New York, Stony Brook; MA 1996, PhD 1999, Princeton University.

Weinstein, Ali A., Assistant Professor and Deputy Director, Center for the Study of Chronic Illness and Disability. BS 1999, Lafayette College; MA 2001, University of Maryland; MS 2004, PhD 2007, Uniformed Services University of the Health Sciences.

Weisburd, David L., Distinguished Professor, Administration of Justice. BA 1976, Brandeis University; MA 1978, PhD 1985, Yale University.

Weisman, David Schor, Affiliate Associate Professor of Psychology. BA 1971, American University; MA 1973, Fairleigh Dickinson University; EdD 1979, Catholic University of America.

Welsh, Caryl, Term Instructor of Nursing. BSN 1977, Wagner College; MSN 1990, University of Nebraska.

Werner, Theresa, Special Education Outreach Coordinator. BS 1980, Louisiana State University; MEd 1982, University of North Carolina, Chapel Hill; JD 1991, Catholic University of America.

Wheeldon, Johannes, Internship Instructor, Administration of Justice. BA 2000, Dalhousie University; LLM 2001, University of Durham.

Wheeler, Douglas J., Affiliate Assistant Professor of Geographic and Cartographic Sciences. BS 1977, MS 1980, Brigham Young University; PhD 1985, University of Utah.

Wheeler, Kathy D., Executive Director, Community Resource Center, Mason Enterprise Center. BA 1991, George Mason University; MBA 1994, Troy State University.

White, E. Bernard, Associate Professor of Systems Engineering; Associate Dean for Undergraduate Studies, The Volgenau School of Information Technology and Engineering. BS 1966, Mississippi Industrial College; MS 1970, University of Illinois; MS 1973, Howard University; PhD 1984, University of Virginia.

White, Elizabeth L., Associate Professor, Computer Science. BS 1985, MS 1986, College of William and Mary; PhD 1994, University of Maryland.

White, Gail Scott, Associate Professor of Art and Visual Technology. BA 1978, Virginia Polytechnic Institute and State University; MFA 1983, Tufts University.

White, James F., Research Associate, Center for Bioresource Development. BS 1996, MA 2000, George Mason University.

White, Stephen, Professor of Education. BA 1974, Coe College; MA 1978, University of Minnesota; PhD 1985, Texas A&M University.

White, Tracy, Chief Financial Officer, GMU Foundation Inc., BBA 1993, College of William and Mary.

Whittington, Frank J., Associate Dean of Academic Affairs, College of Health and Human Services; Professor of Gerontology, Department of Global and Community Health. BA 1968, Mississippi State University; MA 1971, PhD 1975, Duke University.

Wiest, Philip Ray, Associate Professor of Economics. BA 1966, Franklin and Marshall College; MS 1967, Lehigh University; PhD 1976, University of Pittsburgh.

Wiggins, Brenda P., Associate Professor of Parks, Recreation, and Leisure Studies. AB 1975, San Diego State University; MA 1981, University of Maryland; PhD 1994, University of Oregon.

Wiggins, David K., Professor of Physical Education. BA 1974, MA 1975, San Diego State University; PhD 1979, University of Maryland.

Wijesekera, Duminda, Associate Professor, Computer Science. BSc 1981, University of Colombo; MS 1989, PhD 1990, Cornell University; MS 1995, PhD 1997, University of Minnesota.

Wiley, Harolyn, Early Childhood and Special Education Specialist. BS 1979, Appalachian State University; MA 1984, Gallaudet University; PhD 1991, University of Illinois.

Willet, James A., Affiliate Professor, Administration of Justice. BA 1974, Monmouth College; MPA 1975, Pennsylvania State University; JD 1978, University of Richmond.

Willett, James D., Professor, Molecular and Microbiology, and Bioinformatics and Computational Biology. AB 1959, University of California, Berkeley; PhD 1965, Massachusetts Institute of Technology.

Williams, Herbertia, Equal Opportunity Specialist. BA 1991, University of Virginia; JD 1994, George Mason University School of Law.

Williams, K. Nicola, Assistant Professor of Education. BA 1993, MA 1993, University of Virginia; PhD 2003, University of Michigan.

Williams, Mary M., Professor of Education. BS 1977, Eisenhower College; MS 1983, State University of New York; EdD 1992, Boston University.

Williams, Thomas Rhys, Professor of Anthropology. BA 1951, Miami University; MA 1956, University of Arizona; PhD 1956, Syracuse University.

Williams, Walter E., John M. Olin Distinguished Professor of Economics; BA 1965, California State University; MA 1966, PhD 1972, University of California, Los Angeles.

Williams van Rooij, Shahron, Assistant Professor of Education. BA 1968, City College New York; MA 1970, American University of Beirut; PhDd 1980, City University of New York Graduate Center; PhD 2007, George Mason University.

Willis, Boris, Assistant Professor of Dance and Computer Game Design. BFA 2003, George Mason University; MFA 2007, Ohio State University.

Willis, James J., Assistant Professor, Administration of Justice. BA 1991, Pennsylvania State University; PhD 2000, Yale University.

Willis, Odette P., Assistant Professor of Nursing. BSN 1973, Texas Woman’s University; MN 1981, University of California, Los Angeles; MBA 1996, Golden Gate University.

Wilsford, David, Professor of Government and Politics. BA 1977, University of South Carolina; MA 1984, PhD 1987, University of California, San Diego.

Wilson, David B., Chair and Associate Professor, Administration of Justice. BA 1983, Whitworth College; MA 1987, University of Nevada, Las Vegas; PhD 1995, Claremont Graduate School.
Wilson, Deborah J., Associate Athletic Director, Academic Services and Sports Psychologist. BS 1971, James Madison University; MA 1973, Ohio State University; PhD 1986, University of Maryland.

Wiltse, Cathy A., Associate Director, Virginia Small Business Development Center Network. BA 1986, Ursuline College; MPA 2003, George Mason University.

Winant, Peter, Assistant Professor and Associate Chair of Art and Visual Technology. BS 1974, Skidmore College; MFA 1980, Indiana University.

Winchester, Jason B., Assistant Professor Exercise Science. BS 1999, Northwest Missouri State University; MS 2004, University of Wisconsin, La Crosse; PhD 2008, Colorado State University.

Wingfield, Andrew, Assistant Professor, New Century College. BA 1988, Rutgers University; MA 1990, University of Chicago; MFA 1999, George Mason University.

Winkert, Catherine A., Budget Manager, Finance and Administration, College of Visual and Performing Arts. BA 1987, Marymount University.

Winkler, Martin M., University Professor of Classics. MA 1977, West Virginia University; PhD 1982, University of Southern California.

Winsler, Adam, Assistant Professor, New Century College. BA 1988, Rutgers University; MA 1990, University of Chicago; MFA 1999, George Mason University.

Winter, Patrice M., Assistant Research Professor of Rehabilitation Science. BS 1976, MS 1982, Virginia Commonwealth University.

Woitek, Kira M., Director of Annual Giving, Development Office. BS 1992, Babson College; MA 1999, Georgetown University.

Wojtusiak, Janusz, Assistant Professor of Health Administration and Policy. MS 2001, Jagiellonian University; PhD 2008, George Mason University.

Wolf, Paige P., Assistant Professor, Management. BA 1992, University of Delaware; MS 1994, PhD 1996, Virginia Polytechnic Institute and State University.

Wolf-Branigin, Michael, Associate Professor of Social Work. BA 1976, Western Michigan University; 1978, Stockholms Universitet; MSW 1979, University of Michigan; PhD 1999, Wayne State University.

Wolfe, Cathy M., Director, Campus Planning, Facilities. BS, MA 1985, State University of New York Buffalo; MS 2000, Drexel University.

Wolfe, James W., Entrepreneur in Residence and Assistant Professor of Management. BS 1977, MBA 1979, JD 1981, Indiana University.

Wong, David, Professor of Geography and Chair Earth Systems and Geoinformation Sciences. Honour Diploma 1984, Hong Kong Baptist College; MA 1985, PhD 1990, State University of New York, Buffalo.

Wong, Shelley, Associate Professor of Education. BA 1971, University of California, Santa Cruz; MA 1986, University of California, Los Angeles; EdD 1990, Columbia University.

Wood, Kent, Senior Contract Professor, Earth Systems and Geoinformation Sciences. BS 1963, Stanford University; PhD 1973, Massachusetts Institute of Technology.

Wood, Thomas C., Associate Professor, New Century College; Affiliate Professor of Environmental Science and Policy. BS 1986, University of California, Davis; MS 1988, Louisiana State University; PhD 1996, George Mason University.

Wrbiczan, Sue, Assistant Professor of Art and Visual Technology. BA 1993, University of Pittsburgh; MFA 1996, Rhode Island School of Design.

Wren, William Christopher, Term Assistant Professor, Computer Game Design. BA 1996, University of San Francisco.

Wright, Catherine, Term Professor, Communication. BS 1992, Phillips University; MA 1994, Texas Tech University; PhD 2005, Regent University.

Wrigley, Barbara, Executive Director, Women’s Business Center. BA 1976, Hope College; MS 1987, American University.

Wu, Chien-Yen (Jennie), Associate Professor of Nursing. BS 1973, Villanova University; MS 1982, DNSc 1989, George Mason University.

Wu, Yuntao, Assistant Professor, Molecular and Microbiology and Life Science. BS 1985, Wuhan University; MS 1988, Chinese Academy of Sciences; PhD 1998, Queen’s University.

Wulf, Douglas John, Assistant Professor of English. BA 1988, Northwestern University; MA 1993, Wright State University; PhD 2000, University of Washington.

Wulfkuhle, Julia D., Research Professor, Center for Applied Proteomics and Molecular Medicine. BA 1989, Grinnell College; PhD 1996, Purdue University.

Wyczalkowski, Anna K., Term Assistant Professor, Physics and Astronomy. BS 1988, MS 1990, PhD 1998, University of Maryland.

X

Xie, Fei, Assistant Professor, Finance. BS 1998, Tsinghua University; PhD 2005, Vanderbilt University.

Y

Yadav, Alok, Associate Professor of English. BA 1986, University of Toronto; PhD 1993, Cornell University.

Yahya-Zadeh, Massoud, Associate Professor of Accounting. BS 1975, MS 1976, London School of Economics; PhD 1992, Syracuse University.

Yang, Chaowei, Assistant Professor, Earth Systems and Geoinformation Sciences. BS 1995, MS 1997, Northeastern University, China; PhD 2000, Peking University.

Yang, Chi, Associate Professor, Computational and Data Sciences. BS 1982, PhD 1988, Shanghai Jiao Tong University.

Yang, Ruixin, Associate Professor, Earth Systems and Geoinformation Sciences. BSc 1982, Tsinghua (QingHua) University of Beijing, China; MS 1986, PhD 1990, University of Southern California, Los Angeles.

Yang, Wenli, Assistant Professor, Earth Systems and Geoinformation Sciences. BS 1982, Zhejiang University, China; MS 1988, China University of Geosciences; PhD 1997, University of Nebraska, Lincoln.

Yang, Y. Tony, Assistant Professor of Health Administration and Policy. ScD 2006, Harvard University.

Yasai, Masoud, Professor of Management. BSc 1972, Imperial College of Science and Technology, London; MSc 1973, PhD 1979, City University Business School, London.

Yocom, Margaret Rose, Associate Professor of English. BA 1970, Pennsylvania State University; MA 1972, PhD 1980, University of Massachusetts.
Yoon, Yong, Term Associate Professor of Economics. B.S. 1967, Ph.D. 1977, Ph.D 1986. Northwestern University.

Young, Adele E., Assistant Professor of Nursing. BS 1974, University of Pennsylvania. MSN 1984, PhD 1996, University of Maryland.

Z

Zaccaro, Stephen J., Associate Professor of Psychology. BA 1979, Fairfield University; MA 1980, PhD 1981, University of Connecticut.

Zagarri, Rosemarie, Professor of History. BA 1977, Northwestern University; MA 1978, M.Phil 1980, PhD 1984, Yale University.

Zamon, Mary E., Assistant Director of Institutional Assessment. MAT 1983, Webster University; MSFS 1967, Georgetown University.

Zawacki, Terry Myers, Associate Professor of English. BS 1967, Southern Illinois University; MA 1981, New York Institute of Technology; DA 1995, George Mason University.

Zenkov, Kristen, Associate Professor of Education. BA 1989, University of Notre Dame; MEd 1993, University of Illinois, Chicago; PhD 2000, University of Wisconsin, Madison.

Zhang, Jie, Assistant Professor, Computational and Data Sciences. BS 1990, Nanjing University; MS 1993, Purple Mountain Observatory; PhD 1999, University of Maryland.

Zhang, Karl Kuan, Program Director and Term Associate Professor of Chinese. BA 1982, MA 1985, Fudan University; PhD 1999, Stanford University.

Zhang, Suning, Instructor of Accounting. BS 1992, East China Normal University; MBA 1998, Ohio State University; PhD 2007, University of Minnesota.

Zhao, Erhai, Assistant Professor of Physics. MS 1999, Fudan University; PhD 2005, Northwestern University.

Zhao, Xiaouquan, Associate Professor, Communication. BA 1993, Shaanxi Teacher’s University; MA 1996, Beijing University; MA 2001, Indiana University; PhD 2005, University of Pennsylvania.

Zhong, Yutao, Assistant Professor, Computer Science. BS 1997, ME 2000, Nanjing University, China; MS 2002, PhD 2005, University of Rochester.

Zhou, Quiping (Pearl), Assistant Professor of Nursing. Diploma in Nursing 1980, Zong Hou Nursing College; MSN 1994, University of Alberta; PhD 2001, University of Maryland.

Zhou, Ying, Assistant Director, Institutional Assessment. BA 1996, Beijing Foreign Studies University; MEd, PhD 2003, Pennsylvania State University.

Zietsman, Lizette, Assistant Professor of Mathematical Sciences. BSc 1990, MSc 1992, PhD 2000, University of Pretoria.

Zimmerman, Emily, Lab Coordinator, Center for Social Science Research, Sociology and Anthropology. BA 1989, MS 1993, PhD 2001, City University of New York.

Zingraff, Matthew T., Associate Dean for Research, College of Humanities and Social Sciences; Professor of Administration of Justice. BS 1971, Virginia Commonwealth University; MS 1973, PhD 1976, Bowling Green State University.

Zolnik, Edmund J., Assistant Professor, Geography. BS 1985, Fairfield University, MA 2000, PhD 2004, University of Connecticut.

Zoltek, Stanley M., Associate Professor of Mathematics, Department of Computational and Data Sciences. BS 1970, St. John’s University; MA 1973, PhD 1976, State University of New York.
Krasnow Institute for Advanced Study

Phone: 703-993-4333
Web: krasnow.gmu.edu

Administration

James L. Olds, Director
Kenneth De Jong, Associate Director
James L. Olds, Chair, Department of Molecular Neuroscience
Claudio Cioffi-Revilla, Chair, Department of Computational Social Science

Faculty

The Krasnow Institute for Advanced Study seeks to expand the understanding of mind, brain, and intelligence by conducting research at the intersection of the separate fields of cognitive psychology, neurobiology, and the computer-driven study of artificial intelligence and complex adaptive systems, including social systems. These separate disciplines increasingly overlap and promise progressively deeper insight into human thought processes. The institute also examines how new insights from cognitive science research can be applied for human benefit in the areas of mental health, neurological disease, education, computer design, and social system analysis.

The Krasnow Institute for Advanced Study was chartered in 1990 as a private nonprofit Virginia corporation and merged with Mason in 2002, becoming a chartered institute under the Office of the Provost. The Center for Social Complexity joined the Krasnow Institute in 2005. In 2007, the institute became an academic unit housing the Department of Molecular Neuroscience and the Department of Computational Social Science (pending SCHEV approval). With an annual budget of $3.1 million, the institute is home to a scientific staff of 60. Cognitive research at the institute spans from molecules to the mind to social systems. Krasnow scientists have published extensively in the most prestigious scholarly journals and collectively have brought in more than $22 million in sponsored research from federal agencies such as the National Institutes of Health and private sources such as the Sir John Templeton Foundation.

GRADUATE PROGRAMS

■ Neuroscience, PhD       SC-PHD-NEUR

Phone: 703-993-4381
Web: neuroscience.gmu.edu

The Krasnow Institute, together with the College of Science (COS) and the College of Humanities and Social Sciences (CHSS), oversees the campuswide Neuroscience Council in developing the Neuroscience PhD curriculum.

Neuroscience PhD courses are listed under NEUR in the Course Descriptions section of this catalog. Neuroscience PhD admissions and program requirements are listed under Neuroscience in the College of Science section of this catalog.

■ Computational Social Science, PhD       SC-PHD-CSS

Phone: 703-993-1402
Web: socialcomplexity.gmu.edu
E-mail: cssgrad@gmu.edu
The core objective of the PhD in Computational Social Science (CSS) Program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

Admission Requirements

Applicants should have a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline, and have taken undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably an object-based language. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.25. To apply, prospective students should send to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE. TOEFL scores are required of all international applicants.

Degree Requirements

Students must maintain a minimum GPA of 3.00 in the program. The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding a master’s degree, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses. A maximum of 24 credits of prior graduate course work may be transferred, provided such credits have not been used for another degree. The 48 credits of courses have the functional distribution and learning objectives indicated below:

- 12 credits of required core CSS courses:
  - CSS 600 Introduction to Computational Social Science
  - CSS 605 Object-Oriented Modeling for Social Science
  - CSS 610 Computational Analysis of Social Complexity
  - CSS 620 Origins of Social Complexity

- 6 credits of extended core CSS courses taken from the following:
  - CSS 625 Complexity Theory in the Social Sciences
  - CSS 645 Spatial Agent-Based Models
  - CSS 692 Social Network Analysis

- 15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge

- 15 credits of elective courses or independent research, as approved by the student’s advisor, to provide further substantive or methodological specialization as needed. (Students possessing a strong background in computing, such as an MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, such as a BS in economics, will be required to use most or all of these electives in computing courses.)

- 24 credits of dissertation research to demonstrate doctoral-level originality and research excellence

Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality
- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, cyberwarfare
During the first year, each student will form a graduate studies committee, called the First-Year Committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

The candidacy exam is taken after students have completed all core requirements and a majority of additional course work (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen area of concentration; ability to integrate materials from different courses; and potential for a successful dissertation.

The exam will consist of written and oral parts. On passing the candidacy exam and submitting an acceptable dissertation proposal, students are advanced to doctoral candidacy. The degree is awarded on the successful defense of a PhD dissertation that represents a detailed written report of an original and significant research contribution to the CSS field.

### Graduate Certificate in Computational Social Science  
**SC-CERG-CSS**

This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at Mason and all students who hold a bachelor’s degree from an accredited university. The CSS certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Students in the CSS certificate program must take both CSS 600 Introduction to Computational Social Science and CSS 610 Computational Analysis of Social Complexity. Students are also required to take a minimum of 9 credits in elective courses (for example, CSS 605, 620, 692). Students may include a maximum of 3 credits of programming courses to meet the requirements. Such programming courses as procedural, object-oriented languages, or other approved programming approaches (such as CSI 603 or 604 Introduction to Scientific Programming I or II may be used with approval of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages (such as CSI 606 and 607), may also be used to meet the requirements with prior approval of the director. Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS course work intended to satisfy requirements. They must also have their course work plan approved by the director.

### Admission Requirements

Applicants should have an undergraduate degree from an accredited institution with a GPA of at least 3.00. To apply, prospective students should send to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.
Applied Music Faculty

Bassoon

Douglas Kehlenbrink, Adjunct Associate Professor. BS, Ball State University; MM, James Madison University. Former faculty member, James Madison University.

Cello

Robert Park, Adjunct Assistant Professor. BS, University of Maryland, College Park; MM, DMA, Catholic University of America; principal cellist, U.S. Army Band of Washington, D.C. (Army Orchestra and Strolling Strings).

Loran Stephenson, Adjunct Associate Professor. BM, Curtis Institute of Music; MM, Catholic University of America; National Symphony Orchestra; former member, U.S. Army Band of Washington, D.C.

David Teie, Adjunct Associate Professor, Cello. BM, Peabody Conservatory of Music of the Johns Hopkins University; cellist, National Symphony Orchestra, Washington, D.C.

Clarinet

Sharon Bonneau, Adjunct Assistant Professor. BM, BME, Eastman School of Music; MA, George Mason University; former clarinetist, U.S. Air Force Band of Washington, D.C.

Lora Ferguson, Adjunct Associate Professor. BM, Oberlin Conservatory; MM, Catholic University of America; clarinetist, Kennedy Center Opera House Orchestra; Capitol Woodwind Quintet.

Brian Jones, Adjunct Assistant Professor. BME, Florida State University; MM, Baylor University; DMA, Catholic University of America; former member, U.S. Air Force Band of Washington, D.C.; instructor of clarinet, Levine School of Music.

Composition

Steve Antosca, Adjunct Assistant Professor. BA, Tulane University; MM, Peabody Conservatory of Music of Johns Hopkins University; Artist-in-Residence, Duke Ellington School of the Arts; cochair, Composition Department at Levine School of Music.

Glenn Smith, Professor. BA, MA, California State University, Hayward; DMus, Indiana University.

Mark Camphouse, Professor. BM, MM, Northwestern University; former director of bands, Radford University.

Conducting

Stanley Engebretson, Professor. BA, MA, University of North Dakota; DMA, Stanford University; artistic director, Masterworks Chorus and Orchestra; music director, New York Avenue Presbyterian Church; former associate conductor, Minnesota Chorale.

Anthony Maiello, Professor. BS, MS, Ithaca College; Director of Instrumental Music Studies, George Mason University; former chairman of performance, Potsdam College of State University of New York; former associate conductor, McLean (Virginia) Orchestra.

Mark Camphouse (see Composition)
Euphonium

Roger Behrend, Adjunct Professor. BME, Michigan State University; MA, George Mason University; solo/principal euphoniumist, U.S. Navy Band of Washington, D.C.

Flute

Judith Lapple, Adjunct Professor. BM, Eastman School of Music; MM, Northeast Louisiana University; former principal flutist, U.S. Air Force Band of Washington, D.C.

Thomas Perazzoli, Adjunct Associate Professor. Philadelphia Musical Academy; flutist, National Symphony Orchestra.

Guitar (Classical)

Larry Snitzler, Adjunct Professor. Former student of Andres Segovia (guitar) and Nadia Boulanger (theory).

Guitar (Jazz)

Richard Whitehead, Adjunct Assistant Professor. Former member U.S. Air Force Airmen of Note.

Harp

Jeanne Chalifoux, Adjunct Assistant Professor. Artist Diploma, Curtis Institute of Music; former harpist, National Gallery Orchestra and National Symphony Orchestra.

Horn

Eric Moore, Adjunct Assistant Professor. BME, BA, Boston University; MM, University of Texas at Austin; principal horn, U.S. Navy Band and Fairfax Symphony.

Edwin Thayer, Adjunct Associate Professor. BM, MM, University of Illinois; hornist, National Symphony Orchestra.

David Whaley, Adjunct Associate Professor. BME, Drake University; MM, DMA, University of Illinois; hornist, National Symphony Orchestra.

Koto

Kyoko Okamoto, Adjunct Assistant Professor. Bachelor in Languages, Kyoto University of Foreign Studies; Toho Kinshu Kai (Koto School).

Oboe

Lorrie Berkshire-Brown, Adjunct Assistant Professor. BM, Arizona State University; MM, Manhattan School of Music; oboist, U.S. Army Band of Washington, D.C.; substitute oboist, New York Philharmonic Orchestra.

Organ

William Neil, Adjunct Professor. BA, Pennsylvania State University; MM, Syracuse University; University of Michigan; Juilliard School; organist and keyboardist, National Symphony Orchestra, Chamber Soloists of Washington.
**Percussion**

*Kenneth Harbison*, Adjunct Associate Professor. BM, Eastman School; MM, Catholic University of America; assistant principal percussionist, National Symphony Orchestra.

*John Kilkenny*, Adjunct Assistant Professor. BM, The Juilliard School; MM, Temple University; music director, Metropolitan Wind Symphony; cochair, University of Maryland Summer Percussion Workshop.

**Percussion (Jazz)**

*Harold Summey*, Adjunct Assistant Professor. MM, Howard University; member, U.S. Army Band.

**Piano**

*Anna Balakerskaia*, Adjunct Artist Professor. MM, DMA, St. Petersburg State Conservatory, Russia; former faculty member, Moscow and St. Petersburg State Conservatories.

*Joanne Haroutounian*, Adjunct Associate Professor. BA, Trenton State College; MA, American University; PhD, University of Virginia; pedagogy author, lecturer, and clinician.

*Linda Apple Monson*, Associate Professor. BMEd, MM, DMA, Peabody Conservatory of Music of Johns Hopkins University; diploma (piano performance), Santiago de Compostela, Spain; former faculty member of Peabody Institute, College of Notre Dame of Maryland, and Northern Virginia Community College.

**Piano (Jazz)**

*Wade Beach*, Adjunct Assistant Professor. BM, MM, University of Maryland; former member, U.S. Air Force Band Airmen of Note.

**Saxophone**

*Richard Parrell*, Adjunct Assistant Professor. BA, BM, George Mason University; MME, North Texas State University; solo principal saxophonist, U.S. Army Band of Washington, D.C.

*Timothy Roberts*, Adjunct Associate Professor, Saxophone. BM Northwestern University; MM, DMA Catholic University of America; principal saxophonist and a National Tour soloist with the United States Navy Band in Washington, D.C.; coordinator of the Navy Band’s International Saxophone Symposium.

*Dale Underwood*, Adjunct Professor. Texas Tech University; former saxophone soloist, U.S. Navy Band of Washington, D.C.

**String Bass**

*Glenn A. Dewey*, Adjunct Associate Professor. BM, University of Illinois; MM, Northwestern University; bassist, U.S. Marine Band of Washington, D.C.; former double/electric bass instructor, Millikin University.

**Trombone**

*Matthew Neff*, Adjunct Assistant Professor. BS, MEd, Pennsylvania State University; MM, Catholic University; bass trombonist, U.S. Navy Band.
Harry Watters, Adjunct Associate Professor, Jazz Trombone. BM, University of North Texas; MM, University of New Orleans; United States Army Band-Army Blues; United States Army Band-Brass Quintet; Yamaha clinician.

Trumpet

Stanley Curtis, Adjunct Associate Professor. BM, University of Alabama; MM, Cleveland Institute of Music; trumpeter, U.S. Navy Band.

Dennis Edelbrock, Adjunct Professor. BME, University of Iowa; MA, DMA, Catholic University of America; trumpeter, U.S. Army Band of Washington, D.C., and National Gallery Orchestra.

Kenneth Rittenhouse, Adjunct Assistant Professor, Jazz Trumpet. BA, Performance, West Virginia Wesleyan College; MM, Jazz Studies, University of Maryland; additional graduate study, Eastman School of Music; member of the United States Army “Blues” Jazz Ensemble in Washington, D.C.; performs regularly with the Smithsonian Jazz Masterworks Orchestra.

Tuba

Roger Behrend (see Euphonium).

Viola

Edwin Johonnott, Adjunct Professor. Former violinist, National Symphony Orchestra. Studied at Indiana University and Illinois University.

Ramon Scavelli, Adjunct Associate Professor. Philadelphia Musical Academy; violist, National Symphony Orchestra.

Violin

James E. Gardner, Professor and Chair, Department of Music. BM, Oklahoma City University; MM, DMA, Southwestern Baptist Theological Seminary.

Peter Haase, Adjunct Professor. MM, State Conservatory of Music, Katowice, Poland; postgraduate studies, Moscow Conservatory and the Juilliard School; violinist, National Symphony Orchestra.

Edwin Johonnott (see Viola).

Voice

Samuel Bonds, Adjunct Associate Professor. Faculty member, Duke Ellington School for the Arts.

Carla Rae Cook, Adjunct Associate Professor. BM, University of Utah; MM, Boston University; Postgraduate Studies, Manhattan School of Music; performing dramatic mezzo-soprano.

Stanley Engebretson (see Conducting).

Kathryn Hearden-Botelho, Adjunct Professor. BM, St. Norbert College; MM, Performers Certificate, DMA, Eastman School of Music.

Laura Mann, Adjunct Professor. BM, MM, Eastman School of Music; DMA, University of Maryland.

Patricia Miller, Professor. BM, Boston University; MM, New England Conservatory; Artist Diploma, Accademia di Santa Cecilia (Rome); Advanced Vocal Studies, Mozarteum, Salzburg, Austria.
Seong Nam, Adjunct Assistant Professor. BM, Han-Yang University; MM, University of Maryland; chorus member, Washington National Opera; music director, Gyung Hyang Garden Presbyterian Church.

Richard Novak, Assistant Professor, Tenor. BM, MM, Stephen F. Austin University; DMA, University of North Texas; semifinalist-Metropolitan Opera National Council. Regional Auditions, Singer of the Year-National Association of Teachers of Singing; Wichita Grand Opera, Gilmore International Keyboard Festival, Monroe Symphony, the Living Opera, San Antonio Symphony, Des Moines Metro Opera, American Bel Canto Opera.

Debby Wenner, Adjunct Assistant Professor. BS, Frostburg State College; MM, George Washington University; graduate work, West Virginia University, Catholic University of America; former member, Metropolitan Opera Apprentice Program; performing mezzo-soprano.
## Course Information Directory

### Glossary

This section lists George Mason University’s undergraduate and graduate courses that are available for credit. Courses are listed in alphabetical order. The subject code for courses and the programs offering the courses are as follows:

**Semester Notation**

Some course descriptions include one of the following semester notations. Although circumstances may cause a unit to deviate occasionally from these notations, students should use this information to plan their programs of study.

- **f**: usually available only in the fall semester
- **f, sum**: available only in fall and summer
- **f, s, sum**: usually available every semester
- **af, as**: offered only in alternate fall or spring semesters
- **ay**: offered only in alternate years
- **ir**: offered on an irregular basis at the discretion of the department or school

**Course Numbering**

**General Information**

Course titles are followed by numbers in parentheses (0:0:0), separated by colons. The first number refers to the number of credits; the second number, hours of lecture or seminar per week; and the third number, hours of laboratory or studio per week. For independent study, readings, topics, or similar courses, individual instructors set hours.

**Undergraduate**

Courses numbered 499 and below are undergraduate courses. Course numbers in the 100 series are customarily taken by freshmen, the 200 series by sophomores, the 300 series by juniors, and the 400 series by seniors. The number designations of the course descriptions in this chapter have the following significance:

- A single number (HIST 301) indicates the course is complete within a single semester, and the semester course may be taken separately with credit toward a degree.
- A double number separated by a comma indicates that the subject matter or content of the course extends through two
semesters, but that either semester may be taken by itself. Unless otherwise specified, the first semester is not prerequisite to the second semester

**Graduate**

Graduate courses are divided into the following categories:

- **500–699**: Open only to graduate students admitted to master’s or doctoral programs; other bachelor’s degree holders; and approved, advanced undergraduate students. Advanced undergraduate students who have secured the permission of the department offering the course may select from these courses to accumulate the hours necessary to complete an undergraduate degree. With the written permission of the dean of their college, they may take these courses for reserve graduate credit.
- **700–799**: Open only to students admitted to graduate degree or certificate programs.
- **800–999**: Primarily doctoral courses open only to students admitted to graduate degree programs.

Degree programs may extend permission to enroll bachelor’s degree holders.

Courses with the following numbers are reserved for the uses designated:

- **600–609**: Limited applicability, graduate-credit courses, normally intended for in-service professional development and not directly leading to a graduate degree. A limited number of credits from these courses may be applied to a graduate degree.
- **798**: Master’s research
- **799**: Master’s thesis
- **800**: Studies for the doctor of philosophy in education program
- **998**: Doctoral dissertation proposal
- **999**: Doctoral dissertation research
- **790, 890**: Supervised practicum
- **794, 894**: Internship
- **796, 896**: Directed reading and research courses for master’s and doctoral students
Courses
Reading Course Descriptions

ACCT 203 - Survey of Accounting

Credits: 3

Introduction to accounting from the viewpoint of those who prepare and use financial information. Topics include using accounting information; creating financial statements; an overview of the firm's operating, financing, and investing activities; and an introduction to product costing, operating budgets, and capital investment decisions. Lecture, recitation format; requires attendance in weekly lecture and weekly recitation.

Prerequisites
Grade of C or higher in ECON 103.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
Fall, Spring, Summer.

ACCT 301 - Financial Accounting and Managerial Decision Making

Credits: 3

Examines financial accounting from the viewpoint of both users and preparers of financial statements, emphasizing use of financial statement information to make financing, operating, and investing decisions. International Financial Reporting Standards (IFRS) are introduced.

Prerequisites
Grade of C or higher in ACCT 203 or equivalent, sophomore standing.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
When Offered
Fall, Spring, Summer.

ACCT 311 - Managerial and Cost Accounting

Credits: 3
Develops skills in identifying business processes, transforming data into useful information, and making managerial decisions. Designed for students in all areas of management, especially those whose career aims include cost management. Topics include analyzing and managing costs, developing cost systems that facilitate decision making, identifying opportunities for improving business process, creating financial and operating budgets for planning and control, and developing measures to assess performance.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
Fall, Spring.

ACCT 331 - Intermediate Financial Accounting I

Credits: 3
Deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision-useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include the accounting process and the conceptual framework, financial statements, and accounting for current and noncurrent assets and liabilities. International Financial Reporting Standards (IFRS) are discussed.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
When Offered
Fall, Spring.

ACCT 332 - Intermediate Financial Accounting II

Credits: 3
Deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include bonds, owners' equity, cash flows, accounting changes, and accounting for investments, income taxes, leases, and pensions. International Financial Reporting Standards (IFRS) are discussed.

Prerequisites
Degree status, grades of C or higher in ACCT 331 and FNAN 301.

Notes
This course is a continuation of ACCT 331.

Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
Fall, Spring.

ACCT 351 - Taxation and Managerial Decision Making

Credits: 3
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ACCT 361 - Accounting Information Systems

Credits: 3
Introduction to accounting information systems, focusing on a conceptual basis for transaction processing. Handling and processing of transactions in revenue, expenditure, and payroll cycles serves as platform for developing and manipulating accounting information within a computerized transaction-processing and electronic data environment.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
Fall, Spring.

ACCT 372 - Business Analysis and Valuation

Credits: 3
Expands on students' ability to use financial statement information for business valuation and financial analysis transactions including credit analysis, risk assessment, risk management, bankruptcy prediction, and equity valuation. Uses actual case studies to provide in-depth analysis of the use of financial statement information.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ACCT 382 - Financial Analysis and the Business Life Cycle

Credits: 3
Uses multidisciplinary approach to analyze major events in the financial lifecycle of business firms. Topics include start-up activities such as obtaining venture capital and selecting the appropriate business form; high-growth transactions such as stock-option arrangements and initial public offerings; complex corporate structure issues including mergers and alliances; multijurisdictional operations, especially consolidated financial statements, foreign tax credits, currency translations, and currency hedges; downsizing the firm via spin-offs, divestitures, plant closings, and asset sales; and bankruptcy proceedings, including loan workouts.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.
ACCT 411 - Advanced Managerial Accounting

Credits: 3
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting.

Prerequisites
Degree status, grade of C or higher in ACCT 311.

ACCT 433 - Advanced Financial Accounting

Credits: 3

Prerequisites
Degree status, grade of C or higher in ACCT 332.

ACCT 451 - Advanced Federal Taxation

Credits: 3
Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers.

Prerequisites
Degree status, grade of C or higher in ACCT 351.
ACCT 461 - Assurance and Audit Services

Credits: 3
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information.

Prerequisites
Degree status, grades of C or higher in ACCT 331 and 361.

ACCT 462 - Honors Seminar in Accounting

Credits: 3
An in-depth study and analysis of contemporary developments and topics of interest in accounting.

Prerequisites
Accounting major, senior standing, permission of the instructor.

Notes
The topics and format will vary. Enrollment in this course is limited and competitive.

ACCT 472 - Government and Not-for-Profit Accounting
Credits: 3
Introduction to accounting for nonbusiness organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, charitable organizations, and the federal government.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
Fall, Spring.

ACCT 491 - Seminar in Accounting

Credits: 3
Advanced study of accounting concepts and selected topics.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ACCT 499 - Independent Study

Credits: 1-3
Research and analysis of selected problems or topics in accounting.

Prerequisites
9 credits in upper-level accounting courses, degree status.

Notes
Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ACCT 741 - Information Technology Auditing
Credits: 3  
**Cross-Listed with MBA 741**

Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls.

**Prerequisites**  
Admission to MSA or MBA program, or permission of program director.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**When Offered**  
Fall

---

**ACCT 742 - Corporate Governance and Ethics**

Credits: 3  
**Cross-Listed with MBA 742**

Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment.

**Prerequisites**  
Admission to MSA or MBA program, or permission of program director.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**When Offered**  
Spring

---

**ACCT 743 - Corporate Financial Reporting**

Credits: 3  
**Cross-Listed with MBA 743**

Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance.

**Prerequisites**  
Admission to MSA or MBA program, or permission of program director.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0
**ACCT 744 - Fraud Deterrence and Detection**

Credits: 3  
**Cross-Listed with MBA 744**

Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

**Prerequisites**  
Admission to MSA or MBA program, or permission of program director.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**When Offered**  
Fall

**ACCT 796 - Independent Studies/Directed Readings**

Credits: 1-3  
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum.

**Prerequisites**  
Permission of instructor.

**Notes**  
Approval of faculty member and program director required. May be repeated for up to 3 credits.

**Hours of Lecture or Seminar per week**  
0

**Hours of Lab or Studio per week**  
0

**ADJ 100 - Introduction to Criminal Justice**

Credits: 3  
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice.

**Hours of Lecture or Seminar per week**  
3
ADJ 300 - Research Methods and Analysis

Credits: 4
Students are strongly encouraged to take ADJ 300 before or during the first semester of enrolling in 300-level courses. Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Students learn to use a broad range of evidence, including quantitative and qualitative information. Covers design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies.

Prerequisites
ADJ 100. Required for all ADJ majors.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

ADJ 301 - Public Law and the Judicial Process

Credits: 3
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 302 - Delinquency

Credits: 3
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative.

Prerequisites
ADJ 100 and SOCI 101, or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ADJ 303 - Experiencing the Criminal Justice System

Credits: 3
Experiential learning course designed to give preservice ADJ students a firsthand, practical journey through the criminal justice process and system.

Prerequisites
ENGL 302; COMM 100, 101, or 104; and 60 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 304 - Computer Crime, Forensics, and Auditing

Credits: 3
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools.

Prerequisites
IT 103 and 223.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 305 - Crime and Crime Policy

Credits: 3
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime at the individual, neighborhood, and structural levels. Considers policies intended to reduce crime.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ADJ 306 - Criminal Justice Ethics

Credits: 3
Analyzes ethical principles relevant for those working in criminal justice.

Prerequisites
60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 307 - Social Inequality, Crime, and Justice

Credits: 3
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines the effect of gender and race on rates of criminal offending and victimization and explanations for the variation in offending and victimization.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 308 - Human Rights and Justice

Credits: 3
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 400 - Applied Criminal Psychology
Credits: 3
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 401 - Policing in America**

Credits: 3
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing.

**Prerequisites**
ADJ 100.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 402 - Punishment and Corrections**

Credits: 3
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies.

**Prerequisites**
ADJ 100.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 403 - Community Corrections**

Credits: 3
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system.
Prerequisites
ADJ 100

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 404 - Crime Victims and Victimization

Credits: 3
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim's rights advocates.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 405 - Law and Justice around the World

Credits: 3
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 406 - Family Law and the Justice System

Credits: 3
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 407 - Law and Society

Credits: 3
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and relationship between law and social change. Considers different approaches to the study of law and society, and assesses methodologies.

Prerequisites
ADJ 100 or GOVT 301.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 408 - Criminal Courts

Credits: 3
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently.

Prerequisites
ADJ 100 or GOVT 301.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ADJ 409 - Community Policing

Credits: 3
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ADJ 422 - Controversial Legal Issues

Credits: 3
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection.

Prerequisites
GOVT 103

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 424 - Constitutional Law: Criminal Process and Rights

Credits: 3
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ADJ 425 - Criminal Justice Management

Credits: 3
Explains the management function for current and future criminal justice managers. Emphasizes communication, motivation, leadership skills, and organizational development.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 460 - Surveillance and Privacy in Contemporary Society

Credits: 3
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 461 - Introduction to Homeland Security

Credits: 3
Examines governmental actions designed to prevent, detect, respond to, and recover from acts of terrorism and national disasters. Focuses on efforts to align federal, state, local, tribal, private sector, and nongovernmental preparedness, incident management, and emergency response plans into the effective and efficient national structure necessary for the protection of the United States.

Prerequisites
ADJ 100.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ADJ 462 - Law Enforcement and Homeland Security

Credits: 3
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the
The entire framework of homeland security in the United States and the unique issues faced by local law enforcement.

**Prerequisites**
ADJ 100.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 471 - Prevention and Deterrence of Crime**

Credits: 3  
**Cross-Listed with** SOCI 471

Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 475 - Theory and Politics of Terrorism**

Credits: 3

Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ADJ 479 - Preparation for Internship**

Credits: 3

Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported.

**Prerequisites**
ADJ 100, 300, 303; and at least 21 credits of other upper-level courses required for the ADJ major.

**Hours of Lecture or Seminar per week**
3
**ADJ 480 - Internship in Justice Administration**

Credits: 3-12
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports.

**Prerequisites**
ADJ 479.

**Notes**
Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 50 hours of on-the-job work time required for each credit. Students may take the course for 3, 6, or 9 credits. Course may be taken more than once, but total accumulated credits may not exceed 12. Students using the internship to satisfy skills for the justice professional must accumulate a total of 9 credits.

**ADJ 490 - Special Topics in Administration of Justice**

Credits: 1-3
Recent developments in the field.

**Notes**
Content varies. Recent topics covered workplace violence and international terrorism. May be repeated for credit four times.

**ADJ 491 - Honors Seminar I**

Credits: 3
Course includes readings, individual or group projects, and discussion of seminar papers.

**Prerequisites**
Admission to the ADJ honors program.

**Notes**
First of a two-course sequence; subject varies.
**ADJ 492 - Honors Seminar II**

Credits: 3  
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member.

**Prerequisites**  
ADJ 491.

**Notes**  
Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required.

---

**ADJ 499 - Independent Study in Administration of Justice**

Credits: 1-3  
Reading and research on a specific topic under the direction of a faculty member.

**Prerequisites**  
ADJ 100.

**Notes**  
Open to majors in ADJ and public and international affairs, with 90 credits and permission of instructor and program. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student's advisor.

---

**AFAM 200 - Introduction to African American Studies**

Credits: 3  
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives.
AFAM 390 - Special Topics in African and African American Studies

Credits: 3
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout the African Diaspora.

AFAM 490 - Internship

Credits: 3
Prerequisites
AFAM 200 and 60 credits.

Notes
Credit to be determined by the African American Studies Program.

AFAM 499 - Independent Study

Credits: 1-3
Investigation of an area related to African American studies according to individual interest, with emphasis on research.

Prerequisites
Undergraduate senior status and permission of the director.

ANTH 114 - Introduction to Cultural Anthropology
Credits: 3
Overview of major ideas and approaches in the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, and other aspects of non-Western cultures.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 120 - Introduction to Archaeology

Credits: 3
Introduction to survey of anthropological archaeology. Includes development and use of contemporary theory, and field and lab methods.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 135 - Becoming Human: Evolution, Cognition, and Culture

Credits: 3
Examines fossil evidence for human evolution, the origins of human cognition, and human culture. Explores contemporary issues and debates in human biological and social evolution.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 299 - Independent Study

Credits: 1-3
Individual study in anthropology on topic organized in advance by student and instructor.

Prerequisites
ANTH 114, or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0
ANTH 300 - Civilizations

Credits: 3
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 301 - Native North Americans

Credits: 3
Exploration of native North American cultures and selected aspects of Indian-white historical relations. Emphasizes cultural persistence as well as change.

Prerequisites
ANTH 114, 60 credits, or permission of instructor

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 302 - Peoples and Cultures of Latin America

Credits: 3
Examines Latin American cultures and selected aspects of historical record.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 303 - Peoples and Cultures of Selected Regions

Credits: 3
Examines cultures of a specific region such as Middle East, Amazonia.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 304 - Peoples and Cultures of the Pacific

Credits: 3
Survey of 20th-century Melanesian, Polynesian, and Micronesian cultures. Case studies of interplay between cultural systems and island ecology.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 305 - Foraging Societies

Credits: 3
Examines early human societies with emphasis on environmental, technological, and cultural aspects of hunting and gathering as a successful means of adaptation.

Prerequisites
60 credits, 6 credits of anthropology including ANTH 120, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
**ANTH 306 - Peoples and Cultures of Island Asia**

Credits: 3  
Examines cultures of the Island Asia culture region, focusing on native cultures of Indonesia, Borneo, and the Philippines.

**Prerequisites**  
ANTH 114, 60 credits, or permission of instructor.

**Notes**  
For non-Western credit.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**ANTH 307 - Ancient Mesoamerica**

Credits: 3  
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage.

**Prerequisites**  
ANTH 120, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**ANTH 308 - Peoples and Cultures of the Middle East**

Credits: 3  
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0
ANTH 309 - Peoples and Cultures of India

Credits: 3
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country.

Prerequisites
ANTH 114 and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 310 - Social Organization and Kinship

Credits: 3
Examines social organization, kinship, descent, and kinship terminologies in mainly non-Western cultures, emphasizing the meaning of specific cultural systems and cross-cultural similarities and differences.

Prerequisites
ANTH 114, 60 credits, or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 311 - Peoples and Cultures of Mainland Southeast Asia

Credits: 3
Survey of societies of mainland Southeast Asia, with emphasis on successive waves of outside cultural influences and relations between contrasting ethnic groups in modern states. Focuses on Thailand and Malaysia.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ANTH 312 - Political Anthropology

Credits: 3
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 313 - Myth, Magic, and Mind

Credits: 3
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective

Credits: 3
Examines aspects of the cultural transmission process in specific local cultures selected from various world culture regions, with emphasis on transmission of cultures.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ANTH 322 - Historical Archaeology

Credits: 3
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity

Credits: 3
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice as a ritual practice.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 325 - Field Techniques in Archaeology

Credits: 3-6
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western
Credits: 3  
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures.

**Hours of Lecture or Seminar per week**  
3  

**Hours of Lab or Studio per week**  
0

**ANTH 331 - Refugees**

Credits: 3  
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees, and examining efforts on their behalf at national and international levels.

**Prerequisites**  
ANTH 114, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3  

**Hours of Lab or Studio per week**  
0

**ANTH 332 - Cultures in Comparative Perspective**

Credits: 3  
Examines the varieties of cultural experience. Several cultures are studied in depth, with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography.

**Prerequisites**  
ANTH 114, or permission of instructor.

**Notes**  
For non-Western credit and credit toward BA in sociology.

**Hours of Lecture or Seminar per week**  
3  

**Hours of Lab or Studio per week**  
0

**ANTH 333 - Humanitarian Action**

Credits: 3  
Examines humanitarian action, drawing on anthropology's holistic and comparative perspectives developed to ground understanding of humanitarian action within larger cultural contexts. Attention to cultural, biological, environmental, and political sources of humanitarian crises, and actual and potential responses to them. Focuses on large-scale response to social emergencies as culturally informed behavior.
Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 340 - Comparative Perspectives on Immigration

Credits: 3
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 360 - Evolution, Sex, and Society

Credits: 3
Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethnology, and microevolutionary genetic differentiation.

Prerequisites
ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 365 - Race and Racism

Credits: 3
Examines biological dimensions of human variation, and the beginnings of race as a concept. Discusses evolution of human biodiversity in culturally distinct human groups related to environment, physiology, genetics, nutrition, and disease. Explores use of scientific analyses of human biodiversity.

Prerequisites
ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
ANTH 370 - Environment and Culture

Credits: 3
Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 371 - Psychological Anthropology

Credits: 3
Survey of issues in study of relationships between cultural and psychological variables. Major topics viewed cross-culturally include personality, mental illness, projective systems, cognition, and learning.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 375 - Anthropological Perspectives on History

Credits: 3
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ANTH 380 - Language and Culture

Credits: 3
Anthropological analyses of language behavior, origins, and change, emphasizing interplay of language, culture, anthropology, and linguistics.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 381 - Health, Healing, and Culture

Credits: 3
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 382 - Urban Anthropology

Credits: 3
Uses tools and resources of social and cultural anthropology to study life in cities, including urban poverty, migration, urban planning, and discrimination. Case studies draw from different urban environments around the world, including Washington, D.C., and New York City.

Prerequisites
ANTH 114 and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 385 - Gender, Class, and Ethnicity in Latin America
Credits: 3
Examines bases for gender differences and similarities across a variety of societies and cultures in Latin America. Examines interrelationships among constructions of gender, class, and ethnicity.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 390 - Theories, Methods, and Issues I

Credits: 3
First of a two-course sequence that reviews the major theoretical traditions and schools of thought in anthropology.

Prerequisites
ANTH 114 and 60 credits, or permission of instructor.

Notes
Required for anthropology majors.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 395 - Work, Technology, and Society: An IT Perspective

Credits: 3
Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 396 - Issues in Anthropology: Social Sciences
ANTH 399 - Issues in Anthropology

Credits: 3
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization.

Prerequisites
ANTH 114 and 60 credits, or permission of instructor.

Notes
May be repeated for credit.

ANTH 400 - Engaging the World: Anthropological Perspectives

Credits: 3
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, the environment, and migration. Student papers and oral presentations receive formal review by multiple faculty members, to which the students must then respond. Satisfies general education synthesis requirement.

Prerequisites
ANTH 114, 60 credits, completion of all general education requirements, or permission of instructor.

ANTH 410 - Research Design and Methods in Bioanthropology
Credits: 3
Research design in bioanthropology and archaeology. Topics include critique of case studies, framing problems, field strategies, measuring variables, sampling, analysis, and interpretation of results.

Prerequisites
60 credits and 6 credits of anthropology, including ANTH 120 or 135; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 420 - Interpretation in Archaeology

Credits: 3
Explores theoretical and methodological issues in archaeology. Considers patterns and contexts of archaeological remains, analytic problems, and interpretation of material culture.

Prerequisites
6 credits of anthropology including ANTH 120, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 425 - Public Archaeology

Credits: 3
Considers public significance of archaeology and anthropological contributions to public concerns such as antiquities legislation and cultural resource management.

Prerequisites
6 credits of anthropology including ANTH 120, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 427 - Historic Cemetery Survey

Credits: 4
Explores demographic, stylistic, and religious aspects of historic cemeteries. Students learn to survey, record, and analyze gravestone data through field projects.

Prerequisites
ANTH 120, or permission of instructor.

**Hours of Lecture or Seminar per week**
4

**Hours of Lab or Studio per week**
0

**ANTH 428 - Patterns in Prehistory**

Credits: 3
Explores diversity of prehistoric cultures in light of major cultural development: hunting-gathering, agriculture, pastoralism, and complex societies.

**Prerequisites**
60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ANTH 430 - Research Methods in Archaeology**

Credits: 3
Studies archaeological research process through discussions of current archaeological methodologies and student participation in designing and critiquing research projects.

**Prerequisites**
ANTH 120, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ANTH 435 - Special Projects: Archaeology and Biological Anthropology**

Credits: 1-3
Lab or field project leading to a written report of the research.

**Prerequisites**
ANTH 120 or 135, 60 credits, and permission of instructor.

**Notes**
Research and paper completed under instructor's guidance.

**Hours of Lecture or Seminar per week**
ANTH 436 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3
Lab or field project leading to a written report of the research.

Prerequisites
ANTH 120 or 135, 60 credits, and permission of instructor.

Notes
Research and paper completed under instructor's guidance.

ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors

Credits: 3
Focuses on anthropologists' contributions to major policy issues in development agencies in the United States and abroad. Covers techniques that lead to prevention or management of social and cultural conflict.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research

Credits: 3
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application.

Prerequisites
60 credits and 6 credits of anthropology including ANTH 114, or permission of instructor.
ANTH 488 - Gender, Sexuality, and Culture

Credits: 3
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 490 - Theories, Methods, and Issues II

Credits: 3
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology.

Prerequisites
60 credits and 9 credits of anthropology, or permission of instructor.

Notes
Required for anthropology majors and usually taken as a senior seminar.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 492 - Contemporary Controversies in Anthropology

Credits: 3
Examines recent important works, issues, and controversies in anthropology.

Prerequisites
60 credits and 9 credits of anthropology including ANTH 390, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ANTH 495 - Internship

Credits: 3-6
Supervised project in applying anthropology: public archaeology, development anthropology, museums.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

ANTH 496 - On Evolution

Credits: 4
Considers evolution as biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory.

Prerequisites
60 credits and 9 credits of anthropology, or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
2

ANTH 499 - Independent Research

Credits: 1-3
Individual research on a topic to be organized in advance by student and instructor.

Prerequisites
60 credits, 9 credits of anthropology, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

ANTH 535 - Anthropology and the Human Condition: Seminar I
Credits: 3
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir.

Prerequisites
Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 536 - Anthropology and the Human Condition: Seminar II

Credits: 3
Examines contemporary theorists of anthropology, covering ongoing debates over epistemology and the multiple strands that inform anthropological theory and practice.

Prerequisites
ANTH 535.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 555 - Policy and Culture

Credits: 3
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 560 - Human Osteology

Credits: 4
Examines structure and function of human skeletal system. Discussions include age criteria, pathology, epigenetic traits, biomechanics, and phylogenetic relationships.

Prerequisites
Course in human evolution or anatomy, and senior or graduate standing; or permission of instructor.
Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

ANTH 568 - Human Origins

Credits: 3
Detailed survey of the genetic, morphological, and behavioral origins of hominids. Discusses current interpretations and debates.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 576 - American Cultures

Credits: 3
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 580 - Evolution and Human Ecology

Credits: 3
Examines complex relationships among human cultures, biocultural adaptation, and the natural world from an evolutionary perspective.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ANTH 610 - Social Organization

Credits: 3
Detailed examination and re-evaluation of the basic concepts of kinship and social organization in light of contemporary anthropological concerns. Several classical and contemporary texts develop key issues of social organization. Review of traditional concepts of classical anthropology introduces discussion of the nature of the broad epistemological shift that occurred in the last quarter of the 20th century.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 613 - Ethnography

Credits: 3
Literally, "writing about (a) people," ethnography is the defining practice of social-cultural anthropology. The product of participant-observation field work, ethnography brings together evidence and interpretation, providing a key means for developing and testing theories of culture. Course surveys key classical and contemporary ethnographies, introducing the breadth and scope of ethnographic practice in anthropology. Discussions highlight methodological questions.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3

ANTH 614 - Ethnopsychology: Self, Subject, and Culture

Credits: 3
The emerging field of ethnopsychology, in Catherine Lutz's words, is "concerned with the way in which people conceptualize, monitor, and discuss their own and other's mental and/or behavioral processes." Course examines roots of the ethnopsychological enterprise, reviews several recent approaches to the description and analysis of folk psychological material, and investigates the relationship between folk psychology and other aspects of social life.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3
ANTH 615 - Ritual and Power in Social Life

Credits: 3
Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Drawing on a variety of theoretical orientations in the social sciences, including structuralism, semiotics, psychoanalysis, and performance theory, course investigates connections among religious thought, ritual practice, and political action.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 617 - Political Economy

Credits: 3
Human societies have always engaged in complex political relations and economic exchanges. The cultural meanings people create are shaped by, and in turn shape, systems of power. Political economy is the attempt to understand the relationship between politics and economics, at the juncture of local meanings and global histories. Course reviews major works and models of political economy, especially as they relate to social and cultural analysis.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 620 - Theory: Archaeology and Biological Anthropology

Credits: 3
Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology.

Prerequisites
Course in archaeology, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ANTH 625 - Research Design and Methods in Archaeology and Biological Anthropology

Credits: 3
Examines research strategies and methods in archaeology, paleoanthropology, and biological anthropology.

Prerequisites
Course in archaeology, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 630 - Anthropology and Humanitarian Action

Credits: 3
Examines humanitarian action from an anthropological perspective, with attention to the cultural, biological, environmental, and political dimensions of humanitarian crises and actual and potential responses.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 631 - Refugees in the Contemporary World

Credits: 3
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 632 - International Migration in Comparative Perspective

Credits: 3
International migration in the contemporary world, focusing on the full range of economic, political, and social reasons for migration and the effects of different national policies on that process.
Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 635 - Regional Ethnography

Credits: 3
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes.

Prerequisites
Graduate standing, or permission of instructor.

Notes
May be repeated for credit when content differs.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 640 - Applied Anthropology

Credits: 3
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 645 - Ethnography and Literature

Credits: 3
Explores relations between ethnography and literature. Most anthropological knowledge is transmitted in written form through texts known as "ethnographies." Ethnographic techniques can be used in novels, travel literature, biography, and autobiography. Course explores these uses, alongside anthropological ethnographies, to arrive at a better understanding of ethnography: what
constitutes it and how it is defined and practiced.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

## ANTH 650 - Ethnographic Methods and Research Design

Credits: 3
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

## ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives

Credits: 3
Explores different approaches to understanding the interaction of nationalism, transnationalism, and states given the apparently simultaneous dissolution of demographic, economic and cultural borders, and modernist social science paradigms.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

## ANTH 660 - Social Science and Critical Theory

Credits: 3
Surveys key ideas of the Frankfurt School and its legacies today, including the critique of ideology; aesthetic theory; instrumental rationality; and analyses of the state, culture, and society. Writings by members of the Frankfurt School draw on many philosophical and methodological strands: radical humanism, Marxist analysis, cultural criticism, psychoanalysis, and political sociology.
Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 670 - Regional Studies in Archaeology

Credits: 3
Regional survey of specific culture area in archaeology to be chosen by student and instructor.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 675 - Laboratory Techniques

Credits: 4
Covers techniques of data collection, analysis, and management in archaeology and biological anthropology.

Prerequisites
Course in archaeology, and permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

ANTH 677 - Anthropology and History

Credits: 3
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ANTH 680 - Readings in Archaeology

Credits: 3
Directed readings and research on a specific topic in archaeology to be chosen by student and instructor.

Prerequisites
Permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 682 - Readings in Biological Anthropology

Credits: 3
Directed readings and research on a specific topic in biological anthropology chosen by student and instructor.

Prerequisites
Permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 684 - Independent Study in Sociocultural Anthropology

Credits: 1-6
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project.

Notes
May be repeated for maximum of 6 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ANTH 685 - Language and Culture

Credits: 3
Survey of research on the relationship between language and culture, and the many ways the study of language has enhanced understanding of the nature of culture. Course material drawn from anthropology's four traditional subdisciplines (cultural, linguistic, prehistoric archaeology, and physical), as well as neighboring fields such as sociolinguistics, psycholinguistics, literary theory, and ethnology.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 687 - Culture and Curing

Credits: 3
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 690 - Internship

Credits: 1-6
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site.

Prerequisites
Graduate standing in anthropology with 3 credits of methods and 12 credits in program, or with permission of primary advisor.

Notes
May be repeated for maximum 6 credits.
ANTH 699 - Contemporary Issues in Sociocultural Anthropology

Credits: 3
Explores current issues and debates in sociocultural anthropology.

Prerequisites
Graduate standing, or permission of instructor.

Notes
Variable topics.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 710 - Contemporary Issues in Archaeology and Biological Anthropology

Credits: 3
Contemporary research developments and the ways in which various scientific disciplines and theoretical approaches are integrated in the study of biocultural evolution, adaptation, and diversity.

Prerequisites
ANTH 620 and 625, completion of 24 graduate credits, and approval of graduate advisor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 721 - Culture, Power, and Conflict

Credits: 3
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ANTH 750 - Ethnographic Genres

Credits: 3
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 769 - Gender, Sexuality, and Culture

Credits: 3
Utilizes interdisciplinary material within an overall anthropological perspective on body meanings and practices. Readings highlight questions of political economy and history, focusing on specific ethnographic or historical contexts, to develop an understanding of how gender, sexuality, race, and class become analytically distinct yet intertwined systems of meaning and practice.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ANTH 797 - Anthropology Colloquium

Credits: 1
Public forum for the presentation and discussion of contemporary anthropological research.

Prerequisites
Graduate standing in anthropology, or permission of graduate coordinator.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

ANTH 798 - Thesis Proposal
Credits: 3-6
Work on research proposal that forms basis for master's thesis.

Prerequisites
Completion of 18 credits, including all core courses.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ANTH 799 - Master's Thesis

Credits: 1-5
Master's thesis research and writing under direction of thesis committee.

Prerequisites
Completion of ANTH 798 and approval of thesis proposal.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ARAB 101 - Introduction to the Arabic Language

Credits: 3

Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings.

Notes
Students may not receive credit for ARAB 101 and ARAB 110.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

ARAB 102 - Introduction to the Arabic Language

Credits: 3

Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns.
Prerequisites
ARAB 101, or permission of instructor.

Notes
Students may not receive credit for ARAB 102 and ARAB 110.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

ARAB 110 - Elementary Arabic

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for ARAB 110 and ARAB 101 or ARAB 102.

Hours of Lecture or Seminar per week
6
Hours of Lab or Studio per week
1

ARAB 201 - Intermediate Arabic I

Credits: 3
Further development of listening, speaking, reading, and writing skills. Advanced level of vocabulary. Grammar covers past tenses, subordinated conjunctions, and introduction to passive voice.

Prerequisites
ARAB 102 or equivalent.

Notes
Also introduces Arabic dictionary. Students may not receive credit for ARAB 201 and ARAB 210.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

ARAB 202 - Intermediate Arabic II
Credits: 3
Emphasis on application of language skills to reading, composition, and discussion. Focuses on language structure, format of developing vocabulary from verbs, covering different derivations, and language patterns. Leads to learning the use of Arabic dictionary in depth. Grammar covers passive voice and verbal nouns.

Prerequisites
ARAB 201 or equivalent.

Notes
Students may not receive credit for ARAB 202 and ARAB 210.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

ARAB 210 - Intermediate Arabic

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Arabic-speaking regions.

Prerequisites
ARAB 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for ARAB 210 and ARAB 201 or ARAB 202.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

ARAB 250 - Gateway to Advanced Arabic

Credits: 3
Integration of advanced intermediate-level Arabic reading, writing, listening, and speaking skills and the development of critical thinking and understanding authentic texts from the Arabic world.

Prerequisites
ARAB 210, appropriate placement score, or permission of department.

Notes
Taught in Arabic.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1
ARAB 325 - Major Arab Writers/Stories

Credits: 3
Studies works of major Arab writers or collections such as *The Arabian Nights*.

**Prerequisites**
ENGL 101 or permission of instructor

**Notes**
Writers and tales to be studied vary. Course work in English; knowledge of Arabic language helpful but not required. May be repeated once for credit with permission of department.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

ARAB 330 - Reading and Conversation I

Credits: 3
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Readings include selections from newspapers, journals, magazines, web sites, literary works, and other sources.

**Prerequisites**
ARAB 250, appropriate placement score or permission of instructor.

**Notes**
Courses I and II must be taken in sequence.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

ARAB 331 - Reading and Conversation II

Credits: 3
Continuation of ARAB 330.

**Prerequisites**
ARAB 250 or equivalent; appropriate placement; or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
ARAB 380 - Special Topics: Arabic Dialects

Credits: 3
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fus-ha. Includes study of literature, proverbs, and culture associated with that dialect. May be repeated once if dialect covered is different.

Prerequisites
ARAB 250, appropriate placement score, or permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 101 - Introduction to the Visual Arts

Credits: 3
Introduction to the content and principles of the visual arts. Approach varies with instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 102 - Symbols and Stories in Art

Credits: 3
Themes and imagery in art from early Greece to the modern era.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 103 - Introduction to Architecture

Credits: 3
Introduces study, principle, and understanding of art of architecture. Approach varies with instructor; may be historical, geographical, technical, or thematic.

Notes
Field trips required.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 150 - Freshman Seminar

Credits: 3
Focuses on skills and methods of learning as well as subject matter as a way of introducing the discipline of art history.

Prerequisites
Freshman standing.

Notes
Topics vary.

3
Hours of Lecture or Seminar per week
0

ARTH 200 - Survey of Western Art

Credits: 3
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers prehistory, the ancient world, and the Middle Ages.

Notes
Designed as a two-course sequence, but each part may be taken independently without prerequisite.

3
Hours of Lecture or Seminar per week
0

ARTH 201 - Survey of Western Art

Credits: 3
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers the art of the Renaissance, the baroque period, and modern Europe and the Americas.

Notes
Designed as a two-course sequence, but each part may be taken independently without prerequisite.

3
ARTH 203 - Survey of Asian Art

Credits: 3
Introduces arts of South, Southeast, and east Asia. Examines aspects of culture and history of Asia. Discusses monuments and artifacts in a variety of media and their relation to social and historical contexts.

Notes
For non-Western credit.

ARTH 204 - Survey of Latin American Art

Credits: 3
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region.

Notes
Each 300-level course is generally offered once every two years.

ARTH 303 - National Traditions

Credits: 1-3
Studies traditions of art and architecture within a single selected country or historical region.

Prerequisites
24 credits.

Notes
Topic varies. May be repeated for credit with different course content.
ARTh 311 - Design of Cities

Credits: 3
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor, and may involve archaeological or theoretical approaches appropriate to the specific context.

Prerequisites
24 credits.

Notes
May be repeated when course content is different.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTh 315 - Modern Architecture

Credits: 3
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTh 319 - Art and Archaeology of the Ancient Near East

Credits: 3
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean.

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ARTH 320 - Art of the Islamic World

Credits: 3
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections.

Prerequisites
24 credits. For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 321 - Greek Art and Archaeology

Credits: 3
History of ancient Greek architecture, sculpture, and painting.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 322 - Roman Art and Archaeology

Credits: 3
History of Roman architecture, sculpture, and painting.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World

Credits: 3
Arts of the Hellenistic age within the context of history and culture of the period. Explores the powerful dynasties ruling wealthy
empires; achievements in learning and literature housed in the Great Library at Alexandria; baroque sculpture adorning the Altar of Zeus at Pergamon; and Roman collectors of Greek art and antiques.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 333 - Early Christian and Byzantine Art

Credits: 3
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources.

Prerequisites
24 credits.

Notes
Specific focus varies with instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 334 - Western Medieval Art

Credits: 3
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period.

Prerequisites
24 credits.

Notes
Specific focus may vary with instructor. May be repeated when course content is different.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 340 - Early Renaissance Art in Italy, 1300-1500
Credits: 3
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 341 - Northern Renaissance Art

Credits: 3
Studies in the art of France, Germany, and the Netherlands in the age of Van Eyck and Dürer.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 342 - High Renaissance Art in Italy, 1480–1570

Credits: 3
Studies in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

Credits: 3
Studies in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin.
Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 345 - Northern Baroque Art, 1600-1750

Credits: 3
Studies in architecture, sculpture, and painting in the age of Rubens, Van Dyck, Rembrandt, and Vermeer.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 350 - History of Photography

Credits: 3
Development of photography from origins in France in the 19th century to the present.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 359 - Art of the 18th and 19th Centuries

Credits: 3
Introduction to the art and architecture of the 18th and 19th centuries. Topics focus on specific art forms, media, geographic regions, or the thematic categories.

Prerequisites
24 credits.

Notes
May be repeated once for credit when topic differs.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 360 - Nineteenth-Century European Art

Credits: 3
Movements from neoclassicism to symbolism discussed in relation to social, cultural, political, and technological changes in Europe.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 362 - Twentieth-Century European Art

Credits: 3
Study of major movements (fauvism, cubism, futurism, constructivism, surrealism, and expressionism) and important artists in 20th-century painting and sculpture.

Prerequisites
24 credits.

Notes
Focus may vary.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 371 - American Architecture and Material Culture

Credits: 3
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
**ARTH 372 - Studies in 18th- and 19th-Century Art of the United States**

Credits: 3  
Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity).

**Prerequisites**
24 credits.

**Notes**
May be repeated once for credit with different topic. Lecture, discussion.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ARTH 373 - Studies in 20th-Century Art of the United States**

Credits: 3  
Developments in 20th-century American visual culture across all media.

**Prerequisites**
24 credits

**Notes**
Focus may vary (postwar American "realisms," women artists, and feminist art). May be repeated once for credit with different topic. Lecture, discussion.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ARTH 374 - Art Now**

Credits: 3  
Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets.

**Prerequisites**
Any course in art history or art studio, or permission of instructor.
Notes
Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 376 - Twentieth-Century Latin American Art

Credits: 3
Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 380 - African Art

Credits: 3
Focuses on sub-Saharan African art in terms of styles and aesthetics; materials and techniques; and geographical, social, cultural, and religious contexts.

Prerequisites
24 credits.

Notes
For non-Western credit. Specific focus may vary with instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ARTH 382 - Arts of India

Credits: 3
History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts.
Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 383 - Arts of Southeast Asia

Credits: 3
Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia.

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 384 - Arts of China

Credits: 3
Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture.

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 385 - Arts of Japan
Credits: 3
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts.

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 386 - The Silk Road

Credits: 3
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 393 - Art History Internships

Credits: 3-6
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

Prerequisites
Art history major or minor, and permission of instructor.

Notes
Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
**ARTH 394 - The Museum**

Credits: 3  
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor.

**Prerequisites**  
6 credits in art history at the 300-level, and completion or concurrent enrollment in all other required general education courses.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**ARTH 399 - Special Topics in the History of Art**

Credits: 3  
Topics vary.

**Notes**  
At least one 400- or 500-level course is offered each semester; each topic area is generally offered every two years.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**ARTH 400 - Historiography and Methods of Research in Art History**

Credits: 3  
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor.

**Prerequisites**  
ENGL 302, and 6 credits in art history at the 300 level; or permission of instructor.

**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**ARTH 420 - Advanced Studies in Ancient Art**
Credits: 3
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context.

**Prerequisites**
ENGL 302, and 300-level course in ancient art; or permission of instructor.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ARTH 430 - Advanced Studies in Medieval or Islamic Art**

Credits: 3
Studies a single topic in medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world.

**Prerequisites**
ENGL 302, and a 300-level course in medieval or Islamic art; or permission of instructor.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ARTH 440 - Advanced Studies in Renaissance and Baroque Art**

Credits: 3
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area.

**Prerequisites**
ENGL 302, and 300-level course in Renaissance or baroque art; or permission of instructor.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
ARTH 460 - Advanced Studies in 20th-Century European Art

Credits: 3  
Study of a particular topic in 20th-century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Prerequisites  
ENGL 302 and 300-level course in the art of 19th- or 20th-century Europe or the Americas; or permission of instructor.

Hours of Lecture or Seminar per week  
3  
Hours of Lab or Studio per week  
0

ARTH 471 - Advanced Studies in Art of the United States

Credits: 3  
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family; or movement, such as American modernism.

Prerequisites  
ENGL 302 and 300-level course in American art

Notes  
May be repeated for credit.

Hours of Lecture or Seminar per week  
3  
Hours of Lab or Studio per week  
0

ARTH 472 - Advanced Studies in 20th-Century Latin American Art

Credits: 3  
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Prerequisites  
ENGL 302 and 300 level course in 19th- or 20th-century art of Europe or the Americas, or permission of the instructor.

Hours of Lecture or Seminar per week  
3  
Hours of Lab or Studio per week  
0
ARTH 474 - Advanced Studies in Contemporary Art

Credits: 3
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach.

Prerequisites
ENGL 302 and 300-level course work in modern or contemporary art, or permission of the instructor

Notes
Content varies; course may be repeated once for credit if topic varies.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 482 - Advanced Studies in Asian Art

Credits: 3
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium.

Prerequisites
ENGL 302, and 300-level course in any area of Asian art; or permission of instructor.

Notes
For non-Western credit. Content varies; course may be repeated for credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 490 - Independent Study in Art History

Credits: 3
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Study proposal submitted before registration.

Prerequisites
60 credits, ENGL 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
**ARTH 491 - Independent Study in Art History**

Credits: 3  
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Study proposal submitted before registration.

**Prerequisites**
60 credits, ENGL 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**ARTH 492 - Honors Directed Readings, Honors Directed Research**

Credits: 3  
Linked individualized courses, usually given by same instructor. Involves directed readings.

**Prerequisites**
Admission to art history honors program, ENGL 302, and permission of instructor.

**Notes**
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**ARTH 493 - Honors Directed Readings, Honors Directed Research**

Credits: 3  
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

**Prerequisites**
Admission to art history honors program, ENGL 302, and permission of instructor.

**Notes**
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

**Hours of Lecture or Seminar per week**
0

**ARTH 499 - Advanced Studies in Art History**
Credits: 3
Seminar-style discussion on specific subjects in art history.

Prerequisites
ENGL 302 and 300-level course, or permission of instructor.

Notes
For non-Western credit. Topics may vary. May be repeated for credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 593 - Art History Internships

Credits: 3-6
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

Prerequisites
Baccalaureate degree or equivalent, or permission of instructor.

Notes
Recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ARTH 594 - The Museum

Credits: 3
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations.

Prerequisites
Baccalaureate degree or equivalent, or permission of instructor.

Notes
Specific focus may vary with instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ARTH 596 - Independent Study

Credits: 1-3
Independent reading and research on specific project under direction of department member.

Prerequisites
Baccalaureate degree or equivalent, or permission of instructor.

Notes
Written report is required. May be repeated for credit.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ARTH 599 - Special Topics in the History of Art

Credits: 3
Topics vary.

Prerequisites
Baccalaureate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 600 - Methods and Research in Art History

Credits: 3
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program.

Prerequisites
Admission to the art history MA program.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ARTH 696 - Independent Directed Readings
Credits: 3
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam.

Prerequisites
Admission to art history MA program, and permission of instructor.

Notes
Taken in final semester of art history MA.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ARTH 699 - Topics in Art History

Credits: 3
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 103 - Astronomy

Credits: 3
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity.

Notes
Not for physics majors.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 111 - Introductory Astronomy: The Solar System

Credits: 3
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking,
nature of light, and principles of telescope design.

Notes
ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 112 - Introductory Astronomy Lab: The Solar System

Credits: 1
Laboratory course associated with ASTR 111.

Notes
ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
3

ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe

Credits: 3
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking.

Notes
ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe

Credits: 1
Laboratory course associated with ASTR 113.

Notes
ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week
0
ASTR 301 - Astrobiology

Credits: 3
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and search for extraterrestrial life.

Prerequisites
MATH 113 and PHYS 160.

ASTR 302 - Foundations of Cosmological Thought

Credits: 3
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe.

Notes
No advanced background in mathematics or natural sciences required.

ASTR 328 - Introduction to Astrophysics

Credits: 3
Cross-Listed with PHYS 328
Topics include physical concepts; magnitudes of stars; Hertzsprung-Russell diagram; stellar radiation; stellar structure and evolution; white dwarfs, red giants, supernovas, neutron stars, and black holes; interstellar matter, dust, and molecules; cosmic rays and magnetic fields; galactic structure, galaxies, quasars, and intergalactic matter; high energy astrophysics, cosmology and general relativity; and models of the universe.

Prerequisites
PHYS 262 and MATH 214.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ASTR 390 - Topics in Astronomy

Credits: 1-4
Selected topics not covered in fixed-content courses.

Notes
May not be included for credit by physics majors in the 45 credits of physics courses required for BS degree, or in 31 credits of physics courses required for BA degree.

ASTR 401 - Computer Simulation in Astronomy

Credits: 3
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models.

Prerequisites
MATH 213 and ASTR 328.

Notes
Emphasizes hands-on projects.

ASTR 402 - Methods of Observational Astronomy

Credits: 3
Collection and analysis of data covering radio, microwave, infrared, visible, ultraviolet, X-ray, and gamma ray astronomy. Topics include electromagnetic spectrum, coordinate systems, motion of celestial objects, telescopes, detectors, statistics and noise, interferometry, and spectroscopy.

Prerequisites
ASTR 111, 112, 113, 114.

Notes
This course meets the writing-intensive requirement.

**ASTR 403 - Planetary Sciences**

Credits: 3
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study.

Prerequisites
MATH 213 and PHYS 160.

**ASTR 404 - Galactic Astronomy**

Credits: 3
Comprehensive introduction to observational and theoretical aspects of the study of galaxies. Topics include our own galaxy, normal galaxies and their hierarchical structures (groups and clusters), star forming and active galaxies, and colliding galaxies.

Prerequisites
MATH 214, ASTR 328, and PHYS 308.

**ASTR 408 - Senior Research**

Credits: 3
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy.

Prerequisites
15 credits of ASTR courses.

Notes
Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with
Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 409 - Astronomy Internship

Credits: 3
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship.

Prerequisites
75 credits, 15 ASTR credits, and permission of department.

Notes
See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 428 - Relativity and Cosmology

Credits: 3
Cross-Listed with PHYS 428

Special relativity; four-dimensional space-time; general relativity; non-Euclidean geometries, geodesics, and field equations; tests of general theory of relativity; black holes; cosmology; models of the universe; remnant blackbody radiation; big bang cosmology; thermodynamics; and the universe.

Prerequisites
MATH 214; PHYS 303, 305, and 262; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 490 - Astronomy Capstone

Credits: 3
Capstone course providing a learning experience, integrating knowledge from previous astronomy courses with selected readings from current scientific papers and an opportunity to effectively present that synthesis. Emphasizes student participation and
student-led class discussions.

**Prerequisites**
Completion of ASTR core courses or concurrent enrollment in final core courses.

**Notes**
Required of all astronomy majors.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**ASTR 530 - Astrophysics**

Credits: 3
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

**Prerequisites**
PHYS 303, 305, 308; MATH 214.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**ASTR 535 - Space Instrumentation and Exploration**

Credits: 3
**Cross-Listed with** CSI 660
Survey of instruments, devices, and methods for space and planetary exploration, including remote sensing of Earth and other solar system bodies, and planned manned and unmanned missions by the United States and other countries.

**Prerequisites**
PHYS 262 and MATH 213.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**ASTR 590 - Selected Topics in Astronomy and Astrophysics**
Credits: 1-6
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments.

Hours of Lecture or Seminar per week
0-6

Hours of Lab or Studio per week
0

ASTR 680 - Physics of Interstellar Media

Credits: 3
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation.

Prerequisites
PHYS 402 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ASTR 703 - Planetary Sciences

Credits: 3
This course will cover the processes and events that have played a central role in the origin and evolution of the solar system, with special emphasis on the terrestrial planets. The unique history of Earth and how it has evolved into a habitable world will be covered in detail.

Prerequisites
MATH 213 and PHYS 160.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ASTR 760 - Space Plasma Physics

Credits: 3
Cross-Listed with PHYS 760

Covers plasma processes involved in today's space physics research, including different regimes of plasma; basic concepts in kinetic, fluid, and MHD plasmas; and existent waves in these media. Also covers basics of shocks, discontinuities, transport and acceleration of particles such as cosmic rays, reconnection, and MHD instabilities.
Prerequisites
PHYS 622 or 513, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 765 - High-Energy and Accretion Astrophysics

Credits: 3
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Prerequisites
PHYS 502 and 513, and ASTR 530; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 766 - Relativity and Cosmology

Credits: 3
Special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 769 - Topics in Space Sciences

Credits: 3
Cross-Listed with CSI 769

Selected topics in space sciences not covered in fixed-content space sciences courses.

Prerequisites
Permission of instructor.
Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ASTR 790 - Advanced Topics in Astronomy and Astrophysics

Credits: 1-6
Advanced topics from recent theoretical or observational developments and applications.

Prerequisites
Graduate standing and permission of instructor.

Notes
Satisfies need of professional community to keep abreast of current developments.

Hours of Lecture or Seminar per week
0-6
Hours of Lab or Studio per week
0

ASTR 796 - Directed Reading and Research

Credits: 1-6
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member.

Prerequisites
Admission to master's program and permission of instructor.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

ASTR 798 - Research Project

Credits: 3
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report.

Prerequisites
9 credits and permission of instructor.

**Notes**
May not be repeated.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

### ASTR 799 - Master's Thesis

Credits: 1-6  
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee.

**Prerequisites**
9 credits, and permission of instructor.

**Notes**
May not be repeated.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

### ASTR 998 - Doctoral Dissertation Proposal

Credits: 1-12  
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

**Prerequisites**
Admission to physics doctoral program and permission of advisor.

**Notes**
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**Grading**
S/IP
ASTR 999 - Doctoral Dissertation

Credits: 1-12
Doctoral research performed under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy in physics doctoral program and permission of advisor.

Notes
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques

Credits: 3
This course presents an introduction to the profession of athletic training and to the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
2

ATEP 180 - Emergency Medical Care for Physically Active Populations

Credits: 4
An investigation of the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to a physically active population. Students develop knowledge, critical thinking, and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Upon successful completion of this course, the student will earn Emergency Cardiac Care (ECC) and First Aid certifications.

Prerequisites
BIOL 124

Corequisite
BIOL 125

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

ATEP 250 - Physical Assessment of the Lower Body

Credits: 3
An analysis of the principles of physical assessment of the lower body.

Prerequisites
ATEP 150, 180; BIOL 124, 125; HEAL 110; PHED 300

Corequisite
Concurrently enrolled in ATEP 255, ATEP 256

Notes
Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week
3

ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body

Credits: 3
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen).

Prerequisites
ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and PHED 300

Corequisite
Concurrently enrolled in ATEP 250 and ATEP 256

Notes
Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week
3

ATEP 256 - Practicum I: Physical Assessment of the Lower Body

Credits: 3
A clinical practicum filed experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the lower body.

Prerequisites
ATEP 150, 180; BIOL 124, 125; HEAL 110; and PHED 300

Corequisite
Concurrently enrolled in ATEP 250 and 255

Notes
Formal acceptance to professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ATEP 260 - Physical Assessment of the Upper Body

Credits: 3
An analysis of the principles of physical assessment of the upper body.

Prerequisites
ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; PHED 300

Corequisite
Concurrently enrolled in ATEP 265, ATEP 266

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body

Credits: 3
An analysis of physical assessment clinical techniques of the upper body (including the upper extemity, head, and neck).

Prerequisites
ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; and PHED 300

Corequisite
ATEP 260, 266

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
ATEP 266 - Practicum II: Physical Assessment of the Upper Body

Credits: 3
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the upper body.

Prerequisites
ATEP 150, 180, 250, 255, 256, BIOL 124, BIOL 125, HEAL 110, and PHED 300

Corequisite
ATEP 260 and 265

Notes
Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification

ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations

Credits: 3
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations.

Prerequisites
ATEP 150 and 180; BIOL 124 and 125; HEAL 110 and 230; PHED 300

Notes
Formal acceptance to the professional phase of the ATEP

ATEP 350 - Therapeutic Modalities

Credits: 3
Study of the physical principles, physiological effects, indications, and contraindications of therapeutic modalities used in athletic training. Also covers indications, contraindications, physiological effects, special programs, and resistance methods used in the prevention and rehabilitation of athletic injuries.

Prerequisites
ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 260, ATEP 265, ATEP 266, ATEP 270, BIOL 124, BIOL 125, HEAL 110, HEAL 230, and PHED 300

Corequisite
ATEP 355, ATEP 356

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
ATEP 355 - Clinical Techniques III: Therapeutic Modalities

Credits: 3
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270; BIOL 124, 125; HEAL 110, 230; PHED 300

Corequisite
ATEP 350 and 356

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ATEP 356 - Practicum III: Therapeutic Modalities

Credits: 3
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic modalities.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270; BIOL 124, 125; HEAL 110, 230; and PHED 300

Corequisite
ATEP 350 and 355

Notes
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ATEP 360 - Therapeutic Rehabilitation

Credits: 3
A study of the indications, contradictions, physiological effects, special programs, and resistance methods that are used in the prevention and rehabilitation of athletic injuries.

Prerequisites
ATEP 365 - Clinical Techniques IV: Therapeutic Rehabilitation

Credits: 3

A study of the indications, contraindications, physiological effects, special programs, and resistance methods that are used in the prevention and rehabilitation of athletic injuries.

Prerequisites
Formal acceptance to the professional phase of the ATEP; ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, BIOL 124 and 125; HEAL 110 and 230; PHED 300 and 450

Corequisite
Concurrent enrollment in ATEP 365 and 366

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

ATEP 366 - Practicum IV: Therapeutic Rehabilitation

Credits: 3

A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic rehabilitation.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110 and 230; PHED 300 and 450

Corequisite
ATEP 360 and 365

Notes
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.
ATEP 441 - Practicum in Athletic Training

Credits: 3
Techniques and procedures in the care and prevention of athletic injuries in a selected environment under certified athletic trainer supervision.

Prerequisites
ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 260, ATEP 265, ATEP 266, ATEP 270, ATEP 350, ATEP 355, ATEP 356, ATEP 360, ATEP 365, ATEP 366, ATEP 450, ATEP 456, BIOL 124, BIOL 125; HEAL 110, HEAL 230, PHED 300, PHED 364, and PHED 450

ATEP 450 - Administration and Management in Athletic Training

Credits: 3
This lecture/seminar course will focus on the professional management and administrative issues in athletic training. Organization and administration topics will include the preparation in planning, designing, developing, organizing, implementing, directing, and evaluating an athletic training health care program and facility. Current issues in athletic training related to professional conduct and practice will also be discussed.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

Corequisite
ATEP 456

Notes
Formal acceptance into the professional phase of the ATEP.

ATEP 456 - Practicum V: Professional Integration
Credits: 6
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on professional skill integration.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300, 364, and 450

Corequisite
ATEP 450

Notes
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week

AVT 101 - New Majors Colloquium

Credits: 1
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions.

Notes
Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

AVT 103 - Introduction to the Artist's Studio

Credits: 3
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment.

Notes
For non-majors only.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
2
AVT 104 - Studio Fundamentals I

Credits: 4
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 105 - Studio Fundamentals II

Credits: 4
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts.

Prerequisites
AVT 104 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 180 - Computers in the Creative Arts

Credits: 3
Introduces computing from artist's perspective. Emphasizes computer use for artistic creation and research. Overview of hardware, software, operating systems, peripherals, two-dimensional graphics, and web design.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
2

AVT 204 - Visual Thinking

Credits: 3
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media.
AVT 206 - Color

Credits: 4
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology.

Prerequisites
AVT 104 or permission of instructor.

AVT 215 - Typography

Credits: 4
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content.

Prerequisites
AVT 104 and 180, or permission of instructor.

AVT 222 - Drawing I

Credits: 4
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on problems involved in representational and abstract visual interpretations of forms.

Notes
AVT majors encouraged to take AVT 222 with AVT 104.
AVT 232 - Painting I

Credits: 4

Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition, color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique.

AVT 243 - Printmaking I

Credits: 4

Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course. Presentations and field trips focus on aesthetic and cultural concerns of making multiple images.

AVT 252 - Photography I

Credits: 4

Introduction to basic principles and aesthetics of photography, 35-mm camera operation, and darkroom practices, including film processing and print development. Students learn constructive analytical techniques of photography, and explore their personal tastes and judgements as they broaden their artistic development.

AVT 253 - Introduction to Digital Photography
Credits: 4
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

**AVT 262 - Sculpture I**

Credits: 4
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

**AVT 272 - Interdisciplinary Arts**

Credits: 4
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts.

**Hours of Lecture or Seminar per week**
4

**Hours of Lab or Studio per week**
2

**AVT 280 - Introduction to Digital Arts**

Credits: 4
Investigates ways in which contemporary artists employ tools of digital culture. Students create meaningful works of art that demonstrate conceptual awareness and technical skill.

**Prerequisites**
AVT 104 and 180, or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4
AVT 300 - Artsbus Attendance

Credits: 0
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions.

Notes
AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

Grading
S/NC

AVT 301 - Visual Voices Colloquium

Credits: 1
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered.

Notes
AVT majors must accumulate at least 3 credits in this colloquium to graduate. May be repeated each semester up to a total of 8 credits.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

AVT 305 - Creative Processes

Credits: 3
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 307 - Aesthetics
Credits: 3
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 309 - Art as Social Action

Credits: 3
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 311 - Graphic Design Methods and Principles

Credits: 4
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions.

Prerequisites
AVT 215 or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 313 - Editorial Design

Credits: 4
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues, and reinforces conceptual skills and integration of imagery and text.

Prerequisites
AVT 311 or permission of instructor.

Hours of Lecture or Seminar per week
AVT 318 - History of Graphic Design

Credits: 3
Survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

AVT 323 - Drawing II

Credits: 4
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary.

Prerequisites
AVT 222 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 324 - Figure Drawing

Credits: 4
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling.

Prerequisites
AVT 222 or permission of the instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 326 - Nontraditional Approaches to Drawing
This course encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats.

**Prerequisites**
AVT 222 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

### AVT 333 - Painting II

Credits: 4
Course focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Concepts, methodologies, and approaches relevant to contemporary painting are introduced.

**Prerequisites**
AVT 232 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

### AVT 336 - Experimental Painting

Credits: 4
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting.

**Prerequisites**
AVT 232 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

### AVT 337 - Figurative Painting

Credits: 4
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries.

**Prerequisites**
AVT 232 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 343 - Printmaking II

Credits: 4
An introduction to relief, screenprint, and intaglio printing, including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces.

Prerequisites
AVT 243 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 345 - Artists' Books as Visual Language

Credits: 4
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements.

Prerequisites
AVT 180 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 346 - Digital Printmaking

Credits: 4
A beginning course in hand printing digitally processed images. Projects focus on electronic means of creating and manipulating imagery. Students achieve skills in multiple steps and incremental development required in making prints.

Prerequisites
AVT 180 or permission of the instructor.

Hours of Lecture or Seminar per week
2
AVT 353 - Photography II

Credits: 4
With further investigation into the aesthetics of photography through experimentation with new films, developers, papers, and development of a portfolio of photographic images.

Prerequisites
AVT 252 or permission of instructor.

Notes
Continuation of Photography I.

AVT 354 - Digital Photo

Credits: 4
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics.

Prerequisites
AVT 252 and 180, or permission of the instructor.

AVT 356 - Studio Lighting I

Credits: 4
Introduces theory, concepts, and applications of photographic studio lighting using both artificial and natural light sources with an emphasis on the ability to control and manipulate light.

Prerequisites
AVT 353 or permission of instructor.
AVT 363 - Sculpture II

Credits: 4
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication.

Prerequisites
AVT 262 or permission of instructor.

Notes
Lectures, independent student research, and gallery and museum visits required. Vigorous critiques.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 370 - Entrepreneurship in the Arts

Credits: 4
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 371 - Visual Perception and the Arts

Credits: 3
Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

AVT 372 - Hip Hop Culture
Credits: 3
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 373 - Performance Studio

Credits: 4
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images.

Prerequisites
AVT 272 or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 374 - Sound and Vision

Credits: 4
Explores the function and use of sound in conjunction with time-based media and installation. Students learn digital tools for selection, editing, processing, and integration of sound and music (postproduction) into video, animation, and installation projects.

Prerequisites
AVT 180 or 280, or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 376 - Live Movies

Credits: 4
Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance.

Prerequisites
AVT 272 or permission of instructor.
Notes
Students collaborate on production projects.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 377 - Cyberpunk

Credits: 4
Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cybertulture. Includes readings, writings, discussion, screenings, guest speakers, and research projects.

Hours of Lecture or Seminar per week
6
Hours of Lab or Studio per week
0

AVT 378 - The African American Experience in the Performing Arts

Credits: 3
Through lectures, slides, audio recordings, videos, and films, students examine African American contributions to cultural fabric of American forms and institutions. Artistic contributions examined in aesthetic, political, historical, and social contexts.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

AVT 382 - Digital Art and Animation

Credits: 4
Introduces conceptual, technical, and aesthetic practices of two-dimensional computer animation. Students learn to animate hand-drawn and computer-generated images. Students work to develop and create an imaginative and meaningful short animation with sound.

Prerequisites
AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4
AVT 383 - Three-Dimensional Digital Art

Credits: 4
Students create thoughtful and imaginative, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short animations. Emphasis on idea generation, contemporary practices, visual aesthetics, and technique.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 390 - Digital Media and Video Art

Credits: 4
Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on video, visual digital, video art, sound design, and the sociopolitical implications of digital work.

Prerequisites
AVT 280 or permission of the instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 392 - Gallery Practices

Credits: 4
Introduction to practices of the contemporary art gallery, including curatorship, exhibition planning and installation, care and proper handling of artwork, technology in the gallery, collaborating with outside curators, documentation, budget, publicity, and educational and docent activities.

Prerequisites
3 credits of AVT or ARTH, junior standing, or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4
AVT 393 - Field Experience in the Arts

Credits: 1-6
Introductory working and learning experience with an organization or individual in the arts, or as a teaching assistant.

Prerequisites
Junior standing and permission of instructor and academic advisor.

Notes
Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 6 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

AVT 394 - Honors Seminar

Credits: 1
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments.

Prerequisites
By invitation to qualified honors students.

Notes
Students accrue credits toward graduation with AVT honors. Repeatable for up to 8 credits.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

AVT 395 - Writing for Artists

Credits: 3
Practical writing seminar in which students practice typical writing needs of creative professionals, including artist's statements, grant proposals, and reviews, while also exploring ways in which artists have used writing, books, and language in art making.

Prerequisites
ENGL 302 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
AVT 396 - Introduction to Art Teaching and Learning

Credits: 3
Explores art-teaching profession through readings, discussion, hands-on activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisites
Junior standing, completion of ENGL 302, and completion of at least 20 credits of AVT course work (including AVT 307); or permission of art education advisor.

Notes
Prior to enrollment, students must complete art education inquiry form.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 399 - Special Topics in Art and Visual Technology

Credits: 1-6
Explores topical studies in AVT including theoretical and critical aspects of art or studio production.

Notes
Topics and credit vary with instructor. May be repeated when taken under different topics.

Hours of Lecture or Seminar per week
1-6

Hours of Lab or Studio per week
0-6

AVT 414 - Corporate Design and Branding

Credits: 4
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide.

Prerequisites
AVT 252 or 253, AVT 311, and AVT 395, or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 415 - Web Design and Usability
Credits: 4
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development.

**Prerequisites**
AVT 252 or 253, AVT 311, and AVT 395 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

**AVT 419 - Topics in Graphic Design**

Credits: 1-6
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice.

**Prerequisites**
AVT 311 and AVT 313 or 414.

**Notes**
Topics and credit vary with instructor. May be repeated when taken under different topics.

**Hours of Lecture or Seminar per week**
1-6

**Hours of Lab or Studio per week**
0-6

**AVT 422 - Drawing III**

Credits: 4
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice.

**Prerequisites**
AVT 323 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

**AVT 423 - Drawing IV**

Credits: 4
Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development
of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisites
AVT 422 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 432 - Painting III

Credits: 4
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting.

Prerequisites
AVT 333 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 433 - Painting IV

Credits: 4
In this capstone course, students engage in a self-directed studio practice through the development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisites
AVT 432 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 434 - Painting V

Credits: 4
Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies.

Prerequisites
AVT 433 or permission of instructor.
AVT 435 - Painting VI

Credits: 4
Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work.

Prerequisites
AVT 434 or permission of instructor.

AVT 442 - Printmaking III

Credits: 4
An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative.

Prerequisites
AVT 343 or permission of the instructor.

AVT 443 - Printmaking IV

Credits: 4
An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking.

Prerequisites
AVT 442 or permission of the instructor.
AVT 444 - Printmaking V

Credits: 4
Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments.

Prerequisites
AVT 443 or permission of the instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 445 - Printmaking VI

Credits: 4
Students produce a body of print media work reflecting their interests, including the broader context of social, cultural, and contemporary issues. Students engage in collaborative studio practices and independent projects to integrate multiple visual technologies.

Prerequisites
AVT 444 or permission of the instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 452 - Advanced Photographic Printing I

Credits: 4
Advanced darkroom course with emphasis on fine art and craft of black-and-white photographic print. Students produce a personal portfolio based on technical instruction, contemporary photographic approaches, and critical discussions.

Prerequisites
AVT 353 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4
AVT 453 - Advanced Photographic Printing II

Credits: 4
Students produce a photographic portfolio based on technique, content, personal expression, photographic criticism, and knowledge of contemporary trends. Includes critical discussions, and reading and writing assignments.

Prerequisites
AVT 452 or permission of instructor.

Notes
Intensive continuation of AVT 452.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 454 - Alternative Photo Processes

Credits: 4
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums.

Prerequisites
AVT 353 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 455 - Advanced Digital Photo

Credits: 4
Digital Photo with further exploration into digital techniques and personal expression. The semester is spent developing and creating a portfolio of photographic images.

Prerequisites
AVT 354 or permission of instructor.

Notes
Continuation of AVT 354

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4
AVT 456 - Large Format Photography

Credits: 4
An introduction to basic concepts, controls, and exposure theories of large format photography. Students develop an aesthetic knowledge of the view camera's potential working with 4” x 5” view cameras in the studio and field.

Prerequisites
AVT 353 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 457 - Documentary Photography

Credits: 4
Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations.

Prerequisites
AVT 452 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 458 - Advanced Studio Lighting

Credits: 4
The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography.

Prerequisites
AVT 356 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 459 - About Photography: Practice and Research

Credits: 4
A combined studio and lecture course investigating photography's history, critical theory, philosophy, and practice. Lectures,
discussions, readings, and projects focus on a medium that has enormously influenced art and culture.

**Prerequisites**
One course from AVT 452-458 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

---

**AVT 462 - Sculpture III**

Credits: 4
Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects.

**Prerequisites**
AVT 363 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

---

**AVT 463 - Sculpture IV**

Credits: 4
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing.

**Prerequisites**
AVT 462 or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
4

---

**AVT 464 - Sculpture V**

Credits: 4
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited.

**Prerequisites**
AVT 463 or permission of instructor.
AVT 465 - Sculpture VI

Credits: 4
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative.

Prerequisites
AVT 464 or permission of instructor.

Notes
Continuation of advanced work in AVT 465.

AVT 472 - Critical Theory in the Visual Arts

Credits: 3
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts.

Prerequisites
ARTH 374 or permission of instructor.

AVT 473 - Advanced Performance Studio

Credits: 4

Prerequisites
AVT 373 or permission of instructor.
AVT 482 - Advanced Two-Dimensional Digital Art

Credits: 4
In-depth look at advanced digital imaging techniques and contemporary practices. Students are required to create a portfolio of large format high-resolution digital prints and further develop visual critical analysis skills through active participation in critiques.

Prerequisites
AVT 280 or permission of instructor.

AVT 483 - Internet Art

Credits: 4
Investigates Internet as space for making art while detailing a selection of tools, concepts, issues, and history pertaining to Internet art.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.

AVT 487 - Advanced Digital Media

Credits: 4
Integrates media art techniques, including rotoscoping, stop motion, layer compositing, hand drawing, and experimental animation, with digital video editing and DVD authoring. Special focus on intersection of traditional techniques, installation, and contemporary media art theory.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.
AVT 489 - Internship in Art and Visual Technology

Credits: 1-6
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans.

Prerequisites
Senior standing, completion of 12 concentration credits, and permission of instructor.

Notes
Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 12 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

AVT 491 - Independent Study in Art and Visual Technology

Credits: 1-6
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration.

Prerequisites
Senior standing, completion of 12 concentration credits, and permission of instructor.

Notes
Project documentation to include 45 hours of work per credit. May be repeated for credit for maximum 24 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

AVT 493 - Teaching Visual Thinking Through Media, PK-12

Credits: 3
Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher's visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students' artistic growth and human development.

Prerequisites
AVT 396 or permission of art education advisor.

Hours of Lecture or Seminar per week
3
AVT 494 - Teaching Critical Response to Art, PK-12

Credits: 3
Develops visual literacy and critical-thinking skills for application to the PK-12 classroom by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts. Includes intensive writing, readings, discussions, museum work, research and Internet skills, and studio work.

Prerequisites
AVT 396 or permission of art education advisor.

AVT 497 - Senior Project

Credits: 4
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Prerequisites
Senior art and visual technology major, completion of 12 concentration credits, and completion of or concurrent enrollment in all required general education courses.

AVT 498 - Senior Design Project

Credits: 4
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Prerequisites
Senior art and visual technology major, completion of AVT 311, 313, and 414, and completion of or concurrent enrollment in all required general education courses.
AVT 522 - Drawing V

Credits: 4
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisites
Admission to AVT graduate program or permission of instructor for AVT 522; or permission of instructor for 523.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 523 - Drawing VI

Credits: 4
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisites
Admission to AVT graduate program or permission of instructor for AVT 522; AVT 522; or permission of instructor for 523.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 596 - Independent Study

Credits: 1-6
Independent reading and research on specific project under department faculty member's direction.

Prerequisites
BA or equivalent, or permission of instructor.

Notes
Written reports required. May be repeated for credit.

Hours of Lecture or Seminar per week
1-6
Hours of Lab or Studio per week
0

AVT 599 - Special Topics in Art and Visual Technology
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Notes**
Topics and credit vary with instructor. May be repeated when taken under different topics.

**Hours of Lecture or Seminar per week**
1-3

**Hours of Lab or Studio per week**
0-6

### AVT 600 - Research Methodologies

Credits: 3
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### AVT 605 - Issues and Research in Art Education

Credits: 3
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers' use of research-oriented questions and data to explore classroom issues and improve teaching and learning.

**Prerequisites**
Admission to the MAT program and permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### AVT 610 - Graduate Seminar

Credits: 1-4
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on
developing public communication and presentation skills on contemporary issues in the arts.

**Prerequisites**

Admission to AVT graduate program or permission of instructor.

**Notes**

Seminar course required of all AVT graduate students four times during course of study. Repeatable for 4 credits.

**AVT 611 - Graduate Design Seminar**

Credits: 1

A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content.

**Prerequisites**

Admission to graphic design MA (or MFA) program, or permission of instructor.

**Notes**

Can be repeated.

**AVT 612 - Thesis Research**

Credits: 1

Provides the development and research phase in preparation for AVT 794: Thesis, the capstone course in the graphic design masters program. Students will prepare their written thesis proposal for presentation to the AVT GD Graduate Faculty Committee.

**Prerequisites**

Admission to AVT graphic design graduate program and completion of 30 graduate credits.

**Notes**

To be completed prior to enrolling in AVT 794: Thesis

**Hours of Lecture or Seminar per week**

0

**Hours of Lab or Studio per week**

0
AVT 613 - Graphic Design History

Credits: 3
A survey of design history, examining print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

Prerequisites
Admission to AVT graduate program or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 614 - Brand Identity Design

Credits: 4
This is an advanced design course with an emphasis on brand identity development. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphic standards guide.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 615 - Technology for Art Teachers

Credits: 3
Addresses use of technology in PK-12 art classroom. Focuses on research, presentation and instruction, and image creation. Students develop technology-enhanced teaching units for different grade levels and explore related issues, including copyright, plagiarism, and appropriation.

Prerequisites
Admission to the MAT program and permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 616 - Networked Art Practice
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 617 - Advanced Typography

Credits: 4
Students will produce a body of work exploring the opportunities and limitations of typographical design.

Prerequisites
Admission to graphic design MA (or MFA) program, or permission of the instructor

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 619 - Advanced Web Design

Credits: 4
Develops skills for the application of information, interaction, usability, and visual design for web site development. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

AVT 620 - Theory, Criticism, and the Visual Arts

Credits: 3
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers.

Prerequisites
Admission to AVT graduate program or permission of instructor.
AVT 622 - Advanced Drawing

Credits: 4
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral.

Prerequisites
Admission to AVT graduate program or permission of instructor.

AVT 632 - Graduate Painting I

Credits: 5
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisites
Admission to AVT graduate program or permission of instructor.

AVT 633 - Graduate Painting II

Credits: 5
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisites
AVT 632, or permission of instructor.
AVT 634 - Advanced Graduate Painting

Credits: 5
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

Prerequisites
AVT 633, or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
6

AVT 642 - Graduate Printmaking I

Credits: 5
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
6

AVT 643 - Graduate Printmaking II

Credits: 5
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
6
AVT 644 - Advanced Graduate Printmaking

Credits: 5
Intensive course of creative exploration in print media that furthers students' independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture.

Prerequisites
AVT 643, or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 652 - Graduate Photography I

Credits: 5
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 653 - Graduate Photography II

Credits: 5
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

Hours of Lecture or Seminar per week
2
AVT 654 - Advanced Graduate Photography

Credits: 5
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisites
AVT 653, or permission of instructor.

Notes
Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

AVT 662 - Graduate Sculpture I

Credits: 5
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisites
Admission to AVT graduate program or permission of instructor.

AVT 663 - Graduate Sculpture II

Credits: 5
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisites
AVT 662 or permission of instructor.
AVT 664 - Advanced Graduate Sculpture

Credits: 5
Emphasizes individual creative production and development, with periodic exposure of student’s work and ideas to the critical attention of the AVT teaching faculty and other graduate students.

Prerequisites
AVT 663 or permission of instructor.

Notes
Writing and reading components.

AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context

Credits: 4
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12.

Prerequisites
Admission to the MAT program and permission of the instructor based on a portfolio review.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 668 - Three-Dimensional Art Making across Cultures

Credits: 4
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels.

Prerequisites
Admission to the MAT program and permission of the instructor.

Hours of Lecture or Seminar per week
2
AVT 669 - Four Dimensional Art Making: Technology and New Media

Credits: 4
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
4

AVT 670 - Teaching Practicum

Credits: 3 or 6
Supervised classroom teaching practicum in Mason's undergraduate program or community college program.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
May be repeated for total of 6 credits.

Hours of Lecture or Seminar per week
3 or 6

Hours of Lab or Studio per week
0

AVT 672 - Performance Studio I

Credits: 5
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
Substantial research project required.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
6
AVT 673 - Performance Studio II

Credits: 5
In-depth studio course focusing on collaborative practice of performance art. Analyzes creation and production processes from an interdisciplinary perspective in conjunction with practical training in multimedia performance, complemented by screenings, readings, guest artists, and field trips.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 674 - Advanced Performance Studio

Credits: 5
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production.

Prerequisites
AVT 673 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 675 - Advanced Performance Topics

Credits: 5
Opportunity for advanced study in interdisciplinary arts topics including African American experience in the performing arts, cyberpunk, global motion, interarts figures, live movies, writing and performance.

Prerequisites
AVT 673 or permission of instructor.

Notes
May be repeated for maximum 15 credits when taken under different topics.

Hours of Lecture or Seminar per week
6
Hours of Lab or Studio per week
2
AVT 676 - Sound and Music for Video and Animation

Credits: 5
Combined lecture and studio course focusing on selection, editing, processing, and integration of sound and music (postproduction) into video and animation. Studies time, frequency, and amplitude domain and processing. Students postproduce sound and music for 15-minute film or animation due at semester end.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 678 - Interface and CD-ROM Design

Credits: 5
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform CD-ROM project due at semester end.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 682 - The Art of 2D Animation

Credits: 5
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6
AVT 684 - Two-Dimensional Digital Art

Credits: 5
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media, illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and color reproduction. Emphasis on developing advanced studio portfolio.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 685 - Video Art

Credits: 5
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal narrative, creative skills, and construction of meaning, as well as on acquiring technical skills.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 686 - Three-Dimensional Digital Art

Credits: 5
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6
AVT 687 - Advanced Digital Media

Credits: 5
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 688 - Digital Animation

Credits: 5
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6

AVT 691 - Elementary Art Education

Credits: 3
Concepts and methods in early childhood and elementary art education.

Prerequisites
Admission to the MAT program and permission of instructor.

Notes
Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1
AVT 692 - Secondary Art Education

Credits: 3
Concepts and methods in secondary art education.

Prerequisites
AVT 691 or permission of instructor.

Notes
Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

AVT 693 - Apprenticeship

Credits: 3 or 6
Apprenticeship at a local business conforming to students' interests in visual information technologies.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week
3 or 6

Hours of Lab or Studio per week
0

AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK–12

Credits: 3
Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

AVT 695 - Internship in Art Education (Student Teaching)
Credits: 6
Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress.

Prerequisites
Completion of all other MAT program requirements.

Corequisite
AVT 696.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

AVT 696 - Seminar for Student Teachers

Credits: 1
Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers.

Corequisite
AVT 695.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
0

AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts

Credits: 2
Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education.

Prerequisites
Completion of all ASTL art education concentration courses.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
0

AVT 794 - Independent Design Project

Credits: 4
The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production
and presentation of a graduate-level design project guided by faculty and design professionals.

**AVT 796 - Directed Project, Directed Reading, Thesis**

Credits: 1-9
Involves a study of historical basis for studio project, independent creative production suitable for public viewing, and written thesis documenting evolution of the creative problem and exploring the intention, purpose, and relative success of the finished production.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Notes**
One of three courses comprising the MFA comprehensive experience for AVT students.

**AVT 798 - Directed Project, Directed Reading, Thesis**

Credits: 3
Involves a study of historical basis for studio project, independent creative production suitable for public viewing, and written thesis documenting evolution of the creative problem and exploring the intention, purpose, and relative success of the finished production.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Notes**
One of three courses comprising the MFA comprehensive experience for AVT students.

**AVT 799 - Directed Project, Directed Reading, Thesis**

Credits: 1-3
Involves a study of historical basis for studio project, independent creative production suitable for public viewing, and written
thesis documenting evolution of the creative problem and exploring the intention, purpose, and relative success of the finished production.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Notes**
One of three courses comprising the MFA comprehensive experience for AVT students.

**BENG 401 - Bioengineering Instrumentation and Design**

Credits: 4
Exposes students to the engineering design process with special focus in medical and biological applications. Tools to be explored range from specialized software (LabView, OrCad, Matlab) to laboratory and machine shop facilities. The semester culminates in the presentation of a group project. Students are expected to leverage their background and apply it to a problem in bioengineering.

**Prerequisites**
BIOL 213; ECE 320 and 333, or permission of instructor.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**BENG 402 - Bioengineering Instrumentation and Design Laboratory**

Credits: 1
Introduces a project-based laboratory where students are exposed to all available tools from several electrical and computer engineering disciplines. Students will physically implement their own team-based project using a subset of those tools.

**Prerequisites**
BIOL 213, ECE 320 and 333, or permission of instructor.

**Corequisite**
BENG 401

**Notes**
Projects are demonstrated during oral presentations toward the end of the semester.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
3
BENG 492 - Senior Advanced Design Project I

Credits: 2
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan.

Prerequisites
90 credit hours applicable to the BSEE degree and COMM 100 and ENGL 302.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
0

BENG 493 - Senior Advanced Design Project II

Credits: 2
Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Completing this course with a C or better satisfies university's general education synthesis requirement.

Prerequisites
BENG 492, preferably in the preceding semester.

Notes
Implementation of project for which preliminary work was done in BENG 492.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
0

BENG 499 - Special Topics in Bioengineering

Credits: 0-4
Topics of special interest to undergraduates.

Prerequisites
Permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially differ.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0
BINF 354 - Foundations in Mathematical Biology

Credits: 3
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations.

Prerequisites
Completion or concurrent enrollment in all other required general education courses; chemistry and integral calculus; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 401 - Bioinformatics and Computational Biology I

Credits: 3
Topics are presented as three-week units: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction, and evolutionary models; gene structure prediction in prokaryotes and eukaryotes; image analysis, and biomedical applications.

Prerequisites
BIOL 213, IT 108, IT 208, or CS 112 (instead of IT 108 and IT 208), STAT 344, or STAT 250.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 402 - Bioinformatics and Computational Biology II

Credits: 3
Topics are presented as three-week units: the design and use of parallel genomics platforms, mapping the measurements to biomolecules; approaches for inferring biological pathways; simulation methods for the dynamics of biomolecules; systems approaches to biology.

Prerequisites
BINF 401 and BINF 403.

Hours of Lecture or Seminar per week
3  
Hours of Lab or Studio per week
0

**BINF 403 - Bioinformatics and Computational Biology Lab I**

Credits: 1  
Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis methods and image comparisons.

**Corequisite**
BINF 401.

0  
Hours of Lecture or Seminar per week
3

**BINF 404 - Bioinformatics and Computational Biology Lab II**

Credits: 1  
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs.

**Prerequisites**
Concurrent enrollment in BINF 402 and passing grades in BINF 401 and 403.

0  
Hours of Lecture or Seminar per week
3

**BINF 450 - Bioinformatics for Life Sciences**

Credits: 4  
The use of bioinformatics has become pervasive throughout the life sciences. This course will teach students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny.

**Prerequisites**
BIOL 213 and either BIOL 482 or BIOL 483/CHEM 463.

3  
Hours of Lecture or Seminar per week
**BINF 470 - Molecular Biophysics**

Credits: 3  
**Cross-Listed with** PHYS 370

The course offers a broad introduction into molecular biophysics. The course demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. The course is mainly designed for the students majoring in physics or chemistry, but it is also useful for the biology majors interested in bioinformatics and computational biology.

**Prerequisites**  
PHYS 307 or CHEM 331 and CHEM 332 or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**BINF 491 - Senior Thesis in Bioinformatics**

Credits: 1  
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

**Prerequisites**  
The bioinformatics minor core classes.

**Notes**  
An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required.

**Hours of Lecture or Seminar per week**  
1  
**Hours of Lab or Studio per week**  
3

**BINF 492 - Senior Thesis in Bioinformatics**

Credits: 1  
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

**Prerequisites**  
BINF 491.

**Notes**  
A written thesis in standard format is required.

**Hours of Lecture or Seminar per week**
BINF 630 - Bioinformatics Methods

Credits: 3
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.

Prerequisites
Graduate standing, or permission of instructor.

BINF 631 - Molecular Cell Biology for Bioinformatics

Credits: 3
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control.

Prerequisites
Undergraduate background in biochemistry or cell biology, or permission of instructor.

BINF 633 - Molecular Biotechnology

Credits: 3
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today’s society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology.

Prerequisites
Graduate standing or permission of instructor.
Hours of Lab or Studio per week
0

BINF 634 - Bioinformatics Programming

Credits: 3
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language.

Prerequisites
Graduate standing and computer programming experience, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 636 - Microarray Methodology and Analysis

Credits: 3
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products.

Prerequisites
BINF 633, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 637 - Forensic DNA Sciences

Credits: 3
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Prerequisites
Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
BINF 639 - Introduction to Biometrics

Credits: 3
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks.

Prerequisites
Programming experience such as CSI 603 and 604, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 650 - Introduction to Bioinformatics Database Design

Credits: 3
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL.

Prerequisites
BINF 634 or equivalent, or permission of the instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 690 - Numerical Methods for Bioinformatics

Credits: 3
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code.

Prerequisites
Calculus and knowledge of a programming language, such as CS 112 and MATH 113, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics
Credits: 3  
**Cross-Listed with BIOS 701**

Introduction to biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Such studies employ myriad conceptual and technical approaches in their application. Articles from current literature are basis of course offering. The application of molecular techniques within biosciences is now universal. The cell: What is its structure and how does it function? This is the underlying question of course.

**Prerequisites**  
Admission to PhD program in biosciences or bioinformatics, CHEM 663, or equivalent.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

---

**BINF 702 - Research Methods**

Credits: 3  
**Cross-Listed with BIOS 702**

Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection, and data analysis.

**Prerequisites**  
Admission to PhD program in bioinformatics or biosciences or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

---

**BINF 703 - Bioinformatics Lab Rotation**

Credits: 1  
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member.

**Prerequisites**  
Permission of instructor.

**Notes**  
May be repeated.

**Hours of Lecture or Seminar per week**  
0

**Hours of Lab or Studio per week**  
1
BINF 704 - Colloquium in Bioinformatics

Credits: 1
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors.

Prerequisites
Graduate standing.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

BINF 705 - Research Ethics

Credits: 1
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

BINF 730 - Biological Sequence Analysis

Credits: 3
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools.

Prerequisites
BINF 702 or previous courses in programming, molecular biology, and probability, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
BINF 731 - Protein Structure Analysis

Credits: 3
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis.

Prerequisites
Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 732 - Genomics

Credits: 3
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics.

Prerequisites
BINF 730 or previous courses in biology, numerical methods, and programming; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 733 - Gene Expression Analysis

Credits: 3
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks.

Prerequisites
Programming experience and course in molecular biology, or permission of instructor; S-Plus or Matlab experience may be helpful.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 734 - Advanced Bioinformatics Programming
Credits: 3
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project.

Prerequisites
BINF 634, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 739 - Topics in Bioinformatics

Credits: 3
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 740 - Introduction to Biophysics

Credits: 3
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Prerequisites
Undergraduate courses in general physics, calculus, and biology.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 741 - Introduction to Computer Simulations of Biomolecules

Credits: 3
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special
emphasis given to practical applications. Reviews most recent advances in biomolecular simulations.

**Prerequisites**
BINF 690 and 701, and knowledge of computer programming language; or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BINF 751 - Biochemical and Cellular Systems Modeling**

Credits: 3
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis.

**Prerequisites**
Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor.

**Notes**
Course in differential equations is recommended.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BINF 760 - Machine Learning for Bioinformatics**

Credits: 3
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature.

**Prerequisites**
Familiarity with bioinformatics methods and databases (e.g., BINF 630), molecular cell biology (e.g., BINF 631), bioinformatics programming (e.g., BINF 634), or permission of the instructor.

**Notes**
In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
BINF 796 - Directed Reading and Research

Credits: 3
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Notes
May be repeated.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BINF 798 - Research Project

Credits: 3
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

Prerequisites
12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

BINF 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/IP

BINF 820 - Advanced Topics in Molecular Cell Biology
Credits: 3
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation.

Prerequisites
BINF 631 or equivalent.

Notes
Advanced molecular and cellular biology foundation for BINF students.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BINF 831 - Structural Genomics Project

Credits: 3
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication.

Prerequisites
BINF 731, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BINF 841 - Research Topics in Biomolecular Simulations

Credits: 3
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding.

Prerequisites
BINF 741, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BINF 996 - Doctoral Reading and Research
Credits: 1-12
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisites
Admission to doctoral program and permission of instructor.

Notes
May be repeated.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

BINF 998 - Doctoral Dissertation Proposal

Credits: 1-12
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisites
Permission of advisor.

Notes
May be repeated.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

Grading
S/IP

BINF 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy.

Notes
May be repeated, but no more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0
Grading
S/IP

BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents

Credits: 3
Covers pathology, metabolism, and threat of bacterial agents that can be used as biological weapons.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 605 - Introduction to Biodefense II: Viral Agents

Credits: 3
Covers pathology, metabolism, and threat of viral agents that can be used as biological weapons.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 607 - Introduction to Biodefense/Threat Analysis III: Toxins

Credits: 3
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 609 - Biodefense Strategy and Policy

Credits: 1-4
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security.

Prerequisites
BIOD 604 and 605 or permission of instructor.
BIOD 610 - Advanced Topics in Biodefense

Credits: 1-4
Different topics, depending on instructor's specialty. Topics include legal, ethical, scientific, and political aspects of biodefense, emphasizing current problems and research.

Prerequisites
BIOD 604 and 605 or permission of instructor.

Notes
May be repeated when topic is different.

BIOD 620 - Health and Security

Credits: 3
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing security landscape. Presents the major lines of discourse in the academic literature examining links between health and security. The impact of the AIDS epidemic on national and regional security, the role of health issues in post-Cold War conflict situations, and the security implications of advances in the life sciences.

Prerequisites
BIOD 604 and 605 or permission of instructor

BIOD 621 - Ethics and International Security

Credits: 3
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed.
BIOD 622 - Negotiating in the International Arena

Credits: 3
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations.

BIOD 702 - Biodefense Colloquium

Credits: 1
Forum for presentation and discussion of original and current research in biodefense.

Notes
May be repeated for credit.

BIOD 705 - Intelligence: Theory and Practice

Credits: 3
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists.

Prerequisites
BIOD 604 and 605, or permission of instructor.
BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security

Credits: 3
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 709 - Nonproliferation and Arms Control

Credits: 3
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 710 - Approaches to Bioweapon Medical Treatment and Response

Credits: 3
Examines research, treatment, and preparedness strategies against natural and human-made biological agents. Focuses on various strategies, including immunological, pharmaceutical, and medical treatment methodologies and designs.

Prerequisites
BIOD 604 and 605.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
BIOD 722 - Examining Terrorist Groups

Credits: 3
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 723 - Legal Dimensions of Homeland Security

Credits: 3
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 725 - Terrorism and Weapons of Mass Destruction

Credits: 3
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 726 - Agroterrorism and Food Security
Credits: 3
Analyzes the threat of agricultural terrorism, including assessments of the chemical and biological agents used to disrupt agriculture and livestock, and the national and global economic and social impacts of these disruptions. Also examines strategies for enhancing the security of the food production and supply systems.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 751 - Biosurveillance

Credits: 3
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 752 - The Role of the Military in Homeland Security

Credits: 3
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOD 760 - National Security Technology and Policy

Credits: 3
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the
formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 761 - Dispersal Patterns of Biological Agents

Credits: 3
Introduction to military and terrorist methods of dispersal patterns. Covers physics of aerosols; engineering and mechanics of building ventilation systems; and mechanical dissemination, including hand-held, automatic, vehicle, and truck-mounted systems. Includes viability of specific agents involved.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 762 - Into the Hot Zone: Working in a High Threat Environment

Credits: 2
Introductory course covers methodology of working in a Biosafety Level 3 or 4 environment. Special attention to responding to biowarfare or bioterrorism related event.

Prerequisites
BIOD 604 and 605, or permission of instructor

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
0

BIOD 766 - Development of Vaccines and Therapeutics

Credits: 3
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector
failures.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIOD 780 - Master's Supervised Internship**

Credits: 1-6
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency.

**Prerequisites**
Permission of program director or advisor.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**BIOD 793 - Directed Studies in Biodefense**

Credits: 1-3
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor.

**Prerequisites**
Permission of the instructor and program director.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**BIOD 798 - Master's Research Project in Biodefense**

Credits: 3
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal.

**Prerequisites**
24 credits in BIOD and permission of project director.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0
BIOD 799 - Master's Thesis in Biodefense

Credits: 1-6
Master's thesis research under direction of thesis committee.

Prerequisites
24 credits in BIOD and permission of thesis committee.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

Grading
S/NC

BIOD 810 - Advanced Seminar in Biodefense

Credits: 3
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity.

Prerequisites
BIOD 604 and 605, or permission of advisor.

Notes
May be repeated for credit twice when topic is different.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOD 890 - Doctoral Supervised Internship

Credits: 1-6
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisites
Permission of program director or advisor.

Hours of Lecture or Seminar per week
0
BIOD 899 - Directed Research in Biodefense

Credits: 1-12
Research on a pertinent topic in biodefense; scope and subject determined by instructor.

Prerequisites
Approval of program director.

BIOD 996 - Doctoral Reading and Research

Credits: 1-9
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats.

Notes
May be repeated for credits.

BIOD 998 - Doctoral Dissertation Proposal

Credits: 1-12
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee.

Notes
Only 12 credits may be applied to the degree.
BIOD 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research under direction of dissertation chair.

Prerequisites
Completion of 998 and advancement to candidacy.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/NC

BIOL 103 - Introductory Biology I

Credits: 4
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life.

Notes
Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 104 - Introductory Biology II

Credits: 4
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology.

Notes
Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM
BIOL 105 - Introductory Biology I Laboratory

Credits: 1
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented.

Prerequisites
Permission of BIOL 103/104 coordinator and department chair.

Notes
Not available to students who have taken BIOL 103 or the equivalent.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
3

BIOL 106 - Introductory Biology II Laboratory

Credits: 1
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants.

Prerequisites
Permission of BIOL 103/104 coordinator and department chair.

Notes
Not available to students who have taken BIOL 104 or the equivalent.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
3

BIOL 124 - Human Anatomy and Physiology

Credits: 4
Introduction to structure and function of body's major organ systems.

Notes
Should be taken in sequence. Does not satisfy natural science requirement for BA in CAS.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
BIOL 125 - Human Anatomy and Physiology

Credits: 4
Introduction to structure and function of body's major organ systems.

Notes
Should be taken in sequence. Does not satisfy natural science requirement for BA in CAS.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 213 - Cell Structure and Function

Credits: 4
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 225 - Human Reproduction and Sexuality

Credits: 3
Examines anatomy and physiology of human reproductive systems, physiology of sexual intercourse, normal pregnancy, birth, congenital conditions, sex determination and its expression, diseases of reproductive organs, and technical developments related to reproduction.

Notes
Not available for biology major or minor credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
F
BIOL 246 - Introductory Microbiology

Credits: 3
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens.

Prerequisites
C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.

Corequisite
BIOL 306.

Notes
Not available for biology major credit. Not available to students who have taken BIOL 213 or 418.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
F, S

BIOL 301 - Biology and Society

Credits: 3
Cross-Listed with EVPP 421

Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation.

Prerequisites
BIOL 103 and 60 credits, or permission of instructor.

Notes
Not available for biology major or minor elective credit. See Schedule of Classes for current topic; may be repeated if topic is different.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 303 - Animal Biology

Credits: 4
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups.
Prerequisites
C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 304 - Plant Biology

Credits: 4
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships.

Prerequisites
C or better in BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 305 - Biology of Microorganisms

Credits: 3
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions.

Prerequisites
C or better in BIOL 213, or permission of instructor.

Corequisite
BIOL 306.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
F, S, SUM

BIOL 306 - Biology of Microorganisms Laboratory
Credits: 1
Laboratory techniques in culturing, staining, and identifying microorganisms.

Corequisite
BIOL 246 or 305.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 307 - Ecology

Credits: 4
Physical environment, energy flow, structure and function of populations, dynamics of communities, and succession.

Prerequisites
BIOL 303 and 304, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 309 - Introduction to Oceanography

Credits: 3
Cross-Listed with GEOL 309

Introduction to chemical, biological, and geological aspects of oceanic environment.

Prerequisites
GEOL 101 and BIOL 103, or 213 or EVPP 110, or permission of instructor.

Notes
May include field trip.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
F
BIOL 311 - General Genetics

Credits: 4
Basic principles of heredity and modern developments in this field.

Prerequisites
BIOL 213, 303, 304, 305, 306 all completed with no more than one D; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F, S, SUM

BIOL 312 - Biostatistics

Credits: 4
Use of probability and descriptive and inferential statistical techniques in interpreting biological data.

Prerequisites
BIOL 303 and 304, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
2
When Offered
F

BIOL 313 - Human Genetics for the Social Sciences

Credits: 3
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings.

Prerequisites
One year of biology, or permission of instructor.

Notes
Not available for biology credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
S, odd
BIOL 318 - Conservation Biology

Credits: 3
Introduction to science used to identify species in need of conservation, and techniques to manage and protect organisms.

Prerequisites
BIOL 307 and 311, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 320 - Comparative Chordate Anatomy

Credits: 4
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit.

Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
6
When Offered
AF

BIOL 322 - Developmental Biology

Credits: 4
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels.

Prerequisites
BIOL 303 and 311, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
When Offered
F
BIOL 326 - Animal Physiology

Credits: 3
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Prerequisites
BIOL 213, 303, and 60 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 327 - Animal Physiology Laboratory

Credits: 2
Investigation of invertebrate and vertebrate physiology. Emphasizes responses to environmental changes.

Prerequisites/Corequisites
BIOL 326 and permission of instructor.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

BIOL 331 - Invertebrate Zoology

Credits: 4
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups.

Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

BIOL 332 - Insect Biology

Credits: 4
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance.
Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

BIOL 333 - Vertebrate Zoology

Credits: 4
Introduces vertebrates with emphasis on systematics, life history, behavior, and ecology. Laboratory emphasis on identification and natural history of local fauna.

Prerequisites
BIOL 307 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

BIOL 342 - Plant Morphology

Credits: 4
Origin and development of organs, tissue systems, and life cycles of green plants, with phylogenetic comparisons from algae to angiosperms.

Prerequisites
BIOL 304, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

BIOL 344 - Taxonomy of Flowering Plants

Credits: 4
Study of terminology and identification of flowering plants with emphasis on local flora.

Prerequisites
BIOL 304, or permission of instructor.

Hours of Lecture or Seminar per week
3
**BIOL 345 - Plant Communities**

Credits: 4  
Plant associations and formations and their successions in North America.

**Prerequisites**  
BIOL 304, or permission of instructor.

**Notes**  
Three Saturday or Sunday field trips required.

**BIOL 350 - Freshwater Ecosystems**

Credits: 4  
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms.

**Prerequisites**  
CHEM 211/212, and either EVPP 110/111 or BIOL 307.

**BIOL 355 - Ecological Engineering and Ecosystem Restoration**

Credits: 4  
Cross-Listed with EVPP 355

This undergraduate course will provide definition, classification and practice of ecological engineering and ecosystem restoration. The course describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. The content of the course is broad and transdisciplinary, drawing extensively from the natural sciences, the social sciences and the humanities. The objective of this course is to provide students with a systems-oriented perspective on environmental studies. Specifically, the course will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days).
Prerequisites
CHEM 211, BIOL 307 and PHYS 243.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

BIOL 374 - Biogeography: Space, Time, and Life

Credits: 3
Cross-Listed with EOS 321

A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Prerequisites
BIOL 303 and 304 or EOS 122 or GEOG 102 or permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 377 - Applied Ecology

Credits: 3
Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

Prerequisites
8 credits of biology, geology, or chemistry; 60 credits; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 385 - Biotechnology and Genetic Engineering

Credits: 3
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment.

Prerequisites
BIOL 311; CHEM 211, 212; MATH 110 or 113.

Hours of Lecture or Seminar per week
BIOL 402 - Applied and Industrial Microbiology

Credits: 3
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition.

Prerequisites
BIOL 213, 305, 306; CHEM 211, 212; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 403 - Techniques in Applied and Industrial Microbiology

Credits: 1
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products.

Prerequisites
BIOL 213, 305, 306; CHEM 211, 212.

Corequisite
BIOL 402, or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3

BIOL 404 - Medical Microbiology

Credits: 3
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week
3
BIOL 405 - Microbial Genetics

Credits: 4
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

BIOL 406 - Microbial Physiology and Metabolism

Credits: 4
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

BIOL 407 - Microbial Diversity

Credits: 4
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3
BIOL 411 - Advanced General Genetics

Credits: 3
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology.

Prerequisites
2.00 or better in BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 417 - Selected Topics in Molecular and Cellular Biology

Credits: 1-4
Study of current topics in molecular and cellular biology. Lecture, laboratory.

Prerequisites
BIOL 311 or 482, or permission of instructor.

Notes
Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week
0-3
Hours of Lab or Studio per week
0-6

BIOL 418 - Current Topics in Microbiology

Credits: 3
Study of current topics in microbiology.

Prerequisites
BIOL 305 and 306.

Notes
Topics vary. May be repeated for credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
BIOL 420 - Vaccines

Credits: 3

Prerequisites
BIOL 305/306.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 421 - Genetics of Human Diseases

Credits: 3
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented.

Prerequisites
BIOL 311.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 422 - Stem Cell Biology and Regenerative Medicine

Credits: 3
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine."

Prerequisites
BIOL 311.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 425 - Human Physiology
Credits: 3
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions.

Prerequisites
BIOL 213, 303, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 433 - Selected Topics in Plant Biology

Credits: 1-4
Lecture or field course in botany. Topic varies with instructor's specialty.

Prerequisites
BIOL 304, or permission of instructor.

Hours of Lecture or Seminar per week
1-4
Hours of Lab or Studio per week
0-6

BIOL 435 - Selected Topics in Biology

Credits: 1-4
Topics vary with instructor's specialty. May be repeated only with permission of department chair.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
1-3
Hours of Lab or Studio per week
0-6

BIOL 440 - Field Biology

Credits: 1-4
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

Prerequisites
BIOL 303, 304, and 60 credits, or permission of instructor.
Notes
Students bear cost of required field trips. May be repeated once with permission of department chair. Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.

Hours of Lecture or Seminar per week
0-2
Hours of Lab or Studio per week
3-9

BIOL 446 - Environmental Physiology
Credits: 3
Physiological responses of animals to environmental factors and changes in natural environment. Topics include biorhythms and adaptation to temperature, high pressure, and altitude. Emphasis on vertebrates.

Prerequisites
BIOL 326, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 449 - Marine Ecology
Credits: 3
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

Prerequisites
BIOL 307 and BIOL/GEOL 309, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 452 - Immunology
Credits: 3
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system.

Prerequisites
BIOL 213, 305, 306, and 311; or permission of instructor.

Hours of Lecture or Seminar per week
**BIOL 453 - Immunology Laboratory**

Credits: 1  
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation.

**Prerequisites/Corequisites**  
BIOL 452

**Hours of Lecture or Seminar per week**  
0

**Hours of Lab or Studio per week**  
3

**BIOL 459 - Fungi and Ecosystems**

Credits: 3  
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

**Prerequisites**  
BIOL 304, course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**BIOL 465 - Histology**

Credits: 4  
Microscopic structure of animal tissues and organs, with emphasis on vertebrates.

**Prerequisites**  
BIOL 303 and 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
3
BIOL 470 - Dinosaur Biology

Credits: 3
An introduction to the evolution, diversity, and biology of the dinosaurs and their descendents. How current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals will be emphasized.

Prerequisites/Corequisites
Completion of 60 hours and BIOL 307 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
1

BIOL 471 - Evolution

Credits: 3
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations.

Prerequisites
BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
S

BIOL 472 - Introductory Animal Behavior

Credits: 3
Study of mechanisms, functions, and evolution of behavior.

Prerequisites
BIOL 213, 303, or permission of instructor and 60 credits.

Corequisite
BIOL 473.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
BIOL 473 - Introductory Laboratory in Animal Behavior

Credits: 1
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory.

Corequisite
BIOL 472.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3

BIOL 482 - Introduction to Molecular Genetics

Credits: 3
Basic concepts of structure and function of genetic material at molecular level.

Prerequisites
BIOL 213, 305, and 306, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 483 - General Biochemistry

Credits: 4

Prerequisites
BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week
4

Hours of Lab or Studio per week
0

BIOL 484 - Eukaryotic Cell Biology

Credits: 3
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division.
Prerequisites
BIOL 311, 483; MATH 110 or 113; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 485 - Eukaryotic Cell Biology Laboratory

Credits: 1
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis.

Corequisite
BIOL 484 or permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
3

BIOL 486 - Molecular Biology and Biotechnology Laboratory

Credits: 2
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories.

Prerequisites
BIOL 385 or 482.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
6

BIOL 492 - Senior Seminar

Credits: 1
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.

Prerequisites
90 credits or permission of instructor.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
BIOL 493 - Honors Research in Biology

Credits: 1  
Laboratory or field investigation under supervisor's guidance.

Prerequisites  
Admission to the Biology Honors Program.

Hours of Lecture or Seminar per week  
0

Hours of Lab or Studio per week  
0

BIOL 494 - Honors Seminar in Biology

Credits: 1  
Weekly seminar course dealing with recent advances in biology.

Prerequisites  
Admission to department honors program, and permission of instructor.

Notes  
Topics selected from recent publications in field. May be repeated for credit six times.

Hours of Lecture or Seminar per week  
1

Hours of Lab or Studio per week  
0

When Offered  
F, S

BIOL 495 - Directed Studies in Biology

Credits: 1-2  
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor.

Prerequisites  
Permission of instructor and department chair.

Notes  
May be taken for 1 to 2 credits and repeated once for a total of 2 credits. Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.
**BIOL 497 - Special Problems in Biology**

Credits: 1-4  
Lab or field project leading to written report of research. Research and paper completed under instructor's guidance.

**Prerequisites**  
60 credits, and permission of instructor and department chair.

**Notes**  
Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.

**BIOL 501 - Microbial Diversity: An Organismal Approach**

Credits: 3  
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications.

**Prerequisites**  
Undergraduate course in microbiology, or permission of instructor.

**BIOL 506 - Selected Topics in Microbiology**

Credits: 1-4  
Topic depends on instructor's specialty.

**Prerequisites**  
BIOL 305, 306, or permission of instructor.

**Notes**  
May be repeated only with permission of department chair.
BIOL 507 - Selected Topics in Ecology

Credits: 1-4
Topic depends on instructor's specialty.

Prerequisites
Course in ecology and permission of instructor.

Notes
May be repeated only with permission of department chair.

BIOL 508 - Selected Topics in Animal Biology

Credits: 1-4
Topic depends on instructor's specialty.

Prerequisites
BIOL 303, or permission of instructor.

Notes
May be repeated only with permission of department chair.

BIOL 515 - Introduction to Neurobiology

Credits: 2
Introduction to neurobiology with an overview of embryological development of nervous system in evolutionary context. Regional and systems neuroanatomy is introduced by study of mammalian visual system with a comparative perspective.

Prerequisites
Completion of 60 credits, including PSYC 372; or BIOL 213 and 303.
BIOL 516 - Mammalian Neurobiology

Credits: 3
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisites
BIOL 515.

BIOL 518 - Conservation Biology

Credits: 3
Introduction to science used to identify species in need of conservation, and techniques to manage and protect organisms.

Prerequisites
BIOL 307, 311, or equivalent.

BIOL 520 - Systematics in Complex Angiosperm Families

Credits: 3
Morphology and speciation of more complex families such as Poaceae, Cyperaceae, and Asteraceae. Laboratory emphasizes identification of specimens, and acquaintance with taxonomic literature.

Prerequisites
BIOL 344 or 534, or permission of instructor.
BIOL 532 - Animal Behavior

Credits: 3
Ecological aspects of animal behavior.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 533 - Selected Topics in Plant Biology

Credits: 1-4
Topic depends on instructor's specialty.

Prerequisites
BIOL 304, or permission of instructor.

Notes
May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week
1-3

Hours of Lab or Studio per week
0-6

BIOL 534 - Advanced Plant Taxonomy

Credits: 3
Laboratories consist of field trips, and collection and identification of specimens.

Prerequisites
Course in plant taxonomy, or permission of instructor.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
6

BIOL 535 - Ancient Plants and their Environment

Credits: 3
Study of factors involved in origin, history, and extinction of fossil plants, including adaptations, paleoecology, and major
geological events.

**Prerequisites**
BIOL 304, course in paleontology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**BIOL 536 - Ichthyology**

Credits: 4

**Cross-Listed with** EVPP 536

Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

**Prerequisites**
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
3

---

**BIOL 537 - Ornithology**

Credits: 4

Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

**Prerequisites**
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
6

**When Offered**
AS

---

**BIOL 538 - Mammology**

Credits: 4

Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work.

**Prerequisites**
BIOL 539 - Herpetology

Credits: 4
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisites
Course in ecology, or permission of instructor.

BIOL 543 - Tropical Ecosystems

Credits: 4
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics.

Prerequisites
Course in ecology, or permission of instructor.

Notes
Field trip to tropics required as part of laboratory.

BIOL 547 - Terrestrial Plant Ecology

Credits: 4
Considers community organization, development, productivity, and mineral cycling; interactions between plants and competitors; herbivores; and environmental factors, especially light, water, and soil. Field work and laboratory emphasize data collection and statistical analysis.

Prerequisites
Course in ecology.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
3

**BIOL 553 - Advanced Topics in Immunology**

Credits: 3
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

**Prerequisites**
BIOL 452, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism**

Credits: 3
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation.

**Prerequisites**
BIOL 305, 306, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIOL 559 - Fungi and Ecosystems**

Credits: 3
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

**Prerequisites**
BIOL 304 or a course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3
BIOL 561 - Comparative Animal Physiology

Credits: 3
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.

Prerequisites
BIOL 326, or permission of instructor.

Hours of Lecture or Seminar per week
3

BIOL 563 - Virology

Credits: 3
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses.

Prerequisites
BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week
3

BIOL 564 - Techniques in Virology

Credits: 1
Basic techniques of animal virus propagation, isolation, and quantitation.

Prerequisites
BIOL 563, virology, and entrance into the PhD/biosciences or MS/biology program; or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3
BIOL 566 - Cancer Genomics

Credits: 3
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death.

Prerequisites
Course in genetics or biochemistry.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 568 - Advanced Topics in Molecular Genetics

Credits: 3
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research.

Prerequisites
BIOL 482, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 572 - Human Genetics

Credits: 3
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change.

Prerequisites
BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 573 - Developmental Genetics

Credits: 3
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems.
Prerequisites
BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 574 - Population Genetics

Credits: 3
Genetic structure and dynamics of populations, both real and ideal.

Prerequisites
BIOL 307 and 311, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 575 - Selected Topics in Genetics

Credits: 1-4
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research.

Prerequisites
BIOL 311, or permission of instructor.

Notes
May be repeated once with permission of department chair.

Hours of Lecture or Seminar per week
1-3

Hours of Lab or Studio per week
0-6

BIOL 576 - Microbial Ecology of Soils

Credits: 3
Detection, identification, and physiological role of microorganisms in soils from root zone to deep subsurface. Emphasizes interactions of microorganisms, viruses through protests, and their functions in soil.

Prerequisites
BIOL 305, 306, or permission of instructor.
**BIOL 577 - Biogeochemistry: A Global Perspective**

Credits: 3  
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

**Prerequisites**  
Introductory courses in ecology and chemistry, or permission of instructor.

**BIOL 578 - Mutation, DNA Repair, and Environmental Contamination**

Credits: 3  
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair.

**Prerequisites**  
BIOL 307 and 311.

**BIOL 579 - Molecular Evolution and Conservation Genetics**

Credits: 3  
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size.

**Prerequisites**  
BIOL 311.

**Corequisite**
BIOL 471, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### BIOL 580 - Computer Applications for the Life Sciences

Credits: 3

Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminar on advanced application, and complete project using computer to fulfill major assignment associated with another course or employment.

**Prerequisites**
12 credits of biology and one year of college mathematics, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### BIOL 581 - Estuarine and Coastal Ecology

Credits: 3

Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

**Prerequisites**
Course in Ecology and permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### BIOL 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1

Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results.

**Prerequisites/Corequisites**
EVPP 546/BIOL 546

**Hours of Lecture or Seminar per week**
0
Hours of Lab or Studio per week
3

BIOL 583 - General Biochemistry

Credits: 4
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds.

Prerequisites
BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week
4
Hours of Lab or Studio per week
0

BIOL 585 - Eukaryotic Cell Biology Laboratory

Credits: 1-2
Selected topics of laboratory procedures used in the study of eukaryotic cells.

Prerequisites
BIOL 484 or BIOL 682, or permission of instructor.

Notes
May be repeated one time with permission of program director.

Hours of Lecture or Seminar per week
0-1
Hours of Lab or Studio per week
3-6

BIOL 587 - Soil Ecology

Credits: 3
Introduction to physical, chemical, and biological processes that govern development of soils and their ecological functions. Emphasizes central role that plants, microbes, and animals play in soil processes. Provides some training in system of soil classification and current methods to study soils.

Prerequisites
Introductory courses in general ecology or environmental science, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
BIOL 588 - Global Changes in Climate and Ecology

Credits: 3
Focuses on global-level changes that influence ecology. Introduces climate system - past, present, and future - emphasizing links between ecological systems and changes in climate, land use, and element cycling. Topics include responses of forests, oceans to climate change; effects of elevated carbon dioxide on plants; effects of ultraviolet radiation on aquatic systems; salt marsh responses to sea level rise; global eutrophication; desertification; carbon sequestration; and public policy implications of global change science.

Prerequisites
Introductory courses in general ecology or environmental science, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOL 589 - Teaching Practicum

Credits: 1
Experience teaching biology in laboratory or in field under supervision of faculty member.

Prerequisites
Permission of instructor, chair, and course coordinator (if any).

Notes
Undergraduate assists instructor. May be repeated once.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
3

BIOL 607 - Fundamentals of Ecology

Credits: 3
Cross-Listed with EVPP 607

Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
BIOL 608 - Topics in Biology

Credits: 1-4
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics.

Prerequisites
Employment or anticipated employment as science teacher.

Notes
Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair.

Hours of Lecture or Seminar per week
1-4
Hours of Lab or Studio per week
0-9

BIOL 610 - Bioremediation: Theory and Applications

Credits: 3
Provides basis for understanding proper application of bioremedial technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment.

Prerequisites
Course in microbiology and organic chemistry or biochemistry, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 611 - Techniques in Environmental Microbiology

Credits: 2
Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics.

Prerequisites
Laboratory course in microbiology, or permission of instructor.

Notes
Open first to those enrolled in BIOL 610.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
4
BIOL 622 - Methods and Principles of Animal Taxonomy

Credits: 3
Theoretical basis of techniques in animal classification, emphasizing practical application to laboratory problem dealing with a particular animal group.

**Prerequisites**
Course in evolution, or permission of instructor.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
6

BIOL 640 - Environmental Biology

Credits: 3
Patterns of climate and weather, tectonics, soil formation, and surface water and groundwater movements.

**Prerequisites**
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

BIOL 643 - Microbial Ecology

Credits: 4
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment.

**Prerequisites**
Course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
3

BIOL 648 - Population Ecology
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology.

**Prerequisites**
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**BIOL 649 - Biological Resource Management**

Credits: 3
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis.

**Prerequisites**
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**BIOL 665 - Environmental Hazards to Human Health**

Credits: 3
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards.

**Prerequisites**
Courses in animal physiology and organic chemistry, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**BIOL 666 - Human Genetics Concepts for Health Care**

Credits: 4
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome.

**Prerequisites**
BS degree or enrollment in accelerated MS program.

**Notes**
Course in cell or molecular biology. Not available to students who have taken BIOL 572.

**Hours of Lecture or Seminar per week**
4

**Hours of Lab or Studio per week**
0

**BIOL 668 - Advanced Techniques in Molecular Biology**

Credits: 4
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology.

**Prerequisites**
BIOL 568, or permission of instructor.

**Hours of Lecture or Seminar per week**
2

**Hours of Lab or Studio per week**
6

**BIOL 669 - Pathogenic Microbiology**

Credits: 3
Molecular mechanisms of bacterial pathogenicity, and immune response in infectious diseases.

**Prerequisites**
Courses in microbiology and biochemistry.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIOL 670 - Environmental Law for Biologists**

Credits: 3
Study of laws and regulatory issues such as National Environmental Policy Act and Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

**Prerequisites**
Course in ecology, environmental biology, or permission of instructor.
BIOL 675 - Aerosol Biology

Credits: 4
This course provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment.

Prerequisites
Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

BIOL 680 - Experimental Design and Analysis for the Life Sciences

Credits: 4
Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology.

Prerequisites
Course in biostatistics, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

BIOL 682 - Advanced Eukaryotic Cell Biology

Credits: 3
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules.

Prerequisites
BIOL 483, CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
**BIOL 690 - Introduction to Graduate Studies in Biology**

Credits: 1-2  
Required of all new MS students in biology.

**Hours of Lecture or Seminar per week**  
1-2  
**Hours of Lab or Studio per week**  
0

**BIOL 691 - Current Topics in Biology**

Credits: 1-4  
**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week**  
1-3  
**Hours of Lab or Studio per week**  
0-6

**BIOL 692 - Seminar in Biology**

Credits: 1  
Topics vary.

**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week**  
1  
**Hours of Lab or Studio per week**  
0

**BIOL 693 - Directed Studies in Biology**

Credits: 1-8  
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor.

**Prerequisites**  
Permission of instructor, chair, and graduate committee.

**Notes**
May not be used to fulfill explicit undergraduate prerequisites for graduate work.

**BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology**

Credits: 1
Review and discussion of recent literature in specialized area. Includes student presentations.

Notes
May be repeated for credit.

**BIOL 715 - Microbial Physiology**

Credits: 3
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites.

Prerequisites
Undergraduate lecture/lab course in microbiology, and course in biochemistry.

**BIOL 718 - Techniques in Microbial Pathogenesis**

Credits: 3
Laboratory-based class in which students perform current techniques in microbial pathogenesis.

Prerequisites
Admission to biosciences PhD or biology MS program, and permission of instructor.
BIOL 720 - Microbial Metabolism

Credits: 3
Discussions of catabolic and anabolic pathways of bacterial pathogens, and regulation and integration of these pathways.

Prerequisites
Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 745 - Environmental Toxicology

Credits: 3
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation.

Prerequisites
Courses in ecology and physiology, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOL 793 - Research in Biology

Credits: 1-3
Library, laboratory, or field investigation under supervisor's guidance.

Prerequisites
8 graduate credits in BIOL, and permission of instructor and chair.

Notes
May be repeated for total 3 credits.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

BIOL 798 - Master's Research Project
Credits: 1-3
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required.

Prerequisites
Permission of instructor and department chair.

Notes
Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/NC

BIOL 799 - Thesis

Credits: 1-6
Thesis research under direction of supervisor.

Prerequisites
8 graduate credits in BIOL, and permission of instructor and department chair.

Notes
Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/NC

BIOL 800 - Studies for the Doctor of Philosophy in Education

Credits: variable
Program of study designed by student's discipline director and approved by student's doctoral committee. Students participate in research of discipline director, and produce paper reporting original contributions. Paper presented in subsequent PhD Summer seminar.

Prerequisites
Admission to PhD in education program to study in biology.

Notes
Enrollment may be repeated.
BIOS 701 - Biochemical Systematics

Credits: 3
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and underlying questions is, "What is the structure of a cell, and how does it function?"

Prerequisites
General biochemistry.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

BIOS 702 - Research Methods

Credits: 3
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations.

Prerequisites
Admission to PhD program in biosciences.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

BIOS 703 - Laboratory Rotation

Credits: 1
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed.

Prerequisites
Admission to PhD program in biosciences.

Notes
Should be repeated three times (except by permission of concentration director).

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
4
**BIOS 704 - Topics in Biosciences**

Credits: 1  
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator.

**Prerequisites**  
Admission to PhD program in biosciences.

**Notes**  
Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director).

**Hours of Lecture or Seminar per week**  
1

**Hours of Lab or Studio per week**  
0

---

**BIOS 710 - Current Topics in Bioscience**

Credits: 1-3  
Studies current topic in biosciences.

**Prerequisites**  
Admission to biosciences PhD or biology MS program.

**Notes**  
Topics vary. May be repeated for credit with permission of concentration director.

**Hours of Lecture or Seminar per week**  
1-3

**Hours of Lab or Studio per week**  
0

---

**BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology**

Credits: 3  
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field.

**Prerequisites**  
Admission to PhD program in biosciences, or permission of instructor.

**Hours of Lecture or Seminar per week**  
2

**Hours of Lab or Studio per week**  
3
BIOS 741 - Genomics

Credits: 3
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of synteny groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams.

Prerequisites
At least one undergraduate course in genetics and molecular biology, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOS 742 - Biotechnology

Credits: 3
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature.

Prerequisites
Undergraduate course work in genetics and molecular biology.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOS 743 - Genomics, Proteomics, and Bioinformatics

Credits: 3
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools.

Prerequisites
Admission to biosciences PhD or biology MS program.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
BIOS 744 - Molecular Genetics

Credits: 3
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.

Prerequisites
Undergraduate course work including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOS 760 - Seminar in Molecular Systematics

Credits: 1-3
Presentations and discussion by students and faculty of research papers and projects.

Hours of Lecture or Seminar per week
1-3
Hours of Lab or Studio per week
0

BIOS 761 - Dispersal Patterns of Biological Agents

Credits: 3
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved.

Prerequisites
Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

BIOS 762 - Phylogenetic Analysis

Credits: 4
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online
sources of comparative data.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
3

**BIOS 765 - Molecular Systematics**

Credits: 4
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**BIOS 767 - Molecular Evolution**

Credits: 3
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**BIOS 898 - Directed Studies in Biosciences**

Credits: 1-12
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials.

**Prerequisites**
Permission of research advisor.

**Hours of Lecture or Seminar per week**
0
**Hours of Lab or Studio per week**
0

**BIOS 899 - Directed Research in Biosciences**
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor.

**Prerequisites**
Permission of research advisor.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**BIOS 998 - Doctoral Dissertation Proposal**

Credits: 1-6
Research and writing of research proposal for doctoral dissertation.

**Prerequisites**
Permission of research advisor.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**Grading**
S/IP

**BIOS 999 - Doctoral Dissertation Research**

Credits: 1-24
Research in concentration pertinent to students' program of study.

**Prerequisites**
Approved dissertation proposal.

**Notes**
Maximum of 24 credits can be applied toward degree.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**Grading**
S/IP

**BIS 300 - Understanding Multidisciplinary Studies**
Credits: 3
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements.

Notes
Open only to pre-BIS students and BIS majors.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIS 390 - The Research Process**

Credits: 3
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project.

**Prerequisites**
BIS 300, 2.00 or above in ENGL 302.

Notes
Open only to pre-BIS students and BIS majors.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIS 391 - The Research Process for Honors**

Credits: 3
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490.

**Prerequisites**
admission to BIS honors program, 3.5 or better in ENGL 302

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**BIS 399 - Special Topics**
Credits: 1-3
Selected topics reflecting interest in specialized areas.

Prerequisites
Open only to degree students in BIS.

Hours of Lecture or Seminar per week
1-3
Hours of Lab or Studio per week
0

BIS 489 - Directed Readings and Research

Credits: 1-3
Readings and research on a topic directly relevant to student's core concentration.

Notes
Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

BIS 490 - Senior Project

Credits: 3
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor.

Prerequisites
BIS 390;

Corequisite
BIS 491.

Notes
Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

BIS 491 - Senior Project Presentation
Credits: 1
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques.

Prerequisites
BIS 390;

Corequisite
BIS 490.

Notes
Open only to BIS majors.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

**BIS 495 - Career Practicum**

Credits: 1-6
Supervised experience in application of specified area.

Prerequisites
Permission of instructor and BIS director.

Hours of Lecture or Seminar per week
1-6

Hours of Lab or Studio per week
0

**BULE 302 - Legal Environment of Business**

Credits: 3
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.

Prerequisites
Sophomore standing.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
Fall, Spring, Summer.
BULE 402 - Commercial Law

Credits: 3
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases.

Prerequisites
BULE 302, degree status.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
Fall, Spring.

CDS 101 - Introduction to Computational and Data Sciences

Credits: 3
Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CDS 151 - Data Ethics in an Information Society

Credits: 1
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

CDS 301 - Scientific Information and Data Visualization

Credits: 3
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

Prerequisites
CDS 101, CS 211, MATH 125, MATH 113.
CDS 302 - Scientific Data and Databases

Credits: 3
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems.

Prerequisites
STAT 354, MATH 125.

CDS 385 - Materials Science with Applications to Renewable Energy

Credits: 3
Cross-Listed with PHYS 385
Introduction to basic concepts and methods of materials science. Review of metallic alloys and compounds, ceramic materials, ionic solids, semiconductors, polymers, and nano-structured materials. Mechanical, thermal, electric, magnetic and optical properties of materials. Theoretical background and experimental methods of materials characterization. Various materials applications with emphasis on renewable energy.

Prerequisites
PHYS 262 or 266 or 245 and a C or better in MATH 113

CDS 401 - Scientific Data Mining

Credits: 3
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers.

Prerequisites
CDS 302.
CDS 410 - Modeling and Simulations I

Credits: 3
Cross-Listed with MATH 447

Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory.

Prerequisites
MATH 214 or 216, and 446.

CDS 411 - Modeling and Simulations II

Credits: 3
This course covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. It will also provide an introduction to modeling and simulation software, as well as high-performance computing.

Prerequisites
CDS 410 or Math 447.

CDS 421 - Introduction to Computational Fluid Dynamics

Credits: 3
The course will cover the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. At the end of the course, students will understand the process of developing a geometrical model of the flow, applying appropriate boundary conditions, specifying solution parameters, and visualizing the results. The students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package.
Prerequisites
MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CDS 461 - N-Body Simulation Methods

Credits: 3
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Prerequisites
PHYS 510 and MATH 446.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CDS 486 - Topics in Computational and Data Sciences

Credits: 3
Covers selected topics in computational and data sciences not covered in fixed content courses.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CDS 487 - Electronic Structure Computations

Credits: 3
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. The students will be directed to construct simple codes and guided in the use of the more sophisticated available computational packages.

Prerequisites
CDS 490 - Directed Study and Research

Credits: 3
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated up to a total of 6 credits.

Prerequisites
Permission of the instructor and the department chair. For computational and data science majors and minors in their junior or senior year only.

CDS 491 - Internship

Credits: 3
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated up to a total of 6 credits.

Prerequisites
Permission of the instructor and the department chair. For computational and data science majors and minors in their junior or senior year only.

CEIE 100 - Environmental Engineering around the World

Credits: 3
Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different societies today and in the past have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear materials; and management of significantly polluted sites.
CEIE 197 - Industrial Internship I-A

Credits: 0
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

Prerequisites
Civil and Infrastructure Engineering majors only.

Corequisite
ENGR 183.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
When Offered
S

CEIE 198 - Industrial Internship I-B

Credits: 0
Supervised 10-week summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government.

Prerequisites
Grade of C or better in CEIE 197 and ENGR 183. Civil and Infrastructure Engineering majors only.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
When Offered
SUM

CEIE 199 - Industrial Internship I-C

Credits: 1
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.
Prerequisites
Grade of C or better in CEIE 197 and ENGR 183. Civil and Infrastructure Engineering majors only.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0
When Offered
F

CEIE 230 - Hydraulics

Credits: 3
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels.

Prerequisites
Grade of C or better in PHYS 160.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
F, S

CEIE 290 - Engineering Computation and Design

Credits: 3
Introduces civil engineering design process. Includes methods, technologies for spatial data acquisition, emphasizing land measurements, mapping, and surveying. Covers processing field data to incorporate into computer-aided design systems; conversion of raw data into finished design documents, including schematic layouts, digital terrain models, preliminary plans, topographic maps, detailed design plans, cut sheets, cross-sections and profiles; 2D and 3D computer-aided design techniques; and application of digital computation. Includes design projects.

Prerequisites
Grade of C or better in ENGR 183.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
3
When Offered
F, S

CEIE 297 - Industrial Internship II-A
CEIE 298 - Industrial Internship II-B

Credits: 0
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

Prerequisites
Civil and Infrastructure Engineering majors only.

Corequisite
ENGR 183

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
When Offered
S

CEIE 299 - Industrial Internship II-C

Credits: 1
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.

Prerequisites
Grade of C or better in CEIE 297 and ENGR 183. Civil and Infrastructure Engineering majors only.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0
When Offered
F
CEIE 301 - Engineering and Economic Models in Civil Engineering

Credits: 3
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment.

Prerequisites
Grade of C or better in STAT 344 and ENGR 117 or CS 112.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
F

CEIE 305 - Soil Mechanics

Credits: 3
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals.

Prerequisites
Grade of C or better in ENGR 210.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
f, S

CEIE 311 - Structural Analysis

Credits: 3
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis.

Prerequisites
Grade of C or better in ENGR 310.
CEIE 340 - Water Resource Engineering

Credits: 3
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required on selected topics.

Prerequisites
Grade of C or better in CEIE 230.

CEIE 355 - Environmental Engineering and Science

Credits: 3
A course in environmental science and engineering to introduce students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented.

Prerequisites
Grade of C or better in CEIE 230, CHEM 211 or CHEM 251, and PHYS 266

CEIE 360 - Introduction to Transportation Engineering

Credits: 3
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and
level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics.

**Prerequisites**  
Grade of C or better in ENGR 210, ENGL 302, and CEIE 290.

**Notes**  
Fulfills writing-intensive requirement for civil and infrastructure engineering major.

**Hours of Lecture or Seminar per week**  
2

**Hours of Lab or Studio per week**  
3

**When Offered**  
F, S

---

**CEIE 370 - Construction Systems**

Credits: 3  
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases.

**Prerequisites**  
Grade of C or better in CEIE 301

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

---

**CEIE 397 - Industrial Internship III-A**

Credits: 0  
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

**Prerequisites**  
Civil and Infrastructure Engineering majors only.

**Corequisite**  
ENGR 183

**Hours of Lecture or Seminar per week**  
0

**Hours of Lab or Studio per week**  
0
When Offered
S

CEIE 398 - Industrial Internship III-B

Credits: 0
Supervised 10-week summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government.

Prerequisites
Grade of C or better in CEIE 397 and ENGR 183. Civil and Infrastructure Engineering majors only.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
When Offered
SUM

CEIE 399 - Industrial Internship III-C

Credits: 1
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.

Prerequisites
Grade of C or better in CEIE 397 and ENGR 183. Civil and Infrastructure Engineering majors only.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0
When Offered
F

CEIE 400 - Civil Engineering Planning and Management

Credits: 3
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects.

Prerequisites
Grade of C or better in CEIE 311, CEIE 340, CEIE 355 and CEIE 360.
CEIE 401 - Sustainable Land Development

Credits: 3
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra low water design, deconstruction and materials reuse, healthy building design, green house gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction.

Prerequisites
Grade of C or better in CEIE 355, CEIE 340 and CEIE 360.

Corequisite
CEIE 400

CEIE 410 - Geographic Information Systems in Engineering

Credits: 3
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisites
Grade of C or better in CS 112 or ENGR 117, CEIE 355 and CEIE 360.

Notes
Credit is not given for both CEIE 410 and 510.
CEIE 411 - Introduction to Design and Inventive Engineering

Credits: 3
Outlines major stages of design process. Covers conceptual versus detailed design; design evaluation. Covers applications of Artificial Intelligence (AI) in design, including evolutionary computation. Covers inventive problem-solving methods, including brainstorming, Synectics, TRIZ, and morphological analysis. Includes computer tools to support design creativity. Features collaborative design: fundamentals and group projects dealing with civil engineering problems provided by industry.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
f

CEIE 412 - Structural Steel Design

Credits: 3
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design, lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools.

Prerequisites
Grade of C or better in CEIE 311

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
s

CEIE 413 - Reinforced Concrete Design

Credits: 3
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with ACI code requirements.

Prerequisites
Grade of C or better in CEIE 311.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CEIE 440 - Water Supply and Distribution

Credits: 3
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.

Prerequisites
Grade of C or better in CEIE 230.

Notes
Credit is not given for both CEIE 440 and 550.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
3
When Offered
f

CEIE 442 - Open Channel Flow

Credits: 3
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design.

Prerequisites
Grade of C or better in CEIE 230

Notes
Credit is not given for both CEIE 442 and 542.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
s

CEIE 450 - Environmental Engineering Systems
Credits: 3
Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches to characterize environmental sites.

Prerequisites
Grade of C or better in CEIE 355.

Notes
Credit is not given for both CEIE 450 and CEIE 550.

CEIE 452 - Wastewater Management

Credits: 3
Explores design fundamentals to treat wastewater. Topics include environmental regulations; wastewater characterization; pretreatment systems; biological, physical, and chemical treatment; treatment and disposal of wastewater sludge; and financing and management. Also covers consequences of environmental policies; environmental impact assessments; and federal, state, and local government laws and regulations related to wastewater collection, treatment, and disposal.

Prerequisites
Grade of C or better in CEIE 355.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
S

CEIE 456 - Environmental Law

Credits: 3
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.

Prerequisites
Grade of C or better in CEIE 355.

Notes
Credit is not given for both CEIE 456 and 556.
CEIE 461 - Traffic Engineering

Credits: 3
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisites
Grade of C or better in CEIE 360.

Notes
Credit is not given for both CEIE 461 and 561.

CEIE 462 - Urban Transportation Planning

Credits: 3
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisites
Grade of C or better in CEIE 360.

Notes
Credit is not given for both CEIE 462 and CEIE 562.
CEIE 470 - Construction Systems

Credits: 3
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost estimating software and online databases.

Prerequisites
Grade of C or better in CEIE 301.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
f, S

CEIE 471 - Construction Administration

Credits: 3
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Prerequisites
Grade of C or better in CEIE 370

Notes
Credit is not given for both CEIE 471 and CEIE 571.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
f

CEIE 472 - Building Information Modeling

Credits: 3
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.
Prerequisites
Grade of C or better in CEIE 290 and CEIE 370.

Notes
Credit is not given for both CEIE 472 and CEIE 572.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 490 - Senior Design Project

Credits: 3
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, stormwater, site analyses, economic and regulatory considerations, sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project.

Prerequisites
Grade of C or better in CEIE 355, CEIE 400 and CEIE 440, CEIE 412 or CEIE 413.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
F, S

CEIE 498 - Independent Study in Civil Engineering

Credits: 1-3
Directed self-study of special topics of current interest.

Prerequisites
60 credits; must be arranged with an instructor and approved by department chair before registering.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0
CEIE 499 - Special Topics in Civil Engineering

Credits: 3
Vary with nature of topic. Topics of special interest to undergraduates.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 500 - Land Development Engineering

Credits: 3
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site-plan development, and approval process. Examines structure, function, and purpose of infrastructure systems, and ways in which infrastructure systems design can be achieved.

Prerequisites
Graduate standing in CEIE.

Notes
Credit is not given for both CEIE 400 and 500.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
F

CEIE 501 - Sustainable Development

Credits: 3
Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented.

Prerequisites
Graduate standing.
CEIE 510 - Geographic Information Systems in Engineering

Credits: 3
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Notes
Credit is not given for both CEIE 410 and 510.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
When Offered
F

CEIE 511 - Introduction to Design and Inventive Engineering

Credits: 3
Engineering creativity and its roots; DaVinci Principles, the Medici Effect, creative environment, engineering method, AI and evolutionary computation in design, collaborative and Internet-based design; evaluation in design; human problem solving; inventive design methods such as constraint search, morphological analysis, brainstorming, Synectics, and TRIZ. Requires group projects using problems provided by industry.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CEIE 512 - Structural Steel Design

Credits: 3
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design; lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools

Prerequisites
CEIE 311

Notes
Credit is not given for both CEIE 412 and 512.

When Offered
s
CEIE 513 - Reinforced Concrete Design

Credits: 3
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; and design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with the ACI code requirements.

Prerequisites
CEIE 311

Notes
Credit is not given for both CEIE 413 and 513.

When Offered

CEIE 516 - Engineering Law and Ethics

Credits: 3
Overview of body of law surrounding design, construction, and facilities maintenance and operations. Introduces tort law and its relationship to design and construction contracting. Uses case studies of contract form, general and special conditions, ethics, contract administration, claims, dispute resolution, arbitration, and appeals process.

Prerequisites
CEIE 400.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 530 - Water Resource Systems Analysis

Credits: 3
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling, and knowledge-based systems.

Prerequisites
CEIE 601 or equivalent.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
When Offered
F

CEIE 540 - Water Supply and Distribution

Credits: 3
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.

Prerequisites
A course in hydraulics or fluid mechanics.

Notes
Credit is not given for both CEIE 440 and 540.

CEIE 542 - Open Channel Flow

Credits: 3
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design.

Prerequisites
A course in hydraulics or fluid mechanics.

Notes
Credit is not given for both CEIE 442 and 542.

CEIE 550 - Environmental Engineering Systems

Credits: 3
Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches for the characterization of environmental sites.

Prerequisites
CEIE 555.

Notes
Credit is not given for both CEIE 450 and 550.
**CEIE 552 - Wastewater Engineering**

Credits: 3  
Explores design fundamentals to treat wastewater. Topics include environmental regulations; wastewater characterization; pretreatment systems; biological, physical, and chemical treatment; treatment and disposal of wastewater sludge; and financing and management. Includes consequences of environmental policies; environmental impact assessments; and federal, state, and local government laws and regulations related to wastewater collection, treatment, and disposal.

**Prerequisites**
CEIE 555.

**CEIE 555 - Introduction to Environmental Engineering**

Credits: 3  
Introduces principles of environmental engineering management and design pertaining to water supply and treatment, wastewater treatment, solid waste management, air pollution control, noise pollution measurement and control, and environmental impact assessment.

**Notes**
Credit is not given for both CEIE 355 and 555.

**CEIE 556 - Environmental Law**

Credits: 3  
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.
Notes
Credit is not given for both CEIE 456 and 556.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
S

CEIE 560 - Public Transportation Systems

Credits: 3
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts.

Prerequisites
CEIE 360.

Notes
Credit is not given for both CEIE 460 and 560.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
F

CEIE 561 - Traffic Engineering

Credits: 3
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisites
CEIE 360.

Notes
Credit is not given for both CEIE 461 and 561.
CEIE 562 - Urban Transportation Planning

Credits: 3
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisites
CEIE 360.

Notes
Credit is not given for both CEIE 462 and 562.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
S

CEIE 565 - Design of Transport Systems

Credits: 3
Covers street and highway facilities design emphasizing interaction among driver, vehicle, and geometric design elements. Design of interchanges and intersections; highway roadside safety and tort liability; pavement design, maintenance and safety; edge drop-off; clear zone concept; roadside barriers; guiderail treatments; traffic calming; pedestrian and bicycle and transit design challenges; and work-zone traffic control. Provides skills to understand interaction among driver, vehicle, and environment, and how to incorporate better design practices. Also introduces concepts of forgiving highway design and highway tort liability.

Prerequisites
CEIE 360.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 571 - Construction Administration

Credits: 3
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk
transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Notes
Credit is not given for both CEIE471 and 571.

CEIE 572 - Building Information Modeling

Credits: 3
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Notes
Credit is not given for both CEIE 472 and 572.

CEIE 600 - Civil Engineering Infrastructure Planning and Management

Credits: 3
Study of planning and management practices applicable to the life cycle of the physical urban infrastructure including roads, sewers, water distribution and other pipelines, telecommunications, and energy distribution systems. Includes study of relationship of urban growth and infrastructure reinvestment; mechanisms of deterioration; direct and indirect methods of assessment and degradation models; capital finance, budgeting, and programming; planning integration and coordination; quantitative applications in planning; uncertainty and reliability; public-private partnerships; operation and maintenance strategies; and future issues.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 601 - Infrastructure Modeling

Credits: 3
Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction.

Prerequisites
CEIE 605

Hours of Lecture or Seminar per week
3
CEIE 605 - Infrastructure Systems Analysis

Credits: 3
Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, and economic analysis of infrastructure projects and systems.

Prerequisites
STAT 344.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

When Offered
S

CEIE 610 - Construction Systems and Management

Credits: 3
Studies applications of construction management concepts and techniques to the production of constructed system. Explores construction industry and environment through project cycle design and construction phases, emphasizing estimating, planning, scheduling, labor, money, materials, machines, time, and information. Uses popular scheduling software with class projects and case study.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 631 - Water Resources Engineering I: Principles and Practice

Credits: 3
Introduction to the principles of hydrology and hydraulics, and their application to the planning, design and management of modern water resources.

Prerequisites
CEIE 340 or equivalent.

When Offered
F
CEIE 632 - Groundwater Systems Modeling

Credits: 3
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality.

Prerequisites
CEIE 601

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CEIE 660 - Urban Transportation Planning

Credits: 3
Quantitative and qualitative techniques in urban transportation planning. Topics include different levels of urban transportation planning; technical transportation planning process, including travel demand estimation, establishment of transportation strategies, and utility analysis; and activity center planning including on-site vehicle and pedestrian circulation, transportation interface, environmental planning, and planning administration.

Prerequisites
CEIE 601.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CEIE 663 - Intelligent Transportation Systems

Credits: 3
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance.

Prerequisites
CEIE 561 or 562.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CEIE 670 - Civil Engineering Decision Methods and Tools

Credits: 3
Principles of decision making and knowledge acquisition to build knowledge-based decision support tools for civil, environmental, and infrastructure engineering. Includes solving complex problems from several areas of urban systems engineering and using various decision-support tools based on Bayesian decision theory and principles of artificial intelligence, including knowledge-based systems and learning systems.

Prerequisites
CEIE 605

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CEIE 671 - Best Engineering Management Practices

Credits: 3
Covers strategies to identify and implement best engineering management practices. Addresses development of performance standards. Introduces quality improvement methods and standards, including Quality Functional Development, ISO 9000, Baldrige Excellence Award, and the Six Sigma method. Presents relevant national and engineered standards, statistical norms, rules of thumb, selected statistics from comparative projects, excerpts from performance records, and performance targets. Covers case studies relating to management of infrastructure projects. Includes introduction to benchmarking methods, addressing criteria to select benchmarking program or process.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CEIE 673 - Leading Engineering Innovation

Credits: 3
Strategies for fostering and assessing the innovative spirit of a professional, technical organization will be covered. Basic engineering leadership concepts, theories, and principles will be reviewed. Relevant case studies describe the discipline of fostering and leading technical innovation in existing technical organizations; and how technology and other competitive developments are radically changing the process of engineering innovation.

Prerequisites
Graduate standing

CEIE 674 - Infrastructure Finance
Credits: 3
Course reviews key financial concepts used in the management of municipal infrastructure using a case study approach. Issues related to both public and private infrastructure entities will be covered. The course provides a practical introduction to a broad spectrum of infrastructure finance issues.

**Prerequisites**
Graduate standing

### CEIE 675 - Developing the Technical Enterprise

Credits: 3
Introduce students to concepts of engineering enterprise development as related to technical products and services. Engineering students learn to think and act entrepreneurially, the importance of enterprise goals, and how to develop technical opportunities.

**Prerequisites**
Graduate standing

### CEIE 680 - Introduction to Infrastructure and Security Engineering

Credits: 3
In-depth review of present and proposed practices and issues to manage civil infrastructure, focusing on performance and security through the full life cycle, including planning, designing, and construction of new, rehabilitated, modified, and recycled or decommissioned components. Covers asset-management methods and their effectiveness in managing all types of risk. Profiles policies leading civil infrastructure industry toward adoption of such methods, and examines industry case studies. Special attention to vulnerability assessment and risk management in context of broad sampling of potential threats.

**Prerequisites**
BS in civil engineering, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### CEIE 681 - Security of Structural Systems

Credits: 3
Basic concepts of security of structural systems; analytical models of behavior of structural systems under various security threats; computer simulation of security threats, including blasts and fire; generation of terrorist scenarios and of preventive structural measures; design for security; out-of-the-box approaches to development of preventive structural measures; lessons learned; and intelligent structural security systems.

**Prerequisites**
BS in civil engineering, or CEIE 412 or CEIE 413.

**Hours of Lecture or Seminar per week**
3
CEIE 683 - Water and Wastewater Systems Security

Credits: 3
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system.

Prerequisites
BS in civil engineering, or CEIE 355 and 440.

CEIE 685 - Civil Engineering Information Management

Credits: 3
Advanced course covering all phases of information management life cycle from conceptual design and data collection through systems development, archiving, and disposal. Covers software engineering such as structured analysis, rapid prototyping, and object-oriented analysis as applied to urban systems infrastructure problem solving. Reviews database technology, spreadsheets, communications software, customized applications software, groupware, and graphics software including computer-aided design and geographic information systems. Covers selection and use of appropriate software to match specific engineering problems related to the design, construction, and management of civil engineering infrastructure. Includes design and development of system for engineering application.

CEIE 686 - Transportation System Security and Safety

Credits: 3
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS
and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety.

**Prerequisites**
BS in engineering or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CEIE 690 - Topics in Civil Engineering**

Credits: 3
Topics not covered in the regular civil engineering offerings.

**Prerequisites**
Determined by topic.

**Notes**
Course content may vary each semester. Course may be repeated with change in topic.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CEIE 732 - Water Resources Engineering II: Water Resource Systems**

Credits: 3
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling, and knowledge-based systems.

**Prerequisites**
CEIE 631 or equivalent.

**When Offered**
s

---

**CEIE 762 - Transportation System Planning Models**

Credits: 3
Covers transportation systems analysis; theory, mathematical structure, and applications of transportation planning models; network analysis and equilibrium; dynamic and stochastic equilibrium models; modal choice analysis; discrete choice models of transportation demand; and model estimation and aggregation.
Prerequisites
CEIE 562 or 660; CEIE 601.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 767 - Traffic Engineering Modeling and Analysis

Credits: 3
Covers basic principles of simulation; queuing theory and traffic signal operations at individual intersections, arterials and networks; applying models related to traffic signalization; optimization and traffic simulation; and developing skills to select most appropriate model for given scenario.

Prerequisites
CEIE 561, 601.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CEIE 795 - Civil and Infrastructure Engineering Seminar

Credits: 0
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Partially fulfills MS in civil and infrastructure engineering seminar requirement; required for master's candidates during semester they complete research project or thesis.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

CEIE 796 - Directed Reading

Credits: 1-3
Reading on specific topic under direction of faculty member.

Prerequisites
Graduate standing and permission of instructor.
Notes
May be repeated with change in topic.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CEIE 798 - Research Project in Civil Engineering

Credits: 3
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work.

Prerequisites
Permission of instructor

Corequisite
CEIE 795.

Notes
Written report also required.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CEIE 799 - Master's Thesis

Credits: 1-6
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-faculty-member committee, and an oral defense.

Prerequisites
18 credits of graduate-level course work and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CFRS 500 - Introduction to Technologies of Forensics Value

Credits: 3
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to operating systems, software, and hardware, and other aspects required for forensics examination.
Prerequisites
Graduate standing

CFRS 660 - Network Forensics

Credits: 3
Cross-Listed with TCOM 660

This course deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined.

Prerequisites
TCOM 509 and TCOM 529 and a working knowledge of computer programming.

CFRS 661 - Digital Media Forensics

Credits: 3
Cross-Listed with TCOM 661

This course deals with the collection, preservation, and analysis of digital media such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The seizure, preservation, and analysis of digital media will be examined in this course.

Prerequisites
TCOM 548 and TCOM 556 or TCOM 562; a working knowledge of computer operating systems (e.g. CS 471 or equivalent) or permission from instructor

CFRS 663 - Operations of Intrusion Detection for Forensics

Credits: 3
Cross-Listed with TCOM 663

Introduces students to network and computer intrusion detection and its relation to forensics. It addresses intrusion detection architecture, system types, packet analysis, and products. It also presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Prerequisites
TCOM 509 and TCOM 529 and a working knowledge of computer programming.

CFRS 664 - Incident Response Forensics
Cross-Listed with TCOM 664

This course addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Prerequisites
TCOM 509 and TCOM 529.

CFRS 760 - Legal and Ethical Issues in IT

Credits: 3
Presents legal and ethics topics in the context of computer forensics. It will include legal principles, types of crimes, witness testimony, and forensics report writing.

Prerequisites
CFRS 500

CFRS 770 - Fraud and Forensics in Accounting

Credits: 3
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in such a way that they will develop the necessary expertise, and be prepared to give expert evidence in any resultant trial.

Prerequisites
CFRS 500

CFRS 780 - Advanced Topics in Computer Forensics

Credits: 3
Teaches advanced topics from recent developments and applications in various areas of computer forensics. The advanced topics are chosen in such a way that they do not duplicate existing CFRS courses. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic. The course is designed to enhance the professional engineering community’s understanding of breakthrough developments in specific areas of computer forensics.

Prerequisites
Permission of instructor

Notes
Repeatable within degree.
CFRS 790 - Advanced Computer Forensics

Credits: 3
Provides the capstone course for the MS in Computer Forensics program. CFRS 790 will integrate the concepts and practices developed within the Computer Forensics Program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study.

Prerequisites
CFRS 660, CFRS 661, and CFRS 663; minimum of 18 credits completed in the MS in Computer Forensics Program prior to registration.

Notes
To be taken in the last year prior to the completion of degree requirement.

CHEM 101 - Introduction to Modern Chemistry

Credits: 3
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere.

Notes
Not open to students majoring in chemistry. Credit will not be given for this course and CHEM 103. Fundamental principles of chemistry. No previous knowledge of chemistry assumed or required.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 3
Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future.

Prerequisites
Not open to students majoring in chemistry.

Notes
Not open to students majoring in chemistry. Course cannot be used in place of CHEM 313 or 314. Credit will not be given for this course and CHEM 104.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 103 - Chemical Science in a Modern Society

Credits: 4
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry.

Notes
Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

3
Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 4

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section.)

Prerequisites
Not open to students majoring in chemistry.

Notes
Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

3
Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

CHEM 155 - Introduction to Environmental Chemistry I

Credits: 4
Basic chemical principles of Earth's water, air, and soil systems, presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday
morning laboratory activities.

Notes
Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

CHEM 156 - Introduction to Environmental Chemistry II

Credits: 4
Basic chemical principles of Earth's water, air, and soil systems, presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities.

Prerequisites
CHEM 155.

Notes
Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
3

CHEM 201 - Introductory Chemistry I

Credits: 3
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.

Notes
Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 202 - Introductory Chemistry II
Credits: 3
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical thermodynamics, electrochemistry, and nuclear chemistry.

Prerequisites
CHEM 201 or 211.

Notes
Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 211 - General Chemistry

Credits: 4
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Notes
Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

CHEM 212 - General Chemistry

Credits: 4
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Prerequisites
CHEM 211.

Notes
Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3
CHEM 251 - General Chemistry for Engineers

Credits: 4
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers.

Notes
Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
3

CHEM 300 - Chemistry of Semiconductor Processing

Credits: 3
Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films.

Prerequisites
Completion of 30 credits, or permission of instructor.

Notes
Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 313 - Organic Chemistry

Credits: 3
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisites/Corequisites
Corequisite CHEM 315

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CHEM 314 - Organic Chemistry

Credits: 3
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisites
CHEM 313.

Corequisite
CHEM 318.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 315 - Organic Chemistry Lab I

Credits: 2
Lab techniques and reactions arranged to accompany CHEM 313.

Prerequisites/Corequisites
Corequisite: CHEM 313.

Notes
One-hour recitation.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

CHEM 318 - Organic Chemistry Lab II

Credits: 2
Continuation of CHEM 315, arranged to accompany CHEM 314.

Prerequisites
CHEM 315.

Corequisite
CHEM 314.

Notes
One-hour recitation.

Hours of Lecture or Seminar per week
CHEM 321 - Elementary Quantitative Analysis

Credits: 4
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods illustrating principal types of quantitative determinations.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
6

CHEM 322 - General and Biochemical Equilibrium

Credits: 2
Study of general and biochemical equilibria in gas phase, ionic, and heterogeneous systems. Topics include gas reactions, polyfunctional acids and bases, complexion formation, solubility and free energy relationships, and the use of computer algorithms to solve equilibrium problems.

Prerequisites
CS 103, 112, or 161.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
0

CHEM 331 - Physical Chemistry I

Credits: 3
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisites
MATH 113, 114.

Prerequisites/Corequisites
PHYS 243 or 160.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CHEM 332 - Physical Chemistry II

Credits: 3
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

Prerequisites
MATH 113, 114, CHEM 331.

Prerequisites/Corequisites
PHYS 243 or 160.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 333 - Physical Chemistry for the Life Sciences I

Credits: 3
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisites
CHEM 211, 212; MATH 113.

Prerequisites/Corequisites
MATH 114.

Notes
Credit will not be given for both this course sequence and CHEM 331, 332.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 334 - Physical Chemistry for the Life Sciences II

Credits: 3
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisites
CHEM 211, 212; MATH 113; CHEM 333.
Prerequisites/Corequisites
MATH 114.

Notes
Credit will not be given for both this course sequence and CHEM 331, 332.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 336 - Physical Chemistry Lab I

Credits: 2
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry.

Prerequisites/Corequisites
CHEM 331 or 333.

Notes
One-hour recitation.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

CHEM 337 - Physical Chemistry Lab II

Credits: 2
Continuation of CHEM 336.

Prerequisites/Corequisites
CHEM 332 or 334.

Notes
One-hour recitation.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

CHEM 341 - Fundamental Inorganic Chemistry
Credits: 3
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CHEM 350 - Computer Techniques for Chemistry**

Credits: 3
Introduction to computer software, both commercial and online, emphasizing applicability to chemistry topics. Techniques include spreadsheet programming, graphing and statistics, molecular modeling, and chemical information search and retrieval.

**Prerequisites**
CHEM 313.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CHEM 355 - Undergraduate Research**

Credits: 1-3
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor’s guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits.

**Prerequisites**
30 credits, chemistry major or minor.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
1-6

**CHEM 401 - The Research Experience**

Credits: 3
Introduction to research on current problem in chemical sciences, under supervision of faculty advisor. Includes literature search, writing research proposal, attendance at scheduled seminars, written report including impact statement, and oral presentation.

**Prerequisites**
Completion or concurrent enrollment in all other required general education courses.
CHEM 422 - Instrumental Analysis

Credits: 3
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques.

Prerequisites
CHEM 314, 321, and 331.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
6

CHEM 423 - Instrumental Analysis Laboratory

Credits: 2
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation.

Prerequisites
CHEM 422.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
6

CHEM 441 - Properties and Bonding of Inorganic Compounds

Credits: 3
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; and stereochemical, electronic, and magnetic properties of transition metal complexes and metal atom cluster compounds.

Prerequisites
CHEM 314 and 332.

Hours of Lecture or Seminar per week
3
**CHEM 445 - Inorganic Preparations and Techniques**

Credits: 2  
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances.

*Prerequisites*  
CHEM 321 and 441.

**Hours of Lecture or Seminar per week**  
0

**Hours of Lab or Studio per week**  
6

**CHEM 446 - Bioinorganic Chemistry**

Credits: 3  
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species.

*Prerequisites*  
CHEM 314.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**CHEM 451 - Special Projects in Chemistry**

Credits: 2  
Introduction to chemical research or development. Includes literature search, conferences, and lab.

*Prerequisites*  
Chemistry major or minor, 90 credits, and permission of department research committee.

*Notes*  
Written and oral technical reports required.

**Hours of Lecture or Seminar per week**  
0
CHEM 452 - Special Projects in Chemistry

Credits: 2
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisites
Chemistry major or minor, 90 credits, and permission of department research committee.

Notes
Written and oral technical reports required.

CHEM 455 - Honors Research in Chemistry

Credits: 3
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisites
CHEM 313, 314, 321, 331-332 or 333-334; admission to Chemistry Department Honors Program; and permission of department research committee.

Notes
Credit will not be given for both these courses and CHEM 451, 452.

CHEM 456 - Honors Research in Chemistry

Credits: 3
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisites
CHEM 313, 314, 321, 331-332 or 333-334; admission to Chemistry Department Honors Program; and permission of department research committee.
research committee.

Notes
Credit will not be given for both these courses and CHEM 451, 452.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
6

CHEM 463 - General Biochemistry I

Credits: 4
Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism.

Prerequisites
CHEM 313, BIOL 213.

Hours of Lecture or Seminar per week
4

Hours of Lab or Studio per week
0

CHEM 464 - General Biochemistry II

Credits: 3
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

Prerequisites
CHEM 463/BIOL 483.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 465 - Biochemistry Lab

Credits: 2
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules.

Corequisite
CHEM 463.
CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisites
CHEM 313 and 463.

CHEM 468 - Bioorganic Chemistry

Credits: 3
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisites
CHEM 314 and 463.

CHEM 470 - Laboratory Instructional Methods for Chemistry

Credits: 3
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty member and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education.

Prerequisites
CHEM 314.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
6
CHEM 490 - Undergraduate Seminar

Credits: 1
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits.

Prerequisites
60 credits and must be a chemistry major or minor.

CHEM 500 - Selected Topics in Modern Chemistry

Credits: 3
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry.

Notes
May be repeated for credit with different topics. Credit not allowed toward major in chemistry.

CHEM 505 - Hazardous Materials Waste Management

Credits: 1-3
Comprehensive review of subjects most frequently encountered in hazardous chemicals management.

Prerequisites
CHEM 313 or permission of instructor.

George Mason University 2009-2010 Official University Catalog 1717
CHEM 513 - Synthetic and Mechanistic Organic Chemistry

Credits: 3
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course.

Prerequisites
CHEM 313 and 314.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 521 - Theory of Analytical Processes

Credits: 3
Theory of signal and noise, mass transport phenomena, thermodynamics, and ionics in analytical chemistry. Applications made to Fourier transform techniques such as FT-IR and FT-NMR, convolution and correlation spectroscopy, chemical sensors, chromatography, flow injection analysis, ion transport in membrane, and interpretation of analytical signals. Analytical core course.

Prerequisites
CHEM 422 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 529 - Instrumental Techniques of Analysis

Credits: 2
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied.

Prerequisites
CHEM 321 and 422 or 521, or permission of department.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
6
CHEM 531 - Elements of Physical Chemistry

Credits: 3
Intensive overview of concepts, techniques, and models of physical chemistry as they apply in many branches of chemistry and allied sciences. Topics include properties of gases, first and second laws of thermodynamics, phase and chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Emphasizes developing practical skill in using tools of physical chemistry. Extensive use of spreadsheet models to investigate chemical and physical systems.

Prerequisites
CHEM 314; PHYS 243, 245; and MATH 113; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 554 - Geochemistry of Environmental Hazards

Credits: 3
Introduction to origins and reactions of hazardous substances in air, water, and soil environments. Covers movement of trace organic and inorganic substances in geochemical cycle, with particular reference to transport processes that influence air and water quality.

Prerequisites
CHEM 314 or permission of instructor.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
3

CHEM 563 - General Biochemistry I

Credits: 3
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations.

Prerequisites
CHEM 313 and 314.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 564 - General Biochemistry II
Credits: 3
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations.

Prerequisites
CHEM 313, 314; CHEM 563.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisites
CHEM 313 and 463.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 568 - Bioorganic Chemistry

Credits: 3
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisites
CHEM 314 and 463.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 579 - Special Topics

Credits: 1-6
Current topics in chemistry, depending on instructor's specialty.
Prerequisites
CHEM 314 or permission of instructor.

Notes
May be repeated with different topics, with department approval.

Hours of Lecture or Seminar per week
1-6

Hours of Lab or Studio per week
0

CHEM 613 - Modern Polymer Chemistry

Credits: 3
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight
determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive
polymers. Organic core course.

Prerequisites
CHEM 513 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 614 - Physical Organic Chemistry

Credits: 3
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and
thermodynamics of organic reactions, and photochemistry. Organic core course.

Prerequisites
CHEM 314 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 617 - Organic Structural Spectroscopy

Credits: 3
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance
spectroscopy and infrared, mass, ultraviolet and visible, and Raman spectroscopy. Organic core course.
Prerequisites
CHEM 314 or equivalent.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 620 - Modern Instrumentation

Credits: 3
Cross-Listed with PHYS 533

Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics.

Prerequisites
CHEM 422 or permission of instructor.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
2

CHEM 624 - Principles of Chemical Separation

Credits: 3

Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course.

Prerequisites
CHEM 422 or 521, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 625 - Electroanalytical Chemistry

Credits: 3

Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronoamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation.
Prerequisites
CHEM 321 and 331.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 633 - Chemical Thermodynamics and Kinetics

Credits: 3
Cross-Listed with CSI 711

Advanced study covering application of kinetics to the elucidation of reaction mechanisms, and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course.

Prerequisites
CHEM 331 and 332.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 646 - Bioinorganic Chemistry

Credits: 3
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course.

Prerequisites
CHEM 441 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 651 - Environmental Chemistry of Organic Substances

Credits: 3
Prerequisites
One semester of physical chemistry, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 660 - Protein Biochemistry

Credits: 3
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course.

Prerequisites
CHEM 463 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 661 - Antibiotic Chemistry and Resistance

Credits: 3
This course will introduce the various classes of antibiotics. The focus will be on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 662 - Modern Methods of Drug Discovery

Credits: 3
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.
3
Hours of Lab or Studio per week
0

CHEM 665 - Protein-Protein Interactions: Methods and Applications

Credits: 3
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHEM 670 - Teaching Practicum

Credits: 1-2
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques.

Prerequisites
Enrollment in graduate program and demonstrated proficiency in English language.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CHEM 728 - Introduction to Solid Surfaces

Credits: 3
Cross-Listed with CSI 712
Introduces properties of solid surfaces. Topics include gas adsorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology.

Prerequisites
CHEM 422 or equivalent.

Hours of Lecture or Seminar per week
3
CHEM 730 - Statistical Mechanics

Credits: 3
Cross-Listed with CSI 782/PHYS 711

Statistical methods, systems of particles, thermodynamics, macroscopic parameters, the ideal gas, kinetic theory, quantum statics, and transport processes.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 732 - Quantum Chemistry

Credits: 3
Cross-Listed with CSI 713

Illustration of fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Physical core course.

Prerequisites
CHEM 332.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 733 - Polymer Physical Chemistry

Credits: 3

Physical chemistry of macromolecules including molecular weight, conformation, configuration, characteristics of the glassy state, methods for studying polymer morphology (XRD, SEM, TEM, optical microscopy), electronic structure and behavior, band theory, conduction mechanisms, intrinsically conductive polymers, polarization, dielectric behavior, triboelectric behavior, piezo and pyroelectric behavior, and nonlinear optical properties.

Prerequisites
CHEM 332 or permission of instructor.

Hours of Lecture or Seminar per week
CHEM 735 - Astrophysical Chemistry of Planetary Bodies

Credits: 3
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations.

Prerequisites
CHEM 331, or ASTR 403, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 736 - Computational Quantum Mechanics

Credits: 3
Cross-Listed with CSI 783/PHYS 736

Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Prerequisites
PHYS 502, 510, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHEM 767 - Industrial Biochemistry

Credits: 3
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the regulations that oversee the industrial biochemical process.

Prerequisites
CHEM 463 or permission of instructor.

Hours of Lecture or Seminar per week
CHEM 790 - Graduate Seminar

Credits: 1
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. This course will also be used to teach students how to give effective presentations.

Prerequisites
Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

Notes
Requires, in last semester, seminar presentation on student's research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program.

CHEM 791 - Graduate Research Methods and Presentation

Credits: 3
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions.

Prerequisites
Permission of academic advisor, research advisor and/or research committee.

CHEM 796 - Directed Reading and Research

Credits: 1-6
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. May be repeated for a total of 12 credits.

Prerequisites
Admission to a graduate program in chemistry and biochemistry or affiliated programs.
CHEM 798 - Research Project

Credits: 3-6
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member.

Prerequisites
Permission of department; 6 credits of CHEM 798 or 799, but credit will not be given for both.

Notes
Requires comprehensive report acceptable to advisory committee, and final oral exam on report.

CHEM 799 - Master's Thesis

Credits: 1-6
Laboratory thesis research and writing under direction of supervisor.

Prerequisites
Permission of department.

Notes
Minimum of 3 credits for first two enrollment periods.

CHEM 998 - Doctoral Dissertation Proposal

Credits: 1-12
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student’s research advisor and committee forms the basis of the student’s doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying
doctrinal degree requirements, with no more than 12 credits of CHEM 998.

**Prerequisites**
Permission of research advisor and/or graduate committee.

**CHEM 999 - Doctoral Dissertation Research**

Credits: 1-12
Research in the concentration pertinent to student’s program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

**Prerequisites**
Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

**CHIN 101 - Elementary Chinese**

Credits: 3
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing.

**Notes**
Lab work required. Students may not receive credit for CHIN 101 and CHIN 109 or 110.

**CHIN 102 - Elementary Chinese**

Credits: 3
Continuation of CHIN 101.
Prerequisites
CHIN 101.

Notes
Lab work required. Students may not receive credit for CHIN 102 and CHIN 109 or 110.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

CHIN 109 - Intensive Elementary Chinese

Credits: 6
Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time.

Notes
Equivalent to CHIN 101 and 102 taught in single semester. Lab work required. Students may not receive credit for CHIN 109 and CHIN 101, 102, or 110.

Hours of Lecture or Seminar per week
6
Hours of Lab or Studio per week
2

CHIN 110 - Elementary Chinese

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109.

Hours of Lecture or Seminar per week
6
Hours of Lab or Studio per week
1

CHIN 201 - Intermediate Chinese I

Credits: 3
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisites
CHIN 102 or equivalent.

Notes
CHIN 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for CHIN 201 and CHIN 209 or 210.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

CHIN 202 - Intermediate Chinese II

Credits: 3
Continuation of CHIN 201.

Prerequisites
CHIN 201 or equivalent.

Notes
Lab work required. Students may not receive credit for CHIN 202 and CHIN 209 or 210.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
1

CHIN 209 - Intensive Intermediate Chinese

Credits: 6
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time.

Prerequisites
CHIN 102, 109, appropriate placement score, or permission of instructor.

Notes
Equivalent to CHIN 201 and 202 taught in single semester. Lab work required. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210.

Hours of Lecture or Seminar per week
6

Hours of Lab or Studio per week
2

CHIN 210 - Intermediate Chinese
Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions.

Prerequisites
CHIN 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

CHIN 250 - Gateway to Advanced Chinese

Credits: 3
Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe. Taught in Chinese.

Prerequisites
CHIN 210, appropriate placement score, or permission of department.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHIN 300 - Reading Skills Development

Credits: 3
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduction to discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at advanced level.

Prerequisites
CHIN 250, appropriate placement score or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHIN 301 - Advanced Grammar and Syntax

Credits: 3
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing
fundamental difficulties and points of interference between English and Chinese.

**Prerequisites**
CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CHIN 305 - Chinese for the Business World**

Credits: 3
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence.

**Prerequisites**
CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

**Notes**
May be repeated for credit with permission of department when content is different.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CHIN 310 - Survey of Chinese Literature**

Credits: 3
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records.

**Prerequisites**
ENGL 101, or permission of instructor.

**Notes**
Knowledge of Chinese language helpful but not required. Course work in English. May be repeated for credit once when course content is different, with permission of department.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CHIN 311 - Modern Chinese Literature in Translation**
Credits: 3
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays.

Prerequisites
ENGL 101, or permission of instructor.

Notes
Knowledge of Chinese language helpful but not required. Course work in English. May be repeated for credit once when course content is different, with approval from department.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHIN 318 - Introduction to Classical Chinese

Credits: 3
Introduces basic structures and vocabulary of Classical Chinese, which still has a large influence on the formal written prose of modern newspapers and documents.

Prerequisites
CHIN 250, appropriate placement score, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHIN 320 - Contemporary Chinese Film

Credits: 3
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory.

Notes
Knowledge of Chinese language helpful but not required. Course work in English.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHIN 325 - Major Chinese Writers
Studies works of major Chinese writers.

Prerequisites
ENGL 101, or permission of instructor.

Notes
Writers vary. Course work in English. May be repeated for credit up to two times with permission of department. Knowledge of Chinese helpful but not required.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHIN 328 - Asian American Women Writers

Credits: 3
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.

Notes
Knowledge of Asian languages not required. Course work in English.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CHIN 355 - Readings in Chinese Poetry and Poetics

Credits: 3
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.

Prerequisites
CHIN 300, or permission of instructor.

Notes
Knowledge of Chinese required. May be repeated once for credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CHIN 365 - Readings in Chinese Fiction after Mao

Credits: 3
Close readings and discussions of primary texts after Cultural Revolution. Analyzes themes, subjects, language, and styles.

Prerequisites
CHIN 300, or permission of instructor.

Notes
Knowledge of Chinese required. May be repeated once for credit.

Hours of Lecture or Seminar per week
3

CHIN 470 - Special Topics in Chinese Studies

Credits: 3
Special topics on Chinese language, literature, or culture organized by theme, genre approach, or era. May be repeated once for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week
3

CHIN 480 - Fourth-Year Chinese I

Credits: 3
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisites
CHIN 300 and 301; appropriate placement score or permission of instructor.

Hours of Lecture or Seminar per week
3

CHIN 481 - Fourth-Year Chinese II

Credits: 3
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.
Prerequisites
CHIN 300, 301, 480; and appropriate placement score or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CHSS 101 - Presenting and Processing Information Using Technology

Credits: 1-3
Presents practical experience in computer applications.

Prerequisites
Varies with topic.

Notes
Topics vary; most require laboratory work. May be repeated for credit when course content differs.

Hours of Lecture or Seminar per week
0-3
Hours of Lab or Studio per week
0-3

CHSS 200 - Introduction to Science and Society

Credits: 2
Provides students in the interdisciplinary minor in science and society with general background information and a common frame of reference for developing an individualized core of course work. Students design a plan for their course work in the minor, envision the specific topic they will address, and begin preliminary preparation for CHSS 400.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
0

CHSS 313 - Mystery, Madness, and Murder

Credits: 3
Multidisciplinary approach to taboo topics that fascinate and frighten us. Instructors from disciplines across the arts and sciences bring expertise and diverse perspectives to provocative issues such as cannibalism and serial murder. Students learn to think critically and objectively while examining use in myth, literature, and popular culture.

Prerequisites
Completion or concurrent enrollment in all other required general education courses.
CHSS 390 - Peer Tutoring in Writing across the Disciplines

Credits: 1
Student must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing, and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper.

Prerequisites
Grade of A in ENGL 302, 60 credits, and overall GPA of 3.00 or higher with a GPA in major of 3.50 or higher.

Notes
May be repeated up to three times.

CHSS 395 - Technology Apprenticeship

Credits: 3
Experiential learning course in using technology in instruction.

Prerequisites
30 credits; GPA of 2.50 or higher; ability to use Internet browser; and skills in keyboarding, data entry, and word processing.

Notes
Students receive up to 45 hours of instruction and work 90 hours with faculty members, assisting with technology project. Students submit faculty recommendation and application to technology apprenticeship coordinator. May be repeated once for credit.

CHSS 400 - Perspectives on Science and Society

Credits: 1
Capstone course for the interdisciplinary minor in science and society. Helps students integrate material from their individualized
core of courses and make explicit connections among the various disciplines. Provides opportunity for students to share their experiences, expanding their breadth of knowledge in this important and timely area of study.

Prerequisites
CHSS 200 and completion of 17 credits toward the minor in science and society.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

CHSS 485 - International Internship

Credits: 3-9
Students should contact faculty director one semester prior to semester of enrollment. Work at oversees locations under faculty director and site supervisor. Predeparture orientation; minimum 45 hours of work for each credit (in 3-, 6-, and 9-credit increments); and written assignments as specified in learning contract approved by faculty director, including journals, work products and reports, reflective essays, and research papers.

Prerequisites
60 credits, 2.50 GPA, and successful completion of application and selection process.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CHSS 490 - Faculty-Student Research Apprenticeship

Credits: 3
Open only to recipients of the provost's Faculty-Student Apprenticeship Award. Introduces scholarship in action in major field of study. Complements and enriches required course material, and provides undergraduates the unique opportunity to work collaboratively with faculty on research projects.

Prerequisites
60 credits, and permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CL 300 - Introduction to Comparative Literature

Credits: 3
Introduces methods of comparative literature through study, in translation, of selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn from English, American, or European literature; on occasion, non-
Western literature featured.

Prerequisites
60 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CL 514 - Theories of Comparative Literature

Credits: 3
Intensive study of major theories of comparative literature, with special emphasis on international movements and characteristic themes. Students work with texts in foreign language of their concentration; other texts studied in translation.

Prerequisites
CL 300 and 90 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CLAS 240 - Greek and Latin Elements in English

Credits: 3
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CLAS 250 - Classical Mythology

Credits: 3
Illustrates role of classical myths in classical and modern literature and art.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.
Notes
Course work in English.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLAS 260 - The Legacy of Greece and Rome

Credits: 3
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLAS 340 - Greek and Roman Epic

Credits: 3
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLAS 350 - Greek and Roman Tragedy

Credits: 3
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the
Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures.

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Course work in English.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLAS 360 - Greek and Roman Comedy**

Credits: 3
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age, and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence.

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Course work in English.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLAS 370 - Greek and Roman Historians**

Credits: 3
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence.

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Course work in English.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
CLAS 380 - Greek and Roman Novels

Credits: 3
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CLAS 390 - Topics in Classical Literature and Culture

Credits: 3
Certain topics may have other CLAS courses as prerequisites. Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in Greco-Roman world.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English. May be repeated once for credit.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CLAS 499 - Senior Seminar in Classical Studies

Credits: 3
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student.

Prerequisites
Modern and classical languages majors concentrating in classical studies, 90 credits, and permission of instructor.

Notes
Permission must be obtained in advance. Students may present no more than 3 credits for graduation.

Hours of Lecture or Seminar per week
3
**CLIM 101 - Weather, Climate, and Society**

Credits: 3
This course provides a survey of the scientific and societal issues associated with weather and climate variability and change. The course will examine physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. The course will also review the current debate on climate change from a scientific point of view, with a focus on those aspects that have the largest potential impact on global society.

**Prerequisites**
None.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CLIM 662 - Statistical Methods in Climate Research**

Credits: 3
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.

**Prerequisites**
Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CLIM 710 - Introduction to Physical Climate System**

Credits: 3
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation, and interactions between ocean and atmosphere. Reviews past climate change; stratosphere and its interactions with troposphere; and role of land processes in modulating climate.

**Prerequisites**
BS or MS in mathematics or a physical science, or permission of instructor.
CLIM 711 - Introduction to Atmospheric Dynamics

Credits: 3
Cross-Listed with PHYS 676

Covers basic conservation laws of mass, momentum, and energy; and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere.

Prerequisites
BS or MS in mathematics or a physical science, or permission of instructor.

CLIM 712 - Physical and Dynamical Oceanography

Credits: 3
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior.

Prerequisites
BS or MS in mathematics or a physical science, or permission of instructor.

CLIM 713 - Atmosphere-Ocean Interactions

Credits: 3
Provides comprehensive observational and mechanistic understanding of El Niño and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology.
Prerequisites
CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLIM 714 - Land-Climate Interactions

Credits: 3
Interdisciplinary course providing detailed description of surface energy and water balance over land, and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers.

Prerequisites
BS or MS in mathematics or physical science, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLIM 715 - Numerical Methods for Climate Modeling

Credits: 3
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics.

Prerequisites
CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CLIM 750 - Geophysical Fluid Dynamics

Credits: 3
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion;
beta plane approximation; and equatorial Kelvin and Rossby waves.

**Prerequisites**
CLIM 711, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 751 - Predictability of Weather and Climate**

Credits: 3
Covers fundamental aspects of weather and climate predictability. Using simple dynamical models, illustrates basic theorems on divergence of trajectories in phase space and fundamental periodicity properties of flow. Explores paradigms of turbulence, barotropic and baroclinic instability, and optimal linear growth to describe fundamental error growth mechanisms. Examines examples from real weather forecasting systems. Studies predictability of time averages with simple dynamical models and experiments using complex general circulation models and historical data analysis. Emphasizes roles of boundary conditions of sea surface temperature and soil moisture.

**Prerequisites**
CLIM 711 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 752 - Ocean General Circulation**

Credits: 3
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. The class examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves.

**Prerequisites**
CLIM 712 or 711 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 753 - General Circulation of the Atmosphere**
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales.

**Prerequisites**
CLIM 710 and 711.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 759 - Topics in Climate Dynamics**

Credits: 3
Covers selected topics in climate dynamics not covered in fixed-content courses.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for credit when offered with different content.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 762 - Statistical Methods in Climate Research**

Credits: 3
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.

**Prerequisites**
Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CLIM 796 - Directed Reading and Research**
Credits: 1-6
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

**Prerequisites**
Admission into climate dynamics doctoral program and permission of instructor.

**Notes**
May be repeated as necessary.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**CLIM 991 - Climate Dynamics Seminar**

Credits: 1
Presentations in climate dynamics field by Mason faculty and invited speakers.

**Prerequisites**
Graduate standing.

**Notes**
May be repeated for credit; however, a maximum of 3 credits may be applied toward the climate dynamics PhD.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
0

**CLIM 996 - Doctoral Reading and Research**

Credits: 1-6
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

**Prerequisites**
Admission into climate dynamics doctoral program and permission of instructor.

**Notes**
May be repeated as necessary.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**CLIM 998 - Doctoral Dissertation Proposal**
Credits: 1-12
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation.

Prerequisites
Doctoral standing and permission of instructor.

Notes
Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements.

CLIM 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy and permission of instructor.

Notes
May be repeated, but no more than 24 credits total in CLIM 998 and 999 may be applied to doctoral degree requirements.

COMM 100 - Public Speaking

Credits: 3
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
**COMM 101 - Interpersonal and Group Interaction**

Credits: 3  
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships.

_hours of lecture or seminar per week_  
3

_hours of lab or studio per week_  
0

**COMM 140 - Forensics Seminar in Creative Arts**

Credits: 1  
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

_prerequisites_  
Audition.

_notes_  
May be taken four times.

_hours of lecture or seminar per week_  
0

_hours of lab or studio per week_  
6

**COMM 141 - Forensics Seminar in Recreative Arts**

Credits: 1  
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

_prerequisites_  
Audition.

_notes_  
May be taken four times.

_hours of lecture or seminar per week_  
0

_hours of lab or studio per week_  
6

**COMM 142 - Forensics Seminar in Debate: Affirmative Strategies**
Credits: 1
Work in affirmative research, case construction, and oral presentation, directed toward affirmative analysis of intercollegiate debate proposition.

Notes
May be taken four times.

**Hours of Lecture or Seminar per week**
0
**Hours of Lab or Studio per week**
6

**COMM 143 - Forensics Seminar in Debate: Negative Strategies**

Credits: 1
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Notes
May be taken four times.

**Hours of Lecture or Seminar per week**
0
**Hours of Lab or Studio per week**
6

**COMM 145 - Newspaper Workshop I**

Credits: 1
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor.

Notes
May be repeated for total 3 credits.

**Hours of Lecture or Seminar per week**
1
**Hours of Lab or Studio per week**
2

**COMM 148 - Radio Workshop I**

Credits: 1
Practical experience in production, news writing, promotions, advertising, public relations, programming, or newscasting for student radio station WGMU.

Prerequisites
100-level COMM course, or permission of instructor.

**Notes**  
May be taken three times.

**Hours of Lecture or Seminar per week**  
1

**Hours of Lab or Studio per week**  
3

---

**COMM 150 - Communication Skills for International Students**

Credits: 3  
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study.

**Prerequisites**  
International student in first year of study in the United States, non-native speakers of English with some difficulty speaking clearly and accurately, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

---

**COMM 157 - Video Workshop**

Credits: 1  
Practical experience in learning production basics including camera, video, and lighting.

**Notes**  
Students who have already completed or are in COMM 355 are not eligible to take this course. May be taken three times.

**Hours of Lecture or Seminar per week**  
1

**Hours of Lab or Studio per week**  
2

---

**COMM 200 - Introduction to Communication**

Credits: 3  
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication.

**Notes**  
May be repeated only once.
COMM 201 - Small Group Communication

Credits: 3
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving.

Prerequisites
COMM 101 or equivalent course.

COMM 202 - Mass Media and Communication Systems

Credits: 3
Study of the development of various telecommunications and media systems in the United States, including print media, motion pictures, recording industry, telegraphy and telephony, broadcasting and cable, and new communications technologies.

COMM 203 - Introduction to Journalism

Credits: 3
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers, and as orientation for those interested in learning more about news business operations.

COMM 210 - Voice and Articulation
Credits: 3
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**COMM 230 - Case Studies in Persuasion**

Credits: 3
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**COMM 255 - Introduction to Media Literacy**

Credits: 3
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**COMM 260 - Basic Debate Theory and Practice**

Credits: 3
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation.

**Hours of Lecture or Seminar per week**
1
**Hours of Lab or Studio per week**
3

**COMM 261 - Theories of Argumentation**
Credits: 3
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**COMM 300 - Foundations of Public Communication**

Credits: 3
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication.

**Prerequisites**
3 credits of 100- or 200-level COMM courses, or 60 credits; grade of C or better in COMM 200.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**COMM 301 - Foundations of Interpersonal Communication**

Credits: 3
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships.

**Prerequisites**
3 credits of 100- or 200-level COMM courses, or 60 credits; grade of C or better in COMM 200.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**COMM 302 - Foundations of Mass Communication**

Credits: 3
Theories and principles of mass communication emphasizing effects, the media as institution, and role of society.

**Prerequisites**
3 credits of 100- or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

**Hours of Lecture or Seminar per week**
3
COMM 303 - Writing across the Media

Credits: 3
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style.

Prerequisites
30 credits and ENGL 302.

Notes
Prerequisite for all communication media writing courses. Lab work required.

COMM 305 - Foundations of Intercultural Communication

Credits: 3
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted.

Prerequisites
3 credits of 100 or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

COMM 306 - Issues in Intercultural Communication

Credits: 3
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences.

Prerequisites
COMM 305, or permission of instructor.

Notes
Continuation of COMM 305.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
COMM 307 - Field Study in Communication

Credits: 3
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences.

Prerequisites
Permission of instructor

Notes
May be repeated once with a different field of study.

COMM 310 - Oral Interpretation

Credits: 3
Principles and theories of oral interpretation. Practice in oral communication of prose, poetry, and drama.

COMM 320 - Business and Professional Communication

Credits: 3
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills.
Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment.

Prerequisites
COMM 300.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 330 - Principles of Public Relations

Credits: 3
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising.

Prerequisites
3 COMM credits and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 332 - Nonverbal Communication

Credits: 3
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

Prerequisites
3 COMM credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 335 - Organizational Communication

Credits: 3
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.
Prerequisites
COMM 100, 101, or 301; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 340 - Forensics Seminar in Creative Arts

Credits: 1
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisites
4 credits of COMM 140, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
6

COMM 341 - Forensics Seminar in Recreative Arts

Credits: 1
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisites
4 credits of COMM 141, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
6

COMM 342 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate
debate proposition.

**Prerequisites**
4 credits of COMM 142, or 60 credits and audition.

**Notes**
May be taken four times.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
6

**COMM 343 - Forensics Seminar in Debate: Negative Strategies**

Credits: 1
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

**Prerequisites**
4 credits of COMM 143, or 60 credits and audition.

**Notes**
May be taken four times.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
6

**COMM 344 - Parliamentary Procedure**

Credits: 1
Procedures of parliamentary law as practiced in voluntary organizations. Practice in leading groups that conduct business according to Roberts Rules of Order, Newly Revised. Brief review of other parliamentary manuals.

**Prerequisites**
60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
0

**COMM 345 - Newspaper Workshop II**
Credits: 1
Practical experience in writing and editing for student newspaper or other papers.

Prerequisites/Corequisites
3 credits of COMM 145, COMM 351, or permission of instructor

Notes
May be taken three times.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
2

COMM 346 - Yearbook Workshop

Credits: 1
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook.

Notes
May be taken three times.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
2

COMM 348 - Radio Workshop II

Credits: 1
Intense practical application of previously acquired skills in production, promotions, advertising, public relations, programming, or news writing for student radio station WGMU.

Prerequisites
COMM 148, or permission of instructor.

Notes
May be taken three times.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

COMM 350 - Mass Communication and Public Policy
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers.

**Prerequisites**
COMM 102, 202, or 302; or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 351 - News Writing and Reporting**

Credits: 3
Experience in actual news gathering. Students write and report for print and online outlets. Numerous inclass and out-of-class writing assignments train students in unique styles of print and online journalism.

**Prerequisites**
COMM 303.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 352 - News Editing: Print and Beyond**

Credits: 3
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks.

**Prerequisites**
COMM 303.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 353 - Broadcast Journalism**

Credits: 3
Prerequisites
COMM 303.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 354 - Radio Production

Credits: 3
Theory and practice of operational radio broadcasting. Topics include programming, production, and promotion aspects of commercial and noncommercial radio.

Prerequisites
COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
4

COMM 355 - Video Principles and Practices

Credits: 3

General introduction to video production including camera, audio, lighting, and editing. Lab work required.

Prerequisites
Successful completion of COMM 355 (with a C or better) is a prerequisite for all advance-level production courses.

Notes
Lab work required.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
2

COMM 356 - Video: Performance and Writing

Credits: 3
Writing for video, performance skills for on-air work, interviewing.

Hours of Lecture or Seminar per week
COMM 358 - Video Producing and Directing

Credits: 3
Introduces techniques, theory, and practices in producing and directing including studio and field producing and directing, budget, floor plans, and production material associated with video productions.

Prerequisites
COMM 355 with a grade of 2.00 or portfolio assessment.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
4

COMM 359 - Media Management

Credits: 3
Principles, practices of media management from general techniques to operation of individual departments within a media organization.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 360 - Video Editing

Credits: 3
Focus on advanced techniques in digital editing, software associated with video editing (Final Cut Pro), theories of video editing and necessary skills associated with digital editing.

Prerequisites
COMM 355 with a grade of 2.00 or better or portfolio assessment.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
3

COMM 361 - Online Journalism
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet.

Prerequisites
COMM 303, or permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 362 - Argument and Public Policy

Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 363 - Media Career Seminar

Practicum for students with production experience; students produce a final resume in area of expertise.

Prerequisites
Two courses completed in area of media production focus.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
3

COMM 364 - Videography

Focus on camera techniques such as framing, editing within the camera, shot composition, storyboarding, camera angles, video levels, and continuity.

Prerequisites
COMM 355 with a grade of 2.00 or better or portfolio assessment.

Hours of Lecture or Seminar per week
3
COMM 365 - Women and Media

Credits: 3
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media influence, and gives sense of women's roles as media professionals and consumers.

Prerequisites
COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 366 - Visual Communication

Credits: 3
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules, and using electronically mediated discussion.

Prerequisites
IT 103 and COMM 355.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 369 - Telecommunications Systems

Credits: 3
Studies evolution and operation of telecommunications systems from wireline telegraphy to wireless voice, video, and data services. Topics include communication coding systems, analog and digital modulation schemes, twisted-pair telephony, broadband coaxial cable, and high-power direct-to-home digital satellite.

Prerequisites
60 credits, or permission of instructor
COMM 370 - Feature Writing

Credits: 3
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories.

Prerequisites
COMM 303.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 371 - Sports Writing and Reporting

Credits: 3
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 373 - Business and Economic Journalism

Credits: 3
Writing and reporting about business and the economy with focus on understanding financial news, and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
COMM 374 - Political Journalism

Credits: 3
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 375 - Mass Communication Advertising and Promotions

Credits: 3
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising.

Prerequisites
COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 380 - Media Criticism

Credits: 3
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 389 - Public Relations for Associations and Nonprofits

Credits: 3
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment.
Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

**Prerequisites**
60 credits, or 3 credits of lower-division COMM courses.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 390 - Case Studies in Public Relations**

Credits: 3
Focuses on current issues in corporate, government, and nonprofit public relations.

**Prerequisites**
COMM 330.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 391 - Writing for Public Relations**

Credits: 3
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research.

**Prerequisites**
COMM 303.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 392 - Public Relations Study Abroad**

Credits: 3
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis is placed on the global and intercultural aspects of public relations.

**Hours of Lecture or Seminar per week**
3
COMM 399 - Special Topics in Communication

Credits: 1-3
Topics vary; some require laboratories.

Prerequisites
Permission of instructor.

Notes
May be repeated.

COMM 400 - Research Methods in Communication

Credits: 3
Explores applications for primary research methodologies used in communication. Research project, with focus on survey, critical ethnographic, or experimental methodologies.

Prerequisites
COMM 200; and at least two of COMM 300, 301, 302 or 305.

COMM 401 - Interpersonal Communication in the Workplace

Credits: 3
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships.

Prerequisites
COMM 301, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
**COMM 412 - Politics and the Mass Media**

Credits: 3  
**Cross-Listed with GOVT 412**

Covers responsibilities, freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials.

**Prerequisites**  
GOVT 103, or permission of instructor.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**COMM 420 - Senior Seminar in Theories of Communicative Interaction**

Credits: 3  
Explores primary theories explaining human communicative behavior, including traditional rhetorical, contemporary social science, critical, and mass communication.

**Prerequisites**  
Minimum satisfactory grade in COMM 200, 300, 301, and 302.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**COMM 425 - Honors Seminar in Communication**

Credits: 3  
Examines foundations, connectedness, and applications of numerous communication theories across the discipline.

**Prerequisites**  
80 credits, cumulative GPA of 3.50.

**Notes**  
Honors project required.

**Hours of Lecture or Seminar per week**  
3
COMM 430 - Persuasion

Credits: 3
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change.

Prerequisites
COMM 230 or permission of instructor.

COMM 431 - Information Technology and the Political Process

Credits: 3
Studies impact of information network of wire and wireless communications and computers on political process in advanced industrial countries.

Prerequisites
60 credits or permission of instructor.

COMM 432 - Political Communication

Credits: 3
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings.

COMM 434 - Interviewing
Credits: 3
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews.

Prerequisites
60 credits or permission of instructor

Hours of Lecture or Seminar per week
3

COMM 435 - Computers and Communication

Credits: 3
Offers practical application, skill development, and theoretical and critical assessment of computer-mediated communication. Discusses culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, freedom and responsibility, and images of future. Students contract for course assignments within course categories.

Prerequisites
60 credits.

Hours of Lecture or Seminar per week
3

COMM 450 - Internship in Communication

Credits: 3
See department for procedures. On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing.

Prerequisites
75 credits, major or minor in telecommunications or electronic journalism, 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department

Notes
May be repeated up maximum 6 credits.

Hours of Lecture or Seminar per week
1

COMM 451 - Facilitating Communication Education
Credits: 3
Theory and practice in facilitating learning of communication principles and skills. Students work as instructor aides in lower-division classes under supervision of faculty member. Activities include facilitating small-group activities, and individually critiquing oral performances.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
5

COMM 452 - Media Production Practicum

Credits: 3
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of faculty members. Activities include working on telecourses, public relations videos, and multimedia projects; aiding in creating in-house productions for departments; and working as cable caster for master control campus operations.

Prerequisites
COMM 303, 348, or 355.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

COMM 454 - Free Speech and Ethics

Credits: 3
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society.

Prerequisites
COMM 300, 302; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 455 - History of Print Journalism

Credits: 3
Cross-Listed with HIST 455

Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of
independent press, and yellow journalism.

Prerequisites
3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 456 - Comparative Mass Media

Credits: 3
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media, and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems.

Prerequisites
COMM 302 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 465 - Topics in Communication and Gender

Credits: 3
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting.

Notes
Course may be repeated with department approval.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 469 - Structure of the Telecommunications Industry

Credits: 3
Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time.

Prerequisites
90 credits or permission of instructor.

Notes
Serves as capstone seminar in telecommunications minor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 475 - Journalism Law

Credits: 3
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law.

Prerequisites
60 credits or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

COMM 499 - Independent Study in Communication

Credits: 3
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place.

Prerequisites
75 credits and permission of department.

Notes
May be repeated. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

COMM 504 - Communication and Interpersonal Conflict

Credits: 3
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage,
family, and workplace. Examines factors that generate conflicts, and communication strategies and skills that help shape conflict interaction toward productive ends.

**COMM 506 - Communication in International Organizations**

Credits: 3
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities, and learning to deal effectively with differences.

**COMM 510 - Studies in Oral Interpretation**

Credits: 3
Examines role of oral communicator in selection, adaptation, and performance of literature.

**Notes**
Topics vary depending on genre being considered. May be repeated three times for credit if each course devoted to a different genre.

**COMM 530 - Theories of Small Group Communication**

Credits: 3
Advanced-level theory and practice of small group interaction. Examines current research, focusing on learning applications of theories to relevant settings.
COMM 542 - Directing Debate Activities

Credits: 3
Theory and practice of competitive debate. Emphasizes traditional and contemporary theories; administrative activities related to direction of a debate program; and methods of instruction, including analysis of current debate topic. Designed for novice and experienced debate coaches.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 551 - Developing Students' Speaking and Listening Skills

Credits: 3
Emphasizes development of assignments that develop communication competence in children and adolescents. Covers five communication functions and their development to integrate basic skills at elementary level and direct teaching at secondary level, and philosophies of communication education and curriculum development as well as competency assessment.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 554 - Telecommunications Policy and Regulation

Credits: 3
Reviews history and principles of telecommunications regulation. Studies relevant policy-making and regulatory institutions and their roles in charting U.S. telecommunications course. Examines role of citizens and lobby groups in regulatory process.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 590 - Seminar in Communication

Credits: 3
Intensive study of specific topics; content varies.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week
3
COMM 600 - Introduction to Graduate Studies

Credits: 3
This course offers a broad introduction to the field of communication in terms of communication-based theories and research.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 601 - Communication in Professional Relationships

Credits: 3
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 602 - Theories and Research of Mass Communication

Credits: 3
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 604 - Communication Research Practicum

Credits: 3
Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis.

Prerequisites
COMM 634 or permission of instructor
COMM 605 - Intercultural Communication

Credits: 3
Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 620 - Health Communication

Credits: 3
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Particular attention to understanding cultural differences in perceptions of and communication about health and disease.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 621 - Media Advocacy for Nonprofit Organizations

Credits: 3
Drawing from scholarship in media studies, critical theory, and public health campaign literature, provides graduate-level introduction to media advocacy strategies for nonprofit organizations with limited financial resources.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 630 - Theories of Public Relations

Credits: 3
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and
international communication research, rhetoric, persuasion, and social movements.

**COMM 631 - Approaches to Group Facilitation**

Credits: 3
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 634 - Theories of Interpersonal Communication**

Credits: 3
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research.

**Prerequisites**
COMM 301 or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 635 - Organizational Communication**

Credits: 3
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
**COMM 636 - Communication Consulting**

Credits: 3  
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**COMM 637 - Risk Communication**

Credits: 3  
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**COMM 650 - Research Methodologies in Communication**

Credits: 3  
Introduces various research methods used by communication professionals. Focus is to achieve understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**COMM 651 - Communication in the Classroom**

Credits: 3  
Communication theories and skills to manage communicative environment in classroom. Considers nonverbal aspects of space, time, action, and form as they affect teaching choices. Covers verbal patterns for skills of classroom management, including questioning skills, enhancement of students' self-concept, systematic feedback, parental communication, and student development.

**Hours of Lecture or Seminar per week**  
3
**COMM 653 - Graduate Communication: Research and Teaching**

Credits: 3
Investigates theoretical and philosophical implications of communication instruction. Exposes graduate students to principles and practices of teaching college communication courses at upper and lower divisions.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 655 - Theories of Visual Communication in Telecommunications**

Credits: 3
Theories of visual communications and how they are used in creating images for web sites, video productions, corporate presentations, virtual reality, computer graphics. Explores problems of fitting messages to various telecommunications media, how target audience perceives the visual image, and aesthetic demands of products imposed by new technologies.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 656 - Global Communication**

Credits: 3
Study of global telecommunication channels and artifacts of international mass communication, with focus on discussing problems of free flow of information, roles of nations and international organizations in fostering global communication, and other technologies. Develops perspectives on worldwide social, political, educational, and economic development.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**COMM 675 - Content Analysis**

Credits: 3
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques.
COMM 694 - Communication Internship

Credits: 3-6
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study.

Prerequisites
18 graduate credits and permission of department.

COMM 696 - Directed Readings and Research

Credits: 1-3
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required.

Prerequisites
Permission of department.

Notes
May be repeated for maximum 6 credits.

COMM 697 - Independent Production

Credits: 1-3
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisites
Permission of department.

Notes
May be repeated for maximum 6 credits.

**COMM 705 - Intercultural Health and Risk Communication**

Credits: 3
Examines intercultural health and risk communication interventions, including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information.

*Hours of Lecture or Seminar per week*
0
*Hours of Lab or Studio per week*
0

**COMM 706 - Strategic Communication**

Credits: 3
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields.

**Prerequisites**
COMM 630 or permission of the instructor.

*Hours of Lecture or Seminar per week*
3
*Hours of Lab or Studio per week*
0

**COMM 720 - Consumer-Provider Health Communication**

Credits: 3
Explores relational health communication research and practice. Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, as well as in promoting personal and psychosocial well being.

*Hours of Lecture or Seminar per week*
3
*Hours of Lab or Studio per week*
0
**COMM 721 - E-Health Communication**

Credits: 3  
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**COMM 725 - Qualitative Methods**

Credits: 3  
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**COMM 735 - Crisis Communication**

Credits: 3  
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how the media and Internet present crisis information to the public.

**Prerequisites**  
Permission of instructor.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**COMM 750 - Research Methods II**

Credits: 3  
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales.

**Prerequisites**  
COMM 650.
COMM 798 - Communication Studies Project

Credits: 3
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners.

COMM 799 - Master's Thesis

Credits: 1-6
Original research endeavor related to student's concentration in communication under supervision of faculty committee.

Prerequisites
24 graduate credits and approval of thesis proposal by faculty committee.

COMM 800 - Studies for the Doctor of Philosophy in Education

Credits: variable
Program of studies designed by student's discipline director and approved by doctoral committee. Students participate in research activity of discipline director, and write paper reporting original contributions.

Prerequisites
Admission to doctoral program in communication.

Notes
May be repeated.

COMM 806 - International Public Relations
Credits: 3
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues.

Prerequisites
COMM 706 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 820 - Health Communication Campaigns

Credits: 3
Explores use of communication campaigns to promote health and reduce health risks, examines how health communication campaigns are designed, implemented, and evaluated, and describes the role of communication research throughout the campaign process.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 890 - Special Topics in Communication

Credits: 3
Selected topics reflecting specialized areas in communication.

Prerequisites
PhD rank or permission of instructor.

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

COMM 896 - Independent Study

Credits: 3
Independent reading on a topic agreed on by student and faculty member.

Prerequisites
PhD rank or permission of instructor.
COMM 998 - Doctoral Dissertation Proposal

Credits: 1-6
Development of a research proposal that constitutes the basis for a doctoral dissertation.

Prerequisites
Advancement to candidacy.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
Grading
S/NS

COMM 999 - Doctoral Dissertation Research

Credits: 1-15
Research on an approved dissertation topic under the direction of dissertation committee.

Prerequisites
Completion of COMM 998.

Notes
May be repeated. No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements.

CONF 101 - Conflict and Our World

Credits: 3
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations.
CONF 202 - Dialogue and Difference

Credits: 3
Communicating effectively across differences of age, gender, language, culture, and political orientation, and in different contextual situations is a skill useful for every individual. It is also integral to the success of any attempt to resolve conflict, whether individual, group/institutional, or global. Through this course, students will gain an understanding of the challenges of communicating across differences and the skills required to communicate effectively. Students will engage in preparing and analyzing communication strategies and over the term will participate in a dialogue group that explores the meaning and experience of difference on the Mason campus.

CONF 240 - Social Dynamics of Terrorism, Security, and Justice

Credits: 3
Terrorism is a significant factor in conflict worldwide, yet the underlying causes and conditions that give rise to terrorist activity are often misunderstood and misrepresented. Through case studies of terrorist groups around the world, students are presented with an analytic framework to account for terrorist acts and organizations. Explores the various social dynamics underlying the development of terrorism and responses to it. Topics include, but are not limited to, defining terrorism, recruitment into violent groups, dynamics of terrorist organizations, counter-terrorism and human rights concerns, the role of religious and political ideologies in terrorism and counter-terrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

CONF 300 - Conflict Resolution Techniques and Practice

Credits: 3
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics.

Prerequisites
CONF 101 or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CONF 301 - Research and Inquiry in Conflict Resolution

Credits: 3
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work.

Prerequisites
CONF 101 or permission of instructor

CONF 302 - Identity Conflicts and their Resolution

Credits: 3
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict.

CONF 320 - Interpersonal Conflict Analysis and Resolution

Credits: 3
Covers conflict at micro level, introducing theories drawn from various disciplines including psychology, anthropology, and conflict resolution. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Also prepares for further course work for interpersonal conflict concentration.

CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution
Credits: 3
Covers conflict at mezzo level, introducing theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Also prepares for further course work for community and organizational conflict concentration.

Hours of Lecture or Seminar per week
3

CONF 340 - Global Conflict Analysis and Resolution

Credits: 3
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration.

Hours of Lecture or Seminar per week
3

CONF 341 - Global Conflict Resolution Practice

Credits: 1
Building upon CONF340 theories and concepts, this course focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case.

Prerequisites/Corequisites
CONF 340

Hours of Lecture or Seminar per week
3

CONF 375 - Special Programs Field Experience

Credits: 1-6
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings.

Prerequisites
Permission of instructor and director, controlled enrollment form required.
CONF 385 - International Field Experience

Credits: 3
Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director.

Prerequisites
CONF 101, and permission of instructor

Notes
May be repeated for up to 6 credits.

CONF 393 - Philosophy, Conflict Theory, and Violence

Credits: 3
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies.

Prerequisites
CONF 101 or permission of instructor

CONF 399 - Special Topics in Conflict Analysis and Resolution

Credits: 3
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict.

Notes
May be repeated for up to 9 credits if topics vary.
CONF 490 - Integration

Credits: 3
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice.

Prerequisites
CONF 101 and degree status; or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 495 - Organizations and Actors in the Conflict Field

Credits: 3
This seminar acquaints students with the work of professionals in the conflict field through lectures, guest speakers, and field trips to organizations and institutions located in the region. Topics will vary and may include the role and structure of nongovernmental organizations engaged in conflict resolution, the ethical challenges facing conflict practitioners, and the translation of theoretical concepts into practical action.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 499 - Independent Research in Conflict Analysis and Resolution

Credits: 1-3
Readings and research conducted on individual basis in consultation with instructor.

Prerequisites
CONF 101 and permission of instructor

Notes
Student may not present more than 3 credits for graduation credit.
CONF 501 - Introduction to Conflict Analysis and Resolution

Credits: 3
*Prerequisite or corequisite for all MS CONF majors.* Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

**Prerequisites/Corequisites**
Prerequisite or corequisite for all MS CONF majors

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

CONF 502 - Intensive Introduction to Conflict Analysis and Resolution

Credits: 3
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

CONF 595 - Selected Topics

Credits: 3
Topics vary each semester and are announced each academic year.

**Prerequisites**
CONF 501

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

CONF 601 - Theories of Conflict and Conflict Resolution
Credits: 3
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CONF 610 - Philosophy and Methods of Conflict Research**

Credits: 3
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CONF 611 - MS Research II**

Credits: 3
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution.

**Prerequisites**
CONF 501 and 610

**Notes**
Builds on CONF 610.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CONF 642 - Integration of Theory and Practice**
Credits: 3
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501, 601, 610, and 713

Hours of Lecture or Seminar per week
3

CONF 650 - Conflict Analysis and Resolution Advanced Skills

Credits: 3
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501 or 502

Hours of Lecture or Seminar per week
3

CONF 651 - Conflict Analysis and Resolution for Collaborative Leadership in Community Planning

Credits: 3
Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501 or 502

Hours of Lecture or Seminar per week
3

CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts
Credits: 3
Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts.

**Prerequisites/Corequisites**
Prerequisite or corequisite: CONF 501 or 502

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONF 653 - World Religions, Diplomacy, and Conflict Resolution**

Credits: 3
Analyzes ways world religions play role in conflicts, war, diplomacy, peace making, and conflict resolution.

**Prerequisites/Corequisites**
Prerequisite or corequisite: CONF 501 or 502

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution**

Credits: 3
Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods. Applies to social conflicts in local and international contexts.

**Prerequisites/Corequisites**
Prerequisite or corequisite: CONF 501 or 502

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONF 657 - Facilitation Skills**

Credits: 3
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises.

**Prerequisites/Corequisites**
Prerequisite or corequisite: CONF 501 or 502
CONF 658 - Diversity and Difference in Conflict Analysis and Resolution

Credits: 3
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501 or 502

CONF 659 - Leadership in Conflict Analysis and Resolution

Credits: 3
Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501 or 502

CONF 660 - Conflict Assessment and Program Evaluation

Credits: 3
Covers assessment methods appropriate to conflict contexts, and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict.

Prerequisites/Corequisites
Prerequisite or corequisite: CONF 501 or 502
CONF 665 - Special Topics in Conflict Analysis and Resolution

Credits: 3
In-depth study of contemporary areas of conflict resolution practice. Fulfills elective requirement for certificate program. Topics vary.

Prerequisites/Corequisites
CONF 502 or permission of the instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 668 - Applied Integration for Graduate Certificates

Credits: 3
Capstone course facilitating integration of learning in the graduate certificate programs, and appropriate mentored application and experiential learning.

Prerequisites
CONF 501 or 502; CONF 660; and CONF 650,651,652 or 653

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 682 - Principles of Environmental Conflict Resolution

Credits: 3
Cross-Listed with EVPP 682

This course explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Prerequisites
CONF 501, 502, EVPP 607 or permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices

Credits: 3
Cross-Listed with EVPP 683

This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Prerequisites
CONF 682/EVPP 682 or permission of instructor

Hours of Lecture or Seminar per week
3

CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3
Cross-Listed with EVPP 684

This course is the capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Prerequisites
CONF 682/EVPP 682, CONF 683/EVPP 683

Hours of Lecture or Seminar per week
3

CONF 690 - Practicum in Conflict Analysis and Resolution

Credits: 6
In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts.

Prerequisites
CONF 501 or 801, and 713

Notes
Two semesters, 3 credits per semester.

Hours of Lecture or Seminar per week
1
CONF 694 - Internship

Credits: 1-6
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing experiences.

Prerequisites
21 credits, including CONF 713

Notes
Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship.

CONF 695 - Selected Topics

Credits: 3
Topics vary; they are announced each academic year.

CONF 697 - Directed Reading

Credits: 1-3
Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member.

Notes
May be repeated up to 6 credits.
CONF 701 - Theories of Social Harmony

Credits: 3
Explores theories that define and explain social harmony and cooperation. Examines social institutions that manage and mediate conflict at all levels. Draws from major social science theorists from a variety of disciplines.

Prerequisites
CONF 501 or 801; CONF 601 recommended but not required

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 702 - Peace Studies

Credits: 3
Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 703 - Conceptions of Practice

Credits: 3
Provides framework for integrating theory and practice in conflict resolution. Reviews types of practice and theories of intervention and change, discusses analytic process of assessment and diagnosis before intervention. Considers how research can be incorporated into practice and how thoughtful practice generates research questions. Includes methods of program evaluation and action research. Students encouraged to identify, develop their own theories.

Prerequisites
CONF 501, 601, 713

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 708 - Identity and Conflict
Credits: 3
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 709 - War, Violence, and Conflict Resolution

Credits: 3
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deeprooted conflicts.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 711 - The Conventions of Statistical Methodology

Credits: 3
Introduces students to study design, data collection, and measurement. Teaches students how to identify research problems, and formulate research questions and hypotheses. Exposes students to various design strategies and provides a working knowledge of indicator construction, validity threats, and sampling techniques. Reviews a variety of approaches as exemplified by such topics as the experimental method, survey methodology, longitudinal/panel data/pooled data studies, and game theoretical approaches. Emphasis is placed on recognizing the relationship between theoretical and substantive questions; the methodology employed and the analytical strategies that are utilized. Focuses on developing the conceptual tools necessary to design and assess empirical research studies, and the technical and basic computer skills necessary to conduct statistical research.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 713 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and
negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

**Prerequisites/Corequisites**
Prerequisite or corequisite for all CONF majors: CONF 501 or 801

**CONF 714 - Reflective Practice in Organizational or Community Conflict**

Credits: 3
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 713 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

**Prerequisites**
CONF 501 or 801 and 713

**CONF 715 - Reflective Practice in International Conflict and Civil Strife**

Credits: 3
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

**Prerequisites**
CONF 501, 713, and 714

**CONF 720 - Ethnic and Cultural Factors in Conflict Resolution**

Credits: 3
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution.
Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 721 - Conflict and Race

Credits: 3
Cross-Listed with SOCI 523

Addresses historic analyses of racial and ethnic identity conflicts and their resolution.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 722 - Conflict and Religion

Credits: 3
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 723 - Conflict and Gender

Credits: 3
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week

CONF 726 - Moral and Philosophical Foundations of Conflict

Credits: 3
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 727 - Cross-Cultural Analysis of Conflict

Credits: 3
Introduces techniques of participant observation and anthropological research. Provides insights into cross-cultural fieldwork experience, an important skill to facilitate working with groups outside one's "worldview." Highly recommended for students interested in understanding diverse groups and gaining insights into worldviews and values held by different people.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 728 - Human Rights Theory and Practice in Comparative Perspective

Credits: 3
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world.

Prerequisites
CONF 501 or 801, or permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CONF 729 - Approaches to Violence

Credits: 3
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 730 - Structural Sources of Conflict

Credits: 3
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change.

Prerequisites
CONF 501 or 801, and 601 for MS; or 803 for PhD

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 731 - Conflict in Organizations

Credits: 3
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CONF 732 - Conflict in Development

Credits: 3
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 733 - Law and Justice from a Conflict Perspective

Credits: 3
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 735 - Global Context of Conflict

Credits: 3
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual tool boxes to analyze conflicts in different parts of the world.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 736 - Globalization and International Conflict
Credits: 3
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 738 - Researching Conflict in Health Systems

Credits: 3
Capstone seminar; final course in graduate certificate program in conflict resolution for health professionals. Involves conducting research and analyzing specific conflict situation in depth. Builds on theory, research, and practice learned in previous courses for this certificate.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 739 - Collective Action, Social Movements, and Globalization

Credits: 3
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 740 - Conflict Roles, Resources, and Ethics

Credits: 3
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings.

Prerequisites
CONF 501 or 801, 713
CONF 741 - Negotiations

Credits: 3
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation, and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings.

Prerequisites
CONF 501 or 801

CONF 743 - Dynamics of Conflict Termination

Credits: 3
Investigates a number of themes relating to war termination with an emphasis on contemporary civil wars. Considers the nature of civil war, focuses attention on a number of contemporary cases, raises questions relating to settlement and series of themes relating to peace implementation and peace building.

Prerequisites
CONF 501 or 801

CONF 745 - Leadership Roles in Conflict and Conflict Resolution

Credits: 3
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels.

Prerequisites
CONF 501 or 801
CONF 746 - Peace Building

Credits: 3
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

CONF 747 - Reconciliation

Credits: 3
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

CONF 748 - Comparative Peace Processes

Credits: 3
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities.

Prerequisites
CONF 501 or 801, and 601 or 803

Hours of Lecture or Seminar per week
3
CONF 749 - World Religions, Violence, and Conflict Resolution

Credits: 3
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 750 - Evaluation of Conflict Resolution Initiatives

Credits: 3
Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONF 795 - Professional Development Seminars

Credits: 1-3
These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution.

Prerequisites
CONF 501 or 801

Notes
May be repeated.

Hours of Lecture or Seminar per week
1-3

Hours of Lab or Studio per week
0
CONF 798 - Thesis Proposal

Credits: 1
Covers development of research proposal for master's thesis, including framing a question and literature review, and designing appropriate methodology. Students form master's thesis committee and review Human Subject Review Board's guidelines and procedures.

Prerequisites
CONF 501 and 610

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CONF 799 - Master's Thesis

Credits: 1-6
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee.

Prerequisites
CONF 501, 713, 610

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
1-6

CONF 801 - Introduction to Conflict Analysis and Resolution

Credits: 3
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Prerequisites/Corequisites
Prerequisite or corequisite for all PhD CONF students

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CONF 802 - Theories of the Person

Credits: 3
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice.

Prerequisites/Corequisites
Prerequisites or corequisite: CONF 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 803 - Structural Theories

Credits: 3
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Course reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution.

Prerequisites
CONF 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 810 - Philosophy and Conflict Research

Credits: 3
Philosophy of knowledge acquisition. Assumes close link between ways we think and ways we build and test theories about the world. Explores and critiques thinking of major 20th-century thinkers from the social sciences, thus forming a critical framework for working with multiple research methodologies.

Prerequisites
CONF 801

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CONF 811 - Advanced Quantitative Research Methods
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis.

**Prerequisites**
CONF 711, 801, and 810

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONF 812 - Advanced Qualitative Research Methods**

Credits: 3
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis.

**Prerequisites**
CONF 801 and 810

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONF 890 - Practicum in Conflict Analysis and Resolution**

Credits: 6
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts.

**Prerequisites**
CONF 801 and 713; two semesters.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
5

**CONF 897 - Directed Reading**

Credits: 3
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member.

**Hours of Lecture or Seminar per week**
3
CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis

Credits: 3
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals.

Prerequisites
CONF 801 and 802, and at least 9 additional credits of required doctoral courses

CONF 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for doctoral dissertation.

Prerequisites
Successful completion of all course work and doctoral qualifying exams

Notes
May be repeated.

CONF 999 - Doctoral Dissertation Research

Credits: 1-12
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999.

Notes
At least 12 credits of 998 and 999 must be accumulated toward degree.
CONS 320 - Conservation in Practice

Credits: 3
Active communication and presentation techniques essential to conservation practitioners. Explores conservation issues from interdisciplinary perspectives.

Notes
Only offered through the Smithsonian Mason Semester.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CONS 401 - Conservation Science I: Conservation Theory

Credits: 3
Introduces the field of conservation biology and science-based management of threatened wildlife and habitats. Provides theoretical background for understanding the importance of biodiversity conservation and climate change and its potential impacts on conservation.

Notes
Only offered through the Smithsonian Mason Semester.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
1

CONS 402 - Conservation Science II: Conservation Practice

Credits: 4
An applied scientific approach to the nature of biodiversity and impacts of biodiversity loss. Covers reproductive physiology, semen collection and preservation, and non-invasive endocrine monitoring.

Notes
Only offered through the Smithsonian Mason Semester.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
2

CONS 410 - Human Dimensions in Conservation
Credits: 3
Presents essential sociological and societal perspectives on conservation issues including human wildlife interactions, environmental economics, public policy, environmental values and public opinion, ecological grief, community-based conflict resolution, and conservation ethics.

Notes
Only offered through the Smithsonian Mason Semester.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONS 420 - Human-Wildlife Conflict**

Credits: 3
Covers the impact of human-wildlife conflict on conservation efforts and human health and well being.

Notes
Only offered through the Smithsonian Mason Semester.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CONS 490 - Integrated Conservation Strategies**

Credits: 3
Integrates the course work of the Smithsonian Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue.

Notes
Only offered through the Smithsonian Mason Semester.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CS 101 - Preview of Computer Science**

Credits: 2
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science Department and the computing environment at the university. Includes a project to introduce problem solving using computers.
Corequisite
CS 112. All computer science majors are required to take this course within their first year.

Hours of Lecture or Seminar per week
2
Hours of Lab or Studio per week
0

CS 105 - Computer Ethics and Society

Credits: 1
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime.

Prerequisites
12 credits of undergraduate course work.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

CS 112 - Introduction to Computer Programming

Credits: 4
This course introduces the use of computer programming as a problem-solving tool. Topics in procedural programming include expressions, control structures, simple data types, input/output, graphical interfaces, testing, debugging, and programming environments.

Prerequisites
Satisfaction of prerequisites for MATH 113.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

CS 123 - Computing: From the Abacus to the Web

Credits: 3
This course will give students the ability to relate to existing and emerging technologies (such as e-mail, the Internet, search engines, blogs, computer games, and robotics) by educating them on the underlying computer science concepts. Historical, social, and technical issues related to each topic will be discussed.

Prerequisites
None
Notes
Students may not take this course for credit once they have successfully completed CS 211. Intended for nonmajors.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 211 - Object-Oriented Programming

Credits: 3
This course continues to focus on problem solving, testing, and debugging and introduces object-oriented programming. Topics include classes, inheritance, packages, collections, exceptions, and polymorphism. Examples in the course may include the use of basic data structures.

Prerequisites
Grade of C or better in CS 112.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
1

CS 222 - Computer Programming for Engineers

Credits: 3
A second course in computer programming. Introduces object-oriented programming and elementary data structures. The emphasis is on problems and language features relevant to engineers. (Intended as terminal course in computer programming.)

Prerequisites
Grade of C or better in CS 112.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 225 - Culture and Theory of Games

Credits: 3
Explores the theory, history, culture, and lore of games with particular emphasis on the varieties of computer game environments.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CS 261 - Introduction to a Second Language

Credits: 1
Advanced programming using Java programming language. Other languages may be offered at times.

Prerequisites
Grade of C or better in CS 211.

Notes
Not available for credit for CS majors.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

CS 262 - Introduction to Low-Level Programming

Credits: 1
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming.

Prerequisites
Grade of C or better in CS 211 or CS 222.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

CS 306 - Synthesis of Ethics and Law for the Computing Professional

Credits: 3
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet.

Prerequisites
CS 105, junior standing (at least 60 credit hours)

Corequisite
All required general education courses

Notes
Computer science majors may use this course to satisfy the general education synthesis requirement, so long as they have not
previously taken CS 305 for credit.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 310 - Data Structures

Credits: 3
This course continues to focus on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures, and the design and analysis of elementary algorithms.

Prerequisites
Grade of C or better in CS 211.

Corequisite
CS105.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 325 - Introduction to Game Design

Credits: 3
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. This course surveys the technical aspects of the field, with an emphasis on programming.

Prerequisites
Grade of C or better in CS 211.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 330 - Formal Methods and Models

Credits: 3
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies.

Prerequisites
Grade of C or better in CS 211 and MATH 125.
CS 332 - Object-Oriented Software Design and Implementation

Credits: 3
Cross-Listed with SWE 332

In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications, design patterns, and abstraction techniques, including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Prerequisites
Grade of C or better in CS 211.

CS 363 - Comparative Programming Languages

Credits: 3

Key programming mechanisms described independently of particular machines or languages including control, binding, procedural abstraction, and types. Systematically surveys diverse high-level language capabilities.

Prerequisites
Grade of C or better in CS 262.

CS 367 - Computer Systems and Programming

Credits: 3

Introduces students to computer systems from the perspective of a programmer. Topics covered include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. This course serves as a foundation for courses on compilers, networks, operating systems, and computer architecture, where a deeper understanding of systems-level issues is required.
Prerequisites
Grade of C or better in CS 262 or 222 and ECE 301 or 331.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 391 - Advanced Programming Lab

Credits: 1
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances.

Corequisite
Grade of C or better in CS 310 and permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
1

CS 421 - Software Requirements and Design Modeling

Credits: 3
Cross-Listed with SWE 421

An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Prerequisites
Grade of C or better in CS 211.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 425 - Game Programming I

Credits: 3
The course will provide an introduction to technologies and techniques used in modern computer games. Teams will explore the
various facets of a complete design, using sophisticated tools. The course will involve a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426.

**Prerequisites**
Grade of C or better in CS 325 and 367.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 426 - Game Programming II**

Credits: 3
This project-oriented course is a continuation of CS 425 with an emphasis on the implementation of a complete game.

**Prerequisites**
CS 425.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 440 - Language Processors and Programming Environments**

Credits: 3
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques.

**Prerequisites**
Grade of C or better in CS 310, 330, and 367.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 450 - Database Concepts**

Credits: 3
This course covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. The main topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation.
Prerequisites
Grade of C or better in CS 310 and 330.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 451 - Computer Graphics

Credits: 3
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques.

Prerequisites
Grade of C or better in MATH 203, CS 310, and CS 367.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 455 - Computer Communications and Networking

Credits: 3
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies.

Prerequisites
Grade of C or better in CS 310 and 367, and STAT 344.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 465 - Computer Systems Architecture

Credits: 3
Computer subsystems and instruction set architectures. Single-cycle, multiple-cycle, and pipeline architectures. Memory hierarchy, cache, and virtual memory input-output processing.

Prerequisites
Grade of C or better in CS 367.
Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CS 468 - Secure Programming and Systems**

Credits: 3
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems.

Prerequisites
Grade of C or better in CS 310 and CS 367.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CS 471 - Operating Systems**

Credits: 3
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management.

Prerequisites
Grade of C or better in CS 310 and 367.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CS 475 - Concurrent and Distributed Systems**

Credits: 3
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarsegrained parallelism at the application level. Projects involve network programming at application level.

Prerequisites
Grade of C or better in CS 310 and 367.

Hours of Lecture or Seminar per week
CS 480 - Introduction to Artificial Intelligence

Credits: 3
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language.

Prerequisites
Grade of C or better in CS 310 and 330.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 482 - Computer Vision

Credits: 3
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images.

Prerequisites
Grade of C or better in CS 319, MATH 203 and STAT 344

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 483 - Analysis of Algorithms

Credits: 3
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved.

Prerequisites
Grade of C or better in CS 310, CS 330 and MATH 125.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CS 484 - Data Mining

Credits: 3
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction, on one side, and performance evaluation, on the other. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data.

Prerequisites
Grade of C or better in CS 310 and STAT 344.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 485 - Autonomous Robotics

Credits: 3
Covers various basic software topics in autonomous robotics, including autonomous architectures, elementary kinematics and controls, simulation, localization and mapping, reasoning, and multiagent environments. The course will have several projects involving physical robots.

Prerequisites
CS 262, CS 310, MATH 203 or permission of the instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 490 - Design Exhibition

Credits: 3
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel.

Prerequisites
Grade of C or better in CS 421, 483; two other CS 400-level courses; and senior standing.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CS 498 - Independent Study in Computer Science

Credits: 1-3
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering.

Prerequisites
60 credits, major in computer science, and permission of instructor.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CS 499 - Special Topics in Computer Science

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 540 - Language Processors

Credits: 3
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors, and experience with programming environments.

Prerequisites
MATH 125; and CS 310, 330, and 365

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
**CS 555 - Computer Communications and Networking**

Credits: 3  
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols.

**Prerequisites**  
STAT 344 or equivalent.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**CS 571 - Operating Systems**

Credits: 3  
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface.

**Prerequisites**  
CS 310 and CS 465.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**CS 580 - Introduction to Artificial Intelligence**

Credits: 3  
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language.

**Prerequisites**  
CS 310 and 330.

**Hours of Lecture or Seminar per week**  
3

**Hours of Lab or Studio per week**  
0

**CS 583 - Analysis of Algorithms**
Credits: 3
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems.

Prerequisites
CS 310 and 330, and MATH 125.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 600 - Theory of Computation

Credits: 3
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability.

Prerequisites
CS 583 and discrete mathematics.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 631 - Object-Oriented Design Patterns

Credits: 3
Principles of object-oriented design through design patterns. Studies selection of appropriate object-oriented structure after system requirements or requirements specification of software system have been developed. Design patterns created in logic view of software system. Studies generalized design solutions for generalized software design problems, and reuse of design patterns. Once developed, design patterns may be specified in any object-oriented language.

Prerequisites
SWE 619 or 620, or CS 540 or 571; or graduate course in object-oriented programming or equivalent.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 633 - Computational Geometry

Credits: 3
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent
geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation.

**Prerequisites**
CS 583

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 635 - Foundations of Parallel Computation**

Credits: 3
Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers.

**Prerequisites**
CS 583, and 540 or 571; or equivalent.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 640 - Advanced Compilers**

Credits: 3
Examines advanced compiler techniques such as code optimizations for sequential and parallel machines; compilers for logical, functional, or object-oriented languages; and other topics in current literature.

**Prerequisites**
CS 540 and 583, or equivalent

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 645 - Programming Language Semantics**

Credits: 3
This course introduces basic concepts and techniques in the foundational study of programming languages. The central theme is the view of individual programs and whole languages as mathematical objects about which precise claims may be made and proved. Particular topics include operational techniques for formal definition of language features, type systems and type safety properties, polymorphism and subtyping, and foundations of object-oriented programming.
Prerequisites
CS 540, language processors.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CS 650 - Database Engineering

Credits: 3
Data models for network, hierarchical, object-oriented, and relational management information systems. Covers development (including internal structures) of a database system.

Prerequisites
CS 540, 571 and 583

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 652 - Computer Graphics

Credits: 3
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation.

Prerequisites
CS 583.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 658 - Networked Virtual Environments

Credits: 3
Cross-Listed with IT 658

Topics covered in lecture are: networked virtual environment overview, networking technology, network multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. The project consists of four segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using overlay multicast software. The course consists of 31 50-minute sessions plus a major Java programming project which will be presented and discussed in class and two
90-minute examinations. Lectures are recorded in Network EducationWare (NEW) format and are available for playback on a flexible schedule, which is necessary since the course is shared among institutions having different academic calendars.

**Prerequisites**

CS 555

---

**CS 662 - Computer Graphics Game Technologies**

Credits: 4

Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows.

**Prerequisites**

CS 652. Topics include modeling, rendering, and simulation in real time.

**Hours of Lecture or Seminar per week**

3

**Hours of Lab or Studio per week**

1

---

**CS 667 - Biometrics**

Credits: 3

**Cross-Listed with** IT 667

Basic principles and methods for automatic authentication of individuals. Technologies include among others face, fingerprint, and iris recognition, and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required.

**Prerequisites**

CS 580 or permission of the instructor.

---

**CS 668 - Computer Architecture Systems**

Credits: 3

Examines principles and practices relating computer architecture to programming execution and efficiency. Presents new approach that stresses performance and cost of architecture. Examines principles of compiler and OS implications, instructions sets, basic processors, pipelines, and memory-hierarchy. Topics may include RISC machines, cache memories, register usage, and vector machines.

**Prerequisites**

CS 540 or 571, or equivalent.

**Hours of Lecture or Seminar per week**

3
CS 671 - Advanced Operating Systems

Credits: 3
Advanced topics in design and implementation of microkernel-based, object-oriented, and distributed operating systems. Specific topics include support for interprocess communication, interaction between computer architecture and operating systems, distributed file systems, transactions, and distributed shared memory.

Prerequisites
CS 571, or permission of instructor

CS 672 - Computer System Performance Evaluation

Credits: 3
Theory and practice of analytical models of computer systems. Topics include queuing networks, single and multiple class mean-value analysis, models of centralized and client-server systems, software performance engineering, and web servers performance.

Prerequisites
CS 571 and MATH 351, or permission of instructor

CS 673 - Multimedia Computing and Systems

Credits: 3
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance.

Prerequisites
CS 571.
CS 675 - Distributed Systems

Credits: 3
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems.

Prerequisites
CS 571 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 680 - Natural Language Processing

Credits: 3
Explores principles of designing computer programs that respond appropriately to questions, commands, and statements expressed in human language, particularly English. Role of knowledge representation and linguistic theory. Students become familiar with current literature to implement a limited natural language processor.

Prerequisites
CS 540 and 580.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 681 - Designing Expert Systems

Credits: 3
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Focuses on study and use of relevant languages, environments, mathematics, and logic. Case studies of successful systems. Programming projects include development of tools or small-scale systems.

Prerequisites
CS 580.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
**CS 682 - Computer Vision**

Credits: 3  
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding.

**Prerequisites**  
CS 580 and 583.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**CS 683 - Parallel Algorithms**

Credits: 3  
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity.

**Prerequisites**  
CS 583; CS 635 recommended.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**CS 684 - Graph Algorithms**

Credits: 3  
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity.

**Prerequisites**  
CS 583.

**Hours of Lecture or Seminar per week**  
3  
**Hours of Lab or Studio per week**  
0

**CS 685 - Intelligent Systems for Robots**
Credits: 3
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment.

Prerequisites
One of CS 580, ECE 650, SYST 611 or 555, or equivalent.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 686 - Image Processing and Applications

Credits: 3
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images.

Prerequisites
CS 583 and either STAT 344 or MATH 351, or equivalent.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 687 - Advanced Artificial Intelligence

Credits: 3
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence.

Prerequisites
CS 580.

Notes
Major programming project required.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 688 - Pattern Recognition
Credits: 3
Cross-Listed with IT 688

Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and
decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality
reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks
topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Course
emphasizes experimental design, applications, and performance evaluation.

Prerequisites
CS 580 or equivalent.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 695 - Topics in Computer Science

Credits: 3
Special topics in computer science not occurring in regular computer science sequence.

Prerequisites
Completion of two core courses, and permission of instructor.

Notes
May be repeated for credit when subject distinctly different.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 697 - Independent Reading and Research

Credits: 1-3
In areas of importance but insufficient demand to justify a regular course, students may undertake a course of study under
supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list
as part of request for approval. Literature review, project report, or other written product usually required.

Prerequisites
Graduate standing; completion of at least two of core courses CS 540, 571, 580, and 583; and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
CS 700 - Quantitative Methods and Experimental Design in Computer Science

Credits: 3
Integrated treatment to models and practices of experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses of data. Involves one or more large-scale projects.

Prerequisites
STAT 344, at least two 600-level courses in computer science, and doctoral status.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CS 706 - Concurrent Software Systems

Credits: 3
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools.

Prerequisites
CS 571 and SWE 621 or 631, or equivalent

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 719 - Scaling Technologies for E-business

Credits: 3
Cross-Listed with IT 809

Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction.

Prerequisites
At least one operating system and one networking course, and admission to VSITE doctoral program.

Notes
Term paper and project required.

Hours of Lecture or Seminar per week
3
CS 732 - Software Maintenance and Reuse

Credits: 3
Cross-Listed with IT 822

Perfective maintenance, reuse of software components and patterns, evolving software systems, principles of object-oriented analysis and development. Presents issues regarding technologies supporting perfective software maintenance and reuse.

Prerequisites
CS/SWE 621 or equivalent, data structures, principles of modern programming, and discrete mathematics; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 735 - Concurrency

Credits: 3

Studies techniques, tools for specifying and verifying concurrent and distributed programs. Topics may include model checking, temporal logic, process algebra, and test generation. Automated verification tools used to specify and verify concurrent programs.

Prerequisites
CS 635 or 706, or equivalent.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 750 - Theory and Applications of Data Mining

Credits: 3
Cross-Listed with IT 750

Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges.

Prerequisites
CS 688 or permission of instructor.
Notes
Term project and topical review required.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 752 - Interactive Graphics Software

Credits: 3
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics.

Prerequisites
CS 652.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 753 - Parallel Computation

Credits: 3
Cross-Listed with IT 815

Covers topics illustrating contemporary thinking on architectures, application, development environments, algorithms, operating systems, language requirements, and performance.

Prerequisites
CS 635 or CSI 801.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 755 - Advanced Computer Networks

Credits: 3
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet.

Prerequisites
CS 555.
CS 756 - Performance Analysis of Computer Networks

Credits: 3
Analytical and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies.

Prerequisites
CS 555.

CS 771 - Neural Networks

Credits: 3
Cross-Listed with IT 817

Studies adaptive and competitive principles using distributed and parallel computation. Topics include background from statistics, control, adaptive signal processing, and neurosciences. Basic models, such as those suggested by Grossberg, Hopfield, and Kohonen, discussed in terms of analytical characteristics and applications. Neural networks assessed as universal approximators. Connections to fuzzy approach established through the Radial Basis Function approach. Presents applications to perception, knowledge-based systems, and robotics.

Prerequisites
CS 688, or permission of instructor.

CS 773 - Real-Time Systems Design and Development

Credits: 3
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving communication networks, operating systems, databases, and multimedia.
Prerequisites
CS 555 or CS 671 or permission of the instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 774 - Computational Vision

Credits: 3
Cross-Listed with IT 835

Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression.

Prerequisites
CS 68 and 686; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 775 - Advanced Pattern Recognition

Credits: 3
Cross-Listed with IT 844

Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes' theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation.

Prerequisites
CS 688 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CS 776 - Graphical Real-Time Simulation
Current research in advanced computer graphics, and applications in realistic real-time simulations. Topics include physically based modeling, real-time simulation, distributed interactive simulation (DIS), network virtual environments (NVE), and virtual reality (VR).

**Prerequisites**
CS 652 or IT 875.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 777 - Human-Computer Intelligent Interaction**

Credits: 3

Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications. Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing.

**Prerequisites**
CS 580, and 652 or 682; or permission of instructor.

**Notes**
Term project and topical review required.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CS 780 - Data Mining in Multimedia Databases**

Credits: 3

**Cross-Listed with** INFS 780

This course covers advanced algorithms for data management, learning, and mining large multimedia databases. Issues related to handling such data including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability to large datasets are discussed. Mining techniques and data types to be covered include texts/web, images, videos, DNA, temporal, spatial, spatiotemporal databases, graph mining, stream mining, and data visualization.

**Prerequisites**
INFS 755 or CS 750 or permission of instructor.

**Hours of Lecture or Seminar per week**
3
CS 782 - Machine Learning

Credits: 3
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning.

Prerequisites
CS 681, 687, or 688; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 785 - Knowledge Acquisition and Problem Solving

Credits: 3
Principles and major methods of basic stages of knowledge acquisition such as systematic elicitation of expert knowledge, knowledge base refinement, and knowledge base optimization in the context of general problem-solving methods. Includes case studies of successful knowledge acquisition and problem-solving systems, and projects involving development or application of knowledge acquisition tools for knowledge-based systems.

Prerequisites
CS 680, 681, or 687; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 795 - Advanced Topics in CS

Credits: 3
Advanced topics not occurring in regular sequence.

Prerequisites
Admission into computer science PhD program.

Notes
May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements.
CS 798 - Project Seminar

Credits: 3
Master's degree candidates undertake a project using knowledge gained in MS program.

Prerequisites
18 credits applicable toward MS in computer science.

Notes
Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science.

CS 799 - Thesis

Credits: 3-6
Original or expository work evaluated by committee of three faculty members.

Prerequisites
18 credits applicable toward MS in computer science.

CS 800 - Computer Science Colloquium

Credits: 1
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.

Prerequisites
Admission to CS PhD program.

Notes
This course introduces PhD students to research topics in computer science. This course can be taken twice for credit.
Grading
Students will receive a grade of satisfactory (S) or no credit (NC).

CS 803 - Doctoral Tutorial in Information Technology

Credits: 3
Individualized intensive study of information technology.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 804 - Doctoral Tutorial in Information Technology

Credits: 3
Individualized intensive study of information technology.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 811 - Research Topics in Machine Learning and Inference

Credits: 3
Cross-Listed with IT 811

Presents unifying principles that underlie diverse methods, paradigms, and approaches to machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems, and working on projects tailored to research interests.

Prerequisites
CS 580 or 681, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CS 818 - Topics in Computer Systems

Credits: 3
Cross-Listed with IT 818

Discussion of current research topics in computer systems. Topics vary according to faculty interest. Possible topics include peer-to-peer computing, high-performance distributed computing, sensor and ad hoc networks, autonomic computing, virtualization, and web services and middleware.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 850 - Research Topics in Parallel Computation

Credits: 3
Cross-Listed with IT 915

Discusses current research topics that vary according to student and faculty interest. Possible topics include formal models of concurrency, specification and design of parallel programming languages, logic programming in a parallel environment, and parallel distributed processing (neural networks).

Prerequisites
CS 815.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CS 880 - Research Topics in Artificial Intelligence

Credits: 3
Cross-Listed with IT 910

Special topics in artificial intelligence not occurring in regular computer science sequence.

Prerequisites
Graduate course in artificial intelligence.

Notes
Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs.

Hours of Lecture or Seminar per week
3
CS 884 - Advanced Topics in Computer Vision and Robotics

Credits: 3
Cross-Listed with IT 940

Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized.

Prerequisites
CS 682 or 685, or permission of instructor depending on topics offered.

Notes
Course may be repeated with change of topic.

CS 895 - Research Topics in CS

Credits: 3
Advanced topics not occurring in regular sequence.

Prerequisites
Admission into computer science PhD program, or permission of instructor.

Notes
May be repeated for credit when subject differs. Only one such course should be used for breadth requirements.

CS 990 - Dissertation Topic Presentation

Credits: 1
Cross-Listed with IT 990

Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty.
Prerequisites
Completion of all course requirements for PhD, or permission of instructor.

Notes
May be repeated with change of research topic, but credit toward doctoral degree is given once.

CS 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CS 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member in computer science.

Notes
May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CSI 501 - Introduction to Scientific Programming

Credits: 3
This course introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. The course is conducted through a combination of both lecture and interactive computer laboratory.

Prerequisites
Permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CSI 600 - Quantitative Foundations for Computational Sciences

Credits: 3
Cross-Listed with SYST 500

Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory.

Prerequisites
MATH 213 and 214.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 601 - Computational Science Tools I

Credits: 1
Introduces basic tools in computational science. Covers UNIX, editors, LaTeX, HTML, and graphics. Emphasizes application and use rather than theory. Substantial portion of instruction delivered via distance-learning web interface.

Prerequisites
Year of college calculus, and course in computer programming.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

CSI 602 - Computational Science Tools II

Credits: 1
Covers MATLAB, MAPLE, and GNUPlot. Emphasizes application and use rather than theory. Substantial portion of instruction delivered via distance-learning web interface.

Prerequisites
CSI 601, and knowledge of matrix algebra. Introduces basic tools in computational science.

Notes
Not applicable to 48-credit course total for CSI PhD.
CSI 606 - Scientific Graphics and Visualization Tools

Credits: 1
Introduces use of scientific visualization tools for data analysis. Teaches use of specific packages on rotating basis. Packages include PV-WAVE, S-Plus, SV, XMGR, and pnm tools.

Prerequisites
CSI 601, or permission of instructor.

Notes
Not applicable to 48-credit course total for CSI PhD.

CSI 607 - Database Tools for Scientists

Credits: 1
Covers relational model used in Oracle and other database packages. Includes database design concepts, table operations, triggers, sequences, and introduction to structured query language (SQL).

Prerequisites
CSI 601 and 602, or permission of instructor. Introduces database tools.

Notes
Not applicable to 48-credit course total for CSI PhD.

CSI 610 - Introduction to Computational Sciences

Credits: 3
Covers advanced numerical methods, computer architecture, and scientific software development. Includes software design, construction, and validation techniques commonly used in industry. Also introduces high-performance computing.

Prerequisites
CSI 601, 602, 603, 604, 605, and 700; or permission of instructor.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CSI 615 - Quantum Computation**

Credits: 3
Introduces field of quantum computation. Emphasizes scientific principles involved and presentation of strengths and weaknesses of approach. Topics include basic quantum physics and quantum algorithms.

Prerequisites
Undergraduate course in quantum physics, and undergraduate degree in physical or computer sciences, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CSI 632 - Global Ecology**

Credits: 3
Intensive review to begin research in global change. Covers basic principles of physiological ecology; population dynamics; dynamics of ecological communities and ecosystems; biogeography; biological diversity; and dynamics of biosphere, including effects of life on atmosphere, oceans, and solid surfaces.

Prerequisites
General chemistry, general physics, introductory statistics, and calculus.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

**CSI 638 - The Policy Process for Scientists**

Credits: 3
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology.

Prerequisites
Graduate standing.

**CSI 639 - Ethics in Scientific Research**

Credits: 3
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority.

**CSI 654 - Data and Data Systems in the Physical Sciences**

Credits: 3
Introduces data issues associated with modern physical sciences. Examines data access, formats, browsing, analysis, visualization, and data information systems in federated environments. Uses examples from physical sciences, including astronomy and space sciences; Earth sciences; Earth observing and other fields of physics; and model output data and associated special issues. Introduces mathematical techniques particularly important for large databases.

**Prerequisites**
Competency in programming at CSI 601-607 level, or permission of instructor.

**CSI 655 - Atmospheric Physics I**

Credits: 3
**Cross-Listed with** PHYS 575

Introduction to basic physical and chemical processes that operate in the Earth’s atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

**Prerequisites**
PHYS 260, 262, and 305, or equivalent.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**CSI 659 - Dispersal Methods of Hazardous Releases**

Credits: 3
Covers physics of aerosols; engineering, mechanics of building ventilation systems; and mechanical dissemination utilizing hand-held, automatic, vehicle, and truck mounted systems. Also discusses basic concepts, theories, and models of pollutant dispersal in atmosphere, and related atmospheric systems affecting dispersal of biological agents.

**Prerequisites**
CSI 655, or permission of instructor.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**CSI 660 - Space Instrumentation and Exploration**

Credits: 3
**Cross-Listed with** ASTR 535

Surveys instruments, devices, and methods for space and planetary exploration. Covers remote sensing of Earth and other solar system bodies; and planned manned and unmanned missions by the United States and other countries.

**Prerequisites**
PHYS 262, MATH 213, or equivalent; or permission of instructor.

**Hours of Lecture or Seminar per week**
3
**Hours of Lab or Studio per week**
0

**CSI 661 - Astrophysics**

Credits: 3
**Cross-Listed with** ASTR 530

Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.
Prerequisites
PHYS 303, 305, 308; MATH 214.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 662 - Space Weather

Credits: 3
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere. Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances.

Prerequisites
PHYS 303, 305, 307, and MATH 213, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 670 - Economic Systems Design

Credits: 3
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics.

Prerequisites
Course in linear and nonlinear optimization, and course in linear algebra; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 672 - Statistical Inference

Credits: 3
Cross-Listed with STAT 652

Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum-likelihood estimation, asymptotic theory, Bayesian methods, likelihood-ratio tests, statistical decision theory, sequential methods.
CSI 674 - Bayesian Inference and Decision Theory

Credits: 3

Cross-Listed with STAT 664/SYST 664

Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Prerequisites
STAT 544 or CSI 672, or equivalent.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 678 - Times Series Analysis and Forecasting

Credits: 3

Cross-Listed with STAT 658

Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques.

Prerequisites
STAT 544 or CSI 672, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CSI 685 - Fundamentals of Materials Science

Credits: 3
Covers fundamental concepts, methods, and applications of materials science; structure of modern materials such as metallic alloys and compounds, ceramic materials, semiconductors, polymers, and nanostructured materials; materials properties including mechanical, thermal, and electric; experimental methods of materials characterization; application of computers in materials science; and elements of materials design.

Prerequisites
Undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering, or related sciences; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 687 - Solid State Physics and Applications

Credits: 3
Cross-Listed with PHYS 512
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Prerequisites
PHYS 502 or equivalent.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 700 - Numerical Methods

Credits: 3
Cross-Listed with MATH 685/OR 682
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation.

Prerequisites
MATH 203 and 214, and some programming experience.

Hours of Lecture or Seminar per week
3
CSI 701 - Foundations of Computational Science

Credits: 3
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it.

Prerequisites
Competency in UNIX and programming at CSI 601-604 level, and CSI 700; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 702 - High-Performance Computing

Credits: 3
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems.

Prerequisites
CSI 700 and 701; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 703 - Scientific and Statistical Visualization

Credits: 3
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena, and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used.

Prerequisites
STAT 554 or CS 652, or permission of instructor.
CSI 709 - Topics in Computational Sciences and Informatics

Credits: 3
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses.

Prerequisites
Admission to PhD program, and permission of instructor.

Notes
May be repeated for credit as needed.

CSI 710 - Scientific Databases

Credits: 3
Cross-Listed with IT 864

Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites.

Prerequisites
INFS 614 or equivalent, or permission of instructor.

CSI 711 - Chemical Thermodynamics and Kinetics

Credits: 3
Cross-Listed with CHEM 633

Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms, and application of statistical thermodynamics to theory of elementary reaction rates.
Prerequisites
CHEM 331 and 332.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 712 - Introduction to Solid Surfaces

Credits: 3
Cross-Listed with CHEM 728

Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology.

Prerequisites
CHEM 422 or equivalent. Introduces properties of solid surfaces.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 713 - Quantum Chemistry

Credits: 3
Cross-Listed with CHEM 732

Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces.

Prerequisites
CHEM 332.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 714 - Spectroscopy and Structure

Credits: 3
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics.
CSI 715 - Quantum Complexity Theory

Credits: 3
Discusses fundamental aspects of complexity theory and its applications from perspective of quantum physics. Explores current research in emerging field of quantum complexity theory, and discusses related issues in quantum algorithms.

Prerequisites
CSI 615 or equivalent, or permission of instructor.

CSI 716 - Quantum Information Theory

Credits: 3
Introduces quantum information theory and its practical applications to information processing and secure communications. Emphasizes applications involving commercial and defense systems.

Prerequisites
CSI 615, and CSI 783 or 784; or permission of instructor.

CSI 717 - Quantum Computer Programming

Credits: 3
Covers methods for programming quantum computers. Topics include quantum computing concepts, currently known algorithms for quantum computers, denotational semantics, existing languages for quantum computers, application of logic programming to quantum computers, and programming for different types of novel computer architectures.

Prerequisites
CSI 615 or equivalent, or permission of instructor.
CSI 718 - Quantum Computer Realization

Credits: 3
Introduces physical implementation of quantum computation, and practical applications to developing scalable quantum computers. Special emphasis on various schemes for achieving practical quantum computers.

Prerequisites
CSI 615, and 784 or equivalent; or permission of instructor.

CSI 719 - Topics in Computational Chemistry

Credits: 3
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 720 - Fluid Mechanics

Credits: 3
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows.

Prerequisites
CSI 700 and 780; or permission of instructor.
CSI 721 - Computational Fluid Dynamics I

Credits: 3
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/full potential equation, and simple Euler solvers. Includes two major projects Laplace solver, and 2-D Euler solver on unstructured grids. Students expected to write their own codes.

Prerequisites
Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

 CSI 722 - Computational Fluid Dynamics II

Credits: 3
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes.

Prerequisites
CSI 721 or permission of instructor.

 CSI 723 - Fluid Mechanics II

Credits: 3
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics.

Prerequisites
CSI 720 or permission of instructor.
CSI 729 - Topics in Continuum Systems

Credits: 3
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 739 - Topics in Bioinformatics

Credits: 3
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 740 - Numerical Linear Algebra

Credits: 3
Cross-Listed with MATH 625

Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value...
decomposition, and applications.

**Prerequisites**
MATH 203 and some programming experience.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSI 742 - The Mathematics of the Finite Element Method**

Credits: 3
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects.

**Prerequisites**
MATH 446 or 685, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences**

Credits: 3
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSI 746 - Wavelet Theory**

Credits: 3
Cross-Listed with MATH 772
Studies theory and computational aspects of wavelets and wavelet transform. Emphasizes computational aspects of wavelets. Defines Fast Wavelet Transform in one and two dimensions, and develops appropriate numerical algorithms, and theory of wavelet bases on the real line. Covers multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Prerequisites
Knowledge of convolution and Fourier transforms of sequences; some familiarity with Hilbert space theory helpful but not required; knowledge of scientific programming language.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 747 - Nonlinear Optimization and Applications

Credits: 3
Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization.

Prerequisites
MATH 213 and 216, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 748 - Symbolic Computation

Credits: 3
Provides mathematical and computational background for computational algebraic geometry and its applications. Includes algebra, geometry, algorithms, concept of Groebner bases, automatic theorem proving, and serial and parallel algorithms and their complexity. Topics are related to applications in engineering and computer science. Students expected to complete projects.

Prerequisites
Undergraduate degree in scientific discipline and course in abstract algebra.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 749 - Topics in Computational Mathematics
Credits: 3
Selected topics in computational mathematics not covered in fixed-content computational mathematics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week
3

CSI 750 - Earth Systems and Global Changes

Credits: 3
Introduces global system interactions responsible for global environmental change. Discusses natural causes of past and present global changes, and how human activities affect them; and ecological and human consequences of global changes. Topics include climate and hydrological systems, global warming, deforestation, ozone depletion, ecological system dynamics, introduction to climate and global change monitoring, satellite instrumentation and calibration, and model predictions.

Prerequisites
Course in ecology, environmental geology, or atmospheric physics; or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 754 - Earth Science Data and Advanced Data Analysis

Credits: 3
Cross-Listed with EOS 754

Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Prerequisites
EOS 753 or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0
CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing

Credits: 3  
Cross-Listed with EOS 757

Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Prerequisites  
CSI 753 or permission of instructor.

Hours of Lecture or Seminar per week  
3

Hours of Lab or Studio per week  
0

CSI 758 - Visualization and Modeling of Complex Systems

Credits: 3

Covers elements of modeling and analysis of Earth and space sciences data and systems. Concentrates on sample projects and student-initiated projects to use visualization and graphical analysis techniques as they apply to modeling of complex data sets and systems. Uses several different analysis and visualization packages. Spacecraft data sets from the Naval Research Laboratory (NRL) Backgrounds Data Center and other NRL data sets are available for course projects; perusal of web data sets also possible. Modeling and analysis accompanied by appropriate readings from current literature.

Prerequisites  
Permission of instructor.

Hours of Lecture or Seminar per week  
3

Hours of Lab or Studio per week  
0

CSI 761 - N-Body Methods and Particle Simulations

Credits: 3  
Cross-Listed with ASTR 761

Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Prerequisites  
PHYS 613/CSI 780 and CSI 700; or permission of instructor.

Hours of Lecture or Seminar per week  
3
CSI 763 - Statistical Methods in Space Sciences

Credits: 3
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research.

Prerequisites
ASTR 530 or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 764 - Computational Astrophysics

Credits: 3
Cross-Listed with ASTR 764

Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-lanck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Prerequisites
ASTR 530.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 765 - High-Energy and Accretion Astrophysics

Credits: 3
Cross-Listed with ASTR 765

Overview of atomic and nuclear physics. Covers nuclear reactions of use to high-energy astrophysics; radiation processes in cosmic plasmas, emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic
rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

**Prerequisites**
PHYS 502, ASTR 530, and PHYS 613/CSI 780; or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**CSI 766 - Relativity and Cosmology**

Credits: 3  
**Cross-Listed with** ASTR 766

Covers special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

**Prerequisites**
ASTR 530 and MATH 314, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**CSI 769 - Topics in Space Sciences**

Credits: 3  
**Cross-Listed with** ASTR 769

Selected topics in space sciences not covered in fixed-content space sciences courses.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for credit as needed.

**CSI 771 - Computational Statistics**
Credits: 3

**Cross-Listed with** STAT 751

Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

**Prerequisites**
STAT 544, 554, and 652.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CSI 772 - Statistical Learning**

Credits: 3
The course focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

**Prerequisites**
CSI 672 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CSI 773 - Statistical Graphics and Data Exploration**

Credits: 3

**Cross-Listed with** STAT 663

Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit.

**Prerequisites**
300-level course in statistics; STAT 554 strongly recommended.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
CSI 775 - Computational Models of Probabilistic Reasoning

Credits: 3
Cross-Listed with OR 719/STAT 719

Introduces theory and methods for building computationally efficient software agents that reason, act, and learn environments characterized by noisy and uncertain information. Covers methods based on graphical probability and decision models. Students study approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Provides practical model building experience. Students apply what they learn to semester-long project of their own choosing.

Prerequisites
STAT 652 or 664, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 776 - Stochastic Differential Equations

Credits: 3
Cross-Listed with IT 746

Introduces modern theory of stochastic calculus. Covers stochastic integrals, martingales, counting processes, diffusion processes, and Ito-type processes in general. Considers applications of these methods to engineering, biology, and economics.

Prerequisites
STAT 652, ECE 630 or 632, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 777 - Principles of Knowledge Mining

Credits: 3

Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge, and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts.

Prerequisites
INFS 614 or equivalent, or permission of instructor.
CSI 779 - Topics in Computational Statistics

Credits: 3
Selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 780 - Computational Physics and Applications

Credits: 3
Cross-Listed with PHYS 613

Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics.

Prerequisites
PHYS 502; FORTRAN, C, or C++ programming; or permission of instructor.

CSI 781 - Plasma Science

Credits: 3
Study of ionized matter, theory, and some computation with application to astrophysics, industrial plasma processing, magnetosphere, and ionosphere problems. Vlasov and fluid equations derived and applied in plasma science, including study of plasmas with and without magnetic fields.
Prerequisites
PHYS 513 or PHYS 722/CSI 785; PHYS 711/CSI 782/CHEM 730; or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 782 - Statistical Mechanics for Modeling and Simulation

Credits: 3
Cross-Listed with PHYS 711/CHEM 730

Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes.

Prerequisites
PHYS 502 and CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 783 - Computational Quantum Mechanics

Credits: 3
Cross-Listed with PHYS 736/CHEM 736

Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Prerequisites
PHYS 502 and PHYS 613/CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 786 - Molecular Dynamics Modeling

Credits: 3
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and
condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble
distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure.
Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and
introduction to cellular automata.

Prerequisites
PHYS 613/CSI 780 or CHEM 633/CSI 711, or permission of instructor.

Hours of Lecture or Seminar per week
3

CSI 787 - Computational Materials Science

Credits: 3
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface
science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model,
mesoscopic systems, and liquids.

Prerequisites
PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Hours of Lecture or Seminar per week
3

CSI 788 - Simulation of Large-Scale Physical Systems

Credits: 3
Cross-Listed with PHYS 728

Study of diverse, large-scale physical systems emphasizing modeling and simulation of these multifaceted systems. Several
projects are undertaken, drawn from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature
plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology.

Prerequisites
PHYS 613/CSI 780 and CSI 700, or permission of instructor.

Hours of Lecture or Seminar per week
3

CSI 789 - Topics in Computational Physics

CSI 780 - Computational Physics

Credits: 3
Cross-Listed with PHYS 780

Selected topics in computational physics not covered in fixed-content computational physics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week
3

CSI 796 - Directed Reading and Research

Credits: 1-6

Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week
0

CSI 798 - Research Project

Credits: 3

Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisites
12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0
CSI 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/IP

CSI 819 - Quantum Information Science Topics

Credits: 3
Selected topics in quantum information science not covered in fixed-content computational sciences courses.

Prerequisites
Permission of instructor.

Notes
Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSI 853 - Atmospheric Transport and Dispersion

Credits: 3
Develops basic concepts, theories, and models describing pollutant dispersal in atmosphere. Discusses related atmospheric systems affecting transport, transformation, and removal of air pollutants, with strong emphasis on fundamental issues associated with hazard prediction. Content essential for students engaging in graduate research in atmospheric transport and dispersion modeling.

Prerequisites
CLIM 710 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CSI 854 - Hyperspectral Imaging Applications

Credits: 3
Cross-Listed with EOS 840

Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics.

Prerequisites
EOS 754 or permission of instructor.

Prerequisites/Corequisites
CSI 753 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSI 873 - Computational Learning and Discovery

Credits: 3

Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest, and work on projects involving state-of-the art systems.

Prerequisites
CS 580 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

CSI 876 - Measure and Linear Spaces

Credits: 3
Cross-Listed with IT 876/STAT 876

Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Prerequisites
IT 776 or permission of instructor.
CSI 877 - Geometric Methods in Statistics

Credits: 3
Cross-Listed with IT 877/STAT 877

Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Prerequisites
STAT 751 or permission of instructor.

CSI 885 - Atomistic Modeling of Materials

Credits: 3

Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations, and provides hands-on experience through numerous examples and homework assignments based on simulation package SOLD (Simulator of Lattice Defects). Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture).

Prerequisites
CSI 685, 700, and 786; or permission of instructor.

CSI 888 - Topics in Quantum Systems

Credits: 3

Selected topics in quantum systems in physics and chemistry not covered in fixed-content courses in quantum mechanics. Possible topics are new spectroscopic methods, density functional theory, energy transfer and fluorescence, nuclear magnetic resonance, Mossbauer spectroscopy, advanced computational considerations in atomic or molecular structure, nuclear scattering
theory, quantum considerations in condensed matter problems, and quantum gravity.

**Prerequisites**
PHYS 736/CSI 783 or PHYS 732/CSI 784; or permission of instructor.

**Notes**
May be repeated for credit as needed.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CSI 898 - Research Colloquium in Computational Sciences and Informatics**

Credits: 1
Presentations in specific research areas in computational sciences and informatics by SCS faculty and staff members, and professional visitors.

**Notes**
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
0

**Grading**
S/NC

---

**CSI 899 - Colloquium in Computational Sciences and Informatics**

Credits: 1
Presentations in a variety of areas of computational sciences and informatics by SCS faculty and staff members, and professional visitors.

**Notes**
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
0

**Grading**
S/NC

---

**CSI 909 - Advanced Topics in Computational Sciences and Informatics**
Credits: 3
Covers selected topics in computational sciences and informatics not covered in fixed-content courses.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for credit as necessary.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CSI 972 - Mathematical Statistics I**

Credits: 3
**Cross-Listed with** IT 972/STAT 972

Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

**Prerequisites**
STAT 652 or equivalent.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CSI 973 - Mathematical Statistics II**

Credits: 3
**Cross-Listed with** IT 973/STAT 973

Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions.

**Prerequisites**
CSI 972.

**Notes**
Continuation of CSI 972.

**Hours of Lecture or Seminar per week**
3
CSI 976 - Statistical Inference for Stochastic Processes

Credits: 3

Cross-Listed with IT 976

Covers modern theory of parameter estimation and hypothesis testing for stochastic processes, counting processes with random intensities, and solutions to stochastic differential equations driven by martingales. Considers applications to engineering, biology, and economics.

Prerequisites
CSI 776 or permission of instructor.

CSI 978 - Statistical Analysis of Signals

Credits: 3

Cross-Listed with IT 978

Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigen-value processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking.

Prerequisites
STAT 544 and 658, or equivalent.

CSI 979 - Advanced Topics in Computational Statistics

Credits: 3

Cross-Listed with IT 979

Covers selected topics in computational statistics not covered in fixed-content computational statistics courses.

Prerequisites
Permission of instructor.
CSI 986 - Advanced Topics in Large-Scale Physical Simulation

Credits: 3
Covers simulation of physical systems not covered in fixed-content physical simulation courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 991 - Seminar in Scientific Computing

Credits: 1
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation.

Notes
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

CSI 996 - Doctoral Reading and Research

Credits: 1-6
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.
Prerequisites
Admission to doctoral program, and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CSI 998 - Doctoral Dissertation Proposal

Credits: 1-12

Prerequisites
Permission of advisor.

Notes
Course may be repeated as needed, but no more than 12 credits of CSI 998 may be applied to doctoral degree.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/IP

CSI 999 - Doctoral Dissertation

Credits: 1-12
Involves doctoral dissertation research under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy.

Notes
May be repeated as needed, but no more than 24 credits in CSI 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/IP

CSS 600 - Introduction to Computational Social Science
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 605 - Object-Oriented Modeling in Social Science**

Credits: 3
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes.

**Prerequisites/Corequisites**
CSS 600, or approval by instructor and program director.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 610 - Computational Analysis of Social Complexity**

Credits: 3
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods).

**Prerequisites/Corequisites**
CSS 600, or permission of instructor

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 620 - Origins of Social Complexity**

Credits: 3
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica.

**Prerequisites/Corequisites**
CSS 600, or permission of instructor

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 625 - Complexity Theory in the Social Sciences**

Credits: 3
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from-equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics.

**Prerequisites/Corequisites**
CSS 600.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 630 - Comparative Computational Social Science**

Credits: 3
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics.

**Prerequisites/Corequisites**
CSS 600, or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CSS 635 - Cognitive Foundations of Computational Social Science**

Credits: 3
Examines cognitive foundations and information processing in computational social agents, and compares to comparable human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project.

**Prerequisites/Corequisites**
CSS 600 and 610, or permission of instructor.

**Hours of Lecture or Seminar per week**
3
CSS 640 - Human and Social Evolutionary Complexity

Credits: 3
Examines long-term evolution of human and societal complexity from global, cross-cultural perspective, emphasizing computational aspects leading to today's globalization. Global history from the computational social science perspective.

Prerequisites/Corequisites
CSS 600 and 620, and permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSS 643 - Land-Use Modeling Techniques and Applications

Credits: 3
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Prerequisites/Corequisites
CSS 600, GEOG 550, or permission of instructor

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM.

Prerequisites/Corequisites
GEOG 631 or CSS 600, or permission of instructor.

Notes
CSS 600 may be taken concurrently.

Hours of Lecture or Seminar per week
3
CSS 650 - Physics Methods for Analyzing Social Complexity

Credits: 3
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems.

Prerequisites/Corequisites
CSS 600, and permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSS 655 - Social Systems Dynamics

Credits: 3
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict.

Prerequisites/Corequisites
CSS 600

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSS 660 - Computational Social Science of Spacefaring Civilization

Credits: 3
Focuses on goals, resources, history, and modeling issues concerning human and social dimensions of space program using CSS. Design and development of socially viable human communities in extreme environments.

Prerequisites/Corequisites
CSS 600 and 610, and permission of instructor

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CSS 692 - Social Network Analysis

Credits: 3
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena.

Prerequisites/Corequisites
CSS 600

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSS 739 - Topics in Computational Social Science

Credits: 3
Selected topics in computational social science not covered in fixed-content computational social science courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSS 796 - Directed Reading and Research

Credits: 3
Reading and research on specific topic in computational social science under direction of a faculty member.

Prerequisites
Permission of instructor.

Notes
May be repeated as necessary.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
CSS 798 - Research Project

Credits: 3
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisites
12 graduate credits from core requirements, and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CSS 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits from CSS core, and permission of instructor.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/IP

CSS 898 - Research Colloquium in Computational Social Science

Credits: 1
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes
May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

CSS 899 - Colloquium in Computational Social Science
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes
May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0

CSS 909 - Advanced Topics in Computational Social Science

Credits: 3
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as necessary.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CSS 996 - Doctoral Reading and Research

Credits: 1-12
Reading and research on specific topic in computational social science under direction of faculty member.

Prerequisites
Admission to doctoral program, and permission of instructor.

Notes
May be repeated as necessary.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CSS 998 - Doctoral Dissertation Proposal
Credits: 1-12
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated as needed, but no more than 12 credits of CSS 998 may be applied toward satisfying doctoral degree requirements.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

**Grading**
S/IP

---

**CSS 999 - Doctoral Dissertation**

Credits: 1-12
Doctoral dissertation research under direction of dissertation director.

**Prerequisites**
Approval of dissertation proposal.

**Notes**
May be repeated as needed, but no more than 24 credits in CSS 998 and 999 may be applied toward satisfying doctoral degree requirements.

**Hours of Lecture or Seminar per week**
0

**Hours of Lab or Studio per week**
0

---

**CTCH 601 - The Community College**

Credits: 3
Studies institutional character of the community college, including history, purpose, clientele, organization, finance, and social function. Studies issues currently faced by community colleges.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**CTCH 602 - College Teaching**
Credits: 3
Describes issues that affect teaching and learning, and provides basic tools to use in college classroom. Teaches how to plan course, develop syllabus, promote learning among diversity of students, and implement classroom assessment techniques.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CTCH 603 - Technology in Higher Education**

Credits: 3
Overview of technology issues in higher education and hands-on experience with select technology tools to enhance productivity and classroom and online learning. Examines issues related to using technology in administration, teaching and learning, and guides in developing policies and effective technology-enhanced learning activities for students.

**Prerequisites**
Basic familiarity with computer operations

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CTCH 604 - The Scholarship of Teaching and Learning**

Credits: 3
Overview of the movement in higher education in scholarship of teaching and learning. Focuses on ways students learn, how learning can be improved, and different methods of conducting research into teaching and learning.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

**CTCH 605 - Curriculum and Program Design and Assessment**

Credits: 3
Prepares for designing, implementing, and assessing new courses, curricula, and programs. Examines relationships of courses and curricula to larger programs and institutional goals. Explores program planning and implementation such as documenting need, generating cost estimates, and assembling strong case for new programs.

**Prerequisites**
CTCH 601 or 602, and 603.

**Hours of Lecture or Seminar per week**
3
CTCH 606 - Diversity in Higher Education

Credits: 3
Explores instructional interactions and communication strategies for diverse learner populations. Includes discussion of sociological, behavioral, and cognitive theory on culture.

Hours of Lecture or Seminar per week
3

CTCH 621 - Higher Education in the United States

Credits: 3
History of higher education from colonial period to the present. Examines philosophic, political, social, and economic forces that have influenced development. Reviews today's issues and challenges.

Hours of Lecture or Seminar per week
3

CTCH 622 - Organization and Administration in Higher Education

Credits: 3
Provides concepts of organization and administration in contemporary institutions from macro to micro perspectives. Studies theory and practices of the organization as it relates to governance, structure, and management of the institution.

Hours of Lecture or Seminar per week
3

CTCH 624 - Finance and Fiscal Management in Higher Education

Credits: 3
Overview of higher education finance and fiscal management.

Hours of Lecture or Seminar per week
3
CTCH 626 - Assessment in Higher Education

Credits: 3
Focuses on political and historical context of assessment in higher education, and teaches strategies for classroom, program, and institutional assessment. Develops skills in survey and focus group research, and teaches how to develop and implement assessment plan.

CTCH 641 - Introduction to Counseling

Credits: 3
Introduces profession and its practice in various settings. Examines history and development of counseling; national associations; ethical code; standards for preparation and credentials; and roles, functions, and responsibilities.

CTCH 643 - Counseling Theory and Practice in Higher Education

Credits: 3
Study of historical contemporary approaches to counseling. Emphasizes applications of theoretical models as appropriate for higher education.

CTCH 644 - Student Services in Higher Education

Credits: 3
Focuses on development and organization of student personnel programs and services in institutions of higher learning. Covers philosophy, methods, and techniques.
### CTCH 645 - The Contemporary College Student

Credits: 3  
Analyzes changing demographics, barriers, and developmental issues facing college students. Studies impact of college environment on student development, and interaction between students of varying subcultures and the environment. Examines technology issues and their impact.

### CTCH 685 - Practicum

Credits: 3  
Serves as an essential part of the certificate and MAIS programs. Supervised on-the-job experience in approved college or university setting or public agency involved in higher education. Develops skills applicable to college-based teaching or higher education administration or policy. Approval of practicum coordinator needed one semester before registration.

**Prerequisites**  
Admission to certificate, MAIS/CCT or MAIS/Higher Education program; approval of advisor and practicum coordinator; 12 credits of core requirements; and 3 additional credits.

**Notes**  
Minimum 150 hours of work and participation in internship seminar.

### CTCH 792 - Special Topics in Higher Education

Credits: 1-6  
Covers current issues in teaching and learning in higher education.

**Prerequisites**  
Admission to doctoral program, or permission of instructor.

**Notes**  
May be repeated for credit when topic is different.
CTCH 821 - History of Higher Education in the United States

Credits: 3
Key issues and moments in the history of higher education are examined as a way to understand current structures, cultures, policies, and purposes. Historical perspective will also be used to consider the near future of higher education. Students will examine current trends and possible futures for a specific topic by doing historical research on the issue.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CTCH 826 - Advanced Institutional and Program Assessment in Higher Education

Credits: 3
Examination of educational assessment and evaluation, practices, and methods. Students critique and design an evaluation study and an evaluation report. Reviews ethical issues and impact of assessment and evaluation for students, employees, and programs.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CTCH 830 - Ethics in Higher Education: Personal, Organizational, and Institutional Realities

Credits: 3
Explores theories, definitions, and applications of ethics across multiple higher education settings, with particular attention to critical theory contributions. Includes an in-depth analysis of major complex ethical issues in higher education settings using ethical frameworks.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CTCH 885 - Doctoral Internship in College Teaching and Administration
Credits: 3
Students must contact the program at least one semester before enrolling. Supervised internship at community college, four-year college/university, or nonteaching higher-education setting such as government agency or administrative office. Develops skills applicable to college-based teaching or higher education administration or policy.

Prerequisites
Admission to doctoral program, approval of advisor and internship coordinator, 18 credits of graduate course work

Notes
Minimum 180 hours of work and participation in internship seminar.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
0
Grading
S/NC

CTCH 897 - Directed Reading in Higher Education

Credits: 1-6
Independent reading on topic agreed on by student and instructor.

Prerequisites
Admission to doctoral program and permission.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0

CTCH 998 - Doctoral Dissertation Proposal

Credits: 1-3
Contact program for permission to register. Work on research proposal that forms basis for doctoral dissertation.

Prerequisites
Completion of at least one internship and all other course work and qualifying exams.

Hours of Lecture or Seminar per week
0
Hours of Lab or Studio per week
0
Grading
S/NC

CTCH 999 - Doctoral Dissertation
Credits: 1-12
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisites
CTCH 998, two internships, and appointed dissertation committee.

Hours of Lecture or Seminar per week
0

Hours of Lab or Studio per week
0

Grading
S/NC

CULT 320 - Globalization and Culture

Credits: 3
Examines relationship between cultures and globalization through texts and points of view. Starting from development of capitalism, looks at age of imperialism and colonialism, finishing in present. Considers how globalization affects dynamics of cultural change. Emphasizes extraordinary role of new media and technologies in defining and shaping cultural spaces in which people live.

Prerequisites
30 credits; GLOA 101 or SOCI 120.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CULT 802 - Histories of Cultural Studies

Credits: 3
Historical survey of principal works and theories of cultural studies. Provides overview of contemporary situation of cultural studies and assesses possibilities for future development.

Prerequisites
Admission to program, MA feeder track, or permission of instructor

Notes
Required of all students.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CULT 806 - Research Seminar in Cultural Studies
CULT 808 - Student/Faculty Colloquium in Cultural Studies

Credits: 1
Forum for presentation of original and current research in cultural studies.

Prerequisites
Admission to program, or permission of instructor.

Notes
Students register for 1 credit per semester over a three-semester period.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
0

CULT 810 - Culture and Political Economy

Credits: 3
Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mill, Polanyi, Sahlins, A. Smith, and Weber.

Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CULT 812 - Visual and Performance Culture
Credits: 3
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre.

Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CULT 814 - Gender and Sexuality

Credits: 3
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender.

Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CULT 816 - Science/Technology

Credits: 3
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour.

Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CULT 818 - Social Institutions

Credits: 3
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements.
Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CULT 820 - After Colonialism: Race, Ethnicity, Nationalism

Credits: 3
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies.

Prerequisites
Admission to program, or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

CULT 860 - Special Topics in Cultural Studies

Credits: 1-3
Specialized interdisciplinary topics in cultural theory and analysis.

Prerequisites
Admission to program, or permission of instructor.

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week
1-3

Hours of Lab or Studio per week
0

CULT 870 - Directed Readings

Credits: 3
Intensive reading course to develop comprehensive coverage for specific fields as agreed on in with advisors.

Notes
May be repeated.
CULT 880 - Independent Study

Credits: 1-3
Reading and research on specific topic, resulting in a written project.

Notes
May be repeated.

CULT 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for doctoral dissertation. Students must have completed all cultural studies course work, fulfilled foreign language requirement, and passed comprehensive exam.

Notes
Course may be repeated once for credit.

CULT 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisites
Completion of CULT 998, and public presentation of dissertation proposal.

Grading
S/NC
CVPA 101 - Arts Pass

Credits: 2
Introduction to appreciation of the arts through lecture, demonstration in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions, and develop analytical skills through written journal and discussion.

Notes
May be repeated for total 4 credits.

Hours of Lecture or Seminar per week
2

Hours of Lab or Studio per week
0

CVPA 102 - Experiencing the Arts

Credits: 3
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks.

Notes
Not repeatable.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
2

Grading
S/NC

CVPA 105 - Special Topics in the Arts

Credits: 1-3
Exploration of topical studies on the arts.

Notes
Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week
1-3

Hours of Lab or Studio per week
0
CVPA 305 - Seminar in Arts Management

Credits: 3
Covers planning, programming, presentation, funding, and communications in managing visual and performing arts. Includes guest speakers, case analyses, and semester-long individual and group projects.

Prerequisites
Junior standing, admission to arts administration minor, or permission of instructor.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CVPA 308 - Cross-Cultural Arts Appreciation

Credits: 3
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts.

Notes
Subject matter varies. May be repeated for maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

CVPA 399 - Special Topics in the Arts

Credits: 1-6
In-depth presentation and exploration of topical studies on the arts.

Notes
Subject matter varies. May be repeated for maximum 24 credits when taken under different topics.

Hours of Lecture or Seminar per week
1-6

CVPA 430 - Topics in Arts and Wellness

Credits: 1-3
In-depth presentation and exploration of topical studies in arts and wellness or related areas such as injury prevention,
performance enhancement, and health and wellness training.

**Prerequisites**
Junior standing, or permission of instructor.

**Notes**
Topic depends on instructor. May be repeated for up to 9 credits if taken under different topics.

**CVPA 489 - Field Experience in the Arts**
Credits: 3-6
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment.

**Prerequisites**
Junior standing; completion of 6 credits in CVPA courses in area of residency; CVPA 305; or permission of instructor.

**Notes**
May be repeated for maximum 6 credits.

**CVPA 499 - Research/Performance/Topics in the Arts**
Credits: 3-6
Advanced research, performance, or exploration of topical studies in arts.

**Notes**
May be repeated for maximum 6 credits.

**CVPA 530 - Topics in Arts and Wellness**
Credits: 1-3
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention,
performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor.

**Prerequisites**
90 hours or permission of the instructor.

**Notes**
May be repeated up to 9 credits if taken under different topics.

**Hours of Lecture or Seminar per week**
1-3

**Hours of Lab or Studio per week**
0

---

**CVPA 592 - Special Topics in Interdisciplinary Arts Studies**

Credits: 1-3
Topics in interdisciplinary arts.

**Prerequisites**
Undergraduate degree or equivalent, or permission of instructor.

**Notes**
May be repeated for maximum 12 credits.

**Hours of Lecture or Seminar per week**
3

---

**CVPA 599 - Independent Study**

Credits: 1-6
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course.

**Prerequisites**
Undergraduate degree or equivalent, or permission of instructor.

**Notes**
May be repeated for total 12 credits.

**Hours of Lecture or Seminar per week**
1-6

---

**CVPA 700 - Academic Writing in the Arts**
Credits: 1
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students' acculturation in the academic writing skills and practices of their discourse communities.

**Hours of Lecture or Seminar per week**
1

**Hours of Lab or Studio per week**
0

---

**CVPA 701 - Thesis and Project Writing**

Credits: 1
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event.

**Hours of Lecture or Seminar per week**

**Hours of Lab or Studio per week**
0

---

**DANC 101 - Dance Appreciation**

Credits: 3
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical.

**Notes**
Meets general education fine arts requirement.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**DANC 114 - Rhythmic Analysis and Music Resources for Dance**

Credits: 3
Introduces rhythmic structure, notation, and basic forms of music. Experience with audio equipment in creating simple sound scores.

**Prerequisites**
Admission to dance major or permission of instructor.

**Notes**
Lecture, lab.

**Hours of Lecture or Seminar per week**
DANC 118 - World Dance

Credits: 3
Develops knowledge, skills, and appreciation of world dance forms through presentation of fundamental techniques, music, and culture. Area of concentration varies to include as many cultures as possible.

Notes
May be repeated for total 6 credits. Fulfills non-Western requirement for CHSS and COS students, and global understanding requirement of university general education.

DANC 119 - Dance in Popular Culture: Afro-Latino Dance

Credits: 3
Develops knowledge, skills, and appreciation of popular dance forms through presentation of fundamental techniques, music, and culture. Area of concentration varies to include as many idioms as possible.

Notes
Meets general education fine arts requirement. May be repeated for total 6 credits.

DANC 120 - Special Topics in Dance

Credits: 1-3
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor.

Notes
May be repeated for total 9 credits if course content differs.
DANC 125 - Beginning Modern Dance

Credits: 3
Develops knowledge, skills, and appreciation of modern dance through presentation of fundamental techniques and creative movement experiences.

Notes
Meets general education fine arts requirement. May be repeated for total 6 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

DANC 131 - Beginning Jazz Technique

Credits: 3
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography.

Notes
Meets general education fine arts requirement. May be repeated for 6 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0

DANC 145 - Beginning Ballet

Credits: 3
Introduces elements of ballet technique and vocabulary. Stresses learning elementary positions and movements characteristic of this highly stylized art form.

Notes
Meets general education fine arts requirement. May be repeated for total 6 credits.

Hours of Lecture or Seminar per week
3
Hours of Lab or Studio per week
0
DANC 150 - Dance Improvisation

Credits: 3
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series.

Prerequisites
Admission to dance major or permission of instructor.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

Credits: 3
Elementary exploration into rhythms and steps basic to art form of tap dancing including its musical and cultural traditions.

Notes
Meets general education fine arts requirement. May be repeated for total 6 credits.

Hours of Lecture or Seminar per week
3

Hours of Lab or Studio per week
0

DANC 170 - Orientation to Dance Production

Credits: 1
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience.

Prerequisites
Admission to dance major or permission of instructor.

Hours of Lecture or Seminar per week
1

Hours of Lab or Studio per week
1

DANC 210 - Dynamic Alignment

Credits: 3
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise
correctives and imagery to correct insufficient muscle pattern and reduce stress on the body.

**Prerequisites**
Admission to dance major or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### DANC 225 - Beginning Intermediate Modern Dance

Credits: 3
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity.

**Prerequisites**
DANC 125 or permission of instructor.

**Notes**
Meets general education fine arts requirement. May be repeated for total 9 credits.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### DANC 231 - Intermediate Jazz Technique

Credits: 3
Continued study of the concepts of jazz dance technique, and in-depth study of 20th-century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, and mastering rhythm and syncopation. Continues exploration of jazz improvisation and choreography.

**Prerequisites**
DANC 131 or permission of instructor.

**Notes**
Meets general education fine arts requirement. May be repeated for 12 credits.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

### DANC 245 - Beginning Intermediate Ballet
Further development of knowledge, skills, and appreciation through technique, vocabulary, and history of ballet.

**Prerequisites**
DANC 145 or permission of instructor.

**Notes**
Meets general education fine arts requirement. May be repeated for total 9 credits.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**DANC 251 - Dance Composition I**

Credits: 3
Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process.

**Prerequisites**
DANC 150 or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0

---

**DANC 252 - Dance Composition II**

Credits: 3
Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process.

**Prerequisites**
DANC 251 or permission of instructor.

**Hours of Lecture or Seminar per week**
3

**Hours of Lab or Studio per week**
0
DANC 270 - Dance Production Lab

Credits: 1
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs.

Prerequisites
DANC 170 or permission of instructor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week
1
Hours of Lab or Studio per week
1
