- GGS 463 - Applied Geographic Information Systems Credits: 3

Total: 12 credits

Software Engineering Concentration Sample Schedule

First Semester

- Western civilization course Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGL 101 - Composition Credits: 3

Total: 16 credits

Second Semester

- Literature course Credits: 3
- COMM 100 - Public Speaking Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 14 credits

Third Semester

- Natural science course Credits: 4
• CS 262 - Introduction to Low-Level Programming Credits: 1
• CS 310 - Data Structures Credits: 3
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Total: 14 credits

Fourth Semester

• Natural science course Credits: 3
• CS 330 - Formal Methods and Models Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• ECE 301 - Digital Electronics Credits: 3
• SWE 205 - Software Usability Analysis and Design Credits: 3

Total: 15 credits

Fifth Semester

• SWE Cross disciplinary course Credits: 3
• Social and behavioral science course Credits: 3
• CS 332 - Object-Oriented Software Design and Implementation Credits: 3
• CS 421 - Software Requirements and Design Modeling Credits: 3
• ENGL 302 - Advanced Composition Credits: 3

Total: 15 credits

Sixth Semester

• SWE related course Credits: 3
• Fine arts course Credits: 3
• Global understanding course Credits: 3
• SWE 437 - Software Testing and Maintenance Credits: 3
• STAT 250 - Introductory Statistics I Credits: 3
• SWE 301 - Internship Preparation Credits: 0

Total: 15 credits
Seventh Semester

- SWE related course Credits: 3
- SWE related course Credits: 3
- Elective Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- ENGL 410 - Professional and Technical Writing Credits: 3
- SWE 401 - Internship Reflection Credits: 1

Total: 16 credits

Eighth Semester

- SWE related course Credits: 3
- SWE related course Credits: 3
- CS Senior course Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Total: 15 credits

Computer Science, BS

Banner Code: VS-BS-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The objectives of the BS in Computer Science Program relate to the abilities of the graduates several years after graduation. The objectives include:

- Foundation for successful careers in industry: Graduates of the program will have a broad understanding of the fundamental concepts, methodologies, tools, and applications of computer science. They will have the educational foundation that leads to successful careers in the computing industry.
- Foundation for graduate study: Graduates of the program will have the academic preparation for successful completion of rigorous graduate programs.
- Professional preparation: Graduates will have effective written and oral communication skills, and be able to work collaboratively in a professional and ethical manner.

This bachelor’s degree program is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012, telephone 410-347-7700.

Degree Requirements
For the BS-CS degree, students must complete 120 credits, including the university general education requirements and all the following:

**Computer science core (35 credits):**

- CS 101 - Preview of Computer Science Credits: 2
- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- ECE 301 - Digital Electronics Credits: 3

**Note:**

Students must take CS 101 within their first year at the university. Students should take CS 105 during their second semester. A grade of C or better must be earned in CS 306 for this course to satisfy the university general education synthesis requirement.

**Senior computer science (12 credits):**

Any four of the following:

- CS 425 - Game Programming I Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 475 - Concurrent and Distributed Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 482 - Computer Vision Credits: 3
- CS 484 - Data Mining Credits: 3
- CS 499 - Special Topics in Computer Science Credits: 3

**Note:**

Only three credits of CS 499 can be used toward the Senior computer science requirement.
Mathematics (23 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

And one of the following:

- MATH 446 - Numerical Analysis I Credits: 3
- OR 481 - Numerical Methods in Engineering Credits: 3

Note:

MATH 105 and MATH 108 cannot be counted toward this degree.

Computer science-related courses (6 credits):

Two courses chosen from:

- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 447 - Single-Chip Microprocessors Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- PHIL 371 - Philosophy of Natural Sciences Credits: 3
- PHIL 376 - Symbolic Logic Credits: 3
- Any MATH or CS course numbered above 300 (except MATH 351)

Note:

Students may need to choose electives to satisfy prerequisites for these courses. Those planning to take MATH 352 may replace STAT 344 with MATH 351.
Natural Sciences:

- 12 credits in courses intended for scientists and engineers. Two of the courses for this requirement must have laboratory components and constitute a sequence. A list of relevant courses can be obtained from the department office.

COMM 100 (3 credits):

Computer science students must make a technical presentation. The course fulfills the general education requirement in oral communication for Volgenau School students.

And:

Three credits in arts, humanities, or social science in addition to the general education requirements.

Total: 120 credits

Additional Information:

Students should consult the sample schedule below and ensure that course prerequisites are satisfied. Students should obtain computer-generated audits periodically to ensure that degree requirements are being met.

Sample Schedule

First Semester

- Western civilization course  Credits: 3
- CS 101 - Preview of Computer Science Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGL 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- Arts course  Credits: 3
- Literature course  Credits: 3
- CS 105 - Computer Ethics and Society Credits: 1
- CS 211 - Object-Oriented Programming Credits: 3
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

Total: 14 credits

Third Semester

• Natural science course Credits: 4
• Social and behavioral science course Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

Total: 14 credits

Fourth Semester

• Natural science course Credits: 4
• General elective Credits: 3
• COMM 100 - Public Speaking Credits: 3
• CS 310 - Data Structures Credits: 3
• ECE 301 - Digital Electronics Credits: 3

Total: 16 credits

Fifth Semester

• Global understanding course Credits: 3
• CS 330 - Formal Methods and Models Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
• MATH 203 - Linear Algebra Credits: 3

Total: 15 credits

Sixth Semester

• Humanities course Credits: 3
• Natural science course Credits: 4
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Total: 16 credits

Seventh Semester

- Senior computer science course Credits: 3
- Computer science-related elective Credits: 3
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

AND one of the following:

- OR 481 - Numerical Methods in Engineering Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

Total: 15 credits

Eighth Semester

- Senior computer science course Credits: 3
- Senior computer science course Credits: 3
- Senior computer science course Credits: 3
- Computer science-related elective Credits: 3
- General elective Credits: 2

Total: 14 credits

Change of Major

Students requesting a change of major to computer science must have a GPA of at least 2.75 and successfully completed CS 112 or CS 211 and MATH 113, MATH 114 or MATH 125.

Advanced Placement, Credit by Exam

Some students may receive credit for CS 112 by passing departmentally administered exams. In addition, a score of 3 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112. An AP score of 4, together with demonstrated competence in the programming language used in CS 211, qualifies students for credit in CS 211. A score of 4 on
the International Baccalaureate computer science exam qualifies students for credit in CS 112, and a score of 5 or more qualifies students for credit in CS 211.

**Writing-Intensive Requirement**

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 and 421. Faculty members provide feedback on students' expository writing.

**Grades**

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

**Cooperative Education**

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

**Computer Science, Computer Engineering Double Major**

Computer science majors can earn a double major in computer science and computer engineering if they complete an additional 28 credits of courses beyond the 120 credits required for the computer science degree. The additional 28 credits must be part of an approved plan of study. For more information, visit the department web site.

**Bachelor's Level Certificate**

**Computer Science Undergraduate Certificate**

**Banner Code:** VS-CERB-CS

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Computer Science

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

**Admissions Requirements**

Students must have programming experience at the level of CS 112 and CS 211, and either a BS in a technical field with a 3.00 GPA or higher, or current enrollment in a technical undergraduate minor.

**Certificate Requirements**
Basic Computer Science:

- CS 310 - Data Structures Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- ECE 301 - Digital Electronics Credits: 3

Math:

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Completion of one of the following:

- CS 483 - Analysis of Algorithms Credits: 3

AND two of the following:

- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 440 - Language Processors and Programming Environments Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 484 - Data Mining Credits: 3

OR:

- CS 583 - Analysis of Algorithms Credits: 3

AND two of the following:

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
Undergraduate Minor

Computer Science Minor

Banner Code: CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Course Requirements

The minor requires completion of at least 17 credits. Required courses are:

- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 310 - Data Structures Credits: 3

One of the following:

- CS 105 - Computer Ethics and Society Credits: 1
- CS 306 - Synthesis of Ethics and Law for the Computing Professional Credits: 3

Two additional computer science courses should be selected from the following:

- CS 325 - Introduction to Game Design Credits: 3
- CS 330 - Formal Methods and Models Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 363 - Comparative Programming Languages Credits: 3
- CS 367 - Computer Systems and Programming Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- CS 450 - Database Concepts Credits: 3
- CS 451 - Computer Graphics Credits: 3
- CS 455 - Computer Communications and Networking Credits: 3
- CS 465 - Computer Systems Architecture Credits: 3
- CS 468 - Secure Programming and Systems Credits: 3
- CS 471 - Operating Systems Credits: 3
- CS 480 - Introduction to Artificial Intelligence Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3
- CS 484 - Data Mining Credits: 3
For policies governing all minors, see the Academic Policies chapter of this catalog.

Students should pay careful attention to prerequisites when selecting courses.

Software Engineering Minor

Banner Code: SWE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Course Requirements

Candidates for the minor in software engineering must complete 16 credits in software engineering with a minimum GPA of 2.00, comprising:

- CS 112 - Introduction to Computer Programming Credits: 4

One of the following:

- CS 211 - Object-Oriented Programming Credits: 3
- CS 222 - Computer Programming for Engineers Credits: 3

and three from:

- SWE 205 - Software Usability Analysis and Design Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3
- SWE 432 - Design and Implementation of Software for the Web Credits: 3
- SWE 437 - Software Testing and Maintenance Credits: 3
- SWE 443 - Software Architectures Credits: 3

At least 8 credits must be used only for the minor and not for the student's major.

For policies governing all minors, see the Academic Policies chapter of this catalog.

Bachelor's/Accelerated Master's Program
Computer Science, BS/Computer Science, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for those interested in immediately continuing on to graduate studies in computer science.

Admission Requirements

Students in a BS program in computer science or a related area may apply for the BS/accelerated MS program if they have earned 90 undergraduate credits with an overall GPA of at least 3.50. Criteria for admission are identical to criteria for admission to the MS program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS program and the MS program, with 6 credits overlap.

Students register for 6 credits of CS 500-level basic courses in place of the corresponding CS 400-level courses required for the undergraduate degree requirements. That is, students must register for two of the following courses in place of the corresponding 400-level courses:

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, a master’s degree is granted.

Computer Science, BS/Information Security and Assurance, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing their undergraduate studies in computer science with graduate studies in information security and assurance.
Admission Requirements

Students in the BS in Computer Science Program can apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Information Security and Assurance Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Security and Assurance Program, with 6 credits overlapping.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in information security and assurance core courses and apply the two courses from the above list toward the MS in information security and assurance requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information security and assurance requirements, a master’s degree will be granted.
Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Information Systems Program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3

Please note:

Students complete all MS in information systems core courses and apply the two courses from above toward the MS in information systems elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in information systems requirements, a master’s degree is granted.

Computer Science, BS/Software Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program is for students interested in immediately continuing undergraduate studies in computer science with graduate studies in software engineering.

Admission Requirements

Students in the BS in Computer Science Program can apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Software Engineering Program.

Degree Requirements

Students must complete 144 credits that satisfy requirements for the BS in Computer Science Program, as well as those for the MS in Software Engineering Program, with 6 credits overlap.

Students register for two of the following courses (6 credits of 500-level computer science core courses) in place of the corresponding 400-level computer science courses, as part of the undergraduate degree requirements.

- CS 540 - Language Processors Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3
Please note:

Students complete all MS in software engineering core courses and apply the two courses from the above list toward the MS in software engineering elective requirements.

Degree Conferral

Students must apply to have the BS in computer science degree conferred the semester before they expect to complete the BS requirements. At the completion of the MS in software engineering requirements, a master’s degree is granted.

Information Technology, BS/Information Security and Assurance, Accelerated MS

*School: The Volgenau School of Information Technology and Engineering*

*Department: Computer Science*

This program is for students interested in immediately continuing on to graduate studies in information security and assurance.

Admission Requirements

Students in the BS in Information Technology Program may apply for this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Information Security and Assurance program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program and those for the MS program, with 6 credits overlapping with:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master’s degree is granted.

Information Technology, BS/Information Systems, Accelerated MS
School: The Volgenau School of Information Technology and Engineering
Department: Computer Science

This program is for students interested in immediately continuing on to graduate studies in information systems.

Admission Requirements

Students in the BS in Information Technology Program may apply if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the MS in Information Systems program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program as well as those for the MS program, with 6 credits overlapping with:

- INFS 614 - Database Management Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3

Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master's degree is granted.

Information Technology, BS/Software Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering
Department: Computer Science

This program is for students interested in immediately continuing on to graduate studies in software engineering.

Admission Requirements

Students in the BS in Information Technology Program may apply to this program if they have earned 90 undergraduate credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the MS in Software Engineering program.

Degree Requirements

Students must complete all credits that satisfy requirements for the BS program and those for the MS in Software Engineering Program, with 6 credits overlapping with:

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
Degree Conferral

Students must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. At the completion of MS requirements, a master’s degree is granted.

Master's Degree

Computer Science, MS

Banner Code: VS-MS-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The graduate program leading to an MS in computer science prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which do not have a graduate class as prerequisite, and advanced classes, which have a graduate class as prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

Plan of Study

Before the end of the second semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final signed version of the plan must be included when the student submits a graduation application.

Admission Requirements

In addition to fulfilling Mason’s admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes Data Structures and Algorithms (CS 310), Automata Theory and Formal Languages (CS 330), and Computer Architecture including Assembly Language (CS 367 and CS 465). Students also must have completed Calculus I and II and a substantial course in discrete mathematics (such as MATH 125). Students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.
- Have earned a cumulative GPA of 3.00 for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all post secondary education, a self assessment form (included in the application package or available from the department), three letters of recommendation, and an official GRE report.

Degree Requirements
In addition to general university requirements, completion of this program requires 30 credits of graduate courses as follows:

- At least five classes (15 credits) must qualify as “advanced” by having suitable graduate courses as prerequisites.
- Advanced classes must be taken from three different areas. The list of preapproved classes with the areas they belong to is provided below.
- At least six classes, including two advanced classes, must be designated CS.
- At least eight classes have to be taken from the list of preapproved classes. Up to two computer science-related classes that are not on the list of preapproved classes may be taken with Computer Science Department approval.
- All prerequisites must be satisfied. In some cases, basic classes (including CS 583) may be skipped with approval of the Computer Science Department if equivalent undergraduate classes were taken previously.
- CS 583 - Analysis of Algorithms Credits: 3

Preapproved MS CS Courses by Area

Artificial Intelligence and Databases

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 650 - Database Engineering Credits: 3
- CS 667 - Biometrics Credits: 3
- CS 680 - Natural Language Processing Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 685 - Intelligent Systems for Robots Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 689 - Planning Motions of Robots and Molecules Credits: 3
- CS 750 - Theory and Applications of Data Mining Credits: 3
- CS 771 - Neural Networks Credits: 3
- CS 775 - Advanced Pattern Recognition Credits: 3
- CS 780 - Data Mining in Multimedia Databases Credits: 3
- CS 782 - Machine Learning Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- CS 787 - Decision Guidance Systems Credits: 3
- CS 811 - Research Topics in Machine Learning and Inference Credits: 3
- CS 880 - Research Topics in Artificial Intelligence Credits: 3
- CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 764 - Object-Oriented Database Systems Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
Programming Languages and Software Engineering

- CS 540 - Language Processors Credits: 3
- CS 631 - Object-Oriented Design Patterns Credits: 3
- CS 640 - Advanced Compilers Credits: 3
- CS 645 - Programming Language Semantics Credits: 3
- CS 719 - Scaling Technologies for E-business Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 720 - Advanced Software Requirements Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3

Systems and Networks

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 635 - Foundations of Parallel Computation Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 668 - Computer Architecture Systems Credits: 3
- CS 671 - Advanced Operating Systems Credits: 3
- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 675 - Distributed Systems Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3
- CS 773 - Real-Time Systems Design and Development Credits: 3
- CS 779 - Topics in Resilient Computer Systems Credits: 3
- CS 818 - Topics in Computer Systems Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 767 - Secure Electronic Commerce Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3

Theoretical Computer Science

• CS 583 - Analysis of Algorithms Credits: 3
• CS 600 - Theory of Computation Credits: 3
• CS 611 - Computational Methods for Genomics Credits: 3
• CS 630 - Advanced Algorithms Credits: 3
• CS 633 - Computational Geometry Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 753 - Parallel Computation Credits: 3
• CS 850 - Research Topics in Parallel Computation Credits: 3

Visual Computing

• CS 652 - Computer Graphics Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 667 - Biometrics Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 774 - Computational Vision Credits: 3
• CS 776 - Graphical Real-Time Simulation Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 884 - Advanced Topics in Computer Vision and Robotics Credits: 3

Project/Thesis (optional):

Three to six of the advanced classes may be replaced by a project or thesis. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

3 credits of:
• CS 798 - Project Seminar Credits: 3

or

6 credits of:
• CS 799 - Thesis Credits: 1-6

Note:
These courses are not classified by area. Note that CS 695/CS 795 can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

- CS 695 - Topics in Computer Science Credits: 3
- CS 697 - Independent Reading and Research Credits: 1-3
- CS 795 - Advanced Topics in CS Credits: 3
- CS 798 - Project Seminar Credits: 3
- CS 799 - Thesis Credits: 1-6
- CS 895 - Research Topics in CS Credits: 3

Information Security and Assurance, MS

Banner Code: VS-MS-ISA

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The Department of Computer Science’s master of science degree program in information security and assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation’s information infrastructure. The master of science in information security and assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Show proof of a satisfactory score on the GMAT or GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GMAT or GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
- Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.
- International students must submit their TOEFL score.
Foundation Requirements

To ensure that students have an adequate background in mathematical methods and computer technology, the program requires the following four foundation courses, or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate that they have the requisite knowledge for those foundations of INFS 501, 515, and 519. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified with some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Degree Requirements

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). To provide the necessary background and fundamentals of information systems security and assurance, the program has four courses that are required of all students:

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 656 - Network Security Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3

Note:

To continue in the program, students are required to obtain a B- or better grade in the required courses. Students are allowed to repeat the required classes. Students are encouraged to complete the required courses before pursuing the electives.

Elective Courses

Security Electives
To provide breadth and depth of knowledge in information security and assurance, the degree program requires four electives to be taken from the following list of ISA courses:

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3

Other Electives

The remaining two courses may be chosen from any combination of (1) courses at the ISA 600 and 700 level, including ISA 697, ISA 796, ISA 797, and ISA 798; (2) courses at the CS 500, 600, and 700 level; and (3) from the list of preapproved electives provided below. A thesis option is available whereby a student may elect to complete a 6-credit thesis.

Approved Electives

A full list of approved electives is given below by program:

Information Systems (INFS)

- INFS 614 - Database Management Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
• ISA 673 - Operating Systems Security Credits: 3
• ISA 674 - Intrusion Detection Credits: 3
• ISA 681 - Secure Software Design Credits: 3
• ISA 697 - Topics in Information Security Credits: 1-6
• ISA 763 - Security Protocol Analysis Credits: 3
• ISA 764 - Security Experimentation Credits: 3
• ISA 765 - Database and Distributed Systems Security Credits: 3
• ISA 767 - Secure Electronic Commerce Credits: 3
• ISA 785 - Research in Digital Forensics Credits: 3
• ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 630 - Software Engineering Economics Credits: 3
• SWE 631 - Object-Oriented Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 723 - Precise Modeling Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 781 - Secure Software Design and Programming Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 796 - Directed Readings in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3

Computer Science (CS)

• CS 540 - Language Processors Credits: 3
• CS 571 - Operating Systems Credits: 3
• CS 580 - Introduction to Artificial Intelligence Credits: 3
• CS 583 - Analysis of Algorithms Credits: 3
• CS 631 - Object-Oriented Design Patterns Credits: 3
• CS 635 - Foundations of Parallel Computation Credits: 3
• CS 640 - Advanced Compilers Credits: 3
• CS 650 - Database Engineering Credits: 3
• CS 652 - Computer Graphics Credits: 3
• CS 662 - Computer Graphics Game Technologies Credits: 3
• CS 668 - Computer Architecture Systems Credits: 3
• CS 671 - Advanced Operating Systems Credits: 3
• CS 672 - Computer System Performance Evaluation Credits: 3
• CS 673 - Multimedia Computing and Systems Credits: 3
• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 682 - Computer Vision Credits: 3
• CS 683 - Parallel Algorithms Credits: 3
• CS 684 - Graph Algorithms Credits: 3
• CS 685 - Intelligent Systems for Robots Credits: 3
• CS 686 - Image Processing and Applications Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 688 - Pattern Recognition Credits: 3
• CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Network Switching and Routing Credits: 3
• ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3
• ECE 646 - Cryptography and Computer Network Security Credits: 3
• ECE 650 - Robotics Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 681 - VLSI Design for ASICs Credits: 3
• ECE 732 - Mobile Communication Systems Credits: 3
• ECE 734 - Detection and Estimation Theory Credits: 3
• ECE 741 - Wireless Networks Credits: 3
• ECE 744 - Computer Vision and Expert Systems Credits: 3
• ECE 746 - Advanced Applied Cryptography Credits: 3
• ECE 749 - Neural Networks for Control Credits: 3

Operations Research (OR)

• OR 540 - Management Science Credits: 3
• OR 541 - Operations Research: Deterministic Models Credits: 3
• OR 542 - Operations Research: Stochastic Models Credits: 3
• OR 635 - Discrete System Simulation Credits: 3
• OR 640 - Global Optimization and Computational Intelligence Credits: 3
• OR 641 - Linear Programming Credits: 3
• OR 642 - Integer Programming Credits: 3
• OR 643 - Network Modeling Credits: 3
• OR 644 - Nonlinear Programming Credits: 3
• OR 645 - Stochastic Processes Credits: 3
• OR 647 - Queuing Theory Credits: 3
• OR 681 - Decision and Risk Analysis Credits: 3
• OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

• PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
• PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Statistics (STAT)

• STAT 544 - Applied Probability Credits: 3
• STAT 554 - Applied Statistics Credits: 3
• STAT 652 - Statistical Inference Credits: 3
• STAT 655 - Analysis of Variance Credits: 3
• STAT 656 - Regression Analysis Credits: 3
• STAT 662 - Multivariate Statistical Methods Credits: 3
• STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
• STAT 664 - Bayesian Inference and Decision Theory Credits: 3
• STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

• SYST 520 - System Engineering Design Credits: 3
• SYST 530 - System Management and Evaluation Credits: 3
• SYST 542 - Decision Support Systems Engineering Credits: 3
• SYST 560 - Introduction to Air Traffic Control Credits: 3
• SYST 573 - Decision and Risk Analysis Credits: 3
• SYST 611 - System Methodology and Modeling Credits: 3
• SYST 620 - Discrete Event Systems Credits: 3
• SYST 659 - Topics in Systems Engineering Credits: 3
• SYST 660 - Air Transportation Systems Modeling Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
• SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3
• SYST 684 - Sensor Data Fusion Credits: 3
• SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Total: 30 credits

Information Systems, MS

Banner Code: VS-MS-ISYS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This professional degree program focuses on the technical, managerial, and policy issues associated with designing, building, and maintaining information systems in organizations. Data, information, and knowledge are crucial to the modern enterprise, and the MS in information systems (MS-ISYS) addresses both the theoretical and engineering aspects of specifying, designing, implementing, and managing large-scale information systems.

The goals of the MS-ISYS are to provide a high-quality program that allows students with diverse baccalaureate and professional backgrounds to obtain the MS degree; provide a technical body of knowledge, together with hands-on project experience, that will allow students to analyze, design, build, deploy, maintain, and manage information systems in large organizations such as industry, government, and nonprofits; and provide a course of study that allows professionals to pursue a technical or a managerial approach to information systems.
The career paths open to graduates include technical and management positions. Technical positions include systems analyst, data administrator, information architect, database administrator, systems architect, decision analyst, data warehouse administrator, database programmer, web-based information systems designer and programmer, information engineer, and knowledge engineer. Management positions include chief information officer, chief knowledge officer, chief privacy officer, project manager, and webmaster.

Admission Requirements

Applicants must hold a four-year (120-credit) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. They also must meet the following requirements:

- Show proof of a satisfactory score on the GMAT or GRE, if required. The applicable test should have been taken within five years of applying for admission. The department policy is that the GMAT or GRE is required unless the applicant has an undergraduate degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better in the last 60 hours, and a B or better grade in all foundation courses taken at Mason or elsewhere.
- Submit the appropriate application forms with three letters of recommendation from people directly knowledgeable of the applicant’s professional and academic competence, a one-page goals statement, and a work résumé.
- Submit a department self-evaluation form that is essential for evaluating foundation requirements by the department faculty. This form may be obtained from the department office or the department web page.
- International students must submit their TOEFL score.

Foundation Requirements

To ensure students have an adequate background in mathematical methods, computer technology, and programming knowledge, the program requires the following foundation courses or their equivalents: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, SWE 510 Object-Oriented Programming in Java.

Prospective students are asked to complete a department self-evaluation form indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundations of SWE 510, INFS 501, 515, and 519. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified, and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any of the exams must take the equivalent course before enrolling in the core curriculum courses.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.
Degree Requirements

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information systems, the following four courses are required of all students:

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 622 - Information Systems Analysis and Design Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3

Notes:

For students taking the emphasis area and/or graduate certificate in software engineering, SWE 620 must be substituted for INFS 622.

The core courses constitute the technical body of knowledge for the program. The elective courses are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

Elective Courses

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking six courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list is provided at the end of this section. Special courses may be used as electives with prior approval of the student’s academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Listed below are the emphasis areas and the approved elective courses in each area.

Database Management

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3

Data Mining

- CS 780 - Data Mining in Multimedia Databases Credits: 3
- CS 782 - Machine Learning Credits: 3
- INFS 755 - Data Mining Credits: 3
Electronc Commerce

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3

Software Engineering

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3

Knowledge Management

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 650 - Development Frameworks for Information Systems Applications Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
Information Security and Assurance

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 796 - Directed Readings in Information Security Credits: 3

Certificates

Certificates may be also obtained in the following areas: database management, data mining, electronic commerce, information engineering, information security and assurance, intelligent agents, software architecture, software engineering, foundations of information systems, web-based software engineering, biometrics, computer games technology, and computer networking. These certificates are described in the computer science certificates section of this catalog.

Approved Electives

A full list of approved electives is given below by program:

Information Systems (INFS)

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 650 - Development Frameworks for Information Systems Applications Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 796 - Directed Readings in Information Technology Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6
Information Security and Assurance (ISA)

- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 697 - Topics in Information Security Credits: 1-6
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3

- SYST 659 - Topics in Systems Engineering Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Software Engineering, MS

Banner Code: VS-MS-SWE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This program provides specialized knowledge and experience in developing and modifying large, complex software systems. It emphasizes technical and management aspects of software engineering development. Software engineering is an established discipline based on requirements analysis, design, construction, testing, maintenance, economics, and management issues. A pragmatic approach to problem solving is the hallmark of a software engineer. Software engineers are concerned with the theoretical and practical aspects of technology, cost, and social impact of software systems that are effective and efficient.

Software engineers are in demand in every segment of society affected by computing technology. Potential employers include all software vendors and Internet-based companies, electronic business organizations, businesses that build and sell computers,
research and development laboratories, aerospace companies, government contractors, banks, insurance companies, and manufacturing organizations. The master’s program is concerned with technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying high-quality software systems.

Successful applicants have a broad variety of undergraduate backgrounds, including computer science, science and mathematics, engineering, liberal arts, and business. Many students are working or have worked in the software industry.

The program is revised on a regular basis to stay abreast of the latest developments in information technology (IT). The program introduced a major revision for fall 2005; recent additions include software construction with the object-oriented Java programming language, requirements analysis with use cases and the Unified Modeling Language (UML), object-oriented software design with the UML, graphical user interface design, software engineering for the web, software project management using the spiral life cycle model and the Capability Maturity Model, software architecture, design patterns, system testing and testing of object-oriented components, and formal methods using the Object Constraint Language. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

**Foundation Requirements**

Students entering the MS program must have course work or equivalent knowledge in the following areas: introductory programming in any language; knowledge of an object-oriented programming language such as Java, C++, or C#; data structures and algorithms; machine organization (such as those given in computer system architecture or assembly language courses); and topics in discrete mathematics, including sets, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be achieved by taking the following foundation courses from Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

In addition, it is desirable, though not required, that entering students have at least one year of work experience in building or modifying software systems.

Prospective students are asked to complete a department self-evaluation form, indicating whether previously taken courses may satisfy these foundation requirements. On acceptance, students are advised of the necessary foundation courses to be satisfactorily completed to meet this requirement. Foundation courses do not earn credit toward the MS degree; however, they must be successfully completed with a grade of B or better before enrolling in the core curriculum.

Students may test out to indicate they have the requisite knowledge for those foundation courses. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students failing any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

**Admission Requirements**

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- Submit a department self-evaluation form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.
- Show proof of a satisfactory score on the GRE, if required. The test should have been taken within five years of applying for admission. The department policy is that the GRE is required unless the applicant has an undergraduate
degree in science or engineering from a U.S. university and graduated with a GPA of 3.00 or better in the last 60 hours; 
a graduate degree in science or engineering from a U.S. university; or been admitted as a non-degree student and meets 
all the following requirements: an undergraduate degree from a U.S. university, an undergraduate GPA of 3.00 or better 
in the last 60 hours, and a B in all foundation courses taken at Mason or elsewhere.

- Submit the appropriate application form with three letters of recommendation from people directly knowledgeable of 
the applicant’s professional and academic competence.

Acceptance into the MS program is based on an overall assessment of the applicant’s ability to complete the program of study 
satisfactorily. Well-qualified students with minor deficiencies may be admitted to the program in provisional status, with 
specified course work to be completed within a specified time.

Advising

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the 
faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the 
department web site.

The department also provides an advising function to students, as outlined in the student advising form available from the 
department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of 
study form for the MS degree should be completed and submitted by the student soon after admission; this plan serves as a guide 
for the student.

Degree Requirements

In addition to the general requirements of the university, the MS in software engineering requires a minimum of 30 graduate 
credits. The course work is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement 
of 9 credits of emphasis courses, and 9 credits of elective courses.

Four Core Courses (12 credits)

- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 637 - Software Testing Credits: 3

Emphasis Courses (9 credits)

Students may choose an emphasis by taking three courses from one of the emphasis areas of software design, software assurance, 
software management, and web applications. With permission from the advisor, a student may choose to not take an emphasis.
The emphasis area courses are:

Software Design

- SWE 626 - Software Project Laboratory Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3
Software Assurance

- ISA 562 - Information Security Theory and Practice Credits: 3
- SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
- SWE 723 - Precise Modeling Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3

Software Management

- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- SWE 630 - Software Engineering Economics Credits: 3

Web Applications

- INFS 614 - Database Management Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3

Elective Courses (9 credits)

Students may select the remaining courses from the list of approved courses, including other emphasis areas, available from the department office and department web site. Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis, which is primarily intended for students planning to pursue a PhD in information technology with a concentration in software engineering. The course designations are:

- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3
- SWE 796 - Directed Readings in Software Engineering Credits: 3
- SWE 798 - Research Project Credits: 3
- SWE 799 - Thesis Credits: 1-6

Approved Electives

Below is the list of approved electives organized by academic program. Students should note that a maximum of two 500-level courses are allowed as electives. Courses not on this list may only be taken with explicit signed permission from the MS-SWE advisor.
Information Systems (INFS)

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 697 - Topics in Information Systems Credits: 1-6
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 760 - Advanced Database Management Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3
- INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
- INFS 774 - Enterprise Architecture Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- INFS 790 - Information Systems Policy and Administration Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6

Information Security and Assurance (ISA)

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 563 - Fundamentals of Systems Programming Credits: 3
- ISA 564 - Security Laboratory Credits: 3
- ISA 640 - Programming Language Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 673 - Operating Systems Security Credits: 3
- ISA 681 - Secure Software Design Credits: 3
- ISA 697 - Topics in Information Security Credits: 1-6
- ISA 763 - Security Protocol Analysis Credits: 3
- ISA 764 - Security Experimentation Credits: 3
- ISA 765 - Database and Distributed Systems Security Credits: 3
- ISA 767 - Secure Electronic Commerce Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- ISA 797 - Advanced Topics in Information Security Credits: 3

Software Engineering (SWE)

- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 626 - Software Project Laboratory Credits: 3
- SWE 630 - Software Engineering Economics Credits: 3
- SWE 631 - Object-Oriented Design Patterns Credits: 3
Computer Science (CS)

- CS 540 - Language Processors Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 583 - Analysis of Algorithms Credits: 3
- CS 611 - Computational Methods for Genomics Credits: 3
- CS 630 - Advanced Algorithms Credits: 3
- CS 635 - Foundations of Parallel Computation Credits: 3
- CS 640 - Advanced Compilers Credits: 3
- CS 650 - Database Engineering Credits: 3
- CS 652 - Computer Graphics Credits: 3
- CS 662 - Computer Graphics Game Technologies Credits: 3
- CS 668 - Computer Architecture Systems Credits: 3
- CS 671 - Advanced Operating Systems Credits: 3
- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 680 - Natural Language Processing Credits: 3
- CS 681 - Designing Expert Systems Credits: 3
- CS 682 - Computer Vision Credits: 3
- CS 683 - Parallel Algorithms Credits: 3
- CS 684 - Graph Algorithms Credits: 3
- CS 685 - Intelligent Systems for Robots Credits: 3
- CS 686 - Image Processing and Applications Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 688 - Pattern Recognition Credits: 3
- CS 689 - Planning Motions of Robots and Molecules Credits: 3
- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 752 - Interactive Graphics Software Credits: 3
• CS 755 - Advanced Computer Networks Credits: 3
• CS 756 - Performance Analysis of Computer Networks Credits: 3
• CS 773 - Real-Time Systems Design and Development Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 787 - Decision Guidance Systems Credits: 3
• CS 779 - Topics in Resilient Computer Systems Credits: 3
• CS 795 - Advanced Topics in CS Credits: 3

Electrical and Computer Engineering (ECE)

• ECE 511 - Microprocessors Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 535 - Digital Signal Processing Credits: 3
• ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
• ECE 542 - Computer Network Architectures and Protocols Credits: 3
• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 611 - Advanced Microprocessors Credits: 3
• ECE 612 - Real-Time Embedded Systems Credits: 3
• ECE 620 - Optimal Control Theory Credits: 3
• ECE 621 - Systems Identification Credits: 3
• ECE 624 - Control Systems Credits: 3
• ECE 630 - Statistical Communication Theory Credits: 3
• ECE 633 - Coding Theory Credits: 3
• ECE 635 - Adaptive Signal Processing Credits: 3
• ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
• ECE 641 - Computer System Architecture Credits: 3
• ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
• ECE 643 - Network Switching and Routing Credits: 3
• ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3
• ECE 646 - Cryptography and Computer Network Security Credits: 3
• ECE 650 - Robotics Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 681 - VLSI Design for ASICs Credits: 3
• ECE 732 - Mobile Communication Systems Credits: 3
• ECE 741 - Wireless Networks Credits: 3
- ECE 744 - Computer Vision and Expert Systems Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- ECE 749 - Neural Networks for Control Credits: 3

Operations Research (OR)

- OR 540 - Management Science Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- OR 690 - Optimization of Supply Chains Credits: 3

Psychology (PSYC)

- PSYC 734 - Seminar in Human Factors and Applied Cognition Credits: 3
- PSYC 737 - Psychology of Human-Technology Interaction Credits: 3

Statistics (STAT)

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Systems Engineering (SYST)

- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 560 - Introduction to Air Traffic Control Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
• SYST 611 - System Methodology and Modeling Credits: 3
• SYST 620 - Discrete Event Systems Credits: 3
• SYST 659 - Topics in Systems Engineering Credits: 3
• SYST 660 - Air Transportation Systems Modeling Credits: 3
• SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
• SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
• SYST 683 - Modeling, Simulation, and Gaming Credits: 3
• SYST 684 - Sensor Data Fusion Credits: 3
• SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3

Total: 30 credits

Master's Level Certificate

Biometrics Graduate Certificate

Banner Code: VS-CERG-BMCS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Biometrics, the science of recovering or verifying a person’s identity, measures the physical characteristics that make people unique (including fingerprints, an eye’s retina or iris, face, hand geometry, signature, and voice) and uses those measurements for person recognition or authentication. Biometrics are related to the science of forensics, which uses and interprets physical evidence for legal purposes. The importance of biometrics lies in the fact that traditional means of identification and verification are often unreliable or cumbersome. Passwords are difficult to remember and easy to steal. Keys, driver’s licenses, and passports can be lost or forged. The human body and its behavior, on the other hand, can’t be forgotten, stolen, forged, or misplaced. Practical uses for such biometrics are widespread and include maintaining the security for physical space and cyberspace. In particular, biometrics aids in controlling access to an office, computer network or an ATM, smart cards, and wireless communication; confirming the identity of buyers and sellers to make electronic commerce safe and reliable; confirming student identity for distant learning; and safeguarding electronic records related to health care services.

Admission Requirements

The program is open to all students who are eligible for entrance into the master's degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements
Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Required Courses (6 credits):

- CS 667 - Biometrics Credits: 3
- CS 688 - Pattern Recognition Credits: 3

Choose two from the following elective courses (6 credits):

- CS 580 - Introduction to Artificial Intelligence Credits: 3
- CS 652 - Computer Graphics Credits: 3
- CS 682 - Computer Vision Credits: 3
- CS 686 - Image Processing and Applications Credits: 3
- CS 750 - Theory and Applications of Data Mining Credits: 3
  or
- INFS 755 - Data Mining Credits: 3
- CS 777 - Human-Computer Intelligent Interaction Credits: 3

Note:

Students may take either CS 750 or INFS 755 but not both.

Total: 12 credits

Computer Games Technology Graduate Certificate

Banner Code: VS-CERG-CGT

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

Admission Requirements

The certificate program in computer games technology is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason. To obtain the certificate, candidates must complete the following courses for a total of at least 15 credits. Transfer credit may substitute for at most one of these courses, subject to department approval.

Certificate Requirements
Required courses (12 credits):

- CS 652 - Computer Graphics Credits: 3
- CS 658 - Networked Virtual Environments Credits: 3
- CS 662 - Computer Graphics Game Technologies Credits: 3
- CS 777 - Human-Computer Intelligent Interaction Credits: 3

Plus one course from the following:

- AVT 616 - Networked Art Practice Credits: 5
- AVT 676 - Sound and Music for Video and Animation Credits: 5
- AVT 686 - Three-Dimensional Digital Art Credits: 5
- AVT 688 - Digital Animation Credits: 5
- CS 633 - Computational Geometry Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- CS 686 - Image Processing and Applications Credits: 3
- CS 687 - Advanced Artificial Intelligence Credits: 3
- CS 752 - Interactive Graphics Software Credits: 3

Total: 15 credits

Computer Networking Graduate Certificate

Banner Code: VS-CERG-CNET

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

When brought together to form computer networks, the technologies of computing and communications exhibit a synergy that is revolutionizing our world. In-depth knowledge of the new discipline of computer networking increasingly is in demand as a basis for design and deployment of new information systems ranging from aspects of the global Internet to distributed systems in a variety of application domains. The courses for this certificate have been selected to provide a solid basis for understanding the core software and communications technologies on which today’s networks are based and how they may be combined to create effective computer networks. Courses cover mainstream and leading edge technology considerations, ensuring that students are prepared to function at the professional level in this fast moving and technologically challenging field.

Admission Requirements

The certificate program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.
Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Required courses (6 credits):

- CS 555 - Computer Communications and Networking Credits: 3
- CS 571 - Operating Systems Credits: 3

At least one of the following (3-6 credits):

- CS 755 - Advanced Computer Networks Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3

Zero or one of the following electives (0 or 3 credits):

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 742 - High-Speed Networks Credits: 3
- ISA 656 - Network Security Credits: 3

Total: 12 credits

Data Mining Graduate Certificate

Banner Code: VS-CERG-DTM

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program is intended for people interested in the analysis and knowledge discovery from large and diverse data sources. The goal of the program is to study data mining concepts and successful applications. The certificate in data mining may be pursued concurrently with any of the graduate programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. In addition, applicants must complete a self assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.
Each applicant must possess knowledge equivalent to that provided by the following courses at Mason: CS 310 Computer Science III, and STAT 344 Probability and Statistics for Engineers and Scientists.

Students not enrolled in a graduate degree program at Mason should apply for the data mining certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete five courses, with an average grade of B or better, for a total of 15 credits of graduate study. At least one course from three of the following groups must be taken to obtain the certificate:

Group I

- CS 750 - Theory and Applications of Data Mining Credits: 3
- CS 780 - Data Mining in Multimedia Databases Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3

Group II

- CSI 703 - Scientific and Statistical Visualization Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
  or
- CSI 773 - Statistical Graphics and Data Exploration Credits: 3

Group III

- INFS 755 - Data Mining Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3

Group IV

- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  or
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3

Database Management Graduate Certificate

Banner Code: VS-CERG-DBM

School: The Volgenau School of Information Technology and Engineering
The area of databases is considered by most experts to be a fundamental area of computer and information science, and this graduate certificate program provides comprehensive coverage that includes theoretical foundations, practical experience, and recent advances.

**Admission Requirements**

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a graduate degree program at Mason should apply for the database management certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a graduate degree program at Mason should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

**Certificate Requirements**

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

**Required courses (6 credits):**

- INFS 614 - Database Management Credits: 3
- INFS 760 - Advanced Database Management Credits: 3

**Two from the following courses (6 credits):**

- INFS 623 - Classical and Web Information Retrieval Credits: 3
- INFS 740 - Database Programming for the World Wide Web Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 764 - Object-Oriented Database Systems Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3
- INFS 797 - Advanced Topics in Information Systems Credits: 1-6
- ISA 765 - Database and Distributed Systems Security Credits: 3
- INFS 861 - Distributed Database Management Systems Credits: 3
- CSI 710 - Scientific Databases Credits: 3

**Total: 12 credits**
E-Commerce Graduate Certificate

Banner Code: VS-CERG-ECOM

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The Internet is having a significant effect on the way people interact with each other, with government, and with business. This graduate certificate program is for people who are interested in the use of Internet-based technology by people, government, and industry. We are witnessing the emergence of e-tailing, e-government, e-business, and business-to-business applications that are transforming society. The influence of electronic commerce is also being felt across international boundaries where it affects the management and administration of international business. The goal of the certificate in electronic commerce is to study the concepts, tools, policies, and underlying technology that enable Internet-based applications.

Admission Requirements

Applicants must hold a BS degree with a 3.00 or higher in the last 60 credits. They also must possess knowledge equivalent to the following four Mason courses, which are considered foundation courses: INFS 501 Discrete and Logical Structures for Information Systems, INFS 515 Computer Organization, INFS 519 Program Design and Data Structures, and SWE 510 Object-Oriented Programming in Java. Applicants also must possess equivalent knowledge of INFS 612 and 614; SWE 619, 620, and 621; or the prerequisite courses required for the selected electives.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field. Applicants also need to complete a self-assessment form. The form provides summary information concerning background and preparation for the program.

For those students not enrolled in a Mason graduate degree program, application for the certificate program is made through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Two courses (6 credits):

- INFS 640 - Introduction to Electronic Commerce Credits: 3
- INFS 770 - Knowledge Management for E-Business Credits: 3

Two additional courses (6 credits) from the following:

Electives have been organized into emphasis areas, but students may also mix and match elective courses subject to satisfying course prerequisites:

Information Security

- ISA 562 - Information Security Theory and Practice Credits: 3
• ISA 656 - Network Security Credits: 3
• ISA 767 - Secure Electronic Commerce Credits: 3

Database Management

• INFS 740 - Database Programming for the World Wide Web Credits: 3
• INFS 755 - Data Mining Credits: 3
• INFS 760 - Advanced Database Management Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3
• INFS 774 - Enterprise Architecture Credits: 3

Internet Software Engineering

• SWE 632 - User Interface Design and Development Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3

Health Medical Information Systems

• HAP 678 - Introduction to the U.S. Health System Credits: 3
• HAP 706 - Integrated Health Systems Management Credits: 3
• HAP 709 - Health Care Databases Credits: 3
• HAP 740 - Management of Health Information Systems Credits: 3

Total: 12 credits

Foundations of Information Systems Graduate Certificate

Banner Code: VS-CERG-FIS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This certificate program is designed primarily for students who earned an undergraduate degree in an area other than information systems and are interested in acquiring solid foundations to pursue further education and a career in information systems, software engineering, information security and assurance, or a related discipline.

Admission Requirements
The admission requirements for the certificate in foundations of information systems is a four-year bachelor’s degree with a GPA of 3.00 or higher. Also, the admission to the MS in Information Systems Program allows automatic admission to the certificate program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Required courses (12 credits)

Take each one of the following foundation courses (no substitutions are allowed):

- INFS 501 - Discrete and Logical Structures for Information Systems Credits: 3
- INFS 515 - Computer Organization Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- SWE 510 - Object-Oriented Programming in Java Credits: 3

Total: 12 credits

Information Engineering Graduate Certificate

Banner Code: VS-CERG-INFE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program is tailored for people involved in the specification, design, implementation, and management of data- and knowledge-intensive information systems. The certificate program prepares students for research, development, and professional practice in information engineering by offering a hands-on set of courses providing theoretical knowledge and practical experience with methods and tools associated with database management systems, data modeling, knowledge acquisition, data and knowledge representation, and software engineering.

Admission Requirements

Applicants must have a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply for the information engineering certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply
to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses, with an average grade of B or better, for a total of 12 credits of graduate study. To obtain the certificate, students must complete the following:

Four required courses (12 credits):

- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3

Total: 12 credits

Information Security and Assurance Graduate Certificate

Banner Code: VS-CERG-ISA

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program is for people who are interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students must also possess the equivalent knowledge of CS 571 and CS 555, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements
Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Two required courses (6 credits):

- ISA 562 - Information Security Theory and Practice Credits: 3
- ISA 656 - Network Security Credits: 3

Two additional courses (6 credits):

Two electives to be taken from the following, excluding ISA 697, ISA 796, ISA 797, and ISA 798.

- Courses at the ISA 600 and 700 level
- ISA 564 - Security Laboratory Credits: 3

Total: 12 credits

Intelligent Agents Graduate Certificate

Banner Code: VS-CERG-INAG

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This certificate concentrates on the theory and practice of designing and developing systems that rely on knowledge and reasoning, generically called intelligent agents: expert systems, knowledge-based systems, knowledge-based decision support systems, expert database systems, intelligent tutoring systems, and so on. Capturing, using, preserving, transferring, and sharing knowledge is of critical importance to any organization as society evolves from an information society to a knowledge society. Therefore, the ability to design and develop intelligent agents for a wide variety of domains is becoming a highly valuable expertise. The courses in this certificate program cover the basics of knowledge engineering and intelligent agents, as well as advanced research topics. Basic topics include knowledge representation, knowledge acquisition, heuristic search, problem solving and planning, uncertainty reasoning, machine learning, natural language processing, design of expert systems, human computer interaction, data mining, knowledge discovery, and knowledge management. Advanced topics include the development of multiagent systems, mixed-initiative intelligent systems, web-based intelligent agents, and distributed ontologies.

Admission Requirements

The program is open to all students who are eligible for entrance into the master’s degree program in computer science or any scientific or engineering discipline at Mason.

Certificate Requirements

Students must complete the following courses for a total of 12 credits:

Required (3 credits):
• CS 580 - Introduction to Artificial Intelligence Credits: 3

Plus three of the following elective courses (9 credits):

• CS 680 - Natural Language Processing Credits: 3
• CS 681 - Designing Expert Systems Credits: 3
• CS 685 - Intelligent Systems for Robots Credits: 3
• CS 687 - Advanced Artificial Intelligence Credits: 3
• CS 750 - Theory and Applications of Data Mining Credits: 3
• CS 777 - Human-Computer Intelligent Interaction Credits: 3
• CS 780 - Data Mining in Multimedia Databases Credits: 3
• CS 782 - Machine Learning Credits: 3
• CS 785 - Knowledge Acquisition and Problem Solving Credits: 3
• CS 798 - Project Seminar Credits: 3
• CS 811 - Research Topics in Machine Learning and Inference Credits: 3
• CS 880 - Research Topics in Artificial Intelligence Credits: 3
• INFS 772 - Intelligent Agents and the Semantic Web Credits: 3

Note:
One of the three courses may be taken from another MS or PhD program in the Volgenau School with advisor approval, provided it belongs to the certificate area.

Total: 12 credits

Software Architecture Graduate Certificate

Banner Code: VS-CERG-SWA

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working or planning to work in software architecture but do not want to complete the requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Software architecture is an essential part of a software system and can be considered the backbone for such a system. Many industrial organizations recognize the important role of software architecture and have requested specific courses and graduate certification in this area. This proposed graduate certificate program addresses this industrial need. Mason is well-positioned to address this need because the university already offers several relevant courses and has the faculty with the necessary expertise to teach them.
Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science office for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Required courses (3 credits):

- SWE 621 - Software Modeling and Architectural Design Credits: 3

At least two of the following courses (6 or 9 credits):

- SWE 699 - Special Topics in Software Engineering Credits: 3
- SWE 721 - Reusable Software Architectures Credits: 3
- SWE 727 - Quality of Service for Software Architectures Credits: 3
- SWE 795 - Advanced Topics in Software Engineering Credits: 3

Zero or one from the following courses (0 or 3 credits) for a total of 12 credits:

- CS 672 - Computer System Performance Evaluation Credits: 3
- CS 673 - Multimedia Computing and Systems Credits: 3
- SWE 620 - Software Requirements Analysis and Specification Credits: 3
- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 625 - Software Project Management Credits: 3
- SWE 631 - Object-Oriented Design Patterns Credits: 3
Software Engineering Graduate Certificate

Banner Code: VS-CERG-SWE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department. This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures. In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a Mason graduate degree program should apply for the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should apply to the Computer Science Department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or better for a total of 12 credits of graduate study.

Three required courses (9 credits) out of the following:

- SWE 637 - Software Testing Credits: 3
- SWE 641 - Systems Architecture for Large-Scale Systems Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3
- SWE 823 - Software for Critical Systems Credits: 3

Total: 12 credits
• SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
• SWE 621 - Software Modeling and Architectural Design Credits: 3
• SWE 622 - Distributed Software Engineering Credits: 3
• SWE 637 - Software Testing Credits: 3

One additional course (3 credits) from the following:

(subject to satisfying the prerequisites)

• CS 675 - Distributed Systems Credits: 3
• CS 706 - Concurrent Software Systems Credits: 3
• CS 735 - Concurrency Credits: 3
• SWE 620 - Software Requirements Analysis and Specification Credits: 3
• SWE 622 - Distributed Software Engineering Credits: 3
• SWE 623 - Formal Methods and Models in Software Engineering Credits: 3
• SWE 625 - Software Project Management Credits: 3
• SWE 626 - Software Project Laboratory Credits: 3
• SWE 630 - Software Engineering Economics Credits: 3
• SWE 631 - Object-Oriented Design Patterns Credits: 3
• SWE 632 - User Interface Design and Development Credits: 3
• SWE 637 - Software Testing Credits: 3
• SYST 621 - Systems Architecture Design Credits: 3
• SWE 642 - Software Engineering for the World Wide Web Credits: 3
• SWE 645 - Component-Based Software Development Credits: 3
• SWE 699 - Special Topics in Software Engineering Credits: 3
• SWE 720 - Advanced Software Requirements Credits: 3
• SWE 721 - Reusable Software Architectures Credits: 3
• SWE 723 - Precise Modeling Credits: 3
• SWE 727 - Quality of Service for Software Architectures Credits: 3
• SWE 763 - Software Engineering Experimentation Credits: 3
• SWE 781 - Secure Software Design and Programming Credits: 3
• SWE 795 - Advanced Topics in Software Engineering Credits: 3
• SWE 798 - Research Project Credits: 3

Notes:

Students enrolled in the MS in Information Systems Program must substitute SWE 620 for INFS 622 to obtain this certificate. Credit is not given for taking both INFS 622 and SWE 620; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS/SWE 706 is included, it is possible to complete the MS in computer science and the certificate in software engineering within 30 hours.

Total: 12 credits
Web-Based Software Engineering Graduate Certificate

Banner Code: VS-CERG-WBSE

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software engineering but do not want to complete requirements for a master’s degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from department or the department web site. The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses: INFS 501 Discrete and Logical Structures for Information Systems, SWE 510 Object-Oriented Programming in Java, INFS 515 Computer Organization, and INFS 519 Program Design and Data Structures.

Students not enrolled in a Mason graduate degree program should apply to the certificate program through the Volgenau School Graduate Admissions Office. Students enrolled in a Mason graduate degree program should contact the department for admission to the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Certificate Requirements

Students must complete four courses with an average grade of B or higher for a total of 12 credits of graduate study.

Three required courses (9 credits):

- SWE 622 - Distributed Software Engineering Credits: 3
- SWE 632 - User Interface Design and Development Credits: 3
- SWE 642 - Software Engineering for the World Wide Web Credits: 3

One of the following courses (3 credits):

- CS 675 - Distributed Systems Credits: 3
- INFS 614 - Database Management Credits: 3
- ISA 656 - Network Security Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- SWE 621 - Software Modeling and Architectural Design Credits: 3
- SWE 637 - Software Testing Credits: 3
- SWE 645 - Component-Based Software Development Credits: 3
- SWE 781 - Secure Software Design and Programming Credits: 3
Total: 12 credits

Doctoral Degree

Computer Science, PhD

Banner Code: VS-PHD-CS

School: The Volgenau School of Information Technology and Engineering

Department: Computer Science

The PhD program requires course work, qualifying and comprehensive examinations, and a doctoral dissertation that is first proposed and eventually defended. Mason’s general doctoral requirements apply to this program.

Admission Requirements

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, they must have taken the GRE exams: the General Test is required from every applicant; the Subject Test in Computer Science is not required but is recommended. Finally, each applicant must provide a brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Qualifying Exams

Students must demonstrate breadth of knowledge in computer science by passing written qualifying exams. The exams are offered once every semester (usually in the week before the semester begins). To qualify, each student must pass exams in four areas, one of which is foundations of computer science. The other three areas are chosen from these eight areas: operating systems, networks, compilers and languages, object-oriented software specification and construction, software modeling and architectural design, artificial intelligence, database systems, and information systems security. The four exams must be attempted in the same semester, and a failed exam may be retaken once only in the next semester. A student who fails to pass the four exams in two consecutive semesters is subject to termination from the program. Each student must take a set of four exams no later than the first opportunity following the completion of 18 credits. If a student enters the program without a master’s degree in computer science or a related area, then the exams must be taken no later than the first opportunity following the completion of 30 credits.

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be tenured or tenure-track faculty in the Computer Science Department. The fourth member must be from outside the department. The chair of the dissertation committee, who must also be the dissertation director, must be tenured or tenure-track faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department and the associate dean for graduate studies of the Volgenau School.
Comprehensive Exam

Students must pass an oral comprehensive exam in which they demonstrate depth of knowledge in their intended area of research and ability to perform original research in that area. The scope of the oral exam is defined by a reading list prepared by the student and the dissertation director. The list should include research papers and textbooks that adequately cover the basic tools used in the research area, the fundamentals of the research area, and state-of-the-art knowledge in the specific focus of research. The reading list must be accompanied by a one-page description of the intended research. This document must be approved by the dissertation committee prior to the exam and becomes part of the student’s record. The duration of the oral exam is typically two hours.

Students who fail the exam are allowed to retake it once. Failure in the second attempt results in dismissal from the program.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate enrolls in CS 999 Doctoral Dissertation. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and possibly the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is dismissed from the program.

Degree Requirements

The course requirement for the degree is 72 credits. Of these, 30 credits, at most, may be granted for an approved MS degree. Courses that constitute a student’s plan of study will be chosen in consultation with the student’s advisor and/or dissertation committee.

The following courses, totaling 30 credits, are required from all students:

- CS 700 - Quantitative Methods and Experimental Design in Computer Science Credits: 3
- CS 800 - Computer Science Colloquium Credits: 1
- CS 990 - Dissertation Topic Presentation Credits: 1
- CS 998 - Doctoral Dissertation Proposal Credits: 1-12
Note:

Students must enroll in two sections of CS 800 for a total of 2 credits.

Students must complete a minimum of 24 credits of CS 998 and CS 999, with a minimum of 12 credits of CS 999 (only 24 credits of CS 998 and CS 999 may be applied toward the degree).

Students may enroll in CS 998 only after passing the qualifying exams, and they may enroll in CS 999 only after advancing to candidacy.

The remaining 12 credits must be obtained in advanced graduate courses (an advanced graduate course is a graduate course that requires another graduate course as a prerequisite).

Total: 72 credits

Concentration

▲ Concentration in Information Security and Assurance (ISA)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information security. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Volgenau School. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator and department chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.
For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲ Concentration in Information Systems (ISYS)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information systems. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a Computer Science faculty member. The composition of the doctoral supervisory committee must be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and the dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲ Concentration in Software Engineering (SWE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in software engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Computer Science Department. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the
Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

**Electrical and Computer Engineering**

Phone: 703-993-1569  
Web: ece.gmu.edu

School: The Volgenau School of Information Technology and Engineering

**Faculty**

**Professors:** Allnutt, Cook, Ephraim, Gertler, Griffiths, Ioannou, Jabbari, Levis, Manitius (chair), Mulpuri, Pancrazio

**Associate professors:** Berry, Chang, Gaj, Hintz, Mark, Pachowicz, Paris, W. Sutton, Wage

**Assistant professors:** Ikonomidou, Kaps, Li, Nelson, Peixoto, Sikdar

**Research professors:** Katona, Wagenhals, Zaidi

**Instructor:** Lorie, Pandula

**Adjunct professors:** Abgariah, Allen, Alper, Amos, Beatty, Bollino, Durie, Follendore, Fowler, Gong, Hall, Hassan, Herman, Hibey, Hockensmith, Hrnjez, Lazarevich, Leaf, McCaughey, Orebaugh, Osgood, Pollak, Sabzevari, Sheppard, Storey, Sud, Tham, Tran, Van Meter T, West S, Williams, Wilson, Wu, Young

**Emeritus faculty:** Baraniecki, Beale, Black, Schaefer, Tabak, Van Trees

The undergraduate education mission of the ECE Department is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

The objectives of undergraduate programs within the ECE Department relate to the abilities of our graduates three to five years after graduation. These objectives include:

- Technical knowledge: Graduates will be able to apply the fundamentals in the appropriate engineering discipline as demonstrated by success as productive engineers in industry, government, or graduate school.
- Preparation for further study: Graduates will have the knowledge and skills to engage in lifelong learning.
- Professionalism: Graduates will have the skills and understanding needed to fulfill their professional responsibilities as engineers, including written and oral communication, ethics, and teamwork.

Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. ECE offers the PhD in electrical and computer engineering, MS degrees in computer engineering, electrical engineering, telecommunications, and computer forensics, and certificates in communications and networking, signal processing, and very large-scale integration design and manufacturing.

ECE is committed to high standards of teaching and research excellence in communications, digital systems design, computer networks, microprocessor and embedded systems, distributed computing, signal and image processing, control systems, intelligent systems, systems integration and microelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.
The courses in these programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter the programs on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships, research assistantships, and work-study and co-op agreements with local industry.

**Course Work**

The Electrical and Computer Engineering (ECE) Department offers all courses designated ECE, BENG, CRFS and TCOM in the Courses chapter of this catalog. The department also offers some ENGR courses.

**Undergraduate Degree**

**Bioengineering, BS (pending SCHEV approval)**

Return to: Electrical and Computer Engineering (ECE)

**Banner Code: VS-BS-BIOE**

**School: The Volgenau School of Information Technology and Engineering**

**Department: Electrical and Computer Engineering**

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding.

This program concentrates on making measurements and analyzing complex data. It is challenging since it will provide a solid foundation in engineering or computer science, and also give in-depth exposure to the life sciences. The impact of engineering and computer science on biomedicine is wide, ranging from improved medical diagnosis through advanced imaging technologies, to enhanced biological understanding gained by computational models of protein function. With the growing demand for better health care while also containing its costs, the need for bioengineers is expected to be high.

The multidisciplinary training in this field will make graduates competitive for an entry-level position in government or the biomedical industry. It also enables students to continue their education in graduate school or medical school.

The Volgenau School's program leading to a BS degree in Bioengineering has recently been developed, and it is subject to approval by the State of Virginia. It is planned to be initiated in Fall 2010.

**Degree Requirements**

All bioengineering students are strongly advised to see their major advisor before course registration each semester. Students considering bioengineering who have not declared a major are also encouraged to obtain up-to-date information and advice from any of the faculty members involved in the program.

Students must complete each BENG, BIOL, ECE and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.
The 120 credits required for the BS in bioengineering are as follows:

**Bioengineering:**

- Introduction to Bioengineering (BENG 101) Credits: 3
- Biomedical Signals and Systems Credits: 3
- Discrete Signals and Systems in Bioengineering Credits: 3
- Bioengineering Measurements Credits: 3
- Bioengineering Measurements Lab Credits: 1
- Modeling of Biomedical Systems Credits: 3
- Assistive Control of Biomedical Systems Credits: 3
- Senior Seminar I Credits: 1
- Senior Project I (BENG 492) Credits: 2
- Senior Project II (BENG 493) Credits: 2
- Senior Seminar II Credits: 1

**Technical Electives Credits: 9**

**Computer Science:**

- Introduction to Computer Programming (CS 112) Credits: 4
- Introduction to Bioinformatics OR Molecular Bioinformatics Credits: 3

T**wo approved computer/computational systems (Technical Foundation) courses Credits: 6**

**Engineering:**

- ENGR 107 - Introduction to Engineering Credits: 2
- BENG 380 - Introduction to Circuits and Electronics Credits: 3
- BENG 381 - Circuits and Electronics Lab Credits: 1

**Life Sciences:**

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 425 - Human Physiology Credits: 3
Literature general education course Credits: 3

Arts general education course Credits: 3

Global understanding course Credits: 3

English:

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
- COMM 100 - Public Speaking Credits: 3

Economics:

- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Western civilization (choose one):

- HIST 100 - History of Western Civilization Credits: 3
- HIST 125 - Introduction to World History Credits: 3

Mathematics:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
Physics:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Chemistry:

- CHEM 251 - General Chemistry for Engineers Credits: 4

Biocomputation Concentration (BIOC)

The biocomputation concentration allows students to acquire knowledge and expertise in computer science as they apply to biomedical problems, thereby creating bioengineers with analytical skills in both bioelectronics and biocomputation. In place of PHYS 262 (3), PHYS 263 (1), and Assistive Control of Biomedical Systems (3), students in this Concentration take MATH 125 Discrete Mathematics (3), CS 101 Computer Ethics (1), and CS 450 Database Concepts (3). Students choosing this concentration will take CS 402 Molecular Bioinformatics (3) as one of their three Technical Electives, and they will elect another one from approved computer science or statistics courses.

Sample Schedule

First Semester

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGR 107 - Introduction to Engineering Credits: 2
- CS 112 - Introduction to Computer Programming Credits: 4
- ENGL 101 - Composition Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Total: 16 credits
Second Semester

- Literature Elective   Credits: 3
- BENG 101 - Introduction to Bioengineering Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Total: 14 credits

Third Semester

- Global Understanding Elective   Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- CHEM 251 - General Chemistry for Engineers Credits: 4

Total: 17 credits

Fourth Semester

- MATH 214 - Elementary Differential Equations Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Total: 14 credits

Fifth Semester

- Discrete Signals and Systems in Bioengineering   Credits: 3
- **Technical Foundation I   Credits: 3
- Fine Arts Elective   Credits: 3
- BENG 380 - Introduction to Circuits and Electronics Credits: 3
- BENG 381 - Circuits and Electronics Lab Credits: 1
- BIOL 425 - Human Physiology Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Total: 16 credits

Sixth Semester

- Bioengineering Measurements Credits: 3
- Bioengineering Measurements Lab Credits: 1
- Modeling and Control of Biomed Systems
- **Technical Foundation II Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- COMM 100 - Public Speaking Credits: 3

Total: 16 credits

Seventh Semester

- Bioengineering Senior Seminar I Credits: 1
- Assistive Control of Biomedical Systems Credits: 3
- Introduction to Bioinformatics OR Molecular Bioinformatics Credits: 3
- Technical Elective Credits: 3
- BENG 492 - Senior Advanced Design Project I Credits: 2
- ENGL 302 - Advanced Composition Credits: 3

Total: 15 credits

Eighth Semester

- Bioengineering Senior Seminar II Credits: 1
- Technical Elective Credits: 3
- Technical Elective Credits: 3
- BENG 493 - Senior Advanced Design Project II Credits: 2
- HIST 100 - History of Western Civilization Credits: 3
- OR
- HIST 125 - Introduction to World History Credits: 3
Total: 12 credits

**Sequence of Technical Courses**

This sequence of two technical courses allows students to elect foundation courses in computers and/or computational systems. Examples of approved sequences are ECE 301 Digital Electronics and CS 222 Computer Programming for Engineers, and CS 211 Object-Oriented Programming and CS 310 Data Structures. Approval of other sequences may be requested by students.

**Change of Major**

Students who want to change their major to bioengineering must have at least a 2.75 GPA in all math, physics, biology and engineering courses, and should have successfully completed MATH 114.

**Writing-Intensive Requirement**

Mason’s writing-intensive requirement is satisfied by completion of BENG 492 and 493, Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.

**Computer Engineering, BS**

**Banner Code: VS-BS-CPE**

*School: The Volgenau School of Information Technology and Engineering*

*Department: Electrical and Computer Engineering*

The field of computer engineering can be described as a blend of electrical engineering and computer science. It is an amalgam of the computer hardware orientation of an electrical engineering program and the operating systems and languages of a computer science program. Computer engineers are involved in research, development, design, production, and operation of a wide variety of digital systems, from integrated circuits to computer systems and large-scale computer networks. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around software running on advanced hardware that can simulate and assist in the design of new digital systems. Advanced software, such as VHDL, and software tools, such as logic and system design tools by Mentor Graphics and Cadence Design Systems, can be used to model hardware and hardware functionality from the system and architecture level down to the gate level and include relations to integrated circuit fabrication technology. Design and testing methodology involving these tools is taught in the program.

Career opportunities exist in engineering research and development, product design, digital system design and integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

The bachelor’s program in computer engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; telephone 410-347-7700. The computer engineering program is staffed by 25 full-time professors, including eight fellows of IEEE or other professional societies.
The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective concentrations are offered, ranging from strongly hardware-oriented concentrations to strongly software-oriented ones. A major project with appropriate planning, documentation, and oral and written reports is required.

The requirements for the degree may be satisfied on a part-time or co-op basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, computer engineering majors are eligible to apply through the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

### Degree Requirements

All computer engineering students are strongly encouraged to see their major advisor each semester before course registration. Students interested in computer engineering who have not declared a major are also invited to obtain advising at the ECE Department office. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, ENGR, and CS course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in computer engineering are as follows:

**Electrical and computer engineering:**
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 445 - Computer Organization Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2

**Technical Electives Credits: 9**

**Computer science:**
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 262 - Introduction to Low-Level Programming Credits: 1
- CS 367 - Computer Systems and Programming Credits: 3
- CS 471 - Operating Systems Credits: 3

**Engineering:**
- ENGR 107 - Introduction to Engineering Credits: 2
Literature general education course Credits: 3  
Arts general education course Credits: 3  
Global understanding general education course Credits: 3

English:
- ENGL 101 - Composition Credits: 3  
- ENGL 302 - Advanced Composition Credits: 3  
- COMM 100 - Public Speaking Credits: 3

Economics:
- ECON 103 - Contemporary Microeconomic Principles Credits: 3

Western Civilization: (choose one of these)
- HIST 100 - History of Western Civilization Credits: 3  
- HIST 125 - Introduction to World History Credits: 3

Mathematics:
- MATH 113 - Analytic Geometry and Calculus I Credits: 4  
- MATH 114 - Analytic Geometry and Calculus II Credits: 4  
- MATH 125 - Discrete Mathematics I Credits: 3  
- MATH 203 - Linear Algebra Credits: 3  
- MATH 213 - Analytic Geometry and Calculus III Credits: 3  
- MATH 214 - Elementary Differential Equations Credits: 3  
- STAT 346 - Probability for Engineers Credits: 3

Physics:
- PHYS 160 - University Physics I Credits: 3  
- PHYS 161 - University Physics I Laboratory Credits: 1  
- PHYS 260 - University Physics II Credits: 3  
- PHYS 261 - University Physics II Laboratory Credits: 1  
- PHYS 262 - University Physics III Credits: 3

Note:
General education courses should be selected from the department’s list of approved courses. The Synthesis general education requirement is satisfied by ECE 492 plus ECE 493. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social science and humanities courses listed above. Technical electives should be selected from the department’s list of approved technical elective concentrations. Students are also encouraged to propose additional technical elective concentrations for approval.

Total: 120 credits

Sample Schedule
The following presents a sample schedule that undergraduate computer engineering majors would pursue to obtain a bachelor’s degree.

First Semester

- CS 112 - Introduction to Computer Programming Credits: 4
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Total: 14 credits

Third Semester

- Literature course (3 credits)
- ECE 201 - Introduction to Signal Analysis Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Total: 16 credits

Fourth Semester

- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 331 - Digital System Design Credits: 3
• ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
• MATH 214 - Elementary Differential Equations Credits: 3
• CS 262 - Introduction to Low-Level Programming Credits: 1

Total: 16 credits

Fifth Semester

• ECE 333 - Linear Electronics I Credits: 3
• ECE 334 - Linear Electronics Lab I Credits: 1
• ECE 445 - Computer Organization Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
• STAT 346 - Probability for Engineers Credits: 3
• CS 367 - Computer Systems and Programming Credits: 3

Total: 16 credits

Sixth Semester

• COMM 100 - Public Speaking Credits: 3
• CS 471 - Operating Systems Credits: 3
• PHYS 262 - University Physics III Credits: 3
• ECE 448 - FPGA and ASIC Design with VHDL Credits: 4

Total: 13 credits

Seventh Semester

• Technical elective Credits: 3
• Global understanding course Credits: 3
• ECE 447 - Single-Chip Microcomputers Credits: 4
• ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• HIST 100 - History of Western Civilization Credits: 3

OR
- HIST 125 - Introduction to World History Credits: 3

Total: 15 credits

Eighth Semester

- Technical elective Credits: 3
- Technical elective Credits: 3
- Arts course Credits: 3
- ECE 493 - Senior Advanced Design Project II Credits: 2
- ECE 465 - Computer Networking Protocols Credits: 3

Total: 14 credits

Change of Major

Students who want to change their majors to computer engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement

Mason’s writing-intensive requirement is satisfied by completion of ECE 492 and 493, or BENG 492 and BENG 493, Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.

Double Major Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at The Volgenau School web site ite.gmu.edu.

Electrical Engineering, BS

Banner Code: VS-BS-ELEN

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering
Electrical engineering is a major field of modern technology. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including integrated circuits and microwave and laser devices, communication systems, control systems, radar, robots, large telecommunication networks, and power networks.

The bachelor’s program in electrical engineering at Mason is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; telephone 410-347-7700. The electrical engineering program is staffed by 25 full-time professors, including eight fellows of IEEE or other professional societies. The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the important areas of electronics, networks, communications and signal processing, computer engineering, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives, 2 credits of advanced engineering labs, and 3 credits of senior advanced design project, which may be used for further concentration in one of these areas.

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Degree requirements may be satisfied on a part-time or co-op basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. In addition to the usual financial aid available to all students through the Office of Student Financial Aid, electrical engineering majors are eligible to apply at the ECE Department for several scholarships provided by professional societies and industrial organizations, including the Armed Forces Communications and Electronics Association, the Association of Old Crows, the Institute of Electrical and Electronics Engineers, and Rockwell International.

Degree Requirements

All electrical engineering students are strongly encouraged to see their major advisor before course registration each semester. Students interested in electrical engineering who have not declared a major also are invited to obtain advising from the ECE Department. Students are strongly encouraged to follow the sample schedule below to ensure that course prerequisites are satisfied.

Students must complete each ECE, BENG and ENGR course presented as part of the required 120 credits for the degree with a grade of C or better.

The 120 credits required for the BS in electrical engineering are as follows:

**Electrical and computer engineering:**
- ECE 101 - Information Technology for Electrical Engineers Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 305 - Electromagnetic Theory Credits: 3
- ECE 320 - Signals and Systems II Credits: 3
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- ECE 421 - Classical Systems and Control Theory Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
- ECE 445 - Computer Organization Credits: 3
- ECE 460 - Communication and Information Theory Credits: 3
- ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ECE 493 - Senior Advanced Design Project II Credits: 2
  Advanced Engineering Labs Credits: 2
  Technical Electives Credits: 9

Computer science:
• CS 112 - Introduction to Computer Programming Credits: 4
• CS 222 - Computer Programming for Engineers Credits: 3

Engineering:
• ENGR 107 - Introduction to Engineering Credits: 2
  Literature general education course Credits: 3
  Arts general education course Credits: 3
  Global understanding course Credits: 3

English:
• ENGL 101 - Composition Credits: 3
• ENGL 302 - Advanced Composition Credits: 3
• COMM 100 - Public Speaking Credits: 3

Economics:
• ECON 103 - Contemporary Microeconomic Principles Credits: 3

Western civilization (choose one):
• HIST 100 - History of Western Civilization Credits: 3
• HIST 125 - Introduction to World History Credits: 3

Mathematics:
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 346 - Probability for Engineers Credits: 3

Physics:
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Note:

General education courses should be selected from the department’s list of approved courses. The Synthesis general education requirement is satisfied by ECE 492 plus ECE 493 or by BENG 492 plus BENG 493. All students must submit at least 24 credits of social science and humanities course work, which is normally satisfied by the 24 credits of university general education social
science and humanities courses listed above. Technical electives should be selected from the department’s list of approved courses. The required design content must be satisfied by the technical electives.

Concentrations

Concentrations are available within the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student’s transcript on graduation.

▲ Concentration in Bioengineering (BIOE)

In place of 13 credits of PHYS 262, PHYS 263, ECE 460, ECE 492, ECE 493, and one 3-credit technical elective as listed under the Degree Requirements section above, take 13 credits of:

- BIOL 213 - Cell Structure and Function Credits: 4
- BENG 401 - Bioengineering Instrumentation and Design Credits: 4
- BENG 402 - Bioengineering Instrumentation and Design Laboratory Credits: 1
- BENG 492 - Senior Advanced Design Project I Credits: 2
- BENG 493 - Senior Advanced Design Project II Credits: 2

▲ Concentration in Communications and Signal Processing (CSP)

Students must complete:

- ECE 461 - Communication Engineering Laboratory Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a communications and signal processing topic)

And three courses from:

- ECE 410 - Principles of Discrete-Time Signal Processing Credits: 3
- ECE 462 - Data and Computer Communications Credits: 3
- ECE 463 - Digital Communications Systems Credits: 3
- ECE 464 - Modern Filter Design Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (communications and signal processing topic only)
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (communication and signal processing topic only)
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3

▲ Concentration in Computer Engineering (CPE)
Students must complete:

- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a computer engineering topic)

And two courses from:

- ECE 431 - Digital Circuit Design Credits: 3
- ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (computer engineering topic only)
- ECE 548 - Sequential Machine Theory Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3
- CS 471 - Operating Systems Credits: 3

▲ Concentration in Control Systems (CON)

- ECE 429 - Control Systems Lab Credits: 1
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with a control systems topic)

And three courses from:

- ECE 422 - Digital Control Systems Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 450 - Introduction to Robotics Credits: 3
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (control systems topic only)
- ECE 511 - Microprocessors Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 549 - Theory and Applications of Artificial Neural Networks Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (control systems topic only)

▲ Concentration in Electronics (ELE)

Students must complete

- ECE 434 - Linear Electronics II Laboratory Credits: 1

  OR

- ECE 435 - Digital Circuit Design Laboratory Credits: 1

  AND
- ECE 492 - Senior Advanced Design Project I Credits: 1
- ECE 493 - Senior Advanced Design Project II Credits: 2 (with an electronics topic)

And three courses from:

- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 437 - Principles of Microelectronic Device Fabrication Credits: 3
- ECE 447 - Single-Chip Microcomputers Credits: 4
- ECE 448 - FPGA and ASIC Design with VHDL Credits: 4
- ECE 499 - Special Topics in Electrical Engineering Credits: 0-4 (electronics topic only)
- ECE 520 - Applications of Analog and Digital Integrated Circuits Credits: 3
- ECE 563 - Introduction to Microwave Engineering Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 584 - Semiconductor Device Fundamentals Credits: 3
- ECE 586 - Digital Integrated Circuits Credits: 3
- ECE 587 - Design of Analog Integrated Circuits Credits: 3
- ECE 590 - Selected Topics in Engineering Credits: 3 (electronics topic only)
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

Sample Schedule

The following is a sample schedule that an undergraduate electrical engineering major would follow to obtain a bachelor’s degree.

First Semester

- CS 112 - Introduction to Computer Programming Credits: 4
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- ENGL 101 - Composition Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 16 credits

Second Semester

- CS 222 - Computer Programming for Engineers Credits: 3
- ECE 101 - Information Technology for Electrical Engineers Credits: 3
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Total: 14 credits

Third Semester

- Literature course Credits: 3
- ECE 201 - Introduction to Signal Analysis Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

Total: 16 credits

Fourth Semester

- ECE 280 - Electric Circuit Analysis Credits: 5
- ECE 220 - Signals and Systems I Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Total: 15 credits

Fifth Semester

- Arts course Credits: 3
- ECE 320 - Signals and Systems II Credits: 3
- ECE 331 - Digital System Design Credits: 3
- ECE 332 - Digital Electronics and Logic Design Lab Credits: 1
- ECE 333 - Linear Electronics I Credits: 3
- ECE 334 - Linear Electronics Lab I Credits: 1
- STAT 346 - Probability for Engineers Credits: 3

Total: 17 credits

Sixth Semester
• COMM 100 - Public Speaking Credits: 3
• ECE 421 - Classical Systems and Control Theory Credits: 3
• ECE 433 - Linear Electronics II Credits: 3
• ECE 445 - Computer Organization Credits: 3
• ECE 460 - Communication and Information Theory Credits: 3

Total: 15 credits

Seventh Semester

• Advanced engineering lab Credits: 1
• Technical elective Credits: 3
• Global understanding course Credits: 3
• ECE 305 - Electromagnetic Theory Credits: 3
• ECE 491 - Engineering Seminar Credits: 1
• ECE 492 - Senior Advanced Design Project I Credits: 1
• ENGL 302 - Advanced Composition Credits: 3

Total: 15 credits

Eighth Semester

• Advanced engineering lab Credits: 1
• Technical elective Credits: 3
• Technical elective Credits: 3
• ECE 493 - Senior Advanced Design Project II Credits: 2
  AND, either
• HIST 100 - History of Western Civilization Credits: 3
  OR
• HIST 125 - Introduction to World History Credits: 3

Total: 12 credits

Change of Major

Students who want to change their majors to electrical engineering must have at least a 2.75 GPA in all math, physics, engineering, and computer science courses, and should have successfully completed MATH 114.

Writing-Intensive Requirement
Mason’s writing-intensive requirement is satisfied by completion of ECE 492 and 493, or BENG 492 and BENG 493, Senior Advanced Design Project I and II, in which various aspects of project documentation and reports are prepared and critiqued. The faculty provides feedback on student writing. Drafts and revisions are required.

Double Major Programs for Computer Engineering and Electrical Engineering

Computer engineering majors and electrical engineering majors can earn degrees with double majors in a number of disciplines. Computer engineering and computer science are frequently combined. Electrical engineering has been combined with computer engineering, computer science, physics or math. Details are available in the department brochures or at the Volgenau School web site ite.gmu.edu.

Bachelor's/Accelerated Master's Program

Computer Engineering, BS/Computer Engineering, Accelerated MS

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in computer engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in computer engineering in five years with 144 credits.

Admission Requirements

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.50 undergraduate GPA.

Degree Conferral

Students must apply to have the BS in computer engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

Degree Requirements

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.50 during the entire BS/MS program and present a GPA of at least 3.50 for the 24 credits of graduate work submitted for the MS degree.
Electrical Engineering, BS/Electrical Engineering, Accelerated MS

*School: The Volgenau School of Information Technology and Engineering*

*Department: Electrical and Computer Engineering*

This program is for highly capable students who are interested in immediately continuing their undergraduate academic program in electrical engineering into a graduate program. It allows for the completion of both bachelor’s and master’s degrees in electrical engineering in five years with 144 credits.

**Admission Requirements**

Students can apply for the program during the semester in which they expect to complete 90 undergraduate credits applicable toward the BS degree. An overall GPA of at least 3.50 at the time of application is required. Criteria for admission are identical to criteria for admission to the MS in Electrical Engineering Program or the MS in Computer Engineering Program. Application is made using the accelerated graduate program application forms, and all usual requirements must be met. The accelerated program application form specifies the overlapping courses and details the 3.50 undergraduate GPA.

**Degree Conferral**

Students must apply to have the BS in electrical engineering conferred the semester before they expect to complete the BS requirements. At the completion of the MS requirements, the MS degree will be awarded.

**Degree Requirements**

Students must complete 144 credits that satisfy all the requirements for the BS and MS degrees, with 6 credits overlap. Students take 6 credits of 500-level courses as part of their technical electives or substitutes for required courses as part of their 120-credit undergraduate program. The specific courses that may be taken and applied to the accelerated program will be specified by the ECE Department. Students may take additional graduate-level courses as part of their BS technical electives with advisor approval. These additional graduate-level courses will not count toward the MS degree. Students admitted to the accelerated program must maintain an overall GPA of at least 3.50 during the entire BS/MS program and present a GPA of at least 3.50 for the 24 credits of graduate work submitted for the MS degree.

Information Technology, BS/Telecommunications, Accelerated MS

*School: The Volgenau School of Information Technology and Engineering*

*Department: Electrical and Computer Engineering*

Students in the BS in Information Technology Program may elect to enter the Accelerated MS in Telecommunications (MS in TCOM) Program while they are undergraduate students. The accelerated program is designed for qualified undergraduate students in the information technology program who would like to proceed directly into the MS in TCOM Program, completing the two degrees with 144 credits. Students must satisfy requirements for the undergraduate degree (120 credits) and the MS degree (30 credits), with 6 credits of overlap permitted. The MS in TCOM is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows and will be substituted for BS degree concentration electives, subject to prior approval by an advisor. Note: Students in the accelerated program must take ECE 301 as one of their BS in information technology concentration electives.

Applicants must be Mason undergraduate students in the BS in Information Technology Program. Students may apply for the accelerated program during the semester after which they will have completed 90 or more credits applicable toward the BS
degree. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission into the accelerated program are identical to criteria for admission into the MS in TCOM Program, except that students do not need to have completed an undergraduate degree prior to admission.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, after students have been accepted into the accelerated program, they must maintain a 3.25 GPA until they have satisfied requirements for the undergraduate degree. They must then maintain a minimum 3.00 GPA in the graduate segment of the accelerated program. Should their GPA fall below 3.00 while a graduate student, they will be dropped from the accelerated program to the regular program, and those graduate TCOM courses taken and applied to the BS in information technology will no longer be admissible for the MS in TCOM. If students are dropped from the accelerated program and have taken and applied TCOM core courses toward the BS degree, then they need not repeat those courses for the regular MS in TCOM Program if they obtained a grade of B or higher in those courses. But they will need to take elective courses in their place to satisfy the 30-credit requirement for the regular MS in TCOM.

Similarly, if students are dropped from the accelerated program and have taken and applied non core TCOM courses toward the BS degree, then they do not need to repeat those courses for the regular MS in TCOM Program if they obtained a grade of C or higher for those courses. Elective courses will be required to replace TCOM courses already taken and dropped from the program. Note: Up to two C grades may be carried in the regular TCOM program in non mandatory core courses. A minimum GPA of 3.00 is required to graduate with an MS in TCOM.

Students must complete all requirements for the BS degree. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in TCOM is granted on completion of all requirements for the accelerated degree.

TCOM courses that may be taken as an undergraduate student as part of the Accelerated BS in Information Technology/MS in TCOM Program are noted in the listing below. Note: All of the prerequisite courses indicated below must be passed with a grade of B or higher.

### Degree Requirements

#### Telecommunications courses:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5 (prerequisite: acceptance into the Accelerated BSIT/ MS TCOM Program)
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5 (prerequisites: TCOM 501, IT 341, or equivalent)
- TCOM 503 - Fiber Optic Communications Credits: 1.5 (prerequisite: TCOM 500 or equivalent)
- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5 (prerequisite: TCOM 501, IT 341, or equivalent)
- TCOM 509 - Internet Protocols Credits: 1.5 (prerequisites: TCOM 501 and 502, IT 341, or equivalent)
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5 (prerequisite: TCOM 505)
- TCOM 513 - Optical Communications Networks Credits: 1.5 (prerequisite: TCOM 503)
- TCOM 519 - Voice over IP Credits: 1.5 (prerequisites: TCOM 509, IT 341, or equivalent)
- TCOM 529 - Advanced Internet Protocols Credits: 1.5 (prerequisite: TCOM 509)
- TCOM 539 - Advanced Voice over IP Credits: 1.5 (prerequisite: TCOM 519)
- TCOM 551 - Digital Communication Systems Credits: 3 (prerequisite: TCOM 500 or equivalent)
- TCOM 607 - Satellite Communications Credits: 3 (prerequisite: TCOM 551, ECE 463, or equivalent)
Note:
Students in the accelerated program who have passed IT 341 with a grade of B or higher will not be required to take TCOM 501 in the MS in TCOM core and may take an elective 1.5-credit course instead.

Master's Degree

Computer Engineering, MS

Banner Code: VS-MS-CPE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The computer engineering field is at the interface of the computer science and electrical engineering disciplines because it involves knowledge of hardware and software development. The major distinction between computer engineering and computer science is that the computer engineer is more concerned with the physical implementation of computing devices, the interaction between hardware and software, and the methodologies for designing digital systems. The major distinction between computer engineering and electrical engineering is that the computer engineer is more concerned with the computational aspects of electrical engineering problems and the implementation of these solutions in digital devices. The computer engineering program offers the following emphases: digital systems design, computer networks, distributed computing systems, microprocessor and embedded systems, and network and system security.

Admission

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

Admission Categories

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive Bs or better in two core courses specific to the student’s selected program and specialization. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Admission Requirements for Computer Engineering or Electrical Engineering Masters Program

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:
Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments

Detailed statement of career goals and aspirations

For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE

For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one emphasis area of computer engineering; it cannot be a set of disjointed courses.

The plan of study for the degree must include the following:

Two core courses (with B or better in each) from the following:

- CS 571 - Operating Systems Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 545 - Digital System Design with VHDL Credits: 3
- ECE 548 - Sequential Machine Theory Credits: 3

Minimum of 3 courses:

With a grade of B or better in each, at the 600 level and above (not including ECE 798 or 799), including approved doctoral courses (800 and 900 levels).

Electives:

The remaining courses must be taken from the list of approved computer engineering courses (available through the ECE and Computer Science Department offices and on the web), which includes selected courses offered by both departments.

The plan of study usually has no fewer than 15 credits of courses designated ECE.
Lists of courses appropriate for emphasis areas, such as digital systems design, computer networks, network and system security, and microprocessor and embedded systems, are available from the department office. A self-defined emphasis may be created when appropriate, with the approval of the computer engineering graduate program coordinator. This emphasis must include components of hardware and software development and the corresponding plan of study should comprise courses from ECE and the Computer Science Departments.

**Common Degree Requirements for CPE or ELEN Master’s Program**

The following policies apply to students pursuing the MS in computer engineering or the MS in electrical engineering.

**Student Advising**

Newly admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an emphasis from those available in each MS degree program. Students then are assigned an academic advisor from that specialization.

**Plan of Study**

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

**Seminar Requirement**

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

**GPA Requirements**

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

**Graduation Requirements**

To complete requirements for graduation, students may select one of the following options:

**Thesis Option**

Students must complete ECE 799 Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major emphasis, and one from outside the emphasis. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of which must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.
Scholarly Paper Option

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

Computer Forensics, MS

Banner Code: VS-MS-CFRS

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

Computer forensics is a new discipline addressing the collection, processing, and analysis of digital information so that this information can be admitted as evidence in a court of law. It is interdisciplinary in its nature with the inclusion of computer engineering, computer science, information technology, law, and ethics. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information there has been an increase in cyber crime. In response to this, computer forensics has become an important profession serving both public and private sectors. The M.S. in Computer Forensics will prepare graduates for careers in law enforcement and various other branches of government, and in the corporate sector such as banking and finance, by combining academic education with real world practical techniques, and by offering advanced training in analyzing digital evidence, in intrusion forensics, and in legal and ethical issues.

Admission Requirements

Students who hold a B.S. degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, or students who have equivalent work experience indicating analytical aptitude, may apply to the M.S. in computer forensics. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree with a GPA of 3.000 or higher, with no more than 6 credit hours of C grades. The plan of study includes an 18-credit required Core component which includes a mandatory capstone course and a 12-credit elective component as shown below:

Core courses (18 credits):

- CFRS 500 - Introduction to Technologies of Forensics Value Credits: 3
  or
- ISA 522 - Information Security Essentials Credits: 3
  or
- ISA 562 - Information Security Theory and Practice Credits: 3
Elective courses (12 credits):

- CFRS 663 - Operations of Intrusion Detection for Forensics Credits: 3
- CFRS 760 - Legal and Ethical Issues in IT Credits: 3 *
- CFRS 770 - Fraud and Forensics in Accounting Credits: 3 *
- CFRS 780 - Advanced Topics in Computer Forensics Credits: 3
- ECE 511 - Microprocessors Credits: 3
- ECE 746 - Advanced Applied Cryptography Credits: 3
- INFS 785 - Data Mining for Homeland Security Credits: 3
- ISA 650 - Security Policy Credits: 3
- ISA 652 - Security Audit and Compliance Testing Credits: 3
- ISA 656 - Network Security Credits: 3
- ISA 674 - Intrusion Detection Credits: 3
- ISA 785 - Research in Digital Forensics Credits: 3
- SOCI 607 - Criminology Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3

Please note:

*Both CFRS 760 and CFRS 770 may be taken but only one may be used in the core component.

Other courses may be appropriate as elective courses in the degree program, but they must be approved prior to registration.

Total: 30 credits

Electrical Engineering, MS

Banner Code: VS-MS-ELEN

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The electrical engineering program offers the following emphases: bioengineering, communications, signal processing, control and robotics, and microelectronics.
Admission

Admission is very competitive. The department’s policy is to admit only those students who have demonstrated a potential for outstanding performance in their graduate work.

Admission Categories

Each student may be admitted into one of the following categories: degree, provisional, or nondegree. Provisional admission is for anyone whose past performance provides reasonable, but not strong, evidence of ability to pursue graduate work. To advance to degree status, a provisional student must achieve a 3.00 GPA after 12 credits, remove all undergraduate deficiencies by completing the corresponding courses with grades of B or better, and receive Bs or better in two core courses specific to the student’s selected program and emphasis. The nondegree category is used primarily by students who want to take courses but not necessarily pursue a degree. Nondegree students seeking to enter degree programs must formally apply for admission.

Admission Requirements for Computer Engineering or Electrical Engineering Masters Program

To be considered for admission to the master’s program, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely related discipline from an accredited program with a reputation for high academic standards, and have earned a GPA of B or better during the last 60 credits. Other requirements are as follows:

- Three letters of recommendation, preferably from academic references or references in industry or government who hold advanced degrees and are familiar with the applicant’s professional accomplishments
- Detailed statement of career goals and aspirations
- For students who have not earned a bachelor’s degree from a U.S. university, satisfactory performance on the GRE
- For students whose native language is not English, a minimum TOEFL score of 575 for the paper-based exam or 230 for the computer-based exam. A minimum score of 600 for the paper-based exam or 250 for the computer-based exam is required for applicants who wish to be considered for a graduate teaching assistantship.

Non-ECE Students

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, mathematics, mechanical engineering, physics, or electrical engineering technology) are encouraged to apply for admission. They may initially be admitted into the provisional category and advance to degree status by satisfying requirements described in the Admissions Categories section. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended specialization and specific backgrounds.

Degree Requirements

Students must complete a minimum of 30 graduate credits beyond the bachelor’s degree. This work must represent a cohesive set of courses leading to comprehensive knowledge in one area; it cannot be a set of disjointed courses. The plan of study for the degree must include the following:

Two core courses, with a B or better in each, from the following:

- ECE 521 - Modern Systems Theory Credits: 3
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
  OR
• ECE 511 - Microprocessors Credits: 3

• ECE 584 - Semiconductor Device Fundamentals Credits: 3
  OR
• ECE 565 - Introduction to Optical Electronics Credits: 3

and

Minimum of three courses, with a B or better in each, at the 600 level or above (not including ECE 798 or 799) from a chosen specialization, including approved doctoral courses (800 and 900 levels).

Note:

A maximum of 6 credits of non-ECE courses may be used, subject to prior department approval. Approved IT courses (including doctoral 800- and 900-level courses) that cover ECE topics may be taken for credit toward an MS in electrical engineering, subject to prior department approval, in addition to the 6 credits of non-ECE courses.

Common Degree Requirements for CPE or ELEN Master's Program

The following policies apply to students pursuing the MS in computer engineering or the MS in electrical engineering.

Student Advising

Newly admitted graduate students must consult with the ECE graduate coordinator before they register for classes. Students should make an appointment by calling the ECE office. Students are expected to select an emphasis from those available in each MS degree program. Students then are assigned an academic advisor from that emphasis area.

Plan of Study

Before the end of the second semester, each student must submit to the graduate coordinator’s office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Seminar Requirement

All degree candidates must attend a minimum of 10 graduate seminars approved for the given degree program.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.
Graduation Requirements

To complete requirements for graduation, students may select one of the following options:

Thesis Option

Students must complete ECE 799 Master’s Thesis (6 credits) and 24 credits of course work. The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. In some cases, permission may be granted to complete a portion of the work at the student’s place of employment. The final written thesis and oral defense are approved by the student’s advisory committee.

For the electrical engineering program, this committee consists of at least three full-time faculty members, including two from the student’s major specialization, and one from outside the specialization. For the Computer Engineering Program, this committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of which must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 1 credit of thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select this option must complete 30 credits of course work or 27 credits of course work plus ECE 798 Research Project, and must present a scholarly paper. The scholarly paper, with the theme selected under the guidance of a faculty advisor, can be a technical report on an independent study or laboratory or computer experimentation; a literature search on a current scientific or technological topic, such as a survey of new technologies or new methodologies; or a case study of new applications. Students must demonstrate knowledge of the topic and make a satisfactory technical presentation of the paper in the graduate seminar. The scholarly paper and final presentation must be approved by the student’s advisory committee. When a student elects to submit an ECE 798 final report as a scholarly paper, it is expected that the 3 credits of effort in ECE 798 will result in a much more substantial paper than a scholarly paper submitted in addition to 30 credits of regular course work.

Telecommunications, MS

Banner Code: VS-MS-TCOM

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The innovative, interdisciplinary MS in Telecommunications Program provides a blend of cutting-edge engineering-oriented courses in wireless and fiber communications systems, networks, computers, and Internet protocols, combined with courses on telecommunications policy, law, business, international aspects, and other fields. The interdisciplinary program is designed for students who wish to enter the field of telecommunications or are working in the field and want to advance their knowledge of telecommunications. It concentrates on practical applications of telecommunications rather than on the theoretical approach. It focuses on the engineering and IT aspects of telecommunications, in combination with the interdisciplinary knowledge offered by selected courses in telecommunications law and policy. More than 30 new engineering and IT courses have been designed specially for this program, including five certificate programs that may be incorporated into, and taken concurrently with, the MS in telecommunications. Two of the certificates are at an advanced level: the telecommunications forensics and security certificate and the advanced networking protocols for telecommunications certificate.

A novelty of the program is its structure, which consists of five specialty modules corresponding to areas of emphasis. The program offers a mix of 3-credit full-semester courses together with 1.5-credit half-semester courses. This structure allows students to identify more clearly the various specialties in telecommunications technology. Students enjoy considerable flexibility
because they are able to design their master’s programs to fit their technical preferences, including the option of taking courses in other programs at Mason.

A majority of the course material comes from the Electrical and Computer Engineering (ECE) Department and the Systems Engineering and Operations Research (SEOR) Department. Courses offered by ECE focus on network technologies, such as fiber optics, ATM, and Internet protocols; network applications, such as networked multicomputer systems, client-server architectures, and network management; and wireless communications, such as digital communications, satellite communications, mobile communications, PCS, and GPS.

Unique courses in the telecommunications program, such as Border Gateway Protocols, Interior Gateway Protocols, MPLS, GPS, and Advanced Link Design, complement courses given in ECE programs. In addition to the many new telecommunications courses developed for this program, ECE already offers a number of other graduate courses in communications as part of the graduate electrical engineering and computer engineering programs. Those courses may also be taken for credit under the MS in Telecommunications Program, provided students have the prerequisite background. Courses related to systems engineering, project management, capacity modeling, and business of telecommunications (including the design and optimization of large, complex communication networks) are offered by SEOR. Both SEOR fields, systems engineering and operations research, play significant roles in all aspects of the design, operation, and business of telecommunications, and this knowledge is important for students of telecommunications.

The blend of in-depth knowledge of specific elements of telecommunications technology, combined with knowledge of broader issues in telecommunications, is increasingly necessary for people who intend to work in a management or decision-making position within the telecommunications industry, telecommunications-related businesses, or government institutions dealing with telecommunications. The MS in telecommunications provides that blend.

**Format**

The program consists of 9 credits of mandatory engineering and technology core courses (TCOM 500, 501, 502, and 521); 6 credits of electives drawn from an interdisciplinary group of core courses common with the former MA in telecommunications (PUBP 726, LAW 181, and TELE 750 or TCOM 750), and a basic switching lecture and laboratory course (TCOM 514) or an Internet protocol routing lecture and laboratory course (TCOM 515); and five specialty modules (areas of emphasis). Students who enter the program with an undergraduate degree that shows evidence of successfully completing LAN and WAN technologies may substitute TCOM 509 and TCOM 529 for TCOM 501 and TCOM 502 in their mandatory core program, respectively.

Students must complete 30 credits of course work through a combination of core courses and specialty modules. The core consists of 15 credits, with the remaining 15 credits earned in specialty modules. The specialty modules are subareas of telecommunications that provide the necessary depth in the selected areas of emphasis.

Students are usually expected to take courses from at least two specialty modules. Up to 6 credits from the core program may be carried forward into the specialty modules, thus permitting up to 6 credits of electives to be taken inside or outside the prime specialty module chosen by the student. TCOM 501/502 may be carried forward into specialty module 1, 2, or 3; TCOM 521 may be carried forward into specialty module 4 or 5. Double counting is not permitted, but the courses carried forward into a given module may permit that module’s credit requirement to be satisfied, thus allowing elective courses to be taken outside that module. Usually, a minimum of 6 credits is needed to satisfy one specialty module. Credit for each specialty module can be obtained by taking an appropriate combination of full-semester courses (3 credits) and half-semester courses (1.5 credits). In many cases, a pair of coordinated, half-semester courses (for example, TCOM 503/513 on fiber optic communications and networks) permits students to take a half-semester course to get an introduction to the field or the equivalent of a full-semester course for a more complete knowledge of that topic.

**Admission Requirements**

Courses are open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have
equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary course work before they are allowed to enroll in any of the core courses or specialty courses in the program. Applicants who have not studied mathematics beyond the equivalent of algebra II/trigonometry at high school or introductory calculus classes (such as those offered in business or database management programs) will be required to take TCOM 575, the foundation course that prepares students for TCOM 500, prior to being allowed to take TCOM 500. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for nondegree study within the program, which allows them to take individual courses. Students in the nondegree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in nondegree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

**Degree Requirements**

Students must complete a minimum of 30 graduate credits with a GPA of 3.00 or higher. Students must earn a B (3.00) or above in core courses TCOM 500, 501, 502, and 521. Up to 6 credits of a combination of C or B- grades may be carried within the program from the remaining core courses or from the specialty module courses, provided the overall GPA is 3.00 or higher.

The plan of study includes the following:

**15 credits of core courses, subject to the following constraints:**

**Mandatory core courses (9 credits):**

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5
  or
- TCOM 509 - Internet Protocols Credits: 1.5 *
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5
  or
- TCOM 529 - Advanced Internet Protocols Credits: 1.5 *
- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3

**Note:**

*Students must receive prior permission to substitute TCOM 509 for TCOM 501 or TCOM 529 for TCOM 502.

**Elective core courses (6 credits selected from the following):**

- Law 181 Telecommunications Law and Regulation Credits: 3
  www.law.gmu.edu/academics/courses/law181
- PUBP 726 - Telecommunications Policy Credits: 3
- TCOM 514 - Basic Switching: Lecture and Laboratory Course Credits: 3 *
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3 *
- TCOM 750 - Coordinating Seminar Credits: 3

Note:

*Both TCOM 514 and TCOM 515 may be taken for credit, but only one may be used to satisfy a core elective requirement.

Students must take a minimum of 15 credits of courses listed under the following specialty modules:

Students usually take 15 credits from at least two of the five specialty modules, or they may elect to take all 15 credits from the systems engineering of telecommunications module (module 5). Students electing to carry forward a core course (TCOM 501/502 or TCOM 521) into an appropriate specialty module have the option of taking an elective course in that module or another module to bring the total number of credits in the specialty modules to 15.

A specialty module (group of courses in an area of emphasis) can be completed by a combination of full-semester courses and half-semester courses listed under the module or considered applicable to that module for a total of at least 6 credits in that module. Some specialty module courses are in more than one module; for example, TCOM 509 Internet Protocols is in module 1, network technologies, and module 2, network applications. Half-semester 1.5-credit courses may only be counted in one module, even if they apply to more than one. Full-semester 3-credit courses may be counted in one module or split between two modules. For example, TCOM 551 Digital Communication Systems, which is in modules 1 and 3, may be counted as 3 credits in either module, or 1.5 credits in each module.

Basic courses in each module have been specially designed for the telecommunications program. These courses do not require completion of prerequisites from other MS programs in the Volgenau School. Other courses, which are marked with asterisks, are from other MS programs in the Volgenau School and represent viable options for students who have appropriate prerequisites in some technical areas. Although these courses assume certain prerequisites from their specific MS programs, advanced students who already know the prerequisite material can seek instructor permission to enroll in those courses.

Alternatives to completing each specialty module by using appropriate combinations of courses not listed under a given module may be admissible subject to prior approval by the program director. In addition, independent study, reading, and research courses may be taken in all five modules. These courses permit students to make use of their work experiences to undertake non-classroom courses for credit within the program.

Mason has negotiated an articulation agreement with the University of Virginia that allows up to 12 credits of the Informational Systems Management Certificate Program from the University of Virginia to be transferred into modules 4 and 5 of the TCOM Program. In addition, graduate students from the National Defense University (NDU) may transfer up to 9 credits from NDU’s Information Security Certificate Program.

A capstone project course, TCOM 699, is required under the systems engineering of telecommunications module (module 5) should the student elect to take all 15 credits in this specialty module. Students taking only 7.5 credits in modules 4 or 5 have the option of taking TCOM 699, but the course is not required unless the student takes all 15 credits in module 5.

List of Specialty Modules

Courses listed below from other graduate programs in the Volgenau School listed below can be taken for credit in this program if the student has the appropriate prerequisites. Other courses from other programs may be taken for credit, with prior approval.
Module 1, Network Technologies

- TCOM 503 - Fiber Optic Communications Credits: 1.5
- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 513 - Optical Communications Networks Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 556 - Cryptography and Network Security Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3
- ECE 643 - Network Switching and Routing Credits: 3
- CS 571 - Operating Systems Credits: 3
- CS 756 - Performance Analysis of Computer Networks Credits: 3

Module 2, Network Applications

- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 513 - Optical Communications Networks Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 541 - Network Design and Pricing Credits: 1.5
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 555 - Network Management Foundations and Applications Credits: 3
- TCOM 556 - Cryptography and Network Security Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
Module 3, Wireless Communications

- TCOM 506 - Personal Communication Systems (PCS) Credits: 1.5
- TCOM 516 - Global Positioning System (GPS) Credits: 1.5
- TCOM 518 - Third Generation Cellular Telephony Credits: 1.5
- TCOM 526 - Advanced Global Positioning System (GPS) Credits: 1.5
- TCOM 551 - Digital Communication Systems Credits: 3
- TCOM 552 - Introduction to Mobile Communications Systems Credits: 3
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 606 - Advanced Mobile Communications Systems Credits: 3
- TCOM 607 - Satellite Communications Credits: 3
- TCOM 660 - Network Forensics Credits: 3
- TCOM 707 - Advanced Link Design Credits: 3
- ECE 732 - Mobile Communication Systems Credits: 3
- ECE 741 - Wireless Networks Credits: 3

Module 4, Modeling of Telecommunications Systems

- TCOM 541 - Network Design and Pricing Credits: 1.5
- TCOM 542 - Stochastic Models in Telecommunications Credits: 1.5
- TCOM 545 - Reliability and Maintainability of Networks Credits: 3
- TCOM 546 - Financial Models of Telecommunications Systems Credits: 3
- TCOM 547 - Project Management in Telecommunications Credits: 3
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 562 - Network Security Fundamentals Credits: 3
- TCOM 699 - Telecommunications Project Course Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
Module 5, Systems Engineering of Telecommunications

This module can be taken as one of two specialty modules or as one 15-credit module. No more than two SYST courses can be taken within this module.

- TCOM 520 - Economics of Telecommunications Credits: 3
- TCOM 546 - Financial Models of Telecommunications Systems Credits: 3
- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 699 - Telecommunications Project Course Credits: 3
- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 640 - Introduction to Electronic Commerce Credits: 3
- ITRN 772 - International Telecommunications Credits: 3

Applicable BS/Accelerated MS in Telecommunications Programs

These degree programs may be taken as part of an accelerated MS in Telecommunications Program with three undergraduate degree programs: BS in systems engineering, information technology, and individualized studies. See respective undergraduate degree information for details.

Systems Engineering, BS/Telecommunications, Accelerated MS
Information Technology, BS/Telecommunications, Accelerated MS
Individualized Study, BIS/Telecommunications, Accelerated MS

Telecommunications Certificates

Five 15-credit certificates are offered by the MS in TCOM Program. Students may pursue these certificates as stand-alone programs or as part of their degree program. For the former, they are required to submit a graduate program application indicating their desire to enroll in the appropriate graduate certificate program. For the latter, because they are already enrolled in a degree program, they need only add the appropriate graduate certificate to their graduate program status at least one semester prior to the award of the certificate. The courses within the certificates are drawn directly from the MS in TCOM Program. If a student initially signs up for only a certificate program, it is possible to transfer into the degree program later, transferring up to 12 credits into the degree program. Students must therefore ensure they have transferred into the degree program prior to starting course work beyond 12 credits in the certificate program to ensure that all credits from the certificate program may transfer into the degree program. Students who transfer from a certificate program into the degree program may earn the certificate and the degree on satisfactory completion of the respective requirements. Applicable courses may count for the certificate and the degree programs.

Students may transfer in one 3-credit course from another program or institution toward their TCOM certificate, provided the course in question was passed with a B grade or higher. Students are permitted to carry one C grade within their certificate program, provided the overall GPA is 3.00 or above.
Advanced Networking Protocols for Telecommunications Graduate Certificate
Network Technologies and Applications Graduate Certificate
Telecommunications Forensics and Security Graduate Certificate
Telecommunications Systems Modeling Graduate Certificate
Wireless Communications Graduate Certificate

Master's Level Certificate

Advanced Networking Protocols for Telecommunications Graduate Certificate

Banner Code: VS-CERG-ANPT

College: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides an in-depth understanding of advanced protocols used in a variety of telecommunications networks.

Certificate Requirements

To obtain the certificate, students must complete the following for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 509 - Internet Protocols Credits: 1.5
  and
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
  or
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 609 - Interior Gateway Protocol (IGP) Routing Credits: 3
- TCOM 610 - Border Gateway Protocol (BGP) Routing Credits: 3

Elective Courses

Choose 6 credits from following:

- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 611 - Multi-Protocol Label Switching (MPLS) Credits: 3
TCOM 662 - Advanced Secure Networking Credits: 3

Note:

TCOM 509/529 and TCOM 515 cannot be taken twice. If a student takes TCOM 509 and 529 or TCOM 515 in the core element, the course(s) may not be taken again in the elective element.

Communications and Networking Graduate Certificate

Banner Code: VS-CERG-CONE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in communications and networking. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate's primary purpose is to provide a well-defined target for students who want to advance their knowledge of modern communications but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The certificate program in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Certificate Requirements

The certificate is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three elective courses.

Foundation courses (6 credits):

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
  or

Elective courses (9 credits):

After completing the foundation courses, students choose electives by taking three courses from the following:

- ECE 535 - Digital Signal Processing Credits: 3
- ECE 565 - Introduction to Optical Electronics Credits: 3
- ECE 567 - Optical Fiber Communications Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
Network Technologies and Applications Graduate Certificate

Banner Code: VS-CERG-NETT

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The certificate provides a broad understanding of the technologies used in telecommunications networks and the various applications of telecommunications networks. To obtain the certificate, students must complete the following, for a total of 15 credits:

Certificate Requirements

Choose 9 credits from the following:

- TCOM 504 - Asynchronous Transfer Mode Networks Credits: 1.5
- TCOM 505 - Networked Multicomputer Systems Credits: 1.5
- TCOM 509 - Internet Protocols Credits: 1.5
- TCOM 510 - Client-Server Architectures and Applications Credits: 1.5
- TCOM 519 - Voice over IP Credits: 1.5
- TCOM 529 - Advanced Internet Protocols Credits: 1.5
- TCOM 539 - Advanced Voice over IP Credits: 1.5
- TCOM 555 - Network Management Foundations and Applications Credits: 3

Elective Requirements

Six credits are required. Students may elect to take any additional 6 credits from the Telecommunications MS specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.
Networks, System Integration and Testing Graduate Certificate

Banner Code: VS-CERG-NSIT

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides graduate students with the opportunity to reach a demonstrated level of competence in computer networks, system integration, and software testing. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering; however, the certificate’s primary purpose is to provide a well-defined program for students who want to advance their knowledge of modern networks, systems integration and testing, but do not necessarily want to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admission Requirements

The networks, system integration, and testing certificate program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities, with a GPA minimum established by The Volgenau School for all MS programs.

Certificate Requirements

The certificate is awarded on successful completion of five graduate courses (15 credits) from the list of courses given below. A cumulative GPA of 3.00 is required, one course with a grade of C at most may be applied toward the certificate, and no more than one, 3-credit graduate course in the appropriate discipline may be transferred into the certificate from an appropriately accredited program at another institute of higher learning.

The certificate in networks, systems integration, and testing consists of the following five, 3-credit courses:

- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 673 - Discrete Event Systems Credits: 3
- ECE 674 - Systems Architecture Design Credits: 3
- ECE 675 - System Integration and Architecture Evaluation Credits: 3
  or
- ECE 525 - Hardware/Software Integration Credits: 3
- SWE 637 - Software Testing Credits: 3

Signal Processing Graduate Certificate

Banner Code: VS-CERG-SIGP

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The Department of Electrical and Computer Engineering, in conjunction with the Department of Statistics, offers the certificate in signal processing, which provides graduate students with an opportunity to reach a demonstrated level of competence in signal
processing. Course work for the graduate certificate can be used for credit toward the MS in statistical science as well as the MS in electrical or computer engineering. However, the certificate’s primary purpose is to provide a well-defined target for students who want to advance or update their knowledge in this fast-moving field, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

**Admission Requirements**

The program is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and hold graduate status (either degree or non-degree) in the Volgenau School.

**Certificate Requirements**

The certificate is awarded on completion of five graduate courses (15 credits) in signal processing. A cumulative GPA of 3.00 is required, and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two foundation courses taken by all students and three elective courses.

**Foundation courses (6 credits):**

- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
  or
- STAT 544 - Applied Probability Credits: 3
- ECE 535 - Digital Signal Processing Credits: 3

**Elective courses (9 credits):**

After completing the two foundation courses, students choose electives by taking three courses from the following list:

- ECE 537 - Introduction to Digital Image Processing (DIP) Credits: 3
- ECE 621 - Systems Identification Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 635 - Adaptive Signal Processing Credits: 3
- ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing Credits: 3
  or
- ECE 644 - Architectures and Algorithms for Image Processing Credits: 3
- ECE 722 - Kalman Filtering with Applications Credits: 3
  or
- ECE 728 - Random Processes in Electrical and Computer Engineering Credits: 3
- ECE 734 - Detection and Estimation Theory Credits: 3
  or
- ECE 738 - Advanced Digital Signal Processing Credits: 3
- ECE 751 - Information Theory Credits: 3
  or
Telecommunications Forensics and Security Graduate Certificate

Banner Code: VS-CERG-TFAS

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The objective of this certificate is to provide an in-depth understanding of security and forensics as they apply to networks and digital storage media.

Certificate Requirements

Students must complete the following for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 548 - Security and Privacy Issues in Telecommunications Credits: 1.5
- TCOM 556 - Cryptography and Network Security Credits: 1.5
- TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course Credits: 3
- TCOM 562 - Network Security Fundamentals Credits: 3
- ISA 562 - Information Security Theory and Practice Credits: 3
TCOM 660 - Network Forensics Credits: 3
or
TCOM 661 - Digital Media Forensics Credits: 3
or
TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
or
TCOM 664 - Incident Response Forensics Credits: 3

Elective Courses

Choose 6 credits from the following:

- ISA 562 - Information Security Theory and Practice Credits: 3 (formerly ISA 662, and prior to that INFS 762)
- TCOM 660 - Network Forensics Credits: 3
- TCOM 661 - Digital Media Forensics Credits: 3
- TCOM 662 - Advanced Secure Networking Credits: 3
- TCOM 663 - Operations of Intrusion Detection and Forensics Credits: 3
- TCOM 664 - Incident Response Forensics Credits: 3

Note:

TCOM 660, 661, 663, and 664 cannot be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Telecommunications Systems Modeling Graduate Certificate

Banner Code: VS-CERG-TESM

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides a broad understanding of the end to end systems engineering approach to telecommunications projects.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses

Choose 9 credits from the following:

- TCOM 521 - Systems Engineering for Telecommunications Management Credits: 3
- TCOM 541 - Network Design and Pricing Credits: 1.5
- TCOM 545 - Reliability and Maintainability of Networks Credits: 3
Elective Courses

- Six credits are required. Students may earn the credits from the Telecommunications MS specialty modules 4 and 5, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

VLSI Design/Manufacturing Graduate Certificate

**Banner Code: VS-CERG-VLSE**

*School: The Volgenau School of Information Technology and Engineering*

*Department: Electrical and Computer Engineering*

This certificate’s primary purpose is to provide a well-targeted graduate continuing education opportunity for people working in Northern Virginia’s semiconductor and intellectual property industry. This certificate is intended for students who want to advance their knowledge of very large scale integration (VLSI) design or manufacturing, but who do not necessarily wish to complete requirements for the MS in electrical engineering or computer engineering. The course work is designed so that graduate students can reach a demonstrated level of competence in VLSI design or VLSI manufacturing. Course work toward the graduate certificate may be used for credit toward the MS in electrical engineering or computer engineering. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School.

**Admission Requirements**

The program is open to all students who hold a BS degree in scientific and engineering disciplines and hold graduate student status (degree or non-degree) in the Volgenau School. Students with nonscientific and nonengineering degrees are required to take remedial courses before being admitted into the certificate program.

**Certificate Requirements**

The certificate is awarded on completion of five graduate courses (15 credits): a required foundation course, a compulsory core course, and three electives. A cumulative GPA of 3.00 is required, and only one course with a grade of C may be applied toward the certificate. At most, one course may be transferred from graduate course work completed at another accredited university.

After completing the foundation course (ECE 684), students choose one of the two emphases, VLSI design or VLSI manufacturing, by taking four courses in that emphasis, one of which will be the core course in that area.

**Foundation course (3 credits):**

- ECE 684 - MOS Device Electronics Credits: 3

**VLSI Design Emphasis (12 credits):**

**Core course:**
• ECE 586 - Digital Integrated Circuits Credits: 3

Electives

Take 9 credits from the following:

• ECE 545 - Digital System Design with VHDL Credits: 3
• ECE 587 - Design of Analog Integrated Circuits Credits: 3
• ECE 645 - Computer Arithmetic Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 681 - VLSI Design for ASICs Credits: 3
• ECE 682 - VLSI Test Concepts Credits: 3

VLSI Manufacturing Emphasis (12 credits):

Core course:

• ECE 689 - VLSI Processing Credits: 3

Electives

• ECE 586 - Digital Integrated Circuits Credits: 3
• ECE 680 - Physical VLSI Design Credits: 3
• ECE 745 - ULSI Microelectronics Credits: 3

Wireless Communications Graduate Certificate

Banner Code: VS-CERG-WIRE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

This certificate provides a broad understanding of the technologies, applications, and systems used in all forms of wireless communications.

Certificate Requirements

Students must complete the following, for a total of 15 credits:

Core Courses

Choose 9 credits from the following:
Elective Courses

- Six credits are required. Students may earn the credits from the Telecommunications MS specialty modules 1, 2, and 3, including those in the mandatory course list that are not part of the 9 credits of core courses for the certificate.

Doctoral Degree

Electrical and Computer Engineering, PhD

Banner Code: VS-PHD-ECE

School: The Volgenau School of Information Technology and Engineering

Department: Electrical and Computer Engineering

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as communications, networking, computer engineering, control and robotics, signal processing, micro/nano-electronics, and bioengineering. The ECE PhD program requires course work, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason's general doctoral requirements apply to this program.

Admission Requirements

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, three letters of recommendation and official GRE General Test results. The GRE requirement is waived for GMU ECE master's graduates with a 3.0 or greater GPA. Applicants whose native language is not English must demonstrate proficiency by taking the TOEFL or IELTS exam. The minimum score required for admission is 575 on the TOEFL paper-based exam, 230 on the TOEFL computer-based exam, 88 on the TOEFL internet-based exam (with a minimum of 20 in each section), or 6.5 on the IELTS exam. Application materials are reviewed by the ECE PhD committee, which makes a recommendation to the ECE department chair.
Advisor and Dissertation Director

Upon admission to the program, each student is assigned an ECE faculty member as advisor. When the student passes the qualifying exam, the dissertation director becomes the student’s advisor. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The committee is headed by the dissertation director and includes two more graduate faculty members from ECE department and one from outside the department. One more member, from outside the university, may be added to the dissertation committee if justified by the subject of the dissertation. All decisions concerning the student’s course requirements and dissertation committee must be approved by the PhD advisor and the ECE department chair.

Course Requirements

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master’s degree. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The 42 hours of required doctoral-level credits typically consist of 18 credits of regular course work and 24 credits of dissertation research. Courses that constitute a student’s plan of study will be chosen in consultation with the student’s advisor and/or dissertation committee.

For the required 18 hours of doctoral course work, a maximum of 6 credits may be at the 500 level, and at least 9 credits must be at the 700 level or higher. For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair. Individualized reading courses at any level cannot account for more than 6 credits. Note that ECE 798 Research Project is primarily a master’s level course and is not intended to be part of the PhD course work. Research in the PhD program should be included in ECE 998 and ECE 999 courses. PhD students are required to take 3 credits at the 600 level outside the department in a subject considered foundational for their area of emphasis. Typical examples are advanced mathematics or statistics courses for those pursuing an emphasis in communications, signal processing or control, physics courses for those desiring an emphasis in micro/nano-electronics, computer science courses for those pursuing the computer engineering emphasis, and biology courses for those pursuing a bioengineering emphasis. Because such courses are usually not taken for master’s degrees, this requirement can rarely be satisfied with a course taken previously. Students are required to take two courses (6 credits) within the department but outside their area of emphasis. This requirement may be satisfied with courses taken during previous studies, subject to approval.

Students must complete a minimum of 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999), including at least 3 credits of ECE 999. A maximum of 24 credits of ECE 998 and ECE 999 may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 and ECE 999 may earn the remaining credits from approved course work. Students cannot enroll in ECE 999 before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999, students must maintain continuous registration in ECE 999 each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 during that summer term.

Qualifying Exam
The department offers the doctoral qualifying exam at least once each year. The exam tests students' familiarity with fundamental concepts. Students must take the exam within the first year after they have entered the program with an MS degree. Students who enter with a BS degree must take the exam within the first year after they have completed 24 credits beyond the BS degree. Students transferring from the Information Technology PhD program are required to take the ECE qualifying exam. The qualifying exam may be repeated once. A student failing the exam twice is removed from the program. The exam is typically offered in late August, prior to the start of the Fall semester.

The qualifying exam consists of a written in-class exam and an oral interview. The exam is not tied to any particular course. Students select one area of concentration for their qualifying exam from the following list:

- **Area A**: Communications, Controls, and Signal Processing
- **Area B**: Computer Engineering
- **Area C**: Electronics and Devices

Each area consists of four subjects. The written exam contains two problems in each subject. Students must solve five problems from no more than three subjects in their selected area. Students with a non-ECE background may substitute one subject compatible with their background and relevant to their planned research.

**Teaching Requirement**

To acquire teaching experience, each PhD student is required to participate in the department’s teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester, presenting several lectures within a course, or performing other teaching work approved by the department.

**Dissertation Proposal, Research Competency Exam, Advancement to Candidacy**

The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student's dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

**Dissertation Research and Defense**

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a
predefense in the presence of the committee members. The dissertation committee and the
department chair approve the student’s application for a public defense of the doctoral dissertation. A
copy of the dissertation must be placed in the University Libraries four weeks prior to the public
defense. After a successful public defense and completion of the final form of the dissertation, the
dissertation committee recommends the candidate for the degree of doctor of philosophy.

■ Interdisciplinary Programs (VSITE)

_School: The Volgenau School of Information Technology and Engineering_

The Volgenau School offers two interdisciplinary post-master programs: the PhD in Information Technology and the Engineer in IT degree. The first is designed for students who seek a doctoral program in Information Technology and want to be able to customize it to their needs. The second is a professional degree with the flexibility to integrate knowledge from all of the disciplines offered in our School. The programs are managed by the Graduate Student Services Office under the purview of the Senior Associate Dean.

Doctoral students may conduct their doctoral research under the supervision of any eligible faculty member of any of the school's departments. The doctoral program allows students to take a broad range of courses and research options. Students can specialize in various areas, including information systems, software engineering, and information security.

The Engineer in IT degree program allows a student to combine the advanced course work of the PhD degree in IT with an applied project. It is designed to meet the needs of working professionals seeking advanced and up-to-date training in IT areas, but who are not planning a research career.

Professional Degree

Information Technology Engineer Degree

_Banner Code: VS-ENGR-INFT_

_School: The Volgenau School of Information Technology and Engineering_

_Department: Interdisciplinary Programs_

The engineer degree is a post-master’s degree but does not confer a doctorate. Students in the engineer degree can take advanced PhD courses and complete a project of an applied nature to fulfill program requirements.

Admission Requirements

Admission requirements for the engineer degree are the same as for the PhD in information technology.

Plan of Study

The program is made up of specialized course work followed by completion of an applied project summarized in a project report. Under the guidance of the supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and their expected timing. The plan should also contain a tentative subject for the applied project.

Specialized Course Work
Students must include in the plan of study a well-defined advanced concentration area. Successful completion of this requirement should enable students to conduct applied research in a significant contemporary area in IT.

The supervisory committee and The Volgenau School Senior Associate Dean must approve a plan of study. These approvals must occur before a student completes the courses in the area of concentration. There is no guarantee that a course taken before this approval will be accepted. Students must take 30 credits of graduate-level course work. A GPA of 3.50 is required in these credits.

The plan of study may include at most 3 credits of directed reading course work. At least 12 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, a project, or thesis courses.

Courses that cannot be included in any plan of study are INFS 500-level courses; AIT 500 or 600-level courses; OR/SYST 540; and SYST 500. The Senior Associate Dean must approve exceptions to any of these rules in advance.

**Supervisory Committee**

On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they select a project director and a supervisory committee. It is recommended that a student form a supervisory committee as soon as feasible. The supervisory committee includes the project director plus at least two additional members. The committee must contain at least two graduate faculty members from The Volgenau School. It is strongly recommended that the committee include at least one person from outside the university who is knowledgeable in the subject area of the project. The supervisory committee supervises the project proposal presentation and the project defense.

**Project Proposal Presentation**

Near the end of the course work, each student prepares a written project proposal, which is presented to the supervisory committee. Students may enroll in IT 996 Engineer Project Proposal to complete this effort. During the term students expect to present the project proposal to the committee, they should enroll in IT 991 Engineer Project Presentations. After successfully completing this requirement, students are formally admitted as candidates for the engineer degree. The application for candidacy is submitted to the office of the Senior Associate Dean on a standard form.

**Project and Final Defense**

With the concurrence of the supervisory committee, students proceed with the project research, during which time they must continuously enroll in IT 997 Engineer Project. Students must complete a minimum of 12 credits from among IT 991, 996, and 997, with a minimum of 6 credits of IT 997. When the central portions of the project work have been completed to the point that students are able to describe the contributions of the project effort, they submit the written project report to the supervisory committee. Once the committee believes the student is ready, a final public oral defense may be scheduled; the application for the defense must be submitted to the Senior Associate Dean at least one month in advance of the defense so that the announcement is posted for at least two weeks.

Following a satisfactory evaluation of the oral defense of the project by the supervisory committee, the student must submit, with supervision from the project director, a final project that represents a definitive contribution to applied knowledge in IT. This document must be compliant with the university's regulations for appearance and must be submitted to the library. If the candidate successfully defends the project, the supervisory committee recommends that the final form of the project be completed and Volgenau School faculty and the graduate faculty of Mason recommend the candidate for graduation.

**Applying and Completing a PhD Program**

Students who are awarded an engineer degree have the option of applying to one of our PhD programs. Candidates must satisfy all applicable university requirements and all requirements established by the doctoral program faculty. Doctoral candidates must
earn a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master's degree or engineer degree.

Total: 42 credits

Doctoral Degree

Information Technology, PhD

Banner Code: VS-PHD-INFT

School: The Volgenau School of Information Technology and Engineering

Department: Interdisciplinary Programs

The general doctoral requirements of Mason apply to this program.

When the term “information technology (IT) and engineering” is used at Mason to describe the school and its activities, it is intended to mean information technology and the branches of engineering most closely associated with information use and management. These aspects of technology are emphasized in this geographic region, and the relevance of the IT doctoral program has grown with the increasing dependence of the nation’s commerce on the effective use of information. Our focus on the science and technology of information processing complements and enhances the more traditional approaches to engineering that are more strongly based on the physical and material sciences.

Admission Requirements

Students are selected on the basis of scholarship and potential from among applicants with appropriate degrees from institutions of high standing. Generally, a master’s degree in an information technology-related area, such as engineering, computer science, operations research, statistics, mathematics, physical sciences, economics, and psychology, is required for admission to the program.

In addition, well-qualified students without an appropriate master’s degree may apply directly to the PhD program. Such students will have to complete the equivalent of an appropriate Mason master’s degree as part of their program of study. In some cases, it may be possible to obtain transfer credit for graduate course work taken elsewhere, subject to meeting requirements for transfer credit imposed by the university. (The description here assumes that a student has already received an appropriate master’s degree.)

An undergraduate GPA of 3.00 and a graduate GPA of 3.50 scale are basic requirements for applicants. The admission process involves submitting the following materials: application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results when available or if required by the specific concentration, three letters of reference, a résumé, a short statement of career goals and aspirations, and a self-assessment of past background. Translations of
international credentials must be provided if they are not in English. In some cases, applicants will be required to have documents evaluated by an external agency. An applicant's entire background is examined before an admission decision is made.

Students who wish to be considered for Mason’s President Scholarship, which provides a stipend and tuition support for three years, must submit GRE scores with a score of at least 1,200 with their application. One President Scholarship is awarded per PhD program per year.

To ensure a common ground of fundamentals, students should have a background in such topics as calculus, differential equations, linear algebra, discrete structures, probability, and statistics. In addition, students entering the PhD in Information Technology Program must have a sound working knowledge in computing as demonstrated by examples of programs or applications developed and tested in at least one high level programming language environment. Because much of the course work within this program requires computational proficiency, experience with a variety of languages and computer hardware is useful as is an understanding of computer architecture. Highly qualified students who do not present evidence of appropriate course work may be admitted and then required to take appropriate articulation courses.

Plan of Study

The program is made up of a breadth requirement (assessed via qualifying exams) and specialized course work (assessed via the comprehensive exam), followed by preparation of a dissertation. Generally, students have already obtained a master’s degree in a field appropriate to IT, which prepares them for the qualifying exams.

Under the guidance of the doctoral supervisory committee, students prepare a tentative plan of study. The plan lists the intended courses and expected timing. The plan should also contain the intended dates of the qualifying and comprehensive exams, and a tentative subject of the dissertation research.

Qualifying Exams

To satisfy the breadth requirement of the PhD degree, students must pass a set of written qualifying exams designed to test fundamental knowledge. These exams correspond to a set of disciplines related to the individual master’s programs in the Volgenau School. Each exam is based on a reading list posted on the school’s web site. The qualifying exams are not associated with specific courses, although some courses may help students prepare for these exams. The qualifying exams are offered twice a year at specified locations on campus, typically near the beginning of the fall and the spring semesters. Each exam is allocated two hours. The exams are graded on a pass or fail basis.

Students must indicate which exams are being requested through an appropriate form signed by the student and the supervisor and submitted to the office of the senior associate dean.

Each student must pass a set of four different exams in two consecutive offerings of the exams. Four exams must be attempted in the first offering. Thus, the following passing scenarios are allowed: (1) pass all four on the first attempt, (2) pass three in the first attempt and one in the next, (3) pass two in the first attempt and two in the next, (4) pass one in the first attempt and three on the second, and (5) pass all four on the second attempt. The exams attempted on the second offering need not be the same as in the first. A student who fails to pass the qualifying exams under any of these scenarios is subject to termination from the program.

Students must take the qualifying exams within two years of enrolling in the program, unless fewer than 24 credits of course work have been completed in that time. Otherwise, the exams must be taken no later than the first opportunity after completion of 24 credits. If a student enters the program without a master’s degree, these time limits are measured from the date when the student completes the equivalent of an appropriate Mason master’s degree.

Advanced Emphasis Requirement

Students must include in the plan of study a well-defined set of advanced courses in a focused area. Successful completion of this requirement should enable the student to do basic or applied research in a significant contemporary area in IT.
The doctoral supervisory committee and the Volgenau School senior associate dean for graduate studies and research must approve the plan of study. These approvals must occur before a student completes courses in the area of concentration or specialization. There is no guarantee that courses taken before this approval will be accepted.

Students must take a set of 24 credits of graduate-level coursework independent of the qualifying exams they take. That is, if a student takes a qualifying exam related to OR 541, then OR 541 cannot be counted as 3 credits of specialty course work. A GPA of 3.50 is required in these 24 credits. The plan of study may include a maximum of 3 credits of directed reading course work. At least 12 of the 24 credits must be in courses numbered 700 or higher, and these 12 credits cannot include directed reading, project, or thesis courses.

The following courses cannot be included in any plan of study: any INFS 500-level courses, OR 540, ans SYST 500. Exceptions must be approved in advance by the senior associate dean.

Each PhD student is allowed to designate an emphasis from among the titles of the MS degree programs offered by the Volgenau School. For more information, see department sections.

**Doctoral Supervisory Committee**

On admission to the program, students are assigned a temporary advisor. Students are responsible for working with the temporary advisor until they choose a dissertation director and an advisory committee. Students should make this selection as soon after admission as possible. This is especially important for students who have completed a considerable amount of graduate work elsewhere.

Students work collaboratively with the program director and faculty to form the dissertation committee, with the understanding that some areas of research may be impossible to support due to available faculty expertise. Program personnel will facilitate the formation of the dissertation committee to the extent possible, but there can be no guarantee of successful formation.

The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD in IT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director, provided that the chair and other co-director satisfies the "at least 50% rule". At least three committee members must be from the Volgenau School and at least two of the departments of the Volgenau School must be represented on this committee.

In addition, industrial representatives and faculty members from departments outside the school are highly desirable, but not required, on the committee. The doctoral supervisory committee administers the comprehensive exam, dissertation proposal presentation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School senior associate dean on the basis of a written request and plan that has been approved by the supervisory committee.

**Comprehensive Examination**

The comprehensive exam is an oral exam taken after students have satisfactorily completed all course work requirements in their approved plan of study. To initiate the exam process, the student meets with the dissertation advisor to prepare a permission form, which has to be approved by the entire supervisory committee, to be forwarded to the senior associate dean for final approval. The exam committee consists of the doctoral supervisory committee plus any outside examiners considered appropriate. The permission form should contain the following items: a) a one page description of the intended area of research; and b) a reading list on which the student will be examined. The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area. This exam is to be taken at a designated place on campus.

The objective of the comprehensive exam is to allow the exam committee to assess the student’s readiness to complete doctoral research in an area of concentration. The result of the comprehensive exam is a grade of pass or fail with recommendations for removing any deficiencies. Students must pass the comprehensive exam and dissertation proposal defense before being advanced.
to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all course work requirements.

Students who fail the comprehensive exam may request a re-exam within 60 days of receiving notice of the exam result. The request should be made in writing to the senior associate dean. A student may request a new exam in a different format if the intended area of research has changed, but the request must comply with the rules specified above. If the student fails again, or does not request a re-exam within 60 days, the student will be dismissed from the PhD program. Appeals on any of the two attempts must be submitted in writing to the senior associate dean within 15 days of the date the decision was communicated to the student.

**Dissertation Proposal Presentation**

Near the end of the course work, doctoral students prepare a written dissertation proposal, which is presented to the doctoral supervisory committee. Students may enroll in IT 998 Doctoral Dissertation Proposal to complete this effort. During the term the student expects to present the dissertation proposal to the committee, the student should enroll in IT 990 Dissertation Topic Presentations. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree. The application for candidacy is submitted to the senior associate dean on a standard form.

**Dissertation & Final Defense**

With the concurrence of the advisory committee, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. Students must complete a minimum of 24 credits from among IT 990, 998, and 999, with a minimum of 12 credits of IT 999. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the supervisory committee and schedule an oral predefense to the committee. The predefense is to be held no sooner than one month after members of the committee have copies of the dissertation. Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense so that the announcement is posted for at least two weeks. The entire dissertation committee must be present at the defense, unless an exception is approved by the senior associate dean in advance of the defense.

Following satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in IT. This document must meet format guidelines specified by the *Guide for Preparing Graduate Theses, Dissertations, and Projects*. If the candidate successfully defends the dissertation, the dissertation defense committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the program.

**Concentrations**

Choosing a concentration narrows program flexibility, so it is not necessary to choose a concentration. In particular, a concentration may be inappropriate for students doing interdisciplinary research. Students who do declare a concentration will have the concentration noted on their transcript.

▲Concentration in Information Security and Assurance (ISA)
Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information security. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Volgenau School. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator and department chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

▲Concentration in Information Systems (ISYS)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in information systems. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all the requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a Computer Science faculty member. The composition of the doctoral supervisory committee must be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.
Concentration in Software Engineering (SWE)

Students who pursue a concentration in this doctoral program will have the concentration noted on their transcript. The degree conferred on a graduating student is the PhD in information technology with concentration in software engineering. Students may also pursue such doctoral studies without designating a concentration.

Requirements

Students seeking this concentration must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with the consent of the Computer Science doctoral coordinator.

Doctoral Supervisory Committee

The dissertation director must be a faculty member of the Computer Science Department. The composition of the doctoral supervisory committee is to be approved by the Computer Science doctoral coordinator, the Computer Science chair, and the Volgenau School associate dean for research and graduate studies. Permission for the comprehensive exam and dissertation defense is requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the Computer Science doctoral coordinator.

For information regarding qualifying exams and emphasis areas, please consult the department web site.

Statistics

Phone: 703-993-3645

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Carr, Gentle, Rosenberger (chair), Wegman
Associate professors: Davis (associate chair), Miller, C. Sutton
Assistant professors: Diao, Tang
Instructors: Izmirli, Sims, Surina
Emeritus faculty: Bolstein

Course Work
The Statistics Department offers all courses designated STAT in the Courses chapter of this catalog. Statistical methods and methods for data analysis are crucial for researching and exploring the life sciences, natural sciences, social sciences, business, nursing, education, and engineering. The Statistics Department offers a variety of introductory courses and more advanced course work in specialized statistical methodology and applications. The focus of the department’s offerings is applied, with special emphasis on biostatistics, graphics and visualization, federal and survey statistics, and engineering applications of statistics and data analysis.

Introductory courses are targeted for undergraduates in the College of Humanities and Social Sciences and the College of Health and Human Services, as well as in the Volgenau School. The STAT 250–350 sequence is targeted for general audiences, while the STAT 344–354 sequence is targeted for technical and scientific audiences. STAT 362 deals with computer statistical packages and is appropriate as a second or third course for students from a wide variety of backgrounds. It is strongly recommended for students who elect to minor in data analysis.

Although the department does not offer an undergraduate degree in statistics, it does offer an undergraduate certificate program in applied statistics and a minor in data analysis. Also, a variety of advanced undergraduate courses is available for inclusion in other degree programs.

**Bachelor's Level Certificate**

**Applied Statistics Undergraduate Certificate**

**Banner Code:** VS-CERB-ASTA

**School:** The Volgenau School of Information Technology and Engineering

**Department:** Statistics

This program complements undergraduate degree programs in computer science, systems engineering, electrical engineering, civil and infrastructure engineering, and mathematics. Undergraduates majoring in other discipline areas may be admitted to the certificate program at the discretion of the department.

The program expands career options available to students because the demand is great in the Washington, D.C., metropolitan area for people with interdisciplinary training, which includes a background in statistics and data analysis. Inquiries should be directed to the Statistics Department. Students who plan to work toward the certificate should seek advice from the department’s undergraduate coordinator.

**Certificate Requirements**

The certificate program requires 24 credits: 12 credits of certificate courses plus 12 credits of electives.

**Certificate Courses (12 credits)**

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- or
- STAT 346 - Probability for Engineers Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3
• STAT 474 - Introduction to Survey Sampling Credits: 3
  or
• STAT 574 - Survey Sampling I Credits: 3

Elective Courses (12 credits)

Choose 12 credits from the following courses:

• STAT 435 - Analysis of Experimental Data Using SPSS Credits: 3
• STAT 455 - Experimental Design Credits: 3
• STAT 457 - Applied Nonparametric Statistics Credits: 3
• STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
• STAT 498 - Independent Study in Statistics Credits: 1-3
• STAT 499 - Special Topics in Statistics Credits: 3
• ECON 445 - Design and Analysis of Experiments Credits: 3
• OR 335 - Discrete Systems Modeling and Simulation Credits: 3 (or crosslisted course SYST 335)
• OR 441 - Deterministic Operations Research Credits: 3 (or crosslisted course MATH 441)
• OR 442 - Stochastic Operations Research Credits: 3 (or crosslisted course MATH 442)
• OR 481 - Numerical Methods in Engineering Credits: 3 (or crosslisted course MATH 446)
• SYST 473 - Decision and Risk Analysis Credits: 3

Undergraduate Minor

Data Analysis Minor

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

The minor provides students with a background in data analysis and statistical methodology. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

Course Requirements

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 9 of the 15 credits must be in STAT courses. At least 8 credits must be in courses not required by the student’s major.

Core Sequence (6 credits)

To satisfy the core requirement, students must complete one of these sequences with grades of C or better:

• STAT 250 - Introductory Statistics I Credits: 3
• STAT 350 - Introductory Statistics II Credits: 3

OR

• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

OR

Provided the 9 elective credits are all STAT courses, mathematics majors may substitute:
• MATH 351 - Probability Credits: 3
• MATH 352 - Statistics Credits: 3

Elective Courses (9 credits)

The 9 elective credits must be chosen from a list of courses approved by the department's undergraduate coordinator. Courses currently approved for the minor are the following:

• STAT 362 - Introduction to Computer Statistical Packages Credits: 3
• STAT 435 - Analysis of Experimental Data Using SPSS Credits: 3
• STAT 455 - Experimental Design Credits: 3
• STAT 457 - Applied Nonparametric Statistics Credits: 3
• STAT 463 - Introduction to Exploratory Data Analysis Credits: 3
• STAT 474 - Introduction to Survey Sampling Credits: 3
• STAT 499 - Special Topics in Statistics Credits: 3
• BINF 401 - Bioinformatics and Computational Biology I Credits: 3
• CEIE 410 - Geographic Information Systems in Engineering Credits: 3
• CS 450 - Database Concepts Credits: 3
• ECON 345 - Introduction to Econometrics Credits: 3
• ECON 445 - Design and Analysis of Experiments Credits: 3
• GCH 460 - Program Evaluation Credits: 3
• OR 335 - Discrete Systems Modeling and Simulation Credits: 3 (or crosslisted course SYST 335)
• OR 441 - Deterministic Operations Research Credits: 3
• OR 442 - Stochastic Operations Research Credits: 3
• PSYC 300 - Statistics in Psychology Credits: 4
• SOCI 405 - Analysis of Social Data Credits: 4
• SYST 469 - Human Computer Interaction Credits: 3
• SYST 473 - Decision and Risk Analysis Credits: 3

Bachelor's/Accelerated Master's Program

BS/Statistical Science, Accelerated MS

School: The Volgenau School of Information Technology and Engineering
Department: Statistics

This degree option allows Mason students to earn an MS in statistical science in less time than if they had first graduated from a suitable Mason BS program and then applied to the MS program.

Admission Requirements

Students must begin MS work within six months following completion of a BS degree in any one of the Volgenau School major areas or a BS in mathematics from the College of Science. Admission is guaranteed to any student with an overall GPA of 3.00 in courses taken after the first two undergraduate years (60 credits) with grades of B or better in the two 500-level STAT courses selected from STAT 544, 554, and 574.

Degree Requirements

The program consists of a minimum of 144 credits that satisfy the requirements for both the BS in the undergraduate major and the MS in statistical science with 6 credits of overlap. Twenty-four credits are required for the MS, provided that students have taken two of STAT 544, 554, and 574 as part of their BS course work.

Master's Degree

Epidemiology and Biostatistics, MS (VSITE)

Banner Code: HH-MS-EBST

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program prepares participants to apply epidemiological and statistical principles to quantitative analysis of health issues. It will prepare health scientists to work as professionals in government agencies, such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other health-related organizations that need to analyze data and design experiments for medical and public health research. Graduates are expected to analyze and interpret increasingly complex health data. The degree is taught jointly by faculty from the Department of Statistics in The Volgenau School of Information Technology and Engineering and the Department of Global and Community Health in CHHS.

Admission Requirements

Applicants must hold a baccalaureate degree in a discipline related to health science or statistics, with a minimum GPA of 3.00 in the last 60 credits. Courses in calculus at the undergraduate level through multivariate calculus equivalent to MATH 113, 114, and 213 with a grade of B or better and STAT 344 or STAT 346 are required for admission to the program. Applications to the degree program are made through CHHS. Admission decisions are made by a joint faculty committee from the Department of Statistics and the Department of Global and Community Health.

Degree Requirements

Students must complete 36 credits of graduate course work. A graduate course in which a grade of C or below is earned may be repeated only once. Graduate students may repeat no more than two courses in their stated program of study. Students must achieve a minimum GPA of 3.00 to graduate.
Core Requirements (18 credits)

- GCH 712 - Introduction to Epidemiology Credits: 3
- GCH 722 - Infectious Disease Epidemiology Credits: 3
- GCH 732 - Chronic Disease Epidemiology Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3

Epidemiology Electives (6 credits)

Select a minimum of two courses from the following:

- GCH 551 - Research Methods in Rehabilitation Science Credits: 3
- GCH 605 - Social Epidemiology Credits: 3
- GCH 680 - International Research Ethics and Methods Credits: 3
- GCH 726 - Advanced Seminar in Epidemiology Credits: 3
- GCH 752 - Nutritional Epidemiology Credits: 3

Statistics Electives (6 credits)

Select a minimum of two courses from the following:

- STAT 652 - Statistical Inference Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3

Electives (6 credits)

Choose two electives (6 credits) in consultation with the academic advisor. Students may choose to work with their advisor to conduct an epidemiology/biostatistics research project.

Total: 36 credits
Statistical Science, MS

Banner Code: VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.

The MS program offers a choice of the following emphasis areas: applied statistics, biostatistics, computational statistics, engineering statistics, and federal statistics. Students may select one of these emphases or design a customized curriculum in conjunction with a faculty advisor. Students also select the research or the professional option. The research option is for students planning to continue with a PhD degree or begin or continue careers in statistical methodology research. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career.

Admission Requirements

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor’s degree from an accredited institution in a field that includes course work in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses: MATH 113, 114, 213; MATH 203 or 322; STAT 250 or 344; and STAT 346 or MATH 351. Course work taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Degree Requirements

In addition to meeting general requirements that apply to master’s degrees at Mason, all students must complete the 12-credit core requirements for the degree. Students build on these core requirements by choosing 12 credits of emphasis area courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. This choice must be made no later than the end of the semester in which 15 credits have been completed.

Professional Option:

The professional option focuses on completing coursework in modern statistical theory and practice. Thirty credits are required for the degree: 12 credits of core courses (taken by all MS students), 12 credits of emphasis area courses, and 6 credits of electives. Students electing this option are encouraged to pursue a broad background in statistical science, and they may seek to concentrate on applications of statistical methodology to other disciplines.

Students who select the professional option may elect to write a master’s essay. This piece is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The essay is usually about 20 to 25 pages long and demonstrates the student’s ability to read and synthesize current technical literature into a scholarly essay. The essay is evaluated by the student’s adviser, taking into account the comprehensiveness of the coverage of the scientific literature, the
accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their essay to develop their skills in preparing reports on technical subjects. The essay is usually written in the context of 3 credits of STAT 798 Master’s Essay, which count as elective credits. Students opting not to write an essay must take 30 credits of coursework.

Research Option:

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master's Thesis, which count as elective credits. The remaining 24 credits include the 12 core credits and 12 emphasis area credits.

In addition to satisfying general university requirements for a master’s degree, candidates with the research option must submit a thesis or report based on the research to the student’s thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis or report is written. The exam is administered by the student’s thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses (12 credits)

The core course work covers the basic elements of statistics at the graduate level. STAT 544 covers the major mathematical framework for statistical theory and practice. STAT 652 provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. The final core course is STAT 656, which focuses on the theory and application of linear regression analysis.

- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Emphasis Area Courses (12 credits)

Emphasis area courses may be chosen from any of the remaining 600-level graduate STAT courses except 645 and 664. In addition, STAT 574, 751, 758, 760, and 763 may be chosen as emphasis area courses.

Elective Courses (6 credits)

Elective courses may be chosen from any 500-, 600-, or 700-level STAT courses except STAT 535. STAT 789 may be repeated for credit with prior written approval from the department’s graduate coordinator. Also, certain courses from other departments may be used as elective credits in a customized curriculum designed in conjunction with a faculty advisor and approved in writing by the department’s graduate coordinator. Customized curriculum must be submitted and approved no later than the end of the semester in which 15 credits have been completed.

Suggested Programs of Study
The following are some emphasis areas and elective courses students might consider taking depending on their particular area of interests. Students do not have to select all of their courses from any one of these lists; they are provided only as a guide.

Applied Statistics:

- STAT 574 - Survey Sampling I Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

Biostatistics:

- STAT 660 - Biostatistical Methods Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3

Computational Statistics:

- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 751 - Computational Statistics Credits: 3
- STAT 763 - Statistical Graphics and Data Exploration II Credits: 3

Engineering Statistics:

- STAT 645 - Stochastic Processes Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 719 - Computational Models of Probabilistic Reasoning Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3

Federal Statistics:

- STAT 574 - Survey Sampling I Credits: 3
- STAT 634 - Case Studies in Data Analysis Credits: 3
- STAT 660 - Biostatistical Methods Credits: 3
• STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
• STAT 665 - Categorical Data Analysis Credits: 3
• STAT 674 - Survey Sampling II Credits: 3

Total: 30 credits

Note:

A student concurrently enrolled in the Certificate in Actuarial Sciences Program and the MS in Statistical Sciences Program may count MATH 555 and 556 as approved elective courses and may count MATH 653 and 654 as emphasis area courses when designing a curriculum for the MS in Statistical Science. Credit toward the MS in Statistical Sciences will not be given for both MATH 654 and STAT 668. The full curriculum should be designed with the approval of the student’s statistics academic advisor and the statistics graduate coordinator. The Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Sciences. Otherwise, at most two of MATH 555, 556, 653, and 654 can be counted toward the MS in Statistical Sciences as elective courses; none can be applied as emphasis area courses.

Dual Master's

Mathematics and Statistical Science Dual-Degree MS

Banner Codes: SC-MS-MATH, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program allows students to earn an MS degree in mathematics and an MS degree in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics Program and the MS in Statistical Science Program. A joint faculty committee from the Mathematical Sciences and Statistics Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

• MATH 621 - Algebra I Credits: 3
• MATH 675 - Linear Analysis I Credits: 3

• MATH 677 - Ordinary Differential Equations Credits: 3

OR
- MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Elective Credits

- 12 elective credits in MATH courses numbered 610 or higher, excluding MATH 653, 654, 655 and 799. Courses must be approved in advance by the student's mathematical sciences academic advisor and the mathematical sciences graduate coordinator.
- 12 elective credits in 500-, 600-, or 700-level STAT courses, excluding STAT 535 and 799. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Total: 48 credits

Notes:

- Students in either the BS/Accelerated MS in Mathematics Program or the BS/Accelerated MS in Statistics Program, cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in mathematics or the MS in statistical science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Operations Research and Statistical Science Dual-Degree MS (STAT)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements
Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual-degree program requires a total of 48 credits as specified below:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Elective Credits in OR Courses

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

**Deterministic Methods Courses:**
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic Methods Courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Elective Credits in STAT Courses

12 elective credits in 500-, 600-, or 700-level STAT courses, excluding 535. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Total: 48 credits

Notes:
• A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.

• Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS in Statistics Program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.

• If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

• Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Master's Level Certificate

Biostatistics Graduate Certificate (VSITE)

Banner Code: VS-CERG-BSTA

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This certificate, a joint program with CHHS, prepares participants to apply statistical methods to quantitative analysis of health care issues. It is aimed at health scientists and professionals in government agencies such as the National Institutes of Health, pharmaceutical companies, research hospitals, public health agencies, and other medical research organizations that design medical experiments and analyze and interpret increasingly complex health care data. The program will also help prepare students begin careers in such organizations. The certificate is taught jointly by faculty from the Department of Statistics and Department of Global and Community Health.

Admission Requirements

Applicants must hold a bachelor’s degree from a regionally accredited institution of higher education in a discipline related to health science or statistics, with a GPA of 3.00 in the last 60 credits. Such fields include medicine, biology, nursing, health science, biostatistics, statistics, mathematics, and psychology. A course in college algebra with a grade of B or higher is required for admission to the program.

Certificate Requirements

Students must complete one course from each of the five groups. All listed STAT courses except STAT 535 and STAT 660 require three semesters of calculus.

• STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
  or
• STAT 554 - Applied Statistics Credits: 3
• STAT 660 - Biostatistical Methods Credits: 3
• GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
  or
• NURS 804 - Advanced Quantitative Data Analysis for Health Care Research I Credits: 3
Federal Statistics Graduate Certificate

Banner Code: VS-CERG-FSS

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

This professional program is targeted at upgrading the skills of practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The federal statistics certificate is intended to respond to the need for broad training in statistics; survey methods; data analysis, including graphics and data visualization; databases and data security; parallel computation and related technology; geographic information systems; and issues of statistics and public policy. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admission Requirements

Potential candidates should hold a bachelor’s degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These requirements are normally satisfied by students that have successfully completed courses equivalent to the following Mason courses: MATH 113, MATH 114, and STAT 344. Candidates must also be computer literate. Applicants typically have degrees in such fields as sociology, economics, engineering, mathematics, statistics, and business. Candidates should inquire with the department’s graduate coordinator for details of program planning. Courses are offered in late afternoon and evening and are particularly suitable for part-time students.

Certificate Requirements

The certificate program consists of 15 credits: 9 credits of certificate courses plus 6 credits of electives.

Certificate Courses (9 credits)

The certificate courses build the foundations of statistical analysis and survey methods. They consist of the following:

• STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
OR

- STAT 554 - Applied Statistics Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 574 - Survey Sampling I Credits: 3
- STAT 655 - Analysis of Variance Credits: 3
- STAT 656 - Regression Analysis Credits: 3
- STAT 657 - Nonparametric Statistics Credits: 3
- STAT 658 - Time Series Analysis and Forecasting Credits: 3
- STAT 662 - Multivariate Statistical Methods Credits: 3
- STAT 663 - Statistical Graphics and Data Exploration I Credits: 3
- STAT 665 - Categorical Data Analysis Credits: 3
- STAT 673 - Statistical Methods for Longitudinal Data Analysis Credits: 3
- STAT 674 - Survey Sampling II Credits: 3

All of these courses, except for STAT 535, may be used for credit toward the MS in statistical science. Credit is granted for only one of STAT 535 and 554.

Elective Courses (6 credits)

The elective courses are intended to provide a broad background supportive of the multidisciplinary needs of complex statistical systems. Elective courses may be chosen from any 500-, 600-, or 700-level STAT courses. Only 3 credits may be from other departments and must be approved in advance by the department’s graduate coordinator.

Suggested electives include:

- STAT 501 - SAS Language and Basic Procedures Credits: 1
- STAT 502 - Introduction to SAS/GRAPH Credits: 1
- STAT 503 - SAS Macro Language Credits: 1
- STAT 660 - Biostatistical Methods Credits: 3
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- STAT 668 - Survival Analysis Credits: 3
- STAT 751 - Computational Statistics Credits: 3
- STAT 758 - Advanced Time Series Analysis Credits: 3
- STAT 763 - Statistical Graphics and Data Exploration II Credits: 3
- STAT 760 - Advanced Biostatistical Methods Credits: 3
- ECON 637 - Econometrics I Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- PUAD 742 - Program Evaluation Credits: 3
- SOCI 631 - Survey Research Credits: 3

Some courses may have prerequisites for which students must qualify or seek a waiver from the appropriate instructor.

Total: 15 credits

Doctoral Degree
Statistical Science, PhD

Banner Code: VS-PHD-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Statistics

The terminal degree PhD in statistical science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of mathematical theory, computation, and data analysis, and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biometric identification, biostatistics, statistical genetics, statistical graphics, and data exploration.

Degree Requirements

Students are required to complete 72 credits. Students should have a master's degree in a mathematically intensive discipline with a minimum 3.50 GPA. Typically, a student entering with a master's degree in statistics, mathematics, or similar discipline is able to receive a reduction of up to 24 credits from approved course work. In particular, students entering with a master’s degree in statistics are expected to have completed course work equivalent to STAT 544, 554, 652, and 656 with a 3.50 GPA. The program also requires a course in advanced calculus (MATH 315 or equivalent) with a B or better. In exceptional circumstances, talented students with a mathematically intensive undergraduate degree may be admitted.

Written qualifying exams will be taken in the following areas:

- Applied Probability
- Applied Statistics and Data Analysis
- Statistical Inference

Students are required to complete 24 credits of advanced emphasis course work, including three core courses:

- STAT 876 - Measure and Linear Spaces Credits: 3
  OR
- STAT 971 - Probability Theory Credits: 3
- STAT 972 - Mathematical Statistics I Credits: 3
- STAT 973 - Mathematical Statistics II Credits: 3

Additional Information:

The remaining five courses are selected and approved by the doctoral supervisory committee and the PhD Program Director and should be numbered 600 or above. STAT 652, 656, and 660 do not count toward the degree.

Following successfully passing the qualifying exams, students should select a dissertation director and a doctoral studies committee. The chair of the doctoral studies committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The doctoral studies committee consists of a chair, 2 members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member. The doctoral studies committee must be approved by the director of the doctoral program in statistical science.
Admission to candidacy is acquired on completion of an oral comprehensive exam administered by the doctoral supervisory committee, covering the three core courses and five advanced emphasis courses, and a dissertation proposal. The student is evaluated as pass, conditional pass, or fail. A student who fails the comprehensive exam may take it a second time. If the student fails a second time, the student is terminated from the program.

The dissertation defense serves as the student’s final examination and is conducted by the doctoral supervisory committee. Both the comprehensive exam and final exam are scheduled on approval of a written request to the department chair.

For more information, e-mail specific questions to statistics@gmu.edu.

Systems Engineering and Operations Research

Phone: 703-993-1670
Web: seor.gmu.edu

School: The Volgenau School of Information Technology and Engineering

Faculty

Professors: Adelman, Chang, Chen, Donohue, Hoffman, Nash, Polyak, Schum, Sage, Sofer (chair)

Associate professors: Brouse, Laskey, Loerch, Sherry, Shortle, Speller, White

Assistant professors: Ganesan

Affiliated faculty members: Houck, VanTrees

Research and term professors: Costa, Gross, Sherry, Wagenhals, Wagner, Wolman

Adjunct professors: Alexander, Barry, Belle, Camp, Carley, Charboneau, Humphrey, Killam, Laveson, McDevitt, Morris, Rothwell, Soller, Stanojevic, Stephenson, Stevens, Wieland, Yost

Emeritus faculty: Palmer

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor’s degree in systems engineering, a minor in systems engineering and operations research, master’s degrees in systems engineering and in operations research, and a PhD degree in systems engineering and operations research. In addition, the department offers seven certificate programs at the master’s level: architecture-based systems engineering; command, control, communications, computing, and intelligence (C4I); discovery, design and innovation; military operations research; computational modeling; systems engineering analysis and architecture; and systems engineering of software intensive systems. The Department also offers a dual degree MS in Operations Research and Statistical Science jointly with the Statistics Department.

Systems engineers determine the most effective ways for an organization to use all of a given system’s components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems are computer networks, automobiles, intelligent robots, stereos, the Metro, and Mason. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations research is the professional field that deals with using scientific methods in engineering and management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and
understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems. Much of this work is developing and manipulating mathematical and computer models of organizational systems composed of people, machines, information, and procedures. The overall purpose is to provide a rational basis for decision making.

Mason’s operations research faculty members are principally involved in the theoretical and empirical study of managerial and operational processes, and the use of mathematical and computer models to optimize these systems. Models are needed for a variety of decision-making purposes in business, industry, scientific research, and government to describe different environments and relate alternative plans of action. Thus, the courses in operations research focus on quantitative modeling and the analysis of complex systems. Courses stress the use of contemporary computer hardware and software in modeling and analysis. The Bureau of Labor Statistics predicts that the field of operations research will be one of the fastest-growing professions of the next decade.

Obviously, there is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to seor.gmu.edu.

Course Work

The department offers all courses designated SEOR, SYST, and OR in the Courses chapter of this catalog.

Undergraduate Degree

Systems Engineering, BS

Banner Code: VS-BS-SYST

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

The program leading to the BS in systems engineering prepares students for a professional career in systems engineering. The educational program reflects the systems engineer’s unique perspective, which considers all aspects of a system throughout its lifetime. Mason’s systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year long senior design project provides hands-on experience in applying various systems engineering methods and tools.

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term “system” is interpreted broadly to include information, telecommunication, defense, health delivery, transportation and manufacturing systems, and corporate processes.

Specifically, the objectives of the systems engineering program are that graduates of the program will be able to:

- Apply fundamental concepts of mathematics, science, information technology, and engineering to contemporary and future systems.
- Contribute to the development of systems using systems engineering methods, processes, models and tools.
• Work effectively as a member of multi-disciplinary teams and behave in a professional, ethical, and responsible manner. This includes establishing a foundation for life-long learning in the area of systems engineering and related areas.

• Communicate effectively with team members and decision makers both orally and in writing.

This program is accredited by ABET, 111 Market Place, Suite 1050, Baltimore, Maryland 21202-4012; 410-347-7700. The requirements for the degree may be satisfied on a part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning.

Degree Requirements

In addition to Mason’s general education requirements, students must meet specific requirements for this degree. In the first two years, students obtain a basic foundation in mathematics, the natural sciences, computing, writing, humanities, Arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Degree requirements for the systems engineering major include 120 credits. Students must complete the following:

Mathematics and statistics:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 203 - Linear Algebra Credits: 3
• MATH 213 - Analytic Geometry and Calculus III Credits: 3
• MATH 214 - Elementary Differential Equations Credits: 3
• STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
• STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Natural sciences:

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• CHEM 251 - General Chemistry for Engineers Credits: 4
  or
• CHEM 211 - General Chemistry Credits: 4

Computer science:

• CS 112 - Introduction to Computer Programming Credits: 4
• CS 211 - Object-Oriented Programming Credits: 3
Humanities and social sciences:

- Approved courses in literature, Western civilization, global understanding, arts, and synthesis to satisfy the university's general education requirement. Note that all general education courses should be selected from the department's list of approved courses.
- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3 for the natural sciences and technology

Engineering:

- ENGR 107 - Introduction to Engineering Credits: 2

Systems engineering:

Students must complete each of these courses with a grade of C or better.

- SYST 101 - Understanding Systems Engineering Credits: 3
- SYST 210 - Systems Design Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1
- SYST 320 - Dynamical Systems II Credits: 3
- SYST 330 - Systems Methods Credits: 3
- SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- SYST 470 - Human Factors Engineering Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- SYST 489 - Senior Seminar Credits: 3
- SYST 490 - Senior Design Project I Credits: 3
- SYST 495 - Senior Design Project II Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- 3 approved technical electives

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor’s help and approval, each student is required to complete a plan of study. This plan of study, contained in the detailed pamphlet available from the SEOR office, constitutes a learning plan for the degree program. The advisor must approve changes to the plan of study. All students in systems engineering are required to see their advisor at least once each semester to plan for the next semester’s registration.

Technical Emphasis Areas
The systems engineering program requires 9 credits of technical electives. Students must select one of the following technical emphases, each containing three courses.

**Aviation Systems**

- SYST 420 - Network Analysis Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3

**Control Systems**

- ECE 201 - Introduction to Signal Analysis Credits: 3
- ECE 220 - Signals and Systems I Credits: 3
- SYST 421 - Classical Systems and Control Theory Credits: 3

**Computer Network Systems**

- SYST 420 - Network Analysis Credits: 3
- ECE 465 - Computer Networking Protocols Credits: 3
- TCOM 500 - Modern Telecommunications Credits: 3

**Engineering Systems**

- CEIE 230 - Hydraulics Credits: 3
- ENGR 210 - Statics and Dynamics Credits: 3
- ENGR 310 - Mechanics of Materials Credits: 3

**Operations Research**

- OR 481 - Numerical Methods in Engineering Credits: 3
- SYST 420 - Network Analysis Credits: 3
- SYST 465 - Pricing in Optimization and Game Theory Credits: 3

**Software-Intensive Systems**

- CS 310 - Data Structures Credits: 3
- CS 332 - Object-Oriented Software Design and Implementation Credits: 3
- CS 421 - Software Requirements and Design Modeling Credits: 3

**Synthesis Requirement**
Mason’s synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495.

**Writing-Intensive Requirement**

Mason’s writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489.

**General Education Electives**

General education electives should be selected from the department’s list of approved courses.

**Total: 120 credits**

**Sample Schedule**

The following sample schedule shows the required and elective courses in the program. Students are strongly encouraged to follow this sample schedule to ensure that prerequisites are satisfied. For students who do not place into MATH 113 by taking the math placement exam, an alternative schedule is available. The position of the technical elective courses within the schedule will vary depending on the emphasis, and the position of some general education classes may vary as well. Please consult with your advisor to plan the correct sequence.

**First Semester**

- COMM 100 - Public Speaking Credits: 3
- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGR 107 - Introduction to Engineering Credits: 2
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Total: 15 credits

**Second Semester**

- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- SYST 101 - Understanding Systems Engineering Credits: 3

Total: 15 credits
Third Semester

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- SYST 210 - Systems Design Credits: 3
- Literature course Credits: 3

Total: 16 credits

Fourth Semester

- CHEM 251 - General Chemistry for Engineers Credits: 4
  or
- CHEM 211 - General Chemistry Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- SYST 220 - Dynamical Systems I Credits: 3
- SYST 221 - Systems Modeling Laboratory Credits: 1

Total: 14 credits

Fifth Semester

- ENGL 302 - Advanced Composition Credits: 3 (for natural sciences and technology)
- OR 441 - Deterministic Operations Research Credits: 3
- SYST 320 - Dynamical Systems II Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- Arts course Credits: 3

Total: 15 credits

Sixth Semester

- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3
- SYST 330 - Systems Methods Credits: 3
- SYST 335 - Discrete Systems Modeling and Simulation Credits: 3
- SYST 371 - Systems Engineering Management Credits: 3
- Technical elective Credits: 3

Total: 15 credits

Seventh Semester

- SYST 470 - Human Factors Engineering Credits: 3
- SYST 489 - Senior Seminar Credits: 3
- SYST 490 - Senior Design Project I Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- Technical elective Credits: 3

Total: 15 credits

Eighth Semester

- OR 442 - Stochastic Operations Research Credits: 3
- SYST 495 - Senior Design Project II Credits: 3
- Technical elective Credits: 3
- Global understanding course Credits: 3
- Western civilization or world history course (HIST 100 or HIST 125) Credits: 3

Total: 15 credits

Change of Major

Students who want to change their major to systems engineering must have a GPA of at least 2.75 in all math, physics, engineering, and computer science courses taken to fulfill requirements for the systems engineering degree and should have completed MATH 114 with a grade of B or better.

Interdisciplinary Minor Programs

By taking appropriate sequences of technical electives and, in some cases, a few courses in addition to the 120 credits required for graduation, students in the systems engineering program can obtain a minor in an interdisciplinary program. Available minors include data analysis and computer science. Students should see their advisor and the departments offering the minors for specific requirements.

Bachelor's Level Certificate
Operations Research and Engineering Undergraduate Certificate

Banner Code: BS-CERB-OR

School:  The Volgenau School of Information Technology and Engineering

Department:  Systems Engineering and Operations Research

This certificate program is open to students enrolled in the computer science, decision sciences, and mathematics undergraduate degree programs. The certificate augments the standard curricula with material on the computational aspects of operations research. Because the demand for people trained in this area is great, this program expands the career options available to students.

Certificate Requirements

- MATH 313 - Introduction to Applied Mathematics Credits: 3
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Plus two of the following courses:

- Any 400-level STAT class
- OR 481 - Numerical Methods in Engineering Credits: 3
- OR 498 - Independent Study in Operations Research Credits: 1-3
- OR 499 - Special Topics in Operations Research Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Note:

Students seeking the certificate must apply to the SEOR Department.

Undergraduate Minor

Systems Engineering and Operations Research Minor

Banner Code: SEOR

School:  The Volgenau School of Information Technology and Engineering

Department:  Systems Engineering and Operations Research
The minor in Systems Engineering and Operations Research consists of 15 credit hours of coursework. The specific requirements are as follows:

**Two required SEOR courses:**

- SYST 101 - Understanding Systems Engineering Credits: 3
  or
- SYST 210 - Systems Design Credits: 3
  and
- OR 335 - Discrete Systems Modeling and Simulation Credits: 3

**Three additional courses from the following:**

- SYST 371 - Systems Engineering Management Credits: 3
- SYST 469 - Human Computer Interaction Credits: 3
  or
- SYST 470 - Human Factors Engineering Credits: 3
- SYST 460 - Introduction to Air Traffic Control Credits: 3
- SYST 461 - Air Transportation System Engineering Credits: 3
- SYST 473 - Decision and Risk Analysis Credits: 3
- OR 441 - Deterministic Operations Research Credits: 3
  or
- MATH 441 - Deterministic Operations Research Credits: 3
- OR 442 - Stochastic Operations Research Credits: 3
  or
- MATH 442 - Stochastic Operations Research Credits: 3
- OR 481 - Numerical Methods in Engineering Credits: 3
  or
- MATH 446 - Numerical Analysis I Credits: 3

**Prerequisites:**

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses. For policies governing all minors, see the Academic Policies chapter of this catalog.

**Bachelor's/Accelerated Master's Program**

**BS/Operations Research, Accelerated MS**
Qualified undergraduate students may apply for this five-year program leading to a BS in an engineering discipline and an MS degree in operations research. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply for the program after they have completed at least 90 credits applicable to the BS degree. Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission into the MS program, with the exception that students do not need to have completed an undergraduate degree before admission.

Students must complete all requirements for the BS in their chosen major. Students must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.

Up to two courses (6 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses. The undergraduate version of these courses may not be applied to the MS degree.

<table>
<thead>
<tr>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYST 420</td>
<td>SYST 521</td>

</tr>
<tr>
<td>OR 441</td>
<td>OR 541</td>
</tr>
<tr>
<td>OR 442</td>
<td>OR 542</td>
</tr>
</tbody>
</table>

Credit may not be received for both courses.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

BS/Systems Engineering, Accelerated MS

Qualified undergraduate students may apply for this five-year program, which leads to a BS in an engineering discipline and an MS in systems engineering. The program can be completed in 144 credits. Applicants must be Mason undergraduate students majoring in systems engineering, computer science, computer engineering, electrical engineering, or civil and infrastructure engineering. Students may apply after they have completed at least 90 credits applicable to the BS degree. Students must have an overall GPA of at least 3.30 on courses applicable to the BS degree and must have successfully completed all MATH and PHYS requirements. Students must complete all requirements for the BS in their chosen major. Students in the accelerated program must apply to have the BS degree from the appropriate Volgenau School program conferred the semester before they expect to complete BS requirements. The MS degree is granted on completion of remaining courses.
Up to two courses (6 credits) of approved master’s level courses taken as part of the undergraduate degree may be applied to the graduate degree. These two courses may be chosen from the graduate courses in the following table. For BS candidates, these graduate courses replace the corresponding undergraduate courses listed. The undergraduate version of these courses may not be applied toward the MS degree.

<table>
<thead>

</tbody>
</table>

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

**Systems Engineering, BS/Telecommunications, Accelerated MS**

*School: The Volgenau School of Information Technology and Engineering*

*Department: Systems Engineering and Operations Research*

Students in the BS in Systems Engineering Program may elect to enter an accelerated MS in Telecommunications Program while they are undergraduate students. The program is designed for qualified undergraduate students in the systems engineering program who would like to proceed directly into the MS program, completing the two degrees with 144 credits. Students must satisfy requirements for the BS (120 credits) and the MS (30 credits), with 6 credits of overlap permitted. The MS is on an accelerated track, with 6 credits taken as an undergraduate and 24 credits completed as a graduate student. The 6 undergraduate credits must be selected from those given in the listing that follows.

Applicants must be Mason undergraduate students who preferably have chosen to take the systems engineering of telecommunications elective sequence. Other students will be considered on their individual merit. Students may apply for the accelerated program during a semester after which they will have completed 90 or more credits applicable toward the BS in systems engineering. Students must have an overall GPA of at least 3.25 to apply for the program. Students who have not yet finished 90 credits may be accepted provisionally subject to satisfactory completion of 90 credits. Criteria for admission are identical to criteria for admission into the MS in Telecommunications Program, except that students do not need to have completed an undergraduate degree prior to admission into the accelerated program.

Accepted students must maintain a minimum 3.25 GPA in the undergraduate segment of the accelerated program and a 3.00 GPA in the graduate segment. That is, students who have been accepted into the program must maintain a 3.25 average until they have satisfied all requirements for the BS in systems engineering. They must then maintain a minimum 3.00 GPA in the graduate segment.

Students must complete all requirements for the BS in systems engineering. Students in the accelerated program must apply to have the BS degree conferred the semester before they expect to complete the BS requirements. The MS in telecommunications is granted on completion of all requirements for the accelerated degree.

**Degree Requirements**

**Telecommunications courses**
The following courses may be taken by a systems engineering undergraduate student as part of the accelerated program:

- TCOM 500 - Modern Telecommunications Credits: 3
- TCOM 501 - Data Communications and Local Area Networks Credits: 1.5
- TCOM 502 - Wide Area Networks and Internet Credits: 1.5
- OR 541 - Operations Research: Deterministic Models Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3 (if taken, replaces TCOM 521 in the telecommunications core requirements)

**Master's Degree**

**Operations Research, MS**

*Banner Code: VS-MS-OPRS*

*School: The Volgenau School of Information Technology and Engineering*

*Department: Systems Engineering and Operations Research*

This program prepares students for research and professional practice associated with the formulation and analysis of mathematical models for decision making and their computer implementation. Major components include optimization, queuing and network modeling, computer simulation and modeling, applied and computational probability, and application of these components to realistic and relevant operational analysis problems. Students are expected to become proficient in these areas, as well as in supporting areas of information technology necessary to implement operations research methods.

The program includes core courses and electives selected by the student with the aid of a faculty advisor. To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Students may take courses through the Commonwealth Graduate Engineering Program. Appropriate courses may be transferred, with advisor approval, into this Mason degree program.

**Admission Requirements**

To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability and statistics (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:

- Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have a satisfactory score on the TOEFL.
- Provide three letters of recommendation submitted by former professors or supervisors.

The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500. A sample test is available from the department.
Students with minor deficiencies in preparation may be accepted conditionally pending removal of the deficiencies. Courses taken to remove admission deficiencies (including SYST 500) extend minimum requirements for the degree. Students whose undergraduate training was in the quantitative social sciences or quantitatively oriented business administration may be allowed to complete a portion of the mathematics prerequisite by taking SYST 500.

Degree Requirements

The program consists of 30 credits. Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of four concentration areas or in an individual plan approved by the student's advisor.

Core Courses, Project

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3

OR Electives

At least three 600-level or higher OR courses must be taken. These include at least one deterministic methods and one stochastic methods course.

**Deterministic methods courses:**
- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3

**Stochastic methods courses:**
- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Additional Electives

Up to two additional elective courses may be chosen with written concurrence of the advisor. These courses should be taken in an area appropriate to the student’s interests, such as operations research, statistics, computer science, information systems, systems engineering, electrical and computer engineering, economics, mathematics or supply chain management. At least one of these electives must be taken from SEOR’s course offerings.
With the advisor’s permission, a qualified student may elect to write a thesis in place of 3 credits of course work from the methodological or applications area.

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The four concentrations available are decision analysis, military operations research, optimization, and stochastic modeling.

▲ Concentration in Decision Analysis (DA)

Students concentrating in decision analysis must complete the following. The remaining two electives are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- OR 681 - Decision and Risk Analysis Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3

▲ Concentration in Military Operations Research (MOR)

Students concentrating in military operations research must complete the following. The remaining two courses are chosen with written concurrence of the student’s advisor and must include one deterministic methods course and one stochastic methods course.

- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

▲ Concentration in Optimization (OPT)

Students whose primary interest is in optimization may complete a concentration by choosing three courses from the following. The remaining two courses are chosen with written concurrence of the advisor. They should be tailored to the student’s interest and must include at least one stochastic methods course. The other course may be chosen from the department’s offerings, appropriate offerings in other departments within the Volgenau School, and appropriate courses from other university departments. A sample of possible courses outside SEOR is available from the department office.

- OR 640 - Global Optimization and Computational Intelligence Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- OR 741 - Advanced Linear Programming Credits: 3

▲ Concentration in Stochastic Modeling (STM)
Students concentrating in stochastic modeling must complete one 600-level statistics course (numbered 634 or above) and two courses from the following. The remaining two courses are chosen with written concurrence of the student's advisor and must include at least one deterministic methods course.

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 674 - Dynamic Programming Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Dual-Degree MS in Operations Research and Statistical Science

The program allows students to earn an MS in Operations Research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required of the degrees were sought independently. See the corresponding catalog entry.

Systems Engineering, MS

Banner Code: VS-MS-SYST

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

Mason's educational and research program in Systems Engineering addresses a broad range of issues relevant to the design, implementation, analysis, and management of systems. Specialization areas include Architecture-Based Systems Integration; Air Transportation; Systems Engineering Analysis; Systems Management; Command, Control, Communications, Computing, and Intelligence; and Systems Engineering of Software-Intensive Systems. Research activities include both fundamental and applied research. GMU's graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems "perspective".

The program prepares students for a professional career in systems design, development, and management, associated with problem formulation, issue analysis, and evaluation of alternative courses of action. The program emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to master issues relevant to practical aspects of systems design, engineering, and management. The program prepares students for careers in research and development, and pursuing advanced graduate study leading to the PhD in information technology.

Each student is assigned a faculty advisor with whom to work to complete an approved plan of study. This plan of study must include three core courses, two methods courses, three to four electives in an emphasis area, and a thesis or systems engineering project. The plan of study must include 30 graduate credits. Either a thesis (6 credits) or research project (3 credits) is required for the degree. Matriculation requirements for candidates needing additional work in mathematics or engineering also may be included in the plan of study.

Foundation and Admission Requirements

Applicants should have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also should have completed courses in calculus (MATH 113, 114, and 213), matrix algebra (MATH 203), differential equations (MATH 214), applied probability (STAT 346), and a scientific programming language (CS 112).

Other requirements are as follows:
Evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the GRE. Nonnative English speakers must have achieved a satisfactory score on the TOEFL exam.

Three letters of recommendation submitted by former professors or supervisors

Working background in engineering mathematics and computer systems. Students with minor deficiencies in preparation may apply for admission to the program, but they will be required to take one or more foundation courses. The department offers SYST 500 as an intensive review of undergraduate engineering mathematics, including matrix algebra, transforms, differential equations, probability, and statistics.

Students who have not completed a basic engineering undergraduate mathematics sequence will be required to complete courses in engineering calculus and matrix algebra prior to acceptance. On acceptance, students will be required to take a foundation qualification test a week or two before school starts, unless waived by the department chair or graduate coordinator. Students who fail the test will be required to take SYST 500 or other foundation courses. A sample test is available from the department.

Familiarity with analytical modeling software, such as spreadsheets or math packages, is also expected. Students should acquaint themselves with these software packages before beginning classes.

Degree Requirements

Project or Thesis

Each student must complete a project (3 credits); under certain circumstances with the approval of the department chair, students may complete a thesis (6 credits). Under the project option, students complete 3 credits of SYST 798, in which students propose and conduct an approved team project. A project report is submitted at the end of the semester, and a final presentation is made to the Systems Engineering and Operations Research Department faculty. Under the thesis option, students complete 6 credits of SYST 799. The master’s thesis should reflect a significant independent research effort. The work is conducted under the guidance of a faculty thesis advisor from the Systems Engineering and Operations Research Department, and the final written thesis and oral defense are approved by a three member faculty committee and submitted to the Volgenau School. The thesis work is expected to be completed while taking 6 credits of SYST 799. Although students may register for more than 6 credits, only 6 credits can be applied toward the degree.

Core Courses

Students must complete the following three core courses (9 credits):

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3

Methods Courses

Students must complete two basic methods courses, including SYST 611 System Methodology and Modeling. The other basic methods course may depend on the emphasis chosen by the student and must be selected from the following list:

- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
Emphasis Courses

Students must complete a set of elective courses that, together with the basic methods courses, constitute a clearly defined emphasis within systems engineering. Students pursuing the thesis option complete three electives in an emphasis; students pursuing the project option complete four electives in an emphasis.

Students may create their own emphasis with the approval of their advisor, or they may choose one of the following six emphases: systems engineering analysis, systems management, architecture-based systems integration, C4I, systems engineering of software-intensive systems, and advanced transportation systems. Approved basic methods courses and electives for the major emphases are as follows.

Systems Engineering Analysis Emphasis

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This emphasis provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

With careful planning, students who complete this emphasis might be able to complete the Systems Engineering Analysis and Architecture Graduate Certificate simultaneously with their MS.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses

Emphasis-specific courses:

Students must complete the following course:

- SYST 542 - Decision Support Systems Engineering Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and must be approved by the student’s advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
Systems Management Emphasis

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This track emphasizes the theory and practice of systems management and prepares students for careers in managing the development of complex systems.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

Emphasis-specific courses:

Students must take the following:

- SYST 571 - Systems Engineering Management Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and must be approved by the advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 540 - Analysis for Systems Management Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
- SYST 622 - System Integration and Architecture Evaluation. Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
  or
- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 677 - Statistical Process Control Credits: 3
  or
- OR 677 - Statistical Process Control Credits: 3
  or

Architecture-Based Systems Integration Emphasis

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This emphasis covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.
With careful planning, students who complete this emphasis might be able to complete the Architecture-Based Systems Integration Graduate Certificate simultaneously with their MS.

**Basic methods courses:**

- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3

**Emphasis-specific courses:**

Students must complete the following courses:

- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3
  The remaining two courses are electives taken from the list below with approval of the advisor. Courses designated as basic methods courses may also be used as an elective.
- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3
- SYST 622 - System Integration and Architecture Evaluation. Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

**Command, Control, Communications, Computing, and Intelligence (C4I) Emphasis**

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

With careful planning, students who complete this emphasis might be able to complete the Command, Control, Communications, Computing, and Intelligence Graduate Certificate simultaneously with their MS.

**Basic methods courses:**

- OR 542 - Operations Research: Stochastic Models Credits: 3
  or
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3

**Emphasis-specific courses:**
Students must take the following:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
  or
- ECE 670 - Principles of C4I Credits: 3

- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Systems Engineering of Software-Intensive Systems Emphasis

This emphasis addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient, and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

With careful planning, students who complete this emphasis might be able to complete the Systems Engineering of Software-Intensive Systems Graduate Certificate simultaneously with their MS.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

Emphasis-specific courses:

Students must take the following:

- SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3

The remaining courses are electives taken from the list below. The set of elective courses must constitute a well-defined focus and approved by the student's advisor. Courses designated as basic methods courses may also be used as elective courses once the requirement of two basic methods courses has been met:

- CS 571 - Operating Systems Credits: 3
Advanced Transportation Systems Emphasis

The air transportation system is among the most complex networked systems. This specialization is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Basic methods courses:

- SYST 611 - System Methodology and Modeling Credits: 3
- One additional course from the list of basic methods courses.

Emphasis-specific courses:

Students must complete the following:

- SYST 560 - Introduction to Air Traffic Control Credits: 3
- SYST 660 - Air Transportation Systems Modeling Credits: 3

The remaining courses are electives taken from the list below. The set of electives must constitute a well-defined focus and must be approved by the student's advisor. Courses designated as basic methods courses may also be used as electives once the requirement of two basic methods courses has been met:

- SYST 571 - Systems Engineering Management Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3
- OR 647 - Queuing Theory Credits: 3

Total: 30 credits
Dual Master's

Operations Research and Statistical Science Dual-Degree MS (OPRS)

Banner Codes: VS-MS-OPRS, VS-MS-STAT

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program allows students to earn an MS in operations research and an MS in statistical science by completing 48 credits of course work in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

Degree Requirements

The dual degree program requires a total of 48 credits as specified below:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 680 - Project Course in Operations Research Credits: 3
- STAT 544 - Applied Probability Credits: 3
- STAT 554 - Applied Statistics Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- STAT 656 - Regression Analysis Credits: 3

Elective Credits in OR Courses

12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course.

Deterministic Methods Courses:

- OR 641 - Linear Programming Credits: 3
- OR 642 - Integer Programming Credits: 3
- OR 643 - Network Modeling Credits: 3
- OR 644 - Nonlinear Programming Credits: 3
Stochastic Methods Courses:

- OR 645 - Stochastic Processes Credits: 3
- OR 647 - Queuing Theory Credits: 3
- OR 675 - Reliability Analysis Credits: 3
- OR 677 - Statistical Process Control Credits: 3

Elective Credits in STAT Courses

12 elective credits in 500-, 600-, or 700-level STAT courses, excluding 535. Courses must be approved in advance by the student's statistics academic advisor and the statistics graduate coordinator.

Notes:

- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS/Accelerated MS in Operations Research Program or the BS/Accelerated MS in Statistics Program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in operations research or the MS in statistical science.

Total: 48 credits

Master's Level Certificate

Architecture-Based Systems Integration Graduate Certificate

Banner Code: VS-CERG-ABSI

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

Certificate Requirements

The following courses must be completed with a GPA of B or better:

- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
Completing the ABSI Certificate within the MS/SE Program

In addition to the ABSI Certificate courses students must take 5 courses (15 credits) including:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 798 - Systems Engineering Project Credits: 3
- One approved elective from the ABSI Emphasis. Credits: 3

Command, Control, Communications, Computing, and Intelligence Graduate Certificate

Banner Code: VS-CERG-C4I

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The C4I certificate program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

The program is available to students who hold bachelor’s degrees in engineering and scientific disciplines or are in graduate status in such programs. Admission requirements are identical to those for the master’s degree in systems engineering.

Certificate Requirements

The certificate consists of 15 credits (5 courses). Students must complete the following with an average grade of B or better:

- SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I) Credits: 3
  or
- ECE 670 - Principles of C4I Credits: 3
  and
- OR 542 - Operations Research: Stochastic Models Credits: 3
  or
- ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
and three courses out of the following:

- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 684 - Sensor Data Fusion Credits: 3
- SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- ECE 630 - Statistical Communication Theory Credits: 3
- ECE 642 - Design and Analysis of Computer Communication Networks Credits: 3

Completing the C4I Certificate within the MS/SE Program

In addition to the 5 certificate courses, students must complete the following five courses:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 530 - System Management and Evaluation Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 798 - Systems Engineering Project Credits: 3

Computational Modeling Graduate Certificate

Banner Code: VS-CERG-CCM

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This certificate program provides knowledge, tools, and techniques to those who work or plan to work in the field of computational modeling. Courses taken for this certificate program can count toward a master’s degree in operations research or statistics or a PhD in computational sciences and informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

For admission into the certificate program, applicants must meet minimum entrance requirements for the MS in operations research, the MS in statistical science, or the PhD in computational sciences and informatics.

Certificate Requirements

- OR 682 - Computational Methods in Engineering and Statistics Credits: 3
- or
- MATH 685 - Numerical Methods Credits: 3
- or
- CSI 700 - Numerical Methods Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
In addition, candidates must choose any one of the following electives:

- CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- SYST 611 - System Methodology and Modeling Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- ECE 521 - Modern Systems Theory Credits: 3
- MATH 673 - Dynamical Systems Credits: 3

Total: 12 credits

Discovery, Design, and Innovation Graduate Certificate

Banner Code: VS-CERG-DDI

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program responds to the growing need for professional knowledge in innovation. It provides a balanced understanding of the entire process: discovery of knowledge, use in inventive problem solving, development of inventions, and familiarity with using various inventive design methods and tools. The program is available to students who hold master’s degrees in engineering and scientific disciplines or who are in such graduate programs. Students may pursue the certificate concurrently with any of the graduate programs in the Volgenau School; however, the certificate is not awarded until all requirements have been completed.

Certificate Requirements

Certificate candidates must complete at least 15 credits with an average grade of B or better.

To obtain the certificate, students must take:

- SYST 520 - System Engineering Design Credits: 3

and two of the following:

- CEIE 601 - Infrastructure Modeling Credits: 3
  or
- CEIE 670 - Civil Engineering Decision Methods and Tools Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3 (recommended if going on for MS in civil and infrastructure engineering)
- SYST 664 - Bayesian Inference and Decision Theory Credits: 3
  or
- STAT 664 - Bayesian Inference and Decision Theory Credits: 3
- SYST 781 - Data Mining and Knowledge Discovery Credits: 3
  or
- STAT 781 - Data Mining and Knowledge Discovery Credits: 3
- STAT 652 - Statistical Inference Credits: 3
- OR 671 - Judgment and Choice Processing and Decision Making Credits: 3
  or
- SYST 671 - Judgment and Choice Processing and Decision Making Credits: 3

Military Operations Research Graduate Certificate

Banner Code: VS-CERG-MOR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

This program provides knowledge, tools, and techniques to those who work or plan to work in the field of military operations research. It is appropriate for students who cannot complete requirements for a master’s degree in operations research, but who want a concentrated study of military modeling. Admissions requirements are identical to those for the master’s degree in operations research.

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

Certificate Requirements

To obtain the certificate, a student needs to complete the following:

- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 635 - Discrete System Simulation Credits: 3
- OR 651 - Military Operations Research I: Cost Analysis Credits: 3
- OR 652 - Military Operations Research Modeling II: Effectiveness Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3

Systems Engineering Analysis and Architecture Graduate Certificate

Banner Code: VS-CERG-SEAA

School: The Volgenau School of Information Technology and Engineering
The graduate certificate in Systems Engineering Analysis and Architecture (SEAA) is intended for students who want to advance
their knowledge in systems engineering analysis, design and architecture. Students get an understanding of the theory and/or
tools of the systems life cycle, systems requirements and cost modeling, systems design, architecture-based systems engineering,
the design of systems of systems, and a selection of other techniques applicable to systems engineering analysis.

The SEAA certificate program will be open to all students who hold a BS degree in scientific and engineering disciplines from an
accredited university program, with a GPA minimum established by VSITE for all MS programs. Students who are already
enrolled in a master's program must submit an application form to enroll in this certificate program; all others must apply for
graduate admission to this certificate program.

Certificate Requirements

To be eligible for a certificate in Systems Engineering Analysis and Architecture, students must complete three required courses
(9 credits) plus one elective course (3 credits). The three required courses are as follows:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3

Elective Requirement

The elective course must be selected from the following:

- OR 635 - Discrete System Simulation Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3
- SYST 563 - Research Methods in Systems Engineering and Information Technology Credits: 3
- SYST 571 - Systems Engineering Management Credits: 3
- SYST 573 - Decision and Risk Analysis Credits: 3
- SYST 683 - Modeling, Simulation, and Gaming Credits: 3
- SYST 620 - Discrete Event Systems Credits: 3
- SYST 621 - Systems Architecture Design Credits: 3

Total: 12 credits

Systems Engineering of Software-Intensive Systems Graduate
Certificate

Banner Code: VS-CERG-SIS

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research
This certificate is available to any student who holds a bachelor’s degree in an engineering or scientific discipline or has graduate status in such a program. Admission requirements are identical to those for the master’s degree in systems, except that the math requirements include only MATH 113, MATH 114, and a probability and statistics course. Note: Some certificate electives may require stronger math requirements.

Certificate Requirements

To be eligible for a certificate in Systems Engineering for Software-Intensive Systems, students must complete two required courses (6 credits) plus two elective courses (6 credits). The two required courses are as follows:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 542 - Decision Support Systems Engineering Credits: 3

Elective Requirement:

The two elective courses must be selected from the following:

- SYST 520 - System Engineering Design Credits: 3
- SYST 619 - Introduction to Architecture Based Systems Engineering Credits: 3

or

- ECE 672 - Introduction to Architecture-Based Systems Engineering Credits: 3
- CS 555 - Computer Communications and Networking Credits: 3
- SWE 619 - Object-Oriented Software Specification and Construction Credits: 3
- ECE 542 - Computer Network Architectures and Protocols Credits: 3
- INFS 612 - Principles and Practices of Communication Networks Credits: 3

Note: Only one of CS 555, ECE 542 and INFS 612 may be taken.

Total: 12 credits

Doctoral Degree

Systems Engineering and Operations Research, PhD

Banner Code: VS-PHD-SEOR

School: The Volgenau School of Information Technology and Engineering

Department: Systems Engineering and Operations Research

The doctoral program in Systems Engineering and Operations Research offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability on the one hand and an overarching systems perspective that is well-grounded in application on the other. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, research organization, and academia.
The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation predefense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

Admissions

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided, if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for nonnative English speakers. All of an applicant’s background is examined before an admission decision is made.

Program Requirements

Course Requirements

Students entering with a master's degree in a related discipline will be required to complete at least 48 credits. In particular, students entering with a master's degree will be required to complete at least 24 credits of advanced emphasis course work and at least 24 research credits from SEOR 998 Doctoral Dissertation Proposal and SEOR 999 Doctoral Dissertation, with at least 12 credits of SEOR 999. Students entering without an MS will need at least 24 additional credits of coursework.

Coursework Requirements (Students with MS)

Students are required to complete at least 24 credits of advanced emphasis coursework including:

- STAT 554 - Applied Statistics Credits: 3
- SYST 763 - Research Methods in Systems Engineering and Information Technology Credits: 3
- 12 credits of 700-level SEOR approved courses: a list of approved courses is available from the department
- 6 credits in SYST or OR courses numbered 600 or higher, excluding SYST 798 Project in Systems Engineering and OR 680 Project in Operations Research

No more than 3 credits are allowed for a directed reading course. All courses and course substitutions must be approved by the student's dissertation committee chair and the SEOR doctoral coordinator. A GPA of 3.50 is required, and no grade of C is allowed in these 24 credits.

Students lacking prerequisites for their courses or lacking the coursework to complete the qualifying exams or their dissertation may be required to take additional courses.
Coursework Requirements (Students without MS)

Students entering without a master's degree are required to complete an additional 24 credits of master's level courses, including the following:

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3
- 12 additional credits from one of two alternatives (systems engineering or operations research). Consult the SEOR Department for the list of allowable courses.

With appropriate selection of courses, students may obtain the MS degree in Systems Engineering or Operations Research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 798 or OR 680. Consult the SEOR Department for further detail. Credits taken in the courses SYST 798 or OR 680 may not be applied towards the PhD degree program requirements.

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department’s doctoral coordinator.

Qualifying Exam

Each student must take four exams within two years of enrolling in the program. The exams are primarily for testing the students’ familiarity with fundamental concepts.

- SYST 510 - Systems Definition and Cost Modeling Credits: 3
- SYST 520 - System Engineering Design Credits: 3
- OR 541 - Operations Research: Deterministic Models Credits: 3
- OR 542 - Operations Research: Stochastic Models Credits: 3

Note:

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Doctoral Supervisory Committee

Students should select a dissertation director and a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.
Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis course work requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student will be dismissed from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a master's degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing this requirement, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee and the department's doctoral coordinator. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be dismissed from the PhD program.

Concentration

▲ Concentration in Operations Research (OPRS)

Admissions

Students are usually admitted with an MS degree in systems engineering, operations research, or some related engineering or information technology area. The admissions materials are similar to those of the PhD in information technology; however, submittal of GRE scores is mandatory.
Requirements

Students seeking one of these concentrations must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Doctoral Supervisory Committee

The committee chair should be selected from the list of approved chairs of SEOR, and the dissertation director must be a member of SEOR. The doctoral supervisory committee must include at least three members from SEOR. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the department’s doctoral coordinator.

Qualifying Exams

Each student must take a set of four exams from three different degree programs from the following:

- OR 541 - Operations Research: Deterministic Models
- OR 542 - Operations Research: Stochastic Models
- STAT 544 - Applied Probability
- STAT 554 - Applied Statistics
- SYST 520 - System Engineering Design
- SYST 573 - Decision and Risk Analysis

Advanced Emphasis Requirement

For students specializing in operations research, at least 18 of the 24 credits in the advanced emphasis requirement must be in OR courses numbered 600 or higher or in IT courses with an OR designation. For students specializing in systems engineering, at least 18 of the 24 credits must be in SYST courses numbered 600 or higher, or in IT courses with a SYST designation. All exceptions to this rule must be approved by the student’s doctoral supervisor committee and the department’s doctoral coordinator. The doctoral supervisory committee and the associate dean for graduate studies and research of the Volgenau School must approve the overall plan of study. A list of IT courses with an OR or SYST designation is available from the SEOR office.

▲ Concentration in Systems Engineering (SYST)

Admissions

Students are usually admitted with an MS degree in systems engineering, operations research, or some related engineering or information technology area. The admissions materials are similar to those of the PhD in information technology; however, submittal of GRE scores is mandatory.
Requirements

Students seeking one of these concentrations must satisfy all requirements for the PhD in information technology. In addition, the following requirements must be met:

Plan of Study

All decisions concerning the student’s course requirements and plan of study must be approved by the advisor or director, with consent of the department’s doctoral coordinator.

Doctoral Supervisory Committee

The committee chair should be selected from the list of approved chairs of SEOR, and the dissertation director must be a member of SEOR. The doctoral supervisory committee must include at least three members from SEOR. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. Permission for the comprehensive exam and dissertation defense are requested from the Volgenau School associate dean on the basis of a written request and plan that has been approved by the supervisory committee and the department’s doctoral coordinator.

Qualifying Exams

Each student must take a set of four exams from three different degree programs from the following:

- OR 541 - Operations Research: Deterministic Models
- OR 542 - Operations Research: Stochastic Models
- STAT 544 - Applied Probability
- STAT 554 - Applied Statistics
- SYST 520 - System Engineering Design
- SYST 573 - Decision and Risk Analysis
Dedicated to excellence in both teaching and research, the School of Management (SOM) educates future business leaders through world-class teaching, innovative academic programs and strategic business partnerships. With a curriculum rooted in entrepreneurship, corporate governance and global business education the school prepares undergraduate and graduate students for increased globalization through a range of academic programs and international alliances. SOM faculty are deeply engaged in the regional, national and international business communities and their academic expertise combined with real world experience provides a bridge in the classroom from academic theory to business practice.

Business leaders and organizations are actively involved with the School of Management through executive education programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. SOM also maintains close connections to the business community through its advisory board and advisory councils to academic programs. More than 125 business leaders representing 75 different companies serve as advisory board or council members.

SOM enrolls more than 3,550 undergraduate students and more than 450 graduate students in its programs.

The School of Management’s programs offer students a variety of opportunities to enhance their professional endeavors.

- **Our innovative curriculum** meets the demands of the marketplace, focused on business fundamentals, strategic thinking and teamwork.
- **Our highly respected distinguished faculty** are cross-disciplinary collaborators and innovative practitioners that are passionate about education. They bring both theoretical and applied expertise to the classroom.
- **Our outstanding career management professionals** are dedicated to providing tailored support to promote our students' professional advancement and leverage their degree over the short- and long-term.
- **Our diverse student population** offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Faculty

Accounting
Aier, Buchanan, Chen, Dafashy, Douthett, Hasan, Hylton, Jones, Kitching, Lei, Magro, Nutter, Pevzner, Sengupta, Shen, Visvanathan, Warne, Zadeh, Zhang

Finance
Canterbury, Christophe, Crockett, Ferri, Gao, Hanweck, Hsieh, Johnston, Nikolova, Philipov, Pilloff, Stahel, Wang, Xie

Information Systems and Operations Management
Beard, Bockstedt, Das, Druehl, Dutta, Mazumdar, Mehta, Menon, Naor, Sanyal, Singer

Management
Coffinberger, Cramton, Cronin, Demory, Joshi, Klimoski, Kravitz, Langfred, C. Lee, H. Lee, Ling, O'Brien, Parker, Rockmann, Samuels, Wolf, Wolfe, Yasai

Marketing
Cheng, Entrikin, Harvey, Joiner, Jaju, Kulick, Li, Martin, McCrohan, Meamber, Mouri, Philpot, Rose-Robinson, Scott, Sussan

Courses and Programs
SOM offers all course work designated ACCT, BULE, FNAN, GSOM, MBA, MGMT, MIS, MKTG, MSOM, OM, SOM, and TECM in the Courses chapter of this catalog.

Undergraduate
The programs in management education culminate in a BS degree with a major from one of five areas: accounting, finance, information systems and operations management, management, or marketing.

Graduate
SOM offers an MBA, Executive MBA, MS in Accounting, MS in Taxation, and MS in Technology Management. Its Center for Real Estate Entrepreneurship focuses on real estate research and education in real estate development and finance.

Academic Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Appeals Process
The School of Management strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, please contact the Office of Academic and Career Services, Room 008 of Enterprise Hall (703-993-1880).

Undergraduate Degree

Accounting, BS

Banner Code: BU-BS-ACCT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in accounting (ACCT) prepares students for professional careers in the private and public sectors. Students learn how to evaluate fundamental value propositions for various types of organizations and transactions and convert financial and economic information from these organizations and transactions into information that is useful for making decisions. Students also learn how to design and test information systems that provide reliable and relevant information for planning and control. Furthermore, students learn how to identify value-creating opportunities and choose from among competing operating, investing, financing, and disclosure alternatives to maximize firm or organizational value.

The program emphasizes, but is not limited to, the accounting profession and its role in business and government including professional responsibilities and ethics. The program stresses conceptual understanding, technical competencies, analytic abilities, communication skills, and computer literacy. The accounting degree program is separately accredited by AACSB International.

Entering the School of Management

A student interested in pursuing a major in the School of Management (SOM) must apply for acceptance to Bachelor of Science (BS) degree status in SOM. Upon admission to the University, the student’s degree status is classified as BPRE (bachelor-pre). The student then completes the application procedure described below.

Application Procedure

Students must meet the SOM acceptance requirements in effect at the time of application to degree status in the school.

Acceptance is selective, based on completion of the following as of the 2010-11 academic year:

1. At least 48 credits, with a minimum of 9 credits at Mason
2. A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
3. A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application
4. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3
     OR
   - MATH 113 - Analytic Geometry and Calculus I Credits: 4
   - OM 210 - Statistical Analysis for Management Credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3
Deadlines for Application to BS Degree Status

Applications should be submitted during the semester in which the student will complete acceptance requirements.

- November 1 for the following spring semester;
- April 1 for the following summer term; and
- July 1 for the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 with a grade of C or higher.
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 with a grade of C or higher.
  ECON 103 or 104 satisfies the University General Education social and behavioral science requirement.
- Upper-Level (300-400) ECON Credits: 3.
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 with a grade of C or higher.
  OR
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 with a grade of C or higher.
  MATH 108 or MATH 113 satisfies the University General Education quantitative reasoning requirement.
ANTH, PSYC or SOCI Credits: 3.

SOM Core Courses

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301 and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3
  Satisfies the University General Education writing intensive requirement.
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3
  Satisfies the University General Education synthesis requirement.

General Electives

20 credits of general electives are needed to complete the 120 credit hours required for the BU-BS degree. General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Accounting

Required Courses

Note: Completion of ACCT 301 with a grade of B- or higher is required for ACCT 311, 331 and 361.

- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
Electives

The following courses are available if students wish to take more than the 18 required accounting credits. Materials are available in the Office of Academic and Career Services to provide guidance regarding recommended electives. Students who anticipate taking the CPA, CMA, CIA, or other professional exam should consult the applicable regulations and meet with their advisor. State regulations regarding professional examinations may dictate course selections.

- ACCT 372 - Business Analysis and Valuation Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3

Honors in Accounting

Accounting majors with an A or better in ACCT 301 are eligible for the Accounting Honors Program. To graduate with honors in accounting, a student must actively participate in the accounting honor program events, receive a B or better in ACCT 462 and maintain a minimum GPA of 3.50 in all accounting courses above ACCT 301, earning no grade below a B-.

Finance, BS

Banner Code: BU-BS-FNAN

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in finance (FNAN) prepares students for professional careers by providing a solid foundation in the financial principles necessary to make operating decisions for an organization and in financial market analysis.

Entering the School of Management

A student interested in pursuing a major in the School of Management (SOM) must apply for acceptance to Bachelor of Science (BS) degree status in SOM. Upon admission to the University, the student’s degree status is classified as BPRE (bachelor-pre). The student then completes the application procedure described below.

Application Procedure

Students must meet the SOM acceptance requirements in effect at the time of application to degree status in the school.

Acceptance is selective, based on completion of the following as of the 2010-11 academic year:
1. At least 48 credits, with a minimum of 9 credits at Mason
2. A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
3. A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application
4. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3
   OR
   - MATH 113 - Analytic Geometry and Calculus I Credits: 4
   - OM 210 - Statistical Analysis for Management Credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3

**Deadlines for Application to BS Degree Status**

Applications should be submitted during the semester in which the student will complete acceptance requirements.

- November 1 for the following spring semester;
- April 1 for the following summer term; and
- July 1 for the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

**Academic Advising**

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

**BU-BS Degree Requirements**

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

**General Education Requirements**

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).
SOM General Education

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 with a grade of C or higher.
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 with a grade of C or higher.
  ECON 103 or 104 satisfies the University General Education social and behavioral science requirement.
- Upper-Level (300-400) ECON Credits: 3.
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 with a grade of C or higher.
  OR
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 with a grade of C or higher.
  MATH 108 or MATH 113 satisfies the University General Education quantitative reasoning requirement.
- ANTH, PSYC or SOCI Credits: 3.

SOM Core Courses

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301 and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3
  Satisfies the University General Education writing intensive requirement.
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3
  Satisfies the University General Education synthesis requirement.

General Electives

20 credits of general electives are needed to complete the 120 credit hours required for the BU-BS degree. General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Finance
Required Courses (choose three):

- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
- FNAN 311 - Principles of Investment Credits: 3
- FNAN 321 - Financial Institutions Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3

Electives (choose three):

- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
  (If not taken as a required course.)
- FNAN 311 - Principles of Investment Credits: 3
  (If not taken as a required course.)
- FNAN 321 - Financial Institutions Credits: 3
  (If not taken as a required course.)
- FNAN 351 - Principles of Real Estate Credits: 3
- FNAN 401 - Advanced Financial Management Credits: 3
  (If not taken as a required course.)
- FNAN 411 - Investment Analysis and Portfolio Management Credits: 3
  (If not taken as a required course.)
- FNAN 412 - Futures and Options Markets Credits: 3
- FNAN 421 - Money and Capital Markets Credits: 3
- FNAN 440 - International Financial Management Credits: 3
- FNAN 451 - Real Estate Finance Credits: 3
- FNAN 454 - Real Estate Development Credits: 3
- FNAN 462 - Honors Seminar in Finance Credits: 3
- FNAN 491 - Special Topics in Finance Credits: 3
- FNAN 499 - Independent Study Credits: 1-3

Information Systems and Operations Management, BS

Banner Code: BU-BS-ISOM

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in information systems and operations management (ISOM) prepares students for a range of career options by instilling skills that add value to organizations. Graduates will apply their knowledge of technology and business functions to design and improve existing operational and core business processes. They will integrate different business functions into seamless IT-enabled processes and collaborate with business users in defining requirements, identifying new IT-driven business opportunities, building prototypes to validate operations, and managing complex technology projects. The content of the ISOM major is at the intersection of technology, processes, and people.
Entering the School of Management

A student interested in pursuing a major in the School of Management (SOM) must apply for acceptance to Bachelor of Science (BS) degree status in SOM. Upon admission to the University, the student’s degree status is classified as BPRE (bachelor-pre). The student then completes the application procedure described below.

Application Procedure

Students must meet the SOM acceptance requirements in effect at the time of application to degree status in the school.

Acceptance is selective, based on completion of the following as of the 2010-11 academic year:

1. At least 48 credits, with a minimum of 9 credits at Mason
2. A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
3. A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application
4. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3
   - OR
   - MATH 113 - Analytic Geometry and Calculus I Credits: 4
   - OM 210 - Statistical Analysis for Management Credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3

Deadlines for Application to BS Degree Status

Applications should be submitted during the semester in which the student will complete acceptance requirements.

- November 1 for the following spring semester;
- April 1 for the following summer term; and
- July 1 for the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:
• A minimum of 45 credits at the 300- or 400-level.
• A minimum of 30 credits of SOM core and major courses at Mason.
• At least 9 credits required for the specific major and SOM 498 taken at Mason.
• A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education

• ECON 103 - Contemporary Microeconomic Principles Credits: 3 with a grade of C or higher.
• ECON 104 - Contemporary Macroeconomic Principles Credits: 3 with a grade of C or higher.
• ECON 103 or 104 satisfies the University General Education social and behavioral science requirement.
• Upper-Level (300-400) ECON Credits: 3.
• MATH 108 - Introductory Calculus with Business Applications Credits: 3 with a grade of C or higher.
  OR
• MATH 113 - Analytic Geometry and Calculus I Credits: 4 with a grade of C or higher.
  MATH 108 or MATH 113 satisfies the University General Education quantitative reasoning requirement.
• ANTH, PSYC or SOCI Credits: 3.

SOM Core Courses

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301 and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

• ACCT 203 - Survey of Accounting Credits: 3
• ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
• BULE 302 - Legal Environment of Business Credits: 3
• FNAN 301 - Financial Management Credits: 3
• MGMT 301 - People and Organizations Credits: 3
• MIS 102 - Spreadsheet Applications for Business Credits: 1
• MIS 301 - Introduction to Business Information Systems Credits: 3
• MKTG 301 - Principles of Marketing Credits: 3
• OM 210 - Statistical Analysis for Management Credits: 4
• OM 301 - Operations Management Credits: 3
• SOM 301 - Business Models: A Communication Approach Credits: 3
  Satisfies the University General Education writing intensive requirement.
• SOM 498 - Capstone Course: Advanced Business Models Credits: 3
  Satisfies the University General Education synthesis requirement.

General Electives

20 credits of general electives are needed to complete the 120 credit hours required for the BU-BS degree. General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Information Systems and Operations Management

Required Courses:

• MIS 310 - Database Management Systems Credits: 3
• MIS 330 - Systems Analysis and Design Credits: 3
• OM 493 - Management of Technology Projects Credits: 3

Electives (choose three):

Students have considerable flexibility in their choice of electives and may choose from two tracks of study: one in management information systems, which prepares students for a career in the IT industry, and the other in management of business operations, which develops expertise in areas such as quality, project, and supply chain management and business process analysis. Students are strongly urged to discuss their choice of electives and programs of study with their academic advisor. It is also strongly recommended that students planning to major in ISOM take MIS 302 as part of their program.

• OM 320 - Supply Chain Management and E-Business Credits: 3
• OM 352 - Methods and Models of Management Science Credits: 3
• OM 435 - Business Process Analysis and Simulation Credits: 3
• OM 452 - Business Forecasting Credits: 3
• OM 456 - Quality Management Credits: 3
• OM 499 - Independent Study in Operations Management Credits: 1-3
• MIS 302 - Introduction to Programming for Business Applications Credits: 3
• MIS 320 - Networks and Security Credits: 3
• MIS 411 - Management and Control of Information Systems Credits: 3
• MIS 412 - E-Business Systems Development Credits: 3
• MIS 430 - Data Warehousing and Data Mining Credits: 3
• MIS 435 - Knowledge Management Credits: 3
• MIS 440 - E-Commerce Business Models and Applications Credits: 3
• MIS 450 - Internet Architecture and Industry Credits: 3
• MIS 491 - Seminar in Management Information Systems Credits: 3
• MIS 499 - Independent Study in Management Information Systems Credits: 1-3
Management, BS

Banner Code: BU-BS-MGMT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in management prepares students to take leadership, management, and entrepreneurial roles in the public and private sectors. Students learn such skills as strategic thinking, motivating and managing nationally and internationally diverse workforces, building and leading team efforts, negotiating successfully, and instituting planned change in organizations.

Entering the School of Management

A student interested in pursuing a major in the School of Management (SOM) must apply for acceptance to Bachelor of Science (BS) degree status in SOM. Upon admission to the University, the student’s degree status is classified as BPRE (bachelor-pre). The student then completes the application procedure described below.

Application Procedure

Students must meet the SOM acceptance requirements in effect at the time of application to degree status in the school.

Acceptance is selective, based on completion of the following as of the 2010-11 academic year:

1. At least 48 credits, with a minimum of 9 credits at Mason
2. A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
3. A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application
4. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3
   OR
   - MATH 113 - Analytic Geometry and Calculus I Credits: 4
   - OM 210 - Statistical Analysis for Management Credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3

Deadlines for Application to BS Degree Status

Applications should be submitted during the semester in which the student will complete acceptance requirements.

- November 1 for the following spring semester;
- April 1 for the following summer term; and
- July 1 for the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

Academic Advising
Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.

BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 with a grade of C or higher.
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 with a grade of C or higher. ECON 103 or 104 satisfies the University General Education social and behavioral science requirement.
- Upper-Level (300-400) ECON Credits: 3.
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 with a grade of C or higher. OR
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 with a grade of C or higher. MATH 108 or MATH 113 satisfies the University General Education quantitative reasoning requirement.
- ANTH, PSYC or SOCI Credits: 3.

SOM Core Courses

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301 and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a
degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
- FNAN 301 - Financial Management Credits: 3
- MGMT 301 - People and Organizations Credits: 3
- MIS 102 - Spreadsheet Applications for Business Credits: 1
- MIS 301 - Introduction to Business Information Systems Credits: 3
- MKTG 301 - Principles of Marketing Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4
- OM 301 - Operations Management Credits: 3
- SOM 301 - Business Models: A Communication Approach Credits: 3
  Satisfies the University General Education writing intensive requirement.
- SOM 498 - Capstone Course: Advanced Business Models Credits: 3
  Satisfies the University General Education synthesis requirement.

General Electives

20 credits of general electives are needed to complete the 120 credit hours required for the BU-BS degree. General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Management

Required Courses:

- MGMT 312 - Principles and Practices of Management Credits: 3
- MGMT 321 - Introduction to Human Resource Management Credits: 3

Electives (choose four):

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 413 - Organizational Development and Management Consulting Credits: 3
- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - Employee Relations Credits: 3
- MGMT 451 - New Venture Creation Credits: 3
- MGMT 461 - Cross Cultural and Global Management Credits: 3
- MGMT 462 - Honors Seminar in Management Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3
- MGMT 471 - Competitive Strategy Credits: 3
- MGMT 491 - Current Topics in Management Credits: 3
Notes:
Management majors may focus their careers in several areas. In selecting four elective courses, students may want to consider a likely career path. Recommended courses for three possible careers are provided below.

Human Resource Management

- MGMT 421 - Advanced Human Resource Management Credits: 3
- MGMT 431 - Employee Relations Credits: 3

Front-Line Manager or Management Trainee

- MGMT 412 - Diversity in Organizations Credits: 3
- MGMT 463 - Negotiations in Organizations Credits: 3
- MGMT 464 - Teamwork and Interpersonal Skills Credits: 3

Entrepreneur

- MGMT 451 - New Venture Creation Credits: 3
- MGMT 471 - Competitive Strategy Credits: 3
- BULE 402 - Commercial Law Credits: 3

Honors Seminar:

Students with a GPA of at least 3.00 are offered the opportunity to further distinguish their record by participating in MGMT 462, Management Honors Seminar, which addresses a key contemporary management issue in an intensive small group format.

To be eligible for enrollment in MGMT 462, students must be accepted into SOM with a management major, have a cumulative GPA of at least 3.00 with a minimum of 75 semester hours of course work, have a minimum GPA of 3.00 in course work completed for the management major, and be recommended by faculty. The size of the Honors Seminar will be kept small. If the number of interested and qualified students exceeds the number of available spots, management area faculty will select the most qualified students to participate.

Marketing, BS

Banner Code: BU-BS-MKTG

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

The BS in marketing prepares students for a broad range of global and domestic career options in market and consumer research, brand management, advertising, customer relationship management, new market and business development, and marketing
strategy. Marketing opportunities are increasing in the new economy as firms, government agencies, and nonprofit organizations adopt a market orientation.

A marketing major provides students with a solid background in marketing concepts and practices, with emphasis on market analysis and planning, research, and consumer behavior. Because marketing draws on a variety of disciplines for its foundation and is practiced globally, marketing majors are encouraged to take electives in related fields such as psychology, sociology, economics, public policy, international studies, computer science, and foreign languages.

**Entering the School of Management**

A student interested in pursuing a major in the School of Management (SOM) must apply for acceptance to Bachelor of Science (BS) degree status in SOM. Upon admission to the University, the student’s degree status is classified as BPRE (bachelor-pre). The student then completes the application procedure described below.

**Application Procedure**

Students must meet the SOM acceptance requirements in effect at the time of application to degree status in the school.

Acceptance is selective, based on completion of the following as of the 2010-11 academic year:

1. At least 48 credits, with a minimum of 9 credits at Mason
2. A GPA of 2.50 or higher at the end of the semester of application for acceptance for all courses attempted and from all schools and universities attended
3. A minimum Mason cumulative and semester GPA of 2.00 at the end of the semester of application
4. Successful completion of the following courses with a grade of C or better:
   - ACCT 203 - Survey of Accounting Credits: 3
   - MATH 108 - Introductory Calculus with Business Applications Credits: 3
   OR
   - MATH 113 - Analytic Geometry and Calculus I Credits: 4
   - OM 210 - Statistical Analysis for Management Credits: 4
   - SOM 301 - Business Models: A Communication Approach Credits: 3

**Deadlines for Application to BS Degree Status**

Applications should be submitted during the semester in which the student will complete acceptance requirements.

- November 1 for the following spring semester;
- April 1 for the following summer term; and
- July 1 for the following fall semester.

For more information about the application process, contact the Office of Academic and Career Services, 703-993-1880, or visit som.gmu.edu.

**Academic Advising**

Academic planning for undergraduate students is available in the SOM Office of Academic and Career Services, Enterprise Hall, Room 008. Students are encouraged to consult with an advisor regularly. Any student who wishes to change to a major in SOM must consult a SOM academic advisor for degree requirements. For more information about walk-in advising hours or scheduling an appointment, call 703-993-1880, or go to som.gmu.edu.
BU-BS Degree Requirements

SOM students pursuing a BS degree must complete a minimum of 120 credits, including the University General Education requirements, SOM general education, SOM core courses, and major requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of SOM core and major courses at Mason.
- At least 9 credits required for the specific major and SOM 498 taken at Mason.
- A grade of C or higher earned in the SOM core and major requirements.

Students should carefully examine prerequisites for SOM courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

General Education Requirements

SOM students must complete the University General Education requirements, plus 1 additional credit of natural science (the SOM natural science requirement must be fulfilled by completing two 4-credit laboratory sciences).

SOM General Education

- ECON 103 - Contemporary Microeconomic Principles Credits: 3 with a grade of C or higher.
- ECON 104 - Contemporary Macroeconomic Principles Credits: 3 with a grade of C or higher.
  ECON 103 or 104 satisfies the University General Education social and behavioral science requirement.
- Upper-Level (300-400) ECON Credits: 3.
- MATH 108 - Introductory Calculus with Business Applications Credits: 3 with a grade of C or higher.
  OR
- MATH 113 - Analytic Geometry and Calculus I Credits: 4 with a grade of C or higher.
  MATH 108 or MATH 113 satisfies the University General Education quantitative reasoning requirement.
- ANTH, PSYC or SOCI Credits: 3.

SOM Core Courses

A grade of C or higher is required in each of the School of Management core courses listed below. Students will not be permitted to make more than three attempts to achieve a C or higher in the following School of Management core courses: ACCT 301, BULE 302, FNAN 301, MGMT 301, MIS 301, MKTG 301, OM 301 and SOM 301. Those who do not successfully complete these core courses within three attempts will be terminated from their major and will not be eligible to receive a degree from the School of Management. For more information about this, see the "Termination from the Major" section under Academic Policies.

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- BULE 302 - Legal Environment of Business Credits: 3
• FNAN 301 - Financial Management Credits: 3
• MGMT 301 - People and Organizations Credits: 3
• MIS 102 - Spreadsheet Applications for Business Credits: 1
• MIS 301 - Introduction to Business Information Systems Credits: 3
• MKTG 301 - Principles of Marketing Credits: 3
• OM 210 - Statistical Analysis for Management Credits: 4
• OM 301 - Operations Management Credits: 3
• SOM 301 - Business Models: A Communication Approach Credits: 3
  Satisfies the University General Education writing intensive requirement.
• SOM 498 - Capstone Course: Advanced Business Models Credits: 3
  Satisfies the University General Education synthesis requirement.

General Electives

20 credits of general electives are needed to complete the 120 credit hours required for the BU-BS degree. General electives may be selected from any University or SOM course, except courses designated for the Business minor (MSOM).

Major Requirements in Marketing

Required Courses:

• MKTG 312 - Consumer Behavior Credits: 3
• MKTG 351 - Marketing Research Techniques and Applications Credits: 3
• MKTG 471 - Marketing Management Credits: 3

Electives (choose three):

• MKTG 311 - Sales Management Credits: 3
• MKTG 313 - Integrated Marketing Communications Credits: 3
• MKTG 315 - Internet Marketing Credits: 3
• MKTG 332 - Retailing and E-Commerce Management Credits: 3
• MKTG 333 - Business to Business Marketing Credits: 3
• MKTG 407 - International Marketing Credits: 3
• MKTG 451 - Competitive Intelligence and Information Security Credits: 3
• MKTG 481 - Marketing in the Nonprofit Sector Credits: 3
• MKTG 491 - Special Topics in Marketing Credits: 3
• MKTG 499 - Independent Study Credits: 1-3

▲ Concentration in Internet Marketing Resiliency (IMR)

Marketing also offers a concentration in Internet marketing resiliency within the marketing major. This concentration prepares students to enhance and protect the electronic marketing efforts of their firms.
Required Courses (choose four):

- MIS 320 - Networks and Security Credits: 3
- MKTG 315 - Internet Marketing Credits: 3
- MKTG 351 - Marketing Research Techniques and Applications Credits: 3
- MKTG 451 - Competitive Intelligence and Information Security Credits: 3
- MKTG 471 - Marketing Management Credits: 3
- MKTG 491 - Special Topics in Marketing Credits: 3

Bachelor's Level Certificate

Accounting Undergraduate Certificate

Banner Code: BU-CERB-ACCT

Associate Dean for Undergraduate Programs
Phone: 703-993-1880
Web: som.gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia. The requirement for enrollment is a bachelor’s degree or higher from an accredited college or university.

Students are required to complete a minimum of 30 credits of accounting courses. More than half of the required credits must be taken at Mason after acceptance to the certificate program. Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. All students who want to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting, and at least 24 credits of nonaccounting business courses. To receive the Mason accounting certificate, individuals must have completed the following required accounting courses or their equivalents. A grade of B- or higher must be earned in ACCT 301 in order to move on to ACCT 311, 331, and 361.

Certificate Requirements

Required Courses:

- ACCT 203 - Survey of Accounting Credits: 3
- ACCT 301 - Financial Accounting and Managerial Decision Making Credits: 3
- ACCT 311 - Managerial and Cost Accounting Credits: 3
- ACCT 331 - Intermediate Financial Accounting I Credits: 3
- ACCT 332 - Intermediate Financial Accounting II Credits: 3
- ACCT 351 - Taxation and Managerial Decision Making Credits: 3
- ACCT 361 - Accounting Information Systems Credits: 3
- ACCT 461 - Assurance and Audit Services Credits: 3
Electives (choose two):

- ACCT 372 - Business Analysis and Valuation Credits: 3
- ACCT 411 - Advanced Managerial Accounting Credits: 3
- ACCT 433 - Advanced Financial Accounting Credits: 3
- ACCT 451 - Advanced Federal Taxation Credits: 3
- ACCT 462 - Honors Seminar in Accounting Credits: 3
- ACCT 472 - Government and Not-for-Profit Accounting Credits: 3
- ACCT 491 - Seminar in Accounting Credits: 3
- ACCT 499 - Independent Study Credits: 1-3

Note:

If a student has a previous degree in business or accounting, the faculty recommends that students take SOM courses above the 301 level to complete the 16 Mason credits needed after acceptance to the certificate program.

If a student has not previously studied business, the following courses are recommended:

- BULE 302 - Legal Environment of Business Credits: 3
- BULE 402 - Commercial Law Credits: 3
- FNAN 301 - Financial Management Credits: 3
- FNAN 302 - Financial Analysis, Forecasting, and Valuation Credits: 3
- MIS 301 - Introduction to Business Information Systems Credits: 3
- OM 210 - Statistical Analysis for Management Credits: 4

Undergraduate Minor

Business Minor

Banner Code: BUS

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected. Prior to beginning the minor, students must have sophomore standing.

The minor consists of the following MSOM courses. Students must complete five courses for a total of 15 credits. At least eight credits of the minor courses must be unique to the Business Minor and not applied toward any other major, minor, or concentration. *Students must achieve a grade of C or better in each course that is applied toward the minor.*

For policies governing all minors, see the Academic Policies chapter of this catalog.

Course Work
Required Courses:

- MSOM 300 - Managing Financial Resources Credits: 3
- MSOM 301 - Managing People and Organizations Credits: 3
- MSOM 302 - Managing Information in a Global Environment Credits: 3
- MSOM 303 - Marketing in a Global Economy Credits: 3

Electives:

(choose one of the following)

- MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise Credits: 3
- MSOM 305 - Managing in a Global Economy Credits: 3
- MSOM 306 - Managing Projects and Operations Credits: 3
- MSOM 491 - Special Topics: Business Minor Credits: 3

Notes

These courses may not be taken for credit by SOM majors, except for MSOM 305, which may be used only to fulfill the University General Education global understanding requirement.

Students who have already taken and received credit for MGMT 301, MIS 301, MKTG 301, or OM 301 shall substitute courses as follows: MGMT 301 for MSOM 301, MIS 301 for MSOM 302, MKTG 301 for MSOM 303, and OM 301 for MSOM 306. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 and FNAN 301 shall substitute the combination for MSOM 300. All three courses cannot be taken for credit. Transfer students may transfer a maximum of six credits toward the business minor.

Total: 15 credits

Master's Degree

Accounting, MS

Banner Code: BU-MS-ACCT

Phone: 703-993-2136
E-mail: msa@gmu.edu

The MS in accounting (MSA) is designed to meet the special needs of new professionals entering the accounting profession. The programs allow students to earn a state-of-the-art graduate degree in accounting and also meet requirements to take the Uniform
CPA Examination in Virginia and in most other states. The program integrates fundamental business skills and specialized knowledge and skills required by the accounting profession.

Admission Requirements

All students registering for SOM graduate courses must have graduate standing. Nondegree student status is not available. Admission is highly competitive and available to qualified candidates holding a baccalaureate degree in accounting from an AACSB-accredited business school. Applicants are evaluated primarily on their undergraduate record and GMAT performance. For information on the GMAT, go to www.mba.com. Professional work experience is not required. Students begin the program in the fall or spring semester. The priority deadline for application is March 15 for the fall semester and October 15 for the spring semester.

Students can have part- or full-time status. Students completing the MS in accounting course work may elect to further develop their leadership potential by transferring to the MBA with a concentration in accounting. Please contact the department for details.

Degree Requirements

Students are responsible for familiarization and compliance with the university’s Graduate Policies contained in this catalog.

All MS in accounting students must complete the following 10 courses (3 credits each):

- ACCT 741 - Information Technology Auditing Credits: 3
- ACCT 742 - Corporate Governance and Ethics Credits: 3
- ACCT 743 - Corporate Financial Reporting Credits: 3
- ACCT 744 - Fraud Deterrence and Detection Credits: 3
- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3
- MBA 701 - Business Analysis and Valuation Credits: 3

Note:

Students must either graduate with an MSA degree on completion of 30 credits or opt into the Mason MBA program.

Business Administration, MBA

Banner Code: BU-MBA-BUAD

Phone: 703-993-2136
E-mail: mba@gmu.edu

The Mason MBA Program provides a high-level professional education in business administration. It is offered in both part- and full-time formats. The curriculum integrates functional areas with an emphasis on group work, information technology, and the global business environment.
Admissions Requirements

All students registering for SOM graduate courses must have graduate standing. Non degree student status is not available. Admission is highly competitive and available to all qualified candidates without regard to prior academic major. No previous course work in business administration is required, but a four-year undergraduate degree and a college-level calculus course must be successfully completed before matriculation. Admission is based on a combination of academic, professional, and leadership factors. No portion of the portfolio is considered more important than another; careful consideration is given to every part of the application packet to ensure that the Admission Committee has an accurate profile of a candidate’s professional and academic qualifications. For information on the GMAT, go to www.mba.com. A minimum of two years of professional work experience is recommended before entering the program.

The part-time MBA format commences twice a year: fall and spring semesters. Priority is given to applicants submitting their application by October 15 for the following spring semester and March 15 for the following fall semester. Applications for admission received after October 15 and March 15 will be considered on a space-available basis. The full-time MBA format begins only in the fall and has an application deadline of January 15. International students have an application deadline of January 15.

Degree Requirements

Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Program Information

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 33 credits of core courses and 15 credits of elective courses. Students complete the degree program in two or three years depending on the cohort selected. Because of the cohort structure, part time students commit to attending classes a minimum of two times per week and full-time students attend classes during the day four days each week. Part-time students are required to enroll in classes during the summer session to complete their degrees on a timely basis.

Core Courses

33 credits of core courses are completed prior to enrollment in electives. Part-time students enroll in at least 6 credits per semester and at least 3 credits each summer. Fulltime students enroll in 12 credits per semester, with no expectation for enrollment in the summer session. All MBA students complete the following core courses:

- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 612 - Managing Costs and Evaluating Performance Credits: 1.5
- MBA 613 - Financial Reporting and Decision Making Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3
- MBA 662 - Management of Information Technology Credits: 1.5
- MBA 673 - Legal Environment for Management Credits: 1.5
- MBA 674 - Ethical and Social Environment of Business in the 21st Century Credits: 1.5
- MBA 678 - Strategy and Organizational Leadership Credits: 3
- MBA 795 - Global Business Perspectives Credits: 3
Travel outside the United States is required. Most travel costs are included in the MBA program tuition and fees.

Total: 33 credits

Elective Courses

After completing the core courses, students must complete a series of market-driven elective courses (15 credits). A limited number of courses from outside the MBA Program or through the Consortium of Universities of the Washington Metropolitan Area may be taken as electives with the permission of the program director.

Concentrations

MBA students may use electives to complete courses leading to a concentration in accounting, financial management, entrepreneurship, marketing, information systems management, or project management.

▲ Accounting (ACCT)

Required courses

- MBA 741 - Information Technology Auditing Credits: 3
- MBA 742 - Corporate Governance and Ethics Credits: 3
- MBA 743 - Corporate Financial Reporting Credits: 3
- MBA 744 - Fraud Deterrence and Detection Credits: 3

One course from the following:

- MBA 701 - Business Analysis and Valuation Credits: 3
- MBA 702 - Corporate Financial Policy Credits: 3
- MBA 703 - Financial Markets Credits: 3
- MBA 706 - Investment Analysis Credits: 3
- MBA 708 - Taxes and Business Credits: 3
- MBA 717 - International Finance Credits: 3

Total: 15 credits

▲ Entrepreneurship (ENTR)
Required courses

Choose any four courses from the following list to complete 12 credits.

- MBA 705 - Venture Capital and Private Finance Credits: 3
- MBA 711 - Entrepreneurship Credits: 3
- MBA 714 - Managing Growth of Small Businesses Credits: 3
- MBA 719 - Entrepreneurship Laboratory Credits: 1.5
  (May be taken twice.)
- MBA 752 - Turning Ideas into Successful Companies Credits: 3

Note:

Three credits of MBA 700-level courses must be taken to complete degree requirements.

Total: 15 credits

▲ Financial Management (FM)

Required courses

Five courses from the following:

- MBA 701 - Business Analysis and Valuation Credits: 3
- MBA 702 - Corporate Financial Policy Credits: 3
- MBA 703 - Financial Markets Credits: 3
- MBA 704 - Risk Management and Financial Innovation Credits: 3
- MBA 705 - Venture Capital and Private Finance Credits: 3
- MBA 706 - Investment Analysis Credits: 3
- MBA 717 - International Finance Credits: 3
- MBA 746 - Real Estate Analysis and Valuation Credits: 3
- MBA 747 - Real Estate Finance Credits: 3
- MBA 748 - Real Estate Investment Credits: 3

Total: 15 credits

▲ Information Systems Management (ISM)

Required courses
Choose any four courses from the following list to complete 12 credits.

- MBA 731 - Business Application and Life Cycle Management Credits: 3
- MBA 732 - Knowledge Management Credits: 3
- MBA 734 - Electronic Commerce and E-Business Credits: 3
- MBA 735 - Systems Thinking for Business Performance Credits: 3
- MBA 737 - Information Technology Governance and Policy Credits: 3
- MBA 738 - Business Intelligence and Data Mining Credits: 3

Note:

Three credits of MBA 700-level courses must be taken to complete degree requirements.

Total: 15 credits

▲ Marketing (MKTG)

Required courses

- MBA 718 - International Marketing Credits: 3
- MBA 721 - Marketing Decision Systems Credits: 3
- MBA 722 - Consumer Behavior Credits: 3
- MBA 724 - Marketing Communications Credits: 3

Note:

Three credits of MBA 700-level courses must be taken to complete degree requirements.

Total: 15 credits

▲ Project Management (PMGT)

Required courses

- MBA 712 - Project Management Credits: 3
- MBA 715 - Advanced Project and Program Management Credits: 3

Two electives from the following:
- MBA 726 - Negotiations Credits: 3
- MBA 725 - Leadership Credits: 3
- MBA 731 - Business Application and Life Cycle Management Credits: 3
- MBA 737 - Information Technology Governance and Policy Credits: 3

Note:

Three credits of MBA 700-level courses must be taken to complete degree requirements.

Total: 15 credits

Specializations

MBA students may use electives to complete courses leading to a specialization. Specializations are not formally declared and are not recognized on a student's transcript.

International Business

Choose any three courses from the following list to complete 9 credits.

- MBA 716 - International Business Strategy Credits: 3
- MBA 717 - International Finance Credits: 3
- MBA 718 - International Marketing Credits: 3
- MBA 723 - Supply Chain Management Credits: 3
- MBA 734 - Electronic Commerce and E-Business Credits: 3
- MBA 745 - International Financial Reporting Credits: 3

Executive MBA

Banner Code: BU-MBA-BUEX

Phone: 703-993-4457
Email: emba@gmu.edu

Participants

The Executive MBA is designed for those with a minimum of 7 to 10 years of significant business and professional experience. Participants must have the support of their organizations to attend Friday classes every other week and participate in global and domestic residencies.

Sponsoring organizations have included ATPCO, AMS, Apple Federal Credit Union, Blue Cross/Blue Shield, Booz Allen Hamilton, Case New Holland, the Center for Naval Analyses, Cisco, CSC, DISA, Department of Defense, Department of Homeland Security, EDS, Ernst & Young, Exxon- Mobil, Fannie Mae, Freddie Mac, GE Health care Financial Services, General Dynamics, HP, IBM, KPMG, Level (3) Communications, Lockheed Martin, Man Tech International, Marriott, Nextel, Northrop Grumman, OPM, Orbital Sciences, PamAmSat, Pinkerton Computer Consultants, Raytheon, SAIC, SRA, Sunrise Senior Living,
USA Today, the U.S. Army, the U.S. Marine Corps, the U.S. Navy, the U.S. Postal Service, Verizon, World Bank, WR Systems, and Xerox, among others.

Diversity in Learning

Students encounter multiple approaches to learning in the Executive MBA Program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and domestic and international residencies all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

Cohorts

There are two courses of study a student may take in the Executive MBA Program: the Global Executive MBA Cohort and the National Defense Executive MBA Cohort. Information on cohort courses and schedules may be obtained from the EMBA program office.

Global Executive MBA

The Global Executive MBA cohort completes the program in 21 months, including a summer break between the first and second year. Students attend classes one day per week, on alternating Fridays and Saturdays for four semesters. The program’s focus is management decision making, strategic management of business resources, and leadership. Dedicated faculty, an innovative and relevant curriculum, a global focus, a student-centered program team, and great colleagues that contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the global economy.

Global EMBA Residencies

Five residency sessions complete the Global EMBA experience:

- **Opening Residency**: The Leader’s View—Focuses on developing a broad understanding of the economic environment of business and the development of high-performing teams.
- **Global Residency**: Global Business Strategies—Encompasses a trip to selected international locations. Professors from local universities provide an introduction to the business environment of each country visited and help prepare students for company visits and meetings with executives from local and multinational firms. Company presentations are delivered by directors and top managers. Housing is provided in business-class hotels, and time is provided for cultural excursions and other activities.
- **Mid Program Residency**: Professional Advancement and Organization Performance—Provides a comprehensive integrated learning experience designed to draw from the first year’s courses and prepare the student for the second year. The residency includes a workshop that pertains to career planning and development.
- **New York Residency**: Financial Markets—Encompasses a trip to New York concludes EMBA 703 Financial Markets. During this residency, students hear from top managers of financial institutions and visit a number of those institutions to develop a comprehensive understanding of worldwide financial markets.
- **Oxford Residency**: Understanding the European Union—Encompasses a trip to Oxford, England. Includes faculty presentations on the European Union and the variety of European cultures and approaches to doing business worldwide. Site visits to local companies in London are also organized with presentations from senior managers and directors.

National Defense Executive MBA
The National Defense Executive MBA cohort completes the program in 17 months starting in the fall semester in the first year, continuing with a compressed summer session the following year, through December of the second year. Students attend classes one day per week, on alternating Fridays and Saturdays for the first year of the program, taking all courses with the Global EMBA students. The second year courses are tailored to the needs of defense industry professionals and meet Fridays and Saturdays every other week. Dedicated faculty from the Mason School of Management and adjunct faculty working in specialty areas of the defense sector, as well as accomplished government, military, and corporate guest speakers, technical experts, and GMU alumni employed in the defense industry are a part of the National Defense EMBA. The dynamic learning environment brings contemporary challenges of the defense industry right into the classroom.

**National Defense EMBA Residencies**

Three residency sessions complete the National Defense EMBA experience:

- **Opening Residency**: The Leader’s View—Focuses on developing a broad understanding of the economic environment of business and the development of high-performing teams.
- **Interim Session Residency**: Strategic Negotiation Workshop and Site Visits and Seminars related to “Congress and the Government Budgeting Process”
- **Leader One Workshop**: Final Leadership Residency & Capstone Project Presentations
- **Global Residency**: Global Business Strategies—Encompasses a trip to selected international locations. Professors from local universities provide an introduction to the business environment of each country visited and help prepare students for company visits and meetings with executives from local and multinational firms. Company presentations are delivered by directors and top managers. Housing is provided in business-class hotels, and time is provided for cultural excursions and other activities.

**Degree Requirements**

The EMBA program requires successful completion of 54 credit hours of coursework including for-credit residencies. Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

**Eight Modules**

During each of our seven-week modules, students complete two to three courses in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

**Module 1 and 2:**
The Economic and Analytical Foundations of Management

**Module 3:**
Managing Resources for Performance

**Module 4:**
The Global Perspective

**Modules 5 and 6:**
Sustainable Business Performance

**Modules 7 and 8:**
Leadership and Strategy
Required Courses - First Year

- EMBA 603 - Managerial Economics and the Decisions of the Firm Credits: 3
- EMBA 613 - Financial Reporting and Decision Making Credits: 3
- EMBA 623 - Marketing Management Credits: 3
- EMBA 633 - Statistics for Managers Credits: 3
- EMBA 638 - Strategies for Operations Management: Process and Supply Chain Leadership Credits: 3
- EMBA 643 - Managerial Finance Credits: 3
- EMBA 653 - Organizational Behavior Credits: 3
- EMBA 710 - Business, Government, and the Global Economy Credits: 1.5
- EMBA 712 - International Macroeconomics: Concepts and Country Strategy Credits: 1.5
- EMBA 795 - International Business Environment Credits: 1-3 (must take 3 credits)

Total: 27 credits

Second Year Courses

The remaining credit hours to complete the 54 credit requirement will be dependent upon the cohort (Global EMBA or National Defense EMBA). Courses with variable credits (1-6) are established for each entering class to comply with the second year requirement of 27 credit hours. Courses will be selected from:

- EMBA 612 - Managing Costs and Evaluating Performance Credits: 1-3
- EMBA 660 - Management of Information Technology Credits: 3
- EMBA 673 - Legal Environment for Management Credits: 1.5
- EMBA 674 - The Contemporary Ethical and Social Environment of Business Credits: 1 to 3
- EMBA 678 - Strategic Management Credits: 3
- EMBA 703 - Financial Markets Credits: 3
- EMBA 708 - Taxation and Business Strategy Credits: 1-3
- EMBA 709 - Global Capital Markets Credits: 1-3
- EMBA 715 - Special Topics in Accounting Credits: 1-3
- EMBA 716 - Managing Change Credits: 1.5
- EMBA 717 - Corporate Governance Credits: 1-3
- EMBA 718 - Leadership and Managing Change Credits: 3
- EMBA 724 - Marketing Communications Credits: 1-3
- EMBA 725 - Leadership Credits: 1.5
- EMBA 727 - Applied Macroeconomics Credits: 1-3
- EMBA 734 - Electronic Commerce Credits: 1-3
- EMBA 735 - Systems Thinking for Business Performance Credits: 1-3
- EMBA 745 - Special Topics in Finance Credits: 1-6
- EMBA 750 - Capstone Project: Action Learning Project Credits: 1.5
- EMBA 751 - Corporate Strategy and Policy Credits: 1.5
- EMBA 752 - A Strategic View of the Firm Credits: 1-3
- EMBA 755 - Special Topics in Management Credits: 1-6
Real Estate Development, MS

Banner Code: BU-MS-REAL

Contact: Veronika Lozina
703-993-5163
vlozina@gmu.edu

The MS in Real Estate Development program is designed to prepare prospective real estate professionals for professional careers and for research and teaching positions by combining academic education with opportunities for experience within real estate development organizations throughout the region. Emphasis is placed in the program on educating and training students using live case studies, in partnership with leading real estate development companies. The distinctiveness of the Master’s program in Real Estate Development offered by Mason lies in its curriculum, which has been tailored to strengthen the employment opportunities or mobility of students in non-academic kinds of jobs, as well as to prepare the minority of students who might wish to complement their studies with doctoral study in related fields. Students pursue one of three emphases: real estate development, real estate finance, or environment and sustainability. For application and enrollment information, please contact Veronika Lozina at vlozina@gmu.edu.

For information on our certificate program, see the Real Estate Finance Graduate Certificate listing in this catalog.

Admission Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher. In addition, this civil engineering/real estate graduate program requires students to have a basic understanding of real estate development, significant experience in the real estate industry, and/or completion of:

- REAL 500 - Real Estate Development Fundamentals Credits: 3

Degree Requirements

The 36 hour curriculum includes 18 hours of required courses, 9 hours in the emphasis, and 9 hours of electives. Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

Required Courses (18 credits)
The following courses are required for a total 18 credits:

- REAL 500 - Real Estate Development Fundamentals Credits: 3
- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- REAL 630 - Innovative Land Use, Approvals and Real Estate Development Credits: 3
- GSOM 746 - Real Estate Analysis and Valuation Credits: 3
- PUBP 780 - Evolution of the Washington Metropolitan Economy Credits: 3
- REAL 750 - MSRED Capstone Credits: 3

Courses for Emphasis (9 credits)

Real Estate Development Emphasis

Take 3 of the following 5 courses for a total of 9 credits for this emphasis:

- CEIE 500 - Land Development Engineering Credits: 3
- CEIE 511 - Introduction to Design and Inventive Engineering Credits: 3
- CEIE 516 - Engineering Law and Ethics Credits: 3
- CEIE 610 - Construction Systems and Management Credits: 3
- PUBP 770 - Topics in Regional and Urban Development Policy Credits: 3

Real Estate Finance Emphasis

Take 3 of the following 4 courses for a total of 9 credits for this emphasis:

- GSOM 747 - Real Estate Finance Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
- PUBP 745 - Transportation and the Environment Credits: 3

Environment and Sustainability Emphasis

Take 3 of the following 5 courses for a total of 9 credits for this emphasis:

- CEIE 501 - Sustainable Development Credits: 3
- CEIE 550 - Environmental Engineering Systems Credits: 3
- CEIE 555 - Introduction to Environmental Engineering Credits: 3
- PUBP 745 - Transportation and the Environment Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3

Electives (9 credits)

Take 3 courses outside your selected emphasis for a total of 9 credits. The following courses may be included as electives:
• REAL 690 - Topics in Real Estate Development Credits: 1-6
• REAL 796 - Directed Reading Credits: 1-6

Total 36 credits

Taxation, MS

Banner Code: BU-MS-TAX

Phone: Professor Sarah Nutter
703-993-1860
Email: snutter@gmu.edu

The objective of the M.S. in Taxation (MST) program is to provide a comprehensive, high-quality, and professionally oriented education for professionals who have made a career commitment to the field of taxation. It is built on a foundation that assumes an undergraduate degree in business and relevant accounting or taxation experience. The program is not for students who are changing careers or for those seeking an advanced degree solely to qualify for professional certification. Further, the program does not intend to serve full-time students or those who do not possess prior professional experience in accounting or taxation.

Admission Requirements

Students registering for graduate level courses numbered 600 or higher in the School of Management must have graduate standing. Non-degree student status is not available.

Admission to the Masters of Science in Taxation (MST) program is competitive and is based upon three criteria:

1. Professional experience in the fields of taxation or accounting, or licensure as a Certified Public Accountant;
2. Undergraduate academic performance; and
3. Performance on the GMAT

Degree Requirements

The MST program requires a minimum of 30 semester hours of graduate course work. However, students who have not earned a recent undergraduate degree in business administration from an AACSB-accredited school may be required to take additional credits to satisfy the business administration foundation requirements. The exact number of credit hours for an individual is based on an evaluation by the program director at the time of admission.

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Progress Requirement

To ensure that each student is making satisfactory progress toward completion of his/her degree, each MST student must complete at least 12 credits during the first calendar year of enrollment and 21 credits by the end of the second calendar year of enrollment.

Foundation Courses, 21 hours
Students who have not earned a recent undergraduate degree in business administration from an AACSB accredited school may be required to take credits from the courses listed below in order to satisfy the business administration foundation requirements.

- MBA 603 - Managerial Economics and Decisions of the Firm Credits: 3
- MBA 613 - Financial Reporting and Decision Making Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 633 - Statistics for Business Decision Making Credits: 3
- MBA 638 - Operations Management Credits: 3
- MBA 643 - Managerial Finance Credits: 3
- MBA 653 - Organizational Behavior Credits: 3

**Required Core Courses, 18 hours**

Each candidate must complete the following core courses unless, in the opinion of the program director, the candidate has had previous comparable graduate-level course work that would justify substitution of other graduate courses.

- TAX 700 - Federal Income Taxation Credits: 3
- TAX 701 - Accounting Methods and Periods Credits: 1.5
- TAX 702 - Tax Practice and Procedures Credits: 1.5
- TAX 703 - Corporate Taxation Credits: 3
- TAX 704 - Corporate Mergers and Acquisitions Credits: 1.5
- TAX 705 - Affiliated Corporations Credits: 1.5
- TAX 706 - Partnership Taxation Credits: 3

**Electives, 12 hours**

Each student must complete 12 hours of acceptable elective course work from any 700-level or higher graduate courses and must be approved by the program director.

**Technology Management, MS**

**Banner Code:** BU-MS-TECM

**Phone:** 703-993-1792  
**Email:** techman@gmu.edu

The MS in technology management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

Students are from the major firms and organizations in the Washington, D.C., region. They average 14 years of work experience, and almost 25 percent of the students already have graduate degrees. Approximately three-quarters of the students work for the private sector, while the remainder works for federal government agencies or departments.
Program graduates receive chief information officer (CIO) certification, in partnership with the federal CIO Council, in addition to their MS degree. The program satisfies the requirements for federal government CIOs that were developed in response to the passage of the Information Technology Management Reform Act. Mason is one of only six institutions certified to offer this qualification and was one of the founding university partners with CIO University.

The program, designed for working professionals, starts in January and lasts for 18 months. Classes are held on the Fairfax Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management. Previous residency locations included: Australia, Taiwan, Japan, Thailand, India, Sweden, Belgium, England, Tunisia, Germany, Czech Republic and Ireland. Residency cost is included in the tuition.

**Admission Requirements**

Students must have a bachelor’s degree from an accredited institution, a minimum of three years professional work experience, two professional references, and a GMAT score or other evidence that they can perform graduate-level work.

**Degree Requirements**

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog.

Courses with variable credits (2-4) are established for each entering class to comply with the total hour requirement of 36 credit hours.

**Course Work**

- TECM 610 - Communications and Leadership Credits: 2
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 620 - Economics of Technology Management Credits: 2-3
- TECM 635 - Metrics and Statistics for Quality and Project Management Credits: 2-3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 3
- TECM 700 - Business Engineering and Change Management Credits: 2
- TECM 702 - Interpersonal Dynamics and Teamwork Credits: 3
- TECM 703 - Technology Assessment, Evaluation, and Investment Credits: 3
- TECM 704 - Planning and Control of Projects Credits: 3
- TECM 720 - Analysis of IT Industries Credits: 2-4
- TECM 735 - Technology Management Capstone Project Credits: 2
- TECM 740 - Management of Client Relationships Credits: 2-4
- TECM 745 - Business Functions and Operations: Client Industries Credits: 3
- TECM 750 - Global IT Management Credits: 2-4

**Total: 36 credits**

**Master's Level Certificate**
Foundations of Real Estate Development Graduate Certificate

Banner Code: BU-CERG-FRED

Contact: Veronika Lozina
703-993-5163
vlozina@gmu.edu

This new Graduate Degree Certificate is the first in a series of Graduate Degree Certificates with a principal focus on the Real Estate industry. In conjunction with the Volgenau School of Information Technology and Engineering, the School of Public Policy and the School of Management, the Center for Real Estate Entrepreneurship integrated the most advanced and innovative thinking from across George Mason to create an in-depth certificate exploring the fundamentals of real estate development.

The principal focus of the Certificate is to provide a thorough understanding of Real Estate concepts. The graduate certificate will educate the student in three major disciplines: leadership and management challenges in real estate development, fundamentals of real estate development and construction management, and economic evolution and development concepts.

Admissions Requirements

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher.

In addition, this graduate certificate requires students to have a basic understanding of real estate development, significant experience in the real estate industry, and/or completion of:

- REAL 500 - Real Estate Development Fundamentals Credits: 3

Certificate Requirements

The following 5 courses are required for the certificate. Students are responsible for familiarization and compliance with the Graduate Policies contained in this catalog.

- REAL 502 - Real Estate Client Leadership and Project Management Credits: 3
- CEIE 610 - Construction Systems and Management Credits: 3
- CEIE 671 - Best Engineering Management Practices Credits: 3
- PUBP 781 - Entrepreneurship and Economic Development Credits: 3
- PUBP 785 - Urban Development Economics Credits: 3

Total: 15 credits

Real Estate Finance Graduate Certificate

Banner Code: BU-CERG-REAF

Contact:
Veronika Lozina
This graduate certificate prepares students for high-level managerial positions within the real estate industry. The program delivers a multi-disciplinary approach to real estate with a focus on development, finance, investment, valuation, regulatory law, and entrepreneurship. It is designed to serve industry leaders from the National Capital Region as well as enrolled graduate students within SOM who seek to enhance their position as current or future program leaders in the field.

Admissions Requirements

Completion of a four-year curriculum resulting in a Bachelor's degree from an accredited institution and/or current graduate students. Applicants should have two years of professional work experience and demonstrate a language proficiency in English.

- On line application and fee
- Official copies of transcripts from all colleges and universities attended
- One professional letter of recommendation
- A current resume
- A brief personal statement related to post-certificate career goals

For application and enrollment information, please contact Veronika Lozina at vlozina@gmu.edu.

Certificate Requirements

Required Courses (18 credits)

Students are responsible for familiarization and compliance with the university's Graduate Policies contained in this catalog. The graduate certificate requires successful completion of the following courses for a total of 18 hours.

- GSOM 610 - Methods and Uses of Financial Accounting Credits: 3
- GSOM 640 - Finance for Managers Credits: 3
- GSOM 660 - Economics for Managers Credits: 3
- GSOM 746 - Real Estate Analysis and Valuation Credits: 3
- GSOM 747 - Real Estate Finance Credits: 3
- GSOM 748 - Real Estate Investment Credits: 3

Program Note

Students who have completed MBA 746, MBA 747 and MBA 748 previously are not eligible for this certificate program.

Total: 18 credits
Rooted in the strong democratic government traditions of the commonwealth of Virginia, the School of Public Policy (SPP) is committed to transcending traditional conceptual boundaries of research and teaching by integrating real-world experience and problem solving into public policy education. The school’s programs focus on the interplay of culture, organizations, and technology to find alternative approaches to public policy decisions and policy making. Teaching and research are focused on the following principal themes: governance; regional and economic development; international commerce and policy; science and technology policy; transportation policy; entrepreneurship; and culture and values in public policy.

SPP contributes to new and innovative concepts in policy formation while building on the fundamental, pluralistic, and democratic characteristics of policy making in the United States. SPP endorses creativity and responsibility in governance, public management, and the development of economic policy.

Administration

Kingsley E. Haynes, Dean
James H. Finkelstein, Vice Dean
Jonathan L. Gifford, Associate Dean for Research and Development
Matthys van Schaik, Associate Dean for Academic Affairs
William H. Coester, Assistant Dean for Human Resources and Planning
Elizabeth C. Eck, Assistant Dean for Program Management
Jill V. Emerson, Assistant Dean for Student Services
Leslie Metzger Levin, Assistant Dean for Graduate Admissions and Marketing

Faculty

Associate Faculty

Avruch, Bernold, Conlan, Donahue, Flood, Frase, Friesz, Guagnano, Heclo, Hennessey, Mahler, Paden, Regan, Scimecca

Research and Term Faculty

Benson, Courtot, Davis, Deitz, Ferrin, Ha, Hayden, Holleman, Johnson, Keenan, Kil, Kingston, Leitch, Malur, Marshall, McClain, Nicogossian, Paelinck, Pommerening, Regan, Riggle, Robb, Segerson, Spalding, Sturtevant, Wheeler

Adjunct Faculty

Faculty Emeritus

Kash

Course Work

SPP offers courses designated PUBP, ITRN, MNPS, and TELE in the Courses chapter of this catalog. Other academic courses are offered in conjunction with the research activities of the Mason Enterprise Center.

Law and Public Policy, Joint Degree Program

The School of Public Policy and the School of Law offer a joint JD/MPP degree program in law and public policy studies. For more information, go to www.law.gmu.edu/academics/llm.html.

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of the catalog.

Student Appeal and Grievance Procedures

The School of Public Policy has student appeal and grievance procedures laid out in its bylaws. These are based on George Mason University's honor system. Students are responsible for understanding the provisions of the code that are described in detail in this catalog.

Students may appeal decisions concerning academic actions (excluding termination or dismissal) in writing to the Assistant Dean of Student Services, who will consider the merit of these appeals in consultation with the relevant program director. Decisions of the Assistant Dean of Student Services may be appealed to the Associate Dean of Academic Affairs, whose decision is final.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

There is no right to appeal an automatic termination/dismissal itself. However, a student may be entitled to appeal the grade that leads to the automatic termination/dismissal, or a reconsideration of the grade that led to this situation, either of which may result in not going forward with the termination/dismissal.
A student who is dismissed from the program for any other reason may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean will appoint a committee to review the appeal. This committee will make a recommendation to the Dean concerning the appeal. The Dean will make a final determination. This determination may not be appealed.

Students with grievances should direct them in writing to the Assistant Dean for Student Services, who will provide guidance on how to resolve their concerns in accordance with established university procedures.

**Research Centers**

**Center for Regional Analysis**  
**Director: Stephen Fuller, PhD**

Focusing on economic development in technologically intensive regions, the Center for Regional Analysis (CRA) maintains a corporate technology database for the national capital region. The CRA provides economic forecasting services to government agencies at all levels around the world.

**Center for Transportation Policy, Operations and Logistics**  
**Director: Kenneth J. Button, PhD**

This center works with federal and state authorities to find better ways to manage existing transport networks from surface to space. The center is active in the areas of intelligent transportation systems and aviation policy.

**International Center for Applied Studies in Information Technology**  
**Director: Stephen Ruth, PhD**

The International Center for Applied Studies in Information Technology (ICASIT) is a consulting group dedicated to delivering the power of the Internet to businesses, underserved markets, and developing countries. ICASIT has contracts in more than 20 countries.

**Mason Enterprise Center**  
**Director: Kingsley E. Haynes, PhD**

Dedicated to creating and developing businesses in the Washington, D.C., area, the Mason Enterprise Center (MEC) is the synthesis of seven programs designed to meet the needs of growing businesses. The center focuses the energy, skills, and intellectual capital of the university on enterprise creation, expansion, and restructuring. MEC is highly geared on providing its clients with services that add value to their organizations. The center specializes in business development, entrepreneurship, government contracting, international business, technology ventures, and telework, making it a business-development center unlike any other. In addition, MEC conducts seminars and conferences related to its areas of expertise.

**Center for Global Policy**  
**Director: Jack Goldstone, PhD**

This center conducts research on a wide range of global policy issues, including foreign trade, democratization and statebuilding, and transnational networks. It also analyzes specific policy issues for a variety of government agencies, and develops and serves as the home to several major cross-national databases for global policy.
Center for Science and Technology Policy  
**Director: David M. Hart, PhD**

This center helps facilitate the exchange of information and ideas among the worldwide science, foreign affairs, trade, and technology communities. Areas of emphasis include international trade and science and technology.

Center for the Study of International Medical Policies and Practices  
**Director: Arnauld Nicogossian, MD**

This center provides leadership and focus on global medical and public health policies and processes, working collaboratively with health, science, and medical organizations in the public and private sectors, and academic organizations to address pressing global policy concerns.

State Economic Development Center  
**Director: Kingsley E. Haynes, PhD**

This center’s focus is on providing education, training, and research support for state-level economic development policy and programs. While the primary goal is to provide assistance to agencies and organizations in Virginia, the center also works with other government organizations in the United States as well as abroad. Methods employed by the center include roundtable discussions, formal focus groups, survey research, statistical analysis, and mathematical models.

Center for Entrepreneurship and Public Policy  
**Director: Zoltan Acs, PhD**

Economic development policy has shifted dramatically from a business and industry attraction strategy to a more entrepreneurship approach. The Center for Entrepreneurship and Public Policy focuses on entrepreneurship policy research and program delivery, offering programs in research, collaboration, and analysis.

Center for Aerospace Policy Research  
**Director: Kenneth J. Button, PhD**

The mission of the Center for Aerospace Policy is to develop the U.S. aerospace sector by providing educational and research resources. The center helps national agencies, such as NASA, enhance their internal efficiency and smooth the interface between U.S. agencies and other government agencies, the private sector, and foreign counterparts.

Terrorism, Transnational Crime and Corruption Center  
**Director: Louise I. Shelley, PhD**

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

Transportation and Economic Development Research Center  
**Director: Brien Benson, PhD**
The Transportation and Economic Development Research Center is a University Transportation Center, funded by the Research and Innovative Technology Administration of the U.S. Department of Transportation. The Center conducts research in transportation finance, transportation and land use, and entrepreneurship and innovation in transportation.

**Master's Degree**

**Health and Medical Policy, MS (SPP)**

Banner Code: PP-MS-HMP

Phone: 703-993-8200

The master's program in health and medical policy is offered jointly by the School of Public Policy and the College of Health and Human Services. It prepares students to become health and medical systems policy analysts, consultants, and public health advocates in the US and internationally. It provides students with the knowledge, skills and abilities needed to develop improved national/international health and systems planning, decision-making and to support policy formulation for health and medical professionals, health systems development, resource allocation, and advocacy for national/international public health. Students applying to the program will be admitted to one of two concentrations: Global Medical Policy or Health Policy.

The Global Medical Policy concentration is geared towards students interested in global medical policy formulation. The concentration is designed to prepare students with the background knowledge, analytic skills, and strategic thinking necessary to identify medical practice and international health organizations/systems impacted by globalization.

**Admission Requirements**

The following requirements are for students applying to the Global Medical Policy concentration (selected at the time of application):

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.
Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

Students complete 42 hours of course work through a combination of common core courses and concentration courses in the chosen concentration.

Health and Medical Policy Common Core

Health and Medical Systems (6 credits)

- HAP 609 - Comparative International Health Systems Credits: 3 or equivalent
- HAP 715 - Health Economics Credits: 3 or equivalent

Public Policy Process (6 credits)

- PUBP 700 - Theory and Practice in Public Policy Credits: 3 or equivalent
- PUBP 730 - National Policy Systems and Theory Credits: 3 or equivalent

Policy Analysis (9 credits)

- HAP 710 - Inferential Statistics in Health Services Research and Management Credits: 3
  or
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- HAP 730 - Health Care Decision Analysis Credits: 3
  or
- PUBP 713 - Policy and Program Evaluation Credits: 3
- HAP 745 - Health Care Security Policy Credits: 3
  or
- PUBP 710 - Topics in Public Policy Credits: 1-3 (Global Medical Systems Policy Analysis)

▲ Global Medical Policy Concentration (GMP)
Within School of Public Policy

Required Courses

- PUBP 757 - Public Policy in Global Health and Medical Practice Credits: 3
- PUBP 758 - Global Threats and Medical Policies Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
  (Transportation and Medical Policy - 3 credits) and
  (Global Comparative Medical Practices, Ethics and Law - 3 credits)
- PUBP 795 - Final Project Credits: 1-3

Electives (6 credits)

Electives may be drawn from PUBP, CONF, GCH and HAP courses, approved by the academic advisor.

Total: 42 credits

International Commerce and Policy, MA

Banner Code: PP-MA-ICP

Phone: 703-993-8200

The International Commerce and Policy (ICP) Program is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in international commerce and policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today’s world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

Admission Requirements

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non business occupations to careers in the global economy.
Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Students may be admitted for non degree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

The ICP Program requires 42 credits of course work. All degree candidates must take 30 credits of work in the required courses, as described below. The remaining 12 credits consist of electives that may include internships, independent studies, and study abroad. Students entering the program first complete core courses to prepare for higher-level course work.

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

**ICP Core Courses (22 credits)**

- ITRN 500 - Global Political Economy Credits: 1-4
- ITRN 501 - Methods of Analysis for International Commerce and Policy Credits: 4
- ITRN 503 - Investment and Macroeconomics Credits: 1-4
- ITRN 504 - Trade and Microeconomics for International Commerce Credits: 1-4
- ITRN 602 - International Financial Institutions and Globalization Credits: 3
- ITRN 603 - International Trade Relations Credits: 3
Electives (12 credits)

Students have the option to declare a substantive area of emphasis and focus their electives accordingly. The following areas are offered:

- Global Development
- Global Financial Policy
- Global Governance
- Global Business and Policy
- Global Trade Policy

Total: 42 credits

New Professional Studies, MS

Banner Code: PP-MS-NPST

▲ Peace Operations (PSPO)

Phone: 703-993-8200

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations. Pending SCHEV approval, this program will be replaced by the MS in Peace Operations.

Admission Requirements

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

To apply, applicants must submit the following:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).
Submission of GRE or GMAT scores is required only for students requesting funding consideration.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Course Requirements

Students must complete 39 credits as follows:

SPP Common Core (12 credits)

- PUBP 501 - Policy and Organizational Analysis Credits: 4
- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

Peace Operations Core Courses (12 credits)

- MNPS 700 - The New Professionalism: Theory and Practice Credits: 3 *
- MNPS 702 - The New Professional as Reflective Practitioner Credits: 3 *
- MNPS 703 - Technology and Learning in the New Professions Credits: 3 *
- PUBP 550 - Topics in Public Policy Credits: 1-3
  (Analysis for Peace Operations)

Electives (15 credits)

Electives must be approved by the program director or advisor.

Total: 39 credits

Note:

*Only those sections of MNPS 700, 702, and 703 designated for the Peace Operations Program will satisfy degree requirements.

Organization Development and Knowledge Management, MS

Banner Code: PP-MS-ODKM

Phone: 703-993-8200

The MS in Organization Development and Knowledge Management (ODKM) Program is an integrated, 18-month program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and
leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

**Admission Requirements**

Students are considered for admission for the fall term only. Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

ODKM is a 36- to 39-credit executive format program. Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office. Successful completion of the following courses is necessary to fulfill the course requirements of the program.

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
Core Courses (13 credits)

- ODKM 700 - Organizations, Management and Work: Theory and Practice Credits: 3
- ODKM 710 - Social and Organizational Inquiry Credits: 4
- ODKM 715 - Creating Learning Organizations Credits: 3
- ODKM 720 - Collaborative Technologies for Knowledge Sharing Credits: 3

Additional Requirements (12 credits)

- ODKM 705 - Group Dynamics and Team Learning Credits: 3
- ODKM 725 - Strategic Knowledge Management Credits: 3
- ODKM 735 - Organizational Development Practices Credits: 3
- ODKM 740 - Learning Community Credits: 3

Electives (3 credits)

The elective must be approved by the program director or advisor.

Experiential Requirement (0-3 credits)

A 3-credit internship is required. For students with appropriate work experience, this requirement can be waived with the approval of the program director or dean.

- PUBP 794 - Internship Credits: 1-6

Total: 36-39 credits

Peace Operations, MS (pending SCHEV approval)

Banner Code: PP-MS-PO

Phone: 703-993-8200

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

This program is designed for students and practicing professionals engaged in the planning, regulation, management, and conduct of peace operations. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently participate in or conduct a peace operation. Students also learn to think critically and analytically about
the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

**Admission Requirements**

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

To apply, applicants must submit the following:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting funding consideration.

**Academic Policies**

**Peace Operations Core Courses (12 credits)**

- PUBP 650 - Peace Operations I Credits: 3
Electives (15 credits)

Electives may be drawn from PUBP and ITRN courses and must be approved by the program director or advisor.

Total: 39 credits

Public Policy, EMPP

Banner Code: PP-EMPP-PUBP

Phone: 703-993-8200

The executive master’s in public policy program offers a custom-designed degree for a select group of mid-career persons with a significant level of experience and professional promise in the field of public policy. Cohorts meet in executive format to allow for accelerated progress toward degree completion. Classes meet at the Arlington campus on a special schedule to accommodate the working professional.

Admission Requirements

Only applicants that are already successful in the public policy or related field are eligible for admission. Five years of experience and a 3.0 undergraduate GPA are the minimum requirements for consideration. For additional requirements and deadlines, please visit:

http://policy.gmu.edu/admissions

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

Students must complete 30 credits of course work through a combination of core and approved special topics courses.

Required Core Courses (24 credits)

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4
- PUBP 700 - Theory and Practice in Public Policy Credits: 3
• PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
• PUBP 713 - Policy and Program Evaluation Credits: 3
• PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
• PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
• ITRN 503 - Investment and Macroeconomics Credits: 1-4

Electives (6 credits)

Students take two approved special topics courses to fulfill this requirement.

Total: 30 credits

Public Policy, MPP

Banner Code: PP-MPP-PUBP
Phone: 703-993-8200

The master’s program in public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admission Requirements

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

• Graduate application with fee (no fee waivers)
• 750 - 1,000 word written statement of student’s goals and interest in the program
• Current résumé
• Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
• Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
• For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
• Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).
Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.
Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

Students must complete 39 to 42 credits of course work through a combination of core courses, a sequence of courses in their area of emphasis, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment. One of the courses in the emphasis sequence will also have an international focus. The plan of study includes the following:

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

**Required Public Policy Courses (19 credits)**

- PUBP 700 - Theory and Practice in Public Policy Credits: 3
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 741 - U.S. Financial Policy Processes and Procedures Credits: 3
- ITRN 503 - Investment and Macroeconomics Credits: 1-4
  and one of the following:
- PUBP 705 - Advanced Statistical Methods in Policy Analysis Credits: 3
- PUBP 713 - Policy and Program Evaluation Credits: 3
- PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy Credits: 3
  or approved substitution.

**Substantive Policy Emphases (12 credits)**

Electives are chosen from one of the following policy emphases:

- Global Medical and Health Policy
- International Governance and Institutions
- National Security and Public Policy
- Regional Economic Development
- Science and Technology Policy
- Social Policy
- Terrorism, Transnational Crime and Corruption
Professional Experience Requirement (0-3 credits)

Certification that the student has experience in the public policy process outside the classroom and is ready to take leadership responsibilities must be exhibited by one of two ways: relevant professional experience, approved by the program director, or an approved internship.

- PUBP 794 - Internship Credits: 1-6

Total: 39-42 credits

Telecommunications Policy, MA

Banner Code: PP-MA-TCMP

Phone: 703-993-8200

The Telecommunications Policy program explores the way language, culture, and technology intersect with management, regulation, and commerce to shape public policies at all levels of government and industry. The program cuts across traditional academic lines to seek best practices for dealing with a number of issues, such as which products should be taxed, whether or not controlled monopolies should be dismantled in favor of free enterprise, and how instantaneous communications are changing the fabric of society at large. Students enrolled in this program will develop a solid theoretical foundation while at the same time explore practical applications of their studies.

Admission Requirements

Complete applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or higher on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of student’s goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores with a minimum score of 575 on the paper-based exam; 230 on the computer based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.
Students may be admitted for nondegree study and apply a limited number of credits toward the master’s degree should they choose to apply to the degree program later, in accordance with university policy.

**Academic Policies**

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

**Degree Requirements**

The Telecommunications Policy program requires 35 credit hours of coursework. Students should consult with their academic advisor on appropriate course sequencing:

**SPP Common Core (8 credits)**

- PUBP 502 - Governance and Policy Processes Credits: 1-4
- PUBP 503 - Culture, Organization, and Technology Credits: 1-4

**Telecommunications Policy Core Courses (15 credits)**

- PUBP 700 - Theory and Practice in Public Policy Credits: 3
- PUBP 726 - Telecommunications Policy Credits: 3
- PUBP 710 - Topics in Public Policy Credits: 1-3
  This special topics course will be crosslisted with LAW 181 *Telecommunications Law and Regulation*
- TELE 750 - Coordinating Seminar Credits: 3
  *and one of the following:*
- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
  *or*
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3

**Electives (12 credits)**

After completion of twelve credit hours of core coursework, electives may be selected from one of the two following emphasis areas:

- Telecommunications Policy
- International Telecommunications

**Total: 35 credits**
The MA in Transportation Policy, Operations, and Logistics (TPOL) Program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admission Requirements

Complete applications are reviewed on a rolling basis, with late applications considered on a space-available basis. Applicants must hold a bachelor’s degree from a regionally accredited institution, with a preferred GPA of 3.00 or better on a 4.00 scale.

The following items must be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of goals and interest in the program
- Current résumé
- Two official transcripts of all university work completed. International students must also submit a translation of all international transcripts into English, if applicable.
- Two letters of recommendation, with at least one from an individual who is qualified to attest to the candidate’s academic potential.
- For international applicants, TOEFL scores, with a minimum score of 575 on the paper-based exam; 230 on the computer-based exam; or 88 with a minimum of 20 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa).

Submission of GRE or GMAT scores is required only for students requesting merit-based funding consideration.

Academic Policies

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Degree Requirements

The degree requires completion of 36 credits as follows:

SPP Common Core (8 credits)
• PUBP 502 - Governance and Policy Processes Credits: 1-4
• PUBP 503 - Culture, Organization, and Technology Credits: 1-4

TPOL Core Courses (19 credits)

• PUBP 715 - Introduction to Transportation Systems Credits: 3
• PUBP 716 - Transportation Operations and Logistics Credits: 3
• PUBP 717 - Analysis for Transportation Managers Credits: 4
• PUBP 718 - Transportation Planning and Policy Credits: 3
• PUBP 721 - Transportation Economics Credits: 3
• PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics Credits: 3

Electives (9 credits)

Electives must be approved by the program director or advisor.

Total: 36 credits

Master's Level Certificate

Collaboration and Learning in Policy Organizations Graduate Certificate

Banner Code: PP-CERG-CLPO

SPP offers certificate programs in conjunction with its master's programs. All certificates require the completion of at least 15 credits (five courses) of work, including a required core course and electives approved in consultation with a faculty advisor. Students already pursuing a master’s degree in the School of Public Policy may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master’s degree.

Participants have to be admitted to a certificate program. Admission requirements are the same as those for the master’s programs.

Students admitted to an SPP program will be terminated from SPP upon receiving one grade of F and are no longer eligible to take courses in SPP. Per university regulation students are dismissed from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Certificate Requirements

Required Core
- PUBP 700 - Theory and Practice in Public Policy Credits: 3

Electives (12 credits)

Electives may be drawn from the following courses as well as any other PUBP or ITRN course approved by the academic advisor.

- PUBP 710 - Topics in Public Policy Credits: 1-3
- ITRN 701 - Special Topics in International Commerce and Policy Credits: 1-3
- ODKM 705 - Group Dynamics and Team Learning Credits: 3
- ODKM 735 - Organizational Development Practices Credits: 3
- ODKM 725 - Strategic Knowledge Management Credits: 3
- ODKM 720 - Collaborative Technologies for Knowledge Sharing Credits: 3

* One of the four electives must have an international focus

Total: 15 credits

Culture and Values in Social Policy Graduate Certificate

Banner Code: PP-CERG-CVSP

SPP offers certificate programs in conjunction with its master's programs. All certificates require the completion of at least 15 credits (five courses) of work, including a required core course and electives approved in consultation with a faculty advisor. Students already pursuing a master’s degree in the School of Public Policy may, after admission to a certificate program, earn an additional 9 credits (three courses) in SPP to receive a certificate in addition to the master’s degree.

Doctoral Degree

Public Policy, PhD

Banner Code: PP-PHD-PUBP

Phone: 703-993-8200
This program is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student’s program.

**Admission Requirements**

The program seeks students with exceptional potential for accumulating, sorting, analyzing, and communicating information and findings effectively. Public policy is inherently complex and value laden. In the end, high-quality policy analysis requires thoughtful and judicious management of complex and incommensurate information, both quantitative and qualitative. Potential students must be able to manage and integrate both kinds of information and produce persuasive, well-organized, written syntheses and analytical insight.

The ideal applicant has demonstrated capabilities in research and writing, basic mathematical skills roughly equal to the first semester of calculus, competence in statistics, some background in economics, and a theoretical and working knowledge of public policy processes. Applicants with strong records who are lacking in one or more of these areas may be admitted to the program and will receive assistance in making up deficiencies.

Applicants must hold a master’s degree from a regionally accredited institution and have a GPA of 3.00 or higher. Prospective students are encouraged to attend an information session.

Please see the Graduate Admissions Policies section in this catalog and online at [http://admissions.gmu.edu/grad/](http://admissions.gmu.edu/grad/) for general information on graduate admission to George Mason University.

The following items should be included when applying:

- Graduate application with fee (no fee waivers)
- 750 - 1,000 word written statement of goals and interest in advanced study in public policy
- Current resumé or vita
- Two official transcripts of all university work. International students must also submit a translation of all international transcripts into English, if applicable.
- GRE or GMAT results; scores should not be older than five years.
- Two letters of recommendation, with at least one from an individual qualified to attest to the candidate’s academic potential
- A writing sample approximately 10 to 20 pages in length, such as a technical report, professional publication, or term or seminar paper
- For international applicants, TOEFL results with a minimum score of 600 on the paper-based exam; 250 on the computer-based exam; or 100 with a minimum of 23 on each of the subsections on the Internet-based exam. IELTS will be accepted in lieu of the TOEFL; minimum of 6.5 required. Students may also be required to be tested by the English Language Institute.
- Certificate of Financial Responsibility (for students requesting an F-1 or J-1 visa)

**Deadlines**

The application deadline is February 1 for international students and March 1 for domestic students.

**Degree Requirements**
Students are required to complete a minimum of 82 credits of course work, of which no more than 12 may be dissertation credits. Up to 30 credits from a prior master’s degree may be applied toward the doctoral requirements at the program director’s discretion. Credit is not given for comprehensive exams passed at other universities.

Specific course work requirements include four foundational core courses, one semester of participation in the research colloquium, two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student’s research needs and interests. Courses are determined in collaboration with the student’s advisor and are drawn widely not only from SPP, but also from other programs at Mason.

At the completion of the first academic year of full-time study, students must pass a qualifying exam that evaluates mastery of the first year’s material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. The program also requires that students pass a field exam structured around their specific field of proposed doctoral research. Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation.

A complete description of the program policies, procedures, and requirements is in the SPP student and faculty handbook, which is published annually.

Areas of Program Specialization

Students may choose one of the established areas of specialization or work with a faculty committee to create their own specialization. The established specializations in the doctoral program are: Regional Development and Transportation; Technology, Science and Innovation; Entrepreneurship, Growth and Public Policy; U.S. Governance; Culture and Society; Organizational and Information Technology; and Global and International Systems.

Stage One - Core Skills

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in these three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant course work. Prerequisite courses will not count as part of the 82 credit requirement.

- PUBP 704 - Statistical Methods in Policy Analysis Credits: 3
- PUBP 720 - Managerial Economics and Policy Analysis Credits: 3
- PUBP 730 - National Policy Systems and Theory Credits: 3

Core Courses

- PUBP 800 - Culture and Policy Credits: 1-4
- PUBP 801 - Macro Policy Credits: 1-4
- PUBP 804 - Multivariate Statistical Analysis in Public Policy Credits: 4
- PUBP 805 - Public Policy Systems and Theory Credits: 4

*Students whose final paper in PUBP 801 is deemed unacceptable for a doctoral program must take PUBP 709 the following semester. PUBP 709 credit hours will not count as part of the 82 hours of course work. Failure to earn a grade of B or better in PUBP 709 may result in dismissal.
Qualifying Exam taken upon completion of all course courses.

Stage Two - Policy Fields and Skills

- Three elective courses
- One advanced methods course
- PUBP 850 - Seminar in Public Policy Credits: 1

Stage Three - Research Foundations

- Field of Study (3 courses)
- Advanced Methods (1 course)
- Field Statement
- Field Exam

Area of Specialization Requirements

- By end of their third semester, full time students (fourth semester for part-time) must choose a chair for their Field Committee
- By the start of their fourth semester, full time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan (max. 1000 words) will describe a proposed research area, including citations relevant to current research in that Field. The Plan must identify three substantive courses and at least one advanced methods course that the student intends to take that will serve as a foundation for the Field. The Plan must be approved by both the student's Field Committee Chair and the Director of the PhD program.
- The three substantive courses must include at least one 800 level course offered in SPP (excluding those 700 level courses listed as not eligible for PhD Field credit), and no more than one substantive graduate course from outside SPP.
- The advanced methods course must be chosen from the approved list for the SPP PhD program, or approved in writing by the Field Committee Chair and Director of the PhD program.
- Where appropriate courses are not available from SPP, students may petition the Director of the PhD program for substitute courses to count for their Field of Study Plan.
- Courses in the Field of Study Plan are intended to be taken concurrently with work on the Field Statement and Field Exam. Students may not present a dissertation proposal for approval until they have passed the Field Exam.

Stage Four - Dissertation

- Proposal Oral Defense
- Dissertation Oral Defense
- PUBP 998 - Research/Proposal for Dissertation Credits: 1-9
- PUBP 999 - Dissertation Credits: 1-9 (998 + 999, 12 credits total, at least 6 credits from 999)

Advancement to Candidacy

To advance to candidacy, students must have completed all course work requirements, passed the comprehensive qualifying and field examinations, have an approved dissertation committee, and presented and successfully defended a dissertation proposal.
College of Science

Phone: 703-993-3622
Web: cos.gmu.edu
College Code: SC

Departments

- Atmospheric, Oceanic and Earth Sciences
- Bioinformatics and Computational Biology
- Chemistry and Biochemistry
- Computational and Data Sciences
- Environmental Science and Policy
- Geography and Geoinformation Science
- Mathematical Sciences
- Molecular and Microbiology
- Physics and Astronomy

Additional Academic Units

- Biology Undergraduate Program
- Forensic Science Program
- Neuroscience Program

Interdisciplinary and Joint Programs

- Advanced Biomedical Sciences Graduate Certificate
- BA in Environmental and Sustainability Studies (pending SCHEV approval)

The College of Science (COS) serves as the nexus for research and education in the natural, mathematical, and computational sciences at Mason. The central mission of COS is to create and disseminate scientific knowledge, provide outstanding scholarship in concert with excellent teaching, and develop the human and technical resources required to address the current and future needs of society. Through its innovative and multifaceted educational and research mission, COS offers exciting opportunities to undergraduate and graduate students, scientists, educators, and other professionals in Northern Virginia and the national capital region.

In addition to the wide variety of undergraduate degree programs offered by its 9 departments, COS also offers many innovative graduate degrees and interdisciplinary minors. The research strength of COS provides an essential resource to graduate students and to undergraduates whose involvement in research is strongly encouraged. Many undergraduates go on to graduate school and to pursue careers in public service, nonprofit organizations, and the private sector. Graduate students engage in more specialized study at the master’s and doctoral levels, preparing them for first or second careers or job advancement and providing personal enrichment.
Faculty members are committed to teaching grounded in scholarship and research. They strive to make students rigorous thinkers and clear communicators while encouraging experimentation with new approaches and ideas. Students are thus prepared for their role as informed citizens in a complex, global society and able to adapt to an ever-changing world.

Administration

Vikas Chandhoke, Dean
Evans J. Mandes, Senior Associate Dean for Finance and Personnel
Maria Dworzecka, Senior Associate Dean for Facilities and Special Projects
Richard J. Diecchio, Associate Dean for Academic and Student Affairs
Paul S. Schopf, Associate Dean for Research and Computing
Peter A. Becker, Associate Dean for Institutional Relations
Allan Falconer, Associate Dean for Corporate Outreach

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Graduate Degree Programs

COS offers 10 master’s degrees and 10 doctoral degrees. The requirements for each degree are described in the departmental and degree sections that follow. A complete listing of the graduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/degree_programs/graduate.

Undergraduate Degree Programs

COS offers 6 bachelor of arts degrees and 10 bachelor of science degrees. These undergraduate degree consist of course work in university-wide general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide general education requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Students should consult the University General Education chapter for information concerning university-wide general education requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

A complete listing of the undergraduate programs administered by the College of Science is available on the college web site: http://cos.gmu.edu/academics/undergraduate/degree_programs.

College-Level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.
Bachelor of Arts

The BA degree provides students with a breadth of knowledge, as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the university-wide general education program, students pursuing a BA degree must complete the course work below, and the courses listed in the departmental sections that follow. Except where expressly prohibited, a course used to fulfill a college-level requirement may also be used simultaneously to satisfy other requirements, such as university-wide general education requirements, college-level requirements, or requirements for the major. In some cases, the COS requirements below may be superceded by requirements of the major degree program.

- Philosophy or religious studies: 3 credits, fulfilled by any course in philosophy or religious studies (PHIL, RELI)
- Social and behavioral science: 3 credits in addition to the university-wide requirement in social and behavioral science for a total of 6 credits. The two courses used to fulfill the combined college and university requirements must be from different disciplines in the social and behavioral sciences. This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST (except 100 or 125), LING, PSYC, or SOCI and these courses in GGS: 101, 103, 110, 301, 303, 304, 305, 306, 315, 316, 320, 325, 330, 357, 380.
- Science: 1 credit in addition to the university-wide requirement for a total of 8 credits. This requirement can be fulfilled by completing two of any approved natural science courses that include a laboratory experience. This requirement may not be fulfilled by BIOL 124 or 125.
- Non-Western culture: 3 credits of an approved course in the study of a non-Western culture in addition to the course used to fulfill the university-wide general education requirement in global understanding. A course used to fulfill the university-wide general education global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (university-wide general education requirements, college-level requirements, or requirements for the major). This requirement may be fulfilled by any of the following courses: ANTH 114, 300, 301, 302, 304, 305, 306, 307, 308, 309, 311, 313, 330, 332, 396; ARTH 203, 204, 319, 320, 380, 382, 383, 384, 385, 482; CHIN 318, 320, 325; DANC 118; ECON 361, 362; FREN 451; GGS 101, 300, 325, 330, 399; GOVT 328, 332, 333, 340, 341, 345, 432, 433; HIST 130, 251, 252, 261, 262, 271, 281, 282, 328, 329, 353, 354, 355, 356, 365, 366, 367, 387, 426, 459, 460, 461, 465, 466; MUSI 103; RELI 211, 212, 272, 313, 314, 315, 337, 374, 375, 490; or RUSS 353, 354. Students who can document attendance at a native school in a non-Western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office.
- Foreign language: intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210; or by successfully completing a 300- or 400-level course that requires intermediate-level proficiency and is taught in the foreign language; or by achieving a satisfactory score on an approved proficiency test; or by presenting for admission to George Mason University an approved score on the TOEFL and on the TOEFL essay (for students whose native language is not English). International students should consult the Undergraduate Academic Affairs Office about a possible waiver of the foreign language requirement.

Requirements for each BA major are listed in the departmental sections that follow.

Bachelor of Science

The BS degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the university-wide general education program plus the requirements for their major. Requirements for each BS major in COS are listed in the departmental sections that follow.

Teacher Licensure

Degree programs that prepare students for high school teaching careers are available in the following COS departments or programs: Atmospheric, Oceanic and Earth Science; Biology; Chemistry, Mathematics, and Physics. Students who wish to become K-12 teachers, and who plan to seek teacher licensure should also consult the College of Education and Human
Minors

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see the Academic Policies chapter of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form.

Undergraduate Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies and college-level requirements should contact the Undergraduate Academic Affairs Office (Enterprise Hall, Suite 316; 703-993-8725; cosdean@gmu.edu). Additional policy information and forms are available online at www.gmu.edu/student/academicaffairs.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

Academic Load

The university limits undergraduate students with a cumulative GPA below 2.00 to 13 credit hours per semester. All undergraduate students returning from suspension are also limited to a maximum of 13 credit hours. Exceptions to this rule are very rare and only occur in exceptional cases.

Undergraduate students in good standing may enroll in up to 18 credit hours each semester. In exceptional circumstances, students may request an overload of the maximum credit hours. Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding course load while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Withdrawals
Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Credits graded “W” do not affect a student’s GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student’s academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with the Student Retention Categories in the Academic Policies section of the catalog.

**University Consortium Registration**

Participation in consortium registration is available to degree-seeking juniors and seniors in good standing currently enrolled at Mason. Participation is limited to courses that are approved by the student’s department chair and academic dean, apply to the student’s program of study, are not offered during that semester at Mason, and have space available at the consortium institution. Students should consult with the Consortium Coordinator in the Registrar’s Office, as additional restrictions may apply. Students may take just one course per semester, with a career maximum of two courses. Students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the dean’s office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

**Credit to Be Earned at Other Institutions**

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean’s office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses can seldom be approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere.

Courses taken elsewhere that have been pre-approved by the dean’s office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar’s Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Additional information about study elsewhere can be found at www.gmu.edu/student/academicaffairs/policies.htm.

**Study Abroad**

In order to be considered for study through the Center for Global Education, students must plan well in advance and receive prior, written permission from the academic dean. Students must also meet all of the following criteria:
- Have a cumulative GPA of 2.25 or higher at Mason
- Have completed the immediately preceding semester at Mason with a 2.00 or higher
- Have completed the necessary forms and have obtained all required signatures and course equivalencies

The Center for Global Education (globaled.gmu.edu/index.html) may have higher academic standards and students must meet all eligibility requirements.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

**Academic Clemency**

In extraordinary cases, students who (a) have been absent from George Mason for a minimum of three consecutive calendar years and (b) are currently in their first semester back at the university may request that their academic dean consider allowing clemency from up to 16 hours of coursework from previous semesters. To be considered for this exception, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return
- Submit their request in writing by the last day of classes for their first semester back at George Mason
- In order to make this request, students should (a) enroll in at least 6 hours during their first semester back at George Mason and (b) earn at least a 2.50 semester GPA with no grade below “C.” If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances

Additional information about clemency can be found at www.gmu.edu/student/academicaffairs/policies.htm.

**Appeals Process**

Students may appeal departmental decisions concerning academic actions to the Office of Undergraduate Academic Affairs. They may appeal decisions of the Office of Undergraduate Academic Affairs to the Deans Council, a committee composed of college deans and faculty members. Students may appeal decisions of the Dean’s Council to the COS Associate Dean for Undergraduate Programs. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Provost’s Office as specified in the Academic Policies chapter of this catalog.

Grade appeals should be made to the department or program, following the process specified in the Academic Policies chapter of this catalog. If they are resolved within the department or program, that unit is the final level of appeal. The departmental decision may be appealed to the dean only on the basis of procedural irregularity. Such appeals should be made through the Office of Undergraduate Academic Affairs. If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the dean, who makes the final determination. The decision of the dean is not subject to review or further appeal.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Undergraduate Academic Affairs. When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Undergraduate Academic Affairs on the basis of procedural irregularity only, and it is the final level of approval.

The Dean’s Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester.

The COS Associate Dean for Undergraduate Programs is the final level of appeal for COS college level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal. The Associate Dean is the final level of approval.
There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

**Grievances**

Grievances should be directed in writing to the Associate Dean for Undergraduate Programs. The COS Undergraduate Academic Affairs Office may also provide guidance to students on how to resolve their concerns.

**Transfer Students**

Admitted and enrolled transfer students who have completed an AA, AS or AA&S degree from the Virginia Community College System (VCCS) with a curriculum grade point average (GPA) of at least 2.75 are considered to have met all of George Mason University’s lower level general education requirements. They are still required by the university to complete ENGL 302 and a synthesis course. Transfer students who meet the conditions above and are pursuing a degree in COS are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor's degree from an accredited institution who are pursuing a BA degree in COS are also considered to have met all college requirements except for proficiency in a foreign language.

**Excluded Courses**

Physical Education (PHED) and Parks, Recreation, and Leisure Studies (PRLS) activity courses cannot be counted toward credits required for a degree in the College of Science. Students may use nonactivity PHED and PRLS courses for elective credit for college degrees. For a current list of PHED and PRLS courses that may be used for credit in the college, see the CHSS Undergraduate Academic Affairs Office Web site at http://www.gmu.edu/student/academicaffairs/. Military Science (MLSC) courses cannot be counted toward credits required for a degree in the college.

Once admitted to Mason, students may not take CLEP exams and apply credits from those exams to degrees in the College of Science. Students may apply credits from CLEP exams to degrees in the college only if those credits were awarded at the time of admission.

**Master's Level Certificate**

**Advanced Biomedical Sciences Graduate Certificate**

Banner Code: SC-CERG-ABS

The Advanced Biomedical Sciences Certificate is a premium-priced program offered jointly by George Mason University and Georgetown University. This program is aimed at students who typically have most or all of their prerequisites for medical school, but otherwise may have a modest science background (non-science majors, for example) or modest grades in sciences as undergraduates, and/or may also need to improve their medical College Admission Test scores. This is a 1-year program beginning in the fall semester. All classes will be held at the Prince William Campus.

Applicants are expected have a bachelors degree from an accredited university, the desire to pursue a career in medicine or dentistry, completion of all or most of the prerequisite courses for medical school (biology, chemistry, organic chemistry,
physics, math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

This program of study is offered by the College of Science.

**Fall Semester (11 credits)**

- BMED 601 - Cell and Molecular Physiology Credits: 4
- BMED 602 - Biostatistics and Epidemiology Credits: 3
- BMED 603 - Cell Biology and Microscopic Anatomy Credits: 3
- BMED 651 - Physician and Society Credits: 1

**Spring Semester (9 credits)**

- BMED 604 - Fundamentals of Human Physiology Credits: 5
- BMED 605 - Introduction to Human Anatomy Credits: 2
- BMED 651 - Physician and Society Credits: 1
- BMED 652 - Biomedical Career Pathways Credits: 1

**Total: 20 Credits**

- **Atmospheric, Oceanic and Earth Sciences**

  Phone: 703-993-8958
  Web: aoes.gmu.edu

  **Faculty**

  Professors: Diecchio, Hazen (Robinson Professor), Schneider, Schopf, Shukla, Straus (chair), Summers*

  Associate professors: Boybeyi, DelSole, Harlan, Houser**, Huang, Kinter, Klinger, McBride

  Assistant professors: Jin, Kysar-Mattietti, Lu

  Term professors: Krishnamurthy

  Term associate professors: Verardo

  Term assistant professors: Nord, Uhen

  Term research faculty: Doty
Course Work

The department offers all course work designated CLIM and GEOL in the Courses chapter of this catalog.

Honors Program for Earth Science and Geology

Earth science majors who have completed 16 credits of math and science, including GEOL 302 or BIOL 307, with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a B or better in GEOL 302 or BIOL 307 are also eligible. To graduate with honors in Earth Science students are required to maintain a minimum GPA of 3.00 in math and science and complete the following courses with an average GPA of 3.50 or better: GEOL 406, 410, and 411.

Undergraduate Degree

Earth Science, BS

Banner Code: SC-BS-ESCI

This degree is intended for students interested in studying the Earth and its environment. Recognizing that these are integrated disciplines, students receive a broad background in Earth and Environmental Sciences and select one of six specialty concentrations. The concentrations in Atmospheric Science, Earth Science Education, Earth Surface Processes and Geology are solely offered by AOES. The concentrations in Environmental Science and in Oceanography and Estuarine Science are offered jointly with the Department of Environmental Science and Policy where specific advising is also available.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following course work with a minimum GPA of 2.00. Through the course work below, Earth science majors satisfy the university and college requirements in natural science and quantitative reasoning. GEOL 317 fulfills the writing intensive requirement for this major.

This program of study is offered by the College of Science.

Degree Requirements

36 credits of core science and mathematics:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- GGS 309 - Meteorology and Climate Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3
  and either
• GEOL 406 - Seminar in Earth and Environmental Science Credits: 3
  or
• GEOL 420 - Earth Science and Policy Credits: 3
  and either
• GEOL 309 - Introduction to Oceanography Credits: 3
  or
• BIOL 309 - Introduction to Oceanography Credits: 3
  and one of the groups
• CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
  or
• PHYS 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
• PHYS 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
NOTE: Students in the Atmospheric Science Concentration must take the CLIM 111, 112 sequence.

8 credits of physics:

either the sequence
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
  or the sequence
• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1
NOTE: Students in the Atmospheric Science Concentration must take the PHYS 160, 161, 260, 261 sequence.

Concentrations

Each student chooses a concentration in either Atmospheric Science; Earth Science Education; Earth Surface Processes; Environmental Science; Geology; or Oceanography and Estuarine Science. The credit requirements for each concentration differ as noted below.

▲ Atmospheric Science (ATMS)

This concentration gives students a strong quantitative undergraduate education in atmospheric and related sciences. The curriculum meets the American Meteorological Society's recommendations for a Bachelor's degree in atmospheric science and the US Government Civil Service GS-1340 qualification in meteorology. Students completing the atmospheric science concentration will be prepared for a wide range of career paths including operations and research (via graduate school) in meteorology, atmospheric science and climate. 41 credits are required as follows:

• CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- PHYS 262 - University Physics III Credits: 3
- CLIM 301 - Weather Analysis and Prediction Credits: 4
- CLIM 314 - Severe and Extreme Weather Credits: 3
  or
- GGS 314 - Severe and Extreme Weather Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- CLIM 408 - Senior Research Credits: 3
- CDS 401 - Scientific Data Mining Credits: 3
  or
- CSI 501 - Introduction to Scientific Programming Credits: 3

and 9 credits from the following:

- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- MATH 313 - Introduction to Applied Mathematics Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 353 - Observations of the Earth and its Climate Credits: 3
- CLIM 390 - Topics in Climate Research Credits: 1-4
- CLIM 409 - Research Internship Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CLIM 411 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- GGS 456 - Introduction to Atmospheric Radiation Credits: 3
- PHYS 475 - Atmospheric Physics Credits: 3

Total: 41 credits

▲ Earth Science Education (ESE)

This concentration is for students intending to pursue secondary school teaching in Earth Science. Students are advised from both the Geology program and the Graduate School of Education. 29 credits of course work are required, plus an additional 21 credits to satisfy the optional teaching licensure requirement:

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 408 - Practicum for Geology Laboratories Credits: 1
• GEOL 409 - Practicum for Geology Laboratories Credits: 1

and three of the following:

• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4  
• GEOL 304 - Sedimentary Geology Credits: 4 *
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 317 - Geomorphology Credits: 4
• GEOL 363 - Coastal Morphology and Processes Credits: 4
• GEOL 401 - Structural Geology Credits: 4

Total: 29 credits

Optional Teacher Licensure Requirement (21 credits):

• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3

▲ Earth Surface Processes (EP)

This concentration focuses on a broad understanding of the physical processes and natural materials found at or near the Earth's surface that have produced the primary landforms and landscapes observed today. Fundamental concepts, methods and techniques of landscape analysis are also examined. At least 31 credits are required as follows:

• GEOL 102 - Introductory Geology II Credits: 4  
  or
• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4

• GEOL 302 - Mineralogy Credits: 4
• GEOL 303 - Field Mapping Techniques Credits: 3
• GEOL 306 - Soil Science Credits: 3

• GEOL 316 - Computers in Geology Credits: 3  
  or
• CS 112 - Introduction to Computer Programming Credits: 4 **
- GEOL 317 - Geomorphology Credits: 4

and four of the following:

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 315 - Topics in Geology II Credits: 1-3
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 417 - Geophysics Credits: 3

Total: 31 credits (minimum)

▲ Environmental Science (EVSC)

This subdiscipline integrates the physical elements of earth into the broader field of environmental science through classes in ecology of natural systems and human interactions with the environment. This provides students with a scientifically grounded interdisciplinary degree. At least 34 credits are required as follows:

- BIOL 307 - Ecology Credits: 4
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- GEOL 303 - Field Mapping Techniques Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3

and two of the following:

- BIOL 345 - Plant Ecology Credits: 4
- BIOL 449 - Marine Ecology Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4

Total: 34 credits (minimum)

▲ Geology (GEOL)
The Geology Concentration is fashioned after traditional Geology bachelor's degrees. It allows graduates to be employed as geologists in the field or pursue graduate studies in geology. At least 31 credits are required as follows:

- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 404 - Geological Field Techniques Credits: 3-8 ***

Total: 31 credits (minimum)

▲ Oceanography and Estuarine Science (OEST)

This concentration provides students with a comprehensive knowledge of oceanography. Additional coursework in physical and chemical oceanography give insight into the aquatic environment and its link to both ecosystems and climate. Within the concentration, students can choose an open ocean or coastal option. The curriculum will emphasize local and regional case studies, in particular the Chesapeake Bay. The program will provide students with the basic training required to allow them to obtain entry level positions in oceanographic and estuarine career tracks or an appropriate graduate degree program. At least 29 credits are required as follows:

- GEOL 102 - Introductory Geology II Credits: 4
- CLIM 412 - Physical Oceanography Credits: 3
  
either
  
- GEOL 458 - Chemical Oceanography Credits: 3
  
or
  
- CHEM 458 - Chemical Oceanography Credits: 3

and one of the groups

- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4
  
or
  
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
  
or
  
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

One of the following two options:

**Open Ocean Option**
• GEOL 364 - Marine Geology Credits: 3
• BIOL 449 - Marine Ecology Credits: 3
• Elective from list below (3-4 credits)

Coastal Ocean Option
• GEOL 363 - Coastal Morphology and Processes Credits: 4
• EVPP 581 - Estuarine and Coastal Ecology Credits: 3
• EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1

Plus three additional credits or their equivalents

• BIOL 449 - Marine Ecology Credits: 3
• EVPP 581 - Estuarine and Coastal Ecology Credits: 3
• EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1
• BIOL 536 - Ichthyology Credits: 4
• EVPP 350 - Freshwater Ecosystems Credits: 4
• EVPP 377 - Applied Ecology Credits: 3
• EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
• GEOL 302 - Mineralogy Credits: 4
• GEOL 304 - Sedimentary Geology Credits: 4
• GEOL 308 - Igneous and Metamorphic Petrology Credits: 4
• GEOL 312 - Invertebrate Paleontology Credits: 4
• GEOL 363 - Coastal Morphology and Processes Credits: 4
• NCLC 395 - Field-Based Work Credits: 1-18 (when topic is Exploring Underwater Ecology)
• BIOL 440 - Field Biology Credits: 1-4 (when topic is Coral Reef Ecology)
  Additional Recommended Course
• PHED 255 - Basic Scuba Diving Credits: 2

Total: 29 credits (minimum)

Notes:

* Requires C or better in GEOL 302
** Satisfies general education information technology requirement
*** No longer offered regularly; 6-credit geology field camp is required as substitute (see advisor for details).

Geology, BA

Banner Code: SC-BA-GEOL

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in geology must complete additional college requirements for the BA degree in COS. Candidates for a degree in
geology must also complete the following with a minimum GPA of 2.50. (Through the course work below, geology majors satisfy the university wide requirements in natural science and quantitative reasoning.) GEOL 317 fulfills the writing intensive requirement for this major.

This program of study is offered by the College of Science.

Degree Requirements

Geology Core (38 credits):

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4
- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4
- GEOL 404 - Geological Field Techniques Credits: 3-8 **

Chemistry (8 credits):

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

Mathematics (3-4 credits):

one of the following:

- MATH 110 - Introductory Probability Credits: 3
- MATH 111 - Linear Mathematical Modeling Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Computer Science (3-4 credits):

one of the following:

- GEOL 316 - Computers in Geology Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
- IT 103 - Introduction to Computing Credits: 3
Program Courses (9 credits):

9 credits of degree-related course work in a coherent program designed in coordination with advisor and approved by department chair

Notes:

* Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.

** 6 credits of GEOL 404, or a 6-credit geology field camp (see your advisor for details).

Undergraduate Minor

Earth Science Minor

Banner Code: ESCI

This program of study is offered by the College of Science.

Course Work

To receive this minor, students must successfully complete 18 credits with a minimum GPA of 2.00, distributed as follows:

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 309 - Introduction to Oceanography Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3

Electives

- 8 credits of geology electives

Notes:

Eight credits of course work must be unique to the minor.

Students may not receive both the minor in geology and the minor in earth science. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 18 credits

Geology Minor
Banner Code: GEOL

This program of study is offered by the College of Science.

Course Work

To receive the minor, students must successfully complete 20 credits with a minimum GPA of 2.00 to include:

- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- GEOL 302 - Mineralogy Credits: 4

Two of the following courses (8 credits):

- GEOL 304 - Sedimentary Geology Credits: 4 *
- GEOL 308 - Igneous and Metamorphic Petrology Credits: 4 *
- GEOL 312 - Invertebrate Paleontology Credits: 4
- GEOL 317 - Geomorphology Credits: 4
- GEOL 401 - Structural Geology Credits: 4

Notes:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

*Students must achieve a grade of 2.00 or better in GEOL 302 before taking GEOL 304 or 308.

Total: 20 credits

Ocean and Estuarine Science Minor

Banner Code: OES

To receive this minor, students must successfully complete 20-21 credits with a minimum GPA of 2.00 as follows.

This program of study is offered by the College of Science.

Course Work

14-15 credits of core courses:

All students take:
- GEOL 101 - Introductory Geology I Credits: 4
plus one of the following:
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4

and one of the following:
- GEOL 309 - Introduction to Oceanography Credits: 3
- BIOL 309 - Introduction to Oceanography Credits: 3

and one of the following:
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- BIOL 449 - Marine Ecology Credits: 3 *

6 credits of electives from the following:

- GEOL 363 - Coastal Morphology and Processes Credits: 4 *
  or
- EVPP 363 - Coastal Morphology and Processes Credits: 4 *

- BIOL 449 - Marine Ecology Credits: 3 *
- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- NCLC 395 - Field-Based Work Credits: 1-18
- NCLC 495 - Field-Based Work Credits: 1-18
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 507 - Selected Topics in Ecology Credits: 0-4
- EVPP 581 - Estuarine and Coastal Ecology Credits: 3 **
- EVPP 582 - Estuarine and Coastal Ecology Laboratory Credits: 1 **

- BIOL 536 - Ichthyology Credits: 4
  or
- EVPP 536 - Ichthyology Credits: 4

Notes:

PHED 225 is strongly recommended but not required. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

*If not previously counted

**If chosen, must take both lecture and lab for a total of 4 credits

Total: 20-21 credits
Doctoral Degree

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

The mission of this program is to train the next generation of scientists in climate dynamics and related fields. While there is no unambiguous definition of “climate,” climate dynamics is generally considered to encompass processes that determine the behavior of the atmosphere, land, and oceans averaged over time scales of weeks to centuries and millennia. Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years.

Climate variability has important ramifications for society, from planning for next year’s electrical demand and forecasting agricultural production to answering complex questions involving long-term global change. While it is thought to be theoretically impossible to predict day-to-day weather more than a few weeks in advance, recent progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance.

Climate dynamics faculty members are varied and have a blend of expertise in dynamics, statistics, and computational methods. They cover the traditional areas of atmospheric dynamics, physical and dynamical oceanography, land surface physics, and hydrology. The faculty and students involved in the program work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA).

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; deforestation, desertification, and monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; and ocean circulation theory.

External research collaborations exist with federal agencies, private corporations, and other universities, exemplifying the commitment of COS and the university to the development of effective regional and national collaborations. The faculty is heavily involved with national and international climate science efforts, providing students with the opportunity for participation in research.

This program of study is offered by the College of Science.

Admission Requirements

Applicants should have demonstrated high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in undergraduate work and a combined GRE score of 1,100 (verbal plus quantitative). To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants who have not completed an MS degree in the United States.

Degree Requirements
Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding master’s degrees, the required 48 credits may be reduced by up to 30 credits, depending on graduate courses completed. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

The 48-credit curriculum requirement is divided into four areas: 12 credits of fundamental climate science courses, 9 credits of core computational methods, 3 credits of seminar, and a minimum of 24 credits of electives. The course work is organized as follows:

**Fundamental Climate Science Courses (12 credits):**

- CLIM 710 - Introduction to Physical Climate System Credits: 3
- CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
- CLIM 712 - Physical and Dynamical Oceanography Credits: 3
- CLIM 714 - Land-Climate Interactions Credits: 3

**Core Computational Courses (9 credits):**

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CLIM 715 - Numerical Methods for Climate Modeling Credits: 3

**Climate Seminar (3 credits):**

Taken three times:

- CLIM 991 - Climate Dynamics Seminar Credits: 1

**Electives (24 credits):**

- 24 credits of electives, including up to 5 credits of independent research

**Research (24 credits):**

Note: No more than 24 combined credits from CLIM 998 and CLIM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CLIM 998.

- CLIM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CLIM 999 - Doctoral Dissertation Credits: 1-12
Advancement to Candidacy

After completing the fundamental climate science courses, students take a two-part qualifying exam that includes core and specialty components. The core component is administered by an examination committee. After successfully completing the core component, students take the specialty component, which is administered by the dissertation committee that students typically form by the spring semester of their second year. Following successful completion of both parts of the qualifying exam, students present a written dissertation proposal to the committee. Students may enroll in CLIM 998 Doctoral Dissertation Proposal to complete this effort.

Doctoral Dissertation

After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999. The degree will be awarded on completion of the required course work and approval of a PhD thesis that makes an original and significant contribution to the field.

Total: 72 credits

Bioinformatics and Computational Biology

Web: bioinformatics.gmu.edu

Faculty

Professors: Jafri (chair), Willett

Associate professors: Kinser, Klimov, Seto, Vaisman

Course Work

The department offers all course work designated BINF in the Courses chapter of this catalog.

Undergraduate Minor

Bioinformatics Minor

Banner Code: BNF
The bioinformatics minor is an interdisciplinary program consisting of required courses in biology, programming, statistics, and bioinformatics. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Students must complete the following courses (either 20 or 22 credits) with a minimum GPA of 2.00, distributed as follows:

- BINF 401 - Bioinformatics and Computational Biology I Credits: 3
- BINF 402 - Bioinformatics and Computational Biology II Credits: 3
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 482 - Introduction to Molecular Genetics Credits: 3
- STAT 250 - Introductory Statistics I Credits: 3
  or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
  or
- IT 108 - Programming Fundamentals Credits: 3
- IT 306 - Program Design and Data Structures Credits: 3

Total: 20 or 22 credits

Master's Degree

Bioinformatics and Computational Biology, MS

Banner Code: SC-MS-BCB

This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor’s guidance, making the MS in bioinformatics especially relevant for students employed in today’s diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and the ability to develop new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master’s thesis.

This program of study is offered by the College of Science.
Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation, and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required for all international applicants.

Degree Requirements

Candidates must successfully complete 31 credits as follows:

Bioinformatics core courses (12 credits):

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3

Advanced bioinformatics (3 credits):

- 3 credits of advanced bioinformatics courses numbered BINF 730 and above

Electives (12 or 9 credits):

- 12 credits of electives in bioinformatics and computational biology, biology and biotechnology, or computational sciences, as approved by the advisor
- Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

Bioinformatics seminar (1 credit):

- BINF 704 - Colloquium in Bioinformatics Credits: 1

Research component (3 or 6 credits):

Students must complete either a 3-credit research project or a 6-credit MS thesis. Utilization of the 6-credit MS thesis option reduces the electives requirement from 12 credits to 9 credits.

- BINF 798 - Research Project Credits: 3
Bioinformatics Management, MS

Banner Code: SC-MS-BNFM

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The MS in bioinformatics management is intended for

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

This program of study is offered by the College of Science.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN exam. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Bioinformatics Core Courses (15 credits)

Foundational courses in modern biotechnology, tools and methods for bioinformatics analysis, and methods for creating customized bioinformatics tools.

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BINF 730 - Biological Sequence Analysis Credits: 3
One of the following:

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 650 - Introduction to Bioinformatics Database Design Credits: 3

Management Core Courses (12 credits)

Foundational courses in management theory related directly to the management of scientific programs and personnel.

- MBA 638 - Operations Management Credits: 3
- MBA 712 - Project Management Credits: 3
- TECM 615 - Decision Making Using Accounting and Financial Data Credits: 3
- TECM 640 - Management of Consulting and Technical Professionals Credits: 3

Capstone research project (3 credits)

Focusing on bioinformatics management issues and techniques.

- BINF 798 - Research Project Credits: 3

Total: 30 credits

Master's Level Certificate

Bioinformatics and Computational Biology Graduate Certificate

Banner Code: SC-CERG-BCB

This graduate certificate program addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. The flexibility of the certificate structure permits students to custom design their curriculum under an advisor’s guidance, making the certificate in bioinformatics especially relevant for students employed in today’s diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

This program of study is offered by the College of Science.

Admission Requirements
Applicants should hold a BA or BS degree in a discipline related to biological or computer science from an accredited university, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

The certificate program is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the COS educational facilities used to support the certificate program. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours to the certificate program from another certificate, degree, or non degree program because of the differential (premium) tuition rate.

Program Requirements

The certificate in bioinformatics and computational biology requires a total of 15 credits, based on the set of core courses supporting the MS and PhD degree programs in bioinformatics and computational biology, along with a set of elective courses. Students are required to take three core courses, plus two courses selected from the list of electives indicated below.

Certificate Requirements

Required Core Courses (9 credits):

- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 631 - Molecular Cell Biology for Bioinformatics Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3

Elective Courses (6 credits):

Choose two of the following or other courses approved by the coordinator.

- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 636 - Microarray Methodology and Analysis Credits: 3
- BINF 639 - Introduction to Biometrics Credits: 3
- BINF 730 - Biological Sequence Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
- BINF 733 - Gene Expression Analysis Credits: 3
- BINF 734 - Advanced Bioinformatics Programming Credits: 3
- BINF 739 - Topics in Bioinformatics Credits: 3

Total: 15 credits
Doctoral Degree

Bioinformatics and Computational Biology, PhD

Banner Code: SC-PHD-BCB

The main objective of the doctoral program in Bioinformatics and Computational Biology is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. In general, course requirements may be completed within the first two years. The program is structured to be accessible for full- and part-time students.

This program of study is offered by the College of Science.

Admission Requirements

Applicants should have a bachelor’s degree in biology, computer science, or a related field, with a minimum GPA of 3.25. Admission also requires minimum GRE scores of 1,100 (verbal plus quantitative) and 4.00 (analytical writing). Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted provisionally and required to take additional courses, some of which may not be applicable to the 48-credit course total for the bioinformatics PhD. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Biochemical Systematics (Biochemistry).

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral programs will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed. The curriculum includes 6 credits of fundamental biosciences courses; 13 credits of core bioinformatics courses; 3 credits of lab rotation; 3 credits of colloquium; 23 credits of electives or independent research; and 24 credits of dissertation research.

Fundamental Bioscience Courses (6 credits):

- BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics
  Credits: 3
Core Bioinformatics Courses (13 credits):

- BINF 690 - Numerical Methods for Bioinformatics Credits: 3
- BINF 705 - Research Ethics Credits: 1
- BINF 730 - Biological Sequence Analysis Credits: 3
- BINF 731 - Protein Structure Analysis Credits: 3
- BINF 732 - Genomics Credits: 3
  or
- BINF 740 - Introduction to Biophysics Credits: 3

General Electives (23 credits):

23 credits of approved general electives or independent research.

Lab Rotation (3 credits):

taken three times:

- BINF 703 - Bioinformatics Lab Rotation Credits: 1

Colloquium (3 credits):

taken three times:

- BINF 704 - Colloquium in Bioinformatics Credits: 1

Doctoral Committee and Advancement to Candidacy

By the end of the semester when course work is completed, the student must form a doctoral committee, which will supervise the candidacy exam. The exam includes written and oral components. On passing the candidacy exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy.

Research (24 credits):

Note: no more than 24 combined credits from BINF 998 and BINF 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of BINF 998.

- BINF 998 - Doctoral Dissertation Proposal Credits: 1-12
- BINF 999 - Doctoral Dissertation Credits: 1-12
Doctoral Dissertation

After advancing to doctoral candidacy, the student works on their doctoral dissertation while enrolled in BINF 999. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Total: 72 credits

■ Biology Undergraduate Program

Phone: 703-993-1050
Web: biology.gmu.edu

Faculty

Director: Rockwood

Assistant Director: Otto

Biology Undergraduate Coordinator: Polayes

Professors: Rockwood

Term associate professors: Cressey, Kocache, Polayes

Term assistant professors: Fondufe, Madden, Otto, Tondi

Adjunct faculty: Henley, Jones, Laemmerzahl, McClintock, Wood-Salvesen, Yoder

The Biology Undergraduate Program is a collaboration between the Department of Molecular and Microbiology (MMB) and the Department of Environmental Science and Policy (ESP). In addition, the Program has its own dedicated teaching faculty. The Program is administered by the Biology Program Director and the Assistant Program Director. It is governed by a Biology Program Committee consisting of the Program Director, two Biology Program faculty, two faculty from the MMB Department and two faculty from the ESP Department.

Course Work

The program offers all undergraduate course work designated BIOL and MTCH in the Courses chapter of this catalog.

Undergraduate Degree Programs

The bachelor degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allows students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, marine science. The program also offers a BS in medical
technology. Additional information can be found at the Biology Program’s web site at biology.gmu.edu or by contacting the Biology Program office, David J. King Hall, Room 3005, 703-993-1050.

Advising

All biology majors are strongly urged to see an academic advisor regularly to help them plan their schedule, so they can graduate on time. Biology majors should see an advisor for permission to register prior to their first semester and again as they complete 60 credits and 90 credits. Medical technology majors must see the medical technology advisor to obtain permission to register each semester.

Students returning from suspension are required to meet with the Undergraduate Coordinator or designee prior to being allowed to register.

Call 703-993-1050 or visit David J. King Hall, Room 3005, to make an advising appointment.

Residence Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any program research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Honors Program in Biology

Admission Requirements

Minimum requirements for invitation:

- GPA in biology courses must be 3.50 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of B or better in BIOL 213

Ideally, we would like to recruit students in their freshman or sophomore year.

Retention Requirements
Students in honors biology must maintain a biology GPA of 3.50 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 7 credits in honors courses in BIOL including three semesters of BIOL 494 (honors seminar, 1 credit) or two semesters of BIOL 494 and one semester of BIOL 493 (honors research, 1-3 credits). The GPA requirements are as follows:

- Minimum 3.50 GPA in honors biology courses
- Minimum 3.50 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 307. Students not taking BIOL 307 at Mason should consult the program director for a course to fulfill this requirement.

Minor in Biology

Candidates for the minor in biology must complete 19-20 credits in Biology with a minimum GPA of 2.00 including BIOL 213, 303, 304 and either BIOL 307 or 311, in addition to one other 304 credit biology course at the 300 (not 301), 400 or 500 level. Eight credits of coursework must be unique to the minor. For policies concerning minors, see the Academic Policies chapter of the catalog.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required course work and overall preparation.

Teacher Licensure

Students who wish to become teachers should pursue either the BA in Biology with a Concentration in Education or the BS in Biology with a Concentration in Education and consult the College of Education and Human Development chapter of this catalog and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Biology for Nonmajors

Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in BIOL 103 and 104. With permission of the instructor, nonmajors may enroll in BIOL 213 and then take either BIOL 303 or 304 to complete the requirement. Chemistry, physics, and mathematics majors should consult their faculty advisor to determine which biology courses to take.
BS in Medical Technology

This program requires the equivalent of three years of full time professional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to the biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical technology majors and prospective majors are urged to enroll in MTCH 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300-400 level biology or chemistry coursework taken at Mason. Students may present no more than 6 credits of D grades in biology and chemistry courses required in three years of pre-professional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. In addition, candidates must complete MTCH 200 and present the following courses in their pre-professional programs with a minimum GPA of 2.00. (Through the coursework below, majors satisfy the university-wide general education requirements in natural science, quantitative reasoning and information technology proficiency.)

Students are encouraged to elect additional basic science courses during their pre-professional years. Recommended courses are BIOL 465, 483, 484 and 485; CHEM 321; and PHYS 243, 244, 245, and 246. Professional study during the senior year involves clinical education at an affiliated school of medical technology. Thirty credits of coursework are required, including MTCH 401, 402, 403, 404, 405, and 406. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

NOTE: Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in medical technology fulfill this requirement by successfully completing BIOL 453. Students not taking BIOL 453 at Mason should consult the program director for a course to fulfill this requirement.

Major in Medical Technology as a Second Bachelor’s Degree

While the standard program for medical technologists is three years on campus followed by a fourth year at a clinical affiliate (3 + 1), many students elect to complete a bachelor’s degree before entering the clinical program (4 + 1). Students who have completed a BS in biology or chemistry at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor’s degree with a major in medical technology. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a medical technology advisor.
Premedical Honor Society

Alpha Epsilon Delta Zeta Premedical Honor Society is a national student support group, providing professional school tours, educational programs, and lectures on health topics and the professional school admissions process to students interested in such health-related fields as medicine, dentistry, optometry, and veterinary medicine. Active membership is awarded to students who have completed at least three semesters with a minimum scholastic GPA of 3.00. Associate membership is also available.

Predental Society

Mason students who are interested in pursuing careers in dentistry are encouraged to participate in the Predental Society. This student organization organizes supplemental programming focused toward dentistry as a career.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor's degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

Undergraduate Degree

Biology, BA

Banner Code: SC-BA-BIOL

his program of study is offered by the College of Science.

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in biology must complete additional college requirements for the BA degree in COS. Students must also complete the following credits with a minimum GPA of 2.00 in the 32 credits of BIOL courses and a minimum GPA of 2.00 in the supporting courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 32 credits of required BIOL courses. Biology majors must earn a minimum grade of C in all biology core courses listed below. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.) BIOL 307 fulfills the writing intensive requirement.

Degree Requirements
24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4

8 credits of biology electives:

- 8 credits of additional biology courses

8 credits of chemistry:

either the sequence

- CHEM 103 - Chemical Science in a Modern Society Credits: 4
- CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4

or

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

7-8 credits in math or statistics chosen from the following:

- BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3
  - MATH 111 - Linear Mathematical Modeling Credits: 3
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

6 credits chosen from:
- ASTR 103 - Astronomy Credits: 3
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3

Note:

Students expecting to enter graduate or professional school are strongly urged to complete MATH 113 and 114. Organic chemistry and PHYS 243, 244, 245, and 246 are recommended.

Concentrations

Students may choose to complete the requirements of the Education with Licensure concentration described below. Or, they may take biology elective courses of their choice to complete the requirement of 32 credits of biology. Students who choose to complete the concentration must complete their course work with a minimum GPA of 2.00 in the BIOL courses presented for the major and a minimum GPA of 2.00 in the supporting requirements presented for the major. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the 32 credits of required BIOL courses. Biology majors in any concentration must earn a minimum of C in all biology core courses listed below.

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary schools within 120 credits. Students must fulfill all requirements for a bachelor's degree. In addition to satisfying the university-wide general education requirements and the requirements for a BA degree in COS, students majoring in biology with a concentration in education with licensure must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4

6 credits of physiology and evolution courses:
• BIOL 425 - Human Physiology Credits: 3
• BIOL 471 - Evolution Credits: 3

2 credits of biology electives:

• 2 credits of additional biology courses

8 credits of chemistry:

either the sequence
• CHEM 103 - Chemical Science in a Modern Society Credits: 4
• CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
or
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4

7-8 credits in math or statistics chosen from the following:

• BIOL 312 - Biostatistics Credits: 4
and one of the following:
• MATH 108 - Introductory Calculus with Business Applications Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

6-7 credits chosen from:

• ASTR 103 - Astronomy Credits: 3
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
• PHYS 243 - College Physics Credits: 3
• PHYS 245 - College Physics Credits: 3

Teacher Licensure Requirement (21 credits):

• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
  Note: EDCI 490 fulfills the University General Education Synthesis Requirement
  Note: EDUC 372 fulfills the University General Education Social & Behavioral Science Requirement

Biology, BS

Banner Code: SC-BS-BIOL

his program of study is offered by the College of Science.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete their biology coursework and the supporting requirements with a minimum GPA of 2.00. In addition, biology majors must earn a minimum grade of C in all biology core courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the required BIOL courses. Several optional concentrations are available. (Through the course work below, biology majors satisfy the university-wide requirements in natural science, quantitative reasoning, and information technology proficiency.) BIOL 307 meets the writing intensive requirement for this major.

Degree Requirements

Students who do not select an optional concentration complete the curriculum requirements listed below.

24 credits of biology core courses:

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 303 - Animal Biology Credits: 4
• BIOL 304 - Plant Biology Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 307 - Ecology Credits: 4
• BIOL 311 - General Genetics Credits: 4

20 credits of biology electives:
20 credits of additional biology courses

13 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.

- One chemistry course at the 300 or 400 level (not CHEM 314)
  or

- CHEM 314 - Organic Chemistry Credits: 3
  and
- CHEM 318 - Organic Chemistry Lab II Credits: 2
  or

- GEOL 101 - Introductory Geology I Credits: 4
  and
- GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

7-8 credits of math chosen from:

- BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3
  - MATH 111 - Linear Mathematical Modeling Credits: 3
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:
Note:

Students who wish to take biochemistry must take BIOL 483 to receive credit toward the major in biology.

Concentrations

Students may choose to complete the requirements of one of the concentrations described below. Students who choose to undertake a concentration must complete their biology course work and the supporting requirements with a minimum GPA of 2.00. In addition, biology majors in a concentration must earn a minimum grade of C in all biology core courses listed below. No more than 8 credits of 100-level BIOL courses (103, 104, 124, 125) may be applied toward the required BIOL courses.

▲ Concentration in Biology Education (with Licensure) (BIED)

The education concentration consists of a selection of courses that provide essential skills to students who wish to pursue a career teaching high school biology. The concentration allows students to receive a license to teach biology in Virginia secondary schools within 120 credits.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in education with licensure must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4

6 credits of physiology and evolution courses:

- BIOL 425 - Human Physiology Credits: 3
- BIOL 471 - Evolution Credits: 3

8 credits of biology electives:
• 8 credits of additional biology courses

13 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

• One chemistry course at the 300 or 400 level (not CHEM 314)
  or
• CHEM 314 - Organic Chemistry Credits: 3
  and
• CHEM 318 - Organic Chemistry Lab II Credits: 2
  or
• GEOL 101 - Introductory Geology I Credits: 4
  and
• GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

At least 6 credits chosen from:

• MATH 110 - Introductory Probability Credits: 3
• MATH 111 - Linear Mathematical Modeling Credits: 3
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• BIOL 312 - Biostatistics Credits: 4

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3
Teacher Licensure Requirement (21 credits):

- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
  
  Note: EDCI 490 fulfills the University General Education Synthesis Requirement
  
  Note: EDUC 372 fulfills the University General Education Social & Behavioral Science Requirement

▲ Concentration in Biotechnology (BT)

The biotechnology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in biotechnology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4

7 credits of biotechnology courses:

- BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
- BIOL 483 - General Biochemistry Credits: 4

13 credits of biology electives chosen from:
• BIOL 312 - Biostatistics Credits: 4
• BIOL 322 - Developmental Biology Credits: 4
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1 *
• BIOL 405 - Microbial Genetics Credits: 4
• BIOL 406 - Microbial Physiology and Metabolism Credits: 4
• BIOL 417 - Selected Topics in Molecular and Cellular Biology Credits: 1-4 **
• BIOL 418 - Current Topics in Microbiology Credits: 3 **
• BIOL 420 - Vaccines Credits: 3
• BIOL 421 - Genetics of Human Diseases Credits: 3
• BIOL 422 - Stem Cell Biology and Regenerative Medicine Credits: 3
• BIOL 425 - Human Physiology Credits: 3
• BIOL 452 - Immunology Credits: 3
• BIOL 453 - Immunology Laboratory Credits: 1 *
• BIOL 465 - Histology Credits: 4
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 484 - Eukaryotic Cell Biology Credits: 3
• BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2
• BIOL 497 - Special Problems in Biology Credits: 1-4 **
• BIOL 506 - Selected Topics in Microbiology Credits: 1-4 **
• BIOL 553 - Advanced Topics in Immunology Credits: 3
• BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism Credits: 3
• BIOL 563 - Virology Credits: 3
• BIOL 566 - Cancer Genomics Credits: 3
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 572 - Human Genetics Credits: 3
• BIOL 575 - Selected Topics in Genetics Credits: 1-4 **
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3

Notes:

*Laboratories associated with BIOL 403 and BIOL 453 are required.

**Registration for BIOL 417, 418, 497 or 575 subject to approval by program coordinator.

18 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2
8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

7-8 credits of math:

- BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  - MATH 108 - Introductory Calculus with Business Applications Credits: 3
  - MATH 111 - Linear Mathematical Modeling Credits: 3
  - MATH 113 - Analytic Geometry and Calculus I Credits: 4
  - MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:

- IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology, and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students seeking the concentration in environmental and conservation biology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 307 - Ecology Credits: 4
• BIOL 311 - General Genetics Credits: 4

9 credits of conservation courses:

• BIOL 318 - Conservation Biology Credits: 3
• BIOL 377 - Applied Ecology Credits: 3
• BIOL 471 - Evolution Credits: 3

4 credits of field work:

• BIOL 345 - Plant Ecology Credits: 4
or
• EVPP 350 - Freshwater Ecosystems Credits: 4

7 credits of biology electives chosen from:

• BIOL 309 - Introduction to Oceanography Credits: 3
• BIOL 326 - Animal Physiology Credits: 3
• BIOL 331 - Invertebrate Zoology Credits: 4
• BIOL 332 - Insect Biology Credits: 4
• BIOL 333 - Vertebrate Zoology Credits: 4
• BIOL 344 - Plant Diversity and Evolution Credits: 4
• BIOL 345 - Plant Ecology Credits: 4 *
• BIOL 440 - Field Biology Credits: 1-4
• BIOL 472 - Introductory Animal Behavior Credits: 3
• BIOL 449 - Marine Ecology Credits: 3
• EVPP 350 - Freshwater Ecosystems Credits: 4 *
• EVPP 451 - Fungi and Ecosystems Credits: 3

Note:

*If not used for field course requirement.

13 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2

One of the following options (3-8 credits):

• One chemistry course at the 300 or 400 level (not CHEM 314)
  or
• CHEM 314 - Organic Chemistry Credits: 3
  and
• CHEM 318 - Organic Chemistry Lab II Credits: 2
  or
• GEOL 101 - Introductory Geology I Credits: 4
  and
• GEOL 102 - Introductory Geology II Credits: 4

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

7-8 credits of math:

• BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  • MATH 108 - Introductory Calculus with Business Applications Credits: 3
  • MATH 111 - Linear Mathematical Modeling Credits: 3
  • MATH 113 - Analytic Geometry and Calculus I Credits: 4
  • MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Marine and Freshwater Biology (MFWB)
This concentration is offered to students seeking a biology degree that focuses on the biology of organisms in marine and freshwater environments.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 311 - General Genetics Credits: 4

13 credits of marine and freshwater courses:

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 350 - Freshwater Ecosystems Credits: 4
- BIOL 449 - Marine Ecology Credits: 3
- EVPP 421 - Marine Conservation Credits: 3

7 credits of biology electives chosen from:

- BIOL 331 - Invertebrate Zoology Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 472 - Introductory Animal Behavior Credits: 3
- BIOL 473 - Introductory Laboratory in Animal Behavior Credits: 1
- BIOL 536 - Ichthyology Credits: 4
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- NCLC 318 - Exploring Virginia's Watersheds Credits: 4

29 credits of physical sciences:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2  
• GEOL 101 - Introductory Geology I Credits: 4  
• GEOL 102 - Introductory Geology II Credits: 4  
• PHYS 243 - College Physics Credits: 3  
• PHYS 244 - College Physics Lab Credits: 1  
• PHYS 245 - College Physics Credits: 3  
• PHYS 246 - College Physics Lab Credits: 1  

7-8 credits of math:

• BIOL 312 - Biostatistics Credits: 4  
  and one of the following:  
• MATH 108 - Introductory Calculus with Business Applications Credits: 3  
• MATH 111 - Linear Mathematical Modeling Credits: 3  
• MATH 113 - Analytic Geometry and Calculus I Credits: 4  
• MATH 114 - Analytic Geometry and Calculus II Credits: 4  

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3  

Note:

PHED 255 is strongly recommended but not required.

▲ Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students seeking the concentration in microbiology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

• BIOL 213 - Cell Structure and Function Credits: 4  
• BIOL 303 - Animal Biology Credits: 4  
• BIOL 304 - Plant Biology Credits: 4  

George Mason University 2010-2011 Official University Catalog 1176
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 307 - Ecology Credits: 4
• BIOL 311 - General Genetics Credits: 4

12 credits of microbiology courses:

• BIOL 405 - Microbial Genetics Credits: 4
• BIOL 406 - Microbial Physiology and Metabolism Credits: 4
• BIOL 407 - Microbial Diversity Credits: 4

8 credits of biology electives chosen from:

• BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
• BIOL 404 - Medical Microbiology Credits: 3
• BIOL 418 - Current Topics in Microbiology Credits: 3
• BIOL 452 - Immunology Credits: 3
• BIOL 453 - Immunology Laboratory Credits: 1
• BIOL 459 - Fungi and Ecosystems Credits: 3
• BIOL 483 - General Biochemistry Credits: 4
• BIOL 506 - Selected Topics in Microbiology Credits: 1-4
• BIOL 563 - Virology Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3

18 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

7-8 credits of math:

• BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  • MATH 108 - Introductory Calculus with Business Applications Credits: 3
  • MATH 111 - Linear Mathematical Modeling Credits: 3
  • MATH 113 - Analytic Geometry and Calculus I Credits: 4
  • MATH 114 - Analytic Geometry and Calculus II Credits: 4

3 credits of computer science:

• IT 103 - Introduction to Computing Credits: 3

▲ Concentration in Molecular Biology (MOB)

The molecular biology concentration provides basic knowledge of the structure of macromolecules, and chemical processes that occur in living cells. The concentration prepares students for employment or further advanced study in molecular biology.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in biology with a concentration in molecular biology must complete the following. (Through the course work below, they satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.)

24 credits of biology core courses:

• BIOL 213 - Cell Structure and Function Credits: 4
• BIOL 303 - Animal Biology Credits: 4
• BIOL 304 - Plant Biology Credits: 4
• BIOL 305 - Biology of Microorganisms Credits: 3
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• BIOL 307 - Ecology Credits: 4
• BIOL 311 - General Genetics Credits: 4

12 credits of molecular biology courses:
• BIOL 385 - Biotechnology and Genetic Engineering Credits: 3
• BIOL 482 - Introduction to Molecular Genetics Credits: 3
• BIOL 483 - General Biochemistry Credits: 4
• BIOL 486 - Molecular Biology and Biotechnology Laboratory Credits: 2

8 credits of biology electives chosen from:

• BIOL 322 - Developmental Biology Credits: 4
• BIOL 402 - Applied and Industrial Microbiology Credits: 3
• BIOL 403 - Techniques in Applied and Industrial Microbiology Credits: 1
• BIOL 452 - Immunology Credits: 3
• BIOL 453 - Immunology Laboratory Credits: 1
• BIOL 563 - Virology Credits: 3
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 575 - Selected Topics in Genetics Credits: 1-4
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3

18 credits of chemistry:

• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2

8 credits of physics:

• PHYS 243 - College Physics Credits: 3
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
• PHYS 246 - College Physics Lab Credits: 1

7-8 credits of math:

• BIOL 312 - Biostatistics Credits: 4
  and one of the following:
  • MATH 108 - Introductory Calculus with Business Applications Credits: 3
  • MATH 111 - Linear Mathematical Modeling Credits: 3
Medical Technology, BS

Banner Code: SC-BS-MTCH

his program of study is offered by the College of Science.

This program requires the equivalent of three years of full time preprofessional study at the college level preceding a senior year of professional education in an affiliated school of medical technology. All affiliated schools are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Responsibility for applying to schools of medical technology and gaining admission rests with the student; however, guidance is provided by the medical technology program director. Admission to medical technology schools is selective, so candidates should strive for strong academic standing. Students who fail to gain admission to a NAACLS-approved school are unable to complete the degree program. Such students may transfer to a biology major without loss of credits.

Application to medical technology schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the preprofessional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical technology majors and prospective majors are urged to enroll in MTCH 200 as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies. Transfer students must present at least 16 credits of 300- to 400-level biology or chemistry course work taken at Mason. Students may present no more than 6 credits of D grades in biology and chemistry courses required in the three years of preprofessional study. No unsatisfactory grades may be presented for courses in the senior year of professional study. Transfer students entering with more than 45 transfer credits are often unable to complete the preprofessional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the medical technology program director.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements*. In addition, candidates must complete MTCH 200 and present the following courses in their preprofessional programs with a minimum GPA of 2.00. (Through the course work below, majors satisfy the university-wide general education requirements in natural science, quantitative reasoning, and information technology proficiency.) Taking BIOL 453 fulfills the writing intensive requirement.

*Note: Because of the extensive professional education requirements stipulated by NAACLS, students majoring in medical technology are exempt from the university-wide general education requirement in the fine arts.

Degree Requirements
Biology:

Minimum 20 credits, including:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4
- BIOL 452 - Immunology Credits: 3
- BIOL 453 - Immunology Laboratory Credits: 1

Chemistry:

Minimum 18 credits, including:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2

Mathematics:

Minimum 6 credits; MATH 110, 111, 113, 114 or BIOL 312 recommended, MATH 106 not applicable.

Computer skills:

- IT 103 - Introduction to Computing Credits: 3

Professional Study:

30 credits of professional study during the senior year are awarded for clinical education at an affiliated school of medical technology. The distribution of credits in these courses varies with the school of medical technology. No more than 30 professional credits may be applied toward the degree.

Courses that may be awarded for the clinical year include:

- MTCH 401 - Orientation to the Problems and Practices of the Clinical Laboratory Credits: 1-2
- MTCH 402 - Clinical Hematology and Coagulation Credits: 1-8
- MTCH 403 - Clinical Microscopy Credits: 1-3
- MTCH 404 - Serology and Immunohematology Credits: 1-7
- MTCH 405 - Clinical Microbiology Credits: 1-8
Notes:

Students are encouraged to elect additional basic science courses during their preprofessional years. Recommended courses are BIOL 465, 483, 484, and 485; CHEM 321; and PHYS 243, 244, 245, and 246.

Undergraduate Minor

Biology Minor

Banner Code: BIOL

This program of study is offered by the College of Science.

Course Work

Candidates for the minor in biology must complete 19 to 20 credits in biology with a minimum GPA of 2.00, including:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 303 - Animal Biology Credits: 4
- BIOL 304 - Plant Biology Credits: 4
- BIOL 307 - Ecology Credits: 4
  or
- BIOL 311 - General Genetics Credits: 4
- one other 3- to 4-credit biology course at the 300, 400, or 500 level (not BIOL 301).

Note:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 19-20 credits

Bachelor's/Accelerated Master's Program

Biology, BS/Biology, Accelerated MS

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in
microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE and biology subject exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the general test and be in at least the 50th percentile on the subject exam.

This program of study is offered by the College of Science.

■ Chemistry and Biochemistry

Phone: 703-993-1070
Web: chemistry.gmu.edu

Faculty

Professors: Cozzens, Davies, Foster, Hussam, Mose, Mushrush

Associate professors: Born, Honeychuck, Schreifels (Chair), Slayden, Weatherspoon (associate chair)

Term associate professor: Hatton

Assistant professors: Bishop, Cooper, Couch

Term assistant professors: Kort, Pettigrew

Course Work

This department offers all course work designated CHEM in the Courses chapter of this catalog.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336, 337, or 465.

Honors Program in Chemistry

Chemistry majors who have completed prerequisites for CHEM 455 and 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 and 456 with a minimum GPA of 3.50.
**Premedical, Predental, Prepharmacy, and Preveterinary Students**

Web: prehealth.gmu.edu

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required course work and overall preparation.

**Prepharmacy Society**

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Prepharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

**Chemistry Club**

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

**Teacher Licensure**

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**Graduate Degree Programs**

The department offers an MS in chemistry with a research project (thesis option) or an all-course-work program (nonthesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the PhD program in Chemistry and Biochemistry. Students may also pursue Chemistry-related PhD research through the Environmental Science and Policy PhD program and the Bioscience PhD program. An area of emphasis in computational chemistry is available through the PhD in computational sciences and informatics program offered in conjunction with the Department of Computational and Data Sciences.

**Chemistry, Bachelor’s/Accelerated Master’s Degree**

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Chemistry within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s degree after the bachelor’s degree is complete.

**Undergraduate Degree**

**Chemistry, BA**
This program of study is offered by the College of Science.

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. Students majoring in chemistry must complete additional college requirements for the BA degree in COS and the following. (Through the course work below, chemistry majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.) CHEM 336 or 465 fulfill the writing intensive for students in chemistry.

Degree Requirements

37 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- 5 credits of electives in chemistry

11 credits of math:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
PhyS 260 - University Physics II Credits: 3
PhyS 261 - University Physics II Laboratory Credits: 1

▲ Concentration in Biochemistry (BC)

This program is designed for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

In addition to satisfying the university-wide general education requirements and requirements for the BA degree in COS, students majoring in chemistry with a concentration in biochemistry must complete the following. (Through the course work below, majors satisfy the university-wide general education requirements in natural science and quantitative reasoning.)

37 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 465 - Biochemistry Lab Credits: 2

11 credits of math and statistics:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

4 credits of biology:

- BIOL 213 - Cell Structure and Function Credits: 4
Chemistry, BS

Banner Code: SC-BS-CHEM

This program of study is offered by the College of Science.

This program is approved by the American Chemical Society; on completion, students are certified to the society. Students planning professional careers in chemistry should choose this degree.

In addition to satisfying all requirements for bachelor’s degrees including university general education requirements, students majoring in chemistry must complete the following with a minimum GPA of 2.30. (Through the course work below, chemistry majors satisfy the university-wide requirements in natural science and quantitative reasoning. CHEM 336 or CHEM 465 fulfills the writing intensive requirement for students majoring in chemistry.)

Degree Requirements

44 credits of chemistry:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2 or
- CHEM 465 - Biochemistry Lab Credits: 2
- and three credits of chemistry electives

6 credits of in-depth electives chosen from:

- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
• CHEM 458 - Chemical Oceanography Credits: 3
• CHEM 464 - General Biochemistry II Credits: 3
• CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions Credits: 3
• CHEM 468 - Bioorganic Chemistry Credits: 3

1-3 credits from the following:

• CHEM 423 - Instrumental Analysis Laboratory Credits: 2
• CHEM 355 - Undergraduate Research Credits: 1-3
• CHEM 451 - Special Projects in Chemistry Credits: 1 to 3
• CHEM 452 - Special Projects in Chemistry Credits: 1 to 3
• CHEM 455 - Honors Research in Chemistry Credits: 3
• CHEM 456 - Honors Research in Chemistry Credits: 3

11 credits of math:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• MATH 213 - Analytic Geometry and Calculus III Credits: 3

8 credits of physics:

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

▲ Concentration in Analytical and Environmental Chemistry (AEC)

Students planning professional careers in an industry involving chemical measurements, careers with a chemistry emphasis in the environmental science or those seeking graduate study in analytical or environmental chemistry should choose this program. This concentration meets the requirements for certification by the American Chemical Society (ACS).

In addition to satisfying university-wide general education requirements for the BS degree, students majoring in chemistry with a concentration in analytical and environmental chemistry must complete the following with a minimum GPA of 2.30. (Through the coursework below, chemistry majors satisfy the university-wide requirements in natural science and quantitative reasoning.)

55 credits of chemistry
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 332 - Physical Chemistry II Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 337 - Physical Chemistry Lab II Credits: 2
- CHEM 422 - Instrumental Analysis Credits: 3
- CHEM 423 - Instrumental Analysis Laboratory Credits: 2
- CHEM 427 - Aquatic Environmental Chemistry Credits: 3
- CHEM 438 - Atmospheric Chemistry Credits: 3
- CHEM 441 - Properties and Bonding of Inorganic Compounds Credits: 3
  or
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 458 - Chemical Oceanography Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 445 - Inorganic Preparations and Techniques Credits: 2
  or
- CHEM 465 - Biochemistry Lab Credits: 2

8 credits of physics

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

11 credits of math
7-8 credits of supporting science electives from one of three options

Option 1:
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 309 - Introduction to Oceanography Credits: 3

Option 2:
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Option 3:
- CHEM 341 - Fundamental Inorganic Chemistry Credits: 3
  and at least four additional credits chosen from:
- CHEM 355 - Undergraduate Research Credits: 1-3
- CHEM 451 - Special Projects in Chemistry Credits: 1 to 3
- CHEM 452 - Special Projects in Chemistry Credits: 1 to 3
  The discipline sequences may be interchanged only with approval by the program coordinator.

▲ Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the traditional BS in chemistry. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of electives.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in chemistry with a concentration in biochemistry must complete the following courses with a minimum GPA of 2.30. No more than two courses with a grade of D (1.00) may be applied to the major. (Through the course work below, students satisfy the university-wide requirements in natural science and quantitative reasoning.)

39 credits of chemistry courses:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4
- CHEM 464 - General Biochemistry II Credits: 3
- CHEM 465 - Biochemistry Lab Credits: 2

8 credits of math:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

8 credits of biology:

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1

Approved Science Electives

- 9 credits of approved science electives chosen from chemistry or biology courses at 302 or above (Courses from other disciplines may be submitted as electives, subject to approval of the coordinator.)

▲ Concentration in Chemistry Education (CHME)

Those interested in teaching high school chemistry should choose this concentration. This concentration is approved by the American Chemical Society and leads to state licensure to teach in Virginia upon completion of the degree.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students with a concentration in chemistry education must present the following:
38 credits of chemistry courses:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 446 - Bioinorganic Chemistry Credits: 3
- CHEM 463 - General Biochemistry I Credits: 4

- CHEM 336 - Physical Chemistry Lab I Credits: 2
  or
- CHEM 465 - Biochemistry Lab Credits: 2

- CHEM 470 - Laboratory Instructional Methods for Chemistry Credits: 3
- one 3- credit upper-level chemistry elective

11 credits of math:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3

8 credits of physics:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or the alternative sequence
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1

8 credits of other general science:

- GEOL 101 - Introductory Geology I Credits: 4
• BIOL 103 - Introductory Biology I Credits: 4
  or
• BIOL 213 - Cell Structure and Function Credits: 4

Teacher Licensure Requirement (21 credits):

• EDCI 473 - Teaching Science in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3

Notes:

The course work above satisfies university-wide requirements in natural science, information technology, and quantitative reasoning.

During the sophomore year, students should contact the Graduate School of Education to arrange to attend an information session and take the PRAXIS I and II exams.

Bachelor's Level Certificate

Environmental Chemistry Undergraduate Certificate

Banner Code: SC-CERB-EVCH

The department offers an undergraduate certificate program in environmental chemistry. The program consists of 35 credits of course work dealing directly with environmental studies. To receive the certificate, students must hold a baccalaureate degree in any major or be earning one from Mason at the time they receive the certificate.

This program of study is offered by the College of Science.

Certificate Requirements

Substitutions from the following list of required courses are allowed but require permission from the environmental chemistry certificate director:

• BIOL 377 - Applied Ecology Credits: 3
• CHEM 313 - Organic Chemistry Credits: 3
• CHEM 314 - Organic Chemistry Credits: 3
• CHEM 315 - Organic Chemistry Lab I Credits: 2
• CHEM 318 - Organic Chemistry Lab II Credits: 2
• CHEM 321 - Elementary Quantitative Analysis Credits: 4
- CHEM 331 - Physical Chemistry I Credits: 3
  or
- CHEM 333 - Physical Chemistry for the Life Sciences I Credits: 3

- CHEM 505 - Hazardous Materials Waste Management Credits: 1-3
- CHEM 554 - Geochemistry of Environmental Hazards Credits: 3
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- electives (approved by certificate director) to bring the total to 35 credits

Note:
To optimize employment and graduate school opportunities, students are encouraged to take additional courses in natural science, computer science, and environmental law.

Total: 35 credits

Undergraduate Minor

Chemistry Minor

Banner Code: CHEM

The department offers a minor in chemistry. The program requires 16 credits of chemistry at the 300 level or above with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

This program of study is offered by the College of Science.

Total: 16 credits

Bachelor's/Accelerated Master's Program

Chemistry, BS/Chemistry, Accelerated MS

A five-year bachelor’s/accelerated master’s degree program leads to a research-based MS degree following satisfactory completion of 144 credits. It allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees within five academic years plus the summer of the last year. On completion of this program, students will be exceptionally well prepared for entry into a professional school or a PhD program in chemistry or a related discipline. Students can enter this program after completing 90 credits and enroll in graduate courses when they have successfully completed
prerequisites. This flexibility makes it possible for students to complete some of their graduate classes during their junior and senior years. Consult the department for details on the program.

Admitted students are able to use up to 6 graduate credits in partial satisfaction of the requirements for the undergraduate degree. On completion of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and can complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

This program of study is offered by the College of Science.

**Master's Degree**

**Chemistry, MS**

**Banner Code: SC-MS-CHEM**

This program of study is offered by the College of Science.

The MS in chemistry provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry.

**Admission Requirements**

To be considered for admission to degree status, students must have a bachelor’s degree in chemistry, biochemistry, or a related field from an accredited institution and must meet general admission requirements for graduate study. Admission is based on a departmental evaluation of the applicant’s background as evidenced by transcripts and letters of recommendation. Applicants who received a bachelor’s degree more than five years before the application date must submit a résumé.

**Degree Requirements**

To receive an MS in chemistry, students must complete 30 credits of graduate work. The thesis option is designed for students planning to pursue a doctoral degree or a career in the chemical, biochemical, or pharmaceutical industry. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799. Students who select the thesis option complete 6 credits of 799 and present a seminar followed by an oral defense. Students in this option are expected to choose a laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester.

The nonthesis option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students selecting this option are not required to complete a laboratory-based thesis. Instead, they are required to take an additional elective in chemistry (or biochemistry) and complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

CHEM 500 and 501 may not be applied toward the MS degree. CHEM 502 through 510 may be applied toward the MS degree only with prior written approval of the department.

**Chemistry Core Course List**
All students in the Chemistry MS program take 9 credits of chemistry core courses from the following list. The core areas are Analytical, Biochemistry, Environmental, Inorganic, and Organic. The three courses must be selected from three different core areas. Core courses may also be taken as electives beyond the stated credit requirement for each option:

**Analytical**

- CHEM 521 - Theory of Analytical Processes Credits: 3
- CHEM 624 - Principles of Chemical Separation Credits: 3

**Biochemistry**

- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3

**Environmental**

- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3

**Inorganic**

- CHEM 646 - Bioinorganic Chemistry Credits: 3

**Organic**

- CHEM 613 - Modern Polymer Chemistry Credits: 3
- CHEM 614 - Physical Organic Chemistry Credits: 3
- CHEM 617 - Organic Structural Spectroscopy Credits: 3

**Thesis Option, Chemistry**

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the chemical industry. Students must complete the following requirements:

**Chemistry Core Courses (12 credits):**
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- plus 9 credits of additional courses from three different areas in the Chemistry Core Course List (above)

Chemistry Electives (9 credits):
- 3 credits of CHEM designated courses
- 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Seminar/Thesis (9 credits):
- 3 credits of CHEM 790 - Graduate Seminar Credits: 1
- 6 credits of CHEM 799 - Master's Thesis Credits: 1-6

Nonthesis Option, Chemistry

This program is specifically designed for students seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous. Students must complete the following requirements:

Chemistry Core Courses (12 credits):
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- plus 9 credits of additional courses from three different areas in the Chemistry Core Course List (above)

Chemistry Electives (12 credits):
- 6 credits of CHEM designated courses
- 6 credits of courses in chemistry or related fields, approved by the Graduate Committee prior to registration

Teaching/Research (3 credits):
Any combination of CHEM 579 and CHEM 670 may be used to fulfill this requirement. However, CHEM 579 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.
- CHEM 579 - Special Topics Credits: 1-6
- CHEM 670 - Teaching Practicum Credits: 1-2

Seminar (3 credits):
Concentration in Biochemistry (BC)

Thesis Option

This program is specifically designed for students who wish to pursue a doctoral degree or a career in the biochemical or pharmaceutical industry. Students must complete the following requirements:

Chemistry Core Courses (12 credits):

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee

- CHEM 531 - Elements of Physical Chemistry Credits: 3
- or
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- plus 9 credits of additional courses from three different areas in the Chemistry Core Course List (above)

Biochemistry Electives (6 credits):

- 6 credits of electives in biochemistry (see the department for the list of approved courses)

Chemistry Electives (3 credits):

- 3 credits of CHEM designated courses

Seminar/Thesis (9 credits):

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1
- 6 credits of CHEM 799 - Master’s Thesis Credits: 1-6

Nonthesis Option

This program is specifically designed for students seeking to go on to professional school, teach biochemistry in secondary schools, or pursue other careers in which advanced work in biochemistry is necessary or advantageous. Students must complete the following requirements:

Chemistry Core Courses (12 credits):

Students take either CHEM 531 or CHEM 633 as instructed by the Graduate Admissions Committee
CHEM 531 - Elements of Physical Chemistry Credits: 3
or
CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
plus 9 credits of additional courses from three different areas in the Chemistry Core Course List (above)

Biochemistry Electives (9 credits):

- 9 credits of electives in biochemistry (see the department for the list of approved courses)

Chemistry Electives (3 credits):

- 3 credits of CHEM designated courses

Teaching/Research (3 credits):

Any combination of CHEM 579 and CHEM 670 may be used to fulfill this requirement. However, CHEM 579 may be used to fulfill this requirement only with prior written approval of the department and must be used to complete a laboratory- or library-based research project or enhance the student’s teaching skills.

- CHEM 579 - Special Topics Credits: 1-6
- CHEM 670 - Teaching Practicum Credits: 1-2

Seminar (3 credits):

- 3 credits of CHEM 790 - Graduate Seminar Credits: 1

Total: 30 credits

Doctoral Degree

Chemistry and Biochemistry, PhD

Banner Code: SC-PHD-CBCM

This program of study is offered by the College of Science.

The Chemistry and Biochemistry doctoral program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD degree in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, followed by an independent research project under the guidance of a faculty advisor. The
culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal. The program requires 72 total credits of coursework and dissertation.

**Admission Requirements**

The Chemistry and Biochemistry PhD program is intended for students who have completed an undergraduate program of study in chemistry, biochemistry, or a related field. Applicants are expected to have a BS degree with a minimum GPA of 3.00, and acceptable GRE and TOEFL scores (if applicable). Applicants with a BS degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted provisionally, and may be required to successfully complete selected remedial courses, some of which may not be applicable towards PhD requirements. Interested students should submit a completed GMU Graduate Application, three letters of reference, official reports of GRE and TOEFL exam scores, and a personal/goals statement outlining their general research interests and career plans.

**Degree Requirements**

Upon acceptance into the Chemistry and Biochemistry PhD program, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisors who will provide guidance in selecting courses that are consistent with the student’s area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advising to the student.

The program requires 72 total credits of coursework and dissertation. All students in the Chemistry and Biochemistry PhD program take a common core of four courses. By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as Analytical, Biochemistry, Environmental, Inorganic, Organic, or Physical Chemistry, or others according to his or her particular interests. By the end of their first year, all students will pair with a faculty advisor who will guide them toward candidacy. A student may choose up to 30 credits in general elective graduate courses that can be applied towards the degree requirements with the approval of the dissertation advisor and the program director. Core courses not used to satisfy the core requirement can be used as elective credits. Students are also required to take 3 credits of Graduate Seminar (CHEM 790).

By the end of their first year, students in the program are expected to have selected a dissertation/research supervisor and to have formed their dissertation committee. This committee will consist of at least 4 graduate faculty members (including the dissertation supervisor), with at least 2 members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the program director and the associate dean for graduate programs.

**12 Credits of Core Courses:**

- CHEM 814 - Advanced Bioorganic Chemistry Credits: 3
- CHEM 821 - Theory of Analytical Processes Credits: 3
- CHEM 833 - Physical Chemistry and Biochemistry Credits: 3
- CHEM 891 - Doctoral scientific critique, writing and presentation Credits: 3

**9 Credits of Research Emphasis Courses:**

Students are required to select 9 additional chemistry credits (3 courses) in one of the three research emphasis areas listed below. The purpose of the research emphasis courses is to provide the students with an in-depth theoretical foundation in their chosen area of expertise. Research emphasis courses are selected in consultation with the student’s research advisor.
Analytical and Environmental Chemistry

- CHEM 554 - Geochemistry of Environmental Hazards Credits: 3
- CHEM 620 - Modern Instrumentation Credits: 3
- CHEM 624 - Principles of Chemical Separation Credits: 3
- CHEM 625 - Electroanalytical Chemistry Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3

Protein Biochemistry

- CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions Credits: 3
- CHEM 613 - Modern Polymer Chemistry Credits: 3
- CHEM 646 - Bioinorganic Chemistry Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 661 - Antibiotic Chemistry and Resistance Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3
- CHEM 665 - Protein-Protein Interactions: Methods and Applications Credits: 3
- CHEM 735 - Astrophysical Chemistry of Planetary Bodies Credits: 3
- CHEM 767 - Industrial Biochemistry Credits: 3

Physical Chemistry and Spectroscopy

- CHEM 614 - Physical Organic Chemistry Credits: 3
- CHEM 617 - Organic Structural Spectroscopy Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 730 - Statistical Mechanics Credits: 3
- CHEM 732 - Quantum Chemistry Credits: 3
- CHEM 733 - Polymer Physical Chemistry Credits: 3
- CHEM 735 - Astrophysical Chemistry of Planetary Bodies Credits: 3
- CHEM 736 - Computational Quantum Mechanics Credits: 3

3 Credits of Seminar:

Taken 3 times:

- CHEM 790 - Graduate Seminar Credits: 1

24 Credits of Electives:
24 credits of approved elective courses

24 Credits of Research:

Note: No more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

- CHEM 998 - Doctoral Dissertation Proposal Credits: 1-12
- CHEM 999 - Doctoral Dissertation Research Credits: 1-12

Advancement to Candidacy

Students advance to doctoral candidacy by fulfilling the following requirements:

- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- The student must successfully complete separate written and oral candidacy examinations prepared and administered by the dissertation committee.
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy.

Doctoral Dissertation

Based upon the committee’s familiarity with the student’s progress in the research project, the committee will determine whether a candidate is ready to write and defend the dissertation. With the approval of the dissertation committee, the student will enroll in Doctoral Dissertation Proposal (CHEM 998) and Doctoral Dissertation Research (CHEM 999). The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

Total: 72 credits

Physical Sciences, PhD

Banner Code: SC-PHD-PSCI

The interdisciplinary doctoral program in Physical Science is offered jointly by the Department of Physics and Astronomy and the Department of Chemistry and Biochemistry. The goal of the program is to prepare scientists as members of interdisciplinary science teams, primarily involving astronomy, biochemistry, biophysics, chemistry, and physics. The main emphasis is on theoretical, experimental, and/or laboratory research. The program is not intended to produce graduates who are scientific generalists; however, the areas of specialization often cut across traditional disciplines.

The program is built on a foundation of several interdisciplinary courses that expose students to fundamental research problems in modern science and provide them with an introduction to physics, chemistry, biochemistry, biophysics, and astronomy. The program curriculum has been designed to provide enough flexibility to accommodate students seeking a fully interdisciplinary program, as well as those with interests more closely aligned with one specific scientific discipline. Students who seek a program with a heavy emphasis on computational methods may alternatively consider the doctoral program in Computational Sciences.
and Informatics (CSI). The CSI program includes concentrations in computational physics, computational space sciences, and computational astrophysics. See the Computational and Data Sciences section for degree and admission requirements.

This program of study is offered by the College of Science.

**Admission Requirements**

The physical sciences PhD program is intended for students who (1) have completed an undergraduate program of study in one of the physical sciences, (2) have taken math to the level of differential equations, and (3) are computer literate.

Applicants are expected to have a BS degree with minimum GPA of 3.00 and acceptable GRE and TOEFL scores. The undergraduate degree should be in a scientific field, such as physics, chemistry, astronomy, mathematics, or engineering. Applicants with insufficient undergraduate records may be accepted provisionally and required to successfully complete selected remedial courses, some of which may not be applicable to the 48-credit total for the PhD course work requirement.

Interested students should submit a completed Mason graduate application, three letters of recommendation, official reports of GRE and TOEFL scores, and a goals statement reflecting their general research interests and career plans. Mason’s Educational Testing Service code is 5827.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The Physical Sciences PhD program requires 72 credits beyond the baccalaureate degree. All students in the program are required to take 48 credits of course work and 24 credits of dissertation research. For students entering the doctoral program with previous graduate work, the 48 credits of course work may be reduced by a maximum of 30 credits.

Students are encouraged to undertake research under close faculty supervision in a number of potential areas, including the following examples:

- Analysis of complex dynamical systems
- Studies of the role of greenhouse gases in Earth’s atmosphere
- Modeling astrochemical processes in star-forming regions
- Searches for extrasolar planets
- Modeling the production of high-energy gamma rays from cosmic sources
- Analysis and prediction of space weather
- Quantum computation: theory and applications
- Solid state physics, including applications to materials science
- Interaction of organic molecules with solid surfaces

**Science Core (9 credits):**

Note: PSCI 703 is taken three times for a total of 3 credits.

- PSCI 701 - Frontiers of Physical Sciences Credits: 3
- PSCI 702 - Research Methods Credits: 3
- PSCI 703 - Frontiers of Physical Sciences Credits: 1

**Contract Core (15 credits):**
A three-member predissertation faculty committee will be formed by the student as soon as possible after admission. The composition of the student’s committee must be approved by the program director. At this point, the student is expected to have selected a rather broad area of future research interest; typically, the area may not yet be specific enough to define an actual dissertation project. Because students entering the program will have diverse backgrounds and goals and the program is explicitly designed to accommodate students preparing for a range of fields of research, it is not possible to have a completely standardized set of degree requirements.

The student and their committee will decide on a set of at least five courses (15 credits) that will best meet the student’s goals and future research direction. This portion of the program will be set up in the form of a contract between the student and the committee. The contract will include courses that the student should take and books and articles that should be read. Fifteen of the contract credits must be chosen from the following list; however, no more than three classes can be taken in any one area, unless the student obtains special permission from the program director. Furthermore, no more than two classes at the 500 level can be selected.

Astronomy courses:

- ASTR 530 - Astrophysics Credits: 3
- ASTR 766 - Relativity and Cosmology Credits: 3

Biochemistry and biophysics courses:

- CHEM 646 - Bioinorganic Chemistry Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 661 - Antibiotic Chemistry and Resistance Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3
- CHEM 665 - Protein-Protein Interactions: Methods and Applications Credits: 3

Chemistry courses:

- CHEM 617 - Organic Structural Spectroscopy Credits: 3
- CHEM 625 - Electroanalytical Chemistry Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3

Physics courses:

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3

Interdisciplinary courses:

- PHYS 510 - Computational Physics I Credits: 3
Electives (24 credits):

- CHEM 617 - Organic Structural Spectroscopy Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 646 - Bioinorganic Chemistry Credits: 3
- CHEM 660 - Protein Biochemistry Credits: 3
- CHEM 662 - Modern Methods of Drug Discovery Credits: 3
- any other approved graduate level science course

Doctoral Committee and Advancement to Candidacy

By the end of the semester when course work is completed, the student must form a doctoral committee, which will supervise the candidacy exam. The exam includes written and oral components. On passing the candidacy exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy.

Research (24 credits):

Note: no more than 24 combined credits from PSCI 998 and PSCI 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of PSCI 998.

- PSCI 998 - Dissertation Proposal Credits: 1-6
- PSCI 999 - Doctoral Dissertation Credits: 1-12

Doctoral Dissertation

After advancing to doctoral candidacy, the student works on their doctoral dissertation while enrolled in PSCI 999. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Total: 72 credits
Computational and Data Sciences

Faculty

Professors: Becker, Blaisten-Barojas, Carr*, Gentle, Lohner, Papaconstantopoulos (chair), Sauer*, Summers*, Wegman

Associate professors: Borne, Cebral, Klimov*, Sander*, Wallin, C. Yang, R. Yang*, Zhang, Zoltek

Assistant professors: Camelli, Griva, Sheng, Weigel

Research faculty: Bilitza, Dere, Economou, Gomez, Odstrcil, Poland, Sforza, Shabaev, Titarchuk

*Faculty holding primary appointments in other departments.

Course Work

The department offers all course work designated CDS and CSI in the Courses chapter of this catalog.

Undergraduate Degree

Computational and Data Sciences, BS

Banner Code: SC-BS-CDS

This program of study is offered by the College of Science.

The BS degree in computational and data sciences represents a new direction for integrated science at Mason based on the combination of applied mathematics, real-world computer science skills, data acquisition and analysis, and scientific modeling. Graduates of the BS program in computational and data sciences will possess the mathematical, scientific, and computational skills necessary to participate effectively as members of the interdisciplinary scientific simulation and analysis groups that are becoming more and more common in the public and the private sectors, particularly in Northern Virginia. Graduates will also be qualified to pursue graduate education in the sciences. Any student who meets the university’s general eligibility requirements may apply to the BS degree in Computational and Data Sciences Program.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete a total of 18 credits in computational and data sciences core courses, 15 credits in computer science, 23 credits in mathematics, 6 credits in statistics, 21 to 25 credits in a science concentration, and 3 to 9 credits in computational and data sciences electives with a minimum GPA of 2.00. (Through the course-work below, computational and data sciences majors satisfy the university-wide requirements in natural science and quantitative reasoning.) CDS 302 fulfills the university's writing-intensive requirement.

Degree Requirements
Computational and Data Sciences Core (18 credits):

6 courses selected from the following:

- CDS 101 - Introduction to Computational and Data Sciences Credits: 3
- CDS 130 - Computing for Scientists Credits: 3
- CDS 301 - Scientific Information and Data Visualization Credits: 3
- CDS 302 - Scientific Data and Databases Credits: 3
- CDS 401 - Scientific Data Mining Credits: 3
- CDS 410 - Modeling and Simulations I Credits: 3
- CDS 411 - Modeling and Simulations II Credits: 3

Computer Science (15 credits):

- CS 105 - Computer Ethics and Society Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- CS 211 - Object-Oriented Programming Credits: 3
- CS 261 - Introduction to a Second Language Credits: 1
- CS 367 - Computer Systems and Programming Credits: 3
- CS 483 - Analysis of Algorithms Credits: 3

Mathematics (23 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

Statistics (6 credits):

- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3
- STAT 354 - Probability and Statistics for Engineers and Scientists II Credits: 3

Science Concentration (21–25 credits):
21-25 credits of course work in the selected concentration (see below)

Computational and Data Sciences Electives (3–9 credits):

3-9 credits of CDS elective courses

Concentrations

In meeting the above requirements, students choose a concentration in physics, chemistry, or biology. The courses required for each concentration are listed below. Students should plan a program of study in consultation with their advisor as appropriate for their selected concentration.

▲ Concentration in Biology (BIOL)

This concentration is appropriate for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of biological processes and systems. To complete this concentration, students should take the following courses:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
- BIOL 311 - General Genetics Credits: 4

Total: 25 credits

▲ Concentration in Chemistry (CHEM)

This concentration is intended for students who wish to pursue a career or graduate education that applies computers to the simulation of chemical processes and systems. To complete this concentration, students should take the following courses:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

plus either:

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
  or
- CHEM 331 - Physical Chemistry I Credits: 3
- CHEM 336 - Physical Chemistry Lab I Credits: 2

Total: 21 credits

▲ Concentration in Physics (PHYS)

This concentration is designed for students who wish to pursue a career or graduate education that applies computational techniques to the simulation of physical problems. To complete this concentration, students should take the following courses:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

and three of:

- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 328 - Introduction to Astrophysics Credits: 3

Total: 21 credits

Undergraduate Minor

Computational and Data Sciences Minor

Banner Code: CDS

The minor in computational and data sciences (CDS) provides an attractive option for students majoring in mathematics, science, or engineering who wish to augment their major degree program with additional courses in scientific computing. The combination of computer science, numerical methods, science, and synthesis courses in computational and data sciences will significantly enhance the practical knowledge and computational skills of the students when compared with the major field alone.
By absorbing the material in this curriculum, students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their Mason education in a practical way in industrial, government, and academic settings.

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in computational and data sciences consists of 18 credits of course work.

This program of study is offered by the College of Science.

Course Work

- CS 211 - Object-Oriented Programming Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3

9 credits—from:

- Any CDS or CSI courses

3 credits—from:

- Classes in physics, chemistry, biology, bioinformatics, environmental science and policy, geography, geology, astronomy, or statistics at the 300 level or above. Other discipline-based courses may be permitted with permission of the undergraduate program director.

Note:

Many of the courses listed above have additional prerequisites. Nonetheless, the CDS minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science, since these students will generally have the prerequisites for the classes listed above.

Total: 18 credits

Master's Degree

Computational Science, MS

Banner Code: SC-MS-COMP

This program of study is offered by the College of Science.
The master’s program in computational science addresses the growing national and regional demand for trained computational scientists. It combines a solid foundation in information technology skills with computational courses in a variety of scientific areas. All courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside the university.

The 30 credit hour curriculum is centered on a strong computational component, comprising 9 credits of core courses, with the remaining 21 credits taken in a broad range of scientific areas chosen from the various concentrations in the CSI PhD curriculum. This provides students with a flexible set of options that can be used to create their own customized curriculum under the guidance of a faculty advisor. Students are encouraged to undertake an optional master’s thesis or research project that allows them to gain useful experience in the development of simulations and other aspects of computational science.

Admission Requirements

Applicants should have academic backgrounds in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all international applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

Three courses from the computational core (9 credits):

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

Computational electives (15 credits):

- 15 credits of CSI courses not including CSI 796, 798, 799, and 996.

Scientific electives (6 credits):

- Two 3-credit courses approved by the student's advisor.
- Students can apply 6 credits of CSI 799 (master's thesis) or 3 credits of CSI 798 (research project) towards the elective requirement.

Total: 30 credits
Master's Level Certificate

Computational Techniques and Applications Graduate Certificate

Banner Code: SC-CERG-CTA

This program of study is offered by the College of Science.

This certificate program focuses on mastering a variety of basic computational skills. The certificate is independent of the doctoral and master’s programs and is designed primarily for professionals in technical fields who seek to upgrade their computer expertise. This program is also available as an option for prospective or currently enrolled doctoral or master’s degree students.

Admission Requirements

Applicants should have an academic background in physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Program Requirements

The program comprises 15 credits of course work designed to provide an accelerated introduction to concepts in modern computation. Topics include operating systems, environments, languages, graphics, databases, and applications. Special course schedules may be designed depending upon the background and qualifications of the student. Waived credits are to be replaced with applications courses approved by the director of the certificate program.

Certificate Requirements

The required courses may be selected as follows:

6 credits from:

- CSI 601-607

6 credits from:

- CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
- CSI 610 - Introduction to Computational Sciences Credits: 3
- CSI 700 - Numerical Methods Credits: 3

Elective (3 credits):
• one CSI elective

Total: 15 credits

Doctoral Degree

Computational Sciences and Informatics, PhD

Banner Code: SC-PHD-CSI

Founded in 1992, the Computational Sciences and Informatics (CSI) doctoral program addresses the role of computation in science, mathematics, and engineering, and is designed around a core of advanced computer technology courses. Computational sciences is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach often leads to understanding that, in many cases, traditional theory or experimentation alone cannot provide. The close relationship of the CSI doctoral program to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening. The research and teaching activities associated with the CSI program reflect the recognized role of computation as part of a triad with theory and experimentation, leading to a better understanding of nature.

This program of study is offered by the College of Science.

Areas of Emphasis within the PhD Program

Research opportunities leading to the doctoral degree are available in each of the following areas of emphasis:

- Computational Fluid Dynamics
- Computational Materials and Chemical Sciences
- Space Sciences and Computational Astrophysics
- Computational Mathematics
- Computational Physics
- Computational Statistics
- Computational Learning
- Quantum Information Science
- Computational Remote Sensing

Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with computational neuroscience, climate dynamics, bioinformatics, and remote sensing, which are now separate PhD programs.

CDS offers several weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. Doctoral students are encouraged to participate in national and international meetings where they can present their latest findings.

Program of Study
The list of research areas tells only part of the story because the greatest strength of the CSI doctoral program lies in its ability to foster and promote truly interdisciplinary research that crosses traditional domain boundaries. In the CSI doctoral program, each student is presented with an exciting opportunity to create a new area of interdisciplinary inquiry that would not fit into a traditional PhD program. Students in the CSI doctoral program use computationally intensive methods to solve current problems in these scientific areas.

The 72-credit doctoral program combines three intellectual elements:

- Core computational science topics
- Computational intensive courses in specific scientific areas
- Research leading to the dissertation

The doctoral program, designed to be completed in 4 to 5 years, includes

- 12 credits of core computational courses (scientific computing, databases, visualization)
- 15 credits from courses in one of the science areas
- 18 credits in electives from science courses, with at least 9 credits of CSI courses
- 3 credits in colloquium/seminar
- 24 credits in dissertation research

### Admission Requirements

Students interested in applying for admission into the CSI PhD program should have a bachelor’s degree in any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. All applicants to the PhD program should have a mathematics background up to and including differential equations. All applicants to the PhD program should also have knowledge of a computer programming language such as C, C++, FORTRAN, etc.

The GRE is required, unless the applicant holds a master’s degree from a school in the United States. A TOEFL score of 575 (paper-based exam) or 230 (computer-based exam) is required for international students. The ETS code for GMU is 5827.

Students should submit a completed graduate application along with three letters of recommendation, an expanded goals statement, and a $60 check to cover the application fee (payable to George Mason University) in addition to the items listed above.

Applications should be received by March 1 for fall semester and November 1 for spring semester. Applications requesting financial support must be received by February 1 for the fall semester. Please note that applications from local applicants may be accepted after these general deadlines.

Please send completed applications to the address below:

COS Graduate Applications Processing Center
George Mason University
4400 University Drive, MS 6A3
Fairfax, VA 22030

For additional information, phone 703-993-8402; fax 703-993-9300, or e-mail: kborne@gmu.edu.

### Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

### General Core Courses (12 credits):

...
Select from the following:

- CSI 700 - Numerical Methods Credits: 3
- CSI 701 - Foundations of Computational Science Credits: 3
- CSI 702 - High-Performance Computing Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3

Emphasis Requirements (15 credits):

Choose one of the following areas:

**Computational Fluid Dynamics**

- CSI 720 - Fluid Mechanics Credits: 3
- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 722 - Computational Fluid Dynamics II Credits: 3
- CSI 742 - The Mathematics of the Finite Element Method Credits: 3

plus one from:

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 729 - Topics in Continuum Systems Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3

**Computational Materials and Chemical Sciences**

- CSI 685 - Fundamentals of Materials Science Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- CSI 787 - Computational Materials Science Credits: 3

plus one from:

- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 789 - Topics in Computational Physics Credits: 3
- CSI 885 - Atomistic Modeling of Materials Credits: 3
Space Sciences and Computational Astrophysics

- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

plus two from:

- CSI 661 - Astrophysics Credits: 3
- CSI 662 - Introduction to Space Weather Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
- PHYS 684 - Quantum Mechanics I Credits: 3

plus one from:

- CSI 721 - Computational Fluid Dynamics I Credits: 3
- CSI 761 - N-Body Methods and Particle Simulations Credits: 3
- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 788 - Simulation of Large-Scale Physical Systems Credits: 3

Computational Mathematics

- CSI 742 - The Mathematics of the Finite Element Method Credits: 3
- CSI 747 - Nonlinear Optimization and Applications Credits: 3

plus three from:

- CSI 740 - Numerical Linear Algebra Credits: 3
- CSI 746 - Wavelet Theory Credits: 3
- CSI 772 - Statistical Learning Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
- MATH 678 - Partial Differential Equations Credits: 3

Computational Physics

- CSI 780 - Computational Physics and Applications Credits: 3
- CSI 783 - Computational Quantum Mechanics Credits: 3
plus three from:

- CSI 782 - Statistical Mechanics for Modeling and Simulation Credits: 3
- CSI 786 - Molecular Dynamics Modeling Credits: 3
- CSI 787 - Computational Materials Science Credits: 3
- PHYS 513 - Applied Electromagnetic Theory Credits: 3
- PHYS 684 - Quantum Mechanics I Credits: 3

**Computational Statistics**

- CSI 771 - Computational Statistics Credits: 3
  or
- CSI 773 - Statistical Graphics and Data Exploration Credits: 3

- CSI 876 - Measure and Linear Spaces Credits: 3
  or
- CSI 877 - Geometric Methods in Statistics Credits: 3

- CSI 972 - Mathematical Statistics I Credits: 3
- CSI 973 - Mathematical Statistics II Credits: 3
- one additional approved course

**Computational Learning**

- CSI 771 - Computational Statistics Credits: 3
- CSI 772 - Statistical Learning Credits: 3
- CSI 773 - Statistical Graphics and Data Exploration Credits: 3
- CSI 777 - Principles of Knowledge Mining Credits: 3
- CSI 873 - Computational Learning and Discovery Credits: 3

**Quantum Information Science**

- CSI 615 - Quantum Computation Credits: 3
- CSI 715 - Quantum Complexity Theory Credits: 3
- CSI 716 - Quantum Information Theory Credits: 3

- CSI 717 - Quantum Computer Programming Credits: 3
  or
- CSI 718 - Quantum Computer Realization Credits: 3

- CSI 783 - Computational Quantum Mechanics Credits: 3
  or
- PHYS 684 - Quantum Mechanics I Credits: 3
Computational Remote Sensing

- CSI 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing Credits: 3
- CSI 854 - Hyperspectral Imaging Applications Credits: 3
- plus 2 additional approved courses

Electives (18 credits):

18 credits, with at least 9 credits of CSI courses.

Colloquium/Seminar (3 credits):

3 credits from CSI 898, CSI 899, or CSI 991 (courses may be repeated).

- CSI 898 - Research Colloquium in Computational Sciences and Informatics Credits: 1
- CSI 899 - Colloquium in Computational Sciences and Informatics Credits: 1
- CSI 991 - Seminar in Scientific Computing Credits: 1

Research (24 credits):

Note: No more than 24 combined credits from CSI 998 and CSI 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CSI 998.

- CSI 998 - Doctoral Dissertation Proposal Credits: 1-12
- CSI 999 - Doctoral Dissertation Credits: 1-12

Advancement to Candidacy

Students advance to doctoral candidacy by fulfilling the following requirements:

- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- The student must successfully complete separate written, computational, and oral candidacy examinations prepared and administered by the dissertation committee.
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy.

Doctoral Dissertation

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in CSI 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is
expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.

Total: 72 credits

Interdisciplinary Studies

Students may also pursue interdisciplinary research that combines the areas of emphasis listed above with each other and also with Earth systems and geoinformation sciences, computational chemistry, climate dynamics, and bioinformatics, several of which are autonomous PhD programs within COS.

Academic Common Market

The CSI PhD degree has been approved for access by residents of Maryland through the Academic Common Market (ACM). The ACM allows full-time students who are certified residents of Maryland to enroll in the CSI PhD program while paying the Virginia in-state tuition rate, which is about one-third of the out-of-state tuition rate that residents of Maryland would otherwise have to pay. Details regarding Maryland’s participation in the ACM may be found at [www.mhec.state.md.us/index.asp](http://www.mhec.state.md.us/index.asp). The ACM program code for the CSI Doctoral Program is 300801. Interested students should contact the Office of the Registrar, Certifications Services, at 703-993-2448.

Environmental Science and Policy

Phone: 703-993-1043

Faculty

**Professors:** Jones, Lawrey, Lovejoy, Rockwood  
**Term professor:** Talbot  
**Associate professors:** Ahn, Balint, Birchard, Darnall, Gillevet, Jonas (Chair), Macfarlane, Torzilli  
**Assistant professors:** Crate, Edwards, Forkner, Manca, Weeks  
**Term associate professors:** Parsons, Sklarew  
**Term assistant professors:** Largen, Peters  
**Research associate professor:** Litchfield  
**Emeritus professors:** Bradley, Ernst, Kelso, Shaffer, Skog

Other Environmental Program Faculty

**Professors:** Black, Chandhoke, Conlan, Diecchio, Foster, Gifford, Haack, Houck, Mose, Mushrush, Nadeau, Regan, Rowan, Sage, Schum, Wan, Willett, Wong
**Course Work**

This department offers all course work designated EVPP and numerous BIOL courses, listed in the Courses chapter of this catalog.

**Other Undergraduate Programs**

In addition to its own undergraduate programs, the Environmental Science and Policy department also works closely with and provides administrative input to other undergraduate programs.

In concert with the Biology Undergraduate Program, through which the BA and BS degrees in biology are offered, Environmental Science and Policy administers the environmental and conservation biology and the marine and freshwater biology concentrations.

The Concentration in Environmental and Conservation Biology (ESCB) within the BS in Biology is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology.

The Concentration in Marine and Freshwater Biology within the BS in Biology is offered to students seeking a biology degree that focuses on marine and freshwater biology and prepares them for graduate work or employment in aquatic, marine and fisheries fields.

Refer to the Biology Undergraduate Program section for more information on Biology, BS program and these two concentrations.

Environmental Science and Policy and the department of Geography and Geoinformation Sciences cooperatively offer the BS in Global and Environmental Change. This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from the other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth's systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. Refer to the GGS section for more information on the Global and Environmental Change, BS program.

The Concentration in Environmental Science (EVSC) within the BS in Earth Science degree program is offered by Environmental Science and Policy jointly with the Department of Atmospheric, Oceanic and Earth Sciences. It is intended for students interested in studying the earth and its environment. Refer to the AOES section for more information on the Earth Science, BS degree program and this concentration.

The Environmental Science and Policy department also offers (jointly with the College of Humanities and Social Sciences) the BA in Environmental and Sustainability Studies, which focuses on the theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students obtain
additional in-depth knowledge in their selected concentration area. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability. Students should consult the full set of program requirements by viewing the complete description for the BA in Environmental and Sustainability Studies. The Environmental Science and Policy department administers the following two concentrations:

- The Concentration in Climate Change and Society focuses on the relationship between human action and climate evolution. Topics include global warming, pollution, and societal trends.
- The Concentration in Environmental Policy and Politics focuses on the role of policy formulation in the management of the global ecosystem. Topics include resource management and sustainability.

Other Graduate Programs

In addition to its own graduate programs, the Environmental Science and Policy department also participates in the MS in Earth Systems Science administered primarily through the Department of Geography and Geoinformation Science (GGS). Please see the GGS listing for program requirements.

The Environmental Science and Policy department also offers (jointly with the Institute for Conflict Analysis and Resolution) the Graduate Certificate in Environmental Conflict Resolution and Collaboration, which focuses on a systems approach to environmental conflict and how to understand its legal, regulatory, and ecological implications. Coursework addresses the strategic thinking that is required for assessing and designing appropriate environmental conflict resolution processes, as well as understanding the public interest and the intertwined questions of social justice and sustainability that make environmental conflict particularly important and challenging.

Undergraduate Degree

Environmental Science, BS (pending SCHEV approval)

Banner Code: SC-BS-EVSC

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The BS in environmental science provides students with rigorous training in the fundamental science of the environment, and the application of the key scientific principles to the analysis of environmental processes and problems and to the development of practical responses to those problems. The program covers the fundamental techniques of environmental science and engineering, protection and improvement of environmental quality, environmental policy, risk assessment and risk management, and public and private decision-making processes. Graduates of the program are prepared to undertake careers in a variety of environmental science fields, and are also qualified to pursue advanced scientific/professional education.

Students select a concentration in ecological science (ES), aquatic ecology (AE), environmental health (EH), human and ecosystem response to climate change (HERCC), or conservation (CSER). (Through the course work below, environmental science majors satisfy the university-wide requirements in natural science, quantitative reasoning, and synthesis.)

Students must fulfill all requirements for bachelor’s degrees including university general education requirements.

For policies governing all undergraduate degrees, see the Academic Policies chapter of the catalog.

This program of study is offered by the College of Science.
Degree Requirements

- Program and concentration-specific requirements

Environmental Science (35 credits):

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4
- EVPP 305 - Environmental Microbiology Essentials Credits: 3
- EVPP 306 - Environmental Microbiology Essentials Laboratory Credits: 1
- BIOL 307 - Ecology Credits: 4
- BIOL 312 - Biostatistics Credits: 4
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 430 - Fundamentals of Environmental Geographic Information Systems Credits: 3
  and one of the following 2 courses:
- EVPP 336 - Human Dimensions of the Environment Credits: 3
  or
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
  and one of the following 3 courses:
- EVPP 335 - People, Plants, and Culture Credits: 3
- PHIL 343 - Issues in Environmental Ethics Credits: 3
- GEOL 420 - Earth Science and Policy Credits: 3

Chemistry (8 credits):

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4

Mathematics (8 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4

Geology (4 credits):

- GEOL 101 - Introductory Geology I Credits: 4
Concentrations

Students select a concentration in either ecological science (ES), aquatic ecology (AE), environmental health (EH), human and ecosystem response to climate change (HERCC), or conservation (CSER). Students take 24 hours of course work as indicated below for the selected concentration.

▲ Concentration in Aquatic Ecology (AQEC)

- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 421 - Marine Conservation Credits: 3
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- EVPP 363 - Coastal Morphology and Processes Credits: 4
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 536 - Ichthyology Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- GEOL 364 - Marine Geology Credits: 3
- GEOL 458 - Chemical Oceanography Credits: 3
- CLIM 412 - Physical Oceanography Credits: 3
- NCLC 318 - Exploring Virginia's Watersheds Credits: 4
- additional courses approved by the program coordinator

▲ Concentration in Conservation (CNSV)

- EVPP 318 - Conservation Biology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- CONS 320 - Conservation in Practice Credits: 3
- CONS 401 - Conservation Theory Credits: 3
- CONS 402 - Applied Conservation Credits: 4
- CONS 410 - Human Dimensions in Conservation Credits: 3
- CONS 420 - Human-Wildlife Conflict Credits: 3
- CONS 490 - Integrated Conservation Strategies Credits: 3
- CONS 497 - Special Topics in Conservation Credits: 1-3
- CONS 498 - Internship Credits: 1-3
- CONS 499 - Independent Study/Research Credits: 1-3
- NCLC 311 - The Mysteries of Migration: Consequences for Conservation Credits: 6
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- additional courses approved by the program coordinator
▲ Concentration in Ecological Science (ESCI)

- EVPP 350 - Freshwater Ecosystems Credits: 4
- EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 449 - Marine Ecology Credits: 3
- BIOL 459 - Fungi and Ecosystems Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- additional courses approved by the program coordinator

▲ Concentration in Environmental Health (EVHL)

- EVPP 445 - Principles of Environmental Toxicology Credits: 3
- GCH 205 - International Health Credits: 3
- GCH 360 - Health and Environment Credits: 3
  and 9 credits from the following:
  - EVPP 451 - Fungi and Ecosystems Credits: 3
  - EVPP 515 - Molecular Environmental Biology I Credits: 3
  - BIOL 402 - Applied and Industrial Microbiology Credits: 3
  - BIOL 404 - Medical Microbiology Credits: 3
  - BIOL 465 - Histology Credits: 4
  - GCH 460 - Program Evaluation Credits: 3
  - GCH 560 - Environmental Health Credits: 3
  - CHEM 505 - Hazardous Materials Waste Management Credits: 1-3
- additional courses approved by the program coordinator

▲ Concentration in Human and Ecosystem Response to Climate Change (HERC)

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- CLIM 101 - Global Warming: Weather, Climate, and Society Credits: 3
  and at least 8 credits from the following:
  - EVPP 355 - Ecological Engineering and Ecosystem Restoration Credits: 4
  - EVPP 436 - The Human Dimensions of Global Climate Change Credits: 3
  - CLIM 111 - Introduction to the Fundamentals of Atmospheric Science Credits: 3
  - CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab Credits: 1
- BIOL 309 - Introduction to Oceanography Credits: 3
- additional courses approved by the program coordinator

**Bachelor's Level Certificate**

**Environmental Management Undergraduate Certificate**

**Banner Code: SC-CERB-EVMG**

This undergraduate certificate in environmental management is for students interested in environmental issues. The program consists of a minimum of 27 credits, most of which, with appropriate planning, may be counted toward fulfilling BS or BA requirements in biology, geography, earth science, urban systems engineering, and other natural and social sciences.

The curriculum provides a substantive appreciation of the biological, physical, and social aspects of environmental problems and methods for their analysis and resolution. The program should particularly interest students wishing to pursue graduate work or seeking employment in the environmental field. Inquiries should be made to the director of the environmental management certificate program.

Students receiving the certificate must hold a baccalaureate degree or be earning a baccalaureate degree from Mason at the time they receive the certificate. As an entry-level requirement, students must complete a two-semester laboratory science sequence in environmental science, biology, chemistry, or geology. Only courses with a grade of C or better are counted toward the certificate program.

Students select at least 27 credits of course work chosen in consultation with the certificate director. The courses are divided into five categories. Courses listed in more than one category can satisfy the requirements of only one. Any substitution in the following list requires permission from the certificate director.

This program of study is offered by the College of Science.

**Certificate Requirements**

**Environmental certificate core (four courses):**

Choose one of the following:

- EVPP 377 - Applied Ecology Credits: 3
- BIOL 377 - Applied Ecology Credits: 3

and one of the following:

- ECON 103 - Contemporary Microeconomic Principles Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- GOVT 351 - Administration in the Political System Credits: 3
- GOVT 357 - Urban Governance and Planning Credits: 3

- plus a course in statistics (BIOL 312 Biostatistics recommended)
Physical perspective (one or two courses*):

- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 313 - Hydrogeology Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- GEOL 363 - Coastal Morphology and Processes Credits: 4
- GEOL 403 - Geochemistry Credits: 3
- GEOL 405 - Advanced Seminar in Earth Resources Credits: 3

Biological perspective (one or two courses*):

- BIOL 307 - Ecology Credits: 4
- BIOL 309 - Introduction to Oceanography Credits: 3
- BIOL 344 - Plant Diversity and Evolution Credits: 4
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 440 - Field Biology Credits: 1-4
- BIOL 446 - Environmental Physiology Credits: 3
- BIOL 449 - Marine Ecology Credits: 3
- BIOL 471 - Evolution Credits: 3
- BIOL 532 - Animal Behavior Credits: 3
- BIOL 535 - Ancient Plants and their Environment Credits: 3
- BIOL 536 - Ichthyology Credits: 4
- BIOL 537 - Ornithology Credits: 4
- BIOL 543 - Tropical Ecosystems Credits: 4
- BIOL 547 - Terrestrial Plant Ecology Credits: 4
- EVPP 318 - Conservation Biology Credits: 3
- EVPP 350 - Freshwater Ecosystems Credits: 4
- HEAL 450 - Epidemiology and Environmental Health Credits: 3
- EVPP 515 - Molecular Environmental Biology I Credits: 3
- EVPP 538 - Mammalogy Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3

Social perspective (one course):

- ANTH 305 - Foraging Societies Credits: 3
- ANTH 365 - Race and Racism Credits: 3
- ANTH 370 - Environment and Culture Credits: 3
- ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors Credits: 3
Environmental methods (one course):

- BIOL 312 - Biostatistics Credits: 4
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 555 - Lab in Waterscape Ecology Credits: 1

Note:

* Biology majors are required to complete two courses in physical or social perspective; geology or earth science majors are required to complete two courses in biological or social perspective. Social science majors are required to complete two courses in physical or biological perspective.

Total: 27 credits

Undergraduate Minor

Conservation Biology Minor

Banner Code: CBIO

This minor is intended for non-biology majors* with an interest in wildlife and habitat conservation issues. The minor may particularly suit Global and Environmental Change majors and Earth Science majors, as well as New Century College students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism.

This program of study is offered by the College of Science.
Course Work

Candidates for the minor in conservation biology must complete at least 21 credits with a minimum GPA of 2.00, distributed as follows:

Core Biology Courses (15 credits)

- BIOL 303 - Animal Biology Credits: 4 **
- BIOL 304 - Plant Biology Credits: 4 **
- BIOL 307 - Ecology Credits: 4 **

and one from the following:

- EVPP 318 - Conservation Biology Credits: 3
- BIOL 318 - Conservation Biology Credits: 3
- NCLC 401 - Conservation Biology Credits: 6 (3 credits only)

Electives (6 credits)

At least 6 credits of electives from the following courses:

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
- EVPP 419 - Marine Mammal Biology and Conservation Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 4
- NCLC 401 - Conservation Biology Credits: 6 (3 of 6 credits count toward electives)
- NCLC 520 - Conservation Education Credits: 3
- NCLC 522 - Developing an Institutional In Situ Conservation Strategy Credits: 3
- TOUR 312 - Ecotourism Credits: 3

Notes:

Other conservation-oriented classes may also be applicable as electives for this minor if approved by the faculty coordinator for the minor. Eight credits of courses must be unique to the minor and not counted toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

*This minor cannot be taken by biology majors.

**These courses may have prerequisites that need to be met. See advisor for details.

Total: 21 credits
Environmental Policy Minor

Banner Code: EVP

This program of study is offered by the College of Science.

Course Work

To receive this minor, students must successfully complete 21 credits with a minimum 2.00 GPA, including the following:

Core courses (12 credits):

- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 377 - Applied Ecology Credits: 3
  or
- BIOL 377 - Applied Ecology Credits: 3
- PHIL 343 - Issues in Environmental Ethics Credits: 3

Plus 9 credits from the following list:

(or other appropriate courses approved by the coordinator of the minor)

- ANTH 370 - Environment and Culture Credits: 3
- ANTH 399 - Issues in Anthropology Credits: 3
- BIOL 318 - Conservation Biology Credits: 3
  or
- EVPP 318 - Conservation Biology Credits: 3
- BIOL 543 - Tropical Ecosystems Credits: 4
- CEIE 456 - Environmental Law Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 4 (for example, Conserving Endangered Species, Energy and the Environment, Ecological Economics, Environmental Science of Puerto Rico, Marine Conservation, Marine Mammal Biology and Conservation)
- EVPP 505 - Selected Topics in Environmental Science Credits: 4
- GEOL 420 - Earth Science and Policy Credits: 3
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3
- SOCI 332 - Sociology of Urban Communities Credits: 3
- TOUR 312 - Ecotourism Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3
• TOUR 362 - Cultural and Environmental Interpretation Credits: 3
• TOUR 540 - Sustainable Tourism Management Credits: 3

Note:

At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

Total: 21 credits

Environmental Science Minor

Banner Code: EVSC

A minor in Environmental Science aids to give a student an increase awareness of the major environmental issues effecting the natural world and society. The minor is intended to compliment a major in natural science but could also be taken by non-science majors.

At least 8 credits of courses taken for the minor must be exclusive to the minor and not count toward the student’s major. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Either:

• EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
  and
• EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

  or
• BIOL 103 - Introductory Biology I Credits: 4
• BIOL 104 - Introductory Biology II Credits: 4
  and
• GEOL 101 - Introductory Geology I Credits: 4

3 credits of applied ecology

• EVPP 377 - Applied Ecology Credits: 3
  or
• BIOL 377 - Applied Ecology Credits: 3
Electives

And a minimum of 8 credits of EVPP electives (of which 4 credits must be upper level courses).

This minor cannot be taken in conjunction with the BS earth science concentration in environmental science or the BS in Global and Environmental Change.

Total: 19-23 credits

Sustainability Minor

Banner Code: SUST

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines, and it also requires a re-examination of the relationship between human value systems and cultural practices and the associated long-term implications for the ecosystem. This interdisciplinary minor is housed jointly in the Department of Environmental Science and Policy (College of Science) and in the New Century College (College of Humanities and Social Sciences).

For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Candidates for the minor in Sustainability Studies must complete 16 credits with a minimum GPA of 2.00, distributed as follows:

Core Courses (8 credits):

students take 4 credits of:
- NCLC 275 - Special Topics Credits: 1-18
  plus 4 credits of:
- EVPP 480 - Sustainability in Action Credits: 4

Electives (8 credits):

8 credits of electives are required to complete the minor. A maximum of 2 courses from a single department or program can be counted for elective credit. Preapproved courses are listed here and others may be substituted (see the program coordinator for further information).

- ANTH 370 - Environment and Culture Credits: 3
- CEIE 355 - Environmental Engineering and Science Credits: 3
- CEIE 450 - Environmental Engineering Systems Credits: 3
- CEIE 456 - Environmental Law Credits: 3
- CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
- ECON 335 - Environmental Economics Credits: 3
- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 201 - Environment and You: Issues for the Twenty-First Century Credits: 3
- EVPP 335 - People, Plants, and Culture Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
- EVPP 337 - Environmental Policy Making in Developing Countries Credits: 3
- EVPP 361 - Introduction to Environmental Policy Credits: 3
- EVPP 421 - Marine Conservation Credits: 3
- GEOL 305 - Environmental Geology Credits: 3
- NCLC 220 - Energy and Environment Credits: 3-6
- PRLS 250 - Wilderness Travel and Sustainability Credits: 2
- PRLS 300 - People with Nature Credits: 3
- PRLS 402 - Human Behavior in Natural Environments Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PHIL 343 - Issues in Environmental Ethics Credits: 3
- SOCI 320 - Social Structure and Globalization Credits: 3
- TOUR 312 - Ecotourism Credits: 3
- TOUR 340 - Sustainable Tourism Credits: 3
- USST 301 - Urban Growth in a Shrinking World Credits: 3

Total: 16 credits

Master's Degree

Environmental Management, MEM (pending SCHEV approval)

Banner Code: SC-MEM-EVMG

This program of study will be offered by the College of Science.

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The Master of Environmental Management (MEM) degree combines the managerial and administrative skills developed in a traditional Master of Public Administration with the scientific knowledge and understanding normally found as a component of a Master of Science degree. The program serves as a terminal professional master's for those individuals currently working in or aspiring to work as managers in the environmental field in both government and private industry. This degree addresses the needs of professional managers and staff who work at the interface between public administration and environmental science. The MEM is a non-thesis degree that provides balanced training to both full-time and part-time students who seek or currently occupy positions in this growing nexus. The program is offered jointly by the Department of Environmental Science and Policy (ESP) in
the College of Science and the Department of Public and International Affairs (PIA) in the College of Humanities and Social Sciences.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.0 and should have taken at least two semesters of biology and/or chemistry. Applications are accepted for fall admission only and are due by March 15. All applicants must submit the following materials:

- Complete Application for Graduate Study
- Non-refundable application fee
- Application for Virginia In-State Tuition Rates if seeking in-state tuition
- Two copies of official transcripts from each institution attended
- Three letters of recommendation (at least two of which should be from former professors, job supervisors or others familiar with the applicant’s work)
- A recent resume
- A substantial statement of professional goals and interest in the program. This should also specify whether the student wishes to attend full or part-time.
- Scores from the aptitude portion of the GRE (Applicants with undergraduate GPA of 3.3 or higher may petition for a waiver of GRE requirement)
- International students must also submit an official TOEFL score report

Degree Requirements

This degree is designed to be completed by a full-time student in three semesters, or by part-time student in six semesters. Students must complete a total of 37 credit hours as follows:

Core Courses (18 credits):

- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3
- PUAD 640 - Public Policy Process Credits: 3
- PUAD 642 - Environmental Policy Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- PUAD 611 - Problem Solving and Data Analysis I Credits: 3

Environmental Law (3 credits):

- EVPP 670 - Environmental Law Credits: 3
  or
- CEIE 556 - Environmental Law Credits: 3
  or
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
Field Ecology (4 credits):

- either the sequence:
  - EVPP 550 - Waterscape Ecology and Management Credits: 3
  - EVPP 555 - Lab in Waterscape Ecology Credits: 1
- or the sequence:
  - EVPP 646 - Wetland Ecology and Management Credits: 3
  - EVPP 647 - Wetland Ecology Lab and Field Credits: 1

Capstone (3 credits):

- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Electives (9 credits):

- 9 credits of electives approved by the program director

Total: 37 credits

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

The MS in environmental science and policy meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems, such as deforestation, insufficient world food supplies, acid deposition, population growth and public health, global climate change/warming, and depletion of the stratospheric ozone. Areas of specific departmental focus include ecosystems; conservation; environmental biocomplexity; molecular ecology; sustainability science; environmental policy and management and human/environmental interactions.

Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused interdisciplinary action in a setting in which research is an essential element supporting instruction.

Four concentrations are available in the master’s program: environmental science and policy, environmental biocomplexity, Earth surface processes and environmental geochemistry, and environmental management. The first three concentrations, designed for students who wish to obtain a research oriented master’s degree, serve as a training ground for students wishing to further their education by pursuing the PhD in environmental science and public policy at Mason or doctoral programs at other universities. The environmental science and policy concentration is the largest and serves as a home for a broad array of research foci. The environmental biocomplexity concentration is designed for students who wish to obtain a research-oriented master’s degree in
population genetics, microbial ecology, and molecular systematics. The concentration in Earth surface processes and environmental geochemistry provides a specific research focus in the Earth science area.

The environmental management concentration serves as a terminal professional master’s degree for individuals working in or aspiring to work as managers in the environmental field in government or private industry. It combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree.

This program of study is offered by the College of Science.

Admission Requirements

Applicants must complete a standard Mason graduate application form, available from the Graduate Admissions Office or on line at admissions.gmu.edu. Applicants should hold a bachelor’s degree with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a related field with an environmental focus from an accredited institution. Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants should submit three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD. The aptitude portion of the GRE is required, and successful applicants usually have achieved a minimum score of 1,100 for verbal and quantitative combined. Applicants must also submit a statement of interest to the program, which should include the concentration to which they are applying, potential areas of environmental focus, research option preferred, a statement of interactions with potential faculty advisors, and an explanation of career goals. Prospective students must contact potential faculty advisors appropriate to their interests during the application process. The availability of an advisor in the student’s area of interest is a prerequisite for final admission. Students will choose their research skills option at the time of application but may change this option later with their advisor’s permission.

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator's office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences. These introductory courses would be in addition to the degree requirements listed below.

Degree Requirements

▲ Earth Surface Processes and Environmental Geochemistry Concentration (ESEG)

This concentration is for students desiring an MS degree with an earth science geology theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason’s policy on master’s thesis committees. Requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental and earth science issues. Course selection should support the research component of the student’s degree program.

Natural Sciences:

- At least 16 credits are required, including at least one course from each of the following areas (10 of the 16 credits): soils science, hydrogeology, and geochemistry.
The remainder may be chosen from a list of applicable EVPP, CHEM, and GEOL graduate courses, including:

- GEOL 500 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 501 - Selected Topics in Modern Geology Credits: 1-3
- GEOL 601 - The Lithosphere Credits: 3
- CHEM 633 - Chemical Thermodynamics and Kinetics Credits: 3
- CHEM 651 - Environmental Chemistry of Organic Substances Credits: 3
- CHEM 728 - Introduction to Solid Surfaces Credits: 3
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 505 - Selected Topics in Environmental Science Credits: 4
- EVPP 543 - Tropical Ecosystems Credits: 4
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 563 - Coastal Morphology and Processes Credits: 4
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 610 - Bioremediation: Theory and Applications Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 745 - Environmental Toxicology Credits: 3

Public Policy:

- At least 6 credits are required in environmental law, human dimension of global change, environmental ethics, human ecology, or planning.

Methods:

- At least 6 credits are required in remote sensing, GIS, statistics, instrumentation, or modeling.

Seminar:

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research:

At least 3 credits of Master's Thesis are required for this concentration. Students present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research component.

- EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives:

- If necessary, students take additional electives to bring the total to 33 credits.
Environmental Biocomplexity Concentration (EVBC)

This concentration is for students desiring an MS degree with a environmental biocomplexity theme. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of the second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees.

Course requirements may be fulfilled by completing courses from a variety of academic units at the university. The program requires a minimum of 33 graduate credits distributed in five categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should support the research component of the student’s degree program.

Students are encouraged to complete at least 1 credit of directed studies (EVPP 693) as a lab rotation to broaden the scope of their experience in the concentration.

Natural Sciences:

- At least 6 credits are required in courses that cover ecology, biogeochemistry, biochemistry, population genetics, molecular biology, molecular systematics, molecular evolution, microbial ecology, microbial diversity, quantitative genetics, and population biology.

Public Policy:

- At least 6 credits are required in environmental law, human ecology, environmental ethics, patent law, and legal and ethical issues in science.

Methods and Statistics:

- At least 9 credits are required in statistics, bioinformatics, information systems, instrumental analysis, microbiological techniques, molecular methods, and phylogenetic methods.

Seminar:

At least 1 credit on an appropriate topic is required.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1

Research:

This requirement may be satisfied in one of two ways. Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee. Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research skills component.

- EVPP 798 - Master's Research Project in Environmental Science and Public Policy Credits: 1-3
or

- At least 3 credits of EVPP 799 - Master's Thesis in Environmental Science and Public Policy Credits: 1-6

Electives:

- If necessary, students take additional electives to bring the total to 33 credits.

▲ Environmental Management Concentration (EVMG)

Students must complete 37 credits for the environmental management concentration. Students will be assigned an advisor on admission. Full-time students can complete this degree in three semesters; part-time students take six semesters. Course work must include the following:

Administration and Policy:

At least 12 credits are required, including the following:

- EVPP 670 - Environmental Law Credits: 3  
  or
- PRLS 501 - Introduction to Natural Resources Law Credits: 3  
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3  
  or
- PUAD 620 - Organization Theory and Management Behavior Credits: 3  
- PUAD 640 - Public Policy Process Credits: 3 (with sections tailored to environmental science and policy)  
- EVPP 642 - Environmental Policy Credits: 3

Environmental Science:

At least 12 credits are required, including the following:

- EVPP 550 - Waterscape Ecology and Management Credits: 3  
  or
- EVPP 646 - Wetland Ecology and Management Credits: 3  
- EVPP 607 - Fundamentals of Ecology Credits: 3 (if student has not already taken a course in general ecology)  
- EVPP 641 - Environmental Science and Public Policy Credits: 3  
- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3

Methods and Statistics:

At least 6 credits are required, including the following:

- PUAD 611 - Problem Solving and Data Analysis I Credits: 3 (research design)  
- PUAD 612 - Problem Solving and Data Analysis II Credits: 3 (statistics)
Research/Seminar:

Fulfilled with

- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4 Problems in Environmental Management

Electives:

Students may choose 3 credits (or more to complete 37) from the following list of approved electives. Other courses may be used subject to approval of the program committee.

- EVPP 524 - Introduction to Environmental and Resource Economics Credits: 3
- EVPP 525 - Economics of Human/Environment Interactions Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 620 - Development of U.S. Environmental Policies Credits: 3
- EVPP 621 - Overview of Biodiversity Conservation Credits: 3
- EVPP 622 - Management of Wild Living Resources Credits: 3
- EVPP 626 - Environment and Development in Asia Credits: 3
- EVPP 627 - Environmental Policy in Latin America Credits: 3
- EVPP 628 - Environment and Development in Africa Credits: 3
- EVPP 630 - Methods and Logic of Social Inquiry Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 650 - Environmental Analysis and Modeling Credits: 4
- EVPP 675 - Environmental Planning and Administration Credits: 3
- PUAD 509 - Justice Organizations and Processes Credits: 3
- PUAD 615 - Administrative Law Credits: 3
- PUAD 622 - Program Planning and Implementation Credits: 3
- PUAD 657 - Association Management Credits: 3
- PUAD 729 - Issues in Public Management Credits: 3
- PUAD 741 - Policy Analysis Credits: 3
- PUAD 742 - Program Evaluation Credits: 3
- MBA 623 - Marketing Management Credits: 3
- MBA 712 - Project Management Credits: 3
- MBA 724 - Marketing Communications Credits: 3
- MBA 725 - Leadership Credits: 3

▲ Environmental Science and Policy Concentration (EVSP)

This concentration encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy. Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of course work or by the end of second semester, whichever comes first. The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor and conforming to Mason policy on master’s thesis committees.
Course requirements may be fulfilled by completing courses from a variety of academic units at Mason. The program requires a minimum of 33 graduate credits distributed in four categories to provide a breadth of knowledge appropriate for addressing current environmental issues. Course selection should reflect a coherent individual program focus, which is stated and briefly described in the program of study, and support the research component of the student’s degree program.

Course selection should also support the research component of the student’s degree program and should be developed in close consultation with the advisor and committee members. The advisor and thesis committee approve the course work program individually for each student.

**Natural Sciences:**

- At least 6 credits are required in biology, geology, geography, chemistry, or environmental engineering. For those students without previous course work in ecology, EVPP 607 is required in addition to the 6 credits.
- **EVPP 607 - Fundamentals of Ecology** Credits: 3

**Public Policy:**

- At least 6 credits are required in environmental law, human ecology, environmental ethics, planning, or public affairs.

**Methods and Statistics:**

- At least 9 credits are required in statistics, remote sensing, information systems, instrumental analysis, or modeling. A course in statistics is highly recommended.

**Seminar:**

At least 1 credit on an appropriate topic is required.

- **EVPP 692 - Master's Seminar in Environmental Science and Public Policy** Credits: 1

**Research:**

This requirement may be satisfied in one of two ways. Students may conduct a project (EVPP 798) or produce a formal thesis (EVPP 799). The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities.

Students fulfilling the research requirement with EVPP 798 are required to take a comprehensive exam administered by their committee. Students choosing to do a thesis and completing EVPP 799 will present their results in a public seminar and defend their thesis before their committee. Students will be graded pass/no credit on the research skills component.

- **EVPP 798 - Master's Research Project in Environmental Science and Public Policy** Credits: 1-3
  or
- **EVPP 799 - Master's Thesis in Environmental Science and Public Policy** Credits: 1-6

**Electives:**
If necessary, students take additional electives to bring the total to 33 credits.

**Master's Level Certificate**

**Environmental Management Graduate Certificate**

**Banner Code: SC-CERG-EVMG**

The graduate certificate allows students to expand their knowledge of the environment and environmental management beyond their undergraduate training. It offers a professional credential to students who might not have the time or background to enroll in a graduate degree program requiring a thesis or dissertation. Students who later obtain admission to the graduate degree programs in environmental science and policy may be able to use credits earned during the certificate toward their graduate degree program.

The curriculum provides a substantive exposure to the biological, physical, and social aspects of environmental problems, and methods for their analysis and resolution.

This program of study is offered by the College of Science.

**Admission**

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator's office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses would be sufficient background to prepare students without academic training in the natural sciences.

Applicants to the program should meet the following minimum requirements:

- Undergraduate (baccalaureate) degree, preferably in biology, chemistry, geology, geography, earth systems science, resource planning, environmental studies, or a related discipline with an environmental focus.
- Two semesters of college level general chemistry with a laboratory (see note above regarding introductory graduate environmental chemistry).
- Two semesters of college level general biology with a laboratory (see note above regarding introductory graduate environmental biology).
- Undergraduate course in general ecology; students who do not meet this requirement must take EVPP 607 Fundamentals of Ecology as their natural science elective.
- Three letters of reference and a statement of interest in the program.
- Aptitude portion of the Graduate Record Exam.

**Certificate Requirements**

The certificate is awarded after satisfactory completion of six graduate courses (a minimum of 18 semester credits) as specified below:

**Environmental certificate core (three courses):**

- EVPP 677 - Applied Ecology and Ecosystem Management. Credits: 3
One of the following:

- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- SOCI 635 - Environment and Society Credits: 3

Three electives (one from each of the following areas):

**Natural Sciences:**

- EVPP 550 - Waterscape Ecology and Management Credits: 3
- EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
- EVPP 607 - Fundamentals of Ecology Credits: 3
- EVPP 643 - Microbial Ecology Credits: 4
- EVPP 645 - Freshwater Ecology Credits: 3
- EVPP 646 - Wetland Ecology and Management Credits: 3
- EVPP 745 - Environmental Toxicology Credits: 3

**Social Sciences:**

- CONF 501 - Introduction to Conflict Analysis and Resolution Credits: 3
- EVPP 635 - Environment and Society Credits: 3
- EVPP 638 - Corporate Environmental Management and Policy Credits: 3
- EVPP 641 - Environmental Science and Public Policy Credits: 3
- EVPP 642 - Environmental Policy Credits: 3
- EVPP 670 - Environmental Law Credits: 3
- EVPP 675 - Environmental Planning and Administration Credits: 3
- PRLS 501 - Introduction to Natural Resources Law Credits: 3
- PRLS 526 - Environmental Education and Resource Interpretation Credits: 3
- PHIL 643 - Environmental Ethics Credits: 3
- PUAD 502 - Administration in Public and Nonprofit Organizations Credits: 3

**Environmental Methods:**

- EVPP 650 - Environmental Analysis and Modeling Credits: 4

**Total: 18 credits**

**Doctoral Degree**
Environmental Science and Public Policy, PhD

Banner Code: SC-PHD-EVPP

This interdisciplinary program draws on faculty and expertise from the Environmental Science and Policy departmental core faculty, as well as faculty from across the university. This includes the Departments of Atmospheric, Oceanic and Earth Sciences; Molecular and Microbiology; Public and International Affairs; Chemistry and Biochemistry; Economics; Geography and Geoinformation Science; and Sociology and Anthropology; as well as the School of Public Policy, the Volgenau School of Information Technology and Engineering, and the College of Education and Human Development.

Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

This program of study is offered by the College of Science.

Admission Requirements

Applicants should have a bachelor’s degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. The application deadline is February 15 for admission to fall semester; admission to spring semester is usually not available.

In addition to the materials required of all applicants for graduate study at Mason, applicants should submit the following:

- Scores on aptitude portion of GRE (may be waived for applicants with a master’s degree in an appropriate field).
- Three letters of recommendation, with at least two from individuals with doctorates.
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.

All students must obtain the consent of a faculty member willing to serve as an Advisor prior to being fully admitted to the program. Admission decisions are based on the student’s qualifications and the availability of a faculty advisor. Applicants with questions should contact the ESP Graduate Services office (703-993-3187).

Applicants who lack college level course work in biology and chemistry should contact the ESP graduate coordinator’s office for advice. Successful completion of a two semester sequence of introductory graduate level environmental chemistry and biology courses (preferably EVPP 506 and 507) would be sufficient background to prepare students without previous academic training in the natural sciences. These introductory courses would be in addition to the degree requirements listed below.

Before admission to the program, students are responsible for identifying a member of the environmental faculty willing to serve as their advisor. The advisor guides the student through initial course selection. An advisor may be changed by mutual consent of student and advisor, or petition to the graduate program director and the College of Science Dean. Students are required to complete a course work proposal by the end of the second semester of courses. The coursework proposal must be approved by the advisor and program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The students’ course work must provide the knowledge base from which original research projects in their specific areas of interest can be successfully completed.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.
The doctoral program requires a minimum of 78 graduate credits beyond the bachelor’s degree. Students with a master’s degree in an appropriate field may obtain a reduction of credit for appropriate course work of up to 30 graduate credits. To ensure that all students obtain the necessary skills and knowledge to function as environmental professionals, the program requires all students to fulfill the following four category requirements:

**Natural Sciences (at least 12 credits):**

- At least 12 credits are required in biology, chemistry, environmental science, geology, geography, or environmental engineering.

**Public Policy (at least 12 credits):**

- At least 12 credits are required in public affairs, economics, sociology, and business. A course in environmental law is also required as part of this category.

**Research Methods and Technology (at least 9 credits):**

- At least 9 credits are required in statistics, remote sensing, geographic information systems, analytical chemistry, modeling, or information technology. Students should carefully choose course work to ensure they have the necessary skills to support dissertation research. Course work for the first two categories, with a substantial methods component, may be used to meet some of this requirement, subject to approval of the student’s committee.

**Doctoral Seminar (4 credits):**

Students must present a total of 4 graduate seminar credits, with EVPP 991 taken at least once.

- EVPP 692 - Master's Seminar in Environmental Science and Public Policy Credits: 1
- EVPP 991 - Advanced Seminar in Environmental Science Credits: 2

**Course Work Emphasis (12 credits):**

- Beyond the basic 12 hour natural science/public policy requirements, students usually will focus their study either on environmental science or environmental public policy. Those focusing on environmental science should take another 12 credits (for a total of 24 credits) in natural science; those focusing on environmental public policy should take another 12 credits (for a total of 24 credits) of public policy course work. Previous thesis research courses may not be applied to this degree. See advisor for further details.

**Advancement to Candidacy**

Before the end of the fourth semester of course work, students, in consultation with their advisor should propose a dissertation committee of at least four members, three of whom must be from the Mason graduate faculty with representation from at least two governance units. The dissertation committee is appointed by the Dean of the College of Science. After reviewing the student’s course work proposal, progress to date, and area of research, the committee makes final recommendations concerning course work that will be codified in the program of study to be signed by all committee members and the graduate program director. Students are advised to work closely with their advisor and committee to develop the course work program in order to facilitate the process of course selection.

On completion of all or nearly all course work, students may request to take the qualifying or candidacy exam. The qualifying
exam has both written and oral components. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student’s committee. Upon approval of the program of study, completion of all or nearly all course work, successful completion of the qualifying exam, and the approval of the dissertation proposal, the student is recommended for advancement to candidacy by the graduate program director. Students must advance to candidacy within six years of admission to the program.

Before students may enroll in dissertation research (EVPP 999), they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, department chairperson, and dean of the college. Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate program director, department chairperson, and dean. The dissertation and defense must be completed within five years of advancement to candidacy.

**Doctoral Dissertation**

Students must complete a dissertation (12 to 24 credits). This may be accomplished by taking EVPP 999 (Doctoral Dissertation) alone, or in combination with EVPP 998 (Doctoral Dissertation Proposal). However, no more than half the credits specified for dissertation credit on the student’s program of study may be taken as EVPP 998. The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations, on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

- **EVPP 998** - Doctoral Dissertation Proposal Credits: 1-6
- **EVPP 999** - Doctoral Dissertation Research Credits: 1-12

**Total: 78 credits**

### Forensic Science Program

Phone: 703-993-1050  
Web: cos.gmu.edu/forensics

**Faculty**

**Director:** Whildin  
**Professors:** Foster, Jafri, Mushrush, Willett  
**Associate professors:** Born, Gillevet, Honeychuck, Kinser, Palkovich, Schreifels, Seto  
**Assistant professors:** Couch, Forkner  
**Adjunct faculty:** McClintock, Whildin

The Forensic Science Program is an interdisciplinary academic collaboration between the Department of Chemistry and Biochemistry; the Department of Molecular and Microbiology (MMB); the Department of Environmental Science and Policy (ESP); and the Department of Bioinformatics and Computational Biology (BCB). In addition, the Program has its own dedicated
teaching faculty. The Program is administered by the Forensic Science Program Director, and governed by an interdepartmental Forensic Science Program Committee.

**Course Work**

The program offers all course work designated FSRC in the Courses chapter of this catalog.

**Undergraduate Degree Programs**

The Forensic Science Program oversees the undergraduate minor in Forensic Science.

**Graduate Degree Programs**

The Forensic Science Program oversees the MS and Graduate Certificate programs in Forensic Science.

**Undergraduate Minor**

**Forensic Science Minor**

**Banner Code: FRSC**

The minor in forensic science addresses the growing national and regional interest in forensics by introducing students to the technical, psychological, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, engineering, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry.

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student’s major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at Mason and achieve a minimum GPA of 2.00 in courses applied to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

The minor in forensic science consists of 20 credits of course work.

This program of study is offered by the College of Science.

**Course Work**

**Foundation Science Courses (8 credits from the following):**

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
and
• BIOL 306 - Biology of Microorganisms Laboratory Credits: 1
• PHYS 160 - University Physics I Credits: 3
and
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 243 - College Physics Credits: 3
and
• PHYS 244 - College Physics Lab Credits: 1
• PHYS 245 - College Physics Credits: 3
and
• PHYS 246 - College Physics Lab Credits: 1
• PHYS 260 - University Physics II Credits: 3
and
• PHYS 261 - University Physics II Laboratory Credits: 1

Forensic Science Courses (6 credits from the following):

• FRSC 420 - Forensic Toxicology Credits: 3
• FRSC 440 - Forensic Chemistry Credits: 3
• FRSC 460 - Forensic DNA Sciences Credits: 3

Supporting Courses (3 credits from the following):

• PSYC 231 - Social Psychology Credits: 3
• SOCI 301 - Criminology Credits: 3
• CRIM 100 - Introduction to Criminal Justice Credits: 3
• CRIM 400 - Applied Criminal Psychology Credits: 3

Electives (3 credits):

• Students select one additional class from the above lists of Forensic Science Courses and Supporting Courses

Total: 20 credits

Master's Degree
Forensic Science, MS

**Banner Code:** SC-MS-FRSC

his program of study is offered by the College of Science.

The interdisciplinary MS program in Forensic Science is designed to train students in the technical and legal aspects of the field, and it is especially relevant for the many area professionals holding positions in government and private laboratories specializing in the analytical investigation of criminal and terrorist activities. Graduates will be qualified to work in high-technology forensics laboratories that analyze and interpret a wide variety of evidence and data in support of investigations and prosecutions. The demand for graduates with these skills is especially strong in the Northern VA region, where several new FBI and police forensics labs are being built or expanded.

The degree requires 21 credits of core courses covering crime scene analysis and fundamental forensic concepts, and an additional 6-9 credits of forensic science electives. Students also complete either a 3 credit research project or a 6 credit MS thesis for a total of 33 program credits. A unique element of the program is the “Forensics Capstone Course,” which is taken by all students in the program. In this class, students will combine their skills as members of interdisciplinary investigation teams as they analyze “real world” crime scenes.

The curriculum outlined below has been designed to meet the standards of the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Science. Students enrolled in this professional MS program are charged at a differential (premium) tuition rate, and therefore they may not enroll concurrently in any other graduate degree program or certificate program offered by COS, with the exception of the graduate certificate program in Forensics. However students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

**Admission Requirements**

Applicants to the Forensic Science MS program should hold a BA or BS degree in biology, chemistry, or a related field from an accredited university with a minimum GPA of 3.00. Applicants should submit the a completed GMU graduate application, official score reports for the GRE-GEN exam, three letters of recommendation, two copies of official transcripts from each institution of higher learning attended, a current resume, a Virginia Domicile Classification form, and an official report of TOEFL (foreign nationals only).

**Degree Requirements**

The MS program in Forensic Science requires a total of 33 credit hours, comprising traditional 3-credit lecture courses (many with laboratory components), a seminar course, and a research project or thesis. The coursework is divided into forensics core courses and forensics electives. Students must complete 21 credits of core courses and 9 credits of forensic science electives; those undertaking the 6-credit thesis option take only 6 credits of electives.

An important element of the program is the “Forensics Capstone Course,” in which students combine their skills as members of multidisciplinary investigation teams in order to analyze “real world” crime scenes. This course will demonstrate in practice how students combine skills in the scientific/quantitative analysis and legal/anthropological areas to understand the nuances of the evidence presented at an actual crime scene. Waivers of specific course requirements will be considered for students who have taken equivalent courses elsewhere or have substantial practical experience in the subject areas covered by the particular course. Students complete 33 credits as follows:

**Forensics Core Courses (21 credits):**

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Crime Scene Analysis Credits: 3
- FRSC 520 - Toxicology Credits: 3
- FRSC 530 - Law and Forensic Science Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3
- FRSC 600 - Forensics Seminar Credits: 1 (taken 3 times)
- FRSC 690 - Forensics Capstone Course Credits: 3

Forensics Electives (6 or 9 credits):
- FRSC 550 - Issues in Forensic Anthropology Credits: 3
- FRSC 560 - Forensic DNA Sciences Credits: 3
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 633 - Molecular Biotechnology Credits: 3
- BINF 639 - Introduction to Biometrics Credits: 3
- BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 761 - Dispersal Patterns of Biological Agents Credits: 3

Research Component (3 or 6 credits):

Students completing the 6 credit thesis option take only 6 credits of Forensics Electives.

- FRSC 610 - Forensics Research Project Credits: 1-3
- FRSC 799 - Master's Thesis Credits: 1-6
  Note: students completing the 6 credit thesis option take only 6 credits of electives

Total: 33 credits

Master's Level Certificate

Forensics Graduate Certificate

Banner Code: SC-CERG-FORS

This collegewide interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.
Students enrolled in the forensic science concentration obtain the specific scientific skills necessary for laboratory employment in the field. Students enrolled in the general forensics concentration obtain a more general background in the field with a focus on criminal law and anthropology.

At the time of completion, depending on the concentration, students will be able to

- Understand the basic principles of forensics.
- Perform a general crime scene analysis.
- Develop DNA profiles and interpret results of toxicological studies.
- Apply fundamental legal and anthropological concepts.
- Work collaboratively in interdisciplinary groups.

This program of study is offered by the College of Science.

Admission Requirements

Applicants to the forensic science concentration should hold a BA or BS degree in biology or chemistry from an accredited university with a minimum GPA of 3.00. Applicants to the general forensics concentration should hold a BA or BS degree from an accredited university with a minimum GPA of 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required of all international applicants. Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS because this certificate program will charge students at a differential (premium) tuition rate. However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently.

Program Requirements

The certificate in forensics requires a total of 18 credits, comprising six 3-credit courses. A unique element of the program is the Forensics Capstone Course, which is shared by the two concentrations. In this class, students from the two concentrations will combine their skills as members of interdisciplinary investigation teams as they analyze a real-world crime scene. This unique course will demonstrate in practice how students with skills in the scientific/quantitative analysis or legal/anthropological areas can combine forces to understand and interpret the nuances of the evidence presented at an actual crime scene. The curriculum requirements for each concentration are listed below:

Certificate Requirements

- FRSC 500 - Introduction to Forensic Science Credits: 3
- FRSC 510 - Crime Scene Analysis Credits: 3

▲ Forensic Science Concentration (FRSC)

Required Courses (12 credits):

- FRSC 520 - Toxicology Credits: 3
- FRSC 540 - Forensic Chemistry Credits: 3
• FRSC 560 - Forensic DNA Sciences Credits: 3
  or
• BINF 637 - Forensic DNA Sciences Credits: 3
• FRSC 690 - Forensics Capstone Course Credits: 3

Total: 18 credits

▲ General Forensics Concentration (FRSG)

Required Courses (12 credits):

• FRSC 530 - Law and Forensic Science Credits: 3
• FRSC 550 - Issues in Forensic Anthropology Credits: 3
• FRSC 570 - Introduction to Biochemical Forensics Credits: 3
• FRSC 690 - Forensics Capstone Course Credits: 3

Total: 18 credits

■ Geography and Geoinformation Science

Phone: 703-993-1210 or 703-993-1212
Web: ggs.gmu.edu

Faculty

Professors: Agouris, Di, Falconer, Haack, Taylor, Waters, Wong

Associate professors: Beach, Chiu, Curtin, Houser, Qu, Stefanidis, C. Yang, R. Yang

Assistant professors: Cervone, Kronenfeld, Leslie, Manca, Rice, Sun, W. Yang, Zolnik

Research or contract professors: Franzese, Gomez, Pilon, Resmini, Self

Term instructors: Boudinot, Hallden

Course Work
This department offers all courses designated GGS in the Courses chapter of this catalog.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GGS 415. Students majoring in Global and Environmental Change fulfill this requirement by successfully completing GGS 304.

**Teacher Licensure**

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

**PhD Studies in Other Programs**

The department participates in other programs that provide opportunities for geographical, environmental, and earth science research. A popular example is the Environmental Science and Public Policy PhD Program where faculty members serve as both dissertation committee members and chairs. Geographic studies fit well with many issues related to public policy, planning, conservation, and sustainable development. Program description and degree regulations are listed under the Department of Environmental Science and Policy.

The department also participates in the Public Policy PhD Program, along with some of the university’s leading geographers who are members of the School of Public Policy. In addition, geography and geoinformation science faculty members provide joint supervision and serve as committee members to support those pursuing research primarily geographic in nature. Program description and degree regulations can be found under the School of Public Policy listing. Several departments participate in supervisory committees providing a rich opportunity for students to expand their interdisciplinary interests with these departments.

**Undergraduate Degree**

**Geography, BA**

**Banner Code: SC-BA-GEOG**

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in geography must complete additional college requirements for the BA degree in COS. Candidates for a degree in geography must also complete 28 credits of approved GGS geography courses with a minimum GPA of 2.00 in addition to 18 credits of electives.

This program of study is offered by the College of Science.

**Degree Requirements**

**Core courses (16 credits):**
Systematics, applications, and regional courses (12 credits):

Choose four courses from the following, including at least one systematic geography (GGS 301, 303, 304, 305) and one regional geography course (e.g. Geography of Latin America):

- GGS 301 - Political Geography Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 308 - Field Mapping Techniques Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3
- GGS Regional Courses at the 300-400 level

Electives (at least 18 credits):

- 18 or more credits consisting of an approved double major, disciplinary minor, interdisciplinary minor, or certificate, or any other coherent 18-credit (minimum) package of courses approved by the advisor and the department chair. No more than 7 credits used to meet the 28-credit requirement may be used to meet this requirement. (Some of these courses may fulfill university-wide general education or college-level requirements.)

Geography, BS

Banner Code: SC-BS-GEOG

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, candidates for a BS degree in geography must complete the following with a minimum GPA of 2.00 in the 46 credits of geography courses in the first group.

This program of study is offered by the College of Science

Degree Requirements

46 credits in geography, including:

16 credits of core courses:
• GGS 102 - Physical Geography Credits: 3
• GGS 103 - Human Geography Credits: 3
• GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
• GGS 310 - Introduction to Digital Cartography Credits: 4
• GGS 415 - Seminar in Geography Credits: 3

12 credits of systematic and regional courses, chosen from:

Choose four courses from the following, including at least one systematic geography (GGS 301, 303, 304, 305) and one regional geography course (e.g. Geography of Latin America). Some of the regional courses fulfill the college-level, non-Western culture requirement:

• GGS 301 - Political Geography Credits: 3
• GGS 303 - Conservation of Resources and Environment Credits: 3
• GGS 304 - Populations Dimensions of Global Change Credits: 3
• GGS 305 - Economic Geography Credits: 3
• GGS Regional Courses at the 300 or 400 level

12 credits of applications and regional courses:

• GGS 311 - Introduction to Geographic Information Systems Credits: 3
• GGS 411 - Advanced Digital Cartography Credits: 3
• GGS 412 - Air Photography Interpretation Credits: 3
and one of the following two courses:
• GGS 416 - Satellite Image Analysis Credits: 3
or
• GGS 463 - Applied Geographic Information Systems Credits: 3

6 credits of electives:

• 6 additional credits of geography electives, which may also include an internship (GGS 480) approved by the program advisor before enrollment

25 or 26 credits of required science, mathematics, statistics, and computer science courses:

• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• MATH 114 - Analytic Geometry and Calculus II Credits: 4
• STAT 250 - Introductory Statistics I Credits: 3
• IT 103 - Introduction to Computing Credits: 3
plus either a GEOL sequence:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4
Global and Environmental Change, BS

Banner Code: SC-BS-GLEC

This program of study is offered by the College of Science.

This interdisciplinary undergraduate program, one of the first of its kind in the nation, distinguishes itself from other degrees in the natural sciences in that it examines from local, regional, and global scales the dynamics of Earth’s systems and their interactions: the geosphere, the atmosphere, the ecosphere, and the sociosphere. In addition, it emphasizes the dynamic and changing Earth systems and the use of Earth observing and remote sensing and related geoinformation technologies in detecting changes. It is jointly offered with the Department of Environmental Science and Policy (esp.gmu.edu).

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. Through the course work listed below, global and environmental change majors satisfy university-wide general education requirements in natural science, quantitative reasoning, information technology, global understanding, social science, and synthesis:

Degree Requirements

Two required ecosphere core courses (8 credits):

students take either the GGS sequence:

- GGS 121 - Dynamic Atmosphere and Hydrosphere Credits: 4
- GGS 122 - Dynamic Geosphere and Ecosphere Credits: 4

or the EVPP sequence:

- EVPP 110 - The Ecosphere: An Introduction to Environmental Science I Credits: 4
- EVPP 111 - The Ecosphere: An Introduction to Environmental Science II Credits: 4

Four required core courses in global and environmental change (12-13 credits):

- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 353 - Observations of the Earth and its Climate Credits: 3

- GGS 302 - Global Environmental Hazards Credits: 3
  or
- GEOL 305 - Environmental Geology Credits: 3

- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
  or
- BIOL 312 - Biostatistics Credits: 4
Four required courses in geosphere and atmosphere (13-15 credits):

students take either

- GEOL 101 - Introductory Geology I Credits: 4
- or the sequence
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1

plus 3 courses from:

- GGS 309 - Meteorology and Climate Credits: 3
- GGS 312 - Physical Climatology Credits: 3
- GGS 314 - Severe and Extreme Weather Credits: 3
- GGS 319 - Air Pollution Credits: 3
- GGS 399 - Selected Topics in Geography Credits: 3
- GEOL 306 - Soil Science Credits: 3
- GEOL 309 - Introduction to Oceanography Credits: 3
- GEOL 317 - Geomorphology Credits: 4
- EVPP 490 - Special Topics in Environmental Science and Policy Credits: 4

Four required courses in ecosphere and sociosphere (12-13 credits):

students take one of these two courses

- EVPP 377 - Applied Ecology Credits: 3
- or
- GGS 321 - Biogeography: Space, Time and Life Credits: 3

plus 1 of these three courses

- GGS 101 - Major World Regions Credits: 3
- GLOA 101 - Introduction to Global Affairs Credits: 3
- CEIE 100 - Environmental Engineering around the World Credits: 3

and 1 of these two courses

- GGS 103 - Human Geography Credits: 3
- ANTH 135 - Becoming Human: Evolution, Cognition, and Culture Credits: 3

and 1 course from this list

- BIOL 318 - Conservation Biology Credits: 3
- BIOL 345 - Plant Ecology Credits: 4
- BIOL 449 - Marine Ecology Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 307 - Sustainable Development Credits: 3
- GGS 322 - Issues in Global Change Credits: 3
- EVPP 336 - Human Dimensions of the Environment Credits: 3
Two required courses in applications and techniques of detecting global change, choose two from (6 credits):

- GGS 313 - GIS Applications for Earth Systems Credits: 3
- GGS 354 - Data Analysis and Global Change Detection Techniques Credits: 3
- GGS 410 - Introduction to Hyperspectral Imaging Credits: 3
- GGS 455 - Environmental Impact Assessment Credits: 3
- GGS 495 - Senior Research in Global and Environmental Change Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3
- GEOL 303 - Field Mapping Techniques Credits: 3

Two required supporting sciences sequence courses beyond general education requirements (8 credits):

- take one of the sequences
- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
  or
- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1
  or
- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
  or
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
  or
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4

Four required supporting mathematics and IT courses (14 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- STAT 250 - Introductory Statistics I Credits: 3
General electives

- General electives (27–31)

Note:

In meeting the above requirements, students may choose a focus in environmental or global change.

Undergraduate Minor

Geographic Information Systems Minor

Banner Code: GIS

This program of study is offered by the College of Science.

Course Work

To receive this minor, students must complete 18 or 19 credits in geography beyond the prerequisite of GGS 102 or 103, with a minimum GPA of 2.00:

Four required courses (12 credits):

- GGS 110 - Maps and Mapping Credits: 3
- GGS 300 - Quantitative Methods for Geographical Analysis Credits: 3
- GGS 311 - Introduction to Geographic Information Systems Credits: 3
- GGS 463 - Applied Geographic Information Systems Credits: 3

Two elective courses chosen from (6–7 credits):

- GGS 310 - Introduction to Digital Cartography Credits: 4
- GGS 411 - Advanced Digital Cartography Credits: 3
- GGS 412 - Air Photography Interpretation Credits: 3
- GGS 416 - Satellite Image Analysis Credits: 3

Note:
With departmental permission, one course with significant geographic information systems (GIS) content may be substituted for one of the above. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 18-19 credits

Geography Minor

Banner Code: GEOG

This program of study is offered by the College of Science.

Course Work

To receive the minor, students must complete 18 credits in geography, 8 credits of which must be unique to the minor, with a minimum GPA of 2.00, distributed as follows:

Two core courses (6 credits):

- GGS 102 - Physical Geography Credits: 3
- or
- GGS 101 - Major World Regions Credits: 3
- GGS 103 - Human Geography Credits: 3

Four additional courses (12 credits):

Classes at the 300 and 400 level, including one systematic course and one regional course from the following lists.

Systematic
- GGS 301 - Political Geography Credits: 3
- GGS 303 - Conservation of Resources and Environment Credits: 3
- GGS 304 - Populations Dimensions of Global Change Credits: 3
- GGS 305 - Economic Geography Credits: 3
- GGS 306 - Urban Geography Credits: 3
- GGS 309 - Meteorology and Climate Credits: 3

Regional
- GGS 315 - Geography of the United States Credits: 3
- GGS 316 - Geography of Latin America Credits: 3
- GGS 320 - Geography of Europe Credits: 3
- GGS 325 - Geography of North Africa and the Middle East Credits: 3
- GGS 330 - Geography of the Soviet Succession States Credits: 3
- GGS 333 - Issues in Regional Geography Credits: 3
Master's Degree

Earth Systems Science, MS

Banner Code: SC-MS-ESSC

This program of study is offered by the College of Science.

This interdisciplinary master’s program is offered jointly by the Department of Geography and Geoinformation Science and the Department of Environmental Science and Policy. The program addresses the growing demand for trained professionals in Earth systems science and applications. The degree emphasizes a research-oriented, global systems approach to studying the atmosphere, hydrosphere, and lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation and quantitative analysis of Earth systems. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools. Students are encouraged to undertake an optional master’s thesis for more in-depth studies or a research project. In the latter case, students must pass a comprehensive exam.

Admission Requirements

Applicants should have a BS degree in Earth, environmental, or physical science. Previous course work should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. They should have a minimum GPA of 3.00 in their undergraduate degree. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Graduate Admissions Processing Center. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required of all foreign applicants.

Degree Requirements

Candidates must successfully complete 30 credits as follows:

9 credits of Earth science core:

select one course from each group:
• CSI 655 - Atmospheric Physics I Credits: 3
  or
• PHYS 575 - Atmospheric Physics I Credits: 3

• GGS 656 - The Hydrosphere Credits: 3
  or
• EVPP 652 - The Hydrosphere Credits: 3

• GGS 657 - The Lithosphere Credits: 3
  or
• GEOL 601 - The Lithosphere Credits: 3

3 credits of Earth observation courses:

• GGS 579 - Remote Sensing Credits: 3

3 credits of quantitative techniques courses:

select one course from the following:

• CSI 654 - Data and Data Systems in the Physical Sciences Credits: 3
• GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
• GGS 560 - Quantitative Methods Credits: 3

3 credits of human and biological perspectives courses:

select one course from the following:

• GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology Credits: 3
• GGS 704 - Spatial Analysis and Modeling of Population Credits: 3
• GGS 721 - Biogeography Credits: 3
• EVPP 577 - Biogeochemistry: A Global Perspective Credits: 3
• EVPP 636 - Gender, Race, and the Natural World Credits: 3

3 credits of colloquium/seminar:

• GGS 792 - Seminar in Earth Systems Science Credits: 2
• GGS 900 - Colloquium Earth Systems Sciences Credits: 1

3–6 credits of research:

• GGS 798 - Research Project in Earth Systems Science Credits: 1-6
  or
• GGS 799 - Thesis Credits: 1-6
General electives

- 3-6 credits of general electives

Total: 30 credits

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

This program of study is offered by the College of Science.

The focus of this program is to prepare students for careers in geography, remote sensing, and GIS and its increasing applications in diverse fields, as well as cartography, visualization, and modeling. This expertise is useful to civil and defense federal agencies, state and local government agencies, private corporations, and educational institutions. Courses concentrate on the techniques of compilation, display and analysis of spatial data, and their applications. Students are also encouraged to select internships as part of their program. More than 400 of our alumni from this program have entered employment in the Washington, D.C., area since 1978.

Research Facilities

The department’s laboratories house SUN workstations, PCs, and Macs with multiple input and output devices to support ArcGIS, ArcMap, ArcView, IDRISI, ERDAS, and other cartography, GIS, and image-processing software packages. In addition, the department houses an extensive collection of spatial data in different formats. Enriching the program is a network of alumni, students, guest lecturers, and adjunct faculty who work in geography-related organizations in the greater Washington, D.C., area. Specialized instructional space for geographic information science is housed in Innovation Hall on the Fairfax Campus. The department also is home to the Center of Excellence in GIS.

Admission Requirements

In addition to meeting all admission requirements for graduate study at Mason, applicants should have a bachelor’s degree in geography, cartography, or equivalent. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE aptitude scores, three letters of recommendation, transcripts of all college course work, and a statement of interest in the degree. The GRE requirement will be waived if the student holds a master’s degree from a U.S. institution. TOEFL scores are required for all foreign applicants. Credit from courses taken at other departments and other universities may be applied to the program with prior approval.

Degree Requirements

Students must complete 30 graduate credits to include 3 to 6 credits of thesis or 36 graduate credits without a thesis. If the nonthesis option is selected, students are required to pass a comprehensive exam.

Four required courses (12 credits):
- GGS 553 - Geographic Information System Credits: 3
- GGS 579 - Remote Sensing Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 689 - Seminar in Geographic Thought and Methodology Credits: 3

**Thesis or Comprehensive Exam:**

- 3–6 credits of thesis (thesis option)
- Comprehensive exam (nonthesis option)

**Electives (12–24 credits):**

- 12–15 credits (thesis option) of elective courses from 500-799 GGS courses or
- 24 credits (nonthesis option) of elective courses from 500-799 GGS courses

**Note:**

Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

**Total: 30 or 36 credits**

**Geoinformatics and Geospatial Intelligence, MS (pending SCHEV approval)**

**Banner Code: SC-MS-GEOI**

This program of study is offered by the College of Science.

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The new MS program in geoinformatics and geospatial intelligence addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data, in order to identify and monitor complex events and phenomena that manifest themselves over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

The MS program in geoinformatics and geospatial intelligence is designed to expose students to fundamental theoretical principles and practical applications involving:
The curriculum structure of the program reflects these three educational components. The GGI MS degree requires a minimum of 33 credits, including a 3-credit MS thesis.

**Admission Requirements**

Applicants to the MS program in geoinformatics and geospatial intelligence should hold a BA or BS degree in a discipline related to the program’s theme from an accredited university, with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program’s requirements, remedial or preparatory courses tailored to student’s needs may be recommended. Applicants must submit a completed GMU graduate application, along with official transcripts, resume, VA domicile classification form (when applicable), official GRE score reports, and TOEFL scores if they are foreign nationals.

**Degree Requirements**

The GGI MS degree requires 33 credit hours, comprising 10 courses plus a 3-credit MS thesis. The courses include 7 mandatory core courses and 3 electives to be selected from a list of offerings (and approved by the program coordinator).

**Core Courses (21 credits):**

- GGS 550 - Geospatial Science Fundamentals Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 787 - Scientific Data Mining for Geoinformatics Credits: 3

**Thesis (3 credits):**

- GGS 799 - Thesis Credits: 1-6 (3 credits)

**Electives (9 credits):**

Students select three courses from the groups below, with no more than two from a single group (i.e. courses are taken from at least two groups):

**Image Analysis:**

- GGS 579 - Remote Sensing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 759 - Topics in Earth Systems Science Credits: 1-6
- GGS 760 - Advanced Remote Sensing Applications Credits: 3
Geographic Information Science (GIS):

- GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 772 - Distributed Geographic Information Systems Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3
- GGS 795 - Seminar in Regional Analysis Credits: 3

Computational Geoinformatics:

- GGS 650 - Introduction to GIS Algorithms and Programming Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3

Total: 33 credits

Master's Level Certificate

Geographic Information Sciences Graduate Certificate

Banner Code: SC-CERG-GISC

This program of study is offered by the College of Science.

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. Graduates have typically been employed in major mapping programs of the Department of the Interior and in the related land management agencies at the federal and state level. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

Admission Requirements

Applicants should submit an application for graduate studies and must meet all requirements for graduate study at Mason. All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply, but students with a background in one of the physical sciences (atmospheric science, hydrology, or geology), geography, environmental science, or engineering are particularly well-suited to undertake this program.

Students with no knowledge of geospatial technology are required to take GGS 550 prior to admission to the program.

Certificate Requirements
Students must successfully complete 15 graduate credits, distributed as follows:

9 credits of required core courses:

- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- CEIE 510 - Geographic Information Systems in Engineering Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

plus one course from this group:

- GGS 553 - Geographic Information System Credits: 3
- CEIE 510 - Geographic Information Systems in Engineering Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

6 credits of electives chosen from:

- GGS 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GGS 655 - Map Design Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 772 - Distributed Geographic Information Systems Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3
- CEIE 685 - Civil Engineering Information Management Credits: 3
- INFS 614 - Database Management Credits: 3
- INFS 755 - Data Mining Credits: 3
- INFS 795 - Special Topics in Data Mining Applications Credits: 3

Note:

Other courses may be used as electives with prior written approval of the department.

Total: 15 credits

Geospatial Intelligence Graduate Certificate

Banner Code: SC-CERG-GI

This program of study is offered by the College of Science.

This graduate certificate program is for persons employed in geospatial intelligence applications (i.e., federal agency and/or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly evolving geospatial intelligence situations.
Admission Requirements

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate’s theme from an accredited university with a minimum GPA of 3.00. Applicants must submit a completed Mason graduate application, along with official transcripts, résumé, Virginia domicile classification form, and TOEFL scores if they are foreign nationals. GRE scores and letters of recommendation are not required but will considerably strengthen an application, if available.

Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student’s needs. Students may not pursue this certificate concurrent with any other graduate degree programs or certificates offered by COS (because this certificate will charge students a differential tuition rate). However, students enrolled in academic programs outside COS may enroll in this certificate program concurrently. Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Certificate Requirements

The Geospatial Intelligence (GI) certificate requires a total of 18 credits, or 6 courses. These comprise five mandatory core courses and one elective. The mandatory core courses reflect the three key science emphases areas of this program, namely geospatial image analysis, spatial analysis, and information technology, as reflected in the following list of mandatory core courses:

- GGS 553 - Geographic Information System Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 684 - Selected Topics in Geospatial Intelligence Credits: 3
- GGS 685 - Capstone Course in Geoinformatics Credits: 3
- INFS 519 - Program Design and Data Structures Credits: 3
- one 3-credit elective selected in consultation with advisor

Total: 18 credits

Remote Sensing and Earth Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP

This program of study is offered by the College of Science.

The Certificate in Remote Sensing and Earth Image Processing program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. The certificate requires students to complete 15 credits of GGS graduate courses. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

This professional certificate program charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard Mason graduate tuition. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.
Admission Requirements

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from an accredited university, with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the COS Graduate Admissions Processing Center. TOEFL scores are required of all international applicants.

Certificate Requirements

Required Core Courses (12 credits):

- GGS 579 - Remote Sensing Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 757 - Techniques and Algorithms in Earth Observing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3

Elective Courses (3 credits):

Choose one of the following or another course approved by coordinator

- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- GGS 760 - Advanced Remote Sensing Applications Credits: 3
- GGS 840 - Hyperspectral Imaging Applications Credits: 3

Total: 15 credits

Doctoral Degree

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

This program of study is offered by the College of Science.
The innovative PhD in Earth Systems and Geoinformation Sciences (ESGS) Program is based on the integration of the scientific disciplines in geosystems, geosciences, and geography, with the two slightly more technology-oriented scientific disciplines in geoinformation sciences: remote sensing, and geographic information systems (GIS). Graduates from the ESGS doctoral program will be qualified to serve as lead scientists in a wide range of activities involving geosciences, geography, GIS, and remote sensing.

The continual expansion of the NASA Earth observation satellite constellation, the development and expansion of the spatial data infrastructure at federal agencies, and the need to analyze these Earth-oriented data to achieve environmental and economic objectives ensure a constant need in the foreseeable future for qualified scientists in these fields. Students receive broad-based training in the geosciences and geography, as well as concentrated courses in computation and geoinformation sciences.

The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today’s research arena. In addition, students also receive training in teaching, qualifying them to join academic units in more traditional disciplinary and instruction oriented settings or in multidisciplinary programs.

**Admission Requirements**

This program is intended for graduates who hold a BS or BA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing and Earth observing, hydrology, oceanography, geography, or a related field with a minimum GPA of 3.00. Applicants should have knowledge of calculus and a working proficiency with a computer programming language.

Knowledge of mathematics through ordinary differential equations is preferred. Interested applicants should contact the academic coordinator or the GGS chair for more specific advice. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement to the COS Fairfax Campus Graduate Admissions Processing Center.

Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. The GRE requirement for admission to the doctoral program may be waived if the student holds a master’s degree from an accredited U.S. institution. TOEFL scores are required of all international applicants. GRE-GEN scores are required of students wishing to be considered for a GMU Presidential Fellowship.

**Degree Requirements**

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog. The curriculum consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program as long as those credits have not been applied toward a previous degree.

All students are required to take 18 credits of courses selected from a set of three core areas: computational-quantitative, geosciences-geography, and geoinformation. Students also take 6 credits of courses in one of the four areas of emphasis listed below:

- Geosciences (GSC)
- Geography (GEOG)
- Remote Sensing and Earth Observation (RS)
- Geographic Information Systems (GIS)

Students also have the option of taking courses from two or more emphasis areas, subject to the program director’s approval. Additional requirements include a single credit of colloquium taken three times, and electives relevant to the student’s focus.
All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved, the student is formally advanced to doctoral candidacy. The degree will be awarded on completion of the required coursework and approval of a PhD thesis that makes an original and significant contribution to the field.

**Computational-Quantitative Core (6 credits):**

Choose from the following:

- CSI 600 - Quantitative Foundations for Computational Sciences Credits: 3
- CSI 700 - Numerical Methods Credits: 3
- CSI 703 - Scientific and Statistical Visualization Credits: 3
- CSI 710 - Scientific Databases Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 791 - Advanced Spatial Statistics Credits: 3
- GGS 560 - Quantitative Methods Credits: 3

**Geosciences-Geography Core (6 credits):**

6 credits selected from the following:

- GGS 657 - The Lithosphere Credits: 3
  or
- GEOL 601 - The Lithosphere Credits: 3
- GGS 704 - Spatial Analysis and Modeling of Population Credits: 3
- GGS 721 - Biogeography Credits: 3
- CSI 655 - Atmospheric Physics I Credits: 3
  or
- GGS 670 - Introduction to Atmosphere and Weather Credits: 3
- GGS 656 - The Hydrosphere Credits: 3
  or
- EVPP 652 - The Hydrosphere Credits: 3
  or
- GGS 725 - Advanced Hydrosphere Credits: 3

**Geoinformation Sciences Core (6 credits):**

Choose one course from the GIS group:
- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3

and one course from the Remote Sensing group:
- GGS 579 - Remote Sensing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3

Emphasis Courses (6 credits):

Two courses selected from those listed below for the desired area of emphasis. Students choosing not to select a specific area will be assisted by their faculty advisor in developing a curriculum plan by combining courses from two or more of the following areas (the curriculum plan must be approved by the program director):

Geosciences (GSC):

- GGS 656 - The Hydrosphere Credits: 3
- GGS 721 - Biogeography Credits: 3
- GGS 725 - Advanced Hydrosphere Credits: 3
- CSI 655 - Atmospheric Physics I Credits: 3
- EVPP 550 - Waterscape Ecology and Management Credits: 3
- GEOL 601 - The Lithosphere Credits: 3

Geography (GEOG):

- GGS 531 - Land-Use Modeling Techniques and Applications Credits: 3
- GGS 540 - Medical Geography Credits: 3
- GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology Credits: 3
- GGS 560 - Quantitative Methods Credits: 3
- GGS 721 - Biogeography Credits: 3
- PUBP 810 - Regional Development and Transportation Policy Credits: 4
- PUBP 811 - Applied Methods in Regional Development and Transportation Policy Credits: 4
- EVPP 503 - Field Mapping Techniques Credits: 3
- EVPP 741 - Advanced Topics in Environmental Science and Public Policy Credits: 0-4

Remote Sensing and Earth Observation (RS):

- GGS 579 - Remote Sensing Credits: 3
- GGS 658 - Terrain Mapping Credits: 3
- GGS 740 - Hyperspectral Imaging Systems Credits: 3
- GGS 754 - Earth Science Data and Advanced Data Analysis Credits: 3
- GGS 756 - Physical Principles of Remote Sensing Credits: 3
- GGS 757 - Techniques and Algorithms in Earth Observing Credits: 3
- GGS 680 - Earth Image Processing Credits: 3

Geographic Information Systems (GIS):

- GGS 553 - Geographic Information System Credits: 3
- GGS 563 - Advanced Geographic Information Systems Credits: 3
- GGS 590 - Selected Topics in Geography Credits: 1-3
- GGS 653 - Geographic Information Analysis Credits: 3
- GGS 661 - Map Projections and Coordinate Systems Credits: 3
- GGS 664 - Spatial Data Structures Credits: 3
- GGS 671 - Algorithms and Modeling in GIS Credits: 3
- GGS 772 - Distributed Geographic Information Systems Credits: 3
- GGS 773 - Interoperability of Geographic Information Systems Credits: 3

Electives (21 credits):

- 21 credits of approved electives

Colloquium (3 credits):

3 credits total, GGS 900 taken 3 times:

- GGS 900 - Colloquium Earth Systems Sciences Credits: 1

Dissertation Research (24 credits):

24 credits, with at least 12 credits in GGS 999:

- GGS 998 - Dissertation Proposal Credits: 1-12
- GGS 999 - Dissertation Credits: 1-12

Total: 72 credits

Mathematical Sciences
Faculty

Professors: Alligood, Colonna, Kulesza (undergraduate coordinator), B. Lawrence, J. Lawrence, Levy, Morris, Polyak, Sachs, Saperstone (acting chair), Sauer (COS distinguished scholar), Shapiro (associate chair), Singman, Soltan, Walnut (graduate coordinator)

Associate professors: Agnarsson, Anderson, Goldin, Kiley, Lamba, Lim, Lin, Sander, Seshaiyer, Wanner, Zoltek

Assistant professors: Emelianenko, Griva, Kim, Napoletani

Adjuncts: Belle, Goetz, Morse, Preston, Nefessi, Sausville, Shaw, Sternberg, Tascovic, Roberts, Yazigi, Zampedro, Zhang

Admin professional: O’Brien

Term instructors: Crossin, Goldman, Granfield, Matveev, O’Beirne

Affiliates: Nash

Emeritus: Cabell

The department offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or pursue a program focused on either actuarial mathematics or applied mathematics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Graduating seniors are required to have an exit interview.

Course Work

The Mathematical Sciences Department offers all course work designated MATH in the Courses chapter of this catalog.

Writing-Intensive Requirement

Mason policy requires all students to complete at least one course designated as “writing intensive” in their majors at the 300 level or above. Students majoring in mathematics fulfill this requirement by successfully completing MATH 290.

Math Tutoring Center

The department manages the Math Tutoring Center, which offers free tutoring for first- and second-year math courses (math.gmu.edu/tutorcenter.htm). Tutoring is given by advanced mathematics students and available on a drop-in basis with daytime and evening hours throughout the term.

Math Learning Center

The Math Learning Center (math.gmu.edu/mathlearningcenter.htm) for a small fee offers self-paced and classroom noncredit tutorial programs for students who do not place into the math course they need. Special tutors and tutorial software are available to those enrolled in the program. Successful completion of the relevant program enables students to enroll in Math 105, 106, 108, 110, 111, 112, or 125.
Honors Program in Mathematics

Mathematics majors who have maintained a GPA of at least 3.5 in Mathematics courses and a GPA of 3.5 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite. Admission to the program will be monitored by the undergraduate committee. To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.5 in mathematics courses and successfully complete MATH 405 and 406 with an average GPA of at least 3.5 in these two courses.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2892, e-mail gseadmit@gmu.edu, or go to gse.gmu.edu.

Certificate in College Teaching

A student enrolled in the MS or PhD program in mathematics who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the Higher Education Program’s College Teaching Graduate Certificate, offered through the College of Humanities and Social Sciences (LA-CERG-CTCH). Credit can be earned for CTCH 685 (practicum) by working one semester as a graduate teaching assistant in the Mathematics Department.

Mathematics, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Mathematics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.

Undergraduate Degree

Mathematics, BA

Banner Code: SC-BA-MATH

Students may select an optional concentration in mathematics education; students who do not select this concentration study traditional mathematics.

Students must fulfill all requirements for bachelor's degrees. In addition to satisfying university-wide general education requirements and requirements for the BA degree in COS, students must satisfy the requirements listed below.

This program of study is offered by the College of Science.

Degree Requirements
Core Courses (26 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
  - MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
  - MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3

Electives (12 credits):

- 12 credits of electives in MATH numbered above 300

Concentrations

Students may select an optional concentration in education.

▲ Concentration in Education (MTHE)

Students selecting the education concentration take the following coursework in place of the 12 credits of MATH electives listed above.

- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- MATH 302 - Foundations of Geometry Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 321 - Abstract Algebra Credits: 3
- MATH 351 - Probability Credits: 3

Note:
The above courses satisfy the university-wide requirement in quantitative reasoning. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.

Mathematics, BS

Banner Code: SC-BS-MATH

Students may select an optional concentration in actuarial mathematics (AMT), applied mathematics (ACTM), or mathematics education (MTHE). Students who do not select a concentration study traditional mathematics.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students majoring in mathematics must satisfy the requirements listed below. (These courses satisfy the university-wide requirement in quantitative reasoning and natural sciences. A maximum of 6 credits of grades below 2.00 in course work designated MATH may be applied toward the major.)

This program of study is offered by the College of Science.

Degree Requirements

- Program and concentration-specific requirements

Mathematics Core (23 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3
- MATH 322 - Advanced Linear Algebra Credits: 3

Science (8 credits):

For all students, a one-year sequence of a laboratory science selected from one of the following:

- Biology sequence:
  - BIOL 213 - Cell Structure and Function Credits: 4
    and
  - BIOL 303 - Animal Biology Credits: 4
    or
• BIOL 304 - Plant Biology Credits: 4

Chemistry sequence:
• CHEM 211 - General Chemistry Credits: 4
• CHEM 212 - General Chemistry Credits: 4

Geology sequence:
• GEOL 101 - Introductory Geology I Credits: 4
• GEOL 102 - Introductory Geology II Credits: 4

Physics sequence:
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1

Computational Skills (4 or 7 credits):
• All students take   CS 112 - Introduction to Computer Programming Credits: 4
Students in the actuarial concentration also take:
• STAT 362 - Introduction to Computer Statistical Packages Credits: 3

Additional Mathematics (24 credits):
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 316 - Advanced Calculus II Credits: 3
• MATH 321 - Abstract Algebra Credits: 3
  or
• MATH 431 - Topology Credits: 3
• 12 credits of course work above MATH 300

Departmental Non-mathematical Requirements

• Students with no selected concentration or those undertaking either the applied mathematics concentration or the mathematics education concentration must select a second year of science from one of the following three options: a second sequence from the list above; 6 credits from more advanced courses in biology, chemistry, geology, or physics (but only courses acceptable for credit toward a natural science major); or the 4-credit option PHYS 262, 263.
• Students with an actuarial concentration must have 3 credits of ACCT 203 and 6 credits of economics, including ECON 103 (3 credits) and either ECON 306 or 310, or FNAN 321. (The Economics Department has agreed to waive ECON 104 as a prerequisite for ECON 306 for mathematics majors.)
• The department recommends proficiency in French, German, or Russian.

Concentrations
Students may select an optional concentration in applied mathematics (AMT), actuarial mathematics (ACTM), or mathematics education (MTHE). Students selecting a concentration take the courses listed below instead of the 24 credits of additional mathematics taken by students without a concentration. The concentration requirements comprise 24 credits for the AMT and ACTM concentrations, and 39 credits for the MTHE concentration.

▲ Concentration in Applied Mathematics (AMT)

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 315 - Advanced Calculus I Credits: 3
- MATH 351 - Probability Credits: 3
- MATH 413 - Modern Applied Mathematics I Credits: 3
- MATH 414 - Modern Applied Mathematics II Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- 6 credits of course work above MATH 300

Total: 24 credits

▲ Concentration in Actuarial Mathematics (ACTM)

- MATH 351 - Probability Credits: 3
- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 442 - Stochastic Operations Research Credits: 3
  or
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 551 - Regression and Time Series Credits: 3
- MATH 554 - Financial Mathematics Credits: 3
- MATH 555 - Actuarial Modeling I Credits: 3
- MATH 556 - Actuarial Modeling II Credits: 3

Total: 24 credits

▲ Concentration in Mathematics Education (MTHE)

Note: EDCI 490 and EDUC 372 also satisfy the general education requirements for synthesis and social science, respectively.

- EDCI 372 - Teaching Mathematics in the Secondary School Credits: 3
• EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
• EDCI 490 - Student Teaching in Education Credits: 6
• EDRD 419 - Literacy in the Content Areas Credits: 3
• EDUC 372 - Human Development, Learning, and Teaching Credits: 3
• EDUC 422 - Foundations of Secondary Education Credits: 3
• MATH 125 - Discrete Mathematics I Credits: 3
• MATH 302 - Foundations of Geometry Credits: 3
• MATH 315 - Advanced Calculus I Credits: 3
• MATH 321 - Abstract Algebra Credits: 3
• MATH 351 - Probability Credits: 3
• one 3-credit course above MATH 300

Total: 39 credits

General Comments

For math majors:

MATH 105, 106, 108, 110, 111, 112, 271, and 272 cannot be used as substitutes for any requirements of the major in mathematics.

For non-math majors:

• MATH 108, 110, and 111 are designed for students in the social and behavioral sciences.
• Liberal arts majors are advised to take MATH 106, 110, or 111.
• Students in the natural sciences who plan to do graduate work are advised to add courses from MATH 313, 314, 351, 352, 382, 441, 442, 446, and 447.

For both math majors and non-math majors:

• MATH 105, 106, 108, 110, 111, 112, 113 have a qualifying score on the Math Placement Test as a prerequisite. The Math Placement Test is given frequently; for the schedule, inquire at the department office or check the Math Department web site.
• Students who do not achieve the necessary test score needed to take a math course may go to the Math Learning Center (see below), or they may study and retake the test on their own. If they do not complete the relevant program in the Learning Center or do not achieve the necessary score after retaking the test, they are dropped from the course. Depending on their test scores, students who do not place into MATH 113 will be advised to take MATH 105 or visit the Math Learning Center to prepare for MATH 105.
• MATH 105 does not fulfill the university quantitative reasoning requirement.
• Students may not receive credit for both MATH 214 and 216; both MATH 213 and 215; both MATH 351 and STAT 344; and both MATH 352 and STAT 354.
• After receiving a grade of C or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:
Undergraduate Minor

Mathematics for School of Management Students Minor

Banner Code: MSOM

This program of study is offered by the College of Science.

Course Work

To receive this minor, students must complete 20 credits with a minimum GPA of 2.00, including:

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 351 - Probability Credits: 3

One course chosen from:

- MATH 352 - Statistics Credits: 3
- MATH 441 - Deterministic Operations Research Credits: 3
- MATH 554 - Financial Mathematics Credits: 3

Note:

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

Total: 20 credits

Mathematics Minor

Banner Code: MATH
To receive a minor in mathematics, students must complete 21 credits that include a total of 8 hours of math that are not applied toward the major. These courses must have a minimum GPA of 2.00. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Five required courses (15 credits):

- MATH 125 - Discrete Mathematics I Credits: 3
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
  or
- MATH 215 - Analytic Geometry and Calculus III (Honors) Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
  or
- MATH 216 - Theory of Differential Equations Credits: 3
- MATH 290 - Introduction to Advanced Mathematics Credits: 3

One math elective course (3 credits):

- One 3-credit math course that requires MATH 290 as a prerequisite

One general elective course (3 credits):

- one 3-credit math course at the 300 or 400 level, or
- STAT 344 - Probability and Statistics for Engineers and Scientists I Credits: 3

Note:

Students must earn a 2.00 or better in MATH 290 and the courses chosen to fulfill the second requirement.

Total: 21 credits

Bachelor's/Accelerated Master's Program
Mathematics, BS/Mathematics, Accelerated MS

This five-year degree program allows academically strong students to obtain a BS and MS by successfully completing 144 credits within five academic years and one summer. Well-prepared students are admitted to this program on completion of 90 credits, take selected graduate courses during their senior year, and are able to use up to 6 graduate credits to partially satisfy requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory graduate-level performance (3.00) in graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met.

This program of study is offered by the College of Science.

Master's Degree

Mathematics, MS

Banner Code: SC-MS-MATH

The Department of Mathematical Sciences offers courses in pure and applied mathematics leading to the master of science degree in mathematics. The program offers a standard mathematics program and an emphasis in computational and applied mathematics.

This program of study is offered by the College of Science.

Assistantships

A limited number of merit-based teaching assistantships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and Math Learning Center.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the MS degree must have taken an upper-division course in advanced calculus (equivalent to MATH 315) and an upper-division course in linear algebra (equivalent to MATH 322). Students intending to go into the computational and applied mathematics emphasis must have some computer knowledge.

Degree Requirements

Standard Program

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
• Six approved graduate courses (18 credits), at least four of which are MATH. All six courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee. Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (see below).
• Research and creative component (6 credits; see below)

Total: 30 credits

Emphasis in Computational and Applied Mathematics

The emphasis in computational and applied mathematics provides students with the analytical skills and background in computational techniques most relevant to the needs of business, industry, and government. The large number of high-technology firms, telecommunications firms, and government laboratories in the Washington, D.C., metropolitan area gives students an opportunity to gain practical experience and secure employment after graduation.

In addition to fulfilling degree requirements for graduate study, students must complete 30 credits distributed as follows:

- MATH 621 - Algebra I Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3
  
  or
  
- MATH 678 - Partial Differential Equations Credits: 3
- MATH 685 - Numerical Methods Credits: 3
- Four approved graduate courses (12 credits), at least two of which are MATH courses. All four courses must be approved by the student’s advisor. Courses not listed as MATH courses must be approved by the Graduate Committee.
- Research/creative component (6 credits; see below)

Total: 30 credits

Research and Creative Component

A student may fulfill the research and creative component of the MS degree in any one of the following three ways:

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799. A thesis proposal and thesis are submitted in accordance with university rules. The student must give an oral defense of the thesis to the committee and the Mason community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.
Paper Presentation Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the department; one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work done in fulfillment of course requirements. Students choosing this option take 6 additional credits of electives. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

Preliminary Exam for the PhD

The research and creative component of the MS degree can also be fulfilled by passing the preliminary written examination for the Mathematics PhD degree.

Master's Level Certificate

Actuarial Sciences Graduate Certificate

Banner Code: SC-CERG-ACTS

The certificate in actuarial sciences is designed to serve students and professionals in the Washington, D.C., area who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the Society of Actuaries (SOA) Exam FM (formerly Course 2), SOA Exam M (formerly Course 3), SOA Exam C (formerly Course 4), VEE for applied statistics (formerly part of Course 4), and Exam A-1 and EA-1A (for those pursuing EA designation from the U.S. Treasury). The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Preparation for the first exam is achieved in meeting the prerequisites for the certificate courses in the area of probability and statistics. Students enrolling in the actuarial sciences certificate program must complete the 6 course (18 credit) curriculum requirement described below.

This program of study is offered by the College of Science.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue a certificate in the actuarial sciences must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203), a calculus-based course in probability (equivalent to MATH 351), and statistics (equivalent to MATH 352). Completion of the SOA Exam P is also sufficient preparation for the certificate program.

Certificate Requirements

Core Courses (12 credits):
• MATH 551 - Regression and Time Series Credits: 3
• MATH 554 - Financial Mathematics Credits: 3
• MATH 555 - Actuarial Modeling I Credits: 3
• MATH 556 - Actuarial Modeling II Credits: 3

Electives (6 credits from the following):

• MATH 653 - Actuarial Modeling III Credits: 3
• MATH 654 - Construction and Evaluation of Actuarial Models Credits: 3
• MATH 655 - Pension Valuation Credits: 3 (recommended only for students who wish to pursue a career as a pension actuary)
• any other elective course approved by the Graduate Committee

Total: 18 credits

Notes:

The graduate certificate course work provides preparation for SOA and CAS exams as follows. MATH 551 is the SOA VEE for Applied Statistics and is preparation for part of the CAS Exam 3. MATH 554 covers all of the SOA Exam FM material (as well as CAS Exam 2). MATH 555, 556, and 653 cover all of the Exam M material and much of the CAS Exam 3 as well as the EA1 exam. MATH 654 covers most of the SOA Exam C material (as well as CAS Exam 4). MATH 655 covers all of the EA2-A Exam material and some of the SOA Exam 8.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the certificate program in actuarial sciences and another graduate degree program in mathematics can count actuarial mathematics courses toward that degree according to the following rules:

• None of the actuarial mathematics courses MATH 551, 554, 555, 556, 653, 654, and 655 can count toward the PhD degree in mathematics.
• None of the actuarial mathematics courses MATH 551, 554, and 655 can count toward the MS degree in mathematics.
• Up to four of the actuarial mathematics courses MATH 555, 556, 653, and 654 can count toward the MS degree in mathematics provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one actuarial mathematics course from the list toward the MS degree. In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator.

Counting Actuarial Courses toward the Statistical Sciences MS Degree

A student enrolled in the certificate program in actuarial sciences and in the MS program in statistical science can count MATH 555 and 556 as approved non-STAT elective courses and can count MATH 653 and 654 as STAT electives when designing a
curriculum for this degree. The full curriculum should be designed in consultation with the student’s Statistics Department advisor.

**Doctoral Degree**

**Mathematics, PhD**

**Banner Code: SC-PHD-MATH**

The Department of Mathematical Sciences offers a PhD in mathematics. The program begins with graduate course work and advanced seminars and culminates in a thesis consisting of original research in mathematics. The PhD program in mathematics is designed to train students as research mathematicians for careers in academia, government, and private industry.

This program of study is offered by the College of Science.

**Fellowships and Assistantships**

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center and the Math Learning Center.

**Admission Requirements**

It is expected that all applicants have a recent bachelor’s degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322), an upper-division course in advanced calculus (equivalent to MATH 315), and familiarity with basic group theory (such as presented in MATH 321) are encouraged to apply to the MS program in mathematics. Such students may subsequently apply to the PhD program when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement to the COS Fairfax Campus Graduate Admissions Processing Center. TOEFL scores are required for all international applicants. GRE scores are recommended but not required.

**Preliminary Written and Qualifying Exams**

Students are required to take a preliminary written exam after completing the core courses, usually by the end of their second year. The exam is based on material presented in three of the four required courses (the student may choose which topic to exclude). These exams are offered two times a year. Students may take the exam as often as they like. A grade of “pass” on the preliminary written exam is sufficient to satisfy the creative component of the master’s degree in mathematics.

Students are required to take a qualifying exam after passing the preliminary written exam. This exam will have oral and written components. After passing the preliminary written exam, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam will cover the equivalent of approximately four courses of material from the major area and three courses from the minor area.

**Dissertation and Committee**
Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 (Doctoral Dissertation Proposal). The proposal must be approved by the thesis committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the department. After successfully completing this requirement, the student advances to doctoral candidacy.

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work and 12–24 credits of dissertation research. For those holding master’s degrees, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses completed.

Graduate mathematics courses taken elsewhere may be counted toward the degree either as transfer credit or through reduction of credit. Classes at the 500 level and actuarial classes MATH 653, 654, and 655 cannot be used for credit toward a PhD in mathematics.

Students must complete the following curriculum requirements:

Core Courses (12 credits):

- MATH 621 - Algebra I Credits: 3
- MATH 631 - Topology I: Topology of Metric Spaces Credits: 3
- MATH 675 - Linear Analysis I Credits: 3
- MATH 677 - Ordinary Differential Equations Credits: 3

Preliminary Written Exam

Students are required to take a preliminary written exam based on material in three core courses of their choice.

Portions of the preliminary written exam may be waived with approval of the graduate coordinator if the student enters the PhD program with a master’s degree in mathematics.

Qualifying Exam

Students take a qualifying exam after passing the preliminary exam. The qualifying exam will have oral and written components.

Seminar (6–9 credits):

All PhD students are required to take a 1-credit seminar (MATH 795) each semester. A student entering without a master’s degree in mathematics should expect to take a total of 8 to 9 credits of MATH 795.

- MATH 795 - Graduate Seminar Credits: 1
Research (12–24 credits):

- MATH 998 - PhD Thesis Proposal Credits: 1-9
- MATH 999 - PhD Thesis Credits Credits: 1-12

**Advancement to Candidacy**

Approximately one semester after passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 (Doctoral Dissertation Proposal). The proposal must be approved by the thesis committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the department. After successfully completing this requirement, the student advances to doctoral candidacy.

**Doctoral Dissertation**

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate’s mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the thesis is completed, the committee will review the thesis and examine the student in a public oral thesis defense.

**Total: 72 credits**

■ **Molecular and Microbiology**

Phone: 703-993-4263
Web: gmu.edu/departments/mmb

**Faculty**

**Chair:** Willett

**Professors:** Bailey (distinguished), Kashanchi, Liotta, Petricoin, Popov, Soyfer (distinguished university), Willett, Wu

**Associate professors:** Baranova, Christensen, Fryxell, Grant

**Assistant professors:** Cox, Kehn-Hall, van Hoek

**Adjunct faculty:** Baker, McClintock, Pitt

**Emeritus:** Isbister, Royt

**Course Work**

The department offers all course work designated BIOL and BIOS in the Courses chapter of this catalog.
Other Undergraduate Programs

The Molecular and Microbiology department works closely with and provides administrative input to the Biology Undergraduate Program, through which the BA and BS degrees in Biology are offered. Refer to the Biology Undergraduate Program section for more information on bachelors degrees in Biology.

Policy on Using Departmental Laboratories

Only authorized experiments and exercises may be carried out in any departmental research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Biology, Bachelor's/Accelerated Master's Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS within an accelerated time frame. This program is open only to those students who wish to pursue the master’s degree concentrations in microbiology or molecular biology. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is completed.

Students with an overall GPA of at least 3.00 may apply for provisional acceptance to the accelerated master’s program after completing BIOL 213, 303, 304, 305/306, 307, and 311; and CHEM 315 and 318; or after completing 75 undergraduate credits including BIOL 494. Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

After completing 120 credits and all requirements for the bachelor’s degree and filing the Graduation Intent Form, students are awarded a bachelor’s degree. Accelerated master’s students must then submit scores on the GRE general exam to have the provisional qualifier removed. Ordinarily, students should receive a minimum combined score of 1,100 on the verbal and quantitative portions of the exam.

Master's Degree

Biology, MS

Banner Code: SC-MS-BIOL

This program of study is offered by the College of Science.
This program provides advanced training for college graduates or professionals seeking careers in the biotechnology industry or biodefense, as well as more traditional careers in biomedical research, teaching, evolutionary biology, and animal biology. Master’s level concentrations are available in molecular biology (MOB); microbiology and infectious disease (MID); bioinformatics and computational biology (BCB), and systematics and evolutionary biology (SEB). Alternatively, students may choose the program in general biological sciences, which allows flexibility to specialize in additional areas.

**Admission Requirements**

Applicants must have a bachelor’s degree in biology or its equivalent, except for students who choose the BCB concentration. Students who choose the BCB concentration must have an undergraduate degree in any natural science, mathematics, engineering, or computer science. It is preferred that students who choose the BCB concentration have some undergraduate course work in cell biology, molecular biology, genetics, and biochemistry (two to four upper-division courses), plus some undergraduate course work in computer science (two to four courses that include substantial programming projects). Students without this background may be asked to remedy their deficiencies. Students who choose the concentration in microbiology and infectious disease must have a lecture and lab course in microbiology and a lecture course in biochemistry. All MS concentrations require a GPA of 3.00 in biology course work or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the general GRE. Successful applicants usually score at least 1,100 on the verbal and quantitative sections of the GRE. Admission is contingent on acceptance by a faculty research advisor.

**Degree Requirements**

An advisory committee and the student work together to develop a program of study that best fits the student’s background and interests. At least one member of the committee must be a member of the Molecular and Microbiology Department. The student must submit a program of study to the program director for approval within the first 12 credits of graduate work and must complete at least 30 graduate credits.

Students have the option to complete a thesis (3 to 6 credits of BIOL 799) or a research project (1 to 3 credits of BIOL 798). According to Mason graduate policies, the same quality of work is expected of students regardless of their chosen option; that is, the MS thesis option or the MS project option. In general, the MS thesis is most appropriate for students planning or considering a research career. The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. The requirements differ primarily at the conclusion of the project, when students pursuing the project option must successfully complete written and oral comprehensive exams. Students pursuing the thesis option must write a formal thesis that meets the requirements of the graduate school, and must defend their thesis and present their results in a public seminar.

Students in the molecular biology, microbiology and infectious disease, and the bioinformatics and computational biology concentrations are required to present one research paper at a meeting or conference any time before graduation.

**Recommended Electives**

The following list, for students in the molecular biology concentration or the bioinformatics and computational biology concentration, is provided as a suggestion only and is not intended to be complete. Note that two courses covering substantially similar topics may not both be counted in the student’s course plan. Students should consult their faculty research advisor or the graduate program coordinator when preparing a course plan.

- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 575 - Selected Topics in Genetics Credits: 1-4
- BIOL 578 - Mutation, DNA Repair, and Environmental Contamination Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
• BIOL 585 - Eukaryotic Cell Biology Laboratory Credits: 1-2
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOL 793 - Research in Biology Credits: 1-3
• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3
• BIOS 767 - Molecular Evolution Credits: 4

Program in Biological Sciences

This program is for students who wish to specialize in an area not covered by the concentrations described below.

1–3 credits of research methodology:

• BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
• BIOS 702 - Research Methods Credits: 3

2 credits of seminar:

• BIOL 692 - Seminar in Biology Credits: 1
  or
• BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

  either 1-3 credits of:
• BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of:
• BIOL 799 - Thesis Credits: 1-6

19–26 credits of electives:

• 19–26 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits
Concentrations

Master’s level concentrations are available in molecular biology (MOB); microbiology and infectious disease (MID); bioinformatics and computational biology (BCB), and systematics and evolutionary biology (SEB). The BCB, MOB, and SEB concentrations each require 2-4 credits of molecular techniques courses as explained below.

Molecular Techniques Requirement

Students in the BCB, MOB, and SEB concentrations must satisfy the molecular techniques requirement by taking 2-4 credits of BIOL 668 or BIOS 740. Special topics courses, such as BIOL 575 or 691, may also be approved for this requirement by the program director, but only in semesters in which they are primarily a laboratory course of at least two credits with substantial content of techniques in molecular biology.

▲ Concentration in Bioinformatics and Computational Biology (BCB)

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

9 credits of core biology:

- BIOL 580 - Computer Applications for the Life Sciences Credits: 3
  or
- BINF 630 - Bioinformatics Methods Credits: 3
- BINF 634 - Bioinformatics Programming Credits: 3
- BIOS 741 - Genomics Credits: 3

2–4 credits of molecular techniques:

- 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1
1–6 credits of research:

either 1-3 credits of:

- BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of:
- BIOL 799 - Thesis Credits: 1-6

6–15 credits of electives:

- 6–15 credits in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

▲ Concentration in Microbiology and Infectious Disease (MID)

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
  or
- BIOS 702 - Research Methods Credits: 3

12 credits of core biology:

- BIOL 563 - Virology Credits: 3
- BIOL 669 - Pathogenic Microbiology Credits: 3
- BIOL 715 - Microbial Physiology Credits: 3
- BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

2 credits of seminar:

- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:
either 1-3 credits of:

- BIOL 798 - Master's Research Project Credits: 1-3
- BIOL 799 - Thesis Credits: 1-6

7–14 credits of electives to be chosen from the following:

- BIOL 564 - Techniques in Virology Credits: 2
- BIOL 553 - Advanced Topics in Immunology Credits: 3
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 720 - Microbial Metabolism Credits: 3
- BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
- BIOS 710 - Current Topics in Bioscience Credits: 1-3

Total: 30 credits

▲ Concentration in Molecular Biology (MOB)

1–3 credits of research methodology:

- BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
- BIOS 702 - Research Methods Credits: 3

13 credits of core biology:

- BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
- BIOL 583 - General Biochemistry Credits: 4
- BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
- BIOS 767 - Molecular Evolution Credits: 4

3 credits of bioinformatics:
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
  or
• BINF 630 - Bioinformatics Methods Credits: 3
  or
• BINF 634 - Bioinformatics Programming Credits: 3

2–4 credits of molecular techniques:
  • 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:
  • BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:
  either 1-3 credits of:
  • BIOL 798 - Master's Research Project Credits: 1-3
    or 3-6 credits of:
  • BIOL 799 - Thesis Credits: 1-6

0-8 credits of electives:
  • 0-8 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

▲ Concentration in Systematics and Evolutionary Biology (SEB)

1–3 credits of research methodology:
  • BIOL 690 - Introduction to Graduate Studies in Biology Credits: 1-2
    or
  • BIOS 702 - Research Methods Credits: 3
9-10 credits of core biology:

- BIOL 574 - Population Genetics Credits: 4
- BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
  or
- BIOS 767 - Molecular Evolution Credits: 4
- plus 3–4 credits of organismal biology

2–4 credits of molecular techniques:

- 2–4 credits of courses satisfying the Molecular Techniques requirement

2 credits of seminar:

- BIOL 692 - Seminar in Biology Credits: 1
  or
- BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology Credits: 1

1–6 credits of research:

  either 1-3 credits of:
  - BIOL 798 - Master's Research Project Credits: 1-3
  or 3-6 credits of:
  - BIOL 799 - Thesis Credits: 1-6

5–14 credits of electives:

- 5–14 credits of electives in BIOL, BIOS, or related areas as approved by the student’s advisor and the program director

Total: 30 credits

**Doctoral Degree**

**Biosciences, PhD**
This program of study is offered by the College of Science.

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. The area of emphasis in functional genomics and biotechnology includes microarray analysis of gene expression, sequencing and analysis of genes, gene family evolution, mechanisms of toxicology and mutagenesis, and biotechnological applications. The concentration in microbiology and infectious disease stresses molecular mechanisms of infectious disease, genomic and proteomic analysis of pathogens, and the physiology and metabolism of pathogens. The academic component is a three-tiered structure. The first tier provides a set of four core courses designed to advance research skills across all disciplines. The second tier comprises four or five core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

Admission Requirements

In addition to materials required of all applicants for graduate study, the following is also required:

- Minimum 3.25 GPA in previous course work with significant training in the biological sciences. A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general and biology or biochemistry subject exams taken within the past five years prior to date of application submission.

An interview may be required. Applications should be submitted by February 1 for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends. Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program’s fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

Candidates for the PhD in biosciences must complete a minimum of 72 graduate credits. For students entering the doctoral program with a master’s of science degree, the number of credits required may be reduced by a maximum of 30 with approval of the advisor and the program director. Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the dean.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

Bioscience Core (12 credits):

- BIOS 701 - Biochemical Systematics Credits: 3
• BIOS 702 - Research Methods Credits: 3
• BIOS 703 - Laboratory Rotation Credits: 1 (taken 3 times)
• BIOS 704 - Topics in Biosciences Credits: 1 (taken 3 times)

Concentration or Emphasis (15 credits):

▲ Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomics of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work. All students must take the following 15 graduate credits:

• BIOL 563 - Virology Credits: 3
• BIOL 669 - Pathogenic Microbiology Credits: 3
• BIOL 715 - Microbial Physiology Credits: 3
• BIOL 720 - Microbial Metabolism Credits: 3
• BIOL 718 - Techniques in Microbial Pathogenesis Credits: 3

Emphasis in Functional Genomics and Biotechnology

This emphasis prepares students for significant contributions in an academic or industrial research career. Covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, and biotechnological applications. All students must take the following 15 graduate credits:

• BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology Credits: 3
• BIOS 741 - Genomics Credits: 3
• BIOS 742 - Biotechnology Credits: 3
• BIOS 743 - Genomics, Proteomics, and Bioinformatics Credits: 3
• BIOS 744 - Molecular Genetics Credits: 3

Elective Courses (21-33 credits):

21-33 credits chosen from the following to complete 72 credits:

• BIOL 533 - Selected Topics in Plant Biology Credits: 1-4
• BIOL 564 - Techniques in Virology Credits: 2
• BIOL 568 - Advanced Topics in Molecular Genetics Credits: 3
• BIOL 578 - Mutation, DNA Repair, and Environmental Contamination Credits: 3
• BIOL 579 - Molecular Evolution and Conservation Genetics Credits: 3
• BIOL 580 - Computer Applications for the Life Sciences Credits: 3
• BIOL 682 - Advanced Eukaryotic Cell Biology Credits: 3
• BIOS 710 - Current Topics in Bioscience Credits: 1-3
Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of course work, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

Qualifying Examination

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student’s performance was deemed below satisfaction. On successful completion of the qualifying exam, the majority of all course work, and an accepted thesis proposal, students will be recommended for advancement to candidacy by the committee and the program director.

Advancement to Candidacy

Upon successful completion of the qualifying exam, the majority of all course work, and an accepted thesis proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

Dissertation Research (12–24 credits):

Note: no more than 24 combined credits from BIOS 998 and BIOS 999 may be applied toward satisfying doctoral degree requirements. At least half of the credits must be in BIOS 999.

- BIOS 998 - Doctoral Dissertation Proposal Credits: 1-6
- BIOS 999 - Doctoral Dissertation Research Credits: 1-12

Doctoral Dissertation
After advancing to doctoral candidacy, the student works with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, the student will present their results to their graduate committee and defend their dissertation in a public forum.

Total: 72 credits

■ Neuroscience Program

Phone: 703-993-4333
Web: gmu.edu/departments/neuroscience

Faculty

Director: Jafri

Professors: Ascoli, Butler, Jafri, Olds, Smith, McCabe, Parasuraman

Associate professors: Blackwell, Cebral, Flinn, Fryxell, Greenwood, Houser, Kello, Klimov, Peterson, Sander, So

Assistant professors: Barreto, Cox, Dumas, Kabbani, Kalbfleisch, Kozhevnikov, Peixoto, Sikdar, Thompson

Neuroscience at George Mason University is an interdisciplinary field, grounded in biology, chemistry, and psychology. Research and education in neuroscience at Mason is conducted under the auspices of the Neuroscience Advisory Council (NAC). The BS degree in neuroscience is administered by the Psychology department in the College of Humanities and Social Sciences, and the PhD program in neuroscience is administered by the College of Science. The neuroscience faculty at Mason comprise a unique blend of traditional, experimental, and theoretical scientists. They include faculty in the Psychology; Molecular Neuroscience; Molecular and Microbiology; Physics and Astronomy; Bioinformatics and Computational Biology, and Electrical Engineering departments. Research in neuroscience focuses on the broad areas of behavior, anatomy, physiology, biochemistry, computational modeling, and informatics. Some of the key research initiatives currently underway at Mason include studies of:

- effects of drugs and alcohol on behavioral and neurological development
- cellular organization and connections of sensory processing areas in fish
- biochemical dynamics in disorders of the basal ganglia
- computational methods for simulation of complex biological systems
- description and generation of neuronal morphology
- adaptive control for stabilization of epilepsy
- role of metals in memory and Alzheimer's disease
- biochemical/metabolic simulations at the organism level
- cellular and sub-cellular models of associative learning

Course Work

The program offers all course work designated NEUR in the Courses chapter of this catalog.

Doctoral Degree
Neuroscience, PhD

Banner Code: SC-PHD-NEUR

The interdisciplinary doctoral program in neuroscience is offered jointly by the College of Science, the College of Humanities and Social Science, and the Krasnow Institute for Advanced Study.

The program focuses on the complexity of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, biochemistry, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include the effects of drugs and alcohol on behavioral and neurological development, cellular organization and connections of sensory processing areas in fish, plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer’s disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

Admission Requirements

Applicants should have a bachelor’s degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and integral calculus. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. In addition, the applicants Goals statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members. To apply, prospective students should forward to the COS Fairfax Campus Graduate Admissions Processing Center a completed Mason graduate application including the Goals statement, two copies of official transcripts from each college and graduate institution attended, and a current résumé. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE-SUB is recommended if it is given in the student’s undergraduate major. TOEFL scores are required of all international applicants.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

The curriculum for the Neuroscience PhD consists of 72 credits: 48 credits of course work and 24 credits of dissertation research. The 48-credit requirement may be reduced by up to 30 credits for a qualified student holding a previous relevant master’s degree. Up to 24 credits of previous, relevant graduate course work may be transferred into the program provided those credits have not been applied toward a previous degree. Additional requirements for graduation include a dissertation and at least one publication (in print or in press) in a refereed journal.

Two areas of emphasis are included in the program: behavioral, anatomical, and molecular neuroscience; and theoretical, computational, and physiological neuroscience (TCP). All students will follow almost the same curriculum for the first two years, although emphasis prerequisites may vary slightly. For example, students in the TCP emphasis must have basic knowledge of
integral calculus. It is expected that the selection of elective thesis topics will vary widely between the two areas of emphasis; however, students will be allowed to mix and match electives from both areas, with guidance and consent from the advisor or program director.

Core Science (9 credits):

- STAT 535 - Analysis of Experimental Data Using SPSS Credits: 3
- NEUR 604 - Ethics in Scientific Research Credits: 1-3
- NEUR 702 - Research Methods Credits: 3

Core Neuroscience (11 credits):

- NEUR 601 - Developmental Neuroscience Credits: 2
- NEUR 602 - Cellular Neuroscience Credits: 3
- NEUR 603 - Mammalian Neurobiology Credits: 3
- NEUR 701 - Neurophysiology Laboratory Credits: 3

Rotations and Readings (9 credits):

taken three times:

- NEUR 703 - Laboratory Rotation and Readings Credits: 3

Electives (18 credits):

- 18 credits of electives

Seminar (1 credit):

- NEUR 709 - Neuroscience Seminars Credits: 1

Dissertation Research (24 credits):

Note: No more than 24 combined credits from NEUR 998 and NEUR 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998.

- NEUR 998 - Dissertation Proposal Credits: 1-6
- NEUR 999 - Doctoral Dissertation Credits: 1-12
Advancement to Candidacy

When course work is nearing completion, the student should form a doctoral committee and start preparing their dissertation proposal. The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

Doctoral Dissertation

After advancing to candidacy, the student works on their doctoral dissertation while enrolled in NEUR 999. The student is expected to make an original and significant contribution to the field worthy of publication in a peer-reviewed journal. The doctoral committee reviews the dissertation and examines the student in a public oral thesis defense. The degree will be awarded upon completion of the required course work and successful defense of the thesis.

Total: 72 credits

Physics and Astronomy

Phone: 703-993-1280
Web: www.physics.gmu.edu

Faculty

Professors: Becker*, Blaisten-Barojas*, Dworzecka, Ehrlich, Ellsworth, Lieb, Mishin, Satija, Summers (Chair), Trefil
Associate professors: Barreto, Borne*, Opher, Rubin, Satyapal, Sauer, So, Wallin*, Weingartner
Assistant professors: Cressman, Nikolic, Rosenberg, Tian, Weigel*, Zhang*, Zhao
Term associate professor: Oerter
Term assistant professors: Geller, Jazaeri, Wyczalkowski
Term instructors: Ericson, Ewell
Emeriti: Ceperley, Evans, Mielczarek
Research faculty: Duxbury, Gioizzo, Meier, Poland*, Richards

*These guest faculty hold primary appointments in other departments.

Course Work

The Physics and Astronomy Department offers all course work designated ASTR and PHYS in the Courses chapter of this catalog.

Honors Program in Physics
Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at Mason may apply to the departmental honors program when they complete the first semester of their junior year. To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 and 406 with a GPA of at least 3.50 and a grade of at least A- in PHYS 406.

Honors Program in Astronomy

Astronomy majors who have completed the prerequisites for ASTR 405 Honors Thesis in Astronomy, have a GPA of at least 3.5 in ASTR and PHYS courses taken at GMU, and have a GPA of at least 3.5 in all courses taken at GMU may apply for admission to the Astronomy Honors Program. To graduate with honors in astronomy, a student must maintain a GPA of at least 3.5 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 and 406 with a GPA of at least 3.5 and a grade of A- or better in ASTR 406. Students in ASTR 405/406 will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence (PHYS 160, 161, 260, 261, 262, and 263). Students who decide to major in physics after completing PHYS 243, 244, 245, and 246 may do so but only with written permission of the Physics and Astronomy Department. Those students are required to take at least 4 additional credits in approved physics courses.

Physics for Nonmajors

PHYS 243, 244, 245, and 246 are recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree. PHYS 101, 102, 103, and 104 are intended for nonscience majors. PHYS 160, 161, 260, 261 or 265, 262, and 263 constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, and chemistry, computer science, and mathematics students who are pursuing a BS degree. Students may receive credit for only one of the following three sequences: PHYS 243, 244, 245, 246; PHYS 103, 104; or PHYS 160, 161, 260, 261, 262, 263.

Research Opportunities

The department offers many opportunities for undergraduate students to get involved with research. Students should consult with faculty working on research of interest to them, based on their examination of the Physics Department web site.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development chapter and attend an information session early in their undergraduate career. For more information, call 703-993-2078, e-mail gacline2@gmu.edu, or go to gse.gmu.edu.

Physics, Bachelor’s/Accelerated Master’s Degree

Qualified undergraduates may be admitted to an accelerated master’s program and obtain both a BS and an MS in Physics within an accelerated time frame. Students admitted to this program may take graduate courses after completing 90 undergraduate credits, and up to 6 credits of graduate work may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master’s program and must then complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met, including a minimum of 18 credits taken for the master’s after the bachelor’s degree is complete.
Undergraduate Degree

Astronomy, BA

Banner Code: SC-BA-ASTR

The BA in astronomy prepares students for a career in industry, business, science education, and science writing, where analytical skills and scientific background are necessary. This degree is not suitable for students who intend to pursue a graduate degree in astronomy.

Students in the fields of mathematics, science, computer science, and engineering who are considering a double major should discuss this option with the undergraduate coordinator. Some course substitutions are allowed for such majors, but they must be approved in writing in advance.

Students must fulfill all requirements for bachelor’s degrees, including university general education requirements. Students majoring in astronomy must complete additional college requirements for the BA degree in COS. Also required are a minimum of 26 credits in physics and astronomy and 6 credits in mathematics, with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy university wide requirements in natural science and quantitative reasoning. ASTR 402 also satisfies the university’s writing-intensive requirement.

This program of study is offered by the College of Science.

Degree Requirements

Note: Students who take the 11-credit physics sequence and one of the 8-credit math sequences can count the additional 7 credits beyond required minimum credits toward elective credit in the major.

Core Astronomy Courses (20 credits):

- ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
- ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1
- ASTR 301 - Astrobiology Credits: 3
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 3
- ASTR 490 - Astronomy Capstone Credits: 3

Physics Sequence (6 or 11 credits):

students take either this sequence:
- PHYS 243 - College Physics Credits: 3
- PHYS 245 - College Physics Credits: 3
or this sequence:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3

Mathematics Sequence (6 or 8 credits):

- MATH 106 - Quantitative Reasoning Credits: 3
- MATH 108 - Introductory Calculus with Business Applications Credits: 3
  or
- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
  or
- MATH 115 - Analytic Geometry and Calculus I (Honors) Credits: 4
- MATH 116 - Analytic Geometry and Calculus II (Honors) Credits: 4

Electives (15 credits):

At least 3 credits must be taken at or above 300-level

- ASTR 390 - Topics in Astronomy Credits: 1-4
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 408 - Senior Research Credits: 3
- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
- PHYS 124 - Experimental Explorations in Physics Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4
- BIOL 103 - Introductory Biology I Credits: 4
- BIOL 104 - Introductory Biology II Credits: 4
- BIOL 213 - Cell Structure and Function Credits: 4
- CHEM 101 - Introduction to Modern Chemistry Credits: 3
- CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 3
- CHEM 103 - Chemical Science in a Modern Society Credits: 4
- CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry Credits: 4
- CHEM 155 - Introduction to Environmental Chemistry I Credits: 4
- CHEM 156 - Introduction to Environmental Chemistry II Credits: 4
- CHEM 201 - Introductory Chemistry I Credits: 3
- CHEM 202 - Introductory Chemistry II Credits: 3
- CHEM 211 - General Chemistry Credits: 4
- GEOL 101 - Introductory Geology I Credits: 4
- GEOL 102 - Introductory Geology II Credits: 4
or additional courses with permission of the department and course instructor

Astronomy, BS

Banner Code: SC-BS-ASTR

The BS in astronomy prepares students for graduate school or one of the many careers in research or teaching positions, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major in the fields of mathematics, science, computer science, and engineering should talk to the undergraduate coordinator. Note that at least 18 credits used to fulfill an astronomy BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these must be approved in writing in advance.

Students must fulfill all requirements for bachelor's degrees including university general education requirements. In addition, students must complete a total of 39 credits in physics and astronomy and 17 credits in mathematics with a minimum GPA of 2.00. Through the course work below, astronomy majors satisfy the university wide requirements in natural science and quantitative reasoning. Also, by taking ASTR 402, they satisfy the university’s writing-intensive requirement.

This program of study is offered by the College of Science.

Degree Requirements

Seven required core astronomy courses (21 credits):

- ASTR 103 - Astronomy Credits: 3
- or
- ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
- ASTR 328 - Introduction to Astrophysics Credits: 3
- ASTR 402 - Methods of Observational Astronomy Credits: 3
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3
- ASTR 490 - Astronomy Capstone Credits: 3

Eight required physics courses (18 credits):

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
Five required math courses (17 credits):

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3
- MATH 313 - Introduction to Applied Mathematics Credits: 3
  or
- MATH 314 - Introduction to Applied Mathematics Credits: 3

9 credits from the following:

(at least 6 credits must be in upper-level courses)

- any preapproved BIOL, CHEM, MATH, or PHYS courses
- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- ASTR 401 - Computer Simulation in Astronomy Credits: 3
- ASTR 408 - Senior Research Credits: 3
- ASTR 409 - Astronomy Internship Credits: 3
- ASTR 530 - Astrophysics Credits: 3
- ASTR 535 - Space Instrumentation and Exploration Credits: 3
- CS 112 - Introduction to Computer Programming Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 447 - Numerical Analysis II Credits: 3
- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1
- PHYS 124 - Experimental Explorations in Physics Credits: 1
- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 510 - Computational Physics I Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3

Areas of Emphasis

In meeting the above requirements, students may choose an area of emphasis. Students who wish to complete an emphasis should plan a program of study in consultation with their advisors. Some emphases listed below require more than 9 credits in the last category above.

Emphasis in Astrobiology
This emphasis prepares students for careers in research, teaching, or science journalism. Students must take the following, and complete a senior project or internship.

- BIOL 213 - Cell Structure and Function Credits: 4
- BIOL 305 - Biology of Microorganisms Credits: 3
- BIOL 506 - Selected Topics in Microbiology Credits: 1-4
- ASTR 408 - Senior Research Credits: 3
  or
- ASTR 409 - Astronomy Internship Credits: 3

**Emphasis in Computational Astronomy**

This emphasis prepares students planning for computation and information-related jobs in industry and government labs. Students must take 9 credits of the following. In addition, they should complete a senior project or internship.

- ASTR 401 - Computer Simulation in Astronomy Credits: 3
- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
  or
- PHYS 510 - Computational Physics I Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
  or
- MATH 447 - Numerical Analysis II Credits: 3
- ASTR 408 - Senior Research Credits: 3
  or
- ASTR 409 - Astronomy Internship Credits: 3

**Emphasis in Graduate School Preparation**

This emphasis prepares students for graduate study in observational or theoretical astronomy. Students must take two courses from the following. They should complete a senior project or internship in the specialty that they intend to pursue in graduate school.

- ASTR 530 - Astrophysics Credits: 3
  or
- ASTR 535 - Space Instrumentation and Exploration Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- ASTR 408 - Senior Research Credits: 3
  or
- ASTR 409 - Astronomy Internship Credits: 3

**Sample Schedule for Astronomy BS**
First Semester

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- ENGL 101 - Composition Credits: 3
- ASTR 103 - Astronomy Credits: 3
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1

Second Semester

- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1

Third Semester

- ASTR 302 - Foundations of Cosmological Thought Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

Fourth Semester

- ASTR 301 - Astrobiology Credits: 3
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- MATH 214 - Elementary Differential Equations Credits: 3

Fifth Semester

- ASTR 328 - Introduction to Astrophysics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Sixth Semester

- MATH 313 - Introduction to Applied Mathematics Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
Seventh Semester

- MATH 446 - Numerical Analysis I Credits: 3
- ASTR 401 - Computer Simulation in Astronomy Credits: 3
- ASTR 403 - Planetary Sciences Credits: 3
- ASTR 490 - Astronomy Capstone Credits: 3

Eighth Semester

- MATH 447 - Numerical Analysis II Credits: 3
- ASTR 404 - Galactic Astronomy Credits: 3
- ASTR 408 - Senior Research Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3

Physics, BS

Banner Code: SC-BS-PHYS

The BS in physics prepares students for graduate school and careers in business or industry. Students in the fields of mathematics, science, and engineering who are considering a double major in physics should discuss this option with the undergraduate coordinator. Note that at least 18 credits used to fulfill a physics BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed in advance.

Students must fulfill all requirements for bachelor’s degrees including university general education requirements. In addition, students must complete a total of 45 credits in the major and 20 in mathematics, with a minimum GPA of 2.00, distributed as follows. Through the course work below, physics majors satisfy the university-wide requirements in natural science and quantitative reasoning, and the intensive writing requirement by taking PHYS 407.

This program of study is offered by the College of Science.

Degree Requirements

Physics Core Courses (27 credits):

Note: Students double majoring in engineering and physics may substitute ECE 305 for PHYS 305.

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3

**Physics Electives (6 credits):**

6 credits selected from the following:

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3

or

- PHYS 405 - Honors Thesis in Physics Credits: 3
- PHYS 406 - Honors Thesis in Physics Credits: 3

or

- PHYS 408 - Senior Research Credits: 2-3
- PHYS 409 - Physics Internship Credits: 3

or

- PHYS 416 - Special Topics in Modern Physics Credits: 1

or

- ASTR 328 - Introduction to Astrophysics Credits: 3
- ASTR 428 - Relativity and Cosmology Credits: 3

**Mathematics (20 credits):**

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- MATH 203 - Linear Algebra Credits: 3
- MATH 213 - Analytic Geometry and Calculus III Credits: 3
- MATH 214 - Elementary Differential Equations Credits: 3

or

- MATH 313 - Introduction to Applied Mathematics Credits: 3
- MATH 413 - Modern Applied Mathematics I Credits: 3

**Additional Science Courses (12 credits):**

- PHYS 121 - Uses of Physics Credits: 1
- PHYS 122 - Inside Relativity Credits: 1
• PHYS 123 - Inside the Quantum World Credits: 1
• PHYS 124 - Experimental Explorations in Physics Credits: 1
• CS 112 - Introduction to Computer Programming Credits: 4
• or any approved upper-level physics, astronomy, chemistry, electrical engineering, or mathematics courses (for examples, see the areas of emphasis below)

Areas of Emphasis

In meeting all or part of the requirement for 12 credits of Additional Science Courses (above), students have the option of elective an emphasis. Students who wish to complete an emphasis should plan a program of study in consultation with their advisor. Suggested courses for each emphasis are listed below.

Emphasis in Applied Solid State Physics (12 credits):

This emphasis is for students who wish to pursue a career in the semiconductor industry. To complete this emphasis, students should take 12 credits selected from the following courses:

• PHYS 512 - Solid State Physics and Applications Credits: 3
• ECE 430 - Principles of Semiconductor Devices Credits: 3
• ECE 431 - Digital Circuit Design Credits: 3
and one from the following:
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3
• PHYS 408 - Senior Research Credits: 2-3
• PHYS 409 - Physics Internship Credits: 3

Emphasis in Astrophysics (12 credits):

This emphasis is for students who are planning to attend graduate school in astrophysics or pursue a career in industry. To complete this emphasis, students should take 12 credits selected from the following courses:

• PHYS 428 - Relativity and Cosmology Credits: 3
• ASTR 328 - Introduction to Astrophysics Credits: 3
• ASTR 404 - Galactic Astronomy Credits: 3
• ASTR 530 - Astrophysics Credits: 3
• ASTR 535 - Space Instrumentation and Exploration Credits: 3
• MATH 446 - Numerical Analysis I Credits: 3
students may also take one of the following:
• PHYS 405 - Honors Thesis in Physics Credits: 3
• PHYS 406 - Honors Thesis in Physics Credits: 3
• PHYS 408 - Senior Research Credits: 2-3
• PHYS 409 - Physics Internship Credits: 3

Emphasis in Computational Physics (12 credits):
This emphasis is for students who wish to pursue a career that applies computers to the solution of physical problems and data analysis. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 510 - Computational Physics I Credits: 3
- MATH 446 - Numerical Analysis I Credits: 3
- MATH 447 - Numerical Analysis II Credits: 3
  and one from the following:
  - PHYS 405 - Honors Thesis in Physics Credits: 3
  - PHYS 406 - Honors Thesis in Physics Credits: 3
  - PHYS 408 - Senior Research Credits: 2-3
  - PHYS 409 - Physics Internship Credits: 3

**Emphasis in Electronics (12 credits):**

This emphasis is for students who wish to pursue a career in industry, applying a strong background in electronics to physical problems. To complete this emphasis, students should take 12 credits selected from the following courses:

- ECE 301 - Digital Electronics Credits: 3
- ECE 333 - Linear Electronics I Credits: 3
- ECE 430 - Principles of Semiconductor Devices Credits: 3
- ECE 431 - Digital Circuit Design Credits: 3
- ECE 433 - Linear Electronics II Credits: 3
  students may also take one of the following:
  - PHYS 405 - Honors Thesis in Physics Credits: 3
  - PHYS 406 - Honors Thesis in Physics Credits: 3
  - PHYS 408 - Senior Research Credits: 2-3
  - PHYS 409 - Physics Internship Credits: 3

**Emphasis on Graduate School Preparation (12 credits):**

Although any of the options listed here provide the successful student with a fully adequate background to enter graduate school, this emphasis is for students whose career goals definitely include graduate work in physics. To complete this emphasis, students should take 12 credits selected from the following courses:

- PHYS 410 - Computational Physics I Credits: 3
- PHYS 412 - Solid State Physics and Applications Credits: 3
- PHYS 440 - Nuclear and Particle Physics Credits: 3
- ASTR 530 - Astrophysics Credits: 3
  students may also take one of the following:
  - PHYS 405 - Honors Thesis in Physics Credits: 3
  - PHYS 406 - Honors Thesis in Physics Credits: 3
  - PHYS 408 - Senior Research Credits: 2-3
  - PHYS 409 - Physics Internship Credits: 3

**Emphasis in Medical Physics (12 credits):**
Physics majors generally have an excellent acceptance record in applying to medical, dental, or veterinary schools. Although there is no formal set of courses within physics that is uniquely suitable, students should meet with a physics advisor and a health sciences advisor for information about the university’s Medical Sciences Advisory Committee. For more information, call 703-993-1050.

Because schools in the health sciences vary both in their philosophies and specific requirements, it is wise for students to become aware of such information well in advance of applying for admission. Although specific requirements vary, most programs do require applicants to complete at least one year of biology. Other requirements generally include organic chemistry:

- CHEM 313 - Organic Chemistry Credits: 3
- CHEM 314 - Organic Chemistry Credits: 3
- CHEM 315 - Organic Chemistry Lab I Credits: 2
- CHEM 318 - Organic Chemistry Lab II Credits: 2
- PHYS 408 - Senior Research Credits: 2-3

Emphasis in Physics Education (24 credits):

This emphasis is intended for students wishing to pursue a career teaching secondary school physics. The goal of the program is to allow students to receive a license to teach physics in Virginia secondary schools within 120 credits. The following courses are required to qualify for the teaching license (EDRD 419 and either EDCI 473 or EDCI 483 fulfill 6 of the 12 credits of the Additional Science requirement, see above). In addition to the standard requirements for the physics major, students should enroll in 3 credits of directed study in physics laboratory instruction under PHYS 390:

- PHYS 390 - Topics in Physics Credits: 1-4 (physics laboratory instruction)
- EDCI 473 - Teaching Science in the Secondary School Credits: 3
- EDCI 483 - Advanced Methods of Teaching Science in Secondary School Credits: 3
- EDRD 419 - Literacy in the Content Areas Credits: 3
- EDCI 490 - Student Teaching in Education Credits: 6
- EDUC 372 - Human Development, Learning, and Teaching Credits: 3
- EDUC 422 - Foundations of Secondary Education Credits: 3
- pass the Praxis I and II exams

Sample Schedule for Physics BS

(excluding general education courses)

First Semester

- MATH 113 - Analytic Geometry and Calculus I Credits: 4
- PHYS 122 - Inside Relativity Credits: 1
- PHYS 123 - Inside the Quantum World Credits: 1

Second Semester

- MATH 114 - Analytic Geometry and Calculus II Credits: 4
- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- CS 112 - Introduction to Computer Programming Credits: 4

**Third Semester**

- PHYS 251 - Introduction to Computer Techniques in Physics Credits: 3
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- MATH 213 - Analytic Geometry and Calculus III Credits: 3

**Fourth Semester**

- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1
- MATH 214 - Elementary Differential Equations Credits: 3

**Fifth Semester**

- PHYS/MATH elective
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 305 - Electromagnetic Theory Credits: 3
- MATH 313 - Introduction to Applied Mathematics Credits: 3

**Sixth Semester**

- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
  or
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3

**Seventh Semester**

- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 407 - Senior Laboratory in Modern Physics Credits: 3
- PHYS 410 - Computational Physics I Credits: 3
- PHYS 416 - Special Topics in Modern Physics Credits: 1

**Eighth Semester**
- PHYS 408 - Senior Research Credits: 2-3
- PHYS 412 - Solid State Physics and Applications Credits: 3
- PHYS 440 - Nuclear and Particle Physics Credits: 3

Undergraduate Interdisciplinary Minor

Renewable Energy Interdisciplinary Minor

Banner Code: RNRG

This college-wide interdisciplinary minor administered by the Physics and Astronomy Department is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines. Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The renewable energy minor is therefore ideally suited for students with majors in engineering, business, and basic science.

The minor in renewable energy comprises 20 credits of course work. 8 credits must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Core Courses (10 credits):

- PHYS 331 - Fundamentals of Renewable Energy Credits: 3
- PHYS 385 - Materials Science with Applications to Renewable Energy Credits: 3
- MATH 113 - Analytic Geometry and Calculus I Credits: 4

Physics (3 credits):

students take one of the following:

- PHYS 245 - College Physics Credits: 3
- PHYS 262 - University Physics III Credits: 3

Chemistry (4 credits):

students take one of the following:

- CHEM 211 - General Chemistry Credits: 4
- CHEM 212 - General Chemistry Credits: 4
- CHEM 251 - General Chemistry for Engineers Credits: 4
Internship (3 credits):

students take one of the following:

- PHYS 409 - Physics Internship Credits: 3 on renewable energy
- or a 3-credit internship focusing on renewable energy in another natural science or engineering field

Total: 20 credits

Undergraduate Minor

Astronomy Minor

Banner Code: ASTR

The minor requires completion of a physics prerequisite and 15 credits in astronomy, with a minimum GPA of 2.00. Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies section of this catalog.

This program of study is offered by the College of Science.

Course Work

Physics Prerequisite

Students take either this sequence:

- PHYS 243 - College Physics Credits: 3
- PHYS 244 - College Physics Lab Credits: 1
- PHYS 245 - College Physics Credits: 3
- PHYS 246 - College Physics Lab Credits: 1

or this sequence:

- PHYS 160 - University Physics I Credits: 3
- PHYS 161 - University Physics I Laboratory Credits: 1
- PHYS 260 - University Physics II Credits: 3
- PHYS 261 - University Physics II Laboratory Credits: 1
- PHYS 262 - University Physics III Credits: 3
- PHYS 263 - University Physics III Laboratory Credits: 1

Astronomy Core (8 credits):
• ASTR 111 - Introductory Astronomy: The Solar System Credits: 3
• ASTR 112 - Introductory Astronomy Lab: The Solar System Credits: 1
• ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe Credits: 3
• ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe Credits: 1

Astronomy Electives (7 credits from the following):

• ASTR 301 - Astrobiology Credits: 3
• ASTR 302 - Foundations of Cosmological Thought Credits: 3
• ASTR 328 - Introduction to Astrophysics Credits: 3
• ASTR 402 - Methods of Observational Astronomy Credits: 3
• ASTR 403 - Planetary Sciences Credits: 3
• ASTR 404 - Galactic Astronomy Credits: 3
• ASTR 428 - Relativity and Cosmology Credits: 3
• ASTR 530 - Astrophysics Credits: 3
• PHYS 122 - Inside Relativity Credits: 1
• PHYS 123 - Inside the Quantum World Credits: 1

Total: 15 credits

Physics Minor

Banner Code: PHYS

This program of study is offered by the College of Science.

Course Work

The minor requires 18 credits with a minimum GPA of 2.00, including:

• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PHYS 260 - University Physics II Credits: 3
• PHYS 261 - University Physics II Laboratory Credits: 1
• PHYS 262 - University Physics III Credits: 3
• PHYS 263 - University Physics III Laboratory Credits: 1

Any two courses from:
- PHYS 303 - Classical Mechanics Credits: 3
- PHYS 306 - Wave Motion and Electromagnetic Radiation Credits: 3
- PHYS 307 - Thermal Physics Credits: 3
- PHYS 308 - Modern Physics with Applications Credits: 3
- PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3
- PHYS 428 - Relativity and Cosmology Credits: 3

- PHYS 305 - Electromagnetic Theory Credits: 3
  or
- PHYS 513 - Applied Electromagnetic Theory Credits: 3

**Note:**

Eight credits of course work must be unique to the minor. For policies governing all minors, see the Academic Policies chapter of this catalog.

**Total:** 18 credits

**Bachelor's/Accelerated Master's Program**

**Physics, BS/Physics, Accelerated MS**

This program allows academically strong undergraduates with a commitment to research to obtain BS and MS degrees by successfully completing 144 credits within five academic years plus summers their last two years. On completion, students are exceptionally well prepared for entry into a professional school or a PhD program in physics or a related discipline. Well-prepared students are encouraged to apply to this program after they complete 90 credits. Admitted students take selected graduate courses during their senior year (when they have successfully completed prerequisites) and are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. On completion and conferral of that degree and with satisfactory performance (3.00) in the graduate courses, students are given advanced standing in the master’s program and complete an additional 24 credits to receive the master’s degree. All other master’s degree requirements must be met. See the department for further details.

This program of study is offered by the College of Science.

**Master's Degree**

**Applied and Engineering Physics, MS**

**Banner Code:** SC-MS-PHAE

his program of study is offered by the College of Science.
This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into three areas of emphases. The standard emphasis is intended for students who may wish to pursue further graduate study in physics leading to a PhD degree in preparation for a career in basic research. The applied physics emphasis is intended for those who wish to apply the techniques and subject areas of physics to multifaceted problems encountered in the workplace, particularly in physics, engineering, computational science, and other related areas. The engineering physics emphasis allows students to select a larger number of courses from electrical engineering or nanotechnology, and other areas.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to attend easily. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment related research may be conducted under an optional 3-credit research project or an optional 6-credit master’s thesis. Master’s students who are not employed full time may apply for financial aid or a limited number of research assistantships.

**Admission Requirements**

Individuals holding a baccalaureate degree in physics or a related field from an accredited institution and who earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. If the baccalaureate degree is in a field other than physics, applicants should have taken several courses beyond the introductory physics courses, such as junior-level classical mechanics, electricity and magnetism, or electronics. Applicants may be required to make up one or two deficiencies, based on a graduate physics advisor’s assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years.

**Degree Requirements**

Candidates for the degree must successfully complete 30 credits in the categories shown below:

I. 6 credits of required core courses:

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3

For the applied physics emphasis and the engineering physics emphasis, students may substitute:

- PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics Credits: 3 (for PHYS 684)
- PHYS 513 - Applied Electromagnetic Theory Credits: 3 (for PHYS 685)

II. 15 credits in one of three emphases (A, B or C):

A. Standard emphasis:
Students should take any five of the following courses:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 512 - Solid State Physics and Applications Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- PHYS 540 - Nuclear and Particle Physics Credits: 3
- PHYS 575 - Atmospheric Physics I Credits: 3
- PHYS 615 - Fundamentals of Materials Science Credits: 3
- PHYS 620 - Continuum Mechanics Credits: 3
- PHYS 676 - Atmospheric Physics Credits: 3
- PHYS 701 - Theoretical Physics Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3
- PHYS 784 - Quantum Mechanics II Credits: 3
- PHYS 785 - Classical Electrodynamics II Credits: 3
- ASTR 530 - Astrophysics Credits: 3
- ASTR 703 - Planetary Sciences Credits: 3
- ASTR 765 - High-Energy and Accretion Astrophysics Credits: 3
- ASTR 766 - Relativity and Cosmology Credits: 3

Total: 15 credits

B. Engineering physics emphasis:

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3
- 9 credits of ECE graduate courses

Total: 15 credits

C. Applied physics emphasis:

Students should take:

- PHYS 510 - Computational Physics I Credits: 3
- PHYS 533 - Modern Instrumentation Credits: 3

plus any 9 credits from this list:

- ASTR 535 - Space Instrumentation and Exploration Credits: 3
• ASTR 680 - Physics of Interstellar Media Credits: 3
• ASTR 760 - Space Plasma Physics Credits: 3
• BINF 731 - Protein Structure Analysis Credits: 3
• BINF 740 - Introduction to Biophysics Credits: 3
• BINF 741 - Introduction to Computer Simulations of Biomolecules Credits: 3
• CLIM 710 - Introduction to Physical Climate System Credits: 3
• CLIM 711 - Introduction to Atmospheric Dynamics Credits: 3
• CLIM 712 - Physical and Dynamical Oceanography Credits: 3
• CLIM 713 - Atmosphere-Ocean Interactions Credits: 3
• CLIM 714 - Land-Climate Interactions Credits: 3
• CLIM 715 - Numerical Methods for Climate Modeling Credits: 3
• CLIM 750 - Geophysical Fluid Dynamics Credits: 3
• CSI 660 - Space Instrumentation and Exploration Credits: 3
• CSI 721 - Computational Fluid Dynamics I Credits: 3
• CSI 722 - Computational Fluid Dynamics II Credits: 3
• CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
• CSI 763 - Statistical Methods in Space Sciences Credits: 3
• CSI 783 - Computational Quantum Mechanics Credits: 3
• ECE 521 - Modern Systems Theory Credits: 3
• ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering Credits: 3
• ECE 548 - Sequential Machine Theory Credits: 3
• ECE 565 - Introduction to Optical Electronics Credits: 3
• ECE 584 - Semiconductor Device Fundamentals Credits: 3
• ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6
• NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
• NANO 510 - Strategies for Nanocharacterization Credits: 3
• PHYS 611 - Electro-optics Credits: 3
• PHYS 612 - Physics of Modern Imaging Credits: 3
• PHYS 613 - Computational Physics II Credits: 3
• PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3
• PHYS 630 - Introduction to Biophysics Credits: 3
• PHYS 660 - Space Weather Credits: 3
• PHYS 760 - Space Plasma Physics Credits: 3
• or any course listed in the Standard Emphasis (A)

Total: 15 credits

III. 9 credits of electives chosen from courses in:

Physics, chemistry, mathematics, engineering, information technology, and computational sciences and informatics. No more than 6 credits may be chosen from areas outside ASTR, CSI, ECE, NANO, and PHYS. Elective credits can include a project (PHYS 798) or thesis (PHYS 799).

• ECE 798 - Research Project Credits: 1-3
• ECE 799 - Master's Thesis Credits: 1-6
• PHYS 798 - Research Project Credits: 3
• PHYS 799 - Master's Thesis Credits: 1-6

Notes:

Students may choose to do either ECE/PHYS 798 Research Project (3 credits) or ECE/PHYS 799 Master’s Thesis (6 credits), but not both. The research project may be conducted at a student’s place of employment with the concurrence of a faculty advisor.

The thesis is a more substantial piece of work performed under the supervision of a faculty member and requires students to make an oral defense. ECE/PHYS 798 may be taken only once. No more than 6 credits of PHYS 799 may be applied to the degree.

In addition to the requirements stated above, students may also select a research focus in astrophysics, atmospheric physics, biological applications of physics, computational physics, condensed matter, instrumentation (engineering physics), or nonlinear dynamics. A focus requires that students complete 15 credits of approved courses.

Students in the master’s degree program can earn a graduate certificate in computational techniques and applications from the Department of Computational and Data Sciences by choosing an approved sequence of courses.

Total 30 credits

Sample course lists for various focus areas:

Astrophysics:

• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• ASTR 530 - Astrophysics Credits: 3
• ASTR 680 - Physics of Interstellar Media Credits: 3
• ASTR 760 - Space Plasma Physics Credits: 3

Atmospheric physics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 676 - Atmospheric Physics Credits: 3
• ASTR 703 - Planetary Sciences Credits: 3
• CLIM 710 - Introduction to Physical Climate System Credits: 3
• CLIM 713 - Atmosphere-Ocean Interactions Credits: 3

Biophysics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 630 - Introduction to Biophysics Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• BINF 731 - Protein Structure Analysis Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Computational physics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 613 - Computational Physics II Credits: 3
• PHYS 780 - Advanced Selected Topics in Physics Credits: 3
• CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences Credits: 3
• CSI 764 - Computational Astrophysics Credits: 3

Instrumentation/engineering physics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 533 - Modern Instrumentation Credits: 3
• NANO 500 - Introduction to Nanomaterials and Interactions Credits: 3
• NANO 510 - Strategies for Nanocharacterization Credits: 3
• ECE 699 - Advanced Topics in Electrical and Computer Engineering Credits: 1-6

Material physics:

• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3
• PHYS 711 - Statistical Mechanics Credits: 3
• PHYS 512 - Solid State Physics and Applications Credits: 3
• PHYS 614 - Thermodynamics and Kinetics of Materials Credits: 3

Nonlinear dynamics:

• PHYS 510 - Computational Physics I Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
• PHYS 705 - Classical Mechanics Credits: 3
• MATH 673 - Dynamical Systems Credits: 3
• NEUR 751 - Applied Dynamics in Neuroscience Credits: 3

Physics:

• PHYS 784 - Quantum Mechanics II Credits: 3
• PHYS 785 - Classical Electrodynamics II Credits: 3
• PHYS 701 - Theoretical Physics Credits: 3
Doctoral Degree

Physics, PhD

Banner Code: SC-PHD-PHYS

All doctoral students accepted into the physics PhD program take a common core of four courses (see below). By working with the Dissertation Committee, a student may choose to specialize in an emphasis area such as astrophysics, biophysics, nonlinear physics, planetary sciences, material physics, space weather physics, or others according to his or her particular interests. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

This program of study is offered by the College of Science.

Admission Requirements

Those holding a baccalaureate degree in physics or astronomy from an accredited institution, who earned a GPA of 3.00 (out of 4.00) in their last 60 credits, and received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is recommended for all interested applicants who received their baccalaureate degrees within the past five years. A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University, please refer to the Graduate Admission Policies and Admission of International Students sections of this catalog.

Degree Requirements

Students must satisfy all requirements for doctoral degrees expressed in the Academic Policies section of this catalog.

All students in the physics PhD program must earn a minimum of 72 graduate credits. Of these, 48 are required course work and preliminary research credits, and 24 are doctoral dissertation proposal (PHYS/ASTR 998) and doctoral dissertation research (PHYS/ASTR 999) credits. For students entering the doctoral program with a master's degree in physics or a related field, or relevant graduate course work, the 48 credit requirement may be reduced by a maximum of 30 credits.

Physics Core (12 credits):

Note: the doctoral candidacy (qualifying) examination is based on the topics covered in these four core courses.

- PHYS 684 - Quantum Mechanics I Credits: 3
- PHYS 685 - Classical Electrodynamics I Credits: 3
- PHYS 705 - Classical Mechanics Credits: 3
- PHYS 711 - Statistical Mechanics Credits: 3

Specialty Science Courses (6 credits):
6 credits of approved physics or astronomy specialty courses.

General Science Electives (27 credits):

27 credits of approved general electives, which may be chosen from physics and astronomy, or other related disciplines.

Seminar (3 credits):

taken 3 times:

- PHYS 703 - Seminar in Physics Credits: 1

Qualifying Examination

The qualifying examination is offered once per year and is divided into four sections corresponding to the four topics in the core courses (Quantum Mechanics, Electromagnetic Theory, Classical Mechanics, and Statistical Mechanics). All students must successfully pass all four sections of the qualifying examination before the end of their third year. Grades of “Pass” or “Unsatisfactory” will be given individually for the four separate sections of the exam. If students receive a grade of “Unsatisfactory” in a given section of the exam, they will be allowed to retake that section a maximum of two times. Students can choose to take a particular section or a combination of sections at one sitting, but they must successfully pass all sections by the end of their third year.

Students entering the program with equivalent courses taken at another institution can satisfy the core requirement by taking the qualifying exam directly. Each section of the qualifying exam has written and oral components. The student must satisfactorily pass both components of the exam. The oral component may be waived by unanimous consent of the Qualifying Examination Committee based on exceptional performance on the written component. At the beginning of each academic year, the program director will appoint members to the Qualifying Examination Committee, and this committee is responsible for creating and grading the qualifying exam offered that year.

Advancement to Candidacy

Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge. After the successful completion of the qualifying examinations, a Dissertation Committee should be formed as soon as possible. This committee consists of a graduate faculty member from the Department of Physics and Astronomy and at least two other members of the graduate faculty, one of whom must be from outside the the Department. The composition of the committee must be approved by the program director. The Dissertation Committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. Before a student may be advanced to doctoral candidacy, they need to complete all required course work, pass the qualifying examination, and been recommended by their committee.

Research (24 credits):

Note: no more than 24 combined credits from PHYS/ASTR 998 and PHYS/ASTR 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of PHYS/ASTR 998.

- ASTR 998 - Doctoral Dissertation Proposal Credits: 1-12
- ASTR 999 - Doctoral Dissertation Credits: 1-12
- PHYS 998 - Doctoral Dissertation Proposal Credits: 1-12
• PHYS 999 - Doctoral Dissertation Credits: 1-12

Doctoral Dissertation

After advancing to doctoral candidacy, the student works with their Dissertation Committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be defended in a public forum before the Dissertation Committee and other interested faculty.

Total: 72 credits

“Mason is deeply committed to the arts and educating our students about the significance the arts have in all our lives. This is why the arts are integral to our institution. We encourage active student participation in the many programs and related courses in the arts that are scheduled throughout the year. Students are able to receive a more balanced education, develop a deeper appreciation of the arts, and achieve a more enlightened perspective of the world.”

—Alan G. Merten
President, George Mason University

The College of Visual and Performing Arts (CVPA) creates an academic environment in which the arts are considered as individual disciplines as well as interdisciplinary forms that strengthen each other. Courses of study are designed to lead to careers as creators, performers, teachers, managers, and scholars of the arts, as well as prepare students for the challenges of a rapidly changing world. In addition to providing strong programs for arts majors and minors, CVPA strives to ensure that Mason’s entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal arts education.

Studying the arts goes hand in hand with creation and performance. CVPA provides the theaters, studios, rehearsal spaces, computer laboratories, recital halls, and performance classrooms in which students hone their skills. Each major features strong academic preparation in the history and theory of the art form that supports discipline based technique courses. Creative work and performance are at the core of most courses of study. The college’s faculty of practicing artist-teachers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are...
encouraged to stretch, grow, and experiment within this supportive environment. Students regularly perform, create, exhibit, and otherwise develop their art forms in a wide variety of public venues, enhancing their experience as working artists while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts, which comprises a variety of professional presenting and producing units that provide a diverse program of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform in the Concert Hall, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, TheaterSpace, the Fine Arts Building and Johnson Center Galleries, Harris Theater, and other campus venues make the arts pervasive at Mason and in our larger community.

Administration

William F. Reeder, Dean
Linda G. Miller, Senior Associate Dean
Brian Marcus, Associate Dean, Development and Alumni Affairs
Victoria N. Salmon, Assistant Dean, Graduate Studies
Scott Martin, Assistant Dean, Research, Technology
Andrew Bursten, Director Finance and Administration, CFO
Thomas Reynolds, Director of Artistic Programming, Marketing and Audience Services
Julie Thompson, Executive Director, Center for the Arts
Jean Kellogg, Executive Director, Hylton Performing Arts Center
Rick Davis, Artistic Director, Center for the Arts and Co-Artistic Director, Theater of the First Amendment

Undergraduate Degree Programs

The undergraduate degree consists of course work in university general education, a major area of study, and electives. To earn a bachelor’s degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated “writing intensive.” All entering students who have not yet satisfied the university-wide requirement in quantitative reasoning are required to take the math placement test prior to enrollment.

Graduate Degree Programs

CVPA’s graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described in the sections that follow.

Academic Policies

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (Performing Arts Building, A407; 703-993-4551).

Academic Course Load
Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean’s permission. Students are advised that they will be required to pay additional tuition beyond the 16-credit, university full-time academic load. Graduate students earning degrees in CVPA may register for a maximum of 13 credits per fall and spring semester. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their advisor and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over course work.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Advising

Students are assigned advisors and are strongly encouraged to meet with them periodically, and particularly when they achieve 75 credits, or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher, if required by their program.

E-mail

George Mason uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language. This requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Student Academic Affairs Office about a possible waiver of this requirement.

General Education Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the University General Education chapter (University General Education). Students accepted into the Honors Program in General Education fulfill their core general education requirements with completion of that program of study. Students are strongly advised to consult the University General Education chapter of this catalog for information concerning general education.

Minors

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. Some departments have more specific criteria for applying credits to a minor.

Physical Education Courses

Activity courses offered by the Health, Fitness, and Recreation Resources Department cannot be counted toward credits required for a degree in CVPA. Students may take nonactivity PHED courses for elective credit for CVPA degrees.

Registration
Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add period.

Study Elsewhere

Students enrolled at George Mason University are expected to complete their coursework in residence. Exceptions to this policy are rare and are considered only under extraordinary circumstances and on a case-by-case basis. Students must obtain advance, written approval from their department/program and dean's office before enrolling in classes elsewhere.

To be considered for an exception to this policy, students must have completed the immediately preceding semester with a GPA of 2.00 or higher and not be in danger of academic probation, suspension or dismissal. Freshmen and new transfer students are not allowed to take courses elsewhere as they have yet to establish an academic record at George Mason. Since transfer students have already transferred a number of hours, they are expected to plan all remaining courses in residence. Local community colleges are not part of the University Consortium, and requests to take community college courses are seldom approved. Courses offered at Consortium Universities must be reviewed by the Consortium Coordinator in advance and will not be considered for general study elsewhere review.

Courses elsewhere that have been pre-approved by the dean's office must be taken for a grade and be passed with a GPA of 2.00 or higher in order to be transferred to George Mason. Although credit for the course can be transferred, the grade for the course cannot.

Students must make arrangements with the visited institution to have an official transcript mailed directly to the George Mason University Registrar's Office immediately after the course work is completed. Credit cannot be transferred until an official transcript is received.

Transfer of Credit

Undergraduate students may transfer a maximum of 18 credits earned in nondegree status into a degree program.

Graduate credit earned prior to admission to a certificate, master's, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see the Graduate Policies/Transfer of Credit portion of the catalog for more detailed information about the requirements.

Withdrawals

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See University Academic Policies for further details.

Appeals Process

Appeals of Academic Procedures:

See Academic Policies in George Mason University's University Catalog.

CVPA Procedures for Grade Appeal:
Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to believe that a professor is unfair. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The following are the College's steps in grade appeals:

1. The student meets with the professor to discuss the grade and class performance; this meeting should occur within two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Department or Program Chair.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the appeal, the student must submit a written appeal to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.

The Decision of the CVPA Associate Dean (undergraduate students), or Assistant Dean (graduate students) is final.

CVPA Procedures for Appeal of an Academic Action:

In exceptional circumstances a student may request a meeting to review the decision of an academic action.

1. The student must state in writing the reasons for requesting further appeal of an academic action, and provide any additional or new information relevant to the appeal.
2. The Associate Dean for Academic Affairs reviews all undergraduate appeals, and the Assistant Dean for Graduate Programs reviews all graduate appeals.
3. The dean will conduct a review of the documentation provided by the student, and may request additional information in order to make an informed decision.
4. A nonparticipating observer of the student's choice may attend the meeting with the dean, and the dean may also have a nonparticipating observer attend.
5. The student may follow University appeal procedures outlined in the University Catalog.

CVPA Procedure for Non-Academic Appeals or Grievance:

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator follows the following steps:

1. The student meets with the professor and Department Chair to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Chair only.
2. The professor (Chair) responds to the student within three days of the meeting.
3. If the student were to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean for Academic Affairs reviews all non-academic appeals and grievances.

Academic Dismissal from a Graduate Program:

The Registrar's Office contacts students via e-mail if they earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. a written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.
4. The CVPA Assistant Dean for Graduate Programs reviews the appeal.
5. The final decision of the CVPA Assistant Dean is forwarded to the student and Registrar's Office.
6. The student may follow University appeal procedures outlined in the University Catalog.

For these, and any other academic concerns, students are encouraged to contact George Mason University's Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of
students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university. (Academic Policies).

CVPA Courses

Some CVPA courses transcend individual disciplines. These courses are administered by the Dean’s Office and are designated CVPA in the Courses chapter of this catalog.

■ School of Art

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: soa.gmu.edu

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft (associate director), Crawford, Feerick, Frenn, Rothstein, White

Assistant Professors: Cooley, Cui, Endress, Karametou, Sheridan, Winant (associate director), Wrbican

Term Assistant Professors: Constantine, Del Popolo, Stanley, Starr

Adjunct Faculty: Bradley, Carr-Shaffer, Castellana, Clements, Cushner, Dicicco, Ferreira, Goldman, Gorman, Guerrieri, Hicks, Ho, Hoffmann, Kerns, Nahidian, Organ, Petzwinkler, Rodriguez, Sapsford, Tomhave, Watson

Mission

The School of Art offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the School of Art Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the AVT curriculum.

Course Work
The School of Art offers all course work designated AVT in the Courses chapter of this catalog.

**Undergraduate Programs**

Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). The school also offers an undergraduate minor, an interdisciplinary minor in multimedia, and an honors program for selected AVT majors.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the school’s art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art. Consult the course listings for prerequisites.

**Admission to School of Art Requirements**

All students are admitted to School of Art programs of study separately from their admission to the university and only by portfolio review. Students may be admitted to study in the BA or BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials before applying for admission or enrolling in the university at designated portfolio review days before and during each semester
- Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
- Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

**BFA Portfolio Review**

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the School of Art. Please call the main office to schedule an appointment (703-993-8898).

For current Mason students in the AVT BA program who wish to change to the BFA program, or other current Mason students, application deadlines are at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their concentration in the semester prior to their application to discuss the portfolio.

For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of college-level art work
- One-page, double-spaced essay that describes the candidate's interest in a studio art degree

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students may alternatively be admitted to study in the BFA program by one of three ways:

- Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
• Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
• Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the School of Art for an application and specific directions on presenting the portfolio.

Artsbus Requirement

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

Visual Voices Requirement

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

Major GPA

All AVT undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Studios

The School of Art program is located in the Art and Design building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with...
current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

School of Art Honors Program

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

General Education (37 credits)
Foundation Requirements

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  (Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.)
- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3

Core Requirements

- Literature Credits: 3
- Arts Credits: 3*
- Natural science (including at least one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3**
- Social and behavioral sciences Credits: 3

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (60-63 credits)

Studio Foundation (17 credits)

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 4 or
- AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (18 credits)
- ARTH 200 - Survey of Western Art Credits: 3 or
- ARTH 203 - Survey of Asian Art Credits: 3 or
- ARTH 204 - Survey of Latin American Art Credits: 3
  and
- ARTH 201 - Survey of Western Art Credits: 3
- ARTH 374 - Art Now Credits: 3
- AVT 301 - Visual Voices Colloquium Credits: 1 (must be taken for a total of 3 credits or each semester, if less than 3 semesters)
- AVT 307 - Aesthetics Credits: 3
- AVT 395 - Writing for Artists Credits: 3

**Breadth and Experience (9-12 credits)**

Choose three of the following classes; at least one course must be a 200-level studio course:

- AVT 215 - Typography Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to Digital Arts Credits: 4
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

**Synthesis (4 credits)**

- AVT 497 - Senior Project Credits: 4 or
- AVT 498 - Senior Design Project Credits: 4

**Concentration (12 credits)**

12 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media, Painting, Photography, Printmaking or Sculpture

▲ **Drawing (DRW)**

- AVT 422 - Drawing III Credits: 4
- AVT 423 - Drawing IV Credits: 4

4 credits from:

- AVT 324 - Figure Drawing Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
• AVT 333 - Painting II Credits: 4
• AVT 336 - Experimental Painting Credits: 4
• AVT 337 - Figurative Painting Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

Note:
All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)

• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4

Graphic Design Note
All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

• AVT 373 - Performance Studio Credits: 4
• AVT 473 - Advanced Performance Studio Credits: 4

4 credits from:

• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound and Vision Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

▲ New Media Art (NMA)

12 credits from:

• AVT 382 - Digital Art and Animation Credits: 4
• AVT 383 - Three-Dimensional Digital Art Credits: 4
• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
• AVT 483 - Internet Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4
▲ Painting (PNT)

- AVT 333 - Painting II Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4

▲ Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 4
- AVT 459 - About Photography: Practice and Research Credits: 4

4 credits from:

- AVT 452 - Advanced Traditional Photo Methods Credits: 4
- AVT 453 - Professional Photo Practices Credits: 4
- AVT 454 - Alternative Photo Processes Credits: 4
- AVT 455 - Digital Printing Techniques Credits: 4
- AVT 456 - Large Format Photography Credits: 4
- AVT 457 - Documentary Photography Credits: 4
- AVT 458 - Advanced Studio Lighting Credits: 4

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience.

▲ Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4

8 credits from:

- AVT 345 - Artists' Books as Visual Language Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 442 - Printmaking III Credits: 4
- AVT 443 - Printmaking IV Credits: 4

▲ Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4
Concentration Electives

AVT 399 or AVT 491 may be taken with permission of respective Division Coordinator.

- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

General Electives (20-23 credits)

BA students must use general electives to either complete a minor, double major or double degree outside their primary major field of study (15–20 credits) or demonstrate intermediate-level proficiency in one foreign language (0–12 credits)*. After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above.

AVT 393 Field Experience in the Arts and AVT 489 Internship are not required courses but are highly recommended as electives for BA students.

*See beginning of CVPA chapter for foreign language requirement.

Total: 120 credits

Mission
The School of Art offers students an environment in which the pursuit of a degree is a commitment to a way of life that centers on creative thought processes and the production of artworks. The curriculum and the faculty focus on cultivating students’ appreciation of and expertise in studio and digital arts. Students are encouraged to dedicate themselves to academic excellence, skilled artistry, and employing visual literacy within an atmosphere of creative freedom. The faculty’s ongoing engagement with artistic practice forms a vital part of the student-instructor relationship. By offering instruction in traditional and contemporary technologies for art making, faculty members help students develop a strong foundation to realize their personal and professional goals.

A principle that underlies the School of Art Program is its focus on fostering student understanding and experience of the interdisciplinary nature of inquiry and practice in the visual arts. This focus is important because art today crosses the boundaries of traditional disciplines and integrates traditional and technology-based media into the creation of new art forms. This interdisciplinary focus is introduced to all AVT majors in required Foundations and Core courses and is reinforced throughout the SOA curriculum.

Course Work

The School of Art offers all course work designated AVT in the Courses chapter of this catalog.

UNDERGRADUATE PROGRAMS

This intensive, 120-credit studio production program emphasizes analytical, creative, and experiential aspects of studio and new media art. It is designed to prepare students professionally as visual artists or for graduate study in the fine arts. Students devote a significant portion of their college careers to an in-depth study in one of the following concentrations: drawing, graphic design, interdisciplinary arts (InterArts), new media art, painting, photography, printmaking, or sculpture.

Admission to School of Art Requirements

All students are admitted to AVT programs of study separately from their admission to the university and only by portfolio review.

New students at Mason may apply to the BFA program upon admission to the university through a portfolio review. Portfolio reviews are scheduled through periodic Admission Office events, or through scheduled dates designated by the School of Art. Please call the main office to schedule an appointment (703-993-8898).

Current Mason students in the AVT BA program who wish to change their degree program to a BFA, or other current Mason students, may apply for admission to the BFA degree program by presenting a substantive college level portfolio and other requested credentials during the department's designated application period at the end of the sixth week of the fall and spring semester each year. Students planning to apply must meet with the coordinator of their concentration in the semester prior to their application to discuss the portfolio.

For all candidates, admission to the BFA program is highly competitive and requires submission of the following:

For all incoming students:

- Portfolio of 10 to 15 original examples of recent art work
- One-page, double-spaced essay that describes the candidate's interest in a studio art degree

In addition, for all transfer students:

- Transcripts of all college-level study
- Must have at least a 3.00 cumulative GPA overall and in the major

Students may alternatively be admitted to study in the BFA program by one of three ways:
• Presenting a portfolio and any other requested credentials at designated portfolio review days before each semester and before applying for admission
• Completing the sequence of AVT 104, 105, and 222 with a 3.25 or higher average in those courses, and applying for admission through a portfolio review
• Completing the sequence of AVT 104, 105, and 222; and 323 or 324; and one other 200-level AVT course with a 3.00 or higher GPA in those courses; and applying for admission through a portfolio review

Students interested in applying should contact the School of Art for an application and specific directions on presenting the portfolio.

Students who intend to seek licensure to teach art in Virginia public schools or apply for entrance to the master of arts in teaching program for art education are required to pursue a BFA (any concentration) with the suggested course work listed below.

Neither the BA nor the BFA program satisfies all requirements for those seeking accreditation for teaching in the public schools. Undergraduate students interested in this field should contact the department’s art education advisor to learn more about teacher preparation.

**Artsbus Requirement**

All AVT majors must meet the school’s requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 is the same as for any other class.

Freshmen who enroll as AVT majors must take AVT 300 for five semesters. Transfer students and students who change their majors to AVT must take AVT 300 for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 do not have to be consecutive. Students may take AVT 300 up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300/Artsbus participation are posted on the Artsbus web site: http://artsbus.gmu.edu. Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

**Visual Voices Requirement**

All AVT majors must fulfill three credits of Visual Voices, AVT 301, in order to graduate, unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to have one AVT 301 credit per semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work. The procedure and requirements for enrollment in AVT 301 are the same as for any other class.

**Writing-Intensive Requirement**

Mason requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 (or AVT 494 for BFA students planning to pursue the MAT in art education).

**Upper-Level Credits**

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.
Major GPA

All SOA undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Studios

The School of Art program is located in the Art and Design building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

School of Art Honors Program

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits of AVT 394 Honors Seminar.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

General Education (37 credits)

Foundation Requirements

- Oral communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts Credits: 3*
- Natural science (including at least one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3**
• Social and behavioral sciences Credits: 3

Notes:

*AVT majors may not choose AVT courses to meet this requirement, and they may not double-count ARTH courses toward both the AVT major and the university general education arts requirement.

**AVT majors may not double-count ARTH courses toward both AVT major requirements and the university general education global understanding requirement.

AVT Major Requirements (78-81 credits)

Studio Foundation (17 credits)

• AVT 101 - New Majors Colloquium Credits: 1
• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 105 - Studio Fundamentals II Credits: 4
• AVT 222 - Drawing I Credits: 4

• AVT 323 - Drawing II Credits: 4 or
• AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (24 credits)

• ARTH 200 - Survey of Western Art Credits: 3 or
• ARTH 203 - Survey of Asian Art Credits: 3 or
• ARTH 204 - Survey of Latin American Art Credits: 3 and
• ARTH 201 - Survey of Western Art Credits: 3

One course from the following:

• ARTH (300 or 400 level): 3
• AVT 305 - Creative Processes Credits: 3
• AVT 309 - Art as Social Action Credits: 3
• AVT 371 - Visual Perception and the Arts Credits: 3
• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound and Vision Credits: 4
• AVT 418 - History of Graphic Design Credits: 3
• AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3

Note:

*Students concentrating in graphic design must take AVT 418 to meet this requirement.
Plus

- ARTH 374 - Art Now Credits: 3
- AVT 301 - Visual Voices Colloquium Credits: 1 (must be taken for a total of 3 credits or each semester, if less than 3 semesters)
- AVT 307 - Aesthetics Credits: 3
- AVT 395 - Writing for Artists Credits: 3
- AVT 472 - Critical Theory in the Visual Arts Credits: 3

Breadth and Experience (9-12 credits)

Any three of the following:

- AVT 215 - Typography Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 253 - Introduction to Digital Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4
- AVT 272 - Interdisciplinary Arts Credits: 4
- AVT 280 - Introduction to Digital Arts Credits: 4
- AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

Synthesis (4 credits)

- AVT 497 - Senior Project Credits: 4 or
- AVT 498 - Senior Design Project Credits: 4

Concentration (24 credits)

24 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking or Sculpture

▲ Drawing (DRW)

- AVT 422 - Drawing III Credits: 4
- AVT 423 - Drawing IV Credits: 4

4 credits from:

- AVT 324 - Figure Drawing Credits: 4
- AVT 326 - Nontraditional Approaches to Drawing Credits: 4
- AVT 333 - Painting II Credits: 4
- AVT 336 - Experimental Painting Credits: 4
• AVT 337 - Figurative Painting Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

12 credits from:

• AVT 300–499

Note:

All AVT majors concentrating in drawing must complete AVT 232 (Painting I) under Breadth and Experience.

▲ Graphic Design (GD)

• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4
• AVT 415 - Web Design and Usability Credits: 4

8 credits of:

• AVT 419 - Topics in Graphic Design Credits: 1-6

Graphic Design Notes:

AVT 496 or AVT 491 may be taken with permission of the Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.

▲ InterArts (IA)

• AVT 373 - Performance Studio Credits: 4
• AVT 473 - Advanced Performance Studio Credits: 4

12 credits from:

• AVT 372 - Hip Hop Culture Credits: 3
• AVT 374 - Sound and Vision Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 378 - The African American Experience in the Performing Arts Credits: 3
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

4 credits from:
• AVT 300–499

▲ New Media Art (NMA)

12 credits from:

• AVT 382 - Digital Art and Animation Credits: 4
• AVT 383 - Three-Dimensional Digital Art Credits: 4
• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
• AVT 483 - Internet Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4

12 credits from:

• AVT 300–499

▲ Painting (PNT)

• AVT 333 - Painting II Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

12 credits from:

• AVT 300–499

▲ Photography (PHO)

• AVT 353 - Traditional Photo Methods Credits: 4
• AVT 459 - About Photography: Practice and Research Credits: 4

8 credits from:

• AVT 452 - Advanced Traditional Photo Methods Credits: 4
• AVT 453 - Professional Photo Practices Credits: 4
• AVT 454 - Alternative Photo Processes Credits: 4
• AVT 455 - Digital Printing Techniques Credits: 4
• AVT 456 - Large Format Photography Credits: 4
• AVT 457 - Documentary Photography Credits: 4
• AVT 458 - Advanced Studio Lighting Credits: 4

8 credits from:
• AVT 300–499

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience

▲ Printmaking (PMT)

• AVT 343 - Printmaking II Credits: 4

8 credits from:

• AVT 345 - Artists' Books as Visual Language Credits: 4
• AVT 346 - Digital Printmaking Credits: 4
• AVT 442 - Printmaking III Credits: 4
• AVT 443 - Printmaking IV Credits: 4

12 credits from:

• AVT 300–499

▲ Sculpture (SCL)

• AVT 363 - Sculpture II Credits: 4
• AVT 462 - Sculpture III Credits: 4
• AVT 463 - Sculpture IV Credits: 4

12 credits from:

• AVT 300–499

General Electives

• General Electives (2-5 credits)

Total: 120 credits

Degree Requirements for Students Intending to Pursue the MAT Degree in Art Education
General Education (38 credits)

Foundation Requirements

- Oral Communication Credits: 3
- Quantitative reasoning Credits: 3
- Information technology Credits: 4 (AVT 180 - Computers in the Creative Arts and CS 105 - Computer Ethics and Society or PHIL 112 - Ethics and the Cybersociety)
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Natural Science (including at least one laboratory science) Credits: 7
- Western Civilization Credits: 3
- Arts Credits: 3 ARTH 200 - Survey of Western Art
- Global Understanding Credits: 3 (ARTH 203 - Survey of Asian Art recommended)
- Social and Behavioral Sciences Credits: 3 (PSYC 100 - Basic Concepts in Psychology recommended)
- Synthesis options are specified and counted under AVT major requirements

AVT Major Requirements (78-80 credits)

Studio Foundation (17 credits)

- AVT 101 - New Majors Colloquium Credits: 1
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 323 - Drawing II Credits: 4 or
- AVT 324 - Figure Drawing Credits: 4

Art History, Critical Analysis, Contemporary Practice (24 credits)

Only for students who complete all five of the required undergraduate art education courses (AVT 493, 494, 495, EDUC 301, 302), credits for ARTH 200 may be counted toward the major and the arts university general education requirement
• ARTH 200 - Survey of Western Art Credits: 3
• ARTH 201 - Survey of Western Art Credits: 3
• ARTH 374 - Art Now Credits: 3
• AVT 301 - Visual Voices Colloquium Credits: 1 (must be taken for a total of 3 credits or each semester, if less than 3 semesters)
• AVT 307 - Aesthetics Credits: 3
• AVT 472 - Critical Theory in the Visual Arts Credits: 3
• AVT 493 - Teaching Visual Thinking Through Media, PK-12 Credits: 3 (meets the ARTH 300+ requirement)
• AVT 494 - Teaching Critical Response to Art, PK-12 Credits: 3 (meets the AVT 395 writing-intensive requirement)

Breadth and Experience (three classes: 9-11 credits)

• AVT 262 - Sculpture I Credits: 4 or another three dimensional-focused course
• AVT 495 - Introduction to Art Teaching and Learning Credits: 3

One of the following courses (4 credits)

• AVT 215 - Typography Credits: 4
• AVT 232 - Painting I Credits: 4
• AVT 243 - Printmaking I Credits: 4
• AVT 252 - Fundamentals of Photography Credits: 4
• AVT 253 - Introduction to Digital Photography Credits: 4
• AVT 272 - Interdisciplinary Arts Credits: 4
• AVT 280 - Introduction to Digital Arts Credits: 4
• AVT 496 - Special Topics: (specific course title varies) Credits: 1-4

Synthesis (4 credits)

• AVT 497 - Senior Project Credits: 4 or
• AVT 498 - Senior Design Project Credits: 4

Concentration (24 credits)

24 credits in one of the following areas: Drawing, Graphic Design, InterArts, New Media Art, Painting, Photography, Printmaking or Sculpture

▲Drawing (DRW)
• AVT 422 - Drawing III Credits: 4
• AVT 423 - Drawing IV Credits: 4

4 credits from:

• AVT 324 - Figure Drawing Credits: 4
• AVT 326 - Nontraditional Approaches to Drawing Credits: 4
• AVT 333 - Painting II Credits: 4
• AVT 336 - Experimental Painting Credits: 4
• AVT 337 - Figurative Painting Credits: 4
• AVT 432 - Painting III Credits: 4
• AVT 433 - Painting IV Credits: 4

12 credits from:

• AVT 300-499

Note:

All AVT majors concentrating in drawing must complete AVT 232 Painting I under Breadth and Experience.

▲Graphic Design (GD)

• AVT 311 - Graphic Design Methods and Principles Credits: 4
• AVT 313 - Editorial Design Credits: 4
• AVT 414 - Corporate Design and Branding Credits: 4
• AVT 415 - Web Design and Usability Credits: 4

8 credits from:

• AVT 419 - Topics in Graphic Design Credits: 1-6
• AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

Graphic Design Notes:

AVT 496 or AVT 491 may be taken with permission of Area Coordinator.

All AVT majors concentrating in graphic design must complete AVT 252 Photography I or AVT 253 Introduction to Digital Photography under Breadth and Experience.
▲InterArts (IA)

- AVT 373 - Performance Studio Credits: 4
- AVT 473 - Advanced Performance Studio Credits: 4

12 credits from:

- AVT 372 - Hip Hop Culture Credits: 3
- AVT 374 - Sound and Vision Credits: 4
- AVT 376 - Live Movies Credits: 4
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- AVT 491 - Independent Study in Art and Visual Technology Credits: 1-6

4 credits from:

- AVT 300-499

▲New Media Art (NMA)

12 credits from:

- AVT 382 - Digital Art and Animation Credits: 4
- AVT 383 - Three-Dimensional Digital Art Credits: 4
- AVT 390 - Digital Media and Video Art Credits: 4
- AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
- AVT 483 - Internet Art Credits: 4
- AVT 487 - Advanced Digital Media Credits: 4

12 credits from:

- AVT 300-499

▲Painting (PNT)

- AVT 333 - Painting II Credits: 4
- AVT 432 - Painting III Credits: 4
- AVT 433 - Painting IV Credits: 4
12 credits from:

- AVT 300-399

▲Photography (PHO)

- AVT 353 - Traditional Photo Methods Credits: 4
- AVT 459 - About Photography: Practice and Research Credits: 4

8 credits from:

- AVT 452 - Advanced Traditional Photo Methods Credits: 4
- AVT 453 - Professional Photo Practices Credits: 4
- AVT 454 - Alternative Photo Processes Credits: 4
- AVT 455 - Digital Printing Techniques Credits: 4
- AVT 456 - Large Format Photography Credits: 4
- AVT 457 - Documentary Photography Credits: 4
- AVT 458 - Advanced Studio Lighting Credits: 4

8 credits from:

- AVT 300-499

Photography Note:

All AVT majors concentrating in photography must complete AVT 252 Photography I under Breadth and Experience

▲Printmaking (PMT)

- AVT 343 - Printmaking II Credits: 4

8 credits from:

- AVT 345 - Artists' Books as Visual Language Credits: 4
- AVT 346 - Digital Printmaking Credits: 4
- AVT 442 - Printmaking III Credits: 4
- AVT 443 - Printmaking IV Credits: 4
12 credits from:

- AVT 300-499

▲Sculpture (SCL)

- AVT 363 - Sculpture II Credits: 4
- AVT 462 - Sculpture III Credits: 4
- AVT 463 - Sculpture IV Credits: 4

12 credits from:

- AVT 300-499

General Electives (2-4 credits)

Take the following art education courses to meet state education requirements:

- EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural Credits: 3
- EDUC 302 - Human Growth and Development Credits: 3

Total: 120 credits

Note:

Following this curriculum does not guarantee entry into the MAT Program. Prospective MAT students must meet all MAT admissions requirements as described in the catalog.

Undergraduate Minor

Art and Visual Technology Minor

Banner Code: AVT

Art and Design Building, Room 2050
Phone: 703-993-8898
Web: soa.gmu.edu/
The minor in AVT requires 20 credits and offers a core of foundational studies with the opportunity for further study in the following areas: drawing, graphic design, InterArts, new media arts, painting, photography, printmaking, or sculpture.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

The requirements are as follows:

- AVT 200–299 (4)
- AVT 300–399 (4)
- AVT 104 - Studio Fundamentals I Credits: 4
- AVT 105 - Studio Fundamentals II Credits: 4
- AVT 222 - Drawing I Credits: 4

Total: 20 credits

Master's Degree

Art and Visual Technology, MFA

Banner Code: AR-MFA-AVT

Art and Design Building, Room 2050
Phone: 703-993-8898

Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft (associate director), Crawford, Feerick, Frenn, Rothstein, White

Assistant Professors: Cooley, Cui, Endress, Karametou, Sheridan, Winant (associate director), Wrbican

Term Assistant Professors: Constantine, Del Popolo, Stanley, Starr

Adjunct Faculty: Bradley, Carr-Shaffer, Castellana, Clements, Cushner, Dicicco, Ferreira, Goldman, Gorman, Guerrieri, Hicks, Ho, Hoffmann, Kerns, Nahidian, Organ, Petzwinkler, Rodriguez, Sapsford, Tomhave, Watson

GRADUATE PROGRAM
The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits of which 45 credits are made up from both core and studio requirements. An additional 15 credits are based on comprehensive experience.

MFA students may choose an emphasis in digital arts, painting, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program that meets curricular requirements.

**Admission Requirements**

In addition to meeting the general university requirements for admission for graduate study, candidates for the MFA must hold a BA or BFA degree. Upon applying, they must submit a portfolio, statement of intent and professional goals, and three letters of reference. Applications will be accepted for the fall semester only. The deadline for receipt of application materials is January 15.

Diversity among students accepted for study is another consideration. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core courses.

**Portfolio Guidelines**

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art office at 703-993-8898.

Portfolio requirements are different for each graduate area of emphasis and are listed below. Incomplete portfolios will not be considered.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

**Portfolio requirements by area of emphasis:**

New Media: 20 images on a Mac (Apple Macintosh platform) compatible CD. CD images must be numbered on the CD, and correspond to an accompanying written descriptive list. List should include: name of artist, title, date, medium, and size of each work. Videos (no more than four minutes for each selection) must be playable from a Mac-compatible CD or DVD. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. New Media applicants should not submit slides.

Painting: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

Photography: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

Printmaking: 20 images on a Mac-compatible CD or slides. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.
Sculpture: 20 images on a Mac-compatible CD, slides or DVD. All images must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work.

InterArts: 20 images on a Mac-compatible CD, slides, videos, or writing-based materials. All images on the CD must be numbered and correspond to an accompanying written descriptive list. List should correspond in number and include: name of artist, title, medium, size, and date of each work. If videos are included, they must contain no more than four minutes for each selection. Only the relevant parts of the video should be marked for viewing, with the applicant’s role clearly stated. If writing-based materials are submitted, they should be submitted in printed form.

Supplementary material for all applicants, but not specifically requested by the review committee, such as CDs (Mac compatible only), videos (DVD, VHS in NTSC format), film, web addresses, press clippings, or reviews of exhibitions may be submitted but will be reviewed only at the discretion of the AVT graduate application reviewers.

**Studios**

The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

**Core Requirements (30 credits)**

- AVT 500+ Art and Visual Technology Course Work (10)
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (Must be taken for a total of 4 credits)
- AVT 600 - Research Methodologies Credits: 3
- AVT 610 - Graduate Seminar Credits: 1-4 (1 credit repeated for 4 credits)
- AVT 620 - Theory, Criticism, and the Visual Arts Credits: 3
- AVT 670 - Teaching Practicum Credits: 3 - 6

**Studio Emphases (15 credits)**

MFA students must complete 15 credits in digital arts, InterArts, painting, photography, printmaking, or sculpture, as follows:

**Digital Arts Emphasis**
Any three of the following courses:

- AVT 616 - Networked Art Practice Credits: 5
- AVT 676 - Sound and Music for Video and Animation Credits: 5
- AVT 678 - Interface and CD-ROM Design Credits: 5
- AVT 684 - Two-Dimensional Digital Art Credits: 5
- AVT 686 - Three-Dimensional Digital Art Credits: 5
- AVT 688 - Digital Animation Credits: 5

**InterArts Emphasis**

Any three graduate studio courses as approved by the division director of InterArts, for a total of 15 credits. InterArts graduate students may combine courses from the studio areas of emphasis and work with faculty to design an interdisciplinary thesis project.

**Painting Emphasis**

All three of the following courses:

- AVT 632 - Graduate Painting I Credits: 5
- AVT 633 - Graduate Painting II Credits: 5
- AVT 634 - Advanced Graduate Painting Credits: 5

**Photography Emphasis**

All three of the following courses:

- AVT 652 - Graduate Photography I Credits: 5
- AVT 653 - Graduate Photography II Credits: 5
- AVT 654 - Advanced Graduate Photography Credits: 5

**Printmaking Emphasis**

All three of the following courses:

- AVT 642 - Graduate Printmaking I Credits: 5
- AVT 643 - Graduate Printmaking II Credits: 5
- AVT 644 - Advanced Graduate Printmaking Credits: 5

**Sculpture Emphasis**

All three of the following courses:

- AVT 662 - Graduate Sculpture I Credits: 5
- AVT 663 - Graduate Sculpture II Credits: 5
- AVT 664 - Advanced Graduate Sculpture Credits: 5
MFA Comprehensive Experience (15 credits)

Candidates must complete all of the above core and studio requirements as well as the following:

- AVT 796 - Directed Reading Credits: 1-9 (Must be taken for a total of 9 credits)
- AVT 798 - Directed Project and Exhibition Credits: 3
- AVT 799 - Thesis Credits: 1-3 (Must be taken for a total of 3 credits)

Note:

The comprehensive experience involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

Total: 60 credits

Art Education, MAT

Banner Code: AR-MAT-ARTE

Phone: 703-993-8562

Web: arteducation.gmu.edu

GRADUATE PROGRAM

The master of arts in teaching in art education is a preservice degree program that prepares students with a BFA degree or equivalent for preK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work and preservice teaching internship and seminar.

Admission Requirements

In addition to meeting the general university admission requirements for graduate study, admission to this program is contingent on completion of a BFA in art or approved equivalent. Also, candidates must have a minimum 3.00 cumulative undergraduate GPA. Eligibility for the MAT in Art Education Program may demand additional course work to establish proficiency in visual arts. Students lacking a strong background in the visual arts or pedagogy will be required to satisfy prerequisite courses prior to the required graduate courses.

Applications will be accepted for fall and spring semesters. The deadline for receipt of application materials is October 1 and March 1. Each applicant must provide the following materials:

- Completed application form
- Certified copies of all undergraduate transcripts and any graduate transcripts
• Statement of intent and professional goals for entering the field
• Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant’s academic or professional capabilities
• Official score on Praxis I or SAT equivalent
• TOEFL score, if required by Mason policies
• Portfolio of 15 to 20 images that reflect artistic breadth and depth, including drawing skills of the applicant’s art. The work should be in Power Point format on a Mac-compatible CD. All portfolios must include a written image sheet with the corresponding number, title, date, medium, and size of each work. Incomplete portfolios will not be considered. Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials.

The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. Qualified applicants will be invited to an on-campus interview, portfolio review of original art works, and in-person writing sample.

Diversity among students is another consideration for acceptance into the program. Applicants with degrees in areas other than art are welcome, although they may be required to complete undergraduate core, and studio and art history courses.

MAT matriculants who earned a BFA at an institution other than Mason may be required to take additional undergraduate credits as post baccalaureate core requirements before acceptance into the program. Without equivalent courses, they will be required to take two BFA foundational courses in art education and education: AVT 493 and 494.

In addition, applicants who did not take equivalent undergraduate courses must also take AVT 180 Computers in the Creative Arts, plus any additional studio or art history course work to meet Virginia licensure requirements.

**Professional Teaching Portfolio and Qualifications Review**

The comprehensive experience for the MAT includes the following: (1) a group exhibition, “The Art of Teaching Art Showcase,” in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate’s own artwork, and (2) a culminating review of the intern’s competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching. All process folios, lesson plans, explanations of projects, visual images, and other relevant materials must be made available for the project committee to review. Artworks and all materials should be exhibited in a manner that reveals the student’s aesthetic accomplishments. This exhibition and review will assess the MAT candidate’s final professional teaching portfolio that may be used at interviews for employment. These requirements will be accomplished during the internship seminar course that accompanies student teaching. A committee of MAT faculty will determine whether the student has mastered the field of study. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education Program.

**Teacher Endorsement: Art**

Students must complete ALL endorsements, including Praxis I, PLUS art education foundational courses AVT 493 Teaching Visual Thinking Through Media PK-12 and AVT 494 Teaching Critical Respond to Art, PK-12, totaling 6 credit hours. (NOTE: these courses may be taken concurrently with other MAT courses.) Students must have a studio major in the Visual Arts and meet Virginia Department of Education's required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgement and criticism, aesthetics, and 3 hours of related areas of the fine arts.

Course work meets licensure and master's degree requirements.

Recommended Sequence for Licensure:

• AVT 595 Intro to Art Teaching and Learning Credits: 3
• EDUC 539 Human Development and Learning Credits: 3
• EDRD 501 Literacy and Curriculum Integration, K-12 Credits: 3
• AVT 691 Elementary Art Education Credits: 3
• AVT 692 Secondary Art Education Credits: 3
• AVT 695 Internship (Student Teaching) Credits: 5
• AVT 696 Student Teaching Internship Seminar Credits: 1

Art Education

The College of Education and Human Development (CEHD) offers educational programs through its Advanced Studies in Teaching and Learning (ASTL) program for art teachers with current licensure in art education. See the CEHD chapter of this catalog for information on the concentration in ASTL: Art Education (E1-CRIN/AART) and the Graduate Certificate in ASTLE: Art Education (E1-CERG-AART).

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Degree Requirements

• AVT 595 - Introduction to Art Teaching and Learning Credits: 3
• EDUC 539 - Human Development and Learning PK-12 Credits: 3
• EDRD 501 - Literacy and Curriculum Integration, PK-12 Credits: 3
• AVT 605 - Issues and Research in Art Education Credits: 3
• AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context Credits: 3
• AVT 668 - Three-Dimensional Art Making across Cultures Credits: 3
• AVT 691 - Elementary Art Education Credits: 3
• AVT 692 - Secondary Art Education Credits: 3

Prior to Internship, must pass: Praxis II, VCLA, technology & child abuse standards
• AVT 695 - Internship in Art Education (Student Teaching) Credits: 6
• AVT 696 - Internship for Student Teachers Credits: 1

Total: 30-31 credits

Notes:

MAT students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Graphic Design, MA

Banner Code: AR-MA-GD
Faculty

Harold Linton, Director

Professors: Carbonneau, Frederick, Kravitz (gallery director), Linton (director), Sandell

Associate Professors: Ashcraft (associate director), Crawford, Feerick, Frenn, Rothstein, White

Assistant Professors: Cooley, Cui, Endress, Karametou, Sheridan, Winant (associate director), Wrbican

Term Assistant Professors: Constantine, Del Popolo, Stanley, Starr

Adjunct Faculty: Bradley, Carr-Shaffer, Castellana, Clements, Cushner, Dicicco, Ferreira, Goldman, Gorman, Guerrieri, Hicks, Ho, Hoffmann, Kerns, Nahidian, Organ, Petzwinkler, Rodriguez, Sapsford, Tomhave, Watson

GRADUATE PROGRAM

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This proposed degree will be the only graduate degree in graphic design in the Capital region.

Admission Requirements

Application deadlines are as published by the University. Applicants should have an earned BA or BFA degree in Graphic Design from an accredited college or university, with a GPA of 3.0 in art courses. However, applicants with a BA or BS in another discipline, and work experience in the field may apply for admission also. Student should schedule an interview with design faculty prior to admission.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit three letters of recommendation from faculty members, or those who can evaluate the applicant's academic potential; a sample of academic writing about art or graphic design, such as a paper from an art or design history course; and a CD or DVD with 20 examples of design works in PDF, jpeg, or a format that will play in a standard web browser.

Portfolio Guidelines

The applicant’s portfolio is a major selection criterion for graduate admission and should represent the applicant’s most accomplished work.

Applicants’ portfolio items are considered part of the application for admission and, thus, cannot be returned. Please do not send original materials. The portfolio and all other application materials should be submitted to the Office of Graduate Admissions. For more information, contact the School of Art at 703-993-8898.

Studios
The School of Art is located in the Art and Design Building which houses well equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Studios are open to students for extended periods mornings, evenings, and weekends whenever classes are not in progress. Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

**Core Courses (17 credits)**

- AVT 522 - Drawing V Credits: 4
- AVT 523 - Drawing VI Credits: 4
- AVT 611 - Graduate Design Seminar Credits: 1
- AVT 612 - Thesis Research Credits: 1
- AVT 613 - Graphic Design History Credits: 3
- AVT 617 - Advanced Typography Credits: 4

**Elective Courses (15-20 credits)**

- AVT 614 - Brand Identity Design Credits: 4
- AVT 619 - Advanced Web Design Credits: 4
- AVT 596 - Independent Study Credits: 1-6 (3-6 credits)
- AVT 599 - Special Topics in Art and Visual Technology Credits: 1-6 (3-6 credits)

**Final Project (4 credits)**

The final steps for completion of the MA in Graphic Design are a substantial final project that calls upon all the skills of a working designer.

- AVT 794 - Independent Design Project Credits: 4

**Total: 36 credits**

Course Work

The Arts Management Program offers all course work designated AMGT in the Courses chapter of this catalog.

Undergraduate Program

Arts Management Minor

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

Graduate Certificates

Arts Entrepreneurship

The Arts Entrepreneurship certificate is for early to mid-career professionals working at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the actual execution of business models.

Fund Raising and Development in the Arts

The Fund Raising and Development in the Arts certificate is especially helpful for mid-career professionals. It focuses on the practical application of development principles, writing and communication skills, and strategic planning.
Public Relations and Marketing in the Arts

The Public Relations and Marketing in the Arts certificate focuses on strategic planning, development and implementation of public relations and marketing in arts organization for the beginning and mid-level professional.

Special Events Management in the Arts

The Special Events Management in the Arts certificate is for the entry level or mid-level professional to increase their skills in the fast paced and creative field of events management.

MA in Arts Management

The MA in arts management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the world of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation’s largest concentrations of performing and visual arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship-building management among the private and public arts sectors also continues to grow at a fast pace.

The MA is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 23-credit core and then select courses from a cluster: entrepreneurship in the arts and management; finance and budgeting for the arts; marketing and public relations; or an arts-specific cluster. Students also take internal and external internships. The internal internship affords an in-depth opportunity to work with professionals in residence at Mason’s Center for the Arts. The external internship provides the opportunity to work at more than 60 different visual and performing arts venues in the Washington, D.C. metropolitan area.

Admissions Requirements

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that applicants will come from the arts community, with experience and training in music, dance, theater, and visual and technical arts and wish to add the skills of marketing, finance, strategy, entrepreneurship, and management to their repertoire. It is also expected that students will enter with more developed skills in the business side of the arts and wish to unite these skills with prior experiences in the arts. Completed applications must be received by March 1 for fall and October 1 for spring.

In addition to meeting general requirements for university admission for graduate study, applicants must submit the following items:

- Official undergraduate transcripts listing a four-year bachelor’s degree from an accredited institution
- Two letters of recommendation from faculty members or individuals who have first-hand knowledge of the applicant’s academic or professional capabilities
- A two-page (maximum) statement of intent and goals

Applicants might be asked to interview with at least one member of the program faculty or Admissions Committee. In addition, applicants may submit a portfolio that demonstrates work experience. Internship experience for recent graduates will also be considered.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

University policy states that students must earn 8 distinct credits that are not used toward their major toward their minor.

Course Work

The minor in arts management consists of 18 credits, including:

- AMGT 405 - Seminar in Arts Management Credits: 3
- AMGT 489 - Internship in Arts Management Credits: 1-4 (3-4 credits)
- MGMT 301 - People and Organizations Credits: 3

Mini-Courses

Choose 2-3 credits from:

- AMGT 402 - Professional Development Credits: 1
- AMGT 403 - IT for Arts Professionals Credits: 1
- AMGT 470 - Academic Writing in the Arts Credits: 1
- AMGT 471 - Introduction to Grant Writing Credits: 1

Electives

Choose 6 credits from the following:

- AVT 307 - Aesthetics Credits: 3
- AVT 309 - Art as Social Action Credits: 3
• DANC 390 - Dance History: Pre-Twentieth Century Credits: 3
• DANC 391 - Dance History: Twentieth Century Credits: 3
• GAME 230 - History of Computer Game Design Credits: 3
• THR 201 - Stage Management Credits: 1
• THR 202 - Literary Management Credits: 1
• THR 203 - Production/Company Management Credits: 1
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3
(Some courses have prerequisites)
• AVT 392 - Gallery Practices Credits: 4
• AVT 395 - Writing for Artists Credits: 3
• DANC 270 - Dance Production Lab Credits: 1
• DANC 318 - Global Perspectives: World Dance Forms Credits: 3
• DANC 372 - Advanced Dance Production Credits: 1
• FAVS 352 - Ethics of Film and Video Credits: 3
• FAVS 355 - Film Business Practices Credits: 3
• MUSI 331 - Music History in Society I Credits: 3
• MUSI 332 - Music History in Society II Credits: 3
• MUSI 393 - Music Administration and Management Credits: 2
• MUSI 401 - Impact of the Arts on Civilization Credits: 3
• ARTH 374 - Art Now Credits: 3
• ARTH 394 - The Museum Credits: 3
• COMM 300 - Foundations of Public Communication Credits: 3

Total: 18 credits

Academic Policies
Degree Requirements

Core Requirements (23 credits)

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 603 - Arts and Society Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 606 - Board of Directors Management Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 710 - Arts Policy Credits: 3

Internships (6 credits)

- AMGT 740 - Internal Internship Credits: 2
  (Or 2 credits of approved electives for those students who have a minimum of 2000 hours of work in an arts management or related field)
- AMGT 790 - External Internship Credits: 1-4 (Students must take a total of 4 credits)

Clusters of Electives (7 credits)

Select a cluster of electives:

Entrepreneurship in the Arts and Management

- AMGT 712 - Grant Writing in the Arts Credits: 1
- AMGT 750 - Arts Entrepreneurship I Credits: 3
- AMGT 751 - Arts Entrepreneurship II Credits: 3

Finance and Budgeting for the Arts

- AMGT 712 - Grant Writing in the Arts Credits: 1
- AMGT 711 - Directed Readings and Project Credits: 1-6

Marketing and Public Relations

Select from the following courses:

- AMGT 599 - Special Topics in Arts Management Credits: 1-6
- AMGT 607 - Fund Raising/Development II Credits: 3
- AMGT 608 - Public Relations and Marketing Strategies for the Arts II Credits: 3
- AMGT 711 - Directed Readings and Project Credits: 1-6

**Arts/Arts Management Specific Cluster**

- AMGT 610 Gallery Management Credits: 3
- Four credits of course work in arts management, art and visual technology, dance, music, and theater determined in conjunction with the program director.

**Total: 36 credits**

**Master's Level Certificate**

**Arts Entrepreneurship Graduate Certificate**

Banner Code: AR-CERG-AENT

The 15-credit Graduate Certificate in Arts Entrepreneurship is for early to mid-career professionals working at least tangentially in an arts-related profit or nonprofit business. Participants will augment their existing knowledge by examining innovative case studies, studying advanced practices and processes, and the executing business models. Certificate courses will address areas of idea generation, market analysis and testing, arts business and revenue modeling, public relations and marketing strategies, budgeting and finance, public policy, and government relations. Learning together in a cohort-modeled certificate program, students will develop strong interpersonal skills, public communication strategies, and team-based problem-solving strategies.

**Admission Requirements**

For admission into the arts entrepreneurship certificate, prospective students must show graduation from a bachelor’s program (or equivalent) and related work experience. Students apply through Mason’s Office of Admissions, and applications will be approved by a committee established by the Arts Management Program. Courses taken in pursuit of the certificate are eligible to be applied toward the master of arts in arts management, if these courses meet approval.

**Certificate Requirements**

- Elective as approved by the Arts Management Program Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 750 - Arts Entrepreneurship I Credits: 3
- AMGT 751 - Arts Entrepreneurship II Credits: 3

**Total: 15 credits**
Fund Raising and Development in the Arts Graduate Certificate

Banner Code: AR-CERG-FRDA

The ability to create, direct, and manage fundraising and development departments within not-for-profit organizations can be most challenging for Arts Managers. The 18 credit Fund Raising and Development in the Arts Graduate Certificate Program, especially helpful for mid-career professionals, focuses on the practical application of development principles, writing and communication skills, and strategic planning. A grants writing class adds to the much needed knowledge of not only how to write grants but also how funders are most motivated to fund operating expenses, management training, and special projects. Both of the budget and finance classes equip professionals with the skills to keep arts organizations financially sound and meet the goals of contributed and non-contributed income.

Admission Procedures and Requirements

For admission into the Fund Raising and Development in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason's Office of Admissions, and applications will be approved by a committee established by the Arts Management Program.

Core Courses

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 711 - Directed Readings and Project Credits: 1-6
- AMGT 712 - Grant Writing in the Arts Credits: 1

Total: 18 credits

Public Relations and Marketing in the Arts Graduate Certificate

Banner Code: AR-CERG-PRMA

The Public Relations and Marketing in the Arts Graduate Certificate Program focuses on strategic planning, development and implementation of public relations and marketing in arts organizations for the beginning and mid-level professional. Specific, areas of audience, community, and markets in relation to applied marketing media and advertising are studied to improve continuance of current audiences and connecting new patrons. Creative and sound practices in both executing and managing communications are presented. Budget and finance courses round out the 18 credit program to safeguard arts organizations to be financially healthy with both short term and long term goals strategically in place.
Admission Procedures and Requirements

For admission to the Public Relations and Marketing in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason's Office of Admissions, and applications will be approved by a committee established in the Arts Management Program.

Core Courses

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 608 - Public Relations and Marketing Strategies for the Arts II Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 503 - Information Technology for Arts Managers Credits: 1 or
- AMGT 599 - Special Topics in Arts Management Credits: 1-6 or
- AMGT 712 - Grant Writing in the Arts Credits: 1

Total: 18 credits

Special Events Management in the Arts Graduate Certificate

Banner Code: AR-CERG-SEMA

The 17 credit Special Events Management in the Arts Graduate Certificate Program is for the entry level or mid-level professional to increase their skills in the fast paced and creative field of events management. Whether as an addition to a performing arts event or a stand alone gala, festival or fund raiser, the special events manager must combine their professional perspective with much creativity and marketability. The Festival and Special Events course specifically focuses on the different stages of creative idea development, planning, budgeting, marketing, networking, gaining financial and volunteer support, design, decor, and additional special attention to details to make an event successful and memorable.

Admission Procedures and Requirements

For admission into the Special Events Management in the Arts Graduate Certificate Program, prospective students must show graduation from a Bachelor's program (or equivalent) and related work experience. Students will apply through Mason's Office of Admission and applications will be approved by a committee established by the Arts Management Program.
Core Courses

- AMGT 601 - Fund Raising/Development I Credits: 3
- AMGT 602 - Seminar in Arts Management Credits: 3
- AMGT 604 - Public Relations and Marketing Strategies for the Arts I Credits: 3
- AMGT 704 - Finance and Budgeting for Arts I Credits: 3
- AMGT 705 - Finance and Budgeting for Arts II Credits: 2
- AMGT 706 - Festivals and Special Events Credits: 3

Faculty

Scott Martin, Program Director

Associate Professor: Martin (program director)

Term Assistant Professor: Willis, Wren

Undergraduate Program

The 120 credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability postgraduation.

Portfolio Requirement

Effective Fall 2011 students who wish to apply for the Computer Game Design BFA program must submit a portfolio.

The portfolio should include 10-15 examples of your work, at least half of which must be from studio art courses. Examples may include drawing, painting, sculpture, 2 or 3D digital art, prints, animation, models, characters, music, websites (URLs), or game levels. Applicants may include game design documents, scripts and stories, or game code (Script, C++, JAVA). The portfolio must be neatly organized and clearly labeled with name and desired major on the outside. Call 703-993-5158 to schedule a portfolio review.
Course Work

The Computer Game Design Program offers all course work designated GAME in the Courses chapter of this catalog.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

Major GPA

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (40-41 credits)

- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.
- AVT 180 - Computers in the Creative Arts Credits: 3 or
- CS 112 - Introduction to Computer Programming Credits: 4
• CS 105 - Computer Ethics and Society Credits: 1
• MATH 113 - Analytic Geometry and Calculus I Credits: 4
• ENGL 201 - Reading and Writing about Texts Credits: 3
• MUSI 100 - Fundamentals of Music Credits: 3
• PHYS 160 - University Physics I Credits: 3
• PHYS 161 - University Physics I Laboratory Credits: 1
• PSYC 100 - Basic Concepts in Psychology Credits: 3
• DANC 118 - World Dance Credits: 3 or
• MUSI 103 - Musics of the World Credits: 3

Oral Communication, Natural Science including Lab, and Western Civilization

Approved courses may be found under the University General Education section of this catalog.

Major Core (57 credits)

• AVT 104 - Studio Fundamentals I Credits: 4
• AVT 280 - Introduction to Digital Arts Credits: 4
• CS 123 - Computing: From the Abacus to the Web Credits: 3
• GAME 210 - Basic Game Design Credits: 3
• GAME 230 - History of Computer Game Design Credits: 3
• GAME 231 - Computer Animation for Games Credits: 3
• GAME 232 - Online Gaming and File Sharing Credits: 3
• GAME 250 - Music for Film and Video Credits: 3
• GAME 310 - Game Design Studio Credits: 3
• GAME 330 - Computer Game Platform Analysis Credits: 3
• GAME 332 - Story Design for Computer Games Credits: 3
• GAME 367 - Writing and Editing Music and Sound Credits: 3
• GAME 398 - Advanced Game Design Animation Credits: 3
• GAME 410 - Advanced Game Design Studio Credits: 3
• GAME 431 - Consumer Game Platform Analysis Credits: 3
• GAME 490 - Senior Project Credits: 3
• GAME 491 - Internship Credits: 4
• MUSI 101 - Introduction to Classical Music Credits: 3

Digital Media Electives (10 credits)

Select three courses from the following (one from AVT required or advisor's approval)

• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4
• COMM 355 - Video Principles and Practices Credits: 3
• ENGL 332 - Introduction to Film Credits: 3
• FAVS 399 - Special Topics in Film and Video Studies Credits: 1-3
Visual Arts Electives (8 credits)

Select two courses from the following

- AVT 215 - Typography Credits: 4
- AVT 222 - Drawing I Credits: 4
- AVT 232 - Painting I Credits: 4
- AVT 243 - Printmaking I Credits: 4
- AVT 252 - Fundamentals of Photography Credits: 4
- AVT 262 - Sculpture I Credits: 4

General Electives (4-5 credits)

Total: 120 credits

Undergraduate Minor

Computer Game Design Minor

Banner Code: GAME

Performing Arts Building, Room A407
Phone: 703-993-1321
Web: cvpa.gmu.edu/gamedesign.html

Faculty

Scott Martin, Program Director

Associate Professor: Martin (program director)

Term Assistant Professor: Willis, Wren

The minor (18 credits) embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Minors will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor. This minor is not intended for game design majors.
Requirements

The minor requires 18 credits, including:

- GAME 101 - Introduction to Game Design Credits: 3
- GAME 210 - Basic Game Design Credits: 3
- GAME 230 - History of Computer Game Design Credits: 3
- GAME 400 - Game Design Practicum Credits: 3
- GAME 231 - Computer Animation for Games Credits: 3 and
- GAME 398 - Advanced Game Design Animation Credits: 3
  or
- GAME 250 - Music for Film and Video Credits: 3 and
- GAME 367 - Writing and Editing Music and Sound Credits: 3
  or
- GAME 232 - Online Gaming and File Sharing Credits: 3 and
- GAME 330 - Computer Game Platform Analysis Credits: 3

Total: 18 credits

School of Dance

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

Faculty

Elizabeth Price, Director

Professors: Lepore, Miller, Shields

Associate Professors: Price (director), Studd

Assistant Professor: Joyce

Term Assistant Professors: d'Amboise, Dinapoli, Reedy, Willis

Adjunct Faculty: Clancy, Cronmiller, Goodson, Koucheravy, Lee, Mattingly, Nuamah, Summerall

Course Work

The School of Dance offers all course work designated DANC in the Courses chapter of this catalog.

Undergraduate Programs
The School of Dance offers a BFA and a BA. Entrance to either program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

**Writing-Intensive Requirement**

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

**Certification to Teach**

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.**
- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).
- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.
- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.
- With committee approval, register for and complete EDUC 300 and 302 and EDRD 300.
- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a postbaccalaureate semester.

**Graduate Program**

The MFA in dance is a 60-credit program of study grounded in the modern dance genre that emphasizes performance, choreography, and teaching in higher education. Candidates are expected to enter the program with significant professional performance at the national or international level, advanced technical proficiency in ballet or modern technique, and professional competence in choreography exemplified by a significant body of work.

**Admission Requirements**

In addition to fulfilling the admission requirements for graduate study, the applicant must submit directly to the School of Dance a résumé and a 10-minute video that illustrates the applicant’s choreography. All candidates must also demonstrate advanced technical proficiency through an audition. Contact the School of Dance at 703-993-1114 for dates and times.

All candidates must satisfy the following prerequisites: advanced dance technique, improvisation, two semesters of dance composition, two semesters of dance history, rhythmic analysis or music for dance, anatomy and kinesiology, and dance production. Prerequisite courses may be completed before or concurrent with graduate course work and are usually fulfilled if the applicant has earned a BA or BFA in dance.
Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Associate Professors: Price (director), Studd

Assistant Professor: Joyce

Term Assistant Professors: d’Amboise, Dinapoli, Reedy, Willis

Adjunct Faculty: Clancy, Cronmiller, Goodson, Koucheravy, Lee, Mattingly, Nuamah, Summerall

UNDERGRADUATE PROGRAM

The School of Dance offers a BFA. Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page, dance.gmu.edu, or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Because of the professional nature of the BFA degree, the program requires completion of 126 credits of course work. The BFA in dance is a performance-oriented program designed to prepare students professionally as performers, choreographers, and teachers, as well as prepare them for graduate study. Students in this program demonstrate significant technical mastery and devote a large portion of their college study to an intensive and comprehensive dance curriculum.

The BFA degree offers a modern dance major that allows for concentrated study in performance, choreography, or teaching. Daily technical training includes ballet, a strong emphasis on modern dance, and opportunities to study jazz and world dance forms. Students may request admission into the BFA program during the candidate’s freshman year. Student progress in the BFA program is assessed annually.

Course Work

The School of of Dance offers all course work designated DANC in the Courses chapter of this catalog.
Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their major at the 300-level or above. Students in the BFA and BA in dance fulfill this requirement by successfully completing DANC 390 or 391.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Certification to Teach

This program is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). To be considered for licensure in dance education, a student must successfully complete requirements for a BA or BFA in dance. In addition, students must meet the following requirements:

- Be formally accepted into the program by the Dance Education Committee. Before requesting an interview with the committee, students must complete 45 to 60 credits with a GPA of 2.80 or higher, and submit passing scores for the Praxis I tests (Reading, Writing, Mathematics). **It is strongly recommended that students take the Praxis I tests as soon as they have completed ENGL 302, a course in literature, and a course in mathematics.**
- Earn no grade lower than a C in dance (see major curriculum) and in professional education courses (EDUC 300, 302; EDRD 300; DANC 453, 454).
- Maintain an overall GPA of 2.80 or higher in all dance course work at Mason and at all other institutions of higher learning combined.
- As dance elective options, complete DANC 118 World Dance, DANC 453 Teaching Creative Movement, and DANC 131 Beginning Jazz Technique or 231 Intermediate Jazz Technique.
- With committee approval, register for and complete EDUC 300 and 302 and EDRD 300.
- After completing all required course work and with committee approval, submit passing scores on the VLCA and complete a full-time 15-week student teaching internship (DANC 455) that includes experiences at both elementary and middle or secondary levels.

This course of study will require a postbaccalaureate semester.

- DANC 445 - Advanced Ballet Credits: 1-3
- DANC 453 - Teaching Creative Movement Credits: 3
- DANC 455 - Teaching Practicum Credits: 1-6

Note:

Additional technique and performance credits beyond those required in the major core may be applied to dance electives.

Electives
Elective Credits: 3

Total: 126 credits

**Undergraduate Minor**

**Dance Appreciation Minor**

**Banner Code: DNCA**

Performing Arts Building, Room A300
Phone: 703-993-1114
Web: dance.gmu.edu

The minor (21 credits) offers students an opportunity to study a variety of movement styles and understand dance in its historical and cultural context. A maximum of 4 transfer credits may be applied to the dance minor.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

**Course Work**

All minors must complete the following courses:

**Core (6 credits):**

All minors must complete the following courses:

- DANC 101 - Dance Appreciation Credits: 3
- DANC 118 - World Dance Credits: 3

**Students must complete three of the following courses (9 credits):**

- DANC 125 - Beginning Modern Dance Credits: 3
- DANC 145 - Beginning Ballet Credits: 3
- DANC 225 - Beginning Intermediate Modern Dance Credits: 3
- DANC 245 - Beginning Intermediate Ballet Credits: 3

**Note:**

Students with prior experience in ballet and/or modern dance may, with permission of instructor, take all nine credits of technique courses at the 200 level.

All minors must demonstrate a basic level of training in both modern dance and ballet, and therefore, complete nine credits of modern and ballet technique.
Students must choose two or more courses from the following (6 credits):

- DANC 118 - World Dance Credits: 3 *
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- DANC 120 - Special Topics in Dance Credits: 1-3
- DANC 131 - Beginning Jazz Technique Credits: 3
- DANC 161 - Beginning Tap Dance Credits: 3
- DANC 231 - Intermediate Jazz Technique Credits: 3
- DANC 301 - What is Dance? Credits: 3
- DANC 318 - Global Perspectives: World Dance Forms Credits: 3
- DANC 331 - Advanced Jazz Dance Credits: 3
- DANC 420 - Special Topics in Dance Credits: 1-3

Total: 21 credits

Notes:

Substitutions may be proposed to department faculty for approval.

* DANC 118 fulfills the global understanding requirement. Students who choose to take this course twice for the minor must select two different world cultures.

Course Work

The Film and Video Studies Program offers all course work designated FAVS in the Courses chapter of this catalog.

Program

The Film and Video Studies Program offers a 120-credit multidisciplinary BA degree, which spans many units including Art and Visual Technology, Communication, English, History and Art History, Modern and Classical Languages, New Century College, and Theater. Students study film and video production, theory, criticism, ethics, screenwriting, and business.

The vocabulary of film (broadly defined) now pervades the intellectual, cultural, political, and social landscape. The tools the filmmaker wields apply to an ever-widening range of tasks across the fields of human endeavor, from traditional narrative and documentary productions to academic research and pedagogical applications to projects of personal expression. Emerging technology makes the means of production available to anyone with access to a moderate level of computing power. This combination of factors makes film an important subject for academic inquiry and training.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated “writing intensive” in their majors at the 300 level or above. Students seeking a BA in film and video studies fulfill this requirement by completing THR 482.
Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (40 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3
  Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social and behavioral sciences Credits: 3
- Synthesis requirement Credits: 3
- Foreign language, minor, double major or double degree (see College of Visual and Performing Arts for foreign language requirements)

Notes:

FAVS majors may not double-count courses toward both the FAVS major and university general education requirements.

Major (48 credits)

Film and Video Studies Core Requirements (30 credits)

Students must earn a minimum grade of C in all core courses (AVT 204; COMM 355, 454; ENGL 331, 332; FAVS 100, 352, 355, 450, 499; THR 482).

- AVT 204 - Visual Thinking Credits: 3
• COMM 355 - Video Principles and Practices Credits: 3
• COMM 454 - Free Speech and Ethics Credits: 3 or
• FAVS 352 - Ethics of Film and Video Credits: 3
• ENGL 331 - Introduction to Documentary Credits: 3
• ENGL 332 - Introduction to Film Credits: 3
• FAVS 100 - Film and Video Studies Colloquium Credits: 1 (Must be taken for a total of 3 credits)
• FAVS 355 - Film Business Practices Credits: 3
• FAVS 450 - Internship in Film and Video Studies Credits: 3
• FAVS 499 - Senior Project Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3

Analysis, History, Theory (6 credits)

Take 6 credits from the following:
• CHIN 320 - Contemporary Chinese Film Credits: 3
• COMM 255 - Introduction to Media Literacy Credits: 3
• COMM 365 - Gender, Race, and Class in the Media Credits: 3
• COMM 380 - Media Criticisms Credits: 3
• ENGL 334 - Popular Culture Credits: 3
• ENGL 421 - Topics in Film/Media History Credits: 3
• ENGL 422 - Topics in Film/Media Theory Credits: 3
• ENGL 490 - Topics in Film/Media Credits: 3
• FREN 470 - Topics in French Cinema Credits: 3
• HIST 393 - Topics in Film and History Credits: 3
• JAPA 320 - Japanese Cinema Credits: 3
• RUSS 470 - Topics in (Post) Soviet Film Credits: 3

Video Production (6 credits)

Take 6 credits from the following:
• AVT 354 - Digital Photo Techniques Credits: 4
• AVT 356 - Fundamentals of Studio Lighting Credits: 4
• AVT 374 - Sound and Vision Credits: 4
• AVT 376 - Live Movies Credits: 4
• AVT 382 - Digital Art and Animation Credits: 4
• AVT 383 - Three-Dimensional Digital Art Credits: 4
• AVT 390 - Digital Media and Video Art Credits: 4
• AVT 457 - Documentary Photography Credits: 4
• AVT 482 - Advanced Two-Dimensional Digital Art Credits: 4
• AVT 487 - Advanced Digital Media Credits: 4
• COMM 358 - Video Producing and Directing Credits: 3
• COMM 360 - Video Editing Credits: 3
• COMM 363 - Media Career Seminar Credits: 1
• COMM 366 - Visual Communication Credits: 3
• COMM 399 - Special Topics in Communication Credits: 1-3
• FAVS 365 - Documentary Filmmaking I Credits: 3
• THR 230 - Introduction to Technical Theater Credits: 3
• THR 235 - Fundamentals of Costume Construction Credits: 3
• THR 314 - Lighting Stagecraft Credits: 3
• THR 334 - Lighting Design Credits: 3
• THR 336 - Advanced Theater Technology Credits: 3
• THR 423 - Audition Techniques: Stage and Camera Credits: 3

Note:
See Program Director for COMM 399 specifics.

Electives in Area of Specialization (6 credits)

Students are required to take two courses demonstrating a focus in subject matter, possibly from the following departments:

• English
• History
• Music
• Psychology
• Sociology and Anthropology or
• Theater

General Electives (32)

Students must use general electives to complete a minor, double major or second degree outside the major field of study or demonstrate intermediate-level proficiency in one foreign language.

Total: 120 credits

■ School of Music

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty
Dennis Layendecker, Director

**Professors:** Camphouse, Carroll, Engebretson, Gardner, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

**Term Professor:** Balakerskaia, Hearden, Lapple, Rendler

**Associate Professors:** R. Bergman, Billingham, T. Owens

**Term Associate Professors:** Ker-Hackleman

**Assistant Professors:** Guessford, Nickens, Novak, Robinson

**Adjunct Faculty:** Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner

**Course Work**

The School of Music offers all course work designated MUSI in the Courses chapter of this catalog.

**Undergraduate Programs**

The two undergraduate degree programs offered through the School of Music, the bachelor of art (BA) in music and the bachelor of music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

Through its strategic plan, Music Outreach and the Teaching Professions, the School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, and composers. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

**Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date.** Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.
Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Teacher Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this chapter. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

Graduate Certificates

Instrumental Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Piano Performance Artist Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Vocal Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Graduate Programs

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

Music, MM

The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition,
conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

**PhD in Music Education**

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

**Doctor of Music Arts**

The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.

**Undergraduate Degree**

**Music, BA**

The bachelor of art (BA) in music prepares students for graduate work in music and music literature as well as research and professional work in musical activities.

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music web site: music.gmu.edu.

A fundamentals of music test is given during the first week of classes to all students enrolled in MUSI 115 Theory I. Call the School of Music at 703-993-1380 for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: sight singing, ear training, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Students pursuing a BA must complete the general education program outlined below. This distribution enables students to develop a breadth of knowledge, as well as the necessary skills to make the in-depth study of a major truly meaningful. In addition to general education requirements, students must also demonstrate intermediate-level proficiency in one foreign language or complete a minor program. A minimum of 57 credits in music course work is required for the music major. A total of 120 credits is required.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated “writing intensive” in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

Degree Requirements

General Education (25-46 credits)

Foundation Requirements

- Quantitative reasoning (mathematics) Credits: 3
- ENGL 101 - Composition Credits: 3 *
- ENGL 302 - Advanced Composition Credits: 3
  *Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.
Core Requirements

- Literature Credits: 3*
- Natural science (two classes; one must contain a lab) Credits: 7*
- Western civilization Credits: 3
- Social or behavioral science Credits: 3*

Notes:

* Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Other (0-21 credits)

- Intermediate-level language proficiency*, or an academic minor, double major or double degree outside the major field of study

Note:

* See beginning of CVPA chapter for foreign language requirement.

Music Major (57 credits)

Musicianship (28 credits)

- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Theory IV Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2
- MUSI 171 - Keyboard Skills I Credits: 1 (Pianists substitute MUSI 371 for MUSI 171)
- MUSI 172 - Keyboard Skills II Credits: 1 (Pianists substitute MUSI 372 for MUSI 172)
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 431 - Music History in Society III Credits: 3 (Meets university general education global understanding requirement)

Music History Courses:

MUSI 331 and 332 Music History in Society I and II Credits: 6 Or
MUSI 331 and 432 Music History in Society I and IV Credits: 6 Or
MUSI 332 and 432 Music History in Society II and IV Credits: 6
Performance and Music Electives (29 credits)

- Applied music (PMI) Credits: 8
- Large ensemble (Transfer students must earn at least 2 credits at Mason) Credits: 4
- Additional ensembles (Large or small; meets university general education arts requirement) Credits: 3
- MUSI 415 - Music in Computer Technology Credits: 3 (Meets university general education information technology requirement)
- MUSI 251 - The Art of Teaching Music Credits: 3 (Meets university general education communication requirement)
- MUSI 351 - Keyboard Pedagogy Credits: 3 Or
- MUSI 352 - Vocal Pedagogy and Lab Credits: 3 Or
- MUSI 353 - Instrumental Pedagogy and Literature Credits: 3 (Must register for instrumental pedagogy and literature class appropriate to major instrument)
- MUSI 395 - Teaching Internship Credits: 1-4 (Must be taken for 2 credits)
- MUSI 490 - Musical Communication in Context Credits: 3 (Meets university general education synthesis requirement)
- MUSI 300 - Recital Attendance Credits: 0 (five semesters)

Electives (17-38 credits)

Can include additional music courses.

Total: 120 credits

Music, BM

Degree Requirements

▲ Concentration in Composition (CPO):

General Education (21 credits)
Foundation Requirements

- Analytical reasoning (mathematics) Credits: 3
- ENGL 101 - Composition Credits: 3 *
- ENGL 302 - Advanced Composition Credits: 3
*Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3*
- Natural science Credits: 3*
- Western civilization Credits: 3
- Social or behavioral science Credits: 3*

Notes:

*Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Music Core Courses (72 credits)

- MUSI 485 M3E or Healing Arts Ensemble Credits: 4 (4 semesters at 1 credit each)
- MUSI 251 - The Art of Teaching Music Credits: 3 (general education communications)
- MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
- MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)
- MUSI 324 - Junior Recital Credits: 1
- MUSI 424 - Senior Recital Credits: 1
- MUSI 491 - Musical Communication in Performance Credits: 1 (Synthesis)
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2
- MUSI 213 - Sight Singing and Ear Training III Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Theory IV Credits: 3
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 419 - Orchestration Credits: 3
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 432 - Music History in Society IV Credits: 3
- MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass Credits: 1
• MUSI 363 - Class Woodwinds: Flute and Clarinet Credits: 1 Or
  MUSI 364 - Class Woodwinds: Oboe and Bassoon Credits: 1

• MUSI 365 - Class Brass: Trumpet and French Horn Credits: 1 Or
  MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba Credits: 1

• MUSI 366 - Class Percussion Credits: 1

• MUSI 454 - Jazz Arranging Credits: 3 Or
  MUSI 485 - Chamber Ensembles Credits: 1 (3 semesters at 1 credit each for a total of 3 credits)

• MUSI 300 - Recital Attendance Credits: 0 (five semesters)
  MUSI 248 - PMI Composition Credits: 2
  MUSI 448 - PMI Composition Credits: 2-3 (4 semesters at 3 credits each for a total of 12 credits)

Emphasis Requirement (complete one) (27 credits)

Composition: Brass emphasis

• MUSI 245 Applied Music: Brass (3 semesters at 2 credits each) Credits: 6
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble Credits: 1
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 353 Instrumental Pedagogy and Literature Credits: 3
• MUSI 391 and MUSI 396 Instrumental Conducting I and II Credits: 4
• General Electives Credits: 8

Composition: Guitar emphasis

• MUSI 246 Applied Music: Strings (3 semesters at 2 credits each) Credits: 6
• MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble Credits: 1
• MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 353 Instrumental Pedagogy and Literature Credits: 3
• MUSI 391 and MUSI 396 Conducting I and II Credits: 4
• General Electives Credits: 8

Composition: Keyboard emphasis

• MUSI 242 Applied Music: Keyboard (3 semesters at 2 credits each) Credits: 6
• MUSI 381, MUSI 384, or MUSI 385 Chorus Credits: 1
• MUSI 381, MUSI 384, or MUSI 385 Chorus (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 351 Keyboard Pedagogy Credits: 3
• MUSI 371 and MUSI 372 Accompanying I and II Credits: 2
• MUSI 391 and MUSI 396 Conducting I and II Credits: 4
• General electives Credits: 8

Composition: Percussion emphasis

• MUSI 247 Applied Music: Percussion (3 semesters at 2 credits each) Credits: 6
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble Credits: 1
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 353 Instrumental Pedagogy and Literature Credits: 3
• MUSI 391 and MUSI 396 Conducting I and II Credits: 4
• General electives Credits: 8

Composition: String emphasis

• MUSI 246 Applied Music: Strings (3 semesters at 2 credits each) Credits: 6
• MUSI 387 Ensemble Credits: 1
• MUSI 387 Ensemble (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 353 Instrumental Pedagogy and Literature Credits: 3
• MUSI 391 and MUSI 396 Conducting I and II Credits: 4
• General electives Credits: 8

Composition: Voice emphasis

• MUSI 243 Applied Music: Voice(3 semesters at 2 credits each) Credits: 6
• MUSI 381, MUSI 384, or MUSI 385 Chorus Credits: 1
• MUSI 381, MUSI 384, or MUSI 385 Chorus (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 352 Vocal Pedagogy Credits: 3
• MUSI 391 and MUSI 396 Choral Conducting I and II Credits: 4
• General electives Credits: 8

Composition: Woodwind emphasis

• MUSI 244 Applied Music: Woodwind (3 semesters at 2 credits each) Credits: 6
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble Credits: 1
• MUSI 380, MUSI 383, MUSI 387, or MUSI 389 Ensemble (three semesters) (meets general education fine arts requirement) Credits: 3
• MUSI 171 and MUSI 172 Keyboard Skills I and II Credits: 2
• MUSI 353 Instrumental Pedagogy and Literature Credits: 3
• MUSI 391 and MUSI 396 Choral Conducting I and II Credits: 4
• General electives Credits: 8
Total: 120 credits

▲ Concentration in Jazz (JACZ):

General Education (21 credits)

Foundation Requirements

- Quantitative reasoning (mathematics) Credits: 3
- ENGL 101 - Composition Credits: 3 *
- ENGL 302 - Advanced Composition Credits: 3
  *Nonnative speakers of English with limited proficiency may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3*
- Natural science Credits: 3*
- Western civilization Credits: 3
- Social or behavioral science Credits: 3*

Notes:

*Also have significant elective choices as per general education listing.

Remaining general education requirements are fulfilled with major course work.

Music Core Courses (76 credits)

- MUSI 251 - The Art of Teaching Music Credits: 3 (general education communications)
- MUSI 415 - Music in Computer Technology Credits: 3 (general education information technology)
- MUSI 431 - Music History in Society III Credits: 3 (general education global understanding)
- MUSI 389 - Jazz Ensemble Credits: 1 (three semesters at 1 credit each fulfills general education fine arts)
- MUSI 324 - Junior Recital Credits: 1
- MUSI 424 - Senior Recital Credits: 1
- MUSI 491 - Musical Communication in Performance Credits: 1 (Synthesis)
- MUSI 389 - Jazz Ensemble Credits: 5 (5 semesters at 1 credit each for concentration)
- MUSI 485 - Chamber Ensembles Credits: 1 (Jazz Chamber Ensembles) (6 semesters at 1 credit each for a total of 6 credits)
- MUSI 300 - Recital Attendance Credits: 0 (5 semesters)
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 114 - Sight Singing and Ear Training II Credits: 2
- MUSI 213 - Sight Singing and Ear Training III Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 215 - Theory III Credits: 3
- MUSI 216 - Theory IV Credits: 3
- MUSI 273 - Keyboard Skills III Credits: 1
- MUSI 319 - Class Composition and Arranging Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- MUSI 454 - Jazz Arranging Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 311 - Jazz Studies Credits: 3
- MUSI 331 - Music History in Society I Credits: 3
- MUSI 332 - Music History in Society II Credits: 3
- MUSI 432 - Music History in Society IV Credits: 3
- MUSI 492J - Selected Topics in Music Credits: 1-3 (Topics in Jazz Studies 3 credits)
- MUSI 391 - Conducting I Credits: 2
- MUSI 450 - Jazz Improvisation I Credits: 2
- MUSI 452 - Jazz Improvisation II Credits: 2

Note

Students concentrating in Jazz Studies must take MUSI 389 Jazz Ensemble for a total of 8 credits

Emphasis Requirement (complete one) (23 credits)

Jazz: Brass emphasis

- MUSI 245 Applied Music (4 semesters at 2 credits each) Credits: 8
- MUSI 445 Applied Music (4 semesters at 3 credits each) Credits: 12
- MUSI 171 Keyboard Skills I Credits: 1
- MUSI 172 Keyboard Skills II Credits: 1
- General electives Credits: 1

Jazz: Guitar emphasis

- MUSI 246 Applied Music (4 semesters at 2 credits each) Credits: 8
- MUSI 446 Applied Music (4 semesters at 3 credits each) Credits: 12
- MUSI 171 Keyboard Skills I Credits: 1
- MUSI 172 Keyboard Skills II Credits: 1
- General electives Credits: 1

Jazz: Keyboard emphasis
MUSI 242 Applied Music (4 semesters at 2 credits each) Credits: 8
MUSI 442 Applied Music (4 semesters at 3 credits each) Credits: 12
MUSI 371 Techniques of Accompanying I Credits: 1
MUSI 372 Techniques of Accompanying II Credits: 1
General electives Credits: 1

Jazz: Percussion emphasis

MUSI 247 Applied Music (4 semesters at 2 credits each) Credits: 8
MUSI 447 Applied Music (4 semesters at 3 credits each) Credits: 12
MUSI 171 Keyboard Skills I Credits: 1
MUSI 172 Keyboard Skills II Credits: 1
General electives Credits: 1

Jazz: Woodwind emphasis

MUSI 244 Applied Music (4 semesters at 2 credits each) Credits: 8
MUSI 444 Applied Music (4 semesters at 3 credits each) Credits: 12
MUSI 171 Keyboard Skills I Credits: 1
MUSI 172 Keyboard Skills II Credits: 1
General electives Credits: 1

Total: 120 credits

▲ Concentration in Music Education (MUE):

Certification to Teach

The music education concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Minimum scores on the Praxis I and II, and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the music education concentration by the school’s Music Teacher Education Committee. They must have earned 45 to 60 credits and completed Sight Singing and Ear Training III, Keyboard Skills III, and Theory III with a grade of C or higher. Other requirements are as follows:

- Submit scores for the Praxis I (Reading, Writing, and Mathematics) tests to the committee. It is strongly recommended that students take the Praxis I tests as soon as ENGL 302, a course in literature, and a course in mathematics have been completed.
- Maintain an overall GPA of 2.80 in all course work completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in music and professional education courses needed for graduation.
- Successfully pass sight singing, ear training, keyboard, and conducting proficiency exams during the first music methods course (MUSI 461, 463, 464, 466, or 467). Students in the voice emphasis must also pass a voice proficiency exam, and students in the instrumental emphasis must pass a musical instrument fingering proficiency exam during the first music methods course.
Complete all course work in the program sequence. On fulfilling the above requirements, students must complete 15 weeks of a full-time student teaching internship. Applications for placement, subject to approval of the committee, are submitted to the Office of Teacher Education at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching and the Praxis II (Music: Content Knowledge) test during the internship semester.

• EDUC 539 - Human Development and Learning PK-12 Credits: 3

Emphasis Requirement (complete one) (40 credits)

Music Education: Brass emphasis

• MUSI 245 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 445 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 4 (4 semesters at 1 credit each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 3 (3 semesters at 1 credit each; meets general
  education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 363 and MUSI 364 Class Woodwinds I and II Credits: 2
• MUSI 365 and MUSI 369 Class Brass I and II Credits: 2
• MUSI 367 Class Guitar Credits: 1
• MUSI 368 Class Voice Credits: 1
• MUSI 391 and MUSI 396 Instrumental Conducting I and II Credits: 4
• MUSI 464 and MUSI 466 Instrumental Methods I–II Credits: 6
• General Elective Credits: 1

Music Education: Guitar emphasis

• MUSI 246 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 446 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble Credits: 4 (4 semesters at 1 credit each)
• MUSI 381, MUSI 384, MUSI 385, or MUSI 389 Ensemble Credits: 3 (3 semesters at 1 credit each; meets general
  education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 363 and MUSI 364 Class Woodwinds I and II Credits: 2
• MUSI 365 and MUSI 369 Class Brass I and II Credits: 2
• MUSI 367 Class Guitar Credits: 1
• MUSI 368 Class Voice Credits: 1
• MUSI 391 and MUSI 396 Conducting I and II Credits: 4
• MUSI 464 or MUSI 467 Instrumental Methods I or II Credits: 3
• MUSI 466 Instrumental Methods II Credits: 3
• General Elective Credits: 1

Music Education: Keyboard emphasis

• MUSI 242 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 442 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 223 Applied Music Credits: 2 (2 semesters at 1 credit each)
• MUSI 381, MUSI 384, and/or MUSI 385 Ensemble: Chorus (four semesters) Credits: 4
• MUSI 381, MUSI 384, and/or MUSI 385 Ensemble: Chorus (three semesters; meets general education fine arts requirement) Credits: 3
• MUSI 352 Vocal Pedagogy Credits: 3
• MUSI 363, MUSI 364, MUSI 365, or MUSI 369 Class Instruments Credits: 1
• MUSI 367 Class Guitar Credits: 1
• MUSI 371, MUSI 372 Accompanying I and II Credits: 2
• MUSI 391, MUSI 396 Choral Conducting I and II Credits: 4
• MUSI 461 Teaching General Music Credits: 3
• MUSI 463 Teaching Vocal Secondary Music Credits: 3

Music Education: Percussion emphasis

• MUSI 247 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 447 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 4 (4 semesters at 1 credit each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 3 (3 semesters at 1 credit each; meets general education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 363 and MUSI 364 Class Woodwinds I and II Credits: 2
• MUSI 365 and MUSI 369 Class Brass I and II Credits: 2
• MUSI 367 Class Guitar Credits: 1
• MUSI 368 Class Voice Credits: 1
• MUSI 391 and MUSI 396 Instrumental Conducting I and II Credits: 4
• MUSI 464 and MUSI 466 Instrumental Methods I–II Credits: 6
• General Elective Credits: 1

Music Education: String emphasis

• MUSI 246 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 446 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 387 Ensemble: Symphony Orchestra Credits: 4 (4 semesters at 1 credit each)
• MUSI 387 Ensemble: Symphony Orchestra Credits: 3 (3 semesters at 1 credit each; meets general education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 363 and MUSI 364 Class Woodwinds I and II Credits: 2
• MUSI 365 and MUSI 369 Class Brass I and II Credits: 2
• MUSI 367 Class Guitar Credits: 1
• MUSI 368 Class Voice Credits: 1
• MUSI 391 and MUSI 396 Instrumental Conducting I and II Credits: 4
• MUSI 467 Orchestral Methods Credits: 3
• MUSI 466 Instrumental Methods II Credits: 3
• General Elective Credits: 1

Music Education: Voice emphasis

• MUSI 243 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 443 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 222 Applied Music Credits: 2 (Piano, 2 semesters at 1 credit each)
• MUSI 381, MUSI 384, and/or MUSI 385 Ensemble: Chorus Credits: 4 (four semesters)
• MUSI 381, MUSI 384, and/or MUSI 385 Ensemble: Chorus Credits: 3 (three semesters; meets general education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 352 Vocal Pedagogy Credits: 3
• MUSI 363, MUSI 364, MUSI 365, or MUSI 369 Class Instruments Credits: 1
• MUSI 367 Class Guitar Credits: 1
• MUSI 391 and MUSI 396 Choral Conducting I and II Credits: 4
• MUSI 461 Teaching General Music Credits: 3
• MUSI 463 Teaching Vocal Secondary Music Credits: 3

Music Education: Woodwind emphasis

• MUSI 244 Applied Music Credits: 8 (4 semesters at 2 credits each)
• MUSI 444 Applied Music Credits: 6 (3 semesters at 2 credits each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 4 (4 semesters at 1 credit each)
• MUSI 380, MUSI 383, MUSI 387, and/or MUSI 389 Ensemble Credits: 3 (3 semesters at 1 credit each; meets general education fine arts requirement)
• MUSI 171 and MUSI 172 Keyboard Skills Credits: 2
• MUSI 363 and MUSI 364 Class Woodwinds I and II Credits: 2
• MUSI 365 and MUSI 369 Class Brass I and II Credits: 2
• MUSI 367 Class Guitar Credits: 1
• MUSI 368 Class Voice Credits: 1
• MUSI 391 and MUSI 396 Instrumental Conducting I and II Credits: 4
• MUSI 464 and MUSI 466 Instrumental Methods I and II Credits: 6
• General Elective Credits: 1

Undergraduate Interdisciplinary Minor

World Music Minor

Banner Code: WMUS

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Carroll, Lepore, Owens, Robinson (coordinator)

Requirements

Students must complete 16 to 18 credits, with a 10-credit core and opportunities to take electives in several departments at Mason.

Prerequisite

Students must first demonstrate to the World Music coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 or 431. Prerequisites for specific courses are indicated below.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

This program is designed for those who wish to widen their scope of knowledge about music while deepening their understanding of the world’s peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work how music making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic enquiry.
Core (10 credits)

- MUSI 103 - Musics of the World Credits: 3
- ANTH 114 - Introduction to Cultural Anthropology Credits: 3
- MUSI 497 - Independent Study Credits: 1-3

One of the following two courses (1 credits):

- Applied Music (PMI)
  
  or

- Ensembles (Selection of private music instruction or ensemble must be approved by minor coordinator.)

Electives (6-8 credits)

Electives must be approved by the minor coordinator and should be selected from the following:

- Applied Music (PMI) (1-3)
- MUSI 485 - Chamber Ensembles Credits: 1
- MUSI 102 - Popular Music in America Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1
- DANC 118 - World Dance Credits: 3
- DANC 119 - Dance in Popular Culture: Afro-Latino Dance Credits: 3
- COMM 157 - Video Workshop Credits: 1
- COMM 305 - Foundations of Intercultural Communication Credits: 3
- ENGL 333 - Folklore and Folklife Credits: 3
- AFAM 200 - Introduction to African American Studies Credits: 3
- AFAM 390 - Special Topics in African and African American Studies Credits: 3
- AVT 378 - The African American Experience in the Performing Arts Credits: 3
- ANTH 302 - Peoples and Cultures of Latin America Credits: 3
- ANTH 306 - Peoples and Cultures of Island Asia Credits: 3
- ANTH 309 - Peoples and Cultures of India Credits: 3

Note:

Additional electives may include summer travel courses, as appropriate, and must be approved by the minor coordinator.

Total: 16-18 credits

Undergraduate Minor
Jazz Studies Minor

Banner Code: JAZZ

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

This minor is open to music and non music majors who wish to explore America’s unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not normally associated with jazz. No prior experience in jazz is needed, but candidates must pass a music audition. Jazz studies minors in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

Course Work

- Applied Music (PMI) (2)
- MUSI 107 - The Development of Jazz Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*
- MUSI 311 - Jazz Studies Credits: 3
- MUSI 485 - Chamber Ensembles Credits: 1.5 (Jazz Chamber Ensembles) (3 semesters at 1 credit each)
- MUSI 379 - Introduction to Jazz Improvisation Credits: 1

Note:

Jazz studies minors must take MUSI 485 for 3 credits

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 21 credits

Music and Technology Minor

Banner Code: MUTC

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

This minor is open to majors from throughout the university who seek to expand their knowledge and skill in this area of study.
University policy states that students must earn 8 distinct credits that are not used for their major toward their minor.

**Course Work (18 credits)**

- MUSI 100 - Fundamentals of Music Credits: 3
  or
- MUSI 115 - Theory I Credits: 3

- MUSI 300 - Recital Attendance Credits: 0 (2 semesters)
- MUSI 315 - Music Technology Credits: 3

**Applied Music and Ensemble (3 credits)**

- Applied Music (PMI) or Class Voice, Guitar, or Keyboard (1-2 credits)
- MUSI 38X or 485 (Ensemble) (1-2 credits)

**2 Semesters of (6 credits):**

- MUSI 300 - Recital Attendance Credits: 0
- MUSI 316 - Topics in Music Technology Credits: 3

**Choose one of the following (3 credits):**

- MUSI 102 - Popular Music in America Credits: 3
- MUSI 103 - Musics of the World Credits: 3
- MUSI 104 - Introduction to Twentieth-Century Music Credits: 3
- MUSI 105 - Music in the United States Credits: 3
- MUSI 107 - The Development of Jazz Credits: 3

**Note:**

Entrance requirements: MUSI 100 or 115 with a grade of B or higher. A music audition and interview with music technology faculty is required.

**Total: 18 credits**

**Music Minor**

*Banner Code: MUSI*
All music minors must pass a music audition. Music minors in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree.

Course Work

- Applied Music (PMI) (6)
- Ensembles (3)
- MUSI 101 - Introduction to Classical Music Credits: 3
- MUSI 113 - Sight Singing and Ear Training I Credits: 2
- MUSI 115 - Theory I Credits: 3
- MUSI 116 - Theory II Credits: 3
- MUSI 171 - Keyboard Skills I Credits: 1
- MUSI 300 - Recital Attendance Credits: 0 (two semesters)*

Note:

*All students who enroll as music minors and jazz studies minors must take MUSI 300 for two semesters. A grade of S (satisfactory) must be earned each semester.

Total: 21 credits

Master’s Degree

Music, MM

Banner Code: AR-MM-MUSI

Performing Arts Building, Room A417
Phone: 703-993-1380
Web: music.gmu.edu

Faculty

Dennis Layendecker, Director

Professors: Camphouse, Carroll, Engebretson, Gardner, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professor: Balakerskaia, Hearden, Lapple, Rendler
The expansion of professional education in the arts is paramount for the growth and development of a rich and vital cultural community and a supporting network of individual artists. The dynamics of contemporary society suggest that the influence of the arts on public life will continue to expand well into the 21st century. Each year, opportunities increase for creative work by performers, composers, sculptors, painters, dancers, actors, historians, theoreticians, and musicologists.

The MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admission Requirements

In addition to fulfilling admission requirements for graduate study, applicants are expected to hold a baccalaureate degree in music or another discipline, with courses equaling the music requirements (minus the 7- to 8-credit teaching sequence) for the BA in music offered at Mason.

The following admission requirements must also be met:

- Performance: audition
- Conducting: audition
- Composition: submission of a portfolio of compositions
- Music education: interview with music faculty and submission of a two- to three-page paper on the applicant’s philosophy of music education
- Pedagogy: audition in the primary applied teaching area is required. Applicants are expected to have large and small ensemble experience on the major instrument and should have presented a full solo recital or equivalent. All music teaching experience should be summarized.
- Jazz Studies: Submit a CD of at least five jazz tunes in contrasting styles, as well as a complete repertoire list of all jazz tunes studied/performed. Submit all jazz materials to the Director of Jazz Studies at the School of Music and schedule audition.

Diagnostic Entrance Exam

All students are required to complete placement examinations in music theory, sight singing and ear training, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history. The exam is offered during a three-hour period prior to the beginning of classes of the fall and spring semesters. For the summer schedule, see the director of graduate studies.

Foreign Language Exams (Vocal Performance Emphasis)
Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525, 526 Performance Seminar for Singers and Accompanists I, II.

**Comprehensive Exit Exam**

All students are required to pass a comprehensive exit exam administered during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis. August graduates must take this exam during the preceding spring term. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements**

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 nonmusic graduate credits may be taken.

The student is admitted as concentrating in one of six areas: performance, music education, composition, conducting, jazz studies, or pedagogy. All students are required to complete the 11 credits described below as General Requirements plus 19 credits in one of the six areas identified below as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

**General Requirements for the MM (for all six options):**

- Ensemble Credits: 2
- MUSI 611 - Analytical Techniques Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 662 - Introduction to Research in Music Credits: 3

**Total: 11 credits**

**Additional Requirements**

Choose at least one concentration (19 credits) from:

▲ **Concentration in Composition (CPO):**

- MUSI 728 - PMI Composition Credits: 2-3 (9 credits total)
- MUSI 613 - Graduate Orchestration Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 790 - Graduate Recital Credits: 1
- Elective Credits: 3

Total: 19 credits

▲ Concentration in Conducting (CDC):

- MUSI 729 - PMI Conducting Credits: 2-3 (9 credits total)
- MUSI 613 - Graduate Orchestration Credits: 3

Choose one topic or composition course from:

- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 712 - Composition for Conductors and Performers Credits: 3

- MUSI 790 - Graduate Recital Credits: 1
- Elective Credits: 3

Note:

The number of students accepted in the graduate conducting concentration is limited by the extent to which it is possible to provide students with practical experience.

Total: 19 credits

▲ Concentration in Jazz (JAZZ)

- MUSI 615 - Advanced Jazz Improvisation Credits: 3
- MUSI 650 - Topics in Jazz Studies Credits: 3
- MUSI 72X Graduate PMI Credits: 9
- MUSI 790 - Graduate Recital Credits: 1
- Elective Credits: 3

Total: 19 credits

▲ Concentration in Music Education (MUE):
Two required courses:

- MUSI 661 - Psychology of Music Teaching and Learning Credits: 3
- MUSI 663 - Aesthetics of Music Education Credits: 3

Choose one of the three pathways: elementary-level teaching, secondary-level teaching, or thesis

**Orff Schulwerk Pathway**
- MUSI 563 - Orff Schulwerk I Credits: 3
- MUSI 564 - Orff Schulwerk II Credits: 3
- MUSI 565 - Orff Schulwerk III Credits: 3
- MUSI Electives (4 credits)

**Secondary Pathway**
9 advisor-approved credits chosen from:
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
- MUSI 654 - Graduate Conducting Credits: 3
- MUSI 660 - Topics in Music Education Credits: 1-6 (for 3 credits)
  and
- Electives (4 credits)

**Thesis Option**
- 6 credits of MUSI 799 - Thesis Credits: 1-6
- MUSI Elective (7 credits)

Total: 19 credits

▲ **Concentration in Performance (PFM):**

- MUSI 72X Graduate PMI Credits: 9
- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3
- MUSI 790 - Graduate Recital Credits: 1
- Electives (3 credits)

Total: 19 credits

▲ **Concentration in Pedagogy (PDGY):**
• MUSI 72X Graduate PMI (6 credits)
• Pedagogy I (3 credits) Choose one of the following courses: MUSI 551 Keyboard Pedagogy I; or MUSI 552 Vocal Pedagogy and Lab; or MUSI 553 Instrumental Pedagogy and Literature
• MUSI 660 - Topics in Music Education Credits: 1-6 (for 3 credits)
• MUSI 695 - Teaching Internship Credits: 2
• MUSI 690 - Graduate Lecture Recital Credits: 1-3 (for 1 credit)
• MUSI 790 - Graduate Recital Credits: 1
• MUSI 573 - Accompanying and Musicianship III Credits: 3 (piano pedagogy only; all other areas take 3 elective credits)

Total: 19 credits

Total: 30 credits

Master's Level Certificate

Instrumental Performance Artist Graduate Certificate

Banner Code: AR-CERG-ACIP

Performing Arts Building, Room A417
Phone: 703-993-1380

Faculty

Dennis Layendecker, Director

Professors: Camphouse, Carroll, Engebretson, Gardner, Layendecker (director), Maiello, Miller, Monson (associate director), Smith

Term Professor: Balakerskaiia, Hearden, Lapple, Rendler

Associate Professors: R. Bergman,Billingham, T. Owens

Term Associate Professors: Ker-Hackleman

Assistant Professors: Guessford, Nickens, Novak, Robinson

Adjunct Faculty: Beach, Beckwith, Behrend, Berkshire-Brown, Berger, Conlon, Crabill, East, Gerber, Haroutounian, Healey, Kilkenny, McCarthy, M. Owens, Parrell, Rittenhouse, Roberts, Snitzler, Stephansky, Sternbach, Taylor, von Villas, Watters, Wenner
The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor’s approval is required for each semester’s enrollment.

**Admission Requirements**

- An artist certificate application and current résumé
- A bachelor’s degree in music or equivalent (as evaluated by the School of Music Admissions Committee)
- Transcripts from previous educational institutions
- One-page written statement of student’s goals and interest in the program
- Two letters of recommendation
- A CD (preferred), audiocassette, or videotape of a live performance of solo works from the standard repertory.

Applicants must perform an audition recital and be interviewed on the Mason Campus. Applicants will be notified of the date and time of the audition and interview.

**Certificate Requirements**

**Studies in Performance (17 credits)**

- MUSI 72X Graduate PMI (over four semesters) Credits: 12
- MUSI 592 - Topics in Music Credits: 1-6 (Must be taken for 2 credits)
- MUSI 790 - Graduate Recital Credits: 1 (Must be taken for 3 semesters with two solo recitals and one chamber recital)

**Support Studies in Literature and Pedagogy (8 credits)**

- MUSI 630 - Topics in Music History and Literature Credits: 3 or
- MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 551 - Keyboard Pedagogy I Credits: 3 or
- MUSI 553 - Instrumental Pedagogy and Literature Credits: 3
- MUSI 695 - Teaching Internship Credits: 2

**Support Studies in Accompanying or Ensemble plus Electives (7 credits)**

(choose A or B)

A

- MUSI 571 - Techniques of Accompanying I Credits: 1
- MUSI 685 - Graduate Chamber Ensemble Credits: 1

**Electives**
• Electives Credits: 5

B

• MUSI 682 - Wind Symphony Credits: 1
• MUSI 683 - Symphonic Band Credits: 1
• MUSI 685 - Graduate Chamber Ensemble Credits: 1
• MUSI 687 - Symphony Orchestra Credits: 1
• MUSI 689 - Jazz Ensemble Credits: 1

Note:

MUSI 682, MUSI 683, MUSI 685, MUSI 687 and MUSI 689 must be taken for a total of 6 credits

Electives

• Elective Credits: 1

Total: 32 credits

The PhD in music education and the doctor of musical arts degree require 60 credits beyond the master’s degree in music.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (music education, performance, composition, or conducting)
- Three recommendations
- Satisfactory scores on GRE
- A sample of academic writing such as a graduate-level paper from a musicology or music history course taken during MM studies
- Students in performance and conducting must audition. Specific details of those requirements are available from the advisors.
• Composition students must present a portfolio of recent compositions and recordings of performances.
• Music education majors must present a dossier of their teaching experience and activities, and they must schedule an interview with music faculty including the director of graduate studies (DGS) prior to admission.
• There is no “provisional” admission. Students must meet appropriate standards prior to commencing doctoral studies.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including sight singing, ear-training, and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Academic Progress

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non degree credits not formally approved for the degree.

Residency

One year (fall and spring) of consecutive full-time study (9 credits per semester) is required (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. The dean of graduate studies and the student’s Faculty Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Faculty Committee

During the first semester of study, the college’s dean of graduate studies will recommend to the dean of the College of Visual and Performing Arts five faculty members to serve as the student’s Faculty Committee: two from the student’s area of specialization (performance, conducting, or composition), one from music theory, one from music history, and one at large. The student’s major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve exofficio. All Faculty Committee members will have graduate faculty status, as approved by the university provost.

The Faculty Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group. Performance and composition recitals and projects moving toward the dissertation are also subject to approval of the committee.

Comprehensive Exams
After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

**Advancement to Candidacy**

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Faculty Committee, the dean of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

**Dissertation**

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee. This group may be the student’s Faculty Committee as described above, plus a faculty member from beyond the School of Music. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

**Final Defense and Graduation**

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

**Academic Policies**

Please see College of Visual and Performing Arts for college academic policies.

**Degree Requirements (60 credits)**

- Research Courses (advisor-approved CEHD) Credits: 9
- MUSI 860 - Doctoral Seminar in Music Education Credits: 3 (Must be taken for 12 credits)
- MUSI 660 - Topics in Music Education Credits: 1-6
- MUSI 880 - Doctoral Major Ensemble Credits: 1 (Must be taken for 3 credits)
- MUSI 610 - Topics in Music Theory Credits: 3 Or
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3 Or
- MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
• MUSI 810 - Doctoral Seminar in Analysis Credits: 3
• MUSI 830 - Doctoral Seminar in Music History Credits: 3
• MUSI 998 - Dissertation Proposal Credits: 1-3 (Must be taken for 3 credits)
• MUSI 999 - Dissertation Credits: 1-6 (Must be taken for 9 credits)

Approved Electives

• Approved Electives Credits: 6*

Note:

MUSI 610 and/or MUSI 710 must be taken for 6 credits
MUSI 660 option must be taken for 3 credits

Note:

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary PMI, ensemble (including chamber music), or relevant nonmusic courses.

The doctor of musical arts requires 60 credits beyond the master's degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required course work, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

Admission Requirements

In addition to meeting all admission requirements for graduate study, applicants should submit the following:

- Master’s degree in music from an accredited university
- GPA of 3.00 in master’s-level music course work; 3.50 in courses related to the prospective area of doctoral study (performance, composition, or conducting)

Residency

One year (fall and spring) of consecutive full-time study (9 credits per semester) is required (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student’s major area of study. Normally, this will be German, French, or Italian. The DGS and the student’s Faculty Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the
student’s area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Faculty Committee

During the first semester of study, the college’s dean of graduate studies will recommend to the dean of the College of Visual and Performing Arts five faculty members to serve as the student’s Faculty Committee: two from the student’s area of specialization (performance, conducting, or composition), one from music theory, one from music history, and one at large. The student’s major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve ex officio. All Faculty Committee members will have graduate faculty status, as approved by the university provost.

The Faculty Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group. Performance and composition recitals and projects moving toward the dissertation are also subject to approval of the committee.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all course work required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Faculty Committee, the dean of graduate studies, and the chair of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee. This group may be the student’s Faculty Committee as described above, plus a faculty member from beyond the School of Music. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Academic Policies
Degree Requirements

▲ Concentration in Composition (CPO)

- History or Theory Elective (600 level or above) Credits: 3
- Approved Electives Credits: 1*
- MUSI 828 - Doctoral Private Music Instruction Composition Credits: 2-3 (Must be taken for 15 credits)
- MUSI 614 - Music Theory Pedagogy Credits: 3
- MUSI 685 - Graduate Chamber Ensemble Credits: 1 (Must be taken for 4 credits)
- MUSI 880 - Doctoral Major Ensemble Credits: 1
- MUSI 890 - Doctoral Recital Credits: 1 (Must be taken for 2 semesters at 1 credit each)
- MUSI 610 - Topics in Music Theory Credits: 3 Or
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3 Or
- MUSI 730 - Advanced Topics in Music History Credits: 3
- MUSI 640 - Topics in World Musics Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3 (Must be taken for 6 credits)
- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- MUSI 998 - Dissertation Proposal Credits: 1-3 (Must be taken for 1 credit)
- MUSI 999 - Dissertation Credits: 1-6 (Must be taken for 12 credits)

Total: 60 credits

▲ Concentration in Conducting (CDC)

- History or Theory Elective (600 level or above) Credits: 3
- Approved Electives Credits: 5*
- MUSI 829 - Doctoral Private Music Instruction Conducting Credits: 2-3 (Must be taken for 15 credits)
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 880 - Doctoral Major Ensemble Credits: 1 (Must be taken for 4 credits)
- MUSI 890 - Doctoral Recital Credits: 1 (Must be taken for 2 semesters at 1 credit each)
- MUSI 610 - Topics in Music Theory Credits: 3 Or
- MUSI 710 - Advanced Topics in Music Theory Credits: 3 Or
- MUSI 712 - Composition for Conductors and Performers Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3 Or
- MUSI 730 - Advanced Topics in Music History Credits: 3 (Must be taken for 6 credits)
- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- MUSI 998 - Dissertation Proposal Credits: 1-3 (Must be taken for 1 credit)
- MUSI 999 - Dissertation Credits: 1-6 (Must be taken for 12 credits)

Total: 60 credits

▲ Concentration in Performance (PFM)

- MUSI 82X Doctoral Private Music Instruction (PMI) Credits: 15
- History or Theory Elective (600 level or above) Credits: 3
- Approved Electives Credits: 3*
- MUSI 770 - Advanced Topics in Pedagogy Credits: 3
- MUSI 830 - Doctoral Seminar in Music History Credits: 3
- MUSI 810 - Doctoral Seminar in Analysis Credits: 3
- MUSI 998 - Dissertation Proposal Credits: 1-3 (Must be taken for 1 credit)
- MUSI 999 - Dissertation Credits: 1-6 (Must be taken for 12 credits)

Students select from the remaining courses, with the advisor (17 credits):
- MUSI 880 - Doctoral Major Ensemble Credits: 1 And/Or
- MUSI 720 - Advanced Topics in Applied Music Credits: 3 (Must be taken for 4 credits)
- MUSI 685 - Graduate Chamber Ensemble Credits: 1
- MUSI 890 - Doctoral Recital Credits: 1 (Must be taken for 2 semesters at 1 credit each)
- MUSI 610 - Topics in Music Theory Credits: 3
- MUSI 710 - Advanced Topics in Music Theory Credits: 3
- MUSI 712 - Composition for Conductors and Performers Credits: 3
- MUSI 630 - Topics in Music History and Literature Credits: 3 Or
- MUSI 730 - Advanced Topics in Music History Credits: 3 (Must take 6 credits of MUSI 630 or MUSI 730)

Total: 60 credits

Note:

*Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary PMI, ensemble (including chamber music), or relevant nonmusic courses.

■ Theater
Faculty

Clayton Austin, Chair

Professors: D’Andrea (Robinson Professor), Davis, McDonald

Associate Professors: Austin, Elston, Gero, Johnsen-Neshati, Kurtz

Term Associate Professor: Chew

Adjunct Faculty: Cetron, Lechter, Lee, McManus, Mountain, Murray, Nanni-Messegee, Wallace

Course Work

The Theater Department offers all course work designated THR in the Courses chapter of this catalog.

Undergraduate Program

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in the theater. Students electing to major in theater complete the theater core, which is a group of courses providing a broad introduction to the various theater arts and striving to create a shared body of knowledge within the department’s student population.

To organize their advanced work within the major, students elect a course of study that includes classes in at least two of three areas: performance, design and technical theater, and theater studies. The department aims to prepare students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the department and throughout the university’s extensive offerings.

Students seeking to earn a BA as a second bachelor’s degree, either concurrently or sequentially, must complete all theater degree requirements including foreign language. Students must earn a minimum 2.00 cumulative GPA in their major.

Theater Concentrations

Theater majors may apply to complete their degree in one of the following concentrations: Design and Technical Theater, Performance, Playwriting and Dramaturgy, or Theater Studies.

To apply for admission into a concentration a student must have:

- completed 45 credits including THR credits as specified in the concentration
- cumulative GPA minimum of 2.5

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their majors at the 300 level or above. Students seeking a BA in theater fulfill this requirement by successfully completing THR 350 or THR 351.
Honors in Theatre

Students wishing to pursue Honors in Theater should contact the department chair.

Production Opportunities

Participation in Theater Department productions with the GMU Players is expected of all declared majors. Up to 4 practicum credits, 1 credit per assignment can be awarded for satisfactory completion of performance and production assignments in the major, including faculty or guest-directed GMU Players main stage, studio, or Theater of the First Amendment (TFA) productions.

TFA, a professional theater in residence within CVPA, offers students the chance to work closely with professional artists. TFA productions regularly employ student assistants in stage management, directing, design, dramaturgy, technical crews, and production and company management. Students are eligible to audition for age-appropriate roles or understudy assignments in TFA productions and may participate in the Membership Candidate Program through the Actors’ Equity Association.

Academic Policies

Please see College of Visual and Performing Arts academic policies.

Students are eligible to audition for age-appropriate roles or understudy assignments in TFA productions and may participate in the Membership Candidate Program through the Actors’ Equity Association.

**Academic Policies**

Please see College of Visual and Performing Arts academic policies.
Degree Requirements

General Education (40 credits)

Foundation Requirements

- Oral communication Credits: 3
- Information technology Credits: 3
- Quantitative reasoning Credits: 3
- ENGL 101 - Composition Credits: 3
- ENGL 302 - Advanced Composition Credits: 3

Nonnative speakers of English with limited proficiency in the language may substitute ENGL 100 for ENGL 101. Students must attain a minimum grade of C in ENGL 100 or 101, as well as in 302, to fulfill degree requirements.

Core Requirements

- Literature Credits: 3
- Arts (outside the major) (students earning a concentration in Design and Technical Theater must take ARTH 101, 102, 200 or 201) Credits: 3
- Natural science (including one laboratory science) Credits: 7
- Western civilization Credits: 3
- Global understanding Credits: 3
- Social and behavioral sciences Credits: 3
- Synthesis requirement (see concentration for specific requirement) Credits: 3

Major (56-78 credits)

Foreign Language, Minor, Double Major or Double Degree (0–21 credits)

See beginning of CVPA chapter for foreign language requirement.

Students may complete an academic minor, double major or double degree in lieu of the foreign language requirement.

Theater Core Requirements (32-33 credits)

- Additional literature (3)
- Additional arts (outside the major) (students earning a concentration in Design and Technical Theater must take AVT 104 or 222) (3–4)
- THR 150 - Drama, Stage, and Society I Credits: 3
- THR 151 - Drama, Stage, and Society II Credits: 3
- THR 196 - Performance and Design Practicum Credits: 1
- THR 197 - Management/Literary Practicum Credits: 1
• THR 198 - Theatrical Construction Practicum Credits: 1
• THR 199 - Production Run Crew Practicum Credits: 1
• THR 210 - Acting I Credits: 3
• THR 230 - Introduction to Technical Theater Credits: 3
• THR 329 - Directing I Credits: 3
• THR 350 - Script Analysis Credits: 3

One upper-level dramatic literature course (3 credits)

Students earning a concentration in Playwriting and Dramaturgy must take THR 351

• THR 351 - Dramatic Theory and Criticism Credits: 3
• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3 (THR 359 may be applied to fulfill either the global understanding or upper-level dramatic literature requirement but not both.)
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 424 - Contemporary Women Playwrights Credits: 3

One from the following group of 1-credit minicourses:

Students earning a concentration in Playwriting and Dramaturgy must take THR 202

• THR 201 - Stage Management Credits: 1
• THR 202 - Literary Management Credits: 1
• THR 203 - Production/Company Management Credits: 1

Practicum

Students must complete 1 assignment in each of the following areas to earn a total of 4 practicum credits.

THR 196 assignments include actor, designer, assistant designer, stage manager, and assistant stage manager

THR 197 assignments include director, assistant director, dramaturg, master electrician, technical director, playwright, house management, and publicity

THR 198 assignments include scenery construction and painting, costume construction, electrician, and props

THR 199 assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew

• THR 196 - Performance and Design Practicum Credits: 1
• THR 197 - Management/Literary Practicum Credits: 1
• THR 198 - Theatrical Construction Practicum Credits: 1
• THR 199 - Production Run Crew Practicum Credits: 1

Upper-Level Units:
• 24 credits of 300- and 400-level courses, chosen from at least two of the following areas: performance, design and technical theater, and theater studies. These credits are in addition to upper-level credits taken to fulfill theater core requirements.

**Performance**

This emphasis is designed for the serious student of acting with performance aspirations. Solid grounding in the fundamentals of analysis and basic training of the actor’s instrument are complemented by intensive, individualized instruction in the various facets of the actor’s craft.

- THR 300 - Voice and Speech Fundamentals Credits: 3
- THR 301 - Voice and Speech for the Performer Credits: 3
- THR 303 - Movement for the Actor I Credits: 3
- THR 304 - Movement for the Actor II Credits: 3
- THR 305 - Stage Combat Credits: 3
- THR 310 - Acting II Credits: 3
- THR 320 - Beginning Modern Acting Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 345 - Puppetry: History and Technique Credits: 2-4
- THR 365 - Characterization Credits: 3
- THR 420 - Advanced Modern Acting Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 423 - Audition Techniques: Stage and Camera Credits: 3
- THR 425 - Verse Speaking Credits: 3

**Design and Technical Theater**

This emphasis prepares students for further study and work in the design and technical fields. Courses in this area are also strongly recommended for students interested in directing.

- THR 314 - Lighting Stagecraft Credits: 3
- THR 315 - Sound Engineering Credits: 3
- THR 330 - Seminar in Technical Theater Credits: 3
- THR 331 - Drafting and Model Making Credits: 3
- THR 332 - Seminar in Costume History Credits: 3
- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 336 - Advanced Theater Technology Credits: 3
- THR 337 - Sound Design Credits: 3
- THR 339 - Theatrical Design Concepts Credits: 3
- THR 343 - Costume Draping and Drafting Credits: 3
- THR 434 - Advanced Lighting Design Credits: 3

**Theater Studies**
This emphasis is designed to provide the theater generalist with thorough preparation for further study and work in directing, dramaturgy, theater criticism, theater scholarship, playwriting, and teaching. For specific teacher certification requirements, students are directed to the Office of Teacher Education.

- THR 340 - Directing II Credits: 3
- THR 351 - Dramatic Theory and Criticism Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3
- THR 380 - Playwriting I Credits: 3
- THR 381 - Playwriting II Credits: 3
- THR 382 - Screenplay Workshop Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- THR 480 - Advanced Playwriting Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3
- THR 484 - Translation & Adaptation for Stage & Screen Credits: 3
- THR 491 - Major's Seminar on the Profession Credits: 3
- THR 496 - Text in Production Credits: 3

May be applied to the appropriate area:

- THR 490 - Special Topics in Drama Credits: 1-6
- THR 494 - Field Experience Credits: 1-6
- THR 497 - Independent Study Credits: 1-6

Theater Concentrations (30-39 credits)

Theater majors may apply to complete their degree in one of the following concentrations: Design and Technical Theater, Performance, Playwriting and Dramaturgy, or Theater Studies.

Theater majors are not required to complete a concentration to graduate with a Theater BA.

To apply for admission into a concentration, a student must have:

- completed 45 credits including THR credits as specified in the concentration
- cumulative GPA minimum of 2.5

Please see the concentration advisor in your area of interest for specific application details.

To graduate with a concentration, student must have a minimum cumulative program GPA of 3.0.

▲ Concentration in Design and Technical Theater (DTT)

The Design and Technical Theater concentration provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Synthesis fulfilled by THR 440 or THR 496
Prerequisites to apply: THR 198, 199, 230, and 9 additional THR credits

Required Core Courses:

- THR 314 - Lighting Stagecraft Credits: 3
- THR 331 - Drafting and Model Making Credits: 3
- THR 332 - Seminar in Costume History Credits: 3
- THR 339 - Theatrical Design Concepts Credits: 3
- THR 495 - Senior Capstone Project Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or
- THR 496 - Text in Production Credits: 3

Design Courses

Take two design courses:

- THR 333 - Stage Design Credits: 3
- THR 334 - Lighting Design Credits: 3
- THR 335 - Costume Design Credits: 3
- THR 337 - Sound Design Credits: 3

Design and Technical Theater Concentration Electives:

Select four courses from (maximum of 6 credits of THR 330 and maximum of 3 credits of THR 494):

- THR 315 - Sound Engineering Credits: 3
- THR 330 - Seminar in Technical Theater Credits: 3
- THR 336 - Advanced Theater Technology Credits: 3
- THR 342 - Makeup Design Credits: 3
- THR 343 - Costume Draping and Drafting Credits: 3
- THR 345 - Puppetry: History and Technique Credits: 2-4
- THR 434 - Advanced Lighting Design Credits: 3
- THR 494 - Field Experience Credits: 1-6

Total: 36 credits

▲ Concentration in Performance (PFM)

This area is designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization"
entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement
technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional
investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing
student progress reviews, support and advising from Performance Concentration faculty.

Synthesis fulfilled by THR 440 or THR 496

Prequisites to apply: THR 210, 310, 329, and 3 additional THR credits

Required Core Courses:

- THR 300 - Voice and Speech Fundamentals Credits: 3
- THR 303 - Movement for the Actor I Credits: 3
- THR 320 - Beginning Modern Acting Credits: 3
- THR 321 - Acting Shakespeare Credits: 3
- THR 340 - Directing II Credits: 3
- THR 365 - Characterization Credits: 3
- THR 420 - Advanced Modern Acting Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or
- THR 496 - Text in Production Credits: 3

Performance Concentration Electives

Select four courses from the following:

- THR 301 - Voice and Speech for the Performer Credits: 3
- THR 304 - Movement for the Actor II Credits: 3
- THR 305 - Stage Combat Credits: 3
- THR 423 - Audition Techniques: Stage and Camera Credits: 3
- THR 425 - Verse Speaking Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- THR 490 - Special Topics in Drama Credits: 1-6
- THR 494 - Field Experience Credits: 1-6
- THR 496 - Text in Production Credits: 3
- THR 497 - Independent Study Credits: 1-6

Total: 39 credits

▲ Concentration in Playwriting and Dramaturgy (PWD)

The Playwriting and Dramaturgy concentration acknowledges a creative and practical connection between the work of the
playwright and dramaturg. Students choosing this area of specialization will focus on the literary aspects of theater, such as
playwriting, dramaturgy, screenwriting, translation, adaptation, season planning, and theater criticism. Students seeking
specialized experience as a playwright or dramaturg will choose from a selection of required and recommended courses designed
to expose students to a broad range of contemporary and classical texts, deepen their understanding of dramatic structure,
encourage collaboration, and foster opportunities for new play development. Students are encouraged to consult their advisors on complementary courses of interest outside the major, such as in the visual and performing arts, Film and Video Studies, English and Foreign Language. This concentration gives students access to a variety of hands-on opportunities within the Department and the professional world.

Synthesis fulfilled by THR 440

Prerequisites to apply: THR 150 or 151 and 9 additional THR credits

Required Core Courses:

- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 380 - Playwriting I Credits: 3
- THR 381 - Playwriting II Credits: 3
- THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3
- THR 484 - Translation & Adaptation for Stage & Screen Credits: 3
- THR 495 - Senior Capstone Project Credits: 3

Playwriting and Dramaturgy Concentration Electives:

Take four courses from the following:

- THR 340 - Directing II Credits: 3
- THR 352 - Dramatic Literature Seminar Credits: 3
- THR 355 - Moral Vision in American Theater Credits: 3
- THR 359 - World Stages Credits: 3
- THR 382 - Screenplay Workshop Credits: 3
- THR 395 - Theater as the Life of the Mind Credits: 3
- THR 421 - One-Person Show Credits: 3
- THR 424 - Contemporary Women Playwrights Credits: 3
- THR 480 - Advanced Playwriting Credits: 3
- THR 482 - Advanced Screenplay Workshop Credits: 3
- THR 490 - Special Topics in Drama Credits: 1-6

Total: 30 credits

▲ Concentration in Theater Studies (THST)

This concentration is designed to provide the theater generalist with a thorough preparation for further study and work in directing, scholarship or teaching.

Synthesis fulfilled by THR 440 or THR 496

THR 494 requires 3 credits

Prerequisites to apply: THR 198 or 199, 150 or 151, 210 and 230

Required Core Courses:
• THR 494 - Field Experience Credits: 1-6
• THR 495 - Senior Capstone Project Credits: 3

• THR 440 - Advanced Studies in Directing/Dramaturgy Credits: 3 or
• THR 496 - Text in Production Credits: 3

Theater Studies Concentration Electives:

Select three of the following courses:

• THR 351 - Dramatic Theory and Criticism Credits: 3
• THR 352 - Dramatic Literature Seminar Credits: 3
• THR 355 - Moral Vision in American Theater Credits: 3
• THR 359 - World Stages Credits: 3
• THR 380 - Playwriting I Credits: 3
• THR 382 - Screenplay Workshop Credits: 3
• THR 395 - Theater as the Life of the Mind Credits: 3
• THR 424 - Contemporary Women Playwrights Credits: 3

Theater Elective:

Select one course from the following:

• THR 310 - Acting II Credits: 3
• THR 340 - Directing II Credits: 3
• THR 381 - Playwriting II Credits: 3
• THR 482 - Advanced Screenplay Workshop Credits: 3

Design Elective:

Select one course from the following:

• THR 333 - Stage Design Credits: 3
• THR 334 - Lighting Design Credits: 3
• THR 335 - Costume Design Credits: 3
• THR 337 - Sound Design Credits: 3
• THR 342 - Makeup Design Credits: 3

Theater Studies Electives:

THR 300-499 (9 cr)

Total: 33 credits
Electives

- Electives (2-24 credits)

Faculty

Ascoli, Axtell, Barreto, Blackwell, Butler, Cebra, Cioffi-Revilla, Cox, Cressman, Crooks, De Jong, Dumas, Gero, Grefenstette, Kabbani, Kalbfleisch, McCabe, Morowitz, Olds, Palkovich, Parasuraman, Peixoto, Sikdar, So, Tsvetovat

The Institute

The Krasnow Institute for Advanced Study seeks to expand the understanding of mind, brain, and intelligence by conducting research at the intersection of the separate fields of cognitive psychology, neurobiology, and the computer-driven study of artificial intelligence and complex adaptive systems, including social systems. These separate disciplines increasingly overlap and promise progressively deeper insight into human thought processes. The institute also examines how new insights from cognitive science research can be applied for human benefit in the areas of mental health, neurological disease, education, computer design, and social system analysis.

The Krasnow Institute for Advanced Study was chartered in 1990 as a private nonprofit Virginia corporation and merged with Mason in 2002, becoming a chartered institute under the Office of the Provost. The Center for Social Complexity joined the Krasnow Institute in 2005. In 2008, the institute became an academic unit housing the Molecular Neuroscience Department and the Computational Social Science Department. With an annual budget of $4.2 million, the institute is home to a scientific staff of 90. Cognitive research at the institute spans from molecules to the mind to social systems. Krasnow scientists have published extensively in the most prestigious scholarly journals and collectively have brought in more than $40 million in sponsored research from federal agencies such as the National Institutes of Health and private sources such as the Sir John Templeton Foundation.

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. Please see the Academic Policies section of this catalog.

Computational Social Science Department
Computational Social Science is the interdisciplinary science of complex social systems and their investigation through computational models and related tools. The field is at the intersection of social science and computer science and spans anthropology, economics, political science, sociology, and social psychology—the classical social sciences—as well as allied disciplines such as geography, history, organization theory, regional science, communication, and linguistics. Computational approaches include agent-based social simulation models (multi-agent systems), social network analysis, mathematical analysis based on complexity theory, social geospatial modeling methods, and automated information and content analysis methods.

Master's Degree

Computational Social Science, MS (pending SCHEV approval)

Banner Code: KR-MS-CSS

The program described below has been approved by the Board of Visitors and sent to the State Council for Higher Education in Virginia for consideration as a new degree program. The university cannot accept applications or enroll students in this program until SCHEV approval has been granted.

The CSS MS program will prepare students to be members of project teams working at government agencies, think tanks, and contractors, contributing to background research and to project design, execution, and communication. CSS MS graduates following the thesis option will also be prepared to enter research-oriented PhD programs in both computational and social science.

Upon completion of the program, students will: understand the complex systems foundations of CSS; gain exposure to the most current and significant ongoing work in CSS; understand the structure and design of CSS models; be able to design and execute basic CSS models; and understand the technical foundations and current work in at least two CSS subfields (such as but not limited to social network analysis, computational economics, finance, or game theory, the emergence of social complexity, and spatial agent-based modeling).

Admission Requirements

The Fall semester is the normal time of entry into the program, with February 15th of each year as the deadline for receiving applications. Prior background should include a Bachelor’s degree in either one of the social sciences, in computer science, engineering, or in a relevant discipline, as well as undergraduate courses in these and related areas. Bachelor’s degrees in other areas are also eligible, but the student may be required to take additional courses in social science, mathematics or computer science as prerequisites to admission.

Application materials should be submitted to the CSS Academic Programs Office and must include the following:

1) Completed application form;
2) Official transcripts for all undergraduate (minimum overall 3.0 GPA) and previous graduate courses, minimally including pre-calculus and one course in statistics;
3) An updated curriculum vitae;
4) Three letters of recommendation by faculty members or individuals with direct knowledge of the student’s academic or professional capabilities;
5) A statement of purpose (maximum 2000 words) outlining the student’s interest in and preparation for the program;
6) The names of two faculty members who may be suitable as advisors;
7) Graduate Record Examination (GRE) scores taken within the past five years prior to the date of application submission;  
8) Test of English as a Foreign Language (TOEFL) as per GMU policies.

No specific set of qualifications guarantees admission to the program.

CSS Academic Programs Office  
Rm 382 Research I Bldg  
4400 University Drive, MS 6B2  
Fairfax, VA 22030

Students should also review the university-wide graduate admissions standards and procedures discussed in the Admission section of this catalog.

Degree Requirements

The master's degree in Computational Social Science requires a total of 36 credits and includes a choice of three degree completion options. The 36 credits are distributed among the following categories of courses: required core courses (18 credits); research course(s) (3 credits); electives (9-15 credits depending on the degree completion option pursued); and one of three degree completion options: a comprehensive exam (no credit), a project (3 credits), or a thesis (6 credits).

Core Courses (18 credits):

9 credit hours of required CSS Courses

to provide understanding of the conceptual, technical, and practical foundations of computational social science:

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3  
  A more advanced computer science course can replace 605 for students with a strong prior computer science background.
- CSS 610 - Computational Analysis of Social Complexity Credits: 3

9 credit hours of departmental electives from the following list

to provide understanding of the technical foundations and current work in at least two CSS subfields:

- CSS 620 - Origins of Social Complexity Credits: 3
- CSS 625 - Complexity Theory in the Social Sciences Credits: 3
- CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- CSS 692 - Social Network Analysis Credits: 3
- CSS 739 - Topics in Computational Social Science Credits: 3  
  (Courses offered to date under the CSS 739 heading include “Mathematical Foundations of Agent-based Modeling,” “Agent-based Computational Economics,” “Computational Modeling of Organizations,” “Advanced Social Network Analysis,” “Models of Terrorism,” and “Computational Models in Organizational Theory.”)
Research Course (3 credits) chosen from the following:

Three credits will be chosen from the following courses to provide students with exposure to the most current ongoing research in the field and to allow them to further develop their computational research expertise:

- CSS 796 - Directed Reading and Research Credits: 3
- CSS 898 - Research Colloquium in Computational Social Science Credits: 1
- CSS 899 - Colloquium in Computational Social Science Credits: 1

Electives (9-15 credits):

The number of general elective credits required depends on the degree completion option selected by the student. For students choosing the comprehensive exam option, 15 elective credits are required; for those choosing the project option, 12 credits; and for those completing a thesis option, 9 elective credits are required.

The purpose of the electives is to allow students to acquire a substantive specialization and acquire additional training in social and computational science. An elective course may be any Mason master's-level course in computational social science, social science, computer science, statistics, and other quantitative methods such as data visualization, information technology, and geographic information science. These courses should be selected in conjunction with, and approved by, the student's advisor and the Director of CSS Graduate Studies. If the student does not have prior coursework in multivariate statistical analysis, at least one such course relevant for the student's chosen specialization should be included in these credits.

Note that in some instances the specialization may also have a strong methodological component, as is the case for GIS-supported agent-based social simulation modeling and other CSS specializations with strong methodological content.

Degree Completion Options (0-6 credits):

Students choose one degree completion option.

Comprehensive exam (no credit)

Students following the comprehensive exam option must complete a total of 15 elective credits (see above). These students will then take a standardized, written comprehensive exam at the end of the final academic year of their program. The exam will be designed and graded by a comprehensive exam committee of at least three faculty members, including the coordinator of the CSS MS program and two additional faculty members appointed to the examination committee. The exam will include questions based on the content of the three CSS core courses and a choice of field questions based on the departmental electives completed by the students taking the exam in that year. Exams will be graded fail, conditional pass (conditions can include a requirement for a written or oral follow-up to examiners' comments), pass, and high pass. Two attempts to pass the exam are allowed.

Project (3 credits)

Students choosing the project option must complete a total of 12 elective courses (see above), form a three-person faculty committee to review their project, and complete 3 credits of CSS 798 (Research Project). A CSS project is an original technical exercise, such as design and execution of an original experiment using an existing model, a model-to-model comparison, empirical analysis of data generated by a computational model, or implementation and documentation of a simple model in a package such as Netlogo or MASON. The project should be documented through a technical report, which is approved by the student's three-person committee. The student will also be required to hold a public presentation of their project (such as through the CSS brown bag seminar series or an external conference). Projects will be graded fail, conditional pass (conditions can
include a requirement for repeat presentation or written or oral follow up to), pass, and high pass. Two attempts to pass are allowed.

- CSS 798 - Research Project Credits: 3

Thesis (6 credits)

Students choosing the thesis option must form a three-person thesis committee, complete 6 credits of CSS 799 (Master's Thesis), and complete and defend a thesis. The thesis should involve independent, original research suitable for submission to a peer-reviewed conference or journal. Theses will be graded fail, conditional pass (conditions can include a requirement for a written or oral follow-up to examiner's comments), pass, and high pass. Two attempts to defend the thesis are allowed.

- CSS 799 - Master's Thesis Credits: 1-6

Total: 36 credits

Master's Level Certificate

Computational Social Science Graduate Certificate

Banner Code: KR-CERG-CSS

This 15-credit program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at Mason and all students who hold a bachelor’s degree from an accredited university. The CSS certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

Admission Requirements

Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.00. To apply, prospective students should forward a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, and a current résumé to the CSS Academic Programs Office. TOEFL scores are required of all international applicants. Applicants should read the full description of university-wide graduate admissions requirements in the Admission section of this catalog.

CSS Academic Programs Office
Rm 382 Research I Bldg
4400 University Drive, MS 6B2
Fairfax, VA 22030

Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS course work intended to satisfy requirements. They must also have their course work plan approved by the director.
CSS Certificate Requirements

2 required core CSS courses (6 credits):

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3

9 credits minimum in elective courses:

For example,

- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3
- CSS 692 - Social Network Analysis Credits: 3

Note: Students may include a maximum of 3 credits of programming courses to meet the elective requirements. Procedural, object-oriented languages, or other approved programming approaches like CSI 603 or CSI 604, Introduction to Scientific Programming I or II, may be used with permission of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages (for example, CSI 606 and 607), may also be used to meet the requirements with prior approval of the director.

Total: 15 credits

Doctoral Degree

Computational Social Science, PhD

Banner Code: KR-PHD-CSS

The core objective of the computational social science (CSS) PhD program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

For policies governing all graduate degrees, see the Academic Policies chapter of the catalog.

Admission Requirements

Applicants should have as background a bachelor’s degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor’s degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming
language, preferably object-based. Applicants should have an undergraduate degree from an accredited institution, with a GPA of at least 3.25. To apply, prospective students should send to the CSS Academic Programs Office a completed Mason graduate application, two copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student’s academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

CSS Academic Programs Office
Rm 382 Research I Bldg
4400 University Drive, MS 6B2
Fairfax, VA 22030

Students should also review the university-wide graduate admissions standards and procedures discussed in the Admission section of this catalog.

Degree Requirements

The program requires 72 credits beyond the baccalaureate degree, with a minimum of 48 credits in course work, and 24 credits of dissertation research. For those holding a master’s degree, the 72 required credits may be reduced by up to 30 credits, depending on graduate courses. A maximum of 24 credits of prior graduate course work may be transferred, provided such credits have not been used for another degree. The 48 credits of courses have the functional distribution and learning objectives indicated below.

12 credits of required core CSS courses:

- CSS 600 - Introduction to Computational Social Science Credits: 3
- CSS 605 - Object-Oriented Modeling in Social Science Credits: 3
- CSS 610 - Computational Analysis of Social Complexity Credits: 3
- CSS 620 - Origins of Social Complexity Credits: 3

6 credits of extended core CSS courses taken from the following:

- CSS 625 - Complexity Theory in the Social Sciences Credits: 3
- CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions Credits: 3
- CSS 692 - Social Network Analysis Credits: 3

15 credits of discipline-based courses

15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student’s advisor, to provide domain-specific knowledge.

15 credits of elective courses

15 credits of elective courses or independent research, as approved by the student’s advisor, to provide further substantive or methodological specialization as needed. (Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.)
24 credits of dissertation research

24 credits of dissertation research to demonstrate doctoral level originality and research excellence taken from:

- CSS 998 - Doctoral Dissertation Proposal Credits: 1-12
- CSS 999 - Doctoral Dissertation Credits: 1-12

Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality
- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, cyberwarfare
- Computational anthropology: emergence of hierarchy, settlement patterns
- Computational political science: systems of government, conflict and war, cooperation
- Computational sociology: segregation, collective action, leadership, trust
- Complexity theory: power laws, potential theory, criticality, bifurcation
- Computational methodology: multiagent systems, evolutionary computation

Total: 72 credits

Additional Information:

During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student’s advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student’s progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS Program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

The candidacy exam is taken after students have completed all core requirements and a majority of additional course work (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student’s substantive and methodological knowledge in CSS as a whole and in the chosen focus area; the ability to integrate materials from different courses; and the potential for a successful dissertation.

The exam will consist of written and oral parts. Upon passing the candidacy exam and submitting an acceptable dissertation proposal, students are advanced to doctoral candidacy. The degree is awarded on the successful defense of a PhD dissertation that represents a detailed written report of an original and significant research contribution to the CSS field.

■ Molecular Neuroscience Department

Phone: 703-993-4333
Web: neuroscience.gmu.edu

The Krasnow Institute’s Department of Molecular Neuroscience, together with the College of Science (COS) and the College of Humanities and Social Sciences (CHSS), oversees the campus-wide Neuroscience Advisory Council in developing the Neuroscience PhD curriculum.

Neuroscience PhD courses are listed under NEUR in the Courses section of this catalog. Neuroscience PhD admissions and program requirements are listed under Neuroscience, PhD in the College of Science section of this catalog.
Course Directory

This section lists George Mason University’s undergraduate and graduate courses that are available for credit. Courses are listed in alphabetical order. The subject code for courses and the programs offering the courses are as follows:

Courses

Each course indicates the number of credits earned; the hours of lecture or seminar per week; and the hours of laboratory or studio per week (if applicable). For independent study, readings, topics, or similar courses, individual instructors set hours. If a course is listed as having an equivalent course, students may not receive credit for both courses.

For a glossary of the courses, please go to Course Directory.

For the information regarding undergraduate and graduate course numbering, please go to Course Numbering.

Accounting

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

ACCT 203 - Survey of Accounting

Credits: 3

Introduction to accounting from the viewpoint of those who prepare and use financial information. Topics include using accounting information; creating financial statements; an overview of the firm's operating, financing, and investing activities; and an introduction to product costing, operating budgets, and capital investment decisions. Lecture, recitation format; requires attendance in weekly lecture and weekly recitation.

Prerequisites
Grade of C or higher in ECON 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

ACCT 301 - Financial Accounting and Managerial Decision Making

Credits: 3

Examines financial accounting from the viewpoint of both users and preparers of financial statements, emphasizing use of financial statement information to make financing, operating, and investing decisions. International Financial Reporting Standards (IFRS) are introduced.

Prerequisites
Grade of C or higher in ACCT 203 or equivalent, sophomore standing.
Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

ACCT 311 - Managerial and Cost Accounting

Credits: 3
Develops skills in identifying business processes, transforming data into useful information, and making managerial decisions. Designed for students in all areas of management, especially those whose career aims include cost management. Topics include analyzing and managing costs, developing cost systems that facilitate decision making, identifying opportunities for improving business process, creating financial and operating budgets for planning and control, and developing measures to assess performance.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

ACCT 331 - Intermediate Financial Accounting I

Credits: 3
Deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision-useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include the accounting process and the conceptual framework, financial statements, and accounting for current and noncurrent assets and liabilities. International Financial Reporting Standards (IFRS) are discussed.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.
ACCT 332 - Intermediate Financial Accounting II

Credits: 3
Deals with the accounting process used to measure and report economic events. The primary goals are to understand the role financial reporting plays in providing decision useful information; understand the economics underlying business transactions and learn the generally accepted accounting principles (GAAP) that set the reporting and disclosure requirements for those transactions; evaluate the efficacy of GAAP; and understand the motivations that lead managers to select one accounting principle over another. Topics include bonds, owners' equity, cash flows, accounting changes, and accounting for investments, income taxes, leases, and pensions. International Financial Reporting Standards (IFRS) are discussed.

Prerequisites
Degree status, grades of C or higher in ACCT 331 and FNAN 301.

Notes
This course is a continuation of ACCT 331.

Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.

ACCT 351 - Taxation and Managerial Decision Making

Credits: 3
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Notes
Mid-term and final exams may be scheduled on Saturdays for this class. The number of class sessions will be modified to compensate for mid-term examination time. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities.
ACCT 361 - Accounting Information Systems

Credits: 3
Introduction to accounting information systems, focusing on a conceptual basis for transaction processing. Handling and processing of transactions in revenue, expenditure, and payroll cycles serves as platform for developing and manipulating accounting information within a computerized transaction-processing and electronic data environment.

Prerequisites
Degree status, grade of B minus or higher in ACCT 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

ACCT 372 - Business Analysis and Valuation

Credits: 3
Expands on students' ability to use financial statement information for business valuation and financial analysis transactions including credit analysis, risk assessment, risk management, bankruptcy prediction, and equity valuation. Uses actual case studies to provide in-depth analysis of the use of financial statement information.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ACCT 411 - Advanced Managerial Accounting

Credits: 3
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting.

Prerequisites
Degree status, grade of C or higher in ACCT 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

ACCT 433 - Advanced Financial Accounting

Credits: 3
Focuses on advanced topics in financial accounting. Students study accounting business combinations, preparation of consolidated financial statements, accounting for foreign currency transactions, translation and remeasurement of foreign currency financial statements, partnership accounting, interim and segment reporting, and Securities and Exchange Commission
reporting issues. International Financial Reporting Standards (IFRS) are discussed.

**Prerequisites**
Degree status; C or higher in ACCT 301 and ACCT 332.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

---

**ACCT 451 - Advanced Federal Taxation**

Credits: 3  
Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers.

**Prerequisites**
Degree status, grade of C or higher in ACCT 351.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring.

---

**ACCT 461 - Assurance and Audit Services**

Credits: 3  
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information.

**Prerequisites**
Degree status, grades of C or higher in ACCT 301, ACCT 331 and 361.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring.

---

**ACCT 462 - Honors Seminar in Accounting**

Credits: 3  
An in-depth study and analysis of contemporary developments and topics of interest in accounting.

**Prerequisites**
Accounting major, senior standing, permission of the instructor.

**Notes**
The topics and format will vary. Enrollment in this course is limited and competitive.
ACCT 472 - Government and Not-for-Profit Accounting

Credits: 3
Introduction to accounting for nonbusiness organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, charitable organizations, and the federal government.

Prerequisites
Degree status, grade of C or higher in ACCT 331.

ACCT 491 - Seminar in Accounting

Credits: 3
Advanced study of accounting concepts and selected topics.

Prerequisites
Degree status.

ACCT 499 - Independent Study

Credits: 1-3
Research and analysis of selected problems or topics in accounting.

Prerequisites
9 credits in upper-level accounting courses, degree status.

Notes
Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.
ACCT 713 - Managerial Accounting Theory

Credits: 3
Controllership function in public or private organizations, particularly in regard to development of policy and evaluation of performance.

Hours of Lecture or Seminar per week: 3

ACCT 741 - Information Technology Auditing

Credits: 3
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls.

Equivalent to MBA 741

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 742 - Corporate Governance and Ethics

Credits: 3
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment.

Equivalent to MBA 742

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ACCT 743 - Corporate Financial Reporting

Credits: 3
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance.

Equivalent to MBA 743
ACCT 744 - Fraud Deterrence and Detection

Credits: 3
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

Equivalent to MBA 744

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ACCT 745 - International Financial Reporting

Credits: 3
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to MBA 745

Prerequisites
Completion of MBA or MSA core requirements, or permission of program director.

Hours of Lecture or Seminar per week: 3

ACCT 792 - Seminar in Accounting

Credits: 3
Selective analysis of current accounting topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics.

Hours of Lecture or Seminar per week: 3
ACCT 796 - Independent Studies/Directed Readings

Credits: 1-3
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum.

Prerequisites
Permission of instructor.

Notes
Approval of faculty member and program director required. May be repeated for up to 3 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Adult Education

EDAL 542 - Arranging Conditions for Adult Learning

Credits: 6
Focuses on linking adult learners to resources and establishing the environment for learning. Covers program development processes, teaching and learning strategies for adults, technology and adult learning, workplace learning, and learning organizations.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

African and African American Studies

AFAM 200 - Introduction to African American Studies

Credits: 3
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
AFAM 390 - Special Topics in African and African American Studies

Credits: 3
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout the African Diaspora.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AFAM 490 - Internship

Credits: 2-6
Approved work-study program in cooperation with specific organizations including area museums, NGOs, and local, state and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Requires approval of department.

Prerequisites
AFAM 200 and 60 credits.

Notes
Credit to be determined by the African American Studies Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AFAM 499 - Independent Study

Credits: 1-3
Investigation of an area related to African American studies according to individual interest, with emphasis on research.

Prerequisites
Undergraduate senior status and permission of the director.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

Anthropology

ANTH 114 - Introduction to Cultural Anthropology

Credits: 3
Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures.
ANTH 120 - Unearthing the Past: Prehistory, Culture and Evolution

Credits: 3
Introduction to archeology and bioanthropology. Explore issues and debates in human biological evolution, prehistory and social change, as well as lab and field methods for understanding archaeological remains

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

ANTH 135 - Becoming Human: Evolution, Cognition, and Culture

Credits: 3
Examines fossil evidence for human evolution, the origins of human cognition, and human culture. Explores contemporary issues and debates in human biological and social evolution.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 299 - Independent Study

Credits: 1-3
Individual study in anthropology on topic organized in advance by student and instructor.

Prerequisites
ANTH 114, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ANTH 300 - Civilizations
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 301 - Native North Americans**

Credits: 3
Exploration of native North American cultures and selected aspects of Indian-white historical relations. Emphasizes cultural persistence as well as change.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 302 - Peoples and Cultures of Latin America**

Credits: 3
Examines Latin American cultures and selected aspects of historical record.

Satisfies General Education Requirement: Global understanding

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 304 - Peoples and Cultures of the Pacific**

Credits: 3
Survey of 20th-century Melanesian, Polynesian, and Micronesian cultures. Case studies of interplay between cultural systems and island ecology.

Satisfies General Education Requirement: Global understanding

Notes
ANTH 305 - Foraging Societies

Credits: 3
Examines early human societies with emphasis on environmental, technological, and cultural aspects of hunting and gathering as a successful means of adaptation.

Notes
For non-Western credit.

ANTH 306 - Peoples and Cultures of Island Asia

Credits: 3
Examines cultures of the Island Asia culture region, focusing on native cultures of Indonesia, Borneo, and the Philippines.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit.

ANTH 307 - Ancient Mesoamerica

Credits: 3
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage.

Satisfies General Education Requirement: Global understanding

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Notes
For non-Western credit.
ANTH 308 - Peoples and Cultures of the Middle East

Credits: 3
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 309 - Peoples and Cultures of India

Credits: 3
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 310 - Social Organization and Kinship

Credits: 3
Examines social organization, kinship, descent, and kinship terminologies in mainly non-Western cultures, emphasizing the meaning of specific cultural systems and cross-cultural similarities and differences.

Prerequisites
ANTH 114, 60 credits, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 311 - Peoples and Cultures of Mainland Southeast Asia
Credits: 3
Survey of societies of mainland Southeast Asia, with emphasis on successive waves of outside cultural influences and relations between contrasting ethnic groups in modern states. Focuses on Thailand and Malaysia.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 312 - Political Anthropology**

Credits: 3
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism.

Satisfies General Education Requirement: Global understanding

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 313 - Myth, Magic, and Mind**

Credits: 3
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 315 - Socialization Processes: Family, Childhood, Personality in Cross-Cultural Perspective**

Credits: 3
Examines aspects of the cultural transmission process in specific local cultures selected from various world culture regions, with emphasis on transmission of cultures.
Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 322 - Historical Archaeology

Credits: 3
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 324 - Warfare, Violence, and Sacrifice in Antiquity

Credits: 3
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice as a ritual practice.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 325 - Field Techniques in Archaeology

Credits: 3-6
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience.

Prerequisites
ANTH 120, 60 credits, or permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
ANTH 330 - Peoples and Cultures of Selected Regions: Non-Western

Credits: 3
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 331 - Refugees

Credits: 3
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees, and examining efforts on their behalf at national and international levels.

Satisfies General Education Requirement: Global understanding

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 332 - Cross-cultural perspectives on globalization

Credits: 3
Examines the varieties of cultural experience. Several cultures are studied in depth, with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography.

Satisfies General Education Requirement: Global understanding

Notes
For non-Western credit and credit toward BA in sociology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 340 - Comparative Perspectives on Immigration

Credits: 3
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host...
society.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 360 - Evolution, Sex, and Society**

Credits: 3
Inquiry into the biological dimensions of humans as culture-bearing animals. Topics include altruism, aggression, primate social organization, morphology, comparative ethnology, and microevolutionary genetic differentiation.

**Prerequisites**
ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 365 - Race and Racism**

Credits: 3
Examines biological dimensions of human variation, and the beginnings of race as a concept. Discusses evolution of human biodiversity in culturally distinct human groups related to environment, physiology, genetics, nutrition, and disease. Explores use of scientific analyses of human biodiversity.

**Prerequisites**
ANTH 135, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 370 - Environment and Culture**

Credits: 3
Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts.

**Prerequisites**
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ANTH 371 - Psychological Anthropology**
Credits: 3
Survey of issues in study of relationships between cultural and psychological variables. Major topics viewed cross-culturally include personality, mental illness, projective systems, cognition, and learning.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 375 - Culture, Power, History

Credits: 3
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 380 - Language and Culture

Credits: 3
Anthropological analyses of language behavior, origins, and change, emphasizing interplay of language, culture, anthropology, and linguistics.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 381 - Health, Healing, and Culture

Credits: 3
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 382 - Urban Anthropology
Uses tools and resources of social and cultural anthropology to study life in cities, including urban poverty, migration, urban planning, and discrimination. Case studies draw from different urban environments around the world, including Washington, D.C., and New York City.

**Prerequisites**
ANTH 114 and 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 385 - Gender, Class, and Ethnicity in Latin America

Credits: 3  
Examines bases for gender differences and similarities across a variety of societies and cultures in Latin America. Examines interrelationships among constructions of gender, class, and ethnicity.

Satisfies General Education Requirement: Global understanding

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 390 - Theories, Methods, and Issues I

Credits: 3  
First of a two-course sequence that reviews the major theoretical traditions and schools of thought in anthropology.

**Prerequisites**
ANTH 114 and 60 credits, or permission of instructor.

**Notes**
Required for anthropology majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 395 - Work, Technology, and Society: An IT Perspective

Credits: 3  
Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology.

Satisfies General Education Requirement: Information technology (IT, all)

**Prerequisites**
ANTH 114, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 396 - Issues in Anthropology: Social Sciences**

Credits: 3  
Topic of contemporary interest in anthropology, focusing on social science topics of interest.

Satisfies General Education Requirement: Social and behavioral science

**Notes**  
For non-Western credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer and Spring

**ANTH 398 - Study Abroad**

Credits: 1-6  
Field project or study abroad experience leading to the production of a written report

**Notes**  
May be repeated with permission of department for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1 to 6  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

**ANTH 399 - Issues in Anthropology**

Credits: 3  
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization.

**Prerequisites**  
ANTH 114 and 60 credits, or permission of instructor.

**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ANTH 400 - Engaging the World: Anthropological Perspectives

Credits: 3
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
ANTH 114, 60 credits, completion of all general education requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 410 - Research Design and Methods in Bioanthropology

Credits: 3
Research design in bioanthropology and archaeology. Topics include critique of case studies, framing problems, field strategies, measuring variables, sampling, analysis, and interpretation of results.

Prerequisites
60 credits and 6 credits of anthropology, including ANTH 120 or 135; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 420 - Interpretation in Archaeology

Credits: 3
Explores theoretical and methodological issues in archaeology. Considers patterns and contexts of archaeological remains, analytic problems, and interpretation of material culture.

Prerequisites
6 credits of anthropology including ANTH 120, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 425 - Public Archaeology

Credits: 3
Considers public significance of archaeology and anthropological contributions to public concerns such as antiquities legislation and cultural resource management.

Prerequisites
6 credits of anthropology including ANTH 120, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 427 - Historic Cemetery Survey

Credits: 4  
Explores demographic, stylistic, and religious aspects of historic cemeteries. Students learn to survey, record, and analyze gravestone data through field projects.

**Prerequisites**  
ANTH 120, or permission of instructor.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

### ANTH 428 - Patterns in Prehistory

Credits: 3  
Explores diversity of prehistoric cultures in light of major cultural development: hunting-gathering, agriculture, pastoralism, and complex societies.

**Prerequisites**  
60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 430 - Research Methods in Archaeology

Credits: 3  
Studies archaeological research process through discussions of current archaeological methodologies and student participation in designing and critiquing research projects.

**Prerequisites**  
ANTH 120, 60 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ANTH 435 - Special Projects: Archaeology and Biological Anthropology
ANTH 436 - Special Projects: Archaeology and Biological Anthropology

Credits: 1-3
Lab or field project leading to a written report of the research.

Prerequisites
ANTH 120 or 135, 60 credits, and permission of instructor.

Notes
Research and paper completed under instructor's guidance.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ANTH 440 - Public Anthropology: Seeking Solutions in the Public and Private Sectors

Credits: 3
Focuses on anthropologists' contributions to major policy issues in development agencies in the United States and abroad. Covers techniques that lead to prevention or management of social and cultural conflict.

Prerequisites
ANTH 114, 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 450 - Qualitative Methods: Nonstatistical Approaches in Culture and Social Research

Credits: 3
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application.

Prerequisites
60 credits and 6 credits of anthropology including ANTH 114, or permission of instructor.
ANTH 488 - Gender, Sexuality, and Culture

Credits: 3
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings.

Prerequisites
60 hours and ANTH 340 or permission of instructor.

ANTH 490 - Theories, Methods, and Issues II

Credits: 3
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology.

Prerequisites
60 credits and 9 credits of anthropology, or permission of instructor.

Notes
Required for anthropology majors and usually taken as a senior seminar.

ANTH 492 - Contemporary Controversies in Anthropology

Credits: 3
Examines recent important works, issues, and controversies in anthropology.

Prerequisites
60 credits and 9 credits of anthropology including ANTH 390, or permission of instructor.

ANTH 495 - Internship
Credits: 1-6
Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations.

**Prerequisites**
60 credits or permission of instructor.

**Notes**
May be repeated for a maximum of 6 credits. Students must complete 40 hours of work at the internship site for each credit.

**Hours of Lecture or Seminar per week:** 1 to 6
**Hours of Lab or Studio per week:** 0

---

**ANTH 496 - On Evolution**

Credits: 4
Considers evolution as biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory.

**Prerequisites**
60 credits and 9 credits of anthropology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 2

---

**ANTH 499 - Independent Research**

Credits: 1-12
Individual research on a topic to be organized in advance by student and instructor.

**Prerequisites**
60 credits, 9 credits of anthropology, or permission of instructor.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**ANTH 535 - Anthropology and the Human Condition: Seminar I**

Credits: 3
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir.

**Prerequisites**
Graduate standing or permission of instructor.
**ANTH 536 - Anthropology and the Human Condition: Seminar II**

Credits: 3  
Examines contemporary theorists of anthropology, covering ongoing debates over epistemology and the multiple strands that inform anthropological theory and practice.  

**Prerequisites**  
ANTH 535.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 555 - Policy and Culture**

Credits: 3  
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 568 - Human Origins**

Credits: 3  
Detailed survey of the genetic, morphological, and behavioral origins of hominids. Discusses current interpretations and debates.

**Prerequisites**  
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 576 - American Cultures**

Credits: 3  
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America.
Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 580 - Evolution and Human Ecology

Credits: 3
Examines complex relationships among human cultures, biocultural adaptation, and the natural world from an evolutionary perspective.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 600 - Anthropology and Museums

Credits: 3
Explores the changing relations between culture, indigenous groups, representation and knowledge by examining how meaning is created and conveyed in museums and exhibits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

ANTH 610 - Social Organization

Credits: 3
Detailed examination and re-evaluation of the basic concepts of kinship and social organization in light of contemporary anthropological concerns. Several classical and contemporary texts develop key issues of social organization. Review of traditional concepts of classical anthropology introduces discussion of the nature of the broad epistemological shift that occurred in the last quarter of the 20th century.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 614 - Ethnopsychology: Self, Subject, and Culture
The emerging field of ethnopsychology, in Catherine Lutz's words, is "concerned with the way in which people conceptualize, monitor, and discuss their own and other's mental and/or behavioral processes." Course examines roots of the ethnopsychological enterprise, reviews several recent approaches to the description and analysis of folk psychological material, and investigates the relationship between folk psychology and other aspects of social life.

**Prerequisites**
Graduate standing, or permission of instructor.

**Courses**

**ANTH 615 - Ritual and Power in Social Life**
Credits: 3
Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Drawing on a variety of theoretical orientations in the social sciences, including structuralism, semiotics, psychoanalysis, and performance theory, course investigates connections among religious thought, ritual practice, and political action.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 617 - Political Economy**
Credits: 3
Human societies have always engaged in complex political relations and economic exchanges. The cultural meanings people create are shaped by, and in turn shape, systems of power. Political economy is the attempt to understand the relationship between politics and economics, at the juncture of local meanings and global histories. Course reviews major works and models of political economy, especially as they relate to social and cultural analysis.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ANTH 620 - Theory: Archaeology and Biological Anthropology**
Credits: 3
Examines theoretical approaches in archaeology, paleoanthropology, and biological anthropology.

**Prerequisites**
Course in archaeology, or permission of instructor.
ANTH 625 - Research Design and Methods in Archaeology and Biological Anthropology

Credits: 3
Examines research strategies and methods in archaeology, paleoanthropology, and biological anthropology.

Prerequisites
Course in archaeology, or permission of instructor.

ANTH 631 - Refugees in the Contemporary World

Credits: 3
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement.

Prerequisites
Graduate standing.

ANTH 632 - International Migration in Comparative Perspective

Credits: 3
International migration in the contemporary world, focusing on the full range of economic, political, and social reasons for migration and the effects of different national policies on that process.

Prerequisites
Graduate standing or permission of instructor.

ANTH 635 - Regional Ethnography

Credits: 3
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes.
**Prerequisites**
Graduate standing, or permission of instructor.

**Notes**
May be repeated for credit when content differs.

**ANTH 640 - Applied Anthropology**

Credits: 3
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**ANTH 645 - Ethnography and Literature**

Credits: 3
Explores relations between ethnography and literature. Most anthropological knowledge is transmitted in written form through texts known as "ethnographies." Ethnographic techniques can be used in novels, travel literature, biography, and autobiography. Course explores these uses, alongside anthropological ethnographies, to arrive at a better understanding of ethnography: what constitutes it and how it is defined and practiced.

**Prerequisites**
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**ANTH 650 - Ethnographic Methods and Research Design**

Credits: 3
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting.

**Prerequisites**
Graduate standing, or permission of instructor.
ANTH 655 - Nationalism, Transnationalism, and States: Local and Global Perspectives

Credits: 3
Explores different approaches to understanding the interaction of nationalism, transnationalism, and states given the apparently simultaneous dissolution of demographic, economic and cultural borders, and modernist social science paradigms.

Prerequisites
Graduate standing, or permission of instructor.

ANTH 660 - Social Science and Critical Theory

Credits: 3
Surveys key ideas of the Frankfurt School and its legacies today, including the critique of ideology; aesthetic theory; instrumental rationality; and analyses of the state, culture, and society. Writings by members of the Frankfurt School draw on many philosophical and methodological strands: radical humanism, Marxist analysis, cultural criticism, psychoanalysis, and political sociology.

Prerequisites
Graduate standing, or permission of instructor.

ANTH 670 - Regional Studies in Archaeology

Credits: 3
Regional survey of specific culture area in archaeology to be chosen by student and instructor.

Prerequisites
Permission of instructor.

ANTH 675 - Laboratory Techniques

Credits: 4
Covers techniques of data collection, analysis, and management in archaeology and biological anthropology.
Prerequisites
Course in archaeology, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

ANTH 677 - Anthropology and History

Credits: 3
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 680 - Readings in Archaeology

Credits: 3
Directed readings and research on a specific topic in archaeology to be chosen by student and instructor.

Prerequisites
Permission of instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 682 - Readings in Biological Anthropology

Credits: 3
Directed readings and research on a specific topic in biological anthropology chosen by student and instructor.

Prerequisites
Permission of instructor.

Notes
May be repeated for maximum 6 credits.
ANTH 684 - Independent Study in Sociocultural Anthropology

Credits: 1-6
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project.

Notes
May be repeated for maximum of 6 credits.

ANTH 685 - Language and Culture

Credits: 3
Survey of research on the relationship between language and culture, and the many ways the study of language has enhanced understanding of the nature of culture. Course material drawn from anthropology's four traditional subdisciplines (cultural, linguistic, prehistoric archaeology, and physical), as well as neighboring fields such as sociolinguistics, psycholinguistics, literary theory, and ethnology.

Prerequisites
Graduate standing or permission of instructor.

ANTH 687 - Culture and Curing

Credits: 3
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations.

Prerequisites
Graduate standing, or permission of instructor.

ANTH 690 - Internship
Credits: 3-6
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site.

Prerequisites
Graduate standing in anthropology with 3 credits of methods and 12 credits in program, or with permission of primary advisor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ANTH 699 - Contemporary Issues in Sociocultural Anthropology

Credits: 3
Explores current issues and debates in sociocultural anthropology.

Prerequisites
Graduate standing, or permission of instructor.

Notes
Variable topics. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 710 - Contemporary Issues in Archaeology and Biological Anthropology

Credits: 3
Contemporary research developments and the ways in which various scientific disciplines and theoretical approaches are integrated in the study of biocultural evolution, adaptation, and diversity.

Prerequisites
ANTH 620 and 625, completion of 24 graduate credits, and approval of graduate advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ANTH 721 - Culture, Power, and Conflict

Credits: 3
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution.

Prerequisites
Graduate standing, or permission of instructor.
ANTH 750 - Ethnographic Genres

Credits: 3
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style.

Prerequisites
Graduate standing, or permission of instructor.

ANTH 769 - Gender, Sexuality, and Culture

Credits: 3
Utilizes interdisciplinary material within an overall anthropological perspective on body meanings and practices. Readings highlight questions of political economy and history, focusing on specific ethnographic or historical contexts, to develop an understanding of how gender, sexuality, race, and class become analytically distinct yet intertwined systems of meaning and practice.

Prerequisites
Graduate standing, or permission of instructor.

ANTH 797 - Anthropology Colloquium/Workshop

Credits: 0
Public forum for the presentation and discussion of contemporary anthropological research.

Prerequisites
Graduate standing in anthropology or permission of graduate director.

ANTH 798 - Thesis Proposal
Credits: 1-6
Work on research proposal that forms basis for master's thesis.

Prerequisites
Completion of 18 credits, including all core courses.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
When Offered: Fall, Summer, Spring

ANTH 799 - Master's Thesis

Credits: 1-6
Master's thesis research and writing under direction of thesis committee.

Prerequisites
Approval of thesis proposal.

Notes
Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Applied Information Technology

AIT 500 - Quantitative Foundations for Information Systems Analysis

Credits: 3
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics.

Prerequisites
MATH 108 or equivalent

Notes
Does not fulfill any VSITE graduate degree requirement.

Hours of Lecture or Seminar per week: 3
**AIT 504 - Issues of Cyberspace**

Credits: 3  
This seminar-style course presents students, grouped into panels, with major and novel problems presented by the explosive and intrusive growth of 'cyberspace.' Student panels explore, report on, and make recommendations regarding facets of these issues. Facets include legal, ethical, financial, security, utility and value to users and organizations, feasibility and desirability. Each semester features a major topic area.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AIT 521 - Software Engineering Essentials**

Credits: 3  
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program.

Equivalent to SWE 521

**Prerequisites**  
Graduate standing.

**Notes**  
This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

**AIT 524 - Database Management Essentials**

Credits: 3  
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab.

**Notes**  
This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

**AIT 590 - Topics in Applied Information Technology**
Credits: 3
Topics in the application of information technology. The topics are chosen in such a way that they do not duplicate existing AIT courses. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisites
Graduate standing and permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

**AIT 597 - Developing IT Leaders of Integrity**

Credits: 3
This course introduces students to the practice of leading with integrity. Through selected readings, discussions, team projects, in-class activities and guests, students identify their core values, study the attributes of effective and toxic leaders and, examine the difference between managing and leading. Students practice and receive in-class coaching to hone their leadership skills. The course considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisites
Registered student in MS, Applied IT or by Instructor's permission.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

**AIT 665 - Managing Information Technology Programs in the Federal Sector**

Credits: 3
This case study-grounded seminar introduces student team members to the unique complexities of the Federal Sector, including Congressional and Executive Branch oversight, reporting, justifying and sustaining annually very large IT programs. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

**AIT 685 - Capstone Seminar**

Credits: 3
This seminar is a student team-based experience grounded on a solid understanding of the coursework mastered in each of the program's three areas of study. Teams analyze business cases, facilitated by area faculty, of systems of system programs, "mega-systems", of the 20th century. Course cannot be used to satisfy course requirements for PhD IT students.

Prerequisites
Second Year standing in the MS, Applied IT Program; Permission of Instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

### AIT 690 - Advanced Topics in Applied Information Technology

Credits: 3  
Advanced topics in the application of information technology. The topics are chosen in such a way that they do not duplicate existing AIT courses. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Course cannot be used to satisfy course requirements for PhD IT students.

**Prerequisites**  
Graduate standing & permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Summer, Spring

### AIT 697 - Leading Organizations Through Change

Credits: 3  
This course introduces students who understand fundamentals of unit leadership to the critical tools for leading organizations through sustainable change. Through selected readings, discussions, team projects, in-class activities and guests, students learn how to prepare the organization, plan the details, execute a change process across an organization and measure the plan’s effectiveness and the change it brings to achieve continuous improvement. Students practice and receive in-class coaching to hone their leadership skills.

**Prerequisites**  
Graduate Standing in MS, AIT program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

### Arabic

### ARAB 101 - Introduction to the Arabic Language

Credits: 3

Introduction to Arabic language, dialects, countries, and culture. Beginning modern standard and classical Arabic, with emphasis on the written language, script and phonology. Basic grammar covering gender, numbers, cases, prepositions, nominal sentences, and basic conversation and greetings.
Notes
Students may not receive credit for ARAB 101 and ARAB 110.

Hours of Lecture or Seminar per week: 3

ARAB 102 - Introduction to the Arabic Language

Credits: 3
Introduction to developing reading skills in formal settings. Emphasizes modern standard Arabic in oral communication. Beginning grammar level focuses on verbal sentences, present tenses, questions, and compound nouns.

Prerequisites
ARAB 101.

Notes
Students may not receive credit for ARAB 102 and ARAB 110.

Hours of Lecture or Seminar per week: 3

ARAB 110 - Elementary Arabic

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Students may not receive credit for ARAB 110 and ARAB 101 or ARAB 102.

Hours of Lecture or Seminar per week: 6

ARAB 201 - Intermediate Arabic I

Credits: 3
Further development of listening, speaking, reading, and writing skills. Advanced level of vocabulary. Grammar covers past tenses, subordinated conjunctions, and introduction to passive voice.

Prerequisites
ARAB 102 or equivalent.

Notes
Also introduces Arabic dictionary. Students may not receive credit for ARAB 201 and ARAB 210.

Hours of Lecture or Seminar per week: 3
ARAB 202 - Intermediate Arabic II

Credits: 3
Emphasis on application of language skills to reading, composition, and discussion. Focuses on language structure, format of developing vocabulary from verbs, covering different derivations, and language patterns. Leads to learning the use of Arabic dictionary in depth. Grammar covers passive voice and verbal nouns.

Prerequisites
ARAB 201

Notes
Students may not receive credit for ARAB 202 and ARAB 210.

Hours of Lecture or Seminar per week: 3

ARAB 210 - Intermediate Arabic

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Arabic-speaking regions.

Prerequisites
ARAB 110 or appropriate placement score.

Notes
Students may not receive credit for ARAB 210 and ARAB 201 or ARAB 202.

Hours of Lecture or Seminar per week: 3

ARAB 250 - Gateway to Advanced Arabic

Credits: 3
Integration of advanced intermediate-level Arabic reading, writing, listening, and speaking skills and the development of critical thinking and understanding authentic texts from the Arabic world.

Prerequisites
ARAB 210, appropriate placement score, or permission of department.

Notes
Taught in Arabic.

Hours of Lecture or Seminar per week: 3

ARAB 325 - Major Arab Writers/Stories
Credits: 3
Studies works of major Arab writers or collections such as *The Arabian Nights*.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101 or permission of instructor

**Notes**
Writers and tales to be studied vary. Course work in English; knowledge of Arabic language helpful but not required. May be repeated once for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARAB 330 - Reading and Conversation I**

Credits: 3  
Development of conversational fluency and reading skills in modern standard Arabic through class discussion, reports, and presentations. Includes readings from newspapers, journals, magazines, web sites, literary works, and other sources.

**Prerequisites**
ARAB 250, appropriate placement score, or permission of instructor.

**Notes**
Taught in Arabic. ARAB 330 and 331 must be taken in sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARAB 331 - Reading and Conversation II**

Credits: 3  
Continuation of ARAB 330.

**Prerequisites**
ARAB 250 (or equivalent), appropriate placement score, or permission of instructor.

**Notes**
Taught in Arabic.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARAB 380 - Arabic Dialects**
Credits: 3
Study of the structure of one Arabic dialect with comparison to Modern Standard Arabic and the classical Fus-ha. Includes study of literature, proverbs, and culture associated with that dialect.

**Prerequisites**
ARAB 250 or appropriate placement score.

**Notes**
A special topics course that may be repeated once for credit when a different dialect is covered.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Art History**

Students taking ARTH courses should expect to participate in field trips or assignments outside the classroom at area museums.

*At least one 400- or 500-level course is offered each semester; each topic area is generally offered every two years.*

---

**ARTH 101 - Introduction to the Visual Arts**

Credits: 3  
Introduction to the content and principles of the visual arts. Approach varies with instructor.

Satisfies General Education Requirement: Arts

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 102 - Symbols and Stories in Art**

Credits: 3  
Themes and imagery in art from early Greece to the modern era.

Satisfies General Education Requirement: Arts

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 103 - Introduction to Architecture**

Credits: 3  
Introduces study, principle, and understanding of art of architecture. Approach varies with instructor; may be historical, geographical, technical, or thematic.
Satisfies General Education Requirement: Arts

Notes
Field trips required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 150 - Freshman Seminar

Credits: 3
Focuses on skills and methods of learning as well as subject matter as a way of introducing the discipline of art history.

Prerequisites
Freshman standing.

Notes
Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 200 - Survey of Western Art

Credits: 3
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers prehistory, the ancient world, and the Middle Ages.

Satisfies General Education Requirement: Arts

Notes
Designed as a two-course sequence, but each part may be taken independently without prerequisite.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 201 - Survey of Western Art

Credits: 3
Major periods, monuments, and themes of Western art and architecture. Introduces Washington, D.C., museum collections and a historical framework for further study in art history. Covers the art of the Renaissance, the baroque period, and modern Europe and the Americas.

Satisfies General Education Requirement: Arts

Notes
Designed as a two-course sequence, but each part may be taken independently without prerequisite.
ARTH 203 - Survey of Asian Art

Credits: 3
Introduces arts of South, Southeast, and East Asia. Examines aspects of culture and history of Asia. Discusses monuments and artifacts in a variety of media and their relation to social and historical contexts.

Satisfies General Education Requirement: Arts

Notes
For non-Western credit.

ARTH 204 - Survey of Latin American Art

Credits: 3
Introduces arts of Latin America from pre-Columbian to modern era. Discusses important examples of painting, sculpture, and architecture in relation to culture and history of region.

Satisfies General Education Requirement: Arts

Notes
For non-Western credit. Each 300-level course is generally offered once every two years.

ARTH 303 - National Traditions

Credits: 1-3
Studies traditions of art and architecture within a single selected country or historical region.

Prerequisites
24 credits or permission of instructor.

Notes
Topic varies. May be repeated for credit with different course content.
ARTH 311 - Design of Cities

Credits: 3
Explores problems in urban design in a particular geographical region or historical period. Approach varies with instructor, and may involve archaeological or theoretical approaches appropriate to the specific context.

Prerequisites
24 credits.

Notes
May be repeated when course content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 315 - Modern Architecture

Credits: 3
Studies in modern architecture from the Beaux Arts movement to the present; an investigation of stylistic, structural, or theoretical innovations.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 319 - Art and Archaeology of the Ancient Near East

Credits: 3
Aspects of the art, archaeology, and culture of ancient Near East and Bronze Age Mediterranean. Approach varies depending on instructor; emphasis may be on Mesopotamia, Iran, Egypt, Anatolia, the Levant, or the Aegean.

Satisfies General Education Requirement: Global understanding

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 320 - Art of the Islamic World
Credits: 3
Introduction to Islamic art, from the time of Muhammad to present. Cultural and regional approach, utilizing local museum collections.

Satisfies General Education Requirement: Global understanding

Prerequisites
Completion of 24 hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 321 - Greek Art and Archaeology

Credits: 3
History of ancient Greek architecture, sculpture, and painting.

Satisfies General Education Requirement: Arts

Prerequisites
Completion of 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 322 - Roman Art and Archaeology

Credits: 3
History of Roman architecture, sculpture, and painting.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 324 - From Alexander the Great to Cleopatra: The Hellenistic World

Credits: 3
Arts of the Hellenistic age within the context of history and culture of the period. Explores the powerful dynasties ruling wealthy empires; achievements in learning and literature housed in the Great Library at Alexandria; baroque sculpture adorning the Altar of Zeus at Pergamon; and Roman collectors of Greek art and antiques.

Satisfies General Education Requirement: Arts
Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 333 - Early Christian and Byzantine Art**

Credits: 3
Aspects of medieval art and culture in eastern Mediterranean world. Topics may include late antiquity, early Christianity, and the Byzantine empire and its neighbors. Designed to take advantage of unique local museum resources.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits.

Notes
Specific focus varies with instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 334 - Western Medieval Art**

Credits: 3
Aspects of art and architecture in medieval Europe, from the fall of the Roman Empire through the Gothic period.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits.

Notes
Specific focus may vary with instructor. May be repeated when course content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 340 - Early Renaissance Art in Italy, 1300-1500**

Credits: 3
Studies in architecture, sculpture, and painting in the age of Giotto, Ghiberti, Masaccio, and Botticelli.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 341 - Northern Renaissance Art**

Credits: 3  
Studies in the art of France, Germany, and the Netherlands in the age of Van Eyck and Dürer.

Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 342 - High Renaissance Art in Italy, 1480–1570**

Credits: 3

Studies in architecture, sculpture, and painting in the age of Leonardo, Michelangelo, Raphael, and Titian.

Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 344 - Baroque Art in Italy, France, and Spain, 1600–1750**

Credits: 3

Studies in architecture, sculpture, and painting in the age of Caravaggio, Bernini, Velazquez, and Poussin.

Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ARTH 345 - Northern Baroque Art, 1600-1750

Credits: 3
Studies in architecture, sculpture, and painting in the age of Rubens, Van Dyck, Rembrandt, and Vermeer.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 350 - History of Photography

Credits: 3
Development of photography from origins in France in the 19th century to the present.

Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 359 - Art of the 18th and 19th Centuries

Credits: 3
Introduction to the art and architecture of the 18th and 19th centuries. Topics focus on specific art forms, media, geographic regions, or the thematic categories.

Prerequisites
24 credits.

Notes
May be repeated once for credit when topic differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 360 - Nineteenth-Century European Art

Credits: 3
Movements from neoclassicism to symbolism discussed in relation to social, cultural, political, and technological changes in Europe.
Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 362 - Twentieth-Century European Art**

Credits: 3  
Study of major movements (fauvism, cubism, futurism, constructivism, surrealism, and expressionism) and important artists in 20th-century painting and sculpture.

Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

**Notes**
Focus may vary.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 371 - American Architecture and Material Culture**

Credits: 3  
Studies in the history of American architecture or decorative arts in cultural context. Topics range from 17th century to 20th century, depending on instructor.

**Prerequisites**
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 372 - Studies in 18th- and 19th-Century Art of the United States**

Credits: 3  
Developments in visual culture and the changing status of art practitioners throughout these periods. Focus is either chronological (Colonial Period, Gilded Age) or thematic (19th-century genre scenes, the American landscape and national identity).

Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

Notes
May be repeated once for credit with different topic. Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 373 - Studies in 20th-Century Art of the United States

Credits: 3
Developments in 20th-century American visual culture across all media.

Satisfies General Education Requirement: Arts

Prerequisites
24 credits

Notes
Focus may vary (postwar American "realisms," women artists, and feminist art). May be repeated once for credit with different topic. Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 374 - Art Now

Credits: 3
Explores visual art production since 1980, drawing on regional resources. Examines social, institutional, and political issues in recent art and its markets.

Prerequisites
Any course in art history or art studio, or permission of instructor.

Notes
Requires students to work collaboratively and make several field trips, including one Saturday bus trip to New York. Specific topics and assignments vary with the changing art season and instructor. Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 376 - Twentieth-Century Latin American Art

Credits: 3
Major movements and important artists in 20th-century Latin American art discussed in relation to social, cultural, and political conditions in the region.
Satisfies General Education Requirement: Arts

**Prerequisites**
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 380 - African Art**

Credits: 3  
Focuses on sub-Saharan African art in terms of styles and aesthetics; materials and techniques; and geographical, social, cultural, and religious contexts.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
24 credits.

**Notes**
For non-Western credit. Specific focus may vary with instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 382 - Arts of India**

Credits: 3  
History, culture, and arts of south Asia from earliest civilizations along the Indus River to onset of Western colonialism. Emphasizes role of material evidence in the creation of the South Asian history and how political, social, and religious developments affected the arts. Discusses monuments and artifacts in a variety of media in relation to historical contexts.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
24 credits.

**Notes**
For non-Western credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 383 - Arts of Southeast Asia**
Credits: 3
Examines various cultural and artistic traditions of ancient Southeast Asia, from the earliest archaeological evidence to onset of colonialism. Lectures and discussions focus on material culture of the great civilizations that arose within borders of modern Thailand, Cambodia, Indonesia, Burma (Myanmar), Vietnam, Laos, and Malaysia.

Satisfies General Education Requirement: Global understanding

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 384 - Arts of China**

Credits: 3
Explores the complex and dynamic history of China by examining ways in which social, religious, and political shifts have given rise to new and variant forms of material culture.

Satisfies General Education Requirement: Global understanding

Prerequisites
24 credits.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ARTH 385 - Arts of Japan**

Credits: 3
Art and architecture of Japan, with particular attention to the ways political changes, religious movements, and social developments influenced and shaped those creations. Discusses monuments and artifacts in a variety of media in relation to social and historical contexts.

Satisfies General Education Requirement: Global understanding

Prerequisites
24 credits.

Notes
For non-Western credit.
**ARTH 386 - The Silk Road**

Credits: 3  
Explores luxury arts and material culture of Eurasian trade routes between Mediterranean and China in historical, religious, and social contexts. Emphasizes cultural interactions in medieval Central Asia.

Satisfies General Education Requirement: Global understanding

**Prerequisites**  
24 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ARTH 393 - Art History Internships**

Credits: 3-6  
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

**Prerequisites**  
Art history major or minor, and permission of instructor.

**Notes**  
Strongly recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**ARTH 394 - The Museum**

Credits: 3  
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations; focus varies with instructor.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
6 credits in art history at the 300-level, and completion or concurrent enrollment in all other required general education courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ARTH 399 - Special Topics in the History of Art

Credits: 3
Topics vary.

Notes
At least one 400- or 500-level course is offered each semester; each topic area is generally offered every two years.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 400 - Historiography and Methods of Research in Art History

Credits: 3
Historical investigation of theories, methods, and critiques involved in the discipline of art history. Approach or focus may vary with instructor.

Prerequisites
ENGL 302, and 6 credits in art history at the 300 level; or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 420 - Advanced Studies in Ancient Art

Credits: 3
Studies a particular area of ancient art of the Mediterranean, Near East, or Middle East. Topics may be art form or medium, geographical area, theme, function, or context.

Prerequisites
ENGL 302, and 300-level course in ancient art; or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 430 - Advanced Studies in Medieval or Islamic Art
Credits: 3
Studies a single topic in medieval or Islamic art. May focus on a particular period, region, or medium, or may explore cultural interconnections within medieval Eurasian world.

Prerequisites
ENGL 302, and a 300-level course in medieval or Islamic art; or permission of instructor.

Notes
May be repeated for credit.

ARTH 440 - Advanced Studies in Renaissance and Baroque Art

Credits: 3
Studies a particular aspect of Renaissance or baroque art. Topics may be monographic, thematic, or concentrated on the art of a smaller time period or a particular area.

Prerequisites
ENGL 302, and 300-level course in Renaissance or baroque art; or permission of instructor.

Notes
May be repeated for credit.

ARTH 460 - Advanced Studies in 20th-Century European Art

Credits: 3
Study of a particular topic in 20th-century European art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Prerequisites
ENGL 302 and 300-level course in the art of 19th- or 20th-century Europe or the Americas; or permission of instructor.

Notes
May be repeated for credit.

ARTH 471 - Advanced Studies in Art of the United States

Credits: 3
Studies a particular area of American art, focusing on a form, such as landscape or genre painting; theme, such as nationalism, regionalism, or iconography of the family; or movement, such as American modernism.

Prerequisites
ENGL 302 and 300-level course in American art

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 472 - Advanced Studies in 20th-Century Latin American Art

Credits: 3
Study of a particular topic in 20th-century Latin American art. Course may focus on a specific period, region, movement, medium, or theoretical issue, or explore cultural connections and transfer between regions.

Prerequisites
ENGL 302 and 300 level course in 19th- or 20th-century art of Europe or the Americas, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 474 - Advanced Studies in Contemporary Art

Credits: 3
Study of a topic in contemporary art in a research seminar setting. Focus on particular theme, region, artist, or medium, or take a comparative approach.

Prerequisites
ENGL 302 and 300-level course work in modern or contemporary art, or permission of the instructor.

Notes
Content varies; course may be repeated once for credit if topic varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 482 - Advanced Studies in Asian Art

Credits: 3
Seminar-style discussions on a specific topic in Asian art. May focus on the art of a particular period, movement, reign, or region, as well as theoretical issues or works in a particular medium.

Prerequisites
ENGL 302, and 300-level course in any area of Asian art; or permission of instructor.

Notes
For non-Western credit. Content varies; course may be repeated for credit.
ARTh 490 - Independent Study in Art History

Credits: 3
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Study proposal submitted before registration.

Prerequisites
60 credits, ENGL 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201.

ARTh 491 - Independent Study in Art History

Credits: 3
Intensive study of a particular artist, period, or theoretical problem to be conducted by an individual student in consultation with instructor. Study proposal submitted before registration.

Prerequisites
60 credits, ENGL 302, permission of instructor and chair, plus 9 credits in art history beyond ARTH 200, 201.

ARTh 492 - Honors Directed Readings, Honors Directed Research

Credits: 3
Linked individualized courses, usually given by same instructor. Involves directed readings.

Prerequisites
Admission to art history honors program, ENGL 302, and permission of instructor.

Notes
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

ARTh 493 - Honors Directed Readings, Honors Directed Research
Credits: 3
Linked individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

Prerequisites
Admission to art history honors program, ENGL 302, and permission of instructor

Notes
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses. The 3 credits of readings should be taken before the 3 research credits, or they may be taken concurrently.

Hours of Lecture or Seminar per week: 0

ARTH 499 - Advanced Studies in Art History

Credits: 3
Seminar-style discussion on specific subjects in art history.

Prerequisites
ENGL 302 and 300-level course, or permission of instructor.

Notes
For non-Western credit. Topics may vary. May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ARTH 593 - Art History Internships

Credits: 3-6
Internship with a professional arts institution, organization, or individual in the Washington, D.C., area. Project to be arranged by student in consultation with faculty instructor and field supervisor.

Prerequisites
Baccalaureate degree or equivalent, or permission of instructor.

Notes
Recommended for advanced art history students seeking exposure to professional work in visual arts. May be taken for 3 to 6 credits, or repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ARTH 594 - The Museum

Credits: 3
Examines history, theory, practice, ethics, and current problems of collecting and displaying art and artifacts to the public. Emphasizes issues central to museums in Washington, D.C., or museums in other locations.
**Prerequisites**
Baccalaureate degree or equivalent, or permission of instructor.

**Notes**
Specific focus may vary with instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 596 - Independent Study**

Credits: 1-3  
Independent reading and research on specific project under direction of department member.

**Prerequisites**
Baccalaureate degree or equivalent, or permission of instructor.

**Notes**
Written report is required. May be repeated for credit.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**ARTH 599 - Special Topics in the History of Art**

Credits: 1-6  
Topics vary.

**Prerequisites**
Baccalaureate degree or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ARTH 600 - Methods and Research in Art History**

Credits: 3  
Investigates theories, methods, and research strategies in discipline of art history. Designed for first-semester students in art history MA program; foundation for further graduate-level work in the program.

**Prerequisites**
Admission to the art history MA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**ARTH 696 - Independent Directed Readings**

Credits: 3  
Designed to prepare students for comprehensive exams by integrating past work and filling gaps in expected knowledge before the exam.  

**Prerequisites**  
Admission to art history MA program, and permission of instructor.  

**Notes**  
Taken in final semester of art history MA.  

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**ARTH 699 - Topics in Art History**

Credits: 3  
Research seminar on aspects of art history. Topics vary, but course entails extensive critical readings and discussion, development of bibliographies, and advanced-level research papers.  

**Prerequisites**  
Graduate standing.  

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Art and Visual Technology**

**AVT 101 - New Majors Colloquium**

Credits: 1  
Provides a common core experience of contemporary perspectives on the broad range of professional career options open to studio art majors. Lectures address practical concerns but emphasize social, ethical, and philosophical aspects of visual arts professions.  

**Notes**  
Required of all AVT majors. May be taken prior to declaring the major or during the first semester as a declared AVT major.  

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0
AVT 103 - Introduction to the Artist's Studio

Credits: 3
Through projects, readings, class critiques, visuals, and field trips, students explore materials, techniques, concepts, and processes essential to understanding the language of visual arts and the artist's role. Develops imaginative thinking and sensitivity to visual environment.

Satisfies General Education Requirement: Arts

Notes
For non-majors only.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

AVT 104 - Studio Fundamentals I

Credits: 4
Explores elements and principles of two-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects build fundamental knowledge, skills, understanding of precedents, and contemporary practices in visual arts.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 105 - Studio Fundamentals II

Credits: 4
Explores elements and principles of three-dimensional design, establishment of visual vocabulary, and critical analysis that supports conceptual development. Studio projects explore form and composition, time-based media, materials, precedents, and contemporary practices in visual arts.

Prerequisites
AVT 104 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 180 - Computers in the Creative Arts

Credits: 3
Introduces computing from artist's perspective. Emphasizes computer use for artistic creation and research. Overview of hardware, software, operating systems, peripherals, two-dimensional graphics, and web design.
Satisfies General Education Requirement: Information technology (IT, all except ethics)

**AVT 204 - Visual Thinking**

Credits: 3
Explores the ways contemporary artists use principles of design and perception to challenge how we see our world physiologically, psychologically, or socially. Examples drawn from film, photography, new media art, and other contemporary artistic media.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 2

**AVT 206 - Color**

Credits: 4
Color theory and principles of color interaction, including additive, subtractive, and partitive color experience; study of harmony, contrast, focus, space, opacity, transparency, temperature and value in both wet and dry media; and related applications of color technology.

**Prerequisites**
AVT 104 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**AVT 215 - Typography**

Credits: 4
Introduction to history and use of type. Reading and projects develop awareness of type as a linguistic and visual communication tool. Introduces typographic design elements, including color, hierarchy, integration with imagery, structure, and content.

Satisfies General Education Requirement: Arts

**Prerequisites**
AVT 104 and 180, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**AVT 222 - Drawing I**
Credits: 4
Introduction and exploration of the fundamentals of drawing methods and materials, with emphasis on observational study and
critical analysis of the effective and expressive use of line, mass, value, perspective, and formal composition. Emphasis on
problems involved in representational and abstract visual interpretations of forms.

Satisfies General Education Requirement: Arts

Notes
AVT majors encouraged to take AVT 222 with AVT 104.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 232 - Painting I

Credits: 4
Introduction to the basic methods and principles of painting with a focus on observation, paint application, formal composition,
color mixing, and the articulation of form. Students develop a visual awareness as they become familiar with the language of
image making, construction, analysis, and awareness. Students prepare portfolios for collaborative and reflective critique.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 243 - Printmaking I

Credits: 4
Introduction to basics of hand printing. Emphasis on translation and transferal of images, tools, equipment, and technical skills
for making a well-defined print. Students explore drawing, synthesis, and multiplicity in this interactive and collaborative course.
Presentations and field trips focus on aesthetic and cultural concerns of making multiple images.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 252 - Fundamentals of Photography

Credits: 4
Introduces basic principles and aesthetics of photography, 35-mm camera operation, and darkroom practices, including film
processing and print development.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 253 - Introduction to Digital Photography

Credits: 4
Introduction to the digital camera as a tool for electronic photographic image making. Students will be introduced to principles and exploration of the aesthetics of digital photography and also learn basic image-editing skills in a computer environment.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 262 - Sculpture I

Credits: 4
Projects in sculpture that emphasizes contemporary theory and issues, the development of individual concepts, and creative solutions. Explores the application of materials, tools, and imaginative processes. Faculty demonstrations, lectures, gallery and museum visits, and regular student work critiques.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 272 - Interdisciplinary Arts

Credits: 4
Introduces contemporary interdisciplinary art practice through readings and studio projects in performance and installation. Provides students with opportunities to deepen understanding of conceptual art, nontraditional media practices, and collaborative practice in visual arts.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 2

AVT 280 - Introduction to Digital Arts

Credits: 4
Investigates ways in which contemporary artists employ tools of digital culture. Students create meaningful works of art that demonstrate conceptual awareness and technical skill.

Prerequisites
AVT 104 and 180, or permission of instructor.
AVT 300 - Artsbus Attendance

Credits: 0
Students travel to New York or other destinations aboard the AVT Artsbus to attend faculty-selected exhibitions.

Notes
AVT majors must satisfactorily complete course once for each semester they are enrolled as majors, up to five times. Repeatable up to three times per semester.

AVT 301 - Visual Voices Colloquium

Credits: 1
Students attend AVT Visual Voices lecture series during the semester and complete assignments related to the topics covered.

Notes
AVT majors must accumulate at least 3 credits in this colloquium to graduate. May be repeated each semester up to a total of 8 credits.

AVT 305 - Creative Processes

Credits: 3
Study of the creative process in general, with emphasis on the inspiration, working methods, and final creations of various artists. Students explore their own creative processes through journal keeping, collaborative exercises, and projects.

AVT 307 - Aesthetics

Credits: 3
Interdisciplinary course examines broad range of contemporary art and culture to engage an expansive conception of aesthetic experience. Students engage with historical and contemporary aesthetic theories, build heightened aesthetic sensibility, and explore their personal aesthetic.
**AVT 309 - Art as Social Action**

Credits: 3  
Interdisciplinary exploration of work by citizen-artists whose art-making engages the social world. Students learn about the history of socially engaged art-making and experiment with individual and collaborative projects addressing social issues.

**AVT 311 - Graphic Design Methods and Principles**

Credits: 4  
Emphasis on developing design solutions requiring demographic, historical, and/or cultural research. Course strengthens design and typography skills, introduces conceptual problem solving, audience considerations, and broad-based tools designers use to develop effective visual communication solutions.

**Prerequisites**  
AVT 215 or permission of instructor.

**AVT 313 - Editorial Design**

Credits: 4  
Development and production of long-form design projects (magazines, newspapers, catalogs, and other serial and/or multipage publications). Emphasis on narrative, consistency, structure, clarity. Addresses information design issues, and reinforces conceptual skills and integration of imagery and text.

**Prerequisites**  
AVT 311 or permission of instructor.

**AVT 323 - Drawing II**

Credits: 4  
Students develop observational, sketching, and rendering skills. Introduction to a range of materials, methods, formal concepts, drawing in series, and critique vocabulary.
Prerequisites
AVT 222 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 324 - Figure Drawing

Credits: 4
Drawing with an emphasis on the observational study of the human body. Human anatomy and proportion are examined through a series of methodological approaches, including gesture, contour, mass, and modeling.

Prerequisites
AVT 222 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 326 - Nontraditional Approaches to Drawing

Credits: 4
Encourages students to challenge some traditional approaches to drawing by creating innovative works that combine familiar drawing techniques with a variety of materials, approaches, and unusual formats.

Prerequisites
AVT 222 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 333 - Painting II

Credits: 4
Focuses on the development of formal and technical skills, with an emphasis on paint application, color interaction, and support building and preparation. Introduces concepts, methodologies, and approaches relevant to contemporary painting.

Prerequisites
AVT 232 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 336 - Experimental Painting
Using contemporary painting practices as starting place, students explore a variety of experimental and conceptual approaches to painting.

**Prerequisites**
AVT 232 or permission of instructor.

**AVT 337 - Figurative Painting**

Credits: 4
Working primarily with live models, students explore the human form as the main subject for a variety of visual and expressive inquiries.

**Prerequisites**
AVT 232 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 343 - Printmaking II**

Credits: 4
An introduction to relief, screenprint, and intaglio printing, including the study of historical antecedents and their relevancy to contemporary printmaking. Students learn reductive and additive techniques in preparing printing surfaces.

**Prerequisites**
AVT 243 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 345 - Artists' Books as Visual Language**

Credits: 4
Introduces the artist's book as both physical structure and creative association of words and images. Students learn techniques of bookmaking, binding, and traditional and digital printmaking to produce an artist-made book with narrative and sequential elements.

**Prerequisites**
AVT 180 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4
AVT 346 - Digital Printmaking

Credits: 4
A beginning course in hand printing digitally processed images. Projects focus on electronic means of creating and manipulating imagery. Students achieve skills in multiple steps and incremental development required in making prints.

Prerequisites
AVT 180 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 353 - Traditional Photo Methods

Credits: 4
Continuation of Fundamentals of Photography with further investigation into the aesthetics of photography through experimentation with new camera formats, films, papers, developers and development of a photographic portfolio.

Prerequisites
AVT 252 or permission of instructor.

Notes
Continuation of Photography I.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 354 - Digital Photo Techniques

Credits: 4
A computer-intensive class in which students create digital images from the viewpoint of a photographic artist. Emphasis on digital photo techniques, including making digital negatives, concept development, and visual aesthetics.

Prerequisites
AVT 253 and 180, or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 355 - Color Photo Methods

Credits: 4
Introduces basic concepts, theories, histories, contemporary materials, and processes of color photography with focus on creative photographic expression and technique. Combines lecture, studio, and darkroom time to expand students’ photographic repertoire.
through work with both film and digital materials.

**Prerequisites**
AVT 353 or 356 or permission of the instructor.

**When Offered:** Fall

**AVT 356 - Fundamentals of Studio Lighting**

Credits: 4
Introduces theory, concepts, and applications of photographic studio lighting using both artificial and natural light sources with an emphasis on the ability to control and manipulate light.

**Prerequisites**
AVT 353 or AVT 354 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**AVT 363 - Sculpture II**

Credits: 4
Expands on the principles and processes introduced in Sculpture I, developing a higher level of technical competence and critical sophistication.

**Prerequisites**
AVT 262 or permission of instructor.

**Notes**
Lectures, independent student research, and gallery and museum visits required. Vigorous critiques.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**AVT 370 - Entrepreneurship in the Arts**

Credits: 4
Combined lecture and studio course in developing entrepreneurial skills in arts. Special focus on developing communication skills and planning strategies, as well as on nurturing skills that enable students to creatively solve problems and think about opportunities.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**AVT 371 - Visual Perception and the Arts**
Credits: 3
Review of major approaches to the study of visual perception. Topics include analysis of picture perception, visual thinking, the relationship between symbolic and non-symbolic thinking and representation, and how pathologies of vision affect art production.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**AVT 372 - Hip Hop Culture**

Credits: 3
Examines hip hop as an art form within a continuum of cultural expression. Explores multilayered social, political, and aesthetic aspects of hip hop, historical causes and precedents, and contemporary derivatives and implications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**AVT 373 - Performance Studio**

Credits: 4
Studio course focused on theory and practice of collaborative performance art. Detailed analysis of creation and production processes from interdisciplinary perspective in conjunction with practical training in multimedia technologies, body sculpture, and theater of images.

**Prerequisites**
AVT 272 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

**AVT 374 - Sound and Vision**

Credits: 4
Explores the function and use of sound in conjunction with time-based media and installation. Students learn digital tools for selection, editing, processing, and integration of sound and music (postproduction) into video, animation, and installation projects.

**Prerequisites**
AVT 180 or 280, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

**AVT 376 - Live Movies**
Advanced performance studio emphasizing cinematic forms and multimedia technologies. Also covers sound design, scenic design and materials, production planning, and interdisciplinary approaches to narrative and content in performance.

Prerequisites
AVT 272 or permission of instructor.

Notes
Students collaborate on production projects.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 377 - Cyberpunk

Credits: 4
Traces the ways that cinema, music, fiction, cultural theory, visual art, television, theater, and performance have embraced and been shaped by cyberpunk and cybertulture. Includes readings, writings, discussion, screenings, guest speakers, and research projects.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

AVT 378 - The African American Experience in the Performing Arts

Credits: 3
Through lectures, slides, audio recordings, videos, and films, students examine African American contributions to cultural fabric of American forms and institutions. Artistic contributions examined in aesthetic, political, historical, and social contexts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 382 - Digital Art and Animation

Credits: 4
Introduces conceptual, technical, and aesthetic practices of two-dimensional computer animation. Students learn to animate hand-drawn and computer-generated images. Students work to develop and create an imaginative and meaningful short animation with sound.

Prerequisites
AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 383 - Three-Dimensional Digital Art

Credits: 4
Students create thoughtful and imaginative, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. These scenes serve as environments for short animations. Emphasis on idea generation, contemporary practices, visual aesthetics, and technique.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 390 - Digital Media and Video Art

Credits: 4
Integrates study of contemporary art theory, montage theory, and artistic practices with application to new media and technology. Special focus on video, visual digital, video art, sound design, and the sociopolitical implications of digital work.

Prerequisites
AVT 280 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 392 - Gallery Practices

Credits: 4
Introduction to practices of the contemporary art gallery, including curatorship, exhibition planning and installation, care and proper handling of artwork, technology in the gallery, collaborating with outside curators, documentation, budget, publicity, and educational and docent activities.

Prerequisites
3 credits of AVT or ARTH, junior standing, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 393 - Field Experience in the Arts

Credits: 1-6
Introductory working and learning experience with an organization or individual in the arts, or as a teaching assistant.

Prerequisites
Junior standing and permission of instructor and academic advisor.
Notes
Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

AVT 394 - Honors Seminar

Credits: 1
Offers highly motivated students opportunities to interact with art world professionals through field trips, research, critiques, and creative assignments.

Prerequisites
By invitation to qualified honors students.

Notes
Students accrue credits toward graduation with AVT honors. Repeatable for up to 8 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 395 - Writing for Artists

Credits: 3
Practical writing seminar in which students practice typical writing needs of creative professionals, including artist's statements, grant proposals, and reviews, while also exploring ways in which artists have used writing, books, and language in art making.

Prerequisites
ENGL 302 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 414 - Corporate Design and Branding

Credits: 4
Fundamentals of branding and identity design. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphics standards guide.

Prerequisites
AVT 252 or 253, AVT 311, and AVT 395 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4
AVT 415 - Web Design and Usability

Credits: 4
Introduces students to web design, usability, and the use of popular applications for static, interactive, and motion-based web development.

Prerequisites
AVT 252 or 253, AVT 311, and AVT 395 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 418 - History of Graphic Design

Credits: 3
Survey of design history. Looks at print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AVT 419 - Topics in Graphic Design

Credits: 1-6
Rotating subjects give students a deep look into and appreciation of a specific topic in design practice.

Prerequisites
AVT 311 and AVT 313 or 414.

Notes
Topics and credit vary with instructor. May be repeated when taken under different topics.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0-6

AVT 422 - Drawing III

Credits: 4
Builds on intermediate drawing skills, emphasizing individual exploration and expressive techniques. Along with rigorous observational study, students work from a variety of sources to develop a broad understanding of visual solutions within contemporary art practice.

Prerequisites
AVT 323 or permission of instructor.
AVT 423 - Drawing IV

Credits: 4
Students learn and practice advanced drawing skills and techniques in a variety of media and formats. Emphasis on development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisites
AVT 422 or permission of instructor.

AVT 432 - Painting III

Credits: 4
Intermediate course with an emphasis on developing personal content, concepts, painting strategies, and a practical understanding of contemporary ideas in painting.

Prerequisites
AVT 333 or permission of instructor.

AVT 433 - Painting IV

Credits: 4
In this capstone course, students engage in a self-directed studio practice through the development of content, personal sources, techniques, presentation strategies, and methods of analysis through critique.

Prerequisites
AVT 432 or permission of instructor.

AVT 434 - Painting V

Credits: 4
Students work rigorously and independently, advancing individual studio practice through in-depth dialogue with faculty and formal group critiques. Emphasis on individual decision making, personal initiative, and critical vocabularies.
Prerequisites
AVT 433 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 435 - Painting VI

Credits: 4
Advanced directed research in painting. Employing rigorous concepts, presentation strategies, and in-depth critique, students develop independent projects into a cohesive body of work.

Prerequisites
AVT 434 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 442 - Printmaking III

Credits: 4
An intermediate print media course with an emphasis on a wider variety of tools and concepts that investigate photo-based imagery and advance personal narrative.

Prerequisites
AVT 343 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 443 - Printmaking IV

Credits: 4
An advanced print media course that uses hand-drawn, digital, and photo-based imagery. Students explore traditional and new printmaking techniques in a series of related prints and explore their relevancy to contemporary printmaking.

Prerequisites
AVT 442 or permission of the instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 444 - Printmaking V
Credits: 4
Advanced print media course incorporating three-dimensional applications of hand printmaking. Students develop concepts in digital printmaking, book making, sculptural prints, and installation works. Explores issues in contemporary printmaking through critical discussions, reading, and writing assignments.

**Prerequisites**
AVT 443 or permission of the instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 445 - Printmaking VI**

Credits: 4  
Students produce a body of print media work reflecting their interests, including the broader context of social, cultural, and contemporary issues. Students engage in collaborative studio practices and independent projects to integrate multiple visual technologies.

**Prerequisites**
AVT 444 or permission of the instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 452 - Advanced Traditional Photo Methods**

Credits: 4  
Intensive, advanced darkroom course with emphasis on fine art and craft of black-and-white photographic print. Students produce a personal portfolio based on technical instruction, contemporary photographic approaches and thought, and critical readings and discussions.

**Prerequisites**
AVT 353 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 453 - Professional Photo Practices**

Credits: 4  
The course further investigates portfolio development and introduces photography students to a range of professional career options. Emphasis is on portfolio development, internships and developing promotional materials such as websites and resumes. Includes studio, gallery and/or museum visits and guest speaker(s).

**Prerequisites**
AVT 353 or permission of instructor.
AVT 454 - Alternative Photo Processes

Credits: 4
Introduction to 19th century and nontraditional photographic processes including cyanotype, van dyke, gum bichromate, liquid emulsion, and image transfer. Exploration and discussion of photography's influences, application, and use in other mediums.

Prerequisites
AVT 353 or permission of instructor.

AVT 455 - Digital Printing Techniques

Credits: 4
Continuation of 354 Digital Photo Methods with further examination into digital techniques, personal expression and digital printing. Course emphasis is on the fine art and craft of the digital print and portfolio development.

Prerequisites
AVT 354 or permission of instructor.

Notes
Continuation of AVT 354

AVT 456 - Large Format Photography

Credits: 4
An introduction to basic concepts, controls, and exposure theories of large format photography. Students develop an aesthetic knowledge of the view camera's potential working with 4” x 5” view cameras in the studio and field.

Prerequisites
AVT 353 or permission of instructor.

AVT 457 - Documentary Photography
Credits: 4
Introduces documentary photography: techniques, history, choices, and ideas necessary to create meaningful photo essays that incorporate a personal, committed, in-depth approach to seeing and depicting lives and situations.

**Prerequisites**
AVT 452 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 458 - Advanced Studio Lighting**

Credits: 4  
The advanced study of photographic studio lighting concepts using electronic strobes and power packs with emphasis placed on constructing studio materials, metering techniques, staging complex sets, and on-location photography.

**Prerequisites**
AVT 356 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 459 - About Photography: Practice and Research**

Credits: 4  
A combined studio and lecture course investigating photography's history, critical theory, philosophy, and practice. Lectures, discussions, readings, and projects focus on a medium that has enormously influenced art and culture.

**Prerequisites**
One course from AVT 452-458 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

**AVT 462 - Sculpture III**

Credits: 4  
Advanced studio course for continued individual, conceptual, and critical development in sculpture. Biweekly seminar, independent research, museum and gallery visits, vigorous individual and group critiques, required documentation, and portfolio preparation supporting studio projects.

**Prerequisites**
AVT 363 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4
AVT 463 - Sculpture IV

Credits: 4
Intensive studio course for advanced sculpture students to further individual, conceptual, and critical development. Students produce a body of work based on technical exploration, critical discussion, reading, and writing.

Prerequisites
AVT 462 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 464 - Sculpture V

Credits: 4
Advanced studio course for rigorous and independent production of sculpture. Weekly topical seminar, vigorous critiques, museum and gallery visits, professional documentation, and research resulting in a body of work to be exhibited.

Prerequisites
AVT 463 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 465 - Sculpture VI

Credits: 4
Students work rigorously and independently, gaining insights into personal process and direction through one-on-one critical dialogue with faculty and formal group critiques. Emphasizes individual decision making and personal initiative.

Prerequisites
AVT 464 or permission of instructor.

Notes
Continuation of advanced work in AVT 465.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 472 - Critical Theory in the Visual Arts

Credits: 3
Examination of currents in theory and criticism that inform contemporary practice and critical analysis in the visual arts.
Prerequisites
ARTH 374 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 473 - Advanced Performance Studio

Credits: 4

Prerequisites
AVT 373 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 482 - Advanced Two-Dimensional Digital Art

Credits: 4
In-depth look at advanced digital imaging techniques and contemporary practices. Students are required to create a portfolio of large format high-resolution digital prints and further develop visual critical analysis skills through active participation in critiques.

Prerequisites
AVT 280 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 483 - Internet Art

Credits: 4
Investigates Internet as space for making art while detailing a selection of tools, concepts, issues, and history pertaining to Internet art.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 487 - Advanced Digital Media
Credits: 4
Integrates media art techniques, including rotoscoping, stop motion, layer compositing, hand drawing, and experimental animation, with digital video editing and DVD authoring. Special focus on intersection of traditional techniques, installation, and contemporary media art theory.

Prerequisites
AVT 382 or AVT 390, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 489 - Internship in Art and Visual Technology

Credits: 1-6
Unpaid professional-level work experience in a professional organization or with an individual artist, related to the student's concentration and career plans.

Prerequisites
Senior standing, completion of 12 concentration credits, and permission of instructor.

Notes
Placement documentation to include 45 hours of work per credit. May be repeated for credit for maximum 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

AVT 491 - Independent Study in Art and Visual Technology

Credits: 1-6
Opportunity for development of advanced skills and concepts in a field of interest. Study proposal must be approved by instructor prior to registration.

Prerequisites
Senior standing, completion of 12 concentration credits, and permission of instructor.

Notes
Project documentation to include 45 hours of work per credit. May be repeated for credit for maximum 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

AVT 493 - Teaching Visual Thinking Through Media, PK-12

Credits: 3
Investigates range and appropriateness of media and materials that encourage creative expression in the art classroom for PK-12 students, and expands the artist-teacher's visual repertoire. Incorporates art history, criticism, and aesthetics, as well as language arts and other content areas that challenge students' artistic growth and human development.
Prerequisites
AVT 495 or permission of art education director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 494 - Teaching Critical Response to Art, PK-12

Credits: 3
Develops visual literacy and critical-thinking skills for application to the PK-12 classroom by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts. Includes intensive writing, readings, discussions, museum work, research and Internet skills, and studio work.

Prerequisites
AVT 495 or permission of art education director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 495 - Introduction to Art Teaching and Learning

Credits: 3
Explores art-teaching profession through readings, discussion, hand-son activities, and visits to diverse area public schools. Students discover a variety of ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisites
Junior standing, completion of ENGL 302, and completion of at least 20 credits of AVT coursework (including AVT 307); or permission of art education director.

Notes
Prior to enrollment, students must complete art education inquiry form.

Hours of Lecture or Seminar per week: 3

AVT 496 - Special Topics: (specific course title varies)

Credits: 1-4
Explores topical studies in AVT including theoretical and critical aspects of art or studio production.

Notes
Topics and credit vary with instructor. May be repeated when taken under different topics.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0-4
AVT 497 - Senior Project

Credits: 4
Capstone course in which students develop and present a cohesive body of work along with written materials and documentation. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Senior art and visual technology major, completion of 12 concentration credits, and completion of or concurrent enrollment in all required general education courses.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 498 - Senior Design Project

Credits: 4
Capstone course in which students develop and present a design project exploring the possibilities of personal or professional expression. Students participate in critiques with visiting artists or AVT faculty and in workshops supporting professional goals.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Senior art and visual technology major, completion of AVT 311, 313, and 414, and completion of or concurrent enrollment in all required general education courses.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 522 - Drawing V

Credits: 4
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.

Prerequisites
Admission to the AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 523 - Drawing VI

Credits: 4
Drawing on an advanced level, emphasizing individual decision-making and personal initiative.
Prerequisites
Admission to AVT graduate program or permission of instructor for AVT 522; AVT 522; or permission of instructor for 523.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

AVT 595 - Introduction to Art Teaching and Learning

Credits: 3
Explores art-teaching profession through readings, discussion, hands-on activities, visits to diverse area public schools and action research. Students analyze ways that art is taught and evaluated to meet multiple educational needs of today's PK-12 students.

Prerequisites
Admission to MAT Program or permission by the art education advisor or director

AVT 596 - Independent Study

Credits: 1-6
Independent reading and research on specific project under department faculty member's direction.

Prerequisites
BA or equivalent, or permission of instructor.

Notes
Written reports required. May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

AVT 599 - Special Topics in Art and Visual Technology

Credits: 1-6
Exploration of topical studies in AVT, including theoretical and critical aspects of art or studio production.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
Topics and credit vary with instructor. May be repeated when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

AVT 600 - Research Methodologies
Credits: 3
Graduate seminar focusing on development of independent research project in student's area of emphasis. Explores principal methods of researching and documenting art and arts practice. Along with traditional methods of library research, emphasizes new processes of examination and investigation through the use of computer-aided research systems.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 605 - Issues and Research in Art Education

Credits: 3
Readings and projects explore historical and contemporary ideas, issues, philosophies, pedagogy, and research in art education. Investigates teachers' use of research-oriented questions and data to explore classroom issues and improve teaching and learning.

Prerequisites
Admission to the MAT program and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 606 - Creativity and Cognition in the Arts and Media

Credits: 3
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to EDEP 601

AVT 610 - Graduate Seminar

Credits: 1-4
Students present their work or the work of contemporary artists for discussion and peer and faculty critiques. Special focus on developing public communication and presentation skills on contemporary issues in the arts.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
Seminar course required of all AVT graduate students four times during course of study. Repeatable for 4 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
AVT 611 - Graduate Design Seminar

Credits: 1
A laboratory for the exploration of contemporary design theory and practice through writing and design making, this class will have rotating topical content.

Notes
Can be repeated.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

AVT 612 - Thesis Research

Credits: 1
Provides the development and research phase in preparation for AVT 794: Thesis, the capstone course in the graphic design masters program. Students will prepare their written thesis proposal for presentation to the AVT GD Graduate Faculty Committee.

Prerequisites
Admission to AVT graphic design graduate program and completion of 30 graduate credits.

Notes
To be completed prior to enrolling in AVT 794: Thesis

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

AVT 613 - Graphic Design History

Credits: 3
A survey of design history, examining print and web design as both a reaction to and shaper of the broader culture (including other fine and applied arts) through the study of major movements and designers.

Prerequisites
Admission to AVT graduate program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 614 - Brand Identity Design

Credits: 4
This is an advanced design course with an emphasis on brand identity development. Topics include logo development, product packaging, marketing and advertising collaterals, web branding, and broadcast advertising development. Special attention is given to the creation of a graphic standards guide.
AVT 615 - Technology for Art Teachers

Credits: 3
Addresses use of technology in PK-12 art classroom. Focuses on research, presentation and instruction, and image creation. Students develop technology-enhanced teaching units for different grade levels and explore related issues, including copyright, plagiarism, and appropriation.

Prerequisites
Admission to the Art Education concentration ASTL and/or permission of art education director.

AVT 616 - Networked Art Practice

Credits: 5
Studio, lecture course investigating art as networked activity. Particular attention focused on Internet as context for creation, distribution, and patronage of art.

Prerequisites
Admission to AVT graduate program or permission of instructor.

AVT 617 - Advanced Typography

Credits: 4
Students will produce a body of work exploring the opportunities and limitations of typographical design.

Prerequisites
Admission to graphic design MA (or MFA) program, or permission of the instructor

Corequisite
Admission to the AVT graduate program or permission of instructor.
**AVT 619 - Advanced Web Design**

Credits: 4  
Develops skills for the application of information, interaction, usability, and visual design for web site developments. Students gain in-depth knowledge of user behaviors and broader context of social, cultural, and contemporary issues in web communication. Students learn professional design processes and integrate multiple web developing technologies.

**Prerequisites**  
Admission to Graphic Design MA program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

---

**AVT 620 - Theory, Criticism, and the Visual Arts**

Credits: 3  
Cross-disciplinary graduate seminar focusing on key theories and themes that have informed 20th- and 21st-century arts practice. Explores theory and criticism in a variety of contexts, from popular to scholarly, and considers the role of artists as thinkers and writers.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**AVT 622 - Advanced Drawing**

Credits: 4  
Advanced directed research in drawing with continued development of individual aesthetic. Study of historical and philosophical precedents integral.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

---

**AVT 632 - Graduate Painting I**

Credits: 5  
Entering students are expected to be competent painters, with technical proficiency, a disciplined process, and a directed personal vision. Students work rigorously and independently toward the understanding and mastery of techniques, methods, and concepts relevant to formal expression of personal content. Students expected to participate in critical discourse with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.
**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

---

**AVT 633 - Graduate Painting II**

Credits: 5  
Building on research and practices established in Graduate Painting I, students continue to develop strategies for the expression of personal vision and style. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

**Prerequisites**
AVT 632, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

---

**AVT 634 - Advanced Graduate Painting**

Credits: 5  
Working independently on a cohesive body of work, students must demonstrate a thorough understanding and mastery of techniques, methods, and concepts relevant to their own practices, and be able to discuss their work within the context of historical and contemporary art practices. Progress tracked and assessed through periodic one-on-one critical discussions with supervising faculty. Achievement measured by faculty review board at mid-semester and term's end.

**Prerequisites**
AVT 633, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

---

**AVT 642 - Graduate Printmaking I**

Credits: 5  
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6
AVT 643 - Graduate Printmaking II

Credits: 5  
Directed research and practice in printmaking focuses on individualized development of content and technique. Explores intellectual and expressive aspects of printmaking process.

Prerequisites
AVT 642 or permission of instructor.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 6

AVT 644 - Advanced Graduate Printmaking

Credits: 5  
Intensive course of creative exploration in print media that furthers students' independence through production of individualized body of work reflecting interests within the broader contexts of contemporary social, technological, and cultural issues. Students also engage in collaborative studio practices to integrate visual technologies in their work. These may include digital imaging, drawing, graphic design, painting, performance, photography, and sculpture.

Prerequisites
AVT 643 or permission of instructor.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 6

AVT 652 - Graduate Photography I

Credits: 5  
Critical theory and directed practice in photography focusing on development of a personal voice and working method through intellectual activity and creative work. Emphasizes ability to explore concepts, develop skills, and evolve as a communicator of ideas and photographic artist.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 6

AVT 653 - Graduate Photography II

Credits: 5  
An intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
Continuation of Graduate Photography I. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 654 - Advanced Graduate Photography

Credits: 5
Intensive critique class concentrating on the development of creative work with emphasis on articulating responses to others' work, the cultural climate, and issues involved in one's own work as it progresses.

Prerequisites
AVT 653, or permission of instructor.

Notes
Advanced graduate photography course. Weekly classes share equal time with critical theory and hands-on studio work. Includes readings, visiting artists and lecturers, and field trips.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 662 - Graduate Sculpture I

Credits: 5
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 663 - Graduate Sculpture II

Credits: 5
Intensive studio course that furthers student independence through production of a body of work reflecting interests, including a broader context of social, cultural, and contemporary issues. Emphasizes self-evaluation, critical discussion, reading, and writing.

Prerequisites
AVT 662 or permission of instructor.
AVT 664 - Advanced Graduate Sculpture

Credits: 5
Emphasizes individual creative production and development, with periodic exposure of student's work and ideas to the critical attention of the AVT teaching faculty and other graduate students.

Prerequisites
AVT 663 or permission of instructor.

Notes
Writing and reading components.

AVT 667 - Two-Dimensional Art Making: Form, Theme, and Context

Credits: 3
Through studio work and research on basic and innovative drawing strategies, students explore expressive visual qualities, composition, and color. Students develop professional portfolios that incorporate meaningful themes and contexts for developing visual literacy in PK-12.

Prerequisites
Admission to the MAT program and permission of the instructor based on a portfolio review.

AVT 668 - Three-Dimensional Art Making across Cultures

Credits: 3
Explores the diversity of art forms in world cultures and work of traditional and contemporary artists. Students learn basic three-dimensional art-making techniques, including ceramics and fibers, and learn to design three-dimensional art instruction for PK-12 levels.

Prerequisites
Admission to the MAT program or Art Education Concentration ASTL; or permission of the art education director.

AVT 669 - Four Dimensional Art Making: Technology and New Media
Develops teacher skills for the application of advanced technology for the PK-12 art program and examines the changing nature and uses of technology for expanding visual literacy through pedagogical strategies.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

### AVT 670 - Teaching Practicum

Credits: 3 - 6  
Supervised classroom teaching practicum in Mason's undergraduate program or community college program.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Notes**  
May be repeated for total of 6 credits.

**Hours of Lecture or Seminar per week:** 3 or 6  
**Hours of Lab or Studio per week:** 0

### AVT 672 - Performance Studio I

Credits: 5  
Introductory studio course looking at performance as a visual art practice and focusing on time, space and the body. Emphasizes artist as performer. Students study the work of performance practitioners, make short performance pieces, document and exhibit their work, and go to galleries and performances locally and in New York.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Notes**  
Substantial research project required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

### AVT 673 - Performance Studio II

Credits: 5  
In-depth studio course focusing on collaborative practice of performance art. Analyzes creation and production processes from an interdisciplinary perspective in conjunction with practical training in multimedia performance, complemented by screenings, readings, guest artists, and field trips.

**Prerequisites**  
AVT 672 or permission of instructor.
AVT 674 - Advanced Performance Studio

Credits: 5
Advanced laboratory for creating and producing performance art. Emphasizes new technologies and their applications, multimedia scriptwriting and storyboarding, and the creation of audiovisual performance. Students work independently and also contribute to collaborative production.

Prerequisites
AVT 673 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 675 - Advanced InterArts Topics

Credits: 5
Opportunity for advanced study in interdisciplinary arts topics including African American experience in the performing arts, cyberpunk, global motion, interarts figures, live movies, writing and performance.

Prerequisites
AVT 673 or permission of instructor

Notes
May be repeated for maximum 15 credits when taken under different topics.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

AVT 676 - Sound and Music for Video and Animation

Credits: 5
Combined lecture and studio course focusing on selection, editing, processing, and integration of sound and music (postproduction) into video and animation. Studies time, frequency, and amplitude domain and processing. Students postproduce sound and music for 15-minute film or animation due at semester end.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 678 - Interface and CD-ROM Design
Credits: 5
Combined lecture and studio course in multimedia interface and CD-ROM design. Focuses on exporting traditional visual and
aural artistic aesthetic to the computer environment within a multimedia context. Assigned class readings augmented and
supported by presentations of various digital interfaces and CD-ROM examples. Discusses commercial, entertainment, and
educational titles, as well as CD-ROM experimental art works. Studio time divided between AVT labs and area multimedia
facilities. Students conceive, design, and develop two CD-ROM or kiosk interfaces due at midterm, and complete a dual platform
CD-ROM project due at semester end.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 682 - The Art of 2D Animation

Credits: 5
Designed to broaden range of visually expressive, time-based media from cell animation and stop motion animation to
rotoscoping and two-dimensional digital animation. Emphasizes idea generation, concept development, and visual aesthetics.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 684 - Two-Dimensional Digital Art

Credits: 5
Overview of two-dimensional computer-imaging applications in the arts, including painting, printmaking, mixed media,
illustration, video, and animation. Lectures combine technical and aesthetic material, including image processing for artists and
color reproduction. Emphasis on developing advanced studio portfolio.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 685 - Video Art

Credits: 5
Explores video as medium that is transforming art and is transformed by art. Emphasizes developing an approach to personal
narrative, creative skills, and construction of meaning, as well as on acquiring technical skills.

Prerequisites
Admission to AVT graduate program or permission of instructor.
AVT 686 - Three-Dimensional Digital Art

Credits: 5
Teaches how to create realistic, three-dimensional scenes with scaled objects, surface textures, lights, and shadows. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities. Students required to render a portfolio of high-resolution images.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 687 - Advanced Digital Media

Credits: 5
Advanced course in digital media, including layer compositing, digital video editing, rotoscoping, and cell animation. Emphasizes integrating traditional techniques with software applications; and publishing projects to CD-ROM, DV tape, DVD, and Internet.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 688 - Digital Animation

Credits: 5
Study of digital two-dimensional and three-dimensional animation practices. Introduces lighting, camera movement, object motion, timing, and texture mapping as students plan and produce a short animation. Emphasizes idea generation, concept development, visual aesthetics, and technical abilities.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

AVT 691 - Elementary Art Education
Credits: 3
Concepts and methods in early childhood and elementary art education.

Prerequisites
Admission to the MAT program and permission of instructor.

Notes
Students spend three hours per week in class and one hour per week in required field experience in public schools and other educational settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

AVT 692 - Secondary Art Education

Credits: 3
Concepts and methods in secondary art education.

Prerequisites
AVT 691 or permission of instructor.

Notes
Students spend three hours per week in class, and one hour per week in required field experience in the public schools and other educational settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

AVT 693 - Apprenticeship

Credits: 3 - 6
Apprenticeship at a local business conforming to students' interests in visual information technologies.

Prerequisites
Admission to AVT graduate program or permission of instructor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3 or 6
Hours of Lab or Studio per week: 0

AVT 694 - Advanced Studies in Teaching Critical Response to Art, PK-12

Credits: 3
Develops visual literacy and critical thinking skills by examining diverse theoretical models and applying strategies to expand knowledge about art and artifacts in the PK-12 classroom and museum.
Prerequisites
Admission to the Art Education concentration ASTL and/or permission of the art education director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

AVT 695 - Internship in Art Education (Student Teaching)

Credits: 6
Full-time internship in which students teach in elementary and secondary schools with guidance from cooperating mentor teachers. College supervisors make periodic site visits to observe, assess, and evaluate progress.

Prerequisites
Completion of all other MAT program requirements.

Corequisite
AVT 696.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

AVT 696 - Internship for Student Teachers

Credits: 1
Weekly professional seminar focused on needs and concerns of student teachers. Covers issues as they emerge in practice, and concludes with an "Art of Teaching Art" exhibit of work by students of preservice teachers.

Corequisite
AVT 695.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

AVT 697 - Advanced Strategies and Curricular Innovations in the Visual Arts

Credits: 3
Synthesizing knowledge and understandings gained in ASTL program, seminar focuses on innovative curriculum design, mastery of effective instructional strategies, and developing leadership potential for the field of visual art education.

Prerequisites
Completion of all ASTL art education concentration courses.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
**AVT 794 - Independent Design Project**

Credits: 4  
The capstone course in the graphic design Master of Arts degree. Provides for the independent development, design, production and presentation of a graduate-level design project guided by faculty and design professionals.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**AVT 796 - Directed Reading**

Credits: 1-9  
The development of independent research into the historical precedents, theoretical underpinnings, cultural forms, and idea territories pertinent to student's individual studio practice. Individualized section under the direction of division member.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Notes**  
One of three courses comprising the MFA comprehensive experience for AVT students.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**AVT 798 - Directed Project and Exhibition**

Credits: 3  
The construction and presentation of a professional-quality public exhibition. Course includes significant independent studio production of a comprehensive body of work, leading to the MFA Thesis Exhibition. Exhibition must demonstrate student's mastery of studio craft and concept. Individualized section under the direction of division member.

**Prerequisites**  
Admission to AVT graduate program or permission of instructor.

**Notes**  
One of three courses comprising the MFA comprehensive experience for AVT students.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**AVT 799 - Thesis**

Credits: 1-3  
The written thesis informs, documents, and enhances the MFA thesis exhibition, which is the student's primary creative research activity. The content of the written thesis may vary in accordance with artistic discipline and final exhibition. Individualized section under the direction of division member.
**Prerequisites**
Admission to AVT graduate program or permission of instructor.

**Notes**
One of three courses comprising the MFA comprehensive experience for AVT students.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**Arts Management**

---

**AMGT 402 - Professional Development**

Credits: 1  
Seminar course that involves the development of workplace frameworks for success.

**Prerequisites**
Junior standing, admission to the arts administration minor, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**When Offered:** Fall

---

**AMGT 403 - IT for Arts Professionals**

Credits: 1  
Provides the information technology skills to arts managers that have become standard in the field for entry-level positions in arts management. The course will provide several lectures that discuss the purpose and objectives of software and how these skills fit into the larger or organizational schema.

**Prerequisites**
Junior standing, admission to the arts administration minor, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**When Offered:** Spring

---

**AMGT 405 - Seminar in Arts Management**

Credits: 3  
Covers planning, programming, presentation, funding, and communications in managing visual and performing arts. Includes guest speakers, case analysis, and semester-long individual and group projects.

**Prerequisites**
Junior standing, admission to arts administration minor, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

**AMGT 470 - Academic Writing in the Arts**

Credits: 1  
Prepares students for rigors of academic writing within the arts management fields. Students learn how to analyze the rhetorical situation before writing: assignment, topic, purpose, audience, and organization. Includes principles of academic research, writing, and citation; each assignment is designed to encourage students to think critically about their own writing and to practice patterns of review, assessment, reflection, and revision.

**Prerequisites**  
Junior standing, admission to the arts administration minor, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AMGT 471 - Introduction to Grant Writing**

Credits: 1  
Course focuses on developing the skills necessary for successful grant applications for arts organizations. Study of relevant funding sources, awareness of available research materials, ability to construct coherent proposals, and defining fund-raising strategy for an arts organization.

**Prerequisites**  
Junior standing, admission to the arts administration minor, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 1  
**When Offered:** Summer

**AMGT 489 - Internship in Arts Management**

Credits: 1-4  
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with the minor coordinator before enrollment.

**Prerequisites**  
Junior Standing, completion of 6 credits of courses in area of residency, AMGT 305, or permission of instructor.

**When Offered:** Fall, Summer, Spring

**AMGT 503 - Information Technology for Arts Managers**
Credits: 1
Provides arts management students the opportunity to advance IT skills to required levels. Following skills assessment and seminar, students take three classes in campus media labs ranging from MS Office/Excel to advanced IT.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 504 - Professional Development Arts Management

Credits: 1
Combines experimental facets happening within the creative community and the development of an increasing awareness of self. Professional development is not only for the manager, but also for those who work for that manager. It is collaborative, ideally incorporating an evaluative stage. Topics addressed include professional development, consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision and technical assistance.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 505 - Academic Writing in Arts Management

Credits: 1
Course prepares students for the rigors of academic writing at the advanced level and supports their becoming acculturated in the academic writing skills and practices within their discourse communities. Students will learn how to analyze the rhetorical situation before writing: assignment, topic, purpose, audience, and organization and will include the principles of academic research, writing, and citation.

Hours of Lecture or Seminar per week: 3
Grading: Satisfactory/No credit
When Offered: Fall, Spring

AMGT 599 - Special Topics in Arts Management

Credits: 1-6
Provides opportunity to explore special and timely topics in arts management including theoretical and applied areas. Topics and credit vary; may be repeated for up to 12 credits taken under different topics.

Prerequisites
Admission to Arts Management program or permission of program director.
AMGT 601 - Fund Raising/Development I

Credits: 3
Overview for students seeking general knowledge, as well as introductory course for those who will complete the fund-raising concentration. Teaches role of fund raising as management function and part of overall strategic intention of arts organizations, presenting fund raising as a multifaceted, team-based process. Analyzes tools and techniques for effective fund raising.

Prerequisites
AMGT 602, AMGT 603 or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 602 - Seminar in Arts Management

Credits: 3
Develops tools and techniques necessary for successful pursuit of a management career in visual and performing arts. Introduces wide range of arts organizations, working arts administrators, and institutional models through guest lectures, readings, field trips, and analysis of institutional data. Students gain understanding of organizational structures and functions, as well as models for general management.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 603 - Arts and Society

Credits: 3
Examines role of visual and performing arts, with emphasis on historic traditions and trends that have most directly influenced contemporary American practice. Consideration is given to the functions of art in society in addressing questions: What constitutes good or bad art? What is the value of art? What encouragements or impediments does our society offer to the creative artist or arts institution?

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
AMGT 604 - Public Relations and Marketing Strategies for the Arts I

Credits: 3
Teaches strategic way of thinking about audience, community, and markets. Structured into four modules, beginning with fundamentals of strategic planning. Students learn about external and internal environments and the interplay among them; discuss marketing fundamentals pertaining to arts audiences; and are introduced to fundamentals of applied marketing media and advertising fundamentals.

Prerequisites
AMGT 602, AMGT 603 or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 606 - Board of Directors Management

Credits: 3
Board development including oversight and management of a board, as well as understanding board functions. Board relationships, including volunteers, are essential through all of the stages of a management career.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 607 - Fund Raising/Development II

Credits: 3
Focus on two active arts organizations and create a development plan and various proposals specifically geared to their situations. The course focuses on practical application of development principles, writing and communications skills, and strategic thinking and planning.

Prerequisites
AMGT 601 or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 608 - Public Relations and Marketing Strategies for the Arts II
Credits: 3
Conception, planning, and implementation and control of platforms to create and manage a holistic communications strategy for arts organizations. This includes management of brand, public relations, advertising and the evolving marketplace: new technologies, and theories in marketing.

Prerequisites
AMGT 604

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 609 - Facilities Management

Credits: 3
Bridging strategic planning and marketing; audience development; financial management; and board and volunteer management with issues of scheduling, ticketing and sales, mission integration and strategic challenges of new facilities, and growth and operations of existing ones.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 610 - Gallery Management

Credits: 3
Covers the many facets of visual art gallery management, from practical considerations of daily operations to the broader examination of gallery's role in art education, criticism, and art market. Topics such as exhibition coordination and installation, contracts, artist representation, fine art insurance, exhibition policies, budgets, and marketing are covered, along with the responsibility of educating a diverse public.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 704 - Finance and Budgeting for Arts I

Credits: 3
Introduces budget and finance as fundamentals of the budget process, specifically tailored to needs of arts organizations. Provides overview of accounting as tool to manage and control arts organizations. Involves laboratory component for teaching software application frequently encountered in fiscal operation of arts organizations.
Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

AMGT 705 - Finance and Budgeting for Arts II

Credits: 2
Introduces budgeting, planning, and finance as fundamentals of the strategic planning process and management control, specifically tailored to the needs of arts organizations.

Prerequisites
AMGT 704

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 706 - Festivals and Special Events

Credits: 3
Technical aspects of events and festival management. Topics such as cultural understanding, tourism, sponsorship, fund raising and development, logistics of scheduling and contracts, and the relationship to larger venues, marketing and sales, and budgeting.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 710 - Arts Policy

Credits: 3
Reviews current state of the sector, familiarizing students with most common rationales for public support of the arts and respective roles of federal, state, and local governments and private policy actors. Examines dilemmas that arts organizations face in balancing need for government support and artistic integrity with push and pull of the market. Compares U.S. policies to other developed countries.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 3
AMGT 711 - Directed Readings and Project

Credits: 1-6
Opportunity to engage in a more intensive study or project in arts management. Students partner with faculty member for intensive readings and project in strategy and planning in the arts, fundraising and development, entrepreneurial project work, arts marketing, arts policy and law, or other specialized areas pertinent to arts administration.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 712 - Grant Writing in the Arts

Credits: 1
Places components of grant writing process within broader context of nonprofit management. Introduction to perspectives of grant seeker and maker. The grant writing process: research, proposal writing, terminology, oral and written techniques, and specific focus. Discover resources and compelling writing skills pertaining to proposal and letters of intent.

Prerequisites
Admission to Arts Management program or permission of program director.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

AMGT 740 - Internal Internship

Credits: 2
Builds on apprenticeship as a core means of teaching applied concepts of arts management. Augments use of Center of the Arts and active arts environment, both performing and visual, as a learning laboratory. Builds on practical learning and provides internal training as preparation for external internship. Minimum 42 hours/credit.

Prerequisites
Admission to Arts Management program or permission of program director. 9-credit standing.

Notes
9 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

Hours of Lecture or Seminar per week: 0
**AMGT 750 - Arts Entrepreneurship I**

Credits: 3  
Lecture course in discovering and developing entrepreneurial skills in the artist. The course includes presentations, lectures, and meetings with successful art and non-art entrepreneurs in the region. Students will conceive, develop, and present a for-profit or not-for-profit business plan strategy, which includes model(s), market overview, management structure, along with revenue streams, an acquisition strategy, and technical and information technology strategies.

**Prerequisites**  
Admission to Arts Management program or permission of program director.

**Notes**  
The semester concludes with a 15- to 20-minute public presentation of the business plan summary before a panel of entrepreneurs and business and nonprofit managers.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AMGT 751 - Arts Entrepreneurship II**

Credits: 3  
Advanced lecture course in discovering and developing entrepreneurial skills in the artist. Special focus on developing business financial planning skills, funding strategy, and marketing and sales of the arts. Course includes presentations, lectures, and meetings with successful entrepreneurs in the region. Students will conceive, develop, and present statements and projections consistent with the development of a business plan.

**Prerequisites**  
AMGT 750 or permission of program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

**AMGT 760 - Current Issues in Arts Management**

Credits: 3  
Strategic decision making within the complex web of social, political, economic, personal, and ethical dimensions. Analysis of cases, using learned skills in planning, financial and strategic analysis, human resource allocation, and fundraising.

**Prerequisites**  
Admission to Arts Management program, 9-credit standing; or permission of program director.

**Hours of Lecture or Seminar per week:** 3
**AMGT 780 - Arts Consultancy**

Credits: 3  
Studies techniques, frameworks for selecting and using consultants effectively. Incorporates business development, project scope, contract and pricing, and independent contractor as opportunities in arts management field.

**Prerequisites**  
Admission to Arts Management program or permission of program director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**AMGT 790 - External Internship**

Credits: 1-4  
Designed to follow internal internship. Provides a specific work environment to build on skills developed in the classroom, and integrates work experience with specific academic exercises. Students advised to pursue a three-pronged approach toward specialization: electives; internal internship in the same area as concentrated electives; and external internship consistent with specialized course work and internal internship. Minimum 42 hours/credit.

**Prerequisites**  
Admission to Arts Management program, 15 credit standing; or permission of program director.

**Notes**  
15 credits taken within the master in arts management program; or permission of program director. Required for developing practical application.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6-12  
**When Offered:** Fall, Summer, Spring

---

**Astronomy**

---

**ASTR 103 - Astronomy**

Credits: 3  
Introduction to origin of life, Earth, planets and sun, stars, galaxies, quasars, nature of space radiation, and general theory of relativity.
Satisfies General Education Requirement: Natural science Nonlab

Notes
Not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 111 - Introductory Astronomy: The Solar System**

Credits: 3
Topics include history of astronomy, evolution of the solar system, properties of planets, scientific method, critical thinking, nature of light, and principles of telescope design.

Satisfies General Education Requirement: Natural science Lab

Notes
ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 112 - Introductory Astronomy Lab: The Solar System**

Credits: 1
Laboratory course associated with ASTR 111.

Satisfies General Education Requirement: Natural science Lab

Notes
ASTR 111 and 112 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**ASTR 113 - Introductory Astronomy: Stars, Galaxies, and the Universe**

Credits: 3
Topics include electromagnetic radiation, stellar evolution, interstellar medium, galaxies, cosmology, scientific method, and critical thinking.

Satisfies General Education Requirement: Natural science Lab

Notes
ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.
ASTR 114 - Introductory Astronomy Lab: Stars, Galaxies, and the Universe

Credits: 1
Laboratory course associated with ASTR 113.

Satisfies General Education Requirement: Natural science Lab

Notes
ASTR 113 and 114 can be used to fulfill a 4-credit lab science requirement; not for physics majors.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

ASTR 301 - Astrobiology

Credits: 3
Physical science perspective on origin and evolution of life on Earth and how life, in turn, has significantly influenced Earth's evolution. Topics include origin of Earth, mechanisms and sites for origin of life, co-evolution of life and Earth's atmosphere, habitability of planets, and the search for extraterrestrial life.

Prerequisites
MATH 108 or 113; PHYS 160 or 243.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 302 - Foundations of Cosmological Thought

Credits: 3
Examines scientific, historical, and philosophical foundations and development of cosmological thought from antiquity to the present. Emphasizes qualitative understanding of the development of cosmology concluding with the present concept of origin and evolution of universe.

Satisfies General Education Requirement: Natural science Nonlab

Notes
No advanced background in mathematics or natural sciences required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 328 - Introduction to Astrophysics
Credits: 3
Topics include physical concepts; magnitudes of stars; Hertzsprung-Russell diagram; stellar radiation; stellar structure and evolution; white dwarfs, red giants, supernovas, neutron stars, and black holes; interstellar matter, dust, and molecules; cosmic rays and magnetic fields; galactic structure, galaxies, quasars, and intergalactic matter; high energy astrophysics, cosmology and general relativity; and models of the universe.

Equivalent to PHYS 328

**Prerequisites**
PHYS 262 and MATH 214.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 390 - Topics in Astronomy**

Credits: 1-4
Selected topics not covered in fixed-content courses.

**Notes**
May not be included for credit by physics majors in the 45 credits of physics courses required for BS degree, or in 31 credits of physics courses required for BA degree.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0

**ASTR 401 - Computer Simulation in Astronomy**

Credits: 3
Techniques and methods to simulate astronomical phenomena using a computer. Examples taken from a wide variety of astronomical phenomena, including radiation transfer in astrophysical objects, self-gravitating systems, hydrodynamics, and stellar models.

**Prerequisites**
MATH 213 and ASTR 328.

**Notes**
Emphasizes hands-on projects.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ASTR 402 - Methods of Observational Astronomy**

Credits: 3
Collection and analysis of data covering radio, microwave, infrared, visible, ultraviolet, X-ray, and gamma ray astronomy. Topics include electromagnetic spectrum, coordinate systems, motion of celestial objects, telescopes, detectors, statistics and noise,
interferometry, and spectroscopy.

**Prerequisites**
ASTR 111, 112, 113, 114.

**Notes**
This course meets the writing-intensive requirement.

**ASTR 403 - Planetary Sciences**

Credits: 3
Introduction to the physics and chemistry of planets and their natural satellites, asteroids, and comets. Topics include history of the solar system; origin and evolution of planets, their internal structure and atmospheres; and analytical techniques used in remote and in situ study.

**Prerequisites**
MATH 213 and PHYS 160.

**ASTR 404 - Galactic Astronomy**

Credits: 3
Comprehensive introduction to observational and theoretical aspects of the study of galaxies. Topics include our own galaxy, normal galaxies and their hierarchical structures (groups and clusters), star forming and active galaxies, and colliding galaxies.

**Prerequisites**
MATH 214, ASTR 328, and PHYS 308.

**ASTR 405 - Honors Thesis in Astronomy I**

Credits: 3
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 405.

**Prerequisites**
21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
ASTR 406 - Honors Thesis in Astronomy II

Credits: 3
Project chosen and completed under the guidance of a faculty member, resulting in a written thesis. An oral progress report is required for ASTR 406.

Prerequisites
ASTR 405 and 21 credit hours in Physics and Astronomy and acceptance into the astronomy honors program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 408 - Senior Research

Credits: 3
Independent work under guidance of faculty member on research project in experimental, observational, or theoretical astronomy.

Prerequisites
15 credits of ASTR courses.

Notes
Students may not receive more than 6 credits of ASTR 408 and 409. Written report on project required. May be taken twice with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 409 - Astronomy Internship

Credits: 3
On-the-job experience for astronomy majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical astronomy, and prepare written report at end of internship.

Prerequisites
75 credits, 15 ASTR credits, and permission of department.

Notes
See department for other requirements and application procedure prior to enrollment. Students may not receive more than 6 credits of ASTR 408 and 409.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ASTR 428 - Relativity and Cosmology

Credits: 3
Special relativity; four-dimensional space-time; general relativity; non-Euclidean geometries, geodesics, and field equations; tests of general theory of relativity; black holes; cosmology; models of the universe; remnant blackbody radiation; big bang cosmology; thermodynamics; and the universe.

Equivalent to PHYS 428

Prerequisites
MATH 214; PHYS 303, 305, and 262; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 490 - Astronomy Capstone

Credits: 3
Capstone course providing a learning experience, integrating knowledge from previous astronomy courses with selected readings from current scientific papers and an opportunity to effectively present that synthesis. Emphasizes student participation and student-led class discussions.

Prerequisites
Completion of ASTR core courses or concurrent enrollment in final core courses.

Notes
Required of all astronomy majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 530 - Astrophysics

Credits: 3
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Prerequisites
PHYS 303, 305, 308; MATH 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 535 - Space Instrumentation and Exploration
Credits: 3
Survey of instruments, devices, and methods for space and planetary exploration, including remote sensing of Earth and other solar system bodies, and planned manned and unmanned missions by the United States and other countries.

Equivalent to CSI 660

Prerequisites
PHYS 262 and MATH 213.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 590 - Selected Topics in Astronomy and Astrophysics**

Credits: 1-6
Advanced topics from recent theoretical or observational developments and their applications. Satisfies needs of professional community to keep abreast of current developments.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

**ASTR 680 - Physics of Interstellar Media**

Credits: 3
Physical processes in the interstellar media. Topics include the production and transfer of radiation, ionization and recombination, atomic and molecular excitation, dust physics, gas heating and cooling, and star formation.

Prerequisites
PHYS 402 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ASTR 703 - Planetary Sciences**

Credits: 3
This course will cover the processes and events that have played a central role in the origin and evolution of the solar system, with special emphasis on the terrestrial planets. The unique history of Earth and how it has evolved into a habitable world will be covered in detail.

Prerequisites
MATH 213 and PHYS 160.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ASTR 760 - Space Plasma Physics

Credits: 3
Covers plasma processes involved in today's space physics research, including different regimes of plasma; basic concepts in kinetic, fluid, and MHD plasmas; and existent waves in these media. Also covers basics of shocks, discontinuities, transport and acceleration of particles such as cosmic rays, reconnection, and MHD instabilities.

Equivalent to PHYS 760

Prerequisites
PHYS 622 or 513, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 765 - High-Energy and Accretion Astrophysics

Credits: 3
Overview of the field of atomic and nuclear physics, including nuclear reactions of use to high-energy astrophysics. Discusses radiation processes in cosmic plasmas emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Prerequisites
PHYS 502 and 513, and ASTR 530; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 766 - Relativity and Cosmology

Credits: 3
Special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ASTR 769 - Topics in Space Sciences

Credits: 3
Selected topics in space sciences not covered in fixed-content space sciences courses.
Equivalent to CSI 769

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for credit as needed.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ASTR 790 - Advanced Topics in Astronomy and Astrophysics**

Credits: 1-6  
Advanced topics from recent theoretical or observational developments and applications.

**Prerequisites**
Graduate standing and permission of instructor.

**Notes**
Satisfies need of professional community to keep abreast of current developments.

**Hours of Lecture or Seminar per week:** 0-6  
**Hours of Lab or Studio per week:** 0

---

**ASTR 796 - Directed Reading and Research**

Credits: 1-6  
Reading and research on a specific topic in astronomy, astrophysics, or related field under direction of faculty member.

**Prerequisites**
Admission to master's program and permission of instructor.

**Notes**
May be repeated as needed.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**ASTR 798 - Research Project**

Credits: 3  
Research project chosen and completed under guidance of graduate faculty member resulting in an acceptable technical report.

**Prerequisites**
9 credits and permission of instructor.
ASTR 799 - Master's Thesis

Credits: 1-6
Research project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report and oral defense acceptable to three-faculty-member thesis committee.

Prerequisites
9 credits, and permission of instructor.

Notes
May not be repeated.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ASTR 998 - Doctoral Dissertation Proposal

Credits: 1-12
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisites
Admission to physics doctoral program and permission of advisor.

Notes
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

ASTR 999 - Doctoral Dissertation

Credits: 1-12
Doctoral research performed under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy in physics doctoral program and permission of advisor.
Notes
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Athletic Training

ATEP 150 - Introduction to Athletic Training and Preventative Care Techniques

Credits: 3
Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

ATEP 180 - Emergency Medical Care for Physically Active Populations

Credits: 0-4
An investigation of the scientific and philosophical foundations of pre-hospital emergency care principles pertinent to a physically active population. Students develop knowledge, critical thinking, and problem solving skills necessary to correctly apply emergency care principles and associated skills in a variety of clinical and professional settings. Upon successful completion of this course, the student will earn Emergency Cardiac Care (ECC) and First Aid certifications.

Prerequisites
BIOL 124

Corequisite
BIOL 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ATEP 250 - Physical Assessment of the Lower Body

Credits: 3
An analysis of the principles of physical assessment of the lower body.
Prerequisites
ATEP 150, 180; BIOL 124, 125; HEAL 110; PHED 300

Corequisite
Concurrently enrolled in ATEP 255, ATEP 256

Notes
Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3

ATEP 255 - Clinical Techniques I: Physical Assessment of the Lower Body

Credits: 3
An analysis of physical assessment clinical techniques of the lower body (including the lower extremity and abdomen).

Prerequisites
ATEP 150, ATEP 180, BIOL 124, BIOL 125, HEAL 110, and PHED 300

Corequisite
Concurrently enrolled in ATEP 250 and ATEP 256

Notes
Formal acceptance to the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3

ATEP 256 - Practicum I: Physical Assessment of the Lower Body

Credits: 3
A clinical practicum filed experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the lower body.

Prerequisites
ATEP 150, 180; BIOL 124, 125; HEAL 110; and PHED 300

Corequisite
Concurrently enrolled in ATEP 250 and 255

Notes
Formal acceptance to professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 260 - Physical Assessment of the Upper Body
Credits: 3
An analysis of the principles of physical assessment of the upper body.

Prerequisites
ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; PHED 300

Corequisite
Concurrently enrolled in ATEP 265, ATEP 266

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 265 - Clinical Techniques II: Physical Assessment of the Upper Body

Credits: 3
An analysis of physical assessment clinical techniques of the upper body (including the upper extremity, head, and neck).

Prerequisites
ATEP 150, 180, 250, 255, 256; BIOL 124, 125; HEAL 110; and PHED 300

Corequisite
ATEP 260, 266

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 266 - Practicum II: Physical Assessment of the Upper Body

Credits: 3
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on physical assessment of the upper body.

Prerequisites
ATEP 150, 180, 250, 255, 256, BIOL 124, BIOL 125, HEAL 110, and PHED 300

Corequisite
ATEP 260 and 265

Notes
Formal acceptance to the professional phase of the ATEP; Emergency Cardiac Care (ECC) Certification
ATEP 270 - General Medical Conditions and Pharmacology in Physically Active Populations

Credits: 3
An examination of assessment and management techniques of general medical conditions and pharmacological principles in physically active populations.

Prerequisites
ATEP 150 and 180; BIOL 124 and 125; HEAL 110 and 230; PHED 300

Notes
Formal acceptance to the professional phase of the ATEP

ATEP 350 - Therapeutic Modalities

Credits: 3
Study of the physical principles, physiological effects, indications, and contraindications of therapeutic modalities used in athletic training. Also covers indications, contraindications, physiological effects, special programs, and resistance methods used in the prevention and rehabilitation of athletic injuries.

Prerequisites
ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 256, ATEP 260, ATEP 265, ATEP 266, ATEP 270, BIOL 124, BIOL 125, HEAL 110, HEAL 230, and PHED 300

Corequisite
ATEP 355, ATEP 356

Notes
Formal acceptance to the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 355 - Clinical Techniques III: Therapeutic Modalities

Credits: 3
An examination of the scientific theory and standard operating procedures necessary for the safe application of therapeutic modalities in a physically active patient population.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270; BIOL 124, 125; HEAL 110, 230; PHED 300

Corequisite
ATEP 350 and 356

Notes
Formal acceptance to the professional phase of the ATEP
ATEP 356 - Practicum III: Therapeutic Modalities

Credits: 3
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic modalities.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270; BIOL 124, 125; HEAL 110, 230; and PHED 300

Corequisite
ATEP 350 and 355

Notes
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 360 - Therapeutic Rehabilitation

Credits: 3
A study of the indications, contradictions, physiological effects, special programs, and resistance methods that are used in the prevention and rehabilitation of athletic injuries.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300, 450

Corequisite
ATEP 365 and 366

Notes
Formal acceptance into the professional phase of the ATEP

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 365 - Clinical Techniques IV: Therapeutic Rehabilitation

Credits: 3
A study of the indications, contraindications, physiological effects, special programs, and resistance methods that are used in the prevention and rehabilitation of athletic injuries.
**Prerequisites**
Formal acceptance to the professional phase of the ATEP; ATEP 150, 180, 250, 255, 260, 265, 266, 270, 350, 355, 356, BIOL 124 and 125; HEAL 110 and 230; PHED 300 and 450.

**Corequisite**
ATEP 360 and 366

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ATEP 366 - Practicum IV: Therapeutic Rehabilitation**

Credits: 3
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on therapeutic rehabilitation.

**Prerequisites**
ATEP 150, 180, 250, 255, 260, 265, 266, 270, 350, 355, 356; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

**Corequisite**
ATEP 360 and 365

**Notes**
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ATEP 441 - Practicum in Athletic Training**

Credits: 3
Techniques and procedures in the care and prevention of athletic injuries in a selected environment under certified athletic trainer supervision.

**Prerequisites**
ATEP 150, ATEP 180, ATEP 250, ATEP 255, ATEP 260, ATEP 265, ATEP 266, ATEP 270, ATEP 350, ATEP 355, ATEP 356, ATEP 360, ATEP 365, ATEP 366, ATEP 450, ATEP 456, BIOL 124, BIOL 125; HEAL 110, HEAL 230, PHED 300, PHED 300, PHED 364, and PHED 450

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ATEP 450 - Administration and Management in Athletic Training**
Credits: 3
This lecture/seminar course will focus on the professional management and administrative issues in athletic training. Organization and administration topics will include the preparation in planning, designing, developing, organizing, implementing, directing, and evaluating an athletic training health care program and facility. Current issues in athletic training related to professional conduct and practice will also be discussed.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300 and 450

Corequisite
ATEP 456

Notes
Formal acceptance into the professional phase of the ATEP.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ATEP 456 - Practicum V: Professional Integration
Credits: 6
A clinical practicum field experience under the direct supervision of an Approved Clinical Instructor (ACI) with emphasis on professional skill integration.

Prerequisites
ATEP 150, 180, 250, 255, 256, 260, 265, 266, 270, 350, 355, 356, 360, 365, 366; BIOL 124, 125; HEAL 110, 230; PHED 300, 364, and 450

Corequisite
ATEP 450

Notes
Formal acceptance into the professional phase of the ATEP; Current Emergency Cardiac Care (ECC) Certification.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

ATEP 499 - Independent Study in Athletic Training
Credits: 1-6
Study of a topic area in athletic training research, theory, or practice under direction of a faculty member. May be repeated, but not more than 6 total credits may be earned.

Prerequisites
60 credit hours and instructor approval

Hours of Lecture or Seminar per week: 1-6
Bachelor of Individualized Study

BIS 300 - Understanding Interdisciplinary Studies

Credits: 3
Focuses on literature and issues relevant to interdisciplinary and multidisciplinary studies and the BIS program. Students explore selected topics, develop and gather feedback on individualized concentration proposals, and review BIS program requirements.

Notes
Open only to pre-BIS students and BIS majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIS 390 - The Research Process

Credits: 3
Focuses on skills to develop a research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete senior project.

Prerequisites
BIS 300 and a grade of 2.00 or above in ENGL 302.

Notes
Open only to pre-BIS students and BIS majors.
Students cannot receive credit for both BIS 390 and 391.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIS 391 - The Research Process for Honors

Credits: 3
Focuses on skills to develop an honors-level research project, find and organize relevant information, examine and critique evidence, establish criteria, and create plan to complete Honors Senior Research Project (BIS 490). Approved research proposal required prior to registration in BIS 490.

Prerequisites
Acceptance to pursue honors in the major.

Notes
Students cannot receive credit for both BIS 390 and 391
**BIS 399 - Special Topics**

Credits: 1-3  
Selected topics reflecting interest in specialized areas.

**Prerequisites**  
Open only to degree students in BIS.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**BIS 489 - Directed Readings and Research**

Credits: 1-3  
Readings and research on a topic directly relevant to student's core concentration.

**Notes**  
Open only to pre-BIS students and BIS majors. Individualized sections by arrangement. Guided by instructor with expertise. Topics must be approved by instructor and BIS director prior to enrollment.

**Hours of Lecture or Seminar per week:** 1 to 3  
**Hours of Lab or Studio per week:** 0

**BIS 490 - Senior Project**

Credits: 3  
Project or thesis on a topic directly relevant to student's concentration. Guided by student's faculty advisor and 490 instructor.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
BIS 390

**Corequisite**  
BIS 491

**Notes**  
Open only to BIS majors. Individualized sections for BIS honors. Capstone course in BIS core concentration. Research proposals must be approved by faculty mentor, executive committee, and BIS director prior to enrollment.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIS 491 - Senior Project Presentation

Credits: 1
Focuses on preparation and delivery of a formal presentation of student's BIS 490 project. Includes review of basic presentation techniques.

Prerequisites
BIS 390;

Corequisite
BIS 490.

Notes
Open only to BIS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIS 495 - Career Practicum

Credits: 1-6
Supervised experience in application of specified area.

Prerequisites
Permission of instructor and BIS director.

Hours of Lecture or Seminar per week: 1 to 6
Hours of Lab or Studio per week: 0

Biodefense

BIOD 604 - Introduction to Biodefense I: Bacterial and Toxin Agents

Credits: 3
Covers pathology, metabolism, and threat of bacterial agents that can be used as biological weapons.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 605 - Introduction to Biodefense II: Viral Agents

Credits: 3
Covers pathology, metabolism, and threat of viral agents that can be used as biological weapons.
BIOD 607 - Introduction to Biodefense/Threat Analysis III: Toxins

Credits: 3
Discusses the threat of toxins as biological weapons. Special focus on microbiological toxins, including botulinum toxin, and biochemical action of toxins. Comparison to chemical weapons and debate about classification as such.

BIOD 609 - Biodefense Strategy and Policy

Credits: 3
Introduces students to the biodefense and biosecurity strategies and policies of the United States, other nations, and international organizations. Evaluates the effectiveness of these policies in strengthening defenses, improving intelligence, increasing oversight, enhancing nonproliferation, and reinforcing norms. Examines the interaction of biodefense and biosecurity with homeland, national, and international security.

Prerequisites
BIOD 604 and 605 or permission of instructor.

BIOD 610 - Advanced Topics in Biodefense

Credits: 1-4
Different topics, depending on instructor's specialty. Topics include legal, ethical, scientific, and political aspects of biodefense, emphasizing current problems and research.

Prerequisites
BIOD 604 and 605 or permission of instructor.

Notes
May be repeated when topic is different.

BIOD 620 - Health and Security
Explores issues emerging from the interaction of health and security that represent novel challenges to policy makers confronting a rapidly changing security landscape. Presents the major lines of discourse in the academic literature examining links between health and security. The impact of the AIDS epidemic on national and regional security, the role of health issues in post-Cold War conflict situations, and the security implications of advances in the life sciences.

**Prerequisites**
BIOD 604 and 605 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOD 621 - Ethics and International Security

Credits: 3  
Challenges students to wrestle with dilemmas raised by the desire to behave ethically in an international system in which consensus about ethical matters is absent. Students will develop, apply, and justify their own perspective on an ethical problem related to international security using ethical theory and social science research. Ethical issues related to nuclear, biological, and chemical weapons that confront researchers, policy makers, and practitioners will be addressed.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOD 622 - Negotiating in the International Arena

Credits: 3  
Provides students with the concepts and tools for analyzing complex negotiation processes and introduces them to the challenges facing international negotiators. Students will read about the frameworks and perspectives that have guided the scholarly research on negotiation, as well as the latest findings from that research; analyze complex cases of actual negotiations in the security, trade, and environmental areas; and negotiate key issues on the agendas of nations and international organizations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOD 702 - Biodefense Colloquium

Credits: 1  
Forum for presentation and discussion of original and current research in biodefense.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0
BIOD 705 - Intelligence: Theory and Practice

Credits: 3
Theory and practice of intelligence, including the intelligence cycle, organization of the intelligence community, and the origins and impact of recent reforms. Examines the capabilities and limitations of the different collection disciplines, analytic methodologies and pathologies, and the relationship between intelligence and policy. Analyzes challenges posed by collecting and analyzing intelligence on weapons of mass destruction programs conducted by states and terrorists.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 706 - Nuclear, Biological, and Chemical Weapons Policy and Security

Credits: 3
Explores the causes, conduct, and consequences of the proliferation of nuclear, biological, and chemical weapons. Covers the historical, technological, normative, and strategic factors that have promoted and restrained the spread of these weapons. Addresses the motives for states to develop these weapons and the debate over the security implications of nuclear, biological, and chemical weapon proliferation.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 709 - Nonproliferation and Arms Control

Credits: 3
Examines the array of national and international measures used to slow, halt, and reverse the spread of nuclear, biological, chemical, and missile weapons. Explores the theory and practice of proliferation to provide insights into the supply and demand aspects of proliferation.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 710 - Approaches to Bioweapon Medical Treatment and Response

Credits: 3
Examines research, treatment, and preparedness strategies against natural and human-made biological agents. Focuses on various strategies, including immunological, pharmaceutical, and medical treatment methodologies and designs.
Prerequisites
BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 722 - Examining Terrorist Groups

Credits: 3
Introduction to terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat and counterterrorism strategies.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 723 - Legal Dimensions of Homeland Security

Credits: 3
Introduces the impact of legal issues on homeland security and biodefense. Topics include the origins of the Department of Homeland Security, the relationship between public health and law enforcement, the role of the military in homeland security, trade-offs between privacy and security, legal aspects of public-private cooperation in biodefense and homeland security, quarantine authority and enforcement, ensuring compliance with international treaties, and implementing biosecurity regulations.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 725 - Terrorism and Weapons of Mass Destruction

Credits: 3
Examines the capabilities and intentions of terrorists to acquire and use chemical, biological, radiological, and nuclear (CBRN) weapons. The course provides an in-depth understanding of the history of CBRN terrorism, the current challenges posed by this threat, and the range of national and international policy tools available to address this threat.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOD 726 - Agroterrorism and Food Security

Credits: 3
Analyzes the threat of agricultural terrorism, including assessments of the chemical and biological agents used to disrupt agriculture and livestock, and the national and global economic and social impacts of these disruptions. Also examines strategies for enhancing the security of the food production and supply systems.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 751 - Biosurveillance

Credits: 3
Provides an understanding of the capabilities required to provide reliable early warning of disease outbreaks and identify their etiological agents. Assesses strengths and limitations of physicians, laboratories, epidemiologists, aerosol sensors, and syndromic surveillance systems. Considers challenges posed by the integration and analysis of the information collected by these sources.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 752 - The Role of the Military in Homeland Security

Credits: 3
Analyzes the role that the armed forces play in homeland security, including historical and legal developments, the role of the National Guard, capabilities for crisis and consequence management, and case studies of military assistance to civilian authorities in response to riots, terrorist incidents, and natural disasters.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 760 - National Security Technology and Policy

Credits: 3
Introduces students to the intersection of science, technology, and policy in national security. Will examine the players in the formation of science policy; the roles they play; how the types, uncertainties, and availability of data affect science policy debates; and how science policy decisions are made. Topics to be covered include weapons of mass destruction, nonlethal weapons, nanotechnology, bioengineering, energy security, and pandemic influenza.
Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 761 - Dispersal Patterns of Biological Agents

Credits: 3
Introduction to military and terrorist methods of dispersal patterns. Covers physics of aerosols; engineering and mechanics of building ventilation systems; and mechanical dissemination, including hand-held, automatic, vehicle, and truck-mounted systems. Includes viability of specific agents involved.

Prerequisites
BIOD 604 and 605, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 762 - Into the Hot Zone: Working in a High Threat Environment

Credits: 2
Introductory course covers methodology of working in a Biosafety Level 3 or 4 environment. Special attention to responding to biowarfare or bioterrorism related event.

Prerequisites
BIOD 604 and 605, or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

BIOD 766 - Development of Vaccines and Therapeutics

Credits: 3
Analyzes the process of developing new medical countermeasures against biological weapons and emerging infectious diseases such as SARS and pandemic influenza. Special attention is paid to the scientific, technical, political, regulatory, and economic obstacles to developing new vaccines and therapeutics. Examines the causes and potential solutions of public and private sector failures.

Prerequisites
BIOD 604 and 605 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOD 780 - Master's Supervised Internship

Credits: 1-6
Internship under supervision of qualified professional in biodefense at a government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisites
Permission of program director or advisor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOD 793 - Directed Studies in Biodefense

Credits: 1-3
Individualized study of topics not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, or lab or field study, determined in consultation with instructor.

Prerequisites
Permission of the instructor and program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOD 798 - Master's Research Project in Biodefense

Credits: 3
Research project related to student's concentration under supervision of faculty advisor. Student produces substantial and original contribution to the field of biodefense on the model of an article in a scholarly journal.

Prerequisites
24 credits in BIOD and permission of project director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOD 799 - Master's Thesis in Biodefense

Credits: 1-6
Master's thesis research under direction of thesis committee.

Prerequisites
24 credits in BIOD and permission of thesis committee.

Hours of Lecture or Seminar per week: 0
BIOD 810 - Advanced Seminar in Biodefense

Credits: 3
Explores issues of contemporary and emerging concern in biodefense and biosecurity. Topics may include legal, ethical, scientific, economic, and political aspects of biodefense and biosecurity.

Prerequisites
BIOD 604 and 605, or permission of advisor.

Notes
May be repeated for credit twice when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOD 890 - Doctoral Supervised Internship

Credits: 1-6
Internship under supervision of qualified biodefense professional at government agency, consulting firm, industrial firm, or other acceptable agency.

Prerequisites
Permission of program director or advisor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOD 899 - Directed Research in Biodefense

Credits: 1-12
Research on a pertinent topic in biodefense; scope and subject determined by instructor.

Prerequisites
Approval of program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOD 996 - Doctoral Reading and Research
Credits: 1-9
Independent reading and research on specific biodefense topic under faculty member's direction. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, tutorials, or other formats.

Notes
May be repeated for credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOD 998 - Doctoral Dissertation Proposal

Credits: 1-12
Development of a research proposal, which forms the basis for doctoral dissertation under guidance of dissertation director committee.

Notes
Only 12 credits may be applied to the degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOD 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research under direction of dissertation chair.

Prerequisites
Completion of 998 and advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Bioengineering

BENG 101 - Introduction to Bioengineering

Credits: 3
Surveys the field of bioengineering and the global impact of technology innovation in solving problems in biology and medicine with an emphasis on engineering tools and concepts. Introduces mathematical modeling and analysis of bioengineering problems
through the use of standard software packages for simulation. Discusses the history, ethical/social implications, and career paths in Bioengineering.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

### BENG 380 - Introduction to Circuits and Electronics

Credits: 3  
Builds on simple circuit concepts introduced in PHYS 260. Includes circuit analysis using superposition, equivalent circuits and transient analysis of RL, RC and RLC circuits; sinusoidal excitations, AC steady state analysis; frequency response; operational amplifiers; semiconductor devices such as diodes, field effect and bipolar transistors; and digital logic circuits. (Not intended for those majoring in electrical or computer engineering.)

**Prerequisites**  
Grade of C or better in PHYS 260 and in MATH 214.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

### BENG 381 - Circuits and Electronics Lab

Credits: 1  
Lab associated with BENG 380. Experiments involve DC, transient, filter, operational amplifier and digital circuits. (Not intended for those majoring in electrical or computer engineering.)

**Prerequisites**  
Grade of C or better in PHYS 261.

**Corequisite**  
BENG 380

**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

### BENG 401 - Bioengineering Instrumentation and Design

Credits: 4  
Exposes students to the engineering design process with special focus in medical and biological applications. Tools to be explored range from specialized software (LabView, OrCad, Matlab) to laboratory and machine shop facilities. The semester culminates in the presentation of a group project. Students are expected to leverage their background and apply it to a problem in bioengineering.

**Prerequisites**  
BIOL 213 ECE 320 and ECE 333 all with a grade of C or better.
BENG 402 - Bioengineering Instrumentation and Design Laboratory

Credits: 1
Introduces a project-based laboratory where students are exposed to all available tools from several electrical and computer engineering disciplines. Students will physically implement their own team-based project using a subset of those tools.

Prerequisites
BIOL 213 ECE 320 and ECE 333 all with a grade of C or better.

Corequisite
BENG 401

Notes
Projects are demonstrated during oral presentations toward the end of the semester.

BENG 492 - Senior Advanced Design Project I

Credits: 2
Conception of senior design project in bioengineering and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan.

Prerequisites
90 credit hours applicable to the BSEE degree and COMM 100 and ENGL 302.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

BENG 493 - Senior Advanced Design Project II

Credits: 2
Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion. Completing this course with a C or better satisfies university’s general education synthesis requirement.

Prerequisites
BENG 492, preferably in the preceding semester.

Notes
Implementation of project for which preliminary work was done in BENG 492.
BENG 499 - Special Topics in Bioengineering

Credits: 0-4
Topics of special interest to undergraduates.

Notes
May be repeated for maximum 6 credits if topics substantially differ.

BENG 538 - Medical Imaging

Credits: 3
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learnt in class to real-world problems.

Equivalent to ECE 538

Prerequisites
Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

Bioinformatics

BINF 354 - Foundations in Mathematical Biology

Credits: 3
Interdisciplinary introduction to life sciences for physicists, chemists, engineers, and mathematicians. Combines knowledge from natural sciences, social and behavioral sciences, quantitative reasoning, and information technology. Covers selected topics in ecology, physiology, biochemistry, and behavior. May include biochemical reaction kinetics, Hodgkin-Huxley model for cellular electrical activity, continuous and discrete population interactions, and neural network models of learning. Techniques utilized include ordinary differential equations, difference equations, algebraic equations, and computer simulations.
Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
Completion or concurrent enrollment in all other required general education courses (must include a chemistry course); MATH 114 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 401 - Bioinformatics and Computational Biology I**

Credits: 3

The course covers the following topics and related methodology: protein sequence, structure prediction, and modeling methods; nucleic acid sequence and structure prediction; gene structure prediction in prokaryotes and eukaryotes; elements of system biology. Students will learn programming approaches to solve bioinformatics problems.

**Prerequisites**
BIOL 231, IT 108, IT 208, STAT 344.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 402 - Bioinformatics and Computational Biology II**

Credits: 3

The course is a continuation of BINF401 and studies in-depth several algorithms and methods used in bioinformatics and computational biology. Students will learn sequence alignment and assembly algorithms, hidden Markov models, classification and prediction methods, genome annotation. These techniques will then be applied to current bioinformatics problems. Programming assignments are incorporated in the course program.

**Prerequisites**
BINF 401.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 403 - Bioinformatics and Computational Biology Lab I**

Credits: 1

Laboratories will introduce students to bioinformatics tools designed to answer research problems in the topics covered in lectures, such as sequence alignment, sequence pattern recognition, structural conformation modeling, phylogenetic analysis
methods and image comparisons.

Corequisite
BINF 401.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**BINF 404 - Bioinformatics and Computational Biology Lab II**

Credits: 1
Laboratories will introduce students to research bioinformatics tools relevant to lecture topics such as: the correspondence of measured fragments to parent biomolecules, inference methods for gene and protein networks, predicting system outputs given specified inputs.

Corequisite
BINF 402

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**BINF 450 - Bioinformatics for Life Sciences**

Credits: 4
The use of bioinformatics has become pervasive throughout the life sciences. This course will teach students how to understand the basis of and use of bioinformatics software in database searching, sequence analysis, gene identification, genomics, protein structure and phylogeny.

Prerequisites
BIOL 213 and either BIOL 482 or BIOL 483/CHEM 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**BINF 470 - Molecular Biophysics**

Credits: 3
The course offers a broad introduction into molecular biophysics. The course demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological problems. The course is mainly designed for the students majoring in physics or chemistry, but it is also useful for the biology majors interested in bioinformatics and computational biology.

Equivalent to PHYS 370

Prerequisites
PHYS 307 or CHEM 331 or permission of instructor.
Hours of Lecture or Seminar per week: 3

**BINF 491 - Senior Thesis in Bioinformatics**

Credits: 1
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

**Corequisite**
BINF 401.

**Notes**
An oral progress report with a poster at the fall semester Bioinformatics Student Research Day is required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**BINF 492 - Senior Thesis in Bioinformatics**

Credits: 1
A project is chosen and completed under the guidance of a Bioinformatics Department faculty member.

**Corequisite**
BINF 402.

**Notes**
A written thesis in standard format is required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

**BINF 630 - Bioinformatics Methods**

Credits: 3
Introduction to methods and tools for pairwise sequence comparison, multiple sequence alignment, phylogenetic analysis, protein structure prediction and comparison, database similarity searches, and discovery of conserved patterns in protein sequence and structures.

**Prerequisites**
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**BINF 631 - Molecular Cell Biology for Bioinformatics**

Credits: 3  
Intensive review of biochemistry, molecular biology, and cell biology necessary to begin research in bioinformatics. Topics include protein biochemistry, nucleic acids biochemistry, DNA replication, transcription, and translation, recombinant DNA technology, genomics, molecular structure of genes and chromosomes, and gene expression and control.

**Prerequisites**
Undergraduate background in biochemistry or cell biology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 633 - Molecular Biotechnology**

Credits: 3  
Introduction to the theory and practice of molecular biotechnology, with emphasis on the application of tools in today's society. Includes study of recombinant DNA technology, genomics, and bioinformatics as applied to commercially important products. Lectures reflect more recent advances and applications in the commercial aspects of biology.

**Prerequisites**
Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 634 - Bioinformatics Programming**

Credits: 3  
Data representation, control structures, file input/output, subroutines, regular expressions, debugging, introduction to relational databases. Emphasizes bioinformatics applications including DNA sequence analysis, parsing FASTA and GenBank files, processing BLAST output files, SQL, or equivalent query language.

**Prerequisites**
Graduate standing and computer programming experience, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BINF 636 - Microarray Methodology and Analysis**

Credits: 3  
Theory and practice of genome analysis including genetics, biochemistry, and tools for analyzing global gene expression, and detection and quantification of genes and gene products.

**Prerequisites**
BINF 633, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BINF 637 - Forensic DNA Sciences

Credits: 3  
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to FRSC 560

**Prerequisites**  
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BINF 639 - Introduction to Biometrics

Credits: 3  
Introduction to methods for measuring humans. Topics include face, speaker, fingerprint, and shoeprint recognition; and handwriting analysis. Students develop computer programs to perform many of these tasks.

**Prerequisites**  
CSI 603 and 604 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BINF 650 - Introduction to Bioinformatics Database Design

Credits: 3  
Students will acquire skills needed to exploit public biological databases, and establish and maintain personal databases that support their own research; such skills include learning underlying data models and the basics of DBMS and SQL.

**Prerequisites**  
BINF 634 or equivalent, or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BINF 690 - Numerical Methods for Bioinformatics
Credits: 3
Computational techniques for solving scientific problems focusing on applications in bioinformatics and computational biology. Students develop the ability to convert a quantitative problem into computer programs to solve the problem. Emphasizes efficiency and readability of code.

Prerequisites
CS 112, MATH 113 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 701 - Biochemical Systematics (Biochemistry) Core for Doctoral Studies in Biosciences and Bioinformatics

Credits: 3
Introduction to biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Such studies employ myriad conceptual and technical approaches in their application. Articles from current literature are basis of course offering. The application of molecular techniques within biosciences is now universal. The cell: What is its structure and how does it function? This is the underlying question of course.

Equivalent to BIOS 701

Prerequisites
Admission to PhD program in biosciences or bioinformatics, CHEM 663, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 702 - Research Methods

Credits: 3
Trains students in research methodologies for life sciences. Covers the three phases of biological research projects: experimental design, data collection, and data analysis.

Equivalent to BIOS 702

Prerequisites
Admission to PhD program in bioinformatics or biosciences or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 703 - Bioinformatics Lab Rotation

Credits: 1
Short-term introductory research on a specific topic in computational sciences and informatics under direction of faculty member.
**Prerequisites**  
Permission of instructor.

**Notes**  
May be repeated.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

---

**BINF 704 - Colloquium in Bioinformatics**

Credits: 1  
Seminar presentations in a variety of areas of bioinformatics and computational biology by COS faculty, staff, advanced PhD students, and professional visitors.

**Prerequisites**  
Graduate standing.

**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**BINF 705 - Research Ethics**

Credits: 1  
Examines ethical issues in scientific research, reflecting on purpose and reviewing foundational principles for evaluating ethical issues. Provides skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Students learn to apply critical-thinking skills to design, execution, and analysis of experiments and analysis of ethical issues in research, including use of animals and humans, standards in computer community, and research fraud. Guidelines for data ownership, manuscript preparation, and conduct of people in authority may be presented and discussed.

**Prerequisites**  
Permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**BINF 730 - Biological Sequence Analysis**

Credits: 3  
Fundamental methods for analyzing nucleic acid and protein sequences, including pairwise and multiple alignment, database search methods, profile searches, and phylogenetic inference. Development of probabilistic tools, including hidden Markov models and optimization algorithms. Survey of current software tools.
Prerequisites
A course in molecular biology a course in probability and ability to program in a high-level language or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 731 - Protein Structure Analysis

Credits: 3
Computational methods for analyzing, classifying, and predicting three-dimensional protein structures. Covers theoretical approaches, techniques, and computational tools for protein structure analysis.

Prerequisites
Permission of instructor, or previous courses in molecular biology, biochemistry, and computer programming.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 732 - Genomics

Credits: 3
Surveys computational tools and techniques to study whole genomes, and explores biological basis of genome analysis algorithms. Topics include genome mapping, comparative genomics, and functional genomics.

Prerequisites
General biology programming experience CSI 700 or equivalent CSI 731 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 733 - Gene Expression Analysis

Credits: 3
Analyzes gene expression data. Topics include cluster analysis and visualization of expression data, inference of genetic regulatory networks, and theoretical models of genetic networks.

Prerequisites
Permission of instructor; ability to program in a high-level language and a course in molecular biology: S-Plus or Matlab experience recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 734 - Advanced Bioinformatics Programming
Credits: 3
Topics include algorithm design, complex data structures, object oriented programming, relational databases, designing modules, and graphics and web programming. Students complete a bioinformatics programming project.

Prerequisites
BINF 634, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 739 - Topics in Bioinformatics

Credits: 3
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 740 - Introduction to Biophysics

Credits: 3
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Prerequisites
Undergraduate courses in general physics, calculus, and biology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 741 - Introduction to Computer Simulations of Biomolecules

Credits: 3
Details computational methods in biomolecular simulations, such as molecular dynamics and Monte Carlo algorithms. Special emphasis given to practical applications. Reviews most recent advances in biomolecular simulations.

Prerequisites
Graduate standing and good programming skills BINF 690 and 701 or permission of instructor.
BINF 751 - Biochemical and Cellular Systems Modeling

Credits: 3
Mathematical and computational methods for analysis of cellular and subcellular processes. Topics may include ion channels, whole cell models, intracellular signaling, biochemical oscillations, pathway modeling, parameter estimation, and sensitivity analysis.

Prerequisites
Calculus and knowledge of a computer programming language; and BINF 690 and 701; or permission of instructor.

Notes
Course in differential equations is recommended.

BINF 760 - Machine Learning for Bioinformatics

Credits: 3
Machine learning and data mining methods relevant to application to problems in computational biology. Methods include decision trees, random forests, rule learning methods, support vector machines, neural networks, genetic algorithms, instance-based learning, Bayesian networks, and evaluation metrics for learning systems. Applications include cancer prediction, gene finding, protein function classification, gene regulation network inference, and other recent bioinformatics applications selected from the literature.

Prerequisites
BINF 630, BINF 631, and BINF 634 or permission of instructor.

Notes
In addition to lectures from the instructor, students will present papers from the literature and complete a machine learning project.

BINF 796 - Directed Reading and Research

Credits: 1-6
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisites
Permission of instructor.

Notes
May be repeated

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BINF 798 - Research Project

Credits: 3
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

Prerequisites
12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BINF 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

BINF 820 - Advanced Topics in Molecular Cell Biology

Credits: 3
Topics may include cell structure, biomembranes and cell architecture, cell signaling, receptor activation, gene expression and control, protein targeting and trafficking, and cell cycle regulation.

Prerequisites
BINF 631 or equivalent.

Notes
Advanced molecular and cellular biology foundation for BINF students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 831 - Structural Genomics Project
Credits: 3
Covers knowledge-based, large-scale protein structure analysis; classification and prediction of protein structure and function; and other current research topics in structural genomics. Projects address entire research enterprise from developing and defending proposal to peer-reviewed publication.

Prerequisites
BINF 731, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 841 - Research Topics in Biomolecular Simulations

Credits: 3
Research-oriented course combining lectures and work on individual projects in biomolecular simulations. Topics include protein and peptide aggregation, binding, and unfolding and folding.

Prerequisites
BINF 741, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BINF 996 - Doctoral Reading and Research

Credits: 1-6
Reading and research on specific topic in computational sciences and informatics under direction of faculty member.

Prerequisites
Admission to doctoral program and permission of instructor.

Notes
May be repeated.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BINF 998 - Doctoral Dissertation Proposal

Credits: 1-12
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Prerequisites
Permission of advisor.

Notes
May be repeated.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/IP

**BINF 999 - Doctoral Dissertation**

Credits: 1-12  
Doctoral dissertation research under direction of dissertation director.

**Prerequisites**  
Admission to doctoral candidacy.

**Notes**  
May be repeated, but no more than 24 credits in BINF 998 and 999 may be applied to doctoral degree requirements.

**Biology**

*See EVPP, Environmental Science and Public Policy, for additional related course work.*

**BIOL 103 - Introductory Biology I**

Credits: 4  
Topics include chemistry of life, cell structure and function, Mendelian genetics, evolution, and diversity of life.

Satisfies General Education Requirement: Natural science Lab

**Notes**  
Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring, Summer

**BIOL 104 - Introductory Biology II**

Credits: 4  
Topics include animal (including human) structure, function, homeostatic mechanisms, organ systems, behavior, higher plant systems, and major concepts in ecology.
Satisfies General Education Requirement: Natural science Lab

Notes
Students are strongly urged to take BIOL 103 prior to BIOL 104. Survey course suitable for any major. May not be taken after BIOL 200-level or above courses have been taken.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 105 - Introductory Biology I Laboratory

Credits: 1
The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented.

Prerequisites
Permission of BIOL 103/104 coordinator and department chair.

Notes
Not available to students who have taken BIOL 103 or the equivalent.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

BIOL 106 - Introductory Biology II Laboratory

Credits: 1
The structure and function of major organ systems of animals and an examination of the structure and function of plants, emphasizing the higher plants.

Prerequisites
Permission of BIOL 103/104 coordinator and department chair.

Notes
Not available to students who have taken BIOL 104 or the equivalent.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

BIOL 124 - Human Anatomy and Physiology

Credits: 4
Introduction to structure and function of body's major organ systems.

Notes
Should be taken in sequence. Does not satisfy natural science requirement for BA in CAS.
BIOL 125 - Human Anatomy and Physiology

Credits: 4
Introduction to structure and function of body's major organ systems.

Notes
Should be taken in sequence. Does not satisfy natural science requirement for BA in CAS.

BIOL 213 - Cell Structure and Function

Credits: 4
For science majors and preprofessionals in life sciences. Introduction to cell chemistry, metabolism, and genetics.

Satisfies General Education Requirement: Natural science Lab

BIOL 225 - Human Reproduction and Sexuality

Credits: 3
Examines anatomy and physiology of human reproductive systems, physiology of sexual intercourse, normal pregnancy, birth, congenital conditions, sex determination and its expression, diseases of reproductive organs, and technical developments related to reproduction.

Notes
Not available for biology major or minor credit.

BIOL 245 - Plant Communities

Credits: 4
BIOL 246 - Introductory Microbiology

Credits: 3
Introduction to microbial cell structure, physiology, and pathogenicity. Emphasizes control of microorganisms, host-parasite interactions including immunology, and viral and bacterial pathogens.

Prerequisites
C or better in BIOL 124 and 125, one year of general biology, or permission of instructor.

Corequisite
BIOL 306.

Notes
Not available for biology major credit. Not available to students who have taken BIOL 213 or 418.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

BIOL 301 - Biology and Society

Credits: 3
Biological problems facing society including pollution, cloning, emerging diseases, global warming, and overpopulation.

Satisfies General Education Requirement: Synthesis requirement

Equivalent to EVPP 421

Prerequisites
BIOL 103 and 60 credits, or permission of instructor.

Notes
Not available for biology major or minor elective credit. See Schedule of Classes for current topic; may be repeated if topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 303 - Animal Biology

Credits: 4
Emphasizes structure and function of vertebrates, but surveys all animal groups and protozoa. Also covers evolutionary theory, and evolutionary history of major animal groups.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
C or better in BIOL 213, or permission of instructor.

**Hours of Lecture or Seminar per week**: 3  
**Hours of Lab or Studio per week**: 3  
**When Offered**: Fall, Spring, Summer

**BIOL 304 - Plant Biology**

Credits: 4  
Introduction to study of plants, their structure, development, nutrition, and ecology. Emphasizes flowering plants, but surveys all groups and their phylogenetic relationships.

Satisfies General Education Requirement: Natural science Lab

**Prerequisites**  
C or better in BIOL 213, or permission of instructor.

**Hours of Lecture or Seminar per week**: 3  
**Hours of Lab or Studio per week**: 3  
**When Offered**: Fall, Spring, Summer

**BIOL 305 - Biology of Microorganisms**

Credits: 3  
Morphology, physiology, and pathogenicity of certain groups of bacteria, fungi, and viruses; stresses host-parasite interactions.

**Prerequisites**  
C or better in BIOL 213, or permission of instructor.

**Corequisite**  
BIOL 306.

**Hours of Lecture or Seminar per week**: 3  
**Hours of Lab or Studio per week**: 0  
**When Offered**: F, S, SUM

**BIOL 306 - Biology of Microorganisms Laboratory**

Credits: 1  
Laboratory techniques in culturing, staining, and identifying microorganisms.

**Corequisite**  
BIOL 246 or 305.

**Hours of Lecture or Seminar per week**: 0  
**Hours of Lab or Studio per week**: 3  
**When Offered**: F, S, SUM
BIOL 307 - Ecology

Credits: 4
Physical environment, energy flow, structure and function of populations, dynamics of communities, and succession.

Prerequisites
BIOL 303 or 304 or EVPP 110-111, at least one semester of college mathematics MATH 108, 111 or higher.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring, Summer

BIOL 309 - Introduction to Oceanography

Credits: 3
Introduction to chemical, biological, and geological aspects of oceanic environment.

Equivalent to GEOL 309

Prerequisites
GEOL 101 or 111 and BIOL 103 or 213 or permission of instructor.

Notes
May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

BIOL 311 - General Genetics

Credits: 4
Basic principles of heredity and modern developments in this field.

Prerequisites
BIOL 213, 303, 304, 305, 306 all completed with no more than one D; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: F, S, SUM

BIOL 312 - Biostatistics
Use of probability and descriptive and inferential statistical techniques in interpreting biological data.

Prerequisites
BIOL 303 and 304, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: F

**BIOL 313 - Human Genetics for the Social Sciences**

Credits: 3
Emphasizes topics of interest to students in social sciences, but open to any non-biology major. Topics include human genome and its inheritance; nature versus nurture; genetic disease; genetics of sex determination, intelligence, personality, and mental illness; genetic differences within and between populations; and evolution of human beings.

Prerequisites
One year of biology, or permission of instructor.

Notes
Not available for biology credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S, odd

**BIOL 318 - Conservation Biology**

Credits: 3
Introduction to science used to identify species in need of conservation, and techniques to manage and protect organisms.

Prerequisites
BIOL 307 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 320 - Comparative Chordate Anatomy**

Credits: 4
Compares anatomy and morphology of major chordate groups. Lab emphasizes shark, mudpuppy, cat, and rabbit.

Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week: 2
BIOL 322 - Developmental Biology

Credits: 4
Principles of embryonic development and differentiation in animal species at cellular, molecular, tissue, and whole organism levels.

Prerequisites
BIOL 303 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: F

BIOL 326 - Animal Physiology

Credits: 3
General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Prerequisites
BIOL 213, 303, and 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 327 - Animal Physiology Laboratory

Credits: 2
Investigation of invertebrate and vertebrate physiology. Emphasizes responses to environmental changes.

Prerequisites
BIOL 326

Corequisite
BIOL 326

Notes
Students are required to have concurrent registration in the Recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3
BIOL 331 - Invertebrate Zoology

Credits: 4
Survey of invertebrate phyla, excluding insects, showing morphology, phylogeny, and general biology of these groups.

Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 332 - Insect Biology

Credits: 4
Survey of insects including taxonomy, morphology, physiology, behavior, ecology, and economic importance.

Prerequisites
BIOL 303, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 333 - Vertebrate Zoology

Credits: 4
Introduces vertebrates with emphasis on systematics, life history, behavior, and ecology. Laboratory emphasis on identification and natural history of local fauna.

Prerequisites
BIOL 307 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 344 - Plant Diversity and Evolution

Credits: 4
Investigates the diversity of vascular plants, including angiosperms, their evolutionary relationships, and the bases of their classification and identification.

Prerequisites
BIOL 304, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 345 - Plant Ecology

Credits: 4
Investigates the interaction of plants with their abiotic and biotic environment, native Virginian plant communities and their causes, and global processes affecting plant distributions over geological time. 2 Saturday field trips required.

Prerequisites
BIOL 304, or permission of instructor.

Notes
Three Saturday or Sunday field trips required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 350 - Freshwater Ecosystems

Credits: 4
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Lectures, field trips, and lab exercises teach physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms.

Prerequisites
CHEM 211/212 or CHEM 155/156 and either EVPP 110/111 or BIOL 307.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 355 - Ecological Engineering and Ecosystem Restoration

Credits: 4
This undergraduate course will provide definition, classification and practice of ecological engineering and ecosystem restoration. The course describes general system ecology, ecosystem restoration, and the utilization of natural processes to provide ecosystem services to society and benefits to nature. The content of the course is broad and transdisciplinary, drawing extensively from the natural sciences, the social sciences and the humanities. The objective of this course is to provide students with a systems-oriented perspective on environmental studies. Specifically, the course will study principles in general system ecology and ecological engineering and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with field microcosms/meocosms in a newly established Wetland Mesocosm Compound on the campus. This course will involve a field trip (1-2 days).

Equivalent to EVPP 355

Prerequisites
CHEM 211, BIOL 307 and PHYS 243.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 374 - Biogeography: Space, Time, and Life

Credits: 3
A survey of the relationship between the distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to GGS 321

Prerequisites
BIOL 303 and 304 or GGS 122 or GGS 102 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 377 - Applied Ecology

Credits: 3
Introduction to ecosystem concepts and their applications to natural and managed ecosystems.

Prerequisites
8 credits of biology, geology, or chemistry; 60 credits; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 385 - Biotechnology and Genetic Engineering

Credits: 3
Emphasizes theory and applications, including significance and societal implications of biotechnology applied to medicine, agriculture, and environment.

Prerequisites
BIOL 311; CHEM 211, 212; MATH 110 or 113.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 402 - Applied and Industrial Microbiology

Credits: 3
Biology of microorganisms of ecological and industrial significance. Includes food production, spoilage and preservation, fermentation technology, waste disposal, water purification, biodeterioration, and decomposition.

Prerequisites
BIOL 213, 305, 306; CHEM 211, 212; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 403 - Techniques in Applied and Industrial Microbiology**

Credits: 1  
Lab exercises illustrate basic and applied methodologies, including isolation of commercially useful strains. Discusses production and purification of industrial products.

**Prerequisites**  
BIOL 213, 305, 306; CHEM 211, 212.

**Corequisite**  
BIOL 402, or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**BIOL 404 - Medical Microbiology**

Credits: 3  
Basic principles of infectious diseases caused by bacteria and viruses. Discusses genetics and molecular mechanisms of pathogenicity.

**Prerequisites**  
BIOL 305 and 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 405 - Microbial Genetics**

Credits: 4  
Study of structure and function of bacterial DNA, emphasizing mechanisms of gene transfer, expression and regulation. Introduces DNA repair, mutation, and life cycles of bacteriophage.

**Prerequisites**  
BIOL 305 and 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**BIOL 406 - Microbial Physiology and Metabolism**
Credits: 4
Study of complexity and diversity of microbial physiology and metabolism with emphasis on bacteria. Nutrition, growth, transport, and anabolic and catabolic processes are emphasized. Laboratory includes quantification of cellular macromolecules, enzyme purification and kinetics, column chromatography, and bacterial responses to environmental stimuli.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 407 - Microbial Diversity

Credits: 4
Studies effect of microorganisms on ecological and medical phenomena. Stresses evolution of microbial species, biochemical cycling, and species interactions. Laboratory stresses use of cultural, biochemical, and phylogenetic methods to study microbial isolation, metabolism, and identification.

Prerequisites
BIOL 305 and 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 411 - Advanced General Genetics

Credits: 3
Topics include quantitative genetics, extrachromosomal inheritance, and special techniques such as mutation screening, developmental genetics, cancer genetics, behavior genetics, evolutionary genetics, and ethics of genetic technology.

Prerequisites
C or better in BIOL 311 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 417 - Selected Topics in Molecular and Cellular Biology

Credits: 1-4
Study of current topics in molecular and cellular biology. Lecture, laboratory.

Prerequisites
BIOL 311 or 482, or permission of instructor.

Notes
Topics vary. May be repeated for credit.
**Hours of Lecture or Seminar per week: 0-3**
**Hours of Lab or Studio per week: 0-6**

**BIOL 418 - Current Topics in Microbiology**

Credits: 3  
Study of current topics in microbiology.

**Prerequisites**  
BIOL 305 and 306.

**Notes**  
Topics vary. May be repeated for credit.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**BIOL 420 - Vaccines**

Credits: 3  

**Prerequisites**  
BIOL 305/306.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**BIOL 421 - Genetics of Human Diseases**

Credits: 3  
Emphasizes strategies used for identification of genes involved in human genetic diseases. Both monogenic and complex human genetic diseases, as well as principles of genetic screening and counseling, will be presented.

**Prerequisites**  
BIOL 311.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**BIOL 422 - Stem Cell Biology and Regenerative Medicine**
Credits: 3
A broad overview of the biological principles governing stem cell populations. The functional roles stem cells play in regulating normal development and contributing to disease-state pathologies. An examination of the therapeutic potential of stem cells through "regenerative medicine."

**Prerequisites**

BIOL 311.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 425 - Human Physiology**

Credits: 3  
Organ system approach to study of homeostasis, including cardiovascular, respiratory, renal, digestive, endocrine, and nervous system functions.

**Prerequisites**

BIOL 213, 303, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 433 - Selected Topics in Plant Biology**

Credits: 1-4  
Lecture or field course in botany. Topic varies with instructor's specialty.

**Prerequisites**

BIOL 304, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0-6

---

**BIOL 435 - Selected Topics in Biology**

Credits: 0-4  
Topics vary with instructor's specialty. May be repeated only with permission of department chair.

**Prerequisites**

Permission of instructor.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0-6
**BIOL 440 - Field Biology**

Credits: 1-4  
Directed field studies emphasizing ecology and behavior. Topics vary but include design of field manipulations, data collection and analysis, and introduction to organisms of study site.

**Prerequisites**  
BIOL 303, 304, and 60 credits, or permission of instructor.

**Notes**  
Students bear cost of required field trips. May be repeated once with permission of department chair. Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.

**Hours of Lecture or Seminar per week:** 0-2  
**Hours of Lab or Studio per week:** 3-9

---

**BIOL 446 - Environmental Physiology**

Credits: 3  
Physiological responses of animals to environmental factors and changes in natural environment. Topics include biorhythms and adaptation to temperature, high pressure, and altitude. Emphasis on vertebrates.

**Prerequisites**  
BIOL 326 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 449 - Marine Ecology**

Credits: 3  
Plants and animals of marine environments and physical and chemical conditions that affect their existence.

**Prerequisites**  
BIOL 307 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 452 - Immunology**

Credits: 3  
Topics include structure and function of immunoglobulins, role of cell-mediated immunity, protective role of immune system, and disease and injury related to malfunctions of immune system.
Prerequisites
BIOL 213, 305, 306, and 311; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

**BIOL 453 - Immunology Laboratory**

Credits: 1
Techniques relevant to BIOL 452, including enzyme-linked immunoabsorbant assay, immunodiffusion, protein electrophoresis, and immune fixation.

Prerequisites
BIOL 452

Corequisite
BIOL 452

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

**BIOL 459 - Fungi and Ecosystems**

Credits: 3
Considers impact of fungi on ecosystems in terms of biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisites
BIOL 304, course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**BIOL 465 - Histology**

Credits: 4
Microscopic structure of animal tissues and organs, with emphasis on vertebrates.

Prerequisites
BIOL 303 and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 470 - Dinosaur Biology

Credits: 3
An introduction to the evolution, diversity, and biology of the dinosaurs and their descendents. How current biological knowledge is used to estimate and inter the morphology, physiology and ecology of these extinct animals will be emphasized.

Prerequisites
60 hours and BIOL 307.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

BIOL 471 - Evolution

Credits: 3
Process of evolution emphasizing role of genetics, properties of populations, and population differentiations.

Prerequisites
BIOL 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

BIOL 472 - Introductory Animal Behavior

Credits: 3
Study of mechanisms, functions, and evolution of behavior.

Prerequisites
BIOL 303 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 473 - Introductory Laboratory in Animal Behavior

Credits: 1
Field or laboratory study in animal behavior with emphasis on mechanisms, functions, and evolution of behavior. Stresses experimental design and analysis of data. Writing-intensive laboratory.

Corequisite
BIOL 472.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
BIOL 482 - Introduction to Molecular Genetics

Credits: 3
Basic concepts of structure and function of genetic material at molecular level.

Prerequisites
BIOL 213, 305, and 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 483 - General Biochemistry

Credits: 4

Prerequisites
BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 484 - Eukaryotic Cell Biology

Credits: 3
Structure and function of cell membranes and organelles with regard to cellular transport, sorting, compartmentalization, signaling, motility, and cell division.

Prerequisites
BIOL 311, 483; MATH 110 or 113; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 485 - Eukaryotic Cell Biology Laboratory

Credits: 1
Laboratory experiments using cell biology techniques, including microscopy, spectrophotometry, centrifugation, chromatography, and electrophoresis.

Corequisite
BIOL 484 or permission of instructor.
BIOL 486 - Molecular Biology and Biotechnology Laboratory

Credits: 2
Introduction to theory, techniques, and practices used in modern molecular biotechnology laboratories.

Prerequisites
BIOL 385 or 482.

BIOL 492 - Senior Seminar

Credits: 1
Weekly seminar course dealing with recent advances in biology. Topics selected from recent publications in the field. May be repeated for credit.

Prerequisites
BIOL 307, 311 and 90 hours.

BIOL 493 - Honors Research in Biology

Credits: 1-3
Laboratory or field investigation under supervisor's guidance. Total limit for BIOL 440, 493, 495 is 9 credits towards the 44 credits required for the BS, and only 4 credits towards the 32 credits for the BA, not to exceed 4 credits in any one semester.

Prerequisites
Admission to the Biology Honors Program.

BIOL 494 - Honors Seminar in Biology

Credits: 1
Weekly seminar course dealing with recent advances in biology.
Prerequisites
Admission to department honors program, and permission of instructor.

Notes
Topics selected from recent publications in field. May be repeated for credit six times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: F, S

BIOL 495 - Directed Studies in Biology

Credits: 1-2
Study of a topic not otherwise available to student. May involve reading assignments, tutorials, lectures, papers, presentations, or field or laboratory study, determined in consultation with instructor.

Prerequisites
Permission of instructor and department chair.

Notes
May be taken for 1 to 2 credits and repeated once for a total of 2 credits. Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOL 497 - Special Problems in Biology

Credits: 1-4
Lab or field project leading to written report of research. Research and paper completed under instructor's guidance.

Prerequisites
60 credits, and permission of instructor and department chair.

Notes
Total limit for 440, 495, and 497 is 6 credits toward 44 credits required for BS, and only 4 credits toward 32 credits for BA, not to exceed 4 credits in any one semester.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOL 501 - Microbial Diversity: An Organismal Approach

Credits: 3
In-depth study of nonpathogenic microbial world, emphasizing detection, enumeration, and classification of microorganisms; their physiological and evolutionary relationships; and biotechnological applications.
**Prerequisites**
Undergraduate course in microbiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**BIOL 506 - Selected Topics in Microbiology**

Credits: 1-4  
Topic depends on instructor's specialty.

**Prerequisites**
BIOL 305, 306, or permission of instructor.

**Notes**
May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0-6

**BIOL 507 - Selected Topics in Ecology**

Credits: 0-4  
Topic depends on instructor's specialty.

**Prerequisites**
Course in ecology and permission of instructor.

**Notes**
May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0-6

**BIOL 508 - Selected Topics in Animal Biology**

Credits: 1-4  
Topic depends on instructor's specialty.

**Prerequisites**
BIOL 303, or permission of instructor.

**Notes**
May be repeated only with permission of department chair.
Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

**BIOL 509 - DNA Analysis of Biological Evidence**

Credits: 3
Historical development of DNA profiling methods, current DNA typing techniques and the ongoing development of new forensic DNA typing methods. Emphasis will be placed on various analytical techniques used in the analysis of forensic evidence.

**Prerequisites**
BIOL 311 or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Spring

**BIOL 510 - Forensic DNA Analysis Laboratory**

Credits: 1
Provides hands on experience with the methodologies of forensic DNA analysis.

**Prerequisites**
BIOL 311

When Offered: Spring

**BIOL 515 - Introduction to Neurobiology**

Credits: 2
Introduction to neurobiology with an overview of embryological development of nervous system in evolutionary context. Regional and systems neuroanatomy is introduced by study of mammalian visual system with a comparative perspective.

**Prerequisites**
Completion of 60 credits, including PSYC 372; or BIOL 213 and 303.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**BIOL 516 - Mammalian Neurobiology**

Credits: 3
Functional anatomy of mammal brains emphasizing regional and systems neuroanatomy of humans. Correlates with material from clinical neurology, where possible. Laboratory component includes brain dissections and clinical correlations.

**Prerequisites**
BIOL 515.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

---

**BIOL 518 - Conservation Biology**

Credits: 3  
Introduction to science used to identify species in need of conservation, and techniques to manage and protect organisms.

**Prerequisites**

BIOL 307, 311, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 520 - Systematics in Complex Angiosperm Families**

Credits: 3  
Morphology and speciation of more complex families such as Poaceae, Cyperaceae, and Asteraceae. Laboratory emphasizes identification of specimens, and acquaintance with taxonomic literature.

**Prerequisites**

BIOL 344 or 534, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6

---

**BIOL 532 - Animal Behavior**

Credits: 3  
Ecological aspects of animal behavior.

**Prerequisites**

Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 533 - Selected Topics in Plant Biology**

Credits: 1-4  
Topic depends on instructor's specialty.
Prerequisites
Course in plant biology or permission of instructor.

Notes
May be repeated only with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 534 - Advanced Plant Taxonomy

Credits: 3
Laboratories consist of field trips, and collection and identification of specimens.

Prerequisites
Course in plant taxonomy, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

BIOL 535 - Ancient Plants and their Environment

Credits: 3
Study of factors involved in origin, history, and extinction of fossil plants, including adaptations, paleoecology, and major geological events.

Prerequisites
BIOL 304, course in paleontology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 536 - Ichthyology

Credits: 4
Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

Equivalent to EVPP 536

Prerequisites
Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
BIOL 537 - Ornithology

Credits: 4
Study of evolution, systematics, physiology, ecology, and behavior of birds, emphasizing field work.

Prerequisites
Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6
When Offered: AS

BIOL 538 - Mammology

Credits: 4
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing field work.

Prerequisites
Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 539 - Herpetology

Credits: 4
Study of evolution, systematics, physiology, ecology, and behavior of amphibians and reptiles, emphasizing field work.

Prerequisites
Course in ecology, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

BIOL 543 - Tropical Ecosystems

Credits: 4
Terrestrial, aquatic, and marine ecosystems in tropics, emphasizing plant communities, plant-animal interactions, and role of humans in the tropics.

Notes
Field trip to tropics required as part of laboratory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: S, even numbered years
BIOL 547 - Terrestrial Plant Ecology

Credits: 4
Considers community organization, development, productivity, and mineral cycling; interactions between plants and competitors; herbivores; and environmental factors, especially light, water, and soil. Field work and laboratory emphasize data collection and statistical analysis.

Prerequisites
Course in ecology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 553 - Advanced Topics in Immunology

Credits: 3
Comprehensive study of immunologic mechanisms as they pertain to immunologic diseases and transplantation.

Prerequisites
BIOL 452, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 556 - Advanced Topics in Microbial Physiology and Metabolism

Credits: 3
Comprehensive study of microorganisms including growth, nutrition, transport, autotrophic and heterotrophic metabolism, regulation, and differentiation.

Prerequisites
BIOL 305, 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 559 - Fungi and Ecosystems

Credits: 3
Considers impact of fungi on ecosystems in terms of their effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through their activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Prerequisites
BIOL 304 or a course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 561 - Comparative Animal Physiology**

Credits: 3  
Detailed study of selected physiological systems of invertebrates and vertebrates, emphasizing current research.

**Prerequisites**  
BIOL 326, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 563 - Virology**

Credits: 3  
Fundamental concepts of nature of viruses, virus classification, cultivation, and biochemistry. Emphasizes bacteriophage and animal viruses.

**Prerequisites**  
BIOL 482, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

**BIOL 564 - Techniques in Virology**

Credits: 2  
Basic techniques of animal virus propagation, isolation, and quantitation.

**Prerequisites**  
BIOL 563, virology, and entrance into the PhD/biosciences or MS/biology program; or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**BIOL 566 - Cancer Genomics**

Credits: 3  
Review of modern concepts in cancer biology including taxonomy of human tumors, common cancer syndromes, and genome
instability. Genetic and molecular studies of tumor cell proliferation, migration, invasion, and death.

**Prerequisites**
Course in genetics or biochemistry.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 568 - Advanced Topics in Molecular Genetics**

Credits: 3  
Comprehensive study of regulatory mechanisms controlling gene expression in viruses, prokaryotes, and eukaryotes, emphasizing current research.

**Prerequisites**
BIOL 482, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 572 - Human Genetics**

Credits: 3  
Inheritance of humans emphasizing current problems, including genetic control of metabolic diseases, effects of radiation and chemical agents in environment, and directed genetic change.

**Prerequisites**
BIOL 311, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 573 - Developmental Genetics**

Credits: 3  
Genetic approaches to problem of eukaryotic development, emphasizing current research on regulation of gene enzyme systems.

**Prerequisites**
BIOL 311, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 574 - Population Genetics**
Credits: 4
Genetic structure and dynamics of populations, both real and ideal.

Prerequisites
BIOL 307 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 575 - Selected Topics in Genetics

Credits: 1-4
Different topics in different years, including molecular, developmental, physiological, and classical genetics, emphasizing current problems and research.

Prerequisites
BIOL 311, or permission of instructor.

Notes
May be repeated once with permission of department chair.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 576 - Microbial Ecology of Soils

Credits: 3
Detection, identification, and physiological role of microorganisms in soils from root zone to deep subsurface. Emphasizes interactions of microorganisms, viruses through protests, and their functions in soil.

Prerequisites
BIOL 305, 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 577 - Biogeochemistry: A Global Perspective

Credits: 3
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and their integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Prerequisites
Introductory courses in ecology and chemistry, or permission of instructor.
BIOL 578 - Mutation, DNA Repair, and Environmental Contamination

Credits: 3
Overview of relationship between environmental contamination and genetic damage. Covers types of contamination that result in mutations, and molecular mechanisms of DNA damage and repair.

Prerequisites
BIOL 307 and 311.

BIOL 579 - Molecular Evolution and Conservation Genetics

Credits: 3
Evolution of genes and gene families at molecular level, including gene duplication and divergence, positive and negative selection, genetic drift, and molecular clocks. Also includes selected applications in conservation genetics, such as molecular phylogenetics and estimates of population size.

Prerequisites
BIOL 311.

Corequisite
BIOL 471, or permission of instructor.

BIOL 580 - Computer Applications for the Life Sciences

Credits: 3
Studies computer use in biological sciences. Combines lectures, supervised exercises on mainframe and microcomputers. Students present seminar on advanced application, and complete project using computer to fulfill major assignment associated with another course or employment.

Prerequisites
12 credits of biology and one year of college mathematics, or permission of instructor.

BIOL 581 - Estuarine and Coastal Ecology
Credits: 3
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Prerequisites
Course in Ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1
Continues EVPP 546/BIOL 546 as the laboratory section focusing on the approach and methods of estuarine research, including analysis and communication of results.

Corequisite
BIOL/EVPP 581

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

BIOL 583 - General Biochemistry

Credits: 4
Structure and function of proteins, carbohydrates and lipids, enzymology, and metabolism and its controls. Emphasizes chemistry of nitrogen compounds.

Prerequisites
BIOL 213; CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

BIOL 585 - Eukaryotic Cell Biology Laboratory

Credits: 1-2
Selected topics of laboratory procedures used in the study of eukaryotic cells.

Prerequisites
BIOL 484 or BIOL 682, or permission of instructor.

Notes
May be repeated one time with permission of program director.

Hours of Lecture or Seminar per week: 0-1
Hours of Lab or Studio per week: 3-6
BIOL 587 - Soil Ecology

Credits: 3
Introduction to physical, chemical, and biological processes that govern development of soils and their ecological functions. Emphasizes central role that plants, microbes, and animals play in soil processes. Provides some training in system of soil classification and current methods to study soils.

Prerequisites
Introductory courses in general ecology or environmental science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 588 - Global Changes in Climate and Ecology

Credits: 3
Focuses on global-level changes that influence ecology. Introduces climate system - past, present, and future - emphasizing links between ecological systems and changes in climate, land use, and element cycling. Topics include responses of forests, oceans to climate change; effects of elevated carbon dioxide on plants; effects of ultraviolet radiation on aquatic systems; salt marsh responses to sea level rise; global eutrophication; desertification; carbon sequestration; and public policy implications of global change science.

Prerequisites
Introductory courses in general ecology or environmental science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 589 - Teaching Practicum

Credits: 1
Experience teaching biology in laboratory or in field under supervision of faculty member.

Prerequisites
Permission of instructor, chair, and course coordinator (if any).

Notes
Undergraduate assists instructor. May be repeated once.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

BIOL 590 - Forensic Entomology
Credits: 3
Explores use of insects and arthropods in forensic science as it pertains to investigations of human and animal deaths.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

### BIOL 607 - Fundamentals of Ecology

Credits: 3
Overview of concepts in physiological, population, community, and ecosystem ecology. Restricted to graduate students with little or no background in ecology.

Equivalent to EVPP 607

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### BIOL 608 - Topics in Biology

Credits: 1-4
In-service course to strengthen and update teacher's knowledge of biology. Topics include organismal biology, cell biology, ecology, microbiology, or genetics.

**Prerequisites**
Employment or anticipated employment as science teacher.

**Notes**
Not available for credit toward MS in biology, or PhD in environmental science and public policy. May be repeated for credit with permission of department chair.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 0-9

### BIOL 610 - Bioremediation: Theory and Applications

Credits: 3
Provides basis for understanding proper application of bioremedial technologies to treatment for hazardous wastes. Includes evaluation of data to determine successful treatment.

**Prerequisites**
Course in microbiology and organic chemistry or biochemistry, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**BIOL 611 - Techniques in Environmental Microbiology**

Credits: 2  
Laboratory exercises illustrate techniques to demonstrate microbial degradation, detection of microbes, isolation, and evaluation of physiological and genetic characteristics.

**Prerequisites**  
Laboratory course in microbiology, or permission of instructor.

**Notes**  
Open first to those enrolled in BIOL 610.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 4

---

**BIOL 622 - Methods and Principles of Animal Taxonomy**

Credits: 3  
Theoretical basis of techniques in animal classification, emphasizing practical application to laboratory problem dealing with a particular animal group.

**Prerequisites**  
Course in evolution, or permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 6

---

**BIOL 640 - Environmental Biology**

Credits: 3  
Patterns of climate and weather, tectonics, soil formation, and surface water and groundwater movements.

**Prerequisites**  
Course in ecology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**BIOL 643 - Microbial Ecology**

Credits: 4  
Study of relationships between microorganisms and their natural environment, and methodology for observing their natural environment and biochemical activities in that environment.

**Prerequisites**  
Course in microbiology, or permission of instructor.
BIOL 648 - Population Ecology

Credits: 3
Survey of ecological models and theory. Topics include population growth and regulation; competition; predator-prey, herbivore-plant, and parasite-host interactions; mutualism; and metapopulation ecology.

Prerequisites
Course in ecology, or permission of instructor.

BIOL 649 - Biological Resource Management

Credits: 3
Applies modern ecological theories and methods to biological resource management in developing and developed countries. Explores problems in achieving optimum productivity of specific resources and application of systems analysis.

Prerequisites
Course in ecology, or permission of instructor.

BIOL 665 - Environmental Hazards to Human Health

Credits: 3
Health effects of chemical contaminants of air, water, and food resulting from industrialized society. Includes identifying, evaluating, and controlling hazards.

Prerequisites
Courses in animal physiology and organic chemistry, or permission of instructor.

BIOL 666 - Human Genetics Concepts for Health Care

Credits: 4
Principles of genetically determined diseases with emphasis on clinical aspects of these diseases, genetic counseling, and
laboratory methods used in human genetics. Extended studies students preparing to enter medical or dental school are welcome.

**Prerequisites**
BS degree or enrollment in accelerated MS program.

**Notes**
Course in cell or molecular biology. Not available to students who have taken BIOL 572.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

**BIOL 668 - Advanced Techniques in Molecular Biology**

Credits: 4  
Experimental studies using current methods for purification and characterization of biologically important compounds. Provides training for research in molecular biology.

**Prerequisites**
BIOL 568, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

**BIOL 669 - Pathogenic Microbiology**

Credits: 3  
Molecular mechanisms of bacterial pathogenicity, and immune response in infectious diseases.

**Prerequisites**
Courses in microbiology and biochemistry.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**BIOL 670 - Environmental Law for Biologists**

Credits: 3  
Study of laws and regulatory issues such as National Environmental Policy Act and Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

**Prerequisites**
Course in ecology, environmental biology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
BIOL 675 - Aerosol Biology

Credits: 4
This course provides students with familiarity with the state of the art aerosol equipment and techniques used in laboratory-based research pertaining to biological warfare or terrorism threats. Emphasis will be placed on biosafety procedures, techniques, and equipment used in conducting experiments with infectious organisms in a contained environment.

Prerequisites
Undergraduate courses in physics, math, and microbiology, and permission of the Director of the Center for Biodefense.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 680 - Experimental Design and Analysis for the Life Sciences

Credits: 4
Advanced course in applying probability and statistics to research in life sciences. Examples drawn from environmental, medical, physiological, genetic, and chemical biology.

Prerequisites
Course in biostatistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOL 682 - Advanced Eukaryotic Cell Biology

Credits: 3
Structure and function of biomembranes, cytoskeleton, and transport systems. Also discusses protein trafficking, cell cycle, and cell adhesion molecules.

Prerequisites
BIOL 483, CHEM 313, 314; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 690 - Introduction to Graduate Studies in Biology

Credits: 1-2
Required of all new MS students in biology.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0
BIOL 691 - Current Topics in Biology

Credits: 1-4
Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0-6

BIOL 692 - Seminar in Biology

Credits: 1
Topics vary.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

BIOL 693 - Directed Studies in Biology

Credits: 1-8
Study of topic not otherwise available in graduate program. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or laboratory or field study, determined in consultation with instructor.

Prerequisites
Permission of instructor, chair, and graduate committee.

Notes
May not be used to fulfill explicit undergraduate prerequisites for graduate work.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOL 695 - Seminar in Molecular, Microbial, and Cellular Biology

Credits: 1
Review and discussion of recent literature in specialized area. Includes student presentations.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
BIOL 715 - Microbial Physiology

Credits: 3
Comprehensive study of functioning of microbial cells, with emphasis on pathogens. Stresses growth, transport, cell-to-cell signaling, biofilm formation, antibiotic resistance, and secondary metabolites.

Prerequisites
Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 718 - Techniques in Microbial Pathogenesis

Credits: 3
Laboratory-based class in which students perform current techniques in microbial pathogenesis.

Prerequisites
Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

BIOL 720 - Microbial Metabolism

Credits: 3
Discussions of catabolic and anabolic pathways of bacterial pathogens, and regulation and integration of these pathways.

Prerequisites
Undergraduate lecture/lab course in microbiology, and course in biochemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOL 745 - Environmental Toxicology

Credits: 3
Study of nature, distribution, and interaction of toxic chemicals released into the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and implications for government regulation.

Prerequisites
Courses in ecology and physiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
BIOL 793 - Research in Biology

Credits: 1-3
Library, laboratory, or field investigation under supervisor's guidance.

Prerequisites
8 graduate credits in BIOL, and permission of instructor and chair.

Notes
May be repeated for total 3 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOL 798 - Master's Research Project

Credits: 1-3
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member. Comprehensive report acceptable to student's advisory committee is required.

Prerequisites
Permission of instructor and department chair.

Notes
Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 798.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOL 799 - Thesis

Credits: 1-6
Thesis research under direction of supervisor.

Prerequisites
8 graduate credits in BIOL, and permission of instructor and department chair.

Notes
Students who take BIOL 793 may not receive more than 6 credits total for both BIOL 793 and 799.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

BIOL 800 - Studies for the Doctor of Philosophy in Education
Credits: 1-6
Program of study designed by student's discipline director and approved by student's doctoral committee. Students participate in research of discipline director, and produce paper reporting original contributions. Paper presented in subsequent PhD Summer seminar.

**Prerequisites**
Admission to PhD in education program to study in biology.

**Notes**
Enrollment may be repeated.

### Biomedical Sciences

#### BMED 601 - Cell and Molecular Physiology

Credits: 4
Principles of biochemistry and cell signaling, and current concepts regarding physiological processes at the cellular and molecular levels.

**Prerequisites**
Admission to Advanced Biomedical Science certificate program

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

#### BMED 602 - Biostatistics and Epidemiology

Credits: 3
Basic principles of biostatistics and epidemiology in theoretical and practical context including: exploring and displaying data appropriately, exploring relationships between two variables, issues of gathering sample data, and understanding randomness and probability.

**Prerequisites**
Admission to Advanced Biomedical Science certificate program

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

#### BMED 603 - Cell Biology and Microscopic Anatomy
Credits: 3
Examines basic histological techniques, ultrastructure of the cell, basic tissue types and histology of specific organ systems. Structure-functional and clinical correlations are described.

Prerequisites
Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

BMED 604 - Fundamentals of Human Physiology

Credits: 5
Essential concepts of physiology and mechanisms of body function are presented at various levels of organization, ranging from cellular and molecular to tissue and organ system levels. Emphasis is placed on understanding the integrated regulation of various body processes among the major systems.

Prerequisites
Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 605 - Introduction to Human Anatomy

Credits: 2
Principles of anatomy as well as the pertinent anatomy associated with the thorax, abdomen, and pelvic cavities.

Prerequisites
Admission to Advanced Biomedical Science certificate program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

BMED 651 - Physician and Society

Credits: 1
Seminar series explores the cultural, social, economic and ethical factors that affect the practice of medicine in the 21st century.

Prerequisites
Admission to Advanced Biomedical Science certificate program

Notes
May be repeated for a maximum of two credits
BMED 652 - Biomedical Career Pathways

Credits: 1
Series of workshops, presentations and field trips. Students will learn study and interview skills, be better prepared to complete AMCAS and secondary applications to medical schools.

Prerequisites
Admission to Advanced Biomedical Studies certificate program.

BIOS 701 - Biochemical Systematics

Credits: 3
Introduces biochemical systems to investigate complex, multicomponent, dynamic functions of cellular systems. Readings include articles from current literature in molecular biosciences. Application of molecular techniques within biosciences is now universal, and underlying questions is, "What is the structure of a cell, and how does it function?"

Prerequisites
General biochemistry.

BIOS 702 - Research Methods

Credits: 3
Trains students in research methodologies, techniques, and data analysis in life sciences. Divided into three modules that introduce separate but equally significant components of any research project: parameters required to outline and synthesize a problem, techniques of measurement and analysis used by life scientists, and approaches for data analysis and interpretations.

Prerequisites
Admission to PhD program in biosciences.
BIOS 703 - Laboratory Rotation

Credits: 1
Intensive introduction to research laboratory in biosciences. Students read background material pertinent to problem under study, learn and practice research methods of laboratory, and formulate short final project that may be proposal or actual project, demonstrating some mastery of techniques and approaches employed.

Prerequisites
Admission to PhD program in biosciences.

Notes
Should be repeated three times (except by permission of concentration director).

BIOS 704 - Topics in Biosciences

Credits: 1
Combines invited seminars from internal and external faculty with graduate student seminars. Seminar presentation required for advancement to candidacy, generally given in last semester before candidacy. Includes discussion section led by course coordinator.

Prerequisites
Admission to PhD program in biosciences.

Notes
Required of all students during each semester prior to advancement to candidacy. Should be repeated three times (except by permission of concentration director).

BIOS 710 - Current Topics in Bioscience

Credits: 1-3
Studies current topic in biosciences.

Prerequisites
Admission to biosciences PhD or biology MS program.

Notes
Topics vary. May be repeated for credit with permission of concentration director.
BIOS 740 - Laboratory Methods in Functional Genomics and Biotechnology

Credits: 3
Current laboratory techniques in molecular biology and genomics, including nucleic acid isolation, gene cloning and sequencing, gel blot analysis, PCR, in vitro mutagenesis, and theory and practice of DNA microarray analysis of gene expression. Topics may vary from year to year depending on advances in field.

Prerequisites
Graduate standing and undergraduate courses in genetics and molecular biology.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

BIOS 741 - Genomics

Credits: 3
Genetic structure and function at whole genome level. Includes some sequence analysis, comparative genomics, classical genetics, and developmental genetics, as well as analysis of synteny groups, isochores, gene families, genetic complexity, C value paradox, directed discovery of gene functions, and animal models of human disease. Readings from recent texts and primary research literature. Students expected to give one or two oral presentations of primary research papers, as well as complete midterm and final exams.

Prerequisites
At least one undergraduate course in genetics and molecular biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 742 - Biotechnology

Credits: 3
Theory and applications of biotechnology. Includes promoter design, gene fusions, protein targeting, techniques of protein purification, construction of transgenic organisms, cloning of animals and plants, ethical and legal issues. This is a relatively new area of study that is rapidly changing; course strives to keep students abreast of current literature.

Prerequisites
Undergraduate course work in genetics and molecular biology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 743 - Genomics, Proteomics, and Bioinformatics
Fundamental methods for analyzing genomic and proteomic data, including nucleic acid and protein sequences, pair-wise and multiple alignment, database search methods, clustering and presentation of data, prediction modeling, and survey of available software and freeware tools.

Prerequisites
Admission to biosciences PhD or biology MS program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 744 - Molecular Genetics

Credits: 3
Develops understanding of principles of modern molecular genetics and methods of investigation of genomes of pro- and eukaryotes, including types of genetic manipulations conducted in research laboratories today.

Prerequisites
Undergraduate course work including BIOL 311; CHEM 313, 314, 315, and 318; equivalents; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 760 - Seminar in Molecular Systematics

Credits: 1-3
Presentations and discussion by students and faculty of research papers and projects.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

BIOS 761 - Dispersal Patterns of Biological Agents

Credits: 3
Introduces military and terrorist methods of dispersal patterns. Covers physics of aerosols, engineering and mechanics of building ventilation systems, and mechanical dissemination including handheld, automatic, vehicle, and truck-mounted systems. Also covers viability of specific agents involved.

Prerequisites
Admission to biosciences PhD or biology MS program, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 762 - Phylogenetic Analysis
Credits: 4
A consideration of molecular systematics techniques in biology, especially cladistics and phenetics methods. Species concepts, biological nomenclature, and classifications will also be discussed. Laboratory will emphasize phylogenetic methods using online sources of comparative data.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

BIOS 765 - Molecular Systematics

Credits: 4
Comparative evolutionary techniques applied to molecular data. Use of molecular techniques, molecular databases, and analytical techniques will be covered.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 767 - Molecular Evolution

Credits: 4
A review of the diversity and organization of genomes and evolutionary processes that operate at the molecular level. Emphasis will be placed on processes of molecular evolution and techniques used to analyze these processes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

BIOS 898 - Directed Studies in Biosciences

Credits: 1-12
Studies of specialized topics in biosciences. Specific arrangements for designing scope and area of study to be determined in consultation with instructor. May involve literature searches and review, workshops, or tutorials.

Prerequisites
Permission of research advisor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

BIOS 899 - Directed Research in Biosciences

Credits: 1-12
Research on a pertinent topic in biosciences. Scope and subject of research to be determined by instructor.

Prerequisites
Permission of research advisor.

**BIOS 998 - Doctoral Dissertation Proposal**

Credits: 1-6  
Research and writing of research proposal for doctoral dissertation.

**Prerequisites**  
Permission of research advisor.

**BIOS 999 - Doctoral Dissertation Research**

Credits: 1-12  
Research in concentration pertinent to students' program of study.

**Prerequisites**  
Approved dissertation proposal.

**Notes**  
Maximum of 24 credits can be applied toward degree.

**Business Legal Studies**

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

**BULE 302 - Legal Environment of Business**

Credits: 3  
Survey of the legal environment of business, emphasizing legal concepts and legal reasoning to prepare students to recognize legal problems and formulate appropriate responses. Topics include the federal and state court systems, constitutional and administrative law, business torts and crimes, contracts and business ethics. Lecture, discussion, cases.
Prerequisites
Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

BULE 402 - Commercial Law

Credits: 3
Survey of commercial law emphasizing the Uniform Commercial Code. Lecture, discussion, cases.

Prerequisites
BULE 302, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

Business, Minor in

Prerequisite for all MSOM courses is completion of 29 credits (sophomore standing). For the Business Minor, a grade of C or higher is required in each MSOM course used for the minor.

MSOM 300 - Managing Financial Resources

Credits: 3
Focuses on using basic concepts of accounting and financial management to make investment, credit, and operating decisions for an organization. Emphasizes financial reports to aid planning and control of organizational activities.

Prerequisites
Completion of 30 credits (sophomore standing)

Notes
May not be taken for credit by SOM majors. Students who have received credit for both ACCT 203 and FNAN 301 cannot also receive credit for MSOM 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MSOM 301 - Managing People and Organizations

Credits: 3
Introduces key issues in management, organizational behavior, and human resource management. Special attention to best
practices used by effective managers.

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May not be taken for credit by SOM majors. Students cannot receive credit for both MGMT 301 and MSOM 301.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MSOM 302 - Managing Information in a Global Environment**

Credits: 3
Provides overview of strategic role of information, need for information systems, organizing information, integration of information systems in management processes and decision making, and related discussions in electronic commerce.

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May not be taken for credit by SOM majors. Students cannot receive credit for both MIS 301 and MSOM 302.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MSOM 303 - Marketing in a Global Economy**

Credits: 3
Presents marketing principles, concepts, strategies, and analytical tools used by profit and nonprofit organizations to market ideas, products, and services to selected target groups. Emphasizes how to develop, promote, distribute, and price firm's offerings in dynamic economic, social, political, and global environment.

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May not be taken for credit by SOM majors. Students cannot receive credit for both MKTG 301 and MSOM 303.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MSOM 304 - Entrepreneurship: Starting and Managing a New Enterprise**

Credits: 3
Explores behaviors required to successfully launch a new business, tools to identify and evaluate opportunities, and the issues critical to a new firm. Issues include organizational structure, effective marketing strategy, operational logistics, legal issues,
financial projections, financing options, and available support structures.

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May not be taken for credit by SOM majors

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MSOM 305 - Managing in a Global Economy**

Credits: 3  
Multidisciplinary approach to global economy from viewpoint of managing international business. Introduces unique aspects of managing in global economy including theory and political economy of international trade and foreign direct investment, global monetary system, and strategy of international business.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May be taken for credit by SOM majors only if taken to satisfy the global understanding requirement for general education.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MSOM 306 - Managing Projects and Operations**

Credits: 3  
Introduces project management and operations management concepts and tools including project planning, scheduling, monitoring, and control; process design, selection and improvement; supply chain management; inventory management; and quality assurance.

**Prerequisites**
Completion of 30 credits (sophomore standing)

**Notes**
May not be taken for credit by SOM majors. Students cannot receive credit for both OM 301 and MSOM 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MSOM 491 - Special Topics: Business Minor**
Topics related to a minor in business will vary on the focus of the course and by discipline.

**Prerequisites**
Sophomore standing.

**Hours of Lecture or Seminar per week:** 3

### Character Education

**EDCE 601 - How Students Learn Values and Ethics**

Credits: 3

Applies theories to practice to increase learning through the study of moral and ethical development theories and how students learn personal, prosocial, and civic values.

**Prerequisites**
Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCE 602 - Comprehensive Character Education Frameworks**

Credits: 3

Analyzes comprehensive character education frameworks that have emerged from research and practice, examining framework components and their applications to character education initiatives.

**Prerequisites**
Admission to Character Education Program.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCE 603 - Global and Ethical Perspectives on Teaching Diverse Learners**

Credits: 3

Analyzes ethical and moral dimensions of classroom interactions using developmental framework and foundation of democratic principles. Evaluates school politics and policies, and provides overview of prevailing ethical points of view.

**Prerequisites**
Admission to Character Education Program.
EDCE 604 - Character Education Curriculum and Programs

Credits: 3
Analyzes and evaluates quality of programs and curriculum materials for character education using program, implementation, and curriculum standards.

Prerequisites
Admission to Character Education Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCE 605 - Character Education Assessment and Evaluation

Credits: 3
Applies assessment standards and audit tools to analyze and evaluate formative and summative assessments of programs for character education. Utilizes backward design model.

Prerequisites
EDCE 602, 603, and 604.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCE 606 - Leadership in Character Education: An Internship in Program Development, Curriculum, Instruction, or Assessment

Credits: 3
A 150-hour, on-site internship focusing on one of the following: instructional strategies, curriculum or program development, using resources, or assessment.

Prerequisites
EDCE 602, 603, 604, and 605.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCE 607 - Educational Research for Character Educators

Credits: 3
Studies and applies fundamental concepts and methods of educational action research. Emphasis on researching how students
learn personal, prosocial, and civic values, and teacher and school effectiveness in this area.

Prerequisites
EDCE 600, 601, 602, 603, 604, and 605

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Chemistry

CHEM 211, 212 are prerequisites to all other undergraduate CHEM courses numbered 301 or above.

CHEM 101 - Introduction to Modern Chemistry

Credits: 3
Physical and chemical discoveries and properties of matter presented along with their application and impact on way of life. Topics include atomic and molecular structure, nuclear chemistry, and chemistry in Earth and atmosphere.

Satisfies General Education Requirement: Natural science Nonlab

Notes
Not open to students majoring in chemistry. Credit will not be given for this course and CHEM 103. Fundamental principles of chemistry. No previous knowledge of chemistry assumed or required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 102 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 3

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future.

Satisfies General Education Requirement: Natural science Nonlab

Prerequisites
Not open to students majoring in chemistry.

Notes
Not open to students majoring in chemistry. Course cannot be used in place of CHEM 313 or 314. Credit will not be given for this course and CHEM 104.
CHEM 103 - Chemical Science in a Modern Society

Credits: 4
Terminal course in chemistry for nonscience and nursing majors. Principles and application of chemistry.

Satisfies General Education Requirement: Natural science Lab

Notes
Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

CHEM 104 - Introduction to Organic, Biochemical, Pharmacological, and Fuel Chemistry

Credits: 4

Modern and historical accounts of organic chemistry, biochemistry, pharmacology, and fuel chemistry. Topics include the chemistry of carbon compounds, synthesis of polymers and their utility and use in the modern world, biomolecules, DNA and animal cloning, embryonic stem cells, the chemical structure and biological activity of drugs and medicines, and fuel chemistry including petroleum through green chemistry and the future. (CHEM 104 requires concomitant registration in a 104 laboratory section.)

Satisfies General Education Requirement: Natural science Lab

Prerequisites
Not open to students majoring in chemistry.

Notes
Not open to students majoring in chemistry. Credit will not be given for both this course and CHEM 211, 212. Topics are those described for CHEM 101 and 102 but with lab to enhance scientific experience.

CHEM 155 - Introduction to Environmental Chemistry I

Credits: 4

Basic chemical principles of Earth's water, air, and soil systems, presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities.
CHEM 156 - Introduction to Environmental Chemistry II

Credits: 4
Basic chemical principles of Earth's water, air, and soil systems, presented in the context of understanding environmental issues. Includes Saturday morning field trips to sites of past and present environmental contamination, alternating with Saturday morning laboratory activities.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
CHEM 155.

Notes
Credit will not be given for this course and CHEM 103, 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 201 - Introductory Chemistry I

Credits: 3
Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.

Satisfies General Education Requirement: Natural science Nonlab

Notes
Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 211 or 103. General chemistry course for students interested in science, engineering, mathematics, or computer science who do not require a lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 202 - Introductory Chemistry II

Credits: 3
Fundamentals of reaction rates and equilibrium. Topics include kinetics, properties of solutions, ionic equilibrium, chemical
thermodynamics, electrochemistry, and nuclear chemistry.

Satisfies General Education Requirement: Natural science Nonlab

Prerequisites
CHEM 201 or 211.

Notes
Does not fulfill degree requirements for laboratory science course. Credit will not be given for this course and CHEM 212 or 104. Second-semester general chemistry course for those interested in science, engineering, mathematics, or computer science who do not require a lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 211 - General Chemistry

Credits: 4
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Satisfies General Education Requirement: Natural science Lab

Notes
Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 212 - General Chemistry

Credits: 4
Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
CHEM 211.

Notes
Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
CHEM 251 - General Chemistry for Engineers

Credits: 4
Fundamental principles of chemical structure and reactivity including atomic and molecular structure; chemical bonding; structures of ionic, covalent, and metallic lattices; oxidation reduction; electrochemistry and chemistry of metals; and introduction to organic chemistry and polymers.

Satisfies General Education Requirement: Natural science Lab

Notes
Enrollment restricted to students intending to major in engineering. Students who need two semesters of chemistry should enroll in CHEM 211. Credit will not be given for this course and CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

CHEM 300 - Chemistry of Semiconductor Processing

Credits: 3
Chemical aspects of the manufacture of semiconductor devices. Topics include oxidation of silicon, photoresists, plasma etching, removal of metal contaminants by acid etching, and analysis of semiconductor thin films.

Prerequisites
Completion of 30 credits, or permission of instructor.

Notes
Does not satisfy chemistry course requirements for BS in biology. Cannot be used as a chemistry elective toward BA, BS, or minor in chemistry, and does not fulfill premedical requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 313 - Organic Chemistry

Credits: 3
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Corequisite
CHEM 315

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 314 - Organic Chemistry
Credits: 3
Theoretical, synthetic, industrial, and biological aspects of the chemistry of carbon compounds.

Prerequisites
CHEM 313.

Corequisite
CHEM 318 or CHEM 320.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 315 - Organic Chemistry Lab I

Credits: 2
Lab techniques and reactions arranged to accompany CHEM 313.

Corequisite
CHEM 313

Notes
One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 318 - Organic Chemistry Lab II

Credits: 2
Continuation of CHEM 315, arranged to accompany CHEM 314.

Prerequisites
CHEM 315.

Corequisite
CHEM 314.

Notes
One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 321 - Elementary Quantitative Analysis

Credits: 4
Principles of chemical analysis emphasizing ionic equilibria. Lab consists of gravimetric, volumetric, and instrumental methods
illustrating principal types of quantitative determinations.

**CHEM 331 - Physical Chemistry I**

Credits: 3  
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

**Prerequisites**  
MATH 113, 114; PHYS 243 or 160

**Corequisite**  
PHYS 243 or 160

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHEM 332 - Physical Chemistry II**

Credits: 3  
Yearlong survey covering topics including thermodynamics, equilibria, kinetics, solution properties, elementary quantum theory, electrochemistry, atomic and molecular structure, and nuclear chemistry.

**Prerequisites**  
MATH 113, 114, CHEM 331; PHYS 243 or 160

**Corequisite**  
PHYS 243 or 160

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHEM 333 - Physical Chemistry for the Life Sciences I**

Credits: 3  
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

**Prerequisites**  
MATH 113

**Corequisite**  
MATH 114
CHEM 334 - Physical Chemistry for the Life Sciences II

Credits: 3
Yearlong survey of principles of physical chemistry emphasizing application in biological sciences. Topics include first and second laws of thermodynamics, free energy and chemical equilibria, kinetics, transport properties, molecular interactions, molecular structure, spectroscopy, statistical thermodynamics, and x-ray diffraction.

Prerequisites
CHEM 333; MATH 113, 114

Notes
Credit will not be given for both this course sequence and CHEM 331, 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 336 - Physical Chemistry Lab I

Credits: 2
Quantitative experimental study of physicochemical principles. CHEM 336 and 337 constitute an introduction to the practice and theory of experimental physical chemistry.

Prerequisites
CHEM 331

Corequisite
CHEM 331

Notes
One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 337 - Physical Chemistry Lab II

Credits: 2
Continuation of CHEM 336.

Prerequisites
CHEM 331, 332, 336

Corequisite
CHEM 332

Notes
One-hour recitation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

CHEM 341 - Fundamental Inorganic Chemistry

Credits: 3
Descriptive chemistry including chemical properties, reactions, and reaction mechanisms of inorganic elements and compounds. Topics include main group and transition elements, organometallic compounds, and bioinorganic chemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 350 - Computer Techniques for Chemistry

Credits: 3
Introduction to computer software, both commercial and online, emphasizing applicability to chemistry topics. Techniques include spreadsheet programming, graphing and statistics, molecular modeling, and chemical information search and retrieval.

Satisfies General Education Requirement: Information technology (IT, all)

Prerequisites
CHEM 313.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 355 - Undergraduate Research

Credits: 1-3
Original research project. May involve lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance. Culminates in a written and oral final report. May be repeated for a total of 6 credits.

Prerequisites
30 credits, chemistry major or minor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-6
CHEM 422 - Instrumental Analysis

Credits: 3
Introduces theories of analysis by instrumental methods. Basic electronics applied to chemical measurements. Topics include introduction to theory of spectroscopy including ultraviolet, visible, and infrared, and electrochemical methods of analysis; theory of Fourier transform techniques such as FT-IR and FT-NMR; and theory of advanced pulse techniques.

Prerequisites
CHEM 314, 321, and 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 423 - Instrumental Analysis Laboratory

Credits: 2
Laboratory-based introduction to quantitative analysis of organic and inorganic substances by using modern analytical instrumentation. Laboratory highlights practice of atomic and molecular spectroscopy, spectrophotometry, chromatography, voltammetry, and potentiometry in relation to chemical experimentation.

Prerequisites
CHEM 422.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

CHEM 427 - Aquatic Environmental Chemistry

Credits: 3
Thermodynamic and kinetic processes regulating the chemistry of surface and groundwater in natural and polluted environments with particular emphasis in explaining the aqueous concentrations of chemical species and controlling geochemical factors in the hydrosphere. Structure, sources and transformations of organic matter in the aquatic environment and interactions with aqueous solutes will be covered as related to contemporary issues in water quality.

Prerequisites
CHEM 321 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 438 - Atmospheric Chemistry

Credits: 3
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics,
photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change.

Equivalent to CLIM 438

Prerequisites
CHEM 331 and 332 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 441 - Properties and Bonding of Inorganic Compounds

Credits: 3
Interpretation of physical and chemical properties of inorganic compounds in terms of currently used bonding concepts. Topics include molecular symmetry and applications of symmetry, structure and bonding in ionic solids; reactions and characterizations of solids; electronic and magnetic properties and applications of solids.

Prerequisites
CHEM 211, 211; MATH 113

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 445 - Inorganic Preparations and Techniques

Credits: 2
Application of techniques of inorganic chemistry to preparation, purification, and spectroscopic characterization of selected substances.

Prerequisites
CHEM 321 and 441.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

CHEM 446 - Bioinorganic Chemistry

Credits: 3
Application of inorganic coordination chemistry and physical methods in study of structure and function of metal ion sites in biomolecules. Properties of transition metal ions, ligand field theory. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species.

Prerequisites
CHEM 463 or BIOL 483
Corequisite
CHEM 463 or BIOL 483

Notes
Students may take this course concurrently with CHEM 463 or after taking CHEM 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 451 - Special Projects in Chemistry

Credits: 1 to 3
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisites
Chemistry major or minor, 90 credits, and permission of department research committee.

Notes
Written and oral technical reports required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

CHEM 452 - Special Projects in Chemistry

Credits: 1 to 3
Introduction to chemical research or development. Includes literature search, conferences, and lab.

Prerequisites
Chemistry major or minor, 90 credits, and permission of department research committee.

Notes
Written and oral technical reports required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

CHEM 455 - Honors Research in Chemistry

Credits: 3
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisites
CHEM 313, 314; CHEM 321; CHEM 331, 332
CHEM 456 - Honors Research in Chemistry

Credits: 3
Introduction to research on current problem in chemical sciences under supervision of faculty advisor. Includes literature search, laboratory or theoretical work, conferences with faculty advisor, attendance at regularly scheduled seminars, and oral and written presentations.

Prerequisites
CHEM 313, 314; CHEM 321; CHEM 331,332

Notes
Credit will not be given for both these courses and CHEM 451, 452.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

CHEM 458 - Chemical Oceanography

Credits: 3
The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Equivalent to GEOL 458

Prerequisites
CHEM 212, and CHEM 321 or GEOL 309

CHEM 463 - General Biochemistry I

Credits: 4
Brief introduction to biochemistry, followed by in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function, and primary metabolism. Emphasizes enzymes and their chemical mechanisms, and metabolism.

Prerequisites
CHEM 313, BIOL 213.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
CHEM 464 - General Biochemistry II

Credits: 3
Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

Prerequisites
CHEM 463/Biol 483.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 465 - Biochemistry Lab

Credits: 2
Introduction to modern biochemical experimental methods of studying chemical and physical properties of biological molecules. Includes separation, identification, and characterization of biomolecules.

Corequisite
CHEM 463.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

CHEM 467 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisites
CHEM 313 and 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 468 - Bioorganic Chemistry

Credits: 3
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.
Prerequisites
CHEM 314 and 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CHEM 470 - Laboratory Instructional Methods for Chemistry**

Credits: 3
Lecture and laboratory experience teaching chemistry in laboratory. Students work closely with faculty member and are responsible for all aspects of teaching undergraduate laboratory techniques. Students also learn techniques for acquisition and storage of chemicals and laboratory apparatus, safety, disposal of chemical waste, and literature of chemical education.

Prerequisites
CHEM 314.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

**CHEM 490 - Undergraduate Seminar**

Credits: 1
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a one-page summary of each talk attended. This course will also be used to teach students how to give effective presentations. May be repeated for a total of 2 credits.

Prerequisites
60 credits and must be a chemistry major or minor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**CHEM 500 - Selected Topics in Modern Chemistry**

Credits: 3
Topics of interest in analytical, biological, environmental, geological, geochemical, inorganic, organic, and physical chemistry.

Notes
May be repeated for credit with different topics. Credit not allowed toward major in chemistry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHEM 505 - Hazardous Materials Waste Management

Credits: 1-3
Comprehensive review of subjects most frequently encountered in hazardous chemicals management.

Prerequisites
CHEM 313 or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CHEM 513 - Synthetic and Mechanistic Organic Chemistry

Credits: 3
General review of synthetic pathways and applications to new topics, emphasizing fused ring aromatics, heterocyclics, natural products, and biologically active compounds. Includes relationship of applied organic chemistry to consumer products, including drugs and agricultural chemicals. Organic core course.

Prerequisites
CHEM 313 and 314.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 521 - Theory of Analytical Processes

Credits: 3
Theory of signal and noise, mass transport phenomena, thermodynamics, and ionics in analytical chemistry. Applications made to Fourier transform techniques such as FT-IR and FT-NMR, convolution and correlation spectroscopy, chemical sensors, chromatography, flow injection analysis, ion transport in membrane, and interpretation of analytical signals. Analytical core course.

Prerequisites
CHEM 422 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 529 - Instrumental Techniques of Analysis

Credits: 2
Principles and operation of modern instrumentation, emphasizing applications to analysis of chemical, biological, and environmental samples. Methods include combined capillary column gas chromatography and mass spectrometry, high-performance liquid chromatography, optical methods, surface analysis methods, magnetic resonance spectroscopy, atomic emission and absorption spectrometry, and electroanalytical methods. With approval of research committee, students choose methods studied.
### CHEM 531 - Elements of Physical Chemistry

Credits: 3  
Intensive overview of concepts, techniques, and models of physical chemistry as they apply in many branches of chemistry and allied sciences. Topics include properties of gases, first and second laws of thermodynamics, phase and chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Emphasizes developing practical skill in using tools of physical chemistry. Extensive use of spreadsheet models to investigate chemical and physical systems.

**Prerequisites**  
CHEM 211, 212; CHEM 313, 314; PHYS 243, 245; MATH 113; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CHEM 554 - Geochemistry of Environmental Hazards

Credits: 3  
Introduction to origins and reactions of hazardous substances in air, water, and soil environments. Covers movement of trace organic and inorganic substances in geochemical cycle, with particular reference to transport processes that influence air and water quality.

**Prerequisites**  
CHEM 314 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

### CHEM 563 - General Biochemistry I

Credits: 4  
Brief introduction to biochemistry, followed by an in-depth look at amino acids and proteins, 3-D structure, folding and dynamics, their specialized function and primary metabolism. Emphasizes enzymes and their chemical mechanisms and metabolism. Students will be assigned papers from the primary literature and be required to answer questions from these papers on exams.

**Prerequisites**  
CHEM 313; BIOL 213.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0
CHEM 564 - General Biochemistry II

Credits: 3
Previous course in biology recommended but not required. Important biological compounds, including proteins, carbohydrates, lipids, and nucleic acids, and their interrelations.

Prerequisites
CHEM 563 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 567 - The Chemistry of Enzyme-Catalyzed Reactions

Credits: 3
Examples of enzyme mechanisms demonstrate how chemical principles are employed by living organisms. Specific enzyme mechanisms used to illustrate principles from organic, inorganic, and physical chemistry. Discusses techniques to monitor enzyme reactions.

Prerequisites
CHEM 313 and 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 568 - Bioorganic Chemistry

Credits: 3
Basic understanding of chemical nature of biomolecules and biomacromolecules. Introduces biomolecules such as amino acids, proteins, carbohydrates, and lipids. Lectures focus on biophysical properties and synthesis, using practical examples and visual aids.

Prerequisites
CHEM 314 and 463.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 579 - Special Topics

Credits: 1-6
Current topics in chemistry, depending on instructor's specialty.

Prerequisites
CHEM 313 and 314 or permission of instructor.

Notes
May be repeated with different topics, with department approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CHEM 613 - Modern Polymer Chemistry

Credits: 3
Synthetic and analytical chemistry of synthetic macromolecules. Topics include polymer solutions, molecular weight determination, spectroscopy, thermal analysis, x-ray crystallinity, polymerization types, and commercial and electroactive polymers. Organic core course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 614 - Physical Organic Chemistry

Credits: 3
Principles underlying molecular structure, reactivity, and reaction mechanisms. Topics include valence-bond and molecular-orbital theory, electronic interpretation of organic reactions, stereochemistry, conformational analysis, kinetics and thermodynamics of organic reactions, and photochemistry. Organic core course.

Prerequisites
CHEM 314 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 617 - Organic Structural Spectroscopy

Credits: 3
Spectroscopic determination of organic molecular structure using 1H, 13H, 19F, and 31P nuclear magnetic resonance spectroscopy and infrared, mass, ultraviolet and visible, and Raman spectroscopy. Organic core course.

Prerequisites
CHEM 314 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 620 - Modern Instrumentation
Methods of sensing and measurement of radiation, particles, pressure, concentrations of specific elements and compounds. Topics include basic operational amplifier circuits for analog signals, digitizing devices and computerized data collection, noise and noise-reduction methods, and specialized instrumentation systems for various areas of chemistry and physics.

Equivalent to PHYS 533

**Prerequisites**
CHEM 422 or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 2

### CHEM 624 - Principles of Chemical Separation

Credits: 3  
Theories and models of separation with applications to analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas and high-performance liquid chromatography. Emphasizes theory of reverse phase, normal phase, ion exchange, size exclusion, and affinity based separations. Also presents instrumentation such as detectors, pumps, and columns, and data acquisition. Analytical core course.

**Prerequisites**
CHEM 422 or 521, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CHEM 625 - Electroanalytical Chemistry

Credits: 3  
Review of basic electrochemistry. Emphasizes analysis and research for applications of modern electrochemical techniques such as chronamperometry; cyclic, stripping, and AC voltammetry; pulse polarography; coulometry; electrochemical sensors; and instrumentation.

**Prerequisites**
CHEM 321 and 331.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CHEM 633 - Chemical Thermodynamics and Kinetics

Credits: 3  
Advanced study covering application of kinetics to the elucidation of reaction mechanisms, and application of statistical thermodynamics to theory of elementary reaction rates. Physical core course.

Equivalent to CSI 711
Prerequisites
CHEM 331 and 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 646 - Bioinorganic Chemistry

Credits: 3
Applies inorganic coordination chemistry and physical methods to understand structure and function of metal ion sites in biomolecules. Biochemical roles of metal centers in oxygen transport, metalloenzymes, and electron transfer. Topics include iron cytochromes, zinc and copper enzymes, cobalamins, iron sulfur proteins, inorganic model compounds, and metals in medicine. Inorganic core course.

Prerequisites
CHEM 441 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 651 - Environmental Chemistry of Organic Substances

Credits: 3

Prerequisites
One semester of physical chemistry, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 660 - Protein Biochemistry

Credits: 3
Proteins play critical roles in most biological processes. Therefore, to understand these processes, it is necessary to understand proteins. This course will introduce students to proteins, their biosynthesis/biodegradation and their biophysical and biochemical properties. Biochemistry core course.

Prerequisites
CHEM 463 or equivalent or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CHEM 661 - Antibiotic Chemistry and Resistance

Credits: 3
This course will introduce the various classes of antibiotics. The focus will be on the chemistry of antibiotics and how they inhibit bacterial growth and/or cause death and the response of bacteria to these compounds.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 662 - Modern Methods of Drug Discovery

Credits: 3
Introduction to the process of drug discovery. Covers modern methods and strategies of target identification, lead identification, and lead optimization. Biochemistry core course.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 665 - Protein-Protein Interactions: Methods and Applications

Credits: 3
Introduction to the fundamental principles of protein-protein interactions, including experimental design considerations and methods for quantification of these interactions.

Prerequisites
CHEM 463 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 670 - Teaching Practicum

Credits: 1-2
Prelaboratory lecture and laboratory teaching in chemistry. Students work closely with faculty and are responsible for all aspects of teaching undergraduate laboratory techniques.

Prerequisites
Enrollment in graduate program and demonstrated proficiency in English language.
CHEM 728 - Introduction to Solid Surfaces

Credits: 3
Introduces properties of solid surfaces. Topics include gas adsorption isotherms, surface area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas adsorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and surface sensitivities, instrumentation; and principles of vacuum technology.

Equivalent to CSI 712

Prerequisites
CHEM 422 or equivalent.

CHEM 730 - Statistical Mechanics

Credits: 3
Statistical methods, systems of particles, thermodynamics, macroscopic parameters, the ideal gas, kinetic theory, quantum statics, and transport processes.

Equivalent to CSI 782/PHYS 711

Prerequisites
Permission of instructor.

CHEM 732 - Quantum Chemistry

Credits: 3
Illustration of fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces. Physical core course.

Equivalent to CSI 713

Prerequisites
CHEM 332.
CHEM 733 - Polymer Physical Chemistry

Credits: 3
Physical chemistry of macromolecules including molecular weight, conformation, configuration, characteristics of the glassy state, methods for studying polymer morphology (XRD, SEM, TEM, optical microscopy), electronic structure and behavior, band theory, conduction mechanisms, intrinsically conductive polymers, polarization, dielectric behavior, triboelectric behavior, piezo and pyroelectric behavior, and nonlinear optical properties.

Prerequisites
CHEM 332 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 735 - Astrophysical Chemistry of Planetary Bodies

Credits: 3
In depth review of the chemistry of planets, comets and other bodies in the Solar System. Emphasis will be placed on the laboratory techniques and measurements made in order to understand and predict astronomical observations.

Prerequisites
CHEM 331, or ASTR 403, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 736 - Computational Quantum Mechanics

Credits: 3
Study of fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, electron-atom solutions to Schrodinger's equation, electron spin in many electron systems, atomic structure calculations, algebra of many electron calculations, Hartree-Fock, self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to CSI 783/PHYS 736

Prerequisites
PHYS 502, 510, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHEM 767 - Industrial Biochemistry

Credits: 3
An introduction to industrial biochemistry. Includes a mechanistic examination of the biosynthesis of several industrially
important secondary metabolites, the industrial scale process of obtaining commercially valuable biochemical products, and the
regulations that oversee the industrial biochemical process.

**Prerequisites**
CHEM 463 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CHEM 790 - Graduate Seminar**

Credits: 1  
Selected topics from recent chemical theory and applications, generally consisting of research presentations by invited faculty from other institutions. Attendance is required at 80% of the seminars and students must write up a 1 page summary of each talk attended. This course will also be used to teach students how to give effective presentations.

**Prerequisites**
Admission to a graduate program in Chemistry and Biochemistry, or permission of instructor.

**Notes**
Requires, in last semester, seminar presentation on student's research or another topic acceptable to department. Three credits of CHEM 790 required for MS degree; an additional 3 credits required after admission to PhD program.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**CHEM 796 - Directed Reading and Research**

Credits: 1-6  
Reading and research on a specific topic in chemistry or biochemistry under direction of a faculty member. May be repeated for a total of 12 credits.

**Prerequisites**
Admission to a graduate program in chemistry and biochemistry or affiliated programs.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-6

---

**CHEM 798 - Research Project**

Credits: 3-6  
Experimental or theoretical research project chosen and completed under guidance of graduate faculty member.

**Prerequisites**
Permission of department; 6 credits of CHEM 798 or 799, but credit will not be given for both.

**Notes**
Requires comprehensive report acceptable to advisory committee, and final oral exam on report.

**CHEM 799 - Master's Thesis**

Credits: 1-6
Laboratory thesis research and writing under direction of supervisor.

**Prerequisites**
Permission of department.

**Notes**
Minimum of 3 credits for first two enrollment periods.

**CHEM 814 - Advanced Bioorganic Chemistry**

Credits: 3
This course is intended to provide students with an introduction to the chemical nature of biomolecules, with a focus on their organic properties. The course will focus on the chemical principals that underlie the diverse structures, properties and reactions of biomolecules. This is a core course in the Chemistry and Biochemistry doctoral program.

**Prerequisites**
CHEM 313, 314, and 463 or equivalent; or permission from instructor.

**CHEM 821 - Theory of Analytical Processes**

Credits: 3
Theory and application of contemporary analytical processes and methods used in chemistry research. Emphasis on analytical signals and accompanying noise, sample preparation techniques, and quality assurance in measurements. This is a core course in the Chemistry and Biochemistry doctoral program.

**Prerequisites**
Admission to Chemistry and Biochemistry doctoral program.
CHEM 833 - Physical Chemistry and Biochemistry

Credits: 3
The theory and practical use of thermodynamics, kinetics, spectroscopy and quantum chemistry in chemical and biochemical research. This is a core course in the Chemistry and Biochemistry doctoral program.

Prerequisites
CHEM 331 or permission of instructor.

Hours of Lecture or Seminar per week: 3

CHEM 891 - Doctoral scientific critique, writing and presentation

Credits: 3
Development of skills associated with scientific communication and research such as oral presentation of scientific material, analysis of scientific research and preparation of scientific proposals. In preparing scientific proposals, students will learn how to identify scientific questions of interest and how to plan a course of experiments to address these questions. This is a core course in the Chemistry and Biochemistry doctoral program.

Prerequisites
Permission of academic advisor, research advisor and/or research committee.

Hours of Lecture or Seminar per week: 3

CHEM 998 - Doctoral Dissertation Proposal

Credits: 1-12
Development of a research proposal under the guidance of the research advisor and graduate committee. The resulting proposal, once approved by the student's research advisor and committee forms the basis of the student's doctoral dissertation. May be repeated for credit, but no more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

Prerequisites
Permission of research advisor and/or graduate committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12
Grading: S/IP

CHEM 999 - Doctoral Dissertation Research

Credits: 1-12
Research in the concentration pertinent to student's program of study under the direction of their research advisor and committee. Students may enroll for credits in this course once their research proposal has been approved. May be repeated for credit, but no
more than 24 combined credits from CHEM 998 and CHEM 999 may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998.

**Prerequisites**
Admission to candidacy in Chemistry and Biochemistry Doctoral Program.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1-12  
**Grading:** S/IP

### Chinese

**CHIN 101 - Elementary Chinese**

Credits: 3  
Introduction to Mandarin, including basic grammar, oral expression, listening comprehension, reading, and writing.

**Notes**  
Students may not receive credit for CHIN 101 and CHIN 109 or 110.

**Hours of Lecture or Seminar per week:** 3

**CHIN 102 - Elementary Chinese**

Credits: 3  
Continuation of CHIN 101.

**Prerequisites**  
CHIN 101.

**Notes**  
Students may not receive credit for CHIN 102 and CHIN 109 or 110.

**Hours of Lecture or Seminar per week:** 3

**CHIN 109 - Intensive Elementary Chinese**

Credits: 6  
Recommended for students who desire training in Chinese language to an intermediate level of competence in a relatively short period of time.

**Notes**  
Equivalent to CHIN 101 and 102 taught in single semester. Lab work required. Students may not receive credit for CHIN 109
and CHIN 101, 102, or 110.

**CHIN 110 - Elementary Chinese**

Credits: 6  
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

**Notes**  
Lab work required. Students may not receive credit for CHIN 110 and CHIN 101, 102, or 109.

**CHIN 201 - Intermediate Chinese I**

Credits: 3  
Further development of skills acquired in CHIN 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

**Prerequisites**  
CHIN 101 and 102.

**Notes**  
CHIN 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for CHIN 201 and CHIN 209 or 210.

**CHIN 202 - Intermediate Chinese II**

Credits: 3  
Continuation of CHIN 201.

**Prerequisites**  
CHIN 201 or equivalent.

**Notes**  
Lab work required. Students may not receive credit for CHIN 202 and CHIN 209 or 210.
CHIN 209 - Intensive Intermediate Chinese

Credits: 6
Recommended for students who desire training in Chinese to an intermediate level of competence in a relatively short period of time.

Prerequisites
CHIN 102, 109, appropriate placement score, or permission of instructor.

Notes
Equivalent to CHIN 201 and 202 taught in single semester. Lab work required. Students may not receive credit for CHIN 209 and CHIN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

CHIN 210 - Intermediate Chinese

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Chinese-speaking regions.

Prerequisites
CHIN 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for CHIN 210 and CHIN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CHIN 250 - Gateway to Advanced Chinese

Credits: 3
Integration of advanced intermediate-level Chinese reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisites
CHIN 210, appropriate placement score, or permission of department.

Notes
Taught in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CHIN 300 - Reading Skills Development**

Credits: 3  
Develops reading proficiency, emphasizing vocabulary and grammar of standard written Chinese. Introduces discourse structure, sociolinguistic and cultural knowledge, and strategies for reading Chinese at an advanced level.

**Prerequisites**  
CHIN 250, appropriate placement score, or permission of instructor.

**Notes**  
Conducted in Chinese.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**CHIN 301 - Advanced Grammar and Syntax**

Credits: 3  
In-depth review of Chinese grammar and syntax. Provides extensive practice in controlled and free writing, emphasizing fundamental difficulties and points of interference between English and Chinese.

**Prerequisites**  
CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

**Notes**  
Conducted in Chinese.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**CHIN 305 - Chinese for the Business World**

Credits: 3  
Introduces terminology and structure of business Chinese. Emphasizes acquiring vocabulary and developing facility in Chinese business articles and correspondence.

**Prerequisites**  
CHIN 250 or equivalent; appropriate placement score; or permission of instructor.

**Notes**  
Conducted in Chinese. May be repeated for credit once with permission of department when content is different.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

---

**CHIN 310 - Survey of Chinese Literature**
CHIN 309 - Chinese Literature: 19th Century

Credits: 3
Introduces outlines of Chinese literature to the 19th century, presented through literary sources arranged in roughly chronological order. Readings include poetry; fiction; personal essays; documents of philosophy, history, and religion; and transcribed oral records.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101, or permission of instructor.

Notes
Knowledge of Chinese language helpful but not required. Course work in English. May be repeated for credit once when course content is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 311 - Modern Chinese Literature in Translation

Credits: 3
Introduction of outlines of modern Chinese literature from early 20th century to post-Mao era, presented through literary sources arranged in roughly chronological order. Readings include poetry, fiction, personal essays.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101, or permission of instructor.

Notes
Knowledge of Chinese language helpful but not required. Course work in English. May be repeated for credit once when course content is different, with approval from department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 318 - Introduction to Classical Chinese

Credits: 3
Introduces basic structures and vocabulary of Classical Chinese, which still has a large influence on the formal written prose of modern newspapers and documents.

Prerequisites
CHIN 250, appropriate placement score, or permission of instructor.

Notes
Conducted in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CHIN 320 - Contemporary Chinese Film**

Credits: 3
Explores China from 1949 to present through cinematic and literary representations. Discussions focus on representations of cultural, social, and political changes in the movies. Also introduces critical readings that address issues of gender and youth, family, ethnicity, modernity and the nation, as well as visuality and memory.

Notes
Knowledge of Chinese language helpful but not required. Course work in English.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 325 - Major Chinese Writers**

Credits: 3
Studies works of major Chinese writers.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101, or permission of instructor.

Notes
Writers vary. Course work in English. May be repeated for credit up to two times with permission of department. Knowledge of Chinese helpful but not required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CHIN 328 - Asian American Women Writers**

Credits: 3
Introduction to selected works by female writers of Chinese, Filipino, Indian, Japanese, and Korean descent. Analyzes themes, form, style, language, and structure of a variety of works, mainly novels and short stories. Assesses role and significance of writings as part of ethnic American and women's literature by exploring questions of identity formation and disintegration, and how they are rooted in gender, social status, ethnicity, community, geography, and generational conflict.

Satisfies General Education Requirement: Literature

Notes
Knowledge of Asian languages not required. Course work in English.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CHIN 355 - Readings in Chinese Poetry and Poetics

Credits: 3
Close readings and discussions of primary texts covering major periods in Chinese poetry to 1949. Analyzes variety of themes, forms, and styles.

Prerequisites
CHIN 300 or permission of instructor.

Notes
Conducted in Chinese. May be repeated once for credit with permission of department when readings vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 365 - Readings in Chinese Fiction after Mao

Credits: 3
Close readings and discussions of primary texts after the Cultural Revolution. Analyzes themes, subjects, language, and styles.

Prerequisites
CHIN 300 or permission of instructor.

Notes
Conducted in Chinese. May be repeated once for credit with permission of department when readings vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 470 - Special Topics in Chinese Studies

Credits: 3
Special topics on Chinese language, literature, or culture organized by theme, genre approach, or era. May be repeated once for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 480 - Fourth-Year Chinese I

Credits: 3
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisites
CHIN 300 and 301; appropriate placement score or permission of instructor.
Notes
Conducted in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CHIN 481 - Fourth-Year Chinese II

Credits: 3
Advanced work in major grammatical and lexical topics of Chinese. Applies theoretical principles to guided written and oral exercises.

Prerequisites
CHIN 300, 301, 480; and appropriate placement score or permission of instructor.

Notes
Conducted in Chinese.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Civil and Infrastructure Engineering

CEIE 100 - Environmental Engineering around the World

Credits: 3
Introduces environmental engineering as practiced in different societies around the world. Environmental engineering is broadly defined as organizational and physical infrastructure to manage natural resources. Focuses on how different societies today and in the past have responded to environmental challenges related to engineering opportunities. Issues include construction of large dams to manage river systems; use of forecast climate and weather data to improve agriculture, emergency response, or water supply; collection and treatment of wastewater; public health and pollution control; disposal of waste nuclear materials; and management of significantly polluted sites.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 150 - Sustainable Cities, Sustainable Villages I

Credits: 1
This course engages students in the process of becoming sustainable civil engineering practitioners. Concepts that relate to
current practice in planning, designing and managing sustainable infrastructures are presented. Contemporary tools for measuring and evaluating sustainable design, development and operation are introduced.

**Prerequisites**
Acceptance in the BS Civil and Infrastructure Engineering Program is a prerequisite for CEIE 150.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

### CEIE 197 - Industrial Internship I-A

Credits: 0  
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

**Prerequisites**
Civil and Infrastructure Engineering majors only.

**Corequisite**
ENGR 183.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

### CEIE 198 - Industrial Internship I-B

Credits: 0  
Supervised 10-week summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government.

**Prerequisites**
Grade of C or better in CEIE 197 and ENGR 183. Civil and Infrastructure Engineering majors only.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**When Offered:** SUM

### CEIE 199 - Industrial Internship I-C

Credits: 1  
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.

**Prerequisites**
Grade of C or better in CEIE 197 and ENGR 183. Civil and Infrastructure Engineering majors only.
CEIE 230 - Hydraulics

Credits: 3
Principles of fluids in equilibrium and motion. Topics include hydrostatic pressure; continuity, Bernoulli, and momentum equations; viscosity flow problems; pressure pipe flow and turbomachinery; measuring instruments; and applications to closed conduits and open channels.

Prerequisites
Grade of C or better in PHYS 160.

CEIE 250 - Sustainable Cities, Sustainable Villages II

Credits: 1
This course engages students in the process of becoming sustainable civil engineering practitioners. Students integrate current practice in planning, designing and managing sustainable infrastructure. Contemporary tools for measuring and evaluating sustainable design, development and operation are used in the analysis of a civil engineering system.

Prerequisites
30 credit hours and a grade of C or better in CEIE 150.

CEIE 290 - Engineering Computation and Design

Credits: 3
Introduces civil engineering design process. Includes methods, technologies for spatial data acquisition, emphasizing land measurements, mapping, and surveying. Covers processing field data to incorporate into computer-aided design systems; conversion of raw data into finished design documents, including schematic layouts, digital terrain models, preliminary plans, topographic maps, detailed design plans, cut sheets, cross-sections and profiles; 2D and 3D computer-aided design techniques; and application of digital computation. Includes design projects.

Prerequisites
Grade of C or better in ENGR 183.
CEIE 297 - Industrial Internship II-A

Credits: 0
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

Prerequisites
Civil and Infrastructure Engineering majors only.

Corequisite
ENGR 183

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: S

CEIE 298 - Industrial Internship II-B

Credits: 0
Supervised 10-week summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government.

Prerequisites
Grade of C or better in CEIE 297 and ENGR 183.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: SUM

CEIE 299 - Industrial Internship II-C

Credits: 1
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.

Prerequisites
Grade of C or better in CEIE 297 and ENGR 183.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: F

CEIE 301 - Engineering and Economic Models in Civil Engineering

Credits: 3
Applies planning, analysis, control, and engineering economic models to life cycle of physical infrastructure. Introduces
infrastructure design process and application of quantitative and probabilistic models. Presents applications of model building for engineering economics; decision making; forecasting; resource scheduling and allocation; estimating; work measurement and materials; and quality and process control in water, transportation, environmental, energy, and telecommunications infrastructure systems and the built environment.

Prerequisites
Grade of C or better in STAT 344 and ENGR 117 or CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

CEIE 305 - Soil Mechanics

Credits: 3
Covers soil classification, soil properties and engineering characteristics of soils. Includes seepage effects, effective stresses, soil strength and deformation characteristics. Also, the determination of immediate and consolidation settlement, lateral earth pressures and bearing capacities. Introduces foundation design fundamentals.

Prerequisites
Grade of C or better in ENGR 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

CEIE 311 - Structural Analysis

Credits: 3
Basic concepts and assumptions of structural analysis, including statical and geometric redundancy. Analysis, by integration of deformation of simple structural members. Virtual work method for the analysis of deformations of simple structural systems such as articulate beams, trusses, frames, and arches. Method of forces to analyze statically indeterminate systems, method of displacements to analyze geometrically indeterminate systems, and symmetry and antisymmetry in structural analysis. Uses computer programs for structural analysis.

Prerequisites
Grade of C or better in ENGR 310.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

CEIE 340 - Water Resource Engineering

Credits: 3
Introduces principles and practice of water resources engineering. Topics include hydrology, governing principles, design and evaluation methods, common models, and typical applications in water resource engineering. Laboratory and field work required
Prerequisites
Grade of C or better in CEIE 230.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: F, S

CEIE 350 - Sustainable Cities, Sustainable Villages III

Credits: 1
Students apply sustainable civil engineering principals in the design of an infrastructure system. Students learn how to integrate contemporary topics in planning, design and management of sustainable infrastructure. Tools for measuring and evaluating the sustainability of the design, development and operation of a civil engineering system are applied.

Prerequisites
60 credit hours and a grade of C or better in CEIE 250.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CEIE 355 - Environmental Engineering and Science

Credits: 3
A course in environmental science and engineering to introduce students to the concepts of water pollution, air pollution, noise, and solid waste generation and management. Relationships between human population growth and pollution are introduced. Contemporary environmental engineering topics such as sustainability and global climate change are presented.

Prerequisites
Grade of C or better in CEIE 230, CHEM 211 or CHEM 251, and PHYS 266

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: f, s

CEIE 360 - Introduction to Transportation Engineering

Credits: 3
Introduces transportation systems and the factors that influence their planning, design, and operation. Topics include fundamentals of urban travel, travel demand forecasting, and traffic flow; principles of highway design; highway capacity and level of services; introduction to traffic control; traffic signal control systems; intersection design; speed zoning and control; and introduction to Intelligent Transportation Systems and travel demand management. Requires laboratory, field work on selected topics.

Prerequisites
Grade of C or better in ENGR 210, ENGL 302, and CEIE 290.
Notes
Fulfills writing-intensive requirement for civil and infrastructure engineering major.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: F, S

CEIE 370 - Construction Systems

Credits: 3
Overview of the modern construction industry and principles and practices of construction management. Topics include project planning, construction administration, the contract environment, equipment operations, cost estimation and scheduling, and legal theories. Current industry trends are emphasized as are the uses of modern scheduling and cost-estimating software and online databases.

Prerequisites
Grade of C or better in CEIE 301

CEIE 397 - Industrial Internship III-A

Credits: 0
Prepares for summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering, and construction firms, or government.

Prerequisites
Civil and Infrastructure Engineering majors only.

Corequisite
ENGR 183

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: S

CEIE 398 - Industrial Internship III-B

Credits: 0
Supervised 10-week summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government.

Prerequisites
Grade of C or better in CEIE 397 and ENGR 183. Civil and Infrastructure Engineering majors only.
CEIE 399 - Industrial Internship III-C

Credits: 1
Evaluation of summer work experience in civil and infrastructure engineering positions with land development, architecture/engineering and construction firms, or government. Requires written report and presentation.

Prerequisites
Grade of C or better in CEIE 397 and ENGR 183. Civil and Infrastructure Engineering majors only.

CEIE 400 - Civil Engineering Planning and Management

Credits: 3
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site plan development, and approval process. Examines structure, function, and purpose of urban design systems and how they can be achieved. Discusses physical relationships among development, land use, transportation, energy, communications, and water systems. Studies public- and private-sector urban development industry. Other topics include innovation, competition, new technology, and environmental issues. Requires design projects.

Prerequisites
Grade of C or better in CEIE 311, CEIE 340, CEIE 355 and CEIE 360.

CEIE 401 - Sustainable Land Development

Credits: 3
Introduces students to sustainable land development topics including low impact development, site resource conservation, ultra low water design, deconstruction and materials reuse, healthy building design, greenhouse gas reduction, zero and low energy design, and other topics related to sustainable practices in facilities and infrastructure design and construction.

Prerequisites
Grade of C or better in CEIE 355, CEIE 340 and CEIE 360.

Corequisite
CEIE 400
CEIE 410 - Geographic Information Systems in Engineering

Credits: 3
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other situations. Explores methods, technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisites
Grade of C or better in CS 112 or ENGR 117 CEIE 360 and CEIE 355.

Notes
Credit is not given for both CEIE 410 and 510.

CEIE 411 - Introduction to Design and Inventive Engineering

Credits: 3
Outlines major stages of design process. Covers conceptual versus detailed design; design evaluation. Covers applications of Artificial Intelligence (AI) in design, including evolutionary computation. Covers inventive problem-solving methods, including brainstorming, Synectics, TRIZ, and morphological analysis. Includes computer tools to support design creativity. Features collaborative design: fundamentals and group projects dealing with civil engineering problems provided by industry.

CEIE 412 - Structural Steel Design

Credits: 3
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design, lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools.

Prerequisites
Grade of C or better in CEIE 311

Hours of Lecture or Seminar per week: 3
CEIE 413 - Reinforced Concrete Design

Credits: 3
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with ACI code requirements.

Prerequisites
Grade of C or better in CEIE 311.

CEIE 440 - Water Supply and Distribution

Credits: 3
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water supplies; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.

Equivalent to CEIE 540

Prerequisites
Grade of C or better in CEIE 230.

Notes
Credit is not given for both CEIE 440 and 550.

CEIE 442 - Open Channel Flow

Credits: 3
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; and modeling and computer applications in open channel analysis and design.

Prerequisites
Grade of C or better in CEIE 230
CEIE 450 - Environmental Engineering Systems

Credits: 3
Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches to characterize environmental sites.

Prerequisites
Grade of C or better in CEIE 355.

Notes
Credit is not given for both CEIE 450 and CEIE 550.

CEIE 452 - Wastewater Management

Credits: 3
Explores design fundamentals to treat wastewater. Topics include environmental regulations; wastewater characterization; pretreatment systems; biological, physical, and chemical treatment; treatment and disposal of wastewater sludge; and financing and management. Also covers consequences of environmental policies; environmental impact assessments; and federal, state, and local government laws and regulations related to wastewater collection, treatment, and disposal.

Prerequisites
Grade of C or better in CEIE 355.

CEIE 456 - Environmental Law

Credits: 3
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.
Prerequisites
Grade of C or better in CEIE 355.

Notes
Credit is not given for both CEIE 456 and 556.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

CEIE 461 - Traffic Engineering

Credits: 3
Elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow
design elements including volume, density, and speed; intersection design elements including traffic control device warrants,
signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and
circulation.

Prerequisites
Grade of C or better in CEIE 360.

Notes
Credit is not given for both CEIE 461 and 561.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 462 - Urban Transportation Planning

Credits: 3
Technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data
collection methods; urban transportation modeling system, including land use, trip generation, trip distribution, mode choice, and
trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options
for urban transport.

Prerequisites
Grade of C or better in CEIE 360.

Notes
Credit is not given for both CEIE 462 and CEIE 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 471 - Construction Administration
Credits: 3
Examines the principals of project planning and administration using modern specification and project delivery methods. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Prerequisites
Grade of C or better in CEIE 370

Notes
Credit is not given for both CEIE 471 and CEIE 571.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: f

CEIE 472 - Building Information Modeling

Credits: 3
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Prerequisites
Grade of C or better in CEIE 290 and CEIE 370.

Notes
Credit is not given for both CEIE 472 and CEIE 572.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 490 - Senior Design Project

Credits: 3
Capstone design experience. Integrates all design fundamentals employed by a typical civil engineering design team. Major team efforts include land use, transportation, water and sewerage, stormwater, site analysis, economic and regulatory considerations, sectioning, grading, and siting. Students focus on teamwork, interdisciplinary interaction, and tradeoff decision making. Design team analyzes all aspects of a major urban project, develops solutions to design problems, and produces project report and oral presentation. Design effort completed and report is prepared, presented, and evaluated. Primary course goal is to produce design for contemporary civil infrastructure project.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Grade of C or better in CEIE 355, CEIE 400 and CEIE 440, CEIE 412 or CEIE 413.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### CEIE 498 - Independent Study in Civil Engineering

Credits: 1-3  
Directed self-study of special topics of current interest.

**Prerequisites**  
60 credits; must be arranged with an instructor and approved by department chair before registering.

**Notes**  
May be repeated for maximum 6 credits if topics are substantially different.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

### CEIE 499 - Special Topics in Civil Engineering

Credits: 1-3  
Vary with nature of topic. Topics of special interest to undergraduates.

**Notes**  
May be repeated for maximum 6 credits if topics are substantially different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CEIE 500 - Land Development Engineering

Credits: 3  
Quantitative and qualitative analysis in planning, design, construction, and management of engineering systems and facilities. Introduces policies, programs, and regulations that influence land development, history-enabling legislation, governing and regulating bodies, control of site-plan development, and approval process. Examines structure, function, and purpose of infrastructure systems, and ways in which infrastructure systems design can be achieved.

**Prerequisites**  
BS in CEIE or permission of instructor.

**Notes**  
Credit is not given for both CEIE 400 and 500.

**Hours of Lecture or Seminar per week:** 3
CEIE 501 - Sustainable Development

Credits: 3
Introduction to sustainability concepts and terminology including the development and use of sustainability indices. Exploration of sustainability tools and frameworks such as the Leadership in Energy and Environmental Design (LEED) Green Building Rating System, American Institute of Architects Sustainable Design Resources Guide, and the Natural Step (TNS) Framework. Methods for evaluation of sustainable sites, water/energy efficiency, sustainable materials and resources, and indoor air quality are presented.

Prerequisites
Graduate standing.

CEIE 510 - Geographic Information Systems in Engineering

Credits: 3
Introduces geographic information systems (GIS) and their application in environmental, transportation, land-use planning, and other engineering-related decision situations. Introduces methods and technologies for spatial data acquisition, specification, storage, manipulation, query, thematic analysis, presentation, and application in the design process. Introduces relationships, integration of GIS with computer-aided design and global positioning system. Hands-on projects.

Prerequisites
Knowledge of computer programming and databases or permission of instructor.

Notes
Credit is not given for both CEIE 410 and 510.

CEIE 511 - Introduction to Design and Inventive Engineering

Credits: 3
Engineering creativity and its roots; DaVinci Principles, the Medici Effect, creative environment, engineering method, AI and evolutionary computation in design, collaborative and Internet-based design; evaluation in design; human problem solving; inventive design methods such as constraint search, morphological analysis, brainstorming, Synectics, and TRIZ. Requires group projects using problems provided by industry.

Notes
Graduate standing.
CEIE 512 - Structural Steel Design

Credits: 3
Structural design process, steel material and shapes, steel behavior, specs and codes, LRFD/ASD, loads, gravity and lateral systems, bracings, tributary areas, tension members design; shear lag, net area, load transfer, column design; column strength curve, effective length approach, local buckling, beam design; lateral-torsional buckling, unbraced length, noncompact and compact, deflections, connections design; bolts, bearing, slip-critical, eccentric shear, welds, capacity, fillets, eccentric welds, stability, frame design; beam-column connections, base plate, bracings, optimization, computer design tools

Prerequisites
CEIE 311

Notes
Credit is not given for both CEIE 412 and 512.

When Offered: s

CEIE 513 - Reinforced Concrete Design

Credits: 3
Covers the analysis and design of reinforced concrete members including beams, columns, slabs and footings; sizing of structural members for flexure, shear and torsion; determining serviceability limits including deflection, shrinkage and creep; detailing reinforcing steel bars including bond, development length and splices; and design of an integrated reinforced concrete structure for gravity loads, wind loads and seismic loads in accordance with the ACI code requirements.

Prerequisites
CEIE 311

Notes
Credit is not given for both CEIE 413 and 513.

When Offered: f

CEIE 516 - Engineering Law and Ethics

Credits: 3
Overview of body of law surrounding design, construction, and facilities maintenance and operations. Introduces tort law and its relationship to design and construction contracting. Uses case studies of contract form, general and special conditions, ethics, contract administration, claims, dispute resolution, arbitration, and appeals process.

Prerequisites
CEIE 400.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 520 - Advanced Structural Steel Design
Credits: 1
History and evolution of steel structural systems, design and reliability analysis methods, recent trends in skeleton and space structures.

Prerequisites
Graduate Standing in CEIE; CEIE 512 or equivalent

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 521 - Steel Skeleton Structures

Credits: 1
History and evolution of steel structural systems, design and reliability analysis methods, recent trends in skeleton and space structures.

Prerequisites
Graduate Standing in CEIE; CEIE 520

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 522 - Steel Space Structures

Credits: 1
Evolution and taxonomy of space structures, load analysis, including gravity, wind and earthquake forces, simplified and computer methods of analysis and optimization, structural analysis and shaping of joints.

Prerequisites
Graduate Standing in CEIE; CEIE 520

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 540 - Water Supply and Distribution

Credits: 3
Analysis and design of public water supplies. Topics include supply evaluation; water quality and quantity requirements; treatment requirements and methods; hydraulic analysis of water distribution systems including line sizing, fire protection, pumps, valves, and storage; sustainability; security; concepts in management, business, and public policy of public water systems; and federal, state, and local government laws and regulations related to public water systems. Requires laboratory, field work on selected topics.

Prerequisites
A course in hydraulics or fluid mechanics.

**Notes**
Credit is not given for both CEIE 440 and 540.

---

**CEIE 542 - Open Channel Flow**

Credits: 3
Analysis and design of open channels. Topics include principles of open channel flow including conservation of mass, momentum and energy; flow regimes including uniform, gradually varied, rapidly varied, and unsteady flows; sediment transport; channel design; modeling and computer applications in open channel analysis and design.

**Prerequisites**
A course in hydraulics or fluid mechanics.

**Notes**
Credit is not given for both CEIE 442 and 542.

---

**CEIE 550 - Environmental Engineering Systems**

Credits: 3
Introduces systems analysis in environmental engineering. Applies linear and dynamic programming, computer modeling, and other systems analysis methodologies to solve environmental engineering problems related to air, soil, and water pollution. Reviews experimental design approaches for the characterization of environmental sites.

**Prerequisites**
CEIE 455.

**Notes**
Credit is not given for both CEIE 450 and 550.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**CEIE 552 - Wastewater Engineering**

Credits: 3
Explores design fundamentals to treat wastewater. Topics include environmental regulations; wastewater characterization; pretreatment systems; biological, physical, and chemical treatment; treatment and disposal of wastewater sludge; and financing and management. Includes consequences of environmental policies; environmental impact assessments; and federal, state, and local government laws and regulations related to wastewater collection, treatment, and disposal.

**Prerequisites**
CEIE 555.

**Hours of Lecture or Seminar per week:** 3
CEIE 555 - Introduction to Environmental Engineering

Credits: 3  
Introduces principles of environmental engineering management and design pertaining to water supply and treatment, wastewater treatment, solid waste management, air pollution control, noise pollution measurement and control, and environmental impact assessment.

Notes  
Credit is not given for both CEIE 355 and 555.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: S

CEIE 556 - Environmental Law

Credits: 3  
Introductory course in the study of environmental laws as they pertain to urban systems infrastructure management. Reviews the National Environmental Policy Act, Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, and other environmentally related legislation. Also reviews laws for allocation of surface and groundwater supplies, and reviews environmental law databases.

Notes  
Credit is not given for both CEIE 456 and 556.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: S

CEIE 560 - Public Transportation Systems

Credits: 3  
Analyzes public transportation systems in terms of their role in urban transportation. Topics include history of public transportation in the United States, quantitative performance attributes of different modes, analytical techniques for planning and operation, and management and administrative concepts.

Prerequisites  
CEIE 360.

Notes  
Credit is not given for both CEIE 460 and 560.

Hours of Lecture or Seminar per week: 3
CEIE 561 - Traffic Engineering

Credits: 3
Covers elements of traffic engineering analysis; system components of traffic operations: driver, vehicle, and roadway; traffic flow design elements including volume, density, and speed; intersection design elements including traffic control device warrants, signal timing, delay, capacity, and accident countermeasures; and terminal design elements including inflow, outflow, and circulation.

Prerequisites
CEIE 365.

Notes
Credit is not given for both CEIE 461 and 561.

CEIE 562 - Urban Transportation Planning

Credits: 3
Covers technical and qualitative aspects of urban transportation planning process. Topics include urban travel characteristics and data collection methods; urban transportation modeling system, including land use, trip generation and distribution, mode choice, and trip assignment models; site traffic impact studies; environmental impacts; project and plan evaluation; and technology options for urban transport.

Prerequisites
CEIE 365.

Notes
Credit is not given for both CEIE 462 and 562.

CEIE 565 - Design of Transport Systems

Credits: 3
Covers street and highway facilities design emphasizing interaction among driver, vehicle, and geometric design elements. Design of interchanges and intersections; highway roadside safety and tort liability; pavement design, maintenance and safety; edge drop-off; clear zone concept; roadside barriers; guiderail treatments; traffic calming; pedestrian and bicycle and transit design challenges; and work-zone traffic control. Provides skills to understand interaction among driver, vehicle, and environment, and how to incorporate better design practices. Also introduces concepts of forgiving highway design and highway
tort liability.

Prerequisites
CEIE 360.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 571 - Construction Administration

Credits: 3
Examines the principals of project planning and administration using modern specification and project delivery techniques. The role of the project manager as facilitator, constructability advisor, and on-site administrator is emphasized. Project risk transference, market conditions, and legal requirements are explored in the construction contract environment. Other topics include green specifications, design-build delivery, job order contracting, turnkey construction, and public-private partnerships. Appropriate for students, engineering and design professionals, project managers, contract administrators, and owners interested in the planning and administration needs of construction.

Notes
Credit is not given for both CEIE471 and 571.

CEIE 572 - Building Information Modeling

Credits: 3
Virtual design and construction techniques are covered using modern 3D Building Information Modeling (BIM) software. Historical and technological basis for virtual building and infrastructure design are presented. Design and construction coordination are emphasized using clash detection, conflict management, constructability analysis, specification mapping, and asset management. Industry-supported model component databases are used with commercial software design environments for hands-on simulated design and construction projects.

Notes
Credit is not given for both CEIE 472 and 572.

CEIE 600 - Civil Engineering Infrastructure Planning and Management

Credits: 3
Study of planning and management practices applicable to the life cycle of the physical urban infrastructure including roads, sewers, water distribution and other pipelines, telecommunications, and energy distribution systems. Includes study of relationship of urban growth and infrastructure reinvestment; mechanisms of deterioration; direct and indirect methods of assessment and degradation models; capital finance, budgeting, and programming; planning integration and coordination; quantitative applications in planning; uncertainty and reliability; public-private partnerships; operation and maintenance strategies; and future issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CEIE 601 - Infrastructure Modeling

Credits: 3
Concepts of modeling for infrastructure engineering. Covers modeling, simulation, optimization, deterministic and stochastic models, and limitations of modeling approaches. Also includes multiple objective, multiple decision-maker problems, and case studies in areas such as transportation, water resources, the environment, energy, telecommunications, and construction.

Prerequisites
CEIE 605

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

CEIE 605 - Infrastructure Systems Analysis

Credits: 3
Probability and statistics topics for analysis of infrastructure systems. Includes Bayesian decision theory, decision trees, Monte Carlo analysis, stochastic models, and economic analysis of infrastructure projects and systems.

Prerequisites
STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

CEIE 610 - Construction Systems and Management

Credits: 3
Studies applications of construction management concepts and techniques to the production of constructed system. Explores construction industry and environment through project cycle design and construction phases, emphasizing estimating, planning, scheduling, labor, money, materials, machines, time, and information. Uses popular scheduling software with class projects and case study.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 631 - Water Resources Engineering I: Principles and Practice

Credits: 3
Introduction to the principles of hydrology and hydraulics, and their application to the planning, design and management of modern water resources.

Prerequisites
CEIE 340 or equivalent.
CEIE 632 - Groundwater Systems Modeling

Credits: 3
Introduces groundwater hydrology and modeling, including quantity and quality aspects. Topics include characterization of subsurface regime; well hydraulics; consideration of two-dimensional steady and unsteady-state flows; exploration of modeling approaches; simulation and optimization modeling; contaminant transport; parameter estimation; and design of systems to control groundwater quantity and quality.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 663 - Intelligent Transportation Systems

Credits: 3
Advanced transportation system operations and safety through the use of wireless and wireline communications; integrated transportation systems; in-vehicle technologies; industry standards; and systems architecture. Provides skills to apply advanced technologies to transportation systems to improve operational and safety performance. Provides nontraditional tools to address issues of congestion and improved safety performance.

Prerequisites
CEIE 561 or 562.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 670 - Civil Engineering Decision Methods and Tools

Credits: 3
Principles of decision making and knowledge acquisition to build knowledge-based decision support tools for civil, environmental, and infrastructure engineering. Includes solving complex problems from several areas of urban systems engineering and using various decision-support tools based on Bayesian decision theory and principles of artificial intelligence, including knowledge-based systems and learning systems.

Prerequisites
CEIE 605

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 671 - Best Engineering Management Practices
Credits: 3
Covers strategies to identify and implement best engineering management practices. Addresses development of performance standards. Introduces quality improvement methods and standards, including Quality Functional Development, ISO 9000, Baldrige Excellence Award, and the Six Sigma method. Presents relevant national and engineered standards, statistical norms, rules of thumb, selected statistics from comparative projects, excerpts from performance records, and performance targets. Covers case studies relating to management of infrastructure projects. Includes introduction to benchmarking methods, addressing criteria to select benchmarking program or process.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 673 - Leading Engineering Innovation

Credits: 3
Strategies for fostering and assessing the innovative spirit of a professional, technical organization will be covered. Basic engineering leadership concepts, theories, and principles will be reviewed. Relevant case studies describe the discipline of fostering and leading technical innovation in existing technical organizations; and how technology and other competitive developments are radically changing the process of engineering innovation.

Prerequisites
Graduate standing

CEIE 674 - Infrastructure Finance

Credits: 3
Course reviews key financial concepts used in the management of municipal infrastructure using a case study approach. Issues related to both public and private infrastructure entities will be covered. The course provides a practical introduction to a broad spectrum of infrastructure finance issues.

Prerequisites
Graduate standing

CEIE 675 - Developing the Technical Enterprise

Credits: 3
Introduce students to concepts of engineering enterprise development as related to technical products and services. Engineering students learn to think and act entrepreneurially, the importance of enterprise goals, and how to develop technical opportunities.

Prerequisites
Graduate standing

CEIE 680 - Introduction to Infrastructure and Security Engineering
In-depth review of present and proposed practices and issues to manage civil infrastructure, focusing on performance and security through the full life cycle, including planning, designing, and construction of new, rehabilitated, modified, and recycled or decommissioned components. Covers asset-management methods and their effectiveness in managing all types of risk. Profiles policies leading civil infrastructure industry toward adoption of such methods, and examines industry case studies. Special attention to vulnerability assessment and risk management in context of broad sampling of potential threats.

Prerequisites
BS in civil engineering, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 681 - Security of Structural Systems

Credits: 3
Basic concepts of security of structural systems; analytical models of behavior of structural systems under various security threats; computer simulation of security threats, including blasts and fire; generation of terrorist scenarios and of preventive structural measures; design for security; out-of-the-box approaches to development of preventive structural measures; lessons learned; and intelligent structural security systems.

Prerequisites
BS in Civil Engineering or CEIE 367.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 683 - Water and Wastewater Systems Security

Credits: 3
Examines overall security of water and wastewater systems. Covers theory and methods to define water and wastewater infrastructure as physical and organizational systems. Explores concepts of infrastructure systems security; identifies actors, interactions in organizational infrastructure, and threats to water and wastewater infrastructure; describes behavior of physical and organizational infrastructures under stress; examines history of threats or attacks against water and wastewater systems; and explores evolution of design, operations, and maintenance paradigms in response to changes in threats. Covers proactive responses to security threats through vulnerability assessments, and models of organizational and physical infrastructure system.

Prerequisites
BS in Civil Engineering or CEIE 440 and CEIE 455.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 685 - Civil Engineering Information Management

Credits: 3
Advanced course covering all phases of information management life cycle from conceptual design and data collection through
systems development, archiving, and disposal. Covers software engineering such as structured analysis, rapid prototyping, and object-oriented analysis as applied to urban systems infrastructure problem solving. Reviews database technology, spreadsheets, communications software, customized applications software, groupware, and graphics software including computer-aided design and geographic information systems. Covers selection and use of appropriate software to match specific engineering problems related to the design, construction, and management of civil engineering infrastructure. Includes design and development of system for engineering application.

**CEIE 686 - Transportation System Security and Safety**

Credits: 3
Focuses on critical transportation systems infrastructure and operations, and technologies for predicting and managing damage and disruptions caused by potential threats, including natural and technological disasters and terrorist threats. Includes asset management, methodologies for assessing vulnerabilities, potential impact of damage and disruption, applying state-of-the-art technologies and R&D processes for harnessing best analysis methods, and technologies for hardening transportation infrastructure systems. Includes sensing and surveillance using satellite and aerial remote sensing imagery, application of GIS and spatial information technologies, information and communication, intelligent transportation systems, hardening systems, and making intelligent choices for implementing technology advances to transportation security and safety.

**Prerequisites**
BS in engineering or permission of instructor.

**CEIE 690 - Topics in Civil Engineering**

Credits: 3
Topics not covered in the regular civil engineering offerings.

**Prerequisites**
Determined by topic.

**Notes**
Course content may vary each semester. Course may be repeated with change in topic.

**CEIE 732 - Water Resources Engineering II: Water Resource Systems**

Credits: 3
Introduces concepts, applications, and tools of systems analysis for water resources planning, management, and design. Problems including river basin planning, real-time hydrosystem operations, water quality management, capacity expansion, urban drainage
network design, and sanitary sewer design used to illustrate applications of systems analysis. Tools include optimization and simulation modeling, and knowledge-based systems.

**Prerequisites**
CEIE 631 or equivalent.

**When Offered:** s

---

**CEIE 751 - Environmental Sustainability and Entrepreneurship**

Credits: 3
Intended to help students develop innovative and sustainable ideas that satisfy social, environmental, and financial goals. Appropriate for students with a background in environmental engineering with interest in technical business practice that demonstrates social responsibility and environmental stewardship. Students develop concepts for green products and services and learn to: develop new green/sustainable ideas, estimate the market audience and impact of the concept, and estimate the costs of development and impacts on the environment.

**Prerequisites**
Graduate Standing in CEIE

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**CEIE 762 - Transportation System Planning Models**

Credits: 3
Covers transportation systems analysis; theory, mathematical structure, and applications of transportation planning models; network analysis and equilibrium; dynamic and stochastic equilibrium models; modal choice analysis; discrete choice models of transportation demand; and model estimation and aggregation.

**Prerequisites**
CEIE 562 or 660; CEIE 601.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CEIE 767 - Traffic Engineering Modeling and Analysis**

Credits: 3
Covers basic principles of simulation; queuing theory and traffic signal operations at individual intersections, arterials and networks; applying models related to traffic signalization; optimization and traffic simulation; and developing skills to select most appropriate model for given scenario.

**Prerequisites**
CEIE 561.
Corequisite
CEIE 601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CEIE 777 - Analytical Methods for Construction Operations

Credits: 3
Overview of quantitative methods used for the design and analysis of construction operations to maximize productivity and minimize resource idleness. Includes discussions on equipment productivity, queuing theory, line of balance techniques, simulation, and applications to lean construction.

Prerequisites
Graduate Standing in CEIE; CEIE 605, STAT 544 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 795 - Civil and Infrastructure Engineering Seminar

Credits: 0
Invited speakers, faculty, and CEIE graduate students lecture on current topics and research. Partially fulfills MS in civil and infrastructure engineering seminar requirement; required for master's candidates during semester they complete research project or thesis.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CEIE 796 - Directed Reading

Credits: 1-3
Reading on specific topic under direction of faculty member.

Prerequisites
Graduate standing and permission of instructor.

Notes
May be repeated with change in topic.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
CEIE 798 - Research Project in Civil Engineering

Credits: 3
Analyzes and investigates contemporary problem in civil, environmental, and infrastructure engineering. Requires prior approval by faculty member who supervises student's work.

Prerequisites
Permission of instructor

Corequisite
CEIE 795.

Notes
Written report also required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CEIE 799 - Master's Thesis

Credits: 1-6
Research project chosen and completed under guidance of graduate faculty member that results in technical report acceptable to three-faculty-member committee, and an oral defense.

Prerequisites
18 credits of graduate-level course work and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CEIE 890 - Special Topics in Urban Transportation

Credits: 3
Includes traffic safety analysis, simulation in transportation, intelligent transportation systems, advanced public transportation systems, congestion and travel demand management, geographic information systems and information technology, and innovative refinancing and public-private partnerships.

Prerequisites
CEIE 560 and 660 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall
CEIE 892 - Special Topics in Environmental and Water Resource Systems Engineering

Credits: 3
Possible topics include studies in waste minimization; pollution prevention; hazardous waste management; wastewater management; air pollution control; solid waste management; environmental decision making; sustainability; water resource and environmental economics; wetlands management, design and construction; groundwater contamination modeling; stochastic hydrology; river basin planning and management; and water quality modeling.

Prerequisites
CEIE 601

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 896 - Civil Engineering Research Topics

Credits: 3
Reading on specific topic under direction of faculty member. May be repeated with change in topic.

Prerequisites
Admission into CEIE PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CEIE 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit.

Notes
No more than 24 credits of CEIE 998 and 999 may be applied to doctoral degree requirements.

CEIE 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member in civil engineering and infrastructure engineering.

Notes
May be repeated for credit.

Classical Studies
CLAS 240 - Greek and Latin Elements in English

Credits: 3
Studies formation of English vocabulary derived from Greek and Latin prefixes, stems, and suffixes to increase word power in English (vocabulary, style). Special emphasis on bioscientific, medical, and legal terminology. Intended for native and non-native speakers of English. Literary texts illustrate word analyses, vocabulary uses.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 250 - Classical Mythology

Credits: 3
Illustrates role of classical myths in classical and modern literature and art.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 260 - The Legacy of Greece and Rome

Credits: 3
Introduces history, culture, and literature of Greece and Rome through close readings of central passages from classical literature dealing with some of the most important aspects of human existence. Illustrates importance of classical antiquity for the Western tradition.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLAS 340 - Greek and Roman Epic**

Credits: 3
Examines development of classical epic as genre, from beginnings with Homer to transformations in the works of later Greek and Roman authors.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLAS 350 - Greek and Roman Tragedy**

Credits: 3
Follows development of tragedy from its origins to the works of Aeschylus, Sophocles, and Euripides, and its reappearance in the Roman world in the tragedies of Seneca. Considers influence of Greek tragedy on later cultures.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CLAS 360 - Greek and Roman Comedy**

Credits: 3
Studies forms, contexts, and developments of comedy as a dramatic form in Greco-Roman world. Traces development of New Comedy in Hellenistic age, and translation and adaptation of New Comedy by Roman dramatists Plautus and Terence.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.
Notes
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 370 - Greek and Roman Historians

Credits: 3
Examines writings of major Greek and Roman historians, including Herodotus, Thucydides, Sallust, Livy, and Tacitus; their interpretations of the past; and their influence.

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 380 - Greek and Roman Novels

Credits: 3
Examines novels written in antiquity, and influences on postclassical and modern literature. Emphasizes works of Longus, Heliodorus, Petronius, and Apuleius.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 390 - Topics in Classical Literature and Culture

Credits: 3
Studies forms, contexts, and developments of distinctive literary genre or cultural phenomenon in the Greco-Roman world.

Prerequisites
ENGL 101 (or equivalent) or permission of instructor.
Notes
Course work in English. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLAS 499 - Senior Seminar in Classical Studies

Credits: 3
Individual research on specialized topic culminating in seminar paper. Fulfills writing-intensive requirement. Subject of seminar determined by instructor in consultation with student.

Prerequisites
Modern and classical languages majors concentrating in classical studies, 90 credits, and permission of instructor.

Notes
Permission must be obtained in advance. Students may present no more than 3 credits for graduation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Climate

CLIM 101 - Global Warming: Weather, Climate, and Society

Credits: 3
This course provides a survey of the scientific and societal issues associated with weather and climate variability and change. The course will examine physical phenomena observed in the Earth's weather and climate, providing sufficient scientific and technical background to enable students to critically examine arguments being discussed by policymakers and the public at large. The course will also review the current debate on climate change from a scientific point of view, with a focus on those aspects that have the largest potential impact on global society.

Satisfies General Education Requirement: Natural science Nonlab

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 111 - Introduction to the Fundamentals of Atmospheric Science

Credits: 3
An overview of the Earth's atmosphere, its history, and the physical and chemical process that determine its characteristics. The focus is on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere, especially in the context of comparisons with other planetary atmospheres.
CLIM 112 - Introduction to the Fundamentals of Atmospheric Science Lab

Credits: 1  
Laboratory course associated with CLIM 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.

Satisfies General Education Requirement: Natural science Lab

Equivalent to PHYS 112

Corequisite
CLIM 111

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

CLIM 301 - Weather Analysis and Prediction

Credits: 4  
Large-scale behavior of mid-latitude weather systems. Includes coupling of synoptic motion to mesoscale processes that lead to significant weather events. Introduces the observational network, numerical weather models, and prediction. Laboratory portion gives practical experience in weather analysis, prediction, and technology currently used for visualization and analysis.

Prerequisites
MATH 113 or equivalent; one of CLIM/PHYS 111/112 or EOS 121 or GGS 121.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CLIM 314 - Severe and Extreme Weather

Credits: 3  
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events.

Equivalent to GGS 314

Prerequisites
MATH 113 or equivalent; CLIM/PHYS 111/112 or GGS 121.

**Hours of Lecture or Seminar per week:** 3

**CLIM 390 - Topics in Climate Research**

Credits: 1-4
Selected topics not covered in fixed content courses. May be included for credit by AOES majors in the 45 credits of courses required for BS degree.

**Prerequisites**
15 credits of AOES courses within concentration.

**CLIM 408 - Senior Research**

Credits: 3
Independent research under guidance of faculty member on a research project in numerical, experimental, observational, or theoretical atmospheric or climate-related research. A written report on the project is required.

**Prerequisites**
15 credits of AOES courses within major.

**Notes**
May be taken twice with department permission.

**CLIM 409 - Research Internship**

Credits: 3
On-the-job experience for AOES majors in industry or government laboratories, including summer research programs. Students work in observational, experimental, or theoretical research, and prepare a written report at the end of the internship.

**Prerequisites**
75 credits. 15 credits of courses in major and permission of department. See department for requirements and application procedure prior to enrollment.

**Notes**
May be taken twice with department permission.

**CLIM 411 - Introduction to Atmospheric Dynamics**

Credits: 3
The course covers the basic conservation laws of mass, momentum, and energy, and a scaling analysis of the equation of motion and the thermodynamic equation; concepts of circulation and vorticity, balanced flows in the atmosphere (e.g., the geostrophic wind and its vertical shear, and the thermal wind relationship), planetary waves and wave-mean flow interaction. It also covers
the baroclinic instability theory and energy transfer in the life cycle of the baroclinic eddies, and two-layer quasi-geostrophic theory for the mid-latitude atmospheric general circulation. Hadley circulation dynamics may be discussed if time permits.

Prerequisites
PHYS 260, PHYS 261, MATH 214, MATH 313.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

CLIM 412 - Physical Oceanography

Credits: 3
Course describes the global patterns of temperature, salinity, currents and waves in the world’s oceans, and how these patterns influence marine biota, climate, and human activity. Course introduces key concepts which explain physical features of the ocean ranging from microscopic turbulence to global circulation.

Prerequisites
MATH 113 or MATH 115, and PHYS 160 or PHYS 243, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 438 - Atmospheric Chemistry

Credits: 3
The fundamental chemical processes of the Earth's atmosphere including chemical cycles, thermodynamics, reaction kinetics, photochemistry, radiative balance, ozone chemistry and environmental issues, including air pollution, acid rain and global change. Includes some review of extraterrestrial atmospheric chemistry.

Equivalent to CHEM 438

Prerequisites
CHEM 331 and 332 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 690 - Scientific Basis of Climate Change

Credits: 3
A rigorous treatment of global warming, especially with regard to anthropogenic causes, based on the IPCC 4th Assessment Report "The Physical Science Basis". Topics include 1) Overview of observed climate, 2) Variability of climate, 3) Modeling of climate response to greenhouse gas forcing, 4) Greenhouse gases, chemistry, and aerosols, and 5) Projections of climate change and its societal impact.

Prerequisites
BS or MS in a natural science or engineering, or permission of instructor.
**CLIM 710 - Introduction to Physical Climate System**

Credits: 3
Provides modern understanding of ocean, atmosphere, and land based on fundamental physical laws. Describes current climate and physical processes by which climate is maintained. Covers theoretical models of general circulation of atmosphere, including time mean and transient behavior. Describes basics of ocean circulation, and interactions between ocean and atmosphere. Reviews past climate change; stratosphere and its interactions with troposphere; and role of land processes in modulating climate.

**Prerequisites**
BS or MS in mathematics or a physical science, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CLIM 711 - Introduction to Atmospheric Dynamics**

Credits: 3
Covers basic conservation laws of mass, momentum, and energy; and scaling analysis of equation of motion and thermodynamic equation. Discusses balanced flows in atmosphere, such as geostrophic wind and its vertical shear, and thermal wind relationship. Also explores circulation and vorticity; role of atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and role of gravity and Rossby waves in controlling general circulation of atmosphere.

Equivalent to PHYS 676

**Prerequisites**
BS or MS in mathematics or a physical science, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CLIM 712 - Physical and Dynamical Oceanography**

Credits: 3
Introduces climatology and dynamics of oceans. Covers nature of seawater, heat, and salt budgets; general circulation of the ocean, including the Gulf Stream and thermohaline circulations; dynamics of wind-driven ocean circulation; and processes influencing biological and chemical behavior.

**Prerequisites**
CSI 751 or CLIM 710 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
CLIM 713 - Atmosphere-Ocean Interactions

Credits: 3
Provides comprehensive observational and mechanistic understanding of El Niño and Southern Oscillation (ENSO) phenomena. Topics include observations and theories of seasonal and interannual changes in ocean circulation and temperature and interactions with atmosphere; equations of motion and theories of wind-driven circulation; mixed layer observations and theories; midlatitude and equatorial ocean waves; interannual variability and atmosphere-ocean coupling; and tropical oceanography and meteorology.

Prerequisites
CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 714 - Land-Climate Interactions

Credits: 3
Interdisciplinary course providing detailed description of surface energy and water balance over land, and radiative and turbulent transfer. Introduces numerical techniques for modeling land surface and applications in weather, climate, and hydrologic forecasting and simulation. Includes hands-on experience with land surface models in computer laboratory, including sensitivity experiments to reinforce theoretical concepts. Exposure to contemporary research through reading and reviewing seminal journal papers.

Prerequisites
BS or MS in mathematics or physical science, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 715 - Numerical Methods for Climate Modeling

Credits: 3
Foundation and theory of computational methods for atmosphere and ocean modeling, with special emphasis on finite-difference and spectral methods. Topics include accuracy, consistency, convergence and stability; time stepping schemes; nonlinear computational stability; energy and enstrophy conserving schemes for momentum equations; staggered and curvilinear grids; alternate vertical coordinate systems; implicit and split-explicit barotropic mode solution; pressure gradient errors and vorticity constraints; spectral methods for atmospheric models; and treatment of model physics.

Prerequisites
CLIM 712 or 711 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 750 - Geophysical Fluid Dynamics
Introduces geophysical fluid dynamics, the study of rotating stratified flows. Covers hydrostatics; equations of motion, gravity wave dynamics, and stratified flow; effects of rotation, midlatitude dynamics, Rossby number and quasigeostrophic expansion; beta plane approximation; and equatorial Kelvin and Rossby waves.

**Prerequisites**
CLIM 711, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLIM 751 - Predictability of Weather and Climate**

Credits: 3  
Covers fundamental aspects of weather and climate predictability. Using simple dynamical models, illustrates basic theorems on divergence of trajectories in phase space and fundamental periodicity properties of flow. Explores paradigms of turbulence, barotropic and baroclinic instability, and optimal linear growth to describe fundamental error growth mechanisms. Examines examples from real weather forecasting systems. Studies predictability of time averages with simple dynamical models and experiments using complex general circulation models and historical data analysis. Emphasizes roles of boundary conditions of sea surface temperature and soil moisture.

**Prerequisites**
CLIM 711 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLIM 752 - Ocean General Circulation**

Credits: 3  
Description and theory of large-scale ocean circulation and how it affects climate. Focus is on ubiquitous flow structures such as gyres, equatorial currents, and meridional overturning cells. The class examines how the circulation follows from wind and thermohaline forcing, as well as physical principles. The influence of the circulation on heat transport and climate variability is also discussed. Conceptual guideposts include barotropic gyres, Ekman cells, potential vorticity, western intensification, the interplay of gravity and the Earth's rotation, advective-diffusive balance, multiple flow states, and Rossby waves.

**Prerequisites**
CLIM 712 or 711 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CLIM 753 - General Circulation of the Atmosphere**

Credits: 3  
Overview and several theoretical perspectives of atmospheric transport of energy, moisture, and angular momentum, and how these processes fundamentally affect the climate on various time scales.
Prerequisites
CLIM 710 and 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 759 - Topics in Climate Dynamics

Credits: 3
Covers selected topics in climate dynamics not covered in fixed-content courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when offered with different content.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 762 - Statistical Methods in Climate Research

Credits: 3
Introduction to a core set of statistical methods that have proven useful to modern climate and predictability research. Topics include detecting and attributing climate change, describing climate variability with empirical orthogonal functions, statistical forecasting with regression and time series models, and identifying coupled patterns of variability with canonical correlation analysis.

Prerequisites
Undergraduate-level linear algebra and STAT 344 (or equivalent), or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CLIM 796 - Directed Reading and Research

Credits: 1-6
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisites
Admission into climate dynamics doctoral program and permission of instructor.

Notes
May be repeated as necessary.
CLIM 991 - Climate Dynamics Seminar

Credits: 1
Presentations in climate dynamics field by Mason faculty and invited speakers.

Prerequisites
Graduate standing.

Notes
May be repeated for credit; however, a maximum of 3 credits may be applied toward the climate dynamics PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CLIM 996 - Doctoral Reading and Research

Credits: 1-6
Reading and research on a specific topic in climate dynamics under the direction of a faculty member.

Prerequisites
Admission into climate dynamics doctoral program and permission of instructor.

Notes
May be repeated as necessary.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CLIM 998 - Doctoral Dissertation Proposal

Credits: 1-12
Covers development of research proposal under guidance of dissertation director and doctoral committee. Proposal forms basis for climate dynamics doctoral dissertation.

Prerequisites
Doctoral standing and permission of instructor.

Notes
Course may be repeated, but no more than 12 credits of CLIM 998 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP
**CLIM 999 - Doctoral Dissertation**

Credits: 1-12  
Doctoral dissertation research under direction of dissertation director.

**Prerequisites**  
Admission to doctoral candidacy and permission of instructor.

**Notes**  
May be repeated, but no more than 24 credits total in CLIM 998 and 999 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/IP

**College of Humanities and Social Sciences**

**CHSS 101 - Presenting and Processing Information Using Technology**

Credits: 1-3  
Presents practical experience in computer applications.

**Prerequisites**  
Varies with topic.

**Notes**  
Topics vary; most require laboratory work. May be repeated for credit when course content differs.

**Hours of Lecture or Seminar per week:** 0-3  
**Hours of Lab or Studio per week:** 0-3

**CHSS 310 - Introduction to Entrepreneurship**

Credits: 1  
Introduces students to the intellectual underpinnings of entrepreneurship, entrepreneurial leadership, social innovation, intrapreneurship, and social enterprise development. Students shape a entrepreneurial learning plan for their own professional development in line with their career aspirations.

**Hours of Lecture or Seminar per week:** 1  
**When Offered:** Fall, Spring
CHSS 390 - Peer Tutoring in Writing across the Disciplines

Credits: 1
Student must submit two faculty recommendations and a sample of recent academic writing, and complete an interview with the director of the Writing Center. Experiential learning course in teaching of writing across disciplines. Students receive Writing Center training in theory and techniques of tutoring writing, and work a minimum of 3 hours per week in Writing Center. Focus is on practical application of writing theory and pedagogy from course readings, development of tutoring skills, and self-reflection through journals and final paper.

Prerequisites
Grade of A in ENGL 302, 60 credits, and overall GPA of 3.00 or higher with a GPA in major of 3.50 or higher.

Notes
May be repeated up to three times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CHSS 395 - Technology Apprenticeship

Credits: 3
Experiential learning course in using technology in instruction.

Prerequisites
30 credits; GPA of 2.50 or higher; ability to use Internet browser; and skills in keyboarding, data entry, and word processing.

Notes
Students receive up to 45 hours of instruction and work 90 hours with faculty members, assisting with technology project. Students submit faculty recommendation and application to technology apprenticeship coordinator. May be repeated once for credit.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHSS 480 - Preparation for the Workforce

Credits: 1
Prepare students for the workplace, including internships and careers. Students will learn how to locate and obtain internships and jobs that utilize their educational experiences and fit with their personal goals. Class sessions emphasize specific skills, such as how to craft an effective resume, interview strategies, professional networking, how to function successfully in a professional workplace, job-search strategies. Designed specifically for liberal arts majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CHSS 485 - International Internship
Credits: 3-9
Students should contact faculty director one semester prior to semester of enrollment. Work at oversees locations under faculty director and site supervisor. Predeparture orientation; minimum 45 hours of work for each credit (in 3-, 6-, and 9-credit increments); and written assignments as specified in learning contract approved by faculty director, including journals, work products and reports, reflective essays, and research papers.

Prerequisites
60 credits, 2.50 GPA, and successful completion of application and selection process.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CHSS 490 - Faculty-Student Research Apprenticeship

Credits: 3
Open only to recipients of the provost's Faculty-Student Apprenticeship Award. Introduces scholarship in action in major field of study. Complements and enriches required course material, and provides undergraduates the unique opportunity to work collaboratively with faculty on research projects.

Prerequisites
60 credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

College of Visual and Performing Arts

CVPA 101 - Arts Pass

Credits: 2
Introduction to appreciation of the arts through lecture, demonstration in visual art, music, dance, and theater. Emphasizes aesthetic principles in modern society. Students attend performances and exhibitions, and develop analytical skills through written journal and discussion.

Notes
May be repeated for total 4 credits.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

CVPA 102 - Experiencing the Arts
Credits: 3
Reserved for high school students enrolled in CVPA. Introduces collaborative and interdisciplinary arts experiences in visual art, music, dance, theater, film, and media through daily intensive immersion in the arts for two and a half weeks.

Notes
Not repeatable.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
Grading: S/NC

CVPA 105 - Special Topics in the Arts

Credits: 1-3
Exploration of topical studies on the arts.

Notes
Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 308 - Cross-Cultural Arts Appreciation

Credits: 3
Provides cumulative arts experience by tying subject matter to major cultural production of Center for the Arts.

Notes
Subject matter varies. May be repeated for maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 399 - Special Topics in the Arts

Credits: 1-6
In-depth presentation and exploration of topical studies on the arts.

Notes
Subject matter varies. May be repeated for maximum 24 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 3

CVPA 430 - Topics in Arts and Wellness
CVPA 489 - Field Experience in the Arts

Credits: 3-6
Apprenticeship, internship, or project with organization or individual in the arts. Must be prearranged with division director before enrollment.

Prerequisites
Junior standing; completion of 6 credits in CVPA courses in area of residency; CVPA 305; or permission of instructor.

Notes
May be repeated for maximum 6 credits.

CVPA 499 - Research/Performance/Topics in the Arts

Credits: 3-6
Advanced research, performance, or exploration of topical studies in arts.

Notes
May be repeated for maximum 6 credits.

CVPA 530 - Topics in Arts and Wellness

Credits: 1-3
In-depth presentation and exploration of topical studies in arts and wellness and/or related areas (e.g., injury prevention, performance enhancement, health and wellness training to educators and arts professionals). Topic depends on instructor.

Prerequisites
90 hours or permission of the instructor.
Notes
May be repeated up to 9 credits if taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

CVPA 592 - Special Topics in Interdisciplinary Arts Studies

Credits: 1-3
Topics in interdisciplinary arts.

Prerequisites
Undergraduate degree or equivalent, or permission of instructor.

Notes
May be repeated for maximum 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CVPA 599 - Independent Study

Credits: 1-6
Independent reading, performance, or research on specific project under direction of selected faculty member. May include attendance in parallel undergraduate course.

Prerequisites
Undergraduate degree or equivalent, or permission of instructor.

Notes
May be repeated for total 12 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CVPA 700 - Academic Writing in the Arts

Credits: 1
Prepares graduate students for the rigors of academic writing in the arts at the advanced level and supports students' acculturation in the academic writing skills and practices of their discourse communities.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
CVPA 701 - Thesis and Project Writing

Credits: 1
Students will develop an expertise within the specific rhetorical context of the thesis/project genre, understand the specialized features of the final project or thesis, and apply the strategies they have learned in their disciplines to their capstone event.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

College Teaching

CTCH 601 - The Community College

Credits: 3
Studies institutional character of the community college, including history, purpose, clientele, organization, finance, and social function. Studies issues currently faced by community colleges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 602 - College Teaching

Credits: 3
Describes issues that affect teaching and learning, and provides basic tools to use in college classroom. Teaches how to plan course, develop syllabus, promote learning among diversity of students, and implement classroom assessment techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 603 - Technology in Higher Education

Credits: 3
Overview of technology issues in higher education and hands-on experience with select technology tools to enhance productivity and classroom and online learning. Examines issues related to using technology in administration, teaching and learning, and guides in developing policies and effective technology-enhanced learning activities for students.

Prerequisites
Basic familiarity with computer operations

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CTCH 604 - The Scholarship of Teaching and Learning**

Credits: 3  
Overview of the movement in higher education in scholarship of teaching and learning. Focuses on ways students learn, how learning can be improved, and different methods of conducting research into teaching and learning.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CTCH 605 - Curriculum and Program Design and Assessment**

Credits: 3  
Prepares for designing, implementing, and assessing new courses, curricula, and programs. Examines relationships of courses and curricula to larger programs and institutional goals. Explores program planning and implementation such as documenting need, generating cost estimates, and assembling strong case for new programs.

**Prerequisites**  
CTCH 601 or 602, and 603.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CTCH 606 - Diversity in Higher Education**

Credits: 3  
Explores instructional interactions and communication strategies for diverse learner populations. Includes discussion of sociological, behavioral, and cognitive theory on culture.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CTCH 621 - Higher Education in the United States**

Credits: 3  
History of higher education from colonial period to the present. Examines philosophic, political, social, and economic forces that have influenced development. Reviews today's issues and challenges.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CTCH 622 - Organization and Administration in Higher Education**

Credits: 3  
Provides concepts of organization and administration in contemporary institutions from macro to micro perspectives. Studies
theory and practices of the organization as it relates to governance, structure, and management of the institution.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 624 - Finance and Fiscal Management in Higher Education

Credits: 3
Overview of higher education finance and fiscal management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 626 - Assessment in Higher Education

Credits: 3
Focuses on political and historical context of assessment in higher education, and teaches strategies for classroom, program, and institutional assessment. Develops skills in survey and focus group research, and teaches how to develop and implement assessment plan.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 641 - Introduction to Counseling

Credits: 3
Introduces profession and its practice in various settings. Examines history and development of counseling; national associations; ethical code; standards for preparation and credentials; and roles, functions, and responsibilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 643 - Counseling Theory and Practice in Higher Education

Credits: 3
Study of historical contemporary approaches to counseling. Emphasizes applications of theoretical models as appropriate for higher education.

Prerequisites
CTCH 641.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CTCH 644 - Student Services in Higher Education

Credits: 3
Focuses on development and organization of student personnel programs and services in institutions of higher learning. Covers philosophy, methods, and techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 645 - The Contemporary College Student

Credits: 3
Analyzes changing demographics, barriers, and developmental issues facing college students. Studies impact of college environment on student development, and interaction between students of varying subcultures and the environment. Examines technology issues and their impact.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CTCH 685 - Practicum

Credits: 3
Serves as an essential part of the certificate and MAIS programs. Supervised on-the-job experience in approved college or university setting or public agency involved in higher education. Develops skills applicable to college-based teaching or higher education administration or policy. Approval of practicum coordinator needed one semester before registration.

Prerequisites
Admission to certificate, MAIS/CCT or MAIS/Higher Education program; approval of advisor and practicum coordinator; 12 credits of core requirements; and 3 additional credits.

Notes
Minimum 150 hours of work and participation in internship seminar.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 792 - Special Topics in Higher Education

Credits: 1-3
Covers current issues in teaching and learning in higher education.

Prerequisites
Admission to doctoral program, or permission of instructor.

Notes
May be repeated for credit when topic is different.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### CTCH 821 - History of Higher Education in the United States

Credits: 3  
Key issues and moments in the history of higher education are examined as a way to understand current structures, cultures, policies, and purposes. Historical perspective will also be used to consider the near future of higher education. Students will examine current trends and possible futures for a specific topic by doing historical research on the issue.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CTCH 826 - Advanced Institutional and Program Assessment in Higher Education

Credits: 3  
Examination of educational assessment and evaluation, practices, and methods. Students critique and design an evaluation study and an evaluation report. Reviews ethical issues and impact of assessment and evaluation for students, employees, and programs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CTCH 830 - Ethics in Higher Education: Personal, Organizational, and Institutional Realities

Credits: 3  
Explores theories, definitions, and applications of ethics across multiple higher education settings, with particular attention to critical theory contributions. Includes an in-depth analysis of major complex ethical issues in higher education settings using ethical frameworks.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CTCH 885 - Doctoral Internship in College Teaching and Administration

Credits: 3  
Supervised internship at community college, four-year college/university, or nonteaching higher-education setting such as government agency or administrative office. Develops skills applicable to college-based teaching or higher education administration or policy.

**Prerequisites**

Admission to doctoral program, approval of advisor and internship coordinator, 18 credits of graduate course work
Notes
Students must contact the program at least one semester before enrolling. Minimum 180 hours of work and participation in internship seminar. May be repeated once for a total of 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 897 - Directed Reading in Higher Education

Credits: 1-6
Independent reading on topic agreed on by student and instructor.

Prerequisites
Admission to doctoral program and permission.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CTCH 998 - Doctoral Dissertation Proposal

Credits: 1-3
Contact program for permission to register. Work on research proposal that forms basis for doctoral dissertation.

Prerequisites
Completion of at least one internship and all other course work and qualifying exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

CTCH 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisites
CTCH 998, two internships, and appointed dissertation committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Communication
COMM 100 - Public Speaking

Credits: 3
Presents principles to develop effective presentations for public and professional settings while integrating appropriate technologies. Emphasizes analyzing audience; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility.

Satisfies General Education Requirement: Oral communication

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 101 - Interpersonal and Group Interaction

Credits: 3
Presents principles to develop appropriate and effective communication strategies in one-to-one and small group communication settings. Emphasizes analyzing and assessing communication skills to create and sustain effective communication in personal and professional relationships.

Satisfies General Education Requirement: Oral communication

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 140 - Forensics Seminar in Creative Arts

Credits: 1
Intensive work in creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisites
Audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 141 - Forensics Seminar in Recreative Arts
Credits: 1
Intensive work in recreative forensic events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisites
Audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 142 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1
Work in affirmative research, case construction, and oral presentation, directed toward affirmative analysis of intercollegiate debate proposition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 143 - Forensics Seminar in Debate: Negative Strategies

Credits: 1
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 145 - Newspaper Workshop I

Credits: 1
Practical experience in writing, editing, or business aspects of newspaper production at Broadside or other papers. Coordinated by newspaper faculty advisor.

Notes
May be repeated for total 3 credits.
Comm 148 - Radio Workshop I

Credits: 1
Practical experience in production, news writing, promotions, advertising, public relations, programming, or newscasting for student radio station WGMU.

Prerequisites
100-level COMM course, or permission of instructor.

Notes
May be taken three times.

Comm 150 - Communication Skills for International Students

Credits: 3
Introduction to speaking, listening, and nonverbal skills required to communicate appropriately in university study.

Prerequisites
International student in first year of study in the United States, non-native speakers of English with some difficulty speaking clearly and accurately, or permission of instructor.

Comm 157 - Video Workshop

Credits: 1
Practical experience in learning production basics including camera, video, and lighting.

Notes
Students who have already completed or are in COMM 355 are not eligible to take this course. May be taken three times.

Comm 200 - Introduction to Communication
Credits: 3
Introduces the field of communication, including perspectives on theory and research, topical areas within the discipline, basic research methodologies, and a survey of theories in those areas. Covers basic procedures for theory-building, research, and writing about communication.

Notes
May be repeated only once.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 201 - Small Group Communication**

Credits: 3
Principles of communicating effectively in small group situations. Emphasizes problem-solving group communication. Practice in working cooperatively with others to complete projects using systematic approach to problem solving.

**Prerequisites**
COMM 101 or equivalent course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 202 - Mass Media and Communication Systems**

Credits: 3
Study of the development of various telecommunications and media systems in the United States, including print media, motion pictures, recording industry, telegraphy and telephony, broadcasting and cable, and new communications technologies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 203 - Introduction to Journalism**

Credits: 3
American journalism including history and First Amendment components; role of professional journalist; print, broadcast, and computer assisted news operations; economics of publishing; and effect of new technologies. Serves as starting point for those interested in journalism careers, and as orientation for those interested in learning more about news business operations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 210 - Voice and Articulation**
Credits: 3
Principles of voice production, with practice in effective vocal use of American English. Emphasizes student participation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 230 - Case Studies in Persuasion**

Credits: 3  
Examines common persuasive message strategies and approaches. Covers basic principles of persuasive process. Case studies include advertisements, speeches, and persuasive activities from all segments of society.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 255 - Introduction to Media Literacy**

Credits: 3  
Principles and practices of media literacy. Emphasizes critical viewing, listening, and reading media skills; and media effects on consumer.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 260 - Basic Debate Theory and Practice**

Credits: 3  
Theory and practice of formal debate, including approaches to analytical reasoning, research, delivery, and conceptual basis for debate. Does not require tournament participation.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 3

---

**COMM 261 - Theories of Argumentation**

Credits: 3  
Analyzes argument within communicative settings. Emphasizes deductive and inductive forms of reasoning, fallacies in reasoning, tests of evidence, and models for such analyses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
COMM 300 - Foundations of Public Communication

Credits: 3
Theories and principles of public communication, emphasizing methods of persuasion, critical analysis, speaker-listener alignments in public setting, and measurements of effective public communication.

Prerequisites
3 credits of 100- or 200-level COMM courses, or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 301 - Foundations of Interpersonal Communication

Credits: 3
Theories and principles of interpersonal communication emphasizing models of communication, verbal and nonverbal message systems, and analysis of communicative relationships.

Prerequisites
3 credits of 100- or 200-level COMM courses, or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 302 - Foundations of Mass Communication

Credits: 3
Theories and principles of mass communication emphasizing effects, the media as institution, and role of society.

Prerequisites
3 credits of 100- or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 303 - Writing across the Media

Credits: 3
Foundation course focusing on writing for the mass media: Internet, public relations, newspapers, broadcast (television and radio) and advertising with a strong emphasis on adherence to Associated Press Style.

Prerequisites
30 credits and ENGL 302.

Notes
Prerequisite for all communication media writing courses. Lab work required.
COMM 305 - Foundations of Intercultural Communication

Credits: 3
Analyzes communication variables as they relate to intercultural encounters. Emphasizes culture's influence on communication process, particularly influence of verbal and nonverbal communication on how message is interpreted.

Satisfies General Education Requirement: Global understanding

Prerequisites
3 credits of 100 or 200-level COMM courses or 60 credits.

Notes
Communication majors are encouraged to complete COMM 200 prior to enrolling in this course.

COMM 306 - Issues in Intercultural Communication

Credits: 3
Applies basic principles of intercultural communication to analyze specific situations involving communication and cultural differences.

Prerequisites
COMM 305, or permission of instructor.

Notes
Continuation of COMM 305.

COMM 307 - Field Study in Communication

Credits: 3
Structured communication learning experience: one to three weeks of travel in a foreign environment involving another country or relevant U.S. co-cultures. Students must complete appropriate readings, laboratory assignments, and personal learning paper to process communication concepts and experiences.

Prerequisites
Permission of instructor

Notes
May be repeated once with a different field of study.

**COMM 310 - Oral Interpretation**

Credits: 3  
Principles and theories of oral interpretation. Practice in oral communication of prose, poetry, and drama.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 320 - Business and Professional Communication**

Credits: 3  
Study of basic theories and skills of communication in professional contexts, including interviewing, relationship maintenance, small group teams, and public presentations. Emphasizes developing practical and critical thinking skills.

**Prerequisites**  
COMM 100, 101 or 104 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 326 - Rhetoric of Social Movements and Political Controversy**

Credits: 3  
Social and political forces of contemporary era from communication perspective, emphasizing political leadership, pressures for social and political change, and transformations in communicative environment.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
COMM 300.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 330 - Principles of Public Relations**

Credits: 3  
Surveys nature, history, scope, and practice of public relations in business, trade associations, nonprofit organizations, and educational and government institutions. Covers principles, practice of public relations, including media relations, issues
management, and public service announcements; marketing and research; planning and publicity for special events; house publications; and institutional advertising.

Prerequisites
3 COMM credits and 60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 332 - Nonverbal Communication

Credits: 3
Theory, principles, and methods to analyze nonverbal communication. Emphasizes physical behavior, facial expression, personal space and territoriality, physical appearance, vocal cues, and environment.

Prerequisites
3 COMM credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 335 - Organizational Communication

Credits: 3
Theory, practice, and methods to analyze communication in organizations. Emphasizes process and structure, interaction formats, mechanisms for modification, and career paths in organizational communication.

Prerequisites
COMM 100, 101, or 301; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 340 - Forensics Seminar in Creative Arts

Credits: 1
Intensive work in various types of creative forensics events, including rhetorical criticism and informative, persuasive, extemporaneous, after-dinner, and impromptu speaking.

Prerequisites
4 credits of COMM 140, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
COMM 341 - Forensics Seminar in Recreative Arts

Credits: 1
Intensive work in various types of recreative forensics events, including dramatic duo, program interpretation, poetry interpretation, dramatic interpretation, and prose interpretation.

Prerequisites
4 credits of COMM 141, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 342 - Forensics Seminar in Debate: Affirmative Strategies

Credits: 1
Work in affirmative research, case construction, and oral presentation directed toward affirmative analysis of intercollegiate debate proposition.

Prerequisites
4 credits of COMM 142, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

COMM 343 - Forensics Seminar in Debate: Negative Strategies

Credits: 1
Work in negative research, case attacks, and oral presentation directed toward negative analysis of intercollegiate debate proposition.

Prerequisites
4 credits of COMM 143, or 60 credits and audition.

Notes
May be taken four times.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
COMM 344 - Parliamentary Procedure

Credits: 1
Procedures of parliamentary law as practiced in voluntary organizations. Practice in leading groups that conduct business according to Roberts Rules of Order, Newly Revised. Brief review of other parliamentary manuals.

Prerequisites
60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

COMM 345 - Newspaper Workshop II

Credits: 1
Practical experience in writing and editing for student newspaper or other papers.

Prerequisites
3 credits of COMM 145, COMM 351, or permission of instructor

Notes
May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 346 - Yearbook Workshop

Credits: 1
Practical experience in promotion, marketing, and sales of video yearbook, or practical experience working on Senior Expressions, a print supplement to the video yearbook.

Notes
May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

COMM 347 - Cable TV Programming and Marketing

Credits: 1
Practical experience in television programming, promotion, and marketing of a campus television cable network operation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
COMM 348 - Radio Workshop II

Credits: 1
Intense practical application of previously acquired skills in production, promotions, advertising, public relations, programming, or news writing for student radio station WGMU.

Prerequisites
COMM 148, or permission of instructor.

Notes
May be taken three times.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 350 - Mass Communication and Public Policy

Credits: 3
Investigates how matters of public importance are communicated via various mass communication channels. Emphasizes regulations to minimize influence of mass media on public decision-making, and media manipulation by pressure groups, politicians, and media gatekeepers.

Prerequisites
COMM 102, 202, or 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 351 - News Writing and Reporting

Credits: 3
Experience in actual news gathering. Students write and report for print and online outlets. Numerous inclass and out-of-class writing assignments train students in unique styles of print and online journalism.

Prerequisites
COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 352 - News Editing: Print and Beyond

Credits: 3
Copy preparation, headline writing, news judging, and layout for various forms of print and electronic formats. Introduces working on news copy desks.
COMM 353 - Broadcast Journalism

Credits: 3

Prerequisites
COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 354 - Radio Production

Credits: 3
Theory and practice of operational radio broadcasting. Topics include programming, production, and promotion aspects of commercial and noncommercial radio.

Prerequisites
COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 4

COMM 355 - Video Principles and Practices

Credits: 3
General introduction to video production including camera, audio, lighting, and editing. Lab work required.

Notes
Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

COMM 356 - Video: Performance and Writing
Credits: 3
Writing for video, performance skills for on-air work, interviewing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 358 - Video Producing and Directing**

Credits: 3
Introduces techniques, theory, and practices in producing and directing including studio and field producing and directing, budget, floor plans, and production material associated with video productions.

**Prerequisites**
COMM 355 with a grade of 2.00 or portfolio assessment.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4

**COMM 359 - Media Management**

Credits: 3
Principles, practices of media management from general techniques to operation of individual departments within a media organization.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**COMM 360 - Video Editing**

Credits: 3
Focus on advanced techniques in digital editing, software associated with video editing (Final Cut Pro), theories of video editing and necessary skills associated with digital editing.

**Prerequisites**
COMM 355 with a grade of 2.00 or better or portfolio assessment.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 3

**COMM 361 - Online Journalism**

Credits: 3
Focuses on online journalism, research, reporting, web page and weblog creation, and writing for Internet.
Prerequisites
COMM 303, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 362 - Argument and Public Policy

Credits: 3
Develops argumentative skills while examining contemporary public policy. Applies methods of argumentative analysis to design, implementation of public policy. Students learn by constructing, examining, and using public argument.

Satisfies General Education Requirement: Synthesis requirement

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 363 - Media Career Seminar

Credits: 1
Practicum for students with production experience; students produce a final resume in area of expertise.

Prerequisites
Two courses completed in area of media production focus.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

COMM 364 - Videography

Credits: 3
Focus on camera techniques such as framing, editing within the camera, shot composition, storyboarding, camera angles, video levels, and continuity.

Prerequisites
COMM 355 with a grade of 2.00 or better or portfolio assessment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 365 - Gender, Race, and Class in the Media

Credits: 3
Introduces concepts of power, influence of mass media. Allows students to see themselves as products, producers of media
influence, and gives sense of the roles in the media or lack thereof, of groups based on their gender, race and/or class.

Prerequisites
COMM 302, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 366 - Visual Communication

Credits: 3
Teaches visual communication theories and applies them to creation of videos, web pages, multimedia production, Computer Based Training (CBT) and other technologies. Covers limits of visual communication in terms of perception, economics, and technology. Partial distance course includes viewing video modules, and using electronically mediated discussion.

Prerequisites
IT 103 and COMM 355.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 370 - Feature Writing

Credits: 3
Introduces aspiring journalists to research techniques and critical writing skills needed to produce publishable magazine or newspaper feature stories.

Prerequisites
COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 371 - Sports Writing and Reporting

Credits: 3
Experience in actual sports-related news gathering and reporting. Covers writing and reporting on sports-related subjects for print and online media. Numerous in-class and out-of-class writing assignments train students in the unique style of covering sports events, reporting breaking news, and writing feature stories.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 372 - Sports and the Media

Credits: 3
Examines the role of mass media in constructing images of athletes, sport, and sports culture. Critical attention is given to broadcast, print, and film of sport media. Assesses sociological and cultural issues that shape sport media and culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 373 - Business and Economic Journalism

Credits: 3
Writing and reporting about business and the economy with focus on understanding financial news, and reporting about companies, trade, and markets for print, broadcast, and online media. Students practice through in-class and out-of-class writing assignments.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 374 - Political Journalism

Credits: 3
Writing and reporting about politics, elections and campaigns, and the legislative and executive branches of government for print, broadcast, and online media. Students practice the style and substance of covering political news through in-class and out-of-class writing assignments. A unique collaboration with C-SPAN including video conference opportunities with political and media personalities.

Prerequisites
COMM 303 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 375 - Mass Communication Advertising and Promotions

Credits: 3
History, regulation, and ratings of advertising, as well as media buying, advertising campaigns, and strengths and weaknesses of media vehicles used in advertising.

Prerequisites
COMM 302, or permission of instructor.
COMM 380 - Media Criticism

Credits: 3
Examines practical criticism of a wide variety of media texts including television programs, newspapers, articles, films, photographs, and advertisements. Introduces principles of major contemporary modes of analysis for systematically interpreting visual and verbal forms of communication.

COMM 389 - Public Relations for Associations and Nonprofits

Credits: 3
Principles of editing and journalism applied to publications, public relations, and advertising needs within corporate environment. Job requirements of editorial positions in public relations, publications, and information as defined by trade associations, nonprofit organizations, and large corporations.

Prerequisites
60 credits, or 3 credits of lower-division COMM courses.

COMM 390 - Issues in Public Relations

Credits: 3
Focuses on current issues in corporate, government, and nonprofit public relations.

Prerequisites
COMM 330.

COMM 391 - Writing for Public Relations

Credits: 3
Focuses on public relations writing including news releases, client memos, broadcasting, speeches, brochures, journals, and advertisements. Includes writing styles, formats, organization, and writing research.

Prerequisites
COMM 303.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 392 - Public Relations Study Abroad

Credits: 3
Concentrated survey course in public relations for business, trade associations, nonprofit organizations, and governmental institutions from the perspective of a location abroad. Emphasis is placed on the global and intercultural aspects of public relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 399 - Special Topics in Communication

Credits: 1-3
Topics vary; some require laboratories.

Prerequisites
Permission of instructor.

Notes
May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 400 - Research Methods in Communication

Credits: 3
Explores applications for primary research methodologies used in communication. Research project, with focus on survey, critical ethnographic, or experimental methodologies.

Prerequisites
COMM 200; and at least two of COMM 300, 301, 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 401 - Interpersonal Communication in the Workplace
Credits: 3
Comprehensive study of theories and research associated with dynamics of interpersonal relationships in the workplace. Emphasizes individual motivation, interpersonal needs, communication styles, leadership, problem solving, decision making, diversity, interpersonal conflict, individual adaptation to organizational change, and influence of technology on workplace relationships.

Prerequisites
COMM 301, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 404 - Health Communication

Credits: 3
Explores health communication research practice: the role of communication in health care delivery, health promotion and disease prevention, risk communication, and personal as well as psychological well-being. Examines interpersonal, organizational, team, family, and intercultural relationships.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 412 - Politics and the Mass Media

Credits: 3
Covers responsibilities, freedoms of mass media in a democracy; and media influence on citizens' opinions, elections, and decisions of public officials.

Equivalent to GOVT 412

Prerequisites
GOVT 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 420 - Senior Seminar in Theories of Communicative Interaction

Credits: 3
Explores primary theories explaining human communicative behavior, including traditional rhetorical, contemporary social science, critical, and mass communication.

Prerequisites
3 credits of 100 or 200-level COMM courses or 60 credits; grade of C or better in COMM 200.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 425 - Honors Seminar in Communication

Credits: 3
Examines foundations, connectedness, and applications of numerous communication theories across the discipline.

Prerequisites
Permission of instructor.

Notes
Honors project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 430 - Persuasion

Credits: 3
Theories of persuasive communication including traditional and contemporary attitudinal change; relationship among speaker, message, and audience; and relationship between attitudinal and behavioral change.

Prerequisites
COMM 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 431 - Information Technology and the Political Process

Credits: 3
Studies impact of information network of wire and wireless communications and computers on political process in advanced industrial countries.

Prerequisites
60 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 432 - Political Communication

Credits: 3
Studies how political communication shapes development of "political reality." Examines interactions between media and politics with respect to the ways communication functions in political settings.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 434 - Interviewing

Credits: 3
Theory, principles, and practical skills essential to interview process. Emphasizes information gathering, journalistic, persuasive, employment, and performance-appraisal interviews.

Prerequisites
60 credits or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 435 - Computers and Communication

Credits: 3
Offers practical application, skill development, and theoretical and critical assessment of computer-mediated communication. Discusses culture and language, functional and dysfunctional communication, social interaction, critical perspectives and ideology, freedom and responsibility, and images of future. Students contract for course assignments within course categories.

Prerequisites
60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 450 - Internship in Communication

Credits: 3
See department for procedures. On-the-job training in communication through approved field work study programs. Internships arranged and supervised by Department of Communication through internship coordinator. Related class work in resume preparation and job interviewing.

Prerequisites
75 credits, major or minor in telecommunications or electronic journalism, 15 credits in COMM for majors, 12 credits for non-COMM majors, and permission of department

Notes
May be repeated up maximum 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
COMM 451 - Facilitating Communication Education

Credits: 3
Theory and practice in facilitating learning of communication principles and skills. Students work as instructor aides in lower-division classes under supervision of faculty member. Activities include facilitating small-group activities, and individually critiquing oral performances.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5

COMM 452 - Media Production Practicum

Credits: 3
Theory and practice in creation, distribution, and response to media productions. Students complete minimum 150 hours of work as assistants to engineers, producers, directors, and organizers of media production facilities on campus, under supervision of faculty members. Activities include working on telecourses, public relations videos, and multimedia projects; aiding in creating in-house productions for departments; and working as cable caster for master control campus operations.

Prerequisites
COMM 303, 348, or 355.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

COMM 454 - Free Speech and Ethics

Credits: 3
Major issues surrounding roles of speech, press, and electronic media in society. Includes history of free speech and press issues in society, government role in regulating marketplace of ideas, and responsibility of individual in free society.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
COMM 300, 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 455 - History of Print Journalism

Credits: 3
Development of print journalism, emphasizing interaction of technology, audience, and government intervention. Topics include birth of press, development of modern newspaper, and American development including Revolutionary and Civil wars, rise of independent press, and yellow journalism.

Equivalent to HIST 455
Prerequisites
3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 456 - Comparative Mass Media

Credits: 3
Survey of major foreign mass media systems as they compare with American system. Focuses on broad dimensions of international mass media, and describes issues facing global journalism and media systems. Provides substantive framework to critically evaluate various national media systems.

Satisfies General Education Requirement: Global understanding

Prerequisites
COMM 302 or permission of instructor.

Notes
Course may be repeated with department approval.

Comm 456 - Comparative Mass Media

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 465 - Topics in Communication and Gender

Credits: 3
Topics may include gender and culture, women as rhetors, male and female communication, and communication and gender roles. Examines specific interests, ideally in seminar setting.

Notes
Course may be repeated with department approval.

Comm 465 - Topics in Communication and Gender

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 469 - Structure of the Telecommunications Industry

Credits: 3
Explores complex interrelationships that affect modern telecommunications and how major mergers, acquisitions, regulatory decisions, congressional initiatives, or engineering breakthroughs can profoundly affect telecommunications industry at any given time.

Notes
Serves as capstone seminar in telecommunications minor.

Comm 469 - Structure of the Telecommunications Industry

Notes
Serves as capstone seminar in telecommunications minor.
COMM 475 - Journalism Law

Credits: 3
Examines law as it relates to working journalist. Topics include libel, invasion of privacy, free press and fair trial, First Amendment, broadcast regulation, access to media, advertising, and effect of new technologies on these issues. Uses case approach to study leading court decisions in mass media law.

Prerequisites
60 credits or permission of instructor.

COMM 490 - Honors Research Methods in Communication

Credits: 3
Honors version of COMM 400

COMM 491 - Honors Research Project in Communication

Credits: 1-3
Completion of independent honors research project under the guidance of the student's faculty sponsor.

Prerequisites
Completion of COMM 490 with minimum grade of 3.0 and approval of honors project prospectus.

COMM 499 - Independent Study in Communication

Credits: 1-3
Study of a selected area in communication. Independent study application must be processed before start of semester in which work is to take place.

Prerequisites
75 credits and permission of department.

Notes
May be repeated for credit with permission of director of undergraduate program. Communication courses at the 500 level open to post-baccalaureate students or advanced undergraduates with permission of department.
COMM 504 - Communication and Interpersonal Conflict

Credits: 3
Focuses on interpersonal interactions, including dyadic and small-group levels in various settings such as friendships, marriage, family, and workplace. Examines factors that generate conflicts, and communication strategies and skills that help shape conflict interaction toward productive ends.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 506 - Communication in International Organizations

Credits: 3
Analyzes communication variables as they relate to organizational and managerial functions in international organizations. Topics include developing understanding of how cultural differences influence managerial activities, and learning to deal effectively with differences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 530 - Theories of Small Group Communication

Credits: 3
Advanced-level theory and practice of small group interaction. Examines current research, focusing on learning applications of theories to relevant settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 590 - Seminar in Communication

Credits: 3
Intensive study of specific topics; content varies.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 600 - Introduction to Graduate Studies
This course offers a broad introduction to the field of communication in terms of communication-based theories and research.

**COMM 601 - Communication in Professional Relationships**

Credits: 3  
Explores theoretical perspectives and relevant research to communication strategies and skills for various professional roles and situations. Relates theoretical foundations to practice, assessing theories and applications in individual professional fields.

**COMM 602 - Theories and Research of Mass Communication**

Credits: 3  
Explores theories that have guided development of mass media. Emphasizes major scientific and humanistic approaches to mass media effects.

**COMM 604 - Communication Research Practicum**

Credits: 3  
 Helps communication master's students determine focus for program of study, thesis, and projects. Includes readings in applied communication research and exercises in topic selection, analysis.

**Prerequisites**  
COMM 634 or permission of instructor

**COMM 605 - Intercultural Communication**

Credits: 3  
 Analyzes communication variables related to communication across cultures. Topics include nonverbal communication, time conceptualizations, perceptions and attitudes, values, social organization patterns, cultural norms, language, ethics, conflict across cultures, and research in intercultural communication.
COMM 620 - Health Communication

Credits: 3
Examines interpersonal communicative processes associated with health in consumer-provider, family, and health communication campaign contexts. Particular attention to understanding cultural differences in perceptions of and communication about health and disease.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 630 - Theories of Public Relations

Credits: 3
Provides a survey of public relations theories and major ethical issues. Examines ways theories relate to organizations, mass and international communication research, rhetoric, persuasion, and social movements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 631 - Approaches to Group Facilitation

Credits: 3
Introduces various theoretical and practical approaches to group facilitation with in-depth focus and practice in one approach. Students participate in group sessions, analyze videotapes of decision-making groups, and practice methodologies for facilitating group interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 634 - Theories of Interpersonal Communication

Credits: 3
Analyzes contemporary theories, concepts, and approaches to improving interpersonal communication. Examines interpersonal communication research.

Prerequisites
COMM 301 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
COMM 635 - Organizational Communication

Credits: 3
Analyzes communication systems, processes in public and private organizations. Topics include conflict management, group decision making, interviewing, technical presentations, and using various channels for improving internal and external communication.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 636 - Communication Consulting

Credits: 3
Investigates theories providing foundation for communication consulting. Provides theoretical information and mechanisms for application necessary to modify communicative behavior within organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 637 - Risk Communication

Credits: 3
Research on sharing information about physical hazards such as toxic waste, radiation, disease, injury, biohazards. Topics include communication concerning workplace safety, environmental problems, risk assessments, and scientific uncertainties.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 650 - Research Methodologies in Communication

Credits: 3
Introduces various research methods used by communication professionals. Focus is to achieve understanding and knowledge of social scientific research, qualitative and quantitative, and critical analysis through use and application.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 653 - Graduate Communication: Research and Teaching

Credits: 3
Investigates theoretical and philosophical implications of communication instruction. Exposes graduate students to principles and
practices of teaching college communication courses at upper and lower divisions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 655 - Theories of Visual Communication in Telecommunications**

Credits: 3  
Theories of visual communications and how they are used in creating images for web sites, video productions, corporate presentations, virtual reality, computer graphics. Explores problems of fitting messages to various telecommunications media, how target audience perceives the visual image, and aesthetic demands of products imposed by new technologies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 670 - Social Marketing**

Credits: 3  
Offers conceptual overview of social marketing, marketing methods designed to influence people to behave in ways that benefit society. Develops skills necessary to conduct a social marketing initiative and provides an opportunity for practical application of those skills.

**Hours of Lecture or Seminar per week:** 3

---

**COMM 675 - Content Analysis**

Credits: 3  
Introduces content analysis, a research technique for making replicable and valid inferences about text in sources such as news articles, advertisements, and television programs. Students design and conduct research using content analysis techniques.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**COMM 694 - Communication Internship**

Credits: 3  
Students work in approved, professional-level communication position, meeting regularly with internship supervisor from department. Requires paper, journal, minimum 60 hours work for each credit of enrollment. Students usually enroll in internships at end of program of study.

**Prerequisites**
18 graduate credits and permission of department.
COMM 696 - Directed Readings and Research

Credits: 1-3
Reading and research on specific topic under direction of faculty member. Written report required; oral or written exam may be required.

Prerequisites
Permission of department.

Notes
May be repeated for maximum 6 credits.

COMM 697 - Independent Production

Credits: 1-3
Media or creative production activities under direction of faculty member. Requires completed production; written report, oral exam may be required.

Prerequisites
Permission of department.

Notes
May be repeated for maximum 6 credits.

COMM 705 - Intercultural Health and Risk Communication

Credits: 3
Examines intercultural health and risk communication interventions, including health communication campaigns, public relations and advertising for health organizations, and how the media and Internet present health information.

COMM 706 - Strategic Communication
Credits: 3
Examines commonalities of strategic communication campaigns across fields (e.g., military, diplomacy, health, politics, marketing, public relations) in order to understand strategic communication, compare fields, and emphasize strategic and evaluative research across fields.

Prerequisites
COMM 630 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 720 - Consumer-Provider Health Communication

Credits: 3
Examines the role of interpersonal communication in health care delivery, health promotion, disease prevention, risk communication, as well as in promoting personal and psychosocial well being.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 721 - E-Health Communication

Credits: 3
Explores the use of computer-mediated communication technologies in health care and health promotion, including examination of technology in health information dissemination, health education, health communication interventions, and the management of health care delivery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 725 - Qualitative Methods

Credits: 3
Examines qualitative research in communication. Emphasis is placed on techniques of naturalistic inquiry such as observation, interviewing, focus group methods, and ethnography, as well as tools for analyzing and reporting qualitative data.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 735 - Crisis Communication

Credits: 3
Examines crisis communication contexts with a particular emphasis on the role of communication in a variety of crises and how
the media and Internet present crisis information to the public.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 750 - Research Methods II**

Credits: 3  
Extends basic research knowledge and skills learned in COMM 650 Research Methods I. Students will be taught to analyze and synthesize literature, develop theoretical linkages, and construct measurement scales.

**Prerequisites**
COMM 650.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 798 - Communication Studies Project**

Credits: 3  
Final research seminar for all MA in communication students. Students discuss practical and theoretical issues related to project or thesis. Includes readings related to underlying theoretical, methodological, and ethical issues facing contemporary communication researchers and practitioners.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**COMM 799 - Master's Thesis**

Credits: 1-6  
Original research endeavor related to student's concentration in communication under supervision of faculty committee.

**Prerequisites**
24 graduate credits and approval of thesis proposal by faculty committee.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**COMM 800 - Studies for the Doctor of Philosophy in Education**
Credits: 3-6
Program of studies designed by student's discipline director and approved by doctoral committee. Students participate in research activity of discipline director, and write paper reporting original contributions.

Notes
May be repeated.

COMM 806 - International Public Relations

Credits: 3
Provides a survey of international public relations with an emphasis in three areas: applied knowledge for actual international practice, relevant theory, and ethical issues.

Prerequisites
COMM 706 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 820 - Health Communication Campaigns

Credits: 3
Explores use of communication campaigns to promote health and reduce health risks, examines how health communication campaigns are designed, implemented, and evaluated, and describes the role of communication research throughout the campaign process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 890 - Special Topics in Communication

Credits: 3
Selected topics reflecting specialized areas in communication.

Prerequisites
PhD rank or permission of instructor.

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 896 - Independent Study
Credits: 3
Independent reading on a topic agreed on by student and faculty member.

Prerequisites
PhD rank or permission of instructor.

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

COMM 998 - Doctoral Dissertation Proposal

Credits: 1-6
Development of a research proposal that constitutes the basis for a doctoral dissertation.

Prerequisites
Advancement to candidacy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NS

COMM 999 - Doctoral Dissertation Research

Credits: 1-15
Research on an approved dissertation topic under the direction of dissertation committee.

Prerequisites
Completion of COMM 998.

Notes
May be repeated. No more than 18 credits of COMM 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

Comparative Literature

CL 300 - Introduction to Comparative Literature
Credits: 3
Introduces methods of comparative literature through study, in translation, of selected theme or motif as it appears in various periods, genres, or national literatures. Readings drawn from English, American, or European literature; on occasion, non-Western literature featured.

Prerequisites
60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CL 514 - Theories of Comparative Literature

Credits: 3
Intensive study of major theories of comparative literature, with special emphasis on international movements and characteristic themes. Students work with texts in foreign language of their concentration; other texts studied in translation.

Prerequisites
CL 300 and 90 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Computational and Data Sciences

CDS 101 - Introduction to Computational and Data Sciences

Credits: 3
Introduction to the use of computers in scientific discovery through simulations and data analysis. Covers historical development and current trends in the field.

Satisfies General Education Requirement: Natural science Nonlab

Prerequisites
Appropriate score on the math placement test.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 130 - Computing for Scientists

Credits: 3
Covers use of computers to solve practical scientific problems. Topics include creating effective scientific presentations, analysis
of experimental data, online literature, data/information ethics, scientific modeling, and communication/collaboration tools. Designed to equip students with the knowledge and confidence they need to use future hardware and software systems both as a student and throughout their scientific career.

**Prerequisites**
Passing score on the math placement test for MATH 110 or MATH 113.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CDS 151 - Data Ethics in an Information Society**

Credits: 1  
Examination of ethical issues related to access and use of information and data in the Internet age, for the general student, with special emphasis on ethical issues that apply to the proper use and interpretation of scientific and technical information.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**CDS 301 - Scientific Information and Data Visualization**

Credits: 3  
The techniques and software used to visualize scientific simulations, complex information, and data visualization for knowledge discovery. Includes examples and exercises to help students develop their understanding of the role visualization plays in computational science and provides a foundation for applications in their careers.

**Prerequisites**
CDS 101, CS 211, MATH 125, MATH 113.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CDS 302 - Scientific Data and Databases**

Credits: 3  
Data and databases used by scientists. Includes basics about database organization, queries, and distributed data systems. Student exercises will include queries of existing systems, along with basic design of simple database systems.

**Prerequisites**
STAT 354, MATH 125.

**Notes**
This course meets the writing-intensive requirement for the CDS Major.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CDS 385 - Materials Science with Applications to Renewable Energy

Credits: 3
Introduction to basic concepts and methods of materials science. Review of metallic alloys and compounds, ceramic materials, ionic solids, semiconductors, polymers, and nano-structured materials. Mechanical, thermal, electric, magnetic and optical properties of materials. Theoretical background and experimental methods of materials characterization. Various materials applications with emphasis on renewable energy.

Equivalent to PHYS 385

Prerequisites
PHYS 262 or 266 or 245 and a C or better in MATH 113

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 401 - Scientific Data Mining

Credits: 3
Data mining techniques from statistics, machine learning, and visualization to scientific knowledge discovery. Students will be given a set of case studies and projects to test their understanding of this field and provide a foundation for future applications in their careers.

Prerequisites
CDS 302.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 410 - Modeling and Simulations I

Credits: 3
Numerical differentiation and integration, initial-value and boundary-value problems for ordinary differential equations, methods of solution of partial differential equations, iterative methods of solution of nonlinear systems, and approximation theory.

Equivalent to MATH 447

Prerequisites
MATH 214 or 216, and 446.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CDS 411 - Modeling and Simulations II
This course covers the application of modeling and simulation methods to various scientific applications, including fluid dynamics, solid mechanics, materials science, molecular mechanics, and astrophysics. It will also provide an introduction to modeling and simulation software, as well as high-performance computing.

**Prerequisites**
CDS 410 or Math 447.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 421 - Introduction to Computational Fluid Dynamics

Credits: 3  
The course will cover the governing equations of fluid dynamics; numerical discretization of the governing equations and popular techniques for solving flow problems; applications of CFD to some classic fluid dynamics problems; and setting up the CFD simulation using a CFD software package. At the end of the course, students will understand the process of developing a geometrical model of the flow, applying appropriate boundary conditions, specifying solution parameters, and visualizing the results. The students are expected to complete several computer projects, including writing their own CFD computer program to analyze simple fluid flow problems, as well as setting up the CFD simulation using a CFD software package.

**Prerequisites**
MATH 446, proficiency in at least one computer programming language and computer operating system, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 461 - N-Body Simulation Methods

Credits: 3  
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

**Prerequisites**
MATH 203 MATH 213 CS 211.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CDS 486 - Topics in Computational and Data Sciences

Credits: 3  
Covers selected topics in computational and data sciences not covered in fixed content courses.
CDS 487 - Electronic Structure Computations

Credits: 3
Covers computational aspects of materials science, such as first-principles methods of electronic structure calculations of solids, clusters, and molecules, as well as the use of empirical potentials. Examples will be drawn from metals, insulators, and semiconductors. The students will be directed to construct simple codes and guided in the use of the more sophisticated available computational packages.

Prerequisites
PHYS 308.

CDS 490 - Directed Study and Research

Credits: 1-3
Students work under the guidance of a faculty member on an independent study or directed research project in the computational and data sciences. May be repeated in combination with CDS 491 for a total of 6 credits between the two classes.

Prerequisites
Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.

CDS 491 - Internship

Credits: 1-3
On-the-job experience for CDS majors and minors working in industry and government laboratories, including summer programs. Supervision and approval of this course must be arranged with department before registering. May be repeated in combination with CDS 490 for a total of 6 credits between the two classes.

Prerequisites
Students must be CDS majors or minors in their junior or senior year and have permission of the instructor.
CSI 501 - Introduction to Scientific Programming

Credits: 3
This course introduces and reviews programming in C and FORTRAN with emphasis on the aspects used in the computational and data sciences. The course is conducted through a combination of both lecture and interactive computer laboratory.

Prerequisites
Permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 600 - Quantitative Foundations for Computational Sciences

Credits: 3
Accelerated review of mathematical tools for scientific applications and analysis. Topics include vectors and matrices; differential and difference equations; linear systems; Fourier, Laplace, and Z-transforms; and probability theory.

Equivalent to SYST 500

Prerequisites
MATH 213 and 214.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 601 - Computational Science Tools I

Credits: 1
Introduces basic tools in computational science. Covers UNIX, editors, LaTeX, HTML, and graphics. Emphasizes application and use rather than theory. Substantial portion of instruction delivered via distance-learning web interface.

Prerequisites
Year of college calculus, and course in computer programming.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
CSI 602 - Computational Science Tools II

Credits: 1
Covers MATLAB, MAPLE, and GNUPlot. Emphasizes application and use rather than theory. Substantial portion of instruction delivered via distance-learning web interface.

Prerequisites
CSI 601, and knowledge of matrix algebra. Introduces basic tools in computational science.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSI 606 - Scientific Graphics and Visualization Tools

Credits: 1
Introduces use of scientific visualization tools for data analysis. Teaches use of specific packages on rotating basis. Packages include PV-WAVE, S-Plus, SV, XMGR, and pnm tools.

Prerequisites
CSI 601, or permission of instructor.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSI 607 - Database Tools for Scientists

Credits: 1
Covers relational model used in Oracle and other database packages. Includes database design concepts, table operations, triggers, sequences, and introduction to structured query language (SQL).

Prerequisites
CSI 601 and 602, or permission of instructor.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSI 610 - Introduction to Computational Sciences
Credits: 3
Covers advanced numerical methods, computer architecture, and scientific software development. Includes software design, construction, and validation techniques commonly used in industry. Also introduces high-performance computing.

Prerequisites
CSI 601, 602, 603, 604, 605, and 700; or permission of instructor.

Notes
Not applicable to 48-credit course total for CSI PhD.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 615 - Quantum Computation

Credits: 3
Introduces field of quantum computation. Emphasizes scientific principles involved and presentation of strengths and weaknesses of approach. Topics include basic quantum physics and quantum algorithms.

Prerequisites
Undergraduate course in quantum physics, and undergraduate degree in physical or computer sciences, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 632 - Global Ecology

Credits: 3
Intensive review to begin research in global change. Covers basic principles of physiological ecology; population dynamics; dynamics of ecological communities and ecosystems; biogeography; biological diversity; and dynamics of biosphere, including effects of life on atmosphere, oceans, and solid surfaces.

Prerequisites
General chemistry, general physics, introductory statistics, and calculus.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 638 - The Policy Process for Scientists

Credits: 2
Introduces relationship among government, science, scientists, and issues and processes that shape science policy. Emphasizes examples taken from space weather and meteorology.

Prerequisites
Graduate standing.
CSI 639 - Ethics in Scientific Research

Credits: 3
Reviews purpose of scientific research and principles for evaluating ethical issues. Teaches skills for survival through training in moral reasoning and responsible conduct. Discusses ethical issues and applying critical-thinking skills to design, execution, and analysis of experiments. Issues include using animals, humans in research; ethical standards in computer community; research fraud; and currently accepted guidelines for data ownership, manuscript preparation, and conduct of those in authority.

CSI 654 - Data and Data Systems in the Physical Sciences

Credits: 3
Introduces data issues associated with modern physical sciences. Examines data access, formats, browsing, analysis, visualization, and data information systems in federated environments. Uses examples from physical sciences, including astronomy and space sciences; Earth sciences; Earth observing and other fields of physics; and model output data and associated special issues. Introduces mathematical techniques particularly important for large databases.

Prerequisites
Competency in programming at CSI 601-607 level, or permission of instructor.

CSI 655 - Atmospheric Physics I

Credits: 3
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 575

Prerequisites
PHYS 260, 262, and 305, or equivalent.
CSI 659 - Dispersal Methods of Hazardous Releases

Credits: 3
Covers physics of aerosols; engineering, mechanics of building ventilation systems; and mechanical dissemination utilizing hand-held, automatic, vehicle, and truck mounted systems. Also discusses basic concepts, theories, and models of pollutant dispersal in atmosphere, and related atmospheric systems affecting dispersal of biological agents.

Prerequisites
CSI 655, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 660 - Space Instrumentation and Exploration

Credits: 3
Surveys instruments, devices, and methods for space and planetary exploration. Covers remote sensing of Earth and other solar system bodies; and planned manned and unmanned missions by the United States and other countries.

Equivalent to ASTR 535

Prerequisites
PHYS 262, MATH 213, or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 661 - Astrophysics

Credits: 3
Survey of contemporary astrophysics. Topics include physical concepts, stellar spectra, Hertzsprung-Russell diagram, stellar atmospheres, stellar structure, interstellar matter, stellar evolution, high-energy phenomena, hydrodynamical processes in astrophysics, accretion disk formation, and shock formation.

Equivalent to ASTR 530

Prerequisites
PHYS 303, 305, 308; MATH 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 662 - Introduction to Space Weather

Credits: 3
Introduction to space weather involving systems such as the sun, the heliosphere, and the Earth's magnetosphere and ionosphere.
Covers the solar magnetic field, solar flares, coronal mass ejections, particle acceleration mechanisms, the solar wind, and the Earth's magnetic field, radiation belt, geomagnetic storms, and ionospheric disturbances.

**Prerequisites**
PHYS 303, 305, 307, and MATH 213, or permission of instructor.

**CSI 670 - Economic Systems Design**

Credits: 3
Introduces analytical and engineering principles used to develop exchange systems. Covers behavioral aspects of auction systems; matching, assignment, and transportation problems; and information markets. Introduces methods for testbedding systems using experimental economics.

**Prerequisites**
Course in linear and nonlinear optimization, and course in linear algebra; or permission of instructor.

**CSI 672 - Statistical Inference**

Credits: 3
Covers critical aspects of probability, random variables and distributions, characteristic functions, stochastic convergence, optimal estimation, maximum-likelihood estimation, asymptotic theory, Bayesian methods, likelihood-ratio tests, statistical decision theory, sequential methods.

Equivalent to STAT 652

**Prerequisites**
STAT 544, or permission of instructor.

**CSI 674 - Bayesian Inference and Decision Theory**

Credits: 3
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions.
Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena.
Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for
approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to STAT 664/SYST 664

Prerequisites
STAT 544 or CSI 672, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 676 - Regression Analysis

Credits: 3
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building. Both the theory and practice of regression analysis are covered.

Equivalent to STAT 656

Prerequisites
STAT 554, matrix algebra and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 678 - Times Series Analysis and Forecasting

Credits: 3
Modeling stationary and nonstationary processes; autoregressive, moving average and mixed model processes; hidden periodicity models; properties of models; autocovariance and autocorrelation functions, and partial autocorrelation function; spectral density functions; identification of models; estimation of model parameters, and forecasting techniques.

Equivalent to STAT 658

Prerequisites
STAT 544 or CSI 672 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 685 - Fundamentals of Materials Science

Credits: 3
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses.
Includes a term project, assignments from current literature and application of computation in materials science.

Equivalent to PHYS 615

Prerequisites
CDS 385/PHYS 385; or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 687 - Solid State Physics and Applications

Credits: 3
Covers crystal structures, binding, lattice vibrations, free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 512

Prerequisites
PHYS 502 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 700 - Numerical Methods

Credits: 3
Covers computational techniques for solving science, engineering problems. Develops algorithms to treat typical problems in applications, emphasizing types of data encountered in practice. Covers theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. When applicable, uses computer graphical techniques to enhance interpretation.

Equivalent to MATH 685/OR 682

Prerequisites
MATH 203 and 214, and some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 701 - Foundations of Computational Science

Credits: 3
Covers mapping of mathematical models to computer software, including all aspects of developing scientific software such as architecture, data structures, advanced numerical algorithms, languages, documentation, optimization, validation, verification, and software reuse. Examples in bioinformatics, computational biology, computational physics, and global change demonstrate
scientific advances enabled by computation. Class projects involve working in teams to develop software that implements mathematical models, using software to address important scientific questions, and conducting computational experiments with it.

Prerequisites
Competency in UNIX and programming at CSI 601-604 level, and CSI 700; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 702 - High-Performance Computing

Credits: 3
Hardware and software associated with high-performance scientific computing. Computer architectures, processor design, programming paradigms, parallel and vector algorithms. Emphasizes importance of software scalability in science problems.

Prerequisites
CSI 700 and 701; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 703 - Scientific and Statistical Visualization

Credits: 3
Covers visualization methods used to provide new insights and intuition concerning measurements of natural phenomena, and scientific and mathematical models. Presents case studies from myriad disciplines. Topics include human perception and cognition, introduction to graphics laboratory, elements of graphing data, representation of space-time and vector variables, representation of 3-D and higher dimensional data, dynamic graphical methods, and virtual reality. Work on a visualization project required. Emphasizes software tools on Silicon Graphics workstation, but other workstations and software may be used.

Prerequisites
STAT 554 or CS 652, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 709 - Topics in Computational Sciences and Informatics

Credits: 3
Covers selected topics in computational sciences and informatics not covered in fixed-content computational sciences and informatics courses.

Prerequisites
Admission to PhD program, and permission of instructor.

Notes
CSI 710 - Scientific Databases

Credits: 3
Study of database support for scientific data management. Covers requirements and properties of scientific databases, data models for statistical and scientific databases, semantic and object-oriented modeling of application domains, statistical database query languages and query optimization, advanced logic query languages, and case studies such as the human genome project and Earth-orbiting satellites.

Equivalent to IT 864

Prerequisites
INFS 614 or equivalent, or permission of instructor.

CSI 711 - Chemical Thermodynamics and Kinetics

Credits: 3
Advanced study of thermodynamics and kinetics. Covers application of kinetics to elucidation of reaction mechanisms, and application of statistical thermodynamics to theory of elementary reaction rates.

Equivalent to CHEM 633

Prerequisites
CHEM 331 and 332.

CSI 712 - Introduction to Solid Surfaces

Credits: 3
Includes gas absorption isotherms, surface-area measurement techniques, real and clean surfaces, physisorption and chemisorption, methods of gas absorption and desorption, measurement of heats of adsorption, desorption kinetics, electron spectroscopies and their surface sensitivities, instrumentation needed, and principles of vacuum technology.

Equivalent to CHEM 728

Prerequisites
CHEM 422 or equivalent. Introduces properties of solid surfaces.
CSI 713 - Quantum Chemistry

Credits: 3
Illustrates fundamental concepts of quantum mechanics with applications to chemical systems, including atomic and molecular electronic structure and properties, molecular symmetry, and intermolecular forces.

Equivalent to CHEM 732

Prerequisites
CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 714 - Spectroscopy and Structure

Credits: 3
Covers quantum mechanics of the interaction of atoms and molecules with electromagnetic radiation. Also covers modern spectroscopic methods as applied to the elucidation of molecular structure and dynamics.

Prerequisites
CHEM 332.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 715 - Quantum Complexity Theory

Credits: 3
Discusses fundamental aspects of complexity theory and its applications from perspective of quantum physics. Explores current research in emerging field of quantum complexity theory, and discusses related issues in quantum algorithms.

Prerequisites
CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 716 - Quantum Information Theory
Introduces quantum information theory and its practical applications to information processing and secure communications. Emphasizes applications involving commercial and defense systems.

Prerequisites
CSI 615, and CSI 783 or 784; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CSI 717 - Quantum Computer Programming**

Credits: 3
Covers methods for programming quantum computers. Topics include quantum computing concepts, currently known algorithms for quantum computers, denotational semantics, existing languages for quantum computers, application of logic programming to quantum computers, and programming for different types of novel computer architectures.

Prerequisites
CSI 615 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CSI 718 - Quantum Computer Realization**

Credits: 3
Introduces physical implementation of quantum computation, and practical applications to developing scalable quantum computers. Special emphasis on various schemes for achieving practical quantum computers.

Prerequisites
CSI 615, and 784 or equivalent; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CSI 719 - Topics in Computational Chemistry**

Credits: 3
Covers selected topics in computational chemistry not covered in fixed-content computational chemistry courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.
CSI 720 - Fluid Mechanics

Credits: 3
Covers basic and advanced fluid mechanics and continuous hypothesis to define fluids. Introduces tensor analysis; Euclidean and Lagrangian representations of fluid flow; Laplace's equation; continuity equation; Navier-Stokes equations; Bernoulli's theorem and Crocco's form of the equations; steady and unsteady flows; potential, incompressible, and compressible flows; gravity and sound waves; gas dynamics; and viscous flows.

Prerequisites
CSI 700 and 780; or permission of instructor.

CSI 721 - Computational Fluid Dynamics I

Credits: 3
Covers fundamentals including spatial and temporal approximation techniques for partial differential equations, solution of large systems of equations, data structures, solvers of the Laplace/ full potential equation, and simple Euler solvers. Includes two major projects Laplace solver, and 2-D Euler solver on unstructured grids. Students expected to write their own codes.

Prerequisites
Course in partial differential equations such as MATH 678 or equivalent; knowledge of linear algebra at level of MATH 603 or CSI 740/MATH 625; coding experience in FORTRAN or C; or permission of instructor.

CSI 722 - Computational Fluid Dynamics II

Credits: 3
Covers more advanced topics in computational fluid dynamics, including high-resolution schemes for hyperbolic PDEs, advanced Euler solvers, Navier-Stokes solvers, grid generation, adaptive mesh refinement, efficient use of supercomputing hardware, and future trends. Projects include topics in grid generation and adaptive refinement. Students expected to write their own codes.

Prerequisites
CSI 721 or permission of instructor.
CSI 723 - Fluid Mechanics II

Credits: 3
Covers gas dynamics, shock waves, method of characteristics, boundary layer flows, instabilities, and turbulence modeling. Special topics include biological, non-Newtonian, and free surface flows; aeroelasticity; and magneto-hydrodynamics.

Prerequisites
CSI 720 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 729 - Topics in Continuum Systems

Credits: 3
Covers selected topics in the computational aspects of continuum systems not covered in fixed-content courses in dynamical systems. Possible topics are smooth-particle hydrodynamics, radiation hydrodynamics, algorithms for continuum systems, adaptive grids for continuum computations, spectral methods in computational fluid dynamics, algorithms for concurrent machines, formation of high-energy particle jets in astrophysical applications, application to Earth atmospheric problems, and flow considerations in molten materials.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 739 - Topics in Bioinformatics

Credits: 3
Selected topics in bioinformatics not covered in fixed-content bioinformatics courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 740 - Numerical Linear Algebra
Credits: 3
Covers computational methods for matrix systems; theory and development of numerical algorithms for the solution of linear systems of equations, including direct and iterative methods; analysis of sensitivity of system to computer round off; and solution of least squares problems using orthogonal matrices. Also covers computation of eigenvalues and eigenvectors, singular value decomposition, and applications.

Equivalent to MATH 625

**Prerequisites**
MATH 203 and some programming experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 742 - The Mathematics of the Finite Element Method**

Credits: 3
The finite element method is commonly used for developing numerical approximations to problems involving ordinary and partial differential equations. Course develops underlying mathematical foundation, examines specific types of finite elements, analyzes convergence rates and approximation properties, and uses method to solve important equations. Students develop their own codes and are expected to complete independent projects.

**Prerequisites**
MATH 446 or 685, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 744 - Linear and Nonlinear Modeling in the Natural Sciences**

Credits: 3
Develops tools of mathematical modeling while carrying out numerical simulations. Considers examples from across the sciences. Topics include basic issues such as models, simplification, linearity, and nonlinearity; dimensionless parameters; dimensional analysis; models involving differential equations; examples from population growth and chemical kinetics; models involving partial differential equations; diffusion, transport, nonlinearity and shocks; probabilistic modeling; perturbation methods; extrapolation; and introduction to stability.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CSI 746 - Wavelet Theory**

Credits: 3
Studies theory and computational aspects of wavelets and wavelet transform. Emphasizes computational aspects of wavelets.
Defines Fast Wavelet Transform in one and two dimensions, and develops appropriate numerical algorithms, and theory of wavelet bases on the real line. Covers multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to MATH 772

Prerequisites
Knowledge of convolution and Fourier transforms of sequences; some familiarity with Hilbert space theory helpful but not required; knowledge of scientific programming language.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 747 - Nonlinear Optimization and Applications

Credits: 3
Introduction to practical aspects of nonlinear optimization. Covers applications of optimization algorithms to solving problems in science and engineering. Applications include data analysis, materials science, nanotechnology, mechanics, optical design, shape design, and trajectory optimization.

Prerequisites
MATH 213 and 216, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 748 - Symbolic Computation

Credits: 3
Provides mathematical and computational background for computational algebraic geometry and its applications. Includes algebra, geometry, algorithms, concept of Groebner bases, automatic theorem proving, and serial and parallel algorithms and their complexity. Topics are related to applications in engineering and computer science. Students expected to complete projects.

Prerequisites
Undergraduate degree in scientific discipline and course in abstract algebra.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 749 - Topics in Computational Mathematics

Credits: 3
Selected topics in computational mathematics not covered in fixed-content computational mathematics courses.

Prerequisites
Permission of instructor.

Notes
CSI 750 - Earth Systems and Global Changes

Credits: 3
Introduces global system interactions responsible for global environmental change. Discusses natural causes of past and present global changes, and how human activities affect them; and ecological and human consequences of global changes. Topics include climate and hydrological systems, global warming, deforestation, ozone depletion, ecological system dynamics, introduction to climate and global change monitoring, satellite instrumentation and calibration, and model predictions.

Prerequisites
Course in ecology, environmental geology, or atmospheric physics; or permission of instructor.

CSI 753 - Observations of the Earth and Its Climate

Credits: 3
Provides requisite material to understand techniques of remote sensing and other observational methods as applicable to Earth science and global change. Surveys methodologies and their applications, including systematic study of how each part of electromagnetic spectrum is used to gather data about Earth. Describes limitations imposed by satellite engineering, sensor limitations on data gathering, and a survey of data reduction specific to remote sensing applications. Also covers current research issues, including examples pertaining to atmosphere, land masses, and oceans. Includes discussions of current efforts by NASA and NOAA to provide integrated data gathering and dissemination systems.

Equivalent to EOS 753

Prerequisites
CSI 660 or introductory remote sensing course; environmental science, space science, physics, or chemistry undergraduate background; or permission of instructor.

CSI 754 - Earth Science Data and Advanced Data Analysis

Credits: 3
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Prerequisites
GGS 579 or permission of instructor.

**CSI 757 - Techniques and Algorithms in Earth Observing and Remote Sensing**

Credits: 3
Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Equivalent to GGS 757

**Prerequisites**
CSI 753 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CSI 758 - Visualization and Modeling of Complex Systems**

Credits: 3
Covers elements of modeling and analysis of Earth and space sciences data and systems. Concentrates on sample projects and student-initiated projects to use visualization and graphical analysis techniques as they apply to modeling of complex data sets and systems. Uses several different analysis and visualization packages. Spacecraft data sets from the Naval Research Laboratory (NRL) Backgrounds Data Center and other NRL data sets are available for course projects; perusal of web data sets also possible. Modeling and analysis accompanied by appropriate readings from current literature.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CSI 761 - N-Body Methods and Particle Simulations**

Credits: 3
Covers particle methods to solve variety of physical systems. Emphasizes study and development of numerical results, and visualization of these results in complex physical systems. Applications and projects include stellar and galaxy dynamics, smoothed particle hydrodynamics, plasma simulations, and semiconductor device theory algorithms on parallel and vectorized systems.

Equivalent to ASTR 761

**Prerequisites**
PHYS 613, CSI 780 and CSI 700 or permission of instructor.
CSI 763 - Statistical Methods in Space Sciences

Credits: 3
Covers statistical and data analysis methods applicable to problems in space science, remote sensing, and astrophysics. Includes parametric and nonparametric hypothesis testing, parameter estimation, correlation analysis, time series analysis, spatial analysis, and image reconstruction. Emphasizes imperfect nature of actual data sets and hypothesis. Examples drawn from current space science research.

Prerequisites
ASTR 530 or permission of instructor.

CSI 764 - Computational Astrophysics

Credits: 3
Covers statistical mechanics concepts important in astrophysics. Presents unified approach to particle acceleration and interaction theory based on analytical and numerical analysis of Boltzmann and Liouville equations. Discusses computational methods relevant to particle transport problems, with emphasis on Fokker-planck and Monte Carlo solution techniques. Applications from space sciences include studies of cosmic ray acceleration, photon comptonization, particle transport in the near-Earth environment, energy transport in stellar atmospheres, and self-gravitating system dynamics.

Equivalent to ASTR 764

Prerequisites
ASTR 530.

CSI 765 - High-Energy and Accretion Astrophysics

Credits: 3
Overview of atomic and nuclear physics. Covers nuclear reactions of use to high-energy astrophysics; radiation processes in cosmic plasmas, emphasizing quantum mechanical calculations; stellar evolution and nucleosynthesis; computational models of stellar evolution; binary stars and accretion disks; numerical models of the structure of accretion disks; compact stars, white dwarfs, neutron stars, and black holes; acceleration processes and cosmic rays; interstellar medium and propagation of cosmic rays; high-energy processes in the center of galaxies; and ground- and space-based techniques and observations.

Equivalent to ASTR 765

Prerequisites
PHYS 502, ASTR 530, and PHYS 613/CSI 780 or permission of instructor.
CSI 766 - Relativity and Cosmology

Credits: 3
Covers special relativity, four-dimensional space-time, general relativity, non-Euclidean geometries, geodesic and field equations, test of general relativity theory, black holes, cosmic background radiation, thermodynamic considerations in cosmology, and cosmological models.

Equivalent to ASTR 766

Prerequisites
ASTR 530 and MATH 314, or permission of instructor.

CSI 769 - Topics in Space Sciences

Credits: 3
Selected topics in space sciences not covered in fixed-content space sciences courses.

Equivalent to ASTR 769

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

CSI 771 - Computational Statistics

Credits: 3
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross-validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to STAT 751

Prerequisites
CSI 772 - Statistical Learning

Credits: 3
The course focuses on statistical learning theory by introducing the statistical and optimization background essential for developing new efficient statistical learning algorithms. Also discusses applications of statistical learning algorithms to the solution of important problems in many areas of science.

Prerequisites
CSI 672 or equivalent, or permission of instructor.

CSI 773 - Statistical Graphics and Data Exploration

Credits: 3
Exploratory data analysis provides a reliable alternative to classical statistical techniques, which are designed to be the best possible when stringent assumptions apply. Topics include graphical techniques such as scatter plots, box plots, parallel coordinate plots, and other graphical devices; re-expression and transformation of data; influence and leverage; and dimensionality reduction methods such as projection pursuit.

Equivalent to STAT 663

Prerequisites
300-level course in statistics; STAT 554 strongly recommended.

CSI 775 - Computational Models of Probabilistic Reasoning

Credits: 3
Introduces theory and methods for building computationally efficient software agents that reason, act, and learn environments characterized by noisy and uncertain information. Covers methods based on graphical probability and decision models. Students study approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Provides practical model building experience. Students apply what they learn to semester-long project of their own choosing.

Equivalent to OR 719/STAT 719

Prerequisites
STAT 652 or 664, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

### CSI 776 - Stochastic Differential Equations

Credits: 3  
Introduces modern theory of stochastic calculus. Covers stochastic integrals, martingales, counting processes, diffusion processes, and Ito-type processes in general. Considers applications of these methods to engineering, biology, and economics.

Equivalent to IT 746

**Prerequisites**  
STAT 652, ECE 630 or ECE 632 or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

### CSI 777 - Principles of Knowledge Mining

Credits: 3  
Principles and methods for synthesizing task-oriented knowledge from computer data and prior knowledge, and presenting it in human-oriented forms such as symbolic descriptions, natural language-like representations, and graphical forms. Topics include fundamental concepts of knowledge mining; methods for target data generation and optimization; statistical and symbolic approaches; knowledge representation and visualization; and new developments such as inductive databases, knowledge generation languages, and knowledge scouts.

**Prerequisites**  
INFS 614 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

### CSI 779 - Topics in Computational Statistics

Credits: 3  
Selected topics in computational statistics not covered in fixed-content computational statistics courses.

**Prerequisites**  
Permission of instructor.

**Notes**  
May be repeated for credit as needed.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**
CSI 780 - Computational Physics and Applications

Credits: 3
Applies numerical methods to study of variety of physical systems, with emphasis on modeling and simulation. Develops numerical algorithms and simulation codes to gain understanding of mechanisms, processes in physical systems. Includes several projects drawn from such areas as atomic and molecular interactions, molecular dynamics, lattice dynamics, quantum systems, chaos, percolation, random walks, aggregation mechanisms of soft solids, nanomaterials, and nonlinear dynamics.

Equivalent to PHYS 613

Prerequisites
PHYS 502; FORTRAN, C, or C++ programming; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 781 - Plasma Science

Credits: 3
Study of ionized matter, theory, and some computation with application to astrophysics, industrial plasma processing, magnetosphere, and ionosphere problems. Vlasov and fluid equations derived and applied in plasma science, including study of plasmas with and without magnetic fields.

Prerequisites
PHYS 513 or PHYS 722/CSI 785; PHYS 711/CSI 782/CHEM 730 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 782 - Statistical Mechanics for Modeling and Simulation

Credits: 3
Studies microcanonical, canonical, and grand canonical ensembles and fluctuations, as well as Fermi-Dirac and Bose-Einstein statistics. Modeling of ideal, dilute, and diatomic gases, liquids, and crystals. Also covers Liouville equation and simulation in classical statistical mechanics. Introduces Brownian motion, kinetic theory, and transport processes.

Equivalent to PHYS 711/CHEM 730

Prerequisites
PHYS 502 and CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSI 783 - Computational Quantum Mechanics

Credits: 3
Studies fundamental concepts of quantum mechanics from computational point of view, review of systems with spherically symmetric potentials, many electron atom solutions to Schrodinger's equation, electron spin in many-electron systems, atomic structure calculations, algebra of many-electron calculations, Hartree-Fock self-consistent field method, molecular structure calculations, scattering theory computations, and solid-state computations.

Equivalent to PHYS 736/CHEM 736

Prerequisites
PHYS 502 and PHYS 613/CSI 780, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 786 - Molecular Dynamics Modeling

Credits: 3
Introduces simulation methods in physical chemistry sciences. Covers computational approaches to modeling molecular and condensed matter systems, including interatomic and molecular potentials, molecular dynamics, time averages, ensemble distributions, numerical sampling, thermodynamic functions, response theory, transport coefficients, and dynamic structure. Includes stochastic simulations such as Brownian motion, Langevin dynamics, Monte Carlo methods and random walks, and introduction to cellular automata.

Prerequisites
PHYS 613/CSI 780 or CHEM 633/CSI 711, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 787 - Computational Materials Science

Credits: 3
Covers selected topics in computational aspects of condensed matter, such as methods of electronic structure calculations, surface science, molecular clusters, lattice dynamics, nanomaterials, semiconductors, superconductivity, magnetism, Hubbard model, mesoscopic systems, and liquids.

Prerequisites
PHYS 512/CSI 687 and PHYS 736/CSI 783, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 788 - Simulation of Large-Scale Physical Systems
Study of diverse, large-scale physical systems emphasizing modeling and simulation of these multifaceted systems. Several projects are undertaken, drawn from such areas as many-body dynamics, atmospheric structure and dynamics, high-temperature plasmas, stellar structure, hydro dynamical systems, galactic structure and interactions, and cosmology.

Equivalent to PHYS 728

**Prerequisites**
PHYS 613/CSI 780 and CSI 700 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 789 - Topics in Computational Physics**

Credits: 3  
Selected topics in computational physics not covered in fixed-content computational physics courses.

Equivalent to PHYS 780

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for credit as needed.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 796 - Directed Reading and Research**

Credits: 1-6  
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**CSI 798 - Research Project**

Credits: 3  
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.
Prerequisites
12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CSI 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

CSI 819 - Quantum Information Science Topics

Credits: 3
Selected topics in quantum information science not covered in fixed-content computational sciences courses.

Prerequisites
Permission of instructor.

Notes
Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 854 - Hyperspectral Imaging Applications

Credits: 3
Includes advanced hyperspectral concepts, multisystems tradeoffs, data collection and processing systems, imaging radar systems, laser systems, data fusion, calibration and data compression techniques, remote sensing and U.S. national policy. Applications include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation topics.

Equivalent to GGS 840

Prerequisites
CSI 753 or equivalent or permission of instructor
CSI 873 - Computational Learning and Discovery

Credits: 3
Presents modern ideas, theories, and methods for computational learning and discovery, along with relevant applications including medical diagnosis, Earth science data analysis, and neuronal modeling. Includes background elucidation of fundamental concepts in computational learning, addressing discovery of equations, theory of causality, and comparison with biological and cognitive models. Students make presentations on topics of their research interest, and work on projects involving state-of-the-art systems.

Prerequisites
CS 580 or equivalent, or permission of instructor.

CSI 876 - Measure and Linear Spaces

Credits: 3
Covers measure theory and integration, convergence theorems, and the theory of linear spaces and functional analysis, including normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to IT 876/STAT 876

Prerequisites
IT 776 or permission of instructor.

CSI 877 - Geometric Methods in Statistics

Credits: 3
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Equivalent to IT 877/STAT 877

Prerequisites
STAT 751 or permission of instructor.
CSI 885 - Atomistic Modeling of Materials

Credits: 3
Advanced course focusing on utilization of atomistic modeling and computer simulation techniques to analyze structure of crystalline materials. Introduces modern methodology of largescale atomistic simulations, and provides hands-on experience through numerous examples and homework assignments based on simulation package SOLD (Simulator of Lattice Defects). Provides background knowledge on theory of lattice defects (point defects, interfaces, dislocations) and thermal and mechanical properties of solid materials (plastic deformation, fracture).

Prerequisites
CSI 685, 700, and 786; or permission of instructor.

CSI 888 - Topics in Quantum Systems

Credits: 3
Selected topics in quantum systems in physics and chemistry not covered in fixed-content courses in quantum mechanics. Possible topics are new spectroscopic methods, density functional theory, energy transfer and fluorescence, nuclear magnetic resonance, Mossbauer spectroscopy, advanced computational considerations in atomic or molecular structure, nuclear scattering theory, quantum considerations in condensed matter problems, and quantum gravity.

Prerequisites
PHYS 736/CSI 783 or PHYS 732/CSI 784; or permission of instructor.

Notes
May be repeated for credit as needed.

CSI 898 - Research Colloquium in Computational Sciences and Informatics

Credits: 1
Presentations in specific research areas in computational sciences and informatics by SCS faculty and staff members, and professional visitors.

Notes
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Grading: S/NC
CSI 899 - Colloquium in Computational Sciences and Informatics

Credits: 1
Presentations in a variety of areas of computational sciences and informatics by SCS faculty and staff members, and professional visitors.

Notes
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

CSI 909 - Advanced Topics in Computational Sciences and Informatics

Credits: 3
Covers selected topics in computational sciences and informatics not covered in fixed-content courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 971 - Probability Theory

Credits: 3
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function convergence, and Markov chains.

Equivalent to STAT 971

Prerequisites
STAT 544 and MATH 315

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 972 - Mathematical Statistics I
Credits: 3
Focuses on theory of estimation, exploring method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Other topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to IT 972/STAT 972

**Prerequisites**
CSI 672/STAT 652 or equivalent and either CSI 876/IT 876/STAT 876 or IT 971/STAT 971.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 973 - Mathematical Statistics II**

Credits: 3  
Concentrates on theory of hypothesis testing. Topics include characterizing the decision process; simple versus simple hypothesis tests; Neyman Pearson Lemma; and uniformly most powerful, unbiasedness, invariance, randomized, and sequential tests. Applies testing principles to situations in normal distribution family and other families of distributions.

Equivalent to IT 973/STAT 973

**Prerequisites**
CSI 972.

**Notes**
Continuation of CSI 972.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CSI 976 - Statistical Inference for Stochastic Processes**

Credits: 3  
Covers modern theory of parameter estimation and hypothesis testing for stochastic processes, counting processes with random intensities, and solutions to stochastic differential equations driven by martingales. Considers applications to engineering, biology, and economics.

Equivalent to IT 976

**Prerequisites**
CSI 776 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CSI 978 - Statistical Analysis of Signals

Credits: 3
Advanced course in analysis of discrete- and continuous-time signals using methods of stochastic differential equation and time series. Presumes familiarity with methods of harmonic analysis and times series modeling. Topics include state-space modeling and eigen-value processing, nonlinear modeling of signals, non-Gaussian stochastic process structure, detection and estimation of vector-valued signals, robust signal detection, and array processing and target tracking.

Equivalent to IT 978

Prerequisites
STAT 544 and 658, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 979 - Advanced Topics in Computational Statistics

Credits: 3
Covers selected topics in computational statistics not covered in fixed-content computational statistics courses.

Equivalent to IT 979

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 986 - Advanced Topics in Large-Scale Physical Simulation

Credits: 3
Covers simulation of physical systems not covered in fixed-content physical simulation courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSI 991 - Seminar in Scientific Computing
CSI 898 - Seminar on Computational Sciences and Informatics

Credits: 1
Considers selected topics in specific area of computational sciences and informatics not covered in fixed-content courses or as extension of fixed-content courses. Format for presentation is seminar with student participation.

Notes
May be repeated for credit, but maximum 3 credits of CSI 898, 899, and 991 may be applied to PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

CSI 996 - Doctoral Reading and Research

Credits: 1-6
Reading and research on specific topic in computational sciences and informatics under direction of faculty member. May be repeated for a total of 6 credits.

Prerequisites
Admission to doctoral program, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CSI 998 - Doctoral Dissertation Proposal

Credits: 1-12

Prerequisites
Permission of advisor.

Notes
Course may be repeated as needed, but no more than 12 credits of CSI 998 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

CSI 999 - Doctoral Dissertation

Credits: 1-12
Involves doctoral dissertation research under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy.
Notes
May be repeated as needed, but no more than 24 credits in CSI 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Computational Social Science

CSS 600 - Introduction to Computational Social Science

Credits: 3
Graduate-level introduction to computational concepts, principles, and modeling approaches in social sciences, emphasizing simulations and elements of complexity theory as they apply to social phenomena. Survey includes systems dynamics, cellular automata, and agent-based models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 605 - Object-Oriented Modeling in Social Science

Credits: 3
Presents and applies concepts and principles from object-based modeling paradigm. Emphasizes Unified Modeling Language (UML) to render structure and operation of complex social systems and processes.

Prerequisites
CSS 600, or approval by instructor and program director

Corequisite
CSS 600, or approval by instructor and program director

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 610 - Computational Analysis of Social Complexity

Credits: 3
Provides hands-on examination of agent-based models in social sciences by examining and experimenting with variety of social-simulation projects conducted in modeling environments such as Swarm, Repast, Ascape, and MASON (Multi-Agent Simulator of Networks and Neighborhoods).

Prerequisites
CSS 600, or permission of instructor
Corequisite
CSS 600, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 620 - Origins of Social Complexity

Credits: 3
Examines when, where, and how social complexity emerged in human societies, emphasizing long-term analysis and comparative information processing in four civilizations of the ancient world: West Asia, East Asia, Andean Peru, and Mesoamerica.

Prerequisites
CSS 600 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 625 - Complexity Theory in the Social Sciences

Credits: 3
Examines social phenomena including language, terrorism, the Internet, warfare, and wealth based on power laws and far-from equilibrium nonlinear dynamics. Emphasizes data analysis, and modeling and interpreting complexity-theoretic dynamics.

Prerequisites
CSS 600

Corequisite
CSS 600

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 630 - Comparative Computational Social Science

Credits: 3
Applies comparative method for analyzing different types of computational models in the social sciences. Strong crossdomain and interdisciplinary emphasis akin to comparative economic systems, government, or linguistics.

Prerequisites
CSS 600, or permission of instructor

Corequisite
CSS 600, or permission of instructor
CSS 635 - Cognitive Foundations of Computational Social Science

Credits: 3
Examines cognitive foundations and information processing in computational social agents, and compares to comparable human cognitive phenomena, including emotions, trust, and reciprocity. Emphasizes modeling project.

Prerequisites
CSS 600 and 610, or permission of instructor

Corequisite
CSS 600 and 610, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 640 - Human and Social Evolutionary Complexity

Credits: 3
Examines long-term evolution of human and societal complexity from global, cross-cultural perspective, emphasizing computational aspects leading to today's globalization. Global history from the computational social science perspective.

Prerequisites
CSS 600, 620; and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 643 - Land-Use Modeling Techniques and Applications

Credits: 3
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Prerequisites
CSS 600 or permission of instructor

Corequisite
CSS 600 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSS 645 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hand-on development of simple ABM models. Investigates linkages between GIS and ABM.

Prerequisites
GGS 631 or CSS 600, or permission of instructor

Corequisite
GGS 631 or CSS 600, or permission of instructor

Notes
CSS 600 may be taken concurrently.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 650 - Physics Methods for Analyzing Social Complexity

Credits: 3
Surveys complexity theoretic tools including strange attractors, Ising models, correlation functions, ergodic theory, power spectra, meanfield theory, and renormalization group. Emphasizes application to social, economic, or political systems.

Prerequisites
CSS 600, and permission of instructor

Corequisite
CSS 600, and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 655 - Social Systems Dynamics

Credits: 3
Introduces systems dynamics modeling of social systems governed by levels/rates or stocks/flows processes, with applications to global modeling, terrorism, urban dynamics, organizations, and social and international conflict.

Prerequisites
CSS 600

Corequisite
CSS 600
CSS 660 - Computational Social Science of Spacefaring Civilization

Credits: 3
Focusses on goals, resources, history, and modeling issues concerning human and social dimensions of space program using CSS. Design and development of socially viable human communities in extreme environments.

Prerequisites
CSS 600 and 610, and permission of instructor

Corequisite
CSS 600 and 610, and permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 692 - Social Network Analysis

Credits: 3
Methods and applications that examine complex social systems based on relations, structures, connectivity, matrix representations, location, roles, interactions, and other network properties. Applications to terrorism, cognition, organizations, and other social phenomena.

Prerequisites
CSS 600

Corequisite
CSS 600

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 739 - Topics in Computational Social Science

Credits: 3
Selected topics in computational social science not covered in fixed-content computational social science courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CSS 796 - Directed Reading and Research

Credits: 3
Reading and research on specific topic in computational social science under direction of a faculty member.

Prerequisites
Permission of instructor.

Notes
May be repeated as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 798 - Research Project

Credits: 3
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report.

Prerequisites
12 graduate credits from core requirements, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CSS 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under guidance of graduate faculty member, resulting in acceptable technical report (master's thesis) and oral defense.

Prerequisites
12 graduate credits from CSS core, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

CSS 898 - Research Colloquium in Computational Social Science

Credits: 1
Presentations in specific research areas in computational social science by Center for Social Complexity-associated faculty and professional visitors.
CSS 899 - Colloquium in Computational Social Science

Credits: 1
Presentations in variety of areas of computational social science by Center for Social Complexity-associated faculty and professional visitors.

Notes
May be repeated for credit, but maximum 3 credits of CSS 898 and 899 may be applied toward PhD.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CSS 909 - Advanced Topics in Computational Social Science

Credits: 3
Covers selected topics in computational social science and socioinformatics not covered in fixed-content courses.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as necessary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CSS 996 - Doctoral Reading and Research

Credits: 1-12
Reading and research on specific topic in computational social science under direction of faculty member.

Prerequisites
Admission to doctoral program, and permission of instructor.

Notes
May be repeated as necessary.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
**CSS 998 - Doctoral Dissertation Proposal**

Credits: 1-12  
Covers development of research proposal, which forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated as needed, but no more than 12 credits of CSS 998 may be applied toward satisfying doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/IP

---

**CSS 999 - Doctoral Dissertation**

Credits: 1-12  
Doctoral dissertation research under direction of dissertation director.

**Prerequisites**
Approval of dissertation proposal.

**Notes**
May be repeated as needed, but no more than 24 credits in CSS 998 and 999 may be applied toward satisfying doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**Computer Forensics**

---

**CFRS 500 - Introduction to Technologies of Forensics Value**

Credits: 3  
Presents an overview of technologies of interest to forensics examiners. It will provide an introduction to operating systems, software, and hardware, and other aspects required for forensics examination.

**Prerequisites**
Graduate standing
CFRS 510 - Digital Forensics Analysis

Credits: 3
Explains Computer Forensics crime scene procedures, beginning with initial walk-through and evaluation; identification and collection of potential evidence; preparation of intrusion investigation; aspects of working with investigators and attorneys; reverse engineering with file identification and profiling; application of critical thinking in determination of significance of artifacts; and analysis and reporting of evidence.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

CFRS 590 - Special Topics in Computer Forensics

Credits: 3
Presents selected topics from recent developments and applications in various computer forensics disciplines. The course is designed to help the professional computer forensics community keep abreast of current developments, and to provide an applications-oriented introduction to emerging areas of computer forensics.

Prerequisites
Graduate standing or permission from department.

Notes
Repeatable for credit within the degree.

Hours of Lecture or Seminar per week: 3

CFRS 660 - Network Forensics

Credits: 3
This course deals with the collection, preservation, and analysis of network-generated digital evidence such that the evidence can be successfully presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The capture/intercept of digital evidence, the analysis of audit trails, the recording of running processes, and the reporting of such information will be examined.

Equivalent to TCOM 660

Prerequisites
TCOM 509 and TCOM 529 and a working knowledge of computer programming.

CFRS 661 - Digital Media Forensics

Credits: 3
This course deals with the collection, preservation, and analysis of digital media such that the evidence can be successfully
presented in a court of law (both civil and criminal). The relevant federal laws will be examined as well as private sector applications. The seizure, preservation, and analysis of digital media will be examined in this course.

Equivalent to TCOM 661

**Prerequisites**
TCOM 548 and TCOM 556 or TCOM 562; a working knowledge of computer operating systems (e.g. CS 471 or equivalent) or permission from instructor

**CFRS 663 - Operations of Intrusion Detection for Forensics**

Credits: 3
Introduces students to network and computer intrusion detection and its relation to forensics. It addresses intrusion detection architecture, system types, packet analysis, and products. It also presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to TCOM 663

**Prerequisites**
TCOM 509 and TCOM 529 and a working knowledge of computer programming.

**CFRS 664 - Incident Response Forensics**

Credits: 3

This course addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Equivalent to TCOM 664

**Prerequisites**
TCOM 509 and TCOM 529.

**CFRS 698 - Independent Reading and Research**

Credits: 1-3
Studies selected area in Computer Forensics under the supervision of a faculty member. A written report is required.

**Prerequisites**
Graduate standing; completion of at least two core courses in the CFRS program; and permission of instructor

**Notes**
No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.
Hours of Lecture or Seminar per week: 1-3
When Offered: Fall, Summer, Spring

CFRS 760 - Legal and Ethical Issues in IT

Credits: 3
Presents legal and ethics topics in the context of computer forensics. It will include legal principles, types of crimes, witness testimony, and forensics report writing.

Prerequisites
CFRS 500

CFRS 770 - Fraud and Forensics in Accounting

Credits: 3
Prepares students to undertake forensic accounting, a specialty practice area of accounting, in such a way that they will develop the necessary expertise, and be prepared to give expert evidence in any resultant trial.

Prerequisites
CFRS 500

CFRS 780 - Advanced Topics in Computer Forensics

Credits: 3
Teaches advanced topics from recent developments and applications in various areas of computer forensics. The advanced topics are chosen in such a way that they do not duplicate existing CFRS courses. Active participation of the students is encouraged in the form of writing and presenting papers in various research areas of the advanced topic. The course is designed to enhance the professional engineering community's understanding of breakthrough developments in specific areas of computer forensics.

Prerequisites
Permission of instructor

Notes
Repeatable within degree.

CFRS 790 - Advanced Computer Forensics

Credits: 3
Provides the capstone course for the MS in Computer Forensics program. CFRS 790 will integrate the concepts and practices developed within the Computer Forensics Program. Students will be exposed to case studies and be required to conduct computer forensic investigations of digital media, intercepted packet switched data, and multisource log information to successfully complete each case study.
Prerequisites
CFRS 660, CFRS 661, and CFRS 663; minimum of 18 credits completed in the MS in Computer Forensics Program prior to registration.

Notes
To be taken in the last year prior to the completion of degree requirement.

CFRS 798 - Research Project

Credits: 1-3
Conduct a research project to be chosen and completed under guidance of a graduate faculty member that results in an acceptable technical report.

Prerequisites
Graduate standing; completion of at least two core courses and a minimum of 12 credits in the CFRS program; permission of instructor.

Notes
No more than a total of six credits may be taken from a combination of CFRS 698 and CFRS 798 for credit within the CFRS program.

Hours of Lecture or Seminar per week: 1-3
When Offered: Fall, Summer, Spring

Computer Game Design

GAME 101 - Introduction to Game Design

Credits: 3
Introductory overview of the game development process with an emphasis on game design. Through detailed study of historical and current games, students will learn the language and structure needed to develop their own game ideas. Students will learn the many aspects of a game development team and how each of these roles contributes to a game's overall design.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GAME 210 - Basic Game Design

Credits: 3
Introduction to computer game design and development including a brief history of the field, and current industry practice and production. Current major game design software, hardware and associated tools are explored through simple game design projects.
Prerequisites
CS 105 or equivalent ethics course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 230 - History of Computer Game Design

Credits: 3
History of computer game design including games as a new medium for education, entertainment, and communications. Aspects of the business of computer game publishing, game criticism, storytelling, interactive fiction, violence, and virtual communities will be explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 231 - Computer Animation for Games

Credits: 3
2D and 3D modeling, character design, and animation projects are constructed using commercial and proprietary software and game design tool kits and engines. Simple texturing and models rigging for game animation will be discussed.

Prerequisites
GAME 210

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 232 - Online Gaming and File Sharing

Credits: 3
History, practice, and design of online games and file sharing protocols. Past and current interactive file sharing protocols will be studied including chat applications, WikiMedia, and peer-to-peer network protocols. 2D and 3D virtual social networking and computer/console real-time team gaming design will be covered.

Prerequisites
GAME 231

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 250 - Music for Film and Video
Credits: 3
Selection, editing, processing, and integration of sounds and music (post-production) for film, video, and animation. Time, frequency, and amplitude domain digital post-production techniques will be studied.

Prerequisites
MUSI 100 and 101

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 310 - Game Design Studio

Credits: 3
Studio course that focuses on team-based game design. In collaboration with undergraduate students from VSITE’s CS game design concentration, student teams design and develop complete computer-based and online serious and/or entertainment games.

Prerequisites
GAME 230, 231 and 250

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 330 - Computer Game Platform Analysis

Credits: 3
Examine past and current consumer gaming platforms and consoles including handheld, mobile, cell phone, desktop, and commercial consoles. Analysis will include media types, wired and wireless protocols, compiling toolkits, and storage devices. Limitations and advantages of most commercially produced platforms will be examined and compared.

Prerequisites
GAME 231 and 232

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 332 - Story Design for Computer Games

Credits: 3
Use of narrative structure and new media for designing computer game scenarios and stories. Traditional narrative techniques (text stories, novels, films) will be examined, as well as translations of the traditional to interactive, non-linear modes of communications. Analysis of current computer game story design theories, philosophies, and techniques will be covered.

Prerequisites
GAME 210 and 230

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GAME 367 - Writing and Editing Music and Sound

Credits: 3
Composition, editing, processing, and integration of voice, environmental sounds and music into non-linear computer game environments. Special emphasis will be placed on HD sound and music post-production and mixing (3 & 5 transducer point listening spaces), sequential composition and sample-splicing techniques, and the study of competing compression algorithms for sound and music.

Prerequisites
GAME 250

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 398 - Advanced Game Design Animation

Credits: 3
Advanced 2D and 3D animation projects for interactive game scenes and scenarios are built using commercial and proprietary software and game design tool kits. Advanced texturing, rigging, lighting, and perspective manipulation will be covered.

Prerequisites
GAME 231

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GAME 399 - Special Topics

Credits: 1-4
In-depth presentation and exploration of topical studies in computer game design. Subject matter varies.

Notes
May be repeated for a maximum of 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-4
Hours of Lab or Studio per week: 0

GAME 400 - Game Design Practicum

Credits: 3
Studio/lecture course focuses on the design strengths and weaknesses inherent in current entertainment and serious games. UI design, level design and map structure, scoring stratum, on-line support, game ecologies, gaming communities, and designing/writing documentation and specifications will be studied.
**Prerequisites**
GAME 330, 367 or 398. Must be a Computer Game Design minor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

### GAME 410 - Advanced Game Design Studio

Credits: 3  
In collaboration with undergraduate students from VSITE's CS game design concentration, student teams design and develop complete computer-based and online serious and entertainment games.

**Prerequisites**
GAME 310

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GAME 431 - Consumer Game Platform Analysis

Credits: 3  
Current and prototype consumer gaming platforms and consoles. Analysis will include conversion, transposition, and porting game media among most commercially produced platforms for analysis and comparisons.

**Prerequisites**
GAME 330

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GAME 490 - Senior Project

Credits: 3  
Student develops a case study of a publicly or commercially published computer game exploring the technical, economic, ethical, social and political ramifications on its intended target market. A public lecture of the case study is required.

**Prerequisites**
Completion of 60 credits in major

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GAME 491 - Internship
Credits: 4
Placement in an appropriate internship within a program approved by a federal, state or commercial game design/publishing agency or firm.

**Prerequisites**
Completion of 60 credits in major

**Notes**
180 hours of internship on-site work must be completed

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 4

---

**GAME 492 - Independent Study**

Credits: 1-6  
Advanced research, computer game design, or exploration of topical studies in computer game design.

**Notes**
May be repeated for a maximum of 12 credits

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**Computer Science**

---

**CS 101 - Preview of Computer Science**

Credits: 2  
Offers a broad overview of computer science designed to provide students with an introduction to the field of computer science and an orientation to the Computer Science Department and the computing environment at the university. Includes a project to introduce problem solving using computers.

**Corequisite**
CS 112.

**Notes**
All computer science majors are required to take this course within their first year.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**CS 105 - Computer Ethics and Society**
Intensive introduction to legal, social, and ethical issues surrounding software development and computer use. Stresses professional conduct, social responsibility, and rigorous standards for software testing and reliability. Examines issues such as liability, ownership of information, and computer crime.

Satisfies General Education Requirement: Information technology (IT, Ethics)

**Prerequisites**
12 credits of undergraduate course work.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**CS 112 - Introduction to Computer Programming**

Credits: 4  
This course introduces the use of computer programming as a problem-solving tool. Topics in procedural programming include expressions, control structures, simple data types, input/output, graphical interfaces, testing, debugging, and programming environments.

Satisfies General Education Requirement: Information technology (IT, all except ethics)

**Prerequisites**
C or better in MATH 104 or MATH 105 or specified score on math placement test, or MATH 113 with a C or better.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

---

**CS 123 - Computing: From the Abacus to the Web**

Credits: 3  
This course will give students the ability to relate to existing and emerging technologies (such as e-mail, the Internet, search engines, blogs, computer games, and robotics) by educating them on the underlying computer science concepts. Historical, social, and technical issues related to each topic will be discussed.

**Notes**
Students may not take this course for credit once they have successfully completed CS 211. Intended for nonmajors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 211 - Object-Oriented Programming**

Credits: 3  
This course continues to focus on problem solving, testing, and debugging and introduces object-oriented programming. Topics include classes, inheritance, packages, collections, exceptions, and polymorphism. Examples in the course may include the use of basic data structures.
Prerequisites
Grade of C or better in CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

CS 222 - Computer Programming for Engineers

Credits: 3
A second course in computer programming. Introduces object-oriented programming and elementary data structures. The emphasis is on problems and language features relevant to engineers. (Intended as terminal course in computer programming.)

Prerequisites
Grade of C or better in CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 225 - Culture and Theory of Games

Credits: 3
Explores the theory, history, culture, and lore of games with particular emphasis on the varieties of computer game environments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 261 - Introduction to a Second Language

Credits: 1
Advanced programming using Java programming language. Other languages may be offered at times.

Prerequisites
Grade of C or better in CS 211.

Notes
Not available for credit for CS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 262 - Introduction to Low-Level Programming
Credits: 1
Introduction to the language C, as well as operating system concepts, in UNIX, to prepare students for topics in systems programming.

Prerequisites
Grade of C or better in CS 211 or CS 222.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

CS 306 - Synthesis of Ethics and Law for the Computing Professional

Credits: 3
Practical course to become effective computer professional. Examines legal and ethical issues surrounding computer technology and its use, as well as the foundation building that is necessary to deal with those challenges. Applies philosophical bases for ethical decision making to modern concerns raised by computers and technology. Addresses topics covered by CS 105 in a more intensive manner and focuses on the emerging legal and ethical issues involved in e-commerce and widespread use of the Internet.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
CS 105, junior standing (at least 60 credit hours)

Corequisite
All required general education courses

Notes
Computer science majors may use this course to satisfy the general education synthesis requirement, so long as they have not previously taken CS 305 for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 310 - Data Structures

Credits: 3
This course continues to focus on object-oriented programming with an emphasis on tools and techniques for developing moderate to large programs. Topics include use and implementation of linear and nonlinear data structures, and the design and analysis of elementary algorithms.

Prerequisites
Grade of C or better in CS 211.

Corequisite
CS105.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 325 - Introduction to Game Design

Credits: 3
Game design, in various electronic entertainment technologies, involves a diverse set of skills and backgrounds from narrative and art to computer programming. This course surveys the technical aspects of the field, with an emphasis on programming.

Prerequisites
Grade of C or better in CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 330 - Formal Methods and Models

Credits: 3
Abstract concepts that underlie much advanced work in computer science, with major emphasis on formal languages, models of computation, logic, and proof strategies.

Prerequisites
Grade of C or better in CS 211 and MATH 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 332 - Object-Oriented Software Design and Implementation

Credits: 3
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered will be specifications, design patterns, and abstraction techniques, including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Equivalent to SWE 332

Prerequisites
Grade of C or better in CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 363 - Comparative Programming Languages

Credits: 3
Key programming mechanisms described independently of particular machines or languages including control, binding,
procedural abstraction, and types. Systematically surveys diverse high-level language capabilities.

**Prerequisites**
Grade of C or better in CS 262.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 367 - Computer Systems and Programming

Credits: 3  
Introduces students to computer systems from the perspective of a programmer. Topics covered include data representation, assembly and machine-level representation of high-level language programs, the memory hierarchy, linking, exceptions, interrupts, processes and signals, virtual memory, and system-level I/O. This course serves as a foundation for courses on compilers, networks, operating systems, and computer architecture, where a deeper understanding of systems-level issues is required.

**Prerequisites**
Grade of C or better in CS 262 or 222 and ECE 301 or 331.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CS 391 - Advanced Programming Lab

Credits: 1  
Programming-intensive lab course. Students refine problem-solving and programming skills while gaining experience in teamwork. Focuses on data structures, recursion, backtracking, dynamic programming, and debugging. Central focus is applying familiar and new algorithms and data structures to novel circumstances.

**Corequisite**
Grade of C or better in CS 310 and permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

### CS 421 - Software Requirements and Design Modeling

Credits: 3  
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use of case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design notations are introduced. A study of object-oriented analysis and design modeling using the UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Equivalent to SWE 421
Prerequisites
Grade of C or better in CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 425 - Game Programming I

Credits: 3
The course will provide an introduction to technologies and techniques used in modern computer games. Teams will explore the various facets of a complete design, using sophisticated tools. The course will involve a project in which a game is prototyped; this prototype and initial design will serve as the starting point for the project in CS 426.

Prerequisites
Grade of C or better in CS 325 and 367.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 426 - Game Programming II

Credits: 3
This project-oriented course is a continuation of CS 425 with an emphasis on the implementation of a complete game.

Prerequisites
Grade of C or better in CS 425.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 440 - Language Processors and Programming Environments

Credits: 3
Survey of basic programming language processors and software development tools such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code-generation techniques.

Prerequisites
Grade of C or better in CS 310, 330, and 367.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 444 - Introduction to Computational Biology
Credits: 3
This course introduces students to computational methods in molecular biology. The course will cover a broad array of topics in bioinformatics and computational biology and will be organized as three four-week modules. The modules are intended to capture the current classification of bioinformatics and computational biology methods and so to provide students with a broad view of the field.

Prerequisites
C or better in CS 310.

Hours of Lecture or Seminar per week: 3

CS 445 - Computational Methods for Genomics

Credits: 3
Fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignment, and assembly, gene prediction, and knowledge-based protein structure prediction. Projects involve designing and programming basic alignment and prediction methods.

Prerequisites
C or better in CS 310 and STAT 344.

Hours of Lecture or Seminar per week: 3

CS 450 - Database Concepts

Credits: 3
This course covers basics to intermediate knowledge for the design, implementation, and use of relational database systems. The main topics include the Entity-Relationship (ER) and Entity-Enhanced Relationship (EER) models for database design, Relational Algebra (RA), Structured Query Language (SQL), SQL programming techniques, functional dependencies and normalization, object and object-relational databases, and security. Students will practice to design, develop, and implement a relational ORACLE database and use the database for queries, transaction processing, and report generation.

Prerequisites
Grade of C or better in CS 310 and 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 451 - Computer Graphics

Credits: 3
Basic graphics principles and programming. Topics include scan conversion, transformation, viewing, lighting, blending, texture mapping, and some advanced graphics techniques.

Prerequisites
Grade of C or better in MATH 203, CS 310, and CS 367.
CS 455 - Computer Communications and Networking

Credits: 3
Data communications and networking protocols, with study organized to follow layers of Internet Protocol Suite (TCP/IP family of protocols). Topics include role of various media and software components, local and wide area network protocols, network performance, and emerging advanced commercial technologies.

Prerequisites
Grade of C or better in CS 310 and 367, and STAT 344.

CS 465 - Computer Systems Architecture

Credits: 3
Computer subsystems and instruction set architectures. Single-cycle, multiple-cycle, and pipeline architectures. Memory hierarchy, cache, and virtual memory input-output processing.

Prerequisites
Grade of C or better in CS 367.

CS 468 - Secure Programming and Systems

Credits: 3
Fundamental principles and techniques for implementing secure computer systems. Topics include security and cryptography basics, vulnerability analysis, secure software development, and distributed system security. Projects involve designing and programming basic security tools, secure programs, and distributed systems.

Prerequisites
Grade of C or better in CS 310 and CS 367.

CS 471 - Operating Systems
Issues in multiprogramming. Covers concurrent processes and synchronization mechanisms; processor scheduling; memory, file, I/O, and deadlock management; performance of operating systems; and projects dealing with synchronization in multiprogrammed OS and virtual memory management.

**Prerequisites**
Grade of C or better in CS 310 and 367.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 475 - Concurrent and Distributed Systems**

Credits: 3  
Practical issues in designing and implementing concurrent and distributed software. Topics include concurrent programming, synchronization, multithreading, local and wide-area network protocols, distributed computation, systems integration, and techniques for expressing coarse-grained parallelism at the application level. Projects involve network programming at application level.

**Prerequisites**
Grade of C or better in CS 310 and 367.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 480 - Introduction to Artificial Intelligence**

Credits: 3  
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. Uses LISP, PROLOG, or expert system programming language.

**Prerequisites**
Grade of C or better in CS 310 and 330.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 482 - Computer Vision**

Credits: 3  
Basic principles of visual perception and their implementation on computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding. Students complete projects involving real images.

**Prerequisites**
Grade of C or better in CS 310, MATH 203 and STAT 344
CS 483 - Analysis of Algorithms

Credits: 3
Analyzes computational resources for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques. Specific algorithms analyzed and improved.

Prerequisites
Grade of C or better in CS 310, CS 330 and MATH 125.

CS 484 - Data Mining

Credits: 3
Basic principles and methods for data analysis and knowledge discovery. Emphasizes developing basic skills for modeling and prediction, on one side, and performance evaluation, on the other. Topics include system design; data quality, preprocessing, and association; event classification; clustering; biometrics; business intelligence; and mining complex types of data.

Prerequisites
Grade of C or better in CS 310 and STAT 344.

CS 485 - Autonomous Robotics

Credits: 3
Covers various basic software topics in autonomous robotics, including autonomous architectures, elementary kinematics and controls, simulation, localization and mapping, reasoning, and multiagent environments. The course will have several projects involving physical robots.

Prerequisites
CS 262, CS 310, MATH 203 or permission of the instructor.

CS 490 - Design Exhibition
Capstone course focusing on design and successful implementation of major software project, encompassing broad spectrum of knowledge and skills, developed by team of students. Requires final exhibition to faculty-industry panel.

Prerequisites
Grade of C or better in CS 421, 483; two other CS 400-level courses; and senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 498 - Independent Study in Computer Science

Credits: 1-3
Research and analysis of selected problems or topics in computer science. Topic must be arranged with instructor and approved by department chair before registering.

Prerequisites
60 credits, major in computer science, and permission of instructor.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 499 - Special Topics in Computer Science

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 540 - Language Processors

Credits: 3
Basic programming language processors such as assemblers, interpreters, and compilers. Topics include design and construction of language processors, formal syntactic definition methods, parsing techniques, and code generation techniques. Lab includes construction of language processors, and experience with programming environments.

Prerequisites
MATH 125; and CS 310, 330, and 365

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CS 555 - Computer Communications and Networking**

Credits: 3
Techniques and systems for communication of data between computational devices and layers of Internet Protocol Suite. Topics include role of various media and software components, local and wide area network protocols, network design, performance and cost considerations, and emerging advanced commercial technologies. Emphasizes TCP/IP family of protocols.

**Prerequisites**
CS 310 and CS 367 and STAT 344, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CS 571 - Operating Systems**

Credits: 3
Models of operating systems. Major functions including processes, memory management, I/O, interprocess communication, files, directories, shells, distributed systems, performance, and user interface.

**Prerequisites**
CS 310 and CS 367 and CS 465, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CS 580 - Introduction to Artificial Intelligence**

Credits: 3
Principles and methods for knowledge representation, reasoning, learning, problem solving, planning, heuristic search, and natural language processing and their application to building intelligent systems in a variety of domains. LISP, PROLOG, or expert system programming language.

**Prerequisites**
CS 310 and 330.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CS 583 - Analysis of Algorithms**
Credits: 3
Topics include analyzing sequential and parallel algorithmic strategies such as greedy methods, divide and conquer strategies, dynamic programming, search and traversal techniques, and approximation algorithms; and analyzing specific algorithms falling into these classes, NP-Hard and NP-Complete problems.

Prerequisites
CS 310 and 330, and MATH 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 600 - Theory of Computation

Credits: 3
Introduction to logic and proof techniques, formal languages, automata theory, and computational complexity. Specific topics include regular and context-free languages, Turing machines, NP-completeness, and undecidability.

Prerequisites
CS 583 and discrete mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 611 - Computational Methods for Genomics

Credits: 3
This course covers fundamental principles and techniques for implementing computational algorithms to solve problems in biology arising from the need to process large volumes of genomic information. Topics include sequence analysis, alignments, sequence assembly, gene prediction, and protein structure prediction.

Prerequisites
CS 583; or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

CS 630 - Advanced Algorithms

Credits: 3
Provides an overview of advanced algorithm design and analysis techniques. Topics include algorithms for hash tables, matrix operations, number theory, string matching, computational geometry, combinatorial optimization, and linear programming; also the areas of NP-completeness and approximation algorithms.

Prerequisites
CS 583
CS 631 - Object-Oriented Design Patterns

Credits: 3
Principles of object-oriented design through design patterns. Studies selection of appropriate object-oriented structure after system requirements or requirements specification of software system have been developed. Design patterns created in logic view of software system. Studies generalized design solutions for generalized software design problems, and reuse of design patterns. Once developed, design patterns may be specified in any object-oriented language.

Prerequisites
SWE 619 or 620, or CS 540 or 571; or graduate course in object-oriented programming or equivalent.

CS 633 - Computational Geometry

Credits: 3
Basic principles and methods for computing in field of geometric modeling. Emphasizes data structures used to represent geometric objects and algorithms for manipulating those data structures. Topics include range searching, polygon triangulation, convex hulls, motion-planning, visibility, and mesh generation.

Prerequisites
CS 583

CS 635 - Foundations of Parallel Computation

Credits: 3
Covers three major parallel computing paradigms: MIMD computation, SIMD computation, and data flow computation. Emphasizes interfaces between algorithm design and implementation, architecture, and software. Examines parallel algorithms and parallel programming languages relative to architecture of particular parallel computers.

Prerequisites
CS 583, and 540 or 571; or equivalent.

CS 640 - Advanced Compilers
CS 645 - Programming Language Semantics

Credits: 3
This course introduces basic concepts and techniques in the foundational study of programming languages. The central theme is the view of individual programs and whole languages as mathematical objects about which precise claims may be made and proved. Particular topics include operational techniques for formal definition of language features, type systems and type safety properties, polymorphism and subtyping, and foundations of object-oriented programming.

Prerequisites
CS 540, language processors.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 650 - Database Engineering

Credits: 3
Data models for network, hierarchical, object-oriented, and relational management information systems. Covers development (including internal structures) of a database system.

Prerequisites
CS 540, 571 and 583

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 652 - Computer Graphics

Credits: 3
Graphics principles and programming. Topics include graphics hardware, antialiasing, transformations, viewing, illumination, blending, texture mapping, color models, curves, surfaces, and animation.

Prerequisites
CS 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 658 - Networked Virtual Environments

Credits: 3
Topics covered in lecture are: networked virtual environment overview, networking technology, network multimedia concepts, virtual simulation concepts, efficiency/performance issues, and online conferencing/virtual classrooms. The project consists of four segments, each covering one aspect of networked virtual environments, plus a final session where one- or two-person teams create a minimally functional networked virtual environment over the Internet using overlay multicast software. The course consists of 31 50-minute sessions plus a major Java programming project which will be presented and discussed in class and two 90-minute examinations. Lectures are recorded in Network EducationWare (NEW) format and are available for playback on a flexible schedule, which is necessary since the course is shared among institutions having different academic calendars.

Prerequisites
CS 555

CS 662 - Computer Graphics Game Technologies

Credits: 3
Addresses some graphics game techniques including collision detection, levels of detail, physics-based simulations, textures, maps, and shadows.

Prerequisites
CS 652.

Hours of Lecture or Seminar per week: 3

CS 667 - Biometrics

Credits: 3
Basic principles and methods for automatic authentication of individuals. Technologies include among others face, fingerprint, and iris recognition, and speaker verification. Additional topics cover multimodal biometrics, system design, performance evaluation, and privacy concerns. Term project required.

Equivalent to IT 667

Prerequisites
CS 580 or permission of the instructor.

CS 668 - Computer Architecture Systems

Credits: 3
Examines principles and practices relating computer architecture to programming execution and efficiency. Presents new approach that stresses performance and cost of architecture. Examines principles of compiler and OS implications, instructions sets, basic processors, pipelines, and memory-hierarchy. Topics may include RISC machines, cache memories, register usage, and vector machines.
Prerequisites
CS 540 or 571, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 671 - Advanced Operating Systems

Credits: 3
Advanced topics in design and implementation of microkernel-based, object-oriented, and distributed operating systems. Specific topics include support for interprocess communication, interaction between computer architecture and operating systems, distributed file systems, transactions, and distributed shared memory.

Prerequisites
CS 571, MATH 351 or Permission of Instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 672 - Computer System Performance Evaluation

Credits: 3
Theory and practice of analytical models of computer systems. Topics include queuing networks, single and multiple class mean-value analysis, models of centralized and client-server systems, software performance engineering, and web servers performance.

Prerequisites
CS 571 and MATH 351, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 673 - Multimedia Computing and Systems

Credits: 3
Focuses on technological and development environments in developing multimedia applications. Projects involve experience with multimedia authoring tools and simulations to assess performance.

Prerequisites
CS 571.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 675 - Distributed Systems

Credits: 3
Issues in design and implementation of distributed systems and applications. Topics include distributed communication paradigms, middleware, coordination and synchronization, distributed transactions, consistency and replication, fault-tolerance and reliability, and peer-to-peer systems.

Prerequisites
CS 571 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 680 - Natural Language Processing

Credits: 3
Explores principles of designing computer programs that respond appropriately to questions, commands, and statements expressed in human language, particularly English. Role of knowledge representation and linguistic theory. Students become familiar with current literature to implement a limited natural language processor.

Prerequisites
CS 540 and 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 681 - Designing Expert Systems

Credits: 3
Design, construction, and evaluation of software systems that solve problems generally deemed to require human expertise. Focuses on study and use of relevant languages, environments, mathematics, and logic. Case studies of successful systems. Programming projects include development of tools or small-scale systems.

Prerequisites
CS 580.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 682 - Computer Vision

Credits: 3
Study of computational models of visual perception and their implementation in computer systems. Topics include early visual processing, edge detection, segmentation, intrinsic images, image modeling, representation of visual knowledge, and image understanding.
Prerequisites
CS 580 and 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 683 - Parallel Algorithms

Credits: 3
Examines design and analysis of parallel algorithms. Material focuses on algorithms for both theoretical and practical models of parallel computation. Considers algorithm design and analysis for PRAM and existing SIMD and MIMD type architectures. Topics include sorting, graph algorithms, numerical algorithms, and computational complexity.

Prerequisites
CS 583; CS 635 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 684 - Graph Algorithms

Credits: 3
Data structures and analytical techniques to study graph algorithms. Data structures include disjoint sets, heaps, and dynamic trees. Algorithms include minimum spanning trees, shortest path, maximum flow, and graph planarity.

Prerequisites
CS 583.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 685 - Intelligent Systems for Robots

Credits: 3
Reviews developments in intelligent autonomous systems. Studies applications of artificial intelligence, computer vision, and machine learning to robotics. Topics include analysis and design of algorithms and architectures for planning, navigation, sensory data understanding, sensor fusion, spatial reasoning, motion control, knowledge acquisition, learning concepts and procedures, self-organization, and adaptation to environment.

Prerequisites
One of CS 580, ECE 650, SYST 611 or 555, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**CS 686 - Image Processing and Applications**

Credits: 3  
Concepts and techniques in image processing. Discusses methods for image capture, transformation, enhancement, restoration, and encoding. Students complete projects involving naturally occurring images.

**Prerequisites**  
CS 583 and either STAT 344 or MATH 351, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 687 - Advanced Artificial Intelligence**

Credits: 3  
Explores foundational issues of artificial intelligence, such as roles of knowledge and search, formalization of knowledge and inference, and symbolic versus emergent approaches to intelligence. Studies advanced programming techniques for artificial intelligence, relationship to foundational issues, and important application areas for artificial intelligence.

**Prerequisites**  
CS 580.

**Notes**  
Major programming project required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 688 - Pattern Recognition**

Credits: 3  
Explores statistical pattern recognition and neural networks. Pattern recognition topics include Bayesian classification and decision theory, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, dimensionality reduction, feature extraction and selection, mixture models and EM, and vector quantization and clustering. Neural networks topics include feed-forward networks and back-propagation, self-organization feature maps, and radial basis functions. Course emphasizes experimental design, applications, and performance evaluation.

Equivalent to IT 688

**Prerequisites**  
CS 580 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CS 689 - Planning Motions of Robots and Molecules**
Credits: 3
This course covers topics from artificial intelligence, algorithms and databases. It presents algorithms that model and simulate physical and biological systems. The course will focus on motion-planning algorithms for robotic systems in the presence of obstacles. Simple deterministic and sampling-based approaches to motion planning will be covered. Advanced planning methods including planning with kinematics and dynamic constraints will also be presented. Selected topics will include sensor-based motion planning, manipulation planning, assembly planning, planning under uncertainty and robotics-inspired methods to compute functionally-relevant motions of molecular chains.

Prerequisites
CS 583

Hours of Lecture or Seminar per week: 3
When Offered: Fall

CS 695 - Topics in Computer Science

Credits: 3
Special topics in computer science not occurring in regular computer science sequence.

Prerequisites
Completion of two core courses, and permission of instructor.

Notes
May be repeated for credit when subject distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 697 - Independent Reading and Research

Credits: 1-3
In areas of importance but insufficient demand to justify a regular course, students may undertake a course of study under supervision of consenting faculty member. Students usually submit written statement of course content and tentative reading list as part of request for approval. Literature review, project report, or other written product usually required.

Prerequisites
Graduate standing; completion of at least two of core courses CS 540, 571, 580, and 583; and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 700 - Quantitative Methods and Experimental Design in Computer Science

Credits: 3
Integrated treatment to models and practices of experimental computer science. Topics include scientific methods applied to computing, workload characterization, forecasting of performance and quality metrics of systems, uses of analytic and simulation models, design of experiments, interpretation and presentation of experimental results, hypothesis testing, and statistical analyses
of data. Involves one or more large-scale projects.

**Prerequisites**
STAT 344, at least two 600-level courses in computer science, and doctoral status.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**CS 706 - Concurrent Software Systems**

Credits: 3
Topics include concurrent programming languages and constructs, and specification, design, verification, and validation of concurrent programs. Students required to solve concurrent programming problems and check solutions by using verification, testing, and debugging tools.

**Prerequisites**
CS 571 and SWE 621 or 631, or equivalent

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 719 - Scaling Technologies for E-business**

Credits: 3
Discusses, from quantitative point of view, characteristics of most important technologies used to support implementation of e-business sites. Includes topics such as hardware and software architectures of e-business sites, authentication, payment services, understanding customer behavior, workload characterization, scalability analysis, and performance prediction.

Equivalent to IT 809

**Prerequisites**
At least one operating system and one networking course, and admission to VSITE doctoral program.

**Notes**
Term paper and project required.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**CS 735 - Concurrency**

Credits: 3
Studies techniques, tools for specifying and verifying concurrent and distributed programs. Topics may include model checking, temporal logic, process algebra, and test generation. Automated verification tools used to specify and verify concurrent programs.

**Prerequisites**
CS 635 or 706, or equivalent.
**CS 750 - Theory and Applications of Data Mining**

Credits: 3  
Concepts and techniques in data mining and multidisciplinary applications. Topics include databases; data cleaning and transformation; concept description; association and correlation rules; data classification and predictive modeling; performance analysis and scalability; data mining in advanced database systems, including text, audio, and images; and emerging themes and future challenges.

**Prerequisites**  
CS 688 or permission of instructor.

**Notes**  
Term project and topical review required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 752 - Interactive Graphics Software**

Credits: 3  
Advanced graphics methods and tools. Topics include visualization, modeling, rendering, animation, simulation, virtual reality, graphics software tools, and current research topics.

**Prerequisites**  
CS 652 and 583.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 753 - Parallel Computation**

Credits: 3  
Covers topics illustrating contemporary thinking on architectures, application, development environments, algorithms, operating systems, language requirements, and performance.

**Prerequisites**  
CS 635 or CSI 801.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
CS 755 - Advanced Computer Networks

Credits: 3
Current and emerging issues in advanced computer networks and applications. Topics include software systems associated with packet and cell-switched networking architectures and protocols, high-performance LANs, scheduling and congestion control, mobile networking, multimedia applications, and next generation of Internet.

Prerequisites
CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 756 - Performance Analysis of Computer Networks

Credits: 3
Analytical and simulation techniques for modeling and analyzing computer networks. Examines elementary queuing analysis; networks of queues; routing and flow controls; and applications to local and wide area networks, Internet, and emerging networking technologies.

Prerequisites
CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 771 - Neural Networks

Credits: 3
Studies adaptive and competitive principles using distributed and parallel computation. Topics include background from statistics, control, adaptive signal processing, and neurosciences. Basic models, such as those suggested by Grossberg, Hopfield, and Kohonen, discussed in terms of analytical characteristics and applications. Neural networks assessed as universal approximators. Connections to fuzzy approach established through the Radial Basis Function approach. Presents applications to perception, knowledge-based systems, and robotics.

Equivalent to IT 817

Prerequisites
CS 688, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 773 - Real-Time Systems Design and Development
Credits: 3
Real-time systems and principles supporting design and implementation. Emphasizes fundamental results from real-time scheduling theory and relevance to computer system design. Topics include system design issues for real-time applications involving communication networks, operating systems, databases, and multimedia.

Prerequisites
CS 555 or CS 671 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 774 - Computational Vision

Credits: 3
Studies recent advances in development of machine vision algorithms and knowledge-based vision systems. Topics include scalespace; Gabor and wavelet processing; distributed and hierarchical processing using neural networks; motion analysis; active, functional, and selective perception; object and target recognition; expert systems; data fusion; and machine learning. Emphasizes system integration in terms of perception, control, action, and adaptation. Presents applications to robotics, intelligent highways, inspection, forensic, and data compression.

Equivalent to IT 835

Prerequisites
CS 682 and 686 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 775 - Advanced Pattern Recognition

Credits: 3
Covers statistical pattern recognition, neural network, and statistical learning theory approaches. Topics include decision theory and Bayes' theorem, density (parametric and nonparametric) estimation, linear and nonlinear discriminant analysis, SVM and kernel methods, SRM and model selection, performance evaluation, mixture of experts (AdaBoost), dimensionality reduction, feature selection and extraction, and clustering. Emphasizes experimental design, applications, and performance evaluation.

Prerequisites
CS 688 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 776 - Graphical Real-Time Simulation

Credits: 3
Current research in advanced computer graphics, and applications in realistic real-time simulations. Topics include physically based modeling, real-time simulation, distributed interactive simulation (DIS), network virtual environments (NVE), and virtual
reality (VR).

Equivalent to IT 852

**Prerequisites**
CS 652 or IT 875.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 777 - Human-Computer Intelligent Interaction**

Credits: 3  
Current and emerging issues in human-computer intelligent interaction, and human-centered systems and their applications.  
Topics include video processing, visualization, virtual environments, adaptation and tutoring, image and scene modeling, analysis and synthesis, face and gesture recognition, and speech and natural language processing.

**Prerequisites**
CS 580, and 652 or 682; or permission of instructor.

**Notes**
Term project and topical review required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**CS 779 - Topics in Resilient Computer Systems**

Credits: 3  
Course covers study of alternate computer security. It will explore how these can be combined in a layered defense and factors that affect the selection of the architectures. The course will review recent papers and reports.

**Prerequisites**
CS 571 and ISA 562 or permission of instructor.

**When Offered:** Fall

**CS 780 - Data Mining in Multimedia Databases**

Credits: 3  
This course covers advanced algorithms for data management, learning, and mining large multimedia databases. Issues related to handling such data including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability to large datasets are discussed. Mining techniques and data types to be covered include texts/web, images, videos, DNA, temporal, spatial, spatiotemporal databases, graph mining, stream mining, and data visualization.

Equivalent to INFS 780
Prerequisites
INFS 755 or CS 750 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 782 - Machine Learning

Credits: 3
Surveys machine learning concerning development of intelligent adaptive systems that are able to improve through learning from input data or from their own problem-solving experience. Topics provide broad coverage of developments in machine learning, including basic learning strategies and multistrategy learning.

Prerequisites
CS 681, 687, or 688; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 785 - Knowledge Acquisition and Problem Solving

Credits: 3
Principles and major methods of basic stages of knowledge acquisition such as systematic elicitation of expert knowledge, knowledge base refinement, and knowledge base optimization in the context of general problem-solving methods. Includes case studies of successful knowledge acquisition and problem-solving systems, and projects involving development or application of knowledge acquisition tools for knowledge-based systems.

Prerequisites
CS 680, 681, or 687; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 787 - Decision Guidance Systems

Credits: 3
Decision-guidance systems support an iterative process of giving actionable recommendations to and extracting feedbacks from human decision-makers, with the goal of arriving at the best possible course of action. This course focuses on models, languages, algorithms and applications of Decision-Guidance Management Systems, used for fast development of decision-guidance applications.

Prerequisites
INFS 614 or CS 650 or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall
CS 795 - Advanced Topics in CS

Credits: 3
Advanced topics not occurring in regular sequence.

Prerequisites
Admission into computer science PhD program.

Notes
May be repeated for credit when subject differs. Satisfies MS breadth requirement only if explicitly stated in syllabus in given section. Only one such course should be used for breadth requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 798 - Project Seminar

Credits: 3
Master's degree candidates undertake a project using knowledge gained in MS program.

Prerequisites
18 credits applicable toward MS in computer science.

Notes
Topics chosen in consultation with advisor. Meets project or thesis requirement for MS in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 799 - Thesis

Credits: 1-6
Original or expository work evaluated by committee of three faculty members.

Prerequisites
18 credits applicable toward MS in computer science.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 800 - Computer Science Colloquium

Credits: 1
Students are required to attend colloquia including talks by distinguished speakers, faculty candidates, and Mason faculty.
Prerequisites
Admission to CS PhD program.

Notes
This course introduces PhD students to research topics in computer science. This course can be taken twice for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Students will receive a grade of satisfactory (S) or no credit (NC).

CS 803 - Doctoral Tutorial in Information Technology
Credits: 3
Individualized intensive study of information technology.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 811 - Research Topics in Machine Learning and Inference
Credits: 3
Presents unifying principles that underlie diverse methods, paradigms, and approaches to machine learning and inference. Reviews most known learning and inference systems, discusses strengths and limitations, and suggests most appropriate areas of application. Hands-on experience by experimenting with state-of-the-art learning and inference systems, and working on projects tailored to research interests.

Prerequisites
CS 680 or 681, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 818 - Topics in Computer Systems
Credits: 3
Discussion of current research topics in computer systems. Topics vary according to faculty interest. Possible topics include peer-to-peer computing, high-performance distributed computing, sensor and ad hoc networks, autonomic computing, virtualization, and web services and middleware.

Equivalent to IT 818

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 850 - Research Topics in Parallel Computation

Credits: 3
Discusses current research topics that vary according to student and faculty interest. Possible topics include formal models of concurrency, specification and design of parallel programming languages, logic programming in a parallel environment, and parallel distributed processing (neural networks).

Prerequisites
CS 815.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 880 - Research Topics in Artificial Intelligence

Credits: 3
Special topics in artificial intelligence not occurring in regular computer science sequence.

Equivalent to IT 910

Notes
Requires substantial student participation. Subject matter may include continuation of existing 600- or 700-level courses in artificial intelligence or other topics. May be repeated for credit when subject matter differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CS 884 - Advanced Topics in Computer Vision and Robotics

Credits: 3
Covers recent developments. Topics motivated by applications to autonomous robotic systems, mobile robot navigation, multirobot systems, human-computer-environment interaction, image/video search and analysis, content discovery, and visual surveillance. Topics include 3D structure and motion recovery, motion understanding, map building and localization, object detection and recognition, and target tracking. Projects and experimental evaluation emphasized.

Equivalent to IT 940

Prerequisites
CS 682 or 685, or permission of instructor depending on topics offered.

Notes
Course may be repeated with change of topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CS 895 - Research Topics in CS

Credits: 3
Advanced topics not occurring in regular sequence.

Prerequisites
Admission into computer science PhD program, or permission of instructor.

Notes
May be repeated for credit when subject differs. Only one such course should be used for breadth requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CS 990 - Dissertation Topic Presentation

Credits: 1
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty.

Equivalent to IT 990

Prerequisites
Completion of all course requirements for PhD, or permission of instructor.

Notes
May be repeated with change of research topic, but credit toward doctoral degree is given once.

CS 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CS 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member in computer science.
Notes
May be repeated as needed. No more than 24 credits of CS 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Conflict Analysis and Resolution

CONF 101 - Conflict and Our World

Credits: 3
Brief history of field, survey of key conflict resolution themes and theories, and intervention methods. Overview includes general factors of conflict and its resolution; and nature of conflict in interpersonal, group, organizational, and international situations.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 202 - Dialogue and Difference

Credits: 3
Students will gain an understanding of the challenges of communicating across differences and the skills required to communicate effectively. Students will engage in preparing and analyzing communication strategies and over the term will participate in a dialogue group that explores the meaning and experience of difference on the Mason campus.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 240 - Social Dynamics of Terrorism, Security, and Justice

Credits: 3
Terrorism is a significant factor in conflict worldwide, yet the underlying causes and conditions that give rise to terrorist activity are often misunderstood and misrepresented. Through case studies of terrorist groups around the world, students are presented with an analytic framework to account for terrorist acts and organizations. Explores the various social dynamics underlying the development of terrorism and responses to it. Topics include, but are not limited to, defining terrorism, recruitment into violent groups, dynamics of terrorist organizations, counter-terrorism and human rights concerns, the role of religious and political ideologies in terrorism and counter-terrorism, media coverage of terrorism, and effects of terrorism on social structures and processes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 300 - Conflict Resolution Techniques and Practice

Credits: 3
Advanced consideration of CONF 101 topics, introduction of core notion of reflective practice, conflict resolution techniques, practice, third party roles, and ethics.

Prerequisites
CONF 101 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 301 - Research and Inquiry in Conflict Resolution

Credits: 3
Introduces social science research methods at undergraduate level. Covers basic epistemology of social research, including quantitative and qualitative methods, emphasizing participatory action research, and evaluation and assessment work.

Prerequisites
CONF 101 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 302 - Identity Conflicts and their Resolution

Credits: 3
Covers deeply rooted, intractable, or protracted social conflicts around core issues of identity, including race, ethnicity, religion, and nationalism. Explores cultural, symbolic, and discursive approaches to identity conflict.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 320 - Interpersonal Conflict Analysis and Resolution

Credits: 3
Covers conflict at micro level, introducing theories drawn from various disciplines including psychology, anthropology, and conflict resolution. Uses readings, case studies, and role plays to develop ability to analyze and intervene in interpersonal conflicts. Also prepares for further course work for interpersonal conflict concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CONF 330 - Community, Group, and Organizational Conflict Analysis and Resolution

Credits: 3
Covers conflict at mezzo level, introducing theories of social harmony and conflict, drawing on sociology, social psychology, community psychology, organizational psychology, administration of justice, philosophy, and conflict resolution. Uses case studies, class presentations, and group projects to develop ability to analyze conflict and make recommendations for change. Also prepares for further course work for community and organizational conflict concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 331 - Simulation in Community and Organizational Conflict Resolution

Credits: 1
Building on the theories and concepts presented in CONF 330, this laboratory/simulation class focuses on the practice of group and community conflict. Through intensive simulations using conflict cases, students will have the opportunity to practice conflict resolution skills such as dialogue, problem solving, mediation and negotiation and gain a practical understanding of third party roles and intervention strategies in community, group and organizational settings.

Hours of Lab or Studio per week: 15
When Offered: Fall, Spring

CONF 340 - Global Conflict Analysis and Resolution

Credits: 3
Covers conflict at macro level, introducing theories of international and global violence and conflict, drawing from disciplines of international relations, political science, intercultural communication, and conflict resolution. Covers impact of globalization and structural causes of conflict. Uses class discussions, case studies, and final paper to develop analytical skills to help in analysis of conflict. Prepares for further course work for international conflict concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 341 - Global Conflict Resolution Practice

Credits: 1
Focuses primarily on global conflict resolution practice. Using the methodologies of dialogue, problem-solving, and intensive simulation, students will increase their theoretical and practical understanding of peace making, peace building, and transformation processes within a specific international case.

Corequisite
CONF 340 or permission of instructor

Hours of Lecture or Seminar per week: 3
CONF 375 - Special Programs Field Experience

Credits: 1-6
Learning experience in the application of conflict analysis and resolution (CAR) skills in special program settings. Provides supervised practice in CAR techniques, leadership, program implementation, and strategies to facilitate conflict resolution in educational institutions or community settings.

Prerequisites
Permission of instructor and director, controlled enrollment form required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CONF 385 - International Field Experience

Credits: 3
Investigates conflict theory through international field experience including participation in formally organized course offered by Center for Global Education or another form of international field experience approved by program director.

Prerequisites
CONF 101, and permission of instructor

Notes
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 393 - Philosophy, Conflict Theory, and Violence

Credits: 3
Examines causes, sources, and origins of group violence with particular attention to group violence of ethnicity conflict. Explores alternative proposals that explain why violence becomes primary, or at least viable, form of revolving conflict in some societies.

Prerequisites
CONF 101 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 399 - Special Topics in Conflict Analysis and Resolution

Credits: 3
Examines selected topics relating to analysis or resolution of conflict. Topics vary but may include historical examination of conflict, social issues stemming from conflict, ethical issues in intervention, globalization, human rights, sources of conflict, or relationship of particular identity domains to conflict.
CONF 490 - Integration

Credits: 3
Capstone course in which students reflect on what they have learned, integrating knowledge from course work and synthesizing it to a cogent body of knowledge. Includes class discussion and final project that demonstrates understanding of conflict theory and reflective practice.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
CONF 101 and degree status; or permission of instructor

CONF 495 - Organizations and Actors in the Conflict Field

Credits: 3
This seminar acquaints students with the work of professionals in the conflict field through lectures, guest speakers, and field trips to organizations and institutions located in the region. Topics will vary and may include the role and structure of nongovernmental organizations engaged in conflict resolution, the ethical challenges facing conflict practitioners, and the translation of theoretical concepts into practical action.

CONF 499 - Independent Research in Conflict Analysis and Resolution

Credits: 1-6
Readings and research conducted on individual basis in consultation with instructor.

Prerequisites
CONF 101 and permission of instructor.

Notes
Student may not present more than 3 credits for graduation credit.
CONF 501 - Introduction to Conflict Analysis and Resolution

Credits: 3
Prerequisite or corequisite for all MS CONF majors. Introduces field of conflict analysis and resolution. Examines definitions of conflict and diverse views of its "resolution." Explores thinking about human behavior, and social systems as they relate to origins of conflict and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Prerequisites
CONF 501

Notes
Permission of instructor not required for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 502 - Intensive Introduction to Conflict Analysis and Resolution

Credits: 3
Introduces field of conflict analysis and resolution. Examines the origins of social conflict, the practices and strategies for responding to conflict, and frameworks for constructive intervention. Considers interpersonal, community, and large-scale intergroup conflict.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 595 - Selected Topics

Credits: 1-3
Topics vary each semester and are announced each academic year.

Prerequisites
CONF 501.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 601 - Theories of Conflict and Conflict Resolution

Credits: 3
Examines major theories of conflict causation and motivation. Emphasizes need for theories to inform processes of conflict resolution. Weaves together ideas from conventional disciplines with new approaches, especially with regard to causes and methods of resolving deep-rooted conflict.
**CONF 610 - Philosophy and Methods of Conflict Research**

Credits: 3  
Introduces students to the philosophies behind social science research and the methods for conducting research in the field of conflict resolution. Focuses on the identification of research problems associated with particular conflict situations, selection of appropriate research methods, and the design of effective research projects.

**Prerequisites**  
CONF 501 or 801

**CONF 611 - MS Research II**

Credits: 3  
Guides students through design, execution, interpretation, analysis, presentation, and evaluation of field research in conflict and resolution.

**Prerequisites**  
CONF 501 and 610

**Notes**  
Builds on CONF 610.

**CONF 642 - Integration of Theory and Practice**

Credits: 3  
Taken in last semester of master's student course work. Assists in developing students' own theories of conflict and conflict resolution by reviewing and integrating prior course work. Students expected to demonstrate holistic comprehension by writing major essay of publishable quality.

**Prerequisites**  
CONF 501, 601, 610, 713

**Corequisite**  
CONF 501, 601, 610, 713
CONF 650 - Conflict Analysis and Resolution Advanced Skills

Credits: 3
Introduces innovative practices and provides structure to reflect on and improve ability to work within conflict settings. Considers the intersection of theory and practice, with special attention to the challenges of translation, adaptation, and transfer of skills and models.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

CONF 651 - Conflict Analysis and Resolution for Collaborative Leadership in Community Planning

Credits: 3
Covers designing collaborative processes to work with diverse stakeholders to build meaningful and lasting shared agreements. Considers applications in land use, development, or other community planning contexts.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

CONF 652 - Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts

Credits: 3
Considers conflict analysis and resolution approaches to designing, implementing, and evaluating holistic cross-sectoral, conflict-sensitive initiatives in areas of potential violence and postconflict reconstruction and stabilization contexts.

Prerequisites
CONF 501 or 502
Corequisite
CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 653 - World Religions, Diplomacy, and Conflict Resolution

Credits: 3
Analyzes ways world religions play role in conflicts, war, diplomacy, peace making, and conflict resolution.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 656 - Integrating Complementary Approaches in Conflict Analysis and Resolution

Credits: 3
Considers designs and methods for conflict analysis and resolution that integrate multiple approaches, stakeholders, and methods. Applies to social conflicts in local and international contexts.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 657 - Facilitation Skills

Credits: 3
Covers range of skills in group facilitation processes, with emphasis on conflict analysis and resolution approaches to improve group communication. Includes skill-building exercises.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502
CONF 658 - Diversity and Difference in Conflict Analysis and Resolution

Credits: 3
Covers elements of cultural diversity, understanding, and awareness, as well as creative ways of approaching issues of diversity, identity, worldviews, and territory. Considers individuals, organizations, communities and nations.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

CONF 659 - Leadership in Conflict Analysis and Resolution

Credits: 3
Covers roles and styles of leadership in interpersonal, organizational, community, group, and international conflicts. Considers cultural roles of leaders as insider-partials, negotiators, facilitators, and mediators.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502

CONF 660 - Conflict Assessment and Program Evaluation

Credits: 3
Covers assessment methods appropriate to conflict contexts, and related evaluation approaches and techniques for use in areas of peace building, community processes, or interpersonal conflict.

Prerequisites
CONF 501 or 502

Corequisite
CONF 501 or 502
CONF 665 - Special Topics in Conflict Analysis and Resolution

Credits: 3
In-depth study of contemporary areas of conflict resolution practice.

Prerequisites
CONF 502 or permission of the instructor

Notes
Fulfills elective requirement for certificate program. Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 668 - Applied Integration for Graduate Certificates

Credits: 3
Capstone course facilitating integration of learning in the graduate certificate programs, and appropriate mentored application and experiential learning.

Prerequisites
CONF 501 or 502; CONF 660; and CONF 650,651,652 or 653

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 682 - Principles of Environmental Conflict Resolution

Credits: 3
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Equivalent to EVPP 682

Prerequisites
CONF 501, 502, EVPP 607 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 683 - Environmental Conflict Resolution and Collaboration: Situation Assessment, Process Design and Best Practices
Credits: 3
Explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Equivalent to EVPP 683

Prerequisites
CONF 682/EVPP 682 or permission of instructor

Hours of Lecture or Seminar per week: 3

CONF 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3
Capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to EVPP 684

Prerequisites
CONF 682/EVPP 682, CONF 683/EVPP 683

Hours of Lecture or Seminar per week: 3

CONF 690 - Practicum in Conflict Analysis and Resolution

Credits: 3
In-depth field study of ongoing conflict situations, and design and delivery of intervention processes to manage or resolve conflicts.

Prerequisites
CONF 501 or 801, and 713

Notes
Two semesters, 3 credits per semester.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5

CONF 694 - Internship

Credits: 1-6
Students are expected to mesh theory and practice through observation and experience. Includes comprehensive report analyzing
experiences. For 3 credits of internship students must complete 160 hours of work on site. Students must receive permission of the Internship Coordinator prior to registering.

**Prerequisites**
21 credits, including CONF 713

**Notes**
Under direction of internship coordinator, students spend at least 160 hours on project involving study, resolution of conflict for each 3-credit internship.

**CONF 695 - Selected Topics**

Credits: 3
Topics vary; they are announced each academic year.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 697 - Directed Reading**

Credits: 1-3
Independent reading at master's level on specific topic related to conflict analysis and resolution, as agreed to by student and faculty member.

**Notes**
May be repeated up to 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1-3

**CONF 701 - Theories of Social Harmony**

Credits: 3
Explores theories that define and explain social harmony and cooperation. Examines social institutions that manage and mediate conflict at all levels. Draws from major social science theorists from a variety of disciplines.

**Prerequisites**
CONF 501 or 801; CONF 601 recommended but not required

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
CONF 702 - Peace Studies

Credits: 3
Examines diverse meanings of peace, conflict, and violence, and then reviews different issues relevant to understanding peace and conflict, including the sources of war, poverty and economic disparities, and ecological degradation. Other topics to be covered are peace keeping, peace building, sustainable development, ecological preservation, nonviolence, and peace movements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 703 - Conceptions of Practice

Credits: 3
Provides framework for integrating theory and practice in conflict resolution. Reviews types of practice and theories of intervention and change, discusses analytic process of assessment and diagnosis before intervention. Considers how research can be incorporated into practice and how thoughtful practice generates research questions. Includes methods of program evaluation and action research. Students encouraged to identify, develop their own theories.

Prerequisites
CONF 501, 601, 713.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 708 - Identity and Conflict

Credits: 3
Explores complex interrelations of social identity and postmodern conflicts in society. Emphasizes the role of identity in processes of conflict resolution and transformation. Critical rethinking of ethnic, national, and religious identities as both generators and outcomes of conflict are an important part of the course. Extends knowledge on structure and dynamics of identity-based conflicts and develops a framework for their resolution. Course includes lectures, simulations, and case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 709 - War, Violence, and Conflict Resolution

Credits: 3
Considers various theories, causes, and conditions of violence, and applies them to variety of cases: family abuse, religious and ethnic violence, terrorism, revolution, and warfare. Applies insights from study of initiation, escalation, management, resolution, and prevention of violence to theories about resolving deep rooted conflicts.

Prerequisites
CONF 501 or 801
CONF 711 - The Conventions of Statistical Methodology

Credits: 3
Introduces students to study design, data collection, and measurement. Teaches students how to identify research problems, and formulate research questions and hypotheses. Exposes students to various design strategies and provides a working knowledge of indicator construction, validity threats, and sampling techniques. Reviews a variety of approaches as exemplified by such topics as the experimental method, survey methodology, longitudinal/panel data/pooled data studies, and game theoretical approaches. Emphasis is placed on recognizing the relationship between theoretical and substantive questions; the methodology employed and the analytical strategies that are utilized. Focuses on developing the conceptual tools necessary to design and assess empirical research studies, and the technical and basic computer skills necessary to conduct statistical research.

CONF 713 - Reflective Practice in Interpersonal-Multiparty Conflicts

Credits: 3
Introductory skill-building course integrating conflict theory and practice using reflective practitioner model. Students learn necessary skills for third-party facilitation and mediation, including active listening, empathy, paraphrasing, reframing, and negotiation, in addition to analytical skills of problem solving and creation of transformational processes. Cases for practice focus on interpersonal and intergroup conflict.

Prerequisites
CONF 501 or 801

Corequisite
CONF 501 or 801

CONF 714 - Reflective Practice in Organizational or Community Conflict

Credits: 3
Moves from conflicts that are simply described to those with multilevel components, such as community and organizational conflicts. Expands skills acquired in CONF 713 by adding recording chronology, identifying roles played by various participants, observing turning points in process, and precisely stating agreed-on solution.

Prerequisites
CONF 501 or 801 and 713
CONF 715 - Reflective Practice in International Conflict and Civil Strife

Credits: 3
Continues study of resolution processes as applied to highly complex systems, especially where one party denies legitimacy of existing political authority. Considers third-party options for intervention in revolutionary and international conflicts, building communication and trust among parties, and implementing agreements.

Prerequisites
CONF 501, 713, and 714.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

CONF 720 - Ethnic and Cultural Factors in Conflict Resolution

Credits: 3
Examines the role culture plays in genesis, structuring, and resolution of processes of conflict within and between groups. Special attention to ethnicity and other subcultural markers of identity in complex social systems as generators and outcomes of conflict. Explores relevance of variables to success or failure of conflict resolution.

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 721 - Conflict and Race

Credits: 3
Addresses historic analyses of racial and ethnic identity conflicts and their resolution.

Equivalent to SOCI 523

Prerequisites
CONF 501 or 801

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 722 - Conflict and Religion

Credits: 3
Explores role of religious ideas, practices, and organizations in conflict, war, peace making, and conflict resolution.
**CONF 723 - Conflict and Gender**

Credits: 3  
Examines constructs of gender and conflict as they relate to critical analysis of theory and practice. Reviews feminist theories for contributions to social and conflict theories. Uses narratives to explore how gender, power dynamics interact in conflict.

**Prerequisites**  
CONF 501 or 801

**CONF 726 - Moral and Philosophical Foundations of Conflict**

Credits: 3  
Explores major historical and contemporary positions on the intellectual, moral, and religious foundations for analyzing and resolving conflict. Enhances critical abilities in metacritique, dialectics, and intellectual self-appropriation.

**Prerequisites**  
CONF 501 or 801

**CONF 727 - Cross-Cultural Analysis of Conflict**

Credits: 3  
Introduces techniques of participant observation and anthropological research. Provides insights into cross-cultural fieldwork experience, an important skill to facilitate working with groups outside own “worldview.” Highly recommended for students interested in understanding diverse groups and gaining insights into world views and values held by different people.

**Prerequisites**  
CONF 501 or 801

**CONF 728 - Human Rights Theory and Practice in Comparative Perspective**
Introduces major controversies and debates surrounding use of human rights theory and practice cross-culturally. After basic study of human rights philosophy, uses case studies from around the world to examine problems and potential of human rights in today's globalized world.

**Prerequisites**
CONF 501 or 801, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 729 - Approaches to Violence**

Credits: 3  
Explores violence from variety of intellectual and political perspectives. Readings are wide-ranging and interdisciplinary, addressing levels of analysis from biological to nation-state and transnational processes.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 730 - Structural Sources of Conflict**

Credits: 3  
Examines how structures and institutions affect behavior and give rise to conflictual relationships at all social levels, from interpersonal to the international. Explores role of conflict resolution as political process providing opportunities for nonviolent system change.

**Prerequisites**
CONF 501 or 801, and 601 for MS; or 803 for PhD

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**CONF 731 - Conflict in Organizations**

Credits: 3  
Explores intersection and dynamics of organizational behavior and dimensions of conflict. Involves theoretical perspectives and cases examining conflict analysis and resolution. Practices strategies for prevention and intervention. Field research in greater metropolitan area integrates course content.

**Prerequisites**
CONF 501 or 801
CONF 732 - Conflict in Development

Credits: 3
Examines the relationship between processes of political and economic change and conflict; the relationship between democratization and conflict; the relationship between structural adjustment policies and conflict; and the challenges of postconflict reconstruction.

Prerequisites
CONF 501 or 801

CONF 733 - Law and Justice from a Conflict Perspective

Credits: 3
Contrasts legal processes and institutions with alternative approaches to dispute resolution. Defines and distinguishes among law, "alternative dispute resolution," and problem-solving analysis as methods for resolving rather than controlling conflict. Examines to what extent legal procedures are truly applicable to resolving deep-rooted conflict.

Prerequisites
CONF 501 or 801

CONF 735 - Global Context of Conflict

Credits: 3
Advances skills and knowledge base in critical analysis and creative problem-solving. Examines root causes of conflict in global context in terms of gender inequality, cultural differences, unequal North and South relations, militarism, economic oppression, genocide, maldevelopment, religious and ethnic struggles, and environmental scarcity. Students develop their own conceptual tool boxes to analyze conflicts in different parts of the world.

Prerequisites
CONF 501 or 801

CONF 736 - Globalization and International Conflict
Credits: 3
Explores economic, political, social, and cultural meanings of globalization; how they affect conflict processes at international level; and when and under what conditions globalization promotes cooperation or conflict.

Prerequisites
CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 738 - Researching Conflict in Health Systems

Credits: 3
Capstone seminar; final course in graduate certificate program in conflict resolution for health professionals. Involves conducting research and analyzing specific conflict situation in depth. Builds on theory, research, and practice learned in previous courses for this certificate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 739 - Collective Action, Social Movements, and Globalization

Credits: 3
Explores how people translate underlying grievances into collective action. Examines how groups organize, frame, and develop strategies and tactics to pursue agendas, and how processes of globalization have influenced social movement dynamics.

Prerequisites
CONF 501 or 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 740 - Conflict Roles, Resources, and Ethics

Credits: 3
Analyzes and critiques nature and roles in conflicts. Uses theoretical perspectives, case histories to understand how settings affect roles. Includes ethical assessment of interventions in variety of conflict settings.

Prerequisites
CONF 501 or 801, 713

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 741 - Negotiations
Credits: 3
Uses negotiating experiences to construct framework for thinking about and analyzing negotiation processes. Framework then used to organize review of research literature on rhythms and patterns of negotiation, and to analyze actual cases. Interweaves exercises, class projects with state-of-the-art concepts and findings.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 743 - Dynamics of Conflict Termination**

Credits: 3
Investigates a number of themes relating to war termination with an emphasis on contemporary civil wars. Considers the nature of civil war, focuses attention on a number of contemporary cases, raises questions relating to settlement and series of themes relating to peace implementation and peace building.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 745 - Leadership Roles in Conflict and Conflict Resolution**

Credits: 3
Leadership responses to conflict are affected by several variables, including race, ethnicity, and gender. Explores roles of leadership decision-making styles as agents of conflict across range of conflict scenarios at interpersonal, community, organizational, and international levels.

**Prerequisites**
CONF 501 or 801

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 746 - Peace Building**

Credits: 3
Building on initiatives of United Nations and other multilateral organizations, explores dynamics of post-conflict peace building. Prepares students of conflict resolution to play innovative roles in reconstruction of civil societies.

**Prerequisites**
CONF 501 or 801
CONF 747 - Reconciliation

Credits: 3
Explores processes of acknowledgment, reconciliation, forgiveness, and restitution. Reviews literature, case studies, and other research to assess applicability and impact of these efforts.

Prerequisites
CONF 501 or 801

CONF 748 - Comparative Peace Processes

Credits: 3
Compares case studies drawn from actual peace processes, both successful and unsuccessful, to illuminate principles and complexities.

Prerequisites
CONF 501 or 801, and 601 or 803.

CONF 749 - World Religions, Violence, and Conflict Resolution

Credits: 3
Examines how world religions play a role in conflict and conflict resolution. Investigates how values, world view, and hermeneutics influence strategies for successful conflict interventions.

Prerequisites
CONF 501 or 801

CONF 750 - Evaluation of Conflict Resolution Initiatives

Credits: 3
Examination of models and methodologies for evaluation of conflict resolution initiatives. Evaluation approaches taught will include action evaluation, program evaluation, formative evaluation, and summative evaluation. Students will be expected to
complete an evaluation design for an actual conflict resolution-related initiative as the major course requirement and participate in the class evaluation project.

**Prerequisites**
CONF 501 or 801.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CONF 795 - Professional Development Seminars**

Credits: 1-2
These 1- and 2-credit courses are scheduled non-conventionally using weekends, concentrated presentations, and intersession periods to develop advanced professional skills. Possible topics include marketing conflict resolution services, academic course design, training design, mediation, facilitation, family practice, fundraising, writing for publication, advanced field research techniques, and grassroots applications of conflict resolution.

**Prerequisites**
CONF 501 or 801

**Notes**
May be repeated.

**Hours of Lecture or Seminar per week:** 1-3
**Hours of Lab or Studio per week:** 0

**CONF 797 - Proposal Development**

Credits: 1
Covers development of research proposal for master’s thesis, including framing a question, literature review, and designing appropriate methodology. Students form master’s thesis committee and review Human Subjects Review Board’s guidelines and procedures.

**Corequisite**
CONF 501 and 610

**Hours of Lecture or Seminar per week:** 1
**Grading:** Satisfactory/No Credit
**When Offered:** Fall and Spring

**CONF 799 - Master’s Thesis**

Credits: 1-3
Two semesters, usually taken as 3 credits per semester. Original research or analysis under direction of thesis committee.

**Prerequisites**
CONF 801 - Introduction to Conflict Analysis and Resolution

Credits: 3
Introduces field of conflict analysis and resolution for doctoral students. Examines definitions of conflict and diverse views of resolution. Explores thinking about human behavior and social systems as they relate to origins and role of conflict in violent and peaceful social change. Considers appropriate responses to conflict at interpersonal, intergroup, industrial, communal, and international levels.

Notes
Prerequisite or corequisite for all PhD CONF students

CONF 802 - Theories of the Person

Credits: 3
Understanding human conflict requires knowledge of human behavior, motivation, and perception. Reviews and critically analyzes several psychological theories for application to conflict analysis and resolution theory and practice.

Prerequisites
CONF 801

Corequisite
CONF 801

CONF 803 - Structural Theories

Credits: 3
Understanding social conflict and potential for conflict resolution requires that both conflict and cooperation be perceived in relation to patterns of social change. Course reviews and critiques significant theories of social change to establish a basis for creative conflict analysis and resolution.

Prerequisites
CONF 801.
CONF 804 - Alternate Theoretical Foundations

Credits: 3
Familiarizes students with the ideas generated by the Frankfurt School of social theorists and others who have extended or altered these ideas. Students will use these insights to deepen an understanding of serious social conflicts and to explore the implications of critical theories for conflict resolution processes.

Corequisite
CONF 801

Hours of Lecture or Seminar per week: 3

CONF 811 - Quantitative Foundations

Credits: 3
Building on logic of inquiry, introduces steps in research process to prepare dissertation and implement published research. Covers wide array of quantitative research approaches in social sciences, with emphasis on conflict analysis.

Prerequisites
CONF 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 812 - Qualitative Foundations: Social Sciences

Credits: 3
Continuation of steps in research process to prepare dissertation and implement published research. Builds on CONF 811 by examining qualitative research approaches used in social sciences, with emphasis on conflict analysis.

Prerequisites
CONF 801.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 813 - Qualitative Foundations: Humanities

Credits: 3
Explores qualitative research design as it pertains to the humanities, including the methods and epistemology behind the various issues likely to emerge in the process of conducting research. In addition to material on research design and methodology, reading assignments include several monographs that employ different qualitative methodologies.

Prerequisites
CONF 801

Corequisite
CONF 801

Hours of Lecture or Seminar per week: 3

CONF 890 - Practicum in Conflict Analysis and Resolution

Credits: 3
In-depth field study of ongoing conflict situations. Design and delivery of intervention processes to manage or resolve conflicts.

Prerequisites
CONF 801 and 713.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 5

CONF 897 - Directed Reading

Credits: 1-3
Independent reading at doctoral level on a specific topic related to conflict and conflict resolution as agreed to by student and faculty member.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 900 - Integrating Theory, Practice, and Method in Conflict Analysis

Credits: 3
Analyzes theoretical basis undergirding methods of research in conflict resolution. Explores how theory is built through reciprocal influence of research and practice. Assists students to fill in gaps in their knowledge and prepare for comprehensive examinations. Prepares students to write integrated research proposals.

Prerequisites
CONF 801 and 802, and at least 9 additional credits of required doctoral courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONF 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for doctoral dissertation.
Prerequisites
Successful completion of all course work and doctoral qualifying exams

Notes
May be repeated.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

CONF 999 - Doctoral Dissertation Research

Credits: 1-12
Research on approved dissertation topic under direction of committee. Student's dissertation proposal must be approved before registering for 999.

Notes
At least 12 credits of 998 and 999 must be accumulated towards degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-12

Conservation Studies

CONS 320 - Conservation in Practice

Credits: 3
Work with a conservation mentor in a practicum experience. Create a portfolio documenting professional development.

Prerequisites
60 credits and college level coursework in the biological or environmental sciences.

Notes
Must be taken concurrently with CONS 401, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CONS 401 - Conservation Theory

Credits: 3
Introduces the field of conservation biology and science-based management of threatened wildlife and habitats. Provides
theoretical background for understanding the importance of biodiversity conservation and climate change and its potential impacts on conservation.

**Prerequisites**

60 credits and college level coursework in the biological or environmental sciences.

**Notes**

Must be taken concurrently with CONS 320, CONS 402, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester. Students cannot get credit for this course and Biology 318 or NCLC 401.

**CONS 402 - Applied Conservation**

Credits: 4

An applied scientific approach to the nature of biodiversity and species loss. Covers reproductive physiology, semen collection and preservation, non-invasive endocrine analysis, and biodiversity monitoring techniques.

**Prerequisites**

60 credits and college level coursework in the biological or environmental sciences.

**Notes**

Must be taken concurrently with CONS 320, CONS 401, CONS 410, and CONS 490. Only offered through the Smithsonian-Mason Semester.

**CONS 410 - Human Dimensions in Conservation**

Credits: 3

Provides sociological and global perspectives on conservation issues including human wildlife interactions, environmental economics, public policy, environmental values and public opinion, ecological grief, community-based conflict resolution, and conservation ethics.

Satisfies General Education Requirement: Social and behavioral science

**Prerequisites**

60 credits and college level coursework in the biological or environmental sciences.

**Notes**

Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 490. Only offered through the Smithsonian-Mason Semester.
**CONS 420 - Human-Wildlife Conflict**

Credits: 3
Covers the impact of human-wildlife conflict on conservation efforts and human health and well being.

Notes
Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CONS 490 - Integrated Conservation Strategies**

Credits: 3
Integrates the course work of the Smithsonian-Mason Semester through study of current conservation issues. Students incorporate interdisciplinary aspects of conservation into a summative group case study on a chosen conservation issue and present formally before a faculty panel.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
60 credits and college level coursework in the biological or environmental sciences.

Notes
Must be taken concurrently with CONS 320, CONS 401, CONS 402, and CONS 410. Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**CONS 497 - Special Topics in Conservation**

Credits: 1-3
Topics of current relevance to the field of conservation.

Notes
Only offered through the Smithsonian-Mason Semester.

Hours of Lecture or Seminar per week: 1-3

**CONS 498 - Internship**

Credits: 1-3
Directed readings and final reflective paper or project in conjunction with an internship subject to instructor approval. Permission to enroll must be obtained from the Mason Center for Conservation
Studies at least two weeks prior to the start of the semester.

Notes
Only offered through the Smithsonian-Mason Semester.

**CONS 499 - Independent Study/Research**

Credits: 1-3
An independent project or directed exploration into an area of conservation not covered by other courses.

Prerequisites
Permission of instructor.

Notes
Only offered through the Smithsonian-Mason Semester.

**CONS 620 - Spatial Ecology, Geospatial Analysis & Remote Sensing for Conservation**

Credits: 3
Teaches students to use spatial ecology, geospatial analysis, and remote sensing tools to assess and model species distribution and habitat use in dynamic landscapes. Includes computer and field labs with examples using data from Smithsonian research.

Notes
Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

**CONS 625 - Experimental Design and Ecological Statistics**

Credits: 3
Provides an overview of experimental design and analysis techniques used in cutting-edge ecological research and conservation. Focuses on increasing knowledge of statistical tests, interpretation of results, and ability to disseminate and clearly explain these results. Students gain an overview of applied monitoring and analysis techniques such as distance sampling, genetic analysis, niche and species distribution modeling, and spatial analysis.

Prerequisites
Basic statistics course

Notes
Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.
approval of the graduate director of the student’s program.

**CONS 630 - Species Monitoring & Conservation**

Credits: 3
Explores monitoring and conservation research methods and approaches for specific taxa through lectures, case studies, lab exercises, and field work. Focuses on conservation science and conservation outreach techniques.

**Prerequisites**
A general biology (or relevant species-related) course and a statistics course, or permission of instructor. Prior coursework in environmental science, zoology, and ecology recommended.

**Notes**
May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

**CONS 660 - Effective Conservation Leadership**

Credits: 3
Teaches effective leadership and management through individual assignments and group exercises. Explores international environmental and conservation case studies, offers hands-on experience to help students develop their own leadership styles.

**Prerequisites**
Students should have a basic background in conservation, ecology, environmental sciences, or similar field.

**Notes**
Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

**CONS 665 - Conservation Conflict Resolution**

Credits: 3
Focuses on approaches to cultivating sustainable conservation solutions, including determining root causes of complex conflict dynamics, designing decision-making processes to address conflict, and building mutual respect and trust among stakeholders. Employing principles and strategies developed by the Human-Wildlife Conflict Collaboration (HWCC), students learn how to resolve current conservation conflicts, anticipate arising ones, and reconcile old conflicts that impede new progress.
Notes
Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 3

CONS 697 - Special Topics in Conservation

Credits: 1-3
Topics of current relevance to the field of conservation.

Notes
May be repeated for credit with approval of the Mason Center for Conservation Studies. A maximum of 6 credits may be applied to the Applied Conservation Science Certificate.

Offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute on site in Front Royal, VA. This course is not available to students pursuing a degree at George Mason without prior written approval of the graduate director of the student’s program.

Hours of Lecture or Seminar per week: 1-3

Counseling and Development

EDCD 500 - In-Service Educational Development

Credits: 1-6
Offered at request of school division or other educational agency.

Prerequisites
Employment in professional capacity by sponsoring division or agency.

Notes
Content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCD 525 - Advanced Human Growth and Development

Credits: 3
Covers human development throughout the life span, including emotional, physical, and cognitive development; and emphasizes
personal adjustment and achievement.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCD 597 - Special Topics in Education**

Credits: 1-6  
Provides advanced study on selected topic or emerging issue in American or international education.

**Prerequisites**
Admission to program in Graduate School of Education.

**Notes**
May be repeated for credit with GSE permission.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDCD 598 - Directed Reading, Research, and Individual Projects**

Credits: 1-6  
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

**Prerequisites**
Admission to degree program and permission of dean.

**Notes**
May be repeated for up to 12 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDCD 599 - Thesis**

Credits: 6  
Study of problem of significant interest to student using accepted research methods and under supervision of graduate faculty member.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

**EDCD 600 - Workshop in Education**
EDCD 601 - Introduction to Research in Counseling

Credits: 3
Enhances knowledge of and involvement in counseling research by introducing techniques and principles to design, implement, and evaluate research projects and program development in community and school settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 602 - Foundations in Counseling

Credits: 3
Emphasizes history of counseling; multifaceted role of counselors, professional organizations, and memberships; and APA style. Provides a thorough understanding of the CNDV Mission Statement, Mason's Honor Code and Professional Dispositions. Basic skills are briefly introduced and an orientation to multiculturalism and social justice is provided.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 603 - Counseling Theories and Practice

Credits: 3
Covers major theoretical approaches to counseling from a multicultural perspective and provides supervised introduction to basic skills.

Prerequisites
Admission to CNDV program; EDCD 602 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 604 - Assessment and Appraisal in Counseling

Credits: 3
Prepares students to become informed about psychological and educational tests and assessment procedures that are used and
applied in a counseling context.

Prerequisites
Admission to CNDV program, EDCD 525, and EDCD 601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 606 - Counseling Children and Adolescents

Credits: 4
Presents theories, techniques, and counseling issues relevant to children and adolescents. Counseling lab provides practice with an emphasis on process and culturally competent counseling strategies.

Prerequisites
Admission to CNDV program, EDCD 525 and EDCD 603

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

EDCD 608 - Group Processes and Analyses

Credits: 4
Presents theories appropriate to various types of groups and descriptions of group practices, methods, dynamics, and facilitative skills. Focuses on applying theory to practice. Includes lab.

Prerequisites
Admission to CNDV program, EDCD 603; and EDCD 606 or EDCD 609

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

EDCD 609 - Advanced Counseling Skills and Strategies

Credits: 4
Covers counseling skills and process, counselor self-awareness, and strategies associated with major counseling theories. A counseling lab provides skills practice with an emphasis on process and culturally competent counseling strategies.

Prerequisites
Admission to CNDV program, EDCD 525 and EDCD 603

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

EDCD 610 - Career and Educational Counseling
Credits: 3
Presents theories and counseling issues relevant to career counseling in schools and community agencies.

Prerequisites
Admission to CNDV program; EDCD 525; and EDCD 604 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 611 - Introduction to Ethical and Legal Issues in School Counseling

Credits: 2
Introduces principles, practices, and application of ethical and legal issues in school counseling.

Prerequisites
Admission to counseling and development program and EDCD 626

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDCD 618 - Principles and Practices of Counseling in International Schools

Credits: 3
Discusses philosophy, principles, and practices for effective international school counseling programs including leadership, advocacy, and program evaluation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 620 - Counseling Children and Adolescents in International Schools

Credits: 3
Discusses counseling international school students K-12 from developmental and multicultural perspectives.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 626 - Principles and Practices of School Counseling

Credits: 3
Introduces school counseling program development at K-12 levels. Presents philosophy, principles, and practices of effective school counseling.

Prerequisites
Admission to CNDV program, EDCD 602 (course may be taken concurrently).

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 628 - Counseling and Social Justice**

Credits: 3
Studies relationship between counseling and social justice, and theories, models, and strategies of social justice, social change, leadership, and advocacy in community and school settings. Emphasizes application of theories and models.

**Prerequisites**
Admission to CNDV program, EDCD 603, and EDCD 626 or EDCD 654.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 652 - Introduction to Substance Abuse Counseling**

Credits: 3
Introduces substance abuse counseling. Covers addiction issues, diagnosis and treatment planning, and individual and group counseling strategies with diverse populations.

**Prerequisites**
Admission to counseling and development program and EDCD 603

**Corequisite**
EDCD 603

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 654 - Counseling, Ethics, and Consultation in Community Agencies**

Credits: 3
Emphasizes types of services and facilities provided, needs and problems of client population served, role and function of counselor in agency setting, and personnel needs of the individual agency.

**Prerequisites**
Admission to counseling and development program and EDCD 603

**Corequisite**
EDCD 603

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
EDCD 656 - Diagnosis and Treatment Planning for Mental Health Professionals

Credits: 3
Reviews diagnostic criteria associated with mental illness, emphasizes the cultural component of mental illness, and helps students develop written plans and simulate implementation for overall diagnosis and treatment of clients and their families.

Prerequisites
Admission to CNDV program, EDCD 603 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 658 - Couples and Family Counseling

Credits: 3
Introduces major approaches to counseling couples and families. Uses case studies and simulations to facilitate transition from theory to practice.

Prerequisites
Admission to CNDV program; EDCD 603 (course may be taken concurrently).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 660 - Multicultural Counseling

Credits: 3
Covers counseling from a multicultural perspective. Explores counseling issues for diverse populations with a focus on ethnicity and race.

Prerequisites
Admission to CNDV program, EDCD 608.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCD 754 - Practicum in Counseling and Development

Credits: 3-6
Provides supervised practice in counseling setting similar to setting in which student may work. Weekly graduate class emphasizes site processing.

Prerequisites
Completion of CNDV program except for practicum and internship; permission of advisor; overall GPA of 3.00; no grade of C in
skills courses EDCD 605, 607, 608, and 610; and no more than two grades of C in any other graduate course work required by counseling and development program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

### EDCD 755 - Practicum in Counseling

**Credits:** 3  
Provides supervised practice for a minimum of 200 hours (for school counseling students) and 300 hours (for community agency students) in counseling setting similar to setting in which student may work.

**Prerequisites**
Completion of CNDV program course work except for EDCD 610 or 611 or electives (total credits cannot exceed 3 credits); permission of advisor; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606, 608, and 609; no more than two grades of C in any other graduate course work required by CNDV program.

**Notes**
Weekly graduate class emphasizes site processing.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

### EDCD 790 - Internship in Counseling and Development

**Credits:** 3-6  
Provides supervised practice in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

**Prerequisites**
Completion of CNDV program except for internship; permission of advisor; overall GPA of 3.00; no grade of C in any skills courses EDCD 605, 607, 608, 610, and 754; no more than two grades of C in any other graduate course work required by CNDV program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

### EDCD 791 - Internship in Counseling

**Credits:** 3  
Provides supervised practice for minimum of 200 hours (for school counseling students) and 300 hours (for community agency students) in counseling setting similar to setting in which student may work. Skills and practice build on previous practicum experiences. Weekly graduate class emphasizes site processing.

**Prerequisites**
Completion of CNDV program course work except for electives (total credits cannot exceed 3 credits) and internship; permission of advisor; overall GPA of 3.00; no grade lower than B in skills courses EDCD 603, 606, 608, 609; no more than two grades of C
in any other graduate course work required by CNDV program.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**EDCD 797 - Advanced Topics in Education**

Credits: 1-6  
See EDUC 797.

**Prerequisites**  
Admission to CNDV program or permission of instructor.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDCD 895 - Emerging Issues in Counseling and Development**

Credits: 3  
Examines issues in counseling profession, including counseling theory and methodology, development of client groups, new roles and settings for counselors, emerging assessment procedures, new understanding of diagnosis; and impact of societal changes on counseling profession.

**Prerequisites**  
Admission to PhD program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCD 896 - Advanced Multicultural Counseling**

Credits: 3  
Focuses on advanced issues in multicultural counseling, including multicultural counseling theories, skills, assessment, supervision, research, and ethics.

**Prerequisites**  
Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 660 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCD 897 - Advanced Group Counseling**
Credits: 3
For doctoral students who have had experience and training in group work. Provides greater understanding and advanced skill application in group dynamics, group process, and group leadership.

**Prerequisites**
Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 608 or equivalent, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 898 - Grant Writing and Publishing**

Credits: 3
Focuses on grant writing and publishing in counseling and psychology.

**Prerequisites**
Master's degree in counseling or related counseling field from accredited institution of higher education, EDCD 895, and admission to counseling and development PhD specialization; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 990 - Advanced Internship in Counseling Leadership**

Credits: 3
Provides supervised practice in counseling leadership setting or position. Emphasizes counseling leadership in practice.

**Prerequisites**
Admission to counseling and development PhD specialization, EDCD 895, and EDCD 628 or equivalent.

**Notes**
Biweekly class emphasizes site processing, leadership skills, and topical seminars.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDCD 991 - Advanced Internship in Multicultural Counseling**

Credits: 3
Provides supervised practice in multicultural training setting. Emphasizes intensive use of multicultural competencies in practice, supervision, and program development and evaluation in school and community agency settings. Biweekly class emphasizes site processing, leadership skills, and topical seminars.

**Prerequisites**
Admission to counseling and development PhD specialization; and EDCD 895, 896, and 628 or equivalent.
EDCD 992 - Advanced Internship in Social Justice

Credits: 3
Provides opportunities to implement programs and strategies to affect social justice for clients in school or community settings.

Prerequisites
Admission to counseling and development PhD specialization, EDCD 628 or equivalent, and EDCD 895.

Notes
Biweekly class emphasizes topical seminars and supervision.

Criminology

CRIM 100 - Introduction to Criminal Justice

Credits: 3
Overview of the American system of criminal justice, covering theories of justice, criminal law, policing, courts and associated pre and post-trial legal processes, punishment and corrections, and juvenile justice.

Equivalent to ADJ 100 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3

CRIM 300 - Research Methods and Analysis

Credits: 4
Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Students learn to use a broad range of evidence, including quantitative and qualitative information. Covers design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies.

Equivalent to ADJ 300 (2009-2010 Catalog)

Prerequisites
CRIM 100. Required for all CRIM majors.

Notes
Students are strongly encouraged to take CRIM 300 before or during the first semester of enrolling in 300-level courses
CRIM 301 - Public Law and the Judicial Process

Credits: 3
Covers American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Equivalent to ADJ 301 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 302 - Delinquency

Credits: 3
Presents theories of juvenile delinquency and societal reactions to it, gender differences in rates and types, historical overview, development of juvenile justice system, and critical assessment of juvenile justice and its alternative.

Equivalent to ADJ 302 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 303 - Experiencing the Criminal Justice System

Credits: 3
Experiential learning course designed to give preservice criminology students a firsthand, practical journey through the criminal justice process and system.

Equivalent to ADJ 303 (2009-2010 Catalog)

Prerequisites
CRIM 100; ENGL 101; COMM 100, 101, or 104; and 60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 304 - Computer Crime, Forensics, and Auditing
Credits: 3
Covers computer crime, relevant laws, agencies, standards, auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Hands-on experience with forensics tools.

Equivalent to IT 357; ADJ 304 (2009-2010 Catalog)

Prerequisites
IT 103 and 223.

Hours of Lecture or Seminar per week: 3

CRIM 305 - Crime and Crime Policy

Credits: 3
Explores and evaluates how crime is defined and measured, and examines crime patterns and trends. Provides an overview and critical assessment of the major theories of crime at the individual, neighborhood, and structural levels. Considers policies intended to reduce crime.

Equivalent to ADJ 305 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 306 - Criminal Justice Ethics

Credits: 3
Analyzes ethical principles relevant for those working in criminal justice.

Equivalent to ADJ 306 (2009-2010 Catalog)

Prerequisites
CRIM 100 and 60 credits.

Hours of Lecture or Seminar per week: 3

CRIM 307 - Social Inequality, Crime, and Justice

Credits: 3
Explores the significance of social inequality (especially race and gender inequality) for several crime and criminal justice issues. Examines the effect of gender and race on rates of criminal offending and victimization and explanations for the variation in offending and victimization.

Equivalent to ADJ 307 (2009-2010 Catalog)
Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 308 - Human Rights and Justice

Credits: 3
Studies the norms, laws, and systems for the promotion and protection of human rights. Provides a foundation for understanding historical, legal, political, economic, and ethical aspects of human rights. Examines ideological and cultural perspectives, sources of violations, the United Nations, regional and national mechanisms, special issues (e.g., women, torture, children, minorities), and the role of nongovernmental organizations.
Equivalent to ADJ 308 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 400 - Applied Criminal Psychology

Credits: 3
Uses overview of psychological and criminological theories to apply behavioral science theory to practical application in forensic settings. Focuses on analysis of various crime scenes and characteristics of offenders.
Equivalent to ADJ 400 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3

CRIM 401 - Policing in America

Credits: 3
Fundamental issues relevant to contemporary public policing in America: role and history of police; impact on crime, disorder, and other social problems; discretion and its control; moral hazards; police legitimacy and public support; police culture and the police organization; and community policing.
Equivalent to ADJ 401 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 402 - Punishment and Corrections
Credits: 3
Covers theories on forms of punishment systems; punishment and corrections as a product of historical, cultural, and political changes; differences by race and gender in punishment and corrections; problems of social control and violence in prisons; alternative rehabilitation; and community prevention strategies.

Equivalent to ADJ 402 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 403 - Community Corrections

Credits: 3
Studies the purposes and goals of community-based corrections and its various components, including pretrial diversion, probation, parole, and emerging alternatives to traditional incarceration. Addresses issues related to offenders returning to the community and critical issues facing jails, community corrections, and the management of offenders in community settings. Examines the role of community corrections within the broader correctional system.

Equivalent to ADJ 403 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 404 - Crime Victims and Victimization

Credits: 3
Explores experiences of crime victims, distribution of the risks of victimization, and causes and consequences of victimization. Also considers nature and influence of victim’s rights advocates.

Equivalent to ADJ 404 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 405 - Law and Justice around the World

Credits: 3
Comparative inquiry into the models of legal and justice systems around the world. Considers how social and legal norms are created, and how different societies exercise powers of social control. Evaluates justice models in action, including law and courts, policing, corrections, and juvenile justice.
CRIM 406 - Family Law and the Justice System

Credits: 3
Introduction to the elements of family law, and exploration of its influence on American social life and contemporary notions of justice. Topics include marriage and parenting, divorce, custody and support, nontraditional families, and domestic violence.

Equivalent to ADJ 406 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 407 - Law and Society

Credits: 3
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and relationship between law and social change. Considers different approaches to the study of law and society, and assesses methodologies.

Equivalent to ADJ 407 (2009-2010 Catalog)

Prerequisites
CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3

CRIM 408 - Criminal Courts

Credits: 3
Studies the workings, advantages, and frailties of criminal courts, and explores whether the system works effectively and efficiently.

Equivalent to ADJ 408 (2009-2010 Catalog)

Prerequisites
CRIM 100 or GOVT 301

Hours of Lecture or Seminar per week: 3
CRIM 409 - Community Policing

Credits: 3
Study of community policing, particularly in the United States. Covers history and development of community policing, community relations, problem solving, and issues of organizational change.

Equivalent to ADJ 409 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 422 - Controversial Legal Issues

Credits: 3
Focuses on the study of law as an institution that continuously interacts with other social institutions at the individual, community, state, and federal levels. Examines how constitutional and statutory laws are interpreted by the courts to determine and define the law through contemporary, controversial, legal issues. Explores how the courts, using the law, resolve today's most controversial issues.

Equivalent to ADJ 422 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3
Studies First Amendment freedoms of speech, press, assembly, association, and religion; the right to privacy; and Fourteenth Amendment right to equal protection.

Equivalent to ADJ 423 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 424 - Constitutional Law: Criminal Process and Right
Credits: 3
Studies constitutional law pertaining to the rights of the criminally accused from investigation and evidence through attorney, trial, and punishment stages at federal and state levels.

Equivalent to ADJ 424 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 425 - Criminal Justice Management

Credits: 3
Explains the management function for current and future criminal justice managers. Emphasizes communication, leadership skills, and organizational development.

Equivalent to ADJ 425 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 460 - Surveillance and Privacy in Contemporary Society

Credits: 3
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions conducting surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Equivalent to ADJ 460 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 461 - Introduction to Homeland Security

Credits: 3
Examines governmental actions designed to prevent, detect, respond to, and recover from acts of terrorism and national disasters. Focuses on efforts to align federal, state, local, tribal, private sector, and nongovernmental preparedness, incident management, and emergency response plans into the effective and efficient national structure necessary for the protection of the United States.

Equivalent to ADJ 461 (2009-2010 Catalog)
Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 462 - Law Enforcement and Homeland Security

Credits: 3
Examines the effect of 9/11 on law enforcement organizations in the United States and explores the evolving relationship between the military, federal, state, and local law enforcement agencies in the post-9/11 era. Emphasis on understanding the entire framework of homeland security in the United States and the unique issues faced by local law enforcement.

Equivalent to ADJ 462 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 471 - Prevention and Deterrence of Crime

Credits: 3
Theoretical and practical strategies for crime prevention and deterrence. Discusses social, environmental, and mechanical developments, police courts, and correctional elements of law enforcement in terms of current effectiveness and future potential for crime prevention.

Equivalent to ADJ 471 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3

CRIM 475 - Theory and Politics of Terrorism

Credits: 3
Explores origins of terrorism, tracing development from early states to a modern mode of conflict. Presents national, regional, and global perspectives.

Equivalent to ADJ 475 (2009-2010 Catalog)

Prerequisites
CRIM 100

Hours of Lecture or Seminar per week: 3
CRIM 479 - Preparation for Internship

Credits: 3
Preparation for internship in a justice organization or justice-related work activity. Students develop a relationship with a prospective internship sponsor and develop a plan for the internship and the research to be reported.

Equivalent to ADJ 479 (2009-2010 Catalog)

Prerequisites
CRIM 100, 300, 303; and at least 21 credits of courses required for the CRIM major.

Hours of Lecture or Seminar per week: 3

CRIM 480 - Internship

Credits: 3 - 12
Application of classroom learning to an applied justice setting. Students maintain daily journals, conduct research, and deliver written and oral reports.

Equivalent to ADJ 480 (2009-2010 Catalog)

Prerequisites
CRIM 479

Notes
Before enrolling, students must have a plan approved by the instructor. Seminars are held three times during the semester for discussion and oral presentation. Minimum of 50 hours of on-the-job work time required for each credit. Students may take the course for 3, 6, 9, or 12 credits. Course may be taken more than once, but total accumulated credits may not exceed 12.

Hours of Lecture or Seminar per week: 3 - 12

CRIM 490 - Special Topics

Credits: 1-3
Recent developments in the field.

Equivalent to ADJ 490 (2009-2010 Catalog)

Prerequisites
CRIM 100

Notes
Content varies. May be repeated for credit up to 15 credits. May apply to one or more of the concentrations, depending on content.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
CRIM 491 - Honors Seminar I

Credits: 3
Course includes readings, individual or group projects, and discussion of seminar papers.

Equivalent to ADJ 491 (2009-2010 Catalog)

**Prerequisites**
Acceptance to pursue honors in the major.

**Notes**
First of a two-course sequence; subject varies.

**Hours of Lecture or Seminar per week:** 3

CRIM 492 - Honors Seminar II

Credits: 3
Course includes readings and discussion of seminar papers, leading to a research project under the direction of a faculty member.

Equivalent to ADJ 492 (2009-2010 Catalog)

**Prerequisites**
CRIM 491

**Notes**
Second of a two-course sequence. Subject varies. Oral exam on the research and report may be required.

**Hours of Lecture or Seminar per week:** 3

CRIM 499 - Independent Study

Credits: 1 - 3
Reading and research on a specific topic under the direction of a faculty member.

Equivalent to ADJ 499 (2009-2010 Catalog)

**Prerequisites**
CRIM 100 and 90 credits.

**Notes**
Open to majors in CRIM with 90 credits and permission of instructor and department. Written report is required; an oral exam or report may also be required. Degree requirements to be fulfilled by a particular independent study determined by student's advisor.

CRIM 509 - Justice Organizations and Processes
Examines structures, practices, and performance of organizations involved in administration of justice: law enforcement, courts and legal agencies, corrections, regulatory and related agencies, and private organizations.

Equivalent to PUAD 509; JLCP 509 (2009-2010 Catalog)

CRIM 510 - Policing in a Democratic Society

Credits: 3
Fundamental issues in policing a democratic society: police mission, subculture, performance measurement, moral hazards, discretion, impact on crime and disorder, legitimacy, community policing, and other reforms.

Equivalent to PUAD 510; JLCP 510 (2009-2010 Catalog)

CRIM 691 - Justice Program Planning and Implementation

Credits: 3
Examines challenges of adapting to, planning, and implementing change in justice organizations. Provides hands-on experience in conducting, planning, and implementing project.

Equivalent to PUAD 691; JLCP 691 (2009-2010 Catalog)

Prerequisites
CRIM 700 or PUAD 502, or permission of instructor.

CRIM 700 - Theories of Justice

Credits: 3
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system, and other social and political institutions.

Equivalent to GOVT 726; JLCP 700 (2009-2010 Catalog)
**CRIM 702 - Comparative Justice**

Credits: 3  
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.  
Equivalent to JLCP 702 (2009-2010 Catalog)

**Prerequisites**  
CRIM 700/GOVT 726, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

---

**CRIM 703 - Restorative Justice**

Credits: 3  
Covers origins of restorative justice, its principles, implications for different justice organizations and processes, and application to a variety of problems, such as family violence, human rights, and reconciliation following mass victimizations.  
Equivalent to GOVT 727; JLCP 703 (2009-2010 Catalog)

**Prerequisites**  
CRIM 700 or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

---

**CRIM 720 - Behavior of Law**

Credits: 3  
Examines development of law and law’s effect on human behavior. Reviews theories of law’s meaning and aims. Examines construction of law and investigates consequences of law and legal decisions.  
Equivalent to GOVT 728; JLCP 720 (2009-2010 Catalog)

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

---

**CRIM 721 - The Constitution, Criminal Procedure, and Security**

Credits: 3  
Focuses on understanding legal doctrines that form basis of U.S. constitutional procedural rights and how doctrines develop, why courts rule as they do, and evaluating strengths, weaknesses of rights.  
Equivalent to GOVT 713; JLCP 721 (2009-2010 Catalog)
**Prerequisites**
CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CRIM 722 - Civil Justice**

Credits: 3
Covers understanding civil justice system, rules that govern civil justice, origins and effects, strengths and weaknesses of civil law doctrines, and processes to understand power of law to order social behavior.

Equivalent to JLCP 722 (2009-2010 Catalog)

**Prerequisites**
CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CRIM 723 - Law and Social Control**

Credits: 3
Competing conceptions of law, political systems, and social control. Intellectual traditions behind social control, its definitions, and mechanisms for regulating public and private behavior, by both individuals and organizations in society.

Equivalent to JLCP 723 (2009-2010 Catalog)

**Prerequisites**
CRIM 720/GOVT 728 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**CRIM 730 - Courts and Constitutional Law**

Credits: 3
Role, influence, and effects of U.S. courts in creating constitutional norms and interpreting them. Special attention to First and Fourteenth Amendments, Commerce Clause. Analyzes leading court cases.

Equivalent to JLCP 730 (2009-2010 Catalog)

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
CRIM 740 - Justice Organization and Administration

Credits: 3
Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Equivalent to PUAD 790; JLCP 740 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 741 - Conduct of Justice Organizations at the Street Level

Credits: 3
How justice organizations behave at lowest levels, where service is delivered and discretion is greatest (suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system).

Equivalent to PUAD 793; JLCP 741 (2009-2010 Catalog)

Prerequisites
CRIM 740/PUAD 790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 742 - Leadership in Justice and Security Organizations

Credits: 3
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.

Equivalent to JLCP 742 (2009-2010 Catalog)

Prerequisites
CRIM 740/GOVT 790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 743 - Changing Justice and Security Organizations

Credits: 3
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be the most effective.

Equivalent to PUAD 797; JLCP 743 (2009-2010 Catalog)
Prerequisites
CRIM 740/PUAD790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 749 - Issues in Justice Administration

Credits: 1-3
Explores issues in justice administration, taking into diverse perspectives. Emphasizes using theory and evidence to evaluate different viewpoints. Course topics vary, focusing on controversial matters.

Equivalent to PUAD 799; JLCP 749 (2009-2010 Catalog)

Prerequisites
CRIM 509/PUAD 509 or CRIM 700/GOVT 726, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 760 - Crime and Crime Policy

Credits: 3
Explores relationship between crime policy and empirical evidence about etiology of crime. Includes crime measurement and trends in crime over time, effectiveness of various policy interventions.

Equivalent to JLCP 760 (2009-2010 Catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 761 - Politics of Crime Policy

Credits: 3
Explores political context of crime policy. Examines influence of public opinion, interest groups, scientific community, and other political forces. In-depth, case-study comparison of several crime policies.

Equivalent to JLCP 761 (2009-2010 Catalog)

Prerequisites
CRIM 760/GOVT 792 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
CRIM 780 - Research Methods

Credits: 3
Introduces logic and methods of scientific inquiry in justice, law, and crime policy. Includes conceptualization of research questions, observation, measurement, research design, and principles of causality. Evaluation of extant research according to scientific principles.

Equivalent to JLCP 780 (2009-2010 Catalog)

Prerequisites
Undergraduate course in social science research methods or statistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 781 - Justice Program Evaluation

Credits: 3
Practical exploration of assessment techniques used in evaluating need for and consequences of justice programs and policies. Design and measurement, interpreting and presenting results.

Equivalent to PUAD 791; JLCP 781 (2009-2010 Catalog)

Prerequisites
PUAD 611/612 CRIM 780 or two graduate-level statistics courses; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 782 - Statistics I

Credits: 3
Focuses on descriptive and inferential statistical methods and theory with application to problems within the justice field. Explores the logic of inferential statistical methods in general and null hypothesis significance testing in particular. Covers widely used statistical procedures within the applied social sciences.

Equivalent to JLCP 782 (2009-2010 Catalog)

Prerequisites
An undergraduate social science research methods course or an undergraduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 783 - Statistics II
Credits: 3
Focuses on the theory and application of multivariate regression methods as applied within the justice field. Topics include tests for and consequences of violating assumptions of the generalized linear model, dummy coding of categorical variables, testing of interaction effects, logistic regression, ordered and multinominal logit, and missing data analysis.

Equivalent to JLCP 783 (2009-2010 Catalog)

Prerequisites
CRIM 782 or a comparable course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 790 - Research in Practicum

Credits: 1-6
Student-initiated research project supervised by faculty member. Students must work with justice organization to conduct useful research.

Equivalent to JLCP 790 (2009-2010 Catalog)

Prerequisites
CRIM 780, and 782; or either STAT 510 and 535 or STAT 554 and 656; or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

CRIM 795 - Special Topics

Credits: 3
Recent developments in field, or topics not covered by regularly listed courses.

Equivalent to JLCP 795 (2009-2010 Catalog)

Prerequisites
To be determined by instructor.

Notes
Course content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CRIM 796 - Directed Reading
Independent reading at doctoral level on specific topic related to justice, law, or crime policy as agreed to by student and faculty member and approved by coordinator of CRIM program.

Equivalent to JLCP 796 (2009-2010 Catalog)

Prerequisites
Successful completion of 12 graduate level CRIM credits.

Notes
Repeatable.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CRIM 799 - Master’s Thesis

Credits: 1-6
Research on approved master’s thesis topic under direction of thesis committee with approval of chair.

Equivalent to JLCP 799 (2009-2010 Catalog)

Prerequisites
Submission and approval of thesis proposal.

Notes
Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 6 credits of CRIM 799 applicable to masters degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit

CRIM 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on a research proposal forming basis for doctoral dissertation.

Equivalent to JLCP 998 (2009-2010 Catalog)

Prerequisites
Students must complete all core and analytical course degree requirements.

Notes
Repeatable. Minimum 3, maximum 6 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
CRIM 999 - Doctoral Dissertation Research

Credits: 1-21
Doctoral dissertation research and writing under direction of student’s dissertation committee.

Equivalent to CRIM 999 (Catalog 2009-2010)

Prerequisites
Advancement to doctoral Candidacy

Notes
Repeatable. Minimum 12, maximum 21 credits for doctorate. Maximum of 27 credits of CRIM 998/999 applicable to doctoral degree requirements.

CULT 320 - Globalization and Culture

Credits: 3
Examines relationship between cultures and globalization through texts and points of view. Starting from development of capitalism, looks at age of imperialism and colonialism, finishing in present. Considers how globalization affects dynamics of cultural change. Emphasizes extraordinary role of new media and technologies in defining and shaping cultural spaces in which people live.

Prerequisites
30 credits; GLOA 101 or SOCI 120.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 802 - Histories of Cultural Studies

Credits: 3
Historical survey of principal works and theories in the development of cultural studies.
Prerequisites
Admission to doctoral program, related master's degree, or permission of instructor.

Notes
This course is designed for PhD level students. Students in a related MA program may take this course as the capstone to their MA as they are about to matriculate into the PhD in cultural studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

CULT 804 - Histories of Cultural Studies II

Credits: 3
Continues the historical survey of cultural studies up to the present and assesses possibilities for future development.

Prerequisites
Admission to a PhD program and CULT 802 or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

CULT 806 - Research Seminar in Cultural Studies

Credits: 3
Introduces research methods in cultural studies.

Prerequisites
Admission to a doctoral; completion CULT 802 and CULT 804.

Notes
Specific topics vary.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

CULT 808 - Student/Faculty Colloquium in Cultural Studies

Credits: 1
Forum for presentation of original and current research in cultural studies.

Prerequisites
Admission to program or permission of instructor.

Notes
Students register for 1 credit per semester over a three-semester period.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

### CULT 810 - Culture and Political Economy

Credits: 3
