Surveys social science and humanities classics that relate cultural production and consumption to underlying political economic conditions. Includes Marx, Lukacs, Frankfurt School, semiotic neo-Marxism, productivist theories of power indebted to Foucault, Baudrillard, Bourdieu, Harvey, Jameson, Mauss, Mill, Polanyi, Sahlins, A. Smith, and Weber.

**Prerequisites**  
Admission to a doctoral program, or permission of instructor.

**Notes**  
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### CULT 812 - Visual Culture

Credits: 3  
Examines theories, production, consumption, and reception of visual culture. Covers film, video, visual arts, music, display, ritual, performance, performativity, and theories of the aesthetic. Includes key readings from theorists such as Adorno, Artaud, Benjamin, Brecht, Bryson, Doane, Fiske, Heath, Marcuse, Merleau-Ponty, and Sartre.

**Prerequisites**  
Admission to a doctoral program, or permission of instructor.

**Notes**  
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### CULT 814 - Gender and Sexuality

Credits: 3  
Investigates notion of gender functions in maintaining and analyzing issues of social and cultural power. Examines conflicting notions of sexuality and their role in cultural signification. Seeks to explicate relationship of sexuality, gender.

**Prerequisites**  
Admission to a doctoral program, or permission of instructor
Notes
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 816 - Science/Technology

Credits: 3
Considers theories and major debates on culture of science, social construction of nature, and effects of technology on modern cultural forms. Includes readings from theorists such as Nietzsche, Heidegger, Horkheimer, Feyerabend, Bahro, Haraway, and Latour.

Prerequisites
Admission to a doctoral program, or permission of instructor.

Notes
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 818 - Social Institutions

Credits: 3
Considers theories of institutional practice and social structures, from Max Weber to Michel Foucault. Covers prisons, bureaucracies, museums, schools, political parties, and social movements.

Prerequisites
Admission to a doctoral program, or permission of instructor.

Notes
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 820 - After Colonialism

Credits: 3
Surveys racial, ethnic, caste, and national identities in colonial contexts; scientific racism in periphery and core sites; subsequent history of race, ethnic, national identities and conflicts; classical and contemporary texts by authors such as DuBois, Fanon, Gilroy, and Spivak; and particular place of issues of national, racial, and ethnic identities in contemporary cultural studies.
Prerequisites
Admission to a doctoral program, or permission of instructor.

Notes
This course is designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

CULT 860 - Special Topics in Cultural Studies

Credits: 3
Specialized interdisciplinary topics in cultural theory and analysis.

Prerequisites
Admission to a doctoral program, or permission of instructor.

Notes
These courses are designed for the PhD student. Those students not admitted to a PhD program are required to contact the instructor. Content varies, may be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

CULT 870 - Independent Study

Credits: 1-3
Reading and research on a specific topic guided by advisors, supporting the development of a Field Concentration.

Prerequisites
Admission to a PhD program, successful completion of all core courses, or permission of director.

Notes
May be repeated.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

CULT 880 - Field Concentration

Credits: 3
Intensive research course, resulting in a Field Statement and oral defense.

Prerequisites
Admission to cultural studies doctoral program successful completion of core courses and an additional 18 credits.
Notes
May be repeated, permission of field advisor required.

Grading: Graduate Special
When Offered: Fall, Spring

CULT 998 - Doctoral Dissertation Proposal

Credits: 1-6
Develop research proposal that forms basis for doctoral dissertation.

Prerequisites
Advancement to candidacy.

Notes
May be repeated for credit. A maximum of 6 credits may be applied to the degree. Subject to continuous registration requirement.

Grading: S/NC
When Offered: Fall, Spring

CULT 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research and writing under direction of dissertation committee.

Prerequisites
Completion of CULT 998, and public presentation of dissertation proposal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Dance

DANC 101 - Dance Appreciation

Credits: 3
Introduces dance as universal human activity, expression of cultural identity, and art form. Survey of global dance includes folk, ceremonial and ritual, trance, court, classical, and theatrical.

Satisfies General Education Requirement: Arts
DANC 114 - Rhythmic Analysis and Music Resources for Dance

Credits: 3
Introduces rhythmic structure, notation, and basic forms of music. Experience with audio equipment in creating simple sound scores.

Prerequisites
Admission to dance major or permission of instructor.

Notes
Lecture, lab.

DANC 118 - World Dance

Credits: 3
Develops knowledge, skills, and appreciation of world dance forms through presentation of fundamental techniques, music, and culture. Area of concentration varies to include as many cultures as possible.

Satisfies General Education Requirement: Global understanding

Notes
May be repeated for total 6 credits. Fulfills non-Western requirement for CHSS and COS students.

DANC 119 - Dance in Popular Culture: Afro-Latino Dance

Credits: 3
Develops knowledge, skills, and appreciation of popular dance forms through presentation of fundamental techniques, music, and culture. Area of concentration varies to include as many idioms as possible.

Satisfies General Education Requirement: Arts

Notes
May be repeated for total 6 credits.
DANC 120 - Special Topics in Dance

Credits: 1-3
Rotating topic. Introduction and exploration of topical studies in dance or related study areas; topic depends on instructor.

Notes
May be repeated for total 9 credits if course content differs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 125 - Beginning Modern Dance

Credits: 3
Develops knowledge, skills, and appreciation of modern dance through presentation of fundamental techniques and creative movement experiences.

Satisfies General Education Requirement: Arts

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 131 - Beginning Jazz Technique

Credits: 3
Introduces fundamentals of jazz dance technique, explores the musical and cultural traditions of jazz dance, and its historical context. Emphasizes improving anatomical awareness and alignment, increasing strength and flexibility, and developing rhythmic sensitivity. Also introduces jazz improvisation and choreography.

Satisfies General Education Requirement: Arts

Notes
May be repeated for 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 145 - Beginning Ballet

Credits: 3

Introduces elements of ballet technique and vocabulary. Stresses learning elementary positions and movements characteristic of this highly stylized art form.
Satisfies General Education Requirement: Arts

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 150 - Dance Improvisation

Credits: 3
Explores movement invention and discovery. Movement explored in relation to other art forms such as literature, painting, sculpture, and architecture; enhancing kinesthetic awareness; sensitivity to others; and the environment. Prerequisite for dance composition and choreography series.

Prerequisites
Admission to dance major or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 161 - Beginning Tap Dance

Credits: 3
Elementary exploration into rhythms and steps basic to art form of tap dancing including its musical and cultural traditions.

Satisfies General Education Requirement: Arts

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 170 - Orientation to Dance Production

Credits: 1
Introduces sound, lighting, and stage management elements and terminology as related to dance performance. Intensive workshop setting emphasizes laboratory experience.

Prerequisites
Admission to dance major or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1
DANC 210 - Dynamic Alignment

Credits: 3
Covers aspects of anatomy and kinesiology that directly apply to correct development of dance technique. Emphasizes exercise correctives and imagery to correct insufficient muscle pattern and reduce stress on the body.

Prerequisites
Admission to dance major or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 225 - Beginning Intermediate Modern Dance

Credits: 3
Further develops knowledge, skills, and appreciation of modern dance through continued exploration of techniques, aesthetics, and creativity.

Satisfies General Education Requirement: Arts

Prerequisites
DANC 125 or permission of instructor.

Notes
May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 231 - Intermediate Jazz Technique

Credits: 3
Continued study of the concepts of jazz dance technique, and in-depth study of 20th-century jazz dance forms. Emphasizes furthering anatomical awareness and alignment, developing technical clarity, and mastering rhythm and syncopation. Continues exploration of jazz improvisation and choreography.

Satisfies General Education Requirement: Arts

Prerequisites
DANC 131 or permission of instructor.

Notes
May be repeated for 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 245 - Beginning Intermediate Ballet

Credits: 3

Further development of knowledge, skills, and appreciation through technique, vocabulary, and history of ballet.

Satisfies General Education Requirement: Arts

Prerequisites
DANC 145 or permission of instructor.

Notes
May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 251 - Dance Composition I

Credits: 3

Introduces basic principles for composing dance movement. Focuses on simple compositional forms as they apply to solo performer, discussion, analysis, and evaluation of artistic choices. Students maintain video and written journals to document their artistic process.

Prerequisites
DANC 150 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 252 - Dance Composition II

Credits: 3

Explores compositional elements in dance as they apply to group forms. Offers continued experience in developing and manipulating movement phrases using a variety of compositional forms. Introduces conducting rehearsals and selecting music. Students discuss, analyze, and evaluate artistic choices in composition using appropriate dance arts vocabulary and terminology, and maintain video and written journals to document artistic process.

Prerequisites
DANC 251 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 270 - Dance Production Lab

Credits: 1
Practical experience in stage crew, sound, or lighting of dance productions through rehearsal to public performance for university dance concerts or guest artist programs.

Prerequisites
DANC 170 or permission of instructor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1

DANC 301 - What is Dance?

Credits: 3
Explores connections among literature, music, theater, and visual art within aesthetic framework of dance. Examines development and ideals of Western theatrical dance, and historical and social context in which they were created. Method of instruction includes lecture, discussion, and studio experiences.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 314 - Music Accompaniment for Dance

Credits: 3
Lecture practicum course that gives both dance and music students practical experience in dance accompaniment, primarily through using percussion instruments. Students use knowledge of music and rhythm to accompany and enhance a dance technique class.

Prerequisites
DANC 313 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 318 - Global Perspectives: World Dance Forms

Credits: 3
Continued in-depth study of world dance form including technique, music, and culture. Texts, video, performances, music, participatory events, and guest artist presentations. Lecture, studio. Area of concentration varies to include as many cultures as possible.
Satisfies General Education Requirement: Global understanding

**Prerequisites**
Completion of DANC 118, 119, or 120; or junior standing; or permission of instructor.

**Notes**
May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 324 - Introduction to Dance Conditioning**

Credits: 1-3  
Course involves intensive rehabilitation and conditioning exercises and realignment training geared for the individual dancer. In-depth understanding of injury prevention and neuromuscular re-education are applied to ballet and modern technique classes.

**Prerequisites**
Admission to the BA or BFA dance major

**Notes**
May be repeated for a total of 12 credits

**Hours of Lecture or Seminar per week:** 1-3

---

**DANC 325 - Intermediate Modern Dance**

Credits: 1-3  
Explores intermediate level of modern dance technique. Emphasizes improving anatomical awareness, increasing strength and flexibility, expanding modern dance vocabulary, and developing flow and dynamic range.

**Prerequisites**
Admission to dance major or permission of instructor.

**Notes**
Meets general education fine arts requirement. May be repeated for total 24 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**DANC 326 - Dance Performance Practicum**
Credits: 1
Practical experience in dance performance through rehearsal process of university dance concerts.

Prerequisites
Audition.

Notes
May be repeated for total 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

DANC 331 - Advanced Jazz Dance

Credits: 3
In-depth studio study of 20th century jazz dance forms. Continues concepts and vocabulary introduced in DANC 231, and further emphasizes alignment, technical clarity, and virtuosity. Emphasizes mastery of rhythm and syncopation.

Notes
Meets general education fine arts requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 345 - Intermediate Ballet

Credits: 1-3
Provides continued ballet training for intermediate-level dancer. Emphasizes increasing technical proficiency, improving anatomical awareness, and developing deeper understanding of skills and principles of ballet technique and how they provide foundation to teach and perform.

Prerequisites
Admission to dance major, or permission of instructor.

Notes
Meets general education fine arts requirement. May be repeated for 24 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 350 - Advanced Dance Improvisation

Credits: 1-3
Lecture and performance course for continued study of dance improvisation, including contact improvisation. Students create and direct advanced problems in dance improvisation.

Prerequisites
DANC 325 and 150, or permission of instructor.

Notes
May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**DANC 360 - Choreography**

Credits: 3  
Continued choreographic exploration and research, culminating in bringing completed works to production.

**Prerequisites**
DANC 252, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**DANC 362 - Directed Choreography**

Credits: 1  
Faculty-guided, individual learning experience where students learn to choreograph a dance work by auditioning dancers, costuming, staging, lighting, selecting musical accompaniment, and composing original movement material.

**Prerequisites**
DANC 252 or permission of instructor.

Notes
May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**DANC 370 - Dance Performance**

Credits: 1  
Practical experience in performance, repertory, and choreography through rehearsal and public performance of university dance concerts or guest artist programs.

**Prerequisites**
Admission to dance major and audition; or permission of instructor.

Notes
May be repeated for total 12 credits.
DANC 371 - Residency Workshop

Credits: 1
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting.

Prerequisites
Admission to dance major and audition.

Notes
May be repeated for total 6 credits.

DANC 372 - Advanced Dance Production

Credits: 1
Methodology and practice of stage make-up, costume design, and lighting as dictated by specific needs of dance performance.

Prerequisites
DANC 170 and 270, or permission of instructor.

Notes
Taught in series of workshop settings.

DANC 390 - Dance History: Pre-Twentieth Century

Credits: 3
Examines dance as it developed as Western theatrical form from its beginnings in social and folk dance through evolution into ballet. Emphasizes romantic and classical ballet. Also studies American dance forms as they evolved in spectacles, burlesques, minstrelsy, and social dance. All forms of dance placed in social, political, cultural, aesthetic, and historical contexts.

Satisfies General Education Requirement: Arts

DANC 391 - Dance History: Twentieth Century

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Credits: 3
Examines revolutions in transformation of 20th-century Western dance into forms and institutions that radically departed from predecessors. Development of contemporary dance carried with it reflections of the influence of technology and media as well as concept of global culture. Renewed interest in traditional dance forms acknowledges power of dance to serve as carrier of cultural and societal values. Dance forms placed in social, political, cultural, aesthetic, and historical contexts.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 399 - Independent Study

Credits: 1-3
Individual research or creative project supervised by faculty member.

Prerequisites
Permission of chair.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

DANC 410 - Introduction to Contemporary Movement Theories

Credits: 3
Introduction to movement theories combining somatic theory with practical application to dance training. Focus on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis.

Hours of Lecture or Seminar per week: 3

DANC 418 - Global Dance Intensive

Credits: 1-3
Intensive investigation of selected dance idiom within cultural and artistic contexts. Course work supplemented by participation in and observation of ambient culture. Analyzes similarities, differences, and common antecedents between selected culture and North American dance idioms.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
DANC 420 - Special Topics in Dance

Credits: 1-3
In-depth presentation and exploration of topical studies in dance or related study areas.

Prerequisites
9 credits of dance courses, or permission of instructor.

Notes
Topic depends on instructor. May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 425 - Advanced Modern Dance

Credits: 1-3

Advanced-level exploration of modern dance technique. Emphasizes refining alignment, developing ability to self-correct, and replicating sophisticated movement sequences. Preparation to enter professional field of dance.

Prerequisites
Admission to dance major, or permission of instructor.

Notes
Meets general education fine arts requirement. May be repeated for 24 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 445 - Advanced Ballet

Credits: 1-3
Provides preprofessional ballet training for advanced-level dancer. Emphasizes attainment of high-quality technical and performance skills, application of anatomical principles, and mastery of sophisticated classical movement sequences.

Prerequisites
Admission to dance major, or permission of instructor.

Notes
Meets general education fine arts requirement. May be repeated for 24 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
**DANC 453 - Teaching Creative Movement**

Credits: 3  
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with some application to special populations.

**Prerequisites**
DANC 325 and 150, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 454 - Methods of Teaching Dance**

Credits: 3  
Examines dance pedagogy, focusing on principles needed for teaching sound technique. Students learn skills, methods, and instructional procedures for classroom. Emphasizes curriculum development, proper course sequencing, implementation of teaching strategies, and classroom management techniques. Students study teaching methods appropriate for K-12, gifted and talented, and special-needs students. Intensive practice in implementing these skills includes lab, field-teaching experiences.

**Prerequisites**
6 credits of intermediate or advanced dance technique, and DANC 210.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 455 - Teaching Practicum**

Credits: 1-6  
Full semester of supervised teaching experience in approved school or studio dance program. Credits based on number of teaching contact hours per week.

**Prerequisites**
DANC 454, and permission of instructor.

**Notes**
May be repeated for total 12 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 480 - Introduction to Laban Movement Analysis**
Credits: 3
Introduces components of laban movement analysis: body, shape, effort, and space. Includes motif writing for recording and analyzing movement.

Prerequisites
DANC 210, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 490 - Senior Dance Seminar

Credits: 3
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to dance, arts education, and professional development. Students develop senior project including written and oral presentation in public forum.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Senior status in dance major program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 501 - Graduate Dance Seminar

Credits: 3
Presentation and discussion of current issues in dance specific to education, research, and professional development.

Prerequisites
Admission to MFA in dance program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 510 - Contemporary Movement Theories

Credits: 3
In-depth study of movement theories combining somatic theory with practical application to dance training. Focus is on ways somatic practices can deepen perceptual processes and influence movement aesthetics. Theories studied may include: Alexander Technique, Feldenkrais Method, Body-Mind Centering, and Ideokinesis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
DANC 520 - Special Topics in Dance

Credits: 1-3
In-depth presentation and exploration of topical studies in dance or related study areas.

Prerequisites
9 credits of dance courses, or permission of instructor.

Notes
Topic depends on instructor. May be repeated for total 9 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 525 - Advanced Modern Dance

Credits: 1-3
Advanced training in modern technique emphasizing attainment of high technical ability and performing skills.

Prerequisites
Admission to MFA in dance program, or permission of instructor.

Notes
May be repeated for total 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 545 - Advanced Ballet

Credits: 1-3
Advanced training in ballet technique with emphasis on high technical quality, performance skills, ballet vocabulary, and styles.

Prerequisites
Admission to MFA in dance program, or permission of instructor.

Notes
May be repeated for total 18 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

DANC 553 - Teaching Creative Movement

Credits: 3
Provides theory, methodology, and practicum experience in preparation for teaching creative movement to children K-12, with
some application to special populations.

**Prerequisites**
Graduate status, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 560 - Advanced Choreography**

Credits: 3  
Intensive study and exploration of advanced choreographic forms culminating in public performance of complete dance work.

**Prerequisites**
Admission to MFA in dance program, or permission of instructor.

**Notes**
May be repeated for total 12 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 562 - Directed Choreography**

Credits: 1-3  
Individual choreographic project supervised by faculty member.

**Prerequisites**
Admission to MFA in dance program, and permission of instructor.

**Notes**
May be repeated for total 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**DANC 570 - Advanced Dance Performance**

Credits: 1-3  
Advanced performance through participation in university productions and professional dance companies.

**Prerequisites**
Admission to MFA in dance program, and audition.

**Notes**
May be repeated for total 12 credits.
DANC 571 - Residency Workshop

Credits: 1
Rehearsal and performance of new or restaged dance by guest choreographer in intensive rehearsal setting.

Prerequisites
Admission to MFA in dance program, and audition.

Notes
May be repeated for total 6 credits.

DANC 580 - Laban Movement Analysis

Credits: 3
Introduces components of laban movement analysis: body, shape, effort, and space. Includes motif writing for recording and analyzing movement.

Prerequisites
Admission to MFA in dance program, or permission of instructor.

DANC 598 - Philosophy and Aesthetics of Dance

Credits: 3
Study of philosophical theories and aesthetic principles of dance as a performing art.

Prerequisites
DANC 390 and 391, or permission of instructor.

DANC 599 - Independent Study

Credits: 1-6
Individual research or creative project in close consultation with instructor.
Prerequisites
Admission to MFA in dance program, and permission of instructor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

DANC 615 - Contemporary Trends

Credits: 3
Study of contemporary art and artists and their ideas and practices as they relate to the making of new work.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 627 - Advanced Teaching Seminar

Credits: 3
Discussion of advanced problems in teaching from scientific and creative points of view.

Prerequisites
DANC 454, admission to MFA in dance program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 680 - Dance Management

Credits: 3
Exploration of technical, financial, and economic aspects of dance management, including marketing, fundraising, publicity, incorporation, booking, nonprofit vs. profit-making groups, and issues relating to current practices in performing arts industry.

Prerequisites
Admission to MFA in dance program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

DANC 790 - Internship
Credits: 1-3
Study involving intensive professional experience through sponsorship by a dance company, agency, or other arts organization in management, administration, performance, choreography, or teaching.

Prerequisites
Admission to MFA in dance program, and permission of advisor.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

DANC 799 - Thesis

Credits: 1-6
Original research, including written work and public performance, under direction of thesis committee.

Prerequisites
Admission to MFA in dance program, permission of advisor, and approval of proposal.

Notes
May be repeated for total 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Early Childhood Education (Unified Transformative Early Education Model—UTEEM)

EDUT 411 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3
Provides knowledge of child and family development from diverse and cultural perspectives, offering appreciation for critical role of families. Explores role of culture, various disabilities, and theories for understanding and interpreting child and family growth and development.

Equivalent to EDUT 511

Notes
Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUT 413 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and second language acquisition.

Equivalent to EDUT 513

Notes
Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 414 - Curriculum and Instruction for Diverse Young Learners

Credits: 3

Equivalent to EDUT 514

Notes
Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 423 - Developing Language, Literacy, and Communication in Diverse Young Children

Credits: 3
Provides understanding of early language development in terms of the five major components of language. Speech, language, and communication are discussed, particularly in terms of interrelatedness with cognitive and sociocultural development. Explores importance of adult-child interaction; and impact of bilingualism, cultural diversity, cognitive ability, and language disorder.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 424 - Culturally, Linguistically, and Developmentally Appropriate Practices with Infants, Toddlers, and their Families
Credits: 3
Provides understanding of culturally, linguistically, and developmentally appropriate programs and practices in community
settings that provide services to infants and toddlers with varied abilities and their families. Students explore, plan, and
implement developmentally supportive activities, and are expected to become familiar with cultural context of infants and
toddlers with whom they are working. Special emphasis on providing home-based services.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 511 - Developmental Pathways of Diverse Learners, Birth-Adolescence

Credits: 3
Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social, and
emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and
interpreting child and adolescent development.

Equivalent to EDUT 411

Notes
Field experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 512 - Assessment of Diverse Young Learners, Ages 3-5

Credits: 3
Provides understanding of forms, functions, methods, and roles of assessment for planning and implementing effective early
childhood programs for children ages 3-5 from diverse cultures and with varied learning needs. Teaches quantitative and
qualitative approaches to evaluation and assessment. Students learn about technological adaptations, and gain understanding of
appropriate strategies for conducting, reporting, and decision-making related to specific functions of assessment. They also learn
about assessment strategies for second language learners, and adaptations for children with disabilities.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 513 - Foundations of Language and Literacy for Diverse Young Learners

Credits: 3
Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development,
connections between language and literacy, and diversity of communication styles in families and cultures. Emphasizes first and
second language acquisition.

Equivalent to EDUT 413
EDUT 514 - Curriculum and Instruction for Diverse Young Learners

Credits: 3

Equivalent to EDUT 414

Notes
Field experience required

EDUT 515 - Families, Communities, and Schools

Credits: 3
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children, including children from diverse cultural and linguistic backgrounds and children with special needs. Explores theories and research supporting a family-centered approach.

Prerequisites
Admission to the Early Childhood Education program or permission of the instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

EDUT 521 - Infant/Toddler Development in Family and Cultural Contexts

Credits: 3
Teaches about development of infants and toddlers in family and cultural contexts. Students explore role of family, culture, and developmental theories in providing frameworks for understanding and interpreting behavior of children from birth to age 3. Students learn about factors that place infants and toddlers at developmental risk, and other disabilities.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUT 522 - Family-Centered Assessment of Diverse Infants and Toddlers

Credits: 3
Focuses on family-centered practice in assessing infants and toddlers with diverse cultures and abilities. Teaches assessment practices that lead to plans for supporting infant development in individually and culturally relevant ways. Offers understanding of appropriate strategies for conducting, reporting, and decision making related to specific functions of assessment, and adapting assessment practices for culturally, linguistically, and ability diverse infants and toddlers and their families.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 523 - Developing Language, Literacy, and Communication in Diverse Young Children

Credits: 3
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 524 - Culturally, Linguistically, and Developmentally Appropriate Practices with Infants, Toddlers, and Their Families

Credits: 3
Explores culturally, linguistically, and developmentally appropriate programs and practices in community settings that provide services to infants and toddlers with varied abilities and their families. Students explore, plan, and implement developmentally supportive activities with infants and toddlers and their families, and are expected to become familiar with cultural context of infants and toddlers with whom they are working. Special emphasis on providing home-based services.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 612 - Assessment of Diverse Young Learners
Credits: 3
Examines types of assessment for planning and implementing effective preschool through third-grade programs across content areas for culturally, linguistically, and ability diverse children. Addresses selection, administration, analysis, and interpretation of formal and informal assessments.

Prerequisites
Admission to the Early Childhood Education program or permission of the instructor

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 613 - Language and Literacy Assessment and Instruction for Diverse Young Learners

Credits: 3
Examines ways to assess and develop reading, writing, listening, and speaking in preschool through third-grade classrooms. Addresses instructional strategies and practices that promote language and literacy development in culturally, linguistically, and ability diverse children.

Prerequisites
Admission to Early Childhood Education program or permission of the instructor

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 614 - Curriculum Across the Content Areas for Diverse Young Learners

Credits: 3
Explores assessment, curriculum development, planning, and instructional practices across content areas. Examines strategies for guiding children's behavior, integrating instruction across content areas, and planning and implementing community of learners inclusive of children with diverse disabilities.

Prerequisites
Admission to the Early Childhood program or permission of the instructor.

Corequisite
Must be taken concurrently with EDUT 790

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUT 615 - Mathematics and Science for Diverse Young Learners

Credits: 3
Examines ways to foster development of mathematics and science in preschool to third-grade children. Covers construction of math and science lessons and hands-on experiences that address the needs of culturally, linguistically, and ability diverse children.

Prerequisites
Admission to the Early Childhood Education program or permission of the instructor

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 781 - Frameworks for Unified, Transformative Early Care and Education

Credits: 3
Provides opportunity to analyze foundational frameworks for developing unified perspective for working with culturally, linguistically, and ability diverse young learners, birth to age 8, and their families. Students examine foundational work from separate fields of early childhood education, early childhood special education, multicultural education, and second language acquisition and bilingual education.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 782 - Policy Perspectives Affecting Diverse Young Learners and Their Families

Credits: 3
Advanced seminar explores historical and current trends and issues involving legislation and policy in early childhood education, bilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in early childhood education. Provides understanding of continuum of services and context of service delivery.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUT 790 - Internship in Early Childhood Education

Credits: 1-6
Enables students to participate full time in inclusive early childhood setting serving families of infants and toddlers with diverse learning needs. Links university course work to real world of working with diverse families and their infants and toddlers. Students engage in carefully planned learning sequence, including observing infants and toddlers, environments, and intervention strategies that identify family concerns, priorities, and resources.

Prerequisites
Admission to Early Childhood Education program or permission of the instructor

Hours of Lecture or Seminar per week: 1-6  
Hours of Lab or Studio per week: 0

EDUT 791 - Internship with Diverse Infants and Toddlers and Their Families

Credits: 3
Enables students to participate full time in inclusive early childhood setting serving families of infants and toddlers with diverse learning needs. Links university course work to real world of working with diverse families and their infants and toddlers. Students engage in carefully planned learning sequence, including observing infants and toddlers, environments, and intervention strategies that identify family concerns, priorities, and resources.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUT 792 - Internship with Diverse Learners, K-3

Credits: 3
Enables students to participate full time in early childhood setting serving children with diverse learning needs. Links university course work to real world of teaching. Students engage in carefully planned learning sequence, beginning with targeted observations and culminating in responsibility for entire planning process for three- to four-week period.

Prerequisites
Admission to UTEEM program, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUT 793 - Specialization Internship with Diverse Learners and Their Families

Credits: 6
Enables students to participate full time in education setting serving diverse children and their families, becoming involved in range of activities to ensure experience and understanding of the complexity, uniqueness, and significance of the work done.
Prerequisites
Passing scores on Praxis I and II, and admission to UTEEM program; or permission of instructor.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

EDUT 801 - Current Research and Trends in Early Education of Diverse Learners

Credits: 3
Examines research and trends in the early education of children. Explores issues that influence the education of young children with special education needs and children from culturally linguistically, and economically diverse backgrounds. Examines practices appropriate for diverse young learners.

Prerequisites
Admission to the PhD in Education program, or post-master's status and approval of course instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 804 - Families of Diverse Young Learners - Interdisciplinary and Cross-cultural Research, Policy, and Practice

Credits: 3
Explores the relationship between families and professionals in providing appropriate early care and education for diverse young children. Course includes in-depth study, analysis, and discussion of original research as well as syntheses of findings.

Prerequisites
Admission to doctoral program or post-master's status and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUT 805 - Personnel Preparation and Professional Development in Early Education of Diverse Learners

Credits: 3
Explores research and current recommended practices related to professional development and teacher education in early care and education of diverse learners. Provides opportunity for practical application with pre-service or in-service early educators.

Prerequisites
Admission to doctoral program or post-master's status and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUT 806 - Early Childhood Cognition, Language, and Literacy for Diverse Young Learners

Credits: 3
Develops an understanding of research and practice related to cognition, language, and literacy in a sociocultural context in the early childhood education of diverse learners, including special education and multicultural/multilingual education.

Prerequisites
Admission to doctoral program or post-master's status and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Economics

Individual courses taken for credit under their former numbers may not be repeated for credit under their present numbers. A grade of C or better in ECON 103 and 104 is prerequisite to upper-division economics courses.

ECON 100 - Economics for the Citizen

Credits: 3
Not available to economics majors. Broad introduction to economic concepts and how they can contribute to a better understanding of the world around us. Applies and develops concepts to current economic and social problems and issues. Less formal modeling than in the 103-104 sequence.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 103 - Contemporary Microeconomic Principles

Credits: 3
Introduces microeconomics in the context of current problems. Explores how market mechanism allocates scarce resources among competing uses; uses supply, demand, production, and distribution theory to analyze problems.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 104 - Contemporary Macroeconomic Principles
Credits: 3
Introduces macroeconomics in the context of current problems. National income analysis, money and banking, economic growth and stability, unemployment, inflation, and role of government.

Satisfies General Education Requirement: Social and behavioral science

Prerequisites
ECON 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 105 - Environmental Economics for the Citizen

Credits: 3
Introduction to economic concepts and how they can be applied to environmental policy issues such as air and water pollution, climate change, natural resource use, and sustainability. Focus is on concepts, policy, and case studies rather than formal modeling exercises.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 110 - Introduction to Economic Science

Credits: 2
Introduces economics as an observational science, covering personal vs. impersonal exchange, strategic interdependence and game theory, group decision making, and market design.

Satisfies General Education Requirement: Social and behavioral science (ECON 110 and 111 must be taken in sequence)

Notes
Registration is controlled; contact instructor for guidelines.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

ECON 111 - Laboratory Methods in Economics

Credits: 1
Enables participation in experimental economics research by recruiting subjects, writing experiment instructions, and monitoring sessions.

Satisfies General Education Requirement: Social and behavioral science (ECON 110 and 111 must be taken in sequence)

Notes
Registration is controlled; contact instructor for guidelines.

**ECON 306 - Intermediate Microeconomics**

Credits: 3  
Basic factors of price and distribution theory: analysis of demand, costs of production and supply relationships, and price and output determination under various market structures.

**Prerequisites**  
ECON 103 and 104, and MATH 108 or 113.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 308 - Managerial Economics and Strategy**

Credits: 3  
Analysis of major strategic business situations including pricing strategy, incentives and contracts, game theory, and vertical and horizontal integration.

**Prerequisites**  
ECON 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 309 - Economic Problems and Public Policies**

Credits: 3  
Economic problems in light of current and proposed public policies. Topics include environmental issues, international trade policies, and regulatory issues and their historical roots.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
Completion or concurrent enrollment in all other general education courses. ECON 100 or 103 and 104 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECON 310 - Money and Banking**
Monetary, commercial, and central banking systems, with particular emphasis on their relationship with American government programs, fiscal policies, and controls.

**Prerequisites**
ECON 103 and 104, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### ECON 311 - Intermediate Macroeconomics

Credits: 3  
Aggregate economic accounts, including measuring national income; determinants of levels of income and output; and causes and solutions for problems of unemployment, inflation, and economic growth.

**Prerequisites**
ECON 103 and 104, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### ECON 320 - Labor Problems

Credits: 3  
Explores American labor unions and their effect on society, including causes of and proposed solutions to selected problems.

**Prerequisites**
ECON 103 and 104, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### ECON 321 - Economics of Labor

Credits: 3  
Defines factors that determine levels of wages and employment, and economic consequences. Emphasizes recent developments in unionism, collective bargaining, and industrial technology.

**Prerequisites**
ECON 306.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---
ECON 330 - Public Finance

Credits: 3
Covers intergovernmental financial relationships; types, incidences, and consequences of taxation; other sources of governmental income; governmental expenditures and their effect; public economic enterprises; public borrowing; and debt management and its economic effect.

Prerequisites
ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 335 - Environmental Economics

Credits: 3
Microeconomic analysis of environmental problems. Topics include externalities and market failure, alternative solutions and policies, problems in monitoring and enforcement, economic analysis of development of legislation and regulation, and applications to current policy issues.

Prerequisites
ECON 103 and 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 340 - Introduction to Mathematical Economics

Credits: 3
Mathematical treatment of theory of firm and household behavior, stabilization policy, growth theory, input-output analysis, and linear programming.

Prerequisites
ECON 306 and 311, and MATH 113; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 345 - Introduction to Econometrics

Credits: 3
Modern statistical techniques in estimating economic relations.

Prerequisites
ECON 306 and 311, and OM 210 or STAT 250.
ECON 350 - Regional and Urban Economics

Credits: 3
Regional development and metropolitan growth, including locational decisions of households and firms, and problems associated with high-density urban economic activity.

Prerequisites
ECON 306 or permission of instructor.

ECON 355 - The Political Economy of Nonprofit Institutions

Credits: 3
Applies the basic principles of economics to teach students to think critically about nonprofit institutions. Examines the economics of nonprofit institutions, how incentives influence the evolution of charities, and current issues in nonprofit organizations.

Prerequisites
ECON 103 and ECON 104

ECON 360 - Economics of Developing Areas

Credits: 3
Economic growth characteristic of developing countries. Economic development, obstacles to development, policies, and planning.

Satisfies General Education Requirement: Global understanding

Prerequisites
ECON 103 and 104, or permission of instructor.

ECON 361 - Economic Development of Latin America
ECON 361 - Economic Development, Institutions, and Problems of Latin America

Credits: 3
Economic development, institutions, and problems of Latin America.

Satisfies General Education Requirement: Global understanding

Prerequisites
ECON 103 and 104, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 362 - African Economic Development

Credits: 3
Issues of economic development as applied to Africa. Includes overview of early economic history in Africa and post-independence development, and contemporary development problems.

Satisfies General Education Requirement: Global understanding

Prerequisites
ECON 103 and 104.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 365 - Topics in Economic History

Credits: 3
Possible topics include ancient, medieval, modern European, and American economic history, using econometric analysis as necessary.

Prerequisites
ECON 103 and 104.

Notes
Subject matter varies. May be repeated once for credit with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 370 - Economics of Industrial Organization

Credits: 3
Factors influencing industrial structure, and industrial conduct and performance.
Prerequisites
ECON 306, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 374 - Health Economics**

Credits: 3
Microeconomic analysis of health and medicine. Topics include the determinants of health, health externalities, health insurance, the health effects of medicine, the supply and demand of medicine, medical quality and regulation, and information asymmetries.

Prerequisites
ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 380 - Economies in Transition**

Credits: 3
Examines problems and achievements of formerly communist and socialist countries including China, Eastern European countries, and Russia and other countries of the former Soviet Union as they transition to more market-oriented economies. Includes market economics and central planning.

Satisfies General Education Requirement: Global understanding

Prerequisites
ECON 103 and 104, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 385 - International Economic Policy**

Credits: 3
Introduces economic way of thinking on trade and international finance. Presents historical and current information on consequences of trade and protectionism.

Notes
May not be applied toward the elective course requirement needed for a major or minor in economics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 390 - International Economics

Credits: 3
Foreign exchange market, balance of payment, foreign trade policies, and theories of international trade.

Satisfies General Education Requirement: Global understanding

Prerequisites
ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 403 - Austrian Economics

Credits: 3
Microeconomic and macroeconomic models and misallocation of resources.

Prerequisites
ECON 306 and 311.

Notes
Alternative economic tools from noted Austrian economists.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 410 - Public Choice

Credits: 3
Applies economic theory, methodology to study nonmarket decision making.

Prerequisites
ECON 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 412 - Game Theory and Economics of Institutions

Credits: 3
Introduces game theory and its relevance for analyzing framework of rules and institutions within which economic processes occur. Applies game theoretical concepts to comparative analysis of causes and effects of alternative institutional arrangements.

Prerequisites
ECON 306 or permission of instructor.
ECON 415 - Law and Economics

Credits: 3
Economic analysis of the law. Topics include introduction to legal institutions and legal analysis; application of economic concepts to the law of property, contracts and torts, criminal and constitutional law; economic efficiency of common law; and public choice perspective on the evolution of the law.

Prerequisites
ECON 306 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 420 - International Money and Finance

Credits: 3
Examines models of balance of payments, exchange rate behavior, and open economy macroeconomics. Includes international financial system and issues such as globalization and international financial instability.

Prerequisites
ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 435 - Economics of Energy

Credits: 3
Examines various issues in the energy industry using tools from microeconomic theory, law and economics and public choice. Topics include issues related to oil, historical and current energy regulation, and environmental issues associated with energy.

Prerequisites
Econ 306.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

ECON 440 - Economic Systems Design: Principles and Experiments
Credits: 3
Introduces design principles to develop systems to allocate resources. Students must participate in experiment demonstrations of different allocation mechanisms. They also are exposed to experimental methods in economics and market design.

**Prerequisites**
MATH 213.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 441 - Economic Systems Design: Case Studies and Analysis**

Credits: 3
Requires students to design and develop mechanism to specific allocation problem. Students develop analytical and working engineering models of their mechanism.

**Prerequisites**
ECON 440.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 442 - Economic Systems Design: Implementation**

Credits: 3
Involves students in developing experimental design to test proposed allocation solution. Design process includes construction of experimental parameters, treatments, and initial test in laboratory setting.

**Prerequisites**
ECON 441.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 445 - Design and Analysis of Experiments**

Credits: 3
Topics include comparing two or more treatments, and computing and interpreting analysis of variance. Discusses randomized block, Latin square, and factorial designs; and applications to economics experiments.

**Prerequisites**
STAT 250, 344; and MATH 351 or IT 250; or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ECON 470 - Economics of regulation

Credits: 3
Examines various issues surrounding concepts of regulation using tools from microeconomic theory and public choice. Topics include antitrust, rate regulation, policy rationales for regulation, and issues of current interest.

Prerequisites
Econ 306.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

ECON 481 - The Development of Economic Thought

Credits: 3
Developments in economic thought from 1500 to the present. Emphasizes historical origins, impact on contemporary economics, and theoretical validity.

Prerequisites
ECON 306 and 311, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 490 - Senior Seminar on Problems in Economics

Credits: 3
Applies economic tools to investigate problems in economics.

Prerequisites
ECON 306 and 311, OM 210, and 90 credits; economics majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 492 - Study Abroad

Credits: 1-6
Study abroad under supervision of George Mason faculty. Course topics, content, and locations vary.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 1-6
When Offered: Fall, Summer, Spring
ECON 496 - Special Topics in Economics

Credits: 3
Subject matter varies.

Prerequisites
Varies with topic.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 498 - Internship

Credits: 1-3
Students find economics-related internship with assistance from Career Services. Pre-internship proposal and final reflections paper required.

Prerequisites
6 upper-level credits of economics, junior standing, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ECON 499 - Independent Study

Credits: 1-4
Individual study of selected area of economics.

Prerequisites
Economics majors with 90 credits, and permission of both department and instructor.

Notes
Directed research paper required. May be taken for a maximum of 6 credits. ECON 306 and 311, or equivalent, are prerequisites to all graduate courses except ECON 600 and 602. Undergraduates require special permission to enroll in 600-level courses.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ECON 535 - Survey of Applied Econometrics

Credits: 3
Applied introduction to estimating economic relationships. Includes simple equation and simultaneous equation system estimation.
Prerequisites
OM 210, and ECON 306 and 311, or permission of instructor.

Notes
Students who take ECON 535 may not take ECON 637 for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 611 - Microeconomic Theory

Credits: 3
Covers theory of behavior of consumers, firms, and resource suppliers; theories of choice under risk and uncertainty; partial
equilibrium analysis of competitive and noncompetitive markets; general equilibrium analysis; and welfare economics.
Introduces capital theory.

Prerequisites
Admission to master's program in economics, or ECON 306 and 311, and MATH 113; or permission of graduate coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 612 - Microeconomic Theory II

Credits: 3
Nature of the firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic
foundations of theories of public finance and public choice.

Prerequisites
ECON 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 615 - Macroeconomic Theory

Credits: 3
Survey course covering monetary theory, theories of consumption and saving, budget deficits, economic growth, international
finance, and monetary and fiscal policies.

Prerequisites
Admission to master's program in economics, or ECON 306 and 311, and MATH 108; or permission of graduate coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ECON 623 - American Economic History**

Credits: 3  
Explores development of American economy and evolution of economic institutions.

**Prerequisites**  
ECON 611 and 615 taken concurrently, or permission of instructor

**Notes**  
ECON 637 recommended.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 630 - Mathematical Economics I**

Credits: 3  
Includes set theory, function, differential calculus, integration, series, and matrix algebra, with special emphasis on economic applications.

**Prerequisites**  
Admission to doctoral or master's program, or ECON 306 and 311, and MATH 113; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 632 - Economic Systems Design Principles and Experiments**

Credits: 3  
Introduces analytical and engineering principles to develop exchange systems. Students must become familiar with literature on applied mechanism design; and understand behavioral aspects of auction systems, matching, assignment and transportation problems, and information markets. Also introduces methods for testbedding systems using experimental economics and statistical design.

**Prerequisites**  
Courses in linear and nonlinear optimization, and linear algebra.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 633 - Economic Systems Design Case Studies and Analysis**

Credits: 3  
Students begin process of doing research in design economic exchange system. Design process includes electronic instructions,
and design of information structures. Students responsible for research into economic issues, and practical design issues.

**Prerequisites**
ECON 632.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 634 - Economic Systems Design Implementation**

Credits: 3  
Students do original research in economic systems design by constructing engineering model of solution to allocation problem. Research includes experimental and statistical design, and complete description of hypothesis related to construction of experimental parameters and treatments to test mechanism. Requires initial test of mechanism in laboratory setting.

**Prerequisites**
ECON 633.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 637 - Econometrics I**

Credits: 3  
Techniques of estimating relationships between economic variables. Introduces multiple regression and problems associated with single equation model-autocorrelation, multicollinearity, and heteroscedasticity.

**Prerequisites**
Acceptance to PhD program in economics, OM 210, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECON 675 - Economics of Religion I**

Credits: 3  
Explores the application of economics methods and insights to the exploration of the relationship between religious and socioeconomic behavior, beliefs, and institutions.

**Prerequisites**
ECON 611, 612, 615, 630, 637.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ECON 676 - Comparative Economic Systems

Credits: 3
Capitalism, socialism, and corporatism historical perspective. Includes examination of economies of representative contemporary countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 695 - Special Topics in Economics

Credits: 3
Topics vary according to interests of instructor. Emphasizes new areas of discipline. May be repeated for credit as topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

ECON 715 - Macroeconomic Theory I

Credits: 3
Covers classical, neoclassical, Keynesian, and post-Keynesian theories of income and employment determination; theories of inflation and growth; and demand for money and implications for effectiveness of monetary vs. fiscal policy.

Prerequisites
Admission to doctoral program in economics, or permission of graduate coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 799 - Master's Thesis

Credits: 1 - 6
Research on approved thesis topic under direction of thesis committee.

Prerequisites
Admission to MA economics program and permission of thesis advisor.

Notes
Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree.

Grading: S/NC
ECON 811 - Microeconomic Theory I

Credits: 3
Theory and applications of behavior of consumers, firms, and resource suppliers. Partial equilibrium analysis of various market structures and introduction to intertemporal choice and capital theory. Review and analysis of classic works in microeconomic theory.

Prerequisites
Admission to doctoral program, or permission of graduate coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 812 - Microeconomic Theory II

Credits: 3
Examines nature of firm; theory of supply; and production functions, factor pricing, and supplies. Introduces microeconomic foundations of theories of public finance and public choice.

Prerequisites
ECON 811.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 816 - Macroeconomic Theory II

Credits: 3
Aggregate economic activity and price levels with emphasis on dynamic models.

Prerequisites
ECON 611 and 715, or permission of instructor.

Notes
Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 817 - Monetary Theory and Policy

Credits: 3
Theory of mechanisms through which central banking affects economic activity and prices. Analyzes demand for money and its relationship to economic activity. Develops monetary theory with emphasis on current theories and controversies in the field.

Prerequisites
ECON 615 and 637, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECON 820 - History of Economic Thought**

Credits: 3
Explores major figures in history of economic thought and tools of analysis they created. Emphasizes classical, neoclassical, and Keynesian theories.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECON 821 - History of Economic Thought II**

Credits: 3
Covers development of economic analysis from marginal revolution of 1877 to present. Emphasizes development of neoclassical economic theory.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECON 823 - Topics in Economic History**

Credits: 3
Offers economic analysis of various historical epochs including Industrial Revolution, evolution of political reform, rise of unions, and growth of government.

**Prerequisites**
ECON 611 and 615.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECON 825 - Political Economy and Public Policy I**

Credits: 3
Covers economic process of public policy formulation and implementation; and economic behavior of principals in policy making and execution.

**Prerequisites**
ECON 611, or permission of instructor.
ECON 826 - Political Economy and Public Policy II

Credits: 3
Specific issues related to political economy of public policy, including privatization, political economy of deficit spending, regulation and deregulation, and economics of rent seeking.

Prerequisites
ECON 611, 615, and 825; or permission of instructor.

ECON 827 - Economic Philosophy

Credits: 3
Analyzes philosophical organization, including interrelations between economics and legal and political institutions; philosophical presuppositions of capitalist economy under constitutional democracy; alternative presuppositions for non-capitalist economies; and critical evaluation of history of ideas in social and moral philosophy.

Prerequisites
ECON 611, or permission of instructor.

ECON 828 - Constitutional Economics

Credits: 3
Analyzes existing and proposed elements of economic constitution. Emphasizes fiscal, monetary, transfer, and regulatory powers of government and constitutional limits on such powers, especially in the United States. Includes analysis of proposed changes in limits.

Prerequisites
ECON 611, or permission of instructor.

ECON 829 - Economics of Institutions
Credits: 3
Analyzes framework of rules and institutions for economic activities and transactions. Includes emergence and working properties of different institutions, and classical and contemporary approaches to economic theory of institutions.

Prerequisites
ECON 611, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 831 - Mathematical Economics II

Credits: 3
Covers mathematical treatment of economic theories. Includes static and dynamic analysis of macromodels; input-output analysis; and optimization techniques such as Lagrangian multipliers, linear programming, nonlinear programming, and game theory.

Prerequisites
ECON 630 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 838 - Econometrics II

Credits: 3
Explores econometric models and simultaneous equation systems. Includes identifying parameters and least squares bias, alternative estimation methods, and block recursive systems.

Prerequisites
ECON 637 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 839 - Constitutional Economics II

Credits: 3
Uses economic analysis and methods to explore more deeply than in Constitutional Economics I specific issues in Constitutional Economics.

Prerequisites
ECON 828

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 840 - Law and Economics I

Credits: 3
Uses economics to analyze U.S. Common-law system, evaluating efficiency and logic of evolution.

Prerequisites
ECON 611, 630, 637.

Notes
No prior knowledge of law required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 841 - Law and Economics II

Credits: 3
Explores empirical analyses of law of property, torts, crime, and family. Also looks at law's effects on freedom and economic growth.

Prerequisites
ECON 840.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 842 - Labor Economics

Credits: 3
Formal models of labor demand, supply, utilization, and wage determination; determination of factor shares in open economy; theory of collective bargaining, and impact of trade unions on wage rates and resource allocation; measurement, types, and causes of unemployment; and cost-benefit analysis of labor training and development projects.

Prerequisites
ECON 611 and 615, or permission of instructor.

Notes
ECON 637 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 844 - Industrial Organization and Public Policy I
Credits: 3
Structure of American industry and underlying determinants. Includes structure and conduct on industrial performance in light of theory and empirical evidence; and rational antitrust policy and analysis of impact on structure and performance.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 846 - Industrial Organization and Public Policy II

Credits: 3
Covers relationship of law, economics, and theories of social control of property rights. Includes theories of market structure and industrial performance.

Prerequisites
ECON 611 and 844.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 849 - Public Finance

Credits: 3
Theoretical and institutional analysis of government expenditure, taxation, debt management, and intergovernmental fiscal relations. Includes allocative and distributional effects of alternative tax and subsidy techniques, principles of benefit cost, and cost-effectiveness analysis for government decisions.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 852 - Public Choice I

Credits: 3
Applies economic theory and methodology to study of nonmarket decision making.

Prerequisites
ECON 611 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 854 - Public Choice II

Credits: 3
Applies public choice approach to study such topics as causes and consequences of governmental growth, behavior of public bureaucracies, and economic reasoning behind constitutional limitations on size and growth of government.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 856 - Urban and Regional Economics

Credits: 3
Regional development and metropolitan growth economics including locational decisions of households and firms, and problems associated with high-density urban economic activity.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 861 - Economics of the Environment

Credits: 3
Analyzes economic models of ecosystems and pollutant discharges into environment. Includes methods of improving economic efficiency and review of public policies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 866 - Economic Development

Credits: 3
Explores forces contributing to or retarding economic progress in developing countries. Includes role of foreign trade, economic integration, foreign investment, multinational corporations, and technological transfers.

Prerequisites
ECON 611 and 615, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECON 869 - International Trade and Policy

Credits: 3
Studies classical, neoclassical, and modern theories of international trade; theory and practice of world trade models such as project LINK; foreign investment and economic growth, tariffs and nontariff barriers, and economic integration; and recent developments, with emphasis on natural resources.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 871 - International Monetary Economics

Credits: 3
Examines international adjustment mechanism, price and income effects, controls, and monetarist approach; development of international monetary system; demand for international reserves; capital movements; and role of International Monetary Fund.

Prerequisites
ECON 615 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 875 - Economics of Religion II

Credits: 3
Studies the relationship between religion and economies as it addresses a wide range of empirical questions concerning the causes and consequences of religious commitment. Issues addressed include the relationship between religious and political conservatism, correlates of socioeconomic factors and religious outcomes, and the contributions of religion to development, political liberty, and civil rights.

Prerequisites
ECON 611, 630, 637, 812.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 880 - Theory of the Market Process I

Credits: 3
Examines theory developed by Menger, Mises, Hayek, and others of the Austrian School; and compares with other popular theories.

Prerequisites
ECON 611, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 881 - Theory of Market Process II**

Credits: 3
Continuation of ECON 880. Topics vary and include market-process approach to analyzing capital accumulation and growth; money and credit institutions; inflation and unemployment; and industrial fluctuations.

Prerequisites
ECON 880, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 885 - Experimental Economics**

Credits: 3
Designed for graduate students to learn how experimental methods can be used to inform economic research and practice. Students expected to have working understanding of basic economic concepts and multivariate calculus.

Prerequisites
ECON 611 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 886 - Experimental Economics II**

Credits: 3
Research in experimental design. Topics represent basic tools to build, test, and implement exchange mechanisms in an applied setting.

Prerequisites
ECON 885 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 895 - Special Topics in Economics**
Credits: 3
Topics vary according to interests of instructor. Emphasizes new areas of discipline.

Notes
May be repeated for credit as topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 896 - Directed Reading and Research**

Credits: 1-9
Independent reading and research paper on a topic agreed on by student and faculty member.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

**ECON 918 - Seminar in Monetary Theory and Policy**

Credits: 3
Selected topics of current interest.

Prerequisites
ECON 817.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 950 - Seminar in Public Finance**

Credits: 3
Important public finance issues treated in seminar format.

Prerequisites
ECON 611 and 849.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ECON 975 - Workshop in Religion and Economics**

Credits: 3
Topics vary, according to interests of instructor. Emphasizes new areas of discipline.
Prerequisites
ECON 675, 875.

Notes
May be repeated for credit as topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 985 - Workshop in Experimental Economics

Credits: 3
Designed for graduate students who have taken Experimental Economics and Economic Systems Design and are applying experimental methods to their own or collaborative research projects.

Prerequisites
ECON 885, 886.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECON 998 - Doctoral Dissertation Proposal Research.

Credits: 1-9
Research on prospective dissertation topic.

Notes
For students who have completed course work but have not yet advanced to candidacy.

Grading: S/NC

ECON 999 - Doctoral Dissertation Research

Credits: 1-15
Research on approved dissertation topic under direction of dissertation committee.

Prerequisites
Admission to PhD economics program, and permission of dissertation advisor.

Notes
May be repeated; 24 credits may be applied to doctoral degree requirement.

Grading: S/NC

Education
EDEP 601 - Creativity and Cognition in the Arts and Media

Credits: 3
Focuses on research on cognition, development, learning, and creativity in the visual arts and media in formal and informal educational settings.

Equivalent to AVT 606

Hours of Lecture or Seminar per week: 0

EDUC 203 - Human Disabilities in American Culture

Credits: 3
Provides a perspective in human disabilities in American culture through awareness, historical and political implications, and technological applications. Demonstrations, discussions, and explorations of this culture by age groups, professions, and life domains will be included.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 300 - Introduction to Teaching

Credits: 3
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines roles of teacher, nature of American schools, and potential contributions of students.

Notes
Requires school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 301 - Educationally Diverse Populations: Handicapped, Gifted, Multicultural

Credits: 3
Introduction to educational issues; not applicable in graduate-level teacher education programs. Introduces psychological, sociological, educational, and physical aspects of diverse populations in today's schools for early and middle education. Emphasizes litigation and legislation pertaining to education of diverse populations.

Notes
Requires school-based field experience during course.
EDUC 302 - Human Growth and Development

Credits: 3
Introduction to educational issues; not applicable in graduate-level teacher education programs. Examines human development through life span with special emphasis on cognitive, language, physical, social, and emotional development of children. Emphasizes contemporary theories of human development and their relevance to educational practice.

Notes
Requires school-based field experience during course.

EDUC 303 - Politics of American Education

Credits: 3
Focus on the study of the American political system. Designed for students studying the American political system and students interested in careers in education. Explores how interactions between various levels and branches of government affect education.

EDUC 372 - Human Development, Learning, and Teaching

Credits: 3
Explores processes that influence intellectual, social, emotional, moral, ethical, and physical development of middle and high school students. Examines research and theories for understanding learning process.

Satisfies General Education Requirement: Social and behavioral science

Notes
School-based field experience required.

EDUC 400 - In-Service Educational Development

Credits: 1-6
Offered at request of school division or other educational agency.
**Prerequisites**  
Employment in professional capacity by sponsoring division or agency.

**Notes**  
Content varies; may be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDUC 415 - Student Teaching in Physical Education**

Credits: 12  
See PHED 415.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 12

**EDUC 422 - Foundations of Secondary Education**

Credits: 3  
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines educational trends and issues.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 500 - In-Service Educational Development**

Credits: 1-6  
Offered at request of school division or other educational agency.

**Prerequisites**  
Employment in professional capacity by sponsoring division or agency.

**Notes**  
Content varies; may be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDUC 511 - Introduction to Education in International Schools**

Credits: 3  
Explores structure and variations of international schools. Includes analysis of human growth and development, overview of
educational psychology, and introduction to using technology across curriculum.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 512 - Teaching Elementary Social Studies in International Schools**

Credits: 3  
Focuses on translation of knowledge and data-gathering processes from social sciences into appropriate and meaningful K-8 social studies experiences. Develops understanding of aims and methodologies of history, geography, government and political science, sociology, anthropology, and psychology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 513 - Teaching Elementary Math in International Schools**

Credits: 3  
Presents topics in school mathematics with particular emphasis on developing common K-8 strands for application in international schools. Focuses on exploring, verifying, and explaining concepts using concrete materials.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 514 - Teaching Elementary Science in International Schools**

Credits: 3  
Covers theory and practices of effective teaching of K-8 science in international schools. Uses laboratory and discovery techniques to design essential science components and integrate them with other disciplines. Introduces design and implementation of activities for developing concepts, solving problems, and strengthening thinking skills in K-8 science.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDUC 516 - Language Across the Elementary International School Curriculum**

Credits: 3  
Introduces current methods of teaching integrated language arts in elementary and middle school settings (K-8). Includes language and literacy development, second language acquisition, reading and writing in content areas, and children's literature. International focus considers needs of second-language learners in regular classroom settings.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDUC 520 - Elementary Curriculum, Instruction, and Assessment in International Schools

Credits: 3
Addresses interrelationship of instruction, curriculum, and assessment in international schools. Includes review of research and effective practice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 521 - Foundations of Education, PK-12

Credits: 3
Introduces various ways of educating and socialization processes in American educational institutions. Analyzes current education practices in terms of history, philosophy, psychology, and sociocultural factors of formal and informal learning. Emphasizes trends, issues, and alternative futures.

Notes
School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 522 - Foundations of Secondary Education

Credits: 3
Analyzes philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasizes applications to all disciplines taught in secondary schools. Examines current educational trends and issues in relation to sociology of secondary school settings.

Notes
Requires field experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 537 - Foundations of Multicultural Education

Credits: 3
Examines multicultural education through historical, sociological, and philosophical foundations. Emphasizes role of ethnicity in development of nation and education system. Includes overview of multicultural and multilingual curricula, and culturally and linguistically responsive instructional and assessment techniques.

Notes
Requires field experience.
EDUC 539 - Human Development and Learning PK-12

Credits: 3
Provides practicing teachers with foundations of psychological theory, research, and professional practice relating to development and learning in inclusive PK-12 classroom settings.

Notes
School-based field experience required.

EDUC 542 - Foundations of Education

Credits: 3
Examines the historical, philosophical, and sociological foundations of education as they relate to elementary schools, with a particular emphasis on teaching a culturally diverse population. Students will develop an understanding of the relationship between society and education.

Prerequisites
Admission into elementary education graduate program; must be taken in programmatic sequence.

EDUC 543 - Children, Family, Culture, and Schools, 4-12 Year Olds

Credits: 3
Examines child and family development and ways children, families, schools, and communities interrelate. Links children's developing physical, social, emotional, and cognitive abilities to planning curriculum and developing instructional strategies.

Prerequisites
Admission to elementary education licensure program.

Notes
Requires school-based field experience.

EDUC 597 - Special Topics in Education
EDUC 598 - Directed Reading, Research, and Individual Projects

Credits: 1-6
Presents various subjects and projects, principally by directed study, discussion, research, and participation under supervision of graduate faculty member.

Prerequisites
Admission to degree program, and permission of dean.

Notes
May be repeated for up to 12 credits.

EDUC 600 - Workshop in Education

Credits: 1-6
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes
May be repeated for credit.

EDUC 606 - Education and Culture

Credits: 3
Uses cultural inquiry process (CIP) and web site to acquire cultural, social, and language-related perspectives on educational processes; and teaches skills to analyze educational settings and expand strategies to address puzzlements in students' own practice.
EDUC 611 - Cultural Issues in Second Language Acquisition

Credits: 3  
Explores impact of linguistic and cultural diversity among students in teaching of second language across curriculum. Draws on theoretical foundations in second language acquisition, cross-cultural communication, socio- and psycholinguistics, and educational anthropology.

Prerequisites  
Admission to TESL or bilingual or multicultural education program, doctoral status, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 612 - Inquiry into Practice

Credits: 2  
Provides experience using research skills to foster systematic and thoughtful inquiry into classroom practice. Explores relevant classroom practice issues through critical writing, action, and research. Emphasizes cultural diversity and gender issues in research.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

EDUC 613 - How Students Learn

Credits: 3  
Advanced course in study of learning based on research and theory from different disciplines. Focuses on increasing students' learning through study of different learning systems, and understanding each learner in context of learning process itself.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDUC 614 - Designing and Assessing Teaching and Learning

Credits: 2  
Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0
EDUC 615 - Educational Change

Credits: 2
Explores influences on educational change at classroom, school, community, state, and national levels. Investigates implications of factors and influences that affect educational change. Analyzes influences and factors, and involves students in reflecting on their own experiences.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDUC 621 - Teaching and Learning in the International Baccalaureate Primary Years Program

Credits: 3
Focuses on principles and practices of Primary Years Program (PYP) of the International Baccalaureate (IBO), organized around four areas of inquiry: curriculum processes, teaching and learning, assessment, and professional learning. Final course in preparation for IBO Practitioner Award.

Prerequisites
Admission to GSE, enrollment in FAST TRAIN initial licensure program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 622 - Curriculum Development across IB Programs

Credits: 3
Explores the development of practical knowledge about the design and structure of the IB programs' curricula. Provides a foundation for understanding how the programs are implemented and how student learning developed within them is assessed.

Prerequisites
Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 623 - Models and Strategies for Teaching and Learning in IB Schools

Credits: 3
Focuses on the development of the capacity of teachers in IB schools to adopt appropriate teaching strategies and techniques instrumental in ensuring program learning outcomes are achieved. Furthermore, participants develop a deep understanding of the critical relationship between teaching and learning.

Prerequisites
Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the
instructor.

**EDUC 624 - Assessment and Learning in IB Schools**

Credits: 3
Explores the essential role of assessment in teaching IB learners. Addresses formative and summative assessment practices as an integral part of the IB curriculum as well as the use of assessment for differentiation and planning.

**Prerequisites**
Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

**EDUC 626 - Inquiry into Action: IB Teachers, Learners, and Schools**

Credits: 3
Uses the action research and qualitative process to help educational practitioners plan and complete an action research study related to IB learners, teachers, or schools. Furthermore, the course examines the social, cultural, and ethical issues of conducting research with students.

**Prerequisites**
Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.

**EDUC 627 - Contemporary Issues and Trends in IB**

Credits: 3
Focuses on current IB research, trends, and issues as well as international, national, and state/provincial legislation concerning schools and the potential impact on IB schools. Participants are prepared as leaders and advocates for IB programs and their students.

**Prerequisites**
Admission to GSE, enrollment in FAST TRAIN IB certificate program, and completion of EDUC 621, or permission of the instructor.
EDUC 634 - The Role of the School Library Media Specialist

Credits: 3
Introduces basic concepts of library science, and professional responsibilities and ethical standards of library media specialist. Addresses this role as instructional partner and resource for students and staff.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 640 - Selection and Utilization of Library Media Materials and Equipment, Including Technology

Credits: 3
Introduces prospective library media specialists to various uses of technology in library setting, and elements involved in media collection development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 641 - Reference and Bibliography

Credits: 3
Covers library reference process, and bibliographic tools to meet needs of library patrons seeking information.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 642 - Organization and Technical Processing of Materials

Credits: 3
Emphasizes application of basic cataloging principles in bibliographic description of print and nonprint materials. Students develop procedures for organizing, cataloguing, and maintaining media collection using technological support.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 643 - Organization Administration and Evaluation of the School Library Media Center

Credits: 3
Develops skills to implement effective school library media program. Focuses on management principles, interpersonal skills, and lifelong learning skills in relation to evaluating services, collection development, and public relations for school libraries.
EDUC 644 - Production of Media and Instructional Materials

Credits: 3
Provides guidance and practice with available audiovisual and computer-based technology to plan, produce, and present instructional materials.

EDUC 645 - Literature for Young Adults

Credits: 3
Provides in-depth knowledge of young adult literature, and ability to relate that knowledge to library programs.

Notes
Requires extensive reading of young adult literature.

EDUC 646 - Literature for Children

Credits: 3
Develop critical abilities to select and use literature for children. Focuses on selecting materials to support curriculum and promote reading.

EDUC 670 - The Culture of Teaching

Credits: 3
Explores roles, responsibilities, and realities of teaching in secondary schools. Examines teaching in context of contemporary educational issues, legal matters, diverse and exceptional learners, classroom management, and professional practices.

Prerequisites
Admission to secondary education program

Corequisite
Initial methods course.
EDUC 671 - Schools and Culture in the Future

Credits: 3
Focuses on relationship between schools and communities from the past to the future. Research-based education reform, ideas from futurists, and ISTE technology standards influence teacher planning for students in the 21st century.

Prerequisites
EDUC 522 and EDUC 670

EDUC 672 - Human Development and Learning: Secondary Education

Credits: 3
Explores developmental issues associated with middle and high school students, and theories that provide basis for understanding learning process. Addresses implications for designing instruction and curriculum.

EDUC 674 - Assessing Learning and Teaching in the Secondary School Classroom

Credits: 3
Supports beginning teachers' development and design of assessment practices for promoting student learning. Focuses on individual differences and classroom, teacher, school, and cultural factors that impact assessment; different types and purposes of assessment; and relationship of assessment to national and state standards.

EDUC 675 - Research in Secondary Education

Credits: 3
The portfolio is submitted during the semester the candidate is enrolled in EDUC 675. Helps beginning teachers become more effective by critiquing various research paradigms, reviewing the research literature, and systematically collecting and interpreting evidence to improve practice. Emphasizes linking evidence of student learning to make informed instructional decisions.

Notes
This capstone class of the MEd program should be taken last.
EDUC 695 - Northern Virginia Writing Project-Service Program

Credits: 1-3
Offered at request of school division or other educational agency.

Equivalent to ENGL 695

Prerequisites
Admission to graduate program, or permission of dean.

Notes
Content varies. May be repeated with permission of department, but no more than 6 credits in EDUC 695, 695, or 699 may be applied toward master's degree.

EDUC 697 - Theory of Composition

Credits: 3
Acquaints classroom teachers with current theory relating to writing and teaching composition. Focuses on making explicit participants' theories, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to ENGL 697

Prerequisites
ENGL 615 and 695, or equivalent.

EDUC 751 - Mentoring/Supervising Intern Teachers and Mentor Teacher Career Development

Credits: 3
Examines multiple roles of teachers as they mentor and supervise intern teachers in schools. Covers career development, leadership, and instructional roles and strategies. Designed to assist intern teachers in their first year, and provide quality career and staff development to their mentors.
EDUC 795 - Seminar in Brain-Compatible Teaching and Learning in Multicultural Settings

Credits: 3
Course examines brain-compatible learning styles theories and their impact on today’s classrooms comprised of culturally, linguistically, and cognitively diverse (CLCD) learners. Situates current pedagogy and its efficacy at reaching all learners. Issues examined are those involving perception, attention, consciousness, memory and emotion. Focus is particularly placed on responsive teaching methods highlighting situated cognition, brain-based learning principles and authentic learning principles.

Prerequisites
Admission to the PhD in Education program or permission of instructor.

EDUC 797 - Advanced Topics in Education

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes
May be repeated for credit with GSED approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 800 - Ways of Knowing

Credits: 3
Provides understanding of characteristic ways of knowing in various liberal arts disciplines while examining subject matter, scope, key concepts, principles, methods, and theories. Analyzes philosophical traditions underlying educational practice and research.

Prerequisites
Admission to PhD program.

Notes
Required course during first spring semester of study in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 802 - Leadership Seminar

Credits: 3
Intensive study of leadership, emphasizing decision and change processes, and assessment and development of leadership skills.
Prerequisites
Admission to PhD program.

Notes
Required course during first semester of study in the program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 805 - Research and Scholarship in Education

Credits: 2
Provides an intellectual framework for research and scholarship in education, including consideration of specific scholarship of CEHD faculty as representative of the range of educational scholarship that make up the educational research community.

Prerequisites
Admission to PhD in Education Program

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDUC 850 - The Study of Teaching

Credits: 3
Explores the history and development of the search for teaching effectiveness. The course will trace the various definitions of effectiveness and the methods created to assess effectiveness.

Prerequisites
EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 851 - Research on Teacher Education

Credits: 3
Explores the history and development of the search for effectiveness in the preparation of preservice teachers and the continuing professional development of practicing teachers. The students will examine the substance and gaps in the study of the education of educators.

Prerequisites
EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDUC 853 - World Perspectives of Teacher Education

Credits: 3
Focuses on the cross-cultural analysis of current U.S. and internationally based teacher preparation and continuing professional development pedagogical models, policy reforms, and their historical contexts.

Prerequisites
Admission to the doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 870 - Education Policy: Process, Context, and Politics

Credits: 3
Examines public policy decision-making in education at local, state, and national levels, and its impact on education institutions, students, and public. Focuses on government entities' authority over education decision-making, and resolution of competing policy arguments in political arena.

Prerequisites
Admission to PhD in education program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 871 - Advanced Policy Issues in Education

Credits: 3
In-depth analysis of selected education policy issues. Focuses on issue interactions and education-related policy actions by different levels of government.

Prerequisites
EDUC 870 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 872 - Social Science Research and Education Policy

Credits: 3
Focuses on research base used to support education policy actions. Focuses on analyzing strength of this research.

Prerequisites
Admission to PhD program, and EDUC 870 and 871; or equivalent doctoral-level policy course work.
EDUC 873 - Education Policy: Comparative and International Perspectives

Credits: 3
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Prerequisites
EDUC 870 and admission to PhD program

EDUC 874 - The Achievement Gap

Credits: 3
Focuses on achievement gap in schools. Students research and analyze gaps in student achievement related to race and ethnicity, limited English proficiency, family background, gender, poverty, and ableism, and practices designed to close the gap.

Prerequisites
Admission to PhD program or permission of instructor

EDUC 875 - Contemporary and Emerging Issues in Education Policy

Credits: 3
Focuses on identifying and analyzing factors that promote new initiatives in education policy agenda. Attention given to nontraditional sources of education policy initiatives.

Prerequisites
EDUC 870

Corequisite
EDUC 870

Notes
Must be admitted to PhD program.
EDUC 876 - Teacher Development and Education Policy

Credits: 3
Focuses on the impact of policy actions at the local, state, and national levels on teacher preparation and continuing professional development.

Prerequisites
EDUC 870 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 880 - Introduction to International Education

Credits: 3
Using interdisciplinary approach, addresses education policy issues that transcend national boundaries and have implications for educators in fostering social justice and global awareness.

Prerequisites
Admission to PhD in education program or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 881 - Seminar in Bilingual Education: Policy

Credits: 3
Examines historical development of education for language minority students in United States, including federal and state legislation and court decisions. Explores policy issues regarding administrative program models, instructional approaches, curricular reform, and assessment policies for language minority students developed in response to legal mandates, legislative decisions, and school reform movement.

Prerequisites
Admission to PhD program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 882 - Seminar in Bilingualism and Second Language Acquisition: Theory and Research

Credits: 3
Examines theoretical foundations of bilingual and ESL education through focus on linguistics, anthropology, sociology, psychology, and education research addressing language minority students.

Prerequisites
Admission to PhD program, or permission of instructor.

**EDUC 883 - Seminar in Sociocultural Theory**

Credits: 3
Explores and analyzes the theoretical contributions of sociocultural theory. Focuses on the growing body of contemporary research on literacy, equity in education and emancipatory teaching for diverse students.

**Prerequisites**
Admission to PhD program in Education or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDUC 890 - Doctoral Internship in Education**

Credits: 1-6
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

**Prerequisites**
Admission to PhD program, and prior approval of advisor and PhD director.

**Notes**
Requires 100 hours of on-site internship completed over at least a five-week period. Up to 6 credits of EDUC 890 may be applied toward PhD degree requirements.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

**EDUC 892 - Social Justice and Equity in International Education**

Credits: 3
Examines ideological, cultural, and systemic structural inequities in various educational settings at national and international levels. Focuses on educational practices that promote equity and social change throughout the world.

**Prerequisites**
EDUC 895

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
EDUC 893 - Seminar in Educational Anthropology

Credits: 3
Examines theories and research from educational anthropology and educational sociology to clarify and address contemporary educational issues and concerns. Focuses on U.S. public schools, with comparative materials from other educational settings and societies.

Prerequisites
Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 894 - Seminar in Multicultural Education

Credits: 3
Examines knowledge base, policy issues, and curricular and instructional features of multicultural education in United States and other countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 895 - Seminar in Emerging Issues of Education

Credits: 3
Study of selected emerging issues or problems in education. Students engage in research, study, discussion, and writing.

Prerequisites
Successful completion of EDUC 800.

Notes
May be repeated for credit. Up to 6 hours of 895 course work may be applied to PhD requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 897 - Independent Study for the Doctor of Philosophy in Education

Credits: 1-6
Structured learning experience to extend and develop skills and knowledge relative to field of professional expertise.

Prerequisites
Admission to PhD program and prior approval of advisor and PhD director.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
EDUC 994 - Advanced Internship in Education

Credits: 3
Internship in setting related to student's major area of study. Requires minimum of 100 hours completed over at least a five-week period. Each intern works with appropriate staff member in cooperating school, school system, or other educational institution or agency.

Prerequisites
admission to PhD program, and prior approval of advisor and PhD director.

Notes
Internship must be in setting that differs from regular employment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDUC 998 - Doctoral Dissertation Proposal

Credits: 1-6
Prerequisites
Admission to candidacy in PhD program; successful completion of doctoral qualifying exam; and EDRS 810, 811, and 812 or their equivalents.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDUC 999 - Doctoral Dissertation Research

Credits: 1-9
Provides continued faculty assistance on individual basis to complete dissertation planned in EDUC 998 and initiate new projects.

Prerequisites
Admission to candidacy in PhD program and faculty approval of dissertation proposal.

Notes
May be repeated for credit. No more than 11 credits of EDUC 998 and 999 may be applied toward minimum PhD degree requirements.

Hours of Lecture or Seminar per week: 1-9
Hours of Lab or Studio per week: 0

Education Leadership
EDLE 412 - Schools and the Law

Credits: 3
Provides an extensive overview of legal and ethical issues in schools. In the course, students will review and analyze key legal and ethical principles, read court decisions, and examine federal and state statutes.

Prerequisites
EDUC 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 420 - Organization and Management of Schools

Credits: 3
Studies basic issues in leadership, organization, and governance of schools. Explores theories and models of leadership how leaders conceptualize school organization, with an emphasis on distributed leadership in professional environments, systems thinking, and organizational change.

Prerequisites
EDUC 300

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 597 - Special Topics in Education

Credits: 1-6
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisites
Admission to program in GSE.

Notes
May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDLE 610 - Leading Schools and Communities

Credits: 3
Examines critical functions of leadership and organizational management, complex decision making responsibilities of school executives, and constructive relationships between schools and communities. Incorporates historical, ethical, philosophical, and
sociological foundations of American education and the impact of organizational structure on reform and student achievement. Practical and academic emphasis on leadership skill development and dispositions.

**Prerequisites**
EDLE 620 or EDSE 743; EDLE 690; EDLE 791; EDLE 612; EDLE 614 or EDSE 702; EDLE 616 or EDSE 626, and EDLE 618.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 612 - Education Law**

Credits: 3  
Provides legal foundations of U.S. public schools. Examines general principles of statutory and case law, and applies judicial decisions to educational environments. Focuses on legal responsibilities, constraints, and opportunities of public school officials. Includes component of Special Education law.

**Prerequisites**
EDLE 620 or EDSE 743; EDLE 690 and EDLE 791.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 614 - Managing Financial and Human Resources**

Credits: 3  
Explores basic functions in financial and human resource management. Examines legalities, ethics, and politics of resource procurement and allocation. Provides experiences to help students better understand tasks typically performed by school leaders.

**Prerequisites**
EDLE 620, EDLE 690, and EDLE 791.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 616 - Curriculum Development and Evaluation**

Credits: 3  
Examines the relationship of the written, taught, and tested curriculum and identifies critical leadership decisions that can positively impact student achievement. Identifies components of effective curriculum guides. Mini-document for personal use is constructed.

**Prerequisites**
EDLE 620, EDLE 690, and EDLE 791

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDLE 618 - Supervision and Evaluation of Instruction

Credits: 3
Provides a theoretical and practical overview of the supervision and evaluation of instruction. Introduces the domains of supervision and inquiry into current issues and best practices in supervision. Uses a variety of interactive exercises to assist in the development of practical skills for using the clinical process and developmental approach to supervision.

Prerequisites
EDLE 620 or EDSE 743; EDLE 690, and EDLE 791

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 620 - Organizational Theory and Leadership

Credits: 3
Studies basic organizational theories and models of leadership and management. Emphasizes shared leadership in professional environments, communication skills, systems thinking, and personal and organizational change. Bridges theory to practical applications in educational settings.

Corequisite
Application to the Education Leadership Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 634 - Contemporary Issues in Education Leadership

Credits: 3
Examines current and emerging issues and trends impacting education. Includes demographic shifts; globalization; technology; data-based decision making; inclusion of diverse learners in American schools; and recent research on student achievement when influenced by race, gender, and poverty.

Prerequisites
Admission to program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDLE 636 - Adult Motivation and Conflict Management in Education Settings: A Case Study Approach

Credits: 3
Uses case studies and simulations to examine conflict mediation and resolution skills, and safety and security issues. Focuses on
character and ethics education in schools, coaching and mentoring, and adult motivation to support positive behaviors in work settings.

**Prerequisites**
Admission to program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 690 - Using Research to Lead School Improvement**

Credits: 3  
Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects.

**Prerequisites**
EDLE 620 or 743 (may be taken concurrently if application has been submitted to the MEd in Education Leadership program or the MEd in EDLE with a Concentration in Special Education Leadership program)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 791 - Internship in Educational Leadership**

Credits: 3  
Offers wide range of practical experiences and professional challenges in authentic educational settings. Activities emphasize strategic, instructional, organizational, political, and community leadership.

**Prerequisites**
Admission to the MEd in Education Leadership (EDLE) program or MEd in EDLE with a concentration in Special Education Leadership; EDLE 620 or 743 (may be taken concurrently)

**Notes**
Course must be taken in second term of program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDLE 797 - Advanced Topics in Education**

Credits: 1-9  
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes**
May be repeated for credit with CEHD approval.
EDLE 801 - Foundations of Education Leadership History and Leadership

Credits: 3  
Emphasizes historical foundations of U.S. education and evolution of school, district, and state leadership. Students begin work on analytical literature review.

Prerequisites  
Admission to PhD in education program.

Corequisite  
EDLE 802.

Notes  
May be taken as corequisite with EDLE 802. First in three-course sequence.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDLE 802 - Foundations of Education Leadership: Ethics, Philosophy, and Law

Credits: 3  
Emphasizes ethical, philosophical, and legal foundations of U.S. education; and the evolution of school, district, and state leadership. Students continue work on analytical literature review.

Prerequisites  
EDLE 801.

Notes  
May be taken as corequisite with EDLE 801. Second in three course sequence.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

EDLE 803 - Foundations of Education Leadership: Economics and Leadership

Credits: 3  
Emphasizes economic foundations of U.S. education, and evolution of school, district, and state leadership. Students complete work on analytical literature review.

Prerequisites  
EDLE 801 and 802.

Notes  
Third in a three-course sequence.
EDLE 815 - Conceptual Frameworks in Education Leadership

Credits: 3
Introduces three different disciplinary perspectives on education leadership, and helps identify and articulate different conceptual frameworks. Major focus is designing a conceptual framework that informs research questions.

Prerequisites
Admission to PhD in education program or permission of instructor

EDLE 895 - Emerging Issues in Administration and Supervision

Credits: 3
Covers selected emerging issues in educational leadership. Students engage in research, study, discussion, and writing about various topics selected for study.

Prerequisites
Admission to PhD program, or permission of instructor

Education Research

EDRS 531 - Educational and Psychological Measurement

Credits: 3
Emphasizes techniques and principles used in the construction, administration, and quantification of measuring devices for evaluation purposes. Discusses interpretation of standardized tests of ability, aptitude, achievement, interest, and personality.

EDRS 590 - Education Research
Develops skills, insights, and understanding to perform research, with emphasis on interpreting and applying research results. Critiques research, and uses findings in educational settings.

**EDRS 597 - Special Topics in Education**

Credits: 1-6
Provides advanced study on selected topic or emerging issue in American or international education.

**Prerequisites**
Admission to program in GSE.

**Notes**
May be repeated for credit with CEHD approval.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

**EDRS 620 - Quantitative Inquiry in Education**

Credits: 3
Examines fundamental concepts and methods of statistics as applied to educational problems, including descriptive and inferential statistics.

**Prerequisites**
EDRS 590 or equivalent experience.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDRS 621 - Qualitative Inquiry in Education**

Credits: 3
Focuses on basic application of naturalistic research methods. Examines major theoretical frameworks and qualitative research techniques, which include content analysis, coding, and interpretation of data.

**Prerequisites**
EDRS 590 or equivalent experience.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
EDRS 630 - Educational Assessment

Credits: 3
Examines research theory and practice relevant to assessments. Focuses on assessment strategies for students including developing skills to select, score, and interpret educational assessments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 631 - Program Evaluation

Credits: 3
Introduces perspectives of existing and emerging issues, theories, and models of program evaluation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 797 - Advanced Topics in Education

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes
May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDRS 810 - Problems and Methods in Education Research

Credits: 3
Advanced course in interpreting and applying education research methods. Emphasizes comparison of alternative philosophies of research, ways of formulating questions and hypotheses, research plans, and analysis procedures. Students evaluate existing studies, and investigate a range of research approaches.

Prerequisites
Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 811 - Quantitative Methods in Educational Research
Credits: 3
Emphasizes advanced methods of conducting research using quantitative methods of data collection, and analysis appropriate for research in education. Includes design of experimental and quasieperimental research studies, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regression.

Prerequisites
Satisfactory completion of EDUC 810 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 812 - Qualitative Methods in Educational Research

Credits: 3
Teaches how to apply qualitative data collection and analysis procedures in educational research, including ethnographic and other field-based methods, and unobtrusive measures.

Prerequisites
Satisfactory completion of EDUC 810 or equivalent, or permission of instructor.

Notes
Emphases vary depending on student interests and needs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 820 - Evaluation Methods for Educational Programs and Curricula

Credits: 3
Explores development and types of current systems and models for evaluating educational programs and curricula. Emphasizes evaluation needs and problems of public and private elementary and secondary schools, and colleges and universities. Also considers needs of government agencies, industry, and health-related organizations.

Prerequisites
Successful completion of EDRS 810, or permission of instructor.

Notes
Prior completion of EDRS 811 and 812 helpful but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRS 821 - Advanced Applications of Quantitative Methods

Credits: 3
Advanced study of applications of quantitative methods in educational research, reinforcing and building on concepts and skills acquired in EDRS 811. Uses modular approach, and provides advanced study of techniques appropriate to survey research,
group-experimental and quasi-experimental research, selected multivariate procedures and factor analysis, and quantitative synthesis (meta-analysis) of research. Combines text reading assignments, critiques, and discussion of relevant journal articles; and application activities.

**Prerequisites**
EDRS 810 and 811.

**EDRS 822 - Advanced Applications of Qualitative Methods**

Credits: 3
Advanced seminar devoted to study of current topics in qualitative research. Deals with cutting-edge information on selected advanced topics in qualitative research, and provides opportunities to apply new skills and knowledge to projects related to students’ interests.

**Prerequisites**
EDRS 810 and 812.

**EDRS 823 - Advanced Research Methods in Single Subject/Case Design**

Credits: 3
Prepares students to conduct research using single subject design and single case study design. Provides understanding of salient features as well as advantages, disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to student interests.

**Prerequisites**
EDRS 810, 811, and 812.

**EDRS 825 - Advanced Research Methods in Self-Study**

Credits: 3
Prepares students to conduct research using the self-study research methodology, a qualitative research approach for systematically examining one's practitioner role for improvement-aimed purposes with contributions to the educational field and knowledge base.

**Prerequisites**
Admission to PhD in Education program; EDRS 810; EDRS 811 or EDRS 812
EDRS 890 - Research in Practice

Credits: 3
Interns work with appropriate staff member in cooperating school, school system, or other educational institution, agency, or setting.

Augmenting Knowledge Sets

Educational Psychology

EDEP 401 - Introduction to Multimedia/Hypermedia

Credits: 3
Provides an overview of the principles and tools used within the fields of e-learning, instructional design and multimedia/hypermedia technologies. Students apply knowledge and skills learned by creating an e-learning module.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 402 - Brain, Behavior, and Neuroimaging in Children

Credits: 3
Focus on research regarding the development of cognitive processes in children, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Prerequisites
At least junior standing or sophomore honors/university scholar candidate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 405 - The Neuroscience of Learning and Cognition

Credits: 3
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 655

Prerequisites
Junior standing or sophomore honors/university scholar candidate.

**When Offered:** Spring

### EDEP 550 - Theories of Learning and Cognition

Credits: 3  
Explores theoretical perspectives on learning and cognition, and relation of these theories to construction of learning environments, student motivation, classroom management, assessment, and technology to support teaching and learning.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDEP 551 - Principles of Learner Motivation

Credits: 3  
Focuses on theories and concepts of human motivation; and examines strategies, techniques, and interventions that promote and sustain learner motivation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDEP 650 - High-Stakes Assessment and Accountability Systems

Credits: 3  
Focuses on school effectiveness, assessment tools, and accountability models on state and national levels. Explores issues and methods relevant to educational policy, standardized testing, and classroom assessment.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EDEP 651 - Modern Measurement with Applications in Education and the Behavioral Sciences

Credits: 3  
Provides background in modern measurement theory and applications. Covers topics from classical test theory, generalizability theory, and item response theory. Applications include advanced techniques in test construction, analysis of binary and rating data, test equating, item fairness, and cognitive diagnosis.

**Prerequisites**  
EDRS 531

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDEP 652 - Process of Learning and Development

Credits: 3
Explores different theoretical perspectives on learning and development. Focuses on historical and contemporary theories of learning and cognitive development, and examines current research and its application in educational settings.

Prerequisites
EDEP 550.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 653 - Culture and Intelligence

Credits: 3
Explores different theoretical perspectives on intelligence as they relate to individual and cultural differences. Examines issues related to heritability and measures of intelligence, and intelligence in the cultural context.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 654 - Learning, Motivation, and Self-Regulation

Credits: 3
Focuses on theories and research on self-regulation of academic learning. Presents multidimensional conceptual framework for studying and applying self-regulation in educational contexts.

Prerequisites
EDEP 550, 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 655 - The Neuroscience of Learning and Cognition

Credits: 3
Focuses on research regarding the development of cognitive processes in children and adults of various ages, their neurobiological substrates, and the imaging technology used to explore the functioning brain.

Equivalent to EDEP 405

Prerequisites
EDEP 550
When Offered: Spring

EDEP 798 - Directed Reading, Research, and Individual Projects in Educational Psychology

Credits: 3
Offers a capstone experience to students after completion of majority of program coursework with the exception of 6 credit hours. Enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisites
Project mentor approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Grading: Graduate Special
When Offered: Fall, Summer, Spring

EDEP 799 - Thesis in Educational Psychology

Credits: 3
The thesis is based on original research. It enables students to demonstrate their integrative knowledge and skills accrued through study in their concentration area in educational psychology.

Prerequisites
Thesis chair approval and completion of coursework in the MS in Educational Psychology exclusive of 6 credit hours.

Grading: Graduate Special
When Offered: Fall, Summer, Spring

EDEP 820 - Teaching, Learning, and Cognition

Credits: 3
Focuses on foundational educational psychology theories including cognitive, social, and constructivist themes and their implications for improving instructional practices and learning at all developmental levels and content areas.

Prerequisites
EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDEP 821 - Sociocultural Processes in Learning, Instruction, and Motivation
Credits: 3
Examines processes by which social, cultural, and linguistic variables influence human behavior. Focuses on differences within and between cultural groups related to student's learning and achievement in educational settings.

Prerequisites
EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EDEP 822 - Advanced Learning, Motivation, and Self-Regulation**

Credits: 3
Examines development of self-regulatory and motivational processes as they relate to educational practice. Emphasizes how processes influence students' self-motivation and achievement in various domains.

Prerequisites
EDUC 800, 805; EDLE 802; and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EDEP 823 - Research Project in Educational Psychology: Sequence I**

Credits: 3
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding developing research questions and a sound methodological approach for their study.

Prerequisites
EDEP 820, 821, 822.

Notes
First in two-course sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EDEP 824 - Research Project in Educational Psychology: Sequence II**

Credits: 3
Focuses on development and implementation of research studies in educational psychology. Students acquire skills regarding collecting, analyzing, and interpreting data.

Prerequisites
EDEP 823.

Notes
Second in two course sequence.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### Electrical and Computer Engineering

**ECE 101 - Information Technology for Electrical Engineers**

Credits: 3  
Introduces fundamental concepts in information technology that provide technical underpinning for state-of-the-art applications. Presents fundamental engineering skills and perspective on range of information technology through lectures and hands-on experiments. Discusses ethics, professionalism, historical development, and social implications of IT.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

**ECE 201 - Introduction to Signal Analysis**

Credits: 3  
Provides technically more rigorous introduction to problems and tools commonly encountered by electrical engineers. Introduces mathematical modeling of engineering problems and their solutions. Introduces standard software packages for electrical engineering as tools to simulate engineering problems on computer. Mathematical and computer models are related to physical reality provided by hands-on experiments.

**Prerequisites**  
Grade of C or better in MATH 113.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1  
**When Offered:** F, S

**ECE 220 - Signals and Systems I**

Credits: 3  
First of two-semester sequence of courses providing mathematical background for many ECE courses taken in junior and senior years. Introduces methods of representing continuous time signals and systems, and interaction between signals and systems. Covers analysis of signals and systems via differential equations and transform methods; Laplace and Fourier transforms as convenient analysis tools; frequency response of systems; and stability of systems in time and frequency domains. Presents application examples from communications, circuits, control, and signal processing.

**Prerequisites**  
C or better in ECE 201 or equivalent.
Corequisite
MATH 203, 214

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: F, S, SUM

ECE 280 - Electric Circuit Analysis

Credits: 5
Includes circuit analysis using superposition, equivalent circuits, and transient and steady-state analysis of RL, RC, and RLC circuits; applications of Laplace transform in circuit analysis; sinusoidal excitations and phasors; resonance; filters; AC steady-state analysis; coupled coils; and three-phase circuits. Includes lab demonstrating and investigating circuit analysis concepts.

Prerequisites
Grade of C or better in PHYS 260 and 261

Corequisite
ECE 220 must be taken concurrently or before ECE 280.

Notes
Builds on simple circuit concepts introduced in PHYS 260.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 2
When Offered: F, S, SUM

ECE 301 - Digital Electronics

Credits: 3
Introduces digital systems, circuits, and computers. Topics include binary systems and codes, digital logic gates and circuits, microelectronics and integrated circuits, coding and multiplexing, multivibrators, shift registers, counters, A/D converters, and elementary computer architecture.

Prerequisites
Grade of C or better in MATH 125 or MATH 112.

Notes
Not intended for those majoring in electrical or computer engineering.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

ECE 303 - Digital Design/Intro Assembly Language
Credits: 4
Introduces digital systems, circuits, and computers. Topics include binary systems and codes; digital logic gates and circuits; encoding and multiplexing; shift registers, counters, and elementary computer architecture/MIPS computer organization; and assembly language, including instruction format, data definition, load/store/arithmetic instructions, and addressing. Includes laboratory.

Prerequisites
CS 211 or IT 101, 108, and 212.

Notes
Not intended for electrical or computer engineering majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2
When Offered: F, S

ECE 305 - Electromagnetic Theory

Credits: 3
Static and time varying electric and magnetic fields, dielectrics, magnetization, Maxwell's Equations, and introduction to transmission lines. Course uses vector calculus and algebra of complex numbers.

Prerequisites
Grade of C or better in PHYS 260 and MATH 214.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

ECE 320 - Signals and Systems II

Credits: 3
Second of two-semester sequence providing mathematical background for many ECE courses taken in junior, senior years. Provides methods of representing and analyzing discrete-time signals and systems. Studies effects of converting from continuous-time to discrete time, and presents Z-transform as convenient analysis tool. Emphasizes powerful concept of frequency response of systems developed in first semester. Studies random signals in continuous and discrete time. Presents application examples from communications, circuits, control, and signal processing.

Prerequisites
Grade of C or better in ECE 220 and MATH 203.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: F, S, SUM

ECE 331 - Digital System Design
Credits: 3
Covers principles of digital logic and digital system design and implementation in VHDL. Topics include number systems; Boolean algebra; analysis, design, and minimization of combinational logic circuits; analysis and design of synchronous and asynchronous finite state machines; and introduction to VHDL and behavioral modeling of combinational and sequential circuits.

Corequisite
ECE 280 and 332.

Notes
ECE 332 should be taken concurrently with ECE 331. Credit may not be received for ECE 301 and 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

ECE 332 - Digital Electronics and Logic Design Lab

Credits: 1
Lab associated with ECE 331.

Prerequisites
PHYS 261 or 265, or permission of instructor

Corequisite
ECE 331.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: F, S, SUM

ECE 333 - Linear Electronics I

Credits: 3
Principles of operation and application of electron devices and linear circuits. Topics include semiconductor properties, diodes, bipolar and field effect transistors, biasing, amplifiers, frequency response, operational amplifiers, and analog design.

Prerequisites
Grade of C or better in ECE 280.

Notes
ECE 334 is usually taken concurrently with ECE 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S, SUM

ECE 334 - Linear Electronics Lab I
Prerequisites
PHYS 261 or 265, or permission of instructor

Corequisite
ECE 333.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: F, S, SUM

ECE 410 - Principles of Discrete-Time Signal Processing

Credits: 3
Introduces fundamental concepts of digital signal processing. Emphasis on the theoretical and numerical tools used for frequency
domain analysis of sampled signals. Topics covered include sampling, the discrete Fourier transform, fast transform algorithms,
spectral analysis, and digital filtering.

Prerequisites
ECE 320 with grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 421 - Classical Systems and Control Theory

Credits: 3
Introduces analysis and synthesis of feedback systems, including functional description of linear and nonlinear systems, block
diagrams and signal flow graphs; state-space representation of dynamical systems, frequency response methods, Root Locus,
Nyquist, and other stability criteria; performance indices and error criteria; and applications to mechanical and electromechanical
control systems.

Equivalent to SYST 421

Prerequisites
Grade of C or better in ECE 220, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S, SUM

ECE 422 - Digital Control Systems

Credits: 3
Introduces analysis, design of digital control systems, Z-transform, discrete linear systems, frequency domain, and state variable
techniques. Discusses use of microcomputers in control systems.

**Prerequisites**
Grade of C or better in ECE 320 and 421.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

### ECE 429 - Control Systems Lab

Credits: 1  
Laboratory experiments for topics in control systems analysis, design, and implementation with emphasis on using microcomputers.

**Prerequisites**
Grade of C or better in ECE 421.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** S

---

### ECE 430 - Principles of Semiconductor Devices

Credits: 3  
Introduces solid-state physics and its application to semiconductors and semiconductor devices. Topics include band theory, doping, p-n junctions, diffusion theory, low-frequency circuits, devices including bipolar transistor, MOSFET, CMOS, and photo transistors.

**Prerequisites**
MATH 214, ECE 305, and a grade of C or better in ECE 333; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

### ECE 431 - Digital Circuit Design

Credits: 3  
Analysis and design of discrete and integrated switching circuits. Topics include transient characteristics of diodes, bipolar, and field-effect transistors; MOS and bipolar inverters; nonregenerative and regenerative circuits; TTL, ECL, IIL, NMOS, and CMOS technologies; semiconductor memories; VLSI design principles; and SPICE circuit analysis.

**Prerequisites**
Grade of C or better in ECE 331 and 333.

**Hours of Lecture or Seminar per week:** 3
ECE 433 - Linear Electronics II

Credits: 3
Second course in linear electronics. Covers differential amplifiers, feedback circuits, power amplifiers, feedback amplifier frequency response, analog integrated circuits, operational amplifier systems, oscillators, wide band and microwave amplifiers, and computer-aided design.

Prerequisites
Grade of C or better in ECE 333.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

ECE 434 - Linear Electronics II Laboratory

Credits: 1
Second lab course in linear electronics involving analysis and design of topics listed in ECE 433.

Prerequisites
ECE 334

Corequisite
ECE 433.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: F, S

ECE 435 - Digital Circuit Design Laboratory

Credits: 1
Lab experiments for topics covered in ECE 431.

Prerequisites
ECE 334

Corequisite
ECE 431.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: F, S
ECE 437 - Principles of Microelectronic Device Fabrication

Credits: 3
Introduces fundamentals of microelectronic semiconductor device fabrication technology. Processing steps include photolithography, oxidation, diffusion, ion implantation, chemical vapor deposition, ohmic contact metalization, interconnects, packaging, MOS process integration, and bipolar process integration. Laboratory project integral to course.

Prerequisites
ECE 333 or 430, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

ECE 445 - Computer Organization

Credits: 3
General overview of operating a digital computer. Topics include computer arithmetic, arithmetic unit, hardwired and microprogrammed control, memory, register-to-register, input-output operations, and behavioral modeling of computer organization using VHDL.

Prerequisites
Grade of C or better in ECE 331 and ECE 332 and in either CS 262 or CS 222.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

ECE 447 - Single-Chip Microcomputers

Credits: 4
Explores designing with single-chip microcomputers and microcomputer interfacing. Topics include role of microcomputers compared with microprocessors and other computers, microcomputer architecture and organization, real-time control issues, assembly language programming for control, design of control software, input/output methods, design tools, and available single-chip microcomputers. Students select project and design, and construct system including single-chip microcomputer and ancillary hardware to implement control system.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Grade of C or better in ECE 445 and in either CS 367 or CS 222.

Notes
This course is highly recommended for ECE 492/493 students interested in using microcontroller technology in their senior design projects. It should be taken before ECE 493.

Hours of Lecture or Seminar per week: 3
ECE 448 - FPGA and ASIC Design with VHDL

Credits: 4
Practical introduction to modeling of digital systems with VHDL for logic synthesis. Overview and comparative analysis of design flow and tools for FPGAs and standard-cell ASICs. Discusses verification of digital systems using testbenches, prototyping boards and modern testing equipment, and illustrates VHDL-based design methodology with multiple examples from communications, control, DSP, and cryptography. Laboratory experiments create link between simulation and actual hardware implementation based on FPGA boards.

Prerequisites
Grade of C or better in ECE 445.

ECE 450 - Introduction to Robotics

Credits: 3
Introduces mobile robotic systems. Topics include overview of power systems, motors, behavior-based programming, sensors, and sensor integration. Design projects conceived, developed, implemented, and presented.

Prerequisites
CS 112, ECE 280 and ECE 331 and either ECE 332 or ECE 303, all with grade of C or better.

ECE 460 - Communication and Information Theory

Credits: 3
Topics include review of important concepts from signals and systems theory and probability theory; Gaussian processes and power spectral density; digital transmission through additive white Gaussian channels; sampling and pulse code modulation; analog signal transmission and reception using amplitude, frequency and phase modulation; and affects of noise on analog communication systems.

Prerequisites
Grade of C or better in ECE 220 and STAT 346 Introduction to analog and digital communications.
ECE 461 - Communication Engineering Laboratory

Credits: 1
Lab experiments in analog and digital communication areas covered in ECE 460.

Prerequisites
ECE 460 and 334.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: F, S, SUM

ECE 462 - Data and Computer Communications

Credits: 3
Introduces modern data communications and computer networks. Topics include point-to-point communication links and transmission of digital information, modems, and codecs; packet switching, multiplexing, and concentrator design; multiaccess and broadcasting; local area and wide area networks; architectures and protocols for computer networks; OSI reference model and seven layers; physical interfaces and protocols; and data link control layer and network layer. Provides examples of data networks.

Prerequisites
STAT 344 or 346, and ECE 220, and ECE 331 or 303, all with grade of C or better.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

ECE 463 - Digital Communications Systems

Credits: 3
Introduces digital transmission systems. Topics include quantization, digital coding of analog waveforms, PCM, DPCM, DM, baseband transmission, digital modulation schemes, ASK, FSK, PSK, MSK, QAM, pulse shaping, intersymbol interference, partial response, voice-band and wideband modems, digital cable systems, regenerative repeaters, clock recovery and jitter, multipath fading, digital radio design, optimal receiver design, MAP receiver, and probability of error.

Prerequisites
ECE 460.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 464 - Modern Filter Design

Credits: 3
Offers solution to filtering approximation problem via Butterworth, Chebyshev, Elliptic, and Bessel approaches. Covers transfer
function scaling and type transformations, review of Z-transform, time and frequency domain effects of A/D and D/A conversion, and digital filter design and implementation.

**Prerequisites**
ECE 320.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**ECE 465 - Computer Networking Protocols**

Credits: 3  
Introduces computer networking protocols and concepts, emphasizing Internet and Internet Protocol Suite. Covers computer networking protocols at application, transport, and network layers, including multimedia networking protocols, and network security and management.

**Prerequisites**
STAT 346, and CS 112, both with a grade of C or better.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**ECE 467 - Network Implementation Laboratory**

Credits: 1  
Hands-on experience in implementing, configuring, and operating local and wide area networks in live laboratory environment equipped with modern local and wide area network devices and technologies. Students exposed to real-world computer networking scenarios including local area network implementation, asynchronous communication setup, and wide area network implementation using various protocols and technologies covering all layers of computer network protocol stack.

**Prerequisites**
ECE 462.

**Corequisite**
ECE 465.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

**ECE 469 - Microwave Circuit Laboratory**

Credits: 1  
Introduces microwave engineering laboratory techniques and measurements, and the design, fabrication, and test of microwave microstrip circuits.
Prerequisites
ECE 305 and 334, or permission of instructor.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

ECE 491 - Engineering Seminar

Credits: 1
Engineering ethics, professionalism, role of engineer in society, current topics, and employment opportunities.

Prerequisites
90 credits applicable to electrical engineering or computer engineering program, and COMM 100.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: F, S

ECE 492 - Senior Advanced Design Project I

Credits: 1

Conception of senior design project and determination of feasibility of proposed project. Work includes developing preliminary design and implementation plan. Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Senior status in electrical engineering or computer engineering program, and COMM 100 and ENGL 302.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 493 - Senior Advanced Design Project II

Credits: 2

Implementation of project for which preliminary work was done in ECE 492. Project includes designing and constructing hardware, writing required software, conducting experiments or studies, and testing complete system. Requires oral and written reports during project and at completion.
Satisfies General Education Requirement: Synthesis requirement

Prerequisites
ECE 492, preferably in preceding semester.

Notes
Students planning to use microcontroller technology in their projects should enroll in ECE 447 before taking ECE 493. Completing this course with a C or better satisfies university's general education synthesis requirement.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ECE 498 - Independent Study in Electrical and Computer Engineering

Credits: 1-3
Directed self-study of special topics of current interest in ECE. Topic must be arranged with an instructor and approved by department chair before registering.

Notes
Maximum 3 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: F, S

ECE 499 - Special Topics in Electrical Engineering

Credits: 0-4
Topics of special interest to undergraduates.

Prerequisites
Permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum of 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: F, S

ECE 507 - Seminar in Emerging Technologies

Credits: 3
Study of emerging technologies, how they are identified, how they evolve, actions which may encourage or stifle their growth, government influences, societal influences, examples of success and failure, and some lessons to be learned which are unique to government information technology. Topics covered will include a general introduction to emerging technologies, with emphasis
on IT, discussion of difficulty in letting go of legacy systems, the DOD Global Information Grid, Cyberwarfare, Complex Adaptive Systems, and Federal Government support of Research and Development. Cannot be used in the PhD IT program.

Prerequisites
Graduate Standing.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

### ECE 511 - Microprocessors

Credits: 3  
Introduces microprocessor software and hardware architecture. Includes fundamentals of microprocessor system integration, instruction set design, programming memory interfacing, input/output, direct memory access, interrupt interfacing, and microprocessor architecture evolution. Studies Intel family of microprocessors, and reviews other microprocessor families and design trends.

Prerequisites  
ECE 445 or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

### ECE 520 - Applications of Analog and Digital Integrated Circuits

Credits: 3  
Studies analog and digital integrated circuits mainly from communications applications point of view. Covers analog, digital, and mixed (analog/digital) building block circuits used in system design including operational amplifiers, comparators, voltage regulators, video amplifiers, oscillators, modulators, phaselocked loops, multiplexers, active filters, A/D and D/A converters, and optoelectronic circuits.

Prerequisites  
ECE 433 and 431, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

### ECE 521 - Modern Systems Theory

Credits: 3  
Introduces linear systems theory and design of linear feedback control systems. Reviews linear algebra, state variables, state-space description of dynamic systems, analysis of continuous-time and discrete-time linear systems, controllability and observability of linear systems, and stability theory.

Prerequisites  
ECE 521.
ECE 524 - Process Control Fundamentals

Credits: 3
Provides fundamentals of process control methodologies that are applicable in manufacturing industries, such as semiconductor manufacturing. Introduces the basic concepts of controlled processes equipped with digital control loops, starting with basic discrete-time models, deterministic and random signals and parameter estimation. Provides exposition of fundamentals and applications of feedback control principles, self-tuning control, run-to-run control and system diagnostics.

Prerequisites
Graduate standing.

ECE 525 - Hardware/Software Integration

Credits: 3
Provides fundamentals of modern computer system and hardware/software integration through the use of quantitative approaches, cost-performance-power tradeoffs, and engineering designs. Introduces design considerations where hardware and software interlock with each other. Course topics include quantitative computer design, exploitation of hardware and software parallelism at instruction-, multiprocessor-, and thread-level, memory hierarchy, storage system, interconnection network, and embedded system design.

Prerequisites
Graduate standing

ECE 528 - Introduction to Random Processes in Electrical and Computer Engineering

Credits: 3
Probability and random processes are fundamental to communications, control, signal processing, and computer networks. Provides basic theory and important applications. Topics include probability concepts and axioms; stationarity and ergodicity; random variables and their functions; vectors; expectation and variance; conditional expectation; moment-generating and characteristic functions; random processes such as white noise and Gaussian; autocorrelation and power spectral density; linear filtering of random processes, and basic ideas of estimation and detection.

Prerequisites
ECE 220 and STAT 346, or permission of instructor.

ECE 531 - Introduction to Wireless Communications and Networks
Presents the basics of modern wireless communications and wireless networking at the first-year graduate level. Topics include wireless signal design, channel characterization, receiver structure, multiple access technologies, cellular concepts, capacity enlargement, mobility management, and wireless/wireless interworking.

**Prerequisites**
ECE 460 or equivalent

**When Offered:** Fall

---

**ECE 535 - Digital Signal Processing**

Credits: 3
Representation analysis and design of digital signals and systems. Covers sampling and quantization, Z-transform and Discrete Fourier Transform, digital filter realizations, design techniques for recursive and nonrecursive filters, Fast Fourier Transform algorithms, and spectrum analysis. Additional topics may include adaptive filtering, homomorphic digital signal processing, digital interpolation and decimation, and VLSI signal processors.

**Prerequisites**
ECE 320 and 528, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** S

---

**ECE 537 - Introduction to Digital Image Processing (DIP)**

Credits: 3
First course in digital-image processing; introduces scanning systems, focal plane array detectors, data acquisition methods, display hardware, image preprocessing algorithms, feature extraction, and basic image processing methods. Semester-long image processing project includes utilizing modern image processing system prototyping software.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**ECE 538 - Medical Imaging**

Credits: 3
Provides an introduction to the physical, mathematical and engineering foundations of modern medical imaging systems, medical image processing and analysis methods. In addition, this course introduces engineering students to clinical applications of medical imaging. The emphasis is on diagnostic ultrasound and magnetic resonance imaging methods, although several other
modalities are covered. The course also provides an overview of recent developments and future trends in the field of medical imaging, discusses some of the challenges and controversies, and involves hands-on experience applying the methods learned in class to real-world problems.

**Prerequisites**
Graduate Standing or permission of instructor; ECE 320 or equivalent; PHYS 262 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

---

**ECE 540 - Modern Telecommunications**

Credits: 3  
Comprehensive overview of telecommunications including current status and future directions. Topics include review of evolution of telecommunications; voice and data services; basics of signals and noise, digital transmission, network architecture, and protocols; local area, metropolitan, and wide area networks and narrowband ISDN; asynchronous transfer mode and broadband ISDN; and satellite systems, optical communications, cellular radio, personal communication systems, and multimedia services. Uses examples of real-life networks to illustrate concepts and gain insight.

Equivalent to TCOM 500

**Prerequisites**
Graduate standing

**Notes**
For students outside of the program. Cannot be applied toward degrees in electrical or computer engineering.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 541 - Computer Architectures - A Survey**

Credits: 3  
Survey of computer architectures. Covers basic concepts, definitions, single and multiple processor machines, multicore processors, parallel processing, pipelining, instruction level parallelism (ILP), simultaneous multithreading (SMT), and current trends in computer architectures. Course designed for MS AIT students. Cannot be used for credit in MSCpE or MSEE.

**Prerequisites**
IT 212 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 542 - Computer Network Architectures and Protocols**

Credits: 3  
Introduction to architectures and protocols of computer networks and concept of packet switching. Topics include ISO standard
layer model, physical interfaces and protocols, data link control, multiaccess techniques, packet switching, routing and flow control, network topology, data communication subsystems, error control coding, local area network, satellite packet broadcasting, packet radio, interconnection of packet-switching networks, network security and privacy, and various examples of computer networks.

**Prerequisites**
STAT 344 or equivalent, and graduate standing in VSITE.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F, S, SUM

**ECE 545 - Digital System Design with VHDL**

Credits: 3  
Introduction to the design of complex digital systems using hardware description languages. Emphasizes the design methodology based on the partitioning of a digital system into a datapath and control unit. Introduces a clear sequence of steps leading from specification to synthesizable, register transfer level (RTL), and fully verified HDL code. Covers VHDL for digital circuit design, including dataflow, structural, and behavioral coding styles. Introduces and illustrates the concepts of VHDL simulation, verification, synthesis, mapping, placing, routing, timing analysis and performance optimization. Requires semester long project devoted to the design of a complex digital system using VHDL as a hardware description language and FPGA as an implementation platform.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 548 - Sequential Machine Theory**

Credits: 3  
Theoretical study of sequential machines. Topics include sets, relations and lattices, switching algebra, functional decomposition, iterative networks, representation, minimization and transformation of sequential machines, state identification, state recognizers, and linear and stochastic sequential machines.

**Prerequisites**
ECE 331, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**ECE 549 - Theory and Applications of Artificial Neural Networks**

Credits: 3  
Emphasizes dynamical systems approach to neural networks. Covers simple tools for neural network analysis, Liapunov stability,

### Prerequisites

ECE 320 or equivalent.

### Hours of Lecture or Seminar per week: 0

### Hours of Lab or Studio per week: 0

---

**ECE 563 - Introduction to Microwave Engineering**

Credits: 3  
Studies propagation, storage of microwave signals. Examines transmission lines, waveguides, resonators, scattering parameters, Smith charts, measurement techniques, instrumentation, and microwave striplines and microstrips.

### Prerequisites

ECE 305, or permission of instructor.

### Hours of Lecture or Seminar per week: 3

### Hours of Lab or Studio per week: 0

---

**ECE 565 - Introduction to Optical Electronics**

Credits: 3  
Introduces optoelectronic devices for generation, detection, and modulation of light. Topics include electro-optic modulators, gas, solid state and semiconductor lasers, photodetectors, and detector arrays.

### Prerequisites

ECE 305 and 333.

### Hours of Lecture or Seminar per week: 3

### Hours of Lab or Studio per week: 0

---

**ECE 567 - Optical Fiber Communications**

Credits: 3  
Studies components and integration of fiber-optic transmission systems. Topics include optical fibers, signal degradation, optical sources, power launching and coupling, photodetectors, receiver circuits, link analysis, and optical measurements.

### Prerequisites

ECE 565 or permission of instructor.

### Hours of Lecture or Seminar per week: 3

### Hours of Lab or Studio per week: 0
ECE 568 - Introduction to Imaging Sensors

Credits: 3
Imaging sensors are being used extensively in defense, homeland security, biomedical, scientific and consumer applications. This course provides introduction to the operating principles of the front-end optics and sensor technologies. In addition to the familiar cameras, the course will also discuss advanced microscopy, 3D medical imaging (tomography, MRI) and radar-imaging systems.

Prerequisites
Graduate status or permission of instructor.

ECE 584 - Semiconductor Device Fundamentals

Credits: 3
Studies principals of operation of semiconductor devices based on solid state physics. Topics include band theory of solids, intrinsic and extrinsic semiconductor properties, pn junction diode, bipolar junction transistor, Schottky diode, metal insulator semiconductor junctions, field-effect transistors, and hetero-structures.

Prerequisites
ECE 430 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

ECE 586 - Digital Integrated Circuits

Credits: 3
Studies design and analysis of digital integrated circuits, emphasizing CMOS technology. Reviews MOSFET operation and SPICE modeling. Covers analysis and design of basic inverter circuits, structure and operation of combinational and sequential logic gates, dynamic logic circuits, chip I/O circuits, and brief introduction to VLSI methodologies.

Prerequisites
ECE 331 and 430, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

ECE 587 - Design of Analog Integrated Circuits

Credits: 3
Studies design methodologies of CMOS-based analog integrated circuits. Topics include differential amplifiers, current sources, output stages, operational amplifiers, comparators, frequency response, noise, and computer-aided design.

Prerequisites
ECE 333 and 430, or permission of instructor.
ECE 590 - Selected Topics in Engineering

Credits: 3
Selected topics from recent developments, and applications in various engineering disciplines. Designed to help professional engineering community keep abreast of current developments.

Prerequisites
Graduate standing or permission of department.

ECE 611 - Advanced Microprocessors

Credits: 3
Covers principles of advanced 32-bit and 64-bit microprocessors. Includes microprocessor structure and architecture, pipeline hazards, instruction-level parallelism, superscalar and superpipelined execution, thread-level parallelism; and RISC principles and advantages. Offers examples of RISC-type microprocessors. Studies in detail Intel IA-32, Intel and HP IA-64, and Motorola M68000 families.

Prerequisites
ECE 511 or permission of instructor.

ECE 612 - Real-Time Embedded Systems

Credits: 3
Study of real-time operating systems and device drivers for embedded computers. Emphasizes microprocessor systems and associated input device sampling strategies, including interrupt driven and polled I/O. Covers basic input/output operations, analog to digital conversion methods, I/O programming techniques and process, and communication control methodologies. Involves design project.

Prerequisites
ECE 511 or permission of instructor.
ECE 620 - Optimal Control Theory

Credits: 3
Detailed treatment of optimal control theory and its applications. Topics include system dynamics and performance criteria, calculus of variations and Pontryagin's minimum principle, computational methods in optimal control, and applications of optimal control.

Prerequisites
ECE 521 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 621 - Systems Identification

Credits: 3

Prerequisites
ECE 521 and 528, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 624 - Control Systems

Credits: 3
Analysis, design, and implementation of digital feedback control systems. Topics include discrete-time models, pole-placement, controller design methods, MIMO system decoupling, and observer design.

Prerequisites
ECE 421 and 521, or permission of instructor.

Notes
Course may include simulation and design project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 630 - Statistical Communication Theory

Credits: 3
Introduces optimum receiver design in the additive white Gaussian noise environment. Topics include efficient signal set design,
modulation techniques, matched filter, correlation detector, coherent and noncoherent detections, fading and diversity channels,
random amplitude and phase, diversity techniques, performance bounds of communications, and waveform communications.

Prerequisites
ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 633 - Coding Theory

Credits: 3
Mathematics of coding groups, rings, and fields, and polynomial algebra. Topics include linear block codes, generator and parity
check matrices; error syndromes, binary cyclic and convolutional codes; and implementation of encoders and decoders.

Prerequisites
ECE 528 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 635 - Adaptive Signal Processing

Credits: 3
Introduces adaptive systems and adaptive signal processing. Topics include correlation functions and matrices; performance
functions; search of minimum; steepest descent and Newton algorithms; least mean squares algorithm; noise perturbed search and
misadjustment; sequential regression algorithm and convergence issues; recursive least squares algorithm and forgetting factor;
frequency domain algorithms; adaptive equalization; pseudorandom binary sequences and system identification; adaptive
interference cancellation; and adaptive beam forming and arrays. Simulates adaptive algorithms.

Prerequisites
ECE 528.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 638 - Fast Algorithms and Architectures for Digital Signal Processing

Credits: 3
Studies recent advances in development of signal processing algorithms and relevant computational architectures. Topics include
fast polynomial transforms, Winograd's algorithms, multirate processing of digital signals, spectral estimation, adaptive filtering,
and wavelet transforms.

Equivalent to IT 838

Prerequisites
ECE 535 or permission of instructor.
ECE 641 - Computer System Architecture

Credits: 3
Advanced course in computer architecture. Covers definitions, multiple processors, VLSI architecture, data flow, computation, semantic gap, high-level language architecture, object-oriented design, RISC architecture, and current trends in computer architecture.

Prerequisites
ECE 511 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 642 - Design and Analysis of Computer Communication Networks

Credits: 3
Introduces queuing theory. Other topics include concentrator design, multiplexing, capacity assignments, random access schemes, polling and probing techniques, topology design, flow control and routing, packet radio, protocol specification, and validation.

Prerequisites
ECE 542 and 528, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 643 - Network Switching and Routing

Credits: 3
Fundamentals of switching and routing with application to communications networks, both wireline and wireless. Topics include concepts of space and time for switching and forwarding of data, scalability and performance, label swapping, algorithms for routing and path computation, constrained route optimization, traffic theory, control and signaling, and traffic engineering. The course also covers the concepts and issues underlying the design and implementation of the contemporary switched networks.

Prerequisites
ECE 528 and 542

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 644 - Architectures and Algorithms for Image Processing
Credits: 3
Architectures and algorithms to analyze and process pictorial information. Topics include systems and techniques for digital representation of images; image scanning methods and their applications; picture processing languages; image data structures; feature detection, extraction, and reconstruction; detection of symmetries; systems and methods for regular decomposition; image desegmentation; object thinning; real-time orthogonal transformations; and applications. Includes design project.

Prerequisites
ECE 511 and 537, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 645 - Computer Arithmetic

Credits: 3
Covers computer arithmetic as applied to the design of general-purpose microprocessors and application-specific integrated circuits for cryptography, coding, and digital signal processing. Focuses on efficient implementations of all basic arithmetic operations in three major domains: integers, real numbers, and elements of Galois Fields GF(2^n). Illustrates tradeoffs among various hardware algorithms and architectures depending on primary optimization criteria, such as speed, area, and power consumption. Demonstrates the use of software implementations as a source of test vectors for verification of hardware implementations and for evaluating hardware versus software speed-up.

Prerequisites
ECE 545 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 646 - Cryptography and Computer Network Security

Credits: 3
Topics include need for security services in computer networks, basic concepts of cryptology, historical ciphers, modern symmetric ciphers, public key cryptography (RSA, elliptic curve cryptosystems), efficient hardware and software implementations of cryptographic primitives, requirements for implementation of cryptographic modules, data integrity and authentication, digital signature schemes, key exchange and key management, standard protocols for secure mail, the web and electronic payments, security aspects of mobile communications, key escrow schemes, zero-knowledge identification schemes, smart cards, quantum cryptography, and quantum computing.

Prerequisites
ECE 542 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 650 - Robotics
Introduces robotics and advanced automation from electrical engineering standpoint. Topics include hardware overview; coordinate systems and manipulator kinematics; differential motion and inverse Jacobian; manipulator path control and motion planning; design and control of articulated hands; sensory feedback; machine vision; and applications to industrial automation.

**Prerequisites**
ECE 521 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 665 - Fourier Optics and Holography**

Credits: 3
Studies optical systems for processing temporal signals as well as images. Topics include use of coherent optical systems for image processing and pattern recognition, principles of holography, and acousto-optic systems for radar-signal-processing optical computers.

**Prerequisites**
ECE 565.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 670 - Principles of C4I**

Credits: 3
Provides broad introduction to fundamental principles of command, control, communication, computing, and intelligence (C4I). Applies principles, techniques to wide range of civilian and military situations. Discusses modeling, simulation of combat operations; studies sensing, fusion, and situation assessment processes. Derives optimal decision-making rules. Discusses concepts of C4I architectures and tools to evaluate and design systems such as queuing theory.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 672 - Introduction to Architecture-Based Systems Engineering**

Credits: 3
Explores life cycles in systems engineering and human, organizational, process, and technological basis for systems integration and architecting. Includes societal and cultural basis; conceptual frameworks; structure, function, and purpose; risk management; user requirements and functional specifications; bid and proposal process; System of Systems issues; systems management; increasing returns to scale, network effects, and path dependency issues; and evolutionary systems.

Equivalent to SYST 619

**Prerequisites**
SYST 510 or 520, or ECE 521; or permission of instructor.
ECE 673 - Discrete Event Systems

Credits: 3
Introduces modeling and analysis of discrete event dynamical systems. Covers elements of discrete mathematics, and focuses on Petri Net Models and their basic properties: locality and concurrency, condition and event systems, place and transition nets, Colored Petri Nets, reachability graphs (occurrence nets), and invariant analysis. Includes issues in Petri Nets and temporal logic; stochastic Petri Nets; relation to other discrete event models of dynamical systems; and applications of the theory to modeling and simulation and systems engineering problems, especially in systems architecting.

Equivalent to SYST 620

Prerequisites
ECE 521, or SYST 611 or permission of instructor.

ECE 674 - Systems Architecture Design

Credits: 3
Intensive study of relationships of different types of architecture representations and methodologies to obtain them. Uses approaches based on systems engineering constructs, such as structured analysis and software engineering constructs, including object orientation, to develop architecture representations and derive executable model of information architecture. Executable model is then used for behavior analysis and performance evaluation. Discusses roles of systems architect and engineer. Uses examples from current practice including C4ISR architectures.

Equivalent to SYST 621

Prerequisites
SYST 619/ECE 672 and SYST 620/ECE 673 or permission of instructor.

ECE 675 - System Integration and Architecture Evaluation

Credits: 3
Explores human, organizational, societal, cultural, and technological aspects of system integration problem. Includes role of architectures in systems integration, and integration in System of Systems and Federation of Systems. Evaluates architectures; measures performance and effectiveness; analyzes alternative architecture and integration strategies; and assesses system capabilities.

Equivalent to SYST 622
Prerequisites
SYST 620 or ECE 673 and SYST 621 or ECE 674 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 678 - Systems Engineering of Information Architectures

Credits: 3
An intensive study of the relationships between different types of architecture representations and the methodologies used to obtain them. Approaches based on systems and software engineering constructs, such as object orientation and structured analysis are used to develop architecture representations or views. The roles of the systems architect and the systems engineer are discussed. The function of an executable model of the information architecture in deriving requirements is presented. Examples from current practice including C4ISR architectures are included.

Equivalent to SYST 631

Prerequisites
SYST 520 and SYST 619 or ECE 672.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 679 - System Integration and Architecture Evaluation

Credits: 3

Equivalent to SYST 632

Prerequisites
SYST 631/ECE 678

Notes
This course does not meet the requirements for the MS-SYST or MS-ELEN degrees.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 680 - Physical VLSI Design

Credits: 3
Introduces NMOS, CMOS, and BiMOS integrated circuit technology and fabrication. Reviews MOS and BiCMOS inverter structures and operation, MOS and BiCMOS circuit design processes, MOS layers, stick diagrams, design rules, and layout.
Covers subsystem design and layout illustration of design process through design of 4bit arithmetic processor and its parts, adder, multiplier, register, and memory cells; and aspects of system timing, test and testability. Reviews currently available VLSI CAS tools.

Prerequisites
ECE 586 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 681 - VLSI Design for ASICS

Credits: 3
Introduces VLSI design of application-specific integrated circuits (ASICs) from front-end to back-end using HDL and modern design automation software. Covers simulation, synthesis of digital circuits using standard cells, static timing analysis, formal verification, power analysis, test generation/fault simulation, and physical design including floor planning, placement, routing, and design rule checking. Addresses deep submicron CMOS scaling issues and other advanced topics.

Prerequisites
ECE 545, or permission of instructor.
Corequisite
ECE 586

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 682 - VLSI Test Concepts

Credits: 3
Broad introduction to basic concepts, techniques, and tools of modern VLSI testing. Fundamentals of defect modeling, fault simulation, design for testability, built-in self-test techniques, and failure analysis. Test economics, physical defects and fault modeling, automated test pattern generation, fault simulation, design for test, built-in self test, memory test, PLD test, mixed-signal test, Iddq test, boundary scan and related standards, test synthesis, diagnosis and failure analysis, automated test equipment, embedded core test.

Prerequisites
ECE 586

ECE 684 - MOS Device Electronics

Credits: 3
Study of Metal Oxide Semiconductor (MOS)-based device theory, characteristics, models, and limitations. Topics include MOS capacitor, MOSFETs, CMOS, charge coupled devices, scaling, hot carrier effects, latchup, radiation effects, and isolation techniques.

Prerequisites
ECE 689 - VLSI Processing

Credits: 3
In-depth study of various steps in silicon VLSI circuit processing. Includes thermal oxidation, diffusion, ion implantation, epitaxial growth, polysilicon, metal and insulator layer deposition, photolithography, and MOS processing integration. Involves hands-on laboratory projects and using process simulator SUPREM.

Prerequisites
ECE 584 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 698 - Independent Reading and Research

Credits: 1-3
Independent study under the supervision of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 698 for master’s credit.

Prerequisites
Graduate standing, completion of at least two core courses, and permission of instructor.

Notes
Requires written report. May be taken no more than twice for graduate credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 699 - Advanced Topics in Electrical and Computer Engineering

Credits: 1-6
Advanced topics of current interest in electrical and computer engineering. Topics chosen so they do not duplicate other courses in department. Active participation encouraged in form of writing and presenting papers in research areas.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 721 - Nonlinear Systems

Credits: 3
Includes motivating examples; analysis techniques include basic fixed-point theory, implicit function theorem, and dependence of trajectories on initial data and parameters. Also covers computational simulation techniques; stability theory including Lyapunov's direct method; nonlinear control systems of input-output and absolute stability; strong positive real transfer functions; feedback linearization of nonlinear systems; nonlinear canonical forms; nonlinear decoupling; sliding control; and applications to adaptive control, neural networks, and robotics.

Equivalent to IT 846

Prerequisites
ECE 620 or ECE 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 722 - Kalman Filtering with Applications

Credits: 3
Detailed treatment of Kalman Filtering Theory and its applications, including some aspects of stochastic control theory. Topics include state-space models with random inputs, optimum state estimation, filtering, prediction and smoothing of random signals with noisy measurements, all within the framework of Kalman filtering. Additional topics are nonlinear filtering problems, computational methods, and various applications such as global positioning system, tracking, system control, and others. Stochastic control problems include linear-quadratic-Gaussian problem and minimum-variance control.

Equivalent to IT 841

Prerequisites
ECE 521 and 528 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 727 - System Identification and Adaptive Control

Credits: 3
Advanced treatment. Topics include identification algorithms, their convergence and accuracy, and computational aspects; model reference and self-tuning adaptive control, transients, stability, and robustness; and intelligent schemes to improve robustness. Students required to study literature and complete computer project.

Prerequisites
ECE 621, or permission of instructor.

Hours of Lecture or Seminar per week: 3
ECE 728 - Random Processes in Electrical and Computer Engineering

Credits: 3
Recommended for advanced master's and doctoral students. Provides background in random processes needed for pursuing graduate studies and research in statistical signal processing, communications, control, and computer networks. Covers probability spaces, random variables, Lebesque integration, conditional mean on a sigma field, convergence of random variables, limit and ergotic theorems, Markov processes, and Martingales.

Prerequisites
ECE 528 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

ECE 731 - Digital Communications

Credits: 3
Digital transmission of voice, video, and data signals. Covers signal digitization, pulse code modulation, delta modulation, low bit-rate coding, multiplexing, synchronization, intersymbol interference, adaptive equalization, frequency spreading, encryption, transmission codes, digital transmission using band-width compression techniques, and satellite communications.

Prerequisites
ECE 630 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 732 - Mobile Communication Systems

Credits: 3
Topics include modeling of mobile communication channel, signal set and receiver design for mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Examples of mobile communication systems are presented, including pan-European GSM, North American D-AMPS, and personal communication systems.

Prerequisites
ECE 542 and 630.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 734 - Detection and Estimation Theory

Credits: 3
Introduces detection and estimation theory with communication and radar and sonar applications. Topics include classical
detection and estimation theory, detection of known signals in Gaussian noise, signal parameter and linear waveform estimation, and Wiener and Kalman filters.

Equivalent to IT 830

**Prerequisites**
ECE 528.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 737 - Spread Spectrum Communications**

Credits: 3  
Introduces spread spectrum communications. Topics include pseudo noise spread spectrum systems, feedback shift registers, jamming strategy, code acquisition, synchronization, tracking, gold codes, burst-communication systems, time-hopping, frequency hopping, and multiple access communications.

Equivalent to IT 932

**Prerequisites**
ECE 630.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 738 - Advanced Digital Signal Processing**

Credits: 3  
Theory and practice of advanced digital signal processing techniques. Topics include computationally efficient high-speed algorithms for convolution, correlation, orthogonal transforms, multirate processing of digital signals, filter banks, multiresolution time frequency and time-scale analysis of one- and two-dimensional signals, and parallel signal processing.

**Prerequisites**
ECE 638.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ECE 741 - Wireless Networks**

Credits: 3  
Theoretical foundation and practice in design of wireless networks. Emphasizes mobility and teletraffic modeling aspects, and networking issues and state-of-the-art performance evaluation methods of radio and system infrastructure applicable to wireless cellular and local networks. Topics include analysis of mobility, handoff, control traffic loading, resource allocation techniques, multiaccess protocols, admission policy and call control, network infrastructure and multilayer configuration, wireless LANs, and packet data systems.
Prerequisites
ECE 642 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 742 - High-Speed Networks

Credits: 3
Theories for design, analysis and evaluation of high-speed networks including scalability, performance, and issues related to local area, metropolitan, and wide area networks. Includes architecture, protocols, and applications of high-speed networks; performance modeling of high-speed networks; flow control and routing; design issues for high-speed switches, interfaces, and controllers; all optical networks and their architectures; examples of high-speed computer networks and Internet working; video, imaging, and multimedia applications; software issues, robustness, and applications; and selected topics in current research areas in high-speed computer networks.

Equivalent to IT 834

Prerequisites
ECE 528 and 642, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 743 - Multimedia Networking and Communications Software

Credits: 3
Advanced modern networks and services increasingly rely on communication protocols and their implementation in software. Course provides principle methodologies, constraints, and technologies for advanced store-and-forward or packet-switched communications nodes, networks and protocols, and emerging software-based applications. Specific examples include next-generation integrated Internet and Intranet, underlying transport infrastructure over wired and wireless media, switching and routing, multipoint and real-time multimedia and web-based services, and quality of services aspects.

Equivalent to IT 848

Prerequisites
ECE 642 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ECE 744 - Computer Vision and Expert Systems

Credits: 3
Brief review of image analysis. Includes vision system architectures such as human and computer visual systems; vision system operations such as focus and zooming; picture recognition languages; knowledge-based systems; learning algorithmic schemes;
and applications to text processing and analysis as expert systems. Students conceive, simulate, and test design projects.

**Prerequisites**
ECE 644 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 745 - ULSI Microelectronics

Credits: 3  
Studies UltraLargeScaleIntegration (more than a million devices in a single chip) by considering limits of packing density, modeling of devices, and circuit topology. Semiconductor material and device physics imposed "second order effects" and limitations on deep submicron CMOS performance. Reliability studied through analytical (compact) modeling and numerical simulations. Presents and evaluates new ULSI technologies such as SOI CMOS.

**Prerequisites**
ECE 684.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 746 - Advanced Applied Cryptography

Credits: 3  
Discusses complex cryptographic algorithms and their implementations in software and hardware. Provides mathematical background necessary to understand, implement, and break modern cryptoalgorithms. Covers implementations of cryptosystems using smart cards, network processors, and other platforms. Discusses side channel attacks against implementations of cryptography, including timing attacks, power analysis, fault analysis, cache attacks, etc. Introduces advanced topics, such as random and pseudorandom number generators, secret sharing, zero-knowledge, and quantum cryptography. Requires a semester-long project devoted to implementation of selected algorithms or protocols in software or hardware, and/or comparative analysis of various algorithms, protocols, or implementations.

**Prerequisites**
ECE 646 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ECE 749 - Neural Networks for Control

Credits: 3  
General neural network principles for control applications and supervised control, direct inverse control, neural adaptive control, backpropagation trout time (BTT), adaptive critics, sensorimotor principles. Topics include applications to adaptive control and system identification, neural networks for motion control and path planning in robotics, neural network process control, aerospace control problems and neural network autopilot, neural network control of aircraft flare and touchdown, and neural network control of autonomous vehicles.
Equivalent to IT 844

**Prerequisites**
ECE 549 and 620.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 750 - Intelligent Systems for Robots**

Credits: 3  
Reviews recent developments in intelligent autonomous systems. Studies applications of artificial intelligence, control theory, operations research, decision sciences, computer vision, and machine learning to robotics as well as correspondences between various fields. Topics include analysis and design of methods, algorithms and architecture for planning, navigation, sensory data understanding, visual inspection, spatial reasoning, motion control, learning, self-organization, and adaptation to environment.

Equivalent to CS 685/SYST 672/IT 840

**Prerequisites**  
SYST 611, ECE 650, or CS 580; or SYST 555 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 751 - Information Theory**

Credits: 3  
Introduces information theory, which is mathematical theory of communication systems. Topics include measures of information such as entropy, relative entropy, and mutual information; Shannon-McMillan-Breiman theorem and applications to data compression; entropy rate and source coding theorem; Huffman, arithmetic and Lempel-Ziv codes; method of types, channel capacity, and channel-coding theorem; joint source-channel coding theorem; differential entropy; Gaussian channel; rate distortion theory; and vector quantization.

Equivalent to IT 886

**Prerequisites**  
ECE 528 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 752 - Spectral Estimation**

Credits: 3  
In-depth study of spectral analysis and application to statistical signal processing. Topics include classical Fourier analysis of deterministic signals and Wiener theory of spectral analysis for random processes; spectral estimation using Periodogram and
window approaches; maximum entropy spectral estimation and relation to autoregression modeling; signal subspace approaches for frequency estimation; and wavelet transform and elation to short-time Fourier transform.

Equivalent to IT 885

**Prerequisites**
ECE 528 or STAT 652, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 753 - Distributed Estimation and Multisensor Tracking and Fusion**

Credits: 3  
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Equivalent to IT 888

**Prerequisites**
ECE 734 or SYST 611.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 754 - Optimum Array Processing I**

Credits: 3  

Equivalent to IT 837

**Prerequisites**
ECE 734.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 755 - Optimum Array Processing II**

Credits: 3  
Adaptive beamformers, SMI and RLS estimators, spatial smoothing and FB averaging, QR decomposition, LMS algorithm, optimum detection and parameter estimation, UML and CML estimation, Cramer-Rao bounds, IQML, weighted subspace fitting, subspace algorithms such as MUSIC and ESPRIT, root versions, beam-space algorithms, sensitivity, robustness, and calibration.
Equivalent to IT 937

**Prerequisites**
IT 837.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 780 - High-Frequency Electronics**

Credits: 3  
Studies devices and circuits in high-speed communications systems. Topics include microwave bipolar transistors and high-speed integrated circuits, and designing linear and power amplifiers using S-parameter techniques and computer simulation.

Equivalent to IT 845

**Prerequisites**
ECE 563 and 684, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ECE 798 - Research Project**

Credits: 1-3  
Research project under the guidance of a faculty member, resulting in an acceptable technical report. No more than a combined total of 3 credits may be taken towards satisfying the master’s degree, although students may register for more credits. No more than a combined total of 3 credits may be taken of ECE 698 and ECE 798 towards satisfying the master’s degree, although students may register for more credits. Students may not count both ECE 799 and ECE 798 for master’s credit.

**Prerequisites**
9 graduate credits and permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**ECE 799 - Master's Thesis**

Credits: 1-6  
Research project chosen and completed under guidance of graduate faculty member that results in technical report and oral defense acceptable to thesis committee of three faculty members.

**Prerequisites**
9 graduate credits, and permission of instructor.
ECE 836 - Special Topics in Statistical Signal Processing

Credits: 3
Advanced topics in statistical signal processing in areas of current research interest. Topics may include detection, estimation, information theory, array processing, and underwater acoustics.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

ECE 899 - Research Topics in ECE

Credits: 3
Studies advanced research areas in Electrical and Computer Engineering within a course format. Students will develop specialized research skills, which will also involve the presentation of their own work, developed individually and within groups. This course may be repeated for credit if the research areas differ.

Prerequisites
Completion of at least one 600 or 700 level course in the Research Topic area; and permission of instructor.

Notes
This will be an irregularly scheduled course intended for advanced master’s students who want to pursue a specific topic to more depth than a typical course offers at the master’s level. It will prepare students to undertake their individual research topics when they move on to pursue a Ph.D. program, or enter a research environment in their chosen professional careers.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

ECE 945 - Advanced Topics in Microelectronics

Credits: 3
Current topics of advanced research in microelectronics. Includes very high-speed integrated circuits, monolithic microwave integrated circuits, optoelectronic integrated circuits, novel device structures, and advances in semiconductor device technology.

Equivalent to IT 945

Prerequisites
IT 845

Notes
May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ECE 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated. No more than 24 credits of ECE 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ECE 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of ECE faculty member.

Prerequisites
Admission to candidacy.

Notes
May be repeated as needed. Students must complete minimum 12 credits of doctoral proposal (ECE 998) and doctoral dissertation research (ECE 999) Maximum of 24 credits of ECE 998 and 999 may be applied to degree. Students who choose to take less than 24 credits of ECE 998 and 999 may earn remaining credits from approved course work. Students cannot enroll in ECE 999 before research proposal accepted and approved by dissertation committee.

Elementary/Secondary Education

EDCI 370 - Young Adult Literature in Multicultural Settings

Credits: 3
Examines literary works written for and about young adults, introduces critical issues surrounding teaching of young adult literature in multiculturally diverse schools, and requires reading and review of young adult literature.

Notes
Significant online work is required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 372 - Teaching Mathematics in the Secondary School
Credits: 3
Covers curricula, current issues, and research literature in secondary school mathematics. Emphasis is on developing different styles of teaching. Field experience is required for those seeking initial teacher licensure.

Corequisite
EDUC 422

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 469 - Teaching English in Secondary School

Credits: 3
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisites
EDUC 422

Corequisite
EDUC 422

Hours of Lecture or Seminar per week: 3

EDCI 473 - Teaching Science in the Secondary School

Credits: 3
Builds fundamental knowledge of science teaching and learning including standards-based curriculum design and research-based teaching strategies.

Notes
School-based field experience required for those seeking initial teacher licensure.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 479 - Advanced Methods of Teaching English in the Secondary School

Credits: 3
Guides students in working effectively with national and local standards for teaching secondary English. Continuation course in methods from EDCI 469.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 483 - Advanced Methods of Teaching Science in Secondary School
Credits: 3
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, adapting instruction to needs of diverse learners, and promoting safety.

Prerequisites
EDCI 473.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 490 - Student Teaching in Education

Credits: 6
Provides intensive, supervised clinical experience in approved school for fall or spring semester.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion of licensure and all endorsement course work

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

EDCI 500 - In-Service Educational Development

Credits: 1-6
Offered at request of school division or other educational agency.

Prerequisites
Employment in professional capacity by sponsoring division or agency.

Notes
Content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCI 510 - Linguistics for PreK-12 ESOL Teachers

Credits: 3
Examines language as a system, with particular focus on teaching English as a second language (ESOL) to students in public schools, grades PreK-12. Considers teaching implications of phonology, morphology, syntax, semantics, and pragmatics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 511 - Developing Curriculum and Designing Instruction in Early Childhood Education

Credits: 3
Covers procedures, materials, and organization of environments for young children.

Notes
Field experiences required for students without previous teaching or administrative experience in early childhood settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 516 - Bilingualism and Language Acquisition Research

Credits: 3
Examines research in first and second language acquisition, including interaction of bilingual person's two languages, with applications for classroom.

Notes
School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 519 - Methods of Teaching Multilingual Students

Credits: 3
Examines approaches, methods, and techniques for teaching English as second language (ESL) in bilingual and ESL classrooms, as well as resources available in field. Participants critically analyze and demonstrate teaching approaches based on second language acquisition research, including teaching language through content.

Prerequisites
EDCI 516.

Notes
Field experience in public schools required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 520 - Assessment of Language Learners

Credits: 3
Examines innovative approaches to assessing language minority students and English language learners. Topics include identification, placement, monitoring of student progress, development of authentic performance-based measures, design of portfolios, application of measurement concepts, analysis of assessment instruments, and linking assessment to instruction.
Prerequisites
EDCI 516 and 519.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 521 - Curriculum Development for Language Learners

Credits: 3
Examines current approaches to curriculum development for second language learners and language minority students. Participants review, evaluate, and develop curricular materials, with emphasis on learner-centered activities, cooperative learning, interdisciplinary and thematic approaches, authentic and problem-based learning, integration of language and content, and linking assessment and instruction.

Prerequisites
EDCI 516 and 519.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 544 - Curriculum and Methods of Teaching in Elementary Education

Credits: 3
Introduction to general methods of teaching in elementary schools focusing on planning, teaching strategies, management, assessment, and differentiation.

Prerequisites
Admission into elementary education graduate program; must be taken in programmatic sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 545 - Assessment and Differentiation

Credits: 3
Provides a research-based introduction to differentiated instruction for children in grades PK-6. Emphasis on the assessment of learners and differentiation of instruction to meet the needs of all learners.

Prerequisites
Admission into elementary education graduate program; must be taken in programmatic sequence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 546 - Integrating Technology in Elementary Classrooms: Literacy

Credits: 1
Studies the development and integration of technology in the elementary education literacy curriculum.

Prerequisites
Admission into elementary education graduate program.

Corequisite
EDCI 556.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 547 - Integrating Technology in Elementary Classrooms: Mathematics

Credits: 1
Studies the development and integration of technology in the elementary education mathematics curriculum.

Prerequisites
Admission into elementary education graduate program.

Corequisite
EDCI 552.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 548 - Integrating Technology in Elementary Classrooms: Social Studies and Fine Arts

Credits: 1
Studies the development and integration in the elementary education social studies and fine arts curriculum.

Prerequisites
Admission into elementary education graduate program.

Corequisite
EDCI 554.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDCI 549 - Foreign Language Immersion in the Elementary School
Credits: 3
Covers theories and methods of teaching foreign language through elementary school curriculum; and curriculum development, assessment, and community relations in foreign language immersion classes.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 552 - Mathematics Methods for the Elementary Classroom**

Credits: 1-3
Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems.

**Prerequisites**
Admission to elementary education licensure program.

**Notes**
Requires field experience in public schools.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**EDCI 553 - Science Methods for the Elementary Classroom**

Credits: 1-3
Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards.

**Prerequisites**
Admission to elementary education licensure program.

**Notes**
Requires field experience in public schools.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**EDCI 554 - Methods of Teaching Social Studies and Integrating Fine Arts in the Elementary Classroom**

Credits: 3
Focuses on the design and delivery of standards-based integrated curriculum centered on the social sciences. Includes integration of fine arts and examines the central role of the arts in learning.

**Prerequisites**
Admission into elementary education graduate program; must be taken in programmatic sequence.
Notes
Field experience is required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 555 - Literacy Teaching and Learning in Diverse Elementary Classrooms I

Credits: 3
Provides research-based introduction to literacy teaching and learning for younger children. Emphasizes language development; reading and writing processes; emergent literacy; culture, families, and literacy; and literacy integration in the curriculum.

Prerequisites
Admission to elementary education licensure program

Notes
School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 556 - Literacy Teaching and Learning in Diverse Elementary Classrooms II

Credits: 1-3
Provides research-based introduction to literacy teaching and learning for older children. Emphasizes literacy and language processes and development; connections among cultures, families, and literacy; and literacy integration in curriculum.

Prerequisites
Admission to elementary education licensure program

Notes
School-based field experience required.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDCI 557 - Integrating Technology in the Elementary Curriculum

Credits: 3
Examines development and implementation of curriculum and instruction in elementary classroom. Emphasizes integrating technology in curriculum, and inclusion of special needs and culturally diverse students.

Prerequisites
Admission to elementary education licensure program

Notes
School-based field experience required.
EDCI 558 - Integrating Fine Arts and Movement in Elementary Education

Credits: 3
Includes art, drama, music, and movement. Examines central role of arts in children's learning. Focuses on integration and interdisciplinary learning experiences. Includes developmental theory, addressing diverse learners through multiple intelligences, and movement for physical health.

Prerequisites
Admission to PDS or Partnership Elementary Licensure Program.

Notes
School-based field experience required.

EDCI 559 - Research and Assessment in Elementary Education

Credits: 3
Provides teacher candidates an understanding of research paradigms utilizing systematic evidence to improve practice and further skills in assessment of learning outcomes. Emphasizes linking research and practice, making instructional decisions based on systematically collected data.

Prerequisites
Admission into elementary education graduate program; capstone course for degree must be taken last in programmatic sequence.

EDCI 560 - Methods of Teaching in Foreign/World Languages

Credits: 3
Covers approaches, theories, and methods of teaching foreign and second languages, with practical application to classroom. Students demonstrate teaching strategies, develop lesson and unit-planning skills, and evaluate curricula and materials.

Prerequisites
EDCI 516, or current teaching position.

Notes
Requires field experience in schools.
EDCI 567 - Teaching Social Studies in the Secondary School

Credits: 3
Advanced course in methods, materials, content, and organization of social studies programs in secondary schools.

Prerequisites
EDUC 522 and 15 hours school-based field experience

Corequisite
EDUC 522 and 15 hours school-based field experience

Notes
Requires field experience for those seeking initial teacher licensure.

EDCI 569 - Teaching English in the Secondary School

Credits: 3
Provides study of advanced methods, materials, content, and organization of English programs in secondary school.

Prerequisites
EDUC 522.

Notes
School-based field experience required for those seeking initial teacher licensure.

EDCI 570 - Teaching Young Adult Literacy in a Multicultural Setting

Credits: 3
Examines literary works written for and about young adults. Introduces critical issues surrounding teaching young adult literature in multiculturally diverse public schools and requires reading and reviewing young adult literature from several genres.

EDCI 572 - Teaching Mathematics in the Secondary School
EDCI 573 - Teaching Science in the Secondary School

Credits: 3
Provides study of methods, materials, content, and organization of science programs. Emphasizes curriculum planning, current methodologies, safety, and trends in secondary schools.

Prerequisites
EDUC 522.

Notes
School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 577 - Curriculum and Methods of Teaching, PK-12

Credits: 3
Blends theory and practice by providing instruction in curriculum and planning, theoretical concepts, application of research, models of learning and teaching, and practical experiences. Examines educational standards, assessment, and classroom management in PK-12 schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 597 - Special Topics in Education

Credits: 1-6
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisites
Admission to program in GSE.

Notes
May be repeated for credit with GSE permission.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDCI 600 - Workshop in Education**

Credits: 1-6  
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

**Notes**  
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**EDCI 601 - Applied Study of Communicative Competence and Classroom Discourse**

Credits: 3  
Analyzes young children's language development and design of individual and group language experiences.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 602 - Technology Applications in Early Childhood Education**

Credits: 3  
Examines criteria and methods for integrating technology into all areas of early childhood curriculum. Emphasizes use of instructional technology to facilitate cognitive and social growth.

**Prerequisites**  
Admission to GSED.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 603 - Trends, Issues, and Research in Early Childhood Education**

Credits: 3  
Examines trends, issues, research findings, and resulting program development.

**Prerequisites**  
Admission to GSED, and EDRS 590.
EDCI 613 - Curriculum and Assessment in Early Childhood Education I

Credits: 3
First of two-course sequence addressing current thinking about curriculum and assessment in programs for preschool through third grade. Gives overview of effective ways to plan and implement integrated curriculum; special focus on content, subject matter.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 614 - Curriculum and Assessment in Early Childhood Education II

Credits: 3
Second of two-course sequence focusing on planning and assessing children's knowledge of content and subject matter. Emphasizes action research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 615 - Advanced Human Development

Credits: 3
Advanced course in development and learning across lifespan. Critically reviews contemporary research and theories of human development and learning, and relevance to educational practice and family contexts as they relate to children under eight.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 616 - The Creative Arts and Play in Early Childhood Education

Credits: 3
Advanced course using creative arts and play as central approaches to teaching and learning. Focuses on an integrated approach to what arts-based curriculum looks like and how it functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 617 - Using Digital and Popular-Culture Media with Grades 4-12
Credits: 3
Exposes students to recent knowledge on how middle and high school teachers can use digital media and popular culture texts to engage students in subject area learning or literacy development. Focus is on grades 4-12.

Prerequisites
Admission to a GSE licensure, Master’s, or doctoral program and at least one year of PK-12 teaching experience, completion of EDCI 569, EDCI 567, EDCI 572, EDCI 573, or EDCI 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Summer

EDCI 621 - Introduction to Gifted and Talented Learners

Credits: 3
Examines nature and needs of gifted and talented learners. Participants become knowledgeable about characteristics of gifted and talented students, and examine role of culture in manifestation of gifts and talents as well as gifted behaviors in special populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 622 - Curriculum Differentiation for Diverse Learners

Credits: 3
Develops personal and professional rationale for differentiating instruction in mixed-ability classrooms, as well as skills and knowledge of strategies to utilize pre-assessment data and plan for and implement differentiated instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 623 - Models and Strategies for Teaching Gifted Learners

Credits: 3
Provides framework to examine and apply curriculum models and instructional strategies advocated for use with gifted students according to national and state standards that reflect best practices in gifted education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 624 - Assessment, Identification, and Evaluation of Gifted Learners

Credits: 3
Examines broad understandings of intelligence and assessment. Provides techniques to identify gifted students. Develops specific understandings of assessment techniques and awareness of the influences of language, culture, ethnicity, gender, and
exceptionality on recognition and subsequent identification of giftedness.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 625 - Contemporary Issues and Trends in Gifted Education

Credits: 3
Focuses on research, trends, issues, legislation, and litigation concerning gifted and talented children. Provides professionals in gifted education and related fields with knowledge and skills to serve as advocates for gifted-child education.

Prerequisites
EDCI 621, 622, 623, 624.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 626 - Action Research in Gifted Education

Credits: 3
Opportunity to identify and investigate school-based problem and apply inquiry, writing, and research skills to relevant issue or concern in gifted education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 627 - Advanced Practicum in Gifted Education

Credits: 3
Intensive supervised clinical experiences for one semester in accredited elementary or secondary school. Students supervised in setting that includes scheduled observations and seminar experiences.

Prerequisites
EDCI 621, 622, 623, 624.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 631 - Research in Elementary Education

Credits: 3
Helps beginning teachers understand various research paradigms to use research literature and systemic evidence to improve practice. Emphasizes linking research and practice, and making data-based instructional decisions.
Prerequisites
Completion of elementary education (PK-6) licensure.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 632 - Advanced Social Studies Methods for the Elementary Classroom

Credits: 3
Provides advanced study of teaching social studies in elementary education. Uses inquiry, research, and reflection to improve teaching. Emphasizes design and delivery of integrated social studies curriculum centered on knowledge, skills, and dispositions from history, geography, civics and economics, arts and humanities, and multicultural education. Covers student assessment and using student data in instructional decision-making and improvement.

Prerequisites
Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes
Requires extensive field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 633 - Advanced Mathematics Methods for the Elementary Classroom

Credits: 3
Focuses on teaching all children, including those from nonmainstreamed populations. Emphasizes teaching problem-solving and higher-order thinking skills promoted by National Council of Teachers of Mathematics and Virginia Mathematics Standards of Learning. Uses techniques and materials to develop specific problem-solving strategies in hands-on, activity, and workshop-oriented experience. Explores teaching of problem-solving, reasoning, communications, and connections in PK-6 mathematics by working with manipulatives and technologies.

Prerequisites
Completion of elementary education (PK-6) licensure, and EDCI 631.

Notes
Requires field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 634 - Advanced Science Methods for the Elementary Classroom

Credits: 3
Emphasizes inquiry and extensions of theoretical understanding of how children learn. Develops expertise in teaching and assessment, and incorporates technology, safety, and issues of culture and gender into day-to-day teaching activities.
Prerequisites
Completion of elementary education (PK-6) licensure, and EDCI 631.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 635 - Applied Research in Elementary Education

Credits: 3
Helps beginning teachers plan and complete action research project related to teaching assignment. Students apply research methods explored during prerequisite series of courses.

Prerequisites
Completion of elementary education (PK-6) licensure; and EDCI 631, 632, 633, and 634.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 644 - Mathematics Learning and Assessment (K-8)

Credits: 3
Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education.

Prerequisites
Admission to the MEd in Education Leadership Mathematics Education Leadership concentration

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 645 - Curriculum Development in Mathematics Education

Credits: 3
Analysis, design, and evaluation of school mathematics curricula.

Prerequisites
Admission to mathematics education leadership master's degree program, or permission of instructor.

Notes
Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 646 - Mathematics Education Leadership for School Change

Credits: 1-3
Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings.

Prerequisites
Admission to mathematics education leadership master's degree program, or permission of instructor.

Notes
Yearlong seminar for master's-level students in mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDCI 663 - Research in Science Teaching

Credits: 3
Investigates the research and methodology involved in teaching and learning biological, chemical, physical, and earth sciences from K-12.

Prerequisites
Course in teaching science in elementary school, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 666 - Research in Mathematics Teaching

Credits: 3
Explores curricula, current issues, and research literature in elementary school mathematics. Emphasizes development of different styles of teaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 667 - Advanced Methods of Teaching Social Sciences in the Secondary School

Credits: 3
Emphasizes interdisciplinary curriculum and instruction, implementing national state standards, authentic assessment, and adaptations for diverse populations.

Prerequisites
EDCI 567.

Notes
School-based field experience required.

**EDCI 669 - Advanced Methods of Teaching English in the Secondary School**

Credits: 3
Continuation course in methods (See EDCI 569). Guides students in working effectively with national and local standards for teaching secondary English.

**Prerequisites**
EDUC 522 and EDCI 569

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 672 - Advanced Methods of Teaching Mathematics in the Secondary School**

Credits: 3
Focuses on learning processes for mathematics. Introduces national and state standards regarding content and methodologies for teaching mathematics. Examines instructional methods and materials in relation to secondary mathematical content, curriculum, and assessment.

**Prerequisites**
EDCI 572.

**Notes**
School-based field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDCI 673 - Advanced Methods of Teaching Science in the Secondary School**

Credits: 3
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology, and adapting instruction to the needs of diverse learners.

**Prerequisites**
EDCI 573.

**Notes**
School-based field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDCI 677 - Advanced Curriculum and Methods of Teaching, Secondary

Credits: 3
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

Prerequisites
EDCI 577.

Notes
Extends principles of teaching and learning introduced in EDCI 577.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 678 - Advanced Curriculum and Methods of Teaching, Elementary

Credits: 3
Includes application of skills in discipline-specific methodology, communication, classroom management, and evaluation of student performance appropriate to elementary level.

Prerequisites
EDCI 577

Notes
Extends principles of teaching and learning introduced in EDUC 577.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 683 - Curriculum Development and Evaluation in Science Education

Credits: 3
Advanced course in science curriculum design and development. Emphasizes instructional materials and assessment.

Prerequisites
EDCI 663, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 684 - Advanced Methods of Teaching Foreign/Second Languages in PK-12 Schools
Credits: 3
Blends theoretical knowledge and practical application. Provides advanced study of second language pedagogy and teaching trends. Topics include multiple learning styles, alternative forms and assessment, and teaching diverse populations.

Prerequisites
EDCI 516, or current teaching position.

Notes
Requires field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 693 - Leadership and Organizational Issues in Science Education

Credits: 3
Advanced course in current issues for leadership in science education. Emphasizes technology, safety, professional development, and related organizational change issues.

Prerequisites
EDCI 663 and 683, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 705 - Instructional Design

Credits: 3
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDIT 705

Prerequisites
Teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 710 - Technology and the Culture of Schools

Credits: 3
Explores relationship of human inventions and social, political, cultural, and epistemological constructions. Examines history of technology, relationship of technology and human behavior, and theories of social change and technology. Focuses on how technological and social changes influence and shape goals and outcomes of K-12 educational process. Considers links between technology and educational reform, how technology is associated with educational reform movement, and ways educators can
take leadership roles in facilitating intersection of educational reform and technology.

**Corequisite**
EDIT 711.

**EDCI 712 - Technology and Learning**

Credits: 3
Explores ways of knowing and theories of learning as reflected in and influenced by technology. Analyzes, applies, and evaluates current theories such as constructivism, multiple intelligences, role of symbolization in human cognition, development of problem-solving and critical thinking strategies, and learning conditions. Covers relationship of technological forms and nature and structure of human cognition, especially as it influences K-12 educational practice. Explores technology and nature of individual learner attributes, learners in context, special-needs learners, access, equity, and values.

**Corequisite**
EDIT 713.

**EDCI 714 - Methods of Integration**

Credits: 3
Includes examples of curriculum design strategies, readings, discussions, and design of lessons or units appropriate to various contents. First course in sequence focuses on disciplinary standards, role of technology applications to support standards, and strategies for curriculum design such as learning cycle, thematic design, interdisciplinary and transdisciplinary approaches, and writing across the curriculum.

**Corequisite**
EDIT 715. Considers curriculum design strategies that facilitate technology integration.

**EDCI 716 - Principles of Technology Leadership**

Credits: 3
Focuses on the relationship of leadership, change, and technology advocacy with emphasis on leadership roles for technology educators.

**Corequisite**
EDIT 719
EDCI 725 - National and International Leadership Issues in Mathematics Education

Credits: 3
Students study research on mathematics teaching and learning, including current issues and trends in mathematics education leadership at national and international levels.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

EDCI 726 - State and Local Leadership Issues in Mathematics Education

Credits: 3
Students study issues and policies that affect mathematics teaching and learning, including current trends in mathematics school reform at state, district, and individual school levels.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

EDCI 777 - Research to Practice

Credits: 3
Provides culminating experience that synthesizes and applies essential elements of second language teaching and learning. Emphasizes teacher as change agent through critical inquiry into practice. Promotes collaboration between ESL and grade-level teachers to advance achievement of English language learners and language minority students.

Prerequisites
All other program courses except EDRS 590 and elective, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 784 - Capstone Seminar in Early Childhood Education

Credits: 3
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through graduate course work as it applies to early childhood education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 790 - Internship in Education

Credits: 1-6
Intensive, supervised clinical experience for full semester in accredited school. Students must register for appropriate section.

Prerequisites
Passing scores on Praxis I and II, ESL Praxis I only, and permission of advisor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCI 795 - Science Education Research

Credits: 3
Explores science education research, theory, and practice, including sources and methods of study. Students review and report on research literature and teaching practices on topics of interest.

Prerequisites
EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 796 - Science Education Curriculum

Credits: 3
Explores science education curriculum from preschool through high school, including identifying and evaluating curriculum materials and resources. Emphasizes research-based exemplary materials and use of technology.

Prerequisites
EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 797 - Advanced Topics in Education

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes
May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDCI 855 - Mathematics Education Research on Teaching and Learning

Credits: 3
Students survey most current research literature in mathematics education and engage in research, study, and discussion of mathematics education research on teaching and learning in school settings.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 856 - Mathematics Education Curriculum Design and Evaluation

Credits: 3
Students engage in research, analysis, design, and evaluate school mathematics curricula.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 857 - Preparation and Professional Development of Mathematics Teachers

Credits: 3
Students study attributes of effective professional development in mathematics education, develop expertise in designing and teaching mathematics methods courses, and learn to create and teach professional development experiences for practicing
teachers.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 858 - Mathematics Education Research Design and Evaluation

Credits: 3
Students review methods of research appropriate for mathematics education settings and develop theoretical framework and action plan for conducting research project.

Prerequisites
Admission to mathematics education leadership PhD program.

Notes
Yearlong seminar for PhD students in the mathematics education leadership cohort program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 891 - Science Teaching and Learning

Credits: 3
Explores research, theory, and practice for effective science teaching and learning. Focuses on science education standards at local, state, national, and international levels. Students review common core of research literature and topics of individual interest.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 892 - Science Education History and Research

Credits: 3
Explores history of science education research, theory, and practice, including research on general teaching strategies in science instruction. Reviews common historical core of research literature; students conduct exploratory research of individual interest.

Prerequisites
EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDCI 893 - Science Education Staff Development

Credits: 3
Explores staff development in science education with emphasis on planning and conducting professional development on key topics in science teaching and learning. Reviews common core of research literature; students conduct research of individual interest.

Prerequisites
EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 894 - Science Education Leadership and Policy

Credits: 3
Focuses on leadership and policy issues at local, state, and national levels that affect science education. Emphasizes understanding decision-making structure and process; current issues; and trends. Students participate in leadership and policy events.

Prerequisites
EDCI 891.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDCI 895 - Emerging Issues in Curriculum and Instruction

Credits: 3
Covers issues in curriculum and instruction through individual and group research, discussion, writing, and presentations by experts. Students conduct critical analysis of specific field.

Prerequisites
Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Engineering

ENGR 107 - Introduction to Engineering
Credits: 2
Introduces engineering profession fundamentals and problem-solving. Topics include description of engineering disciplines, functions of the engineer, professionalism, ethics and registration, problem solving and representation of technical information, estimation and approximations, and analysis and design.

Satisfies General Education Requirement: Information technology (IT, Ethics)

Corequisite
MATH 105, or Math Placement Test score qualifying student for MATH 113.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

ENGR 117 - Information Technology for Engineering

Credits: 3
Introduces elements of computing essential for engineering students. Topics include hardware fundamentals; number systems; data types; variables; expressions; information process modeling with flow charts; data transmission; arrays; integer and floating point arithmetic; pseudo code development; spreadsheet modeling; scripting and rapid prototyping; fundamentals of web technology; and legal and ethical considerations (including privacy, intellectual property, and appropriate uses of technology).

Satisfies General Education Requirement: Information technology (IT, all)

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

ENGR 183 - Engineering Computer Graphics

Credits: 3
Fundamentals of engineering drawing, graphic communication, descriptive geometry, multiview projection, and graphical analysis. Introduces computer-aided drafting, visualization, pictorial views, and reading of engineering drawings.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

ENGR 210 - Statics and Dynamics

Credits: 3
Covers general principles and fundamental concepts, including units of measurement; force vectors and their use, including vector operations; equilibrium of a particle; resultants of a system of forces; equilibrium of a rigid body; dry friction; center of gravity and centroid; moments of inertia, including parallel axis theorem and radius of gyration; kinematics of a particle.

Prerequisites
Grade of C or better in PHYS 160 and MATH 114.

Hours of Lecture or Seminar per week: 2
ENGR 307 - Engineering Thermodynamics

Credits: 3
Classical concepts of energy and temperature, first and second laws and their application to closed and open thermodynamic systems. Covers properties of pure substances, equation of state, and analysis of thermodynamic processes and systems. Presents application to engineering systems.

Prerequisites
Grade of C or better in MATH 213 and PHYS 266.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

ENGR 310 - Mechanics of Materials

Credits: 3
Concepts of stress, strain, elasticity, and plasticity. Stress and strain transformation, including the use of Mohr's circle. Pure torsion. Theory of pure bending and members under transverse loading, including normal and shear stress analysis. Theory of elastic buckling. Distribution of internal forces in statically determinate systems and deflection of beams.

Prerequisites
Grade of C or better in ENGR 210

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

ENGR 400 - Principles of Professional Practice in Engineering

Credits: 3
Does not satisfy requirements for CEIE technical elective. Overview of all engineering disciplines focusing on engineering ethics and professionalism, need for lifelong learning, and professional licensure. Topic areas also include engineering science and mechanics, material science, electric circuits, chemistry and thermodynamics, engineering economics, and other fundamentals of engineering.

Prerequisites
Engineering majors within 30 hours of graduation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
**ENGR 401 - Professional Practice and Management in Engineering**

Credits: 1
This course introduces professional ethics and management principles, and prepares students for leadership roles in practice. Topics include introduction to professional and technical societies; code of ethics related to the public, clients, contractors, suppliers, employers, agreements, contracts, competitive bidding, the engineering profession, conflict of interest, legal responsibilities and case law; case studies in professional ethics; professional licensure; engineering versus engineering management; personal development; managing culture shock, time management, career versus grad school, continuing education; public policy considerations in engineering practice; practical considerations in project management; effectively communicating with employees, contractors and clients; marketing, competitive bidding and project selection; conflict resolution; and managing a small business.

Satisfies General Education Requirement: Information technology (IT, Ethics)

**Prerequisites**
Senior standing in engineering.

**When Offered:** Fall, Spring

**ENGR 490 - Human Practice of Engineering Design**

Credits: 3
Study of engineering design and innovation emphasizing human aspects. Students directly involved in project with client for whom they must produce measurable innovation supported by engineering system. Students prepare through extensive readings and exercises, from which they will learn how to identify and listen for human concerns, action, breakdowns, and coordination.

**Prerequisites**
Senior standing with at least 90 credits in IT&E degree program; one of SYST 301, ECE 331, or CS 421; and permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGR 498 - Independent Study in Engineering**

Credits: 1-3
Directed self-study of special topics of current interest in ENGR.

**Prerequisites**
60 credits; must be arranged with instructor and approved by department chair before registering.

**Notes**
May be repeated for maximum 6 credits if topics substantially different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ENGR 499 - Special Topics in Engineering

Credits: 0-4
Topics of special interest to undergraduates.

Prerequisites
60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

English

Prerequisite to all 200-level and above: 3 credits of 100-level English. Prerequisite to all English courses numbered above 302 unless otherwise noted: 3 credits of 100-level English and 3 credits of general education literature. Nonnative speakers of English with limited language proficiency are encouraged to take ENGL 100 instead of ENGL 101. Students may not receive credit for both ENGL 100 and 101.

ENGL 100 - Composition for Non-native Speakers of English

Credits: 4
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose, with attention to particularly difficult aspects of the language for non-native speakers. Methods and conventions of preparing research papers.

Satisfies General Education Requirement: Written communication

Notes
For non-native English speakers with limited language proficiency. Students must attain minimum grade of C to fulfill degree requirements.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

ENGL 101 - Composition

Credits: 3
Intensive practice in drafting, revising, and editing expository essays of some length and complexity. Studies logical, rhetorical, and linguistic structure of expository prose. Methods and conventions of preparing research papers.

Satisfies General Education Requirement: Written communication

Notes
Students must attain minimum grade of C to fulfill degree requirements.
ENGL 201 - Reading and Writing about Texts

Credits: 3
Close analysis of literary texts, including but not limited to poetry, fiction, and drama. Emphasizes reading and writing exercises to develop basic interpretive skills. Examines figurative language, central ideas, relationship between structure and meaning, narrative point of view.

Satisfies General Education Requirement: Literature

ENGL 202 - Texts and Contexts

Credits: 3
Studies literary texts within the framework of culture. Examines texts within such categories as history, gender, sexuality, religion, race, class, and nation.

Satisfies General Education Requirement: Literature

Notes
Builds on reading and writing skills taught in ENGL 201.

ENGL 203 - Western Literary Tradition

Credits: 3
Major works of Western literature in historical progression. Focuses on writers such as Homer, Sophocles, Euripides, Dante, Cervantes, Machiavelli, and Montaigne.

Satisfies General Education Requirement: Literature

Notes
All readings are in modern English. Courses build on reading and writing skills taught in ENGL 201.

ENGL 204 - Western Literary Traditions
Credits: 3
Major works of Western literature in historical progression. Covers writers such as Moliere, Mme. de Lafayette, Goethe, Ibsen, Flaubert, Dostoyevski, Tolstoy, Mann, Kafka, Borges, and Soyinka. All readings are in modern English.

Satisfies General Education Requirement: Literature

Notes
Courses build on reading and writing skills taught in ENGL 201.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 300 - Cover to Cover

Credits: 3
Introduction to various topics in English; many have an interdisciplinary emphasis. Appropriate for non-majors. Topic changes each time course is offered.

Prerequisites
ENGL 101

Notes
May be repeated once for credit when course content differs.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

ENGL 302 - Advanced Composition

Credits: 3
Intensive practice in writing and analyzing expository forms such as essay, article, proposal, and technical or scientific reports with emphasis on research related to student's major field.

Satisfies General Education Requirement: Written communication

Prerequisites
Completion of 45 credits including general education composition and general education literature, requires a grade of C or better.

Notes
Schedule of Classes designates particular sections of ENGL 302 in business, humanities, natural sciences and technology, and social sciences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 309 - Writing Nonfiction Genres
Credits: 3
Advanced practice in analyzing and writing nonfiction forms such as essay, profile, article, and technical or scientific report, depending on student's interests.

Notes
Not to be taken concurrently with ENGL 399 or 489, and not to be taken by students who have taken ENGL 489. Not a remedial course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 311 - Writing Ethnography

Credits: 3
Study and practice of ethnographic writing. Students conduct ethnographic investigations and practice journal keeping, field note recording, interviewing, transcription, and interpretation. Includes introduction to current issues in ethnographic writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 322 - English Grammar

Credits: 3
Overview of grammatical structure of English including word classes, phrases, and complex sentences. English grammar analyzed using modern syntactic theory. Students engage in language description through problem solving.

Equivalent to LING 322

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 325 - Dimensions of Writing and Literature

Credits: 6
Examines English as a discipline and develops interpretive skills for further study in the major. All sections cover issues such as form, genre, point of view, figurative language, conventions of close reading and literary interpretation, and how culture shapes texts.

Satisfies General Education Requirement: Synthesis requirement

Notes
Open to all students. Required of those majoring or minoring in English, who should take ENGL 325 before taking other 300- or 400-level literature courses, and who must obtain a minimum grade of C to satisfy degree requirements in English major or minor. Regular class meetings; weekly lectures, performances, or readings.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0
**ENGL 327 - Introduction to Cultural Studies**

Credits: 3  
Introduces interpretive practices associated with cultural studies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 330 - Introduction to Literary Theory**

Credits: 3  
Introduces contemporary theories informing literary and cultural study such as deconstruction, poststructuralism, new historicism, feminism, psychoanalysis, and contemporary cultural studies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 331 - Introduction to Documentary**

Credits: 3  
Considers fundamental concepts of documentary form, style, and subject matter, ethical considerations, and theories of documentary. Includes close analysis of a series of representative film and television texts.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 332 - Introduction to Film**

Credits: 3  
Introduces film medium as an art form.

Satisfies General Education Requirement: Arts

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 333 - Folklore and Folklife**

Credits: 3  
Topics include folktales, personal narratives, legends, proverbs, jokes, folk songs, folk art and craft, and folk architecture. Considers ethnicity, community, family, festival, folklore in literature, and oral history. Discusses traditions in students' own lives.
ENGL 334 - Popular Culture

Credits: 3
Emphasizes popular fiction and adaptation of popular prose genres to media that have strong verbal and visual elements. Relationship between verbal and nonverbal elements of media such as film, comics, and radio.

ENGL 335 - Shakespeare

Credits: 3
Twenty selected plays, emphasizes histories and comedies.

ENGL 336 - Shakespeare

Credits: 3
Twenty selected plays, tragedies, and romances.

ENGL 337 - Topics in Myth and Literature

Credits: 3
Studies how traditional mythologies are reflected in English and American literature and other texts as themes, motifs, and patterns.

Notes
May be repeated once for credit when course content differs.

ENGL 338 - Cultural Constructions of Sexualities
Credits: 3
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seek to complicate traditionally fixed categories of identity. Examines various representations of human sexuality, with particular attention to intersections with gender, race, ethnicity, nationality, and class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 342 - Web Authoring and Design

Credits: 3
Provides a rhetorical foundation for web authoring and design in professional settings. Students will learn basic principles of writing for the web, information architecture, coding for accessibility, and usability testing. The production-oriented component of the course provides instruction in writing valid code and practice with web- and graphic-editing software tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 343 - Rhetoric and New Media

Credits: 3
Critical reading of new media texts and creation of technology-enriched texts in variety of rhetorical genres. Instructs students in rhetoric of new media, whether produced as hypertext, multimedia, or interactive digital productions. Technology-enriched activities present complex textuality of words, images, word-as-image, and kinetic text.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 344 - Digital Creative Writing

Credits: 3
Combined workshop and studio course in technological and aesthetic issues of reading and writing hypermedia texts with emphasis on poetry, fiction, creative nonfiction, mixed genre, drama, or performance. Explores how genre meets hypertext and hypermedia in original creative work. Includes techniques in authoring interactive hypermedia projects using digital media tools.

Prerequisites
ENGL 396, or permission of instructor.

Notes
May include reading assignments in hypertext and hypermedia theory.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 345 - Topics: Literary Survey
Credits: 3
Advanced introduction to major movements and representative figures of two or more centuries or periods of American, British, European, or world literature.

Notes
May be repeated once for credit when course content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 349 - Global Voices

Credits: 3
Studies two cultures other than contemporary British or American culture through exploration of several textual forms such as written literature, oral literature, film, folklore, or popular culture. Specific cultures vary, but at least one is non-Western.

Satisfies General Education Requirement: Global understanding

Prerequisites
45 credits.

Notes
May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 350 - The Idea of a World Literature

Credits: 3
Examines history and current status of conceptions of world literature, considering such topics as non-European influences on Western literature, shifting horizons of comparative literature, rise of postcolonial literature, place of translation, and role of international institutions such as UNESCO and the Nobel Prize. Focuses on degree to which these initiatives have been successful in promoting global understanding of literary production.

Satisfies General Education Requirement: Global understanding

Prerequisites
45 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 360 - Topics in Literature

Credits: 3
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde.
Notes
Topic changes each time course is offered. May be repeated when course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 363 - Special Topics in Literature

Credits: 3
Studies literature by topics, such as women in literature, science fiction, and literature of the avant garde.

Notes
Topic changes each time course is offered. May be repeated when course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 368 - Beginnings of African American Literature Through 1865

Credits: 3
Concentrating on such poets as Phillis Wheatley, Jupiter Hammon, Lucy Terry, and George Moses Horton, examines significant African American literary, social, and political texts produced through 1865. Special attention to narrative accounts of enslavement and freedom by Frederick Douglass, Harriet Jacobs, and Olaudah Equiano; political writings and orations of David Walker and Sojourner Truth; fiction of Harriet Wilson and William Wells Brown; and nonwritten cultural artifacts such as slave songs and spirituals.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 369 - Topics: Women and Literature

Credits: 3
Explores experiences of women as both authors and subjects of imaginative literature.

Notes
May be repeated for credit when subtitle is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 370 - African American Literature: Reconstruction to 1903
Credits: 3

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

### ENGL 371 - African American Literature Through 1946

Credits: 3
Focusing on fiction, poetry, drama, and autobiography, explores evolution of African American literature and aesthetics and major social, cultural, and historical movements such as the Harlem Renaissance of the 1920s and emergence of black naturalism, realism, and modernism in the 1930s-40s. Major authors include Zora Neale Hurston, Langston Hughes, Jessie Fauset, James Weldon Johnson, Jean Toomer, Nella Larsen, Margaret Walker, Chester Himes, Richard Wright, and Ann Petry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

### ENGL 372 - Contemporary African American Literature

Credits: 3
Encompassing array of genres and forms, examines black writing from mid-20th century to present. Engages textual, critical, political, and theoretical issues related to cardinal literary movements, such as Black Arts Movement of 1960s and Third Renaissance of 1980s-90s. Examines how musical forms such as blues, jazz, and rap shaped literary production. Major authors include Ralph Ellison, Gwendolyn Brooks, James Baldwin, Lorraine Hansberry, Amiri Baraka, Alice Walker, Ernest Gaines, Gloria Naylor, August Wilson, and Toni Morrison.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

### ENGL 375 - Topics in Ethnic American Literature

Credits: 3
Studies particular ethnic American literatures. Focuses on literatures such as Asian American, Native American, Latino/a, Arab American, or Jewish American.

**Prerequisites**
3 credits of general education literature.

**Notes**
May be repeated once for credit when subtitle and course content are different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
ENGL 380 - Recent American Fiction

Credits: 3
American short story writers and novelists from World War II to present, including Mailer, Barth, Cheever, Oates, Gass, Beattie, Updike, and Morrison.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 385 - Topics in Literary Nonfiction

Credits: 3
Special studies in literary nonfiction by topic, such as the personal essay, New Journalism, the "nonfiction novel," the memoir, or historical traditions of literary nonfiction. May be repeated once for credits when content is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 390 - Recent American Poetry

Credits: 3

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 392 - Editing for Audience, Style, and Voice

Credits: 3
Introduces editing as a textual and rhetorical practice. Addresses copyediting, stylistics, and design; revisions based on audience, purpose, and genre; multimedia editing; interactions between editors and authors. (Not a remedial course in fixing sentence errors.)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 396 - Introduction to Creative Writing

Credits: 3
Assignments include writing exercises and original works of poetry and fiction. May also include drama or creative nonfiction. Includes reading assignments in covered genres, and may include oral presentations or in-class performance. Original student
work read and discussed in class and conference with instructor.

Satisfies General Education Requirement: Arts

**ENGL 397 - Poetry Writing**

Credits: 3
Workshop in reading, writing poetry. Original student work read and discussed in class and conferences with instructor. Technical exercises in craft of poetry; may include reading assignments.

**Prerequisites**
ENGL 396, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 398 - Fiction Writing**

Credits: 3
Workshop course in reading and writing fiction. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in craft of fiction; may include reading assignments.

**Prerequisites**
ENGL 396, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 399 - Creative Nonfiction Writing**

Credits: 3
Workshop in reading and writing of nonfiction that makes use of literary techniques normally thought of in context of fiction, such as evoking senses and use of dialog. Original student work read and discussed in class and conferences with instructor. Includes technical exercises in artful creating of nonfiction; may include reading assignments.

**Prerequisites**
ENGL 309 or 396, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 400 - Literature of the Middle Ages**
Credits: 3
Selected English narrative, dramatic, and homiletic literature written between 1300 and 1500, exclusive of Chaucer.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 401 - English Poetry and Prose of the 16th C

Credits: 3

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 402 - English Poetry and Prose of the 17th C

Credits: 3
English poetry and prose from 1603 to 1688, excluding Milton.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 404 - Augustan Age: 1660-1745

Credits: 3
English literature from late 17th century to mid-18th century. Includes Dryden, Rochester, Behn, Defoe, Swift, Pope, and Montagu.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 405 - Age of Sensibility: 1745-1800

Credits: 3

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 410 - Professional and Technical Writing**

Credits: 3  
Intensive study and practice in various forms of professional and technical writing, including proposals, reports, instructions, news releases, white papers, and correspondence. Emphasizes writing for variety of audiences, both lay and informed, and writing within various professional and organizational contexts.

**Prerequisites**  
ENGL 302.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 414 - Honors Seminar**

Credits: 3  
Emphasizes growth in awareness of literary scholarship as a discipline, providing opportunity for advanced study in literary and
cultural criticism. Covers variety of topics, including consideration of a literary period, genre, author, work, theme, discourse, or critical theory.

**Prerequisites**
Permission of department.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 415 - Honors Thesis Writing Seminar**

Credits: 3  
Gives students who wish to write an English honors thesis guidance in research methods, while offering opportunity to share and critique works in progress in workshop format. Students may take thesis seminar concurrently and in coordination with another approved course offered by English Department. In this case, the thesis of about 30 pages explores area covered by second course, and instructor in that course serves as thesis reader and advisor. Students receive credit for thesis seminar and second course; however, thesis work may substitute for some assigned work in second course by arrangement of instructors of thesis seminar and second course.

**Prerequisites**
Permission of department and ENGL 414 or 416.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 416 - Honors Independent Study**

Credits: 1-3  
Intensive writing course. Honors students concentrating in nonfiction writing and editing may use English 416 to replace English 414 as first course in honors program.

**Prerequisites**
Admission to honors program in English, and permission of instructor

**Notes**
Honors students concentrating in creative writing may use English 416 to replace 415 as second course in honors program.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**ENGL 421 - Topics in Film/Media History**

Credits: 3  
Advanced studies of development of film language, both as cultural practice and medium for formal innovation. Topics might
include studies of national cinemas, historical periods, genres, or individual directors.

Notes
May be repeated once for credit when topic is distinctly different.

ENGL 422 - Topics in Film/Media Theory

Credits: 3
Advanced studies of theories about various aspects of production, distribution, and reception of film-mediated experiences. Topics may include theories of spectator, semiotics, feminist film theory, theories of narrativity, structuralist film theory, or deconstruction.

Notes
May be repeated once for credit when topic distinctly different.

ENGL 423 - Early American Literature

Credits: 3
Works of first 200 years of American literature, including Edwards, Franklin, Irving, Cooper, and Bryant.

ENGL 425 - Literature of the American Renaissance

Credits: 3
Major writers of American Renaissance (1830-1865), with emphasis on Emerson, Thoreau, Hawthorne, Melville, Whitman, Poe, Stowe, Douglass, and Dickinson.

Credits: 3
English or Irish drama from Yeats to the present. Plays by authors such as Yeats, Synge, O'Casey, Osborne, Wesker, Pinter, Friel, Churchill, and Gems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 447 - American Drama of the 20th Century

Credits: 3
American drama of 20th century, with special attention to playwrights such as Glaspell, O'Neill, Miller, Williams, Fornes, and Albee.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGL 448 - Modern Drama

Credits: 3
Representative plays of most influential European and American dramatists, with emphasis on dramatic styles such as realism, expressionism, epic, and existentialism. Studies Chekhov, Ibsen, Strindberg, Brecht, and Beckett.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 449 - Topics in Drama

Credits: 3
Studies selected topics, periods, or playwrights.

Notes
May be repeated once for credit when subtitle is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 450 - British Novel of the 18th Century

Credits: 3
English novel from its beginnings through turn of 19th century. Covers works by Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Burney, Smollett, and Austen.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 452 - Development of the American Novel to 1914

Credits: 3
Major American novels of the pre-World War I period with emphasis on Brown, Cooper, Hawthorne, Melville, Twain, Howells, James, Crane, Dreiser, Norris, and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 453 - British Novel of the 19th Century

Credits: 3
Works by Dickens, Thackeray, the Brontes, Eliot, Trollope, and Hardy.
ENGL 454 - Development of the American Novel since 1914

Credits: 3
Works by Fitzgerald, Hemingway, Faulkner, Dos Passos, Wolfe, Bellow, and Nabokov.

ENGL 456 - British Novel after 1900

Credits: 3
Works by Conrad, Forster, Lawrence, Joyce, Woolf, Greene, Lessing, Spark, and Fowles.

ENGL 458 - Advanced Fiction Writing Workshop

Credits: 3
Workshop; intensive practice in creative writing and study of creative process. Intended for students already writing original creative work.

Prerequisites
ENGL 398 and manuscript review.

Notes
Submit 8-10 pages of fiction to instructor. Enrollment is controlled. With permission of instructor may be taken a second time for credit.

ENGL 459 - Topics in Fiction

Credits: 3
Study of selected topics, periods, or authors.

Notes
May be repeated once for credit when subtitle is different, with permission of department.
ENGL 460 - Critical Study of Children's Literature

Credits: 3
Examines the history and criticism of children's literature and the strategies used by authors of children's literature to address their audience. Selected readings range from Puritan to contemporary writing for children, as well as influential works in educational philosophy, such as those by Locke and Rousseau.

ENGL 462 - British Poetry after 1900

Credits: 3
Emphasizes Hardy, Yeats, Lawrence, Graves, Auden, Thomas, and Hughes. Fiction works employing poetic techniques, such as Joyce's Ulysses, may also be studied.

ENGL 463 - American Poetry of the 20th Century

Credits: 3
Emphasizes work of Robinson, Frost, Stevens, Williams, Pound, Crane, Eliot, and Lowell. May include work of fiction employing poetic techniques, such as Faulkner's The Sound and the Fury.

ENGL 464 - Advanced Poetry Writing Workshop

Credits: 3
Intensive practice in the craft of poetry and study of the imagination in creative process. Intended for students already writing original poetry.

Prerequisites
ENGL 397 and manuscript review.

Notes
Submit 8-10 pages of poetry to instructor. Enrollment is controlled. At discretion of instructor, technical exercises and assigned reading may be required. With permission of instructor, may be taken a second time for credit.
ENGL 468 - Topics in Poetry

Credits: 3
Study of selected topics, periods, or poets.

Notes
May be repeated once for credit when subtitle is different, with permission of department.

ENGL 471 - Chaucer

Credits: 3
Major works of Chaucer, with emphasis on The Canterbury Tales.

ENGL 472 - Spenser

Credits: 3
Poetry of Edmund Spenser, with central emphasis on The Faerie Queene.

ENGL 473 - Studies in Shakespeare

Credits: 3
Study of one aspect of Shakespeare's art or critical issues surrounding his work.

Notes
May be repeated once for credit when subtitle is different, with permission of department.

ENGL 474 - Milton
Credits: 3
Milton's major poetic works, with emphasis on *Paradise Lost*.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGL 477 - Topics: British Authors

Credits: 3  
Study of one or two major figures in British literature.

**Notes**  
May be repeated once for credit when subtitle is different, with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGL 478 - Topics: American Authors

Credits: 3  
Study of one or two major figures in American literature.

**Notes**  
May be repeated once for credit when subtitle is different, with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGL 479 - Ethnicity and Migration in Folklore

Credits: 3  
Explores U.S. immigration trends and the historical basis for the concepts of ethnicity, identity, and immigration in folklore scholarship, literature, film, and popular media. The course explores at least three of the following ethnic groups: Latino, Asian, Jewish, European, Arab, or African.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ENGL 480 - Folklore of the Spirit World

Credits: 3  
Examines traditional narratives and beliefs about otherworldly experiences and beings. Introduces traditional narrative theory and discusses how people construct and tell their stories about encounters with the supernatural. Considers the conflicts, worldviews, and competing values these stories bring into material form. Focuses on traditions from around the world as well as on personal
experiences of students.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 481 - Folk Arts and Folk Artists**

Credits: 3  
Examines the traditional arts of everyday life, such as festive foods, mementos and other objects of memory, textile arts, pottery, carving in wood and stone, roadside shrines, and more. Explores the folk aesthetics of group-based creativity through the lenses of biography, history, literature, and folklore studies. Considers traditional objects as narratives in material form. Examples drawn from multiple cultures as well as traditions in students' own lives.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 489 - Writing Nonfiction for Publication**

Credits: 3  
Workshop course. Intensive practice in advanced nonfiction writing; emphasizes writing for publication. Occasional special topics sections in such forms as autobiography and scientific writing.

**Prerequisites**  
ENGL 309 or 399, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 490 - Topics in Film/Media**

Credits: 3  
American and foreign films selected by type, period, or director with emphasis varying from year to year. Required viewings, student discussion, and written critiques.

**Notes**  
May be repeated with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 491 - Topics in Folklore Studies**

Credits: 3  
Exploration of various aspects of folklore and folklife such as folklore and literature, folk arts, folk song, and material culture.
ENGL 492 - Science Fiction

Credits: 3
Major works of science fiction in terms of mode, themes, and narrative techniques, especially role of hypothesis in science fiction. Focuses on novels, short stories from early 19th century to present.

ENGL 493 - Topics in Popular Literature

Credits: 3
Studies specific topic or theme in popular literature.

ENGL 494 - Topics in Criticism

Credits: 3
Studies selected approach to literary criticism, as announced, with exercises in critical analysis. Includes new criticism, structuralism, psychoanalysis, and Marxism.

ENGL 495 - Literary Modes

Credits: 3
Theory and practice of such modes as tragedy, comedy, tragicomedy, romance, and satire, considered in separate semesters and drawn from variety of periods ranging from biblical times to present, with examples from drama, poetry, and fiction.
ENGL 496 - Topics in Writing and Rhetoric

Credits: 3
Advanced studies in rhetoric and writing. Introduces key rhetorical terminology and examines how texts construct meaning and how those meanings are determined within social contexts. Topics may include the relationship between rhetorics and poetics, rhetoric and new media, histories of rhetoric, global rhetorics, argument theory, discourse analysis, theories of technical communication, or advanced theories of composition and pedagogy.

Notes
May be repeated once for credit when subtitle is different, with permission of department.

ENGL 497 - Special Topics in Creative Writing

Credits: 3
Students must submit typed manuscript at least one week before registration. Workshop course. Intensive practice in creative writing and study of creative process. Concentrates on specialized literary type other than short story or poetry, such as playwriting, screenwriting, children's literature, travel literature, autobiography, gothic novel, and translation. Concentration announced in department's Course Description Booklet before preregistration.

Prerequisites
ENGL 396 or equivalent, and permission of instructor.

Notes
Intended for students already writing original creative work. May be taken second time for credit.

ENGL 498 - Internship: Special Topics

Credits: 1-3
Under supervision of faculty advisor, students work as an intern with site supervisor in agency of student's choosing, with advisor's permission.

Prerequisites
60 credits including 3 credits of 100-level English course; 6 credits of 200-level English courses; and 3 credits of English 302.
Notes
English majors need 6 additional credits of upper-level English courses. Non-English majors need 3 additional credits of upper-level English courses, and 3 credits of upper-level courses in the major. Unpaid, approved work-study positions at specific sites. For 3 credits, students work 120 hours on site and write 3,500 words, or the equivalent, given contract with advisor. Contact the English Department one semester prior to enrollment. No more than 3 credits can be counted in concentration or English minor. May be repeated for credit once with permission of department.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ENGL 499 - Independent Study

Credits: 1-6
Intensive study of particular author, genre, period, or critical or theoretical problem in literature or linguistics, to be conducted by student in close consultation with instructor. Student produces at least one substantial piece of written work during semester on research findings.

Prerequisites
Permission of department and instructor.

Notes
Individualized section form required. With permission of department, course may be taken twice for maximum 6 credits. With permission of department, qualified undergraduates may enroll in 500-level courses for either undergraduate or reserved graduate credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ENGL 501 - Introduction to Professional Writing and Rhetoric

Credits: 3
Provides historical and theoretical background in professional writing and editing in a seminar format. Explores professional writing's emergence as a field of scholarship and practice, emphasizes the relationships between rhetorical theories and practice, and introduces students to bibliographic research in the field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 502 - Research Methods in Rhetoric and Professional Writing

Credits: 3
Introduces theory, methods, and ethics of conducting research in rhetoric and professional writing. Students learn to conduct and evaluate research that may include rhetorical analysis, discourse analysis, historical methods, ethnography, user-centered design, document and usability testing, and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ENGL 503 - Theory and Practice of Editing**

Credits: 3  
Instruction in revising, editing, and preparing specialized writing for printing. Emphasizes methods of achieving clarity, accuracy, and completeness. Lecture and discussion on editing and printing techniques; practical exercise in revision, layout, and production.

**Prerequisites**  
6 credits of English courses numbered above 300, including one of 309, 311, 396, 397, 398, 410, 458, 464, 489, or 497; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 504 - Internship in Writing and Editing**

Credits: 3-6  
Approved work-study positions in writing or editing established by department with specific employers.

**Notes**  
Open to senior English majors, and graduate students pursuing MA in English or MFA. Contact English Department one semester before enrolling. Variable credit and prerequisites.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**ENGL 505 - Computer-Assisted Publications Writing and Design**

Credits: 3  
Theory and practice of using computer programs to design and produce publications including brochures, fliers, newsletters, and small magazines. Includes readings, writing papers, and producing and editing copies and original publications.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ENGL 506 - Research for Narrative Writing**

Credits: 3  
Combines study of basic research tools with field work and writing workshop experience. Helps students develop techniques and skills necessary for writing a research-dependent project of sufficient complexity to be of book or long essay length. Emphasis on finding story behind facts, using material from numerous sources.

**Prerequisites**  
ENGL 565 or 566, or permission of instructor.
ENGL 508 - Digital Rhetoric and Design

Credits: 3
Provides an examination of major works on digital rhetoric and digital media framed by contemporary rhetorical theories that inform the emergent field of digital rhetoric. Course work includes projects that engage in the design, analysis, and assessment of digital media.

ENGL 511 - Styles and Modes in Literary History

Credits: 3
Historical consideration of principal styles, modes, and intellectual paradigms in literary and cultural texts.

Prerequisites
15 credits of advanced undergraduate work with the approval of the English department.

Notes
Baccalaureate degree highly recommended.

ENGL 512 - Issues in Literature and Philosophy

Credits: 3
Interdisciplinary seminar offering opportunity to arrive at a personal synthesis of work previously done in philosophy and literature. Topic changes yearly, but focuses on themes or methodologies common to both disciplines.

Equivalent to PHIL 512

Prerequisites
Graduate or senior standing, 6 credits of upper-level English, 6 credits of philosophy, and permission of instructor.

ENGL 513 - Advanced Special Topics in English
Credits: 3
Intensive study of topics involving literary or other texts such as film, television, opera, and folklore.

**Prerequisites**
15 credits of advanced undergraduate English courses and permission of department; or baccalaureate degree.

**Notes**
May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 514 - Theories of Comparative Literature**

Credits: 3
Intensive study of major theories of comparative literature with special emphasis on development and redefinition of comparative outlook, from Great Books and Western Canon to transnationalism, multiculturalism, and intercultural studies.

Equivalent to CL 514

**Prerequisites**
CL 300 and senior standing, or baccalaureate degree; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 526 - Special Topics in the History and Criticism of Children's Literature**

Credits: 3
Focuses on the history and criticism of children's literature by concentrating on selected historical periods and literary modes such as "Golden Age" children's literature, contemporary fantastic and children's literature, or Romantic and Victorian children's literature.

**Notes**
May be repeated once for credit with permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ENGL 551 - Literary Criticism**

Credits: 3
Studies in selected critical theories pertinent to textual and cultural analysis.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
ENGL 555 - Introduction to Cinema Studies

Credits: 3
Advanced introduction to film study, including overview of approaches to study of cinema, methods of close analysis, basic concepts of film form and style, and contemporary theories of film.

Notes
Students who have taken ENGL 332 may not take this course for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 564 - Form of Poetry

Credits: 3
Students seeking permission must submit typed manuscript of original poetry. Intensive study of and practice in formal elements of poetry through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original poetry. Covers rhyme, meter, rhythm, lineation, stanza pattern, traditional and experimental forms, free verse and open-form composition, lyric, narrative, and dramatic modes.

Prerequisites
ENGL 464 or equivalent, and permission of instructor, except for MFA students in the concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 565 - Forms of Nonfiction

Credits: 3
Intensive study of and practice in various forms of nonfiction writing through analyzing models and weekly writing assignments. Includes biographies, documentaries, editorials, interviews, reports, reviews, and essays.

Prerequisites
ENGL 489 or equivalent, and permission of instructor, except for MA and MFA candidates in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 566 - Forms of Fiction

Credits: 3
Students seeking permission must submit typed manuscript of original fiction. Intensive practice in formal elements of fiction through analyzing models and weekly or biweekly writing assignments. Intended for students already writing original fiction. Covers description, narration, plot, dialogue, voice, point of view, style, epiphany, and antifiction techniques.
Prerequisites
ENGL 458 or equivalent, and permission of instructor, except for MFA students in concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 590 - Topics in Folk Narrative

Credits: 3
Explores types of folk narratives such as mythology, folktale, fairy tale, legend, family narrative, personal narrative. Focuses on tales from around the world. Considers aspects of storytelling such as storytelling as performance, storytelling as therapeutic modality, and storytelling during crises and conflicts.

Notes
May be repeated twice for credit when subtitle is different.

Hours of Lecture or Seminar per week: 3

ENGL 591 - Topics in Folklore Studies

Credits: 3
Explores folklore and folklife topics such as folk narrative and storytelling, folklore and literature, folksong, and folk arts.

Notes
May be repeated once for credit when subtitle is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 592 - Historical Studies of the English Language

Credits: 3
Either a chronological survey of development of English from Old and Middle English to Modern English and American English; or intensive study of grammar and syntax of Old English as literary language in representative texts of period.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 604 - Internship in Folklore
Credits: 1-6
Unpaid, approved work-study positions at specific sites arranged by interested students and their advisor. Under supervision of faculty advisor, student works as intern with site supervisor in agency of student's choosing, given advisor's permission.

Prerequisites
Undergraduate or graduate course in folklore, which may be taken concurrently.

Notes
For 3 credits, students work 120 hours on site and write 3,500 words, or equivalent, given contract with advisor. Contact English Department one semester prior to enrollment.

**ENGL 608 - Craft Seminars**

Credits: 3
Non-MFA students seeking permission must submit manuscript of original written work in appropriate genre. Various sections offer work in fiction, poetry, and nonfiction, each focusing in different ways on the practices and the craft development of writers. Numerous writing assignments mixed with reading followed by careful analytical and craft discussions.

Prerequisites
ENGL 464, 458, or 489, and permission of instructor for non-MFA students.

Notes
Assignments vary with genre and specific topic. May be taken concurrently with ENGL 564, 565, 566.

**ENGL 610 - Proseminar in Teaching the Reading of Literature**

Credits: 3
Methods of teaching literature. Includes study of methods of literary analysis, and ways of developing student responses to literature, with some classroom practice.

Notes
Does not satisfy Virginia certification requirement in diagnostic or developmental reading.

**ENGL 611 - Studies in Rhetoric**

Credits: 3
Reading and discussion of several major texts that address patterns of discourse, communication, and other issues of rhetoric.
Notes
Content varies. Recent offerings include 20th century rhetoric, collaborative writing, and computers and rhetoric. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 612 - Cultures of Professional Writing

Credits: 3
Students work as ethnographers, studying selected sites where people write professionally, and analyzing ways production and reception of writing contribute to and result from local culture of each site. Lecture and workshop format.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 613 - Technical and Scientific Writing

Credits: 3
Intensive study of theory and practice of technical and scientific writing, with emphasis on writing for variety of audiences. Focuses on writing and evaluating formal reports, articles for lay and technical audiences, proposals, theses, manuals, and other forms of technical prose.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 614 - Internship in the Teaching of Writing

Credits: 1-3
Internships provide experience working in a teaching program such as school or writing center. Under direction of faculty member, students must secure cooperation of on-site supervisor.

Notes
Students work minimum 3 hours per week per credit to be awarded, keep a weekly reflective and analytical log, and communicate regularly with faculty director. May not be repeated for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ENGL 615 - Proseminar in Composition Instruction

Credits: 3
Methods of teaching expository writing. Includes consideration of planning courses, practice in teaching and grading papers, and study of recent developments in teaching writing.
ENGL 616 - Nonfiction Writing Workshop

Credits: 1-6
Intensive practice in craft of nonfiction and study of creative process. Intended for students already familiar with traditional and contemporary nonfiction, and already writing original nonfiction.

Prerequisites
ENGL 565, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes
At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGL 617 - Poetry Writing Workshop

Credits: 1-6
Intensive practice in craft of poetry and study of creative process. Intended for students already familiar with traditional and contemporary poetic modes and already writing original poetry.

Prerequisites
ENGL 564, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes
At discretion of instructor, reading may be required. May be repeated for credit with permission of department.

ENGL 618 - Fiction Writing Workshop

Credits: 1-6
Intensive practice in craft of fiction and study of creative process. Intended for students already familiar with traditional and contemporary fiction and already writing original fiction.

Prerequisites
ENGL 566, which may be taken concurrently, and permission of instructor, except for MFA students in concentration.

Notes
At discretion of instructor, reading may be required. May be repeated for credit with permission of department.
ENGL 619 - Special Topics in Writing

Credits: 3
Workshop course. Intensive practice in creative writing and study of creative process. Concentrates on specialized literary type other than short story, such as essay, playwriting, film writing, children's literature, travel literature, autobiography, gothic novel, and translation.

Prerequisites
Two graduate writing courses or permission of instructor, except for MFA students in concentration.

Notes
Concentration is announced in department's Course Description Booklet. Intended for students already writing original creative work. May be repeated for credit with permission of department.

ENGL 625 - British Medieval

Credits: 3
Selected literary authors, works, or movements from 1300 to 1500, studied in Middle English.

Notes
Content varies. May be repeated twice for credit with permission of department.

ENGL 630 - Early Modern

Credits: 3
Selected literary authors, works, or movements of English Renaissance.

Notes
Content varies. May be repeated three times for credit with permission of department.

ENGL 635 - Eighteenth-Century British
ENGL 640 - Nineteenth-Century British

Credits: 3  
Selected English literary authors, works, or movements of the 19th century.

Notes  
Content varies. May be repeated twice for credit with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGL 645 - Twentieth-Century British

Credits: 3  
Selected English literary authors, works, or movements of the 20th century.

Notes  
Content varies. May be repeated twice for credit with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGL 650 - Seventeenth-Century American

Credits: 3  
Selected literary authors, works, or movements of the "new world" before 1800.

Notes  
Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

ENGL 655 - Nineteenth-Century American
Credits: 3
Selected American literary authors, works, or movements of 19th century.

Notes
Content varies. May be repeated twice for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 660 - Twentieth-Century American

Credits: 3
Selected American literary authors, works, or movements of the 20th century.

Notes
Content varies. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 661 - Advanced Survey in African American Literature

Credits: 3
Intensive study of period in African-American literature between 1800 and present, with focus to be determined by instructor. Several genres will be considered, including autobiography; fiction; drama; poetry; essays; and oral artifacts such as slave songs, spirituals, and hip-hop.

Notes
May be repeated for credit with department permission.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 665 - Texts in Global Contexts

Credits: 3
Examines various cultural texts such as literature, drama, film, and folklore in terms of transnational circulation or production and reception in locations around the world other than Britain and United States. Engages with issues arising from globalization of English and interplay of global cultures.

Notes
Texts studied in English or English translation. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ENGL 670 - Visual Culture: Theories and Histories

Credits: 3
Advanced study in histories of visual representation including film, television, and video, and in theories of production and circulation of meanings in visual culture.

Prerequisites
Introductory film course, or permission of instructor.

Notes
May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 675 - Feminist Theory and Criticism

Credits: 3
Presents historically based introduction to major debates within feminist theory and criticism. Stressing gender in literature and its interpretation, explores diverse collection of feminist interpretive practices.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 676 - Introduction to Cultural Studies

Credits: 3
Advanced introduction to theoretical practice known as cultural studies, with attention to role in textual studies. Part of interdisciplinary cultural studies PhD and MA in English programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 681 - Advanced Topics in Folklore Studies

Credits: 3
Explores advanced folklore and folklife topics such as bodylore, sense of place, festival, folk drama, and folk narrative studies.

Notes
May be repeated for credit when subtitle is different.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring
ENGL 684 - Proseminar in Poetry

Credits: 3
For students working on independent reading and research in poetry. Designed for students preparing to take the MFA reading exam in poetry but open to others with comparable reading projects in poetry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 685 - Selected Topics, Movements, or Genres of Literature in English

Credits: 3
Content varies.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 695 - Northern Virginia Writing Project Inservice Program

Credits: 1-3
Offered at request of school division or other education agency to assist teachers in improving student writing and use of writing to learn.

Equivalent to EDUC 695

Prerequisites
Admission to graduate program, or permission of department.

Notes
Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ENGL 696 - Northern Virginia Writing Project Teacher/Research Seminar

Credits: 3
Equivalent to EDUC 696

Prerequisites
ENGL 695/EDUC 695 or NVWP Summer Institute.
ENGL 697 - Composition Theory

Credits: 3
Acquaints classroom teachers with theory relating to writing and teaching composition. Focuses on explaining theories of participants, reading works of leading theorists, and developing statement describing implications of theoretical consistency in teaching writing.

Equivalent to EDUC 697

ENGL 699 - Workshop in English

Credits: 1-3
Concentrated workshops, educational tours, independent studies, and special seminars dealing with selected topics in writing, linguistics, film, electronic media, and literature written in English.

Prerequisites
Admission to graduate program, or permission of department.

Notes
All tours are optional, and may be replaced by specified work conducted on campus. May be repeated for credit with permission of department, but no more than 6 credits of ENGL 699 may be applied to master's degree in English. No more than 3 credits of 699 may be applied to literature requirement for MFA degree.

ENGL 701 - Research in English Studies

Credits: 3
Introduces research in English studies, including practice in library methods, writing critical bibliography, evaluating issues and problems, and surveying scholarly activities in department.

ENGL 705 - Literary Theory and Criticism
Credits: 3
Major theories of literature and methods of analyzing and evaluating literary works.

Notes
Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 740 - Seminar in English/Cultural Studies

Credits: 3
Analyzes historical shifts in literary and cultural discourse or of relationships between literary and nonliterary elements of culture within specific historical moment.

Prerequisites
9 credits of graduate English courses including 701, or permission of department.

Notes
Major research paper required. Specific topics vary. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 750 - Advanced Workshop in Poetry Writing

Credits: 3
Open to MFA students only. Intensive practice in craft of poetry for experienced writers.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ENGL 751 - Advanced Workshop in Fiction Writing

Credits: 1-6
Open to MFA students only. Intensive practice in craft of fiction for experienced writers.

Notes
May be repeated for credit with permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
ENGL 752 - Advanced Workshop in Nonfiction Writing

Credits: 1-6
Open to MFA students only. Intensive practice in craft of nonfiction for experienced writers.

Notes
May be repeated for credit with permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

ENGL 797 - Projects in Professional Writing and Rhetoric

Credits: 3
Students complete a capstone project guided by instructor and a faculty consultant. Reflecting on theories and methods learned in previous course work and applying them to a concrete rhetorical situation, students produce a professional-quality project for a primary audience located in the professional workplace or the discipline of rhetoric and professional writing.

Prerequisites
ENGL 501, ENGL 502, and 6 credits of professional writing and rhetoric courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Grading: S/NC

ENGL 798 - Directed Reading and Research

Credits: 1-6
Reading, research, and writing on specific project under direction of department member.

Prerequisites
Open only to degree students who have preregistered and have completed 15 credits, including ENGL 701.

Notes
Oral or written report required. MA students may repeat once for credit with permission of department. MFA students may present up to 12 credits of ENGL 798 for graduation, but no more than 3 may count toward completing literature requirement.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

ENGL 799 - Thesis

Credits: 1-6
Students who take ENGL 798 to develop thesis topic and then elect thesis option receive 3 credits for ENGL 799 on completion of thesis. Students who do not take ENGL 798, or who take it to work on project unrelated to thesis, receive up to 6 credits for ENGL 799 on completion of thesis.
ENGL 800 - Studies for the Doctor of Philosophy in Education

Credits: 3
Program of studies designed by discipline director and approved by doctoral committee that prepares student for research and writing in area of interest of discipline director.

Prerequisites
Admission to PhD in education program to study in English.

Notes
Enrollment may be repeated.

ENGL 801 - New Developments in English

Credits: 3
Readings are from literary studies, composition and writing theory, and linguistics.

Notes
Designed for students in doctor of arts in community college education program. Focuses on major original texts that have influenced discipline of English in late 20th century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Enterprise Engineering and Policy

EEP 601 - Introduction to Enterprise Engineering: Engineering and Policy

Credits: 3
Provides overview of extended enterprise integration using modern standard software solutions and tools. Focuses on integration and management aspects of extended enterprise solutions. Topics include enterprise resource planning and e-business extensions. Students must demonstrate complete proficiency in modern implementation methodology and supporting tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EEP 602 - Decision Support for Enterprise Integration
Lectures focus on using "business intelligence" to enhance competitive advantage, developing information-driven set of controls to improve profitability, and creating balanced business with aligned corporate direction and strategic intent. Examines solutions within enterprise resource planning systems.

**Prerequisites**
EEP 601.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EEP 603 - Supply Chain Integration and Management (Business-to-Business Electronic Commerce)**

Credits: 3  
Focuses on two issues: supply chain integration from information technology perspective, and supply chain management from decision support perspective. Course motivation is merging of enterprise computing with operations research, primarily through customer and supply chain management systems. Topics include enterprise resource planning and web integration, advanced planning and scheduling, and CPFR.

**Prerequisites**
EEP 601.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EEP 604 - E-Commerce Architectures (Business-to-Consumer Electronic Commerce)**

Credits: 3  
Introduces network and system architectures that support high-volume, business-to-consumer web sites and portals. Provides insight into structure of modern web-enabled storefront. Critical business and technology issues include storage area networks, server clustering, load balancing techniques at server and network levels, fault tolerance, and recovery of database and application servers.

**Prerequisites**
EEP 601.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EEP 605 - Economics of Electronic Commerce**

Credits: 3  
Focuses on gaining competitive advantage through electronic commerce implementation; identification and growing of new market opportunities and electronic enabling of existing business relationships; business-to-consumer relationships and economics of strategic procurement; enterprise resource planning hosting; customer relationship management; catalog hosting; portal operations; and supplier management.
Prerequisites
EEP 601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EEP 606 - Customer Relationship Management

Credits: 3
Modern world of e-commerce extends intraenterprise integration, as implemented in enterprise resource planning systems, to include external constituents such as customers, partners, and suppliers. Course focuses on modern system support for demand chain, and value-creation process that results from integrating "front office" and "back office" systems.

Prerequisites
EEP 601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EEP 607 - Critical Information Technology Infrastructures

Credits: 3
Focuses on design and implementation of high-speed network and application services in support of modern enterprise resource planning (ERP) systems. Critical technologies include high-speed data communication, switched vs. routed data flow, workflow engines, business rule and web application servers, and load-balancing technologies. Large-scale, web-enabled ERP system architecture examined in detail.

Prerequisites
EEP 601.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EEP 608 - Optimization of Supply Chains

Credits: 3
Focuses on supply chain optimization from enterprise-wide perspective, and supply chain optimization from business-to-business e-commerce perspective. Explores optimizing value of goods and services and assuring reasonable return on such sales. Describes heuristic and exact algorithms for scheduling, production, inventory management, logistics, and distribution. Presents new software that enables such optimization, and new techniques to handle risk, quality of data, and robustness of solutions. Outlines manufacturing and service examples from public and private sectors. Students perform case studies using state-of-art software.

Prerequisites
MATH 203 and 213, and graduate standing.
EEP 609 - Special Topics in Enterprise Engineering and Policy

Credits: 1-3
Topics not covered in regular EEP course offerings; content varies each semester.

EEP 610 - Project in Enterprise Engineering and Policy

Credits: 3
Focuses on completing capstone project in enterprise engineering and policy. Designed as two-semester project, with student closely guided by faculty advisor.

Prerequisites
Admission to EEP program.

Notes
Topic selected by mutual agreement with faculty advisor.

Environmental Science and Public Policy

See additional course work under Biology (BIOL), Chemistry (CHEM), Public and International Affairs (PUAD), School of Public Policy (PUBP), Geography (GEOG), and Geology (GEOL)

EVPP 110 - The Ecosphere: An Introduction to Environmental Science I

Credits: 4
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and earth sciences in integrated format with lecture, laboratory, and field exercises.

Satisfies General Education Requirement: Natural science Lab

Notes
One of two semesters of environmental lab science that fulfills general education science requirements for non science majors. Along with EVPP 111, can be taken in any order.
EVPP 111 - The Ecosphere: An Introduction to Environmental Science II

Credits: 4
Studies components and interactions that make up natural systems of our home planet. Teaches basic concepts in biological, chemical, physical, and Earth sciences in integrated format with lecture, laboratory, and field exercises.

Satisfies General Education Requirement: Natural science Lab

Notes
One of two semesters of environmental lab science that fulfills general education science requirements for non science majors. Along with EVPP 110, can be taken in any order.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 201 - Environment and You: Issues for the Twenty-First Century

Credits: 3
Introduces broad aspects of human-environmental interactions in the contemporary world. Topics range broadly from global populations and wastewater treatment to environmental law, and genetic engineering. Includes both science and science policy of the environment.

Satisfies General Education Requirement: Natural science Nonlab

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 305 - Environmental Microbiology Essentials

Credits: 3
Provides understanding of microbes and their function as a vital part of an environmental education. The role of microbes is central to many environmental issues such as climate change, biodegradation of toxics, wastewater treatment and drinking water contamination. Course provides an introduction to the breadth of microbiology including essential information for students studying environmental problems and their solution.

Prerequisites
EVPP110 and 111 or BIOL 213, and 30 semester hours, or Permission of Instructor.

Corequisite
EVPP 306

Notes
Laboratory section (EVPP306 proposed) is a corequisite unless previously completed

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer, Spring
EVPP 306 - Environmental Microbiology Essentials Laboratory

Credits: 1
Laboratory study of environmental microbiology. Course provides an introduction to the microbiological techniques for students studying environmental problems and their solution. Examples include wastewater treatment - a microbial reactor metabolizing organic matter, drinking water quality - is based on detection and quantification of coliform bacteria, visualization of bacteria in their natural habitat.

Prerequisites
EVPP 110 and 111 or BIOL 213, and 30 semester hours

Corequisite
EVPP 305

Notes
Lecture section (EVPP 305 proposed) is a corequisite.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall, Summer, Spring

EVPP 318 - Conservation Biology

Credits: 3
Introduces science used to identify species in need of conservation, and techniques to manage and protect organisms.

Equivalent to BIOL 318

Prerequisites
BIOL 307 and 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 322 - Business and Sustainability

Credits: 3
This course examines the types of approaches businesses can take to respond to sustainability concerns. Students from multiple disciplines (business, social sciences, natural sciences, humanities, education, etc.) can participate in the class without having had previous courses in management. The class is designed to prepare students for assisting organizations to incorporate sustainability considerations into their strategic decision-making.

Prerequisites
30 credit hours, recommend EVPP 361/GOVT 361 - Introduction to Environmental Policy

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring
EVPP 335 - People, Plants, and Culture

Credits: 3
Introduces students to the complex interactions of people and plants in historical and contemporary times. The course is team taught by professors of both natural and social science. The instructors will lend their expertise to fully address the fundamental links between botany, human ecology, and environmental health and sustainability.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 336 - Human Dimensions of the Environment

Credits: 3
Overview of current knowledge regarding human and environment interactions and human ecology. Topics include basic theoretical and conceptual issues, relationship between social and biological sciences, human causes and consequences of environmental change, and contemporary perspectives on environmental issues.

Prerequisites
One of EVPP 110, EVPP 111, GEOL 101, SOCI 101, or ANTH 114.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 337 - Environmental Policy Making in Developing Countries

Credits: 3
Overview of environmental policy process in developing countries around the world. Major focus on understanding distinctive problems and dynamics of environmental policy making in poor countries to generate better policy decisions and management.

Prerequisites
60 credits.

Notes
This is a writing intensive class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 338 - Ecological Economics
Credits: 3
Introduction to environmental, resource, and ecological economics for non-economist undergraduates. Covers basic theories of scarce resource allocation and examines conditions under which market allocations are efficient and sustainable. Includes graphical and verbal presentation of theory. Course requirements may include problem sets, written assignments, class participation, and short exams.

Prerequisites
60 units completed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 350 - Freshwater Ecosystems

Credits: 4
Studies physical, chemical, and biological processes in lakes, streams, and wetlands. Teaches physical and chemical aspects of aquatic systems and life cycles, and adaptations of aquatic organisms. Lectures, field trips, lab exercises.

Equivalent to BIOL 350

Prerequisites
Either CHEM 211/212 or CHEM 155/156 and either EVPP 110/111 or BIOL 307.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 355 - Ecological Engineering and Ecosystem Restoration

Credits: 4
Provides definition, classification, and practice of ecological engineering and ecosystem restoration. Describes general system ecology, ecosystem restoration (i.e., wetland and river systems), and the use of natural processes to provide ecosystem services to society. Provides students with a systems-oriented perspective on designing and managing ecosystems. Students will study principles in designing field ecological studies, ecological models, ecological engineering, and explore practices in sustainable ecological design by carrying out a hands-on experimental design project with the field wetland mesocosm on the Mason campus. One field trip is required part of the course.

Equivalent to BIOL 355

Prerequisites
CHEM 211, BIOL 307, PHYS 243 and/or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 361 - Introduction to Environmental Policy
Credits: 3
Environmental politics and policymaking since the 1970s. Primary focus on United States, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.

Equivalent to GOVT 361

**Prerequisites**
30 credit hours.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 362 - Intermediate Environmental Policy**

Credits: 3  
Examines environmental issues building on learning objectives from EVPP 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. "Natural" disasters as well as direct "man-made" problems will be covered.

**Prerequisites**
EVPP 361 or GOVT 361 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall and Spring

---

**EVPP 363 - Coastal Morphology and Processes**

Credits: 4  
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, and storms; and human activities. Lectures and extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 563/GEOL 363

**Prerequisites**
GEOL 309, BIOL 309, or GEOL 317; or 9 credits in geography, including GGS 309.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 377 - Applied Ecology**

Credits: 3  
Introduces ecosystem concepts and applications to natural and managed ecosystems.
Equivalent to BIOL 377

**Prerequisites**
60 credits, including 8 credits of biology, geology, or chemistry; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 395 - Undergraduate Research in Environmental Science and Policy**

Credits: 1-3  
Original research project. May involve field and lab study, computer modeling and analysis, or other original research as appropriate. Research formulated and completed under instructor's guidance.

**Prerequisites**
45 credits including at least two upper-level science lab courses.

**Notes**
Culminates in final report. May be repeated for total 10 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**EVPP 396 - Directed Topic in Environmental Science and Policy**

Credits: 1-4  
Study of topics not available in fixed-topics courses. May involve readings, lectures, lab assignments, and tutorials as jointly agreed on by student and instructor.

**Prerequisites**
45 credits.

**Notes**
Culminates in term paper, final exam, or both. May be repeated for maximum 8 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**EVPP 419 - Marine Mammal Biology and Conservation**

Credits: 3  
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 519/BIOL 508
Prerequisites
BIOL/GEOL 309 or BIOL 449; 60 credit hours.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 421 - Marine Conservation

Credits: 3
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy.

Equivalent to EVPP 521/BIOL 507

Prerequisites
BIOL/GEOL 309 and completed or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 430 - Fundamentals of Environmental Geographic Information Systems

Credits: 3
Provides the basic knowledge to explore complex environmental data sets and relationships among biological, ecological, physical and anthropogenic variables using geographic information systems. Using spatial mapping and exploration tools students will be capable of independent analysis of complex environment.

Prerequisites
EVPP 110 and 111, and IT 103 or CDS 103, and 60 credits or Permission of Instructor.

Notes
Previous knowledge of fundamentals of geography, coordinate systems and map projections is an asset. Knowledge of operating systems, text editor and spreadsheet is required.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer

EVPP 432 - Energy Policy

Credits: 3
Overview of energy policy issues, including different energy sources, electricity generation, efficiency and conservation, energy
economics, related energy issues, such as climate change, energy in a global context, transmission of power, and others. Updated yearly. One field trip is part of the course.

**Prerequisites**
60 credits and EVPP 361/GOVT 361, or Permission of Instructor

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall and Spring

---

**EVPP 436 - The Human Dimensions of Global Climate Change**

Credits: 3  
Social science investigation of humans' role(s) in global climate change, including diversity of ecological, cultural and policy issues. Focuses on current science, causes and responses, human rights and social justice, vulnerability of marginalized populations, relevant issues associated with communication and behavior change, place of policy, and the multiple existing and potential roles of academic action. Discussion format.

**Prerequisites**
EVPP 336, CLIM 101 and 60 credits, or Permission of Instructor

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

---

**EVPP 445 - Principles of Environmental Toxicology**

Credits: 3  
Explores basic principles of toxicology with an emphasis on the environment. Includes the history and scope of the field; absorption, distribution, metabolism and excretion of toxicants; mechanisms of toxic action; genetic toxicology; ecotoxicology as well as specific examples important toxicants. Introduces regulatory toxicology and human and ecological risk assessment.

**Prerequisites**
EVPP 110, 111 and Chem 211,212 and 60 credit hours; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Spring

---

**EVPP 451 - Fungi and Ecosystems**

Credits: 3  
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites.

Equivalent to EVPP 551; BIOL 459; BIOL 559

**Prerequisites**
BIOL 304 or course in microbiology; or permission of instructor.
EVPP 468 - Vertebrate Natural History

Credits: 4
Introduces vertebrates with emphasis on systematics, evolution, life history, behavior, and ecology. Laboratory emphasis on identification, taxonomy, and natural history of local vertebrates.

Equivalent to BIOL 468

Prerequisites
BIOL 303 and BIOL 307 or permission of the instructor.

When Offered: Fall

EVPP 480 - Sustainability in Action

Credits: 4
In the wake of global concerns about environmental change, the issue of attaining sustainability has become internationally important. To attain sustainability requires action at environmental, social, and economic levels. To provide students with valuable and tangible experience in practical aspects of realizing sustainability goals and to transfer theory into practice, this course allows students to engage in real-world, sustainability-related projects that provide benefits for a target community. Working in interdisciplinary teams, students will identify and attempt to solve a sustainability-related problem or address a sustainability-related need in a specific target community. Priority will be given to sustainability projects on the Mason campus or the local community. However, options for other relevant projects will be considered on a case-by-case basis.

Prerequisites
Completed or concurrent enrollment in all other required general education courses; 60 credit hours completed.

Notes
This is the capstone course for the Sustainability Minor – see Environmental Science and Policy department listing for details.

EVPP 490 - Special Topics in Environmental Science and Policy

Credits: 4
Studies selected topics in environmental science and policy using lectures, guest lectures, student presentations, or laboratory exercises.

Prerequisites
60 credits, and permission of instructor.
EVPP 503 - Field Mapping Techniques

Credits: 3
Basic techniques for collecting, recording, and plotting spatial field data, including topographic maps, compass, transit, alidade, and global positioning systems. Field work and field-based research project.

Equivalent to GEOL 303

Prerequisites
MATH 105 or equivalent; and EVPP 110, GGS 102, or GEOL 101 or equivalent.

EVPP 505 - Selected Topics in Environmental Science

Credits: 4
Topic depends on instructor's specialty.

Prerequisites
Course in ecology or geology, or permission of instructor.

EVPP 506 - Science of the Environment I

Credits: 3
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisites
Permission of the instructor.

Notes
For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.
EVPP 507 - Science of the Environment II

Credits: 3
Environmental science is explored in this 2-semester sequence providing the foundation in chemistry (I) and biology (II) required for graduate students with social sciences backgrounds seeking a degree and career in environmental science and policy.

Prerequisites
EVPP 506 or permission of instructor.

Notes
For graduate students entering the Environmental Science and Policy or other programs. Not available to students with undergraduate degrees in the natural sciences. This course is in addition to all other degree requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 515 - Molecular Environmental Biology I

Credits: 3
Introduces molecular environmental biology covering basic concepts of molecular biology, molecular evolution, and bioinformatics, and application to problems in molecular and environmental biology.

Prerequisites
Introductory biology and genetics course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 519 - Marine Mammal Biology and Conservation

Credits: 3
Covers the evolution, biology, ecology, and behavior of marine mammals from polar bears and sea otters to whales and dolphins. Marine mammal conservation and policy is also a major component of the course; several lecture sessions are devoted to the issue of whaling, threats to marine mammal populations, and recent conservation issues such as marine mammals and noise pollution. The course also includes a number of guest lectures from a variety of international marine mammal experts.

Equivalent to EVPP 419/BIOL 508

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 521 - Marine Conservation
Credits: 3
Provides an overview of threats to the marine environment, and discusses the scientific, socioeconomic, and political issues behind marine conservation. Covers categories of marine pollutants (chemical, biological, and physical contaminants) and their impacts on the marine ecosystem, as well as impacts on humans (health, social, and economic), threats to key marine species (e.g., coral, sharks, turtles, and marine mammals) and initiatives and laws developed to reduce these threats. Scientific and socioeconomic problems that hinder sustainable fisheries management and the science and policy behind the global warming debate are also discussed. The course also provides an overview of marine environmental law and policy issues related to marine conservation policy.

Equivalent to EVPP 421/BIOL 507

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 524 - Introduction to Environmental and Resource Economics**

Credits: 3
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problems set, short writing assignments, and exams.

Equivalent to GGS 524

**Prerequisites**
Basic algebra skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 525 - Economics of Human/Environment Interactions**

Credits: 3
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Lecture, discussion with substantial student participation. Problem sets, class presentations, term paper.

Equivalent to ECON 895/GGS 525

**Prerequisites**
EVPP 524/GGS 524 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EVPP 531 - Land-use Modeling Techniques and Applications**
Credits: 3
Surveys literature on spatially explicit empirical models of land-use change. Offers hands-on experience developing and running simple models. Includes statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to GGS 531

Prerequisites
GGS 550, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 536 - Ichthyology

Credits: 4
Studies systematics, evolution, physiology, ecology, and behavior of fishes. Lab time used for field trips, practice in identifying species, and hands-on experience with lecture subjects.

Equivalent to BIOL 536

Prerequisites
Ecology course, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

EVPP 538 - Mammalogy

Credits: 4
Study of evolution, systematics, physiology, ecology, and behavior of mammals, emphasizing fieldwork.

Equivalent to BIOL 538

Prerequisites
BIOL 303 and BIOL 307 or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
When Offered: Fall

EVPP 543 - Tropical Ecosystems

Credits: 4
Terrestrial, aquatic, and marine ecosystems in the tropics, emphasizing plant communities, plant-animal interactions, and role of humans in tropics.
Equivalent to BIOL 543

**Prerequisites**
Ecology course, and permission of instructor.

**Notes**
Requires field trip to tropics as part of lab.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 550 - Waterscape Ecology and Management**

Credits: 3  
Studies physical, chemical, and biological components of freshwater ecosystems with emphasis on streams, rivers, and lakes; links between watersheds and freshwater ecosystems; and impact of human management.

**Prerequisites**
Course in chemistry and course in ecology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 551 - Fungi and Ecosystems**

Credits: 3  
Considers impact of fungi on ecosystems in terms of effects on biogeochemical cycling, primary and secondary production, and regulating community structure and populations of individual species through activities as symbionts and parasites. Discusses role of fungi in ameliorating pollutants produced by anthropogenic activities.

Equivalent to EVPP 451; BIOL 459; BIOL 559

**Prerequisites**
BIOL 304 or course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 555 - Lab in Waterscape Ecology**

Credits: 1  
Field and laboratory approaches to freshwater ecology with emphasis on study design, sampling methods, laboratory and data analysis, and report writing.

**Prerequisites**
EVPP 550 or permission of instructor.
EVPP 563 - Coastal Morphology and Processes

Credits: 4
Studies global coastal geomorphology and processes, emphasizing U.S. Atlantic and gulf coasts. Topics include plate tectonics; sea-level changes; sediment supply; impact of waves, tides, storms; and human activities. Lecture, extended weekend field trips to mid-Atlantic coast.

Equivalent to EVPP 363/GEOL 363

Prerequisites
Previous courses in geology, oceanography, marine science or physical geography; or permission of instructor.

EVPP 576 - Microbial Ecology of Soils

Credits: 3
Surveys microbial ecology in surface and subsurface soils. Describes organisms and their function and interaction.

Equivalent to BIOL 576

Prerequisites
Course in microbiology or permission of instructor.

EVPP 577 - Biogeochemistry: A Global Perspective

Credits: 3
Structure and function of ecosystems, their interactions as components of landscapes, and contributions to the global environment. Emphasizes biogeochemical cycles of natural, disturbed, and managed ecosystems, and integration at landscape and global level as related to current ecological problems such as transfer of nonpoint source pollutants, atmospheric deposition, stratospheric ozone depletion, and global change.

Equivalent to BIOL 577

Prerequisites
Course in ecology and course in chemistry; or permission of instructor.
EVPP 581 - Estuarine and Coastal Ecology

Credits: 3
Emphasizes marine biology of estuarine and coastal habitats of Chesapeake Bay region, and factors affecting distribution and abundance of organisms.

Equivalent to BIOL 581

Prerequisites
Course in ecology and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 582 - Estuarine and Coastal Ecology Laboratory

Credits: 1
Provides training in field measurement of physical and chemical parameters, and collection and identification of local organisms. Emphasizes the practice of ecological field research.

Equivalent to BIOL 582

Prerequisites
EVPP 581/BIOL 581

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

EVPP 607 - Fundamentals of Ecology

Credits: 3
Overview of concepts in physiological, population, community, ecosystem, biogeographical and human ecology.

Equivalent to BIOL 607

Notes
Restricted to graduate students with little or no background in ecology. Students who have taken BIOL 307 or the equivalent elsewhere are ineligible for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 610 - Bioremediation: Theory and Applications
Credits: 3
Provides basis for understanding proper application of bioremedial technologies to treatment of hazardous wastes. Includes evaluation of data to determine successful treatment.

Equivalent to BIOL 610

**Prerequisites**
Courses in microbiology and either organic chemistry or biochemistry; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 613 - Environmental Geochemistry and Mineralogy**

Credits: 3
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Equivalent to GEOL 613

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EVPP 615 - Molecular Environmental Biology II**

Credits: 4
Applied course covering theory and methodology of molecular environmental biology, including analysis of selected case studies in conservation biology of macro-organisms, molecular systematics, and microbial ecology.

**Prerequisites**
EVPP 515 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

**EVPP 620 - Development of U.S. Environmental Policies**

Credits: 3
Through lectures, guest speakers, class discussions and assigned reading, examines nature and historical development of environmental policy in the United States, including consideration of social, political, economic and environmental factors, and ways it is expressed and implemented. Also consider sustainability and emerging issues.

**Prerequisites**
8 graduate credits including graduate course in policy process and course in ecology; or permission of instructor.
EVPP 621 - Overview of Biodiversity Conservation

Credits: 3
Lectures, reading assignments, class discussions, and orally presented and written case studies to explore what biodiversity is, why it is important, how conservation has evolved, and status today.

Prerequisites
8 graduate credits in ecology and environmental science or environmental policy, or permission of instructor.

EVPP 622 - Management of Wild Living Resources

Credits: 3
Through lectures, case studies, and discussions, examines management of different types of wild living resources: animal and plant, aquatic and terrestrial. Reviews status of resources, analyzes factors that have led to present situation, and considers what may be required to achieve effective and sustainable management.

Prerequisites
8 graduate credits of ecology or permission of instructor.

EVPP 623 - Translating Environmental Policy into Action

Credits: 3
Guest lecturers, class discussions, written and orally presented case studies, and assigned reading to identify and analyze factors involved in moving from science and policy to concrete action. Provides understanding of basic principles, skills, and strategies.

Prerequisites
8 graduate credits in environmental science or environmental policy, or permission of instructor.

EVPP 626 - Environment and Development in Asia
Credits: 3
Guest lecturers, assigned reading, class discussions, and oral and written case studies to examine environment and development in selected countries of South, Southeast, and East Asia. Reviews relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.

Prerequisites
8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 627 - Environmental Policy in Latin America

Credits: 3
Guest lecturers, assigned reading, class discussions, and oral and written case studies to examine environmental policy in Latin America. Reviews evolution of environmental policy and relationship between environment and development, considers background and history leading up to the present, and considers requirements to achieve more effective and sustainable results.

Prerequisites
8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 628 - Environment and Development in Africa

Credits: 3
Guest lecturers, assigned reading, class discussions, oral and written case studies to examine environment and development in sub-Saharan Africa. Reviews relationship between environment and development, considers background and history leading up to present, and considers requirements to achieve more effective and sustainable results.

Prerequisites
8 graduate credits in policy process, international development, and ecology; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 630 - Methods and Logic of Social Inquiry

Credits: 3
Emphasizes gathering, interpretation, and evaluation of scientific evidence. Develops critical thinking skills and covers logic of scientific inquiry, including various data collection methods such as experiments, observational research, and Q methodology.

Prerequisites
Undergraduate statistics and research methods, or permission of instructor.
EVPP 631 - Spatial Agent-based Models of Human-Environment Interactions

Credits: 3
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models, and investigation of links between GIS and ABM.

Equivalent to CSI 709; GGS 631

Prerequisites
EVPP 531 or CSS 600, or permission of instructor.

EVPP 632 - Qualitative Research Methods for Environmental Scientists

Credits: 3
Course engages questions of qualitative research methods for scientists conducting human-environment research. Focuses on tools to investigate the human-environment nexus, including community-based conservation and management research and decolonizing methodologies. Students discuss and practice 'triangulation'-- the integration of qualitative and quantitative methods-- a necessary skill for environmental/human-environment research.

EVPP 635 - Environment and Society

Credits: 3
Human-environment interactions in human ecology perspective, historical basis of human environmental impact, indigenous and nonindigenous worldviews in context of modernization, environmental degradation and globalization, and contemporary policy and research initiatives geared toward resilience and sustainability. Discussion format.

EVPP 636 - Gender, Race, and the Natural World

Credits: 3
Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar and discussion. Analyzes ideologies that underpin the interlocking narratives of gender, race, and nature, and examines role of science in producing these ideologies.
EVPP 637 - Human Dimensions of Global Change

Credits: 3
Examines human dimensions of climate change, biodiversity loss, ozone depletion, and related anthropogenic alterations of biosphere.

Prerequisites
Graduate standing, or permission of instructor.

EVPP 638 - Corporate Environmental Management and Policy

Credits: 3
Provides understanding of how environmental issues interact with business strategy decisions. Emphasizes learning about proactive win-win environmental management strategies being implemented by world's leading firms, and shows how government policies and regulations can be designed to simultaneously promote higher environmental protection and competitiveness. Combines mini lectures, participatory discussions.

EVPP 641 - Environmental Science and Public Policy

Credits: 3
Effects of human activities on environment. Considers airborne, waterborne, and solid waste contaminants with respect to sources, control, and effect on ecosystems and humans. Focus is on scientific and technical aspects of environmental contamination. Includes discussion of science policy related to these topics.

Prerequisites
Course in ecology, or permission of instructor.

EVPP 642 - Environmental Policy

Credits: 3
In-depth examination of U.S. efforts since 1970 to mitigate pollution of air, land, and water. Addresses issues of global concern,
including biodiversity loss, ozone depletion, and climate change.

Equivalent to PUAD 642

**Prerequisites**
Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 643 - Microbial Ecology**

Credits: 4  
Studies relationships between microorganisms and their natural environment, and methodology for observing the microbes in nature and the biochemistry of environmental systems. Includes discussion of the role of microbes both in creating and removing toxic threats in the environment. Laboratory component includes field sampling/analyses and laboratory isolation and identification of microbes as well as measurement of their physiological activities.

Equivalent to BIOL 643

**Prerequisites**
Course in microbiology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 645 - Freshwater Ecology**

Credits: 3  
Studies biotic and abiotic interactions that affect structure and composition of freshwater ecosystems. Emphasizes research literature.

**Prerequisites**
EVPP 550, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 646 - Wetland Ecology and Management**

Credits: 3  
Emphasizes structure, functions, and ecological processes of created and natural wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, and ecological aspects of wetlands and the management of these systems through in-class and field/lab works. Each student is required to carry out an individual research project that involves field and lab works, and write a research paper.

**Prerequisites**
BIOL 307 or EVPP 377, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 647 - Wetland Ecology Lab and Field**

Credits: 1  
Use laboratory and field work to study the structure and function of wetland ecosystems.

**Prerequisites**  
EVPP 646 (formerly EVPP 644)

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**EVPP 648 - Population Ecology**

Credits: 3  
Surveys ecological models and theory. Topics include population growth and regulation, competition, predator-prey, herbivore-plant, and parasite-host interactions, mutualism, and metapopulation ecology.

Equivalent to BIOL 648

**Prerequisites**  
Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EVPP 650 - Environmental Analysis and Modeling**

Credits: 4  
Introduces principles, history, and methodologies of systems ecology, emphasizing development and simulation of ecological models for natural resource/ecosystem management, conceptual and symbolic models, and simulation techniques on microcomputers.

**Prerequisites**  
Course in ecology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**EVPP 652 - The Hydrosphere**
Credits: 3
Components and transfer processes within hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers; snow, ice, glaciers, soil, moisture, ground water, and atmospheric water vapor.

Equivalent to GGS 656

Prerequisites
Two semesters of calculus and partial differential equation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 670 - Environmental Law

Credits: 3
Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

Equivalent to BIOL 670

Prerequisites
Courses in ecology and environmental biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 675 - Environmental Planning and Administration

Credits: 3
Examines interaction of man and ecological systems; causes of damage or deterioration in environment; content, oversights, and externalities in management decision processes that affect environment and effectiveness of plan implementation; means of assessing environmental impact; and administrative approaches for minimizing environmental impact.

Prerequisites
Permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3
Uses ecological principles to manage natural resources. Emphasizes hierarchical levels of organization within ecological systems, and management of ecosystems to conserve biodiversity, natural resources, and environment.

Prerequisites
EVPP 607 or equivalent.
EVPP 681 - Introduction to Bioinformatics

Credits: 3
Overview of methods and tools in bioinformatics including Internet interfaces to sequence databases, methods for performing searches of biological databases, sequence alignment, phylogenetic analysis, other types of DNA sequence analysis, web-based tools, and databases in structural biology.

Prerequisites
Course in molecular biology, or permission of instructor.

EVPP 682 - Principles of Environmental Conflict

Credits: 3
Explores the nature and characteristics of environmental conflict and efforts to manage, resolve or transform it. Students will develop a capacity to assess the strengths and weaknesses of environmental conflict resolution processes while learning about best practices for preventing, preparing for, and addressing environmental conflict.

Equivalent to CONF 682

Prerequisites
CONF 501, CONF 502 or permission of instructor

Credits: 3
This course explores best practices for managing, resolving, and transforming environmental conflict using environmental conflict resolution (ECR) processes. Nature and dynamics of environmental disputes, methods for assessing conflict situations, and methods for conducting various forms of ECR processes will be covered in the context of selected case studies with emphasis on student involvement.

Equivalent to CONF 683

Prerequisites
EVPP 682 or permission of instructor
EVPP 684 - Environmental Conflict Resolution and Collaboration: Leadership Practicum/Capstone

Credits: 3
This course is the capstone course for the Graduate Certificate in Environmental Conflict Resolution and Collaboration. Under supervision of the instructor, students will undertake an assessment of an active environmental conflict and recommend a range of processes that promote identified goals for preferred conflict outcomes.

Equivalent to CONF 684

Prerequisites
EVPP 682 and EVPP 683

EVPP 692 - Master's Seminar in Environmental Science and Public Policy

Credits: 1
Explores selected topics in environmental science and public policy using lectures, guest lectures, student presentations, and discussions of current literature.

Notes
Topics vary. May be repeated for credit.

EVPP 693 - Directed Studies in Environmental Science and Public Policy

Credits: 1-4
Studies topic not otherwise available in graduate program. May involve reading assignments, tutorials, lectures, papers, presentations, and lab or field study determined in consultation with instructor.

Prerequisites
Permission of instructor and chair.

Notes
Short study plan required. May not be used to fulfill explicit undergraduate prerequisites for graduate work.
EVPP 741 - Advanced Topics in Environmental Science and Public Policy

Credits: 0-4
Studies selected advanced topics in environmental science and public policy. Lectures, guest lectures, student presentations, laboratory exercises.

Prerequisites
8 credits of graduate course work in environmental science and public policy, or permission of instructor.

Notes
Topics vary; each offering has coherent theme. May be repeated for credit if topics significantly differ.

Hours of Lecture or Seminar per week: 0-4
Hours of Lab or Studio per week: 0-4

EVPP 745 - Environmental Toxicology

Credits: 3
Studies nature, distribution, and interaction of toxic chemicals released into environment. Topics include acute, subchronic, and chronic toxicity testing; uptake, distribution and metabolism of toxins as well as their distribution in the environment. Emphasizes effects on nonhuman biota, detection and fate of chemicals, and includes discussion of implications for government regulation.

Equivalent to BIOL 745

Prerequisites
Courses in ecology and physiology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EVPP 791 - Colloquium in Earth Systems Science

Credits: 1
Covers various parts of Earth systems. Invited talks by Mason faculty and primarily Earth science experts in region. Students graded on written reports demonstrating understanding of wide topics covered.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EVPP 792 - Seminar in Earth Systems Science

Credits: 2
Seminar for Earth systems science graduate students with background in major systems. Capstone experience. Seminars presented by faculty and students.
Equivalent to GGS 792

**Prerequisites**
15 graduate credits; and courses on atmosphere, hydrosphere and lithosphere.

**Notes**
Topics vary from semester to semester.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**EVPP 793 - Research in Environmental Science and Public Policy**

Credits: 1-3  
Library, laboratory, or field investigation under supervision of instructor.

**Prerequisites**
8 graduate credits in EVPP, and permission of instructor and chair.

**Notes**
Short proposal required. May be repeated for total of 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**EVPP 798 - Master's Research Project in Environmental Science and Public Policy**

Credits: 1-3  
Experimental, observational, literature-based, or theoretical research project chosen and completed under guidance of faculty member. Proposal required before enrollment. Comprehensive report acceptable to student's committee required for completion.

**Prerequisites**
Approved project proposal, and permission of instructor and chair.

**Notes**
Students taking EVPP 798 may receive no more than 6 credits for both EVPP 793 and EVPP 798.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

---

**EVPP 799 - Master's Thesis in Environmental Science and Public Policy**

Credits: 1-6  
Experimental, observational, or theoretical research under instructor's supervision that culminates in production of thesis. Thesis work should be potentially publishable.
Prerequisites
Approved thesis proposal, and permission of instructor and chair.

Notes
No more than 6 credits of EVPP 793 and EVPP 799 may be applied to master's degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

EVPP 894 - Supervised Internship

Credits: 3-12
Training in application of ecological skills to environmental management and policy under supervision of a qualified environmental scientist at governmental agency, consulting firm, industry, or other acceptable organization.

Prerequisites
Permission of student's doctoral committee, graduate program director and department chair.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

EVPP 991 - Advanced Seminar in Environmental Science

Credits: 2
Topics generally address interface between environmental science and public policy.

Prerequisites
8 hours of ecology, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EVPP 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for a doctoral dissertation.

Prerequisites
Admission to doctoral candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP
EVPP 999 - Doctoral Dissertation Research

Credits: 1-12
Research on basic or applied problem in environmental science and public policy.

Prerequisites
Approval of dissertation proposal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Executive Master of Business Administration

EMBA 603 - Managerial Economics and the Decisions of the Firm

Credits: 3
Develops and applies economic analysis tools in managerial decision situations. Focuses on economic analysis to understand firm's competitive environment.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 612 - Managing Costs and Evaluating Performance

Credits: 1-3
Focuses on developing accounting information for use by managers in planning and control activities. Examines traditional and emerging cost-management systems. Special emphasis on information for decision-making, operational control, and performance evaluation.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall
EMBA 613 - Financial Reporting and Decision Making

Credits: 3
Develops framework of concepts and procedures essential for interpreting general-purpose financial statements and internal managerial accounting reports. Emphasizes understanding basic concepts and applying selected procedures to problem-solving situations.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 623 - Marketing Management

Credits: 3
Develops market-based knowledge and skills for effective marketing strategy design, implementation, and evaluation. Develops ability to make marketing decisions in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused. Emphasis on case studies, team work, and projects.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

EMBA 633 - Statistics for Managers

Credits: 3
Applies statistical methods in analyzing problems in business decision-making. Topics include descriptive statistics, probability distributions, estimation and hypothesis testing, and linear regression.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 638 - Strategies for Operations Management: Process and Supply Chain Leadership

Credits: 3
Integrates theory and practice of operations management with mathematical modeling and quantitative techniques of
management science. Addresses range of operations management issues, including technology and strategy decisions, systems design issues, project operations, quality control, and inventory planning.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### EMBA 641 - Building the High-Performing Team

Credits: 1-3  
Develops the knowledge and skills needed for creating powerful, high-performance teams within and among organizational units. Strategies are offered for alignment of goals, building conditions for coordinated action, generating innovation, and resolving breakdowns.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### EMBA 643 - Managerial Finance

Credits: 3  
Introduces theories of finance and their application to the formulation of business policy. Topics include internal financial analysis, financial forecasting, valuation, risk and return analysis, capital allocation, and capital structure.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### EMBA 653 - Organizational Behavior

Credits: 3  
Examines development, theories, and practice of management within organizations. Emphasizes human behavior and how it influences organizational effectiveness.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**EMBA 660 - Management of Information Technology**

Credits: 3  
Examines computer-based information technologies and their interrelation with management processes, especially problem-solving and decision-making at individual, work group, and organization levels. Topics include management information system life cycle, with emphasis on manager's perspective, and modeling and analysis to support decision-making.

**Prerequisites**  
Admission to EMBA program.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**EMBA 673 - Legal Environment for Management**

Credits: 1.5  
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

**Prerequisites**  
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

**EMBA 674 - The Contemporary Ethical and Social Environment of Business**

Credits: 1 to 3  
Designed to strengthen the ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior you may confront as an executive in charge of people, projects, and organizations.

**Prerequisites**  
Admission to the MBA program.

Hours of Lecture or Seminar per week: 1 to 3  
When Offered: Fall, Spring

**EMBA 678 - Strategic Management**
Integrates business strategy and policy with functional knowledge developed in other courses and business practice. Issues include formulation of strategy, industry analysis, building core competencies, and strategy implementation.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**EMBA 703 - Financial Markets**

Credits: 3  
Explores the relationships between financial markets and their impact on corporate financial decision making. Considers cross-market interrelationships, including how financial markets respond by creating financial instruments to meet the varying financial requirements of business firms. The course includes a domestic financial residency in New York that focuses on contemporary developments in these markets.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**EMBA 708 - Taxation and Business Strategy**

Credits: 1-3  
Examines influences of taxation on decisions of firms, and effects of taxes on performance in competitive setting. Emphasizes specific coverage of international issues, and role of non-tax costs in tax planning.

**Prerequisites**
Admission to EMBA program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Elective - not offered regularly.

---

**EMBA 709 - Global Capital Markets**

Credits: 1-3  
Considers emerging topics in finance, with focus on links between global markets and strategic firm decisions. Emphasizes understanding valuation of strategic investment opportunities, and identification of financing alternatives.

**Prerequisites**
Admission to EMBA program.
EMBA 710 - Business, Government, and the Global Economy

Credits: 1.5
Focuses on the modern system of international trade and the opportunities that the global trading environment creates for firms. Attention will be directed toward the roles of national policies, international agreements, and business activities in the development of the system.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1.75
When Offered: Spring

EMBA 712 - International Macroeconomics: Concepts and Country Strategy

Credits: 1.5
Focuses on the basic concepts of international macroeconomics—national income accounts, monetary and fiscal policies, balance of payments, and exchange rates. These concepts are introduced and discussed in situations where national economic strategies affect the decisions and performance of business operations.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 715 - Special Topics in Accounting

Credits: 1-3
In-depth examination of advanced topics in accounting.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 716 - Managing Change
EMBA 616 - Corporate Governance

Credits: 1.5
Focuses on how organizations can successfully adapt and change. Topics include understanding forces that make change necessary, developing vision of appropriate course, aligning organization behind that vision, and motivating people to achieve it.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 717 - Corporate Governance

Credits: 1-3
Investigates past, present, and future of corporate governance. Focuses on relationships among shareholders, boards of directors, and top-level managers in examining governance process, with emphasis on rights and responsibilities of participants.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 718 - Leadership and Managing Change

Credits: 3
Focuses on the essential elements of successful organizational change. Emphasis on understanding the forces for change, as well as developing skills to manage a successful change process. Gives a deeper understanding of organizational leadership and an increased ability to be a successful leader. Incorporates and integrates theory, research, and application, with the ultimate goal of providing the student with practical information about leadership.

Prerequisites
Admission to the EMBA program.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

EMBA 724 - Marketing Communications

Credits: 1-3
Examines all forms of communication and sources of brand or company contacts as potential message channels in building and managing relationships with various publics. Focuses on an integrated planning process for these communication elements, including consumer and trade advertising, public relations, direct and database marketing, promotions, and sales presentations to achieve synergy in the overall marketing communications program. Emphasis is placed on appreciating the scope, strengths, and weaknesses of these tools.
Prerequisites
Completion of EMBA core requirements or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 725 - Leadership

Credits: 1.5
Explores key leadership roles in organizations and their own leadership competencies. Provides understanding of leadership development, power and influence, motivation, strategic decision making, leading change, the influence of globalization and diversity on leadership, and ethical issues.

Prerequisites
Completion of EMBA core requirements or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 727 - Applied Macroeconomics

Credits: 1-3
Examines how firm environment is shaped by economy and macroeconomic policy. Topics include business cycle, determinants of economic growth, influence of fiscal and monetary policies, and use of economic forecasts.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 734 - Electronic Commerce

Credits: 1-3
Explores ongoing transformation of business activities and markets by computer and telecommunications technologies. Examines technology and its application in variety of functional areas and industry settings.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.
EMBA 735 - Systems Thinking for Business Performance

Credits: 1-3
Enables students to develop, express, improve, and validate holistic mental models of problems. In doing so, they will build a foundation for better decision making leading to improved business performance. The main strength of the systems-thinking approach is its emphasis on long-term strategic outcomes as opposed to short-term tactical ones.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Fall

EMBA 745 - Special Topics in Finance

Credits: 1-6
In-depth examination of advanced topics in finance.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 750 - Capstone Project: Action Learning Project

Credits: 1.5
The Integrated Project Application is a lab-based course designed to provide an action learning experience that integrates course content from throughout the EMBA program. Students work in teams to develop solutions to organizational challenges and opportunities. They select one project from those offered by sponsoring organizations and approved by the faculty members for the course. Student teams evaluate the strategic issues for their assigned clients, design a solution, and present results to an executive panel. Depending on the nature of the issue and faculty requests, team presentations of results include one or more of the following sections: 1) an analysis of the situation 2) recommendations including changes in goals and organizational design, 3) a plan of action integrating marketing, human resource development, organizational design, finance, and operations, and 4) an implementation plan using theories of communication and change management, to include the business case and a business plan. Students are expected to draw upon course work from multiple disciplines in completing this project.

Prerequisites
Completion of EMBA core requirements or permission of instructor.

Notes
Course is repeatable within the term. Offered twice in spring semester for a total of 3 credit hours.

Hours of Lecture or Seminar per week: 3
**EMBA 751 - Corporate Strategy and Policy**

Credits: 1.5  
Examines issues in strategy for firms operating in multiple markets or businesses, including diversification, portfolio approaches to corporate strategy, mergers and acquisitions, corporate alliances and joint ventures, restructuring, and coordinating multibusiness corporations.

**Prerequisites**  
Admission to EMBA program.

**Hours of Lecture or Seminar per week: 1-3**  
**Hours of Lab or Studio per week: 0**  
**When Offered: Spring**

**EMBA 752 - A Strategic View of the Firm**

Credits: 1-3  
Examines the interplay between the industry environment and a firm's resources and capabilities to drive superior performance. The course seeks to integrate multiple functional perspectives to arrive at a complete understanding of the firm within its environment.

**Prerequisites**  
Admission to EMBA program.

**Hours of Lecture or Seminar per week: 1-3**  
**Hours of Lab or Studio per week: 0**  
**When Offered: Fall**

**EMBA 755 - Special Topics in Management**

Credits: 1-6  
In-depth examination of advanced topics in management.

**EMBA 765 - Special Topics in Management Information Systems**

Credits: 1-6  
In-depth examination of advanced topics in management information systems.

**Prerequisites**  
Admission to EMBA program.
EMBA 775 - Special Topics in Marketing

Credits: 1-6
In-depth examination of advanced topics in marketing.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
When Offered: Elective - not offered regularly.

EMBA 791 - The Regulatory and Business Environment of the European Union

Credits: 1.5
Considers contemporary interactions of businesses, government, and regulation. Seminars and presentations with business, government, and regulatory officials.

Prerequisites
Admission to EMBA program.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
Grading: Regular graduate.
When Offered: Spring

EMBA 795 - International Business Environment

Credits: 1-3
Develops global perspective through seminars led by professors and high-level managers; briefings by officials of government and other policy-making organizations; and site visits to production and distribution facilities, research centers, IT units, and other corporate offices.

Prerequisites
Admission to the EMBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
When Offered: Summer, Spring

Exercise, Fitness, and Health Promotion
EFHP 500 - Workshop in Exercise, Fitness, and Health Promotion

Credits: 1-3
Provides concentrated full-time workshops, weekend seminars, and workshops on selected topics in exercise, fitness, and health promotion.

Prerequisites
Graduate standing or permission of instructor

Notes
May be repeated. No more than 6 credits may be applied for degree credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EFHP 522 - Anatomy for the Athletic Trainer: Structure and Function of the Neuromuscular and Musculoskeletal Systems

Credits: 3
Promotes familiarity and proficiency with anatomy of neuromuscular and musculoskeletal systems, which relate directly to sports related injuries.

Prerequisites
BIOL 124 and 125 or equivalent, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 524 - Physiology for the Athletic Trainer Including the Pharmacology of Sports Injuries

Credits: 3
Promotes familiarity and proficiency in physiology, pharmacology, and rehabilitation of sports injuries.

Prerequisites
BIOL 124 and 125 or equivalent, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 526 - Athletic Training Perspectives: Evaluation and Prevention of Sports Injuries
EFHP 528 - Advanced Athletic Training

Credits: 3
Promotes familiarity and proficiency with assessment and intervention of neuromusculoskeletal system and other systems of body that relate directly to sports-related injuries.

Prerequisites
BIOL 124 and 125 or equivalent, EFHP 526, and permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

EFHP 550 - Behav Health Among Youth

Credits: 3

EFHP 598 - Special Topics

Credits: 1-6
Focuses on projects related to exercise, fitness, or health promotion.

Prerequisites
Graduate standing or permission of instructor

Notes
May be repeated with no more than 6 credits earned.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EFHP 599 - Independent Study EFHP
Credits: 1-3
Studies problem areas in exercise, fitness, and health promotion research, theory, or practice under direction of faculty member. May be repeated. No more than 3 credits may be earned.

**EFHP 605 - History of American Sport, Exercise, and Physical Culture**

Credits: 3
Role of sport and physical education in Europe and its impact on developments in America.

**EFHP 606 - Foundations of Exercise, Fitness, and Health Promotion**

Credits: 3
Insights into historical and philosophical foundations that guide exercise, fitness, and health promotion professions. Through assigned readings, group exercises, individual research, and class discussion, students explore disciplines, professions, and associated philosophical trends and issues.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 610 - Advanced Exercise Physiology**

Credits: 3
Lecture, demonstration, and seminar experiences in applying research findings to understanding physiological function and effects of exercise on people.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**EFHP 611 - Fitness Assessment: Theory and Practice**

Credits: 3
Promotes familiarity and proficiency with methods and instrumentation in assessing individual fitness and establishing base for exercise and other lifestyle alternatives to improve fitness.

Prerequisites
Graduate standing or permission of instructor
EFHP 612 - Scientific Foundations of Health and Fitness

Credits: 3
An integrated study of human anatomy, physiology, chemistry, and microbiology, presenting a complete picture of how the body functions and the diseases and disorders that cause the body to malfunction.

EFHP 614 - Advanced Exercise Nutrition

Credits: 3
Advanced study of nutrition's relation to physical activity, exercise, and sports. Reviews biochemical, physiological, and behavioral aspects of nutrition in promoting health, fitness, and sports performance. Focuses on nutrient needs during life cycle stages.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 615 - Epidemiology and Environmental Health

Credits: 3
Principles, methods, and application of epidemiology. Reviews behavioral, psychological, social, and environmental risks to disease distribution. Focuses on lifestyle, exercise patterns, and environmental factors to health and disease conditions.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 616 - Motor Behavior and Development

Credits: 3
Human motor behavior development and theory with application to evaluation of skill acquisition.

Prerequisites
Graduate standing or permission of instructor.
EFHP 618 - Exercise and Sport Psychology

Credits: 3
Covers psychological and social-psychological antecedents and consequences of exercise, physical activity, and sports participation. Emphasizes theory and research on personality, motivation, arousal, cognition, attributions, attitudes, self-efficacy, leadership effectiveness, and group dynamics.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 620 - Research Design for Exercise Science and Health

Credits: 3
Introduction to the techniques of research generally employed in the fields of exercise science and health.

EFHP 621 - Elements of Statistical Reasoning

Credits: 3
Introduction to practical and applied aspects of both descriptive and applied aspects of both descriptive and inferential statistics in exercise science and health.

EFHP 623 - Research Design and Statistical Reasoning

Credits: 3
Introduces techniques of research and methods of data analysis.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EFHP 630 - Exercise, Health, and Fitness Program Development

Credits: 3
Covers exercise and health program development related to fitness and health of adult populations.

Prerequisites
Graduate standing or permission of instructor

Notes
Provides 3 to 6 hours of field experience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EFHP 650 - Scientific Principles of Motor Learning

Credits: 3  
Biomechanical analysis and application of scientific principles of movement to instructing sport skills in physical education and sport programs.

**Prerequisites**  
Graduate standing or permission of instructor.

### EFHP 660 - Management of Exercise, Fitness, and Health Promotion Organizations

Credits: 3  
Advanced study in management and administration of organizations dedicated to human development and improvement of quality of life. Covers application of theories and practices of management and behavioral sciences, fiscal management, marketing, and evaluation research.

**Prerequisites**  
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EFHP 670 - Analysis of Teaching in Physical Education

Credits: 3  
Presents qualitative and quantitative research methods for studying teacher and student behaviors in physical education setting, and engaging teacher as researcher. Revisits teaching strategies, develops action research projects, and examines current education reform movements.

**Prerequisites**  
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### EFHP 671 - Teaching PHED in Secondary School

Credits: 3  
Advanced study of methods, materials, content and organization of physical education programs. Emphasis on curriculum
planning, current methodologies, and trends.

**Prerequisites**
Graduate standing or permission of instructor.

**EFHP 673 - Prgm Dev in Phys Ed/Spri**
Credits: 3

**EFHP 680 - Ethical Issues in Exercise, Fitness, and Health Promotion**
Credits: 3
Covers formulation of coherent framework for ascertaining good, right, and just; and for assessing evidence and reason underlying positions and arguments. Examines ethical issues in exercise, fitness, and health promotion.

**Prerequisites**
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EFHP 798 - Project**
Credits: 1-3
Addresses an applied exercise, fitness, and health promotion issue under supervision of graduate faculty member.

**Prerequisites**
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**EFHP 799 - Thesis**
Credits: 1-6
Explores exercise, fitness, and health promotion problem using appropriate research methodology and under supervision of graduate faculty member.

**Prerequisites**
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0
EFHP 802 - Readings for the Doctor of Arts in Community College Education

Credits: 3-9
Intensive reading in recent scholarship in physical education and related fields. Students must propose reading list that must be approved by faculty advisor and use list to prepare potentially publishable literature review.

Prerequisites
Graduate standing or permission of instructor

Hours of Lecture or Seminar per week: 3-9
Hours of Lab or Studio per week: 0

Film and Video Studies

FAVS 100 - Film and Video Studies Colloquium

Credits: 1
Students are exposed to the film and video industry through film professionals. Students are required to attend all sessions, review the speaker's materials prior to the class, prepare questions, and complete written critiques.

Prerequisites
FAVS majors only

Notes
Students completing their senior project will present their work as part of their last FAVS 100. Students may repeat for a total of 5 credits but only 3 credits of C or better may be applied to the degree.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

FAVS 352 - Ethics of Film and Video

Credits: 3
An examination of ethical issues associated with image production and consumption. Topics include the technological development of the film apparatus, privacy, the pursuit of objectivity, excess, consent, and representing others. All issues highlight the increasingly sophisticated and powerful role of film and media authorship. Students will develop a more complex view of the ethics of screen representation (both fiction and nonfiction) and be encouraged to take stock of the ethics of their own media literacy.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses and completion of 21 credits within the FAVS program.
FAVS 355 - Film Business Practices

Credits: 3
An overview of the film industry from a business perspective. Students learn basic business practices, film financing, business plans, film distribution, and management and marketing techniques appropriate for the film industry.

Prerequisites
COMM 454 or equivalent ethics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 365 - Documentary Filmmaking I

Credits: 3
An introduction to documentary filmmaking in which each student makes a short digital documentary, from concept development to finished piece. The class covers essential technical skills, emerging styles of nonfiction film, and documentary storytelling techniques.

Prerequisites
Satisfactory completion of COMM 355.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FAVS 399 - Special Topics in Film and Video Studies

Credits: 1-3
In-depth presentation and exploration of topical studies.

Notes
Subject matter varies. May be repeated for a maximum 12 credits when taken under different topics.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

FAVS 450 - Internship in Film and Video Studies

Credits: 3
On-the-job training in film and video studies through approved fieldwork study programs. Internships are arranged and supervised by the FAVS director.
Prerequisites
75 credits, 15 credits in core FAVS courses, and permission of FAVS director.

Notes
Required for all FAVS majors.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

FAVS 499 - Senior Project

Credits: 3
Culminating seminar devoted to analyzing and synthesizing knowledge and skills gained through undergraduate course work as it applies to film, video studies, and professional development.

Prerequisites
Senior status in the film and video studies program.

Notes
Students will be required to develop and present written materials and documentation related to the development and presentation of their works, as well as present their work in FAVS 100 Film and Video Studies Colloquium as part of their formal oral presentation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Finance

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

FNAN 300 - Personal Financial Management

Credits: 3
Emphasis is on understanding the importance of developing financial goals and how financial decisions affect those goals throughout their lifetime. In addition, students will develop their own financial goals along with a financial plan that would enable them to meet those goals.

Hours of Lecture or Seminar per week: 3
Credits: 3
Introduction to managing a firm's financial resources given wealth maximization decision criterion. Includes working capital management, fixed-asset investment, cost of capital, capital structure, and dividend decision analysis.

Prerequisites
C or better in ECON 103, ACCT 203, and OM 210; sophomore standing.

Notes
Lecture, problems, and discussion. Requires attendance in weekly lectures and recitations.

The final exam for FNAN 301 will be scheduled to take place for all sections at the same time during the final exam period. Accommodations will be made for exam and religious conflicts and for certain official university-sponsored activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FNAN 302 - Financial Analysis, Forecasting, and Valuation

Credits: 3
Examines techniques for analyzing, understanding, and applying financial information in decision situations. Topics include financial statement analysis, development of financial models, and financial planning and forecasting.

Prerequisites
Degree Status and a grade of B minus or higher in FNAN 301.

Notes
Lecture, discussion, computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FNAN 311 - Principles of Investment

Credits: 3
Introduces analysis of the valuation of equity and debt securities given modern capital market theory. Includes discussion of portfolio analysis as related to valuation of securities.

Prerequisites
Degree Status and a grade of B minus or higher in FNAN 301.

Notes
Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FNAN 321 - Financial Institutions
Credits: 3
Discusses basic objectives of financial institutions in light of industry structure and regulatory environment, and decision
to achieve objectives. Includes role of financial institutions in allocation of
funds in financial markets.

Prerequisites
Degree Status and a grade of B minus or higher in FNAN 301.

Notes
Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FNAN 351 - Principles of Real Estate**

Credits: 3
Studies dimensions and specialties involved in public control and private development, sale, finance, and management of real
estate. Includes land planning, land-use control, appraisal, finance, brokerage, property management, and investment.

Prerequisites
C or higher in FNAN 301, degree status.

Notes
Lecture, discussion, and computer-assisted research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FNAN 401 - Advanced Financial Management**

Credits: 3
Analyzes decision-making in firm, emphasizing conceptual structure of problems and using advanced analytic techniques. Topics
include current asset management, capital budgeting and structure, dividend policy, long-term financing, mergers, and corporate
planning models.

Prerequisites
Degree Status and a grade of B minus or higher in FNAN 301.

Notes
Lecture, discussion, and case analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**FNAN 411 - Investment Analysis and Portfolio Management**
Credits: 3
Analyzes modern techniques of portfolio management including evaluating standards for selecting individual securities to include or delete from portfolios. Presents risk-return analysis for portfolios and portfolio performance measures. Lecture, discussion, computer assisted research.

**Prerequisites**
Degree Status and a grade of C or higher in FNAN 311.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FNAN 412 - Futures and Options Markets**

Credits: 3
Introduces options, commodity, and financial futures markets as they function to provide pricing mechanisms and alternative investment vehicles. Lecture, discussion, and computer-assisted research.

**Prerequisites**
Degree Status and a grade of C or higher in FNAN 311.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FNAN 421 - Money and Capital Markets**

Credits: 3
Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and interaction between markets. Topics include aggregate flow of funds analysis; and money, government, corporate, and mortgage markets. Lecture, discussion, and computer assisted research.

**Prerequisites**
Degree Status and a grade of C or higher in FNAN 321.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FNAN 440 - International Financial Management**

Credits: 3
Introduces management of contemporary firm's international financial operations. Topics include foreign exchange risk, political risk, returns and risks of international projects, international money and capital markets, financial accounting, capital structure, and cost of capital. Lecture, discussion, readings, and problems.

**Prerequisites**
Degree Status and a grade of C or higher in FNAN 311.
FNAN 451 - Real Estate Finance

Credits: 3
Studies mechanisms of real estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and secondary mortgage markets. Develops analytical skills including using microcomputer and appropriate software.

Prerequisites
C or higher in FNAN 301 and FNAN 351, degree status.

FNAN 454 - Real Estate Development

Credits: 3
Examines commercial real estate development process and principles plus actual residential, office, retail, and industrial projects. Includes financial analytical techniques to investigate project feasibility, density, financing viability, cash flows, and valuation. Emphasis placed on real-world, entrepreneurial, decision-making skills for developing commercial real estate. Lecture, discussion, project analysis.

Prerequisites
C or higher in FNAN 351, degree status.

FNAN 462 - Honors Seminar in Finance

Credits: 3
Provides an in-depth study and analysis of contemporary developments and topics of interest in finance. Topics and format will vary. Enrollment is limited and competitive.

Prerequisites
Finance major, degree status, senior standing, permission of the instructor.

FNAN 491 - Special Topics in Finance

Credits: 3
Advanced study of special topics in finance.
Prerequisites
Finance majors with at least 9 upper-level finance credits, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FNAN 499 - Independent Study

Credits: 1-3
May be repeated to a maximum of 6 credits if topics vary. Degree status. Research and analysis of selected problems or topics in finance.

Prerequisites
Finance majors with at least 9 upper-level credits, degree status.

Notes
Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration. Written report required. May be repeated for maximum 6 credits if topics vary.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Foreign Languages

FRLN 310 - Outside of Hitler's Shadow: Germany in its Global Context

Credits: 3
Critical examination of images of Nazis, Hitler, and Holocaust in media, popular culture. Course seeks to demystify and deglamorize such images while highlighting philosophical, cultural, and scientific contributions of Germany, Austria, and Switzerland.

Prerequisites
Completion of concurrent enrollment in all other general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 330 - Topics in World Literature

Credits: 3
Major works of world literature with varying perspectives and topics, such as specific cultures, histories, myths, or music and the arts, as represented in literature.
Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 and 45 credits, or permission of instructor.

Notes
All course work in English. May be taken toward fulfilling literature requirement of baccalaureate degrees. May be repeated twice when course content substantially differs, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 380 - Topics in the Sociopolitics of Language

Credits: 3
Topics will address relationship between language and other social and cultural systems (macro sociolinguistics), and critical study of people's ideas about language (language ideology). Utilizes comparative approach to explore ways people use language to perform and communicate various social identities and categories; how and why people attach social meanings and values to particular ways of using language; development of official and unofficial language policies; and impact of language policies.

Prerequisites
ENGL 101 and 45 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 385 - Multilingualism, Identity, and Power

Credits: 3
Study of individual and societal aspects of multilingualism including language choice, linguistic maintenance and shift, code-switching, language planning, educational policy, and representations of multilingualism. Interdisciplinary approach emphasizes the social and political aspects of multilingualism, as well as the relationship of language to cultural, ethnoracial, and national identities and categories.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 431 - Medieval Intellectual Topics

Credits: 3
Focuses on topic in intellectual history of Middle Ages. Emphasizes literary or historical, depending on discipline of instructor.
Relevant material may be drawn from philosophy, theology, and art.

Equivalent to ENGL 431/ HIST 431

Notes
May be taken for credit by English or history majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 510 - Bibliography and Research in Foreign Languages and Literature

Credits: 3
Use of basic bibliographical tools and methodologies for scholarly research in French, German, and Spanish. Taught in cooperation with university library staff.

Prerequisites
Graduate standing, or permission of department.

Notes
Conducted in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 525 - Literary Translation

Credits: 3
Critical approach and analysis of diverse texts such as poetry, drama, essay, and novel excerpts.

Prerequisites
Graduate standing, or permission of instructor. Advanced work in literary translation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 550 - Special Topics

Credits: 3
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRLN 551 - Special Topics

Credits: 3
Themes, periods, or genres vary from semester to semester. Focuses on topics that incorporate one or more languages taught in department, but instruction is in English.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 565 - Theory of Translation

Credits: 3
Lectures on nature, function of translating process. Evaluates theories of translation with respect to text typology. Critiques selected translations from target languages to English and vice versa.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 572 - Integrating Technology into Language Learning

Credits: 3
Explores pedagogical and theoretical basis for integrating interactive technologies into language learning programs, and examines potential for learning, teaching, testing, and research. Includes hands-on analysis and evaluation of materials.

Prerequisites
Graduate standing or permission of department, language teaching methods course, and language teaching experience; or permission of instructor.

Notes
Prior experience with technology not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 573 - Basic Issues in Language Pedagogy

Credits: 3
Explores major issues controversial in language pedagogy. Topics include communicative competence as pedagogical goal, role of explicit grammar teaching, proficiency movement, cultural authenticity, student-centered learning, and technology.

Prerequisites
Graduate standing or permission of department, language teaching methods course, and language teaching experience; or permission of instructor.

**FRLN 590 - Internship and Seminar in Translation**

Credits: 3
Internships are nonpaying, work-study positions that focus on the practice of translation. Qualified students placed with area institutions, interest groups, agencies, or corporations.

**Prerequisites**
Admission to translation certificate program.

**Notes**
Placement depends on availability of positions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FRLN 600 - Workshop in Foreign Languages**

Credits: 1-6
In-service workshops, tours, and seminars on selected topics in literature, language, bilingualism, culture, methodology.

**Notes**
May not usually be applied toward MA in modern and classical languages.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**FRLN 620 - Literary Theory and Criticism**

Credits: 3
Studies nature of literary work, and analyzes contemporary critical approaches to literature.

**Notes**
May not be taken for credit by students who previously received credit for FRLN 615.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FRLN 650 - The Teaching of Culture in Foreign Language Programs**
Credits: 3
Purpose and methods of study of culture, with emphasis on strategies and techniques for teaching culture in foreign language programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 660 - Approaches to the Study of Language

Credits: 3
Linguistics and its relationship to other disciplines, including study of generative grammar with syntactic problems drawn from commonly taught foreign languages.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRLN 670 - Foreign Language Learning and Teaching

Credits: 3
Theories, methods, and strategies of second and foreign language learning and teaching.

Notes
May not be taken by students who have completed FRLN 570.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Forensics

FRSC 420 - Forensic Toxicology

Credits: 3
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the human enzymatic detoxification processes, methodologies for identifying toxins, and specific toxic analytes.

Prerequisites
Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FRSC 440 - Forensic Chemistry

Credits: 3
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisites
Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 460 - Forensic DNA Sciences

Credits: 3
Presentation of the general principles and methodologies used in forensic DNA profiling. Topics include the development of DNA profiling methods, current DNA typing techniques, forensic DNA and paternity-related issues, and legal issues associated with quality control, frequency estimates, sample conditions, chain of custody, and admissibility.

Prerequisites
Completion of forensic science foundation courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 500 - Introduction to Forensic Science

Credits: 3
Overview of forensic science and related investigative techniques. Includes coverage of crime scene investigation, crime scene procedures, the role of the forensic pathologist, the modern forensic laboratory, DNA analysis techniques, microanalysis, examination of trace evidence, hair and fibers, examination of questioned documents, forensic anthropology, forensic odontology, homicide investigation, and analysis of a mock crime scene.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 510 - Crime Scene Analysis

Credits: 3
Examines the role of the first officer at the scene, search, seizure and related legal issues, traditional crime scene measurements, photogrammetry, processing latents, crime scene reconstruction methods, 2-D and 3-D impressions, blood spatter analysis, collection of trace evidence, packaging and preserving evidence, outdoor crime scenes, and explosion and fire scenes.
Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 520 - Toxicology

Credits: 3
Examines toxic substances and their effects on human cellular and organ systems. The course focuses on human physiological concepts, the chemistry of toxins, the human enzymatic detoxification processes, and the analytical techniques required for detecting the presence of toxins and their metabolites in human tissue or serum.

Prerequisites
A 400-level course in molecular or cellular biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 530 - Law and Forensic Science

Credits: 3
A detailed examination and analysis of the law affecting forensic science across the discipline range. Special emphasis is given to the laws affecting evidence, courtroom procedure, and the forensic expert.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 540 - Forensic Chemistry

Credits: 3
The principles of forensic chemistry will be addressed in this course, including analytical chemistry, instrumentation, sample handling, drug chemistry and pharmacology, and analysis of physical evidence such as papers, inks, paints, and coatings.

Prerequisites
Undergraduate degree in chemistry or biology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FRSC 550 - Issues in Forensic Anthropology
Credits: 3
Examines issues related to skeletal analyses and interpretation of forensic case reports in determining personal identification and cause of death. Discussions include skeletal variation, age criteria, sexing criteria, pathology, trauma, and postmortem damage.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FRSC 560 - Forensic DNA Sciences**

Credits: 3
Intensive introduction to parameters affecting data QC and analysis, including factors arising from biochemistry, chemistry, genetics, statistics, instrumentation, and software.

Equivalent to BINF 637

**Prerequisites**
Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FRSC 570 - Introduction to Biochemical Forensics**

Credits: 3
An introduction to biochemical forensics for non-scientists. This class will first lay a basic groundwork in chemistry and biochemistry. This background will be used in the explanation of forensic toxicology, DNA and blood analysis, identification of bodily fluids and stains, and analysis of controlled substances.

**Prerequisites**
A course in biochemistry or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**FRSC 600 - Forensics Seminar**

Credits: 1
Selected topics in forensic science research, generally consisting of research presentations by forensic professionals and faculty members. Students must write up a one page summary of each talk attended.

**Notes**
Students enrolled in the forensic science MS program must attend at least 80% of the seminars. May be repeated for a total of 3 credits.
FRSC 610 - Forensics Research Project

Credits: 1-3
Research project in a current area of forensic science performed under the direction of a faculty member or affiliated forensic science professional.

Prerequisites
Admission to Forensic Science MS program.

Notes
May be repeated for a total of 3 credits.

FRSC 690 - Forensics Capstone Course

Credits: 3
Integrates all the various techniques used in the study of forensic science and medicine, and applies them to the interpretation of facts and the reconstruction of the sequence of events at a variety of typical death scenes. Integrates medical, scientific, sociological, and legal methodology as they apply to medicolegal death investigations, using a variety of forensic literature and text resources. Presents an integrative approach to crime scene analysis based on actual case studies, in which students apply theoretical concepts discussed in class to real-world situations. Includes weekly group projects, with students organized in rotating groups and assigned a research topic in forensic medicine. Students discuss, examine, and analyze forensic, medical, and physical elements present at the death scenes, and develop their own hypotheses, which are then evaluated and discussed as the case is reconstructed.

Prerequisites
Permission of instructor.

FRSC 799 - Master's Thesis

Credits: 1-6
Laboratory thesis research and writing under the guidance of a graduate faculty member. Comprehensive report (thesis) acceptable to student's advisory committee is required.

Prerequisites
Permission of forensic science MS program director.
French

Placement: See Academic Testing section of the Admission chapter.

See also FRLN course listings.

FREN 101 - Elementary French I

Credits: 3
For students with no knowledge of French. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for FREN 101 and FREN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

FREN 102 - Elementary French II

Credits: 3
Continuation of FREN 101.

Prerequisites
FREN 101, appropriate placement score, or permission of instructor.

Notes
Lab work required. Students may not receive credit for FREN 102 and FREN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

FREN 109 - Intensive Elementary French

Credits: 6
Equivalent to FREN 101 and 102 taught in single semester.

Notes
Recommended for students who desire intensive introduction. Lab work required. Students may not receive credit for FREN 109 and FREN 101, 102, 105 or 110.
FREN 110 - Elementary French

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for FREN 110 and FREN 101, 102, 105, or 109.

FREN 115 - Review of Elementary French

Credits: 3
Reviews elements of French for students who have studied French previously.

Prerequisites
Appropriate placement score or permission of the department.

Notes
Lab work required. Students may not receive credit for FREN 115 and also FREN 105, 102, 109 or 110.

FREN 201 - Intermediate French I

Credits: 3
Further development of skills in listening, speaking, reading, and writing.

Prerequisites
FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes
FREN 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for FREN 201 and FREN 209 or 210.

FREN 202 - Intermediate French II
Credits: 3
Applies language skills to reading, composition, and class discussion.

Prerequisites
FREN 201, appropriate placement score, or permission of department.

Notes
Lab work required. Students may not receive credit for FREN 202 and FREN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

FREN 209 - Intensive Intermediate French

Credits: 6
Equivalent to FREN 201 and 202 taught in single semester.

Prerequisites
FREN 102, 105, and 109; appropriate placement score; or permission of department.

Notes
Lab work required. Students may not receive credit for FREN 209 and FREN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

FREN 210 - Intermediate French

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of French-speaking regions.

Prerequisites
FREN 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for FREN 210 and FREN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

FREN 250 - Gateway to Advanced French

Credits: 3
Integration of advanced intermediate-level French reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.
Prerequisites
FREN 210, appropriate placement score, or permission of department.

Notes
Taught in French.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 300 - Study Tour in France

Credits: 1-6
Directed study tour of cultural and literary points of interest in France. Briefing sessions and reading selection given before the trip.

Prerequisites
FREN 250, appropriate placement score or permission of instructor.

Notes
All papers and exams required for credit are due by end of summer session.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 309 - Reading and Writing Skills Development

Credits: 6
Development of ability to write on topics of current interest. Readings provide examples of each topic and necessary vocabulary for compositions. Introduces reading strategies and provides practice in reading of different kinds of texts.

Prerequisites
FREN 202, 250, or equivalent; appropriate placement score; or permission of instructor.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

FREN 310 - Oral Proficiency in French

Credits: 3
Develops conversational proficiency in French with attention to various specific communicative strategies and functions. Practice in pronunciation and diction based on systematic study of sound system of French.

Prerequisites
FREN 250, appropriate placement score or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**FREN 325 - Major French Writers**

Credits: 3  
Studies works of major French writers.

Satisfies General Education Requirement: Literature

**Prerequisites**  
ENGL 101 or equivalent, or permission of instructor.

**Notes**  
Writers to be studied vary. Course work in English. May be taken toward fulfilling general requirement in literature for baccalaureate degrees. May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 329 - Problems of Western Civilization in French Literature**

Credits: 3  
Basic philosophical, moral, social, and political dilemmas reflected in literature of major French writers.

Satisfies General Education Requirement: Literature

**Prerequisites**  
ENGL 101 or equivalent, or permission of instructor.

**Notes**  
Course work in English. May be taken toward fulfilling general requirement in literature for baccalaureate degrees. May be repeated for credit with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 340 - Francophone Identities**

Credits: 3  
Provides opportunity to learn about richness, variety, and complexity of francophone world through study of literature, culture, social life, and identities of various francophone regions including Caribbean, Africa, Quebec, and Indochina.

**Prerequisites**  
FREN 309, appropriate placement score, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
FREN 357 - Introduction to Translation

Credits: 3
French to English, English to French translations, of texts from current periodicals and newspapers in various fields.

Prerequisites
FREN 250, appropriate placement score or permission of instructor.

Notes
Recommended for students who wish to improve language skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 370 - French Civilization, Culture, and Literature: Ancient Gaul to 1789

Credits: 3
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from Ancient Gaul to the eve of the French Revolution. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisites
FREN 309, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 371 - French Civilization, Culture, and Literature: 1789 to the Present

Credits: 3
Examines history, civilization (daily life, politics, science, philosophy, religion), culture (architecture, art, music, dance), and literature of France from French Revolution of 1789 to present. Studies development of French nation and its people through written texts, visual arts, and music.

Prerequisites
FREN 309, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 381 - Introduction to Literary Analysis

Credits: 3
Structured approach to reading and analysis of French literary texts.

Prerequisites
15 credits of French.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 391 - French for the Business World I**

Credits: 3  
Studies styles in commercial, private, and official formats for correspondence and various common business documents. Emphasizes written exercises. Satisfies needs of students equipping themselves for multinational business and foreign service.

**Prerequisites**  
15 credits of French, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 392 - French for the Business World II**

Credits: 3  
Continuing study of terminology used in business affairs, with attention to form and style of business documents. Oral and written practice of French used in everyday work situations. Students may use course to prepare for Paris Chamber of Commerce certificate in business French.

**Prerequisites**  
FREN 391, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 405 - French Literature of the Renaissance**

Credits: 3  
Development of humanistic tradition in France during 16th century, especially as reflected in works of Rabelais and Montaigne.

**Prerequisites**  
15 credits of French, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**FREN 413 - French Literature of the Seventeenth Century: Classical Drama**
FREN 414 - French Literature of the Seventeenth Century: Prose and Poetry

Credits: 3
Reading and analysis of representative texts of major authors.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 421 - French Literature of the Eighteenth Century: Montesquieu and Voltaire

Credits: 3
Studies Montesquieu, Voltaire, and other writers of first half of century.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 422 - French Literature of the Eighteenth Century: Diderot and Rousseau

Credits: 3
Studies Diderot, Rousseau, and other writers of second half of century.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 431 - French Literature: 1800-1850

Credits: 3
Poetry, theater, and novels of Romantic and Parnassian movements.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 432 - French Literature: 1850-1900

Credits: 3
Poetry, theater, and novels of Realist, Naturalist, and Symbolist movements.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 441 - Twentieth-Century Prose Fiction

Credits: 3
Principal literary trends in contemporary French literature. Emphasizes evolution of novel from Proust and Gide to Beckett and "Nouveau Roman."

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 442 - Twentieth-Century Drama and Poetry

Credits: 3
French drama from Surrealism to "Nouveau Theater." French poetry from Symbolism to contemporary poets.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
FREN 451 - Sub-Saharan African Literature

Credits: 3
Studies selected writers expressing culture and civilizations of French-speaking countries south of the Sahara.

Prerequisites
15 credits of French, or permission of instructor.

Notes
For non-Western credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 452 - French-Canadian Literature

Credits: 3
Studies Francophone literature of Canada with emphasis on contemporary works.

Prerequisites
15 credits of French, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 453 - Francophone Literature from North Africa

Credits: 3
Studies Francophone literature of North Africa (the Maghreb) with emphasis on contemporary works.

Prerequisites
15 credits of French, or permission of instructor.

Notes
May be repeated once for credit with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 454 - Caribbean Literature in French

Credits: 3
Studies selected writers expressing culture and civilization of French speaking countries of Caribbean.

Prerequisites
15 credits of French, or permission of instructor.
FREN 460 - Advanced Oral and Written Expression

Credits: 3
Intensive course to help students obtain fluency in oral and written French. Develops conversational skills and mastery of vocabulary. Class discussions and oral and written reports on current topics.

Prerequisites
15 credits of French, or permission of instructor.

FREN 461 - Linguistic Structure of Modern French

Credits: 3
Analyzes phonology, morphology, and syntax of modern standard French.

Prerequisites
15 credits of French, or permission of instructor.

Notes
Optional lab work.

FREN 462 - Stylistics

Credits: 3
Analyzes more complex aspects of French language and various stylistic processes. Develops writing skills through readings, discussion, and composition.

Prerequisites
15 credits of French, or permission of instructor.

FREN 470 - Topics in French Cinema
Credits: 3
Topics such as early days of French cinema, La Nouvelle Vague, women film directors, Quebecois, and African and Caribbean films selected by type, period, or director. Emphasis varies from year to year. Required viewing, student discussion, and written critiques.

Prerequisites
For film and media studies students: English 332, or permission of instructor; for French students, 15 credits in French, or permission of instructor.

Notes
May be repeated once with permission of department or film studies advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 480 - Special Topics

Credits: 3
Studies selected literary theme, topic, period, or genre.

Prerequisites
15 credits of French, or permission of instructor.

Notes
May be repeated once with permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 490 - Independent Study

Credits: 1-3
Research and analysis of selected problem in literature or linguistics in consultation with department member.

Prerequisites
French majors with 90 credits, and permission of chair.

Notes
Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 491 - Independent Study

Credits: 1-3
Research and analysis of selected problem in literature or linguistics in consultation with department member.
Prerequisites
French majors with 90 credits, and permission of chair.

Notes
Only 6 credits of independent study may be applied to fulfilling requirements in concentration.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 497 - Senior Honors Tutorial

Credits: 3
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

Prerequisites
French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 498 - Senior Honors Tutorial

Credits: 3
Students who meet these requirements admitted to candidacy after submitting letter of application to departmental Honors Committee in second half of junior year. Also requires faculty recommendation and interview by Honors Committee. First semester involves weekly meetings with faculty member to discuss readings from comprehensive list prepared by French faculty. Second semester requires independent research and completion of honors essay under supervision of French faculty member.

Prerequisites
French majors with 90 credits, cumulative GPA of 3.00, and 3.00 in major field.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 515 - Medieval French Literature

Credits: 3
Intensive study of outstanding literary works of Middle Ages.

Notes
Course work in French.
FREN 517 - Studies in Seventeenth-Century Literature

Credits: 3
Selected writers, works, themes, or trends of French literature in classical era.

Notes
Content varies. May be repeated once for credit. Course work in French.

FREN 518 - Studies in Eighteenth-Century Literature

Credits: 3
Selected writers, works, themes, or trends of French literature in 18th century.

Notes
Content varies. Course work in French. May be repeated for credit with permission of department.

FREN 519 - Studies in Nineteenth-Century Literature

Credits: 3
Selected works, themes, genres, and authors of 19th-century French literature.

Notes
Content varies. Course work in French. May be repeated for credit with permission of department.

FREN 525 - Studies in Modern French Literature

Credits: 3
Selected writers, works, themes, or trends of French literature in modern era.

Notes
Content varies. May be repeated for credit with permission of department. Maximum 6 credits may be earned. Course work in French.
FREN 550 - Special Topics

Credits: 3
Specialized topics relating to French culture and literature.

Notes
Content varies. May be repeated once for credit. Course work in French.

FREN 560 - History of the French Language

Credits: 3
Evolution of French language from Latin to present-day French.

FREN 575 - Grammatical Analysis

Credits: 3
Studies characteristic features of contemporary French. Examines spoken and written French, including syntactic analysis, distributional analysis, and generative-transformational grammar. Emphasizes problem areas for American learners.

FREN 576 - Advanced Translation

Credits: 3
Advanced work in translation of topics from social and political sciences and humanities. Comparative terminology, sight translation, and precise writing. Stress important, function, and techniques of documentation in translation.

Notes
Translations from French to English and English to French.
FREN 580 - Contemporary French Society and Culture

Credits: 3
Studies structure and evolution of society and culture of contemporary France.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

FREN 798 - Directed Reading and Research

Credits: 3
Reading and research on specific project under direction of department member.

Notes
Open only to degree students who have completed at least 18 credits. Oral or written report required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

FREN 799 - Thesis

Credits: 1-6
Students who take FREN 798 and then elect the thesis option receive 3 credits for FREN 799 after completing thesis. Students who do not take FREN 798 receive 6 credits for FREN 799 after completing thesis.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Geography and Geoinformation Science

Graduate standing is prerequisite to all 600-level courses.

GGS 101 - Major World Regions

Credits: 3
Patterns, problems, and prospects of the world’s principal human-geographic regions. Emphasizes areal differentiation and role of geographic differences in interpreting current world scene.

Equivalent to GEOG 101 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 102 - Physical Geography

Credits: 3
Interrelated processes affecting global distribution and character of climate, soils, vegetation, hydrology, and landforms. Includes elements of mapping (natural science credit).

Equivalent to GEOG 102 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 103 - Human Geography

Credits: 3
Overview of major ideas and approaches to studying spatial aspects of human social and behavioral systems. Surveys distribution and movement of human populations, characteristics and distribution of cultural mosaics, patterns of economic interdependence, and study of forces of cooperation and conflict among people from global perspective.

Equivalent to GEOG 103 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 110 - Maps and Mapping

Credits: 3
Introduces maps and spatial analytic tools and methods, including geographic information systems. Familiarizes students with key geographic concepts and skills through integrating information technology with map-making technology. Includes introduction to computer and web-based geographic applications, databases, and graphics.

Equivalent to GEOG 110 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 121 - Dynamic Atmosphere and Hydrosphere

Credits: 4
This natural science lab course is a systematic study of weather, climate, energy, and hydrologic systems viewed from a geospatial and global perspective. We will study the spatial distribution and relationships of the Earth’s climate and hydrologic systems to other Earth systems, as well as the processes driving and changing them, including energy, climate, weather, and water resources.

Equivalent to EOS 121 (2009-10 catalog)
GGS 122 - Dynamic Geosphere and Ecosphere

Credits: 4
Systematic study of biogeography and soils, viewed from a geographic, or spatial, perspective. We will study the spatial distribution and relationships of Earth’s biomes and soils systems to other Earth systems, and the processes driving them, including energy, climate, nutrients, chemistry, and moisture.

Equivalent to EOS 122 (2009-10 catalog)

GGS 300 - Quantitative Methods for Geographical Analysis

Credits: 3
Comprehensive introduction to quantitative methods in spatial analysis, with emphasis on solving geographical research problems. Topics include nature of spatial data; collection of spatial data; preparation of spatial data for mapping, geographic information systems, and statistical analysis; descriptive spatial statistics; areal sampling theory and methods; probability theory and distributions; hypothesis testing; correlation and regression; and areal and point pattern spatial statistics.

Equivalent to GEOG 300 (2009-10 catalog)

Prerequisites
30 credits, including GGS 102 and 103, or permission of instructor; and permission of department.

GGS 301 - Political Geography

Credits: 3
Distribution and effects of power on landscape, particularly on national and global scales.

Equivalent to GEOG 301 (2009-10 catalog)

Prerequisites
30 credits

GGS 302 - Global Environmental Hazards
Introduces applications of observational and modeling techniques to natural hazards and the threat they pose to the world, as well as a general introduction to global climate change and its effect on regional and local scales. Examples include topics of interest to different countries and regions of the world, such as earthquakes, sand and dust storms, slope failures, volcanoes, land slides, droughts and desertification, floods, hurricanes and typhoons, severe weather, wild fires (U.S., Indonesia, Africa, S. America), sea-level rise, and tsunamis. Covers Earth system science topics related to the above hazards and their coupling with anthropogenic hazards as well as how societies respond to natural disasters and mitigation.

Equivalent to EOS 305 (2009-10 catalog)

**Prerequisites**
30 hours and undergraduate status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 303 - Conservation of Resources and Environment

Credits: 3
Provides analysis of world resources distribution, conservation, and preservation; and problems resulting from their natural occurrence and utilization. Uses knowledge from physical and social sciences to develop complex and sophisticated understanding of issues surrounding natural resource exploitation and management, conservation, and preservation.

Equivalent to GEOG 303 (2009-10 catalog)

**Prerequisites**
30 credits, and completion or concurrent enrollment in all other required general education courses.

**Notes**
Synthesis course

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 304 - Populations Dimensions of Global Change

Credits: 3
Spatial distribution of population, its causes and effects, and changing patterns resulting from population mobility. Emphasizes spatial characteristics of variables such as age, sex, race, education, and income.

Equivalent to GEOG 304 and EOS 304 (2009-10 catalog)

**Prerequisites**
30 credits and completion of or concurrent enrollment in all general education requirements.

**Notes**
Synthesis course
GGS 305 - Economic Geography

Credits: 3
Analyzes pattern of distribution of world economic activity, spatial economics behind this pattern, and influence of distribution on other spatial systems.

Equivalent to GEOG 305 (2009-10 catalog)

Prerequisites
30 credits

GGS 306 - Urban Geography

Credits: 3
Structure and internal differentiation of cities. Variety of perspectives on nature of cities, and opportunities for intensive use of space. Urban problems and alternatives in their spatial context.

Equivalent to GEOG 306 (2009-10 catalog)

GGS 307 - Sustainable Development

Credits: 3
Explores the concepts, applications, and tools for analysis and decision making in support of environmentally sustainable development. Case studies and problem-solving exercises will be used to stimulate learning and provide practical experience in addressing sustainable development issues.

Equivalent to EOS 306 (2009-10 catalog)

Prerequisites
60 hours; GGS 122 and GGS 302, or permission of instructor.

GGS 308 - Field Mapping Techniques
Credits: 3
Basic techniques for collecting and recording spatial field data, including topographic maps, compass, transit, alidade, and geographic positioning systems. Includes field work.

Equivalent to GEOG 308 (2009-10 catalog)

Prerequisites
MATH 105, GGS 102 or 101, and 30 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

GGS 309 - Meteorology and Climate

Credits: 3
Elements of meteorology; analysis of world distribution of meteorological controls as bases of regional climatic variations.

Equivalent to GEOG 309, EOS 312 (2009-10 catalog)

Prerequisites
GGS 102, 121, or equivalent; permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 310 - Introduction to Digital Cartography

Credits: 4
Origins, principles, and methods of thematic map design and production. Principles of graphic design, data compilation, analysis, and display.

Equivalent to GEOG 310 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

GGS 311 - Introduction to Geographic Information Systems

Credits: 3
Fundamental concepts and theories for appropriate use of geographic information systems (GIS). Discusses basic GIS functionality and applications in various fields.

Equivalent to GEOG 311 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 312 - Physical Climatology

Credits: 3
Quantitative description of nature and theory of the climate system, dynamics of atmosphere-ocean-land surface, internal interactions and response to external forcing, description of the climate record and simple climate models.

Equivalent to EOS 312 (2009-10 catalog)

Prerequisites
30 hours; and GGS 121, MATH 113, PHYS 243-244, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 313 - GIS Applications for Earth Systems

Credits: 3
An overview of fundamentals in GIS, with emphases on aspects related to Earth systems and global studies. Review the use of GIS in different aspects of the Earth systems at the global and regional scales.

Equivalent to EOS 303 (2009-10 catalog)

Prerequisites
30 hours; and GGS 121, GGS 122 and IT 103, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 314 - Severe and Extreme Weather

Credits: 3
Behavior of weather events ranging from small scale (e.g., thunderstorms and tornadoes) to mesoscale (e.g., fronts and hurricanes). Introduces the dynamical and physical processes, atmospheric boundary layer processes, and coupling between different spatial scales that create and shape severe and localized weather events.

Equivalent to CLIM 314; EOS 310 (2009-10 catalog)

Prerequisites
MATH 113 or equivalent; CLIM/PHYS 111/112 or EOS 121 or GGS 121

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring
GGS 315 - Geography of the United States

Credits: 3
Diversity of US physical and cultural landscapes.

Equivalent to GEOG 315 (2009-10 catalog)

Prerequisites
6 credits of geography or American studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 316 - Geography of Latin America

Credits: 3
Regional survey of physical resources, populations, cultural characteristics, and economic activities in Latin America.

Equivalent to GEOG 316 (2009-10 catalog)

Prerequisites
6 credits of geography or Latin American studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 319 - Air Pollution

Credits: 3
Devoted to air pollution fundamentals and aimed at undergraduates who are beginning to study air pollution problems. The use of Gaussian plume dispersion models is also covered in detail, because it serves as the basis for most computer models used for regularity analysis by the EPA. The course also deals with pollution and atmospheric interactions, and the nature of our climate.

Equivalent to EOS 320 (2009-10 catalog)

Prerequisites
30 hours

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 320 - Geography of Europe

Credits: 3
Environmental, economic, social, and political factors influencing regional structure of Europe.
Equivalent to GEOG 320 (2009-10 catalog)

Prerequisites
6 credits of geography or European studies, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 321 - Biogeography: Space, Time and Life

Credits: 3
A survey of the relationship between distribution of plants and animals on the earth surface and the physical geography and environmental characteristics.

Equivalent to BIOL 374; EOS 321 (2009-10 catalog)

Prerequisites
GGS 122 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 322 - Issues in Global Change

Credits: 3
Provides the basis for evaluating existing and emerging issues in the environmental sciences at the regional and global scale, using interdisciplinary scientific principles. This objective is met by a combination of activities designed to provide an understanding of the following: first principles underlying regional/global issues in the environmental sciences, with attention to links among the disciplines of atmospheric sciences, biology, ecology, hydrology, oceanography, geology, human health, toxicology, and mathematical modeling; concepts of systems control, feedbacks, modeling, and hierarchical scales (spatial and temporal); role of retrospective analyses in developing a scientifically sound basis for evaluation and analysis; and studies of specific issues of interest on a regional to global scale.

Equivalent to EOS 322 (2009-10 catalog)

Prerequisites
GGS 121, GGS 122, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 325 - Geography of North Africa and the Middle East

Credits: 3
Environmental, economic, and social factors of differentiation of regional structure and distribution of resources in North African and Middle Eastern countries.
Equivalent to GEOG 325 (2009-10 catalog)

**Prerequisites**
6 credits of geography or courses related to Middle East; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 330 - Geography of the Soviet Succession States**

Credits: 3  
Analyzes geographic factors involved in history, economic development, and geopolitical situation of the former Soviet Union.

Equivalent to GEOG 330 (2009-10 catalog)

**Prerequisites**
6 credits of geography or Russian studies, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 333 - Issues in Regional Geography**

Credits: 3  
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 333 (2009-10 catalog)

**Prerequisites**
30 credits

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

---

**GGS 353 - Observations of the Earth and its Climate**

Credits: 3  
Provides a general introduction to observations of the Earth and its climate, focusing on regional and global aspects. Introduces remote sensing and other Earth-observing techniques, as well as providing a survey of some of the physical and mathematical aspects of remote sensing at a very high level. Concepts and foundations of remote sensing in addition to different approaches and techniques are discussed. The course covers several key Earth system science topics such as El Niño, carbon dioxide increase, climate change including sea rise, ozone depletion, and the energy budget of the Earth.

Equivalent to EOS 353 (2009-10 catalog)

**Prerequisites**
GGS 121, GGS 122 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 354 - Data Analysis and Global Change Detection Techniques**

Credits: 3  
Introduces basic time series methods, especially those used in detecting trends and randomness in time series data. Various data related to global changes on different temporal and spatial scales will be identified, and the relevant analysis methods will be used to those data so that students can detect or confirm changing trends or lack of them in data. Other topics such as data formats, data visualization, and data mining may also be included based on the background of the student body.

Equivalent to EOS 354 (2009-10 catalog)

**Prerequisites**  
IT 103 STAT 250 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 357 - Structures in Urban Governance and Planning**

Credits: 3  
Reviews spatial, policy, and administration principles that guide planning activity in United States. Outlines differences between theory and practice; and provides tools, methods, and perspectives commonly incorporated into practice of urban and regional policy analysis. Provides orientation to public-sector economy in general; and urban administration, planning, and policy in particular.

Equivalent to GEOG 357 (2009-10 catalog)

**Prerequisites**  
30 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 380 - Geography of Virginia**

Credits: 3  
Natural and cultural forces of Virginia. Studies regional makeup and analysis of human and environmental characteristics.

Equivalent to GEOG 380 (2009-10 catalog)

**Prerequisites**  
30 credits
GGS 398 - Selected Topics in Global Change

Credits: 3
Covers selected topics in global change not covered in fixed-content global change courses.

Equivalent to EOS 399 (2009-10 catalog)

Prerequisites
30 credits or permission of instructor.

Notes
Content varies and is determined by instructor. May be repeated.

GGS 399 - Selected Topics in Geography

Credits: 3
Content varies; determined by instructor.

Equivalent to GEOG 399 (2009-10 catalog)

Prerequisites
30 credits.

Notes
May be repeated for maximum of 12 credits.

GGS 406 - Suburban Geography

Credits: 3
Analyzes spatial aspect of social, economic, and political activities in suburbia. Suburbanization viewed as independent force and component of larger urbanization process.

Equivalent to GEOG 406 (2009-10 catalog)

Prerequisites
60 credits

Notes
Uses Northern Virginia as lab for suburban geographical study and student-initiated field work projects.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 410 - Introduction to Hyperspectral Imaging**

Credits: 3  
Provides an introduction to quantitative measurements by remote-sensing methods covering an introduction to quantitative spectroscopy, spectral and thermal signatures, atmospheric physics, and the electromagnetic spectrum. Emphasis will be on the scientific principles involved and the transition of the technology to real-world applications. The requisite materials to begin to understand hyperspectral imaging (HSI) technology and its many civil and military applications are presented. The course covers the needed mathematics used in the analysis of n-dimensional data. Topics such as hyperspectral concepts, data collection systems, data processing techniques, case studies, and U.S. national policy issues will be covered. The data processing techniques will include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and other techniques. Applications and case studies will include environmental, medical, agricultural, military, and others. Ground, airborne, and spaceborne hyperspectral systems will be covered.

Equivalent to EOS 410 (2009-10 catalog)

**Prerequisites**  
PHYS 243-244, 245-246, MATH 113-114, GGS 353 GGS 416, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 411 - Advanced Digital Cartography**

Credits: 3  
Design and production of full-color digital maps and information graphics, map cognition and use, and principles of desktop mapping.

Equivalent to GEOG 411 (2009-10 catalog)

**Prerequisites**  
GGS 311

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GGS 412 - Air Photography Interpretation**

Credits: 3  
Methods and techniques of interpreting and using information contained in aerial photography, including applications to various aspects of physical and cultural landscape.
Equivalent to GGS 412 (2009-10 catalog)

**Prerequisites**
60 credits and GGS 102 or 103, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 415 - Seminar in Geography

Credits: 3  
Students produce, present original research papers.

Equivalent to GEOG 415 (2009-10 catalog)

**Prerequisites**
GGS 300 and 310

**Notes**
Capstone seminar for geography majors integrating previous course work into disciplinary framework.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

### GGS 416 - Satellite Image Analysis

Credits: 3  
Examines methods and techniques of interpreting and using information obtained by non-photographic remote sensing systems, with particular emphasis on space-borne platforms. Includes analysis of imagery for both physical and cultural environments.

Equivalent to GEOG 416 (2009-10 catalog)

**Prerequisites**
60 credits and GGS 412, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 420 - Physiography of North America

Credits: 1 to 3  
Physiographic features of North American continent; spatial distribution; and influence on cultural, demographic, and economic development of United States and Canada.

Equivalent to GEOG 420 (2009-10 catalog)
Prerequisites
60 credits, GGS 102, 3 additional credits of geography or geology, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GGS 455 - Environmental Impact Assessment

Credits: 3
Evaluates current methods and practices for conducting and planning environmental assessments to include techniques and requirements for assessing impacts on air, water, natural resources, transportation, water facilities, and industrial and community development.

Equivalent to EOS 455 (2009-10 catalog)

Prerequisites
GGS 122 GGG 302 or EVPP 377 or 6 hours of courses in ecology and environmental sciences or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 456 - Introduction to Atmospheric Radiation

Credits: 3
The content of this course is designed to help students learn about the fundamental aspects of atmospheric radiation. The goal is to understand their essential roles in advanced remote sensing, atmospheric sciences and global and environmental change. It will provide a foundation for and will be beneficial to students in taking advanced courses in those areas.

Equivalent to EOS 456 (2009-10 catalog)

Prerequisites
GGS 353/GGS 309 and a course in physics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

GGS 463 - Applied Geographic Information Systems

Credits: 3
Selected applications in geographic information systems (GIS). Topics include automated data capturing and processing, spatial data models and structure including object-oriented approach, advanced spatial analytical techniques including raster modeling and network analysis, programming, and algorithm development in GIS. Major purpose of course is to extend fundamental theories and concepts in GIS so students are able to conduct research with and on GIS.

Equivalent to GEOG 463 (2009-10 catalog)
Prerequisites
2.00 or better in GGS 300 and 311.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 480 - Internship in Geography

Credits: 1 to 3
Approved study programs with specific employers.

Equivalent to GEOG 480

Prerequisites
Open only to authorized GGS majors with 90 credits and GPA of 2.50 or higher in GGS courses. Permission of instructor required.

Notes
Credit determined by department, may be repeated to a maximum of 6 credits. Contact department one semester before enrollment.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GGS 490 - Practicum in Geographical Applications

Credits: 1-3
Application of geographical research tools and techniques in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 490 (2009-10 catalog)

Prerequisites
Open only to authorized geography majors with 90 credits. Permission of department and instructor required.

Notes
May be repeated to a total of 6 credits

Hours of Lab or Studio per week: 1-3

GGS 495 - Senior Research in Global and Environmental Change

Credits: 3
Applications of research tools and techniques on specific global change topics, in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to EOS 495 (2009-10 catalog)
Prerequisites
90 credit hours authorized major with permission of department and instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GGS 499 - Independent Study in Geography

Credits: 1 to 3
Individual study of selected area of geography.

Equivalent to GEOG 499 (2009-10 catalog)

Prerequisites
Open only to geography majors with 90 credits and GPA of 2.50 or higher. Permission of department and instructor required.

Notes
Requires directed research paper. May be repeated to a maximum of 6 credits with permission of the department.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GGS 503 - Problems in Environmental Management

Credits: 3
Case studies of effects of human activities on atmospheric, hydrologic, geomorphic, and biotic processes.

Equivalent to GEOG 503 (2009-10 catalog)

Prerequisites
6 credits of geography, including GGS 102.

Hours of Lecture or Seminar per week: 3

GGS 505 - Transportation Geography

Credits: 3
Structure, principles, location, and development of world transportation. Critical role of transportation in moving people, goods, and ideas at international, national, regional, and urban levels.

Equivalent to GEOG 505 (2009-10 catalog)

Prerequisites
6 credits of geography

Hours of Lecture or Seminar per week: 3
GGS 520 - Geography for Teachers

Credits: 3
Emphasizes problems and techniques in teaching geography; and current developments in research, methodology, and philosophy in the discipline.

Equivalent to GEOG 520 (2009-10 catalog)

Prerequisites
Graduate standing, or permission of department.

Hours of Lecture or Seminar per week: 3

GGS 524 - Introduction to Environmental and Resource Economics

Credits: 3
Introduces theory of external costs and benefits, public goods, natural resource management, and benefit and cost analysis for noneconomists. Lecture-discussion format with student presentations and participation. Analytical problem set, short writing assignments, and exams.

Equivalent to GEOG 524 (2009-2010 Catalog) and EVPP 524

Prerequisites
Basic algebra skills.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 525 - Economics of Human/Environment Interactions

Credits: 3
Advanced topics in environmental, natural resource, and ecological economics for noneconomist. Emphasizes sustainability, intergenerational equity, and economic-ecological feedbacks. Lecture, discussion with substantial student participation. Includes problem sets, class presentations, and term paper.

Equivalent to GEOG 525 (2009-2010 Catalog) and ECON 895/EVPP 525

Prerequisites
EVPP 524/GGS 524 or equivalent

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 531 - Land-Use Modeling Techniques and Applications
Credits: 3
Survey of literature on spatially explicit empirical models of land-use change. Hands-on experience developing and running simple models. Techniques covered include statistical models, mathematical programming models, cellular automata, agent-based models, and integrated models.

Equivalent to EVPP 531 and GEOG 531 (2009-10 catalog)

**Prerequisites**
GGS 550, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 533 - Issues in Regional Geography**

Credits: 1-6
Geographical study of particular region or relevant regional issue.

Equivalent to GEOG 533 (2009-10 catalog)

**Notes**
Content varies. May be repeated to a total of 12 credits with permission of the department.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

---

**GGS 540 - Medical Geography**

Credits: 3
Spatial approaches to study of health and disease. Topics include disease ecology and diffusion, and geographic perspectives on improving health care delivery.

Equivalent to GEOG 540

**Prerequisites**
Course in statistics.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GGS 550 - Geospatial Science Fundamentals**

Credits: 3
Introduces geospatial sciences, emphasizing concepts and theories of cartography, remote sensing, air photo interpretation, Global Positioning Systems, spatial data structures, and geographic information systems. Lectures accompanied by hands-on exercises.
Equivalent to GEOG 550 (2009-10 catalog)

Notes
Only available for students without previous course work in cartography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 551 - Thematic Cartography

Credits: 3
Analyzes nature of perceptual organization and visual systems in thematic map communication portrayal, graphic handling, and data analysis.

Equivalent to GEOG 551 (2009-10 catalog)

Prerequisites
GGS 310 or 550

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 553 - Geographic Information System

Credits: 3
Sources of digital geospatial data; and methods of input, storage, display, and processing of spatial data for geographic analysis using GIS. Lectures, hands-on exercises familiarize students with current technology.

Equivalent to GEOG 553 (2009-10 catalog)

Prerequisites
GGS 550 or course in cartography

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 554 - History of Cartography

Credits: 3
History of cartographic portrayal of Earth from ancient times through 19th century, emphasizing interrelation of human culture, technological development, and geographical knowledge as reflected in maps.

Equivalent to GEOG 554 (2009-10 catalog)

Prerequisites
Graduate standing
GGS 557 - Introduction to Atmospheric Radiation

Credits: 3
The content of this course is designed to help students learn about the fundamental aspects of atmospheric radiation. The goal is to understand their essential roles in advanced remote sensing, atmospheric sciences and global and environmental change. It will provide a foundation for and will be beneficial to students in taking advanced courses in those areas.

Equivalent to EOS 556 (2009-10 catalog)

Prerequisites
GGS 353/GGS 309 and a course in physics, or permission of instructor.

GGS 560 - Quantitative Methods

Credits: 3
Survey of quantitative methods commonly used in geographic research. Emphasizes spatial analysis techniques.

Equivalent to GEOG 585 (2009-10 catalog)

Prerequisites
Previous course work in statistics, GGS 310 or 550

GGS 562 - Photogrammetry

Credits: 3
Treatment of photogrammetric problems, including least squares adjustments, image coordination refinements, colinearity equation, resection, relative orientation, and analytic aerotriangulation.

Equivalent to GEOG 562 (2009-10 catalog)

Prerequisites
GGS 412, or permission of instructor.

GGS 563 - Advanced Geographic Information Systems
Credits: 3
Discusses advanced GIS concepts including spatial data structure, spatial analysis, programming data fusion, Internet components, and spatial database management. Hands-on activities demonstrate concepts and specific applications in both cultural and physical geography.

Equivalent to GEOG 563 (2009-10 catalog)

Prerequisites
GGS 553 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 575 - Reconstructing Past Environments: Seminar in Geoarchaeology

Credits: 3
Research seminar examining intersection of geoarchaeology and paleoecology with cultural ecology. Addresses methods common to these research areas, and ranges of scales and reliability of evidences to reconstruct past environments, both natural and cultural. Applied examples cover selected geoarchaeological and paleoecological projects from variety of geographical regions.

Equivalent to GEOG 575

Prerequisites
Permission of instructor and course work in geography, biology, geology, or archaeology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 579 - Remote Sensing

Credits: 3
Examines use of various types and combinations of electromagnetic energy to obtain spatial information. Concentrates on nonphotographic and spaceborne remote sensing platforms and sensors. Examines essential operational parameters for existing and future systems and strategies for visual extraction of features.

Equivalent to EOS 753 and GEOG 579 (2009-10 catalog)

Prerequisites
GGS 416 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 581 - World Food and Population
Credits: 3
Topics include maldistribution of population, regional disparities in growth rates and income distribution, food production, and world hunger. Discusses population policies, with emphasis on Third World countries.

Equivalent to GEOG 581 (2009-10 catalog)

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3

GGS 590 - Selected Topics in Geography

Credits: 1-3
Analyzes topics of immediate interest.

Equivalent to GEOG 590 (2009-10 catalog)

Notes
Content varies. May be repeated to a maximum of 12 credits.

GGS 600 - Communication Skills for Scientists

Credits: 2
Develops basic set of essential skills for scientific communication of written and oral materials. Oral skills focus on delivery of successful and informative presentations to both peers and the general public. Written communication skills focus on writing of scientific abstracts, manuscripts, and grant proposals. Meets objectives through combination of activities, including practical writing assignments, planned and extemporaneous oral presentations, discussion of grant preparation for extramural competition, and personal advice on developing and delivering oral presentations.

Equivalent to EOS 600 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 603 - Geographic Perspectives on Complex Natural Resource Management

Credits: 3
Develops better understanding of strengths, limitations of restoring large and complex natural resource systems by examining critical aspects of one such effort.

Equivalent to GEOG 603 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GGS 605 - Socioeconomic Applications of GIS

Credits: 3
Provides those working with spatially referenced data the technical skills to use GIS to conduct spatial analyses on socioeconomic phenomena related to labor, retail, and real estate markets. Introduces and emphasizes the development of technical and methodological skills to understand the potential and the pitfalls of using GIS for spatial analyses of socioeconomic phenomena.

Equivalent to GEOG 605

Prerequisites
GGS 553

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 631 - Spatial Agent-Based Models of Human-Environment Interactions

Credits: 3
Discusses key challenges in spatial modeling of human-environment interactions. Reviews agent-based modeling applications in urban and rural interactions, agriculture, forestry, and other areas. Hands-on development of simple ABM models and investigation of linkages between GIS and ABM.

Equivalent to EVPP 631 and GEOG 631 (2009-10 catalog)

Prerequisites
GGS 531 or CSS 600, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 644 - Fundamentals and Interpretation of Imaging Radar

Credits: 3
Provides understanding of components, functionality, and use of radar remote sensing for acquiring spatial information. Concentrates on operational systems. Includes hands-on assignments.

Equivalent to GEOG 644 (2009-10 catalog)

Prerequisites
GGS 579, or other basic course in remote sensing.

Hours of Lecture or Seminar per week: 3

GGS 650 - Introduction to GIS Algorithms and Programming
Introduction to programming methods and their application to Geographic Information Systems, including the fundamentals of object-oriented programming and GIS-specific data structures and algorithms. Employs an object-oriented language such as Visual Basic.Net, and existing freeware and commercial GIS libraries. Topics covered include variables, arrays, control structures, objects and classes, raster and vector data structures, spatial algorithms, and spatial indexing methods.

Equivalent to EOS 650 and GEOG 650 (2009-10 catalog)

**Prerequisites**
GGS 553 or equivalent introductory GIS course, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 653 - Geographic Information Analysis**

Credits: 3  
Explores existing and potential capabilities of geographic information systems in conducting spatial analysis and modeling.

Equivalent to GEOG 653 (2009-10 catalog)

**Prerequisites**
GGS 553 and 560

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 655 - Map Design**

Credits: 3  
Advanced examination of principles of map design, including discussions of map design research.

Equivalent to GEOG 655 (2009-10 catalog)

**Prerequisites**
GGS 310 or 550.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 656 - The Hydrosphere**

Credits: 3  
Covers components and transfer processes in hydrosphere, which consists of aqueous envelope of Earth including oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to Equivalent to EVPP 652; EOS 656 and GEOG 570 (2009-10 catalog)
**Prerequisites**
Two semesters of calculus, partial differential equation recommended; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GGS 657 - The Lithosphere**
Credits: 3
Global-scale overview of lithosphere; the solid nonliving Earth, its materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Equivalent to GEOL 601, EOS 657 and GEOG 671 (2009-10 catalog)

**Prerequisites**
Graduate standing

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GGS 658 - Terrain Mapping**
Credits: 3
Covers fundamental methods of digitally representing terrain data, major technologies, and programs for generating terrain data; methods for quantifying terrain error and assessing terrain data quality; and a variety of applications.

Equivalent to GEOG 656 (2009-10 catalog)

**Prerequisites**
GGS 553 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GGS 660 - Automated Cartography**
Credits: 3
Survey of algorithms and techniques to generalize information on maps and in geographic information systems. Covers simplified representation of geographic objects, surfaces, and thematic information. Includes GIS programming component.

Equivalent to GEOG 556 (2009-10 catalog)

**Prerequisites**
GGS 650 or permission of instructor.
GGS 661 - Map Projections and Coordinate Systems

Credits: 3
Covers development of various map projections and coordinate systems, property analysis, distortions, and applications.

Equivalent to GEOG 661 (2009-10 catalog)

Prerequisites
GGS 310 or 550.

GGS 664 - Spatial Data Structures

Credits: 3
Studies spatial data structures and their application in digital cartography, geographic information systems, and image-processing systems. Examines raster and vector data structures, and attribution schemes and topological models. Includes data transformation, information loss, data quality, and the role of metadata.

Equivalent to GEOG 664 (2009-10 catalog)

Prerequisites
B or better in GGS 560

GGS 670 - Introduction to Atmosphere and Weather

Credits: 3
Applies climatic concepts to natural and human-modified environments, and analyzes climatic change.

Equivalent to EOS 670 and GEOG 670 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3

GGS 671 - Algorithms and Modeling in GIS

Credits: 3
Examines several fundamental GIS algorithms based upon computational geometry and computer graphics. Also discusses issues
in modeling features of different dimensions and surfaces in GIS. Significant programming expected.

Equivalent to EOS 771 (2009-10 catalog)

**Prerequisites**
B or better of GGS 560

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 674 - Environmental Impact Analysis

Credits: 3  
Scientific and administrative processes involved in environmental impact analysis and environmental impact statements.

Equivalent to GEOG 674 (2009-10 catalog)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 680 - Earth Image Processing

Credits: 3  
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 758 and GEOG 580 (2009-10 catalog)

**Prerequisites**  
GGS 416 or GGS 579 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GGS 681 - Environmental Applications of Integrated Geographic Information Technologies

Credits: 3  
Focuses on how geoinformation technologies, including GIS, RS, and GPS, and spatial analytical techniques can be integrated to address various situations in environmental risk assessment, monitoring, and planning.

Equivalent to EOS 680 (2009-10 catalog)

**Prerequisites**  
GGS 753 and GGS 550 or GGS 560 or permission of instructor
GGS 684 - Selected Topics in Geospatial Intelligence

Credits: 3
Covers topics relevant to geospatial intelligence, especially addressing emerging trends, focused intelligence applications, and relevant technological advances, not covered by existing courses. Sample topics addressed in this course include geosensor networks, landmine detection using remote sensing techniques, the use of unmanned aerial vehicles in geospatial intelligence, and the use of virtual reality techniques for geospatial information modeling and analyst training.

Equivalent to EOS 684 (2009-2010 Catalog)

Prerequisites
Admission to the Geospatial Intelligence Certificate program or permission from the program's academic director.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 685 - Capstone Course in Geoinformatics

Credits: 3
A course for students completing their geospatial intelligence (GI) certificate program. It is intended to provide a capstone experience by synthesizing the knowledge and experience they acquired in their previous courses to address a complex geospatial intelligence problem. The course requires analytical, collaborative, and communication skills.

Prerequisites
12 credits in the geospatial intelligence certificate program or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 689 - Seminar in Geographic Thought and Methodology

Credits: 3
Includes historical development of geographic thought and current philosophy of geography; rationale for various subfields; and geographic research techniques and methods of analysis.

Equivalent to GEOG 680 (2009-10 catalog)

Prerequisites
GGS 560

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 690 - Advanced Practicum in Geographical Applications
Credits: 1-6
Applies spatial technologies in conjunction with faculty instruction and research. Individualized sections taught by arrangement with full-time faculty.

Equivalent to GEOG 690 (2009-10 catalog)

Prerequisites
Permission of department.

GGS 695 - Internship in Geography

Credits: 1 to 6
Approved study programs with specific employers. Students and employer supervisors must demonstrate relevancy of study program to degree requirements.

Equivalent to GEOG 695 (2009-2010 Catalog)

Prerequisites
Permission of department.

Hours of Lecture or Seminar per week: 1 to 6
When Offered: Fall, Spring

GGS 698 - Directed Readings and Research

Credits: 1-3
Reading and research on specific topic under direction of faculty member.

Equivalent to GEOG 698 (2009-10 catalog)

Prerequisites
Permission of instructor and department.

Notes
Written report required; oral exam and report may be required. May be repeated to a maximum of 12 credits.

GGS 704 - Spatial Analysis and Modeling of Population

Credits: 3
Intermediate-level, population geography course discussing demographic concepts and spatial dimensions of population. Features various indices, measures, and models commonly used in human geography.

Equivalent to EOS 704 (2009-10 catalog)

Prerequisites
Prior courses in quantitative methods and GIS recommended.
**GGS 721 - Biogeography**

Credits: 3  
Provides broad understanding of how physical geography and environment influence spatial and temporal distribution of plants and animals on Earth's surface.

Equivalent to EOS 721 (2009-2010 Catalog)

**Prerequisites**
Courses in ecology, chemistry, and geology.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

---

**GGS 722 - Regional and Global Issues in the Earth Sciences**

Credits: 3  
Provides basis for evaluating existing and emerging issues in Earth sciences at regional and global scales, utilizing interdisciplinary scientific principles.

Equivalent to EOS 722 (2009-2010 Catalog)

**Prerequisites**
Courses in ecology, chemistry, and physics.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

---

**GGS 725 - Advanced Hydrosphere**

Credits: 3  
Uses mathematical and modeling approaches for in-depth study of different components and transfer processes within hydrosphere. Topics include transfer processes relevant for oceans, lakes, rivers, snow, ice, glaciers, soil moisture, ground water, and atmospheric water vapor.

Equivalent to EOS 725 (2009-2010 Catalog)

**Prerequisites**
Two semesters of calculus, preferably partial differential equations; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring
GGS 740 - Hyperspectral Imaging Systems

Credits: 3
Provides requisite materials to understand hyperspectral imaging technology and its many civilian and military applications. Emphasizes scientific principles involved and technology application to real-world imaging systems. Topics include hyperspectral concepts and system tradeoffs; data collection systems; calibration techniques; data processing techniques and software; classification methods; and case studies. Data processing techniques include N-dimensional space, scatterplots, spectral angle mapping, spectral mixture analysis, spectral matching, and mixture tuned matched filtering. Discusses ground, airborne, and spaceborne hyperspectral remote sensing systems.

Equivalent to EOS 740 (2009-2010 Catalog)

Prerequisites
CSI 660 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 747 - Satellite Data Reception and Product Generation

Credits: 3
Provides a practical experience on how to receive, process, and distribute remote-sensing data using an antenna-receiving station. Covers basic orbital mechanics, characteristics of satellite sensors and their limitations, and algorithms used to generate products from the raw measurements. Data mining techniques are presented for the analysis of large volume of data.

Equivalent to EOS 747 (2009-10 catalog)

Prerequisites
GGS 579 or introductory remote-sensing course; computer programming; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 750 - Advanced Geographical Research Applications

Credits: 1-6
Advanced research employing geographical tools and research techniques.

Equivalent to GEOG 750 (2009-10 catalog)

Prerequisites
Permission of instructor.

Notes
Content varies. May be repeated to a maximum of 12 credits with permission of the department.

GGS 754 - Earth Science Data and Advanced Data Analysis
Credits: 3
Covers accessing and applying Earth observations and remote-sensing data for Earth system science research and applications. Major topics are data formats, analysis and visualization tools, advanced data analysis methods, and data applications. Also covers combining innovative information technology techniques and Earth science data to set up online data centers for accessing data through the web.

Equivalent to EOS 754 (2009-2010 Catalog)

Prerequisites
GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 756 - Physical Principles of Remote Sensing

Credits: 3
Emphasizes fundamental physical and mathematical principles of remote sensing. Also provides overview of the current Earth Observation System as well as the National Polar-Orbiting Operational Environmental Satellite Systems (NPOESS), and NPOESS Preparatory Project missions.

Equivalent to EOS 756 (2009-2010 Catalog)

Prerequisites
GGS 753 or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 757 - Techniques and Algorithms in Earth Observing

Credits: 3
Covers retrieval, analysis, and application of geophysical parameters derived from remotely sensed data for Earth system research and applications. Includes theory of visible and infrared and microwave remote sensing, heritage sensors, sensor calibration, retrieval algorithms, validation, and error estimates.

Equivalent to EOS 757 (2009-10 catalog)

Prerequisites
GGS 579 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 759 - Topics in Earth Systems Science
Credits: 1-6
Covers selected topics in Earth systems and global changes not covered in fixed-content Earth systems and global changes courses.

Equivalent to EOS 759 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 760 - Advanced Remote Sensing Applications

Credits: 3
Focuses on applications of remote sensing in various important areas of Earth systems science, including analysis of surface radiation budget, land cover, inland and coastal waterways, and soil moisture. Details algorithms, techniques, and examples.

Equivalent to EOS 760 (2009-2010 Catalog)

Prerequisites
GGS 579 or GGS 680

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 772 - Distributed Geographic Information Systems

Credits: 3
Examines different aspects of science and technology in the context of distributed GIS. Includes general concepts, architecture, component design and development, and system integration as well as other advanced topics, including interoperability and agent-based GIS.

Equivalent to EOS 772 (2009-10 catalog)

Prerequisites
Introductory course in GIS and some programming experience, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 773 - Interoperability of Geographic Information Systems

Credits: 3
Advanced course addressing theories, standards, and implementations of web-based interoperable geographic information systems for online data and information services. Reviews international standards, including OGC, and associated tools for interoperability.

Equivalent to EOS 773 (2009-10 catalog)
Prerequisites
GGS 553 and 754, or a course in GIS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 777 - Remote Sensing of Natural Hazards

Credits: 3
Provides an overview of major natural hazards, their governing dynamics and remote-sensing techniques used to study, forecast, and mitigate hazards.

Equivalent to EOS 777 (2009-2010 Catalog)

Prerequisites
GGS 579 or GGS 680; or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GGS 780 - Graduate Internship in Earth System Science

Credits: 1-6
Applications of knowledge and skills in Earth systems and geoinformation sciences to real-world issues and problems in private industry, government agencies, or nonprofit organizations.

Equivalent to EOS 780 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GGS 785 - Geographic Field Work

Credits: 3
Introduces nature, scope, and objectives of geographic field methods and techniques, including use of base maps, acquisition of data, and field research design. Taught as much as possible in field situations with students required to develop and carry out relevant field research projects pertaining to both physical and cultural geography.

Equivalent to GEOG 785 (2009-10 catalog)

Hours of Lecture or Seminar per week: 3

GGS 787 - Scientific Data Mining for Geoinformatics
Credits: 3
Covers specialized data mining algorithms, geoscience data models, and data information systems. Emphasis on domain-specific data mining algorithms suitable for spatial data and spatio-temporal data with geoscience and geoinformatics applications. Introduces real geoscience data mining applications in detailed applications.

Equivalent to EOS 787 (2009-2010 Catalog)

**Prerequisites**
Competency in programming at the level of CSI 601-607 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

---

**GGS 791 - Advanced Spatial Statistics**

Credits: 3
Advanced course focusing on analyzing georeferenced or spatial data represented as points or polygons. Addresses higher moments, point pattern analyses, and interpolations of points to surfaces. Includes spatial regression.

Equivalent to EOS 791 (2009-10 catalog)

**Prerequisites**
GGS 560 or STAT 535/554, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GGS 792 - Seminar in Earth Systems Science**

Credits: 2
Capstone experience. Seminars presented by faculty and students.

Equivalent to Equivalent to EVPP 792 and EOS 792 (2009-10 catalog)

**Prerequisites**
15 Graduate Credits including CSI 655, GGS 656, and GGS 657, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**GGS 795 - Seminar in Regional Analysis**

Credits: 3
Analyzes and synthesizes physical and cultural elements of geography in selected region. Should be taken near end of master’s degree program. Provides opportunity to apply selective knowledge gained in previous systematic courses to specific region.

Equivalent to GEOG 795 (2009-10 catalog)
GGS 796 - Directed Readings and Research in Earth Systems Science

Credits: 1-6
Reading and research on specific topic in Earth systems and geoinformation sciences under direction of faculty member.

Equivalent to EOS 796 (2009-10 catalog)

Prerequisites
Graduate standing, permission of instructor.

Notes
May be repeated as necessary.

GGS 798 - Research Project in Earth Systems Science

Credits: 1-6
Reading project chosen and completed under guidance of graduate faculty member resulting in acceptable technical report.

Equivalent to EOS 798 (2009-10 catalog)

Prerequisites
Admission to Earth Systems Science MS program, 12 graduate credits, and permission of instructor.

Notes
For students enrolled in Earth Systems Science master’s program.

GGS 799 - Thesis

Credits: 1-6
Degree candidacy and departmental approval of thesis proposal.

Equivalent to EOS 799 and GEOG 799 (2009-10 catalog)

Prerequisites
Degree candidacy and departmental approval of thesis proposal.

Notes
May be repeated to a maximum of 6 credits earned.

**Hours of Lecture or Seminar per week:** 1-6

### GGS 840 - Hyperspectral Imaging Applications

Credits: 3
Introduces advanced hyperspectral imaging and multisensor concepts with emphasis on real-world civilian and military applications. Topics include advanced hyperspectral concepts, multisystem tradeoffs, data collection and processing systems, imaging radar systems, laser systems, calibration techniques, data fusion, quantitative remote sensing techniques, data compression techniques, case studies, and U.S. national policy. Applications and case studies include environmental, homeland security, medical, military, disaster mitigation, agricultural, and transportation.

Equivalent to EOS 840 (2009-2010 Catalog)

**Prerequisites**
CSI 660 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**When Offered:** Fall, Spring

### GGS 854 - Air Pollution Dispersion

Credits: 3
Covers the basic concepts, theories, and models of pollutant dispersal in the atmosphere and the related atmospheric systems affecting dispersal of hazardous atmospheric releases.

Equivalent to EOS 854 (2009-2010 Catalog)

**Prerequisites**
CLIM 710 or 711, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

**When Offered:** Fall, Spring

### GGS 855 - Introduction to Mesoscale Atmospheric Modeling

Credits: 3
Introduces physical and numerical modeling issues involved in mesoscale atmospheric flows. These flows involve time and space scales associated with diurnal cycle, atmospheric inertial mode, thermal and mechanical forcing due to mesoscale terrain inhomogeneities, mesoscale precipitation systems, and downscale energy transfer from synoptic scale to mesoscale due to nonlinear flow interactions.

Equivalent to EOS 855 (2009-2010 Catalog)

**Prerequisites**
Permission of instructor.
**GGS 900 - Colloquium Earth Systems Sciences**

Credits: 1  
Presentations in specific research areas of Earth systems and geoinformation sciences by faculty and staff, Mason faculty in related programs, and professional visitors.

Equivalent to EVPP 791; EOS 900 and GEOG 791 (2009-10 catalog)

**Prerequisites**  
Graduate standing

**Notes**  
May be repeated for credit, but maximum 3 credits may be applied to Earth systems and geoinformation sciences PhD.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**GGS 998 - Dissertation Proposal**

Credits: 1-12  
Covers development of research proposal that forms basis for doctoral dissertation, under guidance of dissertation director and doctoral committee.

Equivalent to EOS 998 (2009-10 catalog)

**Prerequisites**  
Doctoral student, permission of instructor. Permission of instructor

**Notes**  
May be repeated, but no more than 12 credits of GGS 998 may satisfy doctoral degree requirements.

**Grading:** S/IP

---

**GGS 999 - Dissertation**

Credits: 1-12  
Doctoral dissertation research under direction of dissertation advisor.

Equivalent to EOS 999 (2009-10 catalog)

**Prerequisites**  
Permission of instructor
Notes
May be repeated, but no more than total 24 credits in GGS 998 and 999 may be applied to doctoral degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Geology

GEOL 101 - Introductory Geology I

Credits: 4
Covers Earth, processes that operate within Earth and on surface, and human interaction with Earth. Topics include minerals, earthquakes and seismology, isostasy, igneous processes and rocks, paleomagnetism and plate tectonics, weathering, mass movements, rivers and streams, groundwater, glaciers, and marine processes.

Satisfies General Education Requirement: Natural science Lab

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 102 - Introductory Geology II

Credits: 4
Earth processes in historical context. Topics include sedimentary rocks and principles, deformation and metamorphism, mountain building and plate tectonics, geologic time, fossils, and historical development of continents.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
GEOL 101

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 206 - Topics in Geology I
Credits: 1-3
Discuss particular topic in geology.

Notes
May include field trips.

**Hours of Lecture or Seminar per week: 1-3**
**Hours of Lab or Studio per week: 0**

---

**GEOL 302 - Mineralogy**

Credits: 4
Crystallographic, optical, chemical, and physical properties of minerals.

**Prerequisites**
GEOL 101 and 102 with grade of C or better, and CHEM 211.

Notes
May include field trips.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 3**

---

**GEOL 303 - Field Mapping Techniques**

Credits: 3
Basic techniques for collecting, recording, and plotting spatial field data including use of topographic maps, compasses, transit, alidade, and global positioning systems (GPS).

**Prerequisites**
30 credits including MATH 105 or equivalent, and GGS 102 or GEOL 101.

Notes
Includes field work.

**Hours of Lecture or Seminar per week: 0**
**Hours of Lab or Studio per week: 6**

---

**GEOL 304 - Sedimentary Geology**

Credits: 4
Introduces sedimentation, sedimentary petrology, facies analysis, and stratigraphy.

**Prerequisites**
GEOL 101 and 102, and grade of C or better in GEOL 302.

Notes
May include field trips.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GEOL 305 - Environmental Geology**

Credits: 3  
Investigates geological principles directly relating to environmental hazards. Geological causes and effects of natural disasters such as earthquakes, tsunamis, volcanoes, floods and landslides; climate variability and change; prediction of, and planning for geological hazards and disasters and understanding their major societal impacts; and medical geology.

**Prerequisites**  
GEOL 101, and either GEOL 102, GEOL 309/BIOL 309, or GGS 309.

**Notes**  
May include field trips.

---

**GEOL 306 - Soil Science**

Credits: 3  
Composition, classification, physical properties, and origin of soils.

**Prerequisites**  
GEOL 101, and CHEM 103 or 211.

**Notes**  
May include field trips.

---

**GEOL 308 - Igneous and Metamorphic Petrology**

Credits: 4  
Genesis, classification, and recognition of igneous and metamorphic rocks.

**Prerequisites**  
GEOL 101 and 102, grade of C or better in GEOL 302, and MATH 105 or equivalent.

**Notes**  
May include field trips.
GEOL 309 - Introduction to Oceanography

Credits: 3
Introduces physical, chemical, biological, and geological aspects of oceanic environment.

Prerequisites
GEOL 101 and BIOL 103 or 213.

Notes
May include field trip.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 312 - Invertebrate Paleontology

Credits: 4
Classification, evolutionary trends, and distribution of common invertebrate fossils.

Prerequisites
GEOL 101, 102; or BIOL 103, 104; or BIOL 213, 303, 304.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 313 - Hydrogeology

Credits: 3
Geological and hydrologic factors controlling occurrence, distribution, movement, quality, and development of groundwater.

Prerequisites
GEOL 101 or GGS 102, MATH 113, and CHEM 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 315 - Topics in Geology II
Credits: 1-3
Discusses particular topic in geology.

Prerequisites
GEOL 101 or GEOL 102 or permission of instructor.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 316 - Computers in Geology

Credits: 3
Uses of mainframe and microcomputers, with emphasis on geologic applications.

Prerequisites
GEOL 101, 102, and 302, and one semester of mathematics; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 317 - Geomorphology

Credits: 4
Analyzes processes that occur at Earth's surface and resulting landforms. Labs stress recognition and evaluation of landforms using maps and aerial photographs, and methods of data collection used in study of surficial geology.

Prerequisites
GEOL 101 and 102, with grade of C or better; or 6 credits in GGS, including GGS 102; GGS 412 strongly recommended.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 320 - Geology of Earth Resources

Credits: 3
A survey of earth resources, including metallic and non-metallic ore deposits, mineral resources, precious gems, sand and gravel, water, and air.

Prerequisites
GEOL 101, GEOL 102, GEOL 302. GEOL 305 strongly suggested.
Hours of Lecture or Seminar per week: 3
When Offered: Spring

GEOL 321 - Geology of Energy Resources

Credits: 3
A survey of energy resources, including fossil fuels, renewable, nuclear and unconventional sources. Emphasis on origin, use and implications of development.

Prerequisites
GEOL 101 or GEOL 102, and completion of all General Education Science requirements.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

GEOL 363 - Coastal Morphology and Processes

Credits: 4
Studies global coastal geomorphology and processes with emphasis on U.S. Atlantic and Gulf coasts. Topics include plate tectonics, sea level changes, sediment supply, waves, tides, storm impacts, and human activities. Lecture and extended weekend field trips to mid-Atlantic coast.

Prerequisites
GEOL 309 or BIOL 309 or GEOL 317 with a grade C or better; or 9 credits in geography, including GGS 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 364 - Marine Geology

Credits: 3
This course will present a global overview of the geologic origin and composition of the ocean seafloor, and an introduction to the basic principles of the geologic processes occurring in the marine environment. Primary topics include geologic, tectonic and sedimentary characteristics of the deep ocean basins and continental margins; transport and deposition of marine sediments; micropaleontology and paleoceanography; geochemistry and hydrothermal systems; and marine mineral resources.

Prerequisites
GEOL 101, 102, 302, and CHEM 211

GEOL 401 - Structural Geology

Credits: 4
Igneous, sedimentary, and metamorphic rocks in folded, faulted, and metamorphosed terrains.
Prerequisites
Grade of C or better in GEOL 302 and 317; successful completion of one or both of GEOL 304 or 308; and MATH 110, 111, or 113. PHYS 160 or 243 highly recommended.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

GEOL 402 - Geological Development of North America

Credits: 3
Geological history of North America in terms of plate tectonics. Geological development and history of North America's major regions.

Prerequisites
GEOL 101, 102, 302, 304, 308, and 401.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 403 - Geochemistry

Credits: 3
Includes stable isotope, crystal, water, and organic geochemistry; geochronology; and geochemistry of rocks.

Prerequisites
GEOL 101 and 102

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 404 - Geological Field Techniques

Credits: 3-8
Mapping techniques involved in collecting geological field data.

Prerequisites
GEOL 101, 102, 302, 304, 308, and 401.

Notes
Includes field work.
GEOL 405 - Advanced Seminar in Earth Resources

Credits: 3
Analyzes current issues involving renewable and non-renewable earth resources with consideration of the economic, political, social and aesthetic significance of these resources and their utilization. Taught seminar style examining case-studies, with emphasis on discussion, reading, writing and student oral presentations.

Prerequisites
GEOL 101 and 102 and
GEOL 302, 304 and 308 OR GEOL 305, 320 and 321
and completion of General Education.

Notes
May include field trips.

GEOL 406 - Seminar in Earth and Environmental Science

Credits: 3
Students read, discuss research literature; produce, present original papers.

Prerequisites
90 credits.

Notes
Capstone seminar for Earth and environmental science majors.

GEOL 408 - Practicum for Geology Laboratories

Credits: 1
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisites
Geology major with 80 credits, and permission of department chair.
GEOL 409 - Practicum for Geology Laboratories

Credits: 1
Studies techniques to make geology lab effective component in geological education. Discusses developing testing materials, supplemented by experience operating geology course lab section.

Prerequisites
Geology major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 3

GEOL 410 - Research Proposal Preparation

Credits: 1
Prepares students for research in GEOL 411. Includes literature research, initial data collection, and preparing research proposal.

Prerequisites
Geology or Earth science major with 80 credits, and permission of department chair.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

GEOL 411 - Geological Research

Credits: 3
Geological research: data collection and reduction, interpretation, preparation of written report, and oral presentation of results.

Prerequisites
GEOL 410.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

GEOL 412 - Physical Oceanography

Credits: 3

GEOL 417 - Geophysics

Credits: 3
Basic principles of geophysics including gravity, magnetism, and seismic reflection and refraction.
Prerequisites
GEOL 101, MATH 113, and one year of physics; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 420 - Earth Science and Policy

Credits: 3
Discusses Earth science issues that have policy implications. Course uses a broad definition of Earth science, from atmosphere to geosphere. Course taught seminar-style, with emphasis on discussion, reading, writing, critical analysis, and student oral presentations.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion of or concurrent enrollment in all other required general education courses; completion of at least 18 credit hours in major or minor (geology, Earth science, ocean and estuarine science, or global and environmental change), and one of the following social science-based courses: EVPP 361, ECON 103, ANTH 114, GGS 103, GLOA 101, GOVT 132 or 133, HIST 125 or 130, SOCI 101, 102, or 120.

Notes
Course may include field trips.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 458 - Chemical Oceanography

Credits: 3
The world’s oceans, including a variety of closed basins and estuaries, comprise a complex and dynamic system of chemical processes that interact with biological, geological, physical, and atmospheric processes to play a significant role in defining the earth’s fragile environment. This course will present an overview of the origin, occurrence, and distribution of the chemical components in sea water and an introduction to the basic principals of the chemical processes taking place in the marine environment.

Equivalent to CHEM 458

Prerequisites
CHEM 212, and CHEM 321 or GEOL 309

GEOL 480 - Internship

Credits: 1-3
Approved study programs with specific employers.
Prerequisites
Open only to majors with 90 credits.

Notes
Contact department one semester before enrollment.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GEOL 500 - Selected Topics in Modern Geology

Credits: 1-3
Topic designated in class schedule.

Prerequisites
Baccalaureate degree in geology, or permission of instructor.

Notes
Lecture, lab, field trip.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 501 - Selected Topics in Modern Geology

Credits: 1-3
Topic designated in class schedule. Lecture, lab, field trip.

Prerequisites
Baccalaureate degree in geology, or permission of instructor.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GEOL 503 - Special Topics in Earth Science

Credits: 1-6
In-service course to strengthen and update knowledge of Earth science.

Prerequisites
Employment or anticipated employment as Earth science teacher.

Notes
May include field trips.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
GEOL 601 - The Lithosphere

Credits: 3
Global-scale overview of lithosphere, solid non-living Earth, materials, cycles, plate tectonic and geomorphic processes; and history, including interactions with and history of hydrosphere, atmosphere and biosphere, and methods of analysis.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 613 - Environmental Geochemistry and Mineralogy

Credits: 3
Explores hot topics and aids students in developing intellectual skills to identify key research problems. Students will also improve their writing and presentation skills.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GEOL 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6
Program of studies designed by discipline director and approved by doctoral committee that allows student to participate in current research of discipline director and results in paper reporting student's original contributions.

Prerequisites
Admission to PhD in education program to study geology.

Notes
Enrollment may be repeated.

German

Placement: See the Academic Testing section in the Admission chapter.

See also FRLN course listing.

GERM 101 - Elementary German I
Credits: 3
Designed for students with no knowledge of German. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for GERM 101 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GERM 102 - Elementary German II

Credits: 3
Continuation of GERM 101.

Prerequisites
GERM 101, or permission of department.

Notes
Lab work required. Students may not receive credit for GERM 102 and GERM 105 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GERM 110 - Elementary German

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for GERM 110 and GERM 101, 102, or 105.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

GERM 201 - Intermediate German I

Credits: 3
Further development of skills in listening, speaking, reading, and writing.

Prerequisites
GERM 102 and 105, appropriate placement score, or permission of department.

Notes
GERM 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for GERM 201 and GERM 210.
GERM 202 - Intermediate German II

Credits: 3
Applies skills to reading, composition, and discussion.

Prerequisites
GERM 201, appropriate placement score, or permission of department.

Notes
Lab work required. Students may not receive credit for GERM 202 and GERM 210.

GERM 210 - Intermediate German

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of German speaking regions.

Prerequisites
GERM 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for GERM 210 and GERM 201 or 202.

GERM 250 - Gateway to Advanced German

Credits: 3
Integration of advanced intermediate-level German reading, writing, listening, and speaking skills, and the development of critical thinking about authentic texts from around the globe.

Prerequisites
GERM 210, appropriate placement score, or permission of department.

Notes
Taught in German
GERM 301 - Culture and Civilization

Credits: 3
Covers development of German civilization from 18th century to present. Includes German cultural contributions to world civilization.

Prerequisites
60 credits, or permission of instructor.

Notes
Taught in English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 310 - Conversation and Composition

Credits: 3
Develops fluency in speaking and proficiency in writing German through discussion, reports, and compositions based on texts dealing with contemporary events and issues.

Prerequisites
GERM 250, appropriate placement score, or permission of instructor.

Notes
Not for native speakers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 316 - German for the Business World

Credits: 3
Introduces terminology and structural features of business German. Emphasizes acquiring vocabulary and developing facility in reading German business articles and correspondence.

Prerequisites
GERM 250, appropriate placement score, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 318 - Translation of Texts
Credits: 3
Introduces principles and techniques of translation. Translation of texts from the natural and social sciences, current events, and contemporary culture.

Prerequisites
GERM 250 or equivalent; appropriate placement score; or permission of instructor.

Notes
Translations mainly from German into English.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 325 - Major Writers

Credits: 3
Works of major German, Austrian, and Swiss writers in translation.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Writers to be studied vary. Course work in English. May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 340 - Survey of German Literature

Credits: 3
Overview of history of German literature to 1880.

Prerequisites
GERM 250, appropriate placement score or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 355 - Readings in Poetry

Credits: 3
Intensive reading of German poetry in its historical context. Studies genre characteristics and development.

Prerequisites
GERM 250, appropriate placement score or permission of instructor.
Notes
Types of poetry studied vary. May be repeated for credit when subject is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 365 - Readings in Narrative Prose

Credits: 3
Intensive reading of German narrative prose, such as autobiographical fiction, fairy tales, and film. Studies genre characteristics and development.

Prerequisites
GERM 250, appropriate placement score or permission of instructor.

Notes
Topics vary. May be repeated for credit when subject is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 375 - Readings in Drama

Credits: 3
Intensive reading of German dramas in their historical context. Study of genre characteristics and development, including performance aspects. Genre varies; may be historical drama, radio play, or epic theater.

Prerequisites
GERM 250, appropriate placement score, or permission of instructor.

Notes
May be repeated for credit with permission of department when subtitle differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 415 - Advanced Grammar and Style

Credits: 3
Studies syntax, idiomatic features, and levels of style. Extensive practice in different types of written expression.

Prerequisites
15 credits of German or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GERM 418 - Advanced Composition

Credits: 3
Develops proficiency in writing German through intensive practice in preparing guided and original compositions.

Prerequisites
15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 442 - The Age of Goethe

Credits: 3
Major works of Enlightenment, Sturm und Drang, Classicism, and early Romanticism. Emphasizes drama and poetry by Goethe and Schiller, with additional works by Lessing, Kleist, and other important writers of the era.

Prerequisites
15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 444 - The Literature of Romanticism

Credits: 3
German Romantic poetry and prose. Background and some theory included.

Prerequisites
15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 450 - Modern Literature: 1880-1925

Credits: 3
Literature of Naturalism, Impressionism, and Expressionism in Germany, Austria, and Switzerland.

Prerequisites
15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GERM 451 - Modern Literature: 1925 to the Present

Credits: 3
Literary trends since 1925 in Germany, Austria, and Switzerland.

Prerequisites
15 credits of German, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GERM 480 - Special Topics

Credits: 3
Special topics on language, literature, or culture by theme, approach, or era.

Prerequisites
15 credits of German, or permission of instructor.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Global Affairs

GLOA 101 - Introduction to Global Affairs

Credits: 3
Surveys wide range of global topics: previous periods of globalization, international organizations and law, transnational corporations and global economy, immigration and refugees, world environmental concerns, world culture, war and peace, paradoxical presence of nationalism and fundamentalism in global world, and antiglobalization movement.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 480 - Study Abroad
Credits: 1-6
Study abroad under supervision of Mason faculty. Course topics, content, and locations vary.

Notes
May be repeated with permission of department for maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

GLOA 490 - Independent Study in Global Affairs

Credits: 1-6
Reading or research on specific topic related to globalization, under direction of faculty member.

Prerequisites
Global affairs majors with 90 credits, GLOA 101, and permission of instructor.

Notes
At least one written paper required. Course may involve combination of reading assignments, tutorials, presentations, or off-campus activities. May be repeated for credit up to total 6 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 1-3

GLOA 495 - Global Experiential Learning

Credits: 1-18
On-the-job training in transnational or international fields through approved internship programs.

Notes
Enrollment and credits controlled by Global Affairs Program. Contact Global Affairs Program one semester before planned enrollment.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GLOA 600 - Global Competencies

Credits: 3
Explores the nature of globalization. Students will understand the characteristics of the current global system; be familiar with key global issues and debates; have an advanced understanding of and appreciation for organizations, languages, cultures in many global contexts; and be better habituated to thinking across disciplinary lines.

Hours of Lecture or Seminar per week: 3
GLOA 610 - Economic Globalization and Development

Credits: 3
Focuses on the intersection of countries and firms in the arenas of international trade, investment and finance, as the lenses into understanding better today’s “global” economy: countries of differing levels of economic development and economic system structure, factors of monetary union and currency disequilibria, trade liberalization or protectionism, market entry, cross-border variables, risk and relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 620 - Human Systems

Credits: 3
Examines the human dimensions relative to international educational systems and their relationship to basic education and higher education policy, research policy, science and technology, culture, language, social justice, equity, conflict and peace, human resources and national development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 710 - Seminar Abroad

Credits: 3
Intensive program in a foreign setting focusing on a deep overview of the research specialization of the supervising faculty member. Required pre-departure component to set the intellectual, logistical and culture terms of the abroad period. Locations vary from year to year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GLOA 720 - Capstone Research Seminar

Credits: 3
Provides students with the opportunity to engage in significant original research an analysis of a topic in global affairs. Topics vary from year to year.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Global and Community Health
GCH 205 - International Health

Credits: 3
Examines cross-cultural values in health and nutrition, exploring health- and nutrition-related problems that afflict populations throughout the world and efforts to achieve optimal health for all. Introduces nutrition and health concerns from variety of cultures and considers population dynamics, vital statistics, global disease patterns, and cultural variations. Includes lectures, discussion, video presentations, oral presentations, and web research.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 210 - African American Health

Credits: 3
Overview of diseases and health behaviors disproportionately affecting African Americans. Addresses health disparities linked to infectious and chronic disease and mental health factors affecting this population.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 295 - Nutrition for Health Professionals

Credits: 3
Introduces nutrition science, emphasizing macro- and micronutrients in body, digestion, energy metabolism, weight loss, fitness and nutrition, prevention of chronic diseases, nutrition therapy, and nutritional assessment. Problem-solving and critical-thinking methodologies used in group presentations that address nutrition-related case studies. In-class activities, outside readings, and class discussion reinforce concepts. Students use computer-based diet analysis to evaluate personal dietary intakes.

Prerequisites
One semester of science or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 300 - Introduction to Public Health

Credits: 3
Addresses population-focused health care and examines concepts of community and public health, and health policies affecting U.S. populations. Emphasizes primary, secondary, and tertiary levels of prevention related to health problems/diseases.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 310 - Health Behavior Theories

Credits: 3
Introduces health behavior from a global perspective. Various theoretical models are evaluated for understanding health and illness behavior. Case studies examine the nature of health from planning, implementing, and evaluating programs to prevention and treatment of health programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 332 - Health and Disease

Credits: 3
Introduces epidemiology, health promotion, and disease prevention, and effect on health status of culturally diverse and vulnerable individuals, families, small groups, and communities. Focuses on health problems and potential interventions throughout life span, and incorporates principles of teaching and learning as they apply to health professionals.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 350 - Health Education

Credits: 3
Enables students to survey health and wellness issues related to their personal profile and explore options in reducing personal risk factors. Students define health in context of family, environment, culture, society, and life span. By examining, comparing, and using various methods of health-risk appraisal and assessment tools, students plan health education and promotion projects for targeted populations. Stresses motivational strategies for improving and maintaining health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 360 - Health and Environment

Credits: 3
Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels.

Prerequisites
Statistics course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 405 - International Health Policy and Practice

Credits: 3
Examines the development and implementation of international health policies and programs. Develops planning and communication skills. Emphasizes infectious disease, maternal and child health, and nutrition.

Prerequisites
GCH 205, International Health

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 411 - Health Program Planning

Credits: 3
Addresses process of program planning, development, and fundamental evaluation principles for health promotion programs. Focus on development of clear, concise objectives leading to design and evaluation of effective primary, secondary, and tertiary prevention strategies.

Prerequisites
GCH 332, 350

Corequisite
GCH 310 or instructor approval

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 412 - Fundamentals of Epidemiology

Credits: 3
Explores health research methods for measuring population health, designing and implementing observational and experimental studies, reading health science publications, and applying research findings to global and community health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 420 - Strategies for Nutrition Education

Credits: 3
Examines methods and techniques for educating individuals about nutrition. Addresses nutrition education issues from variety of populations with respect to culture, age, religion, and specific disease states.

Prerequisites
GCH 295 or permission of instructor.
GCH 421 - Community Nutrition

Credits: 3
Focuses on nutrition and health problems of specific community settings, and examines practices of nutrition services in various communities.

Prerequisites
GCH 295 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

GCH 422 - Nutrition throughout the Life Cycle

Credits: 3
Focuses on nutrient needs and food habits throughout life cycle. Emphasizes nutrient needs prior, during, and after pregnancy, and nutritional requirements of infants, children, adolescents, adults, and elderly.

Prerequisites
GCH 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 423 - Nutrition and Chronic Illnesses

Credits: 3
Examines nutrient needs related to specific chronic illnesses, including cardiovascular disease, cancer, obesity, and diabetes. Focuses on principles of nutritional therapy and prevention.

Prerequisites
GCH 295 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 445 - Social Determinants of Health

Credits: 3
Examine the social determinants of health and the application of this framework to social work and public health policy and
practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities.

Equivalent to SOCW 445

**Prerequisites**
45 credits or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**GCH 450 - Culture, Sexuality and the Global AIDS Epidemic**

Credits: 3  
Examines how the cultural values and mores regarding sexuality shape HIV/AIDS social policy and how these values and mores facilitate and hinder prevention and care efforts. Also examines several sexuality-related topics that interface with culture (e.g., gender, the sex industry, homosexuality) and the effectiveness of prevention and care initiatives around such issues as condom use, blood donation restrictions, immigration laws, sex education, and HIV testing.

**Prerequisites**
BIOL 301: (HIV/AIDS topic only) or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GCH 460 - Program Evaluation**

Credits: 3  
This introductory research course is designed to present basic concepts and methods of public health research. Emphasis is placed on critique and use of current community and public health research methods.

**Prerequisites**
STAT 250 or equivalent

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GCH 466 - Nutrition and Weight Management: Obesity, Anorexia, and Bulimia**

Credits: 3  
Focuses on the physiological, emotional, genetic, and societal and cultural factors that influence the relationship between eating and weight regulation.

**Prerequisites**
GCH 295, GCH 332, or approval of instructor.
GCH 480 - Health Maintenance and Health Aspects of Aging

Credits: 3
Studies physiological and psychological factors that influence health and have implications for preventive measures in disease and health disorders. Examines nutrition, nature of health problems, and methods of assessing physical and psychological needs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 494 - Special Topics in Global and Community Health

Credits: 3
Selected topics analyzing specialized areas in global and community health.

Notes
Content varies. Lecture, seminar, laboratory, workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 496 - Violence in Today's Society

Credits: 3
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process.

Equivalent to NURS 496

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 498 - Global and Community Health Internship

Credits: 6
Provides advanced students with the opportunity to apply community health knowledge while working under the supervision of a community preceptor in a local health organization. Students submit an application to the GCH internship coordinator the semester prior to enrollment for review. Students who have demonstrated academic excellence will receive priority internship placement.

Prerequisites
GCH 332, GCH 350, and GCH 411; permission of instructor; junior or senior status.
Notes
Open to community health majors only. Students are required to work a minimum of 224 hours during the semester they take the internship. This course provides for experiential learning in a community health organization under the direction of a faculty advisor and a preceptor in the community health organization. Students are expected to understand the roles and functions of the community health organization and complete a project approved by the faculty advisor and the preceptor.

The internship elective may be taken in lieu of two 3-credit elective courses by junior or senior GCH students. The course requires a weekly two-hour seminar and 15-20 hours per week of work in a community health organization.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 15-20  
**When Offered:** Fall, Summer, Spring

---

**GCH 499 - Independent Study in Global and Community Health**

Credits: 1-6  
Provides individual study of a particular problem area in global and community health research, theory development, or education under the direction of faculty.

**Prerequisites**
Permission of instructor

**Notes**
May be repeated for maximum 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**GCH 502 - U.S. Role in Global Health, Nutrition, and Population**

Credits: 3  
The course will cover U.S. history in responding to health, nutrition, and population challenges worldwide; examine current programs in each area, including those of the U.S. government and nongovernmental organizations, foundations, and the private sector; and examine future directions for responding to health, nutrition, and population trends.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GCH 506 - Clinical Exercise Physiology**

Credits: 3  
Examines acute and chronic alterations, adaptations associated with exercise and training. Covers role of exercise therapy in preventing and rehabilitating from disease across lifespan. Particular emphasis on role of exercise therapy in cardiorespiratory, musculoskeletal, and metabolic diseases.

**Prerequisites**
Bachelor's degree, and 8 credits in anatomy and physiology; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 510 - Scientific Basis for Pain, Fatigue, and Suffering in Chronic Illness and Disability**

Credits: 3  
Reviews the scientific literature describing the theories of the initiation and perpetuation of pain, fatigue, and suffering. Describes the methodologies used to evaluate these symptoms. Students will apply the theories of pain, fatigue, and suffering and will further their understanding of specific clinical problems.

**Prerequisites**  
STAT 250 or equivalent

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 520 - Global Health Perspectives on Alcohol**

Credits: 3  
Using a multidisciplinary approach, this course will investigate the impact of beer and wine in health and society from a global perspective. Caters to students interested in understanding the intersections of food science, culture, history, and public health.

**Prerequisites**  
Must be at least 21 and have basic chemistry and/or microbiology

**Notes**  
Will include off campus field trips.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 530 - Nutrition: A Global Perspective**

Credits: 3  
Examines malnutrition and how it occurs by looking at several situations from around the world. Covers how nutrition can affect society and community, and examines benefits of well-nourished population.

**Notes**  
For students from a variety of disciplines.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GCH 543 - Global Health: Trends and Policies

Credits: 3
Covers today's health challenges and their various social, economic, and epidemiological causes; role and likely success of information and technology transfer; primary preventive health care; social awareness; and intervention in alleviating problems.

Notes
Lecture, discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 550 - Introduction to Rehabilitation Science

Credits: 3
Introduces the field of rehabilitation science. In addition, the roles of various specialties (including physiatry, occupational therapy, physical therapy, speech pathology, psychology, vocational counseling, and engineering) in rehabilitation science will be examined.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 551 - Research Methods in Rehabilitation Science

Credits: 3
Explores quantitative and qualitative research methods used in rehabilitation science. Designed to assist in development of basic theoretical and practical knowledge of methodological principles and techniques necessary for implementation of research endeavors.

Corequisite
GCH 601 or graduate course in applied statistics

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 555 - Human Biology

Credits: 3
Provides an overview of the biological aspects of disease processes, with emphasis on the pathophysiology of common diseases and public health measures for the prevention and control of disease in populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GCH 560 - Environmental Health

Credits: 3
Examines principles and methods, risk factors, prevention and control, and policies related to the aspects of human health determined by biological, physical, and chemical factors in the environment at the local, regional, and global levels.

Prerequisites
An undergraduate community health course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 566 - Nutrition and Weight Management

Credits: 3
Focuses on the physiological, emotional, genetic, and societal/cultural factors that influence the relationship between eating and weight regulation.

Prerequisites
GCH 295 or other introductory nutrition course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3
Overview of HIV disease, including retrospective and current concepts and analyses, global and societal effect, and cutting-edge research. Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community, and issues of increasing dilemma for health care professionals.

Equivalent to NURS 571

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 583 - Food and Culture: Biocultural Perspectives on Food and Nutrition

Credits: 3
Examines food and eating behaviors, diet, and nutrition from cross-cultural perspective. Focuses on how and why people choose what to eat, range and significance of cross-cultural variability in diet, how diets have changed, and health and social implications of those changes. Lecture, discussion, video presentations, audiovisual aids, student presentations, and case study analyses.

Prerequisites
GCH 295 or permission of instructor.
GCH 585 - Care Management of Persons with Alzheimer's Disease and Related Disorders

Credits: 3
Focuses on caring for people with dementing illnesses in acute, community, and long-term care settings. Discusses strategies for managing and evaluating care provided by family caregivers and allied health personnel.

GCH 590 - International Health Organizations

Credits: 3
Directed at students in the global health concentration. Examines inner workings of international health organizations such as WHO, PAHO, Red Cross, Red Crescent, USAID, UNICEF, Doctors without Borders, and the World Bank. Primary concern is on organizations focused on health prevention and promotion, disease remediation, and epidemiology. Explores goals and mechanisms of these international health organizations and the mission, roles, procedures, funding sources, and evaluation of effectiveness in global community.

GCH 594 - Special Topics in Health Care

Credits: 3
Selected topics analyzing specialized areas in health care.

Equivalent to HAP 594/NURS 594

Notes
Content varies. Lecture, seminar, laboratory, and workshops.

GCH 601 - Introduction to Biostatistics

Credits: 3
Applies selected biostatistics techniques to public health and health system management issues. Includes univariate and bivariate statistics, and regression analysis.
GCH 602 - Global Health Issues Related to Violence

Credits: 3
Explores worldwide view of violence and its impact on health. Examines biological, psychological, and social determinants of violence. The epidemiology of violence is examined with special attention to collective violence, youth violence, abuse and neglect of children and the elderly, intimate partners, sexual violence, self-directed violence, and transgenerational violence. Preventive approaches attempted to help reduce the prevalence of violence will be addressed.

Prerequisites
Admission to a graduate program or permission of instructor.

GCH 605 - Social Epidemiology

Credits: 3
Students will learn the basic foundations of social epidemiology and learn how they can apply these principles to the global community and their own professions. Throughout the course, students will explore the health-enhancing and health-deteriorating effects of social factors, with special emphasis on the personal social environment. They will also examine the effect of macrosocial variables, such as socioeconomic status, cultural traditions, lifecycle stages, and circumstantial changes, such as migration and relocation on health and well-being.

GCH 610 - Foundations of Health Education and Behavior

Credits: 3
Introduces students to the fundamentals of social and behavioral sciences, emphasizing current health behavior theories and models. Students develop an understanding of the theoretical and scientific basis of health promotion/health education interventions and develop community need and asset assessment skills.

GCH 611 - Health Program Planning

Credits: 3
Addresses the process of program planning, development, and fundamental evaluation principles, emphasizing health promotion programs. The focus is on development of clear and concise objectives leading to the design of effective primary, secondary, and
tertiary prevention strategies.

Corequisite
GCH 610

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

GCH 620 - Psychosocial Aspects of Rehabilitation

Credits: 3
Explores social and psychological impacts of disability. Processes by which people with disabilities adapt to limitations will be examined, as will the influence society has in promoting independence/dependence among people with disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 622 - Mental Health: A Public Health Perspective

Credits: 3
An introduction to mental health and mental disorders; a critical view of national and international classification of disorders; an introduction to public health perspectives on mental health and mental disorders; and a review of cultural factors related to public health dilemmas and services, locally, regionally and in the global community, from a bio-psycho-social perspective.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

GCH 637 - Normal Aging and Health Deviations

Credits: 3
Examines biopsychosocial aspects of aging. Examines effects of age changes and health deviations on functional capacity of older persons and interventions and promotion of the elderly's capacity for self care.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 659 - Health Care of Aging Persons with Chronic Illnesses

Credits: 3
Focuses on biological, psychological, and sociocultural aspects of aging and chronic illness. Examines functional capacity and capacity for self care.

Prerequisites
GCH 637.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 680 - International Research Ethics and Methods

Credits: 3
Prepares students to conduct global and community health research. Discusses ethical issues in international health research. Develops plans for identifying a research project, collecting and analyzing data, and reporting results of international health research.

Prerequisites

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 690 - Independent Study

Credits: 1-3
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

Notes
May be repeated for a maximum of 3 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GCH 691 - Project Management in Public Health

Credits: 3
Course examines project management roles and environments, the project lifecycle and various techniques of work planning, and control and evaluation to achieve project objectives. Emphasizes leadership, communication, grant writing and ethics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 701 - Program Evaluation

Credits: 3
Examines the methods used by public health professionals to determine whether and how a particular health-related program "works". Process and outcomes evaluation will be covered. Skills and knowledge relevant to evaluation strategies will be addressed, including the fundamentals of study design, how to frame evaluation questions, and understanding basic quantitative
and qualitative analysis techniques for assessing program process and effects.

Prerequisites
GCH 601, GCH 611, and GCH 712 or Instructor Permission.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

GCH 702 - Biobehavioral Aspects of Health

Credits: 3
Examines the biological, psychological, and social factors that interact with and affect efforts people make in promoting good health and preventing illness and the recovery, rehabilitation, and psychosocial adjustment of patients with serious health problems.

Prerequisites
GCH 601, research methods course or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 710 - Principles of Applied Physiology I

Credits: 3
Examines the primary bio-regulatory and communication systems. Part one of a detailed study of physiology for graduate students interested in health and human movement, chronic illness, and disability.

Prerequisites
One-year introductory biology sequence with labs or two-semester course sequence in anatomy and physiology.

Notes
General chemistry recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 711 - Principles of Applied Physiology II

Credits: 3
Explores general systemic function. Part II continuation of a detailed study of physiology for graduate students interested in health and human movement, chronic illness, and disability.

Prerequisites
GCH 710

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**GCH 712 - Introduction to Epidemiology**

Credits: 3

Introduction to epidemiology and health service research as body of knowledge and a method for analyzing health problems. Students learn the role of health services research and epidemiology in policy and evidence-based management and clinical practice. Students design experiments, analyze secondary data, and evaluate impact of programs on health outcomes.

**Prerequisites**
HAP 730 or comparable other as approved by instructor. Only one of GCH 712 or 714 can be taken for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 714 - Epidemiology for Nursing Practice**

Credits: 3

Targeted at students in the doctor of nursing practice program, this course provides an introduction to epidemiology as a body of knowledge and a method for analyzing health problems. Students use analytic methods to critically appraise existing literature, design and implement evaluation processes, collect and analyze data, and apply relevant findings to the practice environment.

**Notes**
Only one of GCH 714 or GCH 712 can be taken for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 722 - Infectious Disease Epidemiology**

Credits: 3

Infectious disease epidemiology is the study of the distribution and determinants of infectious diseases in populations. Covers agent, host, and environmental characteristics; the infectious transmission process; epidemiological study, design, and analysis; surveillance, outbreak investigation, and disease control; and advanced techniques such as mathematical modeling and spatial analysis.

**Prerequisites**
GCH 712

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 726 - Advanced Seminar in Epidemiology**

Credits: 3

Develops epidemiological skills through completion of an original research project. Focuses on epidemiological methodology
and analysis, critical review of the literature, and scientific writing.

**Prerequisites**
GCH 601, GCH 712, or equivalent and advanced epidemiology course and permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GCH 732 - Chronic Disease Epidemiology

Credits: 3  
Focuses on the epidemiology of chronic diseases, including cancers, cardiovascular and lung diseases, and mental health disorders. Emphasizes study design, critical reading, and public health approaches to disease control, such as surveillance and screening.

**Prerequisites**
GCH 712 or approved epidemiology course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GCH 740 - Applied Physiology: Cardiorespiratory System

Credits: 3  
Rigorous, evidence-based study of biological factors and medial conditions that limit oxidative metabolic function. Emphasis on examining current hypotheses of physical activity limitations in chronic illness and disability.

**Prerequisites**
GCH 506 or EFHP 610 or other graduate physiology course, plus one of the following: two-semester course sequence in anatomy and physiology (100 level or above) or one course in animal or comparative physiology (300 level or above) or one course in human physiology (300 level or above).

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GCH 745 - Metabolic Basis of Disability

Credits: 3  
Examines anatomy and physiology of organs and systems involved in regulating metabolism; assesses relationships among hormonal and central nervous system regulation in the production and regulation of energy.

**Prerequisites**
Undergraduate level anatomy and physiology.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GCH 746 - Musculoskeletal System and Disability

Credits: 3
Explores anatomy and physiology of musculoskeletal system, and its relationship to human motion; evaluates movement with respect to central and peripheral nervous systems; familiarizes students with human motion and differences in normal and disabled populations.

Prerequisites
Undergraduate-level anatomy, physiology, and calculus

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 751 - Nutritional Assessment, Monitoring, and Surveillance

Credits: 3
Introduces students to methods and tools used in assessing nutritional status and the practice and application of these to monitoring among individuals and population groups. Methods of interpretation of nutrition-related information will be examined.

Prerequisites
GCH 530 or approved graduate nutrition course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 752 - Nutritional Epidemiology

Credits: 3
Introduces students to the principles of epidemiology and their application to nutrition. Examines the methodologies and interpretation of dietary assessment and the design, conduct, analysis, and interpretation of epidemiologic studies related to nutrition, particularly the relationship between nutritional status, diet, and disease.

Prerequisites
GCH 712

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 760 - Rehabilitation Science Colloquium

Credits: 1
Public forum for the presentation and discussion of contemporary issues in the field of rehabilitation science.
Prerequisites
Enrollment in PhD program in Rehabilitation Science or permission of the graduate director.

Notes
May be repeated for credit; however a maximum of three credits may be applied to the rehabilitation science Ph.D.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

GCH 761 - Aging and Health Behavior

Credits: 3
Examines age-related changes in health and health behavior along with the impact of structural factors, societal, and personal attitudes toward aging. The successful aging paradigm will frame discussion of strategies for facilitating optimal health behaviors.

Prerequisites
A graduate level course in psychology or research methods.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

GCH 770 - Gerontology Practicum I

Credits: 3
Field practicum in gerontology, emphasizing applying gerontological knowledge in designated facility and developing skills to function in service organization for aging. Includes problem identification and analysis, project development, and practical experience under supervision of qualified professional. Students collaborate with preceptor to develop useful project based on organizational and client needs. Uses case study analyses to explore problem-solving approaches in variety of situations and health care or service organizations.

Prerequisites
All core course work; corequisite for gerontology majors: health services research for MS in health science.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

GCH 771 - Gerontology Practicum II

Credits: 3
Gerontological theoretical concepts applied in implementation and evaluation. Uses case study analyses to explore problem-solving approaches.

Prerequisites
GCH 770

Notes
Continuation of field practicum in gerontology. Students receive practical experience under supervision of qualified professional. Emphasizes implementation of approved project.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 3

### GCH 788 - Public Health Research I

Credits: 3  
Provides students with skills to develop their research proposal, conduct their research goals, and complete their master's thesis, which will be completed in Public Health Research II.

**Prerequisites**  
Completion of all core courses for GCH Master's degree

**Notes**  
Course restricted to graduate students in GCH. Repeatable to maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GCH 789 - Public Health Research II

Credits: 3  
Provides students with skills to complete their research projects and write the master's thesis.

**Prerequisites**  
GCH 788.

**Notes**  
Repeatable to maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### GCH 790 - Practicum in Public Health

Credits: 3  
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the organization.

**Prerequisites**  
Students must complete all of the core MPH coursework (epidemiology, biostatistics, health education, environmental health, and public health administration) and pass the MPH comprehensive exam with a 70% or better.
**GCH 795 - Special Topics in Global and Community Health**

Credits: 1-3  
Advanced special topics course to address in-depth study of contemporary areas of global and community health insufficiently covered in other courses.

**Prerequisites**  
Must be enrolled in a graduate program and have permission of the instructor

**Notes**  
Fulfills elective requirement for MS in global health degree and global health certificate program. Topics vary. May take up to 6 credits within their degree program.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**GCH 798 - Practicum in Public Health I**

Credits: 3  
Provides students with supervised experience in an identified public health organization. Students will explore the structure, functions, and activities of the public health organization and understand its relationships to improving health from a global perspective.

**Prerequisites**  
Completion of the global health core curriculum.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 8

**GCH 799 - Practicum in Public Health II**

Credits: 3  
Provides students with an in-depth supervised experience in an identified public health organization. Provides students the opportunity to complete a project related to an actual public health issue that is a focus within the organization.

**Prerequisites**  
GCH 798.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 8

**GCH 804 - Advanced Quantitative Data Analysis for Health Care Research I**
Credits: 3
Examines factorial ANOVA, factorial ANCOVA, repeated measures ANOVA, ANOVA and ANCOVA via regression approach, and multiway frequency analysis. Students apply mathematical calculations and interpret SPSS outputs using health care research data.

Equivalent to NURS 804

Prerequisites
A graduate level statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 805 - Advanced Quantitative Data Analysis for Health Care Research II

Credits: 3
Examines multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multiple regression (ordinary least squares), and logistic regression. Students apply mathematical calculations and use linear combinations of multivariate tests in health care research data.

Equivalent to NURS 805

Prerequisites
GCH/NURS 804 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research

Credits: 3
Examines canonical correlation, discriminant analysis, factor analysis and causal analysis (path models and structural equation modeling). Students analyze and interpret data using these statistical techniques.

Equivalent to NURS 806

Prerequisites
GCH/NURS 805 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GCH 807 - Measurement Theories and Applications in Health Care Research

Credits: 3
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item
analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research.

Equivalent to NURS 807

**Prerequisites**
Doctoral-level course in research design and statistics. Completion of GCH/NURS 805 or 806 is highly recommended

**Notes**
Completion of GCH/NURS 805 or GCH/NURS 806 is highly recommended.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GCH 808 - Outcomes Measurement in Rehabilitation Science**

Credits: 3  
Examines the principles of measurement applied to both assessment and outcome measures commonly used in rehabilitation. The student will become familiar with the state of outcomes research in the field of rehabilitation science.

**Prerequisites**
GCH 550 and GCH 551

**Hours of Lecture or Seminar per week:** 3

**GCH 940 - Independent Study**

Credits: 1-6  
In-depth study of selected area of health under the direction of faculty.

**Prerequisites**
Enrollment in PhD program and permission of instructor

**Notes**
May be repeated as needed, up to a maximum of 24 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**GCH 999 - Dissertation Research**

Credits: 1 to 9  
Dissertation research on a specific topic under the direction of a faculty member.

**Prerequisites**
Enrollment in PhD program in rehabilitation science or permission of graduate director
Notes
May be repeated, up to a maximum of 24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Government and International Politics

GOVT 101 - Democratic Theory and Practice

Credits: 3
Comparative exploration; topics include contemporary analysis of the meanings of liberty, equality, representation, property rights, voting rights, and civil responsibilities.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 103 - Introduction to American Government

Credits: 3
American government examined in light of basic concepts and institutions of democracy. Includes citizenship project, a first-hand observation or participation in and analysis of some public activity.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 132 - Introduction to International Politics

Credits: 3
Nature of international politics, approaches to study of international politics, state and nonstate actors in international system, patterns of action and interaction between nation-states, international institutions, and major global issues.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 133 - Introduction to Comparative Politics

Credits: 3
Discusses methods and subject matter of comparative political analysis. Includes political systems, politics, participation in politics, government structures, policy-making process, and evaluation of political performance.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 300 - Research Methods and Analysis

Credits: 4
Emphasizes asking clear, researchable questions and using appropriate evidence to answer them. Introduces broad range of evidence including quantitative and qualitative information. Studies design and analysis of surveys, government archives, case studies, and interpretations of events in journals. Examines ethical implications of information technologies.

Satisfies General Education Requirement: Information technology (IT, all)

Notes
Required for all majors in government and international politics, and public administration. Strongly recommended before or during first semester of enrolling in 300-level courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

GOVT 301 - Public Law and the Judicial Process

Credits: 3
American judicial organization and operation, role of the Supreme Court in policy formation, and selected constitutional principles.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 304 - American State and Local Government

Credits: 3

Prerequisites
GOVT 103.
Notes
Students may not receive credit for GOVT 204 and 304.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 305 - Contemporary American Federalism
Credits: 3
Legal, administrative, fiscal, and political dimensions of evolving American federalism.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 307 - Legislative Behavior
Credits: 3
Organization, processes, functions, and roles of legislature and U.S. Congress members. Topics include state legislatures and cross-national comparisons as time and resources permit.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 308 - The American Presidency
Credits: 3
Survey of modern presidency, including constitutional origins of office, growth and influence of White House staff, Cabinet, presidential appointees and control of executive branch, relations with Congress, and domestic and national security policy making.

Prerequisites
GOVT 103

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 309 - Government and Politics of Metropolitan Areas
GOVT 310 - Government, politics, and problems of metropolitan centers and surrounding areas.

**Prerequisites**
GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 311 - Public Opinion and Electoral Behavior**

Credits: 3
Studies actions of voters, candidates, and political parties in relation to the expression of relevant public opinion in a democratic system.

**Prerequisites**
GOVT 103 and 300.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 312 - Political Parties and Campaigns**

Credits: 3
Characteristics and functions of political parties, influence of parties and other political forces on electoral decisions, and emphasis on parties' inability or ability to hold government accountable to citizens.

**Prerequisites**
GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 318 - Interest Groups, Lobbying, and the Political Process**

Credits: 3
Role, internal operations, strategies, and activities of interest groups. Evaluates ability of these groups to enable citizens to influence or control government and enhance democratic process. Considers conditions under which social movements become, or fail to become, effective interest groups.

**Prerequisites**
GOVT 103.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
GOVT 319 - Issues in Government and Politics

Credits: 1-3
Studies special issues relevant to government and politics. Topics announced in advance. Examples include politics and the arts, ethnic conflict and the political system, gender politics, and changing dynamics in political institutions.

Prerequisites
GOVT 103.

Notes
May be repeated for credit when topic is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 322 - International Relations Theory

Credits: 3
Advanced inquiry into international relations. Studies theories, concepts of international relations, and major forces and issues in international politics.

Prerequisites
GOVT 132 or 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 323 - Classical Western Political Theory

Credits: 3
Lectures, discussions of developments in Western tradition of political thought from time of Greek city-state to late medieval Christendom. Topics include nature and purpose of politics, relationship between individual and state, political significance of religion and tradition, and concept of natural law.

Prerequisites
GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 324 - Modern Western Political Theory

Credits: 3
Lectures, discussions of developments in Western tradition of political thought from Renaissance to mid-19th century. Topics include rise of individualism in political theory, early developments in social contact theory, theories of radical popular sovereignty, and early criticisms of liberal theory.
Prerequisites
GOVT 101, or 3 credits of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 327 - Contemporary Western Political Theory

Credits: 3
Lectures, discussions of developments in Western tradition of political thought from mid-19th century to today. Different sections focus on various political theories that have been influential during this period, such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought.

Prerequisites
GOVT 101, or 3 credits of philosophy.

Notes
May be repeated for credit when subject matter is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 328 - Non-Western Political Theory

Credits: 3
Theory and history of political community, governance, and development as understood by various non-Western societies, including China, Japan, India, Africa, and Islamic World; relations to Western tradition; methodology of studying other cultures; postcolonial theories; and cultural politics on contemporary globalization.

Prerequisites
GOVT 101 or 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 329 - Issues in Political Theories and Values

Credits: 1-3
Studies special issues relevant to theoretical and value aspects of government and politics. Topics announced in advance. Examples include ethics and politics, ethics and environmental policy, changing perspectives on civil rights and liberties, religion and politics, and changing views of public space.

Notes
May be repeated for credit when topic is different, with permission of department, but no more than 9 credits of GOVT 329 are permitted.
GOVT 331 - Government and Politics of Latin America

Credits: 3
Contemporary political systems of Latin America, with emphasis on institutions, political processes, and political behavior. Presents case studies of several key Latin American politics; discusses problems of political development.

Prerequisites
GOVT 132, 133.

GOVT 332 - Government and Politics of the Middle East and North Africa

Credits: 3
Societies of Middle East and North Africa and their response to impact of internal sociocultural-political determinants and external forces. Focuses on contemporary politics, ideologies, popular manifestations, institutions, and operations.

Prerequisites
GOVT 132, 133.

GOVT 333 - Government and Politics of Asia

Credits: 3
Government structures and political processes of Asian countries. Examines patterns of conflict and cooperation, and issues of economic development and political reform in rapidly changing world.

Prerequisites
GOVT 132, 133.

GOVT 334 - Government and Politics of Europe

Credits: 3
Contemporary democratic political systems of Europe, with emphasis on political processes, institutions, and behavior. Presents case studies of key European policies. Discusses problems of multiparty systems, coalition governments, Eurocommunism, and
stability and change in postindustrial societies.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 336 - Political Development and Change

Credits: 3
Process of political development and change in context of modernization and industrialization. Examines patterns of political development, with emphasis on developing world.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 337 - Ethnic Politics in Western Europe and North America

Credits: 3
Studies resurgence of ethnic nationalism in industrial democracies of Western Europe and North America, and the comparative analysis of policy issues related to ethnonationalism. Case studies drawn from the industrial democracies.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 338 - Government and Politics of Russia

Credits: 3
Examines continuity and change in Russia's Soviet era and post-Soviet era politics and international relations.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 339 - Issues in the Politics of Advanced Industrial Societies
Credits: 1-3
Studies selected current political issues in industrial democracies of Western Europe and North America. Specific topics chosen each semester to reflect contemporary political concerns in these countries, but political process in advanced industrial countries is organizing principle throughout the course.

Prerequisites
GOVT 103 or 133, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 340 - Central Asian Politics

Credits: 3
Comparative examination of political change in Central Asia with attention to national identity formation, political economy, political conflict, political Islam, and democratization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 341 - Chinese Foreign Policy

Credits: 3
Discusses theories and practices of Chinese foreign policy decision making, which are then used to understand China's relations with United States, Japan, Russia, Europe, and its Asian neighbors, and China's policy in issues such as human rights, environmental protection, and nuclear nonproliferation.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 342 - Diplomacy

Credits: 3

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 343 - International Political Economy

Credits: 3
Introduces international political economy. Examines interplay of economics and politics, and applies these to different issues. Focuses on issues of contemporary significance, with attention to historical issues and basic political and economic concepts.

Prerequisites
GOVT 132, 133; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 344 - American Foreign Policy

Credits: 3
Central issues surrounding the conduct of America's foreign relations, with special emphasis on structural and constitutional questions, national policy objectives abroad, and conduct of foreign policy in a democracy.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 345 - Political Islam

Credits: 3
Covers politics of religion in Muslim societies; history, ideology, and practices of key individuals, movements, and institutions; case studies of political Islam in the Middle East, Asia, Africa, and the West; plurality and diversity of political expression in Muslim world; nature of democracy in Islam; and Islamic state.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 346 - American Security Policy

Credits: 3
Approaches U.S. National security policy from perspective of organization and implementation of specific policies. Applies theoretical concerns to historic cases to illuminate problems that continue to challenge country.

Prerequisites
GOVT 132, 133

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 347 - International Security

Credits: 3
Explores enduring security problems and new developments. Examines effects of international system on defense policies of states, particularly tensions of world caught between emerging interdependence and national demands. Encourages development of critical-thinking and group and oral presentation skills.

Prerequisites
GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 351 - Administration in the Political System

Credits: 3
Administrative structures and processes in political setting of public management. Presents organization and administrative theory, critiques, and current practices; and examines impact of changes in social, political, and economic environment on concepts, models.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 355 - Public Personnel Administration

Credits: 3
Analyzes techniques and tools in human resource management including merit system, classification, compensation, evaluation, recruitment, and labor relations. Emphasizes current legal and policy issues in personnel administration, such as diversity and privatization.

Prerequisites
GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 356 - Public Budgeting and Finance

Credits: 3
Covers tools and techniques in budgeting and financial management in U.S. governments, including management of public financial institutions, budgetary process and reform, and relationship of public budgeting to national economic policy.

Prerequisites
GOVT 351.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 357 - Urban Governance and Planning**

Credits: 3  
Framework, subject matter, uses, methods, administration, and future of public planning. Emphasizes setting goals, defining objectives, and choosing between program alternatives. Discusses political and bureaucratic constraints, and problems of implementation. Planning illustrations may be drawn from various levels of government.

**Prerequisites**  
GOVT 351.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 358 - Nonprofit Financial Planning**

Credits: 4  
Provides understanding of social mission and entrepreneurial cross pressures underlying financial planning and accounting in nonprofit sector. Topics include revenue sources and projections, entrepreneurial techniques, and cost analysis for nonprofit and nongovernmental entities. Lectures, student case studies.

**Prerequisites**  
60 credits or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

**GOVT 359 - Computers in Public Management**

Credits: 3  
Applies computers and computer-based analytical techniques to management information needs in public sector. Focuses on mainframe and microcomputer applications.

**Prerequisites**  
GOVT 300.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**GOVT 361 - Introduction to Environmental Policy**
Credits: 3
Environmental politics and policy making since the 1970s. Primarily U.S. focus, with some discussion of global issues. Examines policy strategies and outcomes, ethical and economic debates, political controversies, lawmaking and enforcement, and role of key players.

Prerequisites
30 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 362 - Intermediate Environmental Policy

Credits: 3
Examines environmental issues building on learning objectives from GOVT 361. Focuses on environmental and policy issues in the US and internationally, exploring the politics of nature and the interaction of environmental science and politics and resulting controversy. Risk and uncertainty loom large in most environmental issues. Covers "natural" disasters as well as direct "man-made" problems.

Prerequisites
EVPP 361 or GOVT 361 or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

GOVT 364 - Public Policy Making

Credits: 3
Processes, agencies, and politics involved in the proposal making, implementation, evaluation, and revision of U.S. public policy.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 365 - State and Regional Public Policy

Credits: 3
Examines public policy decisions that affect local and state jurisdictions in context of federal system of government. Examines context, substance, and impact of such policies as housing, transportation, land use, crime prevention, service delivery, and health care.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 366 - Public Policy Analysis

Credits: 3
Methods of public policy analysis, evaluation, and research. Studies design and development of alternative courses of
government action and evaluation of results, and problems in applying systematic analysis to political issues.

Prerequisites
GOVT 300.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 399 - Research Practicum in Public and International Affairs

Credits: 1-3
Applies research methods in context of assisting with faculty research. Individualized sections taught by arrangement with full-
time faculty. Methods adopted vary, but generally include library research, data collection, data analysis, and report construction.

Prerequisites
GOVT 300, and permission of instructor

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

GOVT 407 - Law and Society

Credits: 3
Explores relationship between law and society, including concept of law; origin, development, and role of law in society; and
relationship between law and social change. Assesses different approaches and methodologies.

Prerequisites
CRIM 100 or GOVT 301.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 409 - Virginia Government and Politics

Credits: 3
Examines history of politics in Virginia and current political issues. Particular attention to changing dynamics of political parties,
key legislative issues, and policies of recent administrations.

Prerequisites
GOVT 103.
GOVT 412 - Politics and the Mass Media

Credits: 3
Responsibilities and freedoms of mass media in democracy. Explores Influence of media on citizens' opinions, elections, and decisions of public officials.

Equivalent to COMM 412

Prerequisites
GOVT 103.

GOVT 414 - Politics of Race and Gender

Credits: 3
Examines political, economic, and social impact of public policies and implications for race, gender, and age.

Prerequisites
GOVT 103.

GOVT 420 - American Political Thought

Credits: 3
Major political values and theories in America from formation of American republic to present. Covers changes in American political values in crisis periods and contemporary American political theory including pluralism, elite theories of democracy, and empirical political theory.

Prerequisites
GOVT 103

GOVT 421 - Contemporary Political Ideologies
Credits: 3
Studies political ideologies that shape values, beliefs, and actions of contemporary regimes and political movements. Topics include liberalism, conservatism, socialism, communism, and fascism in theory and contemporary practice; and totalitarianism and nationalism in postindustrial and developing societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 422 - Constitutional Interpretation

Credits: 3
Examines Supreme Court's interpretation of constitutional powers of Congress, presidency, and judiciary. Includes examination of major decisions concerning state regulation, taxation, and interstate relations.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 423 - Constitutional Law: Civil Rights and Liberties

Credits: 3
Studies First Amendment freedoms of speech, press, assembly, association, and religion; right to privacy; and Fourteenth Amendment equal protection.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 424 - Constitutional Law: Criminal Process and Rights

Credits: 3
Studies constitutional law pertaining to rights of criminally accused from stages of investigations and evidence through attorney, trial, and punishment stages at federal and state levels.

Prerequisites
GOVT 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 427 - Feminist Political Thought
Credits: 3
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

Prerequisites
GOVT 101, WMST 200, 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 428 - Advanced Democratic Theory

Credits: 3
Explores various theoretical approaches to nature and justification of democracy. Topics may include liberal, communitarian, pluralist, and deliberative theories and their critics; constitutionalism; role of markets; and transnational democracy.

Equivalent to PHIL 428

Prerequisites
GOVT 101 or one course in philosophy

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 430 - Comparative Political Leadership

Credits: 3
Comparative political leadership, relationships between political cultures and types of leadership, patterns of leadership recruitment, and linkages between political elites and citizenry.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 432 - Political Change and Social Development in Sub-Saharan Africa

Credits: 3
Examines relationship of culture, history, ethnicity, and religion, and contemporary political and socioeconomic developments in Africa. Special attention to implications of ethnic conflict for nation-building in the post-Cold War period, and strategies for resolving conflicts.

Prerequisites
GOVT 132, 133.
GOVT 433 - Political Economy of East Asia

Credits: 3
Discusses different theoretical perspectives of East Asian political economy; transformation of East Asia; and issues such as money, finance, trade, investment, environment, and energy. Focuses on issues of contemporary significance, but attention also given to history.

Prerequisites
GOVT 133 and 60 credits, or permission of instructor.

GOVT 434 - Democracy in Global Perspective

Credits: 3
Comparative study of structures and performance of democracies around the world since 1975. Examines growing influence of global forces such as economy, media, and culture in process of democratization. Examines select current elections.

Prerequisites
GOVT 133.

GOVT 443 - Law and Ethics of War

Credits: 3
Explores sources of morality in armed conflict, and implications of such ideas for international relations. Examines content and philosophy of modern law of war.

Prerequisites
GOVT 132.

GOVT 444 - Issues in International Studies

Credits: 1-3
Major issues in international system, including international political economy and security.
Prerequisites
GOVT 132, 133.

Notes
May be repeated for credit when topic is different, with permission of department, but no more than 9 credits of GOVT 444 permitted.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 445 - Human Rights

Credits: 3
Explores philosophical, legal, and political issues at heart of modern international human rights movement. Examines historical background legal architecture of modern human rights movement.

Prerequisites
GOVT 132.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 446 - International Law and Organization

Credits: 3
Nature, sources, and subject of law of nations; law and individual; territorial questions; nature, sources, and functions of international organizations; international transactions and organizations; war and present; and future status of international law.

Prerequisites
GOVT 132, 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 447 - Revolution and International Politics

Credits: 3
Historical overview of modern revolutions as well as different theories about causes and consequences of revolutions. Special attention to Marxist-Leninist, Arab nationalist, and Islamic revolutions.

Prerequisites
GOVT 133.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 448 - Ethics and International Politics

Credits: 3
Ethics and international politics ask students to wrestle with dilemmas raised by a desire to behave morally in an international system in which consensus about ethical matters is absent. Distributive justice and use of force are two overarching themes. Students also develop, apply, and justify their own perspectives on ethical problem using philosophical theory, history, and social science research.

Prerequisites
60 credits, and GOVT 132 or PHIL 151.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 452 - Administrative Law and Procedures

Credits: 3
Law of public office. Studies procedures followed by and the legal limits on administrative agencies and their officers and employees.

Prerequisites
GOVT 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 460 - Surveillance and Privacy in Contemporary Society

Credits: 3
Philosophical perspectives, historical context, technological developments, and institutional changes that surround controversies about privacy and surveillance in contemporary society. Explores public and private institutions doing surveillance, how they calculate and manage risk, and legal constraints on surveillance activities.

Prerequisites
CRIM 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 464 - Issues in Public Policy and Administration

Credits: 1-3
Analyzes selected policy issues in administering public policies. Topics announced in advance. Examples include environmental policy, government regulation, federal mandates, state policy, and regional policy.
Prerequisites
GOVT 103 plus 60 credits.

Notes
May be repeated for credit when topic is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 470 - Faith and Reason in the Making of the Modern Mind

Credits: 3
Investigates the interlocking claims of religious faith and human reason in Western culture, from Biblical times to the present. First covers tightly focused reading assignments in theology and philosophy, and second covers particular case studies, from Galileo to the Intelligent Design debate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 471 - Millennialism and Philosophies of History in Western Culture

Credits: 3
Is there purpose in human history? Are we really going anywhere as humanity moves through time? This seminar studies major patterns by which thinkers in the West have discerned meaning in humanity's temporal existence. Extends from the Jewish roots of historical understanding, through Christian millennialism, to contemporary naturalism.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 472 - Christianity, Secularism, and Democracy

Credits: 3
Examines the evolving relationship between religion and the American political order, from the Reformation to George W. Bush.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 480 - Internship

Credits: 3
Approved internships with specific employer. Programs relate in some capacity to government, politics, public policy, or the law. Students develop individual contracts defining learning and competencies they plan to gain from the experience.
Prerequisites
GOVT 101, 103, 132, 133

Notes
Contact department one semester before enrolling. 3 credits of 480 may be applied to the major requirement in advanced government field courses with permission of the internship coordinator.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GOVT 490 - Synthesis Seminar

Credits: 3
Readings, individual or group projects, and discussion of papers reflecting on connections between liberal arts and sciences and political world.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses, GOVT 300, and 18 credits in major.

Notes
Students may not receive credit for 490 more than once.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 491 - Honors Seminar

Credits: 3
Readings, individual or group projects, and discussions of seminar papers.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses, GOVT 300, and 18 credits in major.

Notes
Subject varies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 496 - Directed Readings and Research

Credits: 1-3
Reading and research on specific topic under direction of faculty member.
Notes
Open to majors in public and international affairs with 90 credits, and permission of instructor and department. Written report required; oral report of research may be required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GOVT 500 - Research Methods in Political Science

Credits: 3
Introduces research methods and data sources to study political science and practice of government. Topics include measurement of political concepts, research design, archival research techniques, survey research and case study development, and data analysis with elementary statistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 510 - American Government and Politics

Credits: 3
Examines institutions and processes of American government, including separate institutions of power in national government, theory and practice of federal system, role of interest groups and political parties, and effects of media and public opinion on electoral behavior and policy making. Seminar examining normative and empirical research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 520 - Political Theory

Credits: 3
Analyzes selected major works of ancient, modern, or contemporary political theory that illuminate basic problems and questions for people engaged in political or civic life. Examines justice, liberty, equality, autonomy, rights, obligation, participation, and nature of politics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 530 - Comparative Politics

Credits: 3
Examines fundamental issues in comparative politics and provides broad coverage of the central themes under study. Designed to help students think theoretically and critically about the study of comparative politics, its scientific objectives, and its epistemological assumptions. Within this context, students will look at concepts and approaches, as well as important theories
and debates that characterize the subfield. Helps prepare students for qualifying exams in comparative politics.

**GOVT 540 - International Relations**

Credits: 3  
Focuses on changing structure of international politics, post-Cold War security issues, effect of globalized economy and information technology revolution, enhanced role of global corporations and nongovernmental organizations, and rise of nonsecurity issues in emerging international agenda.

**GOVT 541 - Introduction to Critical Analysis and Strategic Response to Terrorism**

Credits: 3  
Introduces terrorism as a complex threat to human security. Focuses on tools for analyzing terrorism and the underlying sources and conditions that contribute to it. Considers similarities and differences between terrorism and other threats to human security. Explores the lessons learned in the history of responding to terrorism. Focuses not only on different tactics of response, but also includes how different types of societies (dictatorship, democracies, etc.) have responded to terrorism and what the results of those responses have been. Includes case studies of responses to terrorism.

**GOVT 550 - Seminar in Theories of Public Administration**

Credits: 3  
Reviews the theoretical traditions in American public administration, from the earliest days of the founding to the present. Concludes with consideration of contemporary theoretical debates over the proper role of public administrators and controversies about conflicting demands made on the public service and the public sector.

**Prerequisites**

GOVT 510

**GOVT 603 - Seminar in the Courts and Constitutional Law**

Credits: 3  
Analyzes role, influence, and effects of U.S. courts in creating constitutional legal norms and interpreting them. Special attention
to First and Fourteenth Amendments and Commerce Clause. Lecture and discussion; students expected to read and analyze leading court cases.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GOVT 604 - Seminar on Congress and Legislative Behavior**

Credits: 3  
Examines theories and empirical research on the U.S. Congress and legislative behavior, including elections, representation, structures, and processes. Also examines Congress' impact on the design and implementation of public policy, interactions with other branches of government, and comparisons with parliamentary systems.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GOVT 605 - Seminar on the Presidency**

Credits: 3  
Examines the American presidency from a number of substantive and methodological perspectives. Readings and discussions in the course appraise the presidency within the system and focus on the role the presidency plays in formulating and implementing public policy.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GOVT 631 - Seminar in Comparative Politics and Institutions**

Credits: 3  
Examines theories and practices of governance, development, and conflict resolution in comparative national settings. Covers elections in presidential and parliamentary democracies, institutional forms, political cultures, and ideologies. Comparative analysis theories and research reflecting alternative analytic perspectives applied to institutions and political processes of nations, regions.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**GOVT 640 - Strategic Responses to Terrorism: Coordinated Decision Making**
Credits: 3
Revisits, expands, and examines the critical themes developed in the terrorism certificate program. Provides students with the opportunity to apply the theoretical concepts developed in practice. Integrates the ideas, theories, and practices considered in this track within the larger field of terrorism analysis and strategic responses to this threat.

Notes
This is the capstone course for the terrorism certificate program and must be completed in the final semester of the certificate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 641 - Seminar in Global Systems

Credits: 3
Applies systems approach to understanding global politics. Emphasizes properties and functions of global systems such as population, food, disease, energy, and trade, and how world's political systems interact with them. Discusses how governance at municipal, national, and international levels affected by global systems. Examines role of nongovernmental organizations in global affairs.

Prerequisites
Completion of all core courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 706 - Federalism and Intergovernmental Relations

Credits: 3
Examines broad trends in governance, including theory and practice of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 711 - Problem Solving and Data Analysis I

Credits: 3
Techniques and research skills to solve policy-related problems or analyze politics-related data. Focuses on problem definition, research design, and problem solving under conditions of uncertainty in politics and public sector.

Prerequisites
GOVT 550 and passing grade on screening exam
GOVT 712 - Problem Solving and Data Analysis II

Credits: 3
Advanced techniques and skills for solving policy-related problems or analyzing political data. Focuses on data gathering and analysis, use of statistical software, and multivariate analysis.

Prerequisites
GOVT 711.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 713 - The Constitution, Criminal Procedure, and Security

Credits: 3
Explains legal doctrines that form basis of U.S. constitutional procedural rights, how these doctrines develop, and why courts rule as they do. Evaluates strengths, weaknesses of these rights.

Prerequisites
CRIM 720/GOVT 728, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 715 - Advanced Seminar in Political Methodology

Credits: 3
Common statistical techniques employed in political science research including OLS regression, logistic regression, probit, factor analysis, multidimensional scaling, discriminant analysis, cluster analysis, and analysis of variance. Sampling and inferential statistics.

Prerequisites
GOVT 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 717 - Advanced Seminar in Qualitative Methods

Credits: 3
Examines the use of different research methods used in political science including case studies, interviews, content analysis, and
participant observation. Analysis of the appropriateness of these techniques for different research questions. Discussion of procedural and ethical concerns that might arise in use of these methods.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 719 - Issues in American Politics

Credits: 3
Examines significant issue in American politics and political behavior. Analyzes topic of contemporary and emerging concern.

Prerequisites
GOVT 510.

Notes
Course may be repeated when topics are different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 725 - Democratic Theory and Democratization

Credits: 3
Examines democracy in terms of versions of liberalism, theories of social capital and civic participation, and discourses about civil, political, and human rights. How is democracy conceptualized normatively and empirically? What underlying economic, social, and cultural conditions promote democracy? What role do institutions play in creating and sustaining a stable democratic society? Takes a broadly comparative perspective, focusing on variety of established and emerging democracies around the world. Elective for students specializing in American government or international politics and comparative governments.

Prerequisites
GOVT 520.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 726 - Theories of Justice

Credits: 3
Overview of ancient and modern theories of justice with application to contemporary issues involving justice system and other social and political institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 727 - Restorative Justice
Origins of restorative justice, its principles, implications for different justice organizations and processes, and application to problems such as family violence, human rights, and reconciliation following mass victimizations.

**Prerequisites**
CRIM 700, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GOVT 728 - Behavior of Law**

Credits: 3  
Examines development of law, and law's effect on human behavior. Reviews theories of law's meaning and aims. Examines construction of law, and investigates consequences of law and legal decisions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GOVT 731 - Advanced Seminar in Comparative Politics**

Credits: 3  
Assumes basic proficiency in comparative analysis. Addresses theoretical and methodological issues central to comparative politics by focusing on specific topic such as international development, race and ethnicity, and social movements; or region such as Latin America, Asia, Middle East, European Union, Africa, and Russia. Focuses on advanced modes of inquiry through in-depth analysis and discussion.

**Prerequisites**
GOVT 530

**Notes**
May be repeated for credit when topic is different and with permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**GOVT 732 - Comparative Justice**

Credits: 3  
Survey of justice systems and their environments in different lands and cultures. Identifies commonalities and differences among justice systems, evaluates them, and considers policy implications.

**Prerequisites**
CRIM 700/ GOVT 726, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
GOVT 739 - Issues in Comparative and International Politics

Credits: 3
Explores issues of contemporary and emerging concern in comparative and international politics.

Prerequisites
GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 741 - Advanced Seminar in International Politics

Credits: 3
Examines theoretical and methodological issues central to study of international relations by focusing on specific topic: American foreign policy, diplomacy, international law and organization, international relations theory, international ethics, human rights and humanitarian intervention, the environment, and others.

Prerequisites
GOVT 540.

Notes
May be repeated for credit when topic is different and with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 743 - International Political Economy

Credits: 3
Examines interplay of international politics and economics. Discusses theoretical perspectives and analytical tools in academic field of international political economy, and applies theories and tools to trade, investment, exchange rates, development, regionalization, and globalization. Explores how international economic and political forces increasingly shape domestic interests, and how domestic politics affect international political economy. Lecture, discussion.

Prerequisites
GOVT 343 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 745 - International Security
Credits: 3
Examines interplay of international politics and international security. Discusses theoretical perspectives and analytical tools in academic field of international security, and applies theories and tools to nuclear, biological, and chemical weapons, strategy and defense, and arms control. How domestic issues affect defense policies, terrorism, changing nature of international conflict, and human security will be examined.

Prerequisites
GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 753 - Third-Party Governance

Credits: 3
Examines design and management of government programs that rely on other levels of government and the private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 755 - Seminar in Politics and Bureaucracy

Credits: 3
Explores research and theory on political causes and effects of actions of government bureaucratic agencies. Readings examine origins of agencies, influences on decisions and programs, sources of internal and external accountability, pathologies of bureaucracies, and contributions bureaucracies make on effective and just governance.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 758 - Homeland/Transportation Security Administration

Credits: 3
Examines the terrorist attacks of 9/11, vulnerabilities of the aviation security at that time, failure of elected officials and administrators to act more decisively to improve security before 9/11, and the policy and administrative responses to the 9/11 attacks, including the creation of the Transportation Security Administration and the Department of Homeland Security. Includes the development of radical Islam and the rise of Osama bin Laden and Al Qaeda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 759 - Issues in Public Administration and Management

Credits: 1-3
Current issues in administration and management of public organizations in contemporary American government. Includes practical applications of theories and analysis to managerial problems. Emphasizes competence in improving management in selected government settings.

Notes
May be repeated once when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 794 - Internship

Credits: 1-6
Contact internship coordinator one semester before enrollment. Work-study program with specific employers.

Prerequisites
12 credits in MAIS political science concentration.

Notes
Open only to students admitted to MAIS-political science concentration. Credit determined by department.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GOVT 796 - Directed Readings and Research

Credits: 1-6
Reading and research on specific topic under direction of faculty member.

Prerequisites
15 credits of GOVT courses at 500 level and above, and permission of instructor.

Notes
Written paper required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

GOVT 798 - Political Science Research Project

Credits: 3
Research project related to student's concentration under supervision of a faculty advisor. Student produces substantial and original contribution to political science knowledge on model of article in scholarly journal.
Prerequisites
24 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

GOVT 799 - Political Science Thesis

Credits: 1-6
Substantial and original research paper with guidance of faculty advisor. Thesis proposal must be approved in advance by advisor and two faculty members who comprise thesis committee. Completed research must be approved by committee and defended publicly in oral presentation.

Prerequisites
24 credits, and approval of thesis proposal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

GOVT 810 - American Political Development

Credits: 3
Advanced graduate-level seminar on historical roots of American politics. Examines political culture and historical development of U.S. institutions, and how laws and programs have been affected by historical and cultural development.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 811 - Advanced Seminar in American Institutions

Credits: 3
Advanced graduate-level seminar on specific topics of contemporary research and theory in American governmental institutions. Topics vary to include presidential politics, Congress, and politics of the judiciary. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisites
GOVT 510.

Notes
May be repeated for up to 9 credits on different topics.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 815 - Advanced Seminar in Political Behavior

Credits: 3
Advanced graduate-level seminar on specific topics of contemporary research and theory in American political behavior. Topic varies to include political parties, electoral politics, public opinion and voting behavior, interest groups, and lobbying. Readings include classic and contemporary literature. Seminar format with discussion, student presentations.

Prerequisites
GOVT 510.

Notes
May be repeated for up to 9 credits on different topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 820 - Advanced Topics in Political Thought

Credits: 3
Advanced graduate-level seminar on topics of contemporary research and theory in political thought. Topics vary to include political ideologies, feminist theory, and political theory. Seminar format with discussion, student presentations.

Prerequisites
GOVT 520.

Notes
May be repeated for up to 9 credits on different topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 831 - Research Seminar in Regional Political Culture and Development

Credits: 3
Advanced graduate-level seminar on theories of political culture and economic development applied to Middle East, Latin America, Asia, and Africa. Debates economic growth and development from broad and rigorous analytical base.

Prerequisites
GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
GOVT 833 - European Union and Political Integration

Credits: 3
Advanced graduate-level seminar on European integration and theories of international organizations. Examines evolution of European Union and other international organizations, such as NATO, which have brought most European states together since end of World War II.

Prerequisites
GOVT 540 and 631.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 841 - Ethics and Human Rights in International Affairs

Credits: 3
Seminar on ethical behavior in an international system in which consensus about ethical matters is absent. Overarching themes are distributive justice, human rights, and use of force. Students develop, apply, and justify their own perspective on an ethical problem using ethical theory and social science research.

Prerequisites
GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 843 - Diplomacy

Credits: 3
Advanced graduate seminar on theory and practice of diplomacy; alliance construction and destruction; coercive and cooperative diplomacy; diplomacy of certain great powers such as America, Russia, China, France, and Japan, and small and revolutionary powers. Also examines diplomacy and the media, and day-to-day diplomacy.

Prerequisites
GOVT 540.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

GOVT 850 - Advanced Seminar in Public Administration Research and Theory

Credits: 3
Focuses on a topic of central concern in contemporary public administration research and theory. Content of the seminar varies but includes such topics as organizing for homeland security, managerial and political effects of e-government, or the application of principal-agency models in public management.
Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 851 - Doctoral Seminar in Theories of Organization and Bureaucracy**

Credits: 3
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision making systems; leadership and motivation theories; and theories or organizations as agents of political and social change. Uses case studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 852 - Seminar in Political Leadership**

Credits: 3
Graduate seminar on theories and practices of political and governmental leadership in American and comparative settings. Domestic and comparative cases of leadership in state-building, presidency, and public administration. Primary or secondary research on leaders encouraged.

Prerequisites
GOVT 510.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 853 - Advanced Seminar in Global Innovations in Public Finance**

Credits: 3
Explores how financial decisions by government jurisdictions are affected by global competition and global markets. The impact of cross-national movements of capital and information on tax, tariff, and interest rate policies will be examined, as will the numerous organizations, such as the World Bank, that have been created to reduce the impact on developing nations. Government and supernational efforts to deal with the unintended consequences and global capital flows will also be examined.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**GOVT 854 - Advanced Seminar in Comparative Public Administrative Systems**

Credits: 3
Specific topics of contemporary research and theory in comparative public administration, including the international diffusion of
governmental reform and innovation, public administration in developing countries, and international trends in public
administration theory. Includes readings in classic and contemporary literature.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**GOVT 998 - Doctoral Dissertation Proposal**

Credits: 1-6  
Work on research proposal that forms basis for doctoral dissertation.

**Prerequisites**  
Advancement to candidacy.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**GOVT 999 - Doctoral Dissertation Research**

Credits: 1-12  
Research on approved dissertation topic under direction of dissertation committee.

**Prerequisites**  
Approval of dissertation proposal.

**Notes**  
May be repeated for up to 9 credits in a semester, but no more than 15 total.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/NC

**Graduate School of Management**

**GSOM 520 - Foundations of Marketing**

Credits: 3  
Introduces the marketing concept of an organization. Provides analytical techniques currently used by marketers in a wide variety of institutional and competitive situations. Emphasis is on the use of technology to aid in analysis, decision making, and communication of decisions to relevant publics. The course focuses on emphasizing the role of a marketer in developing and managing long-term customer relationships.
**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 530 - Foundations of Operations Management**

Credits: 3  
The course introduces and examines the principles, techniques, and methodologies required to successfully manage the operations of an organization in today's dynamic environment. The course will address both strategic and tactical issues of operations management and evaluate their impact on an organization's competitiveness, productivity, flexibility, quality, and cost. The course uses case studies of real-world situations for analytical problem solving, quantitative modeling, and the analysis.

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 531 - Managing Business Systems Development**

Credits: 3  
The course introduces principles and practices in development of information systems in a modern organization. Emphasis is on developing the managerial understanding and skills necessary in development and implementation of information systems. Students will learn and apply the methodologies of systems analysis and design and gain an understanding of managerial issues related to the software development lifecycle (SDLC).

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 540 - Analysis of Financial Decisions**

Credits: 3  
Provides a survey of financial decision-making. Assists students with developing a framework within which they can understand the linkages between financial decisions and organizational performance. Examines methods for using information based on financial statements in making decisions and assessing performance, evaluating investment opportunities, and choosing among alternative sources of funds. Focuses on public firms in the corporate sector as well as applications for privately-held companies and organizations in the government and non-for-profit sectors.

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
GSOM 550 - Change Management

Credits: 3
Explores how to implement change in today's business environment and considers the 4 generations in the workplace. Change models are introduced and applied. Students are introduced to individual and organizational change concepts and strategies for dealing with resistance and conflict.

Prerequisites
Admission to a graduate program or graduate certificate program in the School of Management, or permission of the program director.

Hours of Lecture or Seminar per week: 3

GSOM 551 - Leadership

Credits: 3
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. Also focuses on strategies for developing oneself as an effective leader. Integrates theory, research, and applications. Students apply principles of leadership and motivation to their own work situations and case evaluation.

Prerequisites
Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3

GSOM 570 - Spatial Technology Applications in Business and Management

Credits: 3
Introduces graduate students to the application of GIS technology to business studies and management, emphasizing the concepts and theories of spatial analysis and information systems applied to business and management. Hands-on exercises to familiarize students with business solutions using GIS and spatial technology.

Prerequisites
Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3

GSOM 571 - Advanced Spatial Information Systems: Applications in Business and Management

Credits: 3
Introduces students to enhanced application of GIS, Spatial Information Technology, Business Intelligence (BI) programs to business and management issues. Explores existing and potential capabilities of technology in conducting spatial business analysis, simulations, spatial modeling and visualization. Discusses advanced GIS and BI concepts as strategic decision-making
business tools that support marketing research and analysis, logistics, management science, operations and information systems, international business and strategic business decision-making. Focuses on designing, planning, and completing a hands-on capstone project using GIS and Spatial Technology to reveal concepts and demonstrate the power of integration analysis and visualization to enhance business decision-making within a particular company of choice.

**Prerequisites**
GSOM 570 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 610 - Methods and Uses of Financial Accounting**

Credits: 3
Focuses on the practical methods and uses of financial accounting for business transactions. Topics include an introduction to the basic financial reporting model, analysis of transactions and their treatment for accounting reports, and financial statement analysis.

**Prerequisites**
Graduate admission or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 630 - Systems Thinking and Business Dynamics**

Credits: 3
In a business world that is increasingly interconnected, interactions intensify and proliferate managers are continually asked to assess events and make decisions that impact business performance. Systems Thinking is a way to understand the structure of a system and its relationship to behavior and provides a foundation for making more effective management decisions in an interconnected world. The course introduces fundamentals of systems thinking, and involves hands-on use of systems thinking tools and techniques to improve business performance in a variety of situations spanning different industries.

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 631 - Business Applications of Data Mining**

Credits: 3
Introduces sophisticated analytical techniques for identifying patterns from large amounts of data. Focus is on data analysis approach and methods to help businesses successfully uncover hidden patterns and associations from large amounts of data. Emphasis on understanding the different decision models and application of the results to improve business decision making in different business domains.

**Prerequisites**
Graduate admission or permission of instructor.
Hours of Lecture or Seminar per week: 3

GSOM 640 - Finance for Managers

Credits: 3

Prerequisites
Graduate admission or permission of the instructor.

Hours of Lecture or Seminar per week: 3

GSOM 660 - Economics for Managers

Credits: 3
Provides a fundamental understanding of how microeconomics concepts are usefully applied to managerial decision making. Principles of microeconomic theory are explored fully, including market supply and demand, production and cost functions, industry structure, and product and resource pricing.

Prerequisites
Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3

GSOM 746 - Real Estate Analysis and Valuation

Credits: 3
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to MBA 746

Prerequisites
Graduate admission or permission of instructor.

Hours of Lecture or Seminar per week: 3

GSOM 747 - Real Estate Finance

Credits: 3
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.
Equivalent to MBA 747

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**GSOM 748 - Real Estate Investment**

Credits: 3
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.

Equivalent to MBA 748

**Prerequisites**
Graduate admission or permission of instructor.

**Hours of Lecture or Seminar per week:** 3

---

**Greek**

---

**GREE 150 - Classical Greek I**

Credits: 3
Addresses linguistic, semantic, and cultural aspects. Covers basic structure and vocabulary, its place among other world languages and its unique role in development of modern thought.

**Notes**
Lectures, discussions supplemented by web-posted material.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**GREE 160 - Classical Greek II**

Credits: 3
Expands proficiency, refines grasp of morphology and syntax, and fosters greater command of vocabulary. Introduces selected original passages from Greek classical authors.

**Prerequisites**
GREE 150 or permission of instructor.
Notes
Lectures, discussions supplemented by web-posted material.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Health Administration and Policy

HAP 290 - Lifestyle Management through Systems Analysis

Credits: 3
Students make resolutions (e.g., maintain a healthy diet, exercise more, etc.) and analyze their lifestyle to see what is causing and preventing success. Each student maintains a diary and analyzes it using Bayesian causal modeling techniques to understand the constraints and causes leading to successes and failures. Students analyze their pattern of success using statistical process control tools and engage in cycles of self improvement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 301 - Health Care Delivery in the United States

Credits: 3
Introduces history and current structure and function of U.S. health care delivery. Explores components and subsystems of health care, and sociopolitical (public and private) context that shapes system and affects access to health care and delivery of health services.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 307 - Assisted-Living Management and Philosophy

Credits: 3
Overview of growth of assisted living industry, its role in health care continuum, current or proposed regulatory environments, and differences between assisted living and other forms of senior health care and senior living services. Specific instruction provided in philosophy and day-to-day management of assisted-living communities, including resident care, operations, finance and budgeting, human resources and staffing, and successful marketing and community relations. Also examines industry future, including cutting-edge programs and technologies, and approaches to creating next generation of assisted-living services.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 334 - Role Development for Health Administration Majors

Credits: 3
Explores career opportunities that build on basic education in health science field. Includes historical perspectives on ethical, legal, political, social, and cultural issues related to health care policy and research. Explores multidisciplinary collaboration among health care providers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 360 - Introduction to Health Information Systems

Credits: 3
An introduction to basic information management in health care service organizations. Provides an overview of health information systems for selected administrative functions and clinical care services, including electronic data interchange for billing and claims management, institutional approaches to ensuring data security and privacy, and information management and decision support for managers and clinicians.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 395 - Health Care Finance

Credits: 3
Introduces finance in health care organizations. Reviews issues in reimbursement structures, regulatory mechanisms, cost control, and related factors affecting financial management of health service organizations including financial decision support skills.

Prerequisites
HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 396 - Strategic Health Management and Planning

Credits: 3
Introduces past and present interventions that affect supply and demand for health care at community, state, regional, and national levels. Presents health planning and regulatory entities, and discusses strategic and program planning in context of current economic and market conditions.

Prerequisites
HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HAP 410 - Introduction to Health/Medical Practice Management

Credits: 3

An introductory course in the leadership and management of ambulatory health service practices and small provider organizations. Content covers a variety of health/medical practice management functions, including administrative systems, operations and strategies for effective management of quality, efficiency and business performance (contracts and marketing), and human resources. Trends in practice integration and affiliations with multiprovider groups and larger enterprises will be covered.

Prerequisites
HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 416 - Leadership and Management of Health Systems I

Credits: 3

Introduces theoretical concepts and their application to the leadership and management of effective health care organizations. Explores the structure and function of health-related organizations and selected administrative and operational issues in program development and service design, emphasizing strategies for effective performance management, decision making, and communication.

Prerequisites
HAP 301. Completion of HAP 300-level course requirements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 417 - Leadership and Management of Health Systems II

Credits: 3

Explores challenges to providing effective leadership and management of health care organizations and systems of care related to operational issues such as personnel management and labor relations, information management, conflict and goal alignment, financial management, accountability, and quality and safety improvement. Focuses on identification of management skills, technology, and strategy that influence optimal performance and communication between clinicians, administrative staff, and managers.

Prerequisites
Completion of HAP 416.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 420 - Management of Project Resources
Credits: 3
An introductory course in the management of project resources, including, but not limited to, assessing return on investment for projects and costing out resources needed in project subtasks. Includes hands-on application of project management tools as they are applied in the health-related organization and the health service industry. Also includes a variety of variables that may affect cost control and cost variation, including the impact of finishing projects in shorter time frames than originally planned and activity-based costing.

Prerequisites
HAP 360 and HAP 378

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 442 - Introduction to Health Care Politics and Policy

Credits: 3
Reviews health care system issues and trends, and economic concepts, ways to understand the critical role of public health policy and the policy-making process in the United States. Identifies the major political institutions and policy processes that shape health policy. Examines the past and present health policy and its impact on changes in the ability of patients to access health services, the practice of health sciences professionals, and the quality and process of care. Explores the role of politics at both the federal and state government in health policy-making and critical aspects of the U.S. health system are compared to those of other countries.

Prerequisites
HAP 301

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 445 - Introduction to Health Services Research

Credits: 3
An introductory course for undergraduate students in understanding the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. Emphasis is placed on understanding, assessing and using relevant findings from health services research. The course covers a variety of topics related to policy, management, and program evaluation in health delivery systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 447 - Regulatory Requirements for Health Care Systems

Credits: 3
Helps health care professionals understand link between infrastructures of organization and regulatory and accreditation processes for health care organizations. Covers major accrediting agencies and their roles, accreditation principles, and survey process. Focuses on hospitals with reference to ambulatory care, managed care organizations, rehabilitation centers, laboratories, and home health and long-term care facilities. Emphasizes requirements of Joint Commission on Accreditation of Health Care
Organization and regulations mandated by Health Care Finance Administration.

Equivalent to HAP 547

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 460 - Information Technology Project Management**

Credits: 3  
Focuses on project management as applied to management of health care information technology projects. Students learn critical path analysis, project resource management, crashing projects, vendor selection, assessment of project quality, and analysis of project risks. Students learn to use media for effective project communication.

**Prerequisites**  
HAP 360

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 494 - Special Topics in Health Administration and Policy**

Credits: 3  
Selected topics analyzing specialized areas in health administration and policy.

**Notes**  
Content varies. Lecture, seminar, laboratory, and workshops.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 498 - Health Administration Internship**

Credits: 6  
Provides variety of applied management experiences in a health systems or related organization (field agency), under the direction of a HAP faculty member and a preceptor in the field. Students integrate and apply critical-thinking, project-planning, and management and communication skills in the internship experience and toward completion of an approved internship project.

**Prerequisites**  
Open to HAP majors only.

**Notes**  
Taken in last semester of studies. Capstone course involves a two-hour weekly seminar and a 12-hour internship in a health-related organization. Not repeatable for credit.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 12
HAP 499 - Independent Study in Health Administration and Policy

Credits: 1-6
Provides individual study of a particular problem area in health administration and policy research, theory development, or education under the direction of faculty.

Prerequisites
Permission of college.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HAP 501 - Business Statistics in Health Service Management

Credits: 3
An introductory course in basic statistics applied to applications in health systems management. Students use spreadsheet applications to perform a variety of statistical analyses (parametric and nonparametric statistics, including regression) to support program evaluation and managerial decision making in health systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 511 - Ethics in Public Health

Credits: 3
Explores selected ethical issues in public health practice, research, and policy; specific ethical theories identified as the proper basis of public health; relevant ethical concepts and principles and how they inform existing public health policies, practices, and research; and how ethical reasoning can operate in public health practice, research, and policies.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

HAP 540 - Introduction to Emergency Preparedness/Disaster Recovery for Health Care Professionals

Credits: 3
Introductory course in emergency preparedness and disaster recovery issues for health and human service professionals, using blended learning methods. Introduces policy guiding public and private sector emergency preparedness activities, and provides overview of issues in emergency preparedness infrastructure, needs assessment, and interdisciplinary roles in emergency response operations. Uses knowledge acquired from recent state and federal responses to disasters.
HAP 542 - Health Policy

Credits: 3
Explores development of public health policy, influence of health care delivery, nursing, and other health professions.

Notes
Classroom and field experience required.

HAP 546 - Leadership Strategies in Health Policy

Credits: 3
Examines the leadership process from a policy and organizational perspective to expand students' ability to impact the health policy-making process.

Equivalent to NURS 546

HAP 547 - Regulatory Requirements for Health Care Systems

Credits: 3
Helps health care professionals understand link between infrastructures of organization and regulatory and accreditation processes for health care organizations. Covers major accrediting agencies and their roles, accreditation principles, and survey process. Focuses on hospitals with reference to ambulatory care, managed care organizations, rehabilitation centers, laboratories, and home health and long-term care facilities. Emphasizes requirements of Joint Commission on Accreditation of Health Care Organization and regulations mandated by Health Care Finance Administration.

Equivalent to HAP 447

HAP 586 - Quality Improvement in Health Services

Credits: 3
Examines how improved work processes lead to quality improvement. Explores contribution of operations research and quality management to improve delivery and production of health services and business processes from the perspective of health care
managers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 594 - Special Topics in Health Care

Credits: 3
Selected topics analyzing specialized areas in health care.

Equivalent to GCH 594/NURS 594

Notes
Content varies. Lecture, seminar, laboratory, and workshops.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 601 - E-Commerce and On-line Marketing for Health Services

Credits: 3
Explores development of online health services; organization of online businesses; online marketing, financial, and clinical transactions; and venture capital and the IPO process. Explores creating and maintaining web pages and databases. Reviews literature on effect of computer services on patient care and health care organizations. Also reviews examples of both successful and bankrupt technology firms in health care. Student groups draft business plan and develop early version of service proposal.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 609 - Comparative International Health Systems

Credits: 3
Uses Roemer's Model of Health Systems to examine resource allocation, management, and health outcomes in the United States and around the globe. The structure and functioning of national health systems based on geographic location and governance in developing and developed countries (democracies, monarchies, and communist nations). Resource allocation across the continuum of nations and relationship to national health needs, health status, and longevity are examined.

Notes
An online course in comparative international health care systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 610 - Health/Medical Practice Management
Regulatory pressures, technology, managed care contracting, revenue cycle management, and legal issues are making medical practice management more complex. Physicians groups struggling with these demands are finding a need for sophisticated management. Prepares the student to manage the modern practice by providing a foundation in the leadership and management of ambulatory health services and small provider organizations.

**Prerequisites**
Health care financial management or equivalent, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 612 - Maintaining Business Continuity in Health Care**

Credits: 3
Considers potential types of catastrophes, their likely impact, and how organizations could continue their mission in the aftermath. Explores interdependencies among various components of the health care delivery system, regional health services, disaster planning, business record protection, patient information and information systems protection, manpower planning, professional credentialing, access to supplies and drugs, and financial implications and resources.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 621 - Management of Health Service Organizations**

Credits: 3
Introductory course in application of organizational and management theory relating to management of health service organizations. Emphasizes leadership and trends in organizational structure that affect performance effectiveness, quality and interorganizational relations, and values and principles of health management as a profession. Explores challenges of managing health professionals' decision making, power gradients, change, and other issues that affect function and performance of health service organizations. Introduces strategies used by learning organizations.

**Prerequisites**
Admission to CHHS graduate program or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 642 - Health Policy Development and Analysis**

Credits: 3
Examines the process and factors that influence formulation, implementation and modification of health policy in the United States, including competing interests and the relationship between public decisions and the market place. Emphasis is on the application of commonly-used frameworks for policy analysis, including contributions from health economics, health services research, and other policy-related disciplines, to contemporary policy issues in health care delivery, organization, and financing.
HAP 645 - Introduction to Health Sciences Research

Credits: 3
An introductory course in the basic methods of interdisciplinary health services research and program evaluation in health systems and policy. The course covers topics related to policy, management, and program effect and evaluation within health delivery systems, including research design, existing data systems, measurement of quality and basic cost benefit, and effectiveness analysis.

Prerequisites
HAP 678 (if required in program of study) and HAP 501 or equivalent statistics course

HAP 650 - Assisted Living Management and Operations

Credits: 3
Issues, trends, and practices related to administration of assisted-living and senior housing communities. Emphasizes budgeting; staffing; hospitality services; resident care and risk management indicators; and evaluation of demographic, cultural, and regulatory environments affecting industry.

HAP 652 - Essentials of Health Insurance and Managed Care

Credits: 3
Survey course in US health insurance and managed care. Provides an overview of the different types of health insurers and managed care organizations, with content on sales and marketing, provider network management and reimbursement, medical and quality management, claims processing, member services, IT and operational finance. Policy, laws and regulations affecting the industry will also be addressed.

HAP 660 - Health Policy Formation and Implementation

Credits: 3
Applies selected methods for studying theory and practice of health policy formulation and converting a policy into administrative decisions and a plan of action. Emphasis on acquiring a basic working knowledge of health system and problem complexity and evaluation of policy impact using contemporary health policy examples and case studies. Identifies the institutional determinants of health policy formation and implementation, including special interest and stakeholder groups and their interaction.
HAP 661 - Policy Development and Analysis for Community Health Programs

Credits: 3
Prepares students to critically analyze issues and develop skills pertinent to effective policy development for community and family public health programs. Explores what constitutes a vulnerable population and examines current government programs and policies supporting these programs for such populations. Recent case examples ground students in current issues faced by community groups and other health interests.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 662 - Aging and Health Care Policy

Credits: 3
Focuses on policy perspective in relation to older adults in community and long-term care facilities. Students analyze policy issues and health care delivery systems as they affect older adults through lecture, discussion, field trips, projects, and policy analysis papers.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 678 - Introduction to the U.S. Health System

Credits: 3
Explores structure, function, and financing of U.S. health care delivery systems. Explores development of various subsystems of care and ways public, private, and social forces influence politics of health care, shape the system, and affect public health. Includes analysis of systems infrastructure and sociopolitical context of U.S. health care system.

Prerequisites
To all other certificate courses for students who do not have familiarity with all aspects of U.S. health care system and recent working experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 680 - Applied Public Health Leadership and Management

Credits: 3
Survey course in leadership, management, and planning applied to public health systems. Students apply theoretical knowledge from a variety of disciplines relevant to development and implementation of public health policy, regulatory directives, public
health program planning and management (including human resources and financial management), and the design and evaluation of public health services/functions. Content includes strategies for ensuring access to essential public health services and use of evaluation and monitoring systems to ensure the safety, efficiency, and effectiveness of local public health programs/systems. Course emphasizes leadership, communication, systems thinking, data-driven decision making, and ethical practice in public health systems.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 690 - Independent Study**

Credits: 1-3  
In-depth studies of selected area of health science theory, research, or practice under direction of faculty.

**Notes**  
May be repeated for a maximum of 3 credits.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

**HAP 700 - Introduction to Health Informatics**

Credits: 3  
Introduces the study of data and information flow in healthcare delivery. Covers the history and evolution of methods in information management and the role and contributions of an inter-disciplinary health informatics workforce.

**Corequisite**  
HAP 678

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**HAP 701 - Health Data: Vocabulary and Standards**

Credits: 3  
Explores the challenges of representing health care data using standardized vocabulary in health information systems. Topics include data standards and semantics, policy, and theory and practice of standardization.

**Corequisite**  
HAP 678

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall
HAP 702 - Managerial Accounting in Health Care

Credits: 3
Practical examination of controllership function in health care organizations and systems (profit and nonprofit), with emphasis on policy formulation and evaluation of performance, including cost methods and systems; measurement criteria; and managerial planning, methods, and techniques.

Prerequisites
Graduate-level statistics or research methods course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 703 - Financial Management in Health Systems

Credits: 3
Examines tools and methods of financial management in health care organizations and systems, with emphasis on allocation and use of funds. Analyzes costs and constraints of alternative source of funds, and applies financial decision instruments and effect on operational management and market value of entity.

Prerequisites
Admittance to graduate program and working knowledge of health care industry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 704 - Contemporary Issues in Health Systems Management

Credits: 3
Analyzes management theory and practice from recently evolving works that identify, analyze, and resolve strategic organizational problems and issues in health care systems. Applies leadership strategy to effectively manage variety of critical issues, including organizational development, change management, human relations and diversity, quality management for organizational and clinical effectiveness, technology, competing priorities, conflicting constituencies, delivery system redesign, and health services research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 705 - Strategic Management and Marketing in Health Care

Credits: 3
Develops executive skills for strategic decision making through use of marketing-based tools and techniques. Covers strategic planning, market research and opportunity and risk analysis, customer assessment, market segmentation, and life cycle assessment for health care services in managed care and non-managed care environments.
HAP 706 - Integrated Health Systems Management

Credits: 3
Explores emerging structures for financing and delivery of comprehensive health services in integrated health systems. Covers successful development and management of alliances, provider hospital organizations, and managed care systems with emphasis on strategies for vertical integration, community partnering, contract negotiation, governance, and management of antitrust situations.

HAP 709 - Health Care Databases

Credits: 3
Introduces design and use of health and medical databases, providing hands-on experience. Explores uses of medical record systems. Includes review and analysis of databases and database management systems. Examines application of databases to clinical and managerial transaction.

HAP 710 - Inferential Statistics in Health Services Research and Management

Credits: 3
Introduction and practical application of advanced statistical analyses and their use/application in health services (research, management, policy analysis) using various software applications (STATA, Microsoft Excel and Access, SAS, SPSS, MINITAB). Topics include analysis of variance (one and two way) and design of experiments, multiple regression, model building, chi-square and the analysis of contingency tables, and nonparametric statistics.

Prerequisites
HAP 501 or equivalent introductory graduate statistics course and lab.

HAP 712 - Topics in Public Policy

Credits: 3
Presents selected topics current in public policy related to health care and health care administration.
HAP 713 - Project Management in Health Information Technology

Credits: 3
Applies body of knowledge in project management to the implementation of information technology and systems in healthcare organizations. Examines how tasks such as needs assessment, project planning, project cost analysis, risk management, and management of personnel are readily included in the use of health information systems.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

HAP 714 - Ethical Issues in Health Administration and Policy

Credits: 3
Seeks to explore selected ethical issues in health administration and policy and decision options by understanding ethical theories, concepts, and principles and their role and selective application in the development, organization, and administration of health policy, as well as the organization and delivery of health services. Students will learn specific ethical concepts, theories, and principles, how these inform existing health policies and practices, and how ethical reasoning can operate in the policy process and administrative decisions in the health delivery systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 715 - Health Economics

Credits: 3
Emphasizes understanding of economic efficiency in the U.S. health system. Microeconomic methods examine markets and resources in health care. Health care examined as commodity. Explores demand for health and medical care services, provider behavior, and function and behavior of insurance markets. Topics include government role, financing arrangements, insurance reform, rationing, price regulation, and provider competition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 716 - Health Information Systems

Credits: 3
Introduces the students to information systems at all levels of healthcare delivery. Explores departmental information applications currently deployed in care delivery settings and trends and innovations in information technology systems. Examines contemporary management structures for information systems in health care organizations. Laboratory time provides learning experience in various applied situations.
Prerequisites
HAP 678, HAP 700, HAP 701

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
When Offered: Spring

HAP 720 - Health Data Integration

Credits: 3
Students learn to manipulate large databases, create link table queries, write SQL application programs, understand sources of data conflicts, and identify methods of integrating ODBC databases with legacy data. Covers data warehousing, methods of analyzing large databases, including Bayesian belief networks and machine learning in health care context. Features semester long data integration group project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 727 - Program Evaluations in Health Care

Credits: 3
Methods of evaluating health and social programs, including anthropological case studies, decision analytic and quasi-experimental approaches. Emphasis is placed on using methods of continuous quality improvement and benchmarking exchanges in evaluating multisite programs. Assess cost effectiveness of programs (including assessment of patient census, employee activities and program outcomes). Evaluation of health care interventions, rate setting, and managed care are discussed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 730 - Health Care Decision Analysis

Credits: 3
Students analyze practice patterns and find optimal methods of improving them. Uses decision analysis and failure mode analysis in health care settings. Students integrate scientific evidence, patients' preferences, and experts' opinions to identify optimal alternatives.

Prerequisites
HSCI 501 or any statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 735 - Risk Analysis in Health and Bioscience
Credits: 3
Students build and interpret causal model of risks and test the accuracy of them against extant incidence reports using risk analysis models, risk analysis life cycle, as well as methods of evaluating the validity and reliability of risk analysis. Bayesian probability models, probabilistic risk analysis, root-cause analysis, and failure model analysis are covered. Includes applications to terrorism, unauthorized disclosures, and patient safety.

Prerequisites
HAP 730 or equivalent approved by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 740 - Management of Health Information Systems

Credits: 3
Introduces health and medical information systems with emphasis on systems analysis and design to support managerial and clinical communications and decision making. Explores trends and innovations in information technology and systems, focusing on managerial oversight of health and medical information systems. Explores contemporary management strategies for information systems personnel.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 745 - Health Care Security Policy

Credits: 3
Focuses on health security and privacy policy and compliance issues. Students will develop policies for the type of threats faced by facilities. The legal and business policies for facility, personnel, travel, information, and patient security will be discussed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 746 - Health Policy Leadership

Credits: 3
Identifies and assesses critical leadership skills in many areas of health policy making necessary for health care professionals. Teaches individuals how to link health issues with policy development and pursue appropriate strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 752 - Advanced Health Information Systems
Credits: 3
Provides in-depth analyses of the challenges of supporting clinical providers across all settings through information integration in electronic health records (EHR). Analyzes architectural trends, workflow redesign, and implementation strategies. Attention is given to life cycle management strategies for health information systems. Laboratory time provides learning experience in various clinical situations.

Prerequisites
HAP 709, HAP 716

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 1  
When Offered: Fall

HAP 755 - Analysis of Causality in Health Services Research

Credits: 3
Covers philosophical and statistical problems with analysis of causes as separate and distinct from associations. Topics discussed include structural modeling, self selection, risk adjustment, propensity scoring, and Bayesian networks. Students examine real health care databases and the pitfalls of causal inferences. Special attention is made to investigation of causes of outbreaks and illness.

Prerequisites
A prior graduate-level course in statistics covering analysis of variance: HAP 501, GCH 601, GCH 804, or an equivalent course (approved by the instructor).

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HAP 760 - Philosophy of Science in Health Services Research

Credits: 3
An introductory course on the theory and philosophy of science and humanism that relate to the design and conduct of health services research. The course examines selected theories on the nature of reality (ontology), the justification of knowledge claims (epistemology), and how knowledge is constructed (methodology) in design and analysis of health services research.

Prerequisites
Admission to a doctoral program or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

HAP 762 - Cost-Effectiveness for Health Care Management and Policy Decisions

Credits: 3
A survey course in health services research methods for the application of economic evaluation techniques used in health care policy analysis and clinical or administrative applications for health care service planning and evaluation. Introduces methods applied to health care technology assessment, medical decision making, health resource allocation, and policy-making.
HAP 764 - Health Policy and Government Payment Systems for Health Care Services

Credits: 3
Examines the rationale for government intervention in provider payment and explores the current policy issues and politics of major government provider payment systems, including Medicare and Medicaid, and examines options for managing these programs more effectively. The course will "follow the money" as it flows through government and provider payment systems, model potential changes in such systems, and identify policies for improving the operation of these programs and payment systems.

HAP 765 - Methods for Health Policy Analysis

Credits: 3
Explores conceptual, analytic, and technical methods/approaches used in health policy analysis and planning. Students will learn to select from among alternative methods for applied concept modeling, graphical data presentation, needs assessment, goal clarification, group decision methods, and a variety of quantitative applications and frameworks for evaluating policy impact.

HAP 766 - Policy Implementation and Health System Management Dilemmas

Credits: 3
Analyzes selected public policies and regulations and the impact of implementation and compliance/noncompliance on health care systems and organizations. Examines management responsibilities, challenges, and dilemmas (fiduciary and ethical) of implementing selected policies and regulations (promulgated or proposed).

Prerequisites
HAP 703 or equivalent, or permission of instructor.

HAP 770 - Medical Decision Making and Decision Support Systems

Credits: 3
Introduces the complex subject of medical decision making. Examines systematic approaches to decision making. Explores principles governing the design, application, and maintenance of clinical decision support systems. Laboratory time provides
learning experience in various applied situations.

**Prerequisites**
HAP 701, HAP 716

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1  
**When Offered:** Spring

**HAP 780 - Data Mining in Health Care**

Credits: 3  
An introductory course to data mining and knowledge discovery in health care. Methods for mining health care databases and synthesizing task-oriented knowledge from computer data and prior knowledge are emphasized. Topics include fundamental concepts of datamining, data preprocessing, classification and prediction (decision trees, attributional rules, Bayesian networks), constructive induction, cluster and association analysis, knowledge representation and visualization, and an overview of practical tools for discovering knowledge from medical data. These topics are illustrated by examples of practical applications in health care.

**Prerequisites**
HAP 501 or equivalent introductory graduate statistics course and lab, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HAP 790 - Capstone Practicum in Health Systems Management**

Credits: 3  
Team-based field practicum in health management, problem analysis, and project management in health care or service organization. Learning teams define complex problem in assigned facility and analyze problem with recommendations for management decision action. Analysis provides context in which theoretical concepts and management skills are applied. Uses case study analyses to explore problem-solving approaches in variety of situations and health care or service organizations.

**Prerequisites**
All course work in the major.

**Notes**
Practicum hours required in addition to class meetings. Permission of instructor required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 6

**HAP 791 - Practicum in Public Health**

Credits: 3  
The practicum provides students with an in-depth supervised experience in an approved public health organization. The practicum will require students to complete a project related to an actual public health issue that is a focus within the
Prerequisites
Students must complete all of the core MPH coursework (epidemiology, biostatistics, health education, environmental health, and public health administration) and pass the MPH comprehensive exam with a 70% or better.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

HAP 820 - Analytic Models in Health Services Management, Policy, and Research

Credits: 3
An advanced statistics course in applied linear and multiple regression analysis, including polynomial regression, indicator variables and covariance analysis, model selection and validation, methods for measurement errors, diagnostic methods for outliers, influence and multicollinearity, nonlinear regression, logistic regression with non-normal distributions, correlations, and time-series analysis and forecasting as used in health services administration research and policy analysis.

Prerequisites
HAP 710 or equivalent graduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 821 - Analysis of Categorical Data in Health Policy and Administration

Credits: 3
An advanced statistics course in analysis of categorical data. Topics include tests and measures of association for contingency table analysis, including chi-square, odds ratio, relative risk, comparative trials, analysis of categorical data with matched samples, log-linear models, and logistic regression. Econometric models involving categorical variables could also be covered.

Prerequisites
HAP 710 or equivalent graduate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HAP 822 - Research Designs and Analysis in Pharmaceutical and Health-Related Clinical Trials

Credits: 3
A survey course that introduces students to the design and management of clinical trials research and pharmaceutical research and development, including drug development and FDA drug approval. This course also covers a variety of biostatistical methods as they apply to biomedical and biotechnology industry research with human subjects.

Prerequisites
HAP 710 or equivalent graduate statistics course.
HAP 866 - Politics of Influencing Health Care Policy

Credits: 3
Focuses on process of formulating health care policy and analyzing implications for nursing, administration in nursing, and education and nursing service. Examines current and impending health issues, legislative process, and program implementation evaluation.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HAP 868 - Advanced Research Seminar in Health Policy Analysis

Credits: 3
Seminar on advanced research methods that analyzes theoretical and analytic foundations to critique health services research and health policy analysis. Students synthesize, integrate, and apply theoretical knowledge and advanced skills relevant to health services research, policy analysis, and program evolution.

Prerequisites
HAP 703 or equivalent or permission of instructor.

Notes
Limited to doctoral students having completed core courses in statistics and research design, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Health and Human Services

HHS 201 - Introduction to Careers in the Health Professions

Credits: 3
Acquaints students early in their college education with a variety of health professions careers. Introduces basic medical terminology, provides overview of the health care system, and the current supply and demand for health care professionals. Presents information about educational and licensing requirements as well as expected salaries. Defines professionalism and outlines the principal rights and responsibilities of being a health care professional.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HHS 270 - Applied Human Anatomy and Physiology I

Credits: 4
Fast-paced, condensed course covering basics of human anatomy and principles of physiology.

Prerequisites
Permission of college.

Notes
Must be taken in sequence with HHS 271. Some knowledge necessary in basic biology, chemistry, and cell structure and function. Those lacking this background will be assigned reading during first class to catch up. Successful students are capable of independent work and have many hours to devote to studying anatomy and physiology outside classroom.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HHS 465 - Examination and Integration of Professional and Health Care Issues

Credits: 3
Capstone seminar course synthesizing varied dimensions of a health professional's role in global society. Examines issues in health care through reflection on natural and behavioral sciences, humanities, and other prerequisite course work. Selected topics are examined through reading, writing, and discussion. Builds on knowledge and skills acquired through course work and field experience in the major and general education as well as through life experience. Application of literature in professional practice and related disciplines is expected in both formal and informal writings on issues. Student writings and presentations receive written self-evaluation as well as formal review by peers and multiple faculty members involved in teaching the course. Writing intensive.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion of all general education requirements and English 302. For nursing students: Completion of all junior year nursing courses.

Notes
Required of all undergraduate students enrolled in community health, health systems management, and nursing majors. Meets requirement as synthesis course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HHS 480 - Research Internship in Health and Human Services

Credits: 3
The student works as a member of a team engaged in health and human services research and attends a bi-weekly research seminar. Under direction of the course seminar leader and the faculty research mentor, the student will acquire selected research skills and develop introductory research writing and presentation skills.

Prerequisites
Open only to CHHS majors or students who have completed CHHS minor or certificate courses.
**HHS 597 - Approaches to Quantitative Data Analysis in Health Care Research**

Credits: 3  
Examine univariate and bivariate statistical procedures appropriate for analyzing quantitative health care research data. Includes selecting, applying, and interpreting data analysis procedures.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**HHS 750 - Legal Issues Relevant to Health Care Administration**

Credits: 3  
Prepares health professionals to understand legal principles, statutes, regulations, and case law related to managing health care organizations and health professionals' practice. May compare legal health care issues from domestic and international perspectives.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**HHS 830 - The Scholarship of Writing**

Credits: 3  
Boyer’s framework for scholarship shapes the presentation of theory related to writing for scholarship. Students apply research in composition to inform writing for a variety of scholarly purposes, including overall conceptualization of research papers and proposals, writing for publication, and writing for scientific, creative, quantitative, and qualitative research. Seminar and intensive writing.

**Hours of Lecture or Seminar per week: 3**

**HHS 855 - Ethics in Health Care Administration**

Credits: 3  
Philosophical foundations of health care ethics. Students analyze specific ethical dilemmas faced by administrators in health care settings.

Equivalent to NURS 855

**Prerequisites**  
Admission to PhD program; for non-PhD students, permission of instructor.
Health Education

HEAL 110 - Personal Health
Credits: 3
Focuses on individual and family well-being through integrating fitness, nutrition, human sexuality, consumer health, drug education, and mental health.

HEAL 205 - Principles of Accident Causation and Prevention
Credits: 4
Investigates safety-related problems. Emphasizes fire, home, occupational, and vehicle safety; identification, care, and treatment of various medical emergencies; and violence and property crime prevention.

HEAL 220 - Dimensions of Mental Health
Credits: 3
Focuses on integrating behavioral and sociocultural factors in studying mental health.

HEAL 230 - Introduction to Health Behavior
Credits: 3
Introduces health behavior in context of health psychology. Explores various theoretical models to understand health, illness and sick-role behaviors. Studies health and disease from a biopsychosocial perspective. Examines means of preventing and treating health problems.

Satisfies General Education Requirement: Social and behavioral science
HEAL 310 - Drugs and Health

Credits: 3
Analyzes drug use, with emphasis on positive aspects, and presents alternatives to drug misuse and abuse.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 312 - Health and Wellness Choices

Credits: 3
Actively involves students in becoming managers of their personal health and well-being throughout life span. Consistent with Healthy People 2000 goals for nation. Emphasizes lifestyle activity and fitness, behavioral change, and maintenance.

Notes
May be taken by nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 314 - Community Health Issues and Strategies

Credits: 3
Explores health promotion and disease prevention issues in a range of community health settings: schools, colleges, governmental agencies, municipal organizations, private sector workplaces, community service groups, and health care centers. Issue exploration will be global, national, and local levels.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 323 - Program Leadership and Evaluation

Credits: 3
Covers leadership and evaluation of health, fitness, and recreation programs. Uses computer technology to study evaluative aspects of program planning and administration.

Prerequisites
PRLS 310 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HEAL 325 - Health Aspects of Human Sexuality

Credits: 3
Covers biological, behavioral, and sociocultural factors in human sexual behavior.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 327 - Women's Health

Credits: 3
Examines health issues unique to women, including health care, food and exercise, reproductive and gynecological issues, chronic diseases, and issues of violence.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 330 - Nutrition

Credits: 3
Assesses dietary habits and patterns in relation to nutrient requirements. Emphasizes weight control, diet and fitness, and current nutritional controversies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 350 - Interventions for Populations and Communities at Risk

Credits: 3
Identifies culturally, physically, emotionally, mentally, and demographically diverse populations and communities at risk. Covers implications for developing innovative programs and role of HFRR interventions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 370 - Health Determinants and Status

Credits: 3
Focuses on determining person's health status and health behavior change strategies. Covers skills acquisition in health-risk appraisal, screening, and related instruction.
HEAL 372 - Health Communication

Credits: 3
Applies research-based models and theories of health assessment and promotion at individual, organizational, agency, and community levels. Uses communication approaches and skills in context of behavior change strategies, including policy and program development.

HEAL 402 - Introduction to Driver Education Instruction

Credits: 3
Introduces vehicle operator's tasks in highway transportation system. Provides essential knowledge and skills to instruct driver education.

HEAL 403 - Driver Education Practice and Administration

Credits: 3
Applies driver education to simulated and actual driving environments. Provides essential knowledge and skills to administrate driver education.

HEAL 405 - Teaching Methods in Health Education (K-12)

Credits: 3
Covers content, methodology, and resource materials in teaching health education for physical education teaching majors.

Prerequisites
BSED status or permission of instructor

Notes
Field experience required.
HEAL 430 - Seminar in Exercise Science and Health Promotion

Credits: 3
Provides overview of contemporary and often controversial health issues with analysis of selected problems of current concern to society.

Prerequisites
90 hours

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 450 - Epidemiology and Environmental Health

Credits: 3
Covers incidence, distribution, and causes of diseases and injuries in human populations. Emphasizes essential diagnostics and planning for community health problem-solving with environmental consideration.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

HEAL 470 - Community Health Systems

Credits: 3
Examines complexities of community health and community health system infrastructure. Focuses on planning and navigating multi system agency environment, including population and subpopulation health.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HEAL 480 - Special Topics

Credits: 1-3
Presents selected health issues or problems. Focuses on applying information to education programs.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

HEAL 490 - Internship

Credits: 12
Provides directed experience in observing and participating in health promotion and exercise science programs at community
agencies, health care centers, and private sector organizations.

**Prerequisites**
90 credits or permission of instructor

**Notes**
See internship manual for specific concentration requirements. Minimum period of 10 to 12 consecutive weeks.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 12  
**Grading:** PASS/FAIL

---

**HEAL 499 - Independent Study in Health Education**

Credits: 1-3  
Studies problem area in health education research, theory, or practice under faculty direction.

**Prerequisites**
90 credits or permission of instructor

**Notes**
May be repeated, but no more than 3 credits may be earned.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

---

**HEAL 516 - Program Development and Resources in Health Education**

Credits: 3  
Open to licensed and provisionally licensed health and physical education teachers in the commonwealth of Virginia and students in ASTL physical education program. Focuses on program development, health content, methodology, and resources for teaching preK-12 health education.

**Notes**
Distance learning course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**Hebrew**

---

**HEBR 101 - Elementary Hebrew I**
Credits: 3
Designed for students with no knowledge of Hebrew. Introduction including grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

**HEBR 102 - Elementary Hebrew II**

Credits: 3
Continuation of HEBR 101.

**Prerequisites**
HEBR 101 or equivalent.

**Notes**
Lab work required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

**HEBR 150 - Introduction to Biblical Hebrew**

Credits: 3
Introduces basic vocabulary, grammar, and development of reading skills with introduction to religion and culture of ancient Israel that produced the Hebrew Bible/Old Testament.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**HEBR 160 - Readings in Biblical Hebrew**

Credits: 3
Continuation of HEBR 150 to increase students' proficiency in vocabulary and understanding of morphology and syntax. Selected passages from Hebrew Bible read; students introduced to text formation and analysis.

**Prerequisites**
HEBR 150 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HEBR 201 - Intermediate Hebrew I**
Credits: 3
Further development of skills acquired in HEBR 101 and 102, including grammar, oral expression, listening comprehension, reading, and writing.

Prerequisites
HEBR 102 or equivalent.

Notes
Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

HEBR 202 - Intermediate Hebrew II

Credits: 3
Continuation of HEBR 201.

Prerequisites
HEBR 201 or equivalent.

Notes
Lab work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

History

HIST 100 - History of Western Civilization

Credits: 3
History of Western civilization from ancient Mediterranean origins through medieval and modern development of Europe to contemporary world.

Satisfies General Education Requirement: Western civilization/world history

Notes
Students who take HIST 100 may not receive credit for HIST 101 or HIST 102.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 101 - Foundations of Western Civilization

Credits: 3
Evolution of Western culture from ancient Mediterranean world to formation of modern Europe in 17th century.

Notes
Students may not receive credit for HIST 101 if they have taken HIST 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 102 - Development of Western Civilization

Credits: 3
History of Western institutions and ideas from 17th century to the present.

Notes
Students may not receive credit for HIST 102 if they have taken HIST 100.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 121 - Formation of the American Republic

Credits: 3
Social, political, economic, and intellectual growth of American institutions from colonization through Reconstruction.

Satisfies General Education Requirement: Social and behavioral science

Notes
Students may not receive credit for HIST 121 if they have taken HIST 120.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 122 - Development of Modern America

Credits: 3
History of the United States since 1877.

Satisfies General Education Requirement: Social and behavioral science

Notes
Students may not receive credit for HIST 122 if they have taken HIST 120.
HIST 125 - Introduction to World History

Credits: 3
Analytical approach to world history overview that surveys major features of principal existing civilizations of world, as originally formed and as altered by key global processes including forces of modernity.

Satisfies General Education Requirement: Western civilization/world history

HIST 130 - History of the Modern Global System

Credits: 3
Provides understanding of processes that have shaped modern world. Beginning in 1500, traces developments that reorganized peoples, reshaped cultures, and generated new economies in interaction between Western and non-Western societies. Focuses on Western and non-Western regions of world, and their participation in global networks resulting from mercantile expansion, industrial revolution, imperialism, nationalism, and legacies in postcolonial period.

Satisfies General Education Requirement: Global understanding

HIST 200 - Freshman/Sophomore Seminar in U.S. History

Credits: 3
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisites
Freshman or sophomore standing.

Notes
Topics vary.

HIST 201 - Freshman/Sophomore Seminar in European History
Credits: 3
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisites
Freshman or sophomore standing.

Notes
Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 202 - Freshman/Sophomore Seminar in Global History

Credits: 3
Focuses on skills, methods of learning, and subject matter to introduce discipline of history.

Prerequisites
Freshman or sophomore standing.

Notes
Topics vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 251 - Survey of East Asian History

Credits: 3
Surveys history of China and Japan from prehistoric times to ca. 1600.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 252 - Survey of East Asian History

Credits: 3
Surveys history of China and Japan from early modern times (ca. 1600) to present.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 261 - Survey of African History

Credits: 3
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3

HIST 262 - Survey of African History

Credits: 3
Focuses on the sub-Saharan region and examines evolving systems of kinship power, spirituality, and slavery. Explores the interactions between Africans and global influences from the religions of the book and colonialism to the politics of development and continuities and changes in production. HIST 261 surveys African history from the earliest times to 1800. HIST 262 surveys African history from 1800 to the present.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 271 - Survey of Latin American History

Credits: 3
Surveys colonial era to 1825. Emphasizes interactions of United States, Latin America.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 272 - Survey of Latin American History

Credits: 3
Surveys development of independent Latin America since 1825. Emphasizes interactions of United States, Latin America.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 281 - Survey of Middle Eastern Civilization

Credits: 3
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys period from rise of Islam in 570 to medieval period (ca. 1258)

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 282 - Survey of Middle Eastern Civilization

Credits: 3
Survey of Middle Eastern history from rise of Islam to present, emphasizing processes that led to emergence of economic, cultural, social, and political institutions that characterize region today. Surveys medieval period to present.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 298 - History and the Web

Credits: 1
Introduces techniques and methods of creating historical web sites. Overview of historical resources on web, including Internet archives, hypertext scholarly articles, and online exhibits. Examines new narrative and interpretive possibilities for doing history.

Notes
Combines lecture, lab.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

HIST 299 - Databases for Historians

Credits: 1
Introduces techniques and methods to create historical databases. Overview of web, CD-ROM, and personal databases helpful for historical research. Examines database as electronic archive and interpretive and analytical tool.

Notes
Combines lecture and lab.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
HIST 300 - Introduction to Historical Method

Credits: 3
Introduces research skills and methods, as well as historical interpretation, culminating in written and oral presentations.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
ENGL 302; COMM 100, 101 or 104; or permission of instructor.

Notes
Topics vary according to instructor. History majors strongly urged to take HIST 300 early in their program of upper-level courses. Grade of C or better is required to graduate with BA in history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 301 - Classical Greece

Credits: 3
Political, social, economic, and cultural history of classical Greece from development of the city-state through 5th century.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 302 - Classical Rome

Credits: 3
Political, social, economic, and cultural history of classical Rome from founding of the city through fall of Roman republic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 304 - Western Europe in the Middle Ages

Credits: 3
Survey of development of European society from collapse of Roman rule in 5th century to advent of Black Death in 14th century. Emphasizes political, social, cultural, and intellectual growth of society that developed from Roman, Catholic, and Germanic roots.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 305 - The Renaissance

Credits: 3
Survey considering Renaissance as phenomenon rather than chronological period. Emphasizes growth of humanism in Italy in 14th and 15th centuries, development of new political concepts, and laicization of society. Includes transmission of these developments to transalpine Europe in late 15th and 16th centuries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 306 - The Reformation

Credits: 3
Late medieval ecclesiastical conditions and reform movements, late scholasticism, Protestant Reformation, Catholic Reformation, dynastic rivalries, and religious wars. Concludes with Peace of Westphalia.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 307 - Old Regime and Revolutionary Europe

Credits: 3
Political, social, economic, and cultural history of Europe from 1648 to 1815. Crisis of authority, consolidation of the state, absolutism, colonial expansion, the Scientific Revolution and the Enlightenment, and the French Revolution and Napoleon.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 308 - Nineteenth-Century Europe

Credits: 3
History of Europe from Congress of Vienna to outbreak of World War I.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 309 - Europe in Crisis: 1914-1948

Credits: 3
Two world wars, the Great Depression, and political and cultural revolutions transformed Europe as never before. Explores causes and consequences of these tumultuous events, and concludes with consideration of reconstruction that caps period.

Prerequisites
45 credits or permission of instructor.
HIST 312 - Nationalism in Eastern Europe

Credits: 3
Examines history of modern Eastern Europe from mid-19th century through collapse of communist regimes in 1989, and includes focus on Yugoslav wars of 1990s. Nationalism provides organizing theme; topic approached through literature, political, social, cultural, and new media sources. Class sessions emphasize discussion of central issues and sources.

HIST 314 - History of Germany

Credits: 3
Political, diplomatic, economic, social, and cultural development of Germany from dissolution of Holy Roman Empire to present.

HIST 321 - Early Modern England

Credits: 3
History of England from late 15th to mid-18th century, focusing on social, political, economic, and cultural changes of period with particular attention to English Reformation and causes and consequences of English Civil War.

HIST 322 - Modern Britain

Credits: 3
History of Britain from mid-18th century to present. Focuses on social, political, and economic transformations of industrialization; culture of 19th-century industrial society; problems of late 19th-century economic competition and imperialism; creation of welfare state; and experience of post-World War II political, social, and economic realignments.

HIST 328 - Rise of Russia
HIST 329 - Modern Russia and the Soviet Union

Credits: 3
Russia and the Soviet Union from the early 20th century to the present. Focuses on the Russian Revolution and the political, social, cultural, and economic developments of the Soviet and post-Soviet eras.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 330 - The United States Since World War II

Credits: 3
Examines major domestic and foreign policy factors that shaped American experience from World War II to present. Includes political, social, and economic forces as they affected nation's history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 331 - Postwar United States, 1945-1973

Credits: 3
Examines political, cultural, and economics history in the three decades after 1945. Themes include the emergence of the civil rights movement and feminism; the domestic and international events of the Cold War, especially the Vietnam War; and the rise and fall of the presidency's prestige in the years of the Great Society and Watergate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 332 - United States since 1973

Credits: 3
Examines political, cultural, and economics history since the end of the Vietnam War. Themes include the shifting political economy of the country during the resurgence of conservatism, the political debates over culture and identity, and the waning of the Cold War and its replacement with other international concerns.
HIST 335 - The African American Experience in the United States: African Background to 1885

Credits: 3
History of African American experience in United States including African origins; trans-Atlantic slave trade; development of slavery in colonial, revolutionary, and antebellum periods; abolitionist movements; and African American participation in Civil War and during Reconstruction.

Prerequisites
6 credits of history, or permission of instructor.

HIST 336 - The African American Experience in the United States: Reconstruction to the Present

Credits: 3
History of African American life in post-slavery America, and rise and consequences of racial segregation in 19th and 20th centuries. Examines African American response to continued racial inequality and repression. Covers great migration, urbanization, black nationalism, and civil rights era, as well as contemporary debates about race.

Prerequisites
6 credits of history or permission of instructor.

HIST 340 - History of American Racial Thought

Credits: 3
Introduces history of American racial thought, with particular emphasis on relationship between social theory and social practices of racism in American life. Examines origins.

HIST 341 - History of Sport in the United States
Credits: 3
Examines the roots of American sport in colonial play and recreation, the emergence of organized and national sports, issues of gender and race in the sporting world, and the intersection of U.S. sport with events such as the Civil Rights Movement and the Cold War.

Hours of Lecture or Seminar per week: 3

**HIST 342 - The African American Experience in Modern Sport**

Credits: 3
Examines the history of African American athletes and their experiences with the sporting world from the late nineteenth century to the present. Explores African Americans' relationship to various sports against the backdrop of important historical moments in the U.S. Studies scientific racism and black athletic superiority, the experience of African American women in sport, and sport and celebrity culture.

Hours of Lecture or Seminar per week: 3

**HIST 343 - Gender and Modern American Sport**

Credits: 3
Examines the history of the gendering of U.S. sport from the late nineteenth century to the present. Explores how masculinity and American sport became wedded in the nineteenth century; women athletes' efforts to compete against the backdrop of changing American attitudes toward gender, femininity, and sexuality; and contemporary gender and sport issues.

Hours of Lecture or Seminar per week: 3

**HIST 344 - The Rise of American Popular Entertainment and Sport**

Credits: 3
Examines the history of the growth of sport in the context of the emergence of a mass popular culture in the U.S. during the early part of the twentieth century. Explores the emergence of working-class leisure, the growth of popular music, film and amusement parks, and changes to American sport.

Hours of Lecture or Seminar per week: 3

**HIST 345 - History of American Foreign Relations**

Credits: 3
Survey of American diplomacy from Revolutionary War to present, with emphasis on 20th-century issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 350 - U.S. Women's History

Credits: 3
History of women and their changing status and gender roles in American society from colonial period through "second wave" of feminism in 1970s. Explores images and lives of women of different class, ethnic, and regional origins. Also focuses on women's political, economic, and legal conditions, and changes in them.

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 351 - History of the Old South

Credits: 3
History of South to outbreak of Civil War, with particular emphasis on rise of sectionalism. Focuses on development of distinct Southern culture through emergence of economic, political, social, agricultural, and intellectual institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 352 - The South since 1865

Credits: 3
History of South during Reconstruction, Redeemer era, and New South, with particular emphasis on race relations. Covers political, economic, cultural, and intellectual development from aftermath of war.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 353 - History of Traditional China

Credits: 3
China from earliest times to period of modern Western intrusion. Development of traditional Chinese culture, society, and government.

Prerequisites
6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 354 - Modern China
Credits: 3
China from 1644 to the People's Republic of China. Emphasizes coming of West and various stages of Chinese reaction.

Prerequisites
6 credits of history or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 356 - Modern Japan

Credits: 3
Japan from Meiji Restoration to World War II. Emphasizes Japan's modernization in face of challenge.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 357 - Postwar Japan

Credits: 3
History of Japan from World War II to present. Examines Japanese experience of several key moments: Japan's defeat in Pacific War, reconstruction during U.S. occupation, rise to economic prominence during 1960s and 1970s, and cultural and international identity crisis during 1980s and 1990s.

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 358 - Post-1949 China

Credits: 3
Puts People's Republic of CHINA (PRC) into historical context by assessing legacies of China's socialist revolution (1949-1976) and post-socialist reforms (1978-present). Explores revolutionary heritage of the Chinese Communist Party, goals and agendas of China's socialist state, ideologies and policies shaping urban and rural development, individual agency and responses to revolutionary mass mobilization and market reforms.

Satisfies General Education Requirement: Global understanding

Prerequisites
6 credits of history or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 360 - History of South Africa

Credits: 3
Explores the historical processes that led to the rise of African kingdoms, colonialism, industrialization, resistance movements, and legalized segregation.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

HIST 364 - Revolution and Radical Politics in Latin America

Credits: 3
During 20th century, Latin America has witnessed both peaceful political movements and violent revolutions aimed at achieving social justice. Considers several of these movements in comparative perspective: Mexican Revolution, Arbenz government in Guatemala, Allende regime in Chile, Cuban and Nicaraguan revolutions, and Brazilian Worker's Party.

Satisfies General Education Requirement: Global understanding

Prerequisites
6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 365 - Conquest and Colonization in Latin America

Credits: 3
Examines forms of conquest and colonization practiced by Aztec, Inca, Spanish, and Portuguese in what is now Latin America. Includes role of ideology and religion in imperial rule, use of warfare to create empires and colonies, and implementation of political and economic systems to rule subject people.

Satisfies General Education Requirement: Global understanding

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 366 - Comparative Slavery
Credits: 3
Examines systems of slavery from ancient world to modern world, with special emphasis on Atlantic slave trade and slave societies in Latin America and Anglo America. Considers impact of slaves and slavery on cultural, economic, and political systems in Africa and Americas from 16th to 19th centuries.

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 367 - History, Fiction, and Film in Latin America

Credits: 3
Explores modern Latin American history through different types of texts: scholarly histories, historical novels, fictional films, documentary films, and oral history. Explores ways these texts produce knowledge about the past. What motivates different approaches? What counts as evidence? How do we know what really happened? How do we decide what mattered and what did not? Also introduces several important episodes in 20th century Latin American history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 370 - War and American Society

Credits: 3
Examines war and American society from the colonial period to the post-Cold War era, including how military institutions, war, and the preparation for war have affected American society, and how Americans have thought about military service, experience war, and made peace through their history. Special emphasis on civil-military relations and the role of war and militarism in American culture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 373 - The Civil War and Reconstruction

Credits: 3
Analyzes the history of the American Civil War from its origins in the late 18th century to the withdrawal of federal troops from the south in 1877. Examines the political, social, and economic issues that led to war; the home fronts, war leadership, diplomacy, combat motivation, and grand strategy; problems associated with reconstituting the nation's political institutions; and the integration of millions of newly freed slaves.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 377 - The Vietnam War
Credits: 3
Covers the causes, major events, and legacies of America's Vietnam War, including an introduction to Vietnamese history and culture, American decisions for war, strategy and major military engagements, diplomacy and peace talks, and the aftermath of the conflict in Vietnam and United States.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 386 - Topics in History**

Credits: 3
Study of historical topics of special interest.

**Notes**
Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 387 - Topics in Global History**

Credits: 3
Study of historical topics or periods of special interest in global, Latin American, African, Asian, or Middle Eastern history.

Satisfies General Education Requirement: Global understanding

**Notes**
Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 388 - Topics in European History**

Credits: 3
Study of historical topics or periods of special interest.

**Notes**
Topics announced in advance. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 389 - Topics in U.S. History**
Credits: 3
Study of historical topics or periods of special interest.

Notes
Topics announced in advance. May be repeated for credit when topic is different.

HIST 390 - The Digital Past

Credits: 3
Teaches the fundamentals of information technology within the context of a history course. Students learn fundamentals and skills as well as how our society became so enamored of and dependent on these knowledge and information tools. Understanding a new technology requires understanding how new technologies transform the societies that embrace them. Emphasizes the use of free and open-source software whenever possible.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 391 - History of Virginia to 1800

Credits: 3
Discovery and settlement of Virginia. Colonial period with emphasis on development of representative government and race relations, Golden Age of Virginia dynasty, and coming of Civil War.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 392 - History of Virginia Since 1800

Credits: 3
Decision to secede, Civil War and Reconstruction, Readjustors and Populism, disfranchisement and Constitution of 1902, and rise of Senator Harry F. Byrd. Recent developments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 393 - Topics in Film and History

Credits: 3
Study of historical periods or topics from perspective of feature films and documentaries.

Notes
Topics available in advance in History Department. May be repeated when topic is different. Maximum 6 credits may be applied to history major.

**HIST 398 - Historical Study Abroad**

Credits: 1-6
Intended for participation in formally organized course offered by Center for Global Education during intersession or spring break.

**Notes**
May be repeated for credit with permission of department for a maximum of 6 credits.

**HIST 399 - Internship**

Credits: 1-9
Approved work-study programs in cooperation with specific organizations including area museums; archives; historic sites; and local, state, and federal agencies.

**Prerequisites**
History majors with permission of undergraduate coordinator.

**Notes**
Credit determined by department.

**HIST 401 - Colonial America**

Credits: 3
Intensive study of colonial American history from European origins through Revolutionary War.

**HIST 403 - Revolutionary Era in American History, 1763-1812**
Credits: 3
Study of formative years of new republic from Treaty of Paris of 1783 to election of 1820.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 404 - Jacksonian America, 1812-1854

Credits: 3
Study of age of Andrew Jackson. Emphasizes democratic institutions that emerged as dominant influences in American society.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 409 - Between the Wars: The United States, 1919-1941

Credits: 3
Intensive study of political, social, economic, and diplomatic developments in 1920s and 1930s.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 417 - History of Metropolitan Washington

Credits: 3
Examines urban and suburban growth in Washington, D.C., and its suburbs in Maryland and Virginia since 1790, in context of U.S. urban history.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 418 - Ethnic Groups in America

Credits: 3
Explores ethnicity and race in American urban society by comparing experiences of different ethnic groups as migrants to American cities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 426 - The Russian Revolution
Era of revolutionary activity from 19th century to end of 1920s, with emphasis on Russian Revolutions of 1917. Explores why revolutionary situation developed; political, social, and cultural issues at stake; why it took various forms; and revolution's contribution to nature of Soviet state and post-Soviet problems.

**Prerequisites**
45 credits or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HIST 431 - Medieval Intellectual Topics

Credits: 3  
Selected topics in intellectual history of Middle Ages. Topics vary, depending on discipline of instructor.

Equivalent to ENGL 431/FREN 431

**Notes**
May be taken for credit by English or history majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HIST 435 - Society and Culture in Early Modern Europe

Credits: 3  
Examines social and cultural lives of Europeans from end of Middle Ages to Industrial Revolution. Emphasizes popular and elite culture, as well as bridges and interrelationships between them. Focuses on religious, artistic, literary, and recreational behavior. Covers political activity and riots, strikes, royal receptions, and rituals.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HIST 436 - European Society and Culture: 19th and 20th Centuries

Credits: 3  
Examines major cultural trends in Europe since French Revolution. Major themes include romanticism; socialism; Marxism; and social effect of modernization, science, and societies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### HIST 455 - History of Print Journalism
Credits: 3
Development of print journalism from inception to present, with emphasis on interaction of technology, audience, and
government intervention. Topics include birth of press; development of modern newspaper and American development, including
Revolutionary and Civil wars; rise of independent press; and yellow journalism.

Equivalent to COMM 455

Prerequisites
3 credits in COMM or HIST courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 460 - Modern Iran

Credits: 3
Modern Iran, from 1800 to present, in context of several broad themes: institutional structure of state; role of great powers in Iran
and Iranian response to economic, military, technological, and ideological challenge posed by West; interaction of religion and
other ideologies and politics; economic development and impact on politics and society; and ways historians have sought to
understand and interpret modern Iranian history.

Satisfies General Education Requirement: Global understanding

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 461 - Arab-Israeli Conflict

Credits: 3
Some knowledge of history of Middle East since World War I strongly advised. Overview of history of Arab-Israeli conflict.
Examines conflict from various perspectives: conflict over land and between competing nationalisms and identities; in terms of
national interests of various states, including Israelis and Palestinians as well as other Arab governments and great powers; and in
terms of peace making and conflict resolution.

Prerequisites
45 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 462 - Women in Islamic Society

Credits: 3
Surveys history of women in Islamic society from rise of Islam to present day. Examines historical processes that affected role
and status of women in society, and specific topics around which issues of gender status and identity coalesced, especially in modern period.

Satisfies General Education Requirement: Global understanding

Prerequisites
6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 465 - The Middle East in the 20th Century

Credits: 3
Political, social, and cultural history of Middle East since World War I. Emergence of Israel, Arab nationalism, and political and economic influence of Middle East in world affairs.

Prerequisites
6 credits of history or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 466 - Origins of Conflict in Southern Africa

Credits: 3
Explores historical origins of conflict in South Africa, focusing on themes of economic change, cultural interaction, and political consolidation during past five centuries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 480 - Alexander the Great

Credits: 3
Rise of Persia, Persian wars with Greece, subjugation of Greece by Philip II of Macedonia, and Alexander the Great and his conquest of Persian empire.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 490 - Honors Directed Readings, Honors Directed Research
Credits: 3
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisites
Admission to history honors program and permission of instructor

Notes
The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Involves directed readings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 491 - Honors Directed Readings, Honors Directed Research

Credits: 3
Students must have completed at least one course in the field, or with the professor, chosen for these honors courses.

Prerequisites
Admission to history honors program and permission of instructor

Notes
The 3 reading credits should be taken before 3 research credits, though they may be taken concurrently. Either may be taken concurrently with HIST 499. Linked, individualized courses, usually given by same instructor. Culminates in research paper related to subject of readings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 498 - Directed Readings/Research in History

Credits: 1-3
Readings, research conducted on individual basis in consultation with instructor.

Prerequisites
History majors with 90 credits and permission of instructor.

Notes
Student may not present more than 3 credits for graduation credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 499 - Senior Seminar in History

Credits: 3
Research on specialized historical topic culminating in seminar paper and oral presentation. Synthesis course; students expected
to integrate knowledge and skills acquired in general education courses.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
History majors with 90 credits, HIST 300, and completion or concurrent enrollment in all university general education courses.

**Notes**  
Subject determined by instructor. Student may present no more than 3 credits for graduation credit. Must receive passing grade to graduate with BA in history.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Not offered in summer.

---

**HIST 510 - Approaches to Modern World History**

Credits: 3  
Introduces historical study of world beyond Europe and United States. Students read major theoretical works and case studies of particular regions. Examines imperialism, national identity, and various forms of popular resistance; familiarizes students with range of scholarly approaches, including world systems theory and subaltern studies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 523 - Issues in American History**

Credits: 3  
Reading, analysis of selected problems.

**Notes**  
Open to advanced undergraduates and graduates. Topic determined by instructor. Course may be repeated when content differs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HIST 524 - Issues in European History**

Credits: 3  
Reading, analysis of selected problems.

**Notes**  
Open to advanced undergraduates and graduates. Topic determined by instructor. Course may be repeated when content differs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HIST 525 - Problems in Latin American History

Credits: 3
Analysis of selected problems. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes
Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 535 - Problems in Comparative World History

Credits: 3
Investigates selected problems in global and comparative history, covering multiple countries or world regions.

Notes
Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 555 - Problems in Asian History

Credits: 3
Discussion of readings and historical interpretations and compilation of a comprehensive bibliography on given theme.

Notes
Subjects announced by instructor. Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 565 - Problems in African History

Credits: 3
Analysis of selected problems in African history. Emphasis on reading and discussion of historical interpretations and development of bibliography.

Notes
Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 585 - Problems in Middle Eastern History

Credits: 3
Analyzes selected problem. Emphasizes reading and discussion of historical interpretations, and development of bibliography.

Notes
Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 598 - Historical Study Abroad

Credits: 1-3
Intended for participation in formally organized course offered by the Center for Global Education.

Notes
May be repeated for credit for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 601 - Themes in U.S. History I

Credits: 3
Survey of U.S. History prior to 1877. Designed for individuals entering the graduate program who need to strengthen preparation in area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 602 - Themes in U.S. History II

Credits: 3
Continuation of HIST 601.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 605 - Themes in European History I

Credits: 3
Survey of European history from 1500 to 1815. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 606 - Themes in European History II

Credits: 3
Survey of European history from 1815 to present. Designed for individuals entering graduate program who need to strengthen preparation in this area, or who seek to enhance knowledge of latest interpretations in field. Stresses factual knowledge and its interpretation.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 610 - The Study and Writing of History

Credits: 3
Methodology of the historian including techniques of research, use of documentation and other sources, development of bibliography, and synthesis of material.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 613 - The Colonial Origins of American Society

Credits: 3
Study of evolution of elements in colonial society that affect contemporary American institutions and patterns of behavior.

Prerequisites
Graduate standing.

**HIST 615 - Problems in American History**

Credits: 1-6  
Readings and discussion of bibliographies, interpretations, and research trends in topics selected by instructor.

**Prerequisites**  
Graduate standing.

**Notes**  
Course may be repeated when content differs.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**HIST 616 - U.S. Westward Movement**

Credits: 3  
Investigates continuity and change in American West. Topics include economic development, ethnicity, rural and urban life, and role of federal government.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 617 - Topics in the American Civil War Era**

Credits: 3  
Joint project of instructor and students into various aspects of common topic in Civil War era, with emphasis on historiography and historical method.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 618 - The Age of Jackson, 1815-1854**
Credits: 3
Survey of social, cultural, intellectual, economic, and political changes in United States during period of rapid growth and expansion. Topics include second-party system; growth of sectionalism, nationalism, and expansionism; industrialization and spread of market economy; rise of romantic reform and evangelical religion; and growth of abolitionist and proslavery movements.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 619 - The Constitution, Civil Liberties, and the Supreme Court

Credits: 3
Investigates evolution of civil liberties in American history, and interaction of three branches of government in applying various constitutional guarantees. Students read extensively in Supreme Court decisions and secondary literature, and undertake independent research.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 620 - Development of the Early Republic, 1783-1815

Credits: 3
Investigates breakdown of Confederation, Constitutional Convention, and role of revolutionary ideology of republicanism. Discusses leadership and policies of republic in hostile international context. Students read extensively in monographic literature and prepare research paper.

Prerequisites
Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 621 - Virginia and the American Revolution

Credits: 3
Detailed examination of Virginia society on eve of American Revolution, and role in events from 1750 to 1789. Combines lectures, discussion of major themes, ideas, and personalities.

Prerequisites
Graduate standing.
HIST 623 - Recent U.S. History, 1945 to Present

Credits: 3
Selected political, social, economic, diplomatic, and cultural forces that shaped the post-World War II American experience.

Prerequisites
Graduate standing.

HIST 624 - U.S. Diplomatic History

Credits: 3
Study of selected issues in American foreign relations and changing historical interpretations of American diplomacy.

Prerequisites
Graduate standing.

HIST 626 - Approaches to American Culture

Credits: 3
Focuses on various approaches historians have taken to history of American culture: questions they asked, assumptions they made, disciplinary tools they used, and types of materials they analyzed. Concentrates on patterns of culture, and what they say about American past and present.

Prerequisites
Graduate standing.

HIST 628 - Immigration and Ethnicity in the United States

Credits: 3
Examines immigration and ethnicity in America since 1840. Considers why immigrants came, from where, under what circumstances, and how they adapted. Examines immigration policy and American attitudes toward immigration and ethnicity.
**HIST 629 - The Gilded Age and Progressive Era**

Credits: 3  
Examines history of United States from 1877 to 1918, with attention to history of reform movements and politics, and social history of the period. Familiarizes with major issues and historical literature of the period.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 630 - U.S. Women's History**

Credits: 3  
Wide-ranging survey of burgeoning field of women’s history, emphasizing critical evaluation of sources and interpretation. Readings represent variety of approaches, which may include material culture studies, medical history, history of sexuality, political history, and social and cultural history.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 631 - Era of the American Revolution**

Credits: 3  
Examines history and historiography of revolutionary era, with special emphasis on social and ideological interpretations of period. Includes events leading to War for Independence, war itself, and social and political effects of war on American society.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HIST 633 - Reconstruction

Credits: 3
Examines panoply of political, social, economic, and constitutional concerns from 1863 to 1880, as North and South struggled over outcome of Civil War. Addresses political institutions and power in postwar North and South, and place of former slaves in society, politics, and economy.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 634 - Interwar America: 1918-1939

Credits: 3
Considers issues of United States between the two world wars. Explores various ways issues complemented and contradicted each other in rich and complex historical era.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 635 - Problems in European History

Credits: 3
Investigates selected problems. Readings, discussions, development of bibliographies. Primary sources used where possible.

Prerequisites
Graduate standing.

Notes
Course may be repeated when content differs.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

HIST 636 - Political Culture in Twentieth-Century Germany and Austria: Continuities and Discontinuities

Credits: 3
Recent interpretations of key political events of 20th century. Asks if there were fundamental continuities in structure of German and Austrian society that can be observed throughout the period under review.
HIST 637 - Great Britain: Empire to Commonwealth, 1870-1970

Credits: 3
Examines rise of "new imperialism" in Great Britain from 1870 to end of empire, and gradual formation of Commonwealth of Nations.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 638 - Western Europe in the Post-War Period

Credits: 3
Examines process of reconstruction, reconciliation, and integration in Western Europe in 20 years after World War II.

Prerequisites
Graduate standing.

Notes
Conducted as readings colloquium.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 639 - Society and Politics in Western Europe, 1750-1914

Credits: 3
Focuses on changes in social conditions and ramifications in political life. Attention to urbanization of workers, changes in peasantry, growth of middle classes, decline of nobility, and major political developments and expansion of liberal reforms.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 640 - Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries
Credits: 3
Studies individual cities, and investigates particular cities in depth. Considers economic, social, cultural, and political features of urban life.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 642 - Humanism and the Renaissance

Credits: 3
The Renaissance as a unique period in European cultural history from ca. 1350 to 1520. Concentrates on Italian situation as standard, with consideration given to manifestations of Renaissance in northern Europe, especially Germany, until Reformation. Focuses on recent studies of political, social, intellectual, and religious changes. Students write class reports and a larger bibliographic paper.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 643 - Religion and Society in the Reformation Era

Credits: 3
The Reformation, ca. 1500 to 1650, was a time of major religious, intellectual, social, and political upheaval in European history. Investigates reasons for changes, and effects on European society. First half focuses on Germany, but major events throughout Europe are studied.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 644 - Society and Culture in Early Modern Europe

Credits: 3
Overview of most recent historical work on social and cultural history of premodern West, ca. 1400 to 1800. Uses theoretical approaches and empirical methodologies of other disciplines, especially social anthropology, sociology, and literary theory, to shed new light on popular culture, class, manners, taste, rituals, religion, language, gender, and the state. Formulates new topics of research and poses new questions, and suggests new approach to more traditional topics such as politics, religion, and ideas.

Prerequisites
Graduate standing.
HIST 645 - The Russian Revolution and the Origins of the Soviet State

Credits: 3
Period between 1890 and 1924 with concentration on sources of Bolshevism, problems of old regime as they led to revolutions of 1905 and 1917, and establishment of new regime and its survival in environment of foreign and civil war.

Prerequisites
Graduate standing.

HIST 670 - Introduction to Behavioral History

Credits: 3
Analyzes and investigates the historical origins and development of contemporary behaviors and values, with particular emphasis on how these behaviors and values, as well as our perceptions of them, have changed over time and place.

HIST 689 - Teaching and Learning History in the Digital Age

Credits: 3
Examines what happens when instructors integrate new media technology into history classroom. Includes consideration of learning theory, new media theory, and an in-depth examination of state-of-the-art in practice. In the final third of semester, students produce practicum that is either working history teaching web site or concept paper for site, depending on student's degree of technical sophistication. No prior facility with information technology required. Course appropriate for graduate students working as teachers or planning career in teaching.

Prerequisites
Graduate standing.

HIST 690 - The Administration of Archives and Manuscripts

Credits: 3
Introduces principles and practices of managing records and administering archival and manuscript collections, public and
private. Designed for graduate students with special interest in historical sources as well as for those specializing in applied history.

**Prerequisites**
6 credits of U.S. history, or permission of department. Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 691 - Museum Studies**

Credits: 3  
General introduction to museums of history and museum studies in the United States, intended for interested citizen as well as for assistance to students in course and career choices. Explores development, present state, and future possibilities of U.S. Museums, with some reference to international developments.

**Prerequisites**
6 credits of U.S. history or permission of department. Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 692 - Historical Editing**

Credits: 3  
Introduces fundamentals of historical editing of documents, including microform, word processing, and computer techniques. Designed for those seeking introduction to various areas of applied history, and those intending to edit historical documents for publication.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**HIST 693 - Historic Preservation**

Credits: 3  
General introduction to historic preservation in the United States, intended for interested citizen and to assist students in course and career choices. Explores development, present state, and future possibilities of historic preservation in the United States, with some reference to international aspects of preservation.

**Prerequisites**
6 credits of U.S. history or permission of department. Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
HIST 695 - History Symposium

Credits: 1-3
Subject of academic and community interest pursued through discussions and lectures by distinguished guest instructors.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 696 - Clio Wired: An Introduction to History and New Media

Credits: 3
Students with limited computer competency should consult department before enrolling. Introduces changes that new media and technologies are bringing to how we research, write, present, and teach about the past. Students explore theoretical and historical issues as well as learn hands-on skills in digital history.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 697 - Creating History in New Media

Credits: 3
Seminar; students create original historical projects in digital media.

Prerequisites
HIST 696 or permission of instructor. Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HIST 711 - Research Seminar in U.S. History

Credits: 3
Research in specialized topics using primary sources.

Prerequisites
HIST 610 or permission of department.

Notes
Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**HIST 731 - Research Seminar in European History**

Credits: 3  
Research in specialized topics using primary sources.

**Prerequisites**  
HIST 610 or permission of department.

**Notes**  
Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HIST 751 - Research Seminar in Comparative World History**

Credits: 3  
Research seminar requiring comparative research and analysis. Organized around significant topic or theme in field of world history.

**Prerequisites**  
HIST 610 or permission of department.

**Notes**  
Topics vary from year to year. Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**HIST 790 - Comprehensive Readings in U.S. History**

Credits: 3  
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate experience, student and instructor design reading list to round out preparation for exam.

**Notes**  
To be taken in final semester of program.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0
HIST 791 - Comprehensive Readings in Comparative World History

Credits: 3
Integrates past work in major field and fills gaps before comprehensive exam. After a review of graduate course work, student and instructor design reading list to round out preparation for exam.

Notes
To be taken in final semester of program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 792 - Comprehensive Readings in European History Since 1500

Credits: 3
Integrates past work in major field and fills gaps before comprehensive exam. After review of graduate experience, student and instructor design reading list to round out preparation for exam.

Notes
To be taken in final semester of program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 794 - Internship in Applied History

Credits: 3-6
All internship placements must be approved by the department to ensure suitability to student's program. Introduces applied history through work and study at historical museum, site, library archive, editing project, or other approved agency.

Prerequisites
3 credits of applied history in appropriate area and 12 credits in major field, or permission of internship director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 796 - Directed Readings

Credits: 1-6
Independent reading on topic agreed to by student and faculty member.

Notes
Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
HIST 798 - Directed Research and Writing in History

Credits: 3
Intended for students in department's predoctoral track who are not writing master's thesis. Goal is to produce substantial and original contribution to historical knowledge on model of article in scholarly journal.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 799 - Thesis

Credits: 1-6
Master's thesis research and writing under direction of faculty committee.

Notes
May not be taken prior to successful completion of comprehensive exam.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

HIST 800 - Studies for the Doctor of Philosophy in Education

Credits: 3-7
Program of studies designed by discipline director and approved by doctoral committee, which brings student to participate in research of discipline director and results in paper reporting original contributions of student.

Prerequisites
Admission to PhD in education program to study history.

Notes
Enrollment may be repeated.

HIST 801 - New Developments in History

Credits: 3
Survey of current developments in historical analysis and methodology.

Prerequisites
Doctoral standing; or permission of instructor and HIST 610 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
HIST 802 - Readings for Doctor of Arts in Community College Education

Credits: 1-6
Intensive reading of recent scholarship in broad areas of historical study. With advisor, students develop readings list and define at least three areas in which to prepare readings courses.

Prerequisites
Admission to doctor of arts in community college education program to study history.

Notes
May be repeated.

HIST 803 - Doctoral Readings for Major Field

Credits: 3
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing major field exam. Should be broadly comprehensive of field, and cover major historical themes and historiographical debates.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 804 - Doctoral Readings for Minor Field

Credits: 3
Independent readings for PhD students on topic agreed on by student and instructor, taken in preparation for completing minor field statement. Designed to help student master literature of subfield that is subject of field statement.

Prerequisites
Doctoral standing.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 810 - History Doctoral Colloquium

Credits: 1
Introduces array of scholars and scholarship through discussions of innovative historical events, important theories, and significant methodological breakthroughs in history.

Prerequisites
Doctoral standing.

Notes
May be taken for credit 6 times.
Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

HIST 811 - Doctoral Research Seminar

Credits: 3
Students pursue research projects in their areas of specialization.

Prerequisites
Doctoral standing.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

HIST 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for doctoral dissertation.

Prerequisites
Advancement to candidacy

Notes
May be taken for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

HIST 999 - Doctoral Dissertation Research

Credits: 1-12
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisites
Completion of HIST 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Honors Program in General Education
Only students enrolled in the Honors Program are eligible to take HNRS courses. HNRS 110 must be taken in the first semester.

**HNRS 110 - Research Methods**

Credits: 4  
Prepares students in humanities and social sciences research practices. Offers students the opportunity to learn about research practices in the natural sciences, mathematics, economics, management, and law. Students learn how to choose and focus a research question, find and analyze sources, organize evidence in an essay shaped by an original thesis, write clearly, and address an audience of scholars.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 1*

**HNRS 122 - Reading the Arts**

Credits: 3  
Explores relationship of parts to whole in artworks, connections among different art forms, and links between art and its historical context.

**Prerequisites**  
HNRS 110

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

**HNRS 125 - A Liberal Arts Approach to Calculus**

Credits: 3  
Assumes understanding of basic algebra and functions. Studies exponential models and develops mathematical concepts of limit and infinity including the topic of derivatives. Students who have had a course in calculus will explore more advanced topics.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

**HNRS 130 - Conceptions of Self**

Credits: 3  
Drawing from appropriate works in social sciences, arts, and humanities, examines different conceptions and definitions of the self from diverse cultures and historical contexts.

**Prerequisites**  
HNRS 110.
HNRS 131 - Contemporary Society in Multiple Perspectives

Credits: 3
Explores methods and perspectives in social sciences and humanities to evaluate contributions of different disciplines to understanding significant social issues and their global ramifications and our responsibilities as citizens of the world.

Prerequisites
HNRS 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 226 - Topics in Quantitative Analysis

Credits: 3
Studies selected topics of special interest to honors students with suitable preparation.

Notes
For students who have taken calculus in high school. HNRS 226 is an alternative to HNRS 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

HNRS 227 - Scientific Thought and Processes I, II

Credits: 4
Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, and quantum physics.

Prerequisites
HNRS 227 is prerequisite for HNRS 228.

Notes
Includes a weekly lab session.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

HNRS 228 - Scientific Thought and Processes I, II
Credits: 4  
Explores and integrates principles of classical and modern science through study of such topics as cosmology, evolution, ecology, mechanics, relativity, quantum physics, and the environment.

**Prerequisites**  
HNRS 227 is a prerequisite for HNRS 228.

**Notes**  
Includes a weekly lab session.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 3

---

**HNRS 230 - Cross-Cultural Perspectives**

Credits: 3  
Enables students to broaden cultural horizons and understand human behavior by studying societies in depth and in comparison.

**Prerequisites**  
HNRS 110.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HNRS 240 - Reading the Past**

Credits: 3  
Considers constructions of historical narratives by examining significant current topics such as revolution, race, empire, and religion over time. Considers how public narratives about history are constructed.

**Prerequisites**  
HNRS 110.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**HNRS 353 - Technology in the Contemporary World**

Credits: 3  
Analyzes emergence and impact of specific technologies on contemporary cultures. Explores television, automobile, newspapers, Internet, and computer games from historical, scientific, political, economic, and global perspectives.

**Prerequisites**  
Completion or concurrent enrollment in all other required HNRS courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
Information Security and Assurance

ISA 522 - Information Security Essentials

Credits: 3
Course covers basic concepts and techniques in applied information security. Begins introducing the student to basic concepts of security including confidentiality, integrity, availability, and current concerns of anonymity, privacy and safety of web-based transactions, forensics investigations etc. Also covers the main safeguards available in security such as authentication, authorizations, and network security, and shows how these techniques are applied to the concerns of business, health care, nursing, sociology and law.

Prerequisites
An introductory information systems class or permission of instructor.

Notes
This course does not count for MS programs in the Computer Science Department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 562 - Information Security Theory and Practice

Credits: 3
A technical introduction to the theory and practice of information security, which serves as the first security course for the MS-ISA degree, is required as a prerequisite for all subsequent ISA courses (at the 600 and 700 levels) and subsumes most topics covered by the CISSP examination. Also serves as an entry-level course available to non-ISA students, including MS-CS, MS-IS, and MS-SWE students.

Prerequisites
INFS 501, 515, 519, and SWE 510, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 563 - Fundamentals of Systems Programming

Credits: 3
Introduces systems and network programming for UNIX and Windows using lectures and hands-on labs. Covers ANSI C programming, system libraries and APIs, forking and threads, interprocess communications, synchronization, Windows API, and code debugging.

Prerequisites
An intermediate programming language course or permission of instructor.
ISA 564 - Security Laboratory

Credits: 3
Provides hands-on experience in configuring and experimenting with commodity-networked systems and security software in a live laboratory environment, with the purpose of understanding real-world security threats. Takes both offensive and defensive approaches and exposes students to a variety of real-world attacks, including viruses, worms, rootkits, and botnets. Possible mitigation and defending mechanisms, such as firewalls and intrusion detection software, also covered.

Prerequisites
ISA 562.

ISA 640 - Programming Language Security

Credits: 3
Describes language-based techniques to provide security for executing code. Topics include a discussion on the need for and the advantages of language-based security, security principles and properties, memory and type safety, encapsulation and access control, certifying compilers and their verification methods, security types and information flow, and applying programming language-inspired techniques to enforce security in the semantic-web based languages.

Prerequisites
CS 540 and ISA 562 or permission of instructor.

ISA 650 - Security Policy

Credits: 3
Focuses on security policy and its management for information systems having national and international connectivity. Issues include legal, international, cultural, and local factors. Students are expected to participate regularly in presenting material, in discussion of recent security issues, and by writing short papers on major current issues.

Prerequisites
ISA 562 or permission of instructor.
ISA 652 - Security Audit and Compliance Testing

Credits: 3
Presents the fundamental concepts of the IT-security audit and control process that is being conducted in a plethora of environments, including government, the financial industry, and the healthcare industry. The goal of this course is to enable the students to structure and perform audits based on the specifications of Sarbanes-Oxley, HIPAA, and FISMA audit programs. Covers all the CISA certification requirements in depth. Students completing the course are encouraged to attempt the certification exam on their own.

Prerequisites
ISA 562 or ISA 522 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 656 - Network Security

Credits: 3
An in-depth introduction to the theory and practice of network security. It assumes basic knowledge of cryptography and its applications in modern network protocols. Studies firewalls architectures and virtual private networks and provides deep coverage of widely used network security protocols such as SSL, TLS, SSH, Kerberos, IPSec, IKE, and LDAP. It covers countermeasures to distributed denial of service attacks, security of routing protocols and the Domain Name System, e-mail security and spam countermeasures, wireless security, multicast security, and trust negotiation.

Prerequisites
ISA 562 and INFS 612 or CS 555.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 673 - Operating Systems Security

Credits: 3
Covers fundamentals and advanced topics in operating system (OS) security, including OS-level security mechanisms and policies in investigating and defending against real-world attacks on computer systems, such as self-propagating worms and large-scale botnets. Basic OS security techniques, such as logging, system call auditing, and memory protection, will be discussed. Recent advanced techniques, such as honeypots and honeyfarms, system randomization, vulnerability fingerprinting, and virtualization, will also be introduced.

Prerequisites
CS 571 and ISA 562 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 674 - Intrusion Detection
Studies methodologies, techniques, and tools for monitoring events in computer system or network, with the objective of preventing and detecting unwanted process activity and recovering from malicious behavior. Topics include types of threats, host-based and network-based information sources, vulnerability analysis, denial of service, deploying and managing intrusion detection systems, passive versus active responses, and designing recovery solutions.

**Prerequisites**
ISA 562 and 656 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ISA 681 - Secure Software Design**

Credits: 3  
Theory and practice of software security, focusing in particular on some common software security risks, including buffer overflows, race conditions and random number generation, and the identification of potential threats and vulnerabilities early in the design cycle. Emphasis is on methodologies and tools for identifying and eliminating security vulnerabilities, techniques to prove the absence of vulnerabilities, and ways to avoid security holes in new software and on essential guidelines for building secure software. Explores how to design software with security in mind from the ground up and integrate analysis and risk management throughout the software life cycle.

Equivalent to SWE 781

**Prerequisites**
SWE 619 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**ISA 685 - Emerging Topics in Cyber Security**

Credits: 3  
This seminar course provides a student team-based learning experience based on topics selected by leading experts in the area of applications of Information Security Concepts in the real-world scenarios. The (five to six) invited lecturers will lead a discussion followed by two days of project work after each lecture. Teams of students will be assigned to discuss different applications of the concept of discussion. Students develop the critical skills of applying security concepts and analysis to real world scenarios.

**Prerequisites**
Graduate standing in IT&E.

**Notes**
This course cannot be taken by students in the MS-CS, MS-ISA, MS-INFS and MS-SWE programs.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring
ISA 697 - Topics in Information Security

Credits: 1-6
Special topics in information security and assurance not occurring in regular ISA sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 763 - Security Protocol Analysis

Credits: 3
Teaches how to design, understand, verify, and test communication protocols so they meet their objectives of recognizing the basic components of a communication protocol; specifying security properties accurately; modeling actors and mal-actors against which a protocol ought to be secure; discussing verification and testing methods and their limitations by ensuring that the specified protocol satisfies stated security objectives in the presence of specified mal-actions; designing a medium-size protocol that satisfies a specification of requirement; using existing tools to specify and verify security protocols; and testing protocols for satisfying their security objectives.

Prerequisites
ISA 650 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 764 - Security Experimentation

Credits: 3
Teaches how to conduct security experimentations and empirically demonstrate, validate, and evaluate security vulnerabilities, exploits, and defense mechanisms. By the end of the course, students will gain a deeper understanding and first-hand experience on capturing packets of interests from both wired and wireless networks, and replying interested network flows and how shellcode various buffer overflows attacks, worms, spyware, rootkits, botnets, anonymous communication and traceback mechanisms work.

Prerequisites
ISA 562, ISA 564, ISA 674, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 765 - Database and Distributed Systems Security

George Mason University 2010-2011 Official University Catalog 2448
Credits: 3
Science and study of methods of data protection: discretionary and mandatory access controls, secure database design, data integrity, secure architectures, secure transaction processing, information flow controls, inference controls, and auditing. Covers security models for relational and object-oriented databases; security of databases in distributed environments; statistical database security; and survey of commercial systems and research prototypes.

Prerequisites
INFS 614 and ISA 562, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 767 - Secure Electronic Commerce

Credits: 3
Cryptography review, cryptographic protocols, secure electronic transactions, public key certificates and infrastructures, authentication and authorization certificates, secure credential services and role-based authorization, mobile code security, security of agent-based systems, electronic payment systems, intellectual property protection, secure time stamping and notarization.

Prerequisites
ISA 562 and 656, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 785 - Research in Digital Forensics

Credits: 3
Focuses on research-related aspects of digital forensics including open problems in digital forensics, countermeasures against digital forensics, and fundamental and practical limitations of current digital forensics techniques. Also covers currently established techniques and tools for digital forensics as well as common legal and ethical issues.

Prerequisites
ISA 562, CS 571 and CS 555 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 796 - Directed Readings in Information Security

Credits: 3
Research and analysis of contemporary problem in information security.

Prerequisites
Graduate standing in information security and assurance, with at least 12 prior credits in MS.
Notes
Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Written report also required. Maximum of 6 credits may be earned.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 797 - Advanced Topics in Information Security

Credits: 3
Special advanced topics not occurring in regular ISA sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 798 - Research Project

Credits: 3
Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

Prerequisites
18 credits applicable toward MS.

Notes
Prior approval required by faculty sponsor who supervises student's work. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 799 - Thesis

Credits: 1-6
Original or expository work chosen and completed under supervision of graduate faculty member, which results in technical report accepted by three-member faculty committee. Report must be defended in oral presentation.

Prerequisites
18 credits applicable toward MS or permission of instructor.
Notes
To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ISA 862 - Models for Computer Security

Credits: 3
This class will be focused on current research in Security with emphasis in Network and Software Security.

Prerequisites
ISA 562.

Notes
May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

ISA 863 - Advanced Topics in Computer Security

Credits: 3
Current topics of advanced research. Content varies depending on faculty interests, research developments, and student demand. Requires substantial student participation. May include formal models for computer security, multilevel data models, multilevel database management system architectures, secure concurrency control protocols, distributed secure system architectures, integrity models and mechanisms, security policy, and requirements analysis.

Prerequisites
IT 862 or 865, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

Information Systems

INFS 310 - Program Structure and Design for Business Applications

Credits: 3
Teaches structured programming and design using high-level language. Focuses on program design, coding, debugging, and documentation.
Equivalent to IT 308

Prerequisites
Computer programming course in high school or college.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 311 - Database Management

Credits: 3
Studies logical and physical characteristics of data and their organization in computer processing. Emphasizes data as resource in computer applications; examines database management system (DBMS) software and its design, implementation, and use.

Equivalent to IT 314

Prerequisites
Computer programming course in high school or college.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 312 - Computer Architecture and Operating Systems

Credits: 3
Introduces computing system hardware components, architecture, organization, and operating system software concepts. Provides basic experience in assembly language programming for modern microprocessors, and examines techniques for system evaluation and selection.

Prerequisites
INFS 310 or CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 315 - High-Level Programming Languages

Credits: 3
Studies structure and application of high-level languages by stressing design and implementation of data types, data structures, and algorithms. Includes computing lab. Credit does not count toward requirements for major in computer science.

Prerequisites
INFS 310 or CS 112.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
INFS 316 - Software Systems Engineering

Credits: 3
Studies programming environments, including software tools and control of software development for large information systems engineering projects.

Prerequisites
INFS 310 or CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 414 - Advanced Database

Credits: 3
Explores advanced concepts of database modeling using enterprise-level database management system. Topics include object-oriented database processing, data integrity, transactions, locks, concurrency control, backup, recovery, optimization, data mining, Internet databases, server programming, and security.

Equivalent to IT 414

Prerequisites
IT 314 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 462 - Information Security Principles

Credits: 3
Studies security policies, models, and mechanisms for secrecy, integrity, availability and usage controls. Topics include models and mechanisms for mandatory, discretionary and role-based access controls; authentication technologies; control and prevention of viruses and other rogue programs; common system vulnerabilities and countermeasures; privacy and security policies and risk analysis; intellectual property protection; and legal and social issues.

Equivalent to IT 462

Prerequisites
IT 212 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 498 - Independent Study in Information Systems Engineering
Directed self-study of special topics of current interest in INFS.

Prerequisites
60 credits; must be arranged with instructor and approved by department chair before registering.

Notes
May be repeated for maximum 6 credits if topics substantially different.

INFS 499 - Special Topics in Information Systems Engineering

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 credits, and permission of instructor.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

INFS 501 - Discrete and Logical Structures for Information Systems

Credits: 3
Study of discrete and logical structures for information systems analysis and design including basic set theory and proof techniques, propositional and predicate logic, trees and graphs, finite state machines, formal languages and their relation to automata, computability and computational complexity, formal semantics-operational, axiomatic and denotational approaches.

Prerequisites
6 credits of undergraduate mathematics.

Notes
Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

INFS 515 - Computer Organization

Credits: 3
Computer hardware architecture concepts including number systems, machine representation of numbers, instruction set formats, addressing techniques, memory organization, internal processor structure and operation. Symbolic assembly language
fundamental operating systems concepts: process synchronization and scheduling, interprocess communication, memory management, virtual memory, deadlocks, file I/O and disk management, and LINUX operating system case studies.

Prerequisites
Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes
Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

INFS 519 - Program Design and Data Structures

Credits: 3
Study of the fundamentals of data structures and algorithms applied in programming solutions to application problems. The course stresses programming in a modern high-level language. Laboratory required.

Prerequisites
Undergraduate courses or equivalent knowledge in structured programming in a high-level language.

Notes
Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

INFS 524 - Database Management Essentials

Credits: 3
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems.

Prerequisites
One programming course and six credits of college math.

Notes
Computing lab. This course does not count toward MS programs offered in the Computer Science Department.

INFS 565 - Database and Distributed System Security Principles

Credits: 3
Introduces information and distributed system security fundamentals. Topics include notions of security, threats and attacks; legal and ethical issues; security evaluation; data models, concepts, and mechanisms for database and distributed system security; inference in statistical databases; basic issues in operating system, application and network security.
Prerequisites
Permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 612 - Principles and Practices of Communication Networks

Credits: 3
Introduces principles of computer networks and applications to Internet. Discusses details of layering, protocols, performance, resource allocation, management, security and other contemporary issues related to networks. Examples of course material are protocols such as HTTP(S), DNS, TCP/IP, RSVP, SNMP, algorithms such as Dijkstra's link state routing; and security measures such as firewalls and encryption, the principles behind them and analysis of performance.

Prerequisites
INFS 501, 515, 519, and SWE 510, or equivalent

Notes
No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 614 - Database Management

Credits: 3
Introduces database systems, emphasizing study of database models and languages and practice of database design and programming. Topics include Entity-Relationship model, relational model and its formal query languages, SQL, theory of relational database design, and object-oriented and logic-based databases.

Prerequisites
INFS 501, 515, 519, and SWE 510, or equivalent.

Notes
Requires computing lab. No substitutions can be made for this class.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 622 - Information Systems Analysis and Design

Credits: 3
Integration of computing technologies, systems analysis, system design practices, and management criteria in the design of large-scale information management and decision-support systems. Includes cases, computing lab.

Prerequisites
INFS 501, 515, and 519, or equivalent

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**INFS 623 - Classical and Web Information Retrieval**

Credits: 3
Study of models and methods for storage and retrieval of unstructured information, such as documents. Topics include information retrieval models, automatic indexing, document clustering, statistical thesauri, search techniques, performance measurement, answer visualization, and search engines for retrieval from the web.

**Prerequisites**
INFS 501, 515, 519, and SWE 510.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**INFS 640 - Introduction to Electronic Commerce**

Credits: 3
Studies electronic commerce from both managerial and technical perspectives. Topics include e-commerce models and concepts; Internet and web protocols and infrastructure; e-commerce marketing and branding; security protocols and standards; e-commerce payment systems; and case studies of business-to-consumer, business-to-business, consumer-to-consumer, and e-government.

**Prerequisites**
INFS 501, 515, and 519; and SWE 510 or equivalent.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**INFS 650 - Development Frameworks for Information Systems Applications**

Credits: 3
Principles and methods of building commercial applications within high-level framework. Tools for system construction are considered, along with variety of programming languages, component integration, and design methods. Applications investigated through program construction in varied settings, such as database systems, graphical user interfaces, and prototyping.

**Prerequisites**
INFS 501, 515, 519, and SWE 510 or equivalent.

**Notes**
Requires programming projects.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
INFS 697 - Topics in Information Systems

Credits: 1-6
Presents special topics in information systems not occurring in regular INFS sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

INFS 740 - Database Programming for the World Wide Web

Credits: 3
Information systems accessible through web and Internet are becoming prevalent. Course focuses on technologies and industry standards for accessing and manipulating persistent data that are suitable for web applications.

Prerequisites
INFS 614.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 750 - Application Frameworks for Windowed Information Systems

Credits: 3
Studies use of object-oriented visual application frameworks in building event-driven windowed systems. Topics include windowed systems as event-driven systems; central architecture of windowed systems and encapsulation of windowed architectures by object-oriented frameworks; and analysis and design of windowed applications. Illustrates various features of visual application frameworks using variety of information systems applications. Programming projects.

Prerequisites
INFS 650.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 755 - Data Mining

Credits: 3
Introduction to data mining and motivating challenges. Types of data, measures of similarity and distance. Data exploration and

Prerequisites
STAT 344 or equivalent undergraduate course in probability, INFS 614 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 760 - Advanced Database Management

Credits: 3
Study of advanced database models and languages, database design theory, transaction processing, recovery, concurrency, distributed database, and security and integrity. Discusses recent developments and research directions.

Prerequisites
INFS 614.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 764 - Object-Oriented Database Systems

Credits: 3
Studies concepts and systems of object-oriented (OO) databases. Topics include OO design, data models, query languages, new data types, and implementation. Also includes detailed case study and project performed on OO-DBMS. Surveys various prototypes, commercially available systems, and emerging standards.

Prerequisites
INFS 614 or CS 650, or permission of instructor.

Notes
Knowledge of object-oriented programming language such as C++ highly desirable.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 770 - Knowledge Management for E-Business

Credits: 3
Addresses knowledge management (KM) from managerial, technical viewpoints in context of large organizations doing business over web and Internet. Topics include KM life cycle for knowledge creation, aggregation, dissemination, and sharing; ontology modeling, design, and engineering; role of standards such as XML, RDF, web services, and semantic web for e-business; business rules and reasoning engines; and digital rights management for e-business.

Prerequisites
INFS 622 or permission of instructor.
INFS 772 - Intelligent Agents and the Semantic Web

Credits: 3
Course covers the role of intelligent agents in cooperating to access, harvest, sift and winnow information and knowledge from the semantic web. Topics include agent architectures, practical reasoning and deductive agents, beliefs-desires-intentions (BDI) framework for agent reasoning, commitments and actions; Semantic Web ontology languages, description logics, reasoning and rule languages; and agent communication languages, protocols and standards.

Prerequisites
INFS 614

INFS 774 - Enterprise Architecture

Credits: 3
This course presents the basic concepts and methodologies for the discipline known as Enterprise IT Architecting within a framework, structure, and methodology. Enterprise IT Architecting is a necessary step for designing and developing a system of information systems. It includes the definition of the business, work, functional, information and technical perspectives. As such, it is the enabling approach for the system development process that builds complex information systems.

Equivalent to IT 874

Prerequisites
INFS 622 or permission of instructor.

INFS 780 - Data Mining in Multimedia Databases

Credits: 3
Covers advanced algorithms for data management, learning, and mining large, multimedia databases. Issues related to handling such data including feature selection, high dimensional indexing, interactive search and information retrieval, pattern discovery, and scalability to large datasets are discussed. Mining techniques and data types to be covered include texts/web, images, videos, DNA, temporal, spatial, spatiotemporal databases, graph mining, stream mining, and data visualization.

Equivalent to CS 780.

Prerequisites
INFS 755 or CS 750 or permission of instructor.
INFS 785 - Data Mining for Homeland Security

Credits: 3
Topics include small world graphs as way to model groups and organizations, relational data mining with emphasis in predictive models, alias discovery techniques, and profiling.

Prerequisites
INFS 755. Covers analytic techniques for investigative analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 790 - Information Systems Policy and Administration

Credits: 3
Capstone course integrating technical and executive policy issues of information systems. Examines critical executive issues through case studies and comprehensive individual project. No substitutions can be made for this class.

Prerequisites
Completion of all core courses.

Notes
Should be taken in final semester before graduation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 795 - Special Topics in Data Mining Applications

Credits: 3
Focuses on interdisciplinary applications of data mining. Topics selected from following: web and text data mining, e-commerce, bioinformatics, security and intelligence analysis, data mining of economical data. Each topic analyzed in depth; state-of-the-art techniques in application of data mining to field extensively covered.

Prerequisites
INFS 755.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 796 - Directed Readings in Information Technology

Credits: 3
Research and analysis of contemporary problem in information system development.
Prerequisites
Graduate standing in information systems, with at least 12 prior credits in MS.

Notes
To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work. Written report required. Maximum 6 credits may be earned.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 797 - Advanced Topics in Information Systems

Credits: 1-6
Special advanced topics not occurring in regular INFS sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when distinct offerings of course differ in subject.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 798 - Research Project

Credits: 3
Research project chosen under guidance of full-time graduate faculty member, resulting in written technical report.

Prerequisites
18 credits applicable toward MS.

Notes
To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair. Prior approval required by faculty sponsor who supervises student's work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

INFS 799 - Thesis

Credits: 1-6
Original or compilary work evaluated by a committee of three faculty members.

Prerequisites
18 credits applicable toward MS

Notes
To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

INFS 861 - Distributed Database Management Systems

Credits: 3
Topics include transaction management, concurrency control, deadlocks, replicated database management, query processing reliability, and surveys of commercial systems and research prototypes.

Prerequisites
INFS 614 or equivalent.

Hours of Lecture or Seminar per week: 3

INFS 865 - Networks and Distributed Systems Security

Credits: 3
Detailed study of network and distributed systems security. Reviews basic cryptography and threats and vulnerabilities in distributed systems. Covers security services and confidentiality, authentication, integrity, access control, non-repudiation, and their integration in network protocols. Topics also include key management, cryptographic protocols and their analysis; access control, delegation, and revocation in distributed systems; and security architectures, multilevel systems, and security management and monitoring.

Prerequisites
INFS 612 or equivalent.

Hours of Lecture or Seminar per week: 3

INFS 867 - Intelligent Databases

Credits: 3
Studies models and techniques that empower database systems with intelligent and cooperative behavior, with emphasis on subjects such as knowledge-rich databases, logic databases, epistemological queries, intentional answering, and knowledge discovery. Topics include user interfaces, cooperative query interfaces, interactive query constructors, graphical interfaces, and browsers; uncertainty representing, manipulating, and retrieving uncertain, imprecise, or incomplete information; and formulating and interpreting vague or incomplete queries.

Prerequisites
INFS 760, or permission of instructor.

Hours of Lecture or Seminar per week: 3
INFS 870 - Organizational and Policy Aspect Informatics

Credits: 3
Examines effects of informatics on national and international policy; setting of international policy on informatics; ethical and social change in governments and organization; shaping of national policy in informatics; industry growth; and research methods from various scientific disciplines.

Prerequisites
Doctoral status or permission of instructor.

Hours of Lecture or Seminar per week: 3

INFS 950 - Design and Management Aspects of Information Systems

Credits: 3
Impact of organizations and management of information systems (IS) and vice versa. Topics include problems of introducing IS; effect on organizational, economic, and political framework; participative design and new techniques for specification, analysis, design, and implementation of IS; rapid prototyping and expert systems; possible conflicts; methods in life-cycle management; and economic analysis.

Prerequisites
INFS 790 or equivalent.

Hours of Lecture or Seminar per week: 3

Information Technology

IT 101 - Introduction to Information Technology

Credits: 3
Introduces fundamental concepts underpinning state-of-the-art applications. Topics include quantitative and historical perspectives underlying major information technologies, theoretical background on wide range of information technologies as well as issues surrounding the social, economic, and political contexts in which IT exists. Provides exposure to cutting-edge technologies and trends including wireless multimedia, mobile communications, computer security, digital video and audio, and high-performance computing.

Hours of Lecture or Seminar per week: 3

IT 103 - Introduction to Computing
This course, using both lecture and laboratory practice, introduces students to basic computer concepts in hardware, software, networking, computer security, programming, database, e-commerce, decision support systems, and other emerging technologies such as blogs, wiki, RSS, podcasting, and Google applications. Additional lectures examine social, legal, ethical issues including privacy, intellectual property, health concerns, green computing, and accessibility. Students learn techniques to search, evaluate, validate, and cite information found online. Widely used applications including word processing, spreadsheets, databases, presentation, and web development software are studied.

Satisfies General Education Requirement: Information technology (IT, all)

Prerequisites
Knowledge of high school algebra.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

IT 106 - Introduction to IT Problem Solving Using Computer Programming

Credits: 3
Introduces use of procedural programming as an IT resource for developing solutions to business problems. Emphasizes techniques & practices for design of solutions. Includes use of expressions, scalar data types, control structures as well as use of IDEs for development and debugging.

Prerequisites
IT 103 or permission of department.

Hours of Lecture or Seminar per week: 2:30
Hours of Lab or Studio per week: 1:15
When Offered: Fall, Spring

IT 108 - Programming Fundamentals

Credits: 3
Introduces programming fundamentals and presents software development process. Students learn to write programs in high-level, object-oriented language.

Prerequisites
IT 103 or permission of department.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

IT 206 - Object Oriented Techniques for IT Problem Solving

Credits: 3
This course introduces the use of object-oriented programming as an IT tool for developing solutions to business problems. Emphasizes role and use of classes, methods, and exceptions in creating

George Mason University 2010-2011 Official University Catalog 2465
solutions. Introduces concepts of event-driven programming.

**Prerequisites**
IT 106 or permission of department.

**Hours of Lecture or Seminar per week:** 2:30  
**Hours of Lab or Studio per week:** 1:15  
**When Offered:** Fall, Spring

**IT 207 - Applied IT Programming**

Credits: 3  
Building on fundamentals of structured and object-oriented programming, this course covers client and server side scripting languages and an SQL database management system. Students will use open source software tools to develop database-enabled web applications.

**Prerequisites**
Prereq: IT 103 and one of: IT 206, IT 108, or CS 112; or permission of department.

**Hours of Lecture or Seminar per week:** 3

**IT 212 - Computer Hardware Fundamentals**

Credits: 3  
This course explains the basic principles of how computers work. It provides a comprehensive understanding of the essential components associated with computers with a focus on PCs. Topics include history of computers, the microprocessor, motherboard, memory, graphics and sound adapters, input and output devices, and storage media. An overview of operating systems and other software, as well as the various methods used to connect computers to each other and the Internet, are presented. The course also addresses recent advances in computer architectures and computer hardware and how they affect computer performance. Presentations of actual hardware are included so that students can gain experience in identifying the various internal and external components of a PC.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**IT 213 - Multimedia and Web Design**

Credits: 3  
Through lecture, class demonstration, class discussion, and hands-on lab experience, introduces multimedia and web computer graphics. Focuses on development of web-enabled multimedia applications from practical business perspective. Introduces and discusses technological, aesthetic, and human factors.

**Prerequisites**
IT 103 or permission of department.
IT 214 - Database Fundamentals

Credits: 3
Introduces relational database management systems and their applications. Students learn about types of databases, data modeling, designing relational databases, normalization and relationships, and recent trends in database management, including web applications. Students apply learned concepts using modern database application to create tables, queries, forms, and reports.

Prerequisites
IT 103 or permission of department.

IT 223 - Information Security Fundamentals

Credits: 3
Introduces concept of information security. Discusses need for organizational policy to define required services such as confidentiality, authentication, integrity, nonrepudiation, access control, and availability, and mechanisms to implement those services. Covers different types of security including physical security, computer security, and network security; common threats to and attacks against information systems, including accidental damage, identity theft, malicious software, and "spam"; and defensive measures

Prerequisites
IT 103 or equivalent; or permission of department.

Notes
Students cannot receive credit for both IT 221 and 223.

IT 293 - Applied IT: Junior Transition

Credits: 1
Focuses on transition issues for sophomores and transfer students in Applied Information Technology programs. Assists sophomore and transfer students with choice of concentration, course selection, and career readiness.

Prerequisites
Sophomore standing

Hours of Lecture or Seminar per week: 2:40
When Offered: Fall, Summer, Spring
IT 300 - Modern Telecommunications

Credits: 3
Comprehensive overview of the fundamental principles of telecommunications, including current status and future directions of the public switched telephone network, cellular networks, satellite networks, and computer networks.

Prerequisites
IT 101 or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 304 - IT in the Global Economy

Credits: 3
Explores how IT changed nature of society and contributed to evolution of global economy. Examines changing nature of work, education, and communication, and ethical issues such as intellectual property rights, computer-related crime, privacy concerns, and public policy issues.

Satisfies General Education Requirement: Information technology (IT, Ethics)

Prerequisites
IT 103 or equivalent; or permission of department.

Notes
Students cannot receive credit for both IT 304 and CS 306.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 306 - Program Design and Data Structures

Credits: 3
Fundamentals of data structures and analysis of algorithms. Large programs written in a modern, high-level programming language. Stresses abstraction, modular design, code reuse, and correctness.

Prerequisites
IT 206 or IT 108 or permission of department.

Hours of Lecture or Seminar per week: 2:40
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

IT 308 - Event-Driven Programming
Building on the programming concepts covered in IT 108, this course focuses on graphical user interfaces. Students will design, develop, and document event-driven programs using an object-oriented language.

Equivalent to INFS 310

**Prerequisites**
IT 108 or CS 112 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**IT 314 - Database Management**

Credits: 3  
Studies logical and physical characteristics of data and their organization in computer processing. Emphasizes data as resource in computer applications, and examines database management system (DBMS) software and design, implementation, and use.

Equivalent to INFS 311

**Prerequisites**
IT 214, or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**IT 331 - Web I: Web Development**

Credits: 3  
Introduces the principles and techniques necessary for successful client-side web development. Topics such as XHTML, Cascading Style Sheets, JavaScript, DOM, XML, RSS, and AJAX are presented. Students will learn to develop attractive and interactive web pages and applications and use client-side web-scripting languages to solve problems both with a text editor and more powerful WYSIWYG HTML editor.

**Prerequisites**
IT 103, IT 207, and IT 213; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**IT 332 - Web Site Administration**

Credits: 3  
Covers web server administration and web security, property sheets related to these sites and security features, hosting multiple web sites on same web server, associated performance issues, and application-level password security.

**Prerequisites**
IT 331 and IT 341; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### IT 335 - Web Development using Content Management Systems

Credits: 3  
Through lectures and hands-on lab experience, presents web development techniques using content management systems (e.g., Joomla, Dot net nuke). Introduces characteristics of various types of websites (corporate portals, intranets and extranets; online magazines, newspapers, and publications; e-commerce and online reservations, government applications, small business websites). Presents methods, languages, tools related to web content management systems from an applied perspective.

**Prerequisites**  
IT 207 and IT 213; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

### IT 341 - Data Communications and Network Principles

Credits: 3  
Focuses on the primary aspects of data communications networking, including a study of the Open Systems Interconnection (OSI) and Internet models. Students will start at Layer 1 with the study of various Layer 1 interface and cabling configurations. They will construct and test various cables with connectors. Moving up the OSI layers, students will focus on IP network addressing, network design, and enhanced hands-on router and port configurations. They will also learn security protocols and do static routing, EIGRP, RIPv2, and OSPF configurations. Students will also develop Access Control Lists (ACLs) used in modern day networks as a prime method of controlling network security and implement the ACLs on laboratory networks. Concentration on layers 4 through 7 include studying TCP, UDP, data reliability, and error correction methods, on the ladder to the FTP, HTTP, SMTP, DNS, and TFTP protocols of Layer 7.

**Prerequisites**  
IT 101, IT 108, IT 212 and MATH 108; or permission of department.

**Notes**  
This course is 50 percent lab work of configuration of routers and network design, implementation, and testing.

**Hours of Lecture or Seminar per week:** 3

### IT 342 - Operating Systems Fundamentals

Credits: 3  
Practices and procedures for installing and configuring modern operating systems, including user accounts, file, print, and terminal servers, mobile computing, and disaster recovery. Through practical lab sessions, students receive real-world experiences with multiple operating systems.

**Prerequisites**
IT 101, IT 206 or IT 108, and IT 212; or permission of department.

Hours of Lecture or Seminar per week: 3

IT 343 - IT Resources Planning

Credits: 3
Provides essential strategies and procedures for planning, organizing, staffing, monitoring, and controlling design, development, and production of system to meet stated IT-related need in effective and efficient manner. Fulfills writing-intensive requirement for BS in information technology.

Prerequisites
Junior standing in BS in information technology program, or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 344 - Information Storage and Management Technologies

Credits: 3
Provides an introduction to principles of information storage and management technologies. Covers Direct Attached Storage (DAS), networked storage models such as Network Attached Storage (NAS), Storage Area Network (SAN), and Content Addressed Storage (CAS); and applications in business continuity, replication, and disaster recovery. Includes exposure to real-world storage networking technologies.

Prerequisites
IT 341 and IT 342, or permission of department.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

IT 348 - Cloud Computing

Credits: 3
Cloud Computing gives students hands-on experience creating programs hosted on the Google cloud. The course teaches Python and its use. Students create a small business application-style program using Python and App Engine-specific tools, following the Model-View-Controller-based paradigm, using HTML/Django I/O templates, with data storage on the Google Big Table.

Prerequisites
IT 207 or permission of department.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

IT 353 - Information Defense Technologies
This course will examine and assess the role of information technology as a tool of warfare and civil defense. Topics will be discussed from both defensive and offensive perspectives and will include asset tracking, asymmetric warfare, network centric warfare, physical attacks, cyberterrorism, espionage, psyops, reconnaissance and surveillance, space assets, and applications of GPS and cryptographic technology. Students will research and write about the social, ethical, and political effects of such technology.

**Prerequisites**
IT 101 (or equivalent), IT 103 (or equivalent), and IT 223; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### IT 357 - Computer Crime, Forensics, and Auditing

Credits: 3  
Covers computer crime, relevant laws, agencies, and standards. Presents auditing, logging, forensics, and related software. Explores legal principles such as chain of evidence, electronic document discovery, eavesdropping, and entrapment. Students get hands-on experience with forensics tools.

Equivalent to CRIM 304  

**Prerequisites**  
IT 103 and IT 223; or permission of department.

**Notes**  
Students cannot receive credit for both IT 222 and 357.

**Hours of Lecture or Seminar per week:** 3

### IT 366 - Network Security I

Credits: 3  
Examines information security services and mechanisms in network context. Topics include symmetric and asymmetric cryptography; message authentication codes, hash functions and digital signatures; digital certificates and public key infrastructure; access control including hardware and biometrics; intrusion detection; and securing network-enabled applications including e-mail and web browsing.

**Prerequisites**  
IT 206 or IT 108 or equivalent, and IT 223; or permission of department.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### IT 413 - Digital Media Editing
Examines three areas of digital media editing—tools for editing, content and logic decision process, and information technology used by major corporations for development and distribution—through video examples from entertainment industry and corporate productions as well as hands-on editing experience.

**Prerequisites**
IT 213 ; or permission of department.

**Hours of Lecture or Seminar per week:** 3

### IT 414 - Advanced Database

Credits: 3
Explores advanced concepts of database modeling using enterprise-level database management system. Topics include object-oriented database processing, data integrity, transactions, locks, concurrency control, backup, recovery, optimization, data mining, Internet databases, server programming, and security.

**Prerequisites**
IT 314

**Hours of Lecture or Seminar per week:** 3

### IT 415 - Information Visualization

Credits: 3
Provides an overview of information visualization applications in intelligence analysis, decision support systems, and network monitoring. Covers human factors, human interface with information, and current and future trends in information visualization. Students also learn to develop a rudimentary visualization application.

**Prerequisites**
IT 213 or permission of department.

**Hours of Lecture or Seminar per week:** 3

### IT 431 - Web II: Advanced Web Development

Credits: 3
Continuation of Web I. Rapid Application Development (RAD), client- and server-side scripting for user and database interaction. Students build skills in web application development using different technologies and frameworks. Topics such as session tracking/cookie management, privacy and integrity issues, and web services are also covered.

**Prerequisites**
IT 206 or IT 108, and IT 331, or permission of department.

**Hours of Lecture or Seminar per week:** 3
IT 435 - Applied Knowledge Technologies for the Semantic Web

Credits: 3
Methods, languages, and tools related to the knowledge technologies for semantic web from an applied perspective. Combines survey lectures with in-depth presentation of relevant issues and hands-on experience with existing technologies.

Prerequisites
IT 331; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 441 - Network Servers and Infrastructures

Credits: 3
Covers IP networking concepts and practices for using DHCP, DNS, secure communication, routing, remote address services, web servers, and network connectivity between operating systems. Students learn TCP/IP, routing architecture, and understand application-level services used in Internet. Through networking lab sessions, students focus on using switches and routers connected in LANs and WANs.

Prerequisites
Junior level standing and IT 341, MATH 108 and either of MATH 112 or MATH 125; or permission of department.

Notes
Term project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 445 - Advanced Networking Principles

Credits: 3
This course focuses on Layer 2 and 3 of the OSI model and WAN technologies. Frame Relay and ISDN, complex router configurations of Variable Length Subnet Masking (VLSM), Classless Inter-Domain Routing (CIDR), Network Address Translation (NAT), Dynamic Host Configuration Protocol (DHCP), and study of Network Management Systems available for Data Communications Networks. Layer 2 involves Ethernet-switching components, including detailed hands-on configuration covering all aspects of switches using the command-line interface method.

Prerequisites
IT 341; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 455 - Wireless Communications and Networking
Credits: 3
Covers fundamental principles underlying wireless data communications. Topics include wireless transmission basics, radio propagation issues, antennas, digital modulation, spread spectrum techniques and their applications, and popular standards: WiFi, WiMAX and Bluetooth. Also presents practical knowledge to enable the design, testing, deployment, debugging and commissioning of WiFi, WiMAX networks and point-to-point microwave systems. Discussions on cellular network technologies are also included.

Prerequisites
IT 101 and IT 341; or permission of department.

Hours of Lecture or Seminar per week: 3

IT 462 - Information Security Principles

Credits: 3
Studies security policies, models, and mechanisms for secrecy, integrity, availability, and usage controls. Topics include models and mechanisms for mandatory, discretionary, and role-based access controls; authentication technologies; control and prevention of viruses and other rogue programs; common system vulnerabilities and countermeasures; privacy and security policies and risk analysis; intellectual property protection; and legal and social issues.

Equivalent to INFS 462

Prerequisites
IT 212 or equivalent, and IT 223; or permission of department.

Hours of Lecture or Seminar per week: 3

IT 466 - Network Security II

Credits: 3
Detailed study of certain symmetric and asymmetric cryptographic schemes; analysis of network data (including "packet sniffing"); security at different network layers (including IPSec, SSL/TLS and Kerberos); and secure e-commerce. Teaches principles of designing and testing secure networks, including use of network partitioning, firewalls, intrusion detection systems, and vulnerability assessment tools.

Prerequisites
IT 206 or IT 108 or equivalent, IT 223, IT 341, IT 366; and either of MATH 112 or MATH 125; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 471 - Applications of Digital Technologies

Credits: 3
The course covers an overview of technologies and applications of a wide array of digital components used within state of the art IT systems. Topics include an understanding of the applications of such digital devices embedded within telecommunications systems, storage systems, computing systems, multimedia systems, and computer networks.
Prerequisites
IT 101 and at least Junior standing in program; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 481 - Concepts of Multimedia Processing and Transmission

Credits: 3
Covers fundamentals of audio and image processing and transmission. Technical topics include audio and video compression algorithms for efficient storage and transmission of multimedia content, streaming video, high definition video, multimedia storage technologies. Other issues discussed include legal aspects concerning distribution of multimedia content, multimedia standards, the entertainment industry as well as the future of multimedia processing and transmission.

Prerequisites
IT 101 and IT 213; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 484 - Voice Communications Technologies

Credits: 3
Examines current and emerging technologies for transmission of voice signals over telecommunications systems. Highlights significant differences between the requirements for voice and other forms of data. Topics provide a balance between traditional voice technologies and those that use data networks. Real-world implementations are analyzed to determine reliability, quality, and cost effectiveness. Includes lab experiments with analog and digital technologies.

Prerequisites
IT 300 and IT 341; or permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IT 488 - Fundamentals of Satellite Communications

Credits: 3
Provides a comprehensive overview of the principles of satellite communications systems. Major topics include satellite orbits and constellations, the space segment, antennas, modulation, coding, satellite access methods and link analysis. Also covers satellite applications, with emphasis on recent developments in the satellite communications field. Hands-on design experience is gained through the use of readily available vendor software systems.

Prerequisites
IT 300, IT 341, and MATH 108; or permission of department.
IT 492 - Senior Design Project I

Credits: 3
Students use information technology as a tool to redesign business processes so the enterprise can achieve its objectives. Student teams analyze the business processes of real organizations, quantify the negative impact caused by current process challenges, then develop and present a compelling Business Case for Change. Students develop skills critical for preparing and delivering effective verbal briefings and presentations.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Senior standing in BS information technology program, IT 343, and completion or concurrent enrollment in all other required general education courses; or permission of department.

IT 493 - Senior Design Project II

Credits: 4
Students, in teams, complete projects demonstrating preparedness as an IT professional. This work includes ethical challenges, status reports and engineering notebooks evaluated during class. Teams members develop detailed designs, build solutions up to Beta, present final written reports and final verbal presentations before review panels of business leaders. Students must register for the section that continues their IT 492 section.

Prerequisites
IT 492, IT 343, senior standing (90 credits) in BS in information technology program, and all general education requirements completed; or permission of department.

IT 495 - Turning Ideas into Successful Companies

Credits: 3
This is a practical course in entrepreneurship. Each class session will focus on specific topics associated with building a business: team creation, business planning, market research, product development, financial planning, funding, people and organizations, competitive strategies, operations, growth and exit strategies, and more. Students will have reading assignments and will participate in competitive team assignments.

Prerequisites
Senior standing or permission of department.
**IT 498 - Independent Study in Information Technology**

Credits: 1-3
Directed self-study of special topics of current interest in IT.

**Notes**
Topics must be arranged with instructor and approved by department chair before registering. Maximum 3 credits.

**IT 499 - Special Topics in Information Technology**

Credits: 3
Topics of special interest to undergraduates.

**Prerequisites**
Permission of department; specific prerequisites vary with nature of topic.

**Notes**
May be repeated for maximum 6 credits if topics are substantially different.

**IT 796 - Directed Reading and Research**

Credits: 1-6
Reading and research on specific topic in information technology under direction of faculty member.

**Notes**
May be repeated as needed.

**IT 797 - Directed Reading and Research**

Credits: 1-3
Reading and research on specific topic in information technology under direction of faculty member.
Notes
May be repeated as needed.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

IT 990 - Dissertation Topic Presentation

Credits: 1
Students put together a professional presentation of a research proposal and present it for critique to fellow students and interested faculty. May be repeated with change of research topic, but credit toward doctoral degree is given once.

Equivalent to CS 990

Prerequisites
Completion of all course requirements for PhD, or permission of instructor.

Notes
May be repeated with change in topic, but degree credit is given only once.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

IT 991 - Engineer Project Presentation

Credits: 1
Opportunity for engineer degree students to present project proposal for critique to interested faculty and students. Covers presentation of project topic for engineer degree in information technology, and is required of all engineer degree students. Students complete project proposal.

Prerequisites
Completion of all course requirements for engineer degree in information technology, or permission of instructor.

Notes
May be repeated with change in topic, but degree credit is only given once.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

IT 996 - Engineer Project Proposal

Credits: 1-6
Work on project proposal that forms basis for dissertation for engineer degree.

Notes
May be repeated. No more than 12 credits of IT 996 and 997 may be applied to engineer degree requirements.
IT 997 - Engineer Project Dissertation

Credits: 1-6
Formal record of commitment to engineer project dissertation under direction of advisory committee in information technology.

Prerequisites
Admission to candidacy.

Notes
May be repeated as needed.

IT 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated. No more than 24 credits of IT 998 and 999 may be applied to doctoral degree requirements.

IT 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member in information technology.

Prerequisites
Admission to candidacy.

Notes
May be repeated as needed.

Initiatives in Educational Transformation—Teaching
IETT 500 - Introduction to IETT

Credits: 0
Introduces students to the ideas and the experiential pedagogy of the IET program in an intensive summer session designed to develop relationships among participating educators and faculty by building a vibrant learning community through shared and emerging knowledge and experience.

IETT 750 - Studies in Language and Culture I

Credits: 3
Explores the interdependence and mutual construction of languages and cultures, as well as how both provide interpretive frames and thus mediate lived experiences. Investigates culture and language as primary shapers of relationships and identities. Engages teachers in constructing culturally responsive curriculum and pedagogy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IETT 751 - Studies in Language and Culture II

Credits: 3
Deepens understandings of how language and culture shape interpretations that affect people's lives. Investigates student achievement in relationship to classroom experiences and the language and cultural knowledge students bring to school. Examines vernacular discourses, including those in cyberspace and popular culture, while considering pedagogical implications. Probes social justice issues in and out of educational institutions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

IETT 752 - Research in Practice: The Team Project

Credits: 6
Builds further understanding of teacher research with an emphasis on collaborative research process to develop skills, construct knowledge, and transform practice. Teams engage in collaborative inquiry as they form and frame salient questions, take actions to improve teaching and learning, gather, analyze and interpret multiple forms of data, and share their experience in communities of practice.

Prerequisites
MNPE 704

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

IETT 753 - Teaching and Learning
Credits: 3
Provides a structured opportunity for offering evidence of individual growth and transformation of professional practice. Through a process of deep reflection, examines fundamental philosophical and pedagogical assumptions, explores individual educational experiences, and critically examines professional practices related to meeting K-12 students' needs, continuous improvement, and program experiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Instructional Technology

EDIT 401 - Introduction to Multimedia/Hypermedia

Credits: 3
Provides an overview of the principles and tools used within the fields of e-learning, instructional design, and multimedia/hypermedia technologies. Students apply knowledge and skills learned by creating an e-learning module.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 410 - Introduction to Assistive Technology

Credits: 3
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for persons with disabilities. Presentation and demonstration experiences enable students to better use assistive technology in education, work, community, and home environments.

Notes
Knowledge and awareness components may be delivered via distance education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 412 - Assistive Technology for Individuals with Sensory Impairments

Credits: 2
Provides technology and resources available to enhance and improve the ability of individuals with visual and hearing impairments for success in school, daily living activities, and employment.

Prerequisites
EDIT 410.

Notes
EDIT 413 - Technology, Society, and the Culture of Learning

Credits: 3
Explores the relationship between technological change and education reform initiatives. Emphasis will be placed on the ways in which technological and social changes influence and shape the goals and outcomes of the K-12 educational process.

Prerequisites
EDUC 300.

EDIT 423 - Accessibility/Input Modifications

Credits: 2
Explores accessibility/input devices and strategies used by individuals with disabilities for accessing computers, independent living aids, driving equipment, and communication devices.

Prerequisites
EDIT 410.

Notes
Class components may be delivered via distance education.

EDIT 425 - Software for Individuals with Special Needs

Credits: 2
Provides software evaluation and design for individuals with disabilities. Students will create a software program using existing authoring tools for a person with a disability.

Prerequisites
EDIT 410.

Notes
Class components may be delivered via distance education.
EDIT 426 - Web Accessibility and Design

Credits: 3
Provides instruction for accessible web design using HTML and existing authoring tools. Section 508 web accessibility standards and assistive technologies to access the computer will be explored.

Notes
Class may be delivered via distance education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 428 - Low-Technology Assistive Technology Solutions

Credits: 1
Provides functional application of low-technology solutions within the areas of self-care; mobility and transfer; communication; stability and support; sports, recreation, and leisure; and academic and work environments. Will include opportunities to create low-technology devices.

Prerequisites
EDIT 410.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 504 - Introduction to Educational Technology

Credits: 3
Examines uses of and issues in educational technology. Explores curriculum integration of technology, and focuses on learning and using commercially available applications software.

Notes
Field experience in public schools will be required during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 510 - Introduction to Assistive Technology

Credits: 3
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for persons with disabilities. Presentation and demonstration experiences enable students to better use assistive technology in education, work, community, and home environments. Knowledge and awareness components may be delivered via distance
Equivalent to EDSE 510

**EDIT 522 - Assistive Technology for Individuals with Sensory Impairments**

Credits: 2-3
Focuses on professionals or students interested in serving visually impaired/blind or hearing impaired/deaf populations. Heightens awareness of participants to specific technology and resources available to enhance and improve ability of individuals with impairments to succeed in school, daily living activities, and employment. Knowledge and awareness components may be delivered via distance education.

Equivalent to EDSE 522

**EDIT 523 - Accessibility/Input Modification**

Credits: 1-3
Provides overview of accessibility/input modifications and strategies. Students explore various input devices and their application and use by individuals with disabilities. Opportunities for in-depth exploration of sophisticated access technologies available to those students who seek expertise in specific assistive technology devices. Knowledge and awareness components may be delivered via distance education.

Equivalent to EDSE 523

**EDIT 524 - Assistive Technology for Individuals with Learning Disabilities**

Credits: 2
Focuses on strategies and techniques for implementing software and other technologies in lives of individuals, age 3 to adult, with learning disabilities. Students develop and implement plans for assistive technology. Requires practicum. Knowledge and awareness components may be delivered via distance education.

Equivalent to EDSE 524
EDIT 525 - Software for Individuals with Special Needs

Credits: 1-2
Focuses on software evaluation and design for individuals with disabilities. Explores existing software resources, and identifies design features to meet individual's special needs. Students create software program for person with disabilities (credit 2). Knowledge and awareness components may be delivered via distance education.

Equivalent to EDSE 525

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

EDIT 526 - Web Accessibility and Design

Credits: 3
Develops understanding of principles of universal web design. Students apply this understanding by designing and developing accessible web site using web authoring tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 529 - Internet as an Assistive Technology Tool

Credits: 2
Overview of web and Internet as an educational tool for students with disabilities. Focuses on presentation of strategies, accommodations, assistive technology, and Internet resources for educators. Students review and evaluate web sites, and develop accessible Internet lesson plan or web site.

Prerequisites
HTML experience.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 530 - Scripting and Programming

Credits: 2
Enables development of computer-based educational materials using widely known educational scripting language. Students explore basic authoring capabilities, and learn to apply those capabilities by designing and producing materials using commands, procedures, and functions of scripting language.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
EDIT 561 - Teaching with Telecommunications

Credits: 1
Develops expertise with various aspects of telecommunications tools, and models ways these tools can be used for personal learning and integration into teaching/learning process. Addresses e-mail, Internet, web, and online databases.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 562 - Teaching with Databases

Credits: 1
Develops expertise with various aspects of databases, and models ways databases can be integrated into teaching and learning process. Focuses on strategies for searching, sorting, creating, and communicating with information, much of which is structured by variety of online and offline databases.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 563 - Teaching with Graphics

Credits: 1
Explores various graphic programs available for constructing visual images. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 564 - Teaching with Web 2.0

Credits: 2
Develops expertise with social, cognitive, and learning implications of film, video, and television. Engages students in process of planning, storyboarding, and filming with video.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 565 - Teaching with Educational Software

Credits: 1
Explores variety of educational software, including simulations, problem-solving software, computational tools (calculators, probeware, LOGO, and spreadsheets), and drill-and-practice/ integrated learning systems. Emphasizes ways these programs support K-12 teaching and learning process.
EDIT 566 - Teaching with Multimedia/Hypermedia

Credits: 2
Covers variety of hypertext/hypermedia and multimedia tools. Emphasizes students' ability to use tools and then teach others. Covers the ways integration of tools in K-12 curriculum support learning, and difference between hypermedia and multimedia.

Prerequisites
EDIT 563.

EDIT 567 - Teaching with Desktop Publishing

Credits: 2
Explores variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn concepts.

Prerequisites
EDIT 563.

EDIT 568 - Teaching with the Web

Credits: 2
Examines the various aspects of web-based learning and the ways these tools can be integrated into the teaching/learning process. The course is taught online.

Prerequisites
EDIT 561

EDIT 571 - Tools for Visual/Graphic Design

Credits: 1-3
Teaches basic knowledge of tools available for integrating graphics and visual design into computer-based instruction. Exposes students to latest tools available for developing, integrating, and managing visual and graphic display.
EDIT 572 - Tools for Digital Video and Audio

Credits: 1-3
Overview and exploration of using these tools in instructional design process. Offers rationale for using select tools and developing skills to use them.

EDIT 573 - Project Management Tools

Credits: 1-3
Teaches students the principles of project management as it is applied to instructional design. Explores project management tools used to manage, plan, and track large-scale multimedia and hypermedia projects.

EDIT 574 - Networking Tools

Credits: 1-3
Teaches basic knowledge of current networking and telecommunications devices used to enhance instructional design process. Covers local area networks, telecommunications, and teleconferencing and distance education technologies.

EDIT 575 - Authoring Tools

Credits: 1-3
Introduces specific authoring tools through hands-on lab instruction, interaction with software interface, construction of instructional sequences, importing video and audio clips, resource management, and animation.

Notes
Content customized to particular software tool presented.
EDIT 590 - Educational Research in Technology

Credits: 3
Focuses on developing skills, insights, and understanding basics to performing research with emphasis on interpretation, application, critique, and use of findings in educational settings. Students develop expertise in action research methodology, design, and implementation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 593 - Instructional Hardware Systems

Credits: 3
Teaches basic technical features of computer-based hardware systems used in educational settings, including stand-alone computers, peripheral devices, and networking systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 597 - Special Topics in Education

Credits: 1-6
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisites
Admission to program in GSE.

Notes
May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 601 - Instructional Design and Development (IDD) Portfolio

Credits: 1
Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at mid-degree program point.

Notes
To be taken at mid-degree program point with minimum 12 and maximum 15 credits.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
EDIT 611 - Innovations in Distance Learning

Credits: 3
Explores educational opportunities through electronic networks and telecommunications. Hands-on activities focus on planning, implementation, and evaluation. Students discuss emerging applications, and how new approaches to learning can be integrated into today's classrooms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 641 - Understanding Virtual Schools

Credits: 1
Develops knowledge about online learning for K-12 students. Examines history and trends of online learning, and characteristics of K-12 virtual learners.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 642 - The Online Academy

Credits: 1
Develops knowledge about Mason's virtual high school. Focuses on design model with attention to representative problems, performances of understanding, communities of practice, and mentors.

Prerequisites
EDIT 641

Corequisite
EDIT 641

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 643 - Online Mentoring I: Building Virtual Relationships

Credits: 1
Assists in developing online mentoring skills related to integral role that building relationships plays in success of online learning.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 644 - Online Mentoring II: Promoting Self-Regulation
Credits: 1
Assists in developing online mentoring skills related to integral role that self-regulation plays in success of online learning.

Prerequisites
EDIT 643

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 645 - Online Mentoring III: Conceptual Learning

Credits: 1
Assists in developing online mentoring skills related to role of support of conceptual and content understanding in success of online learning.

Prerequisites
EDIT 644

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDIT 646 - Online Mentoring IV: Moderating

Credits: 2
Assists in developing expertise with moderating student learning asynchronous and synchronous in online environments including discussion boards, chat rooms, and general communication patterns.

Prerequisites
EDIT 645 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDIT 701 - Advanced Instructional Design and Development (IDD) Portfolio

Credits: 1
To be taken in the last semester of course work. Enables students to create and publish electronic portfolio that demonstrates effective and meaningful integration and syntheses of instructional design and development concepts, principles, and competencies learned across program courses at end degree program point.

Prerequisites
EDIT 601.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
EDIT 704 - Instructional Technology Foundations and Theories of Learning

Credits: 3
Reviews practical and pedagogical issues related to design and development of technological instruction. Emphasizes investigating instructional design as a field and community of practice, and reviewing core learning theory constructs applicable to design of instructional technology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 705 - Instructional Design

Credits: 3
Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields.

Equivalent to EDCI 705

Prerequisites
Teaching experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 711 - Teaching with Technology I: Telecommunications and Databases

Credits: 3
Explores and develops expertise with various aspects of telecommunications and databases, and models how tools can be used for personal learning and integration into teaching and learning process. Addresses e-mail, Internet, and web, and online and multimedia databases. Also focuses on strategies for searching, sorting, creating, and communicating with information, many of which are structured by online and offline databases.

Corequisite
EDCI 710.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 713 - Teaching with Technology II: Graphics, TV and Video, and Simulations

Credits: 3
Explores and develops expertise with various graphic programs for constructing visual images, interpreting and creating video, and structuring and using simulations for learning. Addresses draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning. Explores social, cognitive, and learning implications of film, video, and television, and engages students in planning, storyboarding, and filming with video. Also focuses on various categories of
simulation, relationship between simulations and ways of knowing, and strategies for using simulations to promote K-12 learning.

Corequisite
EDCI 712.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 715 - Teaching with Technology III: Publishing and Computational Tools

Credits: 3
Explores and develops expertise with variety of publishing tools, including word processors, desktop publishers, and idea processors. Emphasizes using tools to communicate. Covers design and layout principles, appropriate use of images to facilitate communication, and ways K-12 teachers can design opportunities for students to learn these concepts. Also helps students explore and develop expertise with tools commonly used as part of "computational science" and mathematical modeling. Tools include programming languages such as LOGO, calculators, spreadsheets, probeware, and graphing calculators.

Corequisite
EDCI 714.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 717 - Teaching with Technology IV: Hypermedia and Emerging Technologies

Credits: 3
Develops expertise with hypertext/hypermedia and multimedia tools. Emphasizes ability to use tools and then teach others. Focuses on understanding difference between hypermedia and multimedia. Also examines educational technologies expected to become important applications soon, including virtual reality and distributed learning.

Corequisite
EDCI 716.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 719 - Tools 5: Web 2.0 and Digital Video Editing

Credits: 3
Explores emerging Web2 tools (blogs, wikis, and podcasts) and digital video with attention to conceptual understanding and potential applications in K-12 settings. Culminates in the design and development of products and lesson plans for K-12 settings.

Prerequisites
EDIT 717.

Corequisite
EDIT 720 - Leadership Issues in Educational Technology

Credits: 3
Examines how educational technology can provide infrastructure for creating, managing, and evaluating innovative types of teaching and learning environments. Explores new assumptions about learning, instructional technology, and organizational development as foundation for planning how schools can use technology to evolve beyond conventional approaches.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 721 - Web-Based Learning

Credits: 3
Examines web-based learning and how these tools can be integrated into the teaching/learning process in K-12 settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 725 - Technology and Diversity

Credits: 3
Focuses on technology to support learning needs of all students, including English-as-a-second-language, bilingual, and special-needs students. Emphasizes helping teachers use technology to support learning when faced with such diverse learners in one classroom.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 730 - Advanced Instructional Design

Credits: 3
Capstone course of three-course sequence on theory and practice of instructional design. Helps students apply ideas developed in prior courses to complete major instructional design project. Covers leading-edge ideas in evolution of instructional design.

Prerequisites
EDCI/EDIT 705

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 732 - Analysis and Design of Technology-Based Learning Environments

Credits: 3
Enables design, implementation, and evaluation of technology-based education and training materials using advanced computer-based authoring tools.

Prerequisites
EDIT 730 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 742 - Interactive Technologies: Gaming and Robotics

Credits: 3
Project-based, hands-on course focusing on technology, science, and engineering. LEGOS, controlled by small microcomputers, used to show principles behind many technological innovations. Other technological advances explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 745 - Technology Leadership Issues

Credits: 3
Explores relationship of leadership, innovations, change, and technology advocacy. Emphasizes implementation of ideas and strategies to influence decisions of policy makers. Explores sources of grant funding, and interaction with professional organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 746 - Educational Technology and Assessment

Credits: 3
Covers fundamentals of educational assessment and measurement, and relates them to current attempts to use technology for educational assessment. Explores use of computer technology to support traditional testing and innovative ways to assess complex learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 747 - Technology and Teacher Development
Investigates latest research and issues related to teacher education to include staff development in K-12 in-service as well as university courses. Students paired with preservice teachers who act as online mentors to develop leadership and mentoring skills.

**Prerequisites**
EDIT 590 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDIT 748 - TIP 2 Technology Innovations Project**

Credits: 3  
Continuation of design and development of EDIT 741 technology-enriched learning module. Students conduct action research, and implement advanced action research project.

**Prerequisites**
EDIT 741 and 590.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDIT 750 - Emerging Educational Technologies**

Credits: 3  
Examines range of educational technologies expected to become important applications in three to eight years. Assesses potential of these emerging technologies to improve practice and alter mission and content of education, and helps students develop skills in strategic planning.

**Notes**
To be taken in final year of course work.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**EDIT 752 - Design and Implementation of Technology-based Learning Environments**

Credits: 3  
Students design and produce multimedia/hypermedia applications based on current theory and research in instructional design and cognitive science. Examines user needs, information models, structure, and media selection and uses to inform design and production of final project.

**Prerequisites**
EDIT 732 or permission of instructor.
EDIT 771 - Introduction to Multimedia/Hypermedia

Credits: 1-3
Provides overview of tools used in instructional design. Focuses on developing skills necessary to implement hypermedia/multimedia ideas into production process.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 772 - Web-Based Instructional Tools

Credits: 1-3
Provides overview of web development tools. Using instructional design principles, students interact with variety of web publishing software programs to develop a project web site.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDIT 773 - Human Computer Interface Design for Teaching and Learning

Credits: 3
Provides overview of human-computer interface issues related to instructional design of technology-centered learning environments. Examines continuum of human-computer feedback.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 790 - Practicum in Instructional Technology

Credits: 1-6
Provides supervised practice in applying knowledge and skills of student's chosen track through placement in appropriate work setting.

Prerequisites
Completion of IT track requirements, except for practicum, and permission of advisor.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
EDIT 791 - Project Development Practicum

Credits: 6
Designed for students in immersion concentration of Instructional Technology program. Allows students to join design team focusing on analysis and design phase of instructional design process and development process.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

EDIT 792 - Project Development Practicum

Credits: 6
Designed for students in immersion concentration of Instructional Technology program. Allows students to join design team focusing on development and evaluation phase of instructional design process and development process.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

EDIT 797 - Advanced Topics in Education

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes
May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDIT 801 - Nature and Process of Design

Credits: 3
Examines multi- and cross-disciplinary perspectives on the nature and process of designing and developing learning technologies.

Prerequisites
EDCI 716, EDIT 752, or EDSE 649

Corequisite
EDIT 802 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDIT 802 - Cognition and Technology: A Multidisciplinary Approach

Credits: 3
Examines learning interactions between cognition and technology using multiple disciplinary perspectives including, cognitive science, psychology, neuroscience, education, design theory, instructional design, technology design, anthropology, sociology, information science, philosophy, semiotics, and linguistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDIT 803 - Design-Based Research

Credits: 3
Provides an introduction to systematic cycles of design-based research in education. Applicable to all content domains to explore cycles of research within design, development and implementation of educational and training interventions.

Prerequisites
EDIT 801

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

EDIT 891 - Design Research Internship

Credits: 1-9
Applies multiple design research cycles to an identified research problem to systematically test and improve technology-based product interventions or other curriculum/training strategies or materials in order to systematically develop knowledge related to teaching, learning and/or training in context.

Prerequisites
EDRS 811, EDRS 812, and EDIT 803 or equivalent

Grading: Graduate Special
When Offered: Fall, Summer, Spring

EDIT 895 - Emerging Issues in Instructional Technology

Credits: 3
Covers selected emerging issues. Examines ways instructional technology provides infrastructure for creating, managing, and evaluating innovative types of teaching-learning environments.

Prerequisites
Admission to PhD program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Interdisciplinary Studies

MAIS 797 - Interdisciplinary Studies Proposal

Credits: 1
Focused on formulating and writing a MAIS project or thesis proposal.

Prerequisites
Admission to MAIS and completion of 21 credits of graduate course work, including any required research methodology course.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

MAIS 798 - Interdisciplinary Studies Project

Credits: 1-5
Research project related to student's concentration taken under supervision of faculty advisor and project evaluation committee.

Prerequisites
MAIS 797 and prior approval of a project proposal by the faculty advisors, two committee members, and MAIS director.

Notes
Individualized section form required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

MAIS 799 - Interdisciplinary Studies Thesis

Credits: 1-5
Original research endeavor related to student's MAIS program concentration. Research must result in document meeting MAIS and university standards.

Prerequisites
MAIS 797 and prior approval of a thesis proposal by the faculty advisors, three committee members, and MAIS director.

Notes
Individualized section form required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0  
Grading: S/NC

International Commerce and Policy

**ITRN 500 - Global Political Economy**

Credits: 1-4  
Foundation course in the ICP program. Explores issues and ideas affecting global security, stability, growth and development from country, regional and thematic perspectives. Introduces students to key concepts, policies, and practices that underpin international commerce, international relations more broadly, and non-governmental transnational activities.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 501 - Methods of Analysis for International Commerce and Policy**

Credits: 4  
Provides the skills necessary to conduct qualitative and quantitative research and analysis of issues related to international commerce and policy. Students obtain practical information on sources of data, their origins, strengths, and weaknesses. Helps develop tools for statistical analysis of data, and includes use of computers for analyzing and displaying information. It covers major data sources as well and literature and indices related to international policy, including trade data, economics and financial indicators, and development indicators.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 503 - Investment and Macroeconomics**

Credits: 1-4  
Provides overview of basic concepts in macroeconomic theory, as well as mathematical skills, with emphasis on application to problems of contemporary global economy. Covers monetary systems, balance of payments, foreign exchange market, foreign investment and international institutions, and issues in world monetary arrangements.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**ITRN 504 - Trade and Microeconomics for International Commerce**

Credits: 1-4  
Provides foundation in international economics, and presents fundamentals of international trade, finance, and transactions.
Focuses on alternative approaches to understanding international economic system. Topics include classical and neoclassical theories of trade, alternative theories of trade and their extensions, tariffs, customs unions, institutions, and economic development. Students learn to employ appropriate analytical approaches, including graphical analyses, and communicate the results concisely. Throughout, emphasizes relating theory to practical applications.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ITRN 602 - International Financial Institutions and Globalization

**Credits:** 3  
Examines nature and dynamics of financial interactions between public and private sectors worldwide. Covers aims and actions of international financial institutions in fostering trade and development, with emphasis on emerging economies. Policy issues include devolving political and economic structures, differing resource and cultural endowments, privatization, financial crises, sector imbalances, and equity. Reviews international and domestic financial markets and instruments.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ITRN 603 - International Trade Relations

**Credits:** 3  
Examines U.S. role in world economy and evolving global trading system. Analyzes regulatory framework for trade and political dynamics of international trade relations. Particular attention to domestic trading institutions, and global and regional institutions such as the GATT/WTO, NAFTA, EU, and APEC. Examines debate between free and fair trade advocates, and prospects for U.S. trade policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ITRN 604 - International Trade and Technology

**Credits:** 3  
Examines science and technology policies and international trade, with emphasis on relationships and interactions. Assesses roles of science and technology as economic drivers, and explores strategies employed by companies and governments to link research and development to economic growth and competitiveness. Examines research and development systems and technology-related trade policies of United States, Japan, Europe, major developing countries, and selected newly industrialized economies, emphasizing policies affecting trade and technology. Explores specific cases involving interactions among science, technology, and international trade.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### ITRN 612 - International Business Operations and the Multinational Corporation
Credits: 3
Examines international business environment and challenges facing companies in conducting operations in increasingly interconnected global marketplace. Focuses on issues of management and organization, and resolution of conflicts that may arise between business organizations and home and host governments. Also focuses on role of multinational corporations in international environment, and impact on global trade, economic development, and political system. Also studies trade and international investment theories and world financial environment. Explores broad issues such as sovereignty of decision making and global impact of business activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 701 - Special Topics in International Commerce and Policy

Credits: 1-3
Offers specialized courses on various aspects of international commerce and policy.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

ITRN 702 - Special Topics in International Commerce and Policy: Study Abroad

Credits: 3-6
Provides opportunity for study abroad under supervision of Mason faculty.

Notes
Course topics, content, and locations vary.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 710 - International Business Transactions: Finance and Investment

Credits: 3
Focuses on techniques for financing trade and payment methods, including letters of credit, counter trade, and other approaches. Covers issues of direct concern in financing international business operations, such as preparing financing proposals, risk insurance, international taxation, pricing policies, and currency conversion and foreign exchange risk management. Introduces foreign direct investment, alliances and acquisitions, joint ventures, and other methods for investing overseas.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 711 - United States Law and Global Trade
Credits: 3
Surveys types of regulations imposed by United States, foreign governments, and international institutions on transnational business activities. Reviews principal regulatory bodies in United States and overseas, and powers and authorities. Covers tariffs and customs regulations; product safety and environmental restrictions; intellectual property, copyright, trademark, and patent regulations; and licensing rules. Also covers special restrictions that may be imposed because of political considerations such as embargoes, munitions controls, and antibribery and antiboycott regulations.

Prerequisites
ITRN 603 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 712 - World Trade Organization and Global Trade

Credits: 3
Focuses on legal aspects of international trade regulation by studying international legal and political regime established under WTO, and assessing impact of domestic economic legislation on U.S. trade regulations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 713 - U.S. Foreign and Economic Decision Making

Credits: 3
Identifies and assesses approaches to foreign policy decision making within the United States and offices involved with political and trade issues. Examines congressional and executive processes and their interrelationship. Exercises involve historical and simulated cases; gives attention to conflicting interests of private and institutional entities. Assesses tension between political and economic issues within context of national security concerns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 715 - Global Environment and the World Economy

Credits: 3
Examines growing relationship between environmental interdependence and developing world economy. Assesses increased globalization of environmental and health issues with a focus on the impact on those issues on international transactions involving trade and development. Attempts to develop an understanding of relationship of scientific knowledge to global environment in context of existing political and economic institutions. Emphasizes formulating and assessing policies and structures for corporations, nations, regions, and international organizations. Tensions among free trade, international competitiveness, and regulatory responses are central. Gives attention to practices of nations and international organizations, emerging forms of regional and international cooperation, and growing use of multilateral agreements.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 716 - European Union in the International System

Credits: 3
Examines current developments in European market integration from global perspective. Emphasizes impact of single market, and proposed economic and monetary union of United States and other major trading partners. Examines European economic relations with Eastern Europe, former Soviet Union, and Lome Pact countries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 717 - International Science and Technology

Credits: 3
Examines U.S. science and technology policies (S&T) and structures, as well as those in other leading countries. Assesses functional links between S&T and international transactions focusing on trade, national security, finance, and development assistance. Considers emergence of multilateralism and international institutional arrangements as alternatives to traditional bilateral patterns of cooperation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 718 - Global Economic and Human Development

Credits: 3
Interdisciplinary examination of economic and human development in world economy. Introduces alternative concepts and theories of economic and human development, and analytical frameworks for assessing important issues that arise in development process. Topics include colonialism, economic growth, population, health, education, industrialization, and rural development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 720 - Regional and Supranational Organizations

Credits: 3
Assesses role of international organizations in international system today, and focuses on wide range of international and regional economic and political institutions. Emphasizes changing nature of these organizations in relation to nation states, and relationship of international organizations to U.S. national security and economic interests.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 730 - Information Technology Fundamentals for International Business and Trade

Credits: 3
Deals with technology and issues relating to emergence of computing, information, and telecommunications technologies in mainstream society. Aim is to provide general understanding and facility with technologies of contemporary interest.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 731 - Business-to-Business Marketing in International Commerce

Credits: 3
Provides understanding of concepts of international marketing process and international environment within which companies operate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 734 - Pricing in International Commerce

Credits: 3
Deals with theory and techniques of pricing that enable organizations to effectively pursue marketing and business strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 736 - Sources of Growth in East Asia

Credits: 3
Examines extraordinary economic success of East Asian NIEs and some of their problems. Focuses on understanding proximate sources of growth, role of technological development, and salient political issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 737 - World Trade in Semiconductors and Information Technologies

Credits: 3
Examines bilateral and multilateral approaches to world trade in technology products. Compares U.S.-Japan Agreement on Semiconductors and its successor agreements with those of WTO. Also looks at effects of agreements on U.S. industry, their relevance to trade development, and commercial transactions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 738 - Fundamentals of International Marketing

Credits: 3
Offers working knowledge of principles and practices that enable managers to effectively market organizations, products, services, and brands. Emphasizes international dimensions of marketing where appropriate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 740 - ABCs of Exporting and Importing

Credits: 3
Acquaints students with legal, regulatory, and practical issues in importation and exportation of merchandise. Topics include theoretical framework for government oversight of international movement of goods; legal issues between parties and governments; and practical guidance concerning structuring of import and export transactions to avoid legal and tariff liability.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 742 - Technology Policy and International Strategies

Credits: 3
Introduces opportunities and problems created for organizations and society by Internet, and policies affecting trajectory of Internet developments. Also covers technological factors in planning horizon; domestic policy and international treaty factors affecting Internet trajectory; and new horizons for Internet applications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 744 - The Politics of International Competitiveness

Credits: 3
Provides inquiry into governance problems of public managers and political leaders as they cope with global competitiveness in post-industrial era. Focuses on integrating public and private sectors worldwide, with special emphasis on U.S. role and how it influences such areas as technology transfer, national security, electronic commerce, trade policies, money flows, and human resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 750 - Trade and Politics in Eastern Europe and the Former Soviet Union
Credits: 3
Examines background and recent developments in political, business, and cultural environment confronting American firms seeking to do business in Eastern Europe and former Soviet Union. Emphasizes international trade patterns and relations between these states and United States. Examines modes of doing business in these countries, and unique problems American firms confront. Focuses on privatization, joint ventures, and counter trade.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 751 - Trade, Investment, and Politics in the Western Hemisphere**

Credits: 3
Examines cultural, political, economic, and legal aspects of conducting business and trade with countries of Western hemisphere. Focuses on evolving pattern of inter- and intra-hemisphere trade, as well as on region's global trade integration. Special attention given to NAFTA and other bilateral and regional agreements, and potential for and implications of free trade area in hemisphere. Emphasizes manipulation and analysis of regional trade data to describe and project trade patterns.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 752 - International Business Lobbying in the United States, Europe, and Japan**

Credits: 3
Presents comparative overview of lobbying process and practices, and explores representation of foreign firms in United States, European Community and member states, and Japan. Examines contemporary problems relating to lobbying by multinational corporations in foreign political and cultural setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 753 - Role of States and Virginia in the Global Economy**

Credits: 3
Examines roles of states, especially Virginia, in the international marketplace. Focuses on formulating specific export marketing plans for particular Virginia firms and industries. Examines state economic development policies, structure of state agencies, services, and resources available to domestic exporter and foreign investors contemplating direct investment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 754 - International Commercialization of Space**

Credits: 3
Identifies and analyzes problems and transactions concerning privatization and commercialization of transnational space
activities, including launch and satellite operations. Emphasizes interplay of new technologies with existing legal, political, and business structures in formulating viable commercial satellite and launch operations. Focuses on planning and implementing private space actions in conjunction with various public and private international organizations. Sessions focus on interdisciplinary aspects of space commercialization involving technology, finance, tax, insurance, joint venture and business matters, and international legal and national regulatory issues. Guest lecturers include leading business executives engaged in space and satellite operations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 756 - National Security and the Global Economy**

Credits: 3
Examines impact of globalization and changes in international economic and political systems on concepts of national security. Emphasizes nexus of economic and security concerns in post-Cold War era, with particular attention to emerging issues including trade and economic security, proliferation of advanced military technology and control of weapons of mass destruction, international drug trafficking, and defense conversion. Focuses on implications of changing security requirements on U.S. defense and economic policy and activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 757 - Business and Politics in Emerging Markets**

Credits: 3
Examines developing countries that are major destination points for international financial flows and foreign direct investment. Emerging markets have become a major influence in the world economy both because of the potential for growth and the downside risks from economic crises. The course uses the new institutional economics to analyze the interplay of political, economic, and business conditions. Institutional economics is a combination of economics, economic history, and political science. Topics covered include the politics of economic reform, drivers of globalization and investment, the informal sector, and relationships of risk and reward.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 758 - Global Market Planning Practicum**

Credits: 3
Provides opportunity to develop international market plan for specific industry or service sector. Students consult with industry experts and use key trade databases to develop strategic plan that recommends market entry strategies. Completed market plan submitted to industry experts for use and dissemination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**ITRN 759 - Country Risk Analysis**

Credits: 3
Presents a wide variety of country risk analysis methods used by corporations, financial institutions, governments, international organizations, specialized consulting groups, and publications. These methods are used to design policies, programs, and projects in the international arena. The course explores natural, commercial, economics, political and financial risk. It also provides a conceptual foundation for understanding the sources of risk, the impacts of risk on public and private sector activities, and the ways that risk can be successfully mitigated or managed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 760 - International Environmental Politics**

Credits: 3
Examines growing concerns related to global environmental issues and problems they pose to domestic, foreign, and international political institutions. Covers major environmental issues including global warming, ozone depletion, cross-border flow of pollution, and threats to biodiversity. Assesses strengths and weaknesses of traditional political institutions in dealing with these issues and providing for sustainable economic development while limiting environmental damage.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 761 - European Political and Economic Union**

Credits: 3
Examines movement for European integration since World War II, focusing on political and institutional development of European Community/Union. Topics include theories of European integration, Treaties of Rome, Single European Act, Maastricht Treaty, European Union (EU) policies and programs, and EU's external relations. Analyzes changing nature of U.S.-EU relations and prospects for EU enlargement into Central and Eastern Europe.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**ITRN 763 - International Real Estate Transactions**

Credits: 3
Provides overview of real estate market in the United States with emphasis on commercial real estate and issues of importance to national and international investors. Reviews recent developments in valuation approaches, marketing strategies, and performance trends. Discusses increasing use of securitization along with implications for traditional originators of mortgage financing. Emphasizes government experience and practices in real estate management and disposition.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
ITRN 764 - Trade, Investment, and Politics in East Asia

Credits: 3
Examines issues related to international transactions involving Korea, China, Taiwan, and Hong Kong, with some attention to Japan. Focuses on trade and financial relations between these East Asian nations and United States. Assesses impact of culture and domestic political and economic institutions within these states, and roles in regional institutions and in international system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 765 - Trade, Investment, and Politics in Sub-Saharan Africa

Credits: 3
Examines role and potential of sub-Saharan Africa in international trading system. Emphasizes political, historical, cultural, and development factors. Focuses on perspectives of U.S. firms and on international institutions trading or investing in region.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 766 - Trade, Investment, and Politics in the Middle East and North Africa

Credits: 3
Examines major economic, political, and cultural issues that influence trade and investment relations with Middle East and North Africa. Focuses on roles of international and regional institutions in economic development, and develops understanding of challenges facing region and their implications for formulating trade and investment strategies by U.S. firms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 767 - Political Economy and Integration in Latin America

Credits: 3
Examines contemporary political, economic, and cultural dynamics of Latin American and Caribbean regions. Emphasizes issues and trends that affect U.S.-Latin American political, business, and trade relations, particularly recent political and economic reforms. Examines roles of domestic interest groups and decision-making systems in individual countries, and evolution of regional integration arrangements and integration with international system.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

ITRN 768 - Global Intellectual Property Rights and International Trade

Credits: 3
Examines national and regional systems, international contractual relations (licensing), and the evolving global system for
protecting intellectual property. Addresses current international treaty system and the ongoing multilateral efforts to strengthen worldwide intellectual property protection. Examines intellectual property regimes worldwide, including regional and bilateral challenges and opportunities, and relevant U.S. law and policy responses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 769 - International Entrepreneurship**

Credits: 3  
Introduces practical planning approach for small and medium-size entrepreneurial firms seeking to enter international marketplace. Focuses on key business and financial documents related to doing business overseas; and assesses role of language, technology, and information systems in formulating successful business strategy. Role playing and simulated negotiations provide opportunities for students to sharpen business skills.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 770 - International Contract Negotiation**

Credits: 3  
Reviews growing role of arbitration in international transactions. Examines international, national, and government arbitration bodies, with particular emphasis on how differing cultural characteristics affect negotiating behavior and effectiveness of arbitration.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 771 - Trade, Investment, and Politics in South and Southeast Asia**

Credits: 3  
Focuses on trade and finance issues in the most dynamic countries of South and Southeast Asia. Assesses cultural and political factors, regional trade patterns, and institutions, focusing on implications for regional development and business opportunities for U.S. firms.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**ITRN 772 - International Telecommunications**

Credits: 3  
Focuses on developments in international telecommunications and satellite regulation. Examines regulatory environment, and business and financial aspects of global telecommunications industry.
I TRN 773 - International Strategic Management

Credits: 3
 Presents comprehensive approach to international strategy formulation, implementation, and evaluation processes affecting policy and program development within multinational firms and government agencies. Integrates marketing, finance, accounting, and management. Covers techniques for forecasting international business, political, economic, technological, legal, and sociocultural forces.

I TRN 780 - Internship

Credits: 1-3
 Provides practical work experience in state, federal, or international agencies or private sector. Requires written project integrating work experience and academic program.

Notes
Open to authorized graduate majors only; departmental and advisor approval required before enrolling.

I TRN 790 - Independent Study

Credits: 1-3
 Provides opportunity to pursue intensive research in area of interest not covered by other courses.

Notes
Open to authorized graduate majors only; departmental and advisor approval required before enrolling. Note: Not all courses earn 3 graduate credits. Some courses may vary in length and thus, in credits earned. Some course requirements subject to change.

I TRN 791 - Advanced Trade Policy

Credits: 3
 Covers international trade theory, trade policy analysis, regional economic integration, and institutional arrangements governing world trade. Examines dispute settlement regimes, and relationship between trade and environment. Includes WTO and constituent agreements in the areas of goods, services, intellectual property, and trade-related investment measures.
ITRN 795 - Final Project

Credits: 1-3
Includes writing 40-page capstone paper that draws together key themes of program.

Italian

ITAL 101 - Elementary Italian I

Credits: 3
Designed for students with no prior knowledge of Italian. Includes elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for ITAL 101 and ITAL 110.

ITAL 102 - Elementary Italian II

Credits: 3
Continuation of ITAL 101.

Prerequisites
ITAL 101 or permission of instructor.

Notes
Lab work required. Students may not receive credit for ITAL 102 and ITAL 110.

ITAL 110 - Elementary Italian
ITAL 110 - Beginning Italian

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for ITAL 110 and ITAL 101 or 102.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

ITAL 201 - Intermediate Italian I

Credits: 3
Further development of skills in listening, speaking, and writing.

Prerequisites
ITAL 102 or permission of department.

Notes
ITAL 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for ITAL 201 and ITAL 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ITAL 202 - Intermediate Italian II

Credits: 3
Application of language skills to reading, composition, and discussion.

Prerequisites
ITAL 201 or permission of department.

Notes
Students may not receive credit for ITAL 202 and ITAL 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

ITAL 210 - Intermediate Italian

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Italian-speaking regions.

Prerequisites
ITAL 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for ITAL 210 and ITAL 201 or 202.

**ITAL 250 - Gateway to Advanced Italian**

Credits: 3
Development of advanced intermediate-level proficiency with a primary focus on seven major communicative functions: describing, comparing, recommending and expressing opinions, recounting the past, expressing likes and dislikes, hypothesizing, and talking about the future. Examination of authentic materials from various Italian-speaking regions.

**Prerequisites**
ITAL 210; appropriate placement score; or permission of department.

**Notes**
Taught in Italian.

**ITAL 325 - Major Italian Writers**

Credits: 3
Works of major Italian or Italian-American authors in translation. Writers to be studied vary.

Satisfies General Education Requirement: Literature

**Prerequisites**
ENGL 101 or equivalent; or permission of instructor

**Notes**
Course work in English.

**ITAL 330 - Advanced Italian: Language and Culture**

Credits: 3
Develop linguistic and critical proficiency in Italian language and culture for students who have completed intermediate studies in Italian. Analyze authentic texts that reveal the diversity of Italian experience in regional, national and international contexts. Foster advanced reading, writing, speaking, and listening skills that will enable students to understand and to critique Italian with greater ease and sophistication.

**Prerequisites**
ITAL 250; appropriate placement score; or permission of instructor
Japanese

**JAPA 101 - Introduction to the Japanese Language**

Credits: 3
Includes basic grammar, oral expression, listening comprehension, and reading and writing.

**Notes**
Students may not receive credit for JAPA 101 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**JAPA 102 - Introduction to the Japanese Language**

Credits: 3
Includes basic grammar, oral expression, listening comprehension, and reading and writing.

**Notes**
Students may not receive credit for JAPA 102 and JAPA 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**JAPA 109 - Intensive Japanese I**

Credits: 6
Equivalent to JAPA 101, 102 taught in a single semester.

**Notes**
Recommended for students who desire intensive introduction to Japanese. Students may not receive credit for JAPA 109 and JAPA 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

**JAPA 110 - Elementary Japanese**
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for JAPA 110 and JAPA 101, 102, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

JAPA 201 - Intermediate Japanese I

Credits: 3
Further development of skills acquired in JAPA 101 and 102, including grammar, oral expression, listening comprehension, reading and writing. Use of written language (katakana, hiragana, and kanji) emphasized.

Prerequisites
JAPA 102 or equivalent.

Notes
Lab work required. Students may not receive credit for JAPA 201 and JAPA 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 202 - Intermediate Japanese II

Credits: 3
Continuation of JAPA 201.

Prerequisites
JAPA 201 or equivalent.

Notes
Students may not receive credit for JAPA 202 and JAPA 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 209 - Intensive Japanese II

Credits: 6
Equivalent to JAPA 201, 202 taught in a single semester.

Prerequisites
JAPA 102 or 109, or equivalent.

Notes
Students may not receive credit for JAPA 209 and JAPA 201, 202, or 210.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

### JAPA 210 - Intermediate Japanese

Credits: 3  
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Japanese-speaking regions.

**Prerequisites**  
JAPA 110 or appropriate placement score.

**Notes**  
Lab work required. Students may not receive credit for JAPA 210 and JAPA 201, 202, or 209.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

### JAPA 250 - Gateway to Advanced Japanese

Credits: 3  
Development of advanced intermediate-level Japanese language skills in the interpersonal, interpretive, and presentational modes of communication. Incorporates strong component of critical and comparative analysis of Japanese cultural products, practices, and perspectives of the past and the present.

**Prerequisites**  
JAPA 210, appropriate placement score, or permission of department.

**Notes**  
Taught in Japanese.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### JAPA 310 - Japanese Culture in a Global World

Credits: 3  
Study of globalizing Japanese cultural phenomena from the 19th through the 21st century. Explores how movements of ideas, technologies and products across borders influence both local and global ideas and practice.

Satisfies General Education Requirement: Global understanding

**Prerequisites**  
ENGL 101 or equivalent; or permission of instructor
JAPA 320 - Japanese Cinema

Credits: 3
Comprehensive analysis of Japanese cinema based on cross-cultural perspectives and cultural criticism. Major developments and trends as viewed in selected Japanese films with emphasis on post war and contemporary eras. Knowledge of Japanese history, communication, and cultural studies or film and media studies helpful.

Notes
This course is taught in English. May be repeated for credit when topic is different with approval of department.

JAPA 330 - Advanced Reading and Speaking I

Credits: 3
Designed for students to develop conversational proficiency and reading skills. Students work toward a mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports, and presentations.

Prerequisites
JAPA 250, appropriate placement score, or permission of instructor.

Notes
Courses must be taken in sequence.

JAPA 331 - Advanced Reading and Speaking II

Credits: 3
Designed for students to develop conversational proficiency and reading skills. Students continue to develop mastery of linguistic and sociolinguistic rules by incorporating reading and speaking abilities through class discussions, reports and presentations.

Prerequisites
JAPA 202, 330, and appropriate placement score; or permission of instructor.

Notes
Courses must be taken in sequence.
JAPA 440 - Integrated Study of Japanese Language and Society I

Credits: 3
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers.

Prerequisites
JAPA 331, appropriate placement score, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

JAPA 441 - Integrated Study of Japanese Language and Society II

Credits: 3
Integrated approach to study of Japanese language and society through grammar review, vocabulary and kanji development, intensive practice in spoken and written Japanese, and sociological and cultural readings and analysis. Includes class discussion, oral and written reports, and out-of-class direct interactions with native speakers. More emphasis on actual use of Japanese language.

Prerequisites
JAPA 440, appropriate placement score, or permission of instructor.

Notes
Sequel to JAPA 440.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Kinesiology

KINE 300 - Kinesiology

Credits: 3
Increase students knowledge and exposure to the structural and functional components of human anatomy including musculoskeletal origins, insertions, actions and innervations. On a live model, students will locate and identify anatomical landmarks, surface markings and soft tissue structures by palpation. Functional movements in various sport activities will be investigated to classify and identify musculature necessary to create the motions. Emphasis will be places on normal walking and running gait, posture, throwing, kicking and jumping.

Equivalent to PHED 300

Prerequisites
BIOL 124
Corequisite
BIOL 125

Hours of Lecture or Seminar per week: 3
When Offered: Spring

KINE 341 - Practicum in Kinesiology

Credits: 3
Provides a paid or voluntary supervised professional experience in an approved exercise science professional setting under the supervision of a practicum University Supervisor and Agency Supervisor.

Prerequisites
PHED 105 and 108, KINE 400, KINE 410 (concurrent enrollment allowed for KINE 400 and KINE 410); current CPR, AED, & First Aid, and Junior Status.

Hours of Lab or Studio per week: 3

KINE 350 - Cardio-respiratory Training and Conditioning: Concepts and Applications

Credits: 3
Provides students with an opportunity to develop an understanding of the assessment and evaluation process used in cardio-respiratory training and anaerobic conditioning for healthy, athletic, and symptomatic populations.

Prerequisites
PHED 105, KINE 300, and KINE 310

Hours of Lecture or Seminar per week: 3

KINE 360 - Strength Training: Concepts and Applications

Credits: 3
Provides students with an opportunity to develop an in-depth understanding of the principles of strength training and conditioning, including: anatomical and physiological considerations, lifting techniques, equipment selection, program development/evaluation, and weightlifting safety; thus enabling them to teach and train client.

Equivalent to PHED 364

Prerequisites
BIOL 124 and BIOL 125; KINE 300 and 310.

Hours of Lecture or Seminar per week: 3
When Offered: Spring
KINE 370 - Measurement and Evaluation of Physical Fitness

Credits: 3
Provide students with an opportunity to develop a solid understanding of the assessment and evaluation process used in physical education and exercise science.

Equivalent to PHED 365

Prerequisites
BIOL 124 and BIOL 125; KINE 300 and 310.

Notes
This is designated a writing intensive course.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

KINE 400 - Biomechanics

Credits: 3
Focuses on kinetic and kinematic concepts and how they apply to the quantitative assessment of human movement. Analyzes human movement and the functional dynamics of tissue such as muscle or bone.

Prerequisites
BIOL 124, 125; KINE 300

Hours of Lecture or Seminar per week: 3

KINE 410 - Advanced Work Physiology

Credits: 3
Studies the advanced theory of exercise physiology. Increase knowledge related to the physiologic, neuroendocrine, and biochemical changes of the human body which are associated with either a single bout of exercise or chronic work.

Prerequisites
BIOL 124, 125, or BIOL 103,228; and KINE 310 (Physiology of Exercise)

Hours of Lecture or Seminar per week: 3

Korean

KORE 110 - Elementary Korean
Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

KORE 201 - Intermediate Korean I

Credits: 3
Continuation of basic Korean listening, speaking, reading, and writing skills. Online and lab work required.

Prerequisites
KORE 102, appropriate placement score, or permission of department

Notes
Students may not receive credit for KORE 201 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 202 - Intermediate Korean II

Credits: 3
Continuation of KORE 201. Online and lab work required.

Prerequisites
KORE 201, appropriate placement score, or permission of department

Notes
Students may not receive credit for KORE 202 and KORE 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

KORE 210 - Intermediate Korean

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Korean-speaking regions.

Prerequisites
KORE 110 or appropriate placement score.

Notes
Lab work required. Students may not receive credit for KORE 210 and KORE 201 or 202.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

**KORE 250 - Gateway to Advanced Korean**

Credits: 3
Develops advanced-intermediate level reading, writing, listening, and speaking skills through a comparative analysis of Korean cultural products and practices and a critical analysis of the influence of globalization and East Asian regional dynamics.

**Prerequisites**
KORE 210; appropriate placement score; or permission of instructor.

**Latin**

Placement: See Academic Testing section of Admission chapter.

**LATN 101 - Elementary Latin**

Credits: 3
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

**Notes**
Must be taken in sequence. Students may not receive credit for LATN 101 and LATN 109.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LATN 102 - Elementary Latin**

Credits: 3
Introduction including basic grammar, vocabulary, and development of reading skills, and introduction to Roman civilization.

**Notes**
Must be taken in sequence. Students may not receive credit for LATN 102 and LATN 109.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**LATN 109 - Intensive Elementary Latin**
Credits: 6
Equivalent to LATN 101 and 102 and taught in a single semester. Recommended for students in minors of classical studies or Latin, and for students who want intensive introduction.

Notes
Students may not receive credit for LATN 109 and LATN 101 or 102.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

LATN 201 - Intermediate Latin I

Credits: 3
Intensive review of elementary grammar. Introduces more advanced grammatical constructions and patterns of usage, continued development of reading proficiency, and vocabulary and readings in Latin literature.

Prerequisites
LATN 102 or equivalent.

Notes
Students may not receive credit for LATN 201 and LATN 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 202 - Intermediate Latin II

Credits: 3
Study of advanced grammatical constructions, vocabulary, and patterns of usage. Reading of selections from Roman authors of late Republic and early Empire, and study of cultural and political backgrounds.

Prerequisites
LATN 201 or equivalent.

Notes
Students may not receive credit for LATN 202 and LATN 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LATN 209 - Intensive Intermediate Latin

Credits: 6
Equivalent to LATN 201 and 202, and taught in single semester.

Notes
Students may not receive credit for LATN 209 and LATN 201 or 202.
LATN 351 - Roman Prose Literature

Credits: 3
Introduces major work of prose, themes, and literary qualities. Emphasizes interpretation and stylistic analysis. Concentrates on one complete work; topics, authors vary.

Prerequisites
LATN 202 or equivalent.

Notes
May be repeated once for credit.

LATN 352 - Roman Poetry

Credits: 3
Introduces major work of poetry and themes, meters, and poetic techniques. Emphasizes interpretation, metrical and stylistic analysis, and poet's role in society. Topics and authors vary.

Prerequisites
LATN 202 or equivalent.

Notes
May be repeated once for credit.

LATN 451 - Studies in Roman Literature

Credits: 3
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts.

Prerequisites
LATN 351/352 or equivalent, or permission of instructor.

Notes
Topics and authors vary. Sequence may be repeated once for credit.
LATN 452 - Studies in Roman Literature

Credits: 3
Focuses on a single Latin author or literary genre. Approaches subject from variety of interpretive perspectives, and uses secondary literature as well as primary texts.

Prerequisites
LATN 351/352 or equivalent, or permission of instructor.

Notes
Topics and authors vary. Sequence may be repeated once for credit.

Las 100 - Introduction to Latin American Studies

Credits: 1
Weekly series of presentations by various Latin American Studies faculty. Short reading assignments and journal entries required.

Notes
Required for all Latin American studies majors.

Las 490 - Internship

Credits: 1-6
Approved work-study programs in cooperation with specific organizations including area museums, NGOs, and local, state and federal agencies.

Prerequisites
Latin American studies majors with permission of director.

Notes
Credit determined by LAS program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

LAS 491 - Directed Reading for Honors in Latin American Studies

Credits: 3
Directed readings on specialized topic in Latin American Studies to prepare students for LAS 492, the honors research seminar in the major.

Prerequisites
admission to Latin American studies honors program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LAS 492 - Honors Research Seminar in Latin American Studies

Credits: 3
Honors-level research on specialized topic in Latin American studies culminating in substantial paper and oral presentation. Students expected to integrate knowledge and skills acquired in general education courses.

Prerequisites
LAS 491; completion or concurrent enrollment in all other general education courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LAS 499 - Research Seminar in Latin American Studies

Credits: 3
Research on specialized topic in Latin American Studies culminating in substantial paper and oral presentation. Students expected to integrate knowledge and skills acquired in general education courses.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
90 credits and complete or concurrent enrollment in all other required general education courses.

Notes
Must receive passing grade to graduate with a BA in Latin American studies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Linguistics

LING 322 - English Grammar

Credits: 3
Overview of grammatical structure of English including word classes, phrases, and complex sentences. Analyzes English grammar using modern syntactic theory. Students engage in language description through problem solving.

Equivalent to ENGL 322

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

LING 326 - General Linguistics

Credits: 3
Introduces phonetics, phonology, morphology, and syntax.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

LING 450 - Introduction to Sociolinguistics

Credits: 3
Overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

Prerequisites
LING 326.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

LING 485 - Semantics and Pragmatics

Credits: 3
Developments in theoretical linguistics that explore how language form is related to meaning and context. Topics include reference, lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.
Prerequisites
LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 486 - Syntax I

Credits: 3
Nature and form of syntactic theory, and examination and analysis of the properties of several major natural language syntactic structures.

Prerequisites
LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 490 - Generative Phonology

Credits: 3
Sound systems of English and other languages from perspectives of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations, rhythm and stress, and phonological universals and constraints.

Prerequisites
LING 326.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 499 - Independent Study

Credits: 1-3
Intensive study of particular theoretical problem in linguistics conducted by student in close consultation with instructor. Student produces substantial piece of written work on research findings.

Prerequisites
LING 326 and 3 other LING credits, and permission of instructor.

Notes
With instructor permission, may be taken twice for total 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
LING 507 - Field Work in Applied Linguistics

Credits: 3
Contact English Department one semester prior to enrollment. Field work providing working experience in language-teaching program or educational research organization.

Prerequisites
LING 326, 520, 521, or 582.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

LING 520 - Introduction to Linguistics

Credits: 3
Introduces terminology and methodology of modern linguistic science, and detailed structural analysis of English phonology, morphology, and syntax.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 521 - Applied Linguistics: Teaching English as a Second Language

Credits: 3
Theories and basic principles of teaching a second language, especially as they relate to English language. Introduces students to methods of teaching English to speakers of other languages.

Prerequisites
LING 520, 690, or 786.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 522 - Modern English Grammar

Credits: 3
Overview of structure of modern English beginning with word classes and ending with analyses of complex sentences. Most topics introduced as problems of language description; in solving them, principles of syntactic argumentation are demonstrated. Students learn to tap intuitions about English to analyze grammatical structure.

Prerequisites
One course in linguistics, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
LING 523 - English Phonetics

Credits: 3
In-depth description and analysis of sound system processes of modern English. Topics include segmental phonetics, syllable structure, connected speech, and prosodic phenomena. Also addresses implications for language instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 525 - Practicum in ESL

Credits: 3
Involves preparation and presentation of lessons to adult English as second language (ESL) learners under guidance of mentor teacher and practicum professor. Field experience consists of observation and teaching in assigned ESL classroom.

Prerequisites
LING 521

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 581 - Psycholinguistics

Credits: 3
Study of mental and psychological aspects of human language, including aphasia, association, autism, language acquisition, verbal concept formation, and perception.

Prerequisites
LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 582 - Second Language Acquisition

Credits: 3
Examines second language (L2) acquisition from linguistic perspective. Compares first and second language acquisition. Explores factors contributing to L2 variation, including linguistic universals, transfer, age, input, and affective considerations.

Prerequisites
LING 520, 690, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
LING 650 - Introduction to Sociolinguistics

Credits: 3
An overview of the study of language variation and change. Topics to be covered include the interaction between language and social factors (age, sex, social class), dialects of English, speech communities, language contact, and language and gender.

Prerequisites
One of the following: LING 520, 523, 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 686 - Special Topics in Linguistics

Credits: 3
Detailed advanced study of selected area of linguistics.

Prerequisites
Varies with topic.

Notes
Content varies. May be repeated once for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 690 - Generative Phonology

Credits: 3
Sound systems of English and other languages from the perspective of phonological theory. Topics include articulatory phonetics, distinctive features, nature of phonological representations and processes, rule ordering, abstractness, role of external evidence, and nonlinear phonology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 691 - Theories of Language

Credits: 3
Seminar in linguistic metatheory. Examines wide range of theories about language and linguistic theory, including those of Saussure, Bloomfield, Chomsky, and others. Readings from original sources.

Prerequisites
LING 520, 690, or 786; or permission of instructor.
LING 692 - Phonology II

Credits: 3
Recent trends in phonological theory. Topics include stress assignment, tone spreading, and vowel harmony, from within nonlinear framework. Discusses segmental structure and underspecification.

Prerequisites
LING 690.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 770 - Research Methods

Credits: 3
Conceptualizing and conducting second language research, including process of developing research questions, gathering data, obtaining permission from institutional review board, choosing data collection measures, and coding linguistic and nonlinguistic data.

Prerequisites
LING 582 and one of LING 690, 785, or 786; or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

LING 782 - Second Language Acquisition II

Credits: 3
Advanced course in second-language acquisition theory. Detailed analysis of internal and external constraints. Variation addressed from linguistic, psychological, and environmental perspectives.

Prerequisites
LING 582, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 785 - Semantics and Pragmatics

Credits: 3
Developments in theoretical linguistics that explore how language form relates to meaning and context. Topics include reference,
lexical semantics, logic, quantification, truth conditions and sentential meaning, presuppositions, and speech acts.

**Prerequisites**
LING 520, 690, or 786; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 786 - Syntax I**

Credits: 3  
Nature and form of syntactic theory. Examines and analyzes properties of several major natural language syntactic structures.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 787 - Syntax II**

Credits: 3  
Theoretical treatment of syntactic phenomena that have emerged as standard problems for syntactic analysis. Problems include binding, extraction, and quantification. Extensive reading in primary theoretical literature.

**Prerequisites**
LING 786.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 788 - Semantics and Pragmatics II**

Credits: 3  
Advanced course in semantic and pragmatic theory. Study of meaning under truth-conditional, model-theoretic framework explored and related to syntax and pragmatics.

**Prerequisites**
LING 785, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**LING 798 - Directed Reading and Research**

Credits: 1-3  
Reading, research, and writing on specific project under direction of departmental member.
Notes
Open only to students who have completed at least 18 credits of LING courses. Prior approval by faculty member required. Written report required. May be repeated once for credit with permission.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

LING 799 - Thesis

Credits: 1-6
Students who take LING 798 to develop thesis topic and then elect thesis option receive 3 credits after completing thesis. Students who do not take LING 798, or who take it to work on project unrelated to thesis, receive up to 6 credits after completing thesis.

Notes
Open only to students who have completed at least 18 credits of LING courses.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

LING 882 - Seminar in Language Acquisition

Credits: 3
Advanced topics seminar in current language acquisition theory.

Prerequisites
LING 782 or permission of instructor.

Notes
Topics vary. May be repeated twice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 886 - Advanced Syntax Seminar

Credits: 3
Advanced course in current syntactic theory.

Prerequisites
LING 786 or 787, or permission of instructor.

Notes
Topics vary. May be repeated twice.
LING 890 - Advanced Phonology Seminar

Credits: 3
Advanced topics seminar in current phonological theory.

Prerequisites
LING 692 or permission of instructor.

Notes
Topics vary. May be repeated twice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 898 - Advanced Qualifying Seminar

Credits: 3
Work on PhD qualifying paper.

Prerequisites
Completion of 33 credits of core courses in linguistics.

Notes
May be repeated once.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

LING 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for the doctoral dissertation.

Prerequisites
Advancement to candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

LING 999 - Doctoral Dissertation
Credits: 1-12
Doctoral dissertation research and writing under direction of student's dissertation committee.

Prerequisites
Completion of LING 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MGMT 301 - People and Organizations

Credits: 3
Explores how individuals behave in the workplace, and how group and organizational structures affect behavior. Builds managerial skills required for working with and through others to reach organizational goals. Topics include individual differences, groups and teams, managing conflict, organizational ethics, culture, diversity, influence, leadership, and motivational theories and techniques. The course format provides opportunities to discuss and apply concepts.

Prerequisites
Sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 312 - Principles and Practices of Management

Credits: 3
Builds on fundamental theories and concepts learned in MGMT 301 by examining the nature of managerial work under a range of business models and under rapidly changing business conditions. Managerial functions and activities such as planning, strategizing, organizing, controlling, and directing are examined in depth and in the context of current organizational examples and scenarios.

Prerequisites
C or higher in MGMT 301 and degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MGMT 321 - Introduction to Human Resource Management

Credits: 3
The field of human resource management examines what can or should be done to make workers more productive and satisfied. The course builds on MGMT 301 by introducing key concepts and techniques that managers need to attract, retain, develop, compensate, and motivate quality talent. Also emphasizes legal and ethical considerations in human resource management.

Prerequisites
C or higher in MGMT 301 and degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 412 - Diversity in Organizations

Credits: 3
Builds on MGMT 301 by emphasizing intrapersonal, interpersonal, organizational, and societal phenomena relevant to issues of diversity. Examines phenomena and processes in general and with regard to specific dimensions such as gender, race, and ability. Designed to increase students' knowledge of diversity in organizations, understanding others' perspectives, and ability to work well with people who differ from themselves.

Prerequisites
C or higher in MGMT 301 and degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 413 - Organizational Development and Management Consulting

Credits: 3
Introduces theory and practice of organization development. Assumes some basic knowledge of organizational behavior, and addresses how to use knowledge about organizations to change them. Focuses on ways of understanding organizations with attention to theoretical underpinnings of field and diagnostic models, and processes for entering organizations. Later sessions focus on contracting, data collection, organizational diagnosis, data feedback, and change technologies.

Prerequisites
C or higher in MGMT 301; degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 421 - Advanced Human Resource Management

Credits: 3
Builds on MGMT 321 by using a case-based approach to deepen understanding of HRM practices. Students conduct projects requiring application of strategic HR processes. Includes discussion of advanced topics not thoroughly covered in MGMT 321.
Relevant for management majors, particularly those seeking a human resource management career. Helps prepare for SHRM Professional in Human Resources certification exam.

**Prerequisites**
C or higher in MGMT 301 and 321, and degree status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MGMT 431 - Employee Relations**

Credits: 3  
Focuses on employee relations issues from historical and current perspectives; for management majors interested in pursuing HRM career.

**Prerequisites**
C or higher in MGMT 301 and BULE 302; degree status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MGMT 451 - New Venture Creation**

Credits: 3  
Explains process of conceptualizing and creating new venture. Using central concepts of innovation, strategic opportunities, and globalization, students learn to evaluate new venture opportunities and consider external environment's impact. Students gain greater understanding of entrepreneurial concepts by developing business plans that address critical issues, including management composition and structure, effective business and functional strategies, operational logistics, legal issues, financial projections, and financing options.

**Prerequisites**
C or higher in MGMT 301 and degree status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MGMT 461 - Cross Cultural and Global Management**

Credits: 3  
Explores theory and practice of managing culturally diverse organizations in domestic and international contexts. Topics include management customs and practices in different world regions, cross-cultural communication and learning, and the developing culturally and internationally sophisticated employees and managers.

**Prerequisites**
C or higher in MGMT 301, and degree status.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 462 - Honors Seminar in Management

Credits: 3
Topic and format vary. In-depth study of topic of interest to managers and organizations.

Prerequisites
Invitation by professor.

Notes
Enrollment limited and competitive.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MGMT 463 - Negotiations in Organizations

Credits: 3
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation and use of rational assumption, bidding and decision criteria. Format includes negotiation exercises, lecture, and discussion.

Prerequisites
C or higher in MGMT 301 and degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 464 - Teamwork and Interpersonal Skills

Credits: 3
Focuses on intensive development of high professional-level skill set for collaboration and leadership in contemporary environments. Builds on content introduced in MGMT 301, 312. Attention to developing personal leadership capabilities, collaborating in traditional and virtual environments, improving group processes, project management, tolerating ambiguity, improving communication, creative problem solving, time management, coaching, and empowering employees.

Prerequisites
C or higher in MGMT 301 and degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MGMT 471 - Competitive Strategy
Explores industry structures and competitive behavior of firms. Attention to how firm uses tangible, intangible, and human resources to develop sustainable competitive advantage, and how competitors interact in marketplace. Introduces tools and concepts to analyze industry dynamics and competitive interactions of firms in these industries.

**Prerequisites**
C or higher in MGMT 301 and degree status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MGMT 491 - Current Topics in Management

Credits: 3  
Advanced study of management concepts and selected topics. Incorporates intensive analysis of management problems of long-term strategic significance or current urgency for organizational planning and operations. Includes significant contemporary research findings.

**Prerequisites**
C or higher in MGMT 312 and degree status.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### MGMT 499 - Independent Study

Credits: 1-3  
Research and analysis of selected problems or topics in management must be arranged with instructor and approved in writing by associate dean for undergraduate programs.

**Prerequisites**
Management majors with at least 9 credits of management major courses.

**Notes**
Written report required.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

### Management Information Systems

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.
MIS 102 - Spreadsheet Applications for Business

Credits: 1
Hands-on course using popular spreadsheet package. Business examples used to teach fundamentals of spreadsheets and their use in business applications.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1
Grading: S/NC
When Offered: Fall, Spring, Summer.

MIS 301 - Introduction to Business Information Systems

Credits: 3
Introduces fundamentals of hardware, software, and networking. Emphasizes role of technology in improving contemporary business processes and competitive advantage. Includes basic relational concepts, hands-on experience in building business database applications and decision support using spreadsheet software.

Prerequisites
Sophomore standing.

Notes
Projects required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

MIS 302 - Introduction to Programming for Business Applications

Credits: 3
Covers design and implementation of program data structures and algorithms to solve business problems using structured programming techniques. Students become familiar with program development life cycle using standard programming language such as Visual BASIC.NET supported by a modern Integrated Development Environment (IDE). Students complete assignments involving development of real-life business application.

Notes
IT 108 highly recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 310 - Database Management Systems

Credits: 3
Introduces principles of designing and manipulating relational databases with a focus on business applications. Theoretical
database concepts and hands-on experience with a relational package. Term project requiring implementation of a substantial business database application.

**Prerequisites**
C or higher in MIS 301, degree status.

**Notes**
SOM majors may not receive credit for both MIS 310 and IT 214. Requires hands-on implementation using software package.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer.

---

### MIS 320 - Networks and Security

Credits: 3  
Introduces students to fundamentals of networking technologies and their role in businesses. Emphasis is on understanding the business implications of different networking technologies and solutions. Students learn to identify and understand the business requirements, and bring together the different technological components to design the required communication solutions. Also focuses on the types of security threats to the business network infrastructure, and approach to tackling such threats through business practices combined with appropriate technological solutions.

**Prerequisites**
C or higher in MIS 301, degree status.

**Notes**
The course also includes lab work and exercises.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### MIS 330 - Systems Analysis and Design

Credits: 3  
Understanding systems analysis and design methods is a necessary skill for contemporary business analysts, managers, software engineers and system users. Provides students with the foundations for effectively using modern systems analysis and design tools and methodologies for developing modern software and applications. Topics include systems planning and feasibility analysis, requirements analysis, economics, systems design and project management.

**Prerequisites**
C or higher in MIS 301 and MIS 310, degree status, programming course recommended.

**Notes**
Requires team project.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring, Summer.
MIS 411 - Management and Control of Information Systems

Credits: 3
Managerial perspective on issues arising in managing information systems through their life-cycle. The topics include using different methodologies for estimating software development costs, maintenance costs, systems project management, and pricing information products and services. The course also covers methodologies for monitoring performance of information systems, and ways for assessing the strategic and business value of use of information technology.

Prerequisites
C or higher in MIS 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 412 - E-Business Systems Development

Credits: 3
Introduces students to the development of web-based information systems for E-business. Students learn to develop web-based database applications for eCommerce using ASP.NET. Also covers Web 2.0 technologies and contemporary business trends and issues related to web application development. Emphasizes technologies, methods, and application development tools.

Prerequisites
C or higher in MIS 301, degree status.

Notes
Requires team project and computer lab.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 430 - Data Warehousing and Data Mining

Credits: 3
Deals with the challenges faced by businesses in managing large amounts of data and making meaningful use of this data for informed decision making. Introduces students to data warehousing fundamentals, practices, and technologies; and their application to solving business problems. Specific emphasis is on designing of data warehouse to meet the business requirements and hands-on learning of the design principles through implementation on commercially used data warehouse technologies. Also introduces students to OLAP solutions and data mining approaches to supporting business decision making.

Prerequisites
C or higher in MIS 301 and MIS 310, degree status.

Notes
Term project required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MIS 435 - Knowledge Management

Credits: 3
Focuses on new trends on how knowledge management works for organizations, best strategy for such transition, and what are knowledge management elements.

Prerequisites
C or higher in MIS 301 and MIS 310, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 440 - E-Commerce Business Models and Applications

Credits: 3
Introduces students to business models used in E-commerce and E-business. Covers B2B, B2C, and C2C business models and also introduces current business trends of the Web 2.0 era and the core concepts of the information economy, networked business models, and the social web. The class will discuss Blogging, Wikis, Social Networks, Information Goods, and E-Tailing. Students complete a group project in which they create a business plan for a viable Internet-based business.

Prerequisites
C or higher in MIS 301 and MIS 310, degree status.

Notes
Requires a term project.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 450 - Internet Architecture and Industry

Credits: 3
Overview of elements of Internet architecture. Analyzes economic and regulatory issues. Internet technology and industry trends. Includes lab sessions and exercises.

Prerequisites
C or higher in MIS 301 and MIS 310, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 462 - Honors Seminar in Management Information Systems
Credits: 3
Topic and format vary. In-depth study of a topic in the area of information technology management. Enrollment limited and competitive.

Prerequisites
Senior standing, ISOM major, minimum GPA requirement.

MIS 491 - Seminar in Management Information Systems

Credits: 3
Analyzes selected topics that highlight latest developments in information resource management field, including contemporary research findings and case studies of information systems in business and other organizations.

Notes
C or higher MIS 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MIS 499 - Independent Study in Management Information Systems

Credits: 1-3
Research and analysis of selected problems or topics in information resource management.

Notes
C or higher MIS 301, degree status. Must be arranged with instructor and approved in writing by associate dean for undergraduate programs before registration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Marketing

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

MKTG 301 - Principles of Marketing

Credits: 3
Examines marketing principles and practices for analyzing, creating, delivering, capturing, and communicating value to customers. Focuses on managing customer relationships using market-driven strategies, particularly segmentation, targeting, and positioning. The role of customer satisfaction in achieving organizational objectives and ethical and sustainability decision making in a global economy are also emphasized.
Prerequisites
Sophomore standing, C or better in ACCT 203 and ECON 103.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

MKTG 311 - Sales Management

Credits: 3
Familiarizes students with marketing-sales interfaces including sales force role and capabilities, personal selling strategies, organizational relationships, and responsibilities of sales managers including training, motivating, and evaluating sales force.

Prerequisites
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MKTG 312 - Consumer Behavior

Credits: 3
Marketing strategy implications of concepts and propositions that compose consumer decision processes. Emphasizes demographics, lifestyle, situation, and information processing. Lecture and case analysis.

Prerequisites
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

MKTG 313 - Integrated Marketing Communications

Credits: 3
Examines development of integrated communications programs, including advertising, sales promotion, public relations, direct marketing, and other communication tools. Focuses on setting communications objectives and budgets, media planning, creative strategy, execution, and evaluation. Provides skills for analyzing the strengths, weaknesses and synergies of marketing communication tools.

Prerequisites
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

**MKTG 315 - Internet Marketing**

Credits: 3
Explores impact of Internet technology on marketing strategy and practice. Topics include online advertising campaigns (focusing on search marketing), web site usability and content, and the use of social and interactive media to build customer relationships and foster brand loyalty.

**Prerequisites**
C or higher in MKTG 301 and MIS 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

**MKTG 332 - Retailing and E-Commerce Management**

Credits: 3
Comprehensive view of retailing as it relates to overall marketing processes. Emphasizes retail decision alternatives used when formulating retail strategies, particularly Internet.

**Prerequisites**
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

**MKTG 333 - Business to Business Marketing**

Credits: 3
Examines unique challenges and opportunities of marketing systems among suppliers, manufacturers, resellers, and government. Focuses on developing a capability to identify and nurture long-term B2B relationships. Provides tools and techniques commonly leveraged by B2B marketers to develop these relationships with their clients.

**Prerequisites**
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring, Summer.

**MKTG 351 - Marketing Research Techniques and Applications**
Credits: 3
Study of concepts, theories, and principles underlying marketing research process. Focuses on development and evaluation of research designs for gathering marketing information.

Prerequisites
C or higher in OM 210 and MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

MKTG 407 - International Marketing

Credits: 3
Multidisciplinary approach to international marketing from viewpoint of business management. Examines major marketing issues affecting companies operating in a global environment. Students achieve understanding of economic, political, and cultural differences among nations as they affect marketing opportunities and operations, and develop skills to identify and evaluate international marketing opportunities.

Prerequisites
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring.

MKTG 451 - Competitive Intelligence and Information Security

Credits: 3
Develops understanding of benefits to commerce and society because of Internet-based commerce, escalating threats against Internet-based marketing initiatives, and protection of knowledge-based assets of firms.

Prerequisites
C or higher in MKTG 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall.

MKTG 462 - Honors Seminar in Marketing

Credits: 3
Topic and format vary. In-depth study of topic of interest to managers and organizations.

Prerequisites
Degree status in MKTG major; senior standing; permission of department.
Notes
Enrollment limited and competitive.

**Hours of Lecture or Seminar per week:** 3

**MKTG 471 - Marketing Management**

Credits: 3
Emphasizes managerial aspects of marketing, including developing marketing strategies and plans, and integrating specific elements of marketing process. Emphasizes case analysis.

**Prerequisites**
Senior standing; C or higher in MKTG 301, 312 and 351; degree status.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Fall, Spring, Summer.

**MKTG 481 - Marketing in the Nonprofit Sector**

Credits: 3
Examines the unique challenges of applying marketing principles and practices to not-for-profit groups such as human service and philanthropic organizations, museums, health and wellness advocates, educational institutions, industry associations and government. Emphasis on case studies, team work, and projects.

**Prerequisites**
C or higher in MKTG 301, degree status.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring.

**MKTG 491 - Special Topics in Marketing**

Credits: 3
In-depth treatment in seminar format of contemporary topics in marketing. Culminates in preparation of substantial paper and oral presentation.

**Prerequisites**
C or higher in MKTG 301, 9 credits of marketing, degree status.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring.
MKTG 499 - Independent Study

Credits: 1-3
Primary research proposal in marketing area. Requires prior approval from instructor and associate dean for undergraduate programs.

Prerequisites
90 credits (senior class standing) and a minimum of 24 credits of business courses, including principles of marketing, finance, and management.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

Master of Business Administration

MBA 603 - Managerial Economics and Decisions of the Firm

Credits: 3
Provides fundamental understanding of applying microeconomics concepts to managerial decision making. Explores principles of microeconomic theory, including market supply and demand, production and cost functions, industry structure, and product and resource pricing.

Prerequisites
Admission to MBA or MSA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall and spring

MBA 612 - Managing Costs and Evaluating Performance

Credits: 1.5
Examines impact of cost and cost allocation on performance and evaluation.

Prerequisites
Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring and summer

MBA 613 - Financial Reporting and Decision Making
Credits: 3
Foundation course focusing on economics and analysis of business transactions and related financial reporting issues. Topics include introduction to accounting framework used in financial reporting; and analysis of financial statements, economic events and their impact on financial reports, and impact of accounting methods on financial reports.

Prerequisites
Admission to MBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall and spring

MBA 623 - Marketing Management

Credits: 3
Develops market-based knowledge and skills for effective marketing decision making, strategy design, implementation, and evaluation in wide variety of institutional and competitive situations. Addresses the importance of companies being market-driven and customer-focused.
Emphasis on case studies, team work, and projects.

Prerequisites
Admission to MBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall and spring

MBA 633 - Statistics for Business Decision Making

Credits: 3
Uses statistical methods as analytical tools for understanding and solving business problems and supporting business decision making. Includes descriptive statistics, sampling, inferencing and regression. Extensive use of applied business scenarios to illustrate concepts and computer software for data analysis.

Prerequisites
Admission to MBA or MSA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall and spring

MBA 638 - Operations Management

Credits: 3
Focuses on design, planning, and control activities to produce and deliver goods and services in modern organizations. Introduces wide range of operations management decisions, such as operations strategy, process analysis and design, capacity planning, supply chain management, total quality management, and project management. Uses quantitative modeling, case studies, and
computer software to analyze and solve operations management problems.

**Prerequisites**
Admission to MBA or MSA program.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall and spring

**MBA 643 - Managerial Finance**

Credits: 3  
Introduces theory and practice of finance within corporations. Topics include intertemporal choice, valuation, capital budgeting and structure, working capital management, and risk and return analysis.

**Prerequisites**
Admission to MBA or MSA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall and spring

**MBA 653 - Organizational Behavior**

Credits: 3  
Emphasizes development of conceptual tools for understanding and analyzing individual and group behavior in organizations and organizational processes. Considerable focus on developing relevant skills for working in groups and teams. Lectures, discussions, case analyses, and class exercises.

**Prerequisites**
Admission to MBA or MSA program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall and spring

**MBA 662 - Management of Information Technology**

Credits: 1.5  
The strategic, economic and managerial aspects of managing an organization's IT assets are covered. The business value of IT is understood and assessed in context of its impact on the organization's structure and strategy. The course includes discussion on major issues pertaining management of IT infrastructure.

**Prerequisites**
Admission to the MBA or MSA program of permission of the program director.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Summer, Spring
MBA 673 - Legal Environment for Management

Credits: 1.5
Examines the managerial impact of the law upon decision-making processes in business organizations. Lectures as well as discussions of judicial opinions and readings.

Prerequisites
Admission to MBA program or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring and summer

MBA 674 - Ethical and Social Environment of Business in the 21st Century

Credits: 1.5
Strengthens the student's ability to identify, critically analyze, appropriately respond to, and provide leadership regarding the issues of ethical and socially responsible behavior which they may confront as employees and eventually as managers of people, objects, and organizations.

Prerequisites
Admission to the MBA or MSA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
When Offered: Summer, Spring

MBA 678 - Strategy and Organizational Leadership

Credits: 3
Capstone course focusing on strategy development at business unit and corporate level. Cases, readings, and project format familiarize students with strategic management function and help them develop analytical, organizational, and managerial skills to analyze complex business situations. Provides opportunities to integrate knowledge gained in prior course work.

Prerequisites
Admission to MBA program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall and spring

MBA 701 - Business Analysis and Valuation

Credits: 3
Develops framework for business analysis and valuation using financial statement data. Analyzes management decisions such as
equity valuation, creditworthiness, merger valuation, corporate financial structure, and management communication strategy.

**Prerequisites**
Completion of MBA or MSA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**MBA 702 - Corporate Financial Policy**

Credits: 3  
Applies theories and methods of corporate financial management to series of complex cases. Topics include capital projects as real options, cost of capital and capital structure, firm valuation, project finance, and merger and acquisition analysis.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

**MBA 703 - Financial Markets**

Credits: 3  
Explores relationship among financial markets including global equity markets, U.S. Treasury securities, and exchange-traded and over-the-counter financial derivative instruments such as futures, options, swaps, and asset-backed securities.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

**MBA 704 - Risk Management and Financial Innovation**

Credits: 3  
Considers how to identify, measure, and manage financial risk using innovative financial instruments and diversification strategies. Focuses on derivatives as tools in risk-management plans.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall
MBA 705 - Venture Capital and Private Finance

Credits: 3
Considers market microstructure of venture capital and private finance: costs and benefits from employing private financing, interaction between the financiers and entrepreneurs, financial analysis of potential ventures, and investor exit strategies.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MBA 706 - Investment Analysis

Credits: 3
Focuses on analyzing equity securities and debt instruments given implications of efficient market hypothesis and modern capital market theory.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MBA 708 - Taxes and Business

Credits: 3
Provides framework for making managerial decisions in global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MBA 711 - Entrepreneurship

Credits: 3
Considers fundamental aspects of entrepreneurship and process of new venture creation. Draws on broad range of business disciplines including management, marketing, finance, and accounting to develop evaluation and execution skills.
Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MBA 712 - Project Management

Credits: 3
Focuses on designing, planning, monitoring, and controlling projects. Involves practical examination of how projects should be managed from start to finish, including specific emphasis on how to avoid common pitfalls. Includes hands-on experience with a common project management software package.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

MBA 713 - Human Resource Management

Credits: 3
Strategic human resource functions from both a general manager and HR perspective. Students become acquainted with current talent management matters facing organizations in today's business environment and are challenged to generate and debate creative solutions to prevalent issues. Topics include hiring, firing, rewarding, compensating, managing performance, career development, global HR issues, and workplace security.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MBA 714 - Managing Growth of Small Businesses

Credits: 3
Focuses on unique challenges faced by small and entrepreneurial firms that seek long-term growth. Builds on concepts and knowledge of creating start-up company, and introduces processes and strategies required to become significant player in industry segment. Designed for students interested in understanding opportunities and problems in their own businesses, employment in small or entrepreneurial businesses, or exploring corporate entrepreneurship within large firms.

Prerequisites
Completion of MBA core; MBA 711 recommended.

Hours of Lecture or Seminar per week: 3
MBA 715 - Advanced Project and Program Management

Credits: 3
Examines advanced topics in project and program management with specific attention to issues and skills that managers needs to effectively manage multiple projects and programs. Topics include project selection, multiple project resource allocation, and organization of project office.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

MBA 716 - International Business Strategy

Credits: 3
Focuses on the globalization of business activities, the strategic challenges faced by companies in global competition, and how companies strategically respond to these new competitive challenges.

Prerequisites
Completion of MBA core requirements

MBA 717 - International Finance

Credits: 3
Advanced analysis of managing firm's international financial operations. Topics include currency risk, political risk, returns and funding of international projects, international markets and accounting, and cost of capital. Lecture, discussion, readings, and cases.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

MBA 718 - International Marketing
Credits: 3
Addresses marketing process for products and services within major international markets. Topics include marketing mix strategies using standardization, localization, or globalization approaches. Emphasizes the introduction of service innovations and new products in the global market.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

**MBA 719 - Entrepreneurship Laboratory**

Credits: 1.5
Permits MBA students to work with entrepreneurial community to gain first-hand knowledge of process of soliciting second-stage funding for new businesses, evaluating applications for second-stage funding, consulting for entities seeking funding, and negotiations for obtaining second-stage funding.

Prerequisites
Completion of MBA core requirements and permission of instructor.

Notes
May be repeated three times in different semesters.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1.5
When Offered: Fall, spring, summer

**MBA 721 - Marketing Decision Systems**

Credits: 3
Develops skills to plan and implement effective marketing research studies. Topics include research design, data collection, statistical analysis, and use of database systems. Offers perspective on how managers can use market data to develop successful product or service strategies.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

**MBA 722 - Consumer Behavior**

Credits: 3
Examines behavioral science concepts to understand and predict customer decision making, including demographics,
psychographics, attitude formation and change, perception, and learning. Emphasizes applications of product and service strategies, focusing on customer segmentation, satisfaction, and loyalty.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**MBA 723 - Supply Chain Management**

Credits: 3  
Examines logistics of supply chain systems, including inventory management, distribution channels, and information systems. Emphasizes strategic alliances and international issues.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

**MBA 724 - Marketing Communications**

Credits: 3  
Examines all forms of communication and sources of brand or company contacts as potential message channels in building relationship with customers. Focuses on integrated planning process for all communication elements, including consumer and trade advertising, public relations, direct and database marketing, promotions, and sales presentations to achieve synergy in communicating with various constituencies.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

**MBA 725 - Leadership**

Credits: 3  
Overview of major conceptualizations of leadership and motivation in organizations. Integrates theory, research, and applications. Students apply principles of leadership and motivation to their own work situations and case evaluation.

**Prerequisites**
Completion of MBA core requirements, or permission of instructor.
MBA 726 - Negotiations

Credits: 3
Focuses on theory, processes, and practice of negotiation within and across organizations, including attention to ethical issues. Explores systematic ways to increase quality of negotiated agreements, including methods of preparation, effective communication, and various strategies to increase power. Format includes negotiation exercises, lecture, and discussion.

Prerequisites
Completion of MBA core.

MBA 731 - Business Application and Life Cycle Management

Credits: 3
Studies methods and tools for analyzing and designing business information systems with emphasis on business processes. Topics include data modeling, process modeling, interaction analysis, and user interface.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

MBA 732 - Knowledge Management

Credits: 3
Examines firms that use knowledge management principles and approaches: intellectual capital, human capital, customer capital, tacit and explicit knowledge, new role of chief knowledge officer, leveraging of knowledge management.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

MBA 733 - Business Data Communications
Credits: 3
Introduces data communications and telecommunications technologies and application in business, including LANs, WANs, PBXs, voice services, network operating systems, corporate internetworking, and Internet. Analyzes data communications industry, and business applications in manufacturing and service sectors, along with regulatory issues and impact of globalization.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MBA 734 - Electronic Commerce and E-Business

Credits: 3

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MBA 735 - Systems Thinking for Business Performance

Credits: 3
The business world is increasingly interconnected. "Systems Thinking" is a way to understand the structure of a system and its relationship to behavior, and provides a foundation for making more effective management decisions in an interconnected world. The course introduces fundamentals of systems thinking, and involves hands-on use of "systems thinking" tools and techniques to improve performance in a variety of situations spanning different industries.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

MBA 737 - Information Technology Governance and Policy

Credits: 3
Considers specific objectives of IT governance and policy, frameworks that help chart roadmap for this function, and tools and techniques used in specific areas of IT governance.

Prerequisites
MBA 738 - Business Intelligence and Data Mining

Credits: 3
Examines how data warehouses and data mining are used to help businesses successfully gather, structure, analyze, understand and act on relevant data, both operational and contextual.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MBA 741 - Information Technology Auditing

Credits: 3
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application.

Equivalent to ACCT 741

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MBA 742 - Corporate Governance and Ethics

Credits: 3
Focuses on developing understanding of corporate governance issues and ethical decision-making. Topics include examination of internal and external and international governance issues, and ethical analysis in current business environment.

Equivalent to ACCT 742

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring
MBA 743 - Corporate Financial Reporting

Credits: 3
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of performance.

Equivalent to ACCT 743

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Summer

MBA 744 - Fraud Deterrence and Detection

Credits: 3
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets.

Equivalent to ACCT 744

Prerequisites
Admission to MSA or MBA program, or permission of program director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MBA 745 - International Financial Reporting

Credits: 3
Examines accounting from an international perspective, including the study of various functional areas of accounting across countries and the reporting requirements encountered by companies engaged in international trade and making foreign direct investments.

Equivalent to ACCT 745

Prerequisites
Admission to MBA program and completion of core curriculum

Hours of Lecture or Seminar per week: 3
MBA 746 - Real Estate Analysis and Valuation

Credits: 3
Overview of real estate assets, markets, and decisions. Emphasizes development of analytical techniques and information required for implementation. Includes legal, economic, and public policy perspectives.

Equivalent to GSOM 746

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3

MBA 747 - Real Estate Finance

Credits: 3
Examines financing of residential and income-producing real estate from perspectives of both suppliers and users of funds. Focuses on financing alternatives, primary and secondary markets, and decision implications of available arrangements.

Equivalent to GSOM 747

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MBA 748 - Real Estate Investment

Credits: 3
Develops frameworks for analyzing decisions about investing in real estate assets. Focuses on acquisition and analysis of information required to evaluate potential performance of assets. Applications of theories and techniques through case studies.

Equivalent to GSOM 748

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Hours of Lecture or Seminar per week: 3

MBA 752 - Turning Ideas into Successful Companies

Credits: 3
An advanced course in entrepreneurship focused on discovery and development of an achievable business concept. The centerpiece of the course is development of the formal business plan and associated presentation materials. Students are assigned to teams and must hypothesize a new business, research and test their hypothesis, and develop a comprehensive written business
plan. The plan must be for an actual business that the students intend to start upon the successful completion of the course. Technology-based projects are encouraged, but not required. Because the course is cross-listed with IT&E and SOM, most teams will include both engineering and business students. Weekly presentations of the team's progress are required.

Prerequisites
Completion of MBA core requirements and MBA 711 (for MBA students), or permission of the instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

MBA 795 - Global Business Perspectives

Credits: 3
Applies MBA core courses to global business enterprise through site visits to facilities located outside the United States.

Prerequisites
Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
When Offered: Summer and Spring

MBA 796 - Directed Studies in Business Administration

Credits: 1-3
Approval by faculty member and MBA program director required prior to registration. Studies specialized topics in business administration not otherwise available in curriculum.

Prerequisites
Completion of MBA core requirements, or permission of instructor.

Notes
May be repeated for up to 3 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MBA 797 - Special Topics in Business

Credits: 3
Sections established as necessary to focus on various topical issues that emerge in practice of business administration.

Prerequisites
Admission to the MBA program or permission of the program director.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer and Spring
Master of New Professional Studies

MNPS 700 - The New Professionalism: Theory and Practice

Credits: 3
Experientially explores contemporary and relevant ethical theories and their diverse applications to professional studies field. Examines ethical relationship between professionals and clients, ethical accountability and responsibility, ethos of institutions, and the professional's role in sustaining ethical standards. Explores philosophical and pedagogical assumptions to understand professional management issues, and social and individual purposes of being professional.

Notes
Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 702 - The New Professional as Reflective Practitioner

Credits: 3
Identifies central problems in epistemology. Examines how an epistemology appropriate to professional practice may be constructed, what is meant by "ways of knowing" and the "reflective practitioner," and implications for professional learning. Studies core issues of generalizability; objective knowledge and understanding; and how evidence, truth, and meaning affect nature of organizational reality and professional's practice. Special attention to developing skills for "double-loop learning," and reflection in professional lives through journals, narrative, autobiography, and imaginative literature.

Notes
Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 703 - Technology and Learning in the New Professions

Credits: 3
Examines enormous potential for enhancing the way organizations can learn, notably through developing Internet literacy and skills in using differing Internet navigation tools. Focuses on applying technology to real-world problems in different professional work-sites and offers in-depth training in use and development of groupware applications.

Notes
Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MNPS 704 - Research Methodologies in the New Professionalism

Credits: 3
Concentrates on understanding and using research methodologies from such varied sources as Friere, McKeon, and Janowitz, with a practical team activity in which students study organization or aspects of it, using ethnography, field study, or any appropriately defensible research methodology.

Corequisite
EDUC 597

Notes
Customized for each track; for detailed course content, contact appropriate program directors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MNPS 720 - Learning Community

Credits: 3
Workshops, seminars, and reading groups involving at least 60 hours of contact time and culminating in two-day retreat during which candidates for MS in New Professional Studies (organizational learning) make presentations to class and faculty on research practica. Theme of module is communication, collaboration, and interaction in organizations. After initial one-and-a-half day workshop, MNPS candidates meet with all faculty once a month to give talks and presentations on application of ideas in their organizations, discuss issues in organizational learning, and provide feedback about using collaborative computing technology in learning process.

Notes
Only for MNPS in organizational learning degree candidates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Master of New Professional Studies—Teaching

MNPE 700 - The New Professionalism: Theory and Practice

Credits: 3
Explores the philosophical and pedagogical assumptions of teachers as individuals and professionals. Critiques educational issues such as accountability, institutional structures, and professional roles engage teachers to be more just and responsive in their relationships with students, families, and colleagues. Provides a deeper understanding of a teacher's participatory and ethical role in a democracy, which includes questioning the status quo.
MNPE 702 - The New Professional as a Reflective Practitioner

Credits: 3
Explore the central questions of epistemology to encourage depth of understanding of the assumptions and issues of education. Uses reflection to consider how personal and professional identities are influenced by intentions and commitments to learning and teaching. Provides an understanding of the processes of critical inquiry, dialogue, reflection, and action.

MNPE 703 - Technology and Learning in the New Professions

Credits: 3
Supports effective technology integration for teaching and learning by constructive knowledge not just of content, technology and pedagogy, but also of their mutually reinforcing relationships. Develops repertoire of technology-mediated learning approaches with appropriate context specific strategies and representations to support learning. Includes concurrent critique of technology and includes equal access to information, critical web literacy, and privacy issues.

MNPE 704 - Research Methodologies in the New Professionalism

Credits: 3
Introduces teacher research in a school setting. Supports intentional, systematic, public, ethical, and contextual inquiry into practice; participants form and frame salient questions, take actions to transform curriculum, gather, analyze and interpret multiple forms of data, and share experience in communities of practice.

Mathematical Sciences

Knowledge of high school algebra is a prerequisite for all mathematics courses. In exceptional cases, the prerequisite for a course above the calculus sequence may be waived at the discretion of instructor.

Prior knowledge of linear algebra and single and multivariable calculus assumed in all math graduate courses. A double number separated by a comma (MATH 555, 556) indicates both graduate courses normally constitute a sequence, and the first semester is prerequisite to the second. The prerequisite may be waived by permission of department chair. See also STAT and OR courses.
MATH 104 - Trigonometry and Transcendental Functions

Credits: 2
Exponential and logarithmic functions, trigonometric functions, and analytic trigonometry. This course does not satisfy the university's quantitative reasoning requirement. May not be taken for credit after receiving a C or better in MATH 105 or in any MATH course numbered 113 or higher. May not take MATH 105 for credit after receiving a C or better in MATH 104.

Prerequisites
Specified score on math placement test

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

MATH 105 - Precalculus Mathematics

Credits: 4
Reviews mathematics skills essential to studying calculus. Topics include equations, inequalities, absolute values, graphs, functions, exponential and logarithmic functions, and trigonometry.

Prerequisites
High school algebra I, algebra II, and geometry, and specified score on Math Placement Test; or successful completion of self-paced algebra tutorial program offered by Math Literacy Center.

Notes
Call Mathematical Sciences Department at 703-993-1460 for details. May not be used as credit toward BA or BS in mathematical sciences. This course does not satisfy the university's quantitative reasoning requirement for the BA degree. May not be taken for credit after receiving grade of C or better in any MATH course numbered 113 or higher.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

MATH 106 - Quantitative Reasoning

Credits: 3
Quantitative skills for real world. Topics include critical thinking, modeling by functions, graphs, growth, scaling, probability, and statistics.

Satisfies General Education Requirement: Quantitative reasoning

Prerequisites
Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 108 - Introductory Calculus with Business Applications

Credits: 3
Functions, limits, derivative, and integral. Applications of differentiation and integration.

Satisfies General Education Requirement: Quantitative reasoning

Prerequisites
Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center.

Notes
Call Mathematical Sciences Department at 703-993-1460 for details. Students who have received credit for MATH 113 or 114 may not receive credit for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 110 - Introductory Probability

Credits: 3
Elementary set theory, probability, and statistics.

Satisfies General Education Requirement: Quantitative reasoning

Prerequisites
Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 111 - Linear Mathematical Modeling

Credits: 3
Matrix algebra, systems of linear equations, Markov chains, difference equations, and data fitting.

Satisfies General Education Requirement: Quantitative reasoning

Prerequisites
Specified score on Math Placement Test, or successful completion of self-paced Basic Math Program offered by Math Literacy Center.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 112 - Discrete Mathematics for IT
Credits: 3
Introduces ideas of discrete mathematics including mathematical induction, sets, logic, graphs, trees, basic counting arguments, and discrete probability. Students who have received credit for MATH 125 may not receive credit for this course.

**Prerequisites**
Specified score on Math Placement Test, or successful completion of self-paced Algebra Tutorial Program offered through Math Learning Center.

**Notes**
Intended for BSIT students; does not count toward a major or minor in mathematics.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 113 - Analytic Geometry and Calculus I**

Credits: 4  
Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Satisfies General Education Requirement: Quantitative reasoning

**Prerequisites**
C or better in MATH 104 or MATH 105 or specified score on math placement test.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 1

---

**MATH 114 - Analytic Geometry and Calculus II**

Credits: 4  
Methods of integration, conic sections, parametric equations, infinite series, and power series.

**Prerequisites**
Grade of C or better in MATH 113.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 1

---

**MATH 115 - Analytic Geometry and Calculus I (Honors)**

Credits: 4  
More challenging version of MATH 113. Functions, limits, the derivative, maximum and minimum problems, the integral, and transcendental functions.

Satisfies General Education Requirement: Quantitative reasoning

**Prerequisites**
Placement or permission of department.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 1

**MATH 116 - Analytic Geometry and Calculus II (Honors)**

Credits: 4  
More challenging version of MATH 114. Methods of integration, conic sections, parametric equations, infinite series, and power series.

**Prerequisites**  
Successful completion of MATH 115, or grade of A in MATH 113 and recommendation of MATH 113 instructor.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 1

**MATH 125 - Discrete Mathematics I**

Credits: 3  
Introduces ideas of discrete mathematics and combinatorial proof techniques including mathematical induction, sets, graphs, trees, recursion, and enumeration.

Satisfies General Education Requirement: Quantitative reasoning

**Prerequisites**  
Specified score on Math Placement Test, or successful completion of self-paced Algebra Tutorial Program offered by Math Literacy Center.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 203 - Linear Algebra**

Credits: 3  
Systems of linear equations, linear independence, linear transformations, inverse of a matrix, determinants, vector spaces, eigenvalues, eigenvectors, and orthogonalization.

**Prerequisites**  
C or better in MATH 114.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 213 - Analytic Geometry and Calculus III**
Credits: 3
Partial differentiation, multiple integrals, line and surface integrals, and three-dimensional analytic geometry.

**Prerequisites**
Grade of C or better in MATH 114.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 214 - Elementary Differential Equations**

Credits: 3
First-order ODEs, higher-order ODEs, Laplace transforms, linear systems, nonlinear systems, numerical approximations, and modeling.

**Prerequisites**
Grade of C or better in MATH 213 or 215.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 215 - Analytic Geometry and Calculus III (Honors)**

Credits: 3
Vectors and vectorvalued functions, partial differentiation, multiple integrals, line integrals, surface integrals, and transformation of coordinates.

**Prerequisites**
Grade of C or better in MATH 113 and 114.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 216 - Theory of Differential Equations**

Credits: 3
First- and second-order equations, existence uniqueness of solutions, systems of differential equations, and phase plane analysis.

**Prerequisites**
Grade of C or better in MATH 203 and 213 or 215.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 271 - Mathematics for the Elementary School Teachers I**
Concepts and theories underlying elementary school mathematics, including problem solving, whole numbers and numeration, whole numbers operations and properties, number theory, fractions, decimals, ratio and proportion, and integers. Intended for school educators.

Notes
Does not count toward major in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 272 - Mathematics for the Elementary School Teachers II

Credits: 3
MATH 271 recommended before enrolling. Continuation of MATH 271. Topics include rational and real numbers, introduction to algebra, geometry, statistics, and probability.

Notes
Intended for school educators; does not count toward major in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 290 - Introduction to Advanced Mathematics

Credits: 3
Introduction to proofs and the language of mathematics. Topics include induction, equivalence relations, cardinality and basic properties of the real numbers. Designated as a writing intensive course for mathematics majors.

Prerequisites
Grade of C or better in MATH 114.

Notes
Primarily intended for mathematics majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 301 - Number Theory

Credits: 3
Prime numbers, factorization, congruences, and Diophantine equations.

Prerequisites
6 math credits.
MATH 302 - Foundations of Geometry

Credits: 3
Fundamental concepts of incidence. Axioms of Euclidean geometry and the resulting theory, and axioms and development of non-Euclidean and projective geometry.

Prerequisites
6 math credits.

MATH 313 - Introduction to Applied Mathematics

Credits: 3
Vector differential calculus, vector integral calculus, Fourier analysis, and complex analysis.

Prerequisites
Grade of C or better in MATH 213 or 215

MATH 314 - Introduction to Applied Mathematics

Credits: 3

Prerequisites
Grade of C or better in MATH 214 or 216.

MATH 315 - Advanced Calculus I

Credits: 3
Number system, functions, sequences, limits, continuity, differentiation, integration, transcendental functions, and infinite series.

Prerequisites
Grade of C or better in MATH 213 or 215 and 290.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 316 - Advanced Calculus II**

Credits: 3
Sequences of functions, Taylor series, vectors, functions of several variables, implicit functions, multiple integrals, and surface integrals.

**Prerequisites**
Grade of C or better in MATH 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 321 - Abstract Algebra**

Credits: 3
Theory of groups, rings, fields.

**Prerequisites**
Grade of C or better in MATH 213 or 215 and 290.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 322 - Advanced Linear Algebra**

Credits: 3
Abstract vector spaces, linear independence, bases, linear transformations, matrix algebra, inner product, and special topics.

**Prerequisites**
Grade of C or better in MATH 203 and 290.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 325 - Discrete Mathematics II**

Credits: 3
Advanced counting, binomial identities, generating functions, advanced recurrence, inclusion-exclusion, and network flows.
Prerequisites
Grade of C or better in MATH 125.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 351 - Probability

Credits: 3
Random variables, probability functions, special distributions, and limit theorems.

Prerequisites
Grade of C or better in MATH 213 or 215.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 352 - Statistics

Credits: 3
Estimation, decision theory, testing hypothesis, correlation, linear models, and design.

Prerequisites
Grade of C or better in MATH 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 400 - History of Math

Credits: 3
Explores internal controversies and dynamics of mathematics in larger intellectual and social settings. Topics vary but might include differential equations devised for mechanics and astronomy by Euler, Lagrange, and Laplace; foundation of mathematical analysis from Cauchy to Weierstrass; algebras of Galois and Boole; or creation of non-Euclidean geometry and Cantor's transfinite sets.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses, and completion of MATH 290.

Notes
Credits may not be used toward "upper division" math hours required of math majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 405 - Honors Thesis in Mathematics I

Credits: 3
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. An oral presentation is required for MATH 405.

Prerequisites
Two MATH courses at the 300 or higher level (excluding MATH 400), at least one of which has MATH 290 as a prerequisite, and admission to the Mathematics Honors Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 406 - Honors Thesis in Mathematics II

Credits: 3
A project, which is intended to result in a thesis, is to be chosen and completed under the guidance of a full-time faculty member. Oral and written presentations are required in MATH 406.

Prerequisites
MATH 405

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 411 - Functions of a Complex Variable

Credits: 3
Analytic functions, contour integration, residues, and applications to such topics as integral transforms, generalized functions, and boundary value problems.

Prerequisites
Grade of C or better in MATH 214 or 216.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 413 - Modern Applied Mathematics I

Credits: 3

Prerequisites
Grade of C or better in MATH 203 and 214 or 216.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 414 - Modern Applied Mathematics II**

Credits: 3
Continuation of MATH 413, which involves synthesis of pure mathematics and computational mathematics. Fourier analysis and its role in applied mathematics developed (differential equations and approximations). Discrete aspects emphasized in computational models.

**Prerequisites**
Grade of C or better in MATH 413.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 431 - Topology**

Credits: 3
Metric spaces, topological spaces, compactness, and connectedness.

**Prerequisites**
C or better in MATH 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 441 - Deterministic Operations Research**

Credits: 3

**Prerequisites**
Grade of C or better in MATH 203

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**MATH 442 - Stochastic Operations Research**

**Prerequisites**
Grade of C or better in MATH 351.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 446 - Numerical Analysis I**

Credits: 3  
Significant figures, round-off errors, iterative methods of solution of nonlinear equations of a single variable, solutions of linear systems, iterative techniques in matrix algebra, interpolation and polynomial approximation.

**Prerequisites**
Grade of C or better in MATH 203 and CS 112.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 447 - Numerical Analysis II**

Credits: 3  

**Prerequisites**
Grade of C or better in Math 214 or 216 and 446.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 478 - Introduction to Partial Differential Equations with Numerical Methods**

Credits: 3  
Introduces basic facts about partial differential equations, including elliptic equations, parabolic equations and hyperbolic equations. Methods of solution, characteristics, initial/boundary-value problems, and numerical approximation techniques.

**Prerequisites**
C or better in MATH 203 and 214 or 216.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
MATH 491 - Reading and Problems

Credits: 1-3
For mathematical sciences majors only. Independent study in math.

Notes
Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MATH 492 - Reading and Problems

Credits: 1-3
For mathematical sciences majors only. Independent study in math.

Notes
Must be arranged with instructor before registering.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MATH 493 - Topics in Applicable Mathematics

Credits: 3
Topics that have been successfully used in applications of mathematics.

Prerequisites
6 credits of math at or above 310 level.

Notes
Subject determined by instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 494 - Topics in Pure Mathematics

Credits: 3
Topics of pure math not covered in other courses. Topics might include Galois theory, cardinal and ordinal arithmetic, measure theory, mathematical logic, and differential geometry.

Prerequisites
6 credits of math at or above 310 level.

Notes
Subject determined by instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 551 - Regression and Time Series**

Credits: 3  
Mathematics of regression, exponential smoothing, time series, and forecasting. Material included in this course constitutes Society of Actuaries Validation by Educational Experience (VEE) for applied statistics and corresponds to part of Casualty Actuary Society Exam 3.

**Prerequisites**  
MATH 352, STAT 652, SOA Exam P, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 554 - Financial Mathematics**

Credits: 3  
Simple and compound interest, annuities, present and future value, yield rates, capital budgeting, amortization schedules, mortgages, bonds. Material corresponds to the Society of Actuaries Exam: Financial Mathematics (FM). Not appropriate for graduate science and engineering majors not considering actuarial or financial career. Cannot be counted toward MS or PhD degree in mathematics.

**Prerequisites**  
MATH 113

**Corequisite**  
MATH 114

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 555 - Actuarial Modeling I**

Credits: 3  
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.

**Prerequisites**  
MATH 554 and either MATH 351 or STAT 344.
MATH 556 - Actuarial Modeling II

Credits: 3
Two-semester sequence covering portions of the material corresponding to the Society of Actuaries Exam M, Casualty Actuary Society Exam 3, and Joint Board Exam EA1. The remaining material for these exams is covered in MATH 551 and 653. Topics include survival distribution and life tables, life insurance, life annuities, net premiums, net premium reserves, multiple life and multiple decrement models, pensions, insurance models including expense, and nonforfeiture benefits and cash values.

Prerequisites
MATH 554 and either MATH 351 or STAT 344.

MATH 600 - Special Topics in Mathematics

Credits: 1-6
Mathematical workshops, special courses, or other projects.

MATH 601 - Analysis I for Teachers

Credits: 3
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

Prerequisites
Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

Notes
Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

MATH 602 - Analysis II for Teachers
Develops continuous ideas of calculus with particular emphasis on concepts as opposed to computational aspects of calculus. Specific topics include decimal representation of real numbers, sequences, series, and limits; differentiation to find speed, slopes of curves, and tangents; integration to find volumes and distances and area under curves. Optimization problems including maximization of area and volume, and modeling of these concepts. Graphing techniques supported by theory of calculus and graphing utilities such as TI-83 calculator or computer software such as Maple.

**Prerequisites**
Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

**Notes**
Background in mathematics desirable but not necessary. Some topics from college algebra will be reviewed in class, but thorough understanding of high school algebra and trigonometry expected.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

---

**MATH 604 - Geometry for Teachers**

Credits: 3
Covers standard topics from Euclidean geometry, and includes discussion of non-Euclidean geometries. Emphasizes informal and explorative approach to geometry, and makes use of geometry sketchpad. Other topics include geometric constructions, and role of proof in geometry.

**Prerequisites**
Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

**Notes**
Background in mathematics desirable but not necessary.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

---

**MATH 605 - Discrete/Finite Mathematics for Teachers**

Credits: 3
Thorough understanding of high school algebra assumed. Discusses finite mathematics in juxtaposition to continuous ideas of calculus. Topics may consist of elementary counting and combinatorics including recursion and difference equations and their analogy to calculus; thorough discussion of probability and central measures of statistics; and graph theory and its connection to geometry.

**Prerequisites**
Open to in-service teachers of mathematics at middle or secondary level. Others may enroll with permission of instructor.

**Notes**
Background in mathematics desirable but not necessary.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1
MATH 607 - Algebraic Structure for Teachers

Credits: 3
Expands on customary operations on integers and rationals to discuss systems that mimic these operations. Emphasizes multiplicative and additive inverses and their corresponding identities as they occur in other systems. Topics might include permutation groups, rigid transformations, groups of symmetry of the plane and connection to geometry, and matrices treated as linear transformations and connections to solutions of systems of equations.

Prerequisites
Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.

Notes
Background in mathematics desirable but not necessary. Thorough understanding of high school algebra assumed.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 608 - Problem Solving in Mathematics

Credits: 3
Introduces variety of challenging mathematical problems appropriate for middle school student to analyze, and solving problems using mathematics learned in previous courses. Also asks students to search for such problems and orally present solutions.

Prerequisites
Open to in-service teachers of mathematics at middle school level. Others may enroll with permission of instructor.

Notes
Background in mathematics or science desirable but not necessary. Assumes exposure to most of topics covered in MATH 601, 604, 605, and 607.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MATH 610 - Number Systems and Number Theory for K-8 Teachers

Credits: 3
This course covers the topics: ways of representing numbers, relationships between numbers, number systems, the meanings of operations and how they relate to one another, and computation within the number system as a foundation for algebra. It also includes episodes in history and development of the number system, and will examine the developmental sequence and learning trajectory as children learn this material.

Hours of Lecture or Seminar per week: 3

MATH 611 - Geometry and Measurement for K-8 Teachers
The course explores the foundations of informal measurement and geometry in one, two, and three dimensions. The van Hiele model for geometric learning is used as a framework for how children build their understanding of length, area, volume, angles, and geometric relationships. Visualization, spatial reasoning, and geometric modeling are stressed. As appropriate, transformational geometry, congruence, similarity, and geometric constructions will be discussed.

Hours of Lecture or Seminar per week: 3

**MATH 612 - Probability and Statistics for K-8 Teachers**

Credits: 3
An introduction to probability, descriptive statistics, and data analysis. Topics studied will include the exploration of randomness, data representation, modeling. Descriptive statistics will include measures of central tendency, dispersion, distributions, and regression. The analysis of experiments requiring hypothesizing, experimental design and data gathering will also be discussed.

Hours of Lecture or Seminar per week: 3

**MATH 613 - Algebra and Functions for K-8 Teachers**

Credits: 3
The course will examine representing and analyzing mathematical situations and structures using generalization and algebraic symbols and reasoning. Attention will be given to the transition from arithmetic to algebra, working with quantitative change, and the description of and prediction of change.

Hours of Lecture or Seminar per week: 3

**MATH 614 - Rational Numbers and Proportional Reasoning for K-8 Teachers**

Credits: 3
This course will cover the basic number strands in fractions and rational numbers, decimals and percents, and ratios and proportions in the school curriculum. Instruction will cover interpretations, computations, and estimation with a coordinated program of activities that develop both rational number concepts and skills and proportional reasoning.

Hours of Lecture or Seminar per week: 3

**MATH 619 - Topics in Mathematical Logic**

Credits: 3
Special topics in foundations of mathematics not included in regular mathematics curriculum. May be repeated for credit.

Hours of Lecture or Seminar per week: 3

Hours of Lab or Studio per week: 0
MATH 621 - Algebra I

Credits: 3
Groups, linear algebra, and matrix groups.

Prerequisites
Familiarity with basic properties of groups and rings, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 624 - Euclidean Geometry

Credits: 3
Euclidean space, geometry of k-dimensional planes, the affine structure of Euclidean space, rigid motions and similarities, paralleloptopes and volumes, convex polytopes, quadric surfaces, and additional topics by instructor's choice.

Prerequisites
MATH 290 or MATH 322 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 625 - Numerical Linear Algebra

Credits: 3
Theory and development of numerical algorithms for solving variety of matrix problems: linear systems, least squares problems, eigenvalue problems, and singular value decomposition. Direct and iterative method, analysis of sensitivity to rounding errors, and applications.

Equivalent to CSI 740

Prerequisites
Computer literacy, including some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 629 - Topics in Algebra

Credits: 3
Special topics in pure or applied algebra not covered in regular algebra sequence. May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 631 - Topology I: Topology of Metric Spaces

Credits: 3
Covers definition and basic examples of metric spaces, open and closed sets, subspaces and finite products, sequences and convergence, compactness and separability, continuous functions, uniform continuity, metric space C(X) and uniform convergence, and homotopy.

Prerequisites
MATH 315 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 641 - Combinatorics and Graph Theory

Credits: 3
Covers enumerative combinatorics, including partially ordered sets; Moebius inversion and generating functions; and major topics in graph theory such as graph coloring, Ramsey theory, and matching.

Prerequisites
MATH 321 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 644 - Convex and Discrete Geometry

Credits: 3
Basic properties of Euclidean space, convex sets and convex cones, convex hulls, extremal structure of convex sets, support and separation properties, polyhedra and polytopes, special classes of convex sets, Helly-type theorems, selected problems of discrete geometry.

Prerequisites
MATH 203 and 290, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 653 - Actuarial Modeling III

Credits: 3
Economics of insurance, individual risk models for short term, collective risk models for single period, collective risk models over an extended period, and applications of risk theory. Material included in this course corresponds to portions of the Society of Actuaries Exam M and Casualty Actuary Society Exam 3. The remaining material for these exams is covered in MATH 551,
555, and 556.

Prerequisites
MATH 351 or STAT 644 are required. MATH 555 is recommended but not required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 654 - Construction and Evaluation of Actuarial Models

Credits: 3
Nature and properties of survival and loss models, methods of estimates from complete and incomplete data, tabular and parametric models, and practical issues in survival model estimation. Material included in this course corresponds to most of the Society of Actuaries Exam C and Casualty Actuary Society Exam 4.

Prerequisites
MATH 556 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 655 - Pension Valuation

Credits: 3
Basic mathematics used in pension actuarial work without regard to pension law. Material included in this course corresponds to all of the Joint Board Exam EA-2A and portions of the Society of Actuaries Exam 8. This course cannot be counted toward the MS or PhD degree in mathematics.

Prerequisites
MATH 556, SOA Exam EA-1, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 661 - Complex Analysis I

Credits: 3
Topology of complex numbers, holomorphic functions, series, complex integration. Meromorphic, multivalued, and elliptic functions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 671 - Fourier Analysis
Credits: 3  
Study of fundamental ideas in Fourier analysis. Topics include orthonormal systems, Fourier series, continuous and discrete Fourier transform theory, generalized functions, and introduction to spectral analysis. Uses applications to physical sciences, linear systems theory, and signal processing to integrate topics.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**MATH 673 - Dynamical Systems**

Credits: 3  
Contemporary topics in nonlinear dynamical systems illustrated in mathematical models from physics, ecology, and population dynamics. Traditional qualitative analysis of difference and differential equations provides background for understanding chaotic behavior when it occurs in these models. Topics include stability theory, fractals, Lyapunov exponents, and chaotic attractors.

**Prerequisites**
Elementary courses in linear algebra and differential equations.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**MATH 674 - Stochastic Differential Equations**

Credits: 3  
Introduces stochastic calculus and differential equations. Includes Wiener process, Ito and Stratonovich integrals, Ito formula, martingales, diffusions, and applications, including financial applications. Simulations and numerical approximations of solutions.

**Prerequisites**
MATH 214 and 351

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**MATH 675 - Linear Analysis I**

Credits: 3  
Metric spaces, normed linear spaces, completeness, compactness, continuous (bounded) linear transformations, Banach spaces, Hilbert spaces, and orthogonal series.

**Prerequisites**
MATH 315 or equivalent.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
MATH 677 - Ordinary Differential Equations

Credits: 3
Qualitative and quantitative theory of ordinary differential equations. Phase portrait analysis of linear and nonlinear systems, including classification of stable and unstable equilibrium states and periodic orbits. Poincare-Bendixson theorem, Lyapunov stability and Lyapunov functions, and bifurcation theory. Optional topics include averaging and perturbation methods, numerical solution techniques, and chaos.

Prerequisites
MATH 214 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 678 - Partial Differential Equations

Credits: 3
Physical examples, characteristics, boundary value problems, integral transforms, and other topics, such as variational, perturbation, and asymptotic methods.

Prerequisites
Elementary differential equations course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 679 - Topics in Analysis

Credits: 3
Special topics not covered in regular analysis sequence. May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 680 - Industrial Mathematics

Credits: 3
Takes examples from industry and goes through complete solution process: formulation of mathematical model of problem; solution, possibly by numerical approximation; and interpretation and presentation of results. Emphasizes working in groups, relating mathematics to concrete situations, and communication and presentation skills.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MATH 683 - Modern Optimization Theory

Credits: 3
Introduces basic mathematical ideas and methods for solving linear and nonlinear programming problems, with emphasis on mathematical aspects of optimization theory. Reviews classical topics of linear programming, and covers recent developments in linear programming, including interior point method. Considers basic results in nonlinear programming, including very recent developments in this field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 685 - Numerical Methods

Credits: 3
Computational techniques for solving problems arising in science and engineering. Includes theoretical development as well as implementation, efficiency, and accuracy issues in using algorithms and interpreting results. Specific topics include linear and nonlinear systems of equations, polynomial interpolation, numerical integration, and introduction to numerical solution of differential equations.

Equivalent to CSI 700

Prerequisites
Computer literacy, including some programming experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 686 - Numerical Solutions of Differential Equations

Credits: 3
Finite difference methods for initial value problems, two-point boundary value problems, Poisson equation, heat equation, and first-order partial differential equations.

Prerequisites
MATH 214 and MATH 446 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 687 - Variational Methods

Credits: 3
Weak formulation of partial differential equations, energy principles, Galerkin approximations, and finite element methods. Includes review and development of necessary analysis.

Prerequisites
MATH 446 or 685, and elementary differential equations course.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 689 - Topics in Applied Mathematics**

Credits: 3  
Special topics in applied mathematics not covered in the regular applied mathematics sequence. May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 697 - Independent Reading and Research**

Credits: 1-6  
In areas of importance, but with insufficient demand to justify a regular course, students may undertake a course of study under the supervision of a consenting faculty member. Written statement of the content of the course and a tentative reading list is normally submitted as part of the request for approval. Literature review, project report, or other written product is normally required. May be repeated for credit.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**MATH 721 - Algebra II**

Credits: 3  
Rings, fields, and Galois theory.

**Prerequisites**  
MATH 621.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MATH 722 - Algebraic Topology**

Credits: 3  
Covers simplices and simplicial complexes, cycles and boundaries, simplicial homology, homological algebra, homotopy and the fundamental group, cohomology.

**Prerequisites**  
MATH 621 and 631, or equivalent.
MATH 723 - Combinatorial Structures

Credits: 3
Studies structural properties of objects encountered in pure and applied combinatorics. Topics include partially ordered sets, codes, designs, matroids, buildings, symmetrical structures, permutation groups, and face lattices of polytopes.

Prerequisites
MATH 321 or equivalent.

MATH 724 - Commutative Algebra

Credits: 3
Study of commutative rings and their ideals, and of modules over commutative rings and their homological properties. More specific topics include Noetherian rings, primary decomposition, completions, graded rings and dimension theory with applications to algebraic geometry.

Prerequisites
MATH 621.

MATH 732 - Topology II: Set-Theoretic Topology

Credits: 3
Topics include review of basic set theory (including cardinal numbers products of sets, the Axiom of Choice), definition of topological spaces, bases for topological spaces, forming new topological spaces by taking subspaces, quotients, and products, separation properties (Hausdorff, regular, Tychonoff, and normal spaces) compactness, the Lindelof property, separability, connectedness, continuity and homeomorphism, manifolds.

Prerequisites
MATH 631 or equivalent.

MATH 739 - Topics in Differential Geometry and Topology
Credits: 3
Topics include geometry of curves and surfaces, curvature, isometries, the Gauss-Bonet theorem, geodesics, differential forms, manifolds, smooth maps, vector fields, the Euler characteristic, integration on manifolds, de Rham cohomology.

**Prerequisites**
MATH 631 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 762 - Complex Analysis II**

Credits: 3
Harmonic functions, generalizations of the maximum principle, entire and meromorphic functions, analytic continuation, and the Riemann mapping theorem.

**Prerequisites**
MATH 661.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 763 - Functions of Several Complex Variables**

Credits: 3
Covers the important results for analytic functions in several variables, including analyticity in several variables and the differences between the theory of one and the theory of several complex variables.

**Prerequisites**
MATH 661 and 762, or equivalent preparation in one complex variable.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MATH 772 - Wavelet Theory**

Credits: 3
Study of the theory and computational aspects of wavelets and the wavelet transform. Emphasizes computational aspects of wavelets, defining the Fast Wavelet Transform in one and two dimensions. Developing the appropriate numerical algorithms. Includes developing the theory of wavelet bases on the real line, discussing multiresolution analysis, splines, time-frequency localization, and wavelet packets.

Equivalent to CSI 746

**Prerequisites**
MATH 315 or equivalent.
MATH 776 - Measure and Integration

Credits: 3
Lebesque measure and integration. Theory of Lp spaces with p between one and infinity on the real line. Theory of linear operators on Banach spaces, including the Hahn-Banach theorem, open mapping theorem, closed graph theorem and the uniform boundedness principle.

Prerequisites
MATH 675.

MATH 781 - Advanced Methods in Applied Mathematics

Credits: 3
Bifurcation theory and perturbation methods for solutions in ordinary and partial differential equations. This course will develop and apply these mathematical tools in current scientific fields, such as biology, materials science, or financial mathematics.

Prerequisites
Permission of instructor. Different backgrounds may be appropriate, but generally, a student is expected to be an upper level graduate student who has already taken graduate courses including differential equations and dynamical systems.

MATH 784 - Nonlinear Functional Analysis

Credits: 3
Techniques in nonlinear functional analysis with applications. Contraction mapping principle, Frechet and higher derivatives, the implicit function theorem, Lyapunov-Schmidt method, and bifurcation theory. Finite and infinite dimensional degree theory with applications in partial differential equations.

Prerequisites
Permission of instructor.

Notes
Different backgrounds may be appropriate, but generally, a student is expected to be an upper level graduate student who has already taken Linear Analysis. Since the applications given in the course are for differential equations, some familiarity with differential equations is extremely useful.
MATH 790 - Classical Potential Theory

Credits: 3
Potential theory of Laplace's equation in Euclidean space. Harmonic functions, superharmonic functions, potentials, polar sets and capacity, the Dirichlet problem, the Martin boundary, boundary behavior of superharmonic functions using real variable techniques, and minimal fine limit techniques.

Prerequisites
Math 675 and 776

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MATH 795 - Graduate Seminar

Credits: 1
Mandatory for all PhD students. Weekly seminar graded on presentations and attendance. Faculty presentations on potential thesis topics and presentations by students.

Prerequisites
Admission to PhD program in mathematical sciences.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MATH 799 - Thesis

Credits: 1-6
Original or compilatory work evaluated by committee of three faculty members.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

MATH 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6
Program of studies designed by student's discipline director and approved by student's doctoral committee, which brings the student to participate in current research of discipline director and results in paper reporting the original contributions of student. Enrollment may be repeated.

Prerequisites
Admission to PhD in education program to study in mathematical sciences.
MATH 998 - PhD Thesis Proposal

Credits: 1-9
Work on research proposal that forms basis for doctoral dissertation. May be repeated for credit. No more than 24 credit hours of 998 and 999 may be applied to doctoral degree requirements.

Prerequisites
Passing grade on preliminary exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

MATH 999 - PhD Thesis Credits

Credits: 1-12
Formal record of commitment to doctoral dissertation research under the direction of a faculty member. May be repeated for credit. No more than 24 credit hours of 998 and 999 may be applied to doctoral degree requirements.

Prerequisites
Advancement to doctoral candidacy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

Medical Technology

Prerequisite for the following courses except 200: completion of requirements for BS with major in medical technology except for 30 credits of professional study, and admission to school of medical technology approved by National Accrediting Agency for Clinical Laboratories.

MTCH 200 - Introduction to Medical Technology

Credits: 1
Introduction to the profession of medical technology.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

MTCH 401 - Orientation to the Problems and Practices of the Clinical Laboratory
Credits: 1-2
Orientation to clinical lab; specimen collection and record keeping; management principles and problems; educational theories as they apply to the teaching of clinical laboratory procedures; and quality control principles.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MTCH 402 - Clinical Hematology and Coagulation

Credits: 1-8
Morphology of blood cells in health and disease; theories of hematopoiesis and coagulation; techniques for measurement of hematologic parameters; and hematologic pathologies and their lab evaluation.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MTCH 403 - Clinical Microscopy

Credits: 1-3
Methods for the routine examination of urine, feces, and certain other body fluids, especially the microscopic identification of normal and pathologic components. Includes a study of the kidney and theories of microscopy.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MTCH 404 - Serology and Immunohematology

Credits: 1-7
Clinical lab procedures involving antigen-antibody reactions, and theoretical bases of such procedures. Includes both diagnostic and blood bank techniques.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
MTCH 405 - Clinical Microbiology

Credits: 1-8
Biology and pathology of bacteria, rickettsia, fungi, parasites, and viruses of clinical importance and their culture and identification.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MTCH 406 - Clinical Chemistry

Credits: 1-10
Chemical reactions and procedures used in clinical determinations on blood, urine, and cerebral spinal fluid. Includes manual, automated methods of chemical analyses.

Notes
Not offered on campus.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Military Science

MLSC 100 - Introduction to Army/ROTC

Credits: 1
Introduces leadership values and ethics; responsibilities of officership; the organization, customs, and traditions of the U.S. Army; time management; and physical well-being. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2

MLSC 101 - Leadership Skills II

Credits: 0 or 1
Introduces leadership principles, dimensions, styles, and assessment, among other varied topics. Includes a laboratory in applied leadership, common military tasks, and physical fitness.
MLSC 200 - Self/Team Development

Credits: 1
Covers leadership skills, such as values and ethics. Also teaches how to influence, how to communicate, how and when to make decisions, how to engage in creative problem solving, and how to plan and organize. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Prerequisites
MLSC 100 and 101, or approval of professor of military science

MLSC 201 - Leadership Skills IV

Credits: 0
Builds on the leadership skills developed in Leadership Skills III with additional emphasis on communication, team building, and team leadership. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

Prerequisites
MLSC 200

MLSC 201 (LAB) - Leadership Laboratory (Lead Lab)

Credits: 0
Students enrolling in any MLSC class for commissioning credit must enroll in this lab section.

Notes
Meets as a combined unit on Tuesdays, 1:30-4:15 p.m. Trains students on a variety of practical military tasks, from drill and ceremonies to small unit tactics. Upper-class cadets lead training as part of staff leadership experience. Includes field training exercises (FTX) each semester; physical training sessions are conducted every Monday, Wednesday, and Friday, 7-8 a.m., generally at the Field House. A professor of military science can authorize waivers to LAB 201 enrollment in certain circumstances, such as scheduling conflicts.

MLSC 300 - Applied Leadership I
Applied leadership with an introduction to the principles of physical fitness and healthy lifestyle; counseling as means of subordinate development; problem solving; operational analysis, development, and execution; and methods for preparing and presenting instruction. Students are given an introduction to the Leader Development Program that is used to evaluate their leadership performance and provide students with developmental feedback. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

**Prerequisites**
MLSC 100, 101, 200, and 201; and credit or veteran status with approval from military science professor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 2

---

**MLSC 301 - Applied Leadership II**

Credits: 0 or 1
Applied leadership covering the models of communications (verbal and nonverbal), technology to communicate, how to prepare and conduct formal briefings, an introduction to the Army branches, diversity and equal opportunity training, ethical decision making, and group cohesion and dysfunction. Some weekend training required. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

**Prerequisites**
MLSC 300

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 2

---

**MLSC 400 - Leadership and Management**

Credits: 3
Considered the "transition to lieutenant" phase in which managerial theories are applied to personnel, training, and logistics management situations. Students have command and staff responsibilities for the Mason cadet corps and receive hands-on experience operating as a management team. There are several briefing and writing requirements as well. Includes a laboratory in applied science, common military tasks, and physical fitness.

**Prerequisites**
MLSC 300 and 301

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2

---

**MLSC 401 - Leadership and Ethics**

Credits: 3
Continuing the "transition to lieutenant" phase of ROTC, examines ethics of military environment to include customs, ethical codes and decision making, constraints, and appeals to moral principles. American judicial system is also examined, with emphasis on the Uniform Code of Military Justice. Command and staff responsibilities are assigned to students for hands-on
experience operating as a management team for Mason cadet corps. Includes a laboratory in applied leadership, common military tasks, and physical fitness.

**Prerequisites**
MLSC 400, 300, or 301

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2

---

**Music**

All private music instruction is by arrangement. Students must consult the director of applied music studies in the School of Music for teacher assignment and registration numbers. Private music instruction fee applies. Students who register for private music instruction must also register for an ensemble.

For music major, music minor, or jazz studies minor: halfhour lesson per week, 1 credit, $164.50; hour lesson per week, 2 or 3 credits, $329.

---

**MUSI 100 - Fundamentals of Music**

Credits: 3  
Study of musical notation, interval and triad construction, reading of treble and bass clefs, scale construction, rhythm, elementary sight singing and ear training, and application at keyboard.

Satisfies General Education Requirement: Arts

**Notes**
Cannot be applied toward degree in music.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring

---

**MUSI 101 - Introduction to Classical Music**

Credits: 3  
Introduces art-music tradition of West. Techniques for expanding listening skills developed through study of musical elements, styles, and selected masterworks of musical literature.

Satisfies General Education Requirement: Arts

**Notes**
Music majors may take only as free elective.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Spring
MUSI 102 - Popular Music in America

Credits: 3
Investigates popular music styles and development in the United States with particular emphasis on the past 50 years. Lectures, recordings, and video enhance critical listening skills and examine stylistic and social contexts of popular music.

Satisfies General Education Requirement: Arts

Notes
Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 103 - Musics of the World

Credits: 3
Study and comparison of musical structure and expression in several world cultures, with special attention to social context and function. Studies selected Asian, Middle Eastern, African, and American (Latin, Native, African) cultures.

Satisfies General Education Requirement: Global understanding

Notes
For non-music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 104 - Introduction to Twentieth-Century Music

Credits: 3
Survey of various styles found in 20th-century music. Tonal, atonal, serial, and experimental music.

Notes
Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 105 - Music in the United States
Credits: 3
Study of music in the United States from colonial times to present. Through interaction with musical examples, traces significant African and European influences on emerging style and artistic activity in the United States.

Notes
Music majors may take only as free elective.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 107 - The Development of Jazz

Credits: 3
Historical, analytical, and aural survey of jazz from inception to present day. Looks at trends resulting from synthesis of jazz with other musical idioms.

Satisfies General Education Requirement: Arts

Notes
Music majors may take as free elective or part of jazz studies concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 113 - Sight Singing and Ear Training I

Credits: 2
Students taught to sing a line of music without accompaniment of instrument. Matching tones, major and minor scales, key signatures, intervals, rhythm, treble and bass clefs, and rhythmic and melodic dictation.

Prerequisites
MUSI 115 and 171, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 114 - Sight Singing and Ear Training II

Credits: 2
Continuation of MUSI 113. Alto and tenor clefs, modulation, various modes, and melodic and harmonic dictation.

Prerequisites
MUSI 113, or permission of instructor

Hours of Lecture or Seminar per week: 3
MUSI 115 - Theory I

Credits: 3
Music notation, scales, key signatures, intervals, chords, cadences, and figured bass.

Prerequisites
Students must read music, pass fundamentals of music test administered during first week of classes, and have some proficiency on musical instrument or in voice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 116 - Theory II

Credits: 3
First- and second-inversion chords, modulation, nonharmonic tones, figured bass, seventh chords. Analysis of Bach chorales; composition of four-part chorales in 18th-century style.

Prerequisites
MUSI 115, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 171 - Keyboard Skills I

Credits: 1
Study of piano keyboard as it relates to various clefs in music. Emphasis on solution of basic stylistic and technical problems.

Prerequisites
Non-music majors must have permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 172 - Keyboard Skills II
Credits: 1  
Study of piano keyboard as it relates to intermediate song and combined in various music forms.

Prerequisites  
MUSI 171.

Notes  
Nonmusic majors must have permission of instructor.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 3  
When Offered: Spring

MUSI 213 - Sight Singing and Ear Training III

Credits: 2  
Continuation of Music 114. Emphasizes modulation, chromatic and nontonal melodies, various modes, melodic and harmonic dictation, c clefs, and improvisation.

Prerequisites  
Music 114, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

MUSI 215 - Theory III

Credits: 3  
Study of four-part chromatic harmony and analysis of 19th-century compositions.

Prerequisites  
MUSI 116, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0  
When Offered: Fall

MUSI 216 - Theory IV

Credits: 3  
Analytical study of evolution of musical formal structures based primarily on harmonic and textural principles.

Prerequisites  
MUSI 215, or permission of instructor.

Hours of Lecture or Seminar per week: 3
MUSI 221 - Private Music Instruction I

Credits: 1
Private lessons in performance or composition.

Prerequisites
Audition or portfolio.

Notes
May be repeated for up to 8 credits.

MUSI 222 - PMI Keyboard

Credits: 1
Private lessons in keyboard performance.

Prerequisites
Audition.

Notes
May be repeated for up to 8 credits.

MUSI 223 - PMI Voice

Credits: 1
Private lessons in vocal performance.

Prerequisites
Audition.

Corequisite
MUSI 381, 384, or 385.

Notes
May be repeated for up to 8 credits.
MUSI 224 - PMI Woodwind

Credits: 1
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 225 - PMI Brass

Credits: 1
Private lessons in brass performance.

Prerequisites
Audition.

Notes
May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 226 - PMI String

Credits: 1
Private lessons in string performance.

Prerequisites
Audition.

Notes
May be repeated for up to 8 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 227 - PMI Percussion
Credits: 1
Private lessons in percussion performance.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 8 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0.5

---

**MUSI 228 - PMI Composition**

Credits: 1  
Private lessons in music composition.

**Prerequisites**
Portfolio of recent compositions.

**Notes**
May be repeated for up to 8 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0.5

---

**MUSI 241 - Private Music Instruction II**

Credits: 2  
Private lessons in music performance or composition.

**Prerequisites**
Audition or portfolio.

**Notes**
May be repeated for up to 16 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

---

**MUSI 242 - PMI Keyboard**

Credits: 2  
Private lessons in keyboard performance.

**Prerequisites**
Audition.
Notes
May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 243 - PMI Voice

Credits: 2
Private lessons in vocal performance.

Prerequisites
Audition.

Corequisite
MUSI 381, 384, or 385.

Notes
May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 244 - PMI Woodwind

Credits: 2
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 16 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 245 - PMI Brass

Credits: 2
Private lessons in brass performance.

Prerequisites
Audition.

Notes
MUSI 246 - PMI String

Credits: 2
Private lessons in string performance.

Prerequisites
Audition.

Notes
May be repeated for up to 16 credits.

MUSI 247 - PMI Percussion

Credits: 2
Private lessons in percussion performance.

Prerequisites
Audition.

Notes
May be repeated for up to 16 credits.

MUSI 248 - PMI Composition

Credits: 2
Private lessons in music composition.

Prerequisites
Portfolio of recent compositions.

Notes
May be repeated for up to 16 credits.
MUSI 251 - The Art of Teaching Music

Credits: 3
Introduces and explores various music teaching professions. Examines philosophical, pedagogical, and practical issues in context of diverse teaching situations and venues that range from private studio and public school to community music schools and commercial establishments.

Prerequisites
Admission to music major or minor program, or jazz studies minor program.

Notes
Requires observing professionals in the field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

MUSI 273 - Keyboard Skills III

Credits: 1
Continuation of MUSI 172. Study of techniques of harmonization at the piano keyboard.

Prerequisites
MUSI 172.

Notes
Nonmusic majors must have permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 300 - Recital Attendance

Credits: 0
Students attend 10 student recitals to be selected from departmental and music education recitals, and junior, senior, and graduate recitals.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
When Offered: Fall, Spring

MUSI 301 - Music in Motion Pictures
Credits: 3
Intensive study and analysis of using music tracks in motion pictures to introduce the picture, set a scene, create moods, or for musical numbers. From the silent film scores of the 1920s to the present (including electronic music).

Satisfies General Education Requirement: Arts

Prerequisites
30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 302 - American Musical Theater

Credits: 3
Intensive study of the musical elements in the American musical theater from its European and later African roots to its evolution between the wars into a native form, and its continual assimilation of external influences such as new forms of jazz and rock to the eclectic form of the present day.

Satisfies General Education Requirement: Arts

Prerequisites
30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 311 - Jazz Studies

Credits: 3
Musicianship course integrating jazz improvisation, theory, composition, and arranging. Focuses on concepts unique to our time in style, form, and harmony.

Prerequisites
MUSI 379.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 315 - Music Technology

Credits: 3
Study of technology related to music, including audio synthesis and computer-based hardware and software.

Prerequisites
MUSI 100 or 115
Notes
There is a course fee beyond tuition charges.

Hours of Lecture or Seminar per week: 3

MUSI 316 - Topics in Music Technology

Credits: 3
Selected topics in music technology with an emphasis on musical creativity. Includes consideration of recent developments in areas such as electronic composition, the science of music, recording industry and practices, and music industry.

Prerequisites
MUSI 315

Notes
Can be repeated for up to 9 credits. There is a course fee beyond tuition charges.

Hours of Lecture or Seminar per week: 3

MUSI 319 - Class Composition and Arranging

Credits: 3
Students write original compositions for specified instruments, voices, or combinations. They then apply compositional principles to the creative arrangement of existing music of various styles.

Prerequisites
MUSI 114 or 216, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

MUSI 323 - Music Education Recital

Credits: 0
Recital on major instrument given by student during junior or senior year.

Prerequisites
Minimum 8 credits in private music instruction in major instrument

Corequisite
Concurrent enrollment in appropriate 2-credit private music instruction course.

Notes
Recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.
MUSI 324 - Junior Recital

Credits: 1
Public recital by student during junior year.

Corequisite
Concurrent enrollment in appropriate 3-credit private music instruction course.

Notes
Junior recital must be at least 25 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

MUSI 325 - Performance Seminar and Vocal Literature for Singers and Accompanists I

Credits: 2
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

Prerequisites
Audition.

MUSI 326 - Performance Seminar and Vocal Literature for Singers and Accompanists II

Credits: 2
Students assigned vocal literature in Italian, English, German, and French from Baroque to 21st century, and perform in a weekly master class format. Designed for vocal performance and piano and accompanying majors; develops and improves artistic and performance skills, repertoire preparation and execution, diction, interpretation, style, and overall stage presence.

Prerequisites
Audition.
MUSI 331 - Music History in Society I

Credits: 3
Historical survey of Western music from Greek times through the late Baroque era, with emphasis on specific musical genres and composers who developed them. Musical developments are related to other aspects of society. Instruction conducted by lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisites
MUSI 215 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 332 - Music History in Society II

Credits: 3
Historical survey of Western music from the early Classical era through mid-19th century, with emphasis on specific musical genres and composers who developed them. Musical developments related to other aspects of society. Lectures, recordings, video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Prerequisites
MUSI 216 and 331, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

MUSI 341 - Diction for Singers I: Italian Diction and English Diction

Credits: 2
Increases proficiency in singing in Italian and English by teaching International Phonetic Alphabet (IPA), and strengthens performance of Italian and English art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in Italian and English.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 342 - Diction for Singers II: German Diction and French Diction

Credits: 2
Increases proficiency in singing in German and French by teaching International Phonetic Alphabet (IPA), and strengthens performance of German and French art songs and operatic repertoire. Focuses on intensified, systematic study of phonetics as it applies to singing in German and French.
MUSI 351 - Keyboard Pedagogy

Credits: 3
Investigates methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisites
MUSI 114, 216 and 273; and 8 credits in piano, organ, or harpsichord; or permission of instructor.

MUSI 352 - Vocal Pedagogy and Lab

Credits: 3
Instruction in teaching of voice through systematic study of vocal physiology and its implications for pedagogical methods. Includes theoretical and systematic study of processes, procedures, and practices to develop art of singing. Offers technical, physiological, theoretical, and practical principals of the singing art, with emphasis on the importance of vocal health.

MUSI 353 - Instrumental Pedagogy and Literature

Credits: 3
Instruction in teaching instrumental music techniques for all levels through study of pedagogical methods, standard literature, and musical instruments produced by present-day manufacturers.

Prerequisites
Junior standing in instrumental private music instruction, or permission of instructor.

MUSI 361 - Class Strings: Violin, Viola, Cello, and Bass

Credits: 1
Study of playing and teaching string instruments with emphasis on violin and cello through beginning method book. Study of fingerings and bowing techniques to teach and play viola and bass at beginning levels. Survey of string playing techniques to conduct rehearsals at intermediate-,advanced-, and artist-level ensembles.
Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying violin, viola, cello, and bass; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 363 - Class Woodwinds: Flute and Clarinet

Credits: 1
Study of techniques of playing and teaching flute and clarinet. Survey of instructional materials, and mouthpiece and instrument selection.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying flute and clarinet; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 364 - Class Woodwinds: Oboe and Bassoon

Credits: 1
Study of techniques of playing and teaching oboe and bassoon. Survey of instructional materials, instrument selection, and reed adjustment.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying oboe and bassoon; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 365 - Class Brass: Trumpet and French Horn

Credits: 1
Study of techniques of playing and teaching trumpet and French horn. Survey of instructional materials, and mouthpiece and instrument selection.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying trumpet and French horn; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 366 - Class Percussion

Credits: 1
Study of techniques of playing and teaching percussion instruments. Survey of instructional materials and instrument selection.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying percussion instruments; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 367 - Class Guitar

Credits: 1
Study of techniques of playing and teaching guitar. Survey of instructional materials and instrument selection.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying guitar; one hour per week in laboratory ensemble.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 368 - Class Voice

Credits: 1
Study of the human voice in artistic singing. Emphasizes practical application of basic principles.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying voice; one hour per week in laboratory ensemble.
MUSI 369 - Class Brass: Trombone, Euphonium, and Tuba

Credits: 1
Study of techniques of playing and teaching trombone, euphonium, and tuba. Survey of instructional materials and mouthpiece and instrument selection.

Prerequisites
Admission to music major program, or permission of instructor.

Notes
Three hours per week studying trombone, euphonium, or tuba; one hour per week in laboratory ensemble.

MUSI 371 - Techniques of Accompanying I

Credits: 1
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations, and performances by professionals; and participate in master classes.

Prerequisites
Successful audition on keyboard instrument for admission to music degree program; 4 credits in undergraduate private music instruction on a keyboard instrument; or permission of instructor.

Notes
May be taken two times for credit.

MUSI 372 - Techniques of Accompanying II

Credits: 1
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations, and performances by professionals; and participate in master classes.

Prerequisites
Successful audition on keyboard instrument for admission to music degree program; 4 credits in undergraduate private music instruction on a keyboard instrument; or permission of instructor.

Notes
May be taken two times for credit.
MUSI 373 - Advanced Accompanying and Musicianship Skills

Credits: 3
Advanced study and techniques for accompanying choirs, vocal soloists, and instrumentalists. Additional instruction in keyboard reduction of orchestral scores for concertos, continuo/figured bass reading, lead-sheet reading, transposition, improvisation, transcription, and "playing by ear."

MUSI 379 - Introduction to Jazz Improvisation

Credits: 1
Study of improvisation techniques and styles, with emphasis on common practice period of jazz. Application on the student's major instrument or voice to develop creativity and personal expression.

Prerequisites
MUSI 116, or permission of instructor.

MUSI 380 - Wind Symphony

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Highly selective group of instrumentalists perform works from wind symphony repertoire.

Satisfies General Education Requirement: Arts

Prerequisites
Audition.

Notes
Public concerts required.

MUSI 373 - Advanced Accompanying and Musicianship Skills

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: AY

MUSI 379 - Introduction to Jazz Improvisation

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

MUSI 380 - Wind Symphony

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring
MUSI 381 - University Chorale

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from choral repertoire.

Satisfies General Education Requirement: Arts

Prerequisites
Audition.

Notes
Public concerts required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall, Spring

MUSI 382 - Piano Ensemble

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Study and performance of original four-hand works for one and two pianos.

Satisfies General Education Requirement: Arts

Prerequisites
Audition and 4 credits in private piano music instruction.

Notes
Public performances required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

MUSI 383 - Symphonic Band

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from band repertoire.

Satisfies General Education Requirement: Arts

Prerequisites
Audition.

Notes
Public concerts required.
MUSI 384 - Symphonic Chorus

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of major works from the choral repertoire.

Satisfies General Education Requirement: Arts

Prerequisites
Audition.

Notes
Public concerts are given.

MUSI 385 - Chamber Singers

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Students explore their levels of artistic development through discovery, interpretation, and performance of choral music for vocal chamber music ensembles from multiple historical periods. Students bring to Mason and surrounding community musical compositions not readily accessible in regular concert repertoire.

Satisfies General Education Requirement: Arts

Prerequisites
Audition.

MUSI 387 - Symphony Orchestra

Credits: 1
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from symphony orchestra repertoire.

Satisfies General Education Requirement: Arts
**MUSI 388 - Fundamental Techniques of Stagecraft for Opera and Music Theater**

Credits: 2  
Study of basic to intermediate stage movement techniques necessary to the performance of opera and music theater roles. Emphasis on acting, improvisation, theater production, musical theater, and operatic role study.

**Prerequisites**  
Admission to music program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1

**MUSI 389 - Jazz Ensemble**

Credits: 1  
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Provides practical experience in various aspects of jazz performance: section work within a large aggregation, combo work, and improvisation.

Satisfies General Education Requirement: Arts

**Prerequisites**  
Audition.

**Notes**  
Public concerts required.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**MUSI 391 - Conducting I**

Credits: 2  
Study of basic techniques of conducting a musical ensemble.

**Prerequisites**
MUSI 114, 216, and 273; or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: Fall

MUSI 393 - Music Administration and Management

Credits: 2
Prepares students to address aspects of administration and management of music programs in public and private schools. Investigates principles and concepts of management styles and planning. Covers curriculum, budget, student recruitment and retention, external relations of the music unit, and legal issues for music educators.

Prerequisites
MUSI 116, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 395 - Teaching Internship

Credits: 1-4
Internship with a professional individual or organization in teaching. Introduction to teaching or augmentation of teaching skills. Students develop individual contracts defining the learning and competencies to be gained from the experience.

Prerequisites
MUSI 251.

Notes
Maximum of 9 internship credits (MUSI 395, 495, 496) can be applied toward a degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

MUSI 396 - Conducting II

Credits: 2
Advanced conducting course emphasizing techniques for instrumental and choral conducting. Refining gestures, full score analysis and interpretation, rehearsal techniques, and changing meters.

Prerequisites
MUSI 391, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
MUSI 401 - Impact of the Arts on Civilization

Credits: 3
Analyzes how genres of art impact us intellectually, emotionally, and subliminally. Broadens aesthetic and historical perspective, exposes students to major strands of contemporary thought, and develops discursive abilities through role-playing in round table discussions.

Prerequisites
30 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 415 - Music in Computer Technology

Credits: 3
Overview of ways computer is used in music. Topics include principles of musical instrument digital interface (MIDI); various kinds of synthesis; acoustics and sound processing; and musical composition using the computer. Explores music resources of Internet and surveys current multimedia applications in music history, theory, ear training, improvisation, and notation.

Satisfies General Education Requirement: Information technology (IT, all)

Prerequisites
MUSI 319, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 419 - Orchestration

Credits: 3
Principles of combining and balancing instruments in orchestral and chamber contexts. Attention to orchestral terminology and general notation as well as timbre, range, clefs, transposition, special effects, and scoring procedures.

Prerequisites
MUSI 114, 216, and 319; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 421 - Private Music Instruction III
Private lessons in performance or composition.

**Prerequisites**
Audition or portfolio.

**Notes**
May be repeated for up to 8 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0.5

---

**MUSI 424 - Senior Recital**

Credits: 1  
Public recital by student during senior year.

**Corequisite**
Concurrent enrollment in appropriate 3-credit private music instruction course.

**Notes**
Senior recital must be at least 50 minutes long. All recitals by arrangement. Students must consult with director of applied music studies to register and schedule dates.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**MUSI 431 - Music History in Society III**

Credits: 3  
Studies contributions to the world of music in selected cultures such as India, Indonesia, China, Japan, Africa, Middle East, and Americas. Emphasizes comparative musical characteristics as well as sociological function. Lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
MUSI 216, 331, and 332; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

---

**MUSI 432 - Music History in Society IV**

Credits: 3  
Historical survey of Western music from late 19th century to present, with emphasis on specific musical genres and composers
who developed them. Relates musical developments to other aspects of society, and considers interaction between world music. Lectures, recordings, and video. Learning process enhanced by reading, listening, writing, and analytical assignments.

**Prerequisites**
MUSI 216, 331, 332, and 431; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

---

**MUSI 441 - Private Music Instruction IV**

Credits: 2-3  
Private lessons in performance or composition.

**Prerequisites**
Audition or portfolio.

**Notes**
May be repeated for up to 18 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

---

**MUSI 442 - PMI Keyboard**

Credits: 2-3  
Private lessons in keyboard performance.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 18 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 1

---

**MUSI 443 - PMI Voice**

Credits: 2-3  
Private lessons in vocal performance.

**Prerequisites**
Audition.

**Corequisite**
MUSI 381, 384, or 385.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 444 - PMI Woodwind

Credits: 2-3
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 445 - PMI Brass

Credits: 2-3
Private lessons in brass performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 446 - PMI String

Credits: 2-3
Private lessons in string performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.
MUSI 447 - PMI Percussion

Credits: 2-3
Private lessons in percussion performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

MUSI 448 - PMI Composition

Credits: 2-3
Private lessons in music composition.

Prerequisites
Portfolio of recent compositions.

Notes
May be repeated for up to 18 credits.

MUSI 450 - Jazz Improvisation I

Credits: 2
Emphasizes improvisational materials and language developed in common practice period of jazz.

Prerequisites
MUSI 379 or permission of instructor.

MUSI 451 - Keyboard Pedagogy II
Credits: 3
Intensive study of methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisites
MUSI 351.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 452 - Jazz Improvisation II

Credits: 2
Emphasis on advanced improvisational techniques and contemporary tunes.

Prerequisites
MUSI 399 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 454 - Jazz Arranging

Credits: 3
Transcription, analysis, and scoring for small and large jazz ensembles.

Prerequisites
MUSI 311 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 461 - The Teaching of General Music in the Elementary and Middle School

Credits: 3
Studies theory, methods, practice, and materials to teach general music in elementary and middle school. Students spend three hours per week in class and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in the public schools.

Prerequisites
MUSI 114, 216, 273; and acceptance into music education concentration.

Corequisite
MUSI 391

Notes
For music majors only.
MUSI 463 - The Teaching of Vocal Music in the Secondary School

Credits: 3
Survey of repertoire and methods for teaching high school choral groups, small ensembles, and voice classes. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisites
MUSI 114, 216, 273, and 391; and acceptance into music education concentration.

Corequisite
MUSI 396.

Notes
For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

MUSI 464 - Instrumental Music Methods I

Credits: 3
Prepares students to successfully plan, organize, and administer marching band and jazz ensemble programs in secondary public school music curriculum. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisites
MUSI 114, 216, and 273; and acceptance into music education concentration.

Corequisite
MUSI 391

Notes
For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Fall

MUSI 465 - Selected Topics in Music Education
Credits: 1-3
Topics of practical interest to prospective and practicing music educators covering pedagogy, performance, and logistics of teaching music in schools, private studios, and communities.

Prerequisites
90 credits in music degree program, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

MUSI 466 - Instrumental Music Methods II
Credits: 3
Prepares students to teach instrumental music in elementary, middle, and secondary schools. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisites
MUSI 114, 216, 273, and 391; and acceptance to music education concentration.

Corequisite
MUSI 396.

Notes
For music majors only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
When Offered: Spring

MUSI 467 - Instrumental Music Methods I: Orchestra
Credits: 3
Prepares students to successfully plan, organize, and administer string classes from the beginning levels through performing ensembles (grades 4-12), and explore teaching materials appropriate for individual and class instruction. Students spend three hours per week in class, and one hour per week observing and teaching in laboratory ensemble. Students also participate in field observation of music classes in public schools.

Prerequisites
MUSI 114, 216, 273, and 361; and acceptance into music education concentration.

Corequisite
MUSI 391

Notes
For music majors only.
**MUSI 485 - Chamber Ensembles**

Credits: 1  
Students develop an understanding of major artistic works, including a consideration of how theoretical and historical insights find expression via performance. Performance of works from chamber music repertoire.

Satisfies General Education Requirement: Arts

**Prerequisites**
Audition.

**Notes**
Public performances required.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** Fall, Spring

**MUSI 490 - Musical Communication in Context**

Credits: 3  
Explains nature of musical communication in a variety of contexts, and combines knowledge gained in general education courses with knowledge and skills specific to the major to serve as a capstone course synthesizing both areas. How does music itself communicate, and how do musicians communicate about it with each other and with the world around them? Students address these through essays in the style of a journal or portfolio, substantial paper, and oral presentation of paper before faculty and student panel.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
Students must be in senior year of BA program in music, and have completed all other general education requirements.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**MUSI 491 - Musical Communication in Performance**

Credits: 1  
Helps student conceive of musical performance as communication in a variety of contexts, and combines knowledge in general education courses with knowledge and skills specific to the major to serve as a capstone course synthesizing both areas. Students consider various aspects of musical communication to prepare senior recital. Students explore social, historical, analytical, and aesthetic aspects of the music they are to perform by composing essays in the style of a journal or portfolio. Students prepare a substantial paper on recital repertoire and present that paper before a faculty and student panel.
Prerequisites
Completion of all other required general education courses for BM performance concentration.

Corequisite
Concurrent enrollment in appropriate 3-credit private music instruction course and Music 424.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

**MUSI 492 - Selected Topics in Music**

Credits: 1-3
Topics of practical interest to students in composition, music history and literature, world music, jazz studies, and performance practices.

Prerequisites
45 credits, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**MUSI 492H - Selected Topics in Music**

Credits: 1-3
Topics of practical interest to students in music history course.

Prerequisites
45 credits, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

**MUSI 492J - Selected Topics in Music**

Credits: 1-3
Topics of practical interest to students in jazz studies course.

Prerequisites
45 credits, or permission of instructor.
MUSI 492N - Selected Topics in Music

Credits: 1-3
Topics of practical interest to students in non-Western music course.

Prerequisites
45 credits, or permission of instructor.

Notes
May be repeated for credit.

MUSI 495 - Internship in Music Education: Student Teaching

Credits: 6
Full semester of intensive clinical experience in approved Virginia schools.

Prerequisites
Completion of all other courses required for BM with concentration in music education.

Notes
Maximum of 9 internship credits (MUSI 395, 495, 496) can be applied to degree.

MUSI 496 - Internship

Credits: 2-6
Contact the department one semester before enrollment. Internships are approved work-study programs with specific employers or agencies.

Prerequisites
Open to music majors with 90 credits.

Notes
Credit is determined by the department. Maximum 9 internship credits (MUSI 395, 495, 496) can be applied toward degree.
MUSI 497 - Independent Study

Credits: 1-3
Individual research and study of selected subject in close consultation with instructor. Student may choose from the musicological, ethnomusicological, theoretical, compositional, or educational areas, and produce at least one major written work based on research.

Prerequisites
Music majors with 90 credits, and permission of instructor and department chair.

MUSI 498 - Independent Study

Credits: 1-3
Individual research and study of selected subject in close consultation with instructor. Student may choose from the musicological, ethnomusicological, theoretical, compositional, or educational areas, and produce at least one major written work based on research.

Prerequisites
Music majors with 90 credits, and permission of instructor and department chair.

MUSI 501 - Graduate Theory Review

Credits: 3
Vocabulary and conceptual review of diatonic and chromatic harmony, part writing, form, harmonization, 20th-century techniques.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
Does not count toward required credits of a graduate music degree.

MUSI 502 - Graduate Aural Skills Review
Credits: 3
Music reading and aural skills including intervals, dictation (melodic and harmonic), scales, chords, rhythms, and meter.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
Does not count toward required credits of a graduate music degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 515 - Music in Computer Technology

Credits: 3
Overview computer use in music. Topics include principles of musical instrument digital interface (MIDI); synthesis; acoustics and sound processing; and musical composition using the computer. Explores music resources of Internet, and surveys multimedia applications in music history, theory, ear training, improvisation, and notation.

Prerequisites
Baccalaureate degree in music, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

MUSI 516 - Keyboard Skills

Credits: 3
Enhance keyboard skills for the non-keyboard major, including technique, harmonization, transposition, reading, and accompanying.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

MUSI 517 - Score Reading Skills

Credits: 3
Enhance score study and score reading skills for the conductor.

Prerequisites
Baccalaureate degree in music, graduate placement exam.
MUSI 525 - Performance Seminar and Vocal Literature for Singers and Accompanists I

Credits: 2
Students assigned art songs or operatic arias in Italian, German, French, and English, from Baroque to 21st century, and perform in weekly master class format. Develops and improves musical and artistic preparation and performance, increases repertoire, and establishes dependable methods for creating consistently high standards of artistic performance.

Prerequisites
Audition. Advanced vocal literature and performance seminar.

MUSI 526 - Performance Seminar and Vocal Literature for Singers and Accompanists II

Credits: 2
Students assigned art songs or operatic arias in Italian, German, French, and English, from Baroque to 21st century, and perform in weekly master class format. Develops and improves musical and artistic preparation and performance, increases repertoire, and establishes dependable methods for creating consistently high standards of artistic performance.

Prerequisites
Audition. Advanced vocal literature and performance seminar.

MUSI 532 - Music History Review I

Credits: 3
Enhance understanding of music history and the context of musical style, chronologically through the mid-18th century.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
Does not fulfill courses requirements for graduate degrees in music.

MUSI 533 - Music History Review II
Enhance understanding of music history and the context of musical style, from the mid-18th century to today.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
Does not fulfill course requirements for graduate music degrees.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 541 - Diction for Singers I: Italian Diction and English Diction

Credits: 2
Increases proficiency in singing in Italian and English by teaching International Phonetic Alphabet (IPA), and strengthens performance of Italian and English art song and operatic repertoire. Intensified, systematic study of phonetics as it applies to Italian and English.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 542 - Diction for Singers II: German Diction and French Diction

Credits: 2
Increases proficiency in singing in German and French by teaching International Phonetic Alphabet (IPA), and strengthens performance of German and French art songs and operatic repertoire. Intensified, systematic study of phonetics as it applies to singing in German and French.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

MUSI 551 - Keyboard Pedagogy I

Credits: 3
Intensive study of methods, theories, techniques, and materials to teach keyboard to children and adults in individual and group situations.

Prerequisites
Graduate status in applied piano, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 552 - Vocal Pedagogy and Lab
Credits: 3
Instruction in teaching voice through systematic study of vocal physiology and its implications for pedagogical methods. Includes theoretical and systematic study of processes, procedures, and practices to develop art of singing. Offers technical, physiological, theoretical, and practical principals of the singing art, with emphasis on vocal health.

Prerequisites
MUSI 352, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

MUSI 553 - Instrumental Pedagogy and Literature

Credits: 3
Instruction in teaching of instrumental music techniques for all levels through the study of pedagogical methods, standard literature, and musical instruments produced by present-day manufacturers.

Prerequisites
Baccalaureate degree in music, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AY

MUSI 555 - Music as a Healing Art

Credits: 3
Study of the relationship between musical vibrations and the natural rhythms of the body. Topics include history of music and healing, theory of sound, cymatics, toning, and performance practice as well as a survey of vibrational healing modalities and related therapies. Considers listening examples as they apply to healing with music. Students sing and play instruments in directed improvisatory performance.

Prerequisites
Basic proficiency with instrument or voice, and bachelor's degree in music.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 563 - Orff Schulwerk I

Credits: 3
Intensive introduction to Orff teaching philosophy with practical and theoretical instruction and immersion in the method itself. Students learn concepts of rhythm, harmony, solfege, modes, improvisation, and pedagogy. Students learn basic performance technique on soprano recorder, and learn to apply movement and dance in their teaching.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
MUSI 564 - Orff Schulwerk II

Credits: 3
Continues intensive study of Orff teaching philosophy with practical and theoretical instruction and immersion. Teaches further concepts of rhythm and meter including asymmetrical patterns. Reviews pentatonic modes and their transpositions, studies pentachordal and hexachordal scales, and begins intensive work with diatonic modes. Students work with a variety of percussion instruments including body percussion, unpitched instruments, and barred instruments. They sing and play soprano, alto, tenor, and bass recorders. Movement studies continue with intensive study of vocabulary of dance and mime.

Prerequisites
MUSI 563, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 565 - Orff Schulwerk III

Credits: 3
Continues intensive study of Orff teaching philosophy to complete certification process in Orff Schulwerk. Students continue intensive work in rhythm, melody, harmony, timbre, form, and pedagogy. Tenor, bass, and soprano recorders introduced. Movement and rhythmic studies concentrate on mixed meters and non-Western source materials and styles.

Prerequisites
MUSI 563 and 564, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 571 - Techniques of Accompanying I

Credits: 1
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations and performances by professionals; and participate in master classes.

Prerequisites
Admission to graduate-level private music instruction in keyboard instrument, or permission of instructor.

Notes
Each course may be taken two times for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: AY
MUSI 572 - Techniques of Accompanying II

Credits: 1
Development of accompanying skills through collaboration with solo singers, instrumentalists, and small ensembles. Students perform for each other; observe lectures, demonstrations and performances by professionals; and participate in master classes.

Prerequisites
Admission to graduate-level private music instruction in keyboard instrument, or permission of instructor.

Notes
Each course may be taken two times for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
When Offered: AY

MUSI 573 - Accompanying and Musicianship III

Credits: 3
For piano majors or students with significant keyboard skills.

Prerequisites
MUSI 572. Study of complex accompanying skills including open score reading and orchestral reduction.

Hours of Lecture or Seminar per week: 3

MUSI 592 - Topics in Music

Credits: 1-6
Intensive study of selected topics in performance, composition, or conducting. Individual research, group discussions, and participation in related activities.

Prerequisites
Baccalaureate degree in music.

Notes
May be repeated for up to 12 credits as topics change.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

MUSI 610 - Topics in Music Theory

Credits: 3
Uses music analytical theories to examine repertoire from a given time period or style.
Prerequisites
MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.

Notes
May be repeated for up to 9 credits as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 611 - Analytical Techniques

Credits: 3
Detailed formal and stylistic examination of music selected from the major style periods. Development of graduate-level analytical skills.

Prerequisites
MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 613 - Graduate Orchestration

Credits: 3
Intensive study of instrumentation through analysis and arrangement. Includes contemporary techniques and scoring for large forces.

Prerequisites
MUSI 501, 502, and 516, or appropriate score on the graduate placement examination.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 614 - Music Theory Pedagogy

Credits: 3
Study of materials and procedures in the teaching of undergraduate-level music theory subjects.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 615 - Advanced Jazz Improvisation
Credits: 3
Advanced techniques and applications of jazz improvisation.

Prerequisites
Graduate placement exam or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

MUSI 621 - Graduate Private Music Instruction

Credits: 1
Private lessons in performance or composition.

Prerequisites
Audition or portfolio.

Notes
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 622 - PMI Keyboard

Credits: 1
Private lessons in keyboard performance.

Prerequisites
Audition.

Notes
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0.5

MUSI 623 - PMI Voice

Credits: 1
Private lessons in vocal performance.

Prerequisites
Audition.

Notes
May be repeated for up to 6 credits.
MUSI 624 - PMI Woodwind

Credits: 1
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 6 credits.

MUSI 625 - PMI Brass

Credits: 1
Private lessons in brass performance.

Prerequisites
Audition.

Notes
May be repeated for up to 6 credits.

MUSI 626 - PMI String

Credits: 1
Private lessons in string performance.

Prerequisites
Audition.

Notes
May be repeated for up to 6 credits.
**MUSI 627 - PMI Percussion**

Credits: 1  
Private lessons in percussion performance.

**Prerequisites**  
Audition.

**Notes**  
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0.5

**MUSI 628 - PMI Composition**

Credits: 1  
Private lessons in composition.

**Prerequisites**  
Portfolio of recent compositions.

**Notes**  
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0.5

**MUSI 629 - PMI Conducting**

Credits: 1  
Private lessons in conducting.

**Prerequisites**  
Audition.

**Notes**  
May be repeated for up to 6 credits.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0.5

**MUSI 630 - Topics in Music History and Literature**

Credits: 3  
Examination of a musical style, genre, composer, compositional school, or historical development. Primary and secondary source
materials studied in historical and analytical contexts.

**Prerequisites**
MUSI 532 and 533, or appropriate score on the graduate placement exam.

**Notes**
Repeatable for up to 9 credits as topics change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**MUSI 640 - Topics in World Musics**  
Credits: 3  
Study of musics from selected cultures. Students will study structural, social, and cognitive foundations of the music.

**Prerequisites**
Baccalaureate degree in music, graduate placement exam.

**Notes**
Repeatable for up to 9 credits as topics change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  

**MUSI 650 - Topics in Jazz Studies**  
Credits: 3  
Study of selected topics in performance, composition, arranging and analysis. May be repeated for up to 9 credits as topics change.

**Prerequisites**
Graduate placement exam or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  

**MUSI 654 - Graduate Conducting**  
Credits: 3  
Classroom study of conducting, including refining gestures, rehearsal leadership, and the communication of musical style.

**Prerequisites**
Baccalaureate degree in music, graduate placement exam.

**Notes**
May be repeated for up to 9 credits.
MUSI 660 - Topics in Music Education

Credits: 1-6
Examination of specific areas of concern to music educators. Individual research, group discussions, and participation in related activities.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
Repeatable for up to 9 credits as topics change.

MUSI 661 - Psychology of Music Teaching and Learning

Credits: 3
Study of the learner's musical behaviors (affective, cognitive, and psychomotor) in an effort to devise an empirically based teaching method founded on learning principles.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

MUSI 662 - Introduction to Research in Music

Credits: 3
Development of skills, attitudes, and understanding to conduct and report research in music, including philosophical bases, scope and organization, stylistic practices in writing research reports, study of materials and resources in music and music education, and proper use of library and other research services.

Prerequisites
Baccalaureate degree in music, or permission of instructor.

MUSI 663 - Aesthetics of Music Education
Study of philosophical foundations of contemporary music education, and critical examination of music programs and activities in aesthetic education and efforts by music education establishment to enhance them.

**Prerequisites**
Baccalaureate degree in music, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 681 - Graduate Choral Ensembles**

Credits: 1
Performance of works from the choral repertoire.

**Prerequisites**
Audition.

**Notes**
Public concerts are given. May be repeated for up to 6 credits total.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**MUSI 682 - Wind Symphony**

Credits: 1
Highly selective group of instrumentalists performing works from the wind repertoire.

**Prerequisites**
Audition.

**Notes**
Public concerts are given. May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3

---

**MUSI 683 - Symphonic Band**

Credits: 1
Performance of works from band repertoire.

**Prerequisites**
Audition.

**Notes**
Public concerts are given. May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

**MUSI 685 - Graduate Chamber Ensemble**

Credits: 1
Performance of works from chamber music repertoire.

**Prerequisites**
Audition.

**Notes**
Public concerts are given. May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

**MUSI 687 - Symphony Orchestra**

Credits: 1
Performance of works from orchestral repertoire.

**Prerequisites**
Audition.

**Notes**
Public concerts are given. May be repeated for up to 6 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 3

**MUSI 688 - Opera and Musical Theater Ensemble**

Credits: 3
Solo-vocal, performance-oriented ensemble class that presents operatic works or excerpts from them, from Baroque to 21st century, as well as works or excerpts from American musical theater.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 12 credits.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 4
MUSI 689 - Jazz Ensemble

Credits: 1
Provides practical experience in aspects of jazz performance. Participation in section rehearsals and small and large jazz groups. Jazz improvisation expected.

Prerequisites
Audition.

Notes
Public concerts given. May be repeated for up to 6 credits total.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

MUSI 690 - Graduate Lecture Recital

Credits: 1-3
Combination of musical performance and scholarly presentation on a well-defined topic.

Prerequisites
Baccalaureate degree in music, audition.

Corequisite
MUSI 621 (3-credit level).

Notes
Public presentation required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MUSI 695 - Teaching Internship

Credits: 2
Teaching beginner, intermediate, and early advanced students in private or group lessons under faculty supervision.

Prerequisites
MUSI 660.

Notes
May be repeated for up to 4 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
MUSI 699 - Independent Study

Credits: 1-3
Individual research and study a concentration available in the master of music.

Prerequisites
Baccalaureate degree in music, and permission of department chair.

Notes
May be taken for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MUSI 710 - Advanced Topics in Music Theory

Credits: 3
Advanced study of specific styles and repertoire from the perspective of various analytical approaches.

Prerequisites
MUSI 501, 502, and 516, or appropriate score on the graduate placement exam.

Notes
May be repeated for up to 9 credits total as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 712 - Composition for Conductors and Performers

Credits: 3
Advanced study of new music for various media.

Prerequisites
Undergraduate degree in music, graduate placement exam.

Notes
This course is not for students in the composition concentration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 720 - Advanced Topics in Applied Music

Credits: 3
Advanced study of concepts in applied music.
Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
May be repeated for up to 6 credits total as topics change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

MUSI 721 - Private Music Instruction

Credits: 2-3
Private lessons in performance or composition.

Prerequisites
Audition or portfolio.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 722 - PMI Piano

Credits: 2-3
Private lessons in piano performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 723 - PMI Voice

Credits: 2-3
Private lessons in vocal performance.

Prerequisites
Audition.

Notes
MUSI 724 - PMI Woodwind

Credits: 2-3
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

MUSI 725 - PMI Brass

Credits: 2-3
Private lessons in brass performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

MUSI 726 - PMI String

Credits: 2-3
Private lessons in string performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.
MUSI 727 - PMI Percussion

Credits: 2-3
Private lessons in percussion performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 728 - PMI Composition

Credits: 2-3
Private lessons in music composition.

Prerequisites
Portfolio of recent compositions.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 729 - PMI Conducting

Credits: 2-3
Private lessons in conducting.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 730 - Advanced Topics in Music History
Advanced study of specific genres, composers, or repertoire from a historically analytical perspective.

**Prerequisites**
MUSI 532 and 533, or appropriate score on the graduate placement exam.

**Notes**
May be repeated for up to 9 credits total as topics change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 760 - Advanced Topics in Music Education**

Credits: 3  
Advanced study of selected issues in music education.

**Prerequisites**
Baccalaureate degree in music, graduate placement exam.

**Notes**
May be repeated for up to 9 credits total as topics change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 770 - Advanced Topics in Pedagogy**

Credits: 3  
Advanced study of a specific topic in the pedagogy of music.

**Prerequisites**
Baccalaureate degree in music, graduate placement exam.

**Notes**
May be repeated for up to 6 credits total as topics change.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**MUSI 790 - Graduate Recital**

Credits: 1  
Public performance. Repertoire and performance standards as approved by faculty.

**Prerequisites**
At least three credits graduate PMI in the appropriate instrument or voice.
Corequisite
MUSI 72X (3-credit level).

Notes
May be repeated for up to 4 credits total.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MUSI 796 - Directed Reading/Research

Credits: 1-3
Individualized study on a topic approved by faculty.

Prerequisites
Baccalaureate degree in music, graduate placement exam.

Notes
May be repeated for up to 6 total credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

MUSI 799 - Thesis

Credits: 1-6
Supervised research on approved thesis topic.

Prerequisites
At least 12 graduate credits including MUSI 511, and approval of thesis topic.

Notes
Students in the music education concentration must also have taken MUSI 562, and have successfully passed comprehensive exit exam.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

MUSI 800 - Studies for the Doctor of Philosophy in Education

Credits: 1-6
Program of studies designed by the student's discipline director and approved by student's doctoral committee that brings student to participate in research, performance, or creative activity of discipline director and results in a paper reporting original contributions.
**Prerequisites**
Admission to PhD in education program to study music.

**Notes**
Enrollment may be repeated.

**MUSI 810 - Doctoral Seminar in Analysis**

Credits: 3
Seminar study of a specific genre or repertoire from various analytical perspectives.

**Prerequisites**
Graduate placement examination.

**Notes**
May be repeated for up to 9 credits as topics change.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**MUSI 821 - Doctoral Private Music Instruction**

Credits: 2-3
Private instruction in performance, conducting, or composition.

**Prerequisites**
Audition portfolio

**Notes**
May be repeated for up to 18 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1

**MUSI 822 - Doctoral Private Music Instruction Piano**

Credits: 2-3
Private instruction in piano performance.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 18 credits.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 1
MUSI 823 - Doctoral Private Music Instruction Voice

Credits: 2-3
Private instruction in vocal performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 824 - Doctoral Private Music Instruction Woodwind

Credits: 2-3
Private lessons in woodwind performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 825 - Doctoral Private Music Instruction Brass

Credits: 2-3
Private lessons in brass performance.

Prerequisites
Audition.

Notes
May be repeated for up to 18 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

MUSI 826 - Doctoral Private Music Instruction String
Private lessons in string performance.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 18 credits.

---

**MUSI 827 - Doctoral Private Music Instruction Percussion**

Credits: 2-3
Private lessons in percussion performance.

**Prerequisites**
Audition.

**Notes**
May be repeated for up to 18 credits.

---

**MUSI 828 - Doctoral Private Music Instruction Composition**

Credits: 2-3
Private lessons in composition.

**Prerequisites**
Portfolio of recent compositions.

**Notes**
May be repeated for up to 18 credits.

---

**MUSI 829 - Doctoral Private Music Instruction Conducting**

Credits: 2-3
Private lessons in conducting.

**Prerequisites**
Audition.
MUSI 830 - Doctoral Seminar in Music History

Credits: 3
Seminar study of a specific genre, composer, or repertoire from a historically analytical perspective.

Prerequisites
Graduate placement exam.

Notes
May be repeated for up to 9 credits as topics change.

MUSI 860 - Doctoral Seminar in Music Education

Credits: 3
Seminar study of a specific issue in music education.

Prerequisites
Graduate placement exam.

Notes
May be repeated for up to 12 credits as topics change.

MUSI 880 - Doctoral Major Ensemble

Credits: 1
Selective ensemble experience for doctoral students in music.

Prerequisites
Audition.

Notes
Public concerts are given. May be repeated for up to 6 credits.
MUSI 890 - Doctoral Recital

Credits: 1
Public performance. Repertoire and performance standards as approved by faculty.

Prerequisites
At least 3 credits in MUSI 821 in the appropriate instrument or voice.

Corequisite
MUSI 821 (3-credit level).

Notes
May be repeated for up to 4 credits.

MUSI 998 - Dissertation Proposal

Credits: 1-3
Preparation of a proposal for a dissertation study in music under the supervision of music faculty members.

Prerequisites
Admission to doctoral program in music, permission of faculty.

Notes
May be repeated for up to 6 credits.

MUSI 999 - Dissertation

Credits: 1-6
Preparation of a dissertation in music under the supervision of music faculty members.

Prerequisites
Candidacy in a doctoral program in music.

Notes
May be repeated for credit.
Native American and Indigenous Studies

NAIS 201 - Introduction to Native American and Indigenous Studies

Credits: 3
Introduction to the history, social organization, political experience, and artistic expression of indigenous peoples of the western hemisphere, focusing primarily on American Indians, using methods and materials from a number of disciplines.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NAIS 499 - Independent Study

Credits: 3
Intensive study of a particular area, topic, or critical or theoretical problem related to Native American and Indigenous Studies to be conducted in close consultation with an instructor. At least one substantial, researched piece of written work required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Nanotechnology

NANO 500 - Introduction to Nanomaterials and Interactions

Credits: 3
Introduction to nanotechnology. Discussion of the Feynman challenge and its relation to modern science. Applications to nanostructures of charges, currents, diamagnetics, paramagnetics, and ferromagnetics.

Prerequisites
BS in any physical science, mathematics, or engineering; or permission of certificate director.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 510 - Strategies for Nanocharacterization
Credits: 3
Introduces various nanocharacterization techniques, with a discussion of which techniques are most useful in various applications. Includes gates and bridges, chemical thermodynamics, kinetics, and solid-state reactions.

**Prerequisites**
NANO 500 or permission of certificate director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NANO 520 - Survey of Nanostructures**

Credits: 3
Discusses nanomechanical oscillators and nanoresonators, nanofibers, and conducting polymer nanowires. Nanomechanical beams for reacting ion etching. Electron-beam lithography and photolithography.

**Prerequisites**
NANO 500 and 510 or permission of certificate director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NANO 530 - Nanofabrication**

Credits: 3
Covers pulsed laser deposition, molecular beam epitaxy, controlled vapor deposition, reactive sputtering, and doping and implant isolation.

**Prerequisites**
NANO 500 and 510, or permission of certificate director.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NANO 540 - Nanotechnology in Commerce and Government**

Credits: 3
Discusses competitive position of United States and other countries in nanoscience and nanotechnology. Covers business strategies, environmental, and public health aspects of nanotechnology applications. Also introduces students to issues involving legal, economic, social, and political controls over nanotechnology and nanoscience research.

**Prerequisites**
NANO 500, and admission into graduate certificate program in nanotechnology and nanoscience.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NANO 610 - Nanoelectronics

Credits: 3
Introduces basic elements of nanoelectronic structures, including quantum layers, quantum wires, and quantum dots. Covers sub-band structure, transport in quantum layers, behavior in the presence of magnetic fields, Coulomb blockades, CMOS nanodevices and nanoelectronics, and SOI multigate device physics and modeling.

Prerequisites
NANO 500, 510, and 520, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NANO 620 - Computational Modeling in Nanoscience

Credits: 3
Introduction to simulation methods used in nanoscience. Covers computational approaches to modeling molecular and condensed matter at the nanoscale level, including interatomic and molecular potentials, molecular mechanics, molecular dynamics, monte carlo averaging, ensemble distributions, numerical sampling, thermodynamic functions, dynamic structure, and introduction to cellular automata.

Prerequisites
NANO 500, 510, and 520, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Neurosciences

NEUR 210 - Introduction to Neuroscience

Credits: 3
Introduction to basic concepts and information across a broad range of current areas of neuroscience research. Prerequisite to all other courses in neuroscience.

Equivalent to NSCI 210 (2009-10 catalog)

Prerequisites
Completion of 30 credits, including BIOL 213, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall
NEUR 327 - Cellular, Neurophysiological, and Pharmacological Neuroscience

Credits: 3
Basic concepts of cellular and molecular level neuroscience, including neuronal functions, cellular anatomy and membrane functions, electrical properties of neurons, and cellular basis of plasticity.

Prerequisites
PSYC 375 with a grade of 3.00 or better, or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

NEUR 335 - Molecular, Developmental, and Systems Neuroscience

Credits: 3
In-depth survey of genetic and embryological development of the brain and introduction to systems neuroscience, including sections on patterning gene expression, generation and migration of neurons, axonal and dendritic outgrowth, and basic neuroanatomy.

Prerequisites
NEUR 210 or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3
When Offered: Fall

NEUR 461 - Special Topics in Neuroscience

Credits: 1-3
Selected topics reflecting in specialized areas of neuroscience.

Equivalent to NSCI 461 (2009-10 catalog)

Prerequisites
PSYC 372, 375, or equivalent or permission of instructor.

Notes
May be repeated three times for credit when topic is different.

NEUR 600 - Chemistry and the Brain

Credits: 3
Fundamentals of general chemistry, atoms, molecules, and reactions, with emphasis on water solutions. Organic compounds and functional groups, biosynthesis and properties, and examples from nervous system. Also includes biopolymers and their roles in
cellular and neuronal organization, ionic channels, neurotransmitter receptors, and psychoactive substances.

Equivalent to PSYC 556

Prerequisites
Admission to neuroscience PhD program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NEUR 601 - Developmental Neuroscience**

Credits: 2
Introduction to neurobiology with overview of embryological development of the nervous system in evolutionary context. Regional and systems neuroanatomy introduced by study of the mammalian visual system with a comparative perspective.

Equivalent to PSYC 527

Prerequisites
PSYC 372, or BIOL 213 and 303.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**NEUR 602 - Cellular Neuroscience**

Credits: 3
Detailed overview of the functioning and interactions of the cellular elements of the central nervous system. Topics include structure and function relationships, the chemical, physical, and electrical basis of neural signaling, local versus long-distance signaling, generation of action potentials, and essentials of synaptic communication.

Equivalent to BIOS 721

Prerequisites
Admission to PhD program in biosciences or neuroscience, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NEUR 603 - Mammalian Neurobiology**

Credits: 3
Functional anatomy of the brains of mammals, with emphasis on regional and systems neuroanatomy of humans. Anatomy is correlated with material from clinical neurology where possible. Laboratory component includes brain dissections and clinical correlations.

Equivalent to PSYC 531
Prerequisites
NEUR 601

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

NEUR 604 - Ethics in Scientific Research

Credits: 1-3
Reflects on purpose of scientific research and reviews foundational principles for evaluating ethical issues. Offers skills for survival in scientific research through training in moral reasoning and teaching of responsible conduct. Discusses ethical issues in research, and teaches how to apply critical thinking skills to design, execution, and analysis of experiments. Issues include using animals and humans in research, ethical standards in computer community, and research fraud. Currently accepted guidelines for behavior in data ownership, manuscript preparation, and conduct of persons in authority may be presented and discussed in terms of relevant ethical issues.

Equivalent to PHIL 691

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NEUR 611 - Philosophical Foundation of Neuroscience

Credits: 3
This course presents the joint histories of the nature of thought, the philosophy of science, the construct of self, and the nature of mind.

Prerequisites
Any course in neuroscience or permission of the instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 621 - Synaptic Plasticity

Credits: 3
Course on activity-dependent modification of functional connectivity in the central nervous system as it relates to development, cognition, and disease.

Prerequisites
NEUR 602

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NEUR 634 - Neural Modeling

Credits: 3  
Introduces the objectives, philosophy, and methodology of neuronal modeling. Instructs students in the use of some of the more popular neural modeling software packages. Students learn the syntax of several software packages, how to create neurons from subcellular components, and how to create networks by connecting neuron models.

Prerequisites  
NEUR 602 or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

NEUR 689 - Topics in Neuroscience

Credits: 3  
Selected topics in neuroscience reflecting specialized areas or new subfields not covered in fixed-content neuroscience courses.

Prerequisites  
Permission of instructor.

Notes  
Course may be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

NEUR 701 - Neurophysiology Laboratory

Credits: 3  
Hands-on training in current techniques of modern neurophysiology. Acquaints students with the theoretical basis of each technique and trains the student in the laboratory skills necessary to perform each technique. Includes intracellular and extracellular recording techniques.

Prerequisites  
NEUR 602 and admission to neuroscience PhD program or permission of instructor.

Notes  
Meets once weekly for six hours.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 6

NEUR 702 - Research Methods
Credits: 3
Trains students in research methodologies, techniques, and data analysis in neuroscience. The course is divided into three modules that introduce separate but equally significant components of any research project. The first module will focus on parameters required for outlining and synthesizing a problem. The second module will cover various techniques of measurement and analysis used by neuroscientists. The last module will cover various approaches used for data analysis and interpretations.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 703 - Laboratory Rotation and Readings

Credits: 3
Intensive introduction to a research laboratory in neuroscience. The student will read background material pertinent to the problem under study, learn and practice research methods of the laboratory, and formulate a short final project, which may be a proposal or an actual project, demonstrating some mastery of the techniques and approaches employed.

Prerequisites
Admission to the PhD program in Neuroscience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

NEUR 709 - Neuroscience Seminars

Credits: 1
Special seminar series for first year neuroscience PhD students. Detailed overview of neuroscience research at Mason. Each week, a different neuroscience laboratory and principal investigator lectures to students. The lecture includes the neuroscience basics necessary to appreciate the laboratory research theme and mission, and a more practical description of the active research program, possibly including a visit to the laboratory.

Prerequisites
Admission to neuroscience PhD program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

NEUR 710 - Special Topics in Neuroscience

Credits: 1
Examines topics in neurosciences, including neurogenetics, neural imaging, and the competing computational and biological approaches to understanding the mind.

Prerequisites
Admission to neuroscience PhD program.
NEUR 734 - Computational Neurobiology

Credits: 3
Intense review of neurobiology for graduate students interested in studying how nerve cells integrate and transmit signals, and how behavior emerges from integrated actions of populations or circuits of nerve cells. Covers electrical and biochemical properties of single neurons, and electrical and chemical communication between neurons. Emphasizes mathematical descriptions and computational techniques to study and understand neurons and networks of neurons.

Prerequisites
NEUR 602 and MATH 214, or permission of instructor.

NEUR 735 - Computational Neuroscience Systems

Credits: 3
Intensive introduction to systems neuroscience from quantitative perspective. Covers computational techniques used to study function of networks of neurons. Uses spike train statistics, neural encoding, and information theory to investigate behaviors that emerge from integrated actions of networks of neurons.

Prerequisites
NEUR 734, or permission of instructor.

NEUR 741 - Introduction to Neuroimaging

Credits: 3
Introduction to physics and techniques of magnetic resonance imaging (MRI) and their applications to clinical and basic neuroscience. Students learn about the protocols used in the acquisition of images in both structural and functional contexts, and experimental paradigms applied to the exploration of cognition, learning, and development. Students gain experience with creating an experimental design for a study and understanding practical logistics involved in imaging, such as MRI safety and subject screening.

Prerequisites
NEUR 602 or 603, or permission of instructor.
NEUR 742 - Cognitive Neuroscience

Credits: 3
Introduces cognitive neuroscience topics, including aspects of cognitive science covering an array of perceptual, sensory, cognitive, and affective processes. Incorporates studies of brain lesions, brain imaging, and animal and computational models.

Prerequisites
NEUR 602 or 603, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 751 - Applied Dynamics in Neuroscience

Credits: 3
Covers recent developments in the application of applied dynamics to neuroscience. Emphasizes dynamical system approach to the understanding of neural processes. Topics include neural synchrony and control; formation of waves; oscillations; patterns within neural ensembles; network topology and dynamics of neurons; and decoding and encoding of neural signals.

Prerequisites
NEUR 603 or CSI 734, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 752 - Modern Instrumentation in Neuroscience

Credits: 3
Builds on knowledge of how and what things are measured and controlled in modern bioinstrumentation. Topics include fundamental instrumentation; principles of sensing; basic electronics; computer interfaces and data acquisition; signals in biological systems; biopotential and ionic concentration measurements; and optical techniques.

Prerequisites
NEUR 602 or 734, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 851 - Advanced Computation and Brain Dynamics

Credits: 3
In-depth study of open issues and the state-of-the-art in advanced brain dynamics. Using mathematical and physical models, the course covers the neurodynamical aspects of neural nets, receptive fields, ion-channels, intercortical interactions, phase-locking, synchronicity, and the possible nontrivial role of quantum effects.

Prerequisites
NEUR 603 or CSI 734, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NEUR 996 - Doctoral Reading and Research

Credits: 1-6
Reading and research on specific topic in neuroscience under direction of faculty member.

Prerequisites
Admission to NEUR PhD, and permission of instructor.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

NEUR 998 - Dissertation Proposal

Credits: 1-6
Covers development of a research proposal under guidance of dissertation director and doctoral committee. Proposal forms the basis for the doctoral dissertation.

Prerequisites
Permission of advisor.

Notes
Course may be repeated as needed; however, no more than a total of 24 credits in NEUR 998 and 999 may be applied toward satisfying doctoral degree requirements. Out of the 24, no more than 12 credits of NEUR 998 may be applied.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/IP

NEUR 999 - Doctoral Dissertation

Credits: 1-12
Doctoral research performed under the direction of the dissertation director.

Prerequisites
Admission to candidacy in neuroscience doctoral program.

Notes
May be repeated as needed; however, no more than a total of 24 credits in NEUR 998 and 999 may be applied toward satisfying doctoral degree requirements.
New Century College

NCLC 101 - Narratives of Identity

Credits: 6
Explores the concept of identity through the study of literature and oral communication. Introduces aesthetic, cultural, and historical aspects of these forms of communication as well as their psychological, political, and practical significance, with special emphasis on the role of communication in a free society.

Satisfies General Education Requirement: Oral communication and Literature

Hours of Lecture or Seminar per week: 6

NCLC 102 - Global Networks and Communities

Credits: 6
Examines important global issues that shape our world today through the concept of food sheds, the production and distribution of food regionally and globally. Develops an understanding of how these issues are handled in different cultural traditions. Uses information technology as an integral tool that students use to gather, analyze and present data

Satisfies General Education Requirement: Information technology and Global understanding

Hours of Lecture or Seminar per week: 6

NCLC 103 - Human Creativity: Science and Art

Credits: 6
Investigates the vital role played by human creativity in fine arts and natural sciences. Fosters an understanding of the aesthetic and intellectual components of the arts while exploring the scientific method, the relation of theory and experiment, and the development and elaboration of major ideas in science.

Satisfies General Education Requirement: Arts and Natural science (non-lab)

Hours of Lecture or Seminar per week: 6

NCLC 111 - Composition, Communication and Community
Credits: 7
Students study key skills for our information economy. They research original ideas and analyze critically the ideas of others. They also learn to communicate their conclusions through writing, speech, and the creative use of electronic media. Topics covered include writing to learn, information literacy, individual and small-group communication, and collaborative problem solving.

Notes
Credit distribution: written communication (3), oral communication (2), quantitative reasoning (1), and information technology (2).

Hours of Lecture or Seminar per week: 7
Hours of Lab or Studio per week: 0

NCLC 121 - Science, Mathematics, and Technology in Society

Credits: 7
Building on skills developed in NCLC 110/111, designed for students pursuing a BA or BS in integrative studies within New Century College. Introduces natural sciences and their relation to mathematics. After building a knowledge base, students explore the natural world through contemporary issues. Discusses man and nature from biological, historical, and contemporary viewpoints, while developing an understanding of how science develops and communicates ideas. Students learn to work in groups to solve problems and work through issues, then publicly present ideas through debates, posters and various written formats.

Notes
Credit distribution: math/analytical reasoning (3), and natural science (4).

Hours of Lecture or Seminar per week: 7
Hours of Lab or Studio per week: 0

NCLC 165 - Independent Study

Credits: 1-12
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor). Students are encouraged to work as a team on a particular topic.

Prerequisites
Permission of instructor and dean.

Notes
Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 190 - Internship
Credits: 1-6
Internship credit may be applied to 12 credits required in experiential learning. Primary purpose is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

Prerequisites
Sophomore standing and permission of instructor.

Notes
Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-6

NCLC 194 - Service-Learning Experience

Credits: 1-15
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 195 - Field-Based Work

Credits: 1-6
Directed field studies in topic not otherwise available to students.

Notes
Topics vary, but entire course or significant component is located off campus. In addition to fieldwork, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 196 - Teaching Assistant Experience

Credits: 1-6
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as Technology Assistants, Writing Tutors, and Residence Advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.
NCLC 197 - Add-On Experiential Learning

Credits: 1-3
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

Prerequisites
Must be enrolled in a learning community or experiential learning class to add this additional credit.

Notes
May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 198 - Field-Based Work

Credits: 1-15
Experiential-based individualized studies, mentored by instructor.

Notes
Topics decided by student and instructor, and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 200 - Visual Thinking and the Creativity

Credits: 3-15
Investigates modes of visual and textual creativity through art, literature, and variety of visual and textual forms. Through interdisciplinary approach to picturing text, provides opportunity to experiment with creative composition that includes visual elements, and with art forms that include textual elements. Explores blocks to creativity, and provides understanding of how to evaluate and write about visual texts as well as how to produce documents that integrate words and images.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
NCLC 201 - The World Since 1945

Credits: 6
Examines the history of the past 50 years to illuminate the contemporary world as well as build connections between the global and local. Using historical works, fiction, autobiographies, films, and daily newspapers, students explore such major events as the Cold War, the struggle against apartheid in South Africa, the Vietnam War, the Chinese Cultural Revolution, and the continuing conflict in the Middle East. As a learning community, requires active student participation in group projects and discussions.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 202 - Public Speaking and Critical Thinking Skills

Credits: 4
Combines process of learning to speak in front of audiences with analysis of arguments and persuasive appeals. Students learn how to create and present effective speeches, adapt messages to specific audiences, and evaluate and critique messages produced for others. One credit of experiential learning enables students to examine public speeches, news stories, political campaigns, and advertising, among others, to make meaningful connections between public speaking theory and practice.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 203 - Inquiry for Action: Facilitating Change

Credits: 6
Transforms student's learning in the classroom through action in their communities. Explores the relationships between individual acts and society's social and political structures. Students design a semester-long, community-based research project, choose appropriate qualitative and quantitative approaches, and develop a repertoire of community research strategies.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 204 - Leadership Theory and Practice

Credits: 3
Examines historical and contemporary leadership theories, and analyzes various methods and styles of leadership while providing students with opportunity to better understand their leadership strengths and challenges.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 210 - Sustainable World
Credits: 4
Covers basic issues in the natural and social sciences that underlie current environmental problems. Considers ethical matters such as equity as they pertain to global resource consumption, pollution, and climate change.

Hours of Lecture or Seminar per week: 4

**NCLC 211 - Introduction to Conservation Studies**

Credits: 3-6
Provides foundation for the integrative study of environmental conservation. Formal and informal writing assignments and oral presentations designed to strengthen critical thinking and communication skills important to students who pursue conservation-related professions. Instructors encourage students to use course assignments and off-campus work to identify suitable educational and career paths within the conservation world.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 2

**NCLC 215 - Introduction to Science and Society**

Credits: 2
Provides students in the interdisciplinary minor in science and society with general background information and common frame of reference for developing an individualized core of course work. Students design a plan for their course work in the minor, envision the specific topic they will address, and begin preliminary preparation for NCLC 415.

Hours of Lecture or Seminar per week: 2

**NCLC 220 - Energy and Environment**

Credits: 3-6
Investigates current sources of energy, various modes of their utilization, and environmental effects. Offers an overview of the mechanical, physical, and chemical methodologies of energy use and delves into the biological, environmental, and ecological aspects of pollution-generating mechanisms.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

**NCLC 230 - Math and Culture**

Credits: 6
Focuses on mathematical problems and their emergence in different cultures and historical moments. Emphasizes interdisciplinary nature of the motivations for the development of mathematics and on the process of mathematical discovery. High degree of faculty/student interaction, which enables students to demonstrate, through the use of presentations and projects, their understanding and mastery of fundamental mathematical ideas and techniques and the role of mathematics in the development of human culture.
NCLC 231 - Introduction to Community Studies

Credits: 4
Examines relationship between sustainable communities and democratic citizenship in a diverse society. The objectives are to improve one's understanding of and thinking critically about communities and democratic principles, theories and practice. Students identify and work through problems that communities address by working in a community service-learning setting.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 244 - Beats, Rhyme, and Culture

Credits: 4
Examines the history of hip-hop and the effect it has had on our society. The primary focus is to consider hip-hop as a medium of communication that impacts, represents, and misrepresents the life experiences of youth in the United States. Students are exposed to historical, socioeconomic, and musical/aesthetic contexts of this genre through in-class activities and by attending related cultural events.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 245 - Visual Culture and Society

Credits: 4
Explores the role of visual culture in contemporary society including an examination of photography, the visual and performing arts, film and video, and electronic media. Readings focus on the historical foundations of visuality as well as theories of visual culture and aesthetics. Students investigate the ways that forms of visual culture function in society and how these are linked to race, class, and gender as well as politics and economics. Students will gain hands-on experience working with contemporary visual media tools such as computer graphics and digital video editing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 249 - The Internet: Literacy, HTML Tools, and Virtual Community

Credits: 4
Introduction to cyberspace, the Internet, and web. Students learn basic HTLM to create individual and collaborative web pages. In addition to using e-mail, students explore use of listservs, online discussion forums, and virtual communities. Assignments include collaborative and individual web pages, analytical and creative papers, and online research.
Notes
One experiential credit is required in this class.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 1

NCLC 265 - Independent Study

Credits: 1-12
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor). Students are encouraged to work as a team on a particular topic.

Prerequisites
Permission of instructor and dean.

Notes
Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 275 - Special Topics

Credits: 1-18
Studies topics of special interest to undergraduates.

Notes
May be repeated for credit if subtitle is different.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 290 - Internship

Credits: 1-6
Internship credit may be applied to 12 credits required in experiential learning.

Prerequisites
Sophomore standing and permission of instructor.

Notes
Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.
NCLC 294 - Service-Learning Experience

Credits: 1-15
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-6

NCLC 295 - Field-Based Work

Credits: 1-18
Directed field studies in topic not otherwise available to students.

Notes
Topics vary, but entire course or significant component is located off campus. In addition to fieldwork, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 296 - Teaching Assistant Experience

Credits: 1-6
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as technology assistants, writing tutors, and residence advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 297 - Add-On Experiential Learning

Credits: 1-3
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.
Prerequisites
Must be enrolled in a learning community or experiential learning class to add this additional credit.

Notes
May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 298 - Field-Based Work

Credits: 1-15
Experiential-based individualized studies, mentored by instructor.

Notes
Topics decided by student and instructor, and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 301 - Science in the News

Credits: 3
Examination and discussion of the current trends in science as reported in the popular media. Students learn how to evaluate the science that is reported so they may become informed consumers; discuss how scientific advancement might shape society by looking at how science and society have changed together over time; and use examples from the past to discuss future trends.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 304 - Social Movements and Community Activism

Credits: 4
Examines how citizens, individually and collectively, accomplish social change in society through case study analysis. Considers advantages and limits of social change strategies from communication and social movement theory perspectives. Surveys topics including how leaders maintain momentum in face of opposition; how movements and organizations use slogans, symbols and music to inspire followers; and how participants construct persuasive media campaigns and political arguments to facilitate policy change.

Notes
One credit of experiential learning enables students to explore their role as social advocates and effective citizens in context of
NCLC 305 - Conflict Resolution and Transformation

Credits: 6
Examines the nature and dynamics of conflict and ways to resolve and transform conflict. Experiential learning is used as the vehicle through which students explore their assumptions about communication and develop their skills for resolving interpersonal conflicts.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 306 - Our Common Futures

Credits: 3-6
Students and faculty work together to model patterns of life that fit within the planet's ecological means. Involves the study of "environomics," introductions to urban systems and planning, and studio work to actually create models of alternative growth.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 307 - Narratives of Nature

Credits: 6
Course begins with the individual's connection to the infinite, the cosmos, and ends in a microscopic examination of the behavior of the human animal. Looks at the fundamental questions relating to scientific thinking and writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

NCLC 308 - American Landscapes in Fiction, Film, and History

Credits: 6
Waterways and roadways have always had practical, spiritual significance for Americans. Course looks at American literary works and films in historical context to better understand the roles roads, rivers play in shaping physical, cultural landscape of United States. Students explore course themes outside classroom on weekend field trips, and conduct self-directed road trip as a main learning events.

Satisfies General Education Requirement: Synthesis requirement

Notes
Satisfies requirements for ENGL 302.

**Hours of Lecture or Seminar per week:** 4
**Hours of Lab or Studio per week:** 2

---

**NCLC 309 - Introduction to Childhood Studies**

Credits: 3
Focuses on the study of childhood from birth to adolescence from the perspective of several disciplines. Fosters thinking about childhood theory, research, policy, and practical applications of knowledge to decisions regarding children and youth.

**Hours of Lecture or Seminar per week:** 3
**When Offered:** Fall, Spring

---

**NCLC 310 - Violence and Gender**

Credits: 3-6
Using nonfiction, research documentaries, oral histories, case studies, literature, feature films, music, dance, and visual arts, examines the dynamics of violence through different cultural lenses. Students work in university and community settings to integrate their academic experiences with practice.

**Hours of Lecture or Seminar per week:** 3-6
**Hours of Lab or Studio per week:** 0

---

**NCLC 311 - The Mysteries of Migration: Consequences for Conservation**

Credits: 6
Investigates the biology of migration and its implications for science policy. Students consider the phenomenon of migration in the context of natural history, conservation, and cultural issues. The course includes several weekend trips for field study.

**Hours of Lecture or Seminar per week:** 3-15
**Hours of Lab or Studio per week:** 0

---

**NCLC 312 - Images and Experiences of Childhood: Social Construct, Literature, and Film**

Credits: 3-6
Immerses students in the images of childhood through the media of literature, video, and poetry, with a strong emphasis on historical perspectives of childhood. The class is interactive, requires some work in groups, and requires classroom participation.

**Hours of Lecture or Seminar per week:** 3-6
**Hours of Lab or Studio per week:** 0
NCLC 313 - Strangers in a Strange Land: Immigration in 20th Century America

Credits: 3-6
Examines immigration experience as historical reality, culture. Through explorations of historical and contemporary discourse of immigration in United States, illuminates connections between current-day events, and ideas and policies that inform them.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 314 - Conflict, Trauma and Healing

Credits: 6
Develops in students an appreciation of human resilience and helps them acquire better coping mechanisms. Imparts knowledge of the nature and dynamics of trauma and healing. Investigates the difficulties people face in responding to settings of conflict such as war, school shootings, abuse, domestic violence, including natural disaster. Examines case studies from a variety of personal, national, and international settings.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 315 - Spirituality and Conflict Transformation

Credits: 6
Examines dimensions of spirituality, including peacemaking efforts in large-scale conflicts, conflicts within faith communities, and interpersonal disputes. Experiential learning explores spiritually informed resolution.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 316 - Introduction to Childhood Studies

Credits: 4
Focuses on the study of childhood from birth to adolescence from the perspective of several disciplines. Covers childhood theory, research, and policy and their applications to decisions regarding children and youth.

Hours of Lecture or Seminar per week: 3

NCLC 317 - Issues in Family Relationships

Credits: 4
Dynamics of family systems and issues that shape relationships among family members. How families evolve as members grow, leave, and create related family systems; family roles and forms; and communication patterns, decision-making, conflict, stress, and power. Content draws from family communication, family relations, psychology, and counseling. Lecture, discussion, observation, analysis, research, and role-playing.
Prerequisites
55 credits.

Notes
One credit counts for experiential learning; students complete 45 credits of course-related work outside classroom.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 318 - Exploring Virginia's Watersheds

Credits: 4
Comprehensive overview of history, geography, economics, and management of water resources in Virginia; and how rapidly growing population has measurably degraded resource. Includes one weekend field trip.

Prerequisites
HIST 120, 121, 122, or equivalent; and EVPP 110 or GGS 102 or GEOL 109 or NCLC 120.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NCLC 320 - Construction of Differences: Race, Class, and Gender

Credits: 6
Investigates race, sex, sexual orientation, and social class in contemporary American society. Examines commonalities in the construction of these categories and experiences of those who occupy them.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 330 - Enterprise Development

Credits: 6
Prepares students for enterprise development in diverse environments by examining the spectrum of sociocultural, organizational, behavioral, strategic, and management factors that impact enterprise creation. Instructional method is interactive, using case studies, scenarios, role playing, guest speakers, and student-driven semester projects to link theory to practice.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 331 - The Nonprofit Sector
Credits: 4
Readings, classroom discussions and activities, and practical experience reveal historical, legal, and socioeconomic forces that define and influence the American nonprofit sector. Explores structures, issues that affect nonprofit management, governing, and financial systems.

Notes
Includes 1 experiential learning credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 333 - The Nature of Mathematics

Credits: 3
Sections include theoretical framework, historical context, connections with some other disciplines, and current issues. The sections are illustrated with selected mathematics topics (more advanced algebra and geometry plus introductions to set theory, probability, calculus, and number theory) Student presentations (in pairs) on what they have read and learned in mathematics, and result of optional experiential learning component of the course.

Prerequisites
Performance on Math Placement Exam equivalent to requirements for entrance to math, successful completion of algebra program in mathematics learning center, or any mathematics course that fulfills university's general education requirement in quantitative reasoning; and permission of instructor.

Notes
May be taken even after credit for MATH 106 or equivalent has been received. Enrollment in NCLC 395 Experiential Learning is optional for at least 1 credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 334 - Environmental Justice

Credits: 4
Examines historical and contemporary sociopolitical and socioeconomic conditions that have given rise to the environmental justice movement. Analyzes how individuals contribute to environmental justice or injustice through everyday decisions. Considers how environmental justice movement responds to these issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 335 - Ethics, Communication, and Freedom

Credits: 3-6
Students examine ethical principles, discuss some underlying bases for these principles, and work to understand how such principles are experienced and can be applied in a free society. Focus is on examining potential conflicts between ethics and the freedoms believed essential to a healthy democratic society. Cases drawn from sports, medicine, media, politics, and business.
Prerequisites
Sophomore standing and 3 credits each of communication and philosophy; or permission of instructor.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 340 - Progress: Can America Figure Out What It Means?

Credits: 3-6
Explores our land, the built and the left natural, as valued and sacred. Challenges students as developers and environmentalists, as citizens and business persons, to strive for a win-win scenario.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 341 - Progress: Washington, the New Edge City?

Credits: 6
NCLC 340 investigates how the city, both the good parts and the bad parts, came to be. This course investigates what we might do about the situation. Requires active engagement of the students in research and discussion. Collective field work and class field trips both semesters.

Notes
Students may take either Part I or Part II of this course but are encouraged to take both.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 343 - Interactive Digital Texts

Credits: 3
Writing-intensive course devoted to critical reading of new media texts and creation of technology-enriched texts in a variety of rhetorical genres targeted to specific audiences. Includes analysis of text embedded within technology-enhanced writing and that which surrounds this emerging medium. Critical reading and interpretive skills, historical and theoretical contexts for development of contemporary textual media. Allows students to explore critically such genres and gain command of a new rhetorical field for academic, educational, informational, technical, and business communication.

Equivalent to ENGL 343

Prerequisites
English 101 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NCLC 345 - Introduction to Multimedia

Credits: 5
Technological, aesthetic, and educational issues of using interactive multimedia. Topics include theoretical underpinnings of some technological issues involved in multimedia computing as well as techniques for authoring interactive multimedia projects using a variety of digital media tools.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

NCLC 346 - Art as Social Action

Credits: 4
This learning community explores historical records to understand different ways art has been produced, distributed, and consumed. Examines ways artists have affected change in their worlds. Through interdisciplinary studies, teaches major social movements and artists and theories used in socially engaged art. Students engage in experiential learning outside classroom as course requirement.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 347 - Gender Representation in Popular Culture

Credits: 3-6
Explores the way in which masculinity and femininity have been represented across the decades in television, movies, music videos, pop art, and print media. Provides a review of the scholarship on the historical and contemporary roles of women and men in society, and examines the contradictions and expectations associated with gender roles. Incorporates active group learning through creative, insight-oriented exercises, critical thinking and discussions, and group presentations and media research activities.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 348 - Information in the Digital Age

Credits: 6
Examines how purpose and function relate to form and how digital material can attract or hinder audience responsiveness. Unique concerns of copyright, security, and privacy in a digital environment are considered. By looking at significant social, cultural, ethical, business, and economic consequences of the digital age, students gain hands-on experience in working with and assessing digital information.

Prerequisites
NCLC 249.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
NCLC 349 - Writing for Multimedia

Credits: 4
Looks at how literary traditions of 20th century meet the cybercultures of 21st century. Workshop course exploring writing tasks facing multimedia professional, whether as a concept and storywriter, a producer, or a hands-on creator of multimedia presentations and narratives. Students practice creative and project-focused writing. Scripting interactivity is a key component of both kinds of multimedia writing; class time is spent working on the skills and concepts needed to creatively communicate interactively.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 350 - Cyberculture

Credits: 6
Research and write reports about ethical, social, educational, and cultural dynamics of online communities. Students examine who forms and has access to these communities, various types of communities, how people represent themselves online, electronic mediums they use, how technology shapes human interactions, and vice versa. Extensive online discussion component; students post their work on the web. Student groups create a cyberculture web site as the final project.

Prerequisites
NCLC 249, or permission of instructor.

Notes
Students expected to know basic web publishing.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 355 - Consciousness, Meaning and Life Purpose

Credits: 3
Examines scientific evidence about states of consciousness, providing opportunities for experiences and reflections about the personal impact of states of consciousness on how we find meaningful direction for using our talents. Includes the theory and practice of mindfulness and mediation; finding meaning in dreams; the stress-reduction and creativity-enhancement effects of visualization; and traditions of vision-questing about personal meaning and life purpose.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

NCLC 360 - The Built Environment

Credits: 6
Examines, records, and interprets objects, structures, and landscapes that compose our built environment. Draws on the fields of
historical archaeology, architectural history, and urban geography, and employs photography, cartography, and evocative writing to represent the material world we inhabit. Builds on study of one neighborhood in Arlington, Virginia, and expands to entire metropolitan area.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 361 - Neighborhood, Community, and Identity

Credits: 3-6
Examines processes of neighborhood formation and transformation in the context of urbanism, suburbanism, immigration, and transmigration. Students explore the history and meaning of neighborhoods in the Northern Virginia and the Washington, D.C., metropolitan area.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 365 - Independent Study

Credits: 1-12
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor) Students are encouraged to work as a team on a particular topic.

Prerequisites
Permission of instructor and dean.

Notes
Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 375 - Special Topics

Credits: 1-18
Studies topics of special interest to undergraduates.

Notes
May be repeated for credit if subtitle is different.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 378 - Medicine, Justice, and Public Policy
Credits: 3
Explores formation of public policy relating to several key issues in medicine. Students examine basic theories of justice and public policy formation and apply these to contemporary issues in the field of medicine. The goal is to examine how current policy on these issues was established and to give examples of major stakeholders in the debate. This course involves some traditional lecture and discussion classes and also features participative learning through group work and web-based discussions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 379 - Cancer and Its Social Impact

Credits: 4
Introduces epidemiology and biological basis for treatment and prevention of cancer. Students consider the social impact of cancer by looking at how patients and families cope with the disease. A portion of the learning community focuses on working with and learning from people living with cancer. Designed for biology and premedicine students as well as nonscience majors interested in connecting the physiology of health and disease to the human spirit.

Prerequisites
60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 381 - When Cultural Worlds Collide

Credits: 6
Explores what happens when "civilization" encounters "the jungle" by reading, writing, discussing, and viewing written and filmed works dealing with contacts between cultures with colliding world views. Literature (from Conrad's The Heart of Darkness to Shakespeare's The Tempest to Burrough's Tarzan), news articles, radio broadcasts, web home pages, art exhibits, and many film and video presentations provide the basis for in-class and out-of-class activities.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 390 - Internship

Credits: 1-6
Internship credit may be applied to 12 credits required in experiential learning.

Prerequisites
Sophomore standing and permission of instructor.

Notes
Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career
NCLC 391 - Introduction to Integrative Studies

Credits: 3
Describes key components of the Integrative Studies Program in New Century College. Students prepare for active participation as a community of learners to develop skills in reflective learning and self-assessment, and identify areas of intellectual and professional interests, values and skills so that students may take greater advantage of opportunities in NCC. As a learning community, this course fosters group collaboration, intensive writing, and reflective learning.

Notes
Students may not enroll in this course after completing 12 or more learning community credits or simultaneously with or after completing NCLC 491.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 394 - Service-Learning Experience

Credits: 1-15
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 395 - Field-Based Work

Credits: 1-18
Directed field studies in topic not otherwise available to students.

Notes
Topics vary, but entire course or significant component is located off campus. In addition to field work, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 396 - Teaching Assistant Experience
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as Technology Assistants, Writing Tutors, and Residence Advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

### NCLC 397 - Add-On Experiential Learning

Credits: 1-3  
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

**Prerequisites**  
Must be enrolled in a learning community or experiential learning class to add this additional credit.

**Notes**  
May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

**Hours of Lecture or Seminar per week:** 1-3  
**Hours of Lab or Studio per week:** 0

### NCLC 398 - Field-Based Work

Credits: 1-15  
Experiential-based individualized studies, mentored by instructor.

**Notes**  
Topics decided by student and instructor and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

**Hours of Lecture or Seminar per week:** 1-15  
**Hours of Lab or Studio per week:** 0

### NCLC 399 - Study Abroad

Credits: 1-6  
Intended for participation in formally organized course offered by Center for Global Education.

**Hours of Lecture or Seminar per week:** 1-6  
**When Offered:** Fall, Summer, Spring
NCLC 400 - Temptress: Constructs of Sex and Power

Credits: 3
Examines the portrayal of powerful and/or sexual women throughout history, identifying famous historical "temptresses" and investigating the facts known about them. Explores representations and perceptions of contemporary female sexuality, considering possible future concepts and images of female power and sexuality.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 401 - Conservation Biology

Credits: 6
Provides students with a working knowledge of conservation biology. Integrates the study of social, economic, and political factors with biodiversity, population modeling, habitat degradation, and management issues. Students confront the leading edge of this exciting field by developing real species conservation plans. The experiential learning component of the course will include trips to the Smithsonian Institution's Conservation and Research Center in Front Royal, Virginia, to study with nationally known experts.

Prerequisites
Junior standing. or permission of instructor.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 404 - Ethics and Leadership

Credits: 4
Studies the relationship between ethics and leadership from a wide range of disciplines, fields, and professions. Explore such questions as, Is ethical leadership desirable and necessary? What is the responsibility of leaders to establish ethical climates in their organizations and communities? What are the tensions between ethics and leadership?

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NCLC 405 - Women and Leadership

Credits: 4
Examines leadership within the context of the theoretical principles of women's studies through discussion of course texts, interactive exercises, field trips, documentary films, guest speakers, and reflection. Investigates the role that gender plays in the various forms of leadership and leadership styles. Explores the historical record of women in leadership roles, identifying the barriers as well as the opportunities.
**NCLC 410 - Contemporary Health Issues**

Credits: 3-18
Looks at a variety of health and health care issues. Examines several of the major health concerns of women and, to a lesser degree, men. Also explores the biology and medical implications of these diseases and how our society deals with potential life-altering information. Examines who is making the decisions on the allocation of research funds and prevention of diseases.

**Hours of Lecture or Seminar per week:** 3-15
**Hours of Lab or Studio per week:** 0

**NCLC 415 - Perspectives on Science and Society**

Credits: 1
Capstone course for the interdisciplinary minor in science and society. Helps students integrate material from their individualized core of courses and make explicit connections among the various disciplines. Provides opportunity for students to share their experiences, expanding their breadth of knowledge in this important and timely area of study.

**Prerequisites**
NCLC 215 and completion of 17 credits toward the minor in science and society.

**Hours of Lecture or Seminar per week:** 1

**NCLC 416 - Refugee and Internal Displacement**

Credits: 3
Provides students with a deeper understanding of refugee and internal displacement. Explores causes of displacement and its impact on people and societies. Studies the role played by governments, non-governmental organizations (NGOs) and the international community in addressing problems faced by refugees in internally displaced persons in terms of relief assistance and humanitarian services.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**NCLC 420 - Work Effectiveness Skills**

Credits: 3
Develops a variety of work-readiness skills needed to become successful in both local and global marketplaces. Topics and skills covered include communication, problem solving in the business setting, workplace ethics, listening skills, how to influence others, building team project rapport, and meeting effectiveness skills.
NCLC 422 - An Experiential Approach to American Foreign Policy

Credits: 3-6
Takes an experiential approach to the study of American foreign policy. Through case studies, discussions, group projects, and directed research, students learn how foreign policy is made and executed and how they as citizens, activists, or officials can influence national decisions.

Hours of Lecture or Seminar per week: 3-6
Hours of Lab or Studio per week: 0

NCLC 423 - Management in the Global Marketplace

Credits: 6
Experiential approach to the study of global management and organizational behavior. Through exercises, case studies, discussions, group projects, and individual research and essays, students learn the principles of effective management as they apply to modern global organizations, whether public, private, or nonprofit.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

NCLC 431 - Principles of Fund Raising

Credits: 4
Examines history of philanthropy and public policy, and the economic and legal frameworks that shape it. Combining theory and practice, students study human behavior, communications, and management systems that are hallmarks of successful fund raising, and begin to develop skills to generate donations, foundation grants, and other unearned revenue for a nonprofit organization.

Prerequisites
NCLC 331.

Notes
Includes 1 experiential learning credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 435 - Leadership in a Changing Environment

Credits: 4
Explores the basic framework for change management. It examines leadership styles focusing on historical, philosophical, and
industrial examples, as well as personal change stories. Students learn about the diverse nature of leadership, explore historical perspectives on leadership, and interview business and community leaders to understand strategies for change.

**Prerequisites**
60 credits.

**NCLC 440 - Death, Dying, and Decision Making**

Credits: 3
Interdisciplinary examination of clinical care of dying persons along with psychosocial issues related to processes of death and dying. Special emphasis on application of ethical principles in resolving complex problems for individuals with life-threatening illnesses and their families as care givers or decision makers. Students consider the changing norms and mores surrounding end-of-life decisions and explore the care available to terminally ill patients.

**Prerequisites**
60 credits, or permission of instructor

**NCLC 445 - Multimedia Design**

Credits: 5
Technological, aesthetic, and educational issues of using interactive multimedia. Topics include theory and practice, integration of digital media, interface and navigation studies, and technical constraints on design.

**Prerequisites**
NCLC 345, or permission of instructor.

**NCLC 446 - Art, Beauty, and Culture**

Credits: 3-6
Designed to help students understand the culture- and time-bound nature of beauty as it relates to art. Exploration of how the codes of acceptability in art forms have changed over time, with discussion about the subversive nature of art and the role that beauty plays in art that is created to engage the viewer in some type of action. Exercises include research projects, site visits, and gallery attendance.

**Hours of Lecture or Seminar per week:** 3-6
**Hours of Lab or Studio per week:** 0
NCLC 449 - Multimedia Research and Project Development

Credits: 4
Provides a solid background in multimedia research and concept development from a scientific yet practical point of view. Students gain a full understanding of the computer-based principles behind multimedia and appreciate the symbiotic relationship between the two. Students also learn about the life cycle of development for a multimedia application including what constitutes a good idea, usability testing, and copyright issues.

Prerequisites
NCLC 345, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 455 - Consciousness and Transformation in Action

Credits: 3
Covers how principles and practices of consciousness and transformation relate to the major and career pathway it represents. Includes the theory and practices for deepening the student's own experience with the mindfulness and contemplative approaches to inquire. Capstone course for the minor in consciousness and transformation.

Prerequisites
NCLC 355 and 356

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Summer, Spring

NCLC 465 - Independent Study

Credits: 1-12
Individualized section form required. Study of a topic not otherwise available to the student. May involve any combination of reading assignments, tutorials, lectures, papers, presentations, or field/laboratory study (determined in consultation with instructor) Students are encouraged to work as a team on a particular topic.

Prerequisites
Permission of instructor and dean.

Notes
Maximum 12 credits can be used to fulfill graduation requirements.

Hours of Lecture or Seminar per week: 1-12
Hours of Lab or Studio per week: 1-12

NCLC 475 - Special Topics
Credits: 1-18
Studies topics of special interest to undergraduates.

Notes
May be repeated for credit if subtitle is different.

Hours of Lecture or Seminar per week: 3-15
Hours of Lab or Studio per week: 0

NCLC 490 - Internship

Credits: 1-6
Internship credit may be applied to 12 credits required in experiential learning.

Prerequisites
Sophomore standing and permission of instructor.

Notes
Students may take no more than 6 credits in any one semester, unless approved by director of experiential learning or associate dean. Structured and supervised professional experience, within an approved agency, for which the student earns academic credit. The primary purpose of an internship is to connect the student's academic course work to experiences and challenges outside the university classroom. The faculty also expects that students will enhance their competencies and skills and explore career options.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1-6

NCLC 491 - The Senior Capstone Experience

Credits: 3
Should be taken semester before graduation; 85 credits required. Graduation requirement for integrative studies students. Students complete final NCC portfolio and senior exposition. Provides information on issues of professional development (interviewing skills, resume development, career strategies, and alumni opportunities).

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NCLC 492 - Graduation Portfolio

Credits: 0

NCLC 493 - Graduation Portfolio

Credits: 0
NCLC 494 - Service-Learning Experience

Credits: 1-15
Service-learning courses offer students, faculty, and community partners an opportunity to work together to integrate and apply knowledge to address community needs. Learning goals, action strategies, and assignments developed collaboratively. Students demonstrate progress through critical reflection that illustrates growth in acquiring and comprehending values, skills, and knowledge content. Critical reflection may take the form of papers, presentations, portfolios, journals, and exams.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 495 - Field-Based Work

Credits: 1-18
Directed field studies in topic not otherwise available to students.

Notes
Topics vary, but entire course or significant component is located off campus. In addition to field work, course may also include reading assignments, tutorials, lectures, papers, presentations, portfolios, journals, and exams. Students bear costs of required field trips and should consult Center for Field Studies for more information.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 496 - Teaching Assistant Experience

Credits: 1-6
Teaching assistantship and peer-mentoring duties carried out through existing university programs, such as technology assistants, writing tutors, and residence advisors. Also includes teaching assistantship arrangements for specific courses detailed in individualized course contract signed by instructor and student. In addition to peer mentoring/advising, course work may include logistical support, reading assignments, papers, presentations, and portfolios.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

NCLC 497 - Add-On Experiential Learning

Credits: 1-3
For students who wish to add one or more experiential learning credit to existing experiential learning course or learning community.

Prerequisites
Must be enrolled in a learning community or experiential learning class to add this additional credit.
Notes
May also be used by students who wish to add an experiential learning component to course that provides no experiential learning credit (with permission of instructor). Unless experiential learning add-on requirements are spelled out in course syllabus, requirements for add-on experiential learning credit must be detailed in individualized course contract signed by instructor and student.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

NCLC 498 - Field-Based Work

Credits: 1-15
Experiential-based individualized studies, mentored by instructor.

Notes
Topics decided by student and instructor and approved by associate dean. Requirements must be detailed in individualized course contract signed by student, instructor, and associate dean. May include reading assignments, papers, journals, and portfolios.

Hours of Lecture or Seminar per week: 1-15
Hours of Lab or Studio per week: 0

NCLC 510 - Institutional Records Keeping

Credits: 3
Explores theory and mechanics of animal records keeping at zoological and aquarium institutions and how AZA, ISIS, SSPs®, TAGs, PMPs, WCMC, studbooks, and animal records collected in the ISIS database combine forces to manage captive populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 511 - Career Development

Credits: 3
Focuses on traditional and industry-specific nonprofit management topics ranging from marketing to education. It is one of a series of three management courses for MAIS ZAL students.

Prerequisites
PUAD 505 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 512 - Organizational Development
Credits: 3
Covers traditional zoo and aquarium organization topics, strategic planning, human resources, leadership styles, crisis management, and personal ethics. It is one of a series of three management courses for MAIS ZAL students.

Prerequisites
NCLC 511

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 513 - Population Management I: Data Acquisition and Processing

Credits: 3
Teaches students to use SPARKS software and collect, process, and enter data into the studbook computer software program to manage captive populations in zoos and aquariums. Introduces principles of captive population management and genetics.

Prerequisites
Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 514 - Population Management II: Data Analysis and Breeding Recommendations

Credits: 3
Educates students to be competent population managers with the ability to manage the genetic health of captive populations in zoos and aquariums.

Prerequisites
NCLC 513

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 520 - Conservation Education

Credits: 3
 Provides students with a comprehensive view of best practice and an understanding of pedagogical reform necessary to provide excellence in modern zoo and aquarium education. Focuses on public education and K-12 program development.

Prerequisites
Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1
NCLC 522 - Developing an Institutional In Situ Conservation Strategy

Credits: 3
Educates students about the process and disciplines necessary to facilitate the professional development of an institutional in situ conservation strategy. Teaches students key components of a successful institutional conservation strategy. Presents model for strategy development that can be used as a guide to develop institutionally specific strategies.

Prerequisites
Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 523 - Managing Animal Enrichment and Training Programs

Credits: 3
Focuses on the study of animal behavior, exhibit enrichment, training, and animal welfare in modern zoos and aquariums. Topics include history, philosophy, and theory of animal welfare and husbandry planning.

Prerequisites
Admission to MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 531 - Principles of Elephant Management

Credits: 3
Train students to be competent elephant managers through understanding and application of behavioral science, reproductive physiology, population genetics, and conflict resolution.

Prerequisites
Admission to the MAIS ZAL program or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NCLC 595 - Experiential Learning

Credits: 1-3

NCLC 625 - Online Library Research for the Zoo and Aquarium Professional
Credits: 3
Examines technologies such as full-text databases, open access publishing, and websites. Develops an understanding of expectations of the scientific method and ethical conduct among zoo and aquarium professionals. Covers case studies of appropriate conduct including peer review, allocation of credit, animal welfare, and conservation education. Students review cases, conduct independent research, and draw on their own professional experiences to demonstrate an understanding of appropriate process and moral behavior.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Nursing

NURS 305 - Application of Basic Nursing Techniques

Credits: 1
To be taken fall semester of accelerated second degree program. Introduces basic nursing technologies, and provides opportunities to apply these skills in simulated technology lab.

Prerequisites
Acceptance into accelerated second degree pathway.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

NURS 309 - Introduction to Basic Nursing Care

Credits: 3
Enrollment restricted to second-degree students only. Introduces basic fundamentals of nursing care across the life span. Emphasis on nursing process, critical thinking, and foundational technologies and skills required to practice in the health care setting.

Corequisite
NURS 310

Notes
Enrollment restricted to second-degree students only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 310 - Application of Basic Nursing Care
Credits: 3
Application of basic nursing care in acute care settings utilizing the nursing process.

Prerequisites
Acceptance into accelerated second degree program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 9

NURS 319 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups

Credits: 4
Focuses on pathophysiological, psychological, sociocultural, and risk-reduction factors related to nursing care for clients with psychiatric conditions, as well as for child-bearing women, infants, children, and adolescents with acute health care needs.

Prerequisites
Acceptance into second degree program.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NURS 330 - Nursing Fundamentals

Credits: 3
Introduces nursing process and communication skills as the foundation for beginning health assessment and fundamental nursing care for culturally diverse individuals throughout the life span.

Prerequisites
Junior standing.

Corequisite
NURS 331.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 331 - Nursing as a Process for Health Practicum

Credits: 2
Opportunity to practice health assessment and fundamental nursing technologies while using communication skills with culturally diverse and vulnerable populations in a variety of settings.

Prerequisites
NURS 330

Corequisite
NURS 330

Notes
Includes agency and campus labs.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
When Offered: Fall

NURS 332 - Concepts of Health Promotion and Disease Prevention throughout the Lifespan

Credits: 3
Introduces epidemiology, health promotion, and disease prevention; and the impact on health status of culturally diverse and vulnerable individuals, families, small groups, and communities. Focuses on health problems and potential interventions throughout life span, and incorporates principles of teaching, learning as they apply to nursing.

Prerequisites
Junior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 334 - Nursing as a Health Profession and Discipline

Credits: 3
Introduces nursing as a dynamic and caring health profession, the impact of epidemiology, health promotion, and disease prevention on health status of culturally diverse and vulnerable individuals, families, small groups, and communities throughout life span. Incorporates nursing and critical thinking processes as they apply to the art and science of nursing. Historical perspectives on ethical, legal, political, and social issues are included.

Prerequisites
Open only to RNs, LPNs, and second-degree students

Corequisite
NURS 309 and 310 for second-degree students only.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

NURS 337 - Applied Nursing Fundamentals and Health Assessment

Credits: 1
Opportunity to practice health assessment and fundamental nursing technologies while using communication skills with culturally diverse and vulnerable populations in a variety of settings.
Prerequisites
Junior standing.

Corequisite
NURS 330 and 331

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

NURS 343 - Pharmacology

Credits: 3
Covers principles of pharmacokinetics, pharmadynamics of selected drug classifications, and nursing responsibilities related to drug administration to individuals throughout life span.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 344 - Intermediate Nursing Technologies

Credits: 1
Laboratory course to assist students in acquiring therapeutic nursing interventions. Technologies presented are asepsis and wound care, administration of medications including dosage calculations, and management of intravenous therapy.

Prerequisites
Successful completion of NURS 330, 331, 332, and 333

Corequisite
NURS 341.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2
When Offered: Spring

NURS 345 - Nursing of Clients in an Acute-Care Setting

Credits: 5
Concentrated clinical course in an acute-care setting. Opportunity to provide collaborative nursing care to culturally diverse adults experiencing acute or chronic health problems.

Prerequisites
Successful completion of fall and spring junior nursing courses

Corequisite
NURS 346

Hours of Lecture or Seminar per week: 0
NURS 346 - Case Studies in Medical Surgical Nursing

Credits: 1
Meets every week for two hours. Explores in-depth nursing care related to culturally diverse adults experiencing acute and chronic health problems. Uses case presentations dealing with adult family members with health problems.

Corequisite
NURS 345.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
When Offered: Summer

NURS 347 - Adult Pathophysiology and Nursing Care

Credits: 2
Introduces changing health needs of culturally diverse and vulnerable populations. Focuses on nursing care; and pathophysiological, psychological, sociocultural, and risk reduction implications of frequently experienced health problems in the adult population.

Prerequisites
Acceptance into junior standing.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 348 - Maternal-Newborn Physiology, Pathophysiology, and Nursing Care

Credits: 2
Introduces normal and abnormal processes with maternal-infant clients including cultural diversity and vulnerable populations. Focuses on normal physiological, pathophysiological, psychological, sociocultural, risk reduction, and nursing care of these clients.

Prerequisites
Acceptance into junior standing.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 349 - Pediatric Pathophysiology and Nursing Care
Credits: 2
Focuses on changing health needs of culturally diverse and vulnerable populations. Includes nursing care, pathophysiological, psychological, sociocultural, and risk-reduction implications of frequently experienced health problems in pediatric population.

Prerequisites
Acceptance into junior standing.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 350 - Application of Nursing Care for Individuals and Small Groups

Credits: 5
Includes five weeks of clinical experience in each specialty area, with focus on obstetric and family nursing, pediatric, and psychiatric mental health nursing. Students may also follow selected clients in clinics or home situations. Clinical consists of two full days per week in acute-care agencies.

Prerequisites
NURS 334, 305, 309, 310, 319, and 425

Corequisite
NURS 351, 419, and 353.

Notes
Open to accelerated second degree students

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 15

NURS 351 - Application of Intermediate Nursing Technologies

Credits: 1
Introduces intermediate nursing technologies and provides opportunities to apply these skills in simulated technology lab.

Prerequisites
NURS 309, 310, 319, 334, 425

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

NURS 357 - Health Promotion and Disease Prevention in Medical/Surgical Nursing

Credits: 2
Provides the student an opportunity to perform nursing care to medical surgical clients, including those who are culturally diverse and vulnerable and experiencing physiological, psychological, and social health problems in a variety of settings.

Prerequisites
NURS 347

Corequisite
NURS 347

Notes
Enrollment is controlled.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

NURS 358 - Health Promotion and Disease Prevention in Maternal/Infant Nursing

Credits: 2
Provides the student an opportunity to perform nursing care to the maternal/infant client, including those who are culturally diverse and vulnerable, and experiencing physiological, psychological, and social health problems in a variety of settings.

Prerequisites
NURS 348

Corequisite
NURS 348

Notes
Enrollment is controlled.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

NURS 359 - Health Promotion and Disease Prevention in Pediatric Nursing

Credits: 2
 Provides the student an opportunity to perform nursing care to the pediatric client, including those who are culturally diverse and vulnerable, and experiencing physiological, psychological, and social health problems in a variety of settings.

Prerequisites
NURS 349

Corequisite
NURS 349

Notes
Enrollment is controlled.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6
**NURS 388 - Problem-Based Clinical Inquiry**

Credits: 3  
Focuses on analyzing clinical problems and attempts to resolve issues using critical thinking. Students examine the data in the cases, draw inferences, make deductions, identify assumptions, generate interpretations, evaluate weakness and strengths of arguments, and document their findings.

**Prerequisites**  
Completion of NURS 425, 330, 331, 332, 337, and one junior-level clinical course (NURS 357, 358, or 359)

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**NURS 410 - Nursing Care of Clients with Pathological Conditions**

Credits: 3  
Encompasses complex health problems of culturally diverse and vulnerable populations throughout the life span. Focuses on nursing care needs and pathophysiological, psychological, and sociocultural implications of complicated health problems.

**Prerequisites**  
Completion of all junior year nursing courses

**Corequisite**  
Completion of computer NCLEX review required to fulfill course requirements

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**When Offered:** Fall

**NURS 419 - Pathophysiological Basis for Nursing Care of Individuals and Small Groups II**

Credits: 3  
Enrollment restricted to second degree students only. Focuses on pathophysiological, psychological, sociocultural, and risk reduction factors related to nursing care of child-bearing women, infants, children, and adolescents experiencing acute health care problems.

**Prerequisites**  
Completion of NURS 305, 309, 310, 319, and 334.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**NURS 425 - Comprehensive Health Assessment**

Credits: 3  
Open only to RNs and LPNs. Introduces systematic health assessment across the life span, and expands that knowledge base to
include knowledge and skills necessary to perform comprehensive health assessments with culturally diverse and vulnerable populations.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Spring

**NURS 427 - Advanced Technologies for the Accelerated Pathway**

Credits: 1
Advanced technology course developing knowledge base related to acquisition of advanced skills in nursing practice. Refinement of assessment skills associated with selected advanced technologies integrated into this laboratory course.

Prerequisites
NURS 310 and 343.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2

**NURS 428 - Community Health Clinical for the Accelerated Pathway**

Credits: 2
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis on health promotion and disease prevention for well populations, and community-based care for individuals and families with acute and chronic illness.

Prerequisites
NURS 436 and 440.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

**NURS 429 - Preceptorship for the Accelerated Pathway**

Credits: 3
Opportunity to deliver collaborative nursing care to culturally diverse and vulnerable populations.

Prerequisites
NURS 309, 310, 320, 343, 419, and 436.

Notes
Concentrated clinical experiences available in selected institutional settings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 9
NURS 434 - Vulnerable Populations

Credits: 3
Focuses on the care of vulnerable and aging populations. Students will examine health disparities, health literacy, and multicultural issues that impact the delivery of health care. Students will analyze health care policies and health care delivery models that offer potential interventions for the identified needs of these populations.

Prerequisites
Completion of General Education requirements.

Corequisite
Completion of NURS 334 as pre or co-requisite.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring

NURS 436 - Leadership and Management of Health Care

Credits: 3
Introductory course in the leadership and management of health-related organizations. Reviews administrative issues in health-related services with particular emphasis on developing organizational strategies for effective interfacing of medical, nursing, allied health, and administrative staff.

Prerequisites
Completion of all junior year nursing courses

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

NURS 440 - Community Health and Epidemiology

Credits: 3
Addresses population-focused health care. Emphasis is on primary, secondary, and tertiary prevention of health problems. Concepts of community, public health, and health policy affecting culturally diverse and vulnerable populations are examined.

Prerequisites
Senior standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

NURS 451 - Advanced Clinical Preceptorship
Credits: 5
Opportunity to provide complex, collaborative nursing care to culturally diverse and vulnerable populations.

Notes
Concentrated clinicals available in selected institutional settings.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 15
When Offered: Fall, Spring

NURS 453 - Research in Nursing

Credits: 3
Introductory research course designed to present basic concepts and methods of research. The research process is examined as a foundation for scholarship. Emphasis on critique and use of current nursing and research in clinical practice.

Prerequisites
Statistics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 455 - Advanced Technologies in Nursing

Credits: 2
Opportunity to acquire advanced skills in nursing practice. Refinement of assessment skills associated with selected advanced technologies integrated into this laboratory course.

Corequisite
NURS 451.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 4

NURS 457 - Introduction to Nursing Informatics

Credits: 3
This introductory course focuses on the use of computer technology in nursing and healthcare. The student evaluates software applications and assesses the merit of health-related information on the Internet. Students will engage in projects aimed at solving patient care problems in a variety of technologically-enhanced health care settings.

Corequisite
Senior year

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Summer, Spring
**NURS 466 - Community Health Nursing**

Credits: 2  
This course addresses population-focused health care. Concepts of public health, epidemiology, environmental health, extended roles in nursing and health policy affecting culturally diverse and vulnerable populations are examined.

**Prerequisites**  
Completion of all junior year nursing courses

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**NURS 467 - Clinical in Community Health Nursing**

Credits: 2  
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis is on health promotion and disease prevention for well populations and community-based care for individuals and families with acute chronic diseases.

**Prerequisites**  
NURS 410, 436, 466

**Corequisite**  
NURS 442, 466

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 6

---

**NURS 468 - Psychiatric and Mental Health Nursing**

Credits: 2  
Focuses on the nursing care, pathophysiological and psychological, social-cultural, and risk reduction implications of health problems in the area of mental health and psychiatric nursing.

**Prerequisites**  
Completion of all junior year nursing courses

**Notes**  
Open to traditional and LPN students only.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**NURS 469 - Clinical in Psychiatric and Mental Health Nursing**
Clinical experience with a focus on collaborative nursing care with individuals, families, and large groups in the community. Emphasis is on health promotion and disease prevention for well populations and community-based care for individuals and families with acute chronic diseases.

**Prerequisites**
NURS 410, 436

**Corequisite**
NURS 442, 468

**Notes**
Open to traditional and LPN students only.

**NURS 475 - Grand Rounds Complex Case Presentations**

Credits: 3
Examines nursing implications of selected major health problems that significantly affect individuals throughout the life span. Focus is on complex health problems. Class meets once a week in the format of group presentations in the clinical setting.

**Prerequisites**
NURS 254, 262, 318, 319, 320, 419, 426, 430, 450, and 455.

**Notes**
Enrollment restricted to second degree students only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Summer

**NURS 487 - Principles, Concepts, and Techniques of Operating Room Nursing**

Credits: 3
Prepares the registered nurse in basic principles and skills of operating room nursing. Learning environment is provided for registered nurse with no previous operating room experience to apply fundamental skills and knowledge of operating room nursing in clinical practice. Based on the Association of Operating Room Nurses Standards and Recommended Practices and Guidelines.

**Prerequisites**
RN licensure, one year clinical experience, and letter of acceptance to six-month operating room clinical preceptorship.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
NURS 488 - Inquiry-Based Clinical Seminar

Credits: 2
Students focus on a selected client they have provided care for during their NURS 451 clinical preceptorship. Students examine the data in the case, draw inferences, make deductions, identify assumptions, and generate interpretations regarding the client’s problems. The class will participate as a group in the inquiry process to identify strengths and weaknesses of the arguments presented.

Prerequisites
Completion of junior-level nursing courses, NURS 410 and NURS 436

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 491 - Critical Thinking and Analysis of Test Taking Strategies

Credits: 2
Increases test-taking abilities and improves critical-thinking skills related to nursing situations. Also guides the student to analyze and organize content to assist in decision making about nursing interventions. With faculty supervision, students work independently based on their learning needs.

Prerequisites

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 492 - Death, Dying, and Decision Making

Credits: 3
Interdisciplinary examination and analysis of clinical care of dying and psychosocial issues related to death and dying. Special emphasis on applying ethical principles in resolution of complex problems for individuals with life-threatening illnesses and their families as caregivers or decision makers. Decision-maker models provide basis for clinical case discussions. Questions of futility examined with associated care issues. Current professional and lay literature discussed in context of socially changing norms and mores. Explores hospice and alternative palliative care models, and reviews policies, laws, and regulations that affect caregivers and health service providers. Includes advance directives, do-not-resuscitate orders, and assisted suicide. Presents bereavement as part of death, dying, and grieving process.

Notes
Lecture-discussion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 495 - Directed Reading in Nursing
Credits: 1-2
Examines literature on specialized topic in nursing practice, education, or scholarship. Readings conducted in consultation with faculty.

Prerequisites
Senior status or permission of school.

Notes
May be repeated for a maximum of 4 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

NURS 496 - Violence in Today's Society

Credits: 3
Examines magnitude of problem of violence globally and more specifically within the United States. Discussion and reflective activities engage students in the learning process.

Equivalent to GCH 496

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 499 - Independent Study in Nursing

Credits: 1-3
Provides individual study of a particular problem area in nursing research, theory development, or education under the direction of faculty. Clinical practice may be arranged.

Prerequisites
Permission of college.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

NURS 505 - Case Management

Credits: 3
Open to seniors. Survey course on state of case management programs and practice for health and human service professionals. Special emphasis on comparing the nature, process, and outcomes for baccalaureate and graduate students guided by the objectives.

Prerequisites
Bachelor's degree, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 508 - Psychopharmacology**

Credits: 3
Surveys therapeutic effects and side effect profiles of psychopharmacological drugs including psychotropic and recreational drugs. Emphasizes understanding mechanisms of actions, drug interactions, and subject variables influencing drug effects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 509 - Introduction to Emergency Nursing**

Credits: 3
Introduces emergency-care nursing, focusing on relevant pathophysiological disease processes, diagnostics, medical therapeutics and relevant technology as applied to emergency nursing. Focuses on care of multicultural clients across the life span, as well as the patient-family unit of care. Addresses collaboration and triage, as well as legal, ethical, and psychosocial issues. Course based on core curriculum of the Emergency Nursing Association (ENA)

**Prerequisites**
Admission to graduate program

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 513 - Advanced Pharmacology in Nursing**

Credits: 3
Does not meet requirements for nurse practitioner majors, but may be taken as an elective. Provides knowledge of physiologic responses and pharmacokinetic principles of pharmacologic agents that will undergird the student's learning of advanced pharmacologic concepts. Topics include advanced pharmacokinetic principles, pharmacotherapeutics of single and multiple drug regimens, client education needs, special population needs, and legal requirements for prescriptive authority.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 514 - Advanced Health Assessment Methods**

Credits: 1
Expands on undergraduate skills in systematic health assessment across the life span. Teaches application of advanced health assessment skills in specialty advanced nursing practice setting. Integration of skills and techniques in collecting health
assessment data towards appropriate decision making, clinical assessments, and therapeutic interventions in select population emphasized.

**Prerequisites**
Undergraduate-level health assessment course for degree credit or approved CEU course.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 1

---

**NURS 530 - Nurses as Writers**

Credits: 3  
Focuses on theories and practices related to writing in nursing. Researching, composing, revising, and editing practiced in a variety of writing styles.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 546 - Leadership Strategies in Health Policy**

Credits: 3  
Examines the leadership process from a policy and organizational perspective to expand students' ability to impact the health policy-making process.

Equivalent to GCH 546

**Prerequisites**
Graduate standing or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 550 - Pathophysiologic Bases for Major Health Deviations of Individuals**

Credits: 3  
Examines health deviations occurring in people in the United States that require long-term or terminal health care interventions. Deviations are presented within a developmental framework as they influence physiologic integrity at the cellular level. Focus is on man as a whole, open system. Complex health programs from the perspective of maintaining homeodynamics are examined.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**NURS 556 - Principles of Assessment and Evaluation in Nursing Education**
Credits: 3
Presents techniques of assessment, measurement, and evaluation of nursing knowledge and skills in classroom and clinical settings. Provides opportunities for the informal assessment of learning; formal construction, analysis, and evaluation of tests; and evaluation of standardized tests. Examines the current research and the legal and ethical principles related to assessment and evaluation in nursing education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 557 - Introduction to Clinical Genetics in Health Care

Credits: 3
Focuses on human clinical genetics including basic Mendel genetics; cytogenetics; molecular genetics; genetic disease, diagnosis, testing, and screening. Discusses central principles and impact of Human Genome Project on health care practice in terms of ethical and legal issues, including genetic testing and counseling.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 570 - Cultural Dimension of Aging

Credits: 3
Examines the impact of cultural definitions of aging, research methodologies, and findings of crosscultural studies. Implications for health care and nursing are explored.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Credits: 3
Provides overview of all aspects of HIV disease to include retrospective and current concepts and analyses of the epidemic, global, and societal impact, and cutting-edge research. Examines development of therapeutic tools and skills to educate, reduce risks, control infection, and affect care and healing of client, family, and community; and issues of increasing dilemma for health care professionals.

Equivalent to GCH 571

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 580 - Operating Room - RN First Assistant
Credits: 3
Prepares the experienced operating room nurse to become a registered nurse first assistant. Modeled after the official AORN RNFA core curriculum. Student receives hands-on practice in knot tying and suturing, as well as experience with microscope and endoscopy labs.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**NURS 581 - Operating Room - RN First Assistant Clinical Practicum**

Credits: 3
Practicum course that prepares the RNFA to practice in an expanded clinical nursing role in the operating room. Based on the core curriculum of AORN. Individually designed practicum is taken after completion of NURS 580 to give the experienced operating room nurse 120 hours of practicum experience as a surgical first assistant working under the supervision of a surgeon preceptor.

**Prerequisites**
NURS 580, and operating room nursing experience.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 2

**NURS 585 - Entrepreneurship in Health Care**

Credits: 3
Overview of models of entrepreneurship in health care. Provides opportunities for collaborative problem solving to support business development, entrepreneurial behavior, and leadership. Explores innovative approaches to and alternatives for nursing practice and health care delivery.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**NURS 586 - Parish Nursing I**

Credits: 3
Students must be registered nurses. Introduces parish nursing as a developing specialty practice for professional nurses. Identifies basic skills for ministry in a faith community. Emphasizes scope of practice, various theological concepts for health ministry, and application of assessment skills to the faith community. Examines processes of case consultation and spiritual formation.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**NURS 587 - Parish Nursing II**
Credits: 3
Students must be registered nurses. Focuses on skill development in spiritual assessment, ethical decision making, and effective use of prayer. Emphasizes health promotion, working with volunteers, and utilizing community resources. Self-care and professional identity for the parish nurse are addressed. Students continue the processes of case consultation and spiritual formation.

Prerequisites
NURS 586.

Notes
Students must be registered nurses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 594 - Special Topics in Nursing

Credits: 1-3
Presents selected topics analyzing specialized areas in nursing.

Equivalent to GCH 594/HAP 594

Notes
Content varies. Lecture, seminar, laboratory, workshop.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 595 - RN to MSN Transition: Evidence Based Community Health Nursing

Credits: 3
Initial course in RN to MSN Pathway. Introduces concepts of community health nursing with evidence-based focus. Students apply concepts to selected communities; demonstrate an understanding of health promotion and disease prevention; explore role of master's prepared nurses; and complete 45 hours of clinical practicum to achieve course objectives.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1

NURS 605 - Clinical Nurse Educator Academy

Credits: 3
Integrates knowledge and skills from clinical practice with new knowledge and skills needed as a clinical nurse educator. Narratives are used to teach essential skills for clinical nurse educators, such as assessment of learning needs, writing of objectives, teaching strategies, clinical simulation, and performance evaluation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NURS 611 - Anthropology of Health

Credits: 3
Explores cross-cultural issues of health and illness from medical anthropology theory. Discusses cultural dimensions of developmental cycle and health care systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 613 - Advanced Health Assessment

Credits: 2
The course expands on undergraduate skills in systematic health assessment across the life span. The student will learn advanced health assessment skills in specialty advanced nursing practice. Integration of skills and techniques in collecting health assessment data towards appropriate decision-making, clinical assessments and therapeutic interventions in select populations is emphasized in this lab and didactic course.

Prerequisites
Undergraduate-level Health Assessment course for degree credit.

NURS 618 - Pathophysiology: Health and Illness

Credits: 3
Focuses on the biological and pathophysiological foundations of health problems. Biological changes in selected health problems and health risks, will be used as a framework for critically appraising assessment data and to advance nursing strategies.

NURS 620 - Advanced Psychiatric/Mental Health Nursing

Credits: 3
Build on basic psychiatric and mental health nursing knowledge and skills in assessment, diagnosis, therapeutic intervention, and management. Focuses on enhancing fundamental roles of psychiatric or mental health advanced practice nurse, including practice, teaching, consultation, supervision, and research in relation to clients and their families.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 623 - Clinical Concepts in Community-Oriented Primary Care

Credits: 3
Theoretical and clinical application of community-oriented primary care concepts with focus on health promotion and disease prevention. Examines scope of practice of advanced practice nurse practitioner. Students work with interdisciplinary groups to improve health indicators for populations.
Prerequisites
NURS 680.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

**NURS 630 - Acute Care Nursing for Advanced Practice**

Credits: 3
Focuses on acute-care nursing for advanced practice with individuals and their families diagnosed with potentially life-threatening alterations in health. Emphasizes risk factors, physical symptoms, evidence-based interventions, functional capacity, and patient and family dynamics; and psychosocial, economic, and cultural factors and their impact on care.

Prerequisites
Admission to the graduate program or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 645 - Gerontological Nursing 1**

Credits: 3
Provides content related to nursing care of older adults with emphasis on advanced practice and issues relevant to improved health care of the elderly. Focuses on biological, psychological, and sociocultural elements that influence the aging process, and onset of age-related illnesses.

Prerequisites
NURS 680 and 688.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 646 - Gerontological Nursing 2**

Credits: 3
Builds on content in NURS 645, and focuses on health care deviations and nursing interventions in advanced gerontological nursing practice. Age-related illnesses and common disorders are discussed in the context of health behaviors, healthy adaptation, cultural sensitivity, developing appropriate coping strategies, and family, community and nursing supports.

Prerequisites
NURS 645.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NURS 654 - Nursing Administration Financial Management

Credits: 3
Investigates managerial technologies related to financial planning and control functions of mid-level nurse administrators. Content develops knowledge and skills necessary for effective participation in financial management as related to business plan development, program budget planning, and control.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

NURS 660 - Seminar in the Ethics of Health Care

Credits: 3
Examines moral dilemmas in the health care profession, with special emphasis on patients' rights, professionals' obligations to other professionals, and issues of social justice in health care. Methods of moral deliberation based on ethical knowledge and justification are applied to ethical dilemmas in health care.

Equivalent to PHIL 510

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 662 - Oncology Nursing: Clinical Concepts in Advanced Practice

Credits: 3
Focuses on advanced nursing practice for persons diagnosed with cancer and their families. Emphasizes physical symptoms, functional capacities, psychosocial disruptions, and knowledge deficits. Lecture.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 665 - Theoretical and Ethical Foundations Related to Nursing

Credits: 3
Selected nursing and related discipline theories which impact nursing practice are analyzed and evaluated with special attention given to ethical aspects of practice and ethical decision-making frameworks. Moral dilemmas in the health care profession, with emphasis on patients’ rights, professionals’ obligations to other professionals, issues of social justice in health care, and methods of moral deliberation are examined.

NURS 680 - Theoretical Foundations Related to Nursing

Credits: 2
Examination and evaluation of assumptions, concepts, and propositions inherent in selected nursing and related discipline
theories.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

**NURS 685 - Advanced Nursing Research Methods**

Credits: 3  
Examines principles and methods of research in problem identification, theoretical framework, design, data collection, and analysis. Students develop a nursing research proposal.

**Prerequisites**  
Admission to graduate nursing program and a bivariate statistics course and NURS 680.

**Corequisite**  

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**NURS 686 - Projects in Nursing Research**

Credits: 2  
Applies knowledge gained in NURS 790 to implement research proposal designed in NURS 790.

**Prerequisites**  
NURS 685.

Hours of Lecture or Seminar per week: 2  
Hours of Lab or Studio per week: 0

**NURS 688 - Organization of Nursing and Health Care Delivery Systems**

Credits: 3  
Provides foundational overview of U.S. nursing and health care delivery systems. Surveys key concepts, frameworks, processes, and structures related to health care delivery organizations.

**Prerequisites**

**Notes**  
Lecture, discussion.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
NURS 690 - Independent Study in Nursing

Credits: 1-3
Studies in-depth a selected area of nursing theory, research, or practice under direction of faculty.

Prerequisites
Admission to graduate nursing program, and permission of associate dean for academic programs.

Notes
May be repeated; maximum 6 total credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

NURS 704 - Nursing Administrative Leadership Academy

Credits: 3
Uses a leadership competency framework to integrate knowledge, skills, values, and best practices of innovative nursing leadership. Lectures, interactive collaborative discussion, written projects, and leadership self-assessment identify and teach the proficiencies specific to the administrative executive role.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 715 - Nursing Informatics Inquiry

Credits: 3
This course introduces theoretical and practice components of nursing and healthcare informatics for the graduate level nurse. Computer systems will be analyzed. The systems life cycle will be explored. Health care data standards, classification schemes, and the electronic health record (EHR) will be introduced. Students will evaluate informatics as it applies to patient safety, outcomes measurement, complex decision-making, consumer use, and legal and ethical issues.

NURS 719 - Advanced Health Assessment

Credits: 2
Application of advanced health assessment skills and clinical decision making with adults of all ages in primary care settings. Students formulate differential diagnosis related to body systems and presenting signs and symptoms. Students explore communication techniques related to motivating and changing health behaviors. The performance of skills and techniques needed to collect data for comprehensive health assessment is emphasized in this supervised practicum by nurse practitioner preceptors.

Prerequisites
Admission to a nursing concentration or permission of instructor

Notes
Course is offered through George Washington University and is charged at GWU tuition rates. Course meets at George Washington University. Students receive a Mason bill, but tuition is calculated at the George Washington rate. Contact
NURS 720 - Practicum in Family Primary Care Nursing I

Credits: 4
Performance of beginning-level nurse practitioner clinical decision-making skills in assessment and management of families and individuals across the life span, with emphasis on health maintenance and health promotion. Seminar, lab, and clinical practicum.

Prerequisites
NURS 719, 723, 745, 747, 756.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

NURS 721 - Practicum in Assessment and Management of the Developing Family

Credits: 8
Theoretical and clinical application of health assessment, health maintenance and promotion, anticipatory guidance, diagnosis, and management of common primary health care concerns through clinical decision-making skills focused on childrearing and childbearing families. Seminar, lab, clinical practicum.

Prerequisites
NURS 720.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 15

NURS 722 - Practicum in Family Primary Care Nursing II

Credits: 8
Students perform advanced clinical decision making in the role of family nurse practitioner. Family primary care problems throughout the life span are assessed and managed, particularly families with elderly and medically underserved members. Seminar, lab, and clinical practicum.

Prerequisites
NURS 721.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 5

NURS 723 - Clinical Decision Making
Credits: 2
Course is offered through George Washington University and is charged at GWU tuition rates. Analyzes clinical cases using student participation in decision-making formulation. Correlates pathophysiology with symptom manifestations. Evaluates family, medical, and social history; physical findings; laboratory data; and radiographic studies as they contribute to the decision-making process. The theoretical basis for selecting pharmacological and nonpharmacological therapies is explored. Therapies are justified by examining the evidence to support them.

Corequisite
NURS 756, admission to an NP concentration, or permission of instructor.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 725 - Hermeneutic Research Methodologies in Health Care

Credits: 3
Uses seminar/discussion for in-depth exploration of interpretive phenomenology, philosophical background for hermeneutics, and hermeneutics as method in context of conducting research in health care. Uses readings from philosophers such as Heidegger, Merleau-Ponty, and Gadamer to situate hermeneutical methodologies in philosophy of science.

Prerequisites
Graduate-level qualitative research course

Corequisite
Graduate-level qualitative research course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 726 - Perspectives in Nursing Education

Credits: 3
Uses seminar approach to provide an overview of nursing education. Provides the foundation for teaching and learning in nursing with emphasis on relevant research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 727 - Application of Nursing Education Principles to Curriculum and Program Development

Credits: 3
Uses seminar and discussion forums to analyze and apply theoretical principles and teaching and learning strategies in planning, developing, and evaluating nursing programs. Examines the overall creative, planned, and collaborative process of program development and evaluation.

Prerequisites
NURS 726.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 728 - Practicum and Seminar in Nursing Education I

Credits: 3
Uses seminar/discussion approach and practicum experience to analyze the role and functions of the nurse educator in the academic classroom. Emphasis is on the application of teaching/learning strategies, legal and ethical issues in nursing education, and role development as a nurse educator.

Prerequisites
Admission to graduate nursing program or post-master's status; NURS 726 and 727; NURS 556 or EDRS 531.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

NURS 729 - Practicum and Seminar in Nursing Education II

Credits: 3
Uses seminar/discussion approach and practicum experience to analyze the role and functions of the nurse educator in the clinical setting. Application of research-based teaching and evaluation strategies in the clinical setting are emphasized.

Prerequisites
Admission to graduate nursing program or post-master's status; NURS 727 and 728; NURS 556 or EDRS 531.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 6

NURS 730 - Leadership Strategies for the Clinical Nurse Leader

Credits: 2
Explores aspects of horizontal and vertical leadership central to clinical nurse leader (CNL) role. Emphasizes quality management and improvement, communication processes, evidenced-based practice initiatives in microsystem, and strategies for efficient use of resources while maintaining safe and effective patient care.

Prerequisites
NURS 597 and 685

Corequisite
NURS 597 and 685

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
NURS 731 - Clinical Nurse Leader Role Integration

Credits: 2
Explores roles, functions of clinical nurse leader in microsystem in health care arena. Uses seminar and clinical approaches to develop competence in clinical decision-making, critical thinking, problem identification, and outcome measurement for select client population at point of care.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 6

NURS 732 - Clinical Nurse Leader Practicum

Credits: 7
Guided implementation of clinical nurse leader role in selected health care microsystem. Uses clinical and seminar approaches to acquire in-depth skills related to design, implementation, and evaluation of patient care. Focuses on accountability for coordination, delegation, and supervision of care provided by unit-based health care team.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 21

NURS 733 - Introduction to Forensic Science

Credits: 3
Examines the introductory concepts of forensic science including the various professional roles of forensic scientists and practitioners. This course provides a broad overview of the forensic science profession. Different types of violence, as well as prevention and reduction strategies, are discussed. The forensic professional's role in policy and legal processes are explored. Forensic research is introduced. Professional certification options are explored.

Prerequisites
Admission to a graduate program or extended studies, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 734 - Role of the Sexual Assault Nurse Examiner and Interpersonal Violence

Credits: 3
Focuses on the incidence and consequences of interpersonal violence across the lifespan. Identifies the role of sexual assault nurse examiner (SANE) as a member of the Sexual Assault Response Team (SART). Examines forensic techniques used to collect evidence. The role of the SANE in the judicial process is explored.

Prerequisites
Must be a registered nurse with a valid nursing license; NURS 733 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NURS 735 - Crime Lab and Crime Scene Investigation

Credits: 3
Examines the components of the crime lab and the crime scene analysis process. Explores the role of the forensic scientist in crime scene investigation. This course covers the initial crime scene response and initial assessment measures needed to properly collect and handle evidence. Documentation and preservation efforts are reviewed for various types of evidence collected.

Prerequisites
NURS 733 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 736 - Psychological and Legal Aspects of Forensic Science

Credits: 3
Evaluates the psychological and legal aspects of forensic science. Reviews victimology and the role of the forensic professional when dealing with victimized individuals. This course reviews various types of violence and identifies the assessment criteria needed to pursue prosecution. Examines the legal process and the role of the forensic professional in providing testimony in a court of law.

Prerequisites
NURS 733 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 737 - Investigation of Injury and Death

Credits: 3
Explores the role of the forensic scientist in death investigation. Examines death, manners of death, and causes of death, along with the death certification process. The role of the medical office professional and autopsy procedures will be reviewed. DNA evidence and the CODIS system will be analyzed.

Prerequisites
NURS 733 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 740 - Clinical Nurse Specialist Internship

Credits: 3
A continuation of clinical application of theory from NURS 775 to a selected clinical specialty with attention to the health illness
NURS 745 - Pharmacology

Credits: 3
Describes the pharmacologic principles and pharmacodynamic actions of major classes of drugs. Distinguishes between the major drug classes by the pharmacologic properties of the drugs on the cellular, organ, and whole organism level. Study of indications and contraindications of appropriate therapeutic entities for health deviations is based on a thorough knowledge of drugs including their mechanism of action, possible toxic effects, and their fate in the human body. Evaluation and recognition of drug interactions for the possible impact on each drug's therapeutic behavior, as well as on the body as a whole is emphasized. Chooses and interprets appropriate monitoring mechanisms for drug efficacy and toxicity.

Notes
Course is offered through George Washington University and charged at GWU tuition rates.

NURS 746 - Practicum in Adult Primary Care Nursing I

Credits: 6
Demonstration of the ability to function at a beginning level in the role of the nurse practitioner. Performance of advanced skills in assessment and the development of plans for health maintenance and promotion for adults.

Prerequisites
NURS 719, 723, 745, 747, 756

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 12

NURS 747 - Pharmacology in Disease and Pathophysiology

Credits: 1
Analyze drugs and their interaction with physiologic processes on the cellular level. Discuss the therapeutic actions of drugs in relationship to pathophysiologic states. Recognize those physiologic and pathophysiologic states that have direct consequences on the actions of drugs.

Prerequisites
Permission of instructor.

Corequisite
NURS 719.

Notes
Course is offered through George Washington University and charged at GWU tuition rates.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

NURS 748 - Practicum in Adult Primary Care Nursing II

Credits: 8
Enables nurse practitioner student to assume increased responsibility in the delivery of primary care to adults. Special emphasis on primary care needs of elderly and medically underserved groups.

Prerequisites
NURS 746.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 16

NURS 751 - Primary Care of the Developing Family

Credits: 5
Post-master nurse practitioner course to introduce primary care nurse practitioner to knowledge and skills necessary to practice as a family nurse practitioner. Combines clinical experiences with instructional and informative family content, which focuses on primary care needs of the developing family. Provides theoretical and practical foundation for primary care nurse practitioners to expand their scope of practice to encompass family-based nursing. Participants collaborate with other students in group projects and web-based group discussions. Students broaden their knowledge through clinical experiences and clinical logs.

Prerequisites
National certification as adult nurse practitioner; and graduate-level advanced health assessment, pathophysiology, and pharmacology.

Notes
Taught through George Washington University Distance Learning.

Hours of Lecture or Seminar per week: 5
Hours of Lab or Studio per week: 0

NURS 752 - Advanced Family Primary Care

Credits: 8
Seminar and clinical practicum that focuses on the integration of the family nurse practitioner role through the application of family theory and concepts in primary care settings. Application of advanced critical thinking and decision making of family care needs and family systems is emphasized.

Prerequisites
NURS 751 and 753.

Notes
Taught through George Washington University Distance Learning. For advanced students in the Post Master Advanced Practice Nurse Practitioner Program.

Hours of Lecture or Seminar per week: 8
Hours of Lab or Studio per week: 0

NURS 753 - Diagnosis and Management of the Developing Family

Credits: 4
Didactic and laboratory course focused on primary care needs of families. Integration of advanced health assessment, health maintenance and promotion, anticipatory guidance, and diagnosis and management of common primary care health concerns to advance the knowledge and skills of primary care nurse practitioner needs of family care as provided by family nurse practitioners.

Corequisite
NURS 751.

Notes
Taught through George Washington University Distance Learning. For students in the Post Master Advanced Practice Nurse Practitioner Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 6

NURS 754 - Advanced Adult Primary Care

Credits: 4
Enables the post-master's nurse practitioner student to develop and assume increased responsibility in delivery of primary care to adults. Clinical preceptorship and instructional and informative didactic material in primary care enable students to demonstrate advanced skills in the assessment, clinical diagnostic, and clinical management of common acute and chronic primary care problems. Special emphasis to the development of community-based health promotion and disease prevention strategies with adults and medically underserved populations.

Prerequisites
NURS 719, 723, 745, 747, 756

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 9

NURS 756 - Advanced Pathology and Pathophysiology

Credits: 4
Analyze health deviations in the physiologic and pathophysiologic aspects of systems functioning across the life span. Students assimilate the process of systematic assessment and management of health deviations foundational for making clinical decisions.
Collaborate in interprofessional student groups to develop strategies for health promotion and disease prevention in vulnerable populations.

**Prerequisites**
Students must be enrolled in an NP concentration.

**Corequisite**
NURS 723.

**Notes**
Course is offered through George Washington University and charged at GWU tuition rates.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

---

**NURS 757 - Nursing Research and Biostatistics I**

Credits: 3  
Provides a broad framework for understanding and applying commonly used research designs and data analysis techniques in nursing and health care research. Exposed to an overview of qualitative and quantitative research methods integrated with appropriate data analyses techniques. Univariate and bivariate statistical techniques will be used to address research questions or hypotheses as appropriate.

**Prerequisites**
Admission to the graduate nursing program; Undergraduate Statistics Course

---

**NURS 758 - Nursing Research and Biostatistics II**

Credits: 3  
Empirically address practice related problem using complex bivariate and multivariate statistical analysis. Using an established data set as a basis for simulation of the research process, student will identify clinical problems in research traditions to provide evidence for nursing practice. Emphasis is on evaluating the quality of research for its strength as evidence for nursing practice.

**Prerequisites**
NURS 757

---

**NURS 762 - Managed Care Concepts for Primary Care Practice**

Credits: 1-4  
Presents managed-care concepts specific to primary care practice through self-paced learning modules, seminars, and selected nondirect care internship experiences in managed care settings.

**Prerequisites**
Acceptance into nurse practitioner track, and permission of instructor.

**Hours of Lecture or Seminar per week:** 1-4  
**Hours of Lab or Studio per week:** 3-12
NURS 763 - Administrative Theory in Nursing

Credits: 3
Uses administrative theory and management principles and processes as related to roles and functions of the nurse in management in health-related agencies.

Prerequisites
Admission to graduate nursing program or master's degree. NURS 680 and Management/Organizational Theory

Corequisite
NURS 680 and Management/Organizational Theory

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

NURS 765 - Practicum in Nursing Administration I

Credits: 3
Applies administrative theory and management principles and processes in a selected health-related agency. Roles and functions of the nurse in management are explored.

Prerequisites
Admission to graduate nursing program; NURS 680, 763

Corequisite
NURS 763

Notes
Lab arranged.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 8
When Offered: Fall

NURS 766 - Administrative Strategies in Nursing

Credits: 3
Explores roles and functions of the nurse in management as the nurse manager develops patterns of nursing care, articulating nursing education, and nursing service.

Prerequisites
NURS 763, 765, 766

Corequisite
NURS 766
NURS 768 - Practicum in Nursing Administration II

Credits: 3
Impplements and integrates roles and functions of the nurse in management. Emphasizes using appropriate management principles and processes in a selected health-related agency.

Prerequisites
NURS 763, 765, 766

Corequisite
NURS 766

Notes
Lab arranged.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 8
When Offered: Spring

NURS 773 - Clinical Applications of Theory in Advanced Clinical Nursing

Credits: 3
Foundational theory relevant to the emerging roles in advanced clinical nursing, focusing on therapeutic nursing interventions in a variety of clinical specialties, with attention to health-illness continuum of individuals, families, and communities.

Prerequisites
Admission to graduate nursing program. NURS 550, 680.

Corequisite
NURS 550, 680.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 775 - Advanced Specialty Practice I

Credits: 3
Focuses on clinical application of theory from NURS 773 to a selected clinical specialty with attention to the health illness continuum of individuals, families, and communities.

Prerequisites
Admission to graduate program and NURS 680.
Corequisite
NURS 773.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 7

NURS 776 - Development of Advanced Practice Nursing Role

Credits: 3
Expansion of selected content included in NURS 773 for the delivery of advanced nursing care in a variety of settings. Emphasizes development and evaluation of the advanced practice nursing role in complex health care systems.

Prerequisites
NURS 773.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 778 - Advanced Specialty Practice II

Credits: 3
Applies concepts of the advanced practice nursing role from NURS 776 to a selected clinical specialty.

Prerequisites
NURS 773 and 775.

Corequisite
NURS 776.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 7

NURS 780 - Practicum in Gerontological Nursing I

Credits: 3
Demonstrates the ability to function at a beginning level in the role of the gerontological nurse practitioner. Performance of advanced skill in geriatric assessment with a special emphasis on the delivery of health promotion and disease prevention services (practicum of at least 100 clinical hours and case analysis conferences).

Prerequisites
NURS 719, 723, 745, 747, 756.

Corequisite
NURS 746.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
NURS 781 - Practicum in Gerontological Nursing II

Credits: 3
Demonstrates the ability to function at an advanced level in the role of the gerontological nurse practitioner in varied settings, including primary care, long-term care, and sub-acute care (practicum of at least 100 clinical hours and case analysis conferences).

Prerequisites
NURS 780

Corequisite
NURS 748.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

NURS 804 - Advanced Quantitative Data Analysis for Health Care Research I

Credits: 3
Examines factorial ANOVA, factorial ANCOVA, repeated measures ANOVA, ANOVA and ANCOVA via regression approach, and multiway frequency analysis. Students apply mathematical calculations and interpret SPSS outputs using health care research data.

Equivalent to GCH 804

Prerequisites
A graduate-level statistics course

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 805 - Advanced Quantitative Data Analysis for Health Care Research II

Credits: 3
Examines multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), multiple regression (ordinary least squares), and logistic regression. Students apply mathematical calculations and use linear combinations of multivariate tests in health care research data.

Equivalent to GCH 805

Prerequisites
GCH/NURS 804 or an equivalent statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
NURS 806 - Advanced Multivariate Statistics and Data Analysis for Health Care Research

Credits: 3
Examines canonical correlation, discriminant analysis, factor analysis, and causal analysis (path models and structural equation modeling). Students analyze and interpret data using these statistical techniques.

Equivalent to GCH 806

Prerequisites
GCH/NURS 805 or an equivalent multivariate statistics course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 807 - Measurement Theories and Applications in Health Care Research

Credits: 3
Theories, principles, and techniques presented as foundation for the development and evaluation of instruments for use in health care research. Includes review of statistical techniques required for understanding measurement theory, reliability, validity, item analysis, and instrument construction. Students required to design, construct, administer, analyze, and evaluate an original instrument or evaluate an existing instrument in health care research.

Equivalent to GCH 807

Prerequisites
Doctoral-level course in research design and statistics; completion of GCH/ NURS 805 or GCH/NURS 806 is highly recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 808 - Translating Nursing and Health Care Research into Evidence-Based Policy

Credits: 3
This course prepares students to assess the policy dimensions of nursing issues in clinical practice, education, and research environments and translate nursing research into policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 809 - Research Design and Methods in Nursing and Health Care

Credits: 3
Explore strategies for converting nursing and health care problems into research questions. Evaluate and apply quantitative and qualitative designs, measures and analysis strategies to various research questions.
Prerequisites
NURS 804 or equivalent advanced statistical course, NURS 955 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 810 - Evaluation Research in Nursing Education

Credits: 3
Uses seminar/discussion to analyze and apply theoretical models for implementing evaluation research in nursing education.
Examines quantitative approaches for evaluating process and outcomes of domestic or international nursing education programs, including role of accreditation guidelines.

Prerequisites
NURS 920 and 930

Corequisite
NURS 920 and 930

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 811 - Nurse as Educator and Scholar

Credits: 2
Uses seminar/discussion to explore role of nurse educator in meeting research and scholarship expectations of college, university, or service setting. Addresses approaches to scholarship in relation to types of evidence appropriate for various scholarly expectations in academic setting.

Prerequisites
NURS 920 and 930.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

NURS 820 - Human Genetics Concepts for Health Care

Credits: 4
The study of human genetics, principles of heredity, and disease risks.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

NURS 855 - Ethics in Health Administration
Credits: 3
Philosophical foundations of health care ethics. Students analyze specific ethical dilemmas faced by administrators in health care settings.

Equivalent to HHS 855

Prerequisites
Admission to PhD program; for non-PhD students, permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 870 - Nursing and Health Care Administration I**

Credits: 3
Examines the theoretical basis of scholarship and practice in leadership and management of health systems and nursing organizations. Includes discovery of concepts and forces influencing the organization and performance of health care systems.

Prerequisites
Organizational behavior course such as MGMT 600, PUAD 620, LRNG 700, or equivalent; and NURS 955.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 871 - Nursing and Health Care Administration II**

Credits: 2
Analyzes and applies selected concepts related to nursing and health system leaders and managers as well as factors influencing the performance of health systems and organizations.

Prerequisites
NURS 870.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

**NURS 874 - Internship in Health Care Administration/Policy/Education**

Credits: 4
Internship experience of at least 126 hours with leader in field of nursing, health care administration, policy, or education. Participatory activities require integration and application of principles, frameworks, and science related to executive preceptor role.

Prerequisites
Completion of all other course work except NURS 998; written advanced application and permission of instructor by due dates (April/November 1) in advance of semester.
NURS 875 - Research Internship

Credits: 1 OR 3
Provides guided research experience of 45 hours, during which students participate as a member of a research team engaged in scientific inquiry. Designed to enhance professional socialization in research scholarship at the doctoral level.

NURS 880 - Informatics Inquiry for the Doctor of Nursing Practice

Credits: 3
Introduces theoretical and practice components of nursing and health care informatics for the doctor of nursing practice (DNP). Health care data standards, classification schemes, and the electronic health record will be introduced. Students will evaluate informatics as it applies to quality improvement, outcomes measurement, complex decision making, consumer use, and legal and ethical issues. Students will analyze atomic and aggregate data to support practice, patient care, health education, and organizational management.

Prerequisites
Admission to the DNP program or by permission of instructor.

NURS 881 - Issues and Methodologies in Translational Research

Credits: 4
Build on knowledge of research methodologies to analyze the selection and evaluation of research underlying evidence-based practice. Apply research methodologies and strategies to examine and interpret population-based data sets. Explore models and the supporting research relating to the dissemination of knowledge and the translation of research practice. Determine the analytic approaches of relevance to translational research including interdisciplinary models. Address issues of measurement of quality health outcomes at the individual, family, system, and population level.

Prerequisites
Admission to the DNP program or by permission of instructor.

NURS 882 - Theoretical Foundations Related to Human Health Behaviors
Explores and evaluates elements of selective behavioral and social science theories and models related to health risk behaviors and chronic disease management. Examines the impact of selected theories on advanced nursing practice. Applies behavioral change theory to the development of interventions for improvement in individual, organizational, and community health outcomes.

**Prerequisites**
Admission to the DNP program or by permission of instructor.

**NURS 883 - Evidence-Based Practice in Nursing and Healthcare**

Credits: 4
Building on knowledge of research methodologies and personal expertise, student will identify practice and system problems, analyze the variations of processes and outcomes, evaluate research studies and systematic reviews, and develop a proposal to address issues related to the design of new model of care, translation of evidence into practice, or evaluation of current programs in the context of evidence-based practice. Emphasis is placed on the development of strategies to ensure quality improvement.

**Prerequisites**
NURS 757 and NURS 758

**NURS 920 - Qualitative Research in Nursing and Health Care**

Credits: 3
Examination and application of principles in qualitative research in nursing and health care. Qualitative research will be analyzed within the scholarship of discovery, integration, and application.

**Prerequisites**
NURS 955

**NURS 921 - Clinical Practicum I**

Credits: 1-10
Students, in consultation with their academic advisor, complete supervised practicum hours to meet both the post-baccalaureate and post-masters DNP practicum requirement. A practicum course that prepares students to perform clinical decision making in their role as advance practice nurses in individualized specialty areas. They will work with advanced practice nurse preceptors to develop clinical expertise, and to develop an understanding of leadership roles in the clinical setting that can enhance the system of health care delivery. One credit hour of seminar with the remaining hours in clinical practice.

**NURS 922 - Clinical Practicum II**
Credits: 1-10
Students, in consultation with their academic advisor, complete supervised practicum hours to meet both the post-baccalaureate and post-masters DNP practicum requirement. A practicum course that continues to prepare students to practice in an expanded, advanced clinical practice role. Students will learn to become change agents in the clinical setting with a focus on health care delivery systems. The student will apply advanced health assessment skills and clinical decision making in an area of specialty practice, correlating pathophysiology with symptom manifestations. One credit hour of seminar with the remaining hours in clinical practice.

**NURS 925 - Methodological Issues in Nursing and Health Care Qualitative Research**

Credits: 3
Explores, analyzes, and synthesizes conceptual, methodological, and ethical issues in qualitative research within the scholarship of discovery, integration, application, and teaching. Seminar.

**Prerequisites**
NURS 920/HSCI 920 or equivalent course, and permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 930 - Quantitative Methods in Nursing and Health Care**

Credits: 3
Examination and application of principles in quantitative research in nursing and health care. Computer analysis of quantitative data will be required.

**Prerequisites**
NURS 955, 804, and 805.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**NURS 940 - Independent Study for the Doctoral Student**

Credits: 1-6
Studies in depth a selected area of nursing theory, research, or practice under direction of faculty.

**Prerequisites**
Admission to a doctoral nursing program

**Notes**
May be repeated; maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
NURS 950 - Special Topics in Nursing

Credits: 3
Presents selected topics analyzing specialized areas in nursing. Content varies. Lecture, seminar, laboratory, workshop.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 955 - Philosophical Bases of Inquiry

Credits: 3
Philosophical bases of discipline and practice of health-related disciplines are examined within scholarship of discovery, integration, application, and teaching. Compares nursing and health science philosophy with relevant related discipline philosophies.

Prerequisites
Admission to nursing doctoral program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

NURS 980 - Practice Inquiry I

Credits: 4
Synthesize the literature related to the problem. Analyze the environmental factors impacting the problem. Identify the standard of care related to the clinical problem. Assess the quality of evidence that supports the standard of care. Develop a proposal that will impact the delivery of care in the identified area of practice inquiry. Develop the appropriate outcome measures to address the specific practice inquiry area.

Prerequisites
Completion of DNP core courses. A seminar for doctor of nursing practice (DNP) students to identify an area of practice inquiry.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

NURS 981 - Practice Inquiry II

Credits: 4
Implement the proposal developed in Practice Inquiry I. Maintain an ongoing process analysis of the project. Collect data. Analyze the findings from the practice inquiry. Disseminate the findings from the practice inquiry in a scholarly manner.

Prerequisites
NURS 980.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
NURS 998 - Doctoral Dissertation Proposal

Credits: 1-9
A seminar for doctoral students to accompany the development of a doctoral dissertation proposal. Development of the research problem with analysis and critique of methodology discussed.

Prerequisites
Completion of all other course work except NURS 999; and completion of doctoral comprehensive examination.

Notes
Students must enroll in the course for 3-credits the first time they take the course.

When Offered: Fall, Spring

NURS 999 - Doctoral Dissertation

Credits: 1-9
Provides continued faculty assistance on an individual basis toward completion of approved dissertation.

Prerequisites
NURS 998.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Operations Management

If a student takes noncore, upper-level business courses before admission to SOM, those courses will not count on an undergraduate degree application for any major in the school, except as general elective credit. A grade of C or higher must be presented on the graduation application for each upper-level course in the major. Course prerequisites are strictly enforced. Degree status is defined as formal admission to BS degree status in SOM.

OM 210 - Statistical Analysis for Management

Credits: 4

Introduces application of statistical methods to support quantitative decision analysis for resolving business problems. Topics include descriptive statistics, probability distributions, statistical inference and regression. May be taught in lecture/recitation format.

Prerequisites
C or higher in MATH 108 or MATH 113.
Corequisite
MIS 102.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

OM 301 - Operations Management

Credits: 3
Examines an organization's operations, including design, management and improvement processes, projects and supply chains, in both product and service environments. Uses analytical models to support key planning and control activities.

Prerequisites
MIS 102, C or higher in OM 210, sophomore standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

OM 320 - Supply Chain Management and E-Business

Credits: 3
Design, development, and management of supply chain systems, including production and inventory management, distribution channels, and information systems that support them. Emphasizes impact of e-business on companies and industries, including Internet's impact on the way goods and services flow through value chain from providers to customers.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OM 352 - Methods and Models of Management Science

Credits: 3
Introduces operation research and management sciences (OR/MS) techniques for supporting business management decisions. Specific mathematical programming and probabilistic topics include linear programming, integer programming, goal programming, network flow models, decision analysis, game theory, queuing models, and Monte Carlo simulation.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
OM 435 - Business Process Analysis and Simulation

Credits: 3
Introduces concepts and tools used in designing, modeling, analyzing, and improving business processes. Various business process analysis and simulation methods, such as process mapping/flowcharting, process flow and capacity analysis, service process design, theory of constraints, process modeling and simulation, and business process reengineering are discussed. Introduces methods and analytical tools such as queue theory and computer simulation used to design, model, analyze, and improve business processes. Discusses methods such as process mapping/diagramming, service process design, process modeling, and business process reengineering.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OM 452 - Business Forecasting

Credits: 3
Introduces techniques for producing predictions of future business operations as aids to making planning decisions. Specific topics include judgmental forecasting, forecast accuracy, correlation analysis, smoothing methods, regression models, decomposition, and autoregressive and ARIMA models. Methods demonstrated and used through computer software.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OM 456 - Quality Management

Credits: 3
Provides an understanding of the multifaceted nature of quality management by emphasizing topics such as quality philosophies, total quality management, design quality, process quality, and managing quality in information systems development. Discusses ISO 9000 and Capability Maturity Model. Uses software, case studies.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OM 462 - Honors Seminar in Operations Management

Credits: 3
Topic and format vary. In-depth study of a topic in the area of operations management. Enrollment limited and competitive.
Prerequisites
Senior standing, ISOM major, minimum GPA requirement.

OM 491 - Seminar in Operations Management

Credits: 3
Analyzes selected topics that highlight latest developments in the operations management field, including contemporary research findings and case studies of operations management in business and other organizations.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OM 493 - Management of Technology Projects

Credits: 3
Focuses on managerial problems associated with meeting technical, cost, and time constraints of technology projects. Discusses project management areas including organization, teams, scheduling, cost control, earned value analysis, risk management, and quality. Includes software cost estimation models and the management of IT projects. Software and case studies.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer.

OM 499 - Independent Study in Operations Management

Credits: 1-3
By special arrangement with instructor, and approval from associate dean for undergraduate programs. Investigates business problem according to student interest, using state-of-the-art decision science methodology.

Prerequisites
C or higher in OM 301, degree status.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Operations Research
OR 335 - Discrete Systems Modeling and Simulation

Credits: 3
Introduction to basic concepts of modeling complex discrete systems by computer simulation. Topics include Monte-Carlo methods, discrete event modeling, specialized simulation software, and statistics of input and output analysis.

Equivalent to SYST 335

Prerequisites
CS 112 or grade of C or better in IT 103 and STAT 344, or STAT 346, or MATH 351, or grade of C or better in STAT 250.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

OR 441 - Deterministic Operations Research

Credits: 3
Survey of deterministic methods for solving real-world decision problems. Covers linear programming model and simplex method of solution, duality, and sensitivity analysis; transportation and assignment problems; shortest path and maximal flow problems; and introduction to integer and nonlinear programming. Emphasizes modeling and problem solving.

Equivalent to MATH 441

Prerequisites
MATH 203, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

OR 442 - Stochastic Operations Research

Credits: 3
Survey of probabilistic methods for solving decision problems under uncertainty, probability review, decision theory, queuing theory, inventory models, reliability, Markov chain models, and simulation are covered. Emphasis on modeling and problem solving.

Equivalent to MATH 442

Prerequisites
STAT 344 or STAT 346 or MATH 351, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S
OR 481 - Numerical Methods in Engineering

Credits: 3
Modern numerical methods and software. Emphasis on problem solving through software and assessing the quality of solutions obtained. Topics include computer arithmetic, linear equations and least squares data fitting, interpolation, nonlinear optimization, and differential equations. Involves extensive computer use.

Equivalent to MATH 446

Prerequisites
MATH 213 or 215, and MATH 203 or 322; or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

OR 498 - Independent Study in Operations Research

Credits: 1-3
Directed self-study of special topics of current interest in operations research.

Prerequisites
60 credits; must be arranged with instructor and approved by department chair before registering.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: F, S, SUM

OR 499 - Special Topics in Operations Research

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S, SUM
OR 540 - Management Science

Credits: 3
Operations research techniques and their application to managerial decision making. Mathematical programming, Markov processes, queuing theory, inventory models, PERT, CPM, and computer simulation are covered, as well as use of contemporary computer software for problem solving. Case-study approach to problem solving is used.

Equivalent to SYST 540

Prerequisites
MATH 108, and STAT 250 or OM 200; or equivalent.

Notes
Students who have taken OR 541 or OR 542 and OR MS majors do not receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

OR 541 - Operations Research: Deterministic Models

Credits: 3
Survey of deterministic methods of solving real world decision problems. Covers linear programming model and simplex method of solution, duality, and sensitivity analysis, transportation and assignment problems; shortest path, minimal spanning tree, and maximal flow problems; and an introduction to integer and nonlinear programming. Emphasis on modeling and problem solving.

Prerequisites
MATH 203 or equivalent.

Notes
Students who have taken OR 441/MATH 441 will not receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 542 - Operations Research: Stochastic Models

Credits: 3

Prerequisites
STAT 344 or MATH 351, or equivalent.

Notes
Students who have taken OR 442/MATH 442 do not receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
OR 574 - Quality Control and Process Management

Credits: 3

An overview of quality control techniques widely used in a number of manufacturing industries. The course teaches students about combining engineering process quality management and traditional statistical quality control procedures that are applicable in industry and are based on contemporary technologies such as lean Six Sigma, total quality management and predictive maintenance for achieving superior quality, reliability and maintainability.

Equivalent to SYST 574

Prerequisites
Graduate standing or permission of instructor.

OR 576 - Manufacturing Systems Analysis

Credits: 3

An overview of modeling and analysis of general manufacturing systems techniques widely used in a number of manufacturing industries, such as semiconductor manufacturing. The course teaches students about best scheduling and inventory control practices, enterprise resource management principles, and details of engineering economy that are applicable in the industry.

Equivalent to SYST 576

Prerequisites
Graduate standing or permission of instructor.

OR 604 - Practical Optimization

Credits: 3

Survey of optimization methods for students whose main focus is on application of optimization. Covers modeling, search methods, convexity, linear programming, sensitivity, networks, multiobjective optimization, heuristic methods, integer programming, nonlinear programming and dynamic programming; use of modeling languages and optimization tools, including NEOS.

Prerequisites
6 credits of calculus and graduate standing, or permission of instructor.

Notes
Course cannot be counted toward MSOR degree. Students who have taken OR 541 or 644 cannot receive credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
OR 635 - Discrete System Simulation

Credits: 3
Computer simulation as a scientific methodology in operations analysis, with emphasis on model development, implementation, and analysis of results. Discrete-event models, specialized software, input modeling, and output statistics are covered. Extensive computational work is required.

Prerequisites
OR 542, or STAT 354 or 344, or equivalent; and knowledge of scientific programming language.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 640 - Global Optimization and Computational Intelligence

Credits: 3
Introduction to global optimization of nonconvex mathematical programs and numerical methods for the solution of such problems. Topics covered include high-level survey of traditional mathematical programming algorithms; critical comparison of metaheuristics and artificial intelligence (AI) algorithms to traditional mathematical programming algorithms; probabilistic search, multistart methods, statistical tests of performance and confidence, simulated annealing, genetic algorithms, neural networks, Tabu search, homotopies and tunneling; the traveling salesman problem, the Steiner problem, Stackelberg-Cournot-Nash mathematical games and other classical nonconvex optimization problems.

Prerequisites
MATH 203 or equivalent, and knowledge of a scientific programming language.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 641 - Linear Programming

Credits: 3
In-depth look at the theory and methodology of linear programming: Computational enhancements of the revised simplex method; sparse-matrix techniques, bounded variables and the dual simplex method. Alternative interior point methods described and computational complexity of various algorithms analyzed.

Prerequisites
OR 541, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

OR 642 - Integer Programming
Credits: 3
Cutting plane and enumeration algorithms for solution of integer linear programs; bounding strategies and reformulation techniques; heuristic approaches to the solution of complex problems; knapsack problems, matching problems, set covering and partitioning problems; applications to problems in OR/MS, such as capital budgeting, facility location, political redistricting, engineering design, and scheduling.

Prerequisites
OR 541, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 643 - Network Modeling

Credits: 3
Introduction to network problems in operations research, computer science, electrical engineering, and systems engineering. Solution techniques for various classes of such problems are developed. Topics include minimal-cost network flow, maximal flow, shortest path, and generalized networks; plus stochastic networks, network reliability, and combinatorially based network problems. Complexity of each problem class analyzed.

Prerequisites
OR 541, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

OR 644 - Nonlinear Programming

Credits: 3
Nonlinear optimization theory and techniques applicable to problems in engineering, economics, operations research, and management science. Covers convex sets and functions, optimality criteria and duality; algorithms for unconstrained minimization, including descent methods, conjugate directions, Newton-type and quasi-Newton methods; and algorithms for constrained optimization, including active set methods and penalty and barrier methods.

Prerequisites
MATH 213 or equivalent, and OR 541; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

OR 645 - Stochastic Processes

Credits: 3
Selected applied probability models including Poisson processes, discrete- and continuous-time Markov chains, renewal and regenerative processes, semi-Markov processes, queuing and inventory systems, reliability theory, and stochastic networks.
Emphasis on applications in practice as well as analytical models.

Equivalent to STAT 645

**Prerequisites**
OR 542 or STAT 544, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**OR 647 - Queuing Theory**

Credits: 3
Unified approach to queuing, organized by type of model. Single- and multiple-channel exponential queues; Erlangian models, bulk and priority queues, networks of queues; general arrival and/or service times; and statistical inference and simulation of queues are covered. Extensive use of computational software.

**Prerequisites**
OR 542, STAT 544, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**OR 649 - Topics in Operations Research**

Credits: 3-6
Advanced topic chosen according to interests of students and instructor from dynamic programming, inventory theory, queuing theory, Markov and semi-Markov decision processes, reliability theory, decision theory, network flows, large-scale linear programming, nonlinear programming, and combinatorics.

**Prerequisites**
Permission of instructor.

**Notes**
May be repeated for maximum 6 credits if topics are substantially different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 651 - Military Operations Research I: Cost Analysis**

Credits: 3
While drawing on other disciplines (managerial accounting, econometrics, systems analysis), cost analysis uses operations research to assist decision makers in choosing preferred future courses of action by evaluating selected alternatives on the basis of their costs, benefits, and risks. Cost analysis is distinctly different from cost estimating in that projecting future courses of
action almost always requires mathematical modeling. Topics include analysis overview, economic analysis, estimating relationships (factors, simple and complex models), acquiring and verifying cost data, cost progress curves, life-cycle costing, scheduling estimating, effectiveness and risk estimation, relationship of effectiveness models and measures to cost analysis.

Corequisite
OR 541 or 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

OR 652 - Military Operations Research Modeling II: Effectiveness Analysis

Credits: 3
Examines issues and modeling underlying military decisions at the Military Service, Joint Staff, and Department of Defense level. Analytical methods with applications to theater campaign analysis, equipment and weapon system modernization, force structure development, strategic mobility and deployment, small-scale contingency operations, logistics, and requirements determination are considered. Optimization, simulation, and statistical techniques are stressed. Realistic problems presented and solved as case studies. Display of results and presentation techniques for military decision makers emphasized.

Corequisite
OR 541 or 542.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

OR 660 - Air Transportation Systems Modeling

Credits: 3
Introduces range of current issues in air transportation, including public policy toward the industry, industry economics, system capacity, current system modeling capability, human factors considerations, safety analysis and surveillance systems, and new technological developments. Students expected to develop broad understanding of contemporary and future issues. Knowledge evaluated through class discussions, a take-home midterm exam and a term project to be completed by the end of the semester.

Equivalent to SYST 660

Prerequisites
SYST 460/560, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

OR 671 - Judgment and Choice Processing and Decision Making
How do people make judgments and decisions? Course presents an initial review of scientific literature directed toward answering this question, and emphasizes its importance when performing decision analysis and designing systems to support judgment and decision processes.

Equivalent to SYST 671

Prerequisites
STAT 510 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

OR 674 - Dynamic Programming

Credits: 3
Course on the theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties. Stresses intuition, the mathematical foundations being for the most part elementary. Introduces the theory, applications (finance, engineering, and biology), and computational aspects of dynamic programming for deterministic and stochastic problems.

Equivalent to SYST 674

Prerequisites
OR 442 or OR 542 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 675 - Reliability Analysis

Credits: 3
Introduction to component and system reliability, their relationship, and problems of inference. Topics include component lifetime distributions and hazard functions, parameter estimation and hypothesis testing, life testing, accelerated life testing, system structural functions, and system maintainability.

Equivalent to SYST 675/STAT 678

Prerequisites
STAT 544 or 554, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 677 - Statistical Process Control
Credits: 3
Introduces concepts of quality control and reliability. Acceptance sampling, control charts, and economic design of quality control systems are discussed, as are system reliability, fault-tree analysis, life testing, repairable systems, and the role of reliability, quality control and maintainability in life-cycle costing. Role of MIL and ANSI standards in reliability and quality programs also considered.

Equivalent to STAT 677/SYST 677

Prerequisites
STAT 544 or 554, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 680 - Project Course in Operations Research

Credits: 3
Capstone course for both the master's program in operations research and certificate in computational modeling. Can also be used in lieu of the project in master's program in systems engineering. Focus is on model development and implementation involved in the practice of operational modeling. Key activity is completion of a major applied group project. Work includes project proposal planning, completion, documentation, and presentation. To be taken in last spring semester of studies.

Prerequisites
21 graduate credits in OR or SYST.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 681 - Decision and Risk Analysis

Credits: 3
Application of analytic reasoning and skills to practical problems in decisionmaking. Topics include problem structure, analysis and solution implementation, emphasizing contemporary approaches to decision analytic techniques.

Equivalent to SYST 573

Prerequisites
OR 542 or MBA 638.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

OR 682 - Computational Methods in Engineering and Statistics

Credits: 3
Numerical methods have been developed to solve mathematical problems that lack explicit closed-form solutions or have
solutions that are not amenable to computer calculations. Examples include solving differential equations or computation probabilities. Discusses numerical methods for such problems as regression, analysis of variance, nonlinear equations, differential and difference equations and nonlinear optimization. Applications in statistics and engineering are emphasized. Involves extensive computer use.

Equivalent to CSI 700

**Prerequisites**
MATH 203 and 213 or equivalent, and modern numerical methods and software.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 683 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I)**

Credits: 3  
Fundamental principles of C4I are developed from descriptive, theoretical, and quantitative perspectives. Principles and techniques applicable to a wide range of civilian and military situations. Topics include C2 process; modeling and simulation for combat operations; detection, sensing, and tracking; data fusion and situation assessment; optimal decision making; methodologies and tools of C4I architectures; tools for modeling and evaluations of C4 systems such as queuing theory.

Equivalent to SYST 680/ECE 670

**Prerequisites**
ECE 528, OR 542, or SYST 611; or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**OR 690 - Optimization of Supply Chains**

Credits: 3  
Focuses on both supply chain optimization from an enterprise-wide perspective, and supply chain optimization from a business-to-business e-commerce concern. Concerned with optimizing the value of goods and services and assuring a reasonable return on such sales. Describes both heuristic and exact algorithms for scheduling, production, inventory management, logistics, and distribution. New software that enables such optimization is presented, as are manufacturing and service examples from the public and private sectors. New techniques to handle risk, quality of data, and robustness of solutions are presented. Students perform case studies using state-of-the-art software.

**Prerequisites**
Graduate standing, mathematics through linear algebra, and STAT 344.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
OR 719 - Computational Models of Probabilistic Reasoning

Credits: 3
Introduction to theory and methods for building computationally efficient software agents that reason, act, and learn environments characterized by noisy and uncertain information. Covers methods based on graphical probability and decision models. Studies approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision-making. Practical model-building experience provided. Students apply what they learn to a semester-long project of their own choosing.

Equivalent to STAT 719/CSI 775

Prerequisites
STAT 652 or SYST/STAT 664, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 735 - Advanced Stochastic Simulation

Credits: 3
Special topics and recent developments in Monte Carlo simulation methodology for discrete-event stochastic systems. Contents vary; possible topics include statistical analysis of simulation output data, random number and random variate generation, variance reduction techniques, sensitivity analysis and optimization of simulation models, distributed and parallel simulation, object-oriented simulation, and specialized applications.

Equivalent to SYST 735

Prerequisites
OR 635 or permission of instructor.

Notes
May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 741 - Advanced Linear Programming

Credits: 3
Recent developments in linear programming. Highlights advances in interior point methods and also addresses developments in the simplex method. Projective methods, affine methods, and path-following methods are examined, including Karmarkar's original work. Discusses relationships between these methods, and relationships to methods in nonlinear programming. Also discussed are advances in data structures and other implementation issues. Students test software and solve large-scale linear programs.

Prerequisites
OR 541 and 641.
OR 750 - Advanced Topics in Operations Research

Credits: 3
Special topics, applications, or recent developments in operations research. Contents vary and may include topics in optimization, stochastic methods, or decision support that are not covered in the standard OR curriculum.

Prerequisites
OR 541 or 542, and 600-level course that varies with content of course.

Notes
May be repeated for credit when topics are distinctly different.

OR 751 - Advanced Topics in Operations Research for Planning and Scheduling

Credits: 3
Introduces combinatorial optimization problems in scheduling and logistics. Solution techniques for various classes of such problems are developed. Topics include deterministic and stochastic scheduling algorithms with applications in manufacturing and service sectors.

Prerequisites
OR 541.

OR 763 - Research Methods in Systems Engineering and Information Technology

Credits: 3
Examines alternative paradigms of scientific research and their applicability to research in information technology. Topics include fundamental elements of scientific investigation, basic principles of experimental design and statistical induction, philosophy of science and its relation to the information technology sciences, and case studies of information technology research.

Equivalent to IT 763/SYST 763

Prerequisites
STAT 554.
**OR 774 - Advanced Dynamic Programming**

Credits: 3  
Covers advanced topics on the theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties. Stresses the mathematical foundations and introduces the theory, computational aspect, and applications of dynamic programming for deterministic and stochastic problems.

Equivalent to IT 774

**Prerequisites**  
OR674/SYST674 or permission of instructor.

---

**OR 780 - Queuing Modeling of Computer-Communication Networks**

Credits: 3  
Studies analytical modeling of computer and communication networks and performance evaluations. Topics include Markovian systems, open networks, closed networks, approximations, decomposition, simulation, sensitivity analysis, and optimal operation of systems. Presents local area networks, manufacturing systems, and other applications.

Equivalent to IT 780

**Prerequisites**  
OR 645 or 647, or ECE 542; or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**OR 782 - Advanced Topics in Combinatorial Optimizations**

Credits: 3  
Studies problems using most recent developments. Topics include cutting plane procedures based on polyhedral combinatorics; column-generation procedures for large, complex problems; heuristic approaches such as genetic algorithms, simulated annealing, and tabu search; study of special structures; reformulation techniques; and bounding approaches. Topics stress most recent developments in field.

Equivalent to IT 782

**Prerequisites**  
OR 641 and 642.

**Notes**  
May be repeated for credit when topics are distinctly different.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
OR 783 - Advanced Topics in Network Optimization

Credits: 3
Recent developments in solving optimization problems on networks. Prepares doctoral students to perform advanced research on network-related problems. Topics include linear, discrete, nonlinear, and stochastic problems. Several aspects of problems also studied, including computational complexity, exact algorithms, heuristics, solvable special cases, and computer implementation issues.

Equivalent to IT 783

Prerequisites
OR 643.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 784 - Advanced Topics in Nonlinear Programming

Credits: 3
Studies theory and algorithms for solving nonlinear optimization problems. Contents vary; possible topics include large-scale and parallel-unconstrained optimization, theoretical issues in constrained optimization, duality theory, Lagrangian and sequential quadratic programming methods.

Equivalent to IT 784

Prerequisites
OR 644.

Notes
May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 842 - Models of Probabilistic Reasoning

Credits: 3
Survey of alternative views about how incomplete, inconclusive, and possibly unreliable evidence might be evaluated and combined. Discusses Bayesian, Baconian, Shafer-Dempster, and Fuzzy systems for probabilistic reasoning.

Equivalent to IT 842, SYST 842

Prerequisites
STAT 544 or OR 681, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
OR 888 - Distributed Estimation and Multisensor Tracking and Fusion

Credits: 3
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Equivalent to SYST 888/IT 888/ECE 753

Prerequisites
ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 944 - The Process of Discovery and Its Enhancement in Engineering Applications

Credits: 3
Studies ingredients of imaginative reasoning as it concerns efficient discovery of new ideas and valid evidential test of them. Topics include different interpretations of Peirce's theory of abductive reasoning and other forms of reasoning, Hintikka's analysis of process of inquiry, and current attempts to design systems that provide assistance in discovery-related or investigative activities.

Equivalent to SYST 944

Prerequisites
OR 842 or SYST 842 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

OR 981 - Optimization in Medicine

Credits: 3
Course focuses on the application of optimization to medicine, as well as on modeling used and solution approaches to the optimization problems generated. Particular attention is paid to algorithms and methodology not discussed in other optimization courses. Topics covered include nonlinear integer programs, large-scale nonlinear and integer programs, problems governed by differential equations, and more.

Prerequisites
OR 641, OR 642, OR 643, or OR 644.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Organization Development and Knowledge Management
ODKM 700 - Organizations, Management and Work: Theory and Practice

Credits: 3
This introduction to organizations, management, and work examines ideas and practices from two perspectives: conventional ones that go back to the industrial age and scientific management; and contemporary ones that have to do with organizing knowledge-work. Covers contributions of a range of writers and deals with foundations of OD from the standpoint of both theory and practice.

Hours of Lecture or Seminar per week: 3

ODKM 705 - Group Dynamics and Team Learning

Credits: 3
Engaging in unstructured and semi-structured learning environment, students will learn how to facilitate team learning for organizational effectiveness. By exploring various aspects of group dynamics such as power, perception, motivation, leadership, and decision making, students will develop various competencies to manage teams and enhance their emotional and appreciative intelligence.

Hours of Lecture or Seminar per week: 3

ODKM 710 - Social and Organizational Inquiry

Credits: 4
Introduces participants to the ethics, conduct and evaluation of research into human, social and organizational realities. Explores relationships between what and how we measure and what we find. Students develop the capacity to reflect on themselves as research instruments, on their own impact on the systems under study, and on the impact of the research assumptions, framing and approach both on the results obtained and on the future development of those systems.

Hours of Lecture or Seminar per week: 3

ODKM 715 - Creating Learning Organizations

Credits: 3
Focuses on the epistemological and ontological implications of organizational life in the twenty-first century. Reevaluates traditional management approaches in light of global economies, instantaneous communication, changing technologies, and diverse workgroups in knowledge economies. Special attention to developing skills for "double- and triple-loop learning," and reflection in professional lives through learning conversations, journals, narrative, autobiography, and imaginative literature.

Hours of Lecture or Seminar per week: 3
ODKM 720 - Collaborative Technologies for Knowledge Sharing

Credits: 3
Examines the potential of collaborative technologies for creating effective knowledge sharing in organizations. Through the use of tools such as SharePoint, students will gain a comprehensive understanding of the state of the art of virtual work and collaboration technology and other subjects related to successful design of a collaborative knowledge work environment.

Hours of Lecture or Seminar per week: 3

ODKM 725 - Strategic Knowledge Management

Credits: 3
An in-depth look at knowledge management, both theory and practices, which distinguishes between technology-oriented KM practices and people-oriented ones, with an emphasis on leveraging and sharing knowledge to get work done well and develop more effective organizations. Examines effective ways of organizing knowledge-work, including social networks, communities of practice, and the use of collaborative technologies.

Hours of Lecture or Seminar per week: 3

ODKM 730 - Special Topics

Credits: 1-3
Selected special topics in organization development and knowledge management not covered by existing ODKM courses.

Hours of Lecture or Seminar per week: 3

ODKM 731 - Consulting Skills for Organizational Change

Credits: 3
Explores various theories and practices of change management, collaborative consulting, action research, and organization development. Using class projects and case studies, students bring together their understanding of organization development, their values, and their personal style to perform more effectively in various consulting roles. Students also learn various aspects of process consulting and client relationship management.

Hours of Lecture or Seminar per week: 3

ODKM 735 - Organizational Development Practices

Credits: 3
Students develop applied knowledge of various organizational development practices such as action research and appreciative inquiry. Includes simulations to understand the complexities of real-world change management. Group projects with selected organizations will help students develop their diagnostic and analytical skills to become better facilitators of organizational learning.
ODKM 740 - Learning Community

Credits: 3
Using workshops, seminars, simulations, and structured experiences, students will learn how to build a learning Community of Practice (CoP) as practitioners of organization development. They will also reflect upon the community building experience using research findings and design practice sessions to apply the lessons learned to the work environment.

Prerequisites
Candidates for the M.S. in ODKM degree only.

Hours of Lecture or Seminar per week: 3

Parks, Recreation, and Leisure Studies

PRLS 110 - Exploring Outdoor Adventure

Credits: 2
Provides students with an introduction to outdoor adventure activities and the leadership theory involved to properly plan the activities. This class aims to bridge the gap between theory and practice as it pertains to outdoor adventure activities. This class focuses on developing introductory skills in a variety of outdoor recreation activities, including rock climbing, canoeing, orienteering, and caving. Traditional classroom and in-the-field instruction will be used during the various activities.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 1

PRLS 115 - Introduction to Fly Fishing

Credits: 1
A practical course designed for students with little or no knowledge of fly fishing. The course will involve activities to teach students the basics of fly fishing to include terms and equipment, casting, knot tying, aquatic entomology, fly selection, reading water, wading techniques and safety, and fly fishing tactics. In addition to the one-hour classes required during the week, a full day on a stream will be included.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 116 - Introduction to Indoor Rock Climbing
Credits: 1
Introduces equipment, techniques, safety, and planning related to basic rock climbing.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 117 - Rock Climbing

Credits: 2
For individuals who have never done any formal rock climbing. Involves activities to teach students basic climbing terms, techniques, equipment, and safety practices for top rope belay climbing and rappelling. Builds communication skills and trust.

Notes
Fee required.

Hours of Lecture or Seminar per week: 2

PRLS 118 - Intermediate Rock Climbing

Credits: 2
For individuals who have some prior skills in rock climbing looking to further increase their skill level. Involves teaching students climbing terms, advanced knots, equipment, safety practices for redirect belay and top rope belay, as well as setting up techniques using rope and webbing. Special emphasis on anchor building will also be included. Ability to climb and rappel at least at the beginner's level will be required. This is not a certification course.

Prerequisites
PRLS 117

Notes
Fee required.

Hours of Lecture or Seminar per week: 2

PRLS 119 - Trap and Skeet Shooting

Credits: 2
Designed to educate the student on gun and range safety. Includes hands-on learning of the games trap and skeet, where competitors fire at clay targets (approximately 4 ¾ inches in diameter and 1 ½ inches in height) launched from a trap at varying angles.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
PRLS 120 - Introduction to Backpacking

Credits: 2
This practical and experiential course is designed for students with little or no knowledge of backpacking. Involves discussions, demonstrations, and activities to teach students the basics of backpacking. Topics covered include equipment selection and use, map and compass skills, backcountry cooking, staying healthy in the outdoors, safety and emergency procedures, backcountry ethics (Leave No Trace), and natural history. Application of these skills will be realized over a four-day backpacking trip. Not only will students have the opportunity to practice these skills, but they will also develop their leadership abilities by working in a collaborative team environment.

Notes
Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 121 - Intermediate Trap and Skeet Shooting

Credits: 2
Designed to increase the skill competencies in trap shooting. Includes hands-on learning of the different trap games (16-yard, handicap, doubles, and Olympic trap shoot on a wobble trap) where competitors fire at clay targets (approximately 4 ¼ inches in diameter and 1 ½ inches in height) launched from a trap at varying angles. Gun and range safety will also be emphasized.

Prerequisites
PRLS 119 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 122 - Introduction to Horsemanship

Credits: 1
Introduces the basics of horseback riding and horsemanship. Emphasis will be on learning how to care for a horse, tack a horse, and basic riding skills. Students will learn how to walk, trot, and jump small obstacles.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 123 - Intermediate Indoor Rock Climbing

Credits: 1
Introduces the practices designed to move into the intermediate indoor climbing realm with a focus on efficient and creative body positions, including specific, more advanced techniques and strength training.

Prerequisites
PRLS 116 or permission of instructor
PRLS 124 - Pistol Marksmanship

Credits: 2
This course assumes no prior firearms experience. Through classroom instruction and field exercises, the course participant develops marksmanship skills in Olympic sport / target shooting, including: individual skills, shooting safety, position shooting, equipment care and maintenance, and shooting sports competition.

When Offered: Fall, Spring

PRLS 170 - Introduction to White-water Kayaking

Credits: 1
Designed to provide students an overview and entry-level skills and knowledge necessary to navigate rapids up to Class II difficulty and plan and execute trips on moving water. Includes instruction in, but not limited to, paddle strokes and maneuvers, boat handling, basic terminology, equipment, proper clothing, kayak design, trip planning, river safety, self and group rescue techniques, water reading, river etiquette, and environmental ethics. A high priority is placed on emphasizing safety aspects.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 173 - Basic Coastal Kayaking

Credits: 2
This course is designed to provide students with the core skills and knowledge necessary to safely paddle sea/coastal kayaks and execute trips on rivers and coastal environments. Includes instruction in, but not limited to, boat handling, terminology, kayak design, trip planning, marine hazards and safety, rules of the nautical road, weather and tides, and environmental ethics. There will be several trips within 50 miles of Mason.

Notes
Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 174 - Open Water Coastal Kayaking

Credits: 2
This course is designed to provide experienced coastal kayaking students with an introduction to advanced strokes and
maneuvers, open water rescues, on-water navigation, and safety concerns related to open water.

**Prerequisites**
PRLS 173 or permission of instructor

**Notes**
Fee required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**PRLS 175 - Introduction to Rowing**

Credits: 1  
This course is designed to provide students with the skills and knowledge necessary to row successfully in an eight-oared rowing shell. Includes instruction in, but not limited to, proper handling of rowing equipment, basic terminology, the proper execution of the rowing stroke, water safety, and team building.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**PRLS 180 - White-water Canoeing**

Credits: 2  
A practical course designed for students with little or no knowledge or skills in moving water and white-water canoeing. Involve activities to teach basic terms, rules, techniques for river safety, paddle strokes, boat control and maneuvering, reading river currents and conditions, self rescue techniques, ethics and river etiquette, and running rivers up to Class II+ in difficulty. There will be one classroom and four all-day paddling sessions on regional rivers.

**Prerequisites**
Ability to swim fully clothed for five minutes and put on a PFD in water

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**PRLS 181 - White-water Canoeing II**

Credits: 2  
A practical methods course to advance and refine the student's white-water canoeing skills with regard to paddle strokes, turns, maneuvers, boat control, and safety rescue skills.

**Prerequisites**
PRLS 180 or permission of instructor

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0
PRLS 190 - Downhill Skiing

Credits: 1
Basic skills and techniques of downhill skiing are taught and refined. Includes becoming familiar with use of ski equipment, terminology, and safety rules. Includes lecture and field experience to improve downhill skiing skills.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 191 - Snowboarding

Credits: 1
Basic skills and techniques of snowboarding are taught and refined. Includes becoming familiar with use of equipment, terminology, and safety rules. Includes lecture and field experience to improve snowboarding skills. This course also consists of demonstrations, discussions, and videos.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PRLS 195 - Introduction to Hot Air Ballooning

Credits: 2
Includes history, FAA regulations, equipment, weather, instruments, flight planning, balloon operations, and medical factors. Laboratory includes skill development as a crewmember and pilot, using an AX-8 hot air balloon. FAA student pilot certificates will be offered to all students. Although this is an introductory course, those completing it with a grade of B or better will be eligible to sit for the FAA written examination for lighter-than-air, free balloon, a requirement for the private pilot certificate.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 200 - Wilderness First Responder

Credits: 2
Examines the role of outdoor professionals in wilderness medicine and the response, care and rescue of outdoor participants in non-urban outdoor environments. Uses the Patient Assessment System (PAS) to assess backcountry patients in an intensive experiential course which addresses the issues of medico legal concerns, blood borne pathogens and infectious diseases.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 2
When Offered: Fall, Summer, Spring

PRLS 210 - Introduction to Recreation and Leisure
Credits: 3
Traces the development of current concepts of recreation and leisure and their implications and consequences. Covers influences of philosophy, religion, science, economics, sociology, and politics on discretionary time and its uses.

Notes
Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 214 - Field Study in Natural History

Credits: 3
Provides an introduction to natural history and its application in natural area interpretation through field study investigation of the environment. Covers fundamentals of bird, plant, animal, and rock identification, as well as sky and landscape interpretation.

Hours of Lecture or Seminar per week: 3

PRLS 220 - Experiential Education Theory and Application

Credits: 3
Provides a broad theoretical, as well as practical, background in teaching and learning experientially. Concepts presented, experienced, and discussed include the basic premises of experiential learning according to a wide variety of educators and philosophers. The content and experience applies to recreation, education, development, and therapeutic settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 221 - Challenge Course Facilitation

Credits: 3
Provides the fundamental principles and techniques of challenge course facilitation. Classroom learning is combined with an experiential setting through leading youth groups in the field. Students are provided with an introduction to safety, skills, and facilitation techniques for low and high elements of outdoor challenge courses.

Prerequisites
CPR Certification and PRLS 220, or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall

PRLS 241 - Practicum
Credits: 3
Paid or voluntary work experience in a park and recreation agency. Minimum period of 10 to 12 weeks of part-time employment or experience. Capstone course for minors, allowing for integration and application of course work, theories, and research to a work setting. Work sites chosen among four approved sites. Includes meetings and assignments prior to and during the practicum.

Prerequisites
PRLS 210 and 310 for majors; PRLS 210, 310, 316, 327

Corequisite
PRLS 410 for minors

Notes
Open to majors and minors only.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: PASS/FAIL

PRLS 250 - Wilderness Travel and Sustainability

Credits: 2
This experiential course is designed for students with prior backpacking experience. Involves discussions, demonstrations, and activities that teach students wilderness skills, safety and judgment, leadership and teamwork, and environmental ethics. Topics covered include basic wilderness first-aid, hazard evaluation, emergency procedures, expedition behavior, self awareness, judgment and decision making, campsite selection, shelter and stove use, fire building, sanitation and hygiene, cooking, nutrition and rationing, equipment care and selection, staying warm and dry, route finding and navigation, Leave No Trace backpacking, weather, natural history, and wilderness ethics. Application of these skills will occur during the 14-day offtrail backpacking trip in a remote wilderness area. Not only will students practice these wilderness skills, but they will also develop leadership abilities by working in a collaborative team environment.

Prerequisites
PRLS 120

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PRLS 253 - Florida Everglades Canoe Expedition

Credits: 3
Focuses on developing the knowledge and skills necessary to plan, manage, and participate in extended wilderness excursions by canoe in remote locations, while exploring a region's natural history. Students will be engaged in classroom preparation; training in canoeing and wilderness travel/living skills; group leadership; and environmental education in the Everglades National Park ecosystem. The class will travel and camp for 6 days/night in the Everglades back country by canoe as a self-contained group. Students will perform a service project in the park. For students planning careers in outdoor recreation, interpretation, and natural resources management and planning; and students with a general interest in the course topics.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 1
PRLS 300 - People with Nature

Credits: 3
Traces philosophical evolution of perceptions of and attitudes toward nature. Examines role of philosophers, scientists, nature-writers, and artists in the shaping of environmental thought. Includes extensive reading of Emerson, Thoreau, Muir, Leopold, Carson, Wilson, and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 302 - Park Management and Operations

Credits: 3
Focuses on management and operations of park resources, including the management of visitors and recreation development. Emphasizes understanding of contemporary threats to park integrity and preservation of resources. Also covers maintenance management systems.

Prerequisites
PRLS 300

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 310 - Program Planning and Design

Credits: 3
Fundamental principles and techniques of the planning process for health, fitness, and recreation programs. Covers specifying an area of need; goals, objectives, and mission statement; generating solutions; and selecting a program design for implementation.

Prerequisites
PHED 200, PRLS 210, SPMT 201, or TOUR 200

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 316 - Outdoor Education and Leadership

Credits: 3
Focuses on promotion of lifelong health and fitness via noncompetitive and informal outdoor activities. Introduces safety, skills, and leadership techniques. Covers sustainable use, conservation, and stewardship of natural resources.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PRLS 317 - Social Psychology of Play and Recreation

Credits: 3
Applies social psychological theories and research to the study of leisure, play, and recreation behavior, including correlates, antecedents, and consequences of and constraints to these concepts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 327 - Foundations of Therapeutic Recreation

Credits: 3
Covers nature and perceptions of disability and their consequences; problems of stigma, stereotype, and labeling; and principles of normalization and inclusion. Introduces therapeutic recreation model and activity assessment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 360 - Bill of Rights Issues in Parks, Schools, and Public Places

Credits: 3
Examines issues, particularly those involving First Amendment free speech and freedom of religion issues such as political protests, religious displays, and use permits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 402 - Human Behavior in Natural Environments

Credits: 3
Applies social and behavioral theories to management for recreational users of land and water resources. Examines deterioration and pollution of land and water, noise, crowding, and conflicts among users. Discusses strategies for mitigation of deleterious impacts and depreciative behaviors, and attitudes toward resource conservation, preservation, and use.

Prerequisites
PRLS 210 and 300, or permission of instructor, and 60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 405 - Planning, Design, and Maintenance of Leisure Facilities
Credits: 3
Covers quantity, location, and design standards for facilities. Includes safety, functionality, durability, and maintenance demand criteria in planning and design; programmatic and operational objectives to be met, including user comfort and convenience, crowd management, and traffic flow, and space relationships. Includes field study of local facilities.

Prerequisites
PRLS 310 or permission of instructor, and 60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 410 - Administration of RHT Organizations I

Credits: 3
Focuses on operation and management of health, fitness, and recreation services organizations. Covers management and leadership theories and techniques, problem-solving and decision making, organizational communications, design of organizational structures, and budgeting.

Prerequisites
60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 411 - Administration of RHT Organizations II

Credits: 3
Focuses on planning techniques for health, fitness, and recreation organizations. Covers program and organizational marketing principles and strategies; service quality assessment and organizational evaluation techniques; and organizational financing.

Prerequisites
PRLS 310 and 410, and 60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PRLS 416 - Issues and Trends in Therapeutic Recreation

Credits: 3
Explores the role of leisure in human development with a specific focus on needs, demands, and services for people with disabilities and illness. Presents concepts associated with leisure, aging, physical challenge, targeting leisure services, research, and public policy.

Prerequisites
PRLS 327

Notes
Field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 417 - Processes and Techniques in Therapeutic Recreation**

Credits: 3  
Exploration of processes and techniques used in Therapeutic Recreation, with a focus on the nature and diversity of recreation and leisure activities, modalities and interventions, facilitation techniques and approaches, leadership roles and tasks, communication skills, clinical supervision, health and safety considerations, and the impact of the impairment and/or treatment on the individual.

**Prerequisites**  
PRLS 327 and PRLS 416

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

**PRLS 418 - Assessment in Therapeutic Recreation**

Credits: 3  
Presents methods of assessment, development of treatment program plans, and evaluation of all components. Extends program design by developing competencies in the planning approaches, individual and group assessment techniques, program evaluation, and documentation strategies for people with disabilities and illness.

**Prerequisites**  
PRLS 327 and 416

**Notes**  
Field experience required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 435 - Recreation Special Uses and Appeals**

Credits: 3  
Management of extensive and varied commercial and noncommercial demands on federal lands. Policies and procedures used by federal land managers. Implementation, effects, and problems of permit systems; appeal provisions.

**PRLS 442 - Foundations of Public Domain Management**
Credits: 1

**PRLS 443 - Special Uses Management on Federal Lands**

Credits: 4
Special use authority and authorizations. Policies, regulations, and directives in processing applications. Coordination and administration of special uses and integration with land and resource management plans. Includes agriculture, industry, community, aviation, water, treasure trove, and cultural uses.

**PRLS 444 - Linear Uses and FERC Licenses on Federal Lands**

Credits: 3
Legislation, regulation policies, and directives governing linear uses. FERC licensing of hydroelectric power generation and distribution. Right-of-way for oil, gas, and electric transmission, railroads, communication, trams, conveyors, roads, and trails. FERC consultation, exemption, and licensing.

**PRLS 445 - Valuation and Landownership Adjustment**

Credits: 5
Landownership authority, coordination, and adjustment processes; land valuation and rules, and processes of appraisal, title exchange, purchase, donation, transfer, sale, and condemnation of properties.

**PRLS 446 - Right-of-Way Acquisition**

Credits: 3
Authorities and procedures right-of-way acquisition from public agencies and private landowners. Planning, coordination, and project scheduling requirements. Steps in the acquisition process. Cooperative development and use of roads.

**PRLS 447 - Land Status, Boundaries, Claims, and Withdrawals**

Credits: 3
Land survey and status records system, programs for maintaining and managing boundaries, handling claims and encroachments, the land status record system, and Bureau of Land Management master title plot system.

**PRLS 448 - American Indian Rights and Claims**
Credits: 3
American Indian sovereignty, Alaska Native corporations, colonization; treaties, rights, and claims; cultural resources an Indian laws and consultation with tribal governments.

**PRLS 450 - Research Methods**

Credits: 3
Covers the development of empirical research designs for both practical and theoretical problems in health, fitness, and recreation resources management. Includes literature review of hypothesized relationships, and formulation of research proposals.

**Prerequisites**
STAT 250 and 60 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 460 - Sport and Recreation Law**

Credits: 3
Emphasizes safety, liability, and risk. Covers current law and liability issues for administrators of RHT facilities and programs.

**Prerequisites**
60 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 480 - Special Topics in Parks, Recreation, and Leisure Studies**

Credits: 1-3
Selected topics reflecting interest in specialized areas of parks and outdoor recreation or therapeutic recreation.

**Prerequisites**
60 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PRLS 490 - Internship**

Credits: 12-15
Paid or voluntary work experience in a park and recreation agency for a minimum period of 10-12 weeks of full-time employment, and 480 hours for therapeutic recreation students. Applies course work, theories, and research to work settings. Work sites are chosen by students after approval of faculty supervisors. Includes meetings and assignments before and during
internship.

**Prerequisites**
90 credits; HEAL 205 and 323; PHED 200; and PRLS 210, 310, 316, and 410

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 12  
**Grading:** PASS/FAIL

---

**PRLS 499 - Independent Study**

Credits: 1-3  
Individual study of topic area in leisure research, theory, or practice under direction of faculty.

**Prerequisites**
90 credits

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**PRLS 501 - Introduction to Natural Resources Law**

Credits: 3  
Selected legal issues involving conflicting use and preservation demands on our nation's limited natural resource base, particularly those involving public lands, open space, and recreation resources. Uses case studies of recent court decisions.

**Prerequisites**
PRLS 460 and 90 credits, graduate status, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 503 - Disability Rights Law in Therapeutic Recreation**

Credits: 3  
Overview of major law and policy issues related to therapeutic recreation services for people with disabilities. Primary focus is on the Americans with Disabilities Act and related federal legislation.

**Prerequisites**
PRLS 460 and 90 credits, graduate status; or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 526 - Environmental Education and Resource Interpretation**
Credits: 3  
Provides methods for communicating and disseminating information pertaining to the use of natural recreation resources. Covers design and implementation of educational materials and programs to enhance understanding and appreciation of cultural, historical, and natural resources.

**Prerequisites**  
PRLS 402 or permission of instructor, and 90 credits

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 531 - Natural Resources Recreation Planning**

Credits: 3  
Origins and evolution of recreation use philosophy, policies, and service of public estate management. Examines planning for a spectrum of opportunities, from wilderness to developed sites, with attention to financial consideration and sustainable use of cultural and visual resources.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 533 - Visitor Services**

Credits: 3  
Examines motivation of resource-based recreation participants. Covers visitors' expectations and perceptions, with emphasis on implication for service quality, staff training, and other management responsibilities. Discusses use and user conflicts and placement, information and interpretive service, and human and other interpretive service resources.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 535 - Evaluating Recreation Outcomes**

Credits: 3  
Covers application of quantitative and qualitative research methods to the evaluation of programs provided to visitors and users of public lands for outdoor recreation. Focuses on needs assessment and application of meaningful measures for formative and summative evaluations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PRLS 542 - Foundations of Public Domain Management**
Credits: 1

**PRLS 560 - Liability and Risk Management**

Credits: 3
Examines liability and risk; federal jurisdiction, legal apparatus, and decision-making; and analysis of resource-based recreation case law.

*Hours of Lecture or Seminar per week: 3*
*Hours of Lab or Studio per week: 0*

**PRLS 598 - Special Topics**

Credits: 1-6
Projects related to parks, recreation, and leisure studies.

*Prerequisites*
90 credits

*Notes*
May be repeated for a total of 6 credits.

*Hours of Lecture or Seminar per week: 1-6*
*Hours of Lab or Studio per week: 0*

**PRLS 599 - Independent Study**

Credits: 1-3
Study of a problem area in parks, recreation, and leisure studies research; theory or practice under the direction of faculty member.

*Prerequisites*
90 credits

*Notes*
May be repeated. No more than 3 credits may be earned.

*Hours of Lecture or Seminar per week: 1-3*
*Hours of Lab or Studio per week: 0*

**PRLS 601 - History of Leisure and Sport in American Society**
Credits: 3
Examines leisure and sport in American society from the early colonial period to the present day. Investigates the pattern of leisure and sport as America moved from a largely agrarian to a highly industrialized nation.

Hours of Lecture or Seminar per week: 3

PRLS 610 - Recreation Administration and Planning

Credits: 3
Examines recreational administration concepts regarding organizational structure and operations, personnel management, financing, policy development, and public relations procedures.

Hours of Lecture or Seminar per week: 3

PRLS 611 - Social Psychology of Leisure

Credits: 3
Addresses historical, theoretical, and empirical foundations of social psychological constructs relative to social behavior in park, recreation, sport, and tourism settings. Focuses on attitudinal, social, and motivational theories as applied to leisure-related contexts.

Prerequisites
Graduate student status

Hours of Lecture or Seminar per week: 3

PRLS 612 - Philosophy of Leisure and Sport

Credits: 3
Investigates the phenomenon of leisure and sport from a philosophical perspective. Utilizes the philosophical approach to better explain the role that leisure and sport play in American society.

Hours of Lecture or Seminar per week: 3

PRLS 614 - Legal Issues in Recreation Administration

Credits: 3
Surveys current legal issues relevant to Recreation Administration, including, but not limited to, tort law, civil rights law, employment law, constitutional law, and copyright law. This course uses case studies of recent court decisions.

Prerequisites
Graduate status or permission of instructor

Hours of Lecture or Seminar per week: 3
PRLS 635 - Recreation Special Uses and Appeals

Credits: 3
Management of extensive and varied commercial and noncommercial demands on federal lands. Policies and procedures used by federal land managers. Implementation, effects, and problems of permit systems; appeal provisions.

PRLS 643 - Special Uses Management on Public Lands

Credits: 4
Special use authority and authorizations. Policies, regulations, and directives in processing applications. Coordination and administration of special uses and integration with land and resource management plans. Includes agriculture, industry, community, aviation, water, treasure trove, and cultural uses.

PRLS 644 - Linear Uses and FERC Licenses on Federal Lands

Credits: 3
Legislation, regulation policies, and directives governing linear uses. FERC licensing of hydroelectric power generation and distribution. Right-of-way for oil, gas, and electric transmission, railroads, communication, trams, conveyors, roads, and trails. FERC consultation, exemption, and licensing.

PRLS 645 - Valuation and Landownership Adjustment

Credits: 5
Landownership authority, coordination, and adjustment processes; land valuation and rules, and processes of appraisal, title exchange, purchase, donation, transfer, sale, and condemnation of properties.

PRLS 646 - Right-of-Way Acquisition

Credits: 3
Authorities and procedures right-of-way acquisition from public agencies and private landowners. Planning, coordination, and project scheduling requirements. Steps in the acquisition process. Cooperative development and use of roads.

PRLS 647 - Land Status, Boundaries, Claims, and Withdrawals

Credits: 3
Land survey and status records system, programs for maintaining and managing boundaries, handling claims and encroachments, the land status record system, and Bureau of Land Management master title plot system.
PRLS 648 - American Indian Rights and Claims

Credits: 3
American Indian sovereignty, Alaska Native corporations, colonization; treaties, rights, and claims; cultural resources an Indian laws and consultation with tribal governments.

PRLS 670 - Environmental Law

Credits: 3
Focuses on interpretation of environmental laws and regulatory issues. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies involving endangered species, hazardous waste, and toxic substances.

Prerequisites
Graduate status and courses in ecology and environmental biology, or permission of instructor

Hours of Lecture or Seminar per week: 3

Philosophy

PHIL 100 - Introduction to Philosophy

Credits: 3
Introduction to the nature of philosophical reasoning and some of the main problems of philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 112 - Ethics and the Cybersociety

Credits: 1
Examines ethical issues associated with new developments in information technology, including privacy rights, intellectual property rights, and the effect of information technology on society.

Satisfies General Education Requirement: Information technology (IT, Ethics)

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHIL 151 - Introduction to Ethics
Credits: 3
Considers some perennial issues in ethical theory.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 156 - What Is Art?**

Credits: 3  
Introduction to philosophical reflection on the arts by looking at the critical issues in the history of aesthetics. Applies considerations to specific works and exploring these works in terms of their historical contexts and influences. Concentrates on one form of art or one period and always emphasizes questions of critical evaluation and art historical analysis.

Satisfies General Education Requirement: Arts

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 173 - Logic and Critical Thinking**

Credits: 3  
Basic concepts and techniques of deduction, emphasizing the modern treatment of such topics as quantification and rules of inference, with study of the classical treatment. Basic principles of induction, informal fallacies, and uses of logic in everyday life.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 253 - Philosophy and Literature**

Credits: 3  
Examines differences and relations between literary and philosophical texts. Examines texts from a given period in the history of literature and philosophy. Topics include the presence of common issues in literary and philosophical writings, the influence of philosophical ideas on the production of literary texts and literary theory, and the development in literary texts of issues that are possible objects of philosophical inquiry.

Satisfies General Education Requirement: Literature

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHIL 254 - Contemporary Ethical Problems**
Topics include homosexuality, abortion, drugs, civil disobedience, capital punishment, and rights of individual versus the rights of society.

**PHIL 301 - History of Western Philosophy: Ancient**

Credits: 3
Classical Greek philosophy, including pre-Socratics, Socrates, Plato, and Aristotle.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 302 - History of Western Philosophy: Medieval**

Credits: 3
Figures and problems of medieval philosophy. Study of leading thinkers from the 5th to the 15th centuries.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 303 - History of Western Philosophy: Modern**

Credits: 3
Figures and problems of modern philosophy. Study of philosophers such as Descartes, Locke, Berkeley, Hume, Kant, and Hegel.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 305 - Business Ethics**

Credits: 3
Examines some moral problems that arise with regard to the responsibilities of various segments of the business community, including employers, management, stockholders; to one another; to the consumer; and to society at large.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 309 - Bioethics**
Examines some major moral issues involved in practice and research in medicine and health care. Topics to be chosen from medical experimentation, definition of death, physician-assisted dying, genetics and human reproduction, distribution of scarce resources, fertility, and organ transplants.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
Completion or concurrent enrollment in all other general education courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHIL 311 - Philosophy of Law**

Credits: 3  
Investigation of theories of natural law, legal positivism, and legal realism as they pertain to some of the central philosophical questions about law.

**Prerequisites**
3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHIL 312 - Philosophy of Technology**

Credits: 3  
Philosophical examination of modern technology in its broadest human context. Several alternative philosophies of technology are considered. Examines the relationships between technology and religion, economics, and politics. Ethical issues raised by the use of technology are also examined. Typically, the course focuses on the ethical issues raised by the use of one kind of technology.

**Prerequisites**
3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHIL 313 - Philosophy of Religion**

Credits: 3  
Study of classical appeals to philosophy in support of belief in god's existence (Philo, Augustine, Anselm, Aquinas, Descartes); the fideism of Hume and the metaphysical agnosticism of Kant; the concept of religious experience in the philosophies of Hegel, Schleiermacher, and Kierkegaard; and the problem of religious language in contemporary empirical philosophy.

**Prerequisites**
3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 323 - Classical Western Political Theory

**Credits:** 3  
Exploration through lecture and discussion of developments in the Western tradition of political thought from the time of the Greek city-state to late medieval Christendom, focusing on such topics as the nature and purpose of politics, the relationship between the individual and the state, the political significance of religion and tradition, and the concept of natural law.

**Prerequisites**  
GOVT 101, or 3 credits of philosophy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 324 - Modern Western Political Theory

**Credits:** 3  
Exploration through lecture and discussion of developments in the Western tradition of political thought from the Renaissance to the middle of the 19th century, focusing on such topics as the rise of individualism in political theory, early developments in social contract theory, theories of radical popular sovereignty, and early criticisms of liberal theory.

**Prerequisites**  
GOVT 101, or 3 credits of philosophy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 325 - Karl Marx's Social and Political Thought

**Credits:** 3  
Study and evaluation of Marx's social and political ideas based on writings selected from several phases of his career. Examination of relation of Marx's thought to post-Marxian socialist theory and practice.

**Prerequisites**  
3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 327 - Contemporary Western Political Theory
Credits: 3
Exploration through lecture and discussion of recent developments in the Western tradition of political thought from the middle of the 19th century to today. Different sections of this course will focus on one or another of the various political theories that have been influential during this period, such as liberal, libertarian, conservative, communitarian, Marxist, feminist, and postmodern thought.

Prerequisites
GOVT 101, or 3 credits of philosophy.

Notes
This course can be retaken for credit when the subject matter is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 332 - Twentieth-Century Analytic Philosophy

Credits: 3
Examination of the attempts of 20th-century philosophers to solve philosophical problems by an analysis of language. Figures and movements covered include Russell, Moore, Wittgenstein, logical positivism, and ordinary language philosophy.

Prerequisites
3 credits of logic and PHIL 303, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 335 - Nineteenth-Century Philosophy

Credits: 3
Development of German Romanticism and Idealism during a brilliant period in the history of the West rivaled only by ancient Greece. Kant, Fichte, Hegel, Kierkegaard, Schopenhauer, and Nietzsche mount a revolt against the rationalism and scientism of the modern world.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 336 - Twentieth-Century Continental Thought: Existentialism

Credits: 3
Examination of existential philosophy from its 19th-century origins to its 20th-century expressions. Philosophers studied include Kierkegaard, Nietzsche, Sartre, De Beauvoir, and Buber.

Prerequisites
PHIL 337 - Twentieth-Century Continental Thought: Phenomenology

Credits: 3
Examines phenomenological way of doing philosophy, its findings in regard to the "life-world," questions of "first philosophy," and the subject matter of the social sciences, as well as critical difficulties in its development. Texts by Husserl, Heidegger, Merleau-Ponty, Sartre, Schutz, and Derrida.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 338 - Woman: The Philosophical Questions

Credits: 3
Exploration of the meaning and politics of the question of woman that puts the idea of woman into question. Recognizing the historical context of this issue, the ways in which the structures of patriarchy situate woman as the other and determine the meanings of sexuality, subjectivity, the body, and language are examined. One overriding theme is relationship between the "woman" question and other central issues of contemporary philosophy.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 340 - Hermeneutic Philosophy

Credits: 3
Study of the development of hermeneutic philosophy in works by Heidegger, Gadamer, and Ricoeur, as an effort toward coming to terms with the historicity of human experience. Implications for interpretive understanding of artworks, institutions, events, texts, and the human condition.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PHIL 343 - Issues in Environmental Ethics**

Credits: 3  
Philosophical examination of issues in environmental ethics, such as moral status of animals, moral significance of nature, duties to protect wilderness areas, economics and environment protection, and environmental justice.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
Completion or concurrent enrollment in all other required general education courses.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

---

**PHIL 349 - Christian Ethics**

Credits: 3  
Examines the foundations of Christian and Jewish ethics from the Hebrew Bible and studies the meaning of Christian teachings. Examines Catholic, Orthodox, and Protestant texts as the framework to explore various Christian positions on major ethical issues such as war, embryonic stem cell research, abortion, and euthanasia in order to understand the meaning of the Christian life as it is faithfully practiced by members of the major Christian groups.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

---

**PHIL 354 - Topics in Modern Jewish Thought**

Credits: 3  
Surveys modern Jewish thought, engaging some of the most important themes of this period including Jewish responses to rationalism, romanticism, idealism, existentialism, and legalism. Studies work from Baruch Spinoza to Emanuel Levinas.

Equivalent to RELI 354

**Prerequisites**
3 credits in religious studies or philosophy or permission of instructor.

**Notes**
Students may not receive credit for both PHIL 354 and RELI 354

*Hours of Lecture or Seminar per week: 2.5*

---

**PHIL 355 - Theories of Ethics**

Credits: 3  
A critical examination of a variety of different types of classical, modern, and contemporary ethical theories, including consequentialist theories, deontological theories, and virtue theories.
Prerequisites
Three credits in philosophy or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 356 - Philosophy of Art

Credits: 3
Basic problems that arise from an inquiry into meaning and value of art and our response to art.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 357 - Philosophy of the Social Sciences

Credits: 3
Philosophical issues relating to competing methodologies for the social sciences. Analysis and critique of mainstream positivism and behaviorism; paradigm theory and scientific revolutions; interpretive understanding and hermeneutical science; phenomenology and the social construction of reality; ethnomethodology and situational meaning; analytic philosophy and action theory; the "idea" of a social science; sociology of knowledge and theory of ideology; and Western Marxism and critical theory.

Equivalent to SOCI 599

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 371 - Philosophy of Natural Sciences

Credits: 3
One semester of logic recommended. Study of aims and methodology of science. Among the questions of concern are: What constitutes a good scientific explanation? What grounds are used for comparing rival theories? Is there a special method of scientific discovery?

Prerequisites
3 credits of philosophy, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 372 - Philosophical Methods

Credits: 3
Study of the relationship between a philosopher's method, doctrine, and concept of truth. Philosophers studied vary but include representatives from among the empirical, analytical, phenomenological, hermeneutical, and structuralist movements.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 373 - Theory of Knowledge

Credits: 3
Discussion of basic problems concerning the nature of knowledge, with study of the relation of knowledge to perception, belief, and language.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 374 - Philosophy of Mind

Credits: 3
Investigation of such theories as dualism, behaviorism, and materialism as they pertain to some of the central philosophical questions about mind.

Prerequisites
3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 375 - Metaphysics

Credits: 3
Study of basic problems concerning being in general and foundations of individual being; traditional treatments of such problems and criticism of possibility of such knowledge. Selected readings from Plato, Aristotle, Aquinas, Spinoza, Leibniz, Kant, Bradley, Heidegger, and others.

Prerequisites
3 credits of philosophy, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 376 - Symbolic Logic

Credits: 3  
Study of predicate calculi by means of a step-by-step construction of artificial languages. Topics include procedures for constructing a calculus, proof techniques, significant properties of predicate calculi, and procedures for recognizing phrases.

**Prerequisites**  
PHIL 173 or MATH 110, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 377 - Darwin: Biology and Beyond

Credits: 3  
Introduction to and philosophical examination of the theory of evolution in its historical perspective. Examines Darwin's theory of evolution as a scientific theory, connect it to its context in the history of science, and survey its wider cultural impact. In particular, examine implications of the theory of evolution for religion and morality.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
Completion or concurrent enrollment in all other required general education courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHIL 378 - Reason, Science and Faith in the Modern Age

Credits: 3  
Historical examination of the rise of sciences in the modern age (1500-present) and the impact this has had on religion, drawing from such thinkers as Luther, Bacon, Galileo, Newton, Pascal, Hume, Darwin, Kierkegaard, and James.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
Completion or concurrent enrollment in all other required general education courses, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PHIL 391 - Special Topics in Philosophy

Credits: 3
Examines topics of current interest, such as death and dying, rights of children, or philosophical controversies in modern physics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 392 - Special Topics in Philosophy

Credits: 3
Examines topics of current interest, such as death and dying, rights of children, or philosophical controversies in modern physics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 421 - Seminar

Credits: 3
Students with fewer credits in philosophy may be admitted, at the discretion of the professor, if the topic is sufficiently close to their field of study.

Prerequisites
9 credits in philosophy.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 422 - Honors Seminar

Credits: 3
Seminar for students enrolled in the honors program in philosophy.

Prerequisites
9 credits in philosophy and acceptance to the honors program in philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 425 - Independent Study
Credits: 1-3
Independent study under supervision of faculty member. Students and faculty agree on program of study to include at least a reading list and final written project. Students must arrange for independent study in the semester before they wish to enroll. Requires approval of department.

**Prerequisites**
60 credits, including 15 credits in philosophy and permission of department.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week**: 1-2
**Hours of Lab or Studio per week**: 0

---

**PHIL 427 - Feminist Political Thought**

Credits: 3
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

**Prerequisites**
GOVT 101 or WMST 200, or 3 credits of philosophy; or permission of instructor.

**Hours of Lecture or Seminar per week**: 3
**Hours of Lab or Studio per week**: 0

---

**PHIL 428 - Advanced Democratic Theory**

Credits: 3
Explores various theoretical approaches to nature and justification of democracy. Topics may include liberal, communitarian, pluralist, and deliberative theories and their critics; constitutionalism; role of markets; and transnational democracy.

Equivalent to GOVT 428

**Prerequisites**
GOVT 101 or one course in philosophy.

**Hours of Lecture or Seminar per week**: 3
**Hours of Lab or Studio per week**: 0

---

**PHIL 429 - International Ethics**

Credits: 3
Examines key value issues in international affairs, including global justice and poverty, human rights and the extension of democracy, and preservation of environment in view of economic globalization, persistence of nationalism, and new forms of war and terrorism.
Prerequisites
Course in philosophy, or GOVT 101.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 470 - Seminar: Philosophical Examination of Social Issues and the Law

Credits: 3
Philosophical study of social issues that are subject to legislation and judicial review. Analysis of the purpose and function of law in society lays the groundwork for reflection on specific issues such as abortion, euthanasia, capital punishment, divorce, child care, and health care.

Prerequisites
3 credits in philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 471 - Honors Seminar

Credits: 3
Honors version of PHIL 470.

Prerequisites
9 credits in philosophy and acceptance to the honors program in philosophy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 510 - Seminar in Ethics of Health Care

Credits: 3
Examination of moral dilemmas within the health care profession on ethical theories and principles. Special emphasis on patients' rights, social justice of health care, and evolving health care technologies.

Prerequisites
90 credits, graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 602 - Plato: Selected Dialogues
A study of the central issues in the philosophy of Plato through a close reading of selected dialogues. Issues investigated will include the questions of the possibility of knowledge, the nature of being, and of the good.

Prerequisites
Graduate standing.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 603 - Aristotle: Selected Works

Credits: 3
Close study of Aristotle's work and its place and future in history of philosophy. Topics vary by semester, and include Aristotle's metaphysics, natural sciences, ethics, political thought, logic, epistemology, and psychology.

Prerequisites
Graduate standing.

Notes
May be repeated once with permission of department when topics and readings differ significantly.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 604 - Augustine and Aquinas

Credits: 3
Critical examination of philosophies of Augustine and Aquinas with special attention to the mode of argument of each.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 605 - Mind-Body Problem in Early Modern Philosophy

Credits: 3
Examines views of major early modern philosophers on issues such as mind and body interaction, personal identity, and freedom of the will, as well as of interpretations of these philosophers by historians of philosophy.

Prerequisites
Graduate standing.
PHIL 608 - Hegel's Phenomenology of the Spirit

Credits: 3
A study of the philosophy of Hegel through a reading of the text that presents an introduction to his system. Special attention is paid to Hegel's background in the work of Kant and the German Idealists.

Prerequisites
Graduate standing.

PHIL 611 - Philosophy of Law

Credits: 3
Examines major jurisprudential theories that underpin law in Western society. After examining the theories, students apply them to contemporary social and political problems.

Prerequisites
Graduate standing, or permission of instructor.

PHIL 615 - Postmodernist Thought

Credits: 3
In recent decades, the term "postmodern," first used by art critics in the late 19th century, has been taken up by prominent contributors to the arts, social thinkers, and philosophers, to describe developments as well as the current period. Examines three thematic concerns found in work that is identified with postmodern issues: what modernity defines itself in contrast to or against, the status of "man," and status of "subjectivity."

Prerequisites
Graduate standing, or permission of instructor.

PHIL 616 - Phenomenology
This major approach in philosophy is studied in regard to its basic features, the tasks to which it has been set by major contributors, certain findings of phenomenology in practice, as well as crucial problems that develop as phenomenology proceeds and how they are addressed by phenomenologists.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 617 - Movements and Issues in the History of Political Philosophy**

Credits: 3
Explores themes, movements, and periods in the history of political theory.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 618 - Contemporary French Feminism**

Credits: 3
Examines philosophical contexts of existential-phenomenological and psychoanalytic French Feminist. It explores the ways in which French feminist thought has influenced continental philosophical thinking and international feminist theory.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHIL 621 - Philosophy of Science**

Credits: 3
Explores whether and how scientific advances can be achieved. Special attention is paid to relativism and rationalism debates and to the role of technology in science.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
PHIL 631 - Freud and Philosophy

Credits: 3
Explores philosophical aspects of Freud's thought, focusing on Freud's philosophy of human nature and culture, and influence on contemporary thought.

Prerequisites
6 credits of philosophy, course in personality theory, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 632 - Twentieth-Century Logical Positivism

Credits: 3
Examines 20th century logical positivism and its place in the history of philosophy. Topics include Russell's logical atomism and theory of descriptions, program of the Vienna Circle, attempts to formulate empiricist criteria of meaning, and legacy left by the movement.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 640 - History of Ethical Theory

Credits: 3
Examines history of Western ethical theory from ancient Greece to the present day, including virtue theory, consequentialism, deontological theory and contemporary feminism.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 641 - Ethics and the Professions

Credits: 3
A philosophical analysis of the concept of profession as a category of the world of work. Professional codes of ethics are examined to determine their effectiveness as guides for professional conduct.

Prerequisites
Graduate standing, or permission of instructor.
PHIL 642 - Biomedical Ethics

Credits: 3
Explores the application of ethical theories and principles to issues in contemporary health care. Cases central to the development of the field will be examined.

Prerequisites
Graduate standing, or permission of instructor.

PHIL 643 - Environmental Ethics

Credits: 3
An examination of human interactions with the natural environment from an ethical perspective. Emphasis will be placed on the strengths and weaknesses of various ethical theories and the different conceptions of the proper relationship between humans and their environment.

Prerequisites
Graduate standing.

PHIL 644 - Business and Organizational Ethics

Credits: 3
Examines organizational culture as necessary for ethical development and of the application of ethics in business and organizational settings.

Prerequisites
Graduate standing.

PHIL 645 - Research Ethics

Credits: 3
Ethical theories, concepts, and principles, and how these shape research guidelines. Students learn to identify ethical issues in
research, to reflect on them critically, and to respond effectively. Designed for students in the humanities, social sciences, life sciences, and health sciences.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PHIL 646 - International Ethics**

Credits: 3  
Considers normative issues in international affairs, including global distributive justice, just war, foundations of human rights, harms to women, cultural and national identities, possibilities for transnational democracy, responsibilities of global corporations, and environmental ethics.

**Prerequisites**  
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PHIL 658 - Feminist Theory**

Credits: 3  
Analysis of the critique of patriarchy offered by contemporary continental feminist philosophers. Examines contemporary moral, political, and epistemological issues in feminist theory.

**Prerequisites**  
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PHIL 673 - Current Issues in Theory of Knowledge**

Credits: 3  
Advanced exploration of conditions and limits of knowledge, from the perspective of contemporary philosophy. Is there any infallible, or fallible but at least reasonable, foundation for achieving an understanding of the world and of our minds? This question is examined from the perspective of sense datum theory, coherentism, and various naturalized epistemologies. The nature of a priori knowledge (from mathematics and logic) is also examined.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**
PHIL 681 - Ancient Philosophical Figures

Credits: 3
Examines major philosophical authors of crucial philosophical texts and their influence on philosophical thought.

Prerequisites
Graduate standing.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 682 - Early Modern Philosophical Figures

Credits: 3
Examines major philosophical authors of the early modern period and their influence on philosophical thought.

Notes
May be repeated once for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 683 - Contemporary Philosophical Figures

Credits: 3
Examines major recent philosophical authors and their influence on philosophical thought.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 691 - Special Topics in Ancient Philosophy

Credits: 3
Examines topics of current interest in ancient philosophy.

Prerequisites
Graduate standing, or permission of instructor.

Notes
May be repeated once for credit.

Hours of Lecture or Seminar per week: 3
PHIL 692 - Special Topics in Early Modern Philosophy

Credits: 3
Topics vary.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 693 - Directed Readings in Philosophy

Credits: 3
Directed readings and research on specific topic in philosophy chosen by student and instructor.

Notes
May be repeated for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHIL 694 - Special Topics in Contemporary Philosophy

Credits: 3
Topics vary.

Notes
May be repeated once for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 719 - Phenomenology of World

Credits: 3
Studies one of the most fully deployed and enduring themes in phenomenological philosophy, namely, sense of "world."
Philosophers covered include Husserl, Heidegger, and Merleau-Ponty.

Prerequisites
Previous course in phenomenology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHIL 720 - Nietzsche and his Readers

Credits: 3
Reading of major texts of Nietzsche and some of his most influential interpreters and critics.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 721 - Advanced Seminar in Philosophy

Credits: 3
Close study of selected topics in current philosophical discourse.

Prerequisites
Graduate standing.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 733 - Current Issues in Cognitive Science

Credits: 3
Examines current areas of investigation in cognitive science and philosophy of mind, such as nature of consciousness, and representational and connectionist theories of mind.

Prerequisites
Admission to master's program in philosophy or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHIL 799 - Thesis

Credits: 1-6
Develop research and write an original thesis under the direction of their thesis director.

Prerequisites
Completion of 24 credits, approval of the thesis proposal, and permission of instructor (thesis director).

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Physical Education

PHED 102 - Introduction to Soccer

Credits: 1
This course is designed to introduce individuals to the basic elements of soccer. This includes dribbling, kicking, passing, trapping, tactics, and strategy.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 103 - Fencing I

Credits: 1
Gives the beginning student basic knowledge of the sport of fencing and teaches the fundamental movements required in the sport. Students should expect to learn some officiating and etiquette of the sport and acquire the ability to fence at the novice level. The instructor will use any combination of the following: instructional videos, written handouts, guest fencers for demonstrations, drills, and group and individual instruction.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 105 - Aerobics and Basic Conditioning

Credits: 1
Introduce students to fitness and healthy lifestyles. The course is designed to provide students with four lectures and multiple cardiovascular workouts. The lectures include cardiovascular endurance, cardiovascular diseases, body composition, nutrition, and weight management. The class also teaches students how to use cardiovascular equipment and how to design an aerobic fitness program. The course is geared for beginners, yet all students will be helped on an individual basis (therefore advanced individuals can also participate).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 107 - Social Dance
PHED 108 - Weight Training and Body Conditioning

Credits: 1
Introduces students to fitness and healthy lifestyles. The course is designed to provide students with an overview of the various types of weight training but primarily emphasizes circuit weight training method. There will usually be a brief lecture each week with a longer one two or three times during the semester. The lectures include the five health-related components of physical fitness, nutrition, and weight management. The class also teaches students how to use resistance and cardiovascular equipment, and how to design fitness programs. The course is designed for beginners, yet all students will be helped on an individual basis (therefore advanced individuals can also participate).

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 110 - Beginning Swimming

Credits: 1
Develops a knowledge base and basic swimming skills for the weak swimmer and nonswimmer, and make them water safe. These skills include, but are not limited to, locomotion and propulsive movements in a prone and supine position, breath control, rhythmic breathing, beginning diving techniques, personal safety, and rescue skills to maintain a water-safe environment.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 113 - Latin Dance

Credits: 1
Provides students with a knowledge base of dance fundamentals and skill development in various Latin dances and includes basic rhythms, dance positions, floor alignments, techniques of leading and following, and maintenance of dance frame in partner dancing.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 118 - Advanced Life Guarding
Credits: 1
Introduces and develops skills and knowledge necessary to become an American Red Cross-certified lifeguard. Focus is on training participants in aquatic facility and patron safety, in-water rescue skills, and physical conditioning. It teaches the lifeguard candidates to prevent, recognize, and respond to aquatic-related emergencies.

**Prerequisites**
PHED 150 or permission of instructor

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**PHED 120 - Introduction to Basketball**

Credits: 2
Introduces individuals to the basic elements of basketball. This includes dribbling, passing, shooting, tactics, and strategy.

**Hours of Lab or Studio per week:** 1

**PHED 127 - Social Dance II**

Credits: 1
Provides an introduction to the tango and additional patterns for the fox trot, waltz, cha-cha, rumba, and Eastern swing.

**Prerequisites**
PHED 107 or permission of instructor

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**PHED 128 - Fencing II**

Credits: 2
Reviews the advanced footwork and handwork techniques learned in Fencing I and expands on the third component of the sport, strategic tactics. Students are introduced to the rules and protocol of competitive fencing and use electric scoring equipment and electric fencing gear.

**Prerequisites**
PHED 103 or permission of instructor

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

**PHED 129 - Introduction to Yoga**
Credits: 1
Introduces students to the practice of Hatha yoga. Class emphasis will be on learning yoga asanas (postures) and pranayama (breathing exercises) to enhance physical fitness and mental concentration.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 130 - Intermediate Yoga

Credits: 1
Class emphasis will be on mastering yoga asanas (postures) and pranayama (breathing techniques) to enhance physical fitness and mental concentration. Students will learn 10 new yoga poses and practice the complete Sun Salutation.

Prerequisites
PHED 129 or permission of instructor

Notes
Expands on the yoga practices taught in PHED 129.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 131 - Introduction to Pilates

Credits: 1
Provides the history and basic foundations of Pilates including an introduction to beginning Pilates exercises and their proper execution; exploration of modifications for certain exercises and the various props which may be used in the group class setting.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 21
When Offered: Fall, Spring

PHED 134 - Self-Defense for Men and Women

Credits: 1
A practical self-defense course designed for students with little or no background in martial arts or self-defense. Defensive and offensive techniques are taught to prepare students for any potentially dangerous event they may encounter. The course will also improve student's physical and mental fitness.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PHED 135 - Self-Defense for Men and Women II

Credits: 1
A continuing practical self-defense course designed for students with a basic self-defense skill level or minimal martial arts experience. More advanced defensive and offensive techniques will be taught building on the student's previous training. Continued improvement in the student's physical and mental fitness will also be emphasized.

Prerequisites
PHED 134

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 136 - Tae Kwon Do

Credits: 1
A beginner-level course designed to develop basic skills of Tae Kwon Do, a Korean martial art that predominantly emphasizes kicking.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 137 - Intermediate Tae Kwon Do

Credits: 1
An intermediate-level course that continues to develop basic skills of Tae Kwon Do. Course instruction continues to focus on the student's mental development, as well as physical training.

Prerequisites
PHED 136 or permission of instructor

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 138 - Brazilian Jiu-Jitsu
Credits: 1
A practical self-defense course instructing students in Brazilian Jiu-Jitsu techniques designed for students who have no prior experience in martial arts or Brazilian Jiu-Jitsu. Brazilian Jiu-Jitsu's primary goal is to give advantage to those who use correct form, posture, and technique over strength.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 139 - Brazilian Jiu-Jitsu II for Men and Women

Credits: 2
A beginner-to-intermediate-level course teaching techniques in Brazilian Jiu-Jitsu. Students will learn specific defensive techniques to be used against an attacker along with escapes and submissions from a variety of different attacks. Students will participate in basic sparring with particular attention to safety. Students will also undergo an intensive training and conditioning routine.

Prerequisites
PHED 138 or permission of instructor

Notes
Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 140 - Golf

Credits: 1
A practical course designed for students with little or no golf knowledge. The course involves activities to teach students basic golf terms, rules, and techniques for the full swing, putting, chipping, and pitching, as well as playing on a golf course.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 144 - Intermediate Golf

Credits: 2
A practical course designed for students with basic golf knowledge and skills. The course will include course strategies, course management, the proper use of the rules, club selection, speed of play, skill building, and different golf formats.

Prerequisites
PHED 140 or permission of instructor

Notes
Fee required.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 145 - Beginning Judo for Men and Women

Credits: 1
This is an introduction to Judo in which students will learn basic body mechanics of throwing, sweeping, grappling, and submission. Students will learn the fundamentals in these areas both for self-defense and sport. The history of judo, rules of the sport, and proper safety and falling techniques will be presented.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 146 - Introduction to Badminton

Credits: 1
A practical course designed as an introduction to badminton. Students learn badminton terms; scoring rules; and techniques for forehand, and backhand, and the serve. Students are also introduced to basic strategy for singles and doubles play.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 147 - Advanced Tae Kwon Do

Credits: 2
Advanced-level course that continues to enhance and refine skills of Tae Kwon Do. Students develop more extensive jump and spin kicks, as well as combinations of the same. Provides brown to black belt levels of promotion and continues to focus on each student's mental development and physical training.

Prerequisites
PHED 137 or permission of instructor

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PHED 149 - Tai Chi
A beginner-level course designed to increase awareness of the mind and body. Students will be introduced to basic principles of Chi (energy) and Yin Yang (polarity) and how these apply to their bodies through practicing the Tai Chi Chih movements.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 150 - Intermediate Swimming

Credits: 1
A course designed to build on basic-level swimming skills by providing practice for confidence, refinement of coordination, and improvement of other aquatic skills. Presents more advanced swimming strokes and focuses on physical conditioning and aquatic safety.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 151 - Introduction to Tennis

Credits: 1
A practical course designed as an introduction to tennis. Involves activities to teach students tennis terms, rules, scoring, techniques for the forehand and backhand ground strokes, volley, overhead, and serve, as well as basic strategy for singles and doubles.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 153 - Intermediate Tennis

Credits: 1
A practical course designed for the novice tennis player. Involves such activities as control of pace, direction, and depth on forehand and backhand ground strokes; the use of topspin and under spin; tactical use of the volley; styles of play; and strategy for singles and doubles.

Prerequisites
PHED 151 or demonstrated ability

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 155 - Introduction to Springboard Diving

Credits: 2
A beginner-level course designed to increase awareness of the sport of diving, safety issues pertaining to competitive and
recreational diving, competition formats, and history and evolution of the sport and scoring systems. Students will be introduced to fundamental skill progressions leading to basic dives.

**Prerequisites**
PHED 150 or permission of instructor

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

**PHED 156 - Intermediate Springboard Diving**

Credits: 2
Students build on the fundamental skill progressions and perform more advanced skills and dives than in the introductory course (PRLS 155). Designed to increase awareness of the sport of diving, safety issues pertaining to competitive and recreational diving, competition formats, history and evolution of the sport, and scoring systems.

**Prerequisites**
PHED 155 or permission of instructor

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 0

**PHED 157 - Aikido for Men and Women**

Credits: 1
Designed for students who have no prior experience in martial arts. Can benefit those with a solid martial arts background. Mind-body techniques useful to all athletes and students are taught in a classical martial art self-defense context. Involves mind-body coordination exercises, and solo and partner practice. Gives all students a chance to execute throws, locks, and pins, both as the thrower and the one who takes falls.

**Hours of Lecture or Seminar per week:** 1
**Hours of Lab or Studio per week:** 0

**PHED 158 - Underwater Hockey**

Credits: 1
Designed to provide basic instruction in the fundamentals of underwater hockey. Students learn free diving and snorkeling activities in preparation for underwater hockey. They will learn about and experience physiological reactions to aquatic submersion. Significant attention throughout this course will be given to safety issues related to underwater training, emphasizing current and lifelong skills.

**Prerequisites**
PHED 150 or permission of instructor

**Notes**
Fee required.
PHED 159 - Advanced Swimming

Credits: 1
A course designed to build on intermediate-level swimming skills by providing practice to refine and perfect swimming strokes, so that students swim with more ease, efficiency, power, and smoothness over greater distances. Focuses on developing a higher level of fitness and maintaining better physical conditioning. Introduces other aquatic activities to enrich the class and broaden the horizons of the participant.

Prerequisites
PHED 150 or permission of instructor

Notes
Fee required.

PHED 160 - Intermediate Tai Chi

Credits: 1
A second-level course for students to learn Tai Chi Weapon (Tai Chi Straight Sword), as well as practice the basic principles of Tai Chi. Students will increase awareness of the mind and body.

Prerequisites
PHED 149 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 162 - Introduction to Bowling

Credits: 1
Students will learn the sport of 10-pin bowling. Topics covered are bowling etiquette, history of bowling, playing rules for league members, scoring, different approaches to the game, and the appropriate equipment for these approaches. Inexperienced and experienced bowlers are welcome to participate.

Notes
Fee required.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
PHED 163 - Karate

Credits: 1
American Kenpo Karate is the combination of art and science. Emphasizes techniques, forms (kata), and sets (drills). All the techniques are related by motion and principles. Each technique builds on the previous one, creating a web of knowledge.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 164 - Intermediate Karate

Credits: 1
Second-level course in American Kenpo Karate. Students review information and refine skills developed in the introductory class, as well as learn new forms and techniques to increase skill performance at the next level.

Prerequisites
PHED 163 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 165 - Introduction to Racquetball

Credits: 1
A practical course designed as an introduction to racquetball. Involves activities to teach students basic racquetball terms, rules, scoring, safety, and techniques for the forehand, backhand, overhead, and serve, as well as singles and doubles.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 166 - Intermediate Racquetball

Credits: 1
A practical course designed for the novice racquetball player. Course involves activities to teach students intermediate skills, including ceiling shots, kill shots, passing shots, back wall strokes, advanced serves, court positions, and tactics and strategies for singles and doubles.

Prerequisites
PHED 165 or permission of instructor

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PHED 167 - Advanced Concepts and Strategies in Bowling
Students will learn advanced concepts and strategies in the sport of Ten Pin Bowling. Topics covered are equipment, mental preparation, spare conversions, practice regimens, and strategies for different lane conditions. This course is intended for experienced bowlers.

**Prerequisites**
PHED 162 or permission of instructor

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

### PHED 169 - Intermediate Judo for Men/Women

Credits: 2  
This is a second level course with the emphasis placed on executing proper skills and movements and not the contact itself. The nature of this course incorporates both offensive and defensive movements, and these actions are accepted as part of the class. Excessive force, violence, or aggression will not be tolerated.

**Prerequisites**
PHED 145

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

### PHED 200 - Professional Dimensions of Health, Recreation, and Physical Education

Credits: 3  
Traces historical foundations of health, recreation, physical education, and sport.

**Notes**
Open to nonmajors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHED 201 - Developmental Motor Patterns

Credits: 3  
Analyzes motor-skill development and prescription of activities from immature to mature stages.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PHED 202 - Teaching Skillful Movement
Credits: 3
Covers planning and presenting lessons on numerous motor skills using varied teaching strategies in a peer teaching setting.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHED 230 - Asian Martial Arts: Origin and Development**

Credits: 3
Introduction to martial arts of East, South, and Southeast Asia. Lectures address martial arts from a historical, philosophical, biographical, warfare, and sport perspective.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHED 250 - Water Safety Instruction**

Credits: 2
Introduces planning, organizing, and executing American Red Cross swimming and water safety courses. Focus is on educational methods, approaches, and skill development applicable to swimming and water safety instruction.

**Prerequisites**
PHED 150 and instructor evaluation

**Notes**
Fee required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**PHED 255 - Basic Scuba Diving**

Credits: 2
Provides training toward certification as an open water SCUBA diver. The course emphasizes the learning of snorkeling (free diving introduction) and SCUBA skills. Safe diving skills, the physics of diving, equipment care and maintenance, diving fitness, underwater navigation, record keeping, and other basic SCUBA knowledge will be covered in the course. On successful completion of the course, students will be qualified for open water certification by Scuba Schools International (SSI).

**Notes**
Fee required.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**PHED 273 - Net and Target Games**
Credits: 2
Skill and content knowledge in net and target games. Includes skill progression, strategies, officiating, and authentic assessment in games such as volleyball, golf, tennis, and badminton.

Notes
Open to BPRE and BSED PHED majors only.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

PHED 274 - Dance and Educational Gymnastics

Credits: 2
Skill and content knowledge in dance, rhythms, and educational gymnastics.

Notes
Open to BPRE and BSED PHED majors only.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

PHED 275 - Field and Invasion Games

Credits: 2
Skill and content knowledge in field and invasion games. Includes skill progression, strategies, officiating, and authentic assessment in activities such as softball, basketball, soccer, field events, and Ultimate Disc.

Notes
Open to BPRE and BSED PHED majors only.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

PHED 300 - Kinesiology

Credits: 3
Covers anatomical and mechanical study of human movement.

Prerequisites
BIOL 124

Corequisite
BIOL 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PHED 306 - Psychomotor Learning

Credits: 3
Analyzes psychological aspects, learning theory, and practice conditions for learning motor skills.

Prerequisites
BSED status

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 308 - Adapted Physical Education

Credits: 3
Introduces disabilities in public schools. Covers national standards, federal legislation, IEPs, and developmental inclusion models.

Prerequisites
BSED status, and BIOL 124 and 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 364 - Strength Training: Concepts and Applications

Credits: 3
Provides students with an opportunity to develop an in-depth understanding of the principles of strength training and conditioning, including anatomical and physiological considerations, lifting techniques, equipment selection, program development and evaluation, and weightlifting safety.

Prerequisites
BIOL 124 and BIOL 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 365 - Measurement and Evaluation of Physical Fitness

Credits: 3
Covers selection, administration, evaluation, and construction of measurements and evaluation instruments and techniques in physical education. Also covers statistical analysis of data and survey of selected instruments.

Prerequisites
BIOL 124 and 125
PHED 403 - Elementary School Instruction in Physical Education

Credits: 3
Covers content, knowledge, and teaching methods for K-6 physical education. Requires field experience.

Prerequisites
PHED 201, 202, 273, 274, 275, and 306; and BSED status

PHED 404 - Middle and High School Instruction in Physical Education

Credits: 3
Examines school curriculum, assessment, content, and teaching practices for middle and high school physical education programs. Requires field experience.

Prerequisites
PHED 201, 202, 273, 274, 275, 306, and 403; and BSED status

PHED 410 - Social/Psychological Aspects of Health and Fitness

Credits: 3
Covers research, trends, and techniques of health and fitness from a behavioral perspective.

PHED 415 - Student Teaching in Physical Education

Credits: 9-12
Provides supervised clinical experience for a full semester in approved schools. Requires experiences in elementary (seven weeks) and secondary (seven weeks) school settings. Includes participation of one week in preservice workshops and related activities, and weekly seminar sessions.

Prerequisites
Completion of all courses in approved program, and acceptance into student teaching
PHED 442 - Practicum in Physical Education

Credits: 1-3
Provides supervised professional practice in a selected area of interest.

Prerequisites
90 credits, or 60 credits and permission of instructor

Notes
May be repeated for up to 3 credits. Each credit requires a minimum of 60 hours of participation in the specialty over a period of six weeks. Areas selected with faculty advisor approval.

PHED 450 - Physiology of Exercise

Credits: 4
Covers human physiological responses to environmental changes and exercise.

Prerequisites
BIOL 124 and 125, and PHED 300

PHED 480 - Special Topics

Credits: 1-3
See course description in the Schedule of Classes. Selected topics reflect interest in specialized areas of exercise science or health promotion.

Prerequisites
60 credits

PHED 499 - Independent Study in Physical Education and Fitness
Credits: 1-3
Study of a problem area in physical education research, theory, or practice under direction of faculty member.

Prerequisites
90 credits and permission of instructor

Notes
May be repeated, but no more than 3 total credits may be earned.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PHED 670 - Analysis of Teaching in Physical Education

Credits: 3
Presents variety of research techniques for studying teacher and learner behaviors in physical education, engaging the teacher as researcher and grant writer. Goal is to prepare teachers to be leaders in their field.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 672 - Curriculum and Assessment in Physical Education

Credits: 3
Provides knowledge of curriculum models and assessment strategies in standards-based physical education program. Studies curriculum models such as sport education and adventure education. Examines traditional and alternative assessment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 673 - Motor Development for Special Populations

Credits: 3
Provides knowledge that focuses on individuals with orthopedic, sensory, and learning disabilities in physical education setting. Areas of focus include development of motor patterns and skills assessment, and planning and instruction for students with disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHED 680 - Mentoring and Supervising in Physical Education

Credits: 3
Prepares mentors and supervisors of preservice and in-service teachers in physical education. Topics include professional
dispositions, assessment and evaluation, adult learners, counseling and communication, providing feedback, and reflection and inquiry into the profession.

Prerequisites
PHED 670

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

Physical Sciences

PSCI 701 - Frontiers of Physical Sciences

Credits: 3
Each semester, the course will cover between four and six topics considered to be at the frontiers of the physical sciences - the key questions that are of interest to researchers today. The topics will be chosen from interdisciplinary areas, such as nanoscience, astroparticle physics, nonlinear dynamics, and neuroscience. Approximately two to three weeks will be spent on each topic, and the specific topics may vary each semester. The course includes guest lectures given by faculty who are doing research in each area. Assignments include readings from the current literature as well as projects and class presentations.

Prerequisites
Admission to physical sciences doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSCI 702 - Research Methods

Credits: 3
This course trains students in research methodologies, techniques, and data analysis methods in the physical sciences. Covers approaches for outlining and synthesizing a problem, techniques for measurement and analysis, and methods used for data analysis and interpretation.

Prerequisites
Admission to physical sciences doctoral program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSCI 703 - Frontiers of Physical Sciences

Credits: 1
This course combines invited seminars from faculty (internal and external) with graduate student seminars. Presentation at a
seminar is a requirement for advancement to candidacy in the physical sciences doctoral program.

**Prerequisites**  
Admission to physical sciences doctoral program.

**Notes**  
May be repeated three times.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PSCI 998 - Dissertation Proposal**

Credits: 1-6  
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

**Prerequisites**  
Permission of advisor.

**Notes**  
May be repeated as needed; however, no more than a total of 24 credits in PSCI 998 and 999 may be applied toward satisfying doctoral degree requirements. Out of 24, no more than 12 credits of PSCI 998 may be applied.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/IP

**PSCI 999 - Doctoral Dissertation**

Credits: 1-12  
Doctoral research performed under direction of dissertation director.

**Prerequisites**  
Admission to candidacy in physical sciences doctoral program.

**Notes**  
May be repeated as needed, but no more than a total of 24 credits in PSCI 998 and 999 may be applied toward satisfying doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**Grading:** S/IP

**Physics**
PHYS 101 - Light and Sound in Our World

Credits: 3
Nature of light, color, sound, electromagnetic spectrum, optical instruments, mechanisms of vision and hearing, color addition and subtraction, synthesis of musical sounds, interference of waves, polarization, Doppler effect, lasers, holography.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 102 - Sports Physics

Credits: 3
Introduction to laws of physics in context of sports. Physics topics to be studied include two-dimensional motion, forces, conservation of energy, and momentum in the application to sports. Sports include football, basketball, baseball, swimming, and tennis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 103 - Physics and Everyday Phenomena I

Credits: 4
The course uses basic physics concepts from the areas of mechanics and thermodynamics to explain a wide range of everyday phenomena, such as how we walk and drive, how a ship floats, how clothing keeps us warm, and why it rains when we have a low pressure system.

Satisfies General Education Requirement: Natural science Lab

Notes
For nonscience majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

PHYS 104 - Physics and Everyday Phenomena II

Credits: 4
The course uses basic physics concepts from the areas of light, sound, electricity, magnetism, and modern physics to explain a wide range of everyday phenomena. Topics include how we speak, hear, and see, what to do if the circuit breaker keeps tripping, how your computer stores and displays data, how rainbows and northern lights form, and the basic nature of matter.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 103 or permission of instructor.

Notes
For nonscience majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3

**PHYS 111 - Introduction to the Fundamentals of Atmospheric Science**

Credits: 3
An overview of the Earth's atmosphere, its history, and the physical and chemical processes that determine its characteristics. The focus is on key concepts from thermodynamics, radiation, chemistry, and dynamics that are essential for understanding the state, variability, and long term evolution of the atmosphere, especially in the context of comparisons with other planetary atmospheres.

Satisfies General Education Requirement: Natural science Lab

Equivalent to CLIM 111

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 112 - Introduction to the Fundamentals of Atmospheric Science Lab**

Credits: 1
Laboratory course associated with PHYS 111. Study of the Earth's atmosphere based on concepts taken from thermodynamics, radiation transport, chemistry, and dynamics.

Satisfies General Education Requirement: Natural science Lab

Equivalent to CLIM 112

Corequisite
PHYS 111

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 1

**PHYS 121 - Uses of Physics**

Credits: 1
Describes the uses of physics to a number of disciplines and professions, including medicine, information technology, energy, and environmental technology.

Notes
Introductory course intended for both majors and nonmajors.
PHYS 122 - Inside Relativity

Credits: 1
Introductory course describing Einstein's theories of special and general relativity.

Notes
Intended for majors and nonmajors.

PHYS 123 - Inside the Quantum World

Credits: 1
Introductory course describing quantum theory.

Notes
Intended for majors and nonmajors.

PHYS 124 - Experimental Explorations in Physics

Credits: 1
Introductory nonmathematical course intended primarily for physics majors. Experimental studies of phenomena in mechanics, electricity and magnetism, and optics. Stresses development of familiarity with methods and techniques of measurement and with data evaluation.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

PHYS 160 - University Physics I

Credits: 3
First semester of three-semester, calculus-based introductory physics sequence, designed primarily for science and engineering majors. Mechanics.

Satisfies General Education Requirement: Natural science Lab

Corequisite
MATH 114.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 161 - University Physics I Laboratory

Credits: 1
Experiments in mechanics, including techniques for recording, graphically and statistically analyzing, and reporting data.

Satisfies General Education Requirement: Natural science Lab

Corequisite
PHYS 160 and MATH 114

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 225 - Problems in Physics I

Credits: 1-3
Individual study of physics problems of current interest.

Prerequisites
24 credits and 2.50 GPA in physics and mathematics.

Notes
May be taken three times for credit.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 243 - College Physics

Credits: 3
PHYS 243 is prerequisite to PHYS 245. Two-semester basic physics course with emphasis on topics of classical and modern physics of particular importance to science majors. Principles of mechanics, heat, electricity, magnetism, optics, and atomic and nuclear physics are discussed.

Satisfies General Education Requirement: Natural science Lab

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 244 - College Physics Lab
Credits: 1
Laboratory portion of two-semester basic physics course.
Satisfies General Education Requirement: Natural science Lab

Corequisite
PHYS 243 for 244, and 245 for 246.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 245 - College Physics

Credits: 3
Two-semester basic physics course with emphasis on topics of classical and modern physics of particular importance to science majors. Principles of mechanics, heat, electricity, magnetism, optics, and atomic and nuclear physics are discussed.
Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 243

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 246 - College Physics Lab

Credits: 1
Laboratory portion of two-semester basic physics course.
Satisfies General Education Requirement: Natural science Lab

Corequisite
PHYS 243 for 244, and 245 for 246.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 251 - Introduction to Computer Techniques in Physics

Credits: 3
Introduction to using computers in physics based on examples from mechanics and astronomy.
Satisfies General Education Requirement: Information technology (IT, all except ethics)

Prerequisites
PHYS 160.
PHYS 260 - University Physics II

Credits: 3
Waves, electricity, and magnetism.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 160 with grade of C or better (2.00)

Corequisite
MATH 213

PHYS 261 - University Physics II Laboratory

Credits: 1
Experiments in mechanics, electricity, and magnetism, including techniques for recording, graphically and statistically analyzing, and reporting data.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 161

Corequisite
MATH 213 and PHYS 260

PHYS 262 - University Physics III

Credits: 3
Thermodynamics, optics, and modern physics.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 260 with grade of C or better (2.00)
Corequisite
MATH 214

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 263 - University Physics III Laboratory

Credits: 1
Experiments in optics and modern physics, including techniques for recording, graphically and statistically analyzing, and reporting data.

Satisfies General Education Requirement: Natural science Lab

Prerequisites
PHYS 261

Corequisite
PHYS 262

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 265 - Advanced University Physics II Laboratory

Credits: 2
Credit may be received for PHYS 261 or 265. Experiments in mechanics, electricity, and magnetism with emphasis on data analysis using spreadsheets and Matlab.

Corequisite
MATH 213 and PHYS 260.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

PHYS 266 - Introduction to Thermodynamics

Credits: 1
Students may not receive credit for both PHYS 262 and 266. Laws of thermodynamics, kinetic theory of gases, heat engines, and entropy.

Prerequisites
PHYS 260.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
**PHYS 303 - Classical Mechanics**

Credits: 3  
Motion of a particle in one, two, and three dimensions; systems of particles; noninertial coordinate systems; and equations of Lagrange and Hamilton.

**Prerequisites**  
PHYS 262 and MATH 214 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 305 - Electromagnetic Theory**

Credits: 3  
Interaction of static charges, interaction of stationary currents, electromagnetic induction, and Maxwell's equations.

Equivalent to ECE 305

**Prerequisites**  
PHYS 260

**Corequisite**  
MATH 214

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 306 - Wave Motion and Electromagnetic Radiation**

Credits: 3  
Vibrating string, plane waves, interference, diffraction, polarization, electromagnetic waves, dispersion, and relativity.

**Prerequisites**  
PHYS 262

**Corequisite**  
MATH 214.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 307 - Thermal Physics**
Credits: 3
Classical concepts of energy and temperature, basic definitions, first and second laws of thermodynamics, properties of pure substances, and equations of state. Introduction to classical and quantum statistics and their application to physical systems.

Prerequisites
PHYS 262.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 308 - Modern Physics with Applications

Credits: 3
Study of modern physics with emphasis on applications. Topics include introductory quantum physics; modern optics; lasers; binding and energy bands in solids; electrical, thermal, and magnetic properties of solids; semiconductors; radioactivity; nuclear reactions; radiation detectors; and applications of nuclear physics to other sciences.

Prerequisites
PHYS 262

Corequisite
MATH 214

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 310 - Physics of Semiconductor Materials and Processing

Credits: 3
Survey of the electronic and structural properties of semiconductors and the physics of semiconductor processing. Topics to be discussed include crystal growth, crystal defects, thin films, thermal properties, lithography, and characterization.

Prerequisites
PHYS 160, 260, and 262; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 326 - Problems in Physics II

Credits: 1-3
Individual study of physics problems of current interest.

Notes
May be taken three times for credit.
PHYS 328 - Introduction to Astrophysics

Credits: 3
Topics include physical concepts; magnitudes of stars; Hertzsprung-Russell diagram; stellar radiation; stellar structure and stellar evolution; white dwarfs, red giants, supernovas, neutron stars, black holes; interstellar matter, dust, and molecules; cosmic rays and magnetic fields; galactic structure, galaxies, quasars, and intergalactic matter; high energy astrophysics, cosmology, and general relativity; and models of the universe.

Equivalent to ASTR 328

Prerequisites
PHYS 262 and MATH 214.

PHYS 331 - Fundamentals of Renewable Energy

Credits: 3
The course introduces the physical principles for a range of renewable energies, including solar, wind, hydropower and geothermal. The course demonstrates how the application of methods and principles of physics allow us to understand the basic operation, advantages, limitations and relative merits of various renewable energy sources. The course is mainly designed for students majoring in the sciences or engineering but useful for students interested in science policy, business, global change and sustainable development.

Prerequisites
PHYS 262 or 266 or permission of instructor.

Notes
This course counts toward the required 45 hours of upper division hours, but it does not count toward the requirement for a minimum of 12 upper-level credits for physics majors.

PHYS 370 - Molecular Biophysics

Credits: 3
Offers a broad introduction into molecular biophysics. Demonstrates that the application of methods of physics provides a unique opportunity to tackle complex biological programs. Mainly designed for students majoring in physics or chemistry but also useful for biology majors interested in bioinformatics and computational biology.

Equivalent to BINF 470
Prerequisites
PHYS 307, or CHEM 331 and CHEM 332, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 385 - Materials Science with Applications to Renewable Energy

Credits: 3
Introduction to basic concepts and methods of materials science. Review of metallic alloys and compounds, ceramic materials, ionic solids, semiconductors, polymers, and nano-structured materials. Mechanical, thermal, electric, magnetic and optical properties of materials. Theoretical background and experimental methods of materials characterization. Various materials applications with emphasis on renewable energy.

Equivalent to CDS 385

Prerequisites
PHYS 262 or 266 or 245 and a C or better in MATH 113

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 390 - Topics in Physics

Credits: 1-4
Selected topics in physics not covered in fixed-content courses.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 402 - Introduction to Quantum Mechanics and Atomic Physics

Credits: 3
Experimental basis of quantum mechanics; the wave function; systems in one, two, and three dimensions.

Equivalent to PHYS 502

Prerequisites
PHYS 308, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 405 - Honors Thesis in Physics
Credits: 3
Project chosen and completed under the guidance of a faculty member, which results in a thesis.

**Prerequisites**
21 credits of physics courses including PHYS 262, 305, and 308; and admission to Physics Department Honors Program.

**Notes**
PHYS 405 is a prerequisite for PHYS 406. An oral progress report is required for PHYS 405. Oral and written presentations are required for PHYS 406. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**PHYS 406 - Honors Thesis in Physics**

Credits: 3
Project chosen and completed under the guidance of a faculty member, which results in a thesis.

**Prerequisites**
21 credits of physics courses including PHYS 262, 305, and 308; and admission to Physics Department Honors Program.

**Notes**
PHYS 405 is a prerequisite for PHYS 406. An oral progress report is required for PHYS 405. Oral and written presentations are required for PHYS 406. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**PHYS 407 - Senior Laboratory in Modern Physics**

Credits: 3
Advanced experiments in modern physics: electronics, optics, condensed matter, and nuclear physics. Techniques for recording, graphically and statistically analyzing, and reporting data. Typical experiments include the Frank-Hertz experiment, Hall Effect, electron spin resonance, nuclear magnetic resonance and optical pumping.

**Prerequisites**
21 credits of physics courses, including PHYS 305 and 308

**Notes**
This course meets the writing-intensive requirement.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 9

---

**PHYS 408 - Senior Research**
Credits: 2-3
Work under guidance of faculty member on research project in experimental or theoretical physics.

Prerequisites
21 credits of physics courses.

Notes
May be taken twice with permission of the Physics Department. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 409 - Physics Internship

Credits: 3
On-the-job experience for physics majors in industry or government laboratories including summer programs.

Prerequisites
75 credits, 21 credits of physics courses, and permission of department.

Notes
See department for other requirements and application procedures prior to enrollment. Students may receive no more than 6 credits of PHYS 405, 406, 408, and 409.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 410 - Computational Physics I

Credits: 3
Study and development leading to computer simulations of various physical systems. Requires the study and development of computational techniques and numerical algorithms to obtain both numerical results and visualization of these results. Application to individual physical processes taking place in a variety of physical streams.

Equivalent to PHYS 510

Prerequisites
PHYS 303 and 305

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 412 - Solid State Physics and Applications

Credits: 3
Crystal structures, binding, lattice vibrations, the free electron model, metals, semiconductors and semiconductor devices,
superconductivity, and magnetism.

Equivalent to PHYS 512/CSI 687

**Prerequisites**
PHYS 402 or 502.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 416 - Special Topics in Modern Physics**

Credits: 1  
Topics of current interest in modern physics with emphasis on the breadth of physical understanding needed to approach many of today's problems. The course will also review all of undergraduate physics through assigned problems from the GRE test.

**Prerequisites**
21 credits of physics courses.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

---

**PHYS 417 - Geophysics**

Credits: 3  
Seismological and gravitational theory and application to an understanding of the Earth's interior. Geology requirement may be waived for physics and engineering students with sufficient background.

Equivalent to GEOL 417

**Prerequisites**
GEOL 101, 102, 201, 301; MATH 113, 114; and PHYS 160.

**Corequisite**
MATH 213 and PHYS 260, 261.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 428 - Relativity and Cosmology**

Credits: 3  
Special relativity; four-dimensional space-time; general relativity; non-Euclidean geometries, geodesics, and field equations; tests of general theory of relativity; black holes; cosmology; models of the universe; remnant blackbody radiation; big bang cosmology; thermodynamics; and the universe.

Equivalent to ASTR 428
Prerequisites
MATH 214; and PHYS 303, 305, and 262; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 440 - Nuclear and Particle Physics**

Credits: 3

Accelerators, detectors and related electronics; nuclear and elementary particle structure; symmetries and conservation laws; the electromagnetic, weak, and hadronic interactions; nuclear models; the quark model; and nuclear science and technology.

Equivalent to PHYS 540

Prerequisites
PHYS 402 or 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 475 - Atmospheric Physics**

Credits: 3

Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 575/CSI 655

Prerequisites
PHYS 260, 262, and 305 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PHYS 502 - Introduction to Quantum Mechanics and Atomic Physics**

Credits: 3

Experimental basis of quantum mechanics, the wave function, and systems in one, two, and three dimensions.

Equivalent to PHYS 402
**Prerequisites**
PHYS 308, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 510 - Computational Physics I**

Credits: 3  
Study and development leading to computer simulations of various physical systems. Requires the study and development of computational techniques and numerical algorithms to obtain both numerical results and visualization of these results. Application to individual physical processes taking place in a variety of physical systems.

Equivalent to PHYS 410

**Prerequisites**
PHYS 303 and 305

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 512 - Solid State Physics and Applications**

Credits: 3  
Crystal structures, binding, lattice vibrations, the free electron model, metals, semiconductors and semiconductor devices, superconductivity, and magnetism.

Equivalent to PHYS 412/CSI 687

**Prerequisites**
PHYS 402 or 502.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 513 - Applied Electromagnetic Theory**

Credits: 3  
Classical electromagnetic theory with applications. Topics include electrostatics, magnetic fields and materials, electromagnetic wave propagation, waveguides, transmission lines, radiation, and antennas.

**Prerequisites**
PHYS 305, 306; and MATH 313, 314 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**PHYS 533 - Modern Instrumentation**

Credits: 3  
Topics include sensors for radiation, particles, electric and magnetic fields, pressure, and motion; electronic instruments, computer data collection, instrumentation noise and noise reduction methods; and specialized instrumentation systems for various areas of applied physics.

Equivalent to CHEM 620

**Prerequisites**  
PHYS 513 and an electronics course

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 540 - Nuclear and Particle Physics**

Credits: 3  
Accelerators, detectors and related electronics; nuclear and elementary particle structure; symmetries and conservation laws; the electromagnetic, weak, and hadronic interactions; nuclear models; the quark model; and nuclear science and technology.

Equivalent to PHYS 440

**Prerequisites**  
PHYS 402 or 502.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 575 - Atmospheric Physics I**

Credits: 3  
Introduction to basic physical and chemical processes that operate in the Earth's atmosphere. Emphasis on those concepts that provide a global description of the current atmospheric state and those processes that relate to global change and atmospheric evolution. Topics include equilibrium structure, radiative transfer models, thermodynamics of various atmospheric layers, and the various processes defining these layers.

Equivalent to PHYS 475/CSI 655

**Prerequisites**  
PHYS 305, 262, and 260 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PHYS 580 - Selected Interdisciplinary Topics

Credits: 3
Selected interdisciplinary topics with a strong physics content not covered in fixed-content courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 590 - Selected Topics in Physics

Credits: 1-6
Selected topics from recent theoretical or experimental developments and applications. Satisfies needs of professional community to keep abreast of current developments.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 0-6
Hours of Lab or Studio per week: 0

PHYS 600 - Special Topics in Physics

Credits: 1-6
In-service course to strengthen and update teachers' knowledge of physics and astronomy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 611 - Electro-optics

Credits: 3
Optical modulators, display devices, types and operation of lasers, mode locking, Q-switching, photodetectors, optical fibers.

Prerequisites
PHYS 502 or 684, and 513 or 685.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 612 - Physics of Modern Imaging

Credits: 3
Study of imaging methods using acoustic and electromagnetic waves to probe extended objects, and mathematical transformations to produce images from scattered waves. Topics include classical imaging, physical optics, Fourier transform,
holography, tomography, seismic mapping, underwater acoustic imaging and mapping, side-looking radar, antenna arrays, applicable computer methods.

**Prerequisites**
PHYS 513 or 685.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHYS 613 - Computational Physics II**

Credits: 3
Study of diverse physical systems with emphasis on modeling and simulation. Study and development of numerical algorithms and techniques to obtain both numerical results and visualization of these results. Projects undertaken will draw from such areas as many-body orbital dynamics, molecular interactions, quantum systems, radiative transfer in high-temperature plasmas, stellar interiors, hydrodynamics, and cosmology.

Equivalent to CSI 780

**Prerequisites**
PHYS 303, 305, and 510; PHYS 502 or equivalent recommended.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHYS 614 - Thermodynamics and Kinetics of Materials**

Credits: 3
Advanced thermodynamics and physical kinetics with applications to materials science. The course covers an axiomatic formulation of thermodynamics, theory of phase transformations, kinetic theory of reactions and diffusion processes in solids, and interface phenomena. Possible applications considered in the course include processing and fabrication of semiconductor materials, metal oxidation and corrosion, diffusion-controlled phase growth in solid solutions, shape memory alloys, and small-size effects in physical properties of materials.

**Prerequisites**
MATH 113, 114, 213, 307; PHYS 262 or 266, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PHYS 615 - Fundamentals of Materials Science**

Credits: 3
Covers fundamentals of materials science with emphasis on physical topics including crystal structure and symmetry, dislocation theory, theory of interfaces, multicomponent phase diagrams, theory of phase transformations, nano-materials, metallic glasses. Includes a term project, assignments from current literature and application of computation in materials science.
Equivalent to CSI 685

**Prerequisites**
CDS 385/PHYS 385 or undergraduate degree in physics, chemistry, materials, electrical or mechanical engineering or related disciplines; or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 620 - Continuum Mechanics**

Credits: 3  
Study of continuum mechanics; topics include physical concepts, mathematical formulation and solution, elastic materials, ideal fluids, viscous fluids, waves in continuous media, turbulence, thermal convection, stability considerations, high-temperature gas flows, radiative processes for momentum and energy transport, shocks, and computational fluid dynamics.

**Prerequisites**
PHYS 510 and 303 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 630 - Introduction to Biophysics**

Credits: 3  
Introduces biophysics, focusing on physical and chemical concepts and their relation to rapidly expanding interdisciplinary interfaces among biology, chemistry, and physics. Reveals multiscale nature of biophysics, and includes exploration of macroscopic and microscopic applications.

Equivalent to BINF 740

**Prerequisites**
Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PHYS 660 - Space Weather**

Credits: 3  
Overview of space weather including sun, heliosphere, magnetosphere, and ionosphere.

Equivalent to ASTR 660

**Prerequisites**
Graduate standing, or permission of instructor.
PHYS 676 - Atmospheric Physics

Credits: 3
Covers the basic conservation laws of mass, momentum, and energy, and a scaling analysis of the equations of motion and thermodynamics. Balanced flows in the atmosphere are discussed. Concepts of circulation and vorticity; the role of the atmospheric boundary layer in mass, momentum, and energy transfer; synoptic scale motions; and the role of gravity and Rossby waves in controlling the general circulation of the atmosphere are covered.

Prerequisites
PHYS 303, 305, and 308; and MATH 314.

PHYS 684 - Quantum Mechanics I

Credits: 3
Fundamental concepts, including one-dimensional solutions of Schrodinger's equations, operators in Hilbert space, observables, propagators, and harmonic oscillators.

Prerequisites
PHYS 305, 308; MATH 313 and 314, or equivalent.

PHYS 685 - Classical Electrodynamics I

Credits: 3
Deals with static and dynamic properties of electromagnetic fields as described by Maxwell's equations. Covers electrostatics, magnetostatics, boundary value problems, multipoles, time dependent fields, propagating wave solutions, and resonant structures.

Prerequisites
PHYS 305, 308; MATH 313 and 314, or equivalent.

PHYS 701 - Theoretical Physics
Credits: 3
Study of the physical basis for selection of particular mathematical tools in physics; topics include curvilinear coordinates, tensors, matrices, differential equations, special functions, complex variables, and group theory.

**Prerequisites**
Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 703 - Seminar in Physics**

Credits: 1  
A general seminar course that combines invited seminars from faculty (both internal and external) with graduate student seminars.

**Prerequisites**
Permission of instructor.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PHYS 705 - Classical Mechanics**

Credits: 3  
Study of classical mechanics; topics include variational principles, constrained motion, Lagrangian and Hamiltonian mechanics, canonical transformations, and applications (central forces, rigid-body motion, oscillations).

**Prerequisites**
Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PHYS 711 - Statistical Mechanics**

Credits: 3  
Topics include thermodynamics, kinetic theory, ensemble theory, quantum statistics, and applications.

Equivalent to CHEM 730/CSI 782

**Prerequisites**
Undergraduate degree in physics or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PHYS 760 - Space Plasma Physics

Credits: 3
Covers plasma processes involved in today's space physics research, including different regimes of plasma; basic concepts in kinetic, fluid, and MHD plasmas; and existent waves in these media. Also covers basics of shocks, discontinuities, transport and acceleration of particles such as cosmic rays, reconnection, and MHD instabilities.

Equivalent to ASTR 760

Prerequisites
PHYS 513 or 685, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 780 - Advanced Selected Topics in Physics

Credits: 3
Selected topics in physics not covered in fixed-content physics courses.

Equivalent to CSI 789

Prerequisites
Permission of instructor.

Notes
May be repeated for credit as needed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 784 - Quantum Mechanics II

Credits: 3
Advanced topics in quantum mechanics. Covers rotations, angular momentum, 3D solutions to Schrodinger's equations, symmetries, conservation laws, approximate methods, and spin mechanics.

Prerequisites
PHYS 684, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 785 - Classical Electrodynamics II
Credits: 3
Advanced topics in electrodynamics. Covers radiation, scattering and diffraction, special relativity, relativistic particle dynamics, Lorentz transformation, 4-vectors, transformation of fields, charges and currents, Thomas precession, retarded potentials, and radiation from moving charges.

Prerequisites
PHYS 685, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PHYS 796 - Directed Reading and Research

Credits: 1-6
Reading and research on a specific topic in physics or related field under the direction of a faculty member.

Prerequisites
Admission to master's program, and permission of instructor.

Notes
May be repeated as needed.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PHYS 798 - Research Project

Credits: 3
Project chosen and completed under the guidance of a graduate faculty member, which results in an acceptable technical report.

Prerequisites
9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

PHYS 799 - Master's Thesis

Credits: 1-6
Project chosen and completed under the guidance of a graduate faculty member, which results in an acceptable technical report and oral defense.

Prerequisites
9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
PHYS 998 - Doctoral Dissertation Proposal

Credits: 1-12
Covers development of a research proposal under the guidance of a dissertation director and the doctoral committee. The proposal forms the basis for the doctoral dissertation.

Prerequisites
Admission to physics doctoral program and permission of advisor.

Notes
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program. Out of the 24, no more than 12 credits of ASTR/PHYS 998 may be applied.

PHYS 999 - Doctoral Dissertation

Credits: 1-12
Doctoral research performed under direction of dissertation director.

Prerequisites
Admission to doctoral candidacy in physics doctoral program and permission of advisor.

Notes
May be repeated as needed; however, no more than 24 credits in ASTR/PHYS 998 and ASTR/PHYS 999 may be applied toward satisfying doctoral degree requirements in the physics PhD program.

Psychology

PSYC 100 - Basic Concepts in Psychology

Credits: 3
Introduces psychology as scientific discipline. Examines concepts and methods in learning, motivation, development, personality,
and measurement.

Satisfies General Education Requirement: Social and behavioral science

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PSYC 110 - Seminar in General Psychology**

Credits: 1
Explores applications, implications, methods, and findings of psychology.

**Corequisite**
PSYC 100.

**Notes**
Students must be enrolled concurrently in PSYC 100. In-class work includes discussion that enriches the PSYC 100 lecture material, exploration of controversial issues in psychology, use of technology to broaden knowledge of psychology, and in-depth discussions of topics on which instructor has special expertise. Short papers are required.

**Hours of Lecture or Seminar per week: 1**
**Hours of Lab or Studio per week: 0**

**PSYC 211 - Developmental Psychology**

Credits: 3
Review of major developmental theories including perspectives of childhood, adolescence, adulthood, and old age.

Satisfies General Education Requirement: Social and behavioral science

**Prerequisites**
PSYC 100 or permission of instructor.

**Hours of Lecture or Seminar per week: 3**
**Hours of Lab or Studio per week: 0**

**PSYC 231 - Social Psychology**

Credits: 3
Study of human behavior development in a social matrix, including such topics as socialization, cultural behavior, group norms, and attitude formation.

Satisfies General Education Requirement: Social and behavioral science

**Prerequisites**
PSYC 100 or permission of instructor.
PSYC 260 - Basic Research Methods in Psychology

Credits: 1-3
Introduction to research methods in psychology in the context of assisting faculty with research; individualized sections by arrangement with faculty. Methods taught vary but generally include basic data collection and recordkeeping methods in research.

Prerequisites
6 credits of psychology or permission of instructor and department.

Notes
Course culminates in a paper describing techniques learned. No more than six credits in PSYC 260, 350, and 460 can be used toward a psychology major.

PSYC 300 - Statistics in Psychology

Credits: 4
Descriptive and inferential statistics in design, analysis, and interpretation of psychological research with practical application using computers in laboratory.

Satisfies General Education Requirement: Information technology (IT, all except ethics) (PSYC 330, 301 and 372 must be taken in sequence)

Prerequisites
6 credits of psychology and 3 credits of mathematics course work; or permission of instructor.

Notes
Students are strongly encouraged to take PSYC 301 concurrently.

PSYC 301 - Research Methods in Psychology

Credits: 3
General research design in psychology, with an emphasis on experimental design and control. Topics include use of human participants in research, reliability and validity, observational methods, and survey and longitudinal designs.

Satisfies General Education Requirement: Information technology (IT, all except ethics) (PSYC 330, 301 and 372 must be taken in sequence)
**Prerequisites**
6 credits of psychology, including PSYC 300 as prerequisite or corequisite, or permission of instructor.

**Notes**
Students are strongly encouraged to take PSYC 300 concurrently. Laboratory work will include designing and running research studies and writing manuscripts using appropriate style and format. PSYC 301 is a writing-intensive course.

**Hours of Lecture or Seminar per week:** 2
**Hours of Lab or Studio per week:** 2

---

**PSYC 304 - Principles of Learning**

Credits: 4
Principles of animal learning, including such topics as classical and operant conditioning, discrimination learning, and animal cognition.

**Prerequisites**
PSYC 300, or permission of instructor.

**Notes**
Laboratory projects require working with computer simulations. PSYC 304 is a writing-intensive course.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 2

---

**PSYC 309 - Sensation, Perception, and Information Processing**

Credits: 4
Principles of perception, including topics such as psychophysics, perceptual organization, perceptual learning, and perceptual constancies.

**Prerequisites**
PSYC 300 and PSYC 372, or permission of instructor.

**Notes**
Laboratory projects demonstrate and investigate perceptual phenomena. PSYC 309 is a writing-intensive course.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 2

---

**PSYC 313 - Child Psychology**

Credits: 3
Study of human psychological development from conception to adolescence including such topics as genetic factors, emotional and intellectual growth, and environmental influences.

**Prerequisites**
6 credits of psychology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 314 - Adolescent Psychology**

Credits: 3  
Study of the biological and cultural changes accompanying adolescence, including the effect of these changes on emotional, intellectual, and social development.

**Prerequisites**
6 credits of psychology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 317 - Cognitive Psychology**

Credits: 3  
An in-depth overview of important topics in cognitive psychology, including memory, attention, pattern recognition, problem solving, reasoning, and psycholinguistics.

**Prerequisites**
6 credits of psychology or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 320 - Psychological Tests and Measurements**

Credits: 4  
Examination and application of principles underlying the theory, interpretation, and administration of psychological tests, including a study of tests of intelligence, achievement, and ability.

**Prerequisites**
PSYC 300, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2

**PSYC 321 - Counseling Psychology**
Credits: 3
Review of the theories and methods in psychological counseling.

**Prerequisites**
PSYC 325 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 322 - Behavior Modification**

Credits: 3-5  
Examination of experimental principles of human and animal learning within theoretical framework of applied behavior analysis, including design, implementation, and evaluation of operant intervention programs across a wide variety of human situations.

**Prerequisites**
PSYC 324 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 323 - Clinical and Social Psychology Research Techniques**

Credits: 4  
Review and application of research techniques including interviewing, survey analysis, and process analysis. PSYC 323 is a writing-intensive course.

**Prerequisites**
PSYC 300, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2

**PSYC 324 - Personality Theory**

Credits: 3  
Introduction to classical and contemporary theories of personality, and comparative evaluation of major theories in terms of relevant studies.

**Prerequisites**
PSYC 100 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 325 - Abnormal Psychology

Credits: 3
Study of development of abnormal behavior patterns, including such topics as methods of diagnosis and prevention of serious mental disorders such as psychosomatic disorders, psychoses, character disorders, and mental retardation.

Prerequisites
PSYC 100, and one of PSYC 211, 231, or 324; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 326 - Therapeutic Communication Skills

Credits: 3
Introduction to understanding and use of basic therapeutic communication skills used in clinical and counseling psychology.

Prerequisites
PSYC 325 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 327 - Psychology in the Community

Credits: 3
Individual placements in applied psychology settings.

Prerequisites
Psychology major with minimum 6 psychology credits, and permission of associate chair for undergraduate studies.

Notes
Maximum 6 credits of PSYC 327, 328, 421, 422, 548, and 549 can be applied to the psychology major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 328 - Psychology in the Community Laboratory

Credits: 1
Course comprises one-hour service learning component linked to selected psychology courses.

Prerequisites
Psychology major with minimum 6 psychology credits and permission of course instructor and associate chair for undergraduate studies.
Corequisite
Enrollment in psychology course for which this is service learning component.

Notes
Maximum 6 credits of PSYC 327, 328, 421, 422, 548, and 549 can be applied to the psychology major.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 330 - Psychology of Adjustment

Credits: 3
Nature of effective and faulty patterns of adjustment. Factors in healthy and unhealthy personality development, unique motivation patterns of individuals, and influence of personally significant groups on adjustment. Resources for personal growth and application of contemporary psychological principles to achievement of increased intellectual, emotional, and social competence.

Prerequisites
PSYC 100 or permission of instructor.

Notes
PSYC 330 cannot be taken for credit by psychology majors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 333 - Industrial and Organizational Psychology

Credits: 3
Examination of application of psychological principles and methods to problems commonly encountered in business and industry.

Prerequisites
PSYC 100 and 300; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 335 - Psychology of Creativity and Innovation

Credits: 3
Creativity and innovation take place in many domains such business, science and the arts. Learn the distinction between creativity and innovation. Apply findings from the scientific literature about the antecedents of creativity and innovation including emotions, cognition, individual differences, and social contexts. Experiment with ways to enhance your creativity and skills for innovation.

Prerequisites
PSYC 100 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall

---

**PSYC 350 - Directed Reading and Research in Psychology**

Credits: 1-3  
Library research in psychology, culminating in a substantial formal paper; individualized sections by arrangement with faculty.

**Prerequisites**  
PSYC 100 and 300, and permission of instructor and department.

**Notes**  
No more than six credits in PSYC 260, 350, and 460 can be used toward psychology major.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**PSYC 362 - Psychology of Women**

Credits: 3  
Behavior and attitudes of women; influence of chromosomes and hormones on behavior, influence of culture on sex role differentiation, and theories of sex role development.

**Prerequisites**  
PSYC 100 and BIOL 103, 104; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 372 - Physiological Psychology**

Credits: 3  
Survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action.

Satisfies General Education Requirement: Information technology (IT, all except ethics) (PSYC 330, 301 and 372 must be taken in sequence)

**Prerequisites**  
PSYC 100, and BIOL 103 and 104; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 373 - Physiological Psychology Laboratory

Credits: 1
Functional anatomy and physiology of the brain, including dissection of brain and eye, and a demonstration and practice in research methods for studying physiological mechanisms underlying behavior.

Prerequisites
PSYC 372 or 375 or permission of instructor

Corequisite
PSYC 372 or 375 or permission of instructor

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 2

PSYC 375 - Brain and Behavior I

Credits: 3
First half of comprehensive survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action.

Prerequisites
PSYC 100, and BIOL 103, 104; or permission of instructor.

Notes
Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 376 - Brain and Behavior II

Credits: 3
Second half of comprehensive survey of neuroscience, including basic neuroanatomy, neural and synaptic transmission, neural mechanisms underlying normal and abnormal behavior, and biological mechanisms of drug action.

Prerequisites
PSYC 100, and BIOL 103, 104; or permission of instructor.

Notes
Students may earn credit for 372 and either 375 or 376, but they may not earn credit for all three.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 379 - Applied Cross-Cultural Psychology
Credits: 3
A review of important landmarks in cross-cultural research, showing how this research impacts psychology as a discipline. Emphasizes an empirical approach to cross-cultural study and includes topics such as theoretical and empirical developments in cross-cultural psychology, development of coherent schema's to guide cross-cultural research and interventions, comparison of psychology's goals and assumptions in Western and other cultures, and integration of course materials into educational and career goals of students.

Satisfies General Education Requirement: Global understanding

Prerequisites
PSYC 100, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 405 - Madness, Mystery, and Mayhem

Credits: 3
Multidisciplinary approach to taboo topics that fascinate and frighten us. Instructors from disciplines across the arts and sciences bring expertise and diverse perspectives to provocative issues such as cannibalism and serial murder. Students learn to think critically and objectively while examining use in myth, literature, and popular culture.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all other required general education courses.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

PSYC 414 - Behavior Disorders of Childhood

Credits: 3
Review of the theories, methods, and research dealing with emotional and behavioral disorders of children.

Prerequisites
PSYC 313 and 325, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 415 - Psychological Factors in Aging

Credits: 3
Examination of the sensory, perceptual, intellectual, and personality changes that occur in older people. Common adjustment problems as well as more serious adjustment difficulties are discussed. Applications of various personality theories of aging.
Prerequisites
PSYC 100 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 417 - Science of Well Being

Credits: 3
This course will examine and interpret the latest research in social, personality, and clinical psychology on well-being, character strengths, and personal growth. Emphasis will be placed on the ways in which scientists generate hypotheses regarding the nature of positive psychological traits and processes and the methods by which these ideas are tested.

Prerequisites
PSYC 100 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring

PSYC 418 - Death, Dying, and Grieving

Credits: 3
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill.

Prerequisites
PSYC 100 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 421 - Undergraduate Practicum in Psychology

Credits: 3
Supervised experience in application of psychological principles requiring work in a nonclassroom situation.

Prerequisites
PSYC 325 and 326, and permission of Clinical Review Committee.

Notes
No more than 6 credits in PSYC 327, 328, 421, 422, 548, and 549 can be used toward psychology major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 422 - Undergraduate Practicum in Psychology

Credits: 3
Supervised experience in application of psychological principles requiring work in a nonclassroom situation.

Prerequisites
PSYC 325 and 326, and permission of Clinical Review Committee.

Notes
No more than 6 credits in PSYC 327, 328, 421, 422, 548, and 549 can be used toward psychology major.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 423 - Group Psychotherapy Techniques

Credits: 3
Review of theory and methods of group therapy with emphasis on humanistic and interpersonal approaches, including applications to family therapy, alcoholism, and drug abuse.

Prerequisites
PSYC 324 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 435 - Personnel Training and Development: A Psychological Perspective

Credits: 3
Overview and critique of training methods used in industry from viewpoint of psychological theory, including simulations, on-the-job training, supervisory/leadership skills training, computer-assisted instruction, and programmed texts. Principles of needs analysis, program development, and program evaluation are discussed within framework of industrial psychology.

Prerequisites
PSYC 233, PSYC 320, or permission of instructor

Corequisite
PSYC 320 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 460 - Independent Study in Psychology

Credits: 1-4
Advanced research methods in psychology in context of individual student projects or assisting with research on faculty projects;
individual sections by arrangement with faculty.

**Prerequisites**
18 credits of psychology including PSYC 301, with grade of C or better; 2.50 GPA in psychology; and written proposal approved before registration by instructor and department.

**Notes**
No more than 6 credits in PSYC 260, 350, and 460 can be used toward psychology major.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**PSYC 461 - Special Topics**

Credits: 1-3
Selected topics reflecting interest in specialized areas.

**Prerequisites**
See course description in Schedule of Classes.

**Notes**
Announced in advance.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PSYC 465 - History and Systems in Psychology**

Credits: 3
Historical background and major theoretical systems in modern psychology. Approaches include behaviorism, cognitive/information processing approaches, and psychodynamic theories.

**Prerequisites**
18 credits in psychology including PSYC 317, or permission of instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**PSYC 466 - Psychology of Intimate Relationships**

Credits: 3
Advanced survey of theories and research related to intimate relationships, including romantic relationships and those among family members and friends.

**Prerequisites**
PSYC 100 and 231; PSYC 324 recommended; or permission of instructor.
PSYC 467 - The Psychology of Working in Groups and Teams

Credits: 3
Teaches knowledge and the skills to meet communication, interpersonal, and task-related challenges that arise when functioning in work teams. Through readings, classroom activities, and applied problem-solving exercises, students acquire or refine team-related competencies. Students study theory of group and team processes while gaining insight from feedback on their behavior in exercises to become more effective team members.

Prerequisites
60 credits including PSYC 100, or permission of instructor.

PSYC 472 - Advanced Physiological Psychology

Credits: 3
Rotating topics. Physiological mechanisms underlying behavior. Selected topics include neuronal bases of learning and memory, and biological bases of reinforcement and addiction.

Prerequisites
PSYC 372 or 375 and 376; or permission of instructor.

Notes
May be repeated once with approval of instructor.

PSYC 490 - Psychology Honors I

Credits: 3
Review of topics and issues in psychology, including historical overview, theory and supporting data, and influences on behavior.

Prerequisites
Admission to Psychology Department honors status.

Notes
Topics vary. May not be repeated.
PSYC 491 - Psychology Honors II

Credits: 3
Introduces advanced statistics, research methodologies, statistics packages, computing and information technology, and library technology appropriate for psychological research and pedagogy.

Prerequisites
PSYC 300, 301, and 490.

Notes
Students required to complete proposal in preparation for admission to Psychology Honors III. May not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 492 - Psychology Honors III

Credits: 3
Completion of final honors project or thesis. Students must complete project or thesis, and present oral defense to committee and poster to class. Students also expected to prepare proposal to present project or thesis at regional or national conference, or prepare manuscript for publication in appropriate journal.

Prerequisites
PSYC 491, and approval of proposal for final honors project or thesis.

Notes
May not be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 499 - Senior Thesis

Credits: 3
Directed research on topic agreed on by student and advisor.

Prerequisites
Psychology major with 90 credits, experimental psychology lab course, 3.00 GPA in psychology, PSYC 460, permission of instructor, and prior approval of thesis proposal.

Notes
Students should take PSYC 460 with same advisor to develop thesis proposal before registering for PSYC 499. Students must complete thesis and defend it orally before advisor and two faculty members. With permission of department, students may take a second semester for maximum 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
PSYC 506 - Theories of Personality

Credits: 3
Comparative review of prevalent theories of personality with special emphasis on fundamental models, and similarities and differences.

Prerequisites
PSYC 324 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 518 - Death, Dying, and Grieving

Credits: 3
Advanced survey of processes of grieving and their relationship to death and dying. Topics include ways of dying, effects of death on loved ones, and care for the terminally ill.

Prerequisites
PSYC 100

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 527 - Introduction to Neurobiology

Credits: 2
Introduction to neurobiology with overview of embryological development of nervous system in evolutionary context. Introduces regional and systems neuroanatomy by studying mammalian visual system with comparative perspective.

Prerequisites
Completion of 60 credits, including PSYC 372 or BIOL 213 and 303.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

PSYC 530 - Cognitive Engineering: Cognitive Science Applied to Human Factors

Credits: 3
Application of cognitive theory to understand and predict interactions among human cognition, artifact, and task. Discusses recent research and case studies that emphasize empirical research, analytical modeling techniques, systems design, and development of tools and methods.

Prerequisites
Experimental lab course, or permission of instructor.
PSYC 531 - Mammalian Neurobiology

Credits: 3
Functional anatomy of brains of mammals, with emphasis on regional and systems neuroanatomy of humans. Anatomy correlated with material from clinical neurology where possible. Laboratory component includes brain dissections and clinical correlations.

Prerequisites
PSYC 527.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 3

PSYC 541 - Survey Research

Credits: 3
Introduces theory, method, and practice of survey research; students complete survey research project.

Prerequisites
PSYC 300 or SOCI 221, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 548 - Practicum in Gerontology

Credits: 3
Practical experience in gerontological setting under supervision of qualified professional for 150 contact hours per 3 credits.

Prerequisites
Completion of three of the required courses in gerontology certificate program, or permission of instructor.

Notes
No more than 6 credits in PSYC 327, 328, 421, 422, 548, and 549 can be used toward psychology major.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 549 - Practicum in Gerontology

Credits: 3
Practical experience in gerontological setting under supervision of qualified professional for 150 contact hours per 3 credits.
Prerequisites
Completion of three of the required courses in gerontology certificate program, or permission of instructor.

Notes
No more than 6 credits in PSYC 327, 328, 421, 422, 548, and 549 can be used toward psychology major.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 552 - Histology/Histochemistry of the Brain

Credits: 5
Explores conceptual basics and provides hands-on experience in techniques for studying brain tissue, including stereotaxic surgery, perfusion, sectioning, Nissl and myelin stains, enzyme histochemistry, immunohistochemistry, in situ hybridization, and quantitative receptor autoradiography.

Prerequisites
PSYC 372 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 556 - Chemistry and the Brain

Credits: 3
Fundamentals of general chemistry, atoms, molecules, and reactions, with emphasis on water solutions. Organic compounds and functional groups, biosynthesis and properties, and examples from nervous system. Also includes biopolymers and their roles in cellular and neuronal organization, ionic channels, neurotransmitter receptors, and psychoactive substances.

Prerequisites
PSYC 372 or 375 and 376; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 557 - Psychometric Methods

Credits: 3
Examines concepts of psychological measurement with emphasis on predictor test and criterion development. Discusses reliability, validity, and specialized techniques to develop tests of ability, interest, and personality.

Prerequisites
PSYC 611 and 612, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PSYC 558 - Neuronal Bases of Learning and Memory**

Credits: 3  
Examines neuronal mechanisms involved in learning and memory, in animals ranging from invertebrates to humans.

Prerequisites  
PSYC 372 or 375 and 376; or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 559 - Behavioral Chemistry**

Credits: 3  
Neurochemistry and neuroendocrinology, including neurotransmitter synthesis, genetic aspects of neural functioning, mechanisms of action of neurotransmitters and second messenger systems, regulation of neuroendocrine systems, neuroendocrine effects on behavior, and neuroimmunology.

Prerequisites  
PSYC 372 or 375 and 376; or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 560 - Advanced Applied Social Psychology**

Credits: 3  
Study of major trends in social psychological research with emphasis on ethical and practical problems posed by human experimentation. Topics include attitude measurement and change, conformity, social perception, and small group interaction.

Prerequisites  
PSYC 231, or permission of instructor.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**PSYC 561 - Behavioral Biology of Substance Abuse**

Credits: 3  
Overview of biological effects of substance abuse, and biological mechanisms underlying addiction. Topics include alcohol, cocaine, marijuana, and other drugs; genetics of addiction; and neural systems underlying addiction and withdrawal.

Prerequisites  
PSYC 372 or equivalent.
PSYC 591 - Professional Seminar

Credits: 1-3
See area coordinator for requirements for section in each track.

Prerequisites
MA students in psychology.

Notes
Each section limited to students in one concentration of MA program. May be repeated for total 3 credits only.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 592 - Special Topics

Credits: 1-6
Special topics reflecting interests in specialized areas.

Notes
Topic announced in advance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 597 - Directed Reading and Research

Credits: 1-3
Independent reading or research on topic agreed on by student and faculty member.

Prerequisites
Permission of instructor

Notes
Directed reading or research for MA students in psychology. May be repeated for maximum 6 credits. Maximum 9 credits of 597, 792, 798, and 799 may be applied to master's degree.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
PSYC 611 - Advanced Statistics

Credits: 4
Test must be passed to take course. Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes using computer packages for data handling and analyses.

Prerequisites
Screening test given on first evening of class

Notes
Students must enroll in 611 and 612 in sequential semesters.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 612 - Advanced Statistics

Credits: 4
Open only to degree students. Integrates basic psychological statistics with overview of research methodology including experimental, quasi-experimental, field approaches, and measurement issues from advanced perspective. Lab work includes use of computer packages for data handling and analyses.

Prerequisites
Grade of A or B in PSYC 611.

Notes
Students must enroll in 611 and 612 in sequential semesters.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

PSYC 614 - The Psychology of Aging

Credits: 3
Review of the experimental literature in psychology of aging, including intellectual functioning, personality and adjustment, minor and major adjustment problems, and role changes in later life.

Prerequisites
PSYC 100, and undergraduate or graduate course in aging.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 615 - Language Development
Seminar covering theory and research on acquisition of language, including biological and environmental influences and constraints; research methods; role of parents; individual and cultural differences; links between language and other domains of development including cognitive, behavioral, social, and emotional; language and the brain; animal language; bilingualism; and atypical language development.

**Prerequisites**
3 credits of graduate development psychology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 617 - Child Psychopathology**

Credits: 3  
Intensive survey of major types of psychopathological disturbances of infancy and childhood.

**Prerequisites**
PSYC 313 or 211, and 325.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy**

Credits: 3  
Focuses on basic principles and procedures of applied behavior analysis; identification of factors that contribute to behavioral problems and improved performance; and procedures that can be used to minimize behavioral problems, improve performance, teach new behaviors, and increase probability of behaviors occurring under appropriate circumstances.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 621 - Applied Behavior Analysis: Empirical Bases**

Credits: 3  
Focuses on basic content of applied behavior analysis, and teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 623 - Applied Behavior Analysis: Assessments and Interventions**
PSYC 624 - Applied Behavior Analysis: Applications

Credits: 3
Further expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.

Prerequisites
PSYC 619 and 621, or EDSE 619 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 625 - Applied Behavior Analysis: Verbal Behavior

Credits: 3
Further expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.

Prerequisites
PSYC 619 and 621, or EDSE 619 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 630 - Developmental Disabilities

Credits: 3
Lectures, seminars discuss state-of-the-art and evidence-based information about developmental disabilities across life span with emphasis on mental retardation. Includes epidemiology, etiology, diagnoses, risk factors, treatment, supports, and prevention of developmental disabilities. Pertinent philosophical, ethical, and legal issues concerning this special-needs population will be discussed.

Prerequisites
3 credits of graduate developmental psychology courses, or permission of instructor

Notes
In addition to course work and assigned reading, students sign up for a 20-hour per semester practicum.
PSYC 631 - Industrial and Personnel Testing and Evaluation

Credits: 3
Study of administration, scoring, and interpretation of standard tests used by industry for selection and assessment of personnel.

Prerequisites
PSYC 300 and 320.

PSYC 633 - Evaluative Research in Psychology

Credits: 3
Examines research techniques specifically designed to evaluate human effectiveness of organizations and mental health programs.

Prerequisites
PSYC 300 or permission of instructor.

PSYC 636 - Survey of Industrial Psychology

Credits: 3
Intensive survey of historical and current issues in major areas of applied (nonclinical) psychology.

Prerequisites
PSYC 300 or permission of instructor.

PSYC 638 - Training: Psychological Contributions to Theory, Design, and Evaluation

Credits: 3
Focuses on applying learning principles derived from psychological research in development of training models and techniques of skill acquisition. Discusses research designs and empirical results appropriate to training evaluation.
Prerequisites
PSYC 636, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 639 - Survey of Organizational Processes

Credits: 3
Trains at conceptual/theoretical and empirical levels in organizational processes. Includes individual, interpersonal, intra-group, and intergroup phenomena as they exist in context of organizational settings.

Prerequisites
PSYC 333 or 632.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 640 - Techniques in Industrial/Organizational Psychology

Credits: 3
Skills-oriented course enabling students to construct instruments and perform functions critical to both researchers and practitioners in industrial/organizational psychology. Focuses on conducting job analysis interviews, developing and scoring task inventories, using critical incident and KSAO methods, and constructing performance appraisal and selection instruments.

Prerequisites
PSYC 300, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 645 - Research Methods in Human Factors and Applied Cognition

Credits: 3
Hands-on approach to selected current or classical human factors/applied cognition research methods; exact methods announced in advance. Potential methods include cognitive task analysis, usability evaluation methods, critical incident analysis, reliability analysis, workload measures, verbal protocol analysis, and engineering models of human performance.

Prerequisites
PSYC 530 and 611.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 646 - Issues and Methods in Longitudinal Developmental Research

Credits: 3
Examines techniques for measuring developmental change across lifespan.

Prerequisites
PSYC 611 and 612, and 6 credits of graduate developmental psychology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 648 - Developmental Psychopathology

Credits: 3
In-depth look at emerging discipline of developmental psychopathology. Discusses specific disorders and contexts to illustrate how knowledge of normal development, deviant development, and maladaptive behavior illuminates principles underlying adaptive functioning.

Prerequisites
6 credits of graduate developmental psychology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 652 - Quantitative Methods II: Analysis of Variance

Credits: 3
Basic concepts in experimental design, fundamental assumptions in analysis of variance, and analysis of variance and covariance designs. Reviews multiple comparison tests.

Prerequisites
PSYC 300 and either 304, 305, or 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 654 - Naturalistic Methods in Psychology

Credits: 3
Theory and techniques involved in studying people in their natural environment. Primary emphasis on quasiexperimental designs and methods of systematic observation.

Prerequisites
PSYC 300 and either 304, 305, or 309.
PSYC 666 - Cognitive and Perceptual Development

Credits: 3
Survey of theory and research on development of perception, memory, concepts, problem solving, intelligence, and academic skills in children.

Prerequisites
6 credits of child psychology, and course in experimental psychology; or permission of instructor.

PSYC 667 - Behavior in Small Groups and Teams

Credits: 3
Theories, methods, and topics relevant to individual behavior in small group setting. Includes effects of individual on group, effects of group on individual, and interaction effects among individuals.

Prerequisites
PSYC 231.

PSYC 668 - Personality: Theoretical and Empirical Approaches

Credits: 3
Presents comprehensive overview of current theoretical and empirical approaches to personality. Emphasizes areas of special relevance to clinical, developmental, and industrial/organizational psychology.

Prerequisites
PSYC 324, or permission of instructor.

PSYC 669 - Social and Emotional Development

Credits: 3
Surveys theory and research relevant to development of social relationships, emotional expressiveness and regulation, aggressive
and altruistic behaviors, sex roles, and morality. Emphasizes influences on such development, including parents, other adults, peers, siblings, and broader culture.

**Prerequisites**
6 credits of developmental psychology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PSYC 671 - Role and Function of the School Psychologist

Credits: 3  
Considers roles, functions of school psychologist in educational environment, including certification and ethical standards, issues, and trends.

**Notes**  
Open only to school psychology MA students, or by permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### PSYC 673 - Prevention, Intervention, and Consultation in Schools

Credits: 4  
Examines theory and practice of behavior modification and consultation in school environment.

**Notes**  
Open to practicing school psychologists and students in school psychology, or by permission of instructor.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

### PSYC 678 - Topics in School Psychology

Credits: 1-6  
Selected topics reflecting specialized area of school psychology.

**Notes**  
Open to practicing school psychologists and advanced students in school psychology, or by permission of instructor. Content varies. May be repeated for total 9 credits.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

### PSYC 684 - Psychological Counseling Techniques
Students gain experience in counseling techniques used in schools and contemporary practice.

**Notes**
Open to practicing school psychologists or psychology graduate students with prior course in counseling. Application of various counseling approaches and techniques to school-age child and adolescent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 685 - Cognitive Neuroscience**

Credits: 3  
Provides an overview of the neural basis of human mental functions. Uses neuroimaging (PET, fMRI, ERPs, TMS, etc.), computational, and information-processing methods to examine functions such as attention, memory, language, emotion, and decision making.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 701 - Cognitive Bases of Behavior**

Credits: 3  
Surveys concepts in learning, cognitive, and affective processes, including theories and supporting data and their influences on behavior.

**Notes**
Open only to degree students.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 702 - Biological Bases of Human Behavior**

Credits: 3  
Surveys biological bases of behavior, including such topics as neural conduction, role of specific neurotransmitters, cortical functioning, and brain disorders.

**Notes**
Open only to degree students.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 703 - Social Bases of Behavior**
PSYC 704 - Life-Span Development

Credits: 3
Surveys theories and research regarding lifespan development and personality formation.

Notes
Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 705 - Historical and Philosophical Issues in Psychology

Credits: 3
Important historical and systematic approaches to psychology and their relationship to the philosophy of science, structure of theory, and philosophical issues in psychology.

Notes
Open only to degree students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 709 - The Measurement of Intelligence

Credits: 4
Administration, scoring, and interpretation of major infant, child, and adult intelligence tests, with emphasis on individual tests. Development of IQ tests, theories of intelligence, and current trends and developments in intellectual assessment.

Prerequisites
Department permission; and PSYC 617 or 822 and PSYC 320 or equivalent.

Corequisite
PSYC 611.

Notes
Open only to school psychology MA student.
PSYC 710 - Psychological Assessment

Credits: 4
Study of major instruments used in clinical assessment and nature, problems, and predictive value; administration and scoring of major techniques for evaluation of personality; and principles of interpretation of these procedures.

Prerequisites
Satisfactory completion as certified by the School Psychology Committee; PSYC 617, 709, 822, or 810; and permission of department.

Notes
Open only to school psychology MA students.

PSYC 722 - Advanced Child Assessment

Credits: 4
Problems involved in diagnostic assessment of children with various handicapping conditions such as learning disabilities, retardation, and emotional disturbances.

Prerequisites
PSYC 709 and 710 or PSYC 810 and 811, five intellectual assessments at psychological clinic, and permission of department

Notes
Open only to school psychology MA or PhD students.

PSYC 730 - Practicum in Applied Psychology

Credits: 1-6
Practical experience in organizational setting as assigned.

Prerequisites
Permission of department. Apply in writing to area coordinator 60 days prior to beginning of semester.

Notes
Open only to degree students in psychology. PhD students may repeat course for maximum 15 credits; MA students for maximum 6 credits.
PSYC 733 - Issues in Personnel Psychology

Credits: 3
Examines psychological literature on job analysis, job evaluation and compensation, performance appraisal, training, and EEOL selection issues. Methodological and psychometric issues in interpretation and evaluation of personnel psychology research receive particular attention.

Prerequisites
PSYC 636 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 734 - Seminar in Human Factors and Applied Cognition

Credits: 3
Emphasizes current research and application of human factors, ergonomics, applied cognition, and applied perception.

Prerequisites
6 graduate credits in human factors and applied cognition, or permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 735 - Psychological Perspectives on Organizational Development

Credits: 3
Theories and methods in industrial/organizational psychology as they relate to organizational change and development. Actual training in organizational diagnosis, change through supervised field work.

Prerequisites
3 graduate credits in industrial/organizational psychology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 736 - Research in Human Performance Assessment

**Prerequisites**
3 graduate credits in industrial/organizational psychology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 737 - Psychology of Human-Technology Interaction**

Credits: 3  
Emphasizes current research and development in human-computer interaction, cognitive systems engineering, cognitive ergonomics, and cognitive engineering.

**Prerequisites**
6 graduate credits in human factors and applied cognition, or permission of instructor.

**Notes**
May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 739 - Seminar in Industrial/Organizational Psychology**

Credits: 3  
Rotating topics such as leadership theories and management development, and performance appraisal.

**Prerequisites**
PSYC 333 and 636, or permission of instructor.

**Notes**
Topics announced in advance. May be repeated for credit.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 741 - Psychology of Work Motivation**

Credits: 3  
Examines psychological literature of need, cognitive, and reinforcement theories of motivation; organizational attachment (commitment, absenteeism, and turnover); job design and quality of work issues. Emphasizes methodological and psychometric issues in interpreting and evaluating work-motivation research.
**Prerequisites**
PSYC 333 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PSYC 750 - School Psychology Practicum I**

Credits: 1  
Practical experience in school psychology.

**Prerequisites**
PSYC 709

**Notes**
Open only to school psychology MA students.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**PSYC 751 - School Psychology Assessment Practicum II**

Credits: 2  
Practical experience in school psychology.

**Prerequisites**
PSYC 750.

**Notes**
Open only to School Psychology MA students. Apply in writing for permission of department 60 days prior to beginning of semester.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**PSYC 754 - Quantitative Methods III: Psychological Applications of Regression Techniques**

Credits: 3  
Reviews psychological applications of regression techniques in variety of contexts including experimental, field, and survey settings.

**Prerequisites**
PSYC 611 and 612.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PSYC 756 - Quantitative Methods IV: Multivariate Techniques in Psychology

Credits: 3
Surveys multivariate statistical techniques as applied to psychological research. Emphasizes analysis of complex designs and interpretation of multivariate data analyses resulting from computer processing.

Prerequisites
PSYC 611 and 612, or equivalent; PSYC 755 recommended.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 757 - Advanced Topics in Statistical Analysis

Credits: 3
Focuses on noncognitive individual differences that predict performance. Published work discussed in seminar format with emphasis on conceptual development, methodological adequacy, and new directions.

Prerequisites
PSYC 754.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 758 - Dispositional Predictors of Performance

Credits: 3
Focuses on individual differences other than cognitive ability that predict performance. Papers discussed in seminar format with eye toward conceptual development and empirical review.

Prerequisites
PSYC 636.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 759 - Applied Decision Making

Credits: 3
Covers "basic applied" decision-making research. First half of course reviews basic psychological research on judgment and decision making; second half applies research to various practical problems. Overarching goal is to understand how basic decision-making literature can better inform applied research and practice.

Prerequisites
PSYC 768 - Advanced Topics in Cognitive Science

Credits: 3
Emphasizes current research in cognitive science. Topics may include computational cognitive models, nature of expertise, diagrammatic reasoning, display-based problem solving, visual attention, decision making, goal-based versus event-based cognition, and situated action.

Prerequisites
PSYC 530 or 701

Notes
May be repeated for credit.

PSYC 780 - Applied Developmental Psychology

Credits: 3
Examines how developmental theory, knowledge base, and methodology can be used to promote health and welfare of individuals across lifespan. Topics include contemporary social issues and child development, research in applied settings, developmental assessment and intervention, and program evaluation.

Prerequisites
PSYC 704, or 3 credits of other graduate developmental psychology courses, and permission of instructor.

PSYC 786 - Assessment and Treatment in Gerontology

Credits: 3
Functional assessment of older adults including conceptual and methodological problems involved. Examines intervention strategies with older adults, including interviewing, group work with older persons, milieu therapy, reality therapy, and design of supportive environments.

Prerequisites
Course in the psychology of aging, PSYC 320 and 423, or equivalent courses.
PSYC 790 - School Psychology Internship

Credits: 3-6
Supervised field experience of one school year. Advanced school psychology student functions as full-time staff member in school system. Student completes paper on practical research project involving alternative school psychology role in school system.

Prerequisites
Completion of required courses in school psychology, and permission of program coordinator.

Notes
Enrollment is for total 9 credits (thesis option) or 12 credits (nonthesis option) in increments of 3 credits according to placement. Students enrolled in PSYC 799 are not required to complete the practical research project.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 792 - Practicum in Developmental Psychology, Biopsychology, and School Psychology

Credits: 1-6
Supervised experience in developmental psychology, biopsychology, or school psychology.

Prerequisites
3 credits of graduate developmental psychology or biopsychology or advanced standing in school psychology.

Notes
Open to degree students in developmental psychology, biopsychology, or school psychology MA or PhD programs. Interested students must apply to area coordinator 60 days before registration.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 798 - Thesis Proposal

Credits: 1-6
Work on a proposal for master's thesis.

Prerequisites
Permission of instructor

Notes
May not be repeated for credit.

Hours of Lecture or Seminar per week: 0
PSYC 799 - Master's Thesis

Credits: 1-6
Research on approved master's thesis topic under direction of thesis committee with approval of chair.

PSYC 810 - Psychological Assessment I

Credits: 4
First of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods.

Notes
Open only to clinical psychology PhD students.

PSYC 811 - Psychological Assessment II

Credits: 4
Second of required two-course sequence that provides comprehensive coverage of principles, strategies, and techniques of psychological assessment. Emphasizes empirically supported methods.

Notes
Open only to clinical psychology PhD students.

PSYC 816 - Neuropsychological Assessment

Credits: 3
Nature of brain behavior relationships in adults and children. Concentrates on major assessment techniques including Luria Nebraska, Halstead-Reitan, and Michigan Neuropsychological batteries.

Prerequisites
PSYC 702, 810, and 811; or 709 and 710
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 822 - Scientific Foundations of Clinical Psychology I**

Credits: 3
First of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions.

Notes
Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 823 - Scientific Foundations of Clinical Psychology II**

Credits: 3
Second of required two-course sequence that provides comprehensive coverage of major psychological problems, including review of empirically supported interventions.

Notes
Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 830 - History, Systems, and Theories of Personality and Psychotherapy**

Credits: 3
Review of history, systems, and theories of clinical psychology emphasizing traditional theories of personality and psychotherapy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 831 - Social-Cognitive Interventions in Clinical Psychology**

Credits: 3
Survey of procedures for altering emotional distress and behavioral dysfunction within the conceptual framework of social cognitive theory and cognitive behavioral therapy.

Notes
Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 832 - Group, Marital, and Family Psychotherapy**

Credits: 3
Introduces major models of group, marital, and family functioning as well as current approaches to group, marital, and family psychotherapy.

Prerequisites
PSYC 822, 823, and 830.

Notes
Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 833 - Social And Cognitive Foundations Of Clinical Psychology**

Credits: 3
Review of theory and research in social psychology (particularly social cognition) relevant to understanding psychological adjustment, adjustment problems, and clinical interventions.

Notes
Open only to clinical psychology PhD students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 840 - Community Psychology I**

Credits: 3
First of required two-course sequence. Comprehensive coverage of history, concepts, and practice of community-clinical psychology, including community mental health theory, consultation, prevention, program planning and evaluation, and human services management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PSYC 841 - Community Psychology II**
Credits: 3
Second of required two-course sequence. Comprehensive coverage of history, concepts, and practice of community-clinical psychology, including community mental health theory, consultation, prevention, program planning and evaluation, and human services management. Includes implementation of consultation project.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PSYC 850 - Teaching Practicum in Psychology**

Credits: 1  
Workshop in effective teaching of selected undergraduate psychology courses. Required of and designed to guide graduate teaching assistants assigned to teach undergraduate course (not a lab) for first time. Topics include course planning, syllabus development, lecture resources, effective lecturing skills, use of audio visuals, leading of classroom discussion, construction and grading of exams, student writing, instructional technology, and handling of student questions and problems. Individual critiques of teaching.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

**PSYC 881 - Practicum in Clinical Psychology**

Credits: 1-3  
Supervised clinical work in a professional psychological services setting. Usually includes practice in psychological assessment and clinical interventions, but can also include supervision, consultation, and program evaluation.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**PSYC 883 - Ethical and Professional Issues in Clinical Practice**

Credits: 3  
Examines ethical principles and professional guidelines to help develop ethical decision-making and behavior to meet the appropriate standards of care in providing clinical services.

**Notes**  
Open only to clinical psychology PhD students.

**Hours of Lecture or Seminar per week:** 3  
**When Offered:** Fall, Spring

**PSYC 885 - Clinical Externship**
Credits: 0
Individual placements in psychological assessment or psychotherapy service settings.

Notes
Open only to clinical psychology PhD students in the third year or more of training.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 888 - Clinical Supervision: Theory, Research, and Practice

Credits: 3
Introduces students to theory, research, and practice of clinical supervision, with an emphasis on supervision of psychotherapy. Focuses on selecting effective supervision strategies, establishing and maintaining a positive supervisory relationship, and applying supervisory practices in accordance with current research and standards. Includes didactic and applied components.

Prerequisites
6 credits of PSYC 881.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PSYC 890 - Seminar in Professional Psychology

Credits: 1-3
Each section limited to students in one concentration of PhD program. See area coordinator for requirements for section in each track.

Notes
Open only to degree students. May be repeated for credit.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0
Grading: S/NC

PSYC 892 - Special Topics in Psychology

Credits: 1-6
Selected topics reflecting specialized areas in psychology.

Notes
Open only to PhD students. Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PSYC 897 - Directed Reading and Research

Credits: 1-3
Independent reading on topic agreed on by student and faculty member.

Notes
Clinical psychology PhD students may not take this course for elective credit. May be repeated. May not be repeated for degree credit by students who also register for PSYC 799.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PSYC 998 - Doctoral Dissertation Proposal

Credits: 1-6
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated. No more than 24 credits of PSYC 998 and 999 may be applied to doctoral degree requirements.

Grading: S/NC

PSYC 999 - Doctoral Dissertation

Credits: 1-3
Research on approved dissertation topic under direction of dissertation committee.

Prerequisites
PSYC 998

Notes
May be repeated. Students must complete a minimum of 3 credits of 999. No more than 12 credits of PSYC 998 and 999 may be applied to doctoral degree requirements.

Grading: S/NC

Public Administration

PUAD 502 - Administration in Public and Nonprofit Organizations

Credits: 3
Graduate introduction to field of public administration. Focuses on structure, functions, and processes of executive branch agencies of national, state, and local governments. Emphasizes nonprofit organizations as co-actors with government in policy-
making/policy implementation nexus.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 504 - Managing in the International Arena: Theory and Practice**

Credits: 3  
Theoretical and empirical examination of international system that both affects and is affected by decisions, behaviors, and subsystems of state and nonstate (organizational) actors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 505 - Introduction to Management of Nonprofits**

Credits: 3  
Examines nonprofit organizations and their role in contemporary society. Explores unique aspects of nonprofits including voluntary governance, tax-exempt status, nonprofit corporation law, accounting practices, fund raising, finance, and management of volunteers. Emphasizes board/executive relationship, and value of establishing and maintaining nonprofit organization's reputation.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 509 - Justice Organizations and Processes**

Credits: 3  
Examines structures, practices, and performance of organizations involved in administration of justice (law enforcement, courts and legal agencies, corrections, regulatory and related agencies, private organizations) Explores applicability of various theoretical perspectives on organizational processes, and considers extent to which processes operate as a system. Focuses on comparing formal goals and system expectations to actual practice.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 611 - Problem Solving and Data Analysis I**

Credits: 3  
Techniques, skills for public managers to solve policy-related problems or analyze policy-related data. Focuses on problem definition, research design, and problem solving under conditions of uncertainty in public sector.

**Prerequisites**  
Passing grade on screening exam.
PUAD 612 - Problem Solving and Data Analysis II

Credits: 3
Techniques and skills for public managers to solve policy-related problems or analyze policy-related data. Focuses on data gathering and analysis, use of computers, systems theory and analysis, and operations research.

Prerequisites
PUAD 611

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 613 - Economic Analysis in Public Administration

Credits: 3
Covers major economic issues about role of markets and government in global world. Applies fundamental economic concepts such as cost benefit analysis to public sector.

Prerequisites
PUAD 611

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 615 - Administrative Law

Credits: 3
Covers law as guiding and controlling force in public-sector operations. Includes application of legal processes to administrative practices and situations, and administrative determination of private rights and obligations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 620 - Organization Theory and Management Behavior

Credits: 3
Considers behavior in context of public organization, and consequent changes required in management. Focuses on such issues as perception, attitude formation, motivation, leadership, systems theory, communication and information flow, conflict theory, and decision theory.
PUAD 621 - Principles and Practices in Government Organization and Management

Credits: 3
Major management theories applicable to American federal system. Emphasizes organization, structure, and operations. Explores relationship of theories to management practices in contemporary American administration.

Prerequisites
PUAD 620.

PUAD 622 - Program Planning and Implementation

Credits: 3
Practical exploration of implementing public law in American federal system. Studies construction of organizational apparatus, development of operational plans, and systems of control and evaluation necessary to implement government programs. Emphasizes coordinating tasks and resources required for effective program implementation.

Prerequisites
PUAD 620.

PUAD 623 - Managing Government Contracting

Credits: 3
Explores unique management and administrative challenges of providing public goods and services through contracts. Examines debates over privatization, and explores tools managers need to address unique accountability challenges associated with this governance tool.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 624 - Public and Private Partnerships

Credits: 3
Emphasizes entrepreneurial efforts where governments, nonprofit organizations and private companies establish goals and combine resources and talents. Issues of efficiency, accountability, and democratic responsiveness will be examined. Various tools for promoting and implementing such partnerships will be explored.
PUAD 625 - Higher Education Law

Credits: 3
Analyzes legal issues confronting higher education: governance, faculty matters, and student issues. Examples include due process, freedom of speech, and privacy. Reviews key constituents in higher education-students, faculty, administrators, board of trustees, and parents -and how their roles are changing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 626 - Consulting Management

Credits: 3
Explores the consulting industry, changes in the industry and future expectations of consulting as a career. Examines different sectors of consulting such as HR, IT, Operations, Marketing, Succession Planning, Organizational Consulting, Knowledge management, Non-profit and health care and government consulting.

PUAD 630 - Emergency Planning and Preparedness

Credits: 3
Provides an understanding of the issues associated in developing plans and policies to prepare for disasters, both natural and man made. Overview of nature of challenges posed by different kinds of disasters; discussion of regulatory requirements, sample plans, equipment requirements, collateral and mutual aid support agreements, and methods for testing and updating plans.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 631 - Disaster Response Operations and Recovery

Credits: 3
Explores the principles and practices that promote effective disaster response operations and management. Examines nature of disasters, models for response operations in the United States and roles and responsibilities of various emergency management-related organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 632 - Terrorism: Theory and Practice
Credits: 3
Introduces students to the subject of terrorism including the history and evolution of terrorism, case studies of key terrorist groups, the current nature of the terrorist threat, and counterterrorism strategies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 633 - Hazard Mitigation Policy**

Credits: 3
Examines the complex interplay and policy approaches to hazard prevention and protection of known hazards in terms of land use, zoning, infrastructure, and building code management. Focuses on understanding the relative roles of proactive policy design and implementation at the federal, state, and local levels of government.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 634 - Management of International Security**

Credits: 3
Examines theory and practice of managing international security. Emphasizes interplay of organizational structure and bureaucratic dynamics in international context. Presents theory and practice of crisis management, and coordination and comparison of security methods and techniques.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 635 - Emergency Preparedness: Interagency Communication and Coordination**

Credits: 3
Considers complex relationships within governments and across sectors and levels of government for effective emergency management in planning, response, recovery, and mitigation phases. Explores intergovernmental management and network management theories and research to understand the nature of interorganizational problems and potential models for collaboration.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 636 - The NGO: Policy and Management**

Credits: 3
Explores unique aspects of nonprofit organizations operating in international environments, particularly in relief and development work. Examines relationship between NGO and U.S. and foreign governments. Covers international philanthropy; cross-cultural understanding; and key managerial concerns such as communications, planning, human resource management,
control, group process, and project evaluation.

**PUAD 637 - Managing Homeland Security**

Credits: 3
Focuses on the Department of Homeland Security and will cover the statutory law that provides the foundation for the department, the resources appropriated to the department, the determination of strategy and priorities, the development of operational capacity, and other challenges associated with top-level (secretarial) management of the department and its principal bureaus.

**Hours of Lecture or Seminar per week:** 3

**PUAD 640 - Public Policy Process**

Credits: 3
Processes of making public policy, including detection of public issues, consideration of alternatives, and adoption and implementation of solutions. Highlights major actors in policy process, and environment within which they work.

**Prerequisites**
PUAD 502.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PUAD 642 - Environmental Policy**

Credits: 3
In-depth examination of environmental policy making. Examines U.S. efforts from 1970 to present to mitigate pollution of nation's air, land, and water; and addresses issues of global concern including biodiversity loss, ozone depletion, and climate change.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**PUAD 644 - Public Policy Models**

Credits: 3
Approaches to modeling policy problems. Includes analysis and comparison of dominant paradigms in policy sciences. Reviews assumptions and implications of different models and their utility for analysis, implementation, and evaluation.

**Prerequisites**
PUAD 640.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 651 - Virginia Politics, Policy, and Administration

Credits: 3
Cultural, demographic, constitutional, and socioeconomic environment of public administration in Virginia. Covers governmental agencies, legislative functions, executive leadership, staff agencies, state-local relationships, intrastate regionalism, administrative customs peculiar to Virginia.

Prerequisites
PUAD 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 652 - Nonprofit Leadership and Change

Credits: 3
Examines the principles of leadership and the process of change within the context of the nonprofit sector and its role in the community. Looks at current changes and challenges within the nonprofit sector and their effect on the sector and society as a whole.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 654 - The Community, Marketing, and Public Relations

Credits: 3
Focuses on marketing concepts and communications issues of nonprofit organization as they apply to identifying market, ability to formulate public image and reputation, and capability to raise money and retain membership or volunteers.

Prerequisites
PUAD 502 or 505.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 655 - Philanthropy and Fund Raising

Credits: 3
Examines history of philanthropy and relationship to nonprofit, government, and commercial sectors in United States. Studies
principles of financial development including governance, development of organizational capacity, and identification of funding sources and donor motivations. Provides understanding of fund raising techniques that generate financial support for nonprofits, and context in which these methods may be used.

**Prerequisites**  
PUAD 502 or 505

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 657 - Association Management**

Credits: 3  
Practical application of management theory in context of professional and trade associations. Covers legal structures, tax-exempt status, and general organizational structure. Topics include volunteer management, budgeting and accounting practices in associations, fund raising, media relations, media and event planning, and human resource management.

**Prerequisites**  
PUAD 502 or 505

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 658 - Social Entrepreneurship and Nonprofit Enterprise**

Credits: 3  
Explores innovative approaches for addressing social problems. Organized around the steps in the entrepreneurial process: identifying social needs, formulating program strategies, mobilizing resources, managing growth tracking results, and maximizing impact.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUAD 659 - Nonprofit Law, Governance, and Ethics**

Credits: 3  
Overview of nonprofit governance as well as basic contract, labor, and tax law issues within nonprofit corporation law. Covers relationship between board and executive, and ethics topics typical to nonprofit organizations such as self-dealing, fiduciary responsibility, and human resource issues.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PUAD 660 - Public and Nonprofit Accounting and Finance

Credits: 3
Studies fundamental normative debates in public and nonprofit financial management arena with focus on resulting implementation principles and techniques in governmental accounting, financial reporting, budget and revenue decisions, debt management, cash and investment management, pensions and employee benefits, and risk management.

Prerequisites
Course open only to admitted MPA or association/nonprofit management certificate students

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 661 - Public Budgeting Systems

Credits: 3
Survey focusing on policy and theoretical framework of revenue and expenditure choices at all levels of government. Topics include development, theories, structure of budgeting; political, economic, and managerial aspects of public budgeting; public policy implications; and budgetary reform movements and successes and failures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 662 - National Budgeting

Credits: 3
Examines formulation of overall national fiscal policy and budgetary priorities through presidential and congressional budget processes, including decisions over spending and revenues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 663 - State and Local Budgeting

Credits: 3
Introduces state and local government budgeting including principal actors and institutions inside and outside state and local governments that play role in budget development, appropriation, implementation, and auditing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 664 - Nonprofit Financial Management
Credits: 3
Covers nonprofit financial management with attention to conflicts between social mission and financial entrepreneurship. Topics include mission, budgeting, fund raising, commercial programs, investments, accounting and information systems, financial reporting, auditing, and internal control.

Prerequisites
Course open only to admitted MPA or association/nonprofit management certificate students.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 670 - Human Resources Management in the Public Sector

Credits: 3
Overview of range and complexity of functions, responsibilities, and expectations of human resource staff and line managers in public sector. Focuses on human resources management in context of political, legal, and managerial systems. Human resource functions, such as hiring, performance, and development, are also presented.

Prerequisites
PUAD 502.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 671 - Public Employee Labor Relations

Credits: 3
Public employee labor relations, including unionization, representational elections, bilateral policy negotiations, administration of agreements, management rights, union and membership security, strike issue and grievance procedures, impact on public administration, and assessment of future developments.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 672 - Human Resources Reforms for Public Administration

Credits: 3
Explores recent reforms in human resources management in federal, state, and local governments. Covers pay for performance systems, flexible assignment patterns, incentives for productivity, work-life balance, job design, and changes resulting from higher levels of contracting for government programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 680 - Managing Information Resources
Credits: 3
Examines how managerial and analytical functions in public organizations can be performed via end-user computer applications. Provides in-depth coverage of selected database and decision support packages, and gives attention to logic and integration of application software.

Prerequisites
Admission to MPA program, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 691 - Justice Program Planning and Implementation

Credits: 3
Covers development and construction of organizational systems to implement government policies and programs. Emphasizes dealing with real-world challenges, constraints, and opportunities to create feasible plans, performance-monitoring systems, and secure multiple agency coordination. Applications of planning and implementation principles to actual projects in justice agencies.

Prerequisites
PUAD 502 and 509.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 700 - Ethics and Public Administration

Credits: 3
Topics of ethical dimensions including constitutionalism, democratic values and traditions, standards of conduct and ethics, and conflicting values of public officials and social equity of public programs.

Prerequisites
Admission to MPA program, and 18 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 701 - Cross-Cultural and Ethical Dimensions of International Management

Credits: 3
To be taken in final two semesters of MPA program. Examines normative issues in management of programs in international context. Emphasizes interplay of cultural, sociopolitical, legal, and ethical factors, and management and policy problems arising from conflicting goals, values, and inequities among nations and regions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUAD 703 - Third-Party Governance

Credits: 3
Examines design and management of government programs relying on other levels of government and private sector for delivery, with focus on such governmental tools as contracts, grants, loans, regulation, and tax credits.

Prerequisites
PUAD 502, 620, and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 720 - Performance Measurement

Credits: 3
Methods used by managers to systematically assess performance. Includes practical tools such as focus groups, survey research, cost/benefit analysis, benchmarking, and comparison methods for revealing outcomes and impacts. Prepares managers to use information more effectively in developing programs and services and formulating policy, and covers reporting techniques to communicate performance results.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 727 - Seminar in Risk Assessment and Decision Making

Credits: 3
Examines decision making under risk and uncertainty. Readings introduce major intellectual perspectives on topic and are drawn from variety of disciplines, including biology, economics, law, and psychology. Emphasizes making actual decisions under uncertainty.

Prerequisites
12 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 729 - Issues in Public Management

Credits: 3
Current issues in management of public organizations in contemporary American government. Includes practical applications of theories and analysis to managerial problems. Emphasizes competence in improving management in selected government settings.

Prerequisites
PUAD 502, and 9 graduate credits.

Notes
May be repeated with different topic.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PUAD 730 - Professional Development Workshop

Credits: 1-3
Explores external and internal factors reshaping public and nonprofit organizations. Investigates processes and techniques that managers and staff can use to respond to rapid environmental change. Emphasizes case studies and application of techniques and processes.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

PUAD 731 - Homeland/Transportation Security Administration

Credits: 3
Examines the terrorist attacks of 9/11, the vulnerabilities of the aviation security system at that time, reasons why elected leaders and officials did not act more decisively to improve security before 9/11, and the policy and administration responses to the 9/11 attacks, including the creation of the Transportation Security Administration and the Department of Homeland Security. Includes the development of radical Islam and the rise of Osama bin Laden and Al Qaeda.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 738 - Issues in International Security

Credits: 3
Examines issues of topical interest in general area of international security. Possible topics include nuclear strategy, disarmament, American defense policy, and international terrorism.

Prerequisites
PUAD 504, and 9 graduate credits.

Notes
May be repeated with different topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 739 - Issues in International Management
Credits: 3
Examines significant current issues in public international management. Emphasizes practical applications of theories and analysis of problems in public international management arena, and competence in improving management practices in international management settings.

Prerequisites
PUAD 502, and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 741 - Policy Analysis**

Credits: 3
Introduces concepts and techniques for formal policy analysis, development of skills in applying policy analysis techniques through case studies, and exploring legitimacy and utility of policy analysis.

Prerequisites
PUAD 502, 611, and 640.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 742 - Program Evaluation**

Credits: 3
Practical exploration of assessment techniques used in studying results of public programs and policies, including evaluation of implementation strategies and impacts. Draws on multiple approaches such as cost analysis, field research, experiments, productivity analysis, surveys and questionnaires, and qualitative studies.

Prerequisites
PUAD 502 and 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUAD 749 - Issues in Public Policy**

Credits: 3
Examines significant issues in public policy in contemporary American government. Emphasizes practical applications of theories and analysis to policy problems, and competence in improving policy analysis in selected government settings.

Prerequisites
PUAD 502, and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUAD 750 - Federalism and Intergovernmental Relations

Credits: 3
Examines broad trends in governance, including theory and practice of federalism, with particular focus on intergovernmental relations and changing roles of federal, state, and local governments. May include privatization, devolution, mandating, regulatory reform, and comprehensive federalism reform.

Prerequisites
PUAD 502 and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 758 - Environmental Politics

Credits: 3
Evolution and current state of environmental policy making. Includes history, strengths, and weaknesses of key U.S. environmental laws and central international environmental agreements. Introduces analytical approaches, including cost-benefit and risk analysis. Discusses economic incentives and normative considerations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 759 - Issues in Local Government Administration

Credits: 3
Management and policy formulation in American local governments. Addresses environments, institutions, and actors involved. Examines contemporary problems such as education, criminal justice, transportation, land use, economic development, and environmental impact.

Prerequisites
PUAD 502, and 9 graduate credits.

Notes
May be repeated with different topic.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 769 - Issues in Public Financial Management

Credits: 3
Current issues in budgeting and financial management in contemporary American government. Emphasizes practical applications of administration and management issues and policy choices at all levels of government.
Prerequisites
PUAD 502, and 9 graduate credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 781 - Information Management: Technology and Policy

Credits: 3
Examines challenges that organizations encounter as they move to a more technologically sophisticated information and communication environment. Studies organizational policy issues evolving from new technologies, including privacy, security, authentication, content control, intellectual property, and taxation, focusing on effectiveness of previous policy solutions and analyzing proposed solutions.

Prerequisites
PUAD 680, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 790 - Justice Organization and Administration

Credits: 3
Examines organization and administration of justice and security organizations. Covers organization theory and behavior as applied to justice and security organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 791 - Justice Program Evaluation

Credits: 3
Practical exploration of assessment techniques used to study need for and consequences of justice programs and policies. Covers needs assessments, process, and impact evaluations. Includes design and measurement issues for assessing performance of justice programs, and interpreting and presenting results. Emphasizes designing program evaluation for justice agency.

Prerequisites
PUAD 611 and 612.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 793 - Conduct of Justice Organizations at the Street Level
Credits: 3
Explores how justice organizations behave at lowest levels, where service is delivered and discretion is greatest. Includes suspects, victims, witnesses, police officers, prison guards, parole officers, attorneys, and others who interact with the justice system.

Prerequisites
CRIM 740/GOVT 790, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 794 - Internship

Credits: 1-6
Open only to MPA students. Contact internship coordinator one semester before enrollment. Credit determined by the department.

Prerequisites
12 PUAD credits or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PUAD 795 - Leadership in Justice and Security Organizations

Credits: 3
Examines leadership theories, and explores fundamental questions about leadership in justice and security organizations today.

Prerequisites
CRIM 740/PUAD 790, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 796 - Directed Readings and Research

Credits: 1-3
Reading and research on specific topic under direction of faculty member. Written report is required; oral exam covering research and report may be required.

Prerequisites
18 PUAD credits and permission of instructor.

Notes
May be repeated once.
PUAD 797 - Changing Justice and Security Organizations

Credits: 3
Examines challenges of changing justice organizations, how changes have been successfully and unsuccessfully implemented in the past, and what change strategies appear to be most effective.

Prerequisites
CRIM 740/PUAD790 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 798 - Colloquium in Public Administration

Credits: 0
Colloquium series required of all graduate students in public administration. Features a variety of speakers from academia, governments, think tanks, and the nonprofit sector. Topics include recent developments in public administration theory and research, public and nonprofit sector behavior, public policy.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: Graded S/NC

PUAD 821 - Doctoral Seminar in Theories of Organization and Bureaucracy

Credits: 3
Examines key issues in organization theory and behavior. Issues include organization design; interorganizational coordination, intelligence and decision-making systems; leadership and motivation theories; and theories or organizations as agents of political and social change. Uses case studies.

Prerequisites
PUAD 620 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUAD 840 - Research Seminar in Policy Governance I

Credits: 2-4
Surveys major institutions that formulate and implement public policy in United States. Examines translation of public preferences into public policy, and decisions about which societal and economic functions are most appropriately carried out by
governments, and which are best accomplished by private institutions and individuals.

Equivalent to PUBP 840

Prerequisites
Admission to doctoral program or permission of instructor.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUAD 841 - Research Seminar in Policy Governance II

Credits: 2-4
Second of two-semester sequence (PUAD 840, 841) in governance and public management policy concentration. Focuses on division of responsibilities among several levels of government, and between public and private sectors. Explores impact of these divisions on development of public policy in several policy areas, such as urban governance, environmental policy, and health care.

Equivalent to PUBP 841

Prerequisites
Admission to doctoral program.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUAD 998 - Doctoral Proposal Research

Credits: 1-16
Work on a research proposal that forms basis for doctoral dissertation.

Prerequisites
Permission of advisor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PUAD 999 - Doctoral Dissertation

Credits: 1-12
Registration for total credits may be spread over a multisemester contiguous period. PhD candidates must register for at least 3 credits each semester until dissertation completed.

Prerequisites
Permission of participant's dissertation committee.
Public Policy

PUBP 501 - Policy and Organizational Analysis

Credits: 4
Prepares students to engage in systematic analysis, both qualitative and quantitative, and constitutes the basis for advanced analytical techniques. Emphasis on research design, information acquisition, application of data analysis techniques, and presentation, including writing for professional and lay audiences.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 502 - Governance and Policy Processes

Credits: 1-4
Assesses governance processes in public and private organizational settings on the basis of economic and political standards such as efficiency, accountability, and responsiveness to societal needs in a rapidly changing global environment. Using cases, simulations, and fieldwork, students learn to evaluate the quality of institutional governance in specific venues and appraise implications for public policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 503 - Culture, Organization, and Technology

Credits: 1-4
Focuses on the influence of culture in societal, political, economic, and technological processes, nationally and internationally. Culture is seen as dynamic and interactional. Using case studies, students learn pertinent approaches to the study of culture, from the analysis of organization and social networks to that of belief systems and identities. Students also develop practical skills in observation, participation, and intervention.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 511 - Quantitative Methods in Public Policy

Credits: 3
Introduces students to the range of quantitative methods used for public policy analysis. Provides a broad foundation to prepare
students for doing statistical analysis on the master's level.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUBP 533 - Topics in Public Policy Processes**

Credits: 1-3  
Focuses on selected topics in public policy processes and procedures on an introductory level.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUBP 550 - Topics in Public Policy**

Credits: 1-3  
Focuses on selected topics in public policy not covered in fixed-content public policy courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUBP 555 - Economics Math Workshop**

Short course covering math and calculus skills required for master's level managerial economics course PUBP720.

---

**PUBP 556 - Writing Workshop**

A limited enrollment, noncredit, one-day workshop designed for master-level public policy students who want to improve their writing skills. Aimed at good writers who want to move to the next level of effectiveness. Taught by professional writers.

---

**PUBP 601 - Theory and Practice of Regional Economic Development**

Credits: 3  
Helps students develop real-world skills to be a successful economic developer, consultant, policymaker, or change agent in this rapidly changing environment. Designed to provide a framework for understanding regional and national economic growth and prosperity, and provide tools to conduct concrete analyses to help decision makers, clients, and constituents make better-informed decisions.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
PUBP 602 - Regional Economic Development: Strategies and Applications

Credits: 3
Introduces range of methods for tracking the performance of metropolitan economies, identifying opportunities for economic development, and assessing effectiveness of public and private investments designed to achieve region's economic growth. Also examines strategies and case results of economic development plans and projects.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 605 - State and Local Government Policy and Economic Development

Credits: 3
Examines state and local government policies and processes to promote local economic development, including institutional arrangements, financing and tax incentives, nonfinancial strategies and approaches, land use, environmental and other relevant regulations, and relationships across government and nongovernmental organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 650 - Peace Operations I

Credits: 3
First course of two-semester sequence on international peace operations. Focuses on emerging theory of peace operations, including peacemaking activities of United Nations and other diplomatic initiatives; peace-building activities of international organizations and nongovernmental organizations; and peace support provided by international militaries.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 651 - Peace Operations II

Credits: 3
Second course of two-semester sequence on international peace operations. Focuses on application of emerging theory of peace operations, including peace-making activities of United Nations and other diplomatic initiatives; peace-building activities of international organizations and nongovernmental organizations; and peace support provided by international militaries. Several guest lectures from past and present peace operations provide practical information for future staff of peace operations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 700 - Theory and Practice in Public Policy
Theories of public policy emphasizing historical intellectual development, and role theory and ethics may play in public policy making. Assumptions made by policy professionals examined against broad range of philosophical, social, political, and economic imperatives affecting public policy environment.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 702 - Comparing Political Institutions

Credits: 3
Examines political institutions and processes from comparative and international perspectives, and role of political environment in economic trade and investment policy decisions. Examines how generalizability, objective knowledge and understanding, and nature of evidence impact public policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 703 - Organizational Informatics in Public Policy

Credits: 3
Helps policy professionals develop proficiency in technological skills necessary for effective practice by teaching latest developments in organizational informatics and web-based student-teacher interaction. Uses information technology to understand real-world policy problems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 704 - Statistical Methods in Policy Analysis

Credits: 3
Graduate-level introduction to statistical methods and techniques used in policy sciences. Topics include descriptive statistics, sampling and probability theory, graphical data display, estimation and significance testing, contingency tables, bivariate regression and correlation, and multiple regression, with introduction to computer based statistical analysis.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 705 - Advanced Statistical Methods in Policy Analysis

Credits: 3
Covers classical regression methods and their application to public policy analysis. Includes simple and multiple regression, analysis of variance, time series, and simultaneous equation structural models. Problems associated with applications include specification error, multicollinearity, qualitative variables, heteroskedasticity, serial correlation, and structural identification.
Course develops analysis skills by discussing sample empirical studies and models using advance statistical computer software.

**Prerequisites**
PUBP 704 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUBP 706 - Environmental Decisions: Modeling Rational Judgment**

Credits: 3  
Discusses decision aids for environmental or other policy makers to make and defend decisions soundly and economically. Integrates public policy and environmental science with decision analysis; for example, prescriptive models that quantify knowledge and values person or institution brings to bear on a decision. Applies simple aids, based on decision theory, to real consulting cases.

**Prerequisites**
PUBP 705.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

Credits: 3  
Studies analytical concepts and techniques used in public-sector overall budgetary and specific project decision making. Includes conceptual concerns and quantitative techniques used in benefit-cost analysis, capital budgeting, financial analysis, and various specialty applications, such as economic and fiscal impact analysis. These are all interrelated by the desire to measure the benefits versus the costs of various alternative public decisions. Attention is given to measuring results over time and the use of present value techniques. Assesses strengths and weaknesses of analytical techniques. Emphasizes the process of defining the appropriate stakeholders affected by decisions, the sources and quality of data, and the rigor of conducting studies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**PUBP 709 - Professional Writing for Policy**

Credits: 3  
Professional Writing teaches effective writing for the professions. The course includes the fundamentals of writing -- grammar, word usage and paragraphing – and instruction in selected genres, including news stories, editorials, and research writing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---
PUBP 710 - Topics in Public Policy

Credits: 1-3
Focuses on selected topics in public policy not covered by fixed-content public policy courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 711 - Modeling Policy in Dynamic Environments

Credits: 3
Introduces basics of policy making and decision analysis, with major focus on hands-on development and use of systems dynamics-based models.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 712 - Policy Systems Analysis and Management Science

Credits: 3
Introduces analytical models and analysis to support decisions. Primary emphasis on understanding techniques of operation research and management science, cost benefits, and cost effectiveness for public decision making. Using mathematical details of algorithms to solve models not emphasized except as it contributes to understanding reliability and validity of methodologies. Through case studies and computer solutions, offers appreciation of when, where, and how to use models. Students demonstrate their understanding of techniques by applying them to term research project on government program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 713 - Policy and Program Evaluation

Credits: 3
Examines how programs of public agencies are proposed, established, operated, and evaluated. Covers role of research in program evaluation process, including alternative methodologies for policy assessment. Considers demand estimation, supply and pricing of publicly produced goods and services, and role of subsidies in nonmarket environments.

Prerequisites
PUBP 704 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 714 - Topics in Transportation Policy, Operations, and Logistics

Credits: 1-3
Issues in transportation policy, operations and logistics in United States and abroad. Includes practical applications of theories and analysis to policy problems, and emphasizes competence in improving policy in selected domains. May be taken up to three times and simultaneously for sections addressing different subject matter.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 715 - Introduction to Transportation Systems

Credits: 3
Transportation is a service that contributes substantially to well-being of advanced economies. Resource requirements and byproducts of transportation also pose sobering environmental challenges for society. Course examines history and development of transportation systems; contribution to and impact on society; institutions and practices that govern planning, design, construction, operation, maintenance, and retirement from service; and policy and managerial challenges, and tools and techniques for addressing them.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 716 - Transportation Operations and Logistics

Credits: 3
Provides survey of issues, methods, problems, and strategies. Topics include origins of logistics, industry structure, pricing, underwriting, rate making, compliance, inventory effects, just-in-time inventory management (JIT), materials requirements planning (MRP), customer service and order processing operations, sales functions and operations, dispatch and fleet manager functions and operations, rate-setting among three parties, typical electronic and paper document flow, routing and scheduling, route selection, satellite load tracking through dispatch-customer web inquiry, role of ITS in route selection, toll system use, congestion, training activities, and logistics markets.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 717 - Analysis for Transportation Managers

Credits: 4
Introduces basic methods of transportation analysis and evaluation relating them to policy framework. Covers descriptive statistics, hypothesis testing, contingency tables (Chi-Square analysis), regression, optimization, demand elasticities, and gravity model. Also covers sources of transportation data and research design. Teaches mathematical base and logic of each technique, but primary emphasis is applying methods to relevant policy and management problems. Students required to complete series of assignments along with research proposal focused on applying one or more methods to problem of their own interest.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PUBP 718 - Transportation Planning and Policy**

Credits: 3
Introduces highway, rail, air, and water transport planning in United States. Teaches legislative, organizational, fiscal, legal and political environment within which planning for transportation facilities and services takes place. Introduce technical and analytical methods for transportation planning. Focus is largely on public sector, but also considers commercial transport planning and role of private sector in helping to design, manage, and finance transport systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 719 - Transportation Law**

Credits: 3
Examines legal environment of transportation. Topics include basic legal concepts and institutions, history and evolution of price and service regulation, environmental law and regulation, labor relations, and property.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 720 - Managerial Economics and Policy Analysis**

Credits: 3
Introduces microeconomics theory and its application in analyzing public policy issues. Provides capability to understand economic literature and theories.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 721 - Transportation Economics**

Credits: 3
Provides basis for understanding economics of transport system, and how transportation relates to urban and regional development. Treats transport generically, but includes case studies of specific modes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 722 - Practicum in Transportation Policy, Operations, and Logistics**

Credits: 3
In-depth field study of ongoing transportation policy, operations, or logistics situations; and design and delivery of actions to
manage or resolve problems and opportunities. Range of application areas depends on interests of student body and opportunities faculty identify for "clients" or real-world projects. Illustrative domain areas include surface transportation (highways and transit), airports, and aviation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 723 - Metropolitan Transportation Policy

Credits: 3
Recent changes in federal legislation have led to renewed importance for transportation policy and planning. Considerations of clean air, economic development, congestion management, and changing urban form have greatly increased importance of well-planned transportation facilities and policies. Course introduces basic methods of transportation policy analysis and evaluation. Topics include data collection, simplified demand estimation techniques, transportation choice modeling, transportation supply analysis, and ex-ante and ex-post evaluation methods.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 724 - Intelligent Transportation Systems and Technology

Credits: 3
Overview of intelligent transportation systems (ITS), which include wide range of information technology applications to surface transportation. ITS categories include traffic management, traveler information, fleet control, commercial vehicle regulation, transit, rural, and vehicle-control systems. Key institutional and policy issues involve the appropriate federal role in ITS; state and local government collaboration; public-private partnerships; how privacy interests can be protected as ITS surveillance and enforcement technologies become increasingly sophisticated; and how driver information systems, including cell phones, can be used to optimal advantage without burdening drivers with information overload.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 725 - International Transportation Logistics

Credits: 3
Focuses on making efficient match between new demands on transportation, and ways demands can be met. Topics embody multidisciplinary approach to international transportation logistics drawing on economics, law, information technology, and network analysis. Includes international supply-chain management, global performance indicators, international intermodal transportation, air-freight logistics, new technologies, and border-crossing issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 726 - Telecommunications Policy
Credits: 3
Examines salient issues associated with telecommunications and electronic commerce in context of public policy questions facing decision makers in government, education, and business. Examples include privacy, electronic signatures, digital divide, bandwidth auctions, IP telephony, CRM, Bluetooth, and Internet taxation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 727 - Transportation Evaluation

Credits: 3
Transportation impinges on many aspects of life: economic, social, and political. Provision and operation of transportation services involves a wide range of trade-offs. Course looks at range of evaluation techniques and concepts applied in making decisions over such matters as transportation investments, transportation operating strategies, and public policy as it affects transportation. Considers theory and concepts as well as more detailed assessments of standard evaluation methods used in United States and elsewhere. Case studies reviewed in depth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 728 - Fleet Operations

Credits: 3
Overview of most important factors affecting fleet operations today. Topics include goals for government fleet operations and privately owned fleets, proforma cost analysis, fleet operations including route and vehicle and operator selection, asset-based versus non-asset based fleets, fleet design and make-up based on multiple objectives, scheduled maintenance requirements and trade-offs, shared capacity issues, reverse logistics policies, costs, operations, environmental constraints on fleets, fuel logistics, fleet decision-making, competitive and market challenges, and opportunities in fleet management.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 729 - Transportation Asset Management

Credits: 3
Introduces main elements that have attracted significant attention over the past decade. Several developments have challenged traditional framework for transportation service delivery, including changes in transportation environment; shift in public's attitude toward provision of public goods; and extraordinary advances in communication and computer technologies. Adoption of transportation asset management poses significant challenges on both organizational structure and existing knowledge base within transportation agencies. Course provides overview of these challenges, and introduces theoretical frameworks within which challenges may be analyzed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 730 - National Policy Systems and Theory

Credits: 3
Provides inquiry into policy-making environment, organized around U.S. federal system. Examines nation's policy systems and key components: actors, institutions of governance, outside groups, and other influential interests. Special emphasis on dynamic character of policy making. In addition, different policy theories discussed in context of current political realities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 731 - Macroeconomic Policy Assessment

Credits: 3
Covers monetary theory, theories of consumption and saving, budget deficits, economic growth, international finance, and monetary and fiscal policy. Investigates national income and product accounts, savings, employment, and investment, and alternatives to Keynesian principles. Evaluates theories of inflation, investment, capital accumulation, and nonproportional growth.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 732 - Transport and the Environment

Credits: 3
Multidisciplinary course examines implications of transportation and how public policy has attempted to handle them, and how policy may move in future. Looks at all modes of transportation and at most environmental ramifications. In addition to two faculty members, several guest speakers provide wider perspectives on particular issues.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 733 - Urban Politics and Policy

Credits: 3
This course explores the factors that guide and affect urban politics and policy including, but not limited to, housing, public education, criminal justice, employment, and economic development. It is designed to provide students with an introduction to the major theories and some of the significant research in urban politics and policy. The primary focus will be on large American cities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 734 - Administrative Law and Public Policy
Credits: 3
Covers administrative discretion, rule-making and agency proceedings, public participation, political accountability, regulatory processes, oversight, formal adjudication and informal action, lobbying agency administrators, and political and legal nature of the administrative process.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 735 - Lobbying and Interest Representation**

Credits: 3
To work effectively within a democratic political environment, policy analyst must understand contemporary methods used to influence policy. Course focuses on roles and techniques of organized influence, and its impact on policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 736 - The Global Information Economy and the Digital Divide**

Credits: 3
Discusses institutional, social, and policy issues involved in development of global information economy and society. Economic development needs, public institutional capacity, nongovernmental networks examined critically; course deals with implications of universal access to Internet and equality of use in areas such as online delivery of government services, privacy, online voting, and e-government. Focuses on efforts to ameliorate digital divide sponsored by major multilateral agencies. Emphasizes development of public policies for democratic governance in a complex networked world.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 737 - Cases and Concepts in E-Government**

Credits: 3
Electronic government has become a significant public policy issue worldwide. It offers the prospect of dramatic improvements in delivering government services, but also portends major debate about government intrusion. Course covers emerging public policy issues associated with electronic government: job displacement in public sector, privacy, procurement and supply chain management, voter profiling, scope of government services, challenges to "digital democracy," Internet-based voting, land management, the "digital divide," and others.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 738 - Information, Technology, and Institutional Change**
Credits: 3
Examines role and character of information in institutions as foundation to understanding role of IT in economy, society and politics. Considers theories of and practice of information in institutions, organizations and markets, and assesses effects of information technology changes on key economic, social and political institutions such as firms, markets, communities, nonprofit organizations, and government.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 739 - Media and Public Policy

Credits: 3
Explores complex relationship between media and public policy. Examines how these forces collide in our modern media, how coverage decisions regarding public policy are made in newsrooms, how advocates use and rely on the media to advance message, and how different media reflect different strengths and vulnerabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 741 - U.S. Financial Policy Processes and Procedures

Credits: 3
Examines design and operation of expenditure and revenue systems at federal, state, and local levels of U.S. government. Stresses mobilizing and allocating resources through planning, adoption, and execution of budget. Includes theory and policy objectives of tax and spending regimes and review of financial controls, performance measurement, cash and debt management, and accounting and financial reporting systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 742 - Transportation Safety and Security

Credits: 3
Examines transportation safety and security from multimodal perspective for both passenger and freight. Topics include historical context and policy framework, regulation, institutional issues, new security arrangements for preventing organized terrorist attacks, infrastructure design, vehicle design, operating protocols, and information systems.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 743 - National Security Management and Policy

Credits: 3
Examines hierarchies in national security from the president to military establishment, including National Security Council,
secretary of defense, joint chiefs of staff, commanders-in-chief of unified and specified commands, and intelligence agencies. Covers policies involving national defense, peace-keeping operations, embargoes and other sanctions, defense conversion, and military acquisition policy. Also covers significant legislation affecting national security, such as National Security Act of 1947 and Goldwater-Nichols Act of 1986.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 744 - Federal Institutions and Management

Credits: 3
Covers management and policy in federal government, examining policy problems within context of national system of governance, including political environment, evolution and constitutional framework of American government, U.S. Congress, executive branch from White House to agencies, and role of interest groups and political parties. Special attention to implementing legislation, regulatory process, and intergovernmental relations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 745 - Transportation and the Environment

Credits: 3
Multidisciplinary examination of implications of transportation and ways public policy has attempted to handle them, and how policy may move in the future. Explores all modes of transportation and most environmental ramifications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 746 - Maritime Transportation Policy, Operations and Logistics

Credits: 3
Examines how international maritime transportation system has evolved, and discusses current challenges and options for future developments. Maritime shipping is an ancient enterprise that has dominated transportation since long before industrialization led to the development of steam propulsion, railroads, motor trucks, and airplanes. Topics include globalization, e-commerce, just-in-time manufacturing, quick response capabilities, integrated logistic systems, and relevance of maritime transportation in light of emerging technological advances.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 747 - Air Transportation Policy, Operations and Logistics

Credits: 3
Reviews evolution of various forms of air transport such as airlines, general aviation, and military aviation; and includes basics of
airline economics, especially as they intersect with airline operations and the management of hub and spoke networks; air traffic control technologies and operations and their intersection with airline economics; safety and security technologies and regulations; future of various elements of air transportation; and effects of deregulation on air travel.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 748 - Public Transportation Policy, Operations and Logistics**

Credits: 3  
Provides general system description for components comprising typical publicly funded transit property. Topics include organizational structure, historical context, budget development including operating and capital budgets, personnel and labor relations, regulatory framework, operations management (bus and commuter rail), reporting structure, customer service, and contracted operations. Also discusses current topics of interest, such as security of transit systems and transit's role in air quality.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 749 - Highway Transportation Policy, Operations and Logistics**

Credits: 3  
Highways have played central role in development of U.S. transportation system. Interstate highway system has revolutionized both freight and passenger transport. Course examines history and development of highway system, institutions responsible for development and ongoing operation, environmental impacts and efforts to mitigate them, the emerging emphasis on operations and management of highway system, and role in freight logistics and supply chain management system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 750 - History of Military Operations Other than War**

Credits: 3  
Focuses on history of military activity in support of noncombat missions. Uses historical examples of early days of United States and colonial histories of Western and Eastern powers. Also touches on use of military force in support of multinational peace operations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 751 - International Police Operations**

Credits: 3  
Analyzes role of international police monitors and domestic police forces in international peace operations. Focuses on how using international police monitors and developing indigenous law-enforcement capabilities can improve prospects for success of
international peace operations. Examines origins, mandates, planning, and deployment of international civilian police forces; problems of coordinating international police operations with international military forces and local security forces; international role in developing democratically oriented police forces; relationship of police to the entire judicial system; and the need to continue assistance to all parts of the judicial system beyond initial intervention.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 752 - Infrastructure Finance**

Credits: 3
Covers planning, budgeting, and financing of infrastructure, including air, water and surface transportation, public utilities, and other major public works. Focuses on private capital markets for projects funding as well as domestic and international loan and grant programs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 753 - Ethics in Public Policy**

Credits: 3
Inquiry into ethical and moral issues in public policy. Explores issues that are controversial and often confusing to public policy makers such as health care, secrecy in government, surrogate motherhood, and disability. Perspectives are national as well as global, and deal with impact of culture and politics on ethical dilemmas confronting society. Also looks at processes by which specific ethical systems are incorporated into governing bodies. Larger issues, such as war and peace, just and unjust wars, capital punishment, medical and legal ethics, and communitarian vs. individual liberties are also included, with emphasis on how they affect public policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 754 - Geographic Information Systems and Spatial Analysis for Public Policy**

Credits: 3
Introduces GIS including analytical tools to manipulate and study spatial data. Run mainly as a laboratory, with extensive hands-on experience. Focuses on public policy applications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 755 - National Security Decision-Making Policy**

Credits: 3
Applies behavioral, economic, strategic, and other decision theories to U.S. government and other actors in historical national
security crisis cases and current policy issues. Explores tension in decisions between rational goal seeking by actors vs. organizational process, and aims to develop usable decision tools.

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PUBP 756 - Geostrategic Assessment Policy**

Credits: 3  
Geopolitical assessment of global threats to international order and security. First half of course focuses on geopolitical theories; elements of military power; and global social, demographic and political trends. Second half analyzes regional, political, military, economic, and social trends.  

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PUBP 757 - Public Policy in Global Health and Medical Practice**

Credits: 3  
Introduces international medical policy. Covers globalization of health and medical policies directed at removing disparities, financing, ethical considerations of biomedical research, and use of emerging technologies.  

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PUBP 758 - Global Threats and Medical Policies**

Credits: 3  
Explores medical and health governance, biosecurity and biosafety, health and natural and human-made disasters, humanitarian and emergency assistance, vaccine development, behavior and health, critical infrastructures, bioethics and resource allocations in global context.  

**Hours of Lecture or Seminar per week: 3**  
**Hours of Lab or Studio per week: 0**

**PUBP 759 - National Security Law and Public Policy**

Credits: 3  
Introduces legal and policy issues concerning current U.S. national security. Its emphasis is on developments since 9/11. It focuses on the legal rules governing the formulation and execution of U.S. national security policy. It examines U.S. and international law as well as general domestic and foreign policy considerations. In particular, the course considers the principal cases, legislation and treaties impacting U.S. national security. Special emphasis is on the interplay of national security concerns and civil liberties in this age of global and transnational terrorism.
PUBP 760 - Science and Technology Policy in the 21st Century

Credits: 3
Investigates roles dynamic scientific research and technological innovation play in contemporary society. Focuses on design and analysis of alternative public policies intended to influence rate and direction of technological change in societies, and use of scientific and technical knowledge in public policy making. Uses historical and international comparative approaches to assess politics and pragmatics of science and technology policy. Includes material from policy evaluation and analysis, organization theory, economics of innovation, and sociology of science and technology. Applications focus on areas of concern to "new economy" such as biotechnology, networked telecommunications and computing, and globalization of technology-based production.

PUBP 761 - Social Entrepreneurship and Public Policy

Credits: 3
This course is about people who start new ventures with the explicit objective of creating social as well as private value. As societies and the challenges they face become ever more complex, existing institutions and incentive structures may or may not be adequate to address new generations of problems. Social entrepreneurs innovate new organizational forms with the objective of finding solutions in the public interest. Students in this course will be challenged to integrate elements of business strategy and policy analysis to craft a practical plan for the launch of a novel and needed social venture.

PUBP 762 - Social Institutions and Public Policy

Credits: 3
Limited government involvement in social policies changed drastically during the 1960s, with an explosion of social programs designed to ameliorate poverty, reduce crime, and eliminate racial segregation. These new social policies affect many institutions, including family, schools and colleges, criminal justice system, and government agencies. Many of these policies have been controversial, with debates over efficacy and whether they have cured or exacerbated social problems. Course examines evolution and status of selected American social policies, including civil rights policies, education reform, family policy, crime prevention, and other topics chosen by students. Readings and discussions on policy issues linked to readings and discussions on social theories and value systems that underpin social policies.

PUBP 768 - Education and Public Policy
Credits: 3
Explores current issues and policy initiatives in education policy at federal, state, and local levels, with emphasis on education reform. Issues and topics vary. Typical policy issues include raising academic standards, high-stakes testing, alternative governance including school choice and voucher policies, teacher quality and certification, role of school resources in academic outputs, and equity topics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 770 - Topics in Regional and Urban Development Policy**

Credits: 3
Explores leadership and institutional development in regional economic development. First part involves presentations by faculty members on conceptual, theoretical, and methodological traditions regarding leadership and institutional development. Second part focuses on issue of leadership in context of regional economic development.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 771 - Introduction to Enterprise Engineering and Policy**

Credits: 3
Provides overview of extended enterprise integration. Lectures focus on SAP architecture and R/3 standard software solution. Laboratory requires students to complete end-to-end implementation project with Great Plains Software midrange ERP solution, Dynamics C/S +. For modeling, students must demonstrate complete proficiency in Architecture of Information Systems (ARIS) methodology and supporting ARIS Toolset.

Equivalent to SYST 691/EEP 601

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**PUBP 772 - Decision Support for Enterprise Integration**

Credits: 3
Lectures focus on using business intelligence to enhance competitive advantage, developing information driven set of controls to improve profitability, and creating balanced business with aligned corporate direction and strategic intent. Examines solutions provided in ERP systems.

Equivalent to SYST 692/EEP 602

**Prerequisites**
SYST 542 and 691 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 773 - Supply Chain Integration and Management

Credits: 3
Lectures focus on two issues: supply chain integration from information technology perspective, and supply chain management from decision support perspective. Course motivation is merging of enterprise computing with operations research, primarily through customer and supply chain management systems. Topics include ERP/Web integration, advanced planning, and customer relationship management.

Equivalent to SYST 693/EEP 603

Prerequisites
SYST 691 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 774 - E-Commerce Architectures

Credits: 3
Introduces network and system architectures that support high-volume business to consumer web sites and portals. Provides insight into structure of modern web enabled storefront. Critical business and technology issues include Storage Area Networks (SANs), server clustering, load balancing techniques at server and network level, fault tolerance, and recovery of database and application servers.

Equivalent to SYST 694/EEP 604

Prerequisites
SYST 691 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 775 - Economics of Electronic Commerce

Credits: 3
Focuses on gaining competitive advantage through electronic commerce implementation; identification and growing of new market opportunities and electronic enabling of existing business relationships; and business-to-consumer relationships and economics of strategic procurement, ERP hosting, customer relationship management, catalog hosting, portal operations, and supplier management.

Equivalent to SYST 695/EEP 605

Prerequisites
SYST 691 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
PUBP 776 - Customer Relationship Management

Credits: 3
Focuses on front office integration with back office, and value creation process that results. Modern world of e-commerce extends intraenterprise integration as implemented in Enterprise Resource Planning (ERP) systems to include external constituents such as customers, partners, and suppliers. Course focuses on modern system support for demand chain.

Equivalent to SYST 696/EEP 606

Prerequisites
SYST 691 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 777 - Critical Information Technology Infrastructures

Credits: 3
Design and implementation of high-speed network and application services in support of modern Enterprise Resource Planning (ERP) systems. Critical technologies include high-speed data communication, switched vs. routed data flow, workflow engines, business rule and web application servers, and load balancing technologies. Large-scale, web-enabled ERP system architecture examined in detail.

Equivalent to SYST 697/EEP 607

Prerequisites
SYST 694 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 780 - Evolution of the Washington Metropolitan Economy

Credits: 3
Includes historical context, role of federal spending, tourism, technology sector, international business, regional organizations, local government policies, and forecasts. Evaluates development patterns in Washington, D.C., Northern Virginia, and suburban Maryland.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 781 - Entrepreneurship and Economic Development
A knowledge spillover theory of entrepreneurship is employed to link between theories of entrepreneurship and theories of innovation and regional development. Other interconnections are explored at the regional level as firms forge networks, clusters, and specialized markets. The public policy issues of these constructs, including competition policy, industrial policy, and cluster policy, are examined within a regional and global context.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 782 - International Financial Policy**

Credits: 3  
Addresses theory of international finance, application to financial policy such as exchange rate regimes, and institutions of international finance. Covers operations of International Monetary Fund and World Bank, development of European Monetary Union, and debate over "international financial architecture."

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 783 - Global Governance**

Credits: 3  
Surveys important issues in global governance given changes in contemporary world. Explores dynamics and complexity of formal and informal actors, institutional arrangements, organizations, and roles in process of governance in international sphere. Considers states, governmental and nongovernmental organizations, international regimes, social movements, regional associations, and multinational corporations as actors bearing on transnational authority. Examines various vehicles for international coordination and conflict in terms of relevance and opportunities for global governance.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 784 - Entrepreneurship, Economics, and Public Policy**

Credits: 3  
To demonstrate that global capitalism is a process driven by entrepreneurship, students study the Austrian school of economics, which views capitalism as a process of creative destruction, as well as other economists who emphasize entrepreneurship and change. The course reviews the history of capitalism, focusing on the so-called industrial revolutions in Britain, Germany, Japan, and the United States, and on particular historical and current entrepreneurs.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 785 - Urban Development Economics**
Credits: 3
Examines changing structure and functions of urban economy, and develops skills and knowledge for evaluating and remedying conditions inhibiting local economic development. Includes case studies of redevelopment strategies, programs, and outcomes for inner-city neighborhoods, central and suburban business districts, waterfronts, and surplus military bases.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 791 - Advanced Field Research for Policy: Theory and Method**

Credits: 4  
Teaches how to analyze the framing of policy questions and examine culture and organization at group, organizational, interorganizational, and societal levels. Covers case study research, open-ended interviewing, participant-observation, social network analysis, and historical and archival research.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 792 - Advanced Economic Analysis for Policy Research**

Credits: 4  
Builds analytical skills in economic analysis for policy research for students with competence in elementary calculus. Reviews mathematical techniques and covers consumer theory, demand estimation and forecasting, production theory, cost-benefit analysis, technological change and productivity analysis, growth theory, market structure and competition, game theory, capital budgeting, and public sector's role in the economy.

**Prerequisites**  
PUBP 720 or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 793 - Large-Scale Database Construction and Management for Policy Research**

Credits: 4  
Explores data resources for macro-comparative policy research, and how to use these to inform decision making and evaluate policy performance. Emphasizes how social science data is generated, coded, and managed; and methods for successful presentation of evidence in support of policy recommendations.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 794 - Internship**
Credits: 1-6
Open only to students in SPP degree program requiring internship. Contact appropriate program director one semester before enrollment. Work-study programs with specific employers.

Prerequisites
12 PUBP credits, or permission of instructor.

Notes
Credit determined by appropriate degree program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PUBP 795 - Final Project

Credits: 1-3
Writing of capstone paper related to student's program concentration, under guidance of three-person committee.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

PUBP 796 - Directed Readings and Research

Credits: 1-3
Independent reading and research at master's or doctoral level on specific topic related to public policy as agreed to by student and faculty member.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 799 - Master's Thesis

Credits: 1-6
Individualized section form required. Original research endeavor related to student's program concentration. Research must result in document meeting public policy and university standards.

Prerequisites
Degree candidacy in public policy master's program; completion of required credits of graduate course work; and approval of thesis proposal by faculty advisor, two committee members, and program director.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

PUBP 800 - Culture and Policy
Comparative overview of institutions and culture, focusing on ways United States is exceptional when compared with other mature industrial societies. Presents culture and social structure as explanatory variables in accounting for these differences. Provides overview of analytical methods used in comparative public policy research, and background on political environment in which international trade and investment decisions are made.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 801 - Macro Policy**

Credits: 1-4  
Demonstrates how macroeconomic, technological, demographic, and social forces affect supply and demand for governmental services. Counterpart analysis of the impact of shifts in patterns of international trade, demographic composition of population, and trends in social structure. Builds awareness of need to factor alternative assumptions about macro environment into policy planning; shows how macro events can affect social welfare and policy performance indicators; and suggests how national income accounting analysis and simple macroeconomic models can help pinpoint impending trouble spots for public policy.

**Prerequisites**  
PUBB 720 and PUBP 730, or their equivalents.

**Hours of Lecture or Seminar per week:** 2-3  
**Hours of Lab or Studio per week:** 0-1

**PUBP 802 - The Logic of Policy Inquiry**

Credits: 1-4  
Defines policy research problems, questions, and hypotheses. Explores modes of policy research, analysis, and rhetoric, including interdisciplinary research strategies. Uses information sources to emphasize written communication of policy research results. Also discusses professional practice issues.

**Prerequisites**  
Enrollment in doctoral program in public policy.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 804 - Multivariate Statistical Analysis in Public Policy**

Credits: 4  
Explores multivariate techniques of contingency table analysis, reliability and validity assessment, factor analysis and scaling, multivariate regression and path analysis, analysis of variance and covariance, and other selected multivariate techniques. Emphasizes applying these techniques to real policy data using sophisticated statistical packages.

**Prerequisites**  
PUBP 704 or equivalent.
PUBP 805 - Public Policy Systems and Theory

Credits: 4
Theories of public policy making, emphasizing discipline's historical, intellectual, and international development. Focuses on policy systems' political and social dimensions, including agenda-setting, policy design, rationality, incrementalism, systems theory, scientific methods, and public choice theory. Applies theories to comparative systems of governance.

Prerequisites
PUBP 730 or equivalent.

PUBP 806 - Advanced Management Science for Public Organizations

Credits: 3
Primary emphasis is to understand techniques of operations research and management science, cost benefits, and cost effectiveness for public policy decision making. Some familiarity with elementary calculus and linear algebra helps with understanding mathematical basis of algorithms used to solve models, and reliability and validity of these techniques. Case studies and computer solutions help students understand when and how to use OR models.

Prerequisites
PUBP 712 or equivalent.

PUBP 810 - Regional Development and Transportation Policy

Credits: 4
Introduces and critiques theory and methods used in regional and transportation policy analysis. Explores central place, growth pole, and economic base theories as well as other theoretical constructs used in regional policy analysis. Introduces and examines methodological tools such as regional econometric modeling, multiobjective programming, shift-share analysis, economic base analysis, location quotient analysis, and input-output analysis. Examines selected regional and transportation public issues using theoretical and methodological constructs introduced in first part of course.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 811 - Applied Methods in Regional Development and Transportation Policy
Credits: 4
Students develop research papers that investigate aspects of regional and transportation policy, with the goal of producing publishable papers. Students develop the focus of their paper based on work done in the first semester, and are expected to prepare a two-page proposal followed by a detailed proposal and finally, a completed paper. Each is critiqued in the seminar, which is organized to conform to the process of review and critique. Instructor works with students individually as well as in seminar sessions.

Prerequisites
PUBP 810.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 817 - Policy Research Topics: Transportation Policy

Credits: 3
Research workshop examining development of policy research and relevant methodologies linked directly to faculty and student interests. Students identify cutting-edge policy concerns and execute research programs. The 4-credit version of the course requires a discussion section and research laboratory.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 820 - Technology, Science, and Innovation: Institutions and Governance

Credits: 4
First of a two-semester core seminar sequence required for public policy PhD students in the science and technology policy concentration. Explores how political and economic institutions and cultural values shape the pace, direction, costs, and benefits of technological innovation and scientific research. Special emphasis on the interaction between national institutions and values and processes of globalization.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 821 - Analytic Methods for Technology, Science, and Innovation Policy

Credits: 4
Second of a two-semester core seminar sequence required for public policy PhD students in the science and technology policy concentration. Covers major methodological approaches to the study of technology, science, innovation, and public policy. Focuses on analytical inputs to policy making, and assesses practical consequences in such areas as security, energy, environment, and health.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 830 - Comparative Socioeconomic Policy
Throughout the past century, numerous socioeconomic theories have competed for primacy. This course compares, contrasts, and analyzes some of the leading socioeconomic theories and policies and places them in a global context. The role of these theories in shaping current public policy is explored.

**PUBP 833 - Topics in Public Policy**

Credits: 1-4
Focuses on selected topics in public policy not covered in fixed-content public policy courses.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 834 - Entrepreneurship, Growth, and Public Policy**

Credits: 1-4
Focuses on a closer consonance among entrepreneurship, geography, and economic growth. Studies the creation and incubation of new knowledge and features three theoretical fields: the new growth theory; the new economic geography; and the new economics of innovation. Develops a knowledge spillover theory of entrepreneurship. Examines public policy issues arising from these constructs, including competition, within a regional and global context.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 835 - Entrepreneurship, Creativity, and Innovation**

Credits: 1-4
Provides multidisciplinary foundation for the study of entrepreneurship, creativity, and innovation, and their effects on regional and national economic growth. Draws from seminal thinkers and emphasizes creativity and innovation. Examines how organizational change, institutional structure, and geographic clustering drive the development of regional and national economies. Explores these issues through the lens of the three Ts of economic growth: technology, talent, and tolerance.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**PUBP 840 - U.S. Policy-Making Institutions**

Credits: 4
First of two-semester sequence in governance and public management policy concentration. Examines major institutions that formulate and implement policy at national level. Emphasizes presidency, Congress, and executive branch bureaucracies. Also considers agenda-building institutions such as media, interest groups, political parties, and elections.
PUBP 841 - U.S. Policy-Making Processes

Credits: 4
Second of two-semester sequence in governance and public management policy concentration. Analyzes major U.S. Public policy processes. Attention to major instruments for implementing policy, including regulation, grants, tax policy, and market-based mechanisms; and how different methodologies are appropriate for understanding aspects of policy inquiry. Covers ethical and accountability aspects of policy, including federalism, intergovernmental relations, and state and local governance.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 850 - Seminar in Public Policy

Credits: 1
Weekly colloquium series, required of public policy PhD students. Features variety of speakers from universities, government, and nonprofit sectors. Topics include policy formulation and analysis, and theoretical and methodological foundation.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

PUBP 860 - Social Theory, Culture, and Public Policy

Credits: 4
Covers major social and cultural theories that underlie public policies. Selections from classical and contemporary social theorists relevant to studying social change, social capital, and social organization. Focuses on interplay among culture, social institutions, social processes, and policy.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1

PUBP 861 - Culture and Social Policy Analysis

Credits: 4
Applies social and cultural theories to policy topics, including methodological approaches and empirical studies. Emphasizes linkage between theory and empirical research, and methods appropriate for social policy study. Policy topics may include poverty and inequality, family, education, crime and corruption, immigration, and health.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0-1
PUBP 862 - Institutional Analysis and Policy

Credits: 4
Policy analysts are increasingly cognizant of the influence of societal institutions in shaping public policy, not only in terms of policy design, but also as a determinant of implementation. This course reviews the growing literature regarding institutional analysis; furthermore, it considers the ways in which institutions help shape the policies that emerge within a given society and the context by which they are evaluated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 870 - Organizational and Policy Aspects of Informatics

Credits: 1-4
Examines effects of informatics on national and international policy; setting international policy on informatics; ethical and social change in governments and organizations; shaping national policy in informatics; industry growth; and research methods from various scientific disciplines.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 871 - Organizational and Information Technology Challenges of the Knowledge Society

Credits: 4
Explores links of policy, managing organizations, and information technologies in postmodern era. Includes issues related to contradictions among conventional models of organizational and process design, policy and regulatory structures, ideologies, and information technologies. Provides framework for becoming more sophisticated analyst of policy, organizations, and information technology.

Prerequisites
PUBP 870.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

PUBP 872 - Managing Knowledge-Based, Information-Intensive Organizations

Credits: 4
Deals with challenges of planning, creating, integrating, and managing contemporary information-technology enabled public and private sector organizations, and managing relationships between public and private enterprises enabled by information technology initiatives.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**PUBP 880 - Global and International Public Policy I**

Credits: 4  
Explores multiple dimensions of globalization and internationalization relative to public policy processes and consequences. Offers substantive insight into contemporary public policy dynamics from global and comparative perspectives. Accordingly, it examines a broad range of international cultural, political, technological, and economic policy issues, and their interactions and implications at all levels of analysis. Engages relevant theoretical and methodological approaches and debates to provide tools for analyzing various world problems and policies.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

**PUBP 881 - International Trade Policy**

Credits: 4  
Addresses international trade theory, trade policy analysis, regional economic integration, and institutional arrangements governing world trade. Covers World Trade Organization (including constituent agreements in goods, services, intellectual property and trade-related investment measures), regional trade agreements such as NAFTA, dispute settlement regimes, and relations between trade and the environment.

*Hours of Lecture or Seminar per week: 3*  
*Hours of Lab or Studio per week: 0*

**PUBP 997 - Field Statement**

Credits: 1  
Requires work on field statement in preparation for field exam.

**Notes**

*Must register in semester during which field exam will be taken. Requires permission of field committee chair. May not be repeated. Does not apply to credit degree requirements.*

*Hours of Lecture or Seminar per week: 1*  
*Hours of Lab or Studio per week: 0*

**PUBP 998 - Research/Proposal for Dissertation**

Credits: 1-9  
Requires work on research proposal that forms basis for doctoral dissertation.

**Notes**

*May be repeated, but no more than 24 credits of PUBP 998 and 999 may be applied to doctoral degree requirements.*
PUBP 999 - Dissertation

Credits: 1-9
Requires research on approved dissertation topic under director on dissertation committee.

Notes
May be repeated, but no more than 24 credits of PUBP 998 and 999 may be applied to doctoral degree requirements.

REAL 500 - Real Estate Development Fundamentals

Credits: 3
A comprehensive study of the main elements of the real estate development process. Examines the intricacies between residential, commercial and mixed-use development, and approaches to optimizing each. The value of market research and analysis, determining value propositions of prospective deals, zoning considerations, design and construction issues, and asset management will also be examined.

Prerequisites
Graduate standing

REAL 502 - Real Estate Client Leadership and Project Management

Credits: 3
A study of the challenges faced by developers, both in terms of client (owner) challenges as well as project challenges. Examines assessment approaches and frameworks to assess clients, including analyzing the maturity of a representative client and identify key approaches to optimizing the relationship of that client. Examines specific project challenges-project assessment frameworks, and improvement approaches.

Prerequisites
Graduate standing, REAL 500 (or CEIE 580) or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
REAL 630 - Innovative Land Use, Approvals and Real Estate Development

Credits: 3
Examines the challenges in designing innovative uses for land and balancing those prospective uses with local urban policies and the land development/zoning process. Introduces the entitlements process, the legal considerations of planning and zoning in America, and the language of zoning. Explores the impacts of the different forms of government on the entitlement process.

Prerequisites
REAL 500, or permission of instructor

REAL 690 - Topics in Real Estate Development

Credits: 1-6
Explores contemporary issues and challenges in the management and development of real estate. Topics not covered in the regular real estate development offerings. Course content may vary each semester. Course may be repeated with change in topic.

Prerequisites
Admission to the MSRED Program, and completion of core requirements

REAL 750 - MSRED Capstone

Credits: 3
The Capstone Project will be the culmination of the master's program, offered at the end of the program. The course will combine the theoretical teachings from the program with real world, practical situations. Students will apply concepts learned to current development and construction projects in the Washington, D.C. metropolitan area. One of the sample cases involves the potential future uses of a plot of land in the metro area, a mixed-use high-density area that is slated to undergo significant transformation. The case will request project teams to explore the various options, employing a decision-tree approach to fully analyze the options, and examining the SWOT, local urban management policies, future valuation streams, and environmental impacts of each. A site visit will be required, as well as visits to various developers engaged in similar projects.

Prerequisites
Admission to the MSRED Program, and completion of all other course work

Corequisite

REAL 796 - Directed Reading

Credits: 1-6
Reading on a specific topic under the direction of a faculty member. May be repeated with a change in topic.

Prerequisites
Admission to the MSRED Program, and completion of core requirements
Reading Education

EDRD 300 - Literacy and Curriculum Integration

Credits: 3
Introduces K-12 content area reading, writing, and language arts. Emphasizes integration of reading and other language arts across curriculum.

Notes
Intended as an introduction to educational issues and is not applicable in Mason's graduate-level teacher education programs. School-based field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 301 - Facilitating Literacy in School or Community Settings

Credits: 3
Provides knowledge, teaching strategies, and support for students working with developing readers and writers. Emphasizes implementation strategies that foster literacy development; incorporation of trade books and technology resources into individual and small group work; and reflection.

Notes
Requires 45 hours of school-based field experience during course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 419 - Literacy in the Content Areas

Credits: 3
Assists students in understanding the language and literacy process as it applies to teaching in middle and high schools. Focuses on instructional strategies to support literacy development, including adaptations for culturally diverse and exceptional learners.

Prerequisites
EDCI 473 and EDCI 483.

Corequisite
EDCI 490.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDRD 500 - In-Service Educational Development

Credits: 1-6
Offered at request of school division or other educational agency.

Notes
Content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDRD 501 - Literacy and Curriculum Integration, PK-12

Credits: 3
Introduces PK-12 content area reading, writing, and language arts. Emphasizes integration of reading and other language arts across curriculum; instructional planning; needs of diverse learners. Field experience in public schools required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 525 - Emergent Literacy for English Language Learners, PK-12

Credits: 3
Provides an introduction to emergent reading/writing processes in first and second languages. Focuses on developing reading skills in five areas: phonemic awareness, phonics, fluency, vocabulary, and text comprehension.

Prerequisites
EDCI 510, EDCI 516, or Permission of Instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 558 - Literacy in the Content Areas, PK-12

Credits: 3
Focuses on research-based introduction to PK-12 content area reading, writing, and language arts that meet state and national guidelines. Enables teachers to understand literacy needs of their students in content areas, and provide appropriate instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 597 - Special Topics in Education
Credits: 1-6
Provides advanced study on selected topic or emerging issue in American or international education.

Prerequisites
Admission to program in Graduate School of Education.

Notes
May be repeated for credit with GSE permission.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDRD 610 - Content Literacy for English Language Learners, PK-12

Credits: 3
Focus on research-based instruction for teaching reading and writing in the content areas. Emphasizes similarities and differences between reading and writing in two or more languages, vocabulary development, reading fluency, and strategies for text comprehension.

Prerequisites
EDRD 525 or Permission of Instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 614 - Teaching Reading in the Secondary School

Credits: 3
Emphasizes reading and writing in content areas; reading and writing causes, classroom diagnosis, and remediation of reading problems; study skills; and rates of reading.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 615 - Reading/Writing for Multilingual Students

Credits: 3
Develops instructional competencies in reading and writing approaches for students from culturally and linguistically diverse backgrounds. Examines teaching reading and writing across curriculum, biliteracy acquisition, historical and current approaches for second language learners, preliteracy skills for younger and older English language learners, and special issues in developmental and diagnostic reading for language minority students.

Prerequisites
EDCI 516 and 519, or permission of instructor or advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDRD 619 - Literacy in Content Areas

Credits: 3
Offers understanding of language and literacy process as it applies to teaching in secondary schools. Emphasizes reading and writing in content areas, and instructional strategies to support students' literacy development. Focuses on ways reading, writing, speaking, and listening are developed and used in learning discipline-specific curriculum, including adaptations for culturally diverse and exceptional learners.

Prerequisites
Methods I (EDCI 567, 569, 572, or 573) and Methods II (EDCI 667, 669, 672, or 673).

Corequisite
EDCI 790 Internship.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 620 - Reading/Writing in Foreign/World Languages

Credits: 3
Introduces reading and writing processes in foreign and second languages, research on reading comprehension, and effective teaching and assessment approaches for students in PK-12 schools. Topics include reading goals and standards for foreign language learning, sociocultural perspectives, multimedia computer-assistance, research on related strategies and skills, and performance-based assessments.

Prerequisites
EDCI 516 and 519, or permission of instructor or advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 630 - Advanced Literacy Foundations and Instruction, Birth to Middle Childhood

Credits: 3
Advanced study of literacy theory, research, and practice as it relates to younger learners. Addresses sociocultural, cognitive, linguistic, psychological, and developmental influences on children's literacy. Includes reading, writing, and oral communication.

Prerequisites
Admission to the literacy emphasis, or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDRD 631 - Advanced Literacy Foundations and Instruction, Adolescence through Adulthood

Credits: 3
Advanced study of literacy theory, research, and practice as it relates to adolescents and adults. Addresses sociocultural, cognitive, linguistic, psychological, and developmental influences on literacy. Includes reading, writing, and oral communication.

Prerequisites
EDRD 630 and admission to the literacy emphasis, or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 632 - Literacy Assessments and Interventions for Groups

Credits: 3
Provides literacy assessments and interventions for groups of learners. Includes exploration of assessment tools for classrooms and large populations. Class members conduct related practice in their own classrooms or specified field settings.

Prerequisites
EDRD 630 and 631; admission to literacy emphasis, or permission of the program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 633 - Literacy Assessments and Interventions for Individuals

Credits: 3
Provides literacy assessments and interventions for individuals. Includes diagnosis and remediation for learners who find reading and writing difficult. Requires assigned practicum experience.

Prerequisites
EDRD 630, 631, and 632; admission to literacy emphasis; or permission of program coordinator.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 634 - School-Based Leadership in Literacy

Credits: 3
Prepares reading specialist as a school leader. Expands knowledge of literacy gained in prerequisite courses, and applies it to professional development work with teachers at their own site.

Prerequisites
EDRD 630, 631, 632, and 633; admission to literacy emphasis or permission of program coordinator.
EDRD 635 - School-Based Inquiry in Literacy

Credits: 3
Capstone course in literacy emphasis focusing on research-based inquiry related to literacy in school settings. Includes review of literature and teacher inquiry project.

Prerequisites
EDRD 630, 631, 632, 633, and 634; admission to literacy emphasis; or permission of program coordinator.

EDRD 637 - Supervised Literacy Practicum

Credits: 2-3
Supervised literacy practicum that requires students to conduct assessments of and provide instruction to struggling readers.

Prerequisites
EDRD 630, 631, 632

Corequisite
EDRD 633.

EDRD 658 - Advanced Reading Methods and Language Acquisition, Elementary

Credits: 3
Provides research-based introduction to literacy for children in grades K-6. Emphasizes oral language, reading process, literacy development, integration of reading across the curriculum, culture connections, and families and literacy.

Prerequisites
EDRD 558

EDRD 797 - Advanced Topics in Education
Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

Notes
May be repeated for credit with CEHD approval.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDRD 829 - Advanced Foundations of Literacy Education

Credits: 3
Examines foundational theory, research, and methodology related to literacy. Includes historical and theoretical foundations; research methodologies; and issues such as literacy acquisition, beginning reading, comprehension, struggling readers, and language diversity.

Prerequisites
EDUC 800, EDRS 810, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 830 - Foundations of Literacy: Birth through Later Childhood

Credits: 3
Explores theory, research, and practice related to emergent literacy and literacy development during childhood. Topics include literacy acquisition and development; historical trends in theories of literacy development; psychological and linguistic, sociocultural, and instructional influences on literacy development; vocabulary development; role of narrative and scripts on linguistic development; authentic tasks and assessment and early literacy; and development in academically diverse children.

Prerequisites
EDUC 800 and EDRS 810.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDRD 831 - Foundations of Literacy: Adolescence through Adulthood

Credits: 3
Explores theory, research, and practice related to adolescent and adult literacy. Topics include influences on adolescents' and adults' literacy practice and development, current and historical understanding of literacy, connections between literacy and learning in the content areas, and needs of diverse learners. Students review common core research literature and topics of individual interest.

Prerequisites
EDUC 800 and EDRS 810.
EDRD 832 - Seminar in Emerging Trends and Issues in Literacy

Credits: 3
Explores emerging trends and issues related to literacy research methods, processes, practices, and policies. Students analyze literacy research and develop a research proposal on a topic of personal interest.

Prerequisites
EDUC 800, EDRS 810, or permission of instructor

REL 100 - The Human Religious Experience

Credits: 3
Examines main forms of religious expression as embodied in several important religious traditions in contemporary world. Investigates religious experience; myth and ritual; teachings and scripture; ethical, social, and artistic aspects of religion; and nature and function of religion in human society.

Satisfies General Education Requirement: Global understanding

REL 110 - Introduction to Jewish Ethics

Credits: 3
Brief overview of Judaism and its classical texts. Examines a number of current ethical issues including artificial insemination, stem cell research, transplantation, abortion, homosexuality, capital punishment, from a Jewish perspective.

REL 211 - Religions of the West
Credits: 3
Focuses on Judaism, Christianity, and Islam from historical, comparative, and cross-cultural perspectives. May also include modern developments of those faiths such as Mormonism and Baha'ism, as well as Zoroastrianism and religions of ancient Near Eastern cultures.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 212 - Religions of Asia**

Credits: 3
Surveys religions of India, Hinduism, Jainism, Sikhism, Buddhism, and the religions of the Far East, China, and Japan, including Daoism, Confucianism, Shinto, from origins to present.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 231 - Religion in America**

Credits: 3
Religious heritage in American culture, growth of denominations and sects, and interrelationship of religion and sociopolitical life.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 235 - Religion and Literature**

Credits: 3
Explores the relationship between religion and literature in different times and cultures, the influence of religion on literary works, and how literature expresses major religious themes such as death and immortality, divine will and justice, suffering and human destiny, and religion and state.

Satisfies General Education Requirement: Literature

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 272 - Islam**
Introduces basic religious beliefs and practices of Islam, with view to diverse manifestations of Islamic culture in different ethnic and social contexts. Provides overview of essential rituals of Islamic life, mystical practices of Sufis, certain popular forms of religious practice, sources and application of Islamic law, and distinctive Islamic artistic and literary forms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 313 - Hinduism**

Credits: 3
Introduces Hindu religion and thought, beliefs, rituals, ethics and religious practices. Emphasis on classical Hinduism, but also covers Hinduism and modernity, modern Hindu movements, and Hinduism as a global religion.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**RELI 314 - Chinese Philosophies and Religious Traditions**

Credits: 3
Surveys major religious traditions and philosophical themes of China including Confucianism, Taoism, and Chinese Buddhism and Neo-Confucianism. Examines foundation of Chinese world view and spirituality by investigating diverse religious traditions that have created tensions and harmony among them.

Prerequisites
RELI 212, or permission of instructor.

Hours of Lecture or Seminar per week: 3

May be repeated once when languages are different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**Russian**

Placement: See Academic Testing section of Admission chapter.
RUSS 101 - Elementary Russian I

Credits: 3
For students with no knowledge of Russian. Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for RUSS 101 and RUSS 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

RUSS 102 - Elementary Russian II

Credits: 3
Continuation of RUSS 101.

Prerequisites
RUSS 101 or permission of department.

Notes
Lab work required. Students may not receive credit for RUSS 102 and RUSS 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

RUSS 109 - Intensive Elementary Russian

Credits: 6
Equivalent to RUSS 101 and 102 taught in single semester.

Notes
Recommended for students who desire intensive introduction. Lab work required. Students may not receive credit for RUSS 109 and RUSS 101, 102, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

RUSS 110 - Elementary Russian

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading.

Notes
Lab work required. Students may not receive credit for RUSS 110 and RUSS 101, 102, or 109.
RUSS 199 - Russian Language and Culture for Students and Professionals

Credits: 3
Designed for English-speaking specialists in humanities, sciences, and business studies in Russia. Covers range of topics, including elementary Russian phonetics and grammar, basic conversation, and Russian etiquette. RUSS 201 - Intermediate Russian I

Credits: 3
Further development of skills in listening, speaking, reading, and writing.

Prerequisites
RUSS 102, 109, appropriate placement score, or permission of department.

Notes
RUSS 201 and 202 must be taken in sequence. Lab work required. Students may not receive credit for RUSS 201 and RUSS 209 or 210.

RUSS 202 - Intermediate Russian II

Credits: 3
Application of language skills to reading, composition, and discussion.

Prerequisites
RUSS 201, appropriate placement score, or permission of department.

Notes
Lab work required. Students may not receive credit for RUSS 202 and RUSS 209 or 210.
RUSS 209 - Intensive Intermediate Russian

Credits: 6
Equivalent to RUSS 201 and 202 taught in a single semester.

Prerequisites
RUSS 102, 109, appropriate placement score, or permission of department.

Notes
Lab work required. Students may not receive credit for RUSS 209 and RUSS 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

RUSS 210 - Intermediate Russian

Credits: 3
Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Russian-speaking regions. Lab work required.

Prerequisites
RUSS 110 or appropriate placement score.

Notes
Students may not receive credit for RUSS 210 and RUSS 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

RUSS 250 - Gateway to Advanced Russian

Credits: 3
Integration of advanced intermediate-level Russian grammar, reading, writing, listening and speaking skills with the development of research skills and critical thinking about authentic texts from contemporary media.

Prerequisites
RUSS 210, appropriate placement score, or permission of department.

Notes
Taught in Russian.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

RUSS 302 - Russian Conversation and Composition
Develops in students ability to express themselves orally on topics of current interest and everyday situations. Provides practice in more difficult forms of written expression.

**Prerequisites**
RUSS 250, appropriate placement score, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**RUSS 303 - Russian Advanced Conversation**

Credits: 3  
Development of oral proficiency. Includes current colloquial expressions.

**Prerequisites**
RUSS 250, appropriate placement score, or permission of instructor.

**Notes**
Conducted in Russian.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**RUSS 310 - Readings in Russian Literature**

Credits: 3  
Readings of Russian literary works in original language with lectures, discussions, and exam in Russian.

**Prerequisites**
RUSS 250, appropriate placement score or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**RUSS 311 - Contemporary Russian Short Fiction**

Credits: 3  
Reading and discussion of recent short stories by best-known Russian writers of today.

**Prerequisites**
RUSS 250, appropriate placement score or permission of instructor.

**Notes**
Readings in original language, with lectures and discussion in Russian.
RUSS 325 - Major Russian Writers

Credits: 3
Study of works of major Russian writers in translation.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent, or permission of instructor.

Notes
Course work in English. Writers to be studied vary. May be taken toward fulfilling general requirement in literature for baccalaureate degrees. May be repeated once for credit when course content is different.

RUSS 326 - A Survey of Russian Literature

Credits: 3
Surveys Russian literature from its beginning to 1880.

Satisfies General Education Requirement: Literature

Prerequisites
60 credits, or permission of instructor.

Notes
Course work in English. May be taken toward fulfilling general requirement in literature for baccalaureate degrees.

RUSS 327 - A Survey of Russian Literature

Credits: 3
Surveys Russian literature of late 19th and 20th centuries.

Satisfies General Education Requirement: Literature

Prerequisites
60 credits, or permission of instructor.

Notes
Course work in English. May be taken toward fulfilling general requirement in literature for baccalaureate degrees.

**RUSS 353 - Russian Civilization**

Credits: 3  
Civilization and culture of Russia and former Soviet Union. Includes films, slides, and music in addition to readings and lectures.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
60 credits, and completion or concurrent enrollment in all other required general education courses

**Notes**
Course work in English.

**RUSS 354 - Contemporary Post-Soviet Life**

Credits: 3  
Social life, art, economics, education, view of life, and personal aspirations of Russian citizen today.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
60 credits, or permission of instructor.

**Notes**
For non-Western credit. Course work in English.

**RUSS 380 - Advanced Russian I**

Credits: 3  
Comprehensive study of the more difficult characteristics of contemporary standard Russian in areas of grammar, style, and vocabulary usage. Emphasizes developing fluency in oral and written expression.

**Prerequisites**
RUSS 202, 209, or equivalent; appropriate placement score; or permission of instructor
**RUSS 381 - Advanced Russian II**

Credits: 3  
Comprehensive study of the more difficult characteristics of contemporary standard Russian in areas of grammar, style, and vocabulary usage. Emphasizes developing fluency in oral and written expression.

**Prerequisites**  
RUSS 202, 250, or equivalent; appropriate placement score; or permission of instructor.

**Notes**
Open to all majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**SOCW 301 - Laboratory in Interpersonal Communication**

Credits: 4  
Emphasizes experiential learning of biological, psychological, social, and cultural influences on behavior of those who need and those who give help. Students examine their own behavioral and learning patterns, values, ethics, and attitudes to increase ability to understand and help clients.

**Prerequisites**  
SOCI 101, PSYC 100, and sophomore standing; or permission of instructor.

**Notes**  
Service learning of at least 60 hours required.

**Hours of Lecture or Seminar per week:** 4  
**Hours of Lab or Studio per week:** 0

---

**SOCW 323 - Human Behavior in the Social Environment I**

Credits: 3  
Social systems approach unifying and integrating concepts and knowledge from biology, anthropology, sociology, and psychology about human behavior. Applications to professional practice, from social work literature to field experience.

Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**  
SOCI 101, BIOL 103, and PSYC 100; or permission of instructor; completion or concurrent enrollment in all other required general education course work.

**Notes**  
Open to all majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 324 - Human Behavior in the Social Environment II**

Credits: 3  
Examines social systems theories as they pertain to study of macro systems. Focus of study involves families, social group, formal organization, and community. Students apply theoretical concepts to contemporary social problems.

**Prerequisites**  
SOCW 323 with a minimum grade of C, or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 351 - Social Policy and Social Justice I**
Introduces social welfare policy, including historical development, central concepts, institutional nature, and origins of social work as profession. Analyzes service delivery systems and role of social work profession in bringing about social and economic change.

**Prerequisites**
SOCI 101 and GOVT 103; or permission of instructor.

**Notes**
Open to all majors.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 352 - Social Policy and Social Justice II**

Credits: 3  
Analyzes various social welfare policies and their development; examines how policies have emerged in response to social problems arising out of changing social, political, economic, and cultural influences.

**Prerequisites**
SOCW 351 with minimum grade of C, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 357 - Methods of Social Work Intervention I**

Credits: 3  
Social work practice from systems perspective. Particular emphasis on problem-solving activities with microsystems. Analyzes common core of knowledge, values, and skills essential to social work practice to gain insight into social work functions and role of social worker as change agent.

**Prerequisites**
SOCI 101, PSYC 100, or permission of instructor. SOCW 200 (Majors only)

**Corequisite**
SOCW 200 (Majors only)

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 358 - Methods of Social Work Intervention II**

Credits: 3  
Continues generic problem-solving model, focusing on group and macro intervention systems, settings, and skills. Emphasizes working with both treatment and task groups. Group processes, such as goal formulation, contract setting, composition, and
termination necessary for effective worker intervention, are part of knowledge base.

**Prerequisites**
60 credits, or permission of instructor.

**Notes**
Open to majors only. Field service of 40 hours required.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 359 - Junior Seminar**

Credits: 1  
Provides opportunity to integrate theory, research, and practice in area of group work. Time is allotted to process successes and obstacles, and to share issues, knowledge, and skills learned in service-learning site.

**Prerequisites**
SOCW 301

**Corequisite**
Must be taken simultaneously with SOCW 358.

**Notes**
Forty hours of service learning are required.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0

---

**SOCW 400 - Legal and Ethical Issues in Human Services**

Credits: 3  
Overview of ethical and legal issues related to human services professions. Topics include responsibility, competence, duty to warn, confidentiality, professional relationships, and research. Emphasizes models of ethical decision making and critical thinking.

**Prerequisites**
42 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 410 - Alcohol and Substance Abuse: Policies and Programs**

Credits: 3  
Primary issues related to alcoholism and drug abuse including key concepts, theories, policies, and research regarding use and abuse of alcohol and other drugs. Emphasizes impact of policies and programs on well-being of ethnic minority and
disadvantaged service populations.

**Prerequisites**
42 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 415 - Child and Family Welfare**

Credits: 3  
Emphasizes viewing human development and child and family welfare services critically, holistically, and contextually. Integrates ecological systems, human rights, and empowerment perspectives for understanding delivery systems and persons in relation to their environment across levels from individual to global. Provides overview of existing child welfare system with focus on current issues, challenges, and at-risk populations.

**Prerequisites**
42 credits, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 417 - Integrative Methods in Social Action and Social Change**

Credits: 3  
Uses generalist social work practice concepts with large systems and provides students with a hands-on opportunity to apply concepts and principles of intervention with large systems. Students will work with organizations and communities on a local, national, or global level to promote social action and social change. The course will also focus on evaluating interventions addressing the social justice needs of diverse, at-risk, and oppressed populations.

**Prerequisites**
SOCW 301, 357, 358, 359, 452, 453

**Notes**
For social work majors only.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 423 - Social Work with Children and Adolescents**

Credits: 3  
Major needs of children and adolescents, and implications for social work practice. Problems of family and peer group relationships, occupational choice, sexual and scholastic adjustment, and special problems of racial and cultural alienation, alcohol and drug abuse, and delinquency. Reviews various theoretical orientations and evidence from research. Analyzes both individual and group approaches to counseling and treatment.
Prerequisites
42 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 425 - Planning and Organizing for Community Change

Credits: 3
Designed for senior social work students with interest in pursuing community organization as professional career specialty.
Provides basic understanding of community organization and planning, with special emphasis on conducting needs assessment in community. Students examine environmental context in which administrative and community practice occurs. Explores role of social workers as planners and agents of social change.

Prerequisites
43 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 430 - Social Work and the Law

Credits: 3
Introduces social worker's role in legal system, and familiarizes students with legal processes and application to issues of interest to social workers and clients, including child abuse, foster care, reproductive rights, juvenile justice, and legal rights of the poor, women, and minorities.

Prerequisites
44 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 435 - An Intergenerational Approach to Aging

Credits: 3
Surveys issues related to working with aged, their families, and care providers. Studies biological, psychological, and sociocultural aspects of aging, and unique problems with service delivery to aged persons. Examines forces that impinge on aged person, and explores critical issues related to extended life span, family changes, institutionalization, and role of aged persons in society. Students increase their sensitivity and knowledge of aged individuals through intergenerational lens.

Prerequisites
45 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCW 445 - Social Determinants of Health**

Credits: 3  
Examine the social determinants of health and the application of this framework to social work and public health policy and practice interventions. Explore the many social justice factors that affect health and consider which community systems and social change approaches may decrease or eliminate health inequities.  
Equivalent to GCH 445  
**Prerequisites**  
45 credits or permission of the instructor.  
**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall, Summer, Spring

---

**SOCW 452 - Senior Seminar I**

Credits: 2  
Provides integrative team experience to support field experience and provide opportunities to demonstrate required competencies through special assignments.  
**Prerequisites**  
SOCW 200, 301, 323, 324, 351, 352, 357, 358, and 359 with grade of C or better and recommendation of faculty.  
**Corequisite**  
Concurrent with Senior Practicum I (SOCW 453).  
**Notes**  
Open only to social work majors.

---

**SOCW 453 - Senior Practicum I**

Credits: 3  
Supervised learning experience (practicum) under guidance of qualified faculty liaisons and professional staff designated and approved by director of field education. Designed to facilitate practice with individuals, families, groups, and communities. Students spend two full days weekly in practicum sites.  
**Prerequisites**  
SOCW 200, 301, 323, 324, 351, 352, 357, 358, and 359 with grade of C or and recommendation of faculty.  
**Notes**  
Open only to social work majors. Requires concurrent seminar (SOCW 452) participation and faculty-agency visits.
**SOCW 454 - Senior Seminar II**

Credits: 2  
Continuation of integrative team experience designed to support practicum experience and provide opportunities to demonstrate required competencies through special assignments.

**Prerequisites**
SOCW 452, 453, 471 with a grade of C or better.

**Corequisite**
SOCW 456

**Hours of Lecture or Seminar per week:**

---

**SOCW 456 - Senior Practicum II**

Credits: 3  
Continuation of supervised learning experience (practicum) begun in SOCW 453. Students spend two full days weekly in practicum sites supervised by faculty liaisons and qualified professional staff designated and approved by director of field education.

**Prerequisites**

**Corequisite**
SOCW 454

**Notes**
Requires concurrent seminar participation (SOCW 454) and faculty-agency visits. Open to SOCW majors only.

---

**SOCW 471 - Research in Social Work**

Credits: 3  
Must be completed with minimum grade of C. Principles and theory underlying scientific inquiry. Emphasizes use of research in social work practice, steps in conducting research, and research efforts in developing and evaluating social work knowledge and skills.

**Prerequisites**
SOCI 313 or PSYC 300; SOCW 200, 301, 323, 351, 357; senior standing or permission of the instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCW 475 - Selected Topics in Social Work Policy**
Credits: 3
In-depth study of special areas of social work of interest to students, faculty, and social work community.

**Prerequisites**
45 credits, or permission of instructor.

**Notes**
May be repeated for maximum 9 credits if topics vary.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 483 - Selected Approaches to Social Work Intervention**

Credits: 3
Opportunity to examine personal use of different approaches to social work intervention currently employed in practice settings. Students use technical skills with clients that these approaches require.

**Prerequisites**
45 credits, or permission of instructor.

**Notes**
May be repeated for maximum 9 credits if topics vary.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 499 - Independent Study in Social Work**

Credits: 1-3
Investigates research problem in field of social work.

**Prerequisites**
60 credits and research proposal approved by instructor before enrollment.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0

---

**SOCW 598 - Special Topics in Social Work**

Credits: 1-6
Critical examination of special topics related to social work, social justice, and human rights.

**Prerequisites**
Upper-level undergraduate or graduate standing.
SOCW 623 - Human Behavior and Social Systems I

Credits: 3
Ecological approach to behavior of individuals, families, groups, organizations, and communities. Integrates and applies theories from psychology, sociology, biology, and anthropology to study of infants, children, and adolescents. Emphasizes human diversity.

Prerequisites
Graduate standing.

SOCW 624 - Human Behavior and Social Systems II

Credits: 3
Continues study of human behavior and diversity by exploring application of development theory and ecological principles to those in young adulthood, middle adulthood, and older adulthood.

Prerequisites
SOCW 623.

SOCW 630 - Forensic Social Work Practice

Credits: 4
Explores the social work role in legal processes relating to such issues as family violence, child custody, behavioral health, disabilities, aging, and juvenile/criminal justice. Apply skills in forensic interviewing, risk assessment, expert testimony, mitigation, mediation, treatment, victim advocacy, and multidisciplinary collaboration.

Prerequisites
SOCW 624, 652, 658, and 673.

SOCW 640 - Advanced Clinical Practice
Credits: 4
Prepares students at the advanced level to apply diagnostic, assessment, prevention, treatment, and intervention skills with individuals, families, and groups in clinical mental health and health settings. Trains students in differential diagnosis and assessment using the Revised Diagnostic and Statistical Manual (DSM IV-TR). Currently accepted treatment interventions within the context of contemporary social work theory are also presented.

Prerequisites
SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673 and 680

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**SOCW 645 - Community-Centered Clinical Practice**

Credits: 4
Students use an ecosystems framework for assessment, risk-reduction, prevention, and intervention with communities in a local, national, or international context. Possible areas of exploration include violence prevention and intervention, suicide prevention and intervention, emergency response efforts, and behavioral health or wellness interventions at the community level.

Prerequisites
SOCW 624, 652, 658, and 673.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**SOCW 651 - Social Policies, Programs, and Services**

Credits: 3
History of American social welfare policy and social work profession. Explores political, economic, social, cultural, and ideological influences on policy making with emphasis on consequences for populations at risk. Introduces historical policy analysis.

Prerequisites
Graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 652 - Influencing Social Policy**

Credits: 3
Introduces students to the knowledge, skills, and values needed to influence policy outcomes. Explores the role of social workers in electoral politics and policy advocacy. Students gain skills in legislative research, coalition building, testifying, constituent organizing, and lobbying, while developing strategies for promoting social justice through policy change.

Prerequisites
SOCW 651.
SOCW 657 - Direct Social Work Practice I

Credits: 3
Introduces role of social workers as change agents and the core knowledge, values, and skills that guide social work practice with individuals, families, small groups, organizations, and communities.

Prerequisites
Graduate standing and open only to students enrolled in MSW degree program.

Corequisite
SOCW 672.

SOCW 658 - Direct Social Work Practice II

Credits: 3
Continuation of social work theory and practice with individuals, families, groups, organizations, and communities. Emphasizes intervention, evaluation, follow-up, and termination, with attention to incorporating social work knowledge, values, and skills.

Prerequisites
SOCW 657; Open to students enrolled in MSW degree program

Corequisite
SOCW 673

SOCW 670 - Communication and Technology for Social Work Practice

Credits: 3
Studies various forms of written communication pertinent to social work practice. Examines impact of audience, status, culture, and purpose on effective professional writing.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SOCW 671 - Research Methods for Social Workers

Credits: 3
Examines role of scientific inquiry in social work. Emphasizes construction and use of measurement instruments, data collection, analysis, and interpretation, and application of computer technologies relevant to social work practice.

Prerequisites
SOCW 624 and 652.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCW 672 - Foundation Field Practicum and Seminar I

Credits: 3
Supervised social work learning experience in human service agencies. Students complete 20 hours per week in field practicum, and attend monthly seminar in which they share learning and integrate theory with practice.

Corequisite
SOCW 657.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SOCW 673 - Foundation Field Practicum and Seminar II

Credits: 3
Continuation of supervised social work learning experience begun in SOCW 672. Students spend 20 hours per week in field practicum, and attend monthly seminar in which they share learning, process experiences, and integrate theory with practice.

Prerequisites
SOCW 672.

Corequisite
SOCW 658.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SOCW 674 - Psychopathology

Credits: 4
Overview of adult and child psychopathology presented within the contexts of the lives of people experiencing mental disorders and the social contexts that can have a bearing on symptom maintenance. Learn to formulate competency-based assessments and DSM IV-TR-based differential diagnoses.
Prerequisites
SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673

Notes

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**SOCW 675 - Selected Topics in Clinical Practice**

Credits: 3
In-depth study of special topics related to clinical social work practice at the individual, family, small group, or community level.

Prerequisites
30 credits or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCW 676 - Selected Topics in Social Work and Social Change**

Credits: 4
Critical examination of special topics related to understanding and improving community and societal conditions through policy practice, program development, and social action.

Prerequisites
30 graduate credits or permission of instructor.

Hours of Lecture or Seminar per week: 4
Hours of Lab or Studio per week: 0

**SOCW 680 - Clinical Field Practicum**

Credits: 6
Supervised social work learning experience four days per week. Students placed in public, nonprofit or for-profit mental health and health venues reflecting specific interests in advanced clinical practice with individuals, families and groups, community-centered clinical practice, or forensic social work.

Prerequisites
SOCW 673, 630, 640, 645, and 688

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
**SOCW 681 - Clinical Field Seminar**

Credits: 3  
Assists students in critically analyzing their field experiences in the application of mental health assessment and interventions, working with individuals, families, groups, and communities. Students are expected to apply social work knowledge, values, and skills from their advanced clinical course work.

**Corequisite**
SOCW 680.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**SOCW 684 - Social Work and the Law**

Credits: 4  
Students engage in close analysis of judicial opinions to explore the role of the courts in creating public policy. Areas of inquiry include the role of social workers in the legal system, the nature of legal proceedings, and how the law shapes policy in relation to issues affecting children, youth, families, older adults, women, minorities, people in poverty, and other vulnerable populations.

**Prerequisites**
SOCW 624, 652, 658, and 673.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 685 - Organizational Leadership for Social Workers**

Credits: 4  
Examines functions and structure of human service organizations in context of service delivery. Development of theoretical knowledge, professional ethics, and skills in administration, leadership, management, organization, and supervision.

**Prerequisites**
SOCW 624, 652, 658, and 673.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCW 687 - Empowering Communities for Change**

Credits: 4  
Explores social work interventions at community level, including organization, planning, and development. Strategies for mobilizing community members, using community organizations, formulating coalitions, engaging in participatory planning, and social and economic development.

**Prerequisites**
SOCW 624, 652, 658, and 673.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### SOCW 688 - Advanced Research in Social Work

Credits: 3  
Explores social work intervention research, needs assessment, formative and summative program evaluation, and cost analyses. Discusses applications of systematic inquiry at the practice, organizational, and policy levels. Addresses ethical, pragmatic, and political considerations; qualitative approaches; quality performance; evidence from empirical research; and evaluation design.

**Prerequisites**  
SOCW 624, 652, 658, 671, and 673.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 1

### SOCW 690 - Social Change Field Practicum

Credits: 6  
Supervised social work learning experience four days per week. Students placed in public, nonprofit, or for-profit venues reflecting specific interests in agency supervision, organizational management, community change, electoral policies, or social policy.

**Prerequisites**  
SOCW 673, 684, 685, 687, and 688.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

### SOCW 691 - Social Change Field Seminar

Credits: 3  
Processing of field practicum experiences; analysis of successes and challenges; application of social work knowledge, values, and skills from across the curriculum. Culminates in professional presentations by students.

**Corequisite**  
SOCW 690.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

### SOCW 692 - Clinical Practicum I

George Mason University  2010-2011 Official University Catalog  3007
Credits: 4
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the clinical concentration year practicum. The seminar is designed to assist the student in critically analyzing their field experiences in the application of mental health assessment, risk reduction and interventions working with individuals, families, groups, and communities.

**Prerequisites**
SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### SOCW 693 - Clinical Practicum II

Credits: 4
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the clinical concentration year practicum. The seminar is designed to assist the student in critically analyzing their field experiences in the application of mental health assessment, risk reduction and interventions working with individuals, families, groups, and communities.

**Prerequisites**
SOCW 623, 624, 630, 651, 652, 657, 658, 670, 671, 672, 673, 674, 688, and 692

**Notes**
This is a continuation of SOCW 692 taken in the Fall semester.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Spring

### SOCW 694 - Social Change Practicum I

Credits: 4
Students participate in a supervised clinical social work field practicum for 20 hours per week. The clinical field seminar accompanies the concentration year practicum. The seminar is designed to assist students in processing their field experiences and analyzing their successes and challenges. Students are expected to apply social work knowledge, values, and skills from across the curriculum.

**Prerequisites**
SOCW 623, 624, 651, 652, 657, 658, 670, 671, 672, 673

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0  
**When Offered:** Fall

### SOCW 695 - Social Change Practicum II
Credits: 4
Students continue to work in a supervised social work field practicum for 20 hours per week. At the end of this semester students will have completed 300 hours of field work to meet the total number of 600 hours required for the concentration year practicum. The field seminar accompanies the concentration year practicum. The seminar is designed to assist students in processing their field experiences and analyzing their successes and challenges. Students are expected to apply social work knowledge, values, and skills from across the curriculum.

**Prerequisites**

**Notes**
Continuation of SOCW 693 from the Fall semester.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0
**When Offered:** Spring

---

**SOCW 697 - Thesis Project Seminar**

Credits: 3
Provides structured opportunity for students to work with each other and faculty in developing their final MSW thesis projects. Integrates and applies learning from all previous course work, emphasizing knowledge, skills, and values related to research, clinical practice, policy, community practice, and organizational leadership. Social work ethics, empowerment of populations at risk, and systems transformation will be explored. In addition to group meetings, students will meet individually with their faculty mentors.

**Prerequisites**
Social Change: 684, 685, 688
Clinical Practice: 630-688

**Corequisite**
Social Change: 676, 687
Clinical Practice: 640, 645

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SOCW 699 - Independent Study in Social Work**

Credits: 1-3
Investigates research problem in field of social work.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 0
**Hours of Lab or Studio per week:** 0
Sociology

**SOCI 101 - Introductory Sociology**

Credits: 3  
Introduction to basic sociological concepts. Examines aspects of human behavior in cultural framework, including individual and group interaction, social mobility and stratification, status and class, race and gender relations, urbanism, crime and criminology, and social change and reform.

Satisfies General Education Requirement: Social and behavioral science

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 102 - Introduction to Sociological Inquiry**

Credits: 3  
Offers introduction to sociology through conduct of original student research, informed by small group and classroom discussion of sociological ideas and methods exemplified by seminal texts. Especially recommended for students considering majoring in sociology, as well as students interested in studying sociology as a liberal art.

**Notes**  
Students may not receive credit for both SOCI 101 and 102.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 120 - Globalization and Society**

Credits: 3  
Examines and analyzes important global issues and processes. Considers historical development of globalization and implications for different societies and cultures. Investigates perceptions of global processes by different cultures and nations, and efforts of international institutions to address social, political, economic, and cultural changes in global society.

Satisfies General Education Requirement: Global understanding

**Notes**  
Students may not receive credit for both SOCI 120 and GLOA 101.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SOCl 300 - Social Control and Human Freedom

Credits: 3
Examines how various social institutions function to organize and regulate society. Topics include family, education, ideology, law, media, work, governmental planning, and stratification. Serves as a foundation of many specialized courses offered by department, especially those that focus on control of crime and delinquency.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 301 - Criminology

Credits: 3
Focuses on causes and meaning of crime, with emphasis on adults. Patterns of criminal behavior, including property crimes, violent crimes, organized crime, white-collar crime, and victimless crime. Critical assessment of criminal justice system as a response to crime.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 302 - Sociology of Delinquency

Credits: 3
Examines social factors involved in development of delinquency, including family, political economy, schooling, community environment and culture. Examines various theories of delinquency; rates of delinquency in relation to age, race, gender and social class; and legal system that addresses causes, consequences, and policies of punishment and rehabilitation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 303 - Sociological Research Methodology

Credits: 4
Introduces empirical design in sociological research: historical development, research design, sampling, methods of gathering data, sociometric scales, analysis and interpretation of results, and research reporting.

Prerequisites
SOCI 101 or 102, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 2

SOCl 304 - Sociology of Work and Occupations
Credits: 3
Analysis of how societies structure work and allocate economic functions among different groups and classes. Topics include historical and cross-cultural variations in work, human consequences of industrialization, and impact of transition to post-industrial society. Special emphasis on changing position of professional employees and social factors that affect distribution of opportunity among various groups, and growing significance of technology for the nature of work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 305 - Sociology of Small Groups

Credits: 3
Characteristics, structure, and processes of small group dynamics; theories and models of group analysis, techniques of observation and research in small groups; research theory and application of small group knowledge to such natural groups as mutual aid self-help groups, families, juvenile delinquent gangs, and task groups in work sites.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 307 - Social Movements and Political Protest

Credits: 3
Explores process by which people organize to resist current social arrangements and create alternative institutions, policies, or leadership. Historical and contemporary case studies of domestic and global change used to explore how, why, and to what effect various groups have organized to reject status quo and create social change.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 308 - Racial and Ethnic Relations

Credits: 3
How race and ethnicity have been shaped by the policies and practices in Western and non-Western societies. Background given on evolution of racial and ethnic sentiments from Western colonial period in African, Asian, Middle Eastern, and Latin American countries as well as contemporary U.S. racial and ethnic relations. Explores how changing demographic racial patterns may affect future definitions of race and ethnicity.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 309 - Marriage, Families, and Intimate Life

Credits: 3
Focuses on family in history and family forms in contemporary societies. Looks at interaction within families and relationship
between society and families.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 310 - Sociology of Deviance**

Credits: 3  
Analyzes macro- and microlevel deviance-producing processes, meaning and control of deviance, and major theoretical approaches to deviance.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 311 - Classical Sociological Theory**

Credits: 3  
Explores sociological tradition through readings and discussions of ideas drawn from writings of selected sociological thinkers such as Comte, Marx, Weber, Durkheim, and others.

**Prerequisites**  
9 credits of sociology including SOCI 101, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 312 - Qualitative Research Methods**

Credits: 3  
Introduces ethnography, field work methods, interviewing, life histories, and other qualitative methods to generate data about cultures in which various groups and classes are immersed. Students learn by applying qualitative methods to term projects, developed under guidance of instructor.

**Prerequisites**  
9 credits of sociology including SOCI 101 or 102, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SOCI 313 - Statistics for the Behavioral Sciences**

Credits: 4  
Fundamentals of applied statistics as used in behavioral science to include descriptive statistics, inferential statistics, correlation regression, analysis of variance, factor analysis, nonparametric statistics, and practical experience with calculators in applying
statistical analysis to actual problems of the behavioral sciences.

**Prerequisites**
SOCI 101, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 2

**SOCI 314 - Sociology of Culture**

Credits: 3  
Contemporary examination of culture as aspect of symbolic order, social institutions, and everyday practices of social life. Introduces range of different approaches to sociological study of culture with emphasis on problems of cultural difference and narrative aspects of culture in institutions of democratic society.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 315 - Sex and Gender in Contemporary Society**

Credits: 3  
Changing conceptions of sex roles, both female and male, in contemporary society. Using historical and comparative data, considers differential socialization of males and females in relation to changing social structure in which it takes place.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 320 - Social Structure and Globalization**

Credits: 3  
While focusing on nature and process of change in human society, considers social impact of political, economic, and environmental change and how lives are shaped by complexities of global social forces. Examines specific global issues such as conflict and security; economic disparity; ecological deterioration; populations and migration; legitimization of commerce; diffusion of innovations; and impact of class, status, and power in modern societies.

Satisfies General Education Requirement: Global understanding

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 326 - Armed Conflict and Conflict Resolution**

Credits: 3  
Examines political, economic, and sociocultural reasons why countries engage in armed conflict. Conflicts within and between
states are explored with special focus on consequences for global, regional and local instability, loss of life and limb, and fragmentation of social, political, and economic fabric of societies. Examines various approaches to conflict resolution.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**SOCI 332 - Sociology of Urban Communities**

Credits: 3  
Urban community, including historical development, demography, and ecology of metropolitan areas; urbanism as a way of life; emergence of suburbia; and future of cities.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**SOCI 340 - Power, Politics, and Society**

Credits: 3  
Analyzes how power is defined, attained and sustained in society. Students analyze political power as related to social realities such as democratic elections, class conflict, elite networks, powersharing, protest, and revolution.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**SOCI 350 - Community, Diversity, and Democracy: A Practicum**

Credits: 3  
Develops practical skills for reducing prejudice and building community within diverse workplaces, educational and civic organizations and local neighborhoods. Specific skills taught empower individuals to be effective communicators across differences, work with controversial issues and build multicultural coalitions.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

**SOCI 352 - Social Problems**

Credits: 3  
Sociological analysis of the problems of modern society, including those related to stratification, urbanism, family and kinship, cultural change, and deviant behavior.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0
**SOCI 355 - Social Inequalities**

Credits: 3  
Studies class structures and implications for individuals and groups in U.S. society. Explores issues of race and ethnicity, language and immigration status, sex and gender, social class, age, and sexual orientation. Students critically examine theory and research that explores construction, experience, and meaning of such differences.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 360 - Youth Culture and Society**

Credits: 3  
Introduces sociology of youth and youth culture. Investigates social, economic, and political realities of youth as a group and different groups of youth, including youth cultural production, formation of youth culture, and youth identities in variety of social settings.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 373 - The Community**

Credits: 3  
Examines small to moderate-size communities ranging through village, rural community, small town, and city subcommunity. Latter category includes city localities, ethnic villages, and suburban communities.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 377 - Art and Society**

Credits: 3  
Introduces the many ways in which art reflects social tendencies, comments on social problems, and contributes to discussions about a wide range of social issues. Students attend theatrical performances and visit exhibition spaces on campus, and learn to analyze what they experience through both aesthetic and sociological approaches. Explores contemporary issues such as debates about artistic freedom and public morality, commercialization of art, and relationship between cultural and social hierarchies.

Satisfies General Education Requirement: Synthesis requirement

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**SOCI 382 - Education in Contemporary Society**

Credits: 3  
Studies education as social institution and its function as socialization agency for social stability and social change. Emphasizes influences of social class elements on educational process and social organization of the U.S. public school system.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 383 - Human Services in Society**

Credits: 3  
Analyzes human services emphasizing government-sponsored, nonprofit organizations and informal voluntary services, and their interrelationships with health care and welfare systems. Comparative analysis of services in other societies. Observation in service agencies.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 385 - Sociology of Religion**

Credits: 3  
Studies places of religious consciousness in human action and institutional and organizational networks created to sustain religious beliefs. Emphasizes comparative and historical analysis of role religion has played in human society. Examines theories of nature of religious experience, religious symbolism, and basis of religious community. Explores changing demographics in relation to older traditional religious faiths and newer nontraditional faiths.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 390 - Sociology of Health, Illness, and Disability**

Credits: 3  
Examines social context of health, illness, and disability; relationships of health care professionals and patients; and structure and delivery of health care in different medical systems.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 395 - Issues in Sociology**

Credits: 3  
Opportunity to apply to contemporary relevant issues the theoretical perspectives and methodological skills previously learned.
Prerequisites
90 credits, and 12 credits of sociology.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 399 - Independent Study

Credits: 1-3
Individual study of sociological topic of interest to student.

Prerequisites
Open to sociology majors only. 6 credits of sociology including SOCI 101, and approval of written proposal.

Notes
May be repeated for credit up to 12 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SOCI 402 - Sociology of Punishment and Corrections

Credits: 3
Theories explaining forms of punishment systems; punishment and corrections as products of historical, cultural, and political changes; differences by race and gender in punishment and corrections. Problems of social control and violence in prisons, alternative rehabilitation, and community prevention strategies.

Prerequisites
6 credits of sociology including SOCI 101, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 405 - Analysis of Social Data

Credits: 4
Overview of management and analysis of empirical social science data, including file construction, scaling and measurement, data transformation, and treatment of missing data. Emphasizes manipulation, management, and analysis of data sets using computers.

Prerequisites
60 credits, SOCI 313 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3
**SOCI 410 - Social Surveys and Attitude and Opinion Measurements**

Credits: 3
Surveys research methods and techniques to collect, measure, and analyze social data, attitudes, and opinions with special emphasis on using computer software, the Internet, and other information technologies for social research. Highlights ethical issues for social research, computing, and information technology.

Satisfies General Education Requirement: Information technology (IT, all except ethics)

**Prerequisites**
SOCI 303 and 313 or equivalents, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 412 - Contemporary Sociological Theory**

Credits: 3
Analyzes contemporary sociological theorists such as Parsons, Merton, Mills, Berger, and Gouldner in terms of their relationship to major schools of contemporary sociological theory.

**Prerequisites**
12 credits of sociology including SOCI 101 and 311, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 414 - Sociology of Language**

Credits: 3
Interaction of language and social structure. Focuses on language as revealing culturally specific rules of interpretation; sex, class, race, and setting of specific uniformities in producing talk; and language as it constrains individuals.

**Prerequisites**
60 credits and 3 credits of sociology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 416 - Internship in Sociology**

Credits: 1-6
Intended to promote learning in application of sociological knowledge, and build skills in different work settings. Students work in approved setting as applied sociologists.

**Prerequisites**
21 credits of sociology, including Research Methods, or permission of instructor.

Notes
Minimum 45 hours of work for each credit required. May be repeated for a maximum of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

**SOCI 421 - Field Work in Social Change**

Credits: 3
In-depth investigation of planned social change through field work internship with change organization of student's choice. Groups may be involved in influencing peace, environment, civil rights, consumer protection, poverty, or other public issues. Topics include ideologies, targets, organizational structures, opposition, and strategies of change.

Prerequisites
6 credits of sociology or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 441 - The Sociology of Aging**

Credits: 3
Aging from a sociological perspective. Topics include demographic trends and aging population in America, social construction of life stages and creation of "old age," cultural labeling, and human resistance.

Prerequisites
6 credits of sociology, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 450 - The Holocaust: The Construction of Social History through Survivor Testimonies**

Credits: 3
Examines Holocaust, destruction of European Jewry, through testimonies of survivors and narratives of historians. Topics include historical and cultural circumstances that encouraged German anti-Semitism, rise of Nazism, ghettoization of Jews in Poland, Jewish life in ghettos, European Jews under Nazi occupation, Jewish resistance, Christian rescuers, invasion of Russia and mobile killing units, life in hiding and passing, forced labor camps and concentration camps, responses of United States and world, and reflections on Holocaust today. Also considers eyewitness testimony, memory, narrative, and literature.

Prerequisites
60 credits, or permission of instructor.
SO CI 471 - Prevention and Deterrence of Crime

Credits: 3

Prerequisites
60 credits, in-service status, or permission of instructor.

SO CI 475 - Women and the Law

Credits: 3
Prerequisite for 575: undergraduate senior status in sociology or graduate standing. Analyzes changing position of women in law from legal and sociological perspectives. Focuses on how law defines and regulates women's rights in variety of areas such as employment, marriage and divorce, reproduction and control of one's body, and violence against women. Explores social and economic consequences of various legal doctrines, and compares laws and policies in United States with those in other countries.

Prerequisites
60 credits, or permission of instructor.

SO CI 480 - Honors Seminar in Sociology I

Credits: 3
Develop research proposals and an appropriate bibliography for honors thesis under the guidance of a sociology faculty member.

Prerequisites
Admission to honors in the sociology major.

SO CI 481 - Honors Seminar in Sociology II

Credits: 3
Pursue independent research and write honors thesis under the guidance of a faculty mentor. Present work in a colloquium at the
Prerequisites
Successful completion of SOCI 480.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 482 - Honors Internship in Sociology

Credits: 3
Provides hands-on experience in sociology and opportunity to do research in approved work settings. In addition to 120 hours of field work (for 3 credits), students meet at discretion of instructor to plan their research and share ongoing field work experiences.

Prerequisites
Admission to Sociology Honors Program and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SOCI 483 - The Sociology of Higher Education

Credits: 3
Exposes students to sociological theory and research on evolution of higher learning in United States. Explores social forces that have shaped the distinctively American approach toward higher education and have led to transformation of higher education in contemporary society. Particular attention to relation between universities and elites within surrounding society, linkage between education and industry, norms and values that are presupposed by educational institutions, and bearing of sports on values and traditions of higher education.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
60 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 492 - Sociology of Organizations

Credits: 3
Theories, analysis of types of organizations from informal voluntary associations to large complex ones. Explores nonprofit organizations and alternatives to bureaucracies, such as feminist collectives, cooperatives, self-help groups, and social movement organizations. Students do field work in organizations applying theories and concepts to observations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SOCI 499 - Independent Research in Sociology**

Credits: 1-4
Investigation of sociological problem according to individual interest, with emphasis on research.

**Prerequisites**
18 credits of sociology including SOCI 311, 313, and 412; 3.00 GPA in sociology; and research proposal approved by instructor and department chair before enrollment.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**SOCI 503 - Sociology of Law**

Credits: 3
Classical and contemporary sociological theories applied to law and legal institutions. Social relations between law and community, special group interests, social change, and social deviance. Case studies. Consideration of legal profession.

**Prerequisites**
Undergraduate senior status in sociology, graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 516 - Internship in Sociology**

Credits: 1-6
Learning experience in the application of sociological knowledge and skills in different work settings. Students work in approved setting as applied sociologists.

**Prerequisites**
21 credits of sociology including research methods, or permission of instructor.

**Notes**
Minimum 40 hours of work for every 1 credit. May be repeated for a maximum of 6 credits.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0

**SOCI 550 - The Holocaust**

Credits: 3
Examines Holocaust, destruction of European Jewry, through testimonies of survivors and narratives of historians. Topics include historical and cultural circumstances that encouraged German anti-Semitism; rise of Nazism; ghettoization of Jews in Poland;
Jewish life in ghettos; European Jews under Nazi occupation; Jewish resistance; Christian rescuers; invasion of Russia and mobile killing units; life in hiding and passing, forced labor camps, and concentration camps; responses of United States and world; and reflections on Holocaust today. Also considers eyewitness testimony, memory, narrative, and literature.

Prerequisites
Undergraduate senior status in sociology, or graduate status.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 575 - Women and the Law

Credits: 3
Analyzes changing position of women in law from legal and sociological perspectives. Focuses on how law defines and regulates women's rights in variety of areas such as employment, marriage and divorce, reproduction and control of one's body, and violence against women. Explores social and economic consequences of various legal doctrines, and compares laws and policies in United States with those in other countries.

Prerequisites
Undergraduate senior status in sociology or graduate standing

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 590 - Gender, Race, and the Natural World

Credits: 3
Advanced study of links among gender, race, and nature using social-psychological framework, original sources, and seminar discussion format. Analyzes ideologies that underpin interlocking narratives of gender, race, and nature; and examines role of science in production of those ideologies.

Prerequisites
Undergraduate seniors, graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 599 - Issues in Sociology

Credits: 1-3
Contemporary topics in sociology including sociological theory, crime and delinquency, advanced research methods, social and cultural change, urban sociology, medical sociology, sociology of aging, and rural sociology.

Equivalent to NURS 611

Prerequisites
Undergraduate senior status in sociology, or graduate status.
Notes
May be taken only once for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 605 - Gender and Social Structure
Credits: 3
Reviews theories explaining the development and maintenance of gender. Using historical and comparative data, examines perceived, prescribed, and actual sex differentiation in social, political, and economic roles. Begins with gender as a social structure and then examines contemporary research as support or refutation for variety of theoretical paradigms. Includes discussion of gender in intimate relationship and the public sector.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 607 - Criminology
Credits: 3
Crime and crime causation. Topics include social basis of law, administration of justice, and control and prevention of crime.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 608 - Juvenile Delinquency
Credits: 3
Sociology of adolescent behavior. Sociological factors that determine which behaviors and social categories of adolescents are likely to be labeled and treated as delinquent.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 609 - Sociology of Punishment and Corrections
Credits: 3
Explores development of modern penal system as interpreted by various perspectives, including Durkheim, Marx, Weber, Foucault, Elias, and Garland. Explores recent trends and problems, including social control and violence in prisons, race and gender disparities in punishment, alternative rehabilitation, and prevention strategies.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 614 - Sociology of Culture

Credits: 3
Analyzes 20th-century debates in American culture and cultural politics, with emphasis on art and popular culture, news media, and competing notions of "the public." In-depth readings in cultural sociology cover variety of theoretical and methodological approaches.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 619 - Conflict and Conflict Management: Perspectives from Sociology

Credits: 3
Deals with sociology of conflict. Presents major sociological theories of conflict such as those of Marx, Weber, Simmel, Dahrendorf, Coser, and Collins. Stresses role that sociological conflict theory plays in undergirding conflict management practices.

Prerequisites
Graduate standing in sociology or conflict analysis and resolution, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 620 - Methods and Logic of Social Inquiry

Credits: 3
Emphasizes gathering, interpreting, and evaluating scientific evidence. Covers logic of scientific inquiry, including the application of various research designs and data collection methods. Develops critical-thinking skills by using set of rules and logical criteria for evaluation of social science research. Focuses both on how results are obtained and disseminated via research reports.

Prerequisites
Undergraduate statistics and research methodology, or permission of instructor.
SOCI 623 - Racial and Ethnic Relations: American and Selected Global Perspectives

Credits: 3
Covers demographic purview of U.S. and other global racial and ethnic groups and racial and ethnic groups as human-social-minority and dominant groups. Explores factors contributing to dominant and minority status and means of altering dominant groups assessment of minority group status.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

SOCI 631 - Survey Research

Credits: 3
Introduces theory, method, and practice of survey research design and analysis. Students complete survey research project.

Prerequisites
SOCI 530 and 531, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 632 - Evaluation Research for Social Programs

Credits: 3
Studies methodological issues related to evaluation of social programs. Explores conceptual and research design issues in relation to social programs, particularly delivery of social services. Includes examination of methods used to assess need for programs, impact of delivery systems, and efficiency and effectiveness of social programs.

Prerequisites
SOCI 530 and 531, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 633 - Special Topics in Sociology

Credits: 3
Specialized inquiry of topics of contemporary sociological research and scholarship. Content varies.

Notes
May be repeated for credit when topic varies for a maximum of 12 credits.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### SOCI 634 - Qualitative Research Methods

Credits: 3  
Examines basic research methods involving observational techniques and procedures used in description and analysis of patterns, configurations, ethos, eidos, structures, functions, and styles typical of whole societies and cultures. Emphasizes case studies, unobtrusive methods, participant observation, longterm residence, choices of observer status role, recording data, uses of technical equipment, key informants, interviewing techniques, and ethical considerations in employing such methods and procedures.

**Prerequisites**  
Graduate standing, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### SOCI 635 - Environment and Society

Credits: 3  
Overview of human ecology and environmental sociology, emphasizing selected topics. Focuses on theory, since theory makes it possible to generalize from understandings derived in an analysis of a particular problem and apply them to other problems.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

### SOCI 636 - Statistical Reasoning

Credits: 3  
Intermediate treatment of quantitative analytic techniques used in sociology. Topics include sampling, inference, hypothesis testing, analysis of variance, and bivariate and multiple correlation and regression. Introduces logic of multivariate analysis. Focus on how results are obtained and disseminated via research reports.

**Prerequisites**  
Undergraduate statistics and research methodology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SO CI 640 - Social Theory and Social Policy

Credits: 3
Major theories of social organization and social change as means of understanding social policy development. Concentration is on social policies in American society.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SO CI 651 - Health Care Systems

Credits: 3
Changing health care systems are rapidly affecting patient providers and health and quality of life of society. Offers analysis and theories of change in health care systems and impacts on society and various stakeholders. Examines for-profit and nonprofit organizations and their impacts, and offers comparative cross-cultural analysis of health care systems.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SO CI 660 - Historical and Comparative Sociology

Credits: 3
Seminar in theory and methods of historical and comparative sociology, primarily for students with background in sociological theory and methods. Examines basic approaches and research data of history and sociology, surveys development of field, and analyzes exemplary studies.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SO CI 686 - Sociology of Aging

Credits: 3
Analyzes sociological issues in aging, including class and cultural factors, problems of work, retirement, attachment and loss, and ageism. Examines different theories of aging.

Prerequisites
Graduate standing, or permission of instructor.
SOCI 692 - McDonaldization of Organizations

Credits: 3
Examines classical and contemporary theories and analysis governing formal organizations, their development, and characteristics and relationships to society. Considers alternative conceptualizations to bureaucracy such as learning organizations, self-help groups, feminist collectives, cooperatives, and social movement organizations. Nonprofit, governmental, and business organizations are dissected.

Prerequisites
Graduate standing, or permission of instructor.

SOCI 696 - Independent Study

Credits: 1-3
Theoretical and research literature chosen by student and instructor.

Prerequisites
Graduate standing, or permission of instructor.

SOCI 697 - Independent Study

Credits: 1-3
Theoretical and research literature chosen by student and instructor.

Prerequisites
Graduate standing, or permission of instructor.

SOCI 711 - Classical Sociological Theory

Credits: 3
In-depth examination of major issues in classical (pre-1930) sociological theory. Analyzes Durkheim, Marx, Weber, Mead, and
others, and emphasizes social and intellectual context of their theories.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 712 - Contemporary Sociological Theory**

Credits: 3  
Examines schools in contemporary sociological theory such as structural-functionalist, conflict, exchange, symbolic interactionism, ethnometodology, humanist sociology, and critical theory. Analyzes contemporary theorists in relation to schools.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 730 - Analytic Techniques of Social Research**

Credits: 3  
Introduces multiple regression and causal analysis to sociological researchers, with a focus on obtaining and disseminating results. Moves from linear regression to the general linear model with several variables, its extensions, assumptions, and regression diagnostics. Examines the use of dummy variable and the analysis of interaction effects. Considers systems of equations and nonlinear outcomes.

**Prerequisites**  
Undergraduate statistics and research methodology, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SOCI 797 - Sociology Colloquium**

Credits: 0  
Public forum for the presentation and discussion of contemporary sociological research.

**Prerequisites**  
Graduate standing or permission of instructor.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

**SOCI 799 - Thesis**

Credits: 1-6  
Master’s thesis research under direction of thesis committee.
SOCl 801 - Proseminar in Public and Applied Sociology

Credits: 3
The first of a two-semester core sequence devoted to the philosophical, historical, theoretical, and methodological dimensions of public and applied sociology within the United States. Traces the evolution of the field during the 20th century, from its inception in the Chicago school and the studies of W.E.B. DuBois to more recent formulations, as these bear on the interplay between social scientific knowledge and public decisions and debates.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 803 - Institutions and Inequality

Credits: 3
Analyzes the interrelations between social inequalities and institutional structures, including markets, the press, prisons, mental institutions, cultural organizations, and corporations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 804 - Sociology of Globalization

Credits: 3
Addresses the social, political, cultural, and economic process of globalization. Explores the limits on globalization during the precapitalist era, the relation between empire and the internal structure of imperialist societies, theoretical debates over the contemporary world system, the relation between cities and globalization, and the link between globalization and social inequality within both developed and developing societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCl 833 - Special Topics in Sociology

Credits: 3
Specialized inquiry of topics of contemporary sociological research and scholarship. Content varies.

Prerequisites
Have completed either 6 credits of coursework at the 600 level or permission of instructor.
Notes
May be repeated when topic is different for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
When Offered: Spring

**SOCI 840 - Work Organizations and Social Inequality**

Credits: 3
Examines the social, organizational, and cultural processes that account for the differential distribution of job rewards along class, gender, and racial and ethnic lines. Topics include the historical evolution of the management worker relationship, job segregation by race and gender, the effect of new technologies on social inequality, the relation between gender and professional careers, the efficacy of governmental efforts to ensure equal opportunity, and the effect of organizational change on racial and gender inequalities at work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 844 - Youth, Schooling, and Popular Culture**

Credits: 3
Uses sociological perspectives to understand the various ways in which popular youth culture, schooling processes, and consumer culture intersect in contemporary American cultural life. Examines the social, economic, and political realities of youth as a group and the formation of distinct youth cultures within and outside formal school settings, including schooling and commodity culture, how markets promote and hinder particular educational ideologies, and how corner markets operate as spaces of cultural learning.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 845 - Society and Education**

Credits: 3
Exposes students to the major theories, debates, and findings within the sociology of education, emphasizing the reciprocal influences of schooling and social inequalities within contemporary societies. Emphasis on the historical evolution of public schooling in the United States, the complex relation between schooling and economic institutions, class differences in educational opportunity, and the politics of educational reform.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SOCI 850 - Sociology of Development**
Credits: 3
Analyzes socioeconomic and political change, focusing on the poor countries of Asia, Africa, and Latin America. Offers a basic descriptive understanding of processes of change in these countries and an introduction to major theoretical perspectives on development and globalization, from classical theories of comparative advantage to theories of imperialism, modernization, dependency, and globalization.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 851 - Globalization and Social Movements

Credits: 3
Analyzes current issues in the study of social movements, with an emphasis on the ways in which globalization shapes and in turn is shaped by social movements. Emphasis is placed on the relations among the strategies, identities, and organizations bound up with transnational social movements and the relation between the dynamics of global political and economic developments and protest movements in core and peripheral societies.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 853 - Cities in a Global Society

Credits: 3
Examines the scholarly literature on cities and globalization with a focus on the impact of globalization on urban environments and the effects of urbanization on the processes of globalization. Emphasis on the ways in which globalization restructures urban life in the core and periphery of the world economy with attention paid to the effects of spatial dispersion on the character of economic institutions within the advanced societies, the shifting nature of crime and security, immigration, and the cities of the Global South.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 857 - Sociology of Human Rights

Credits: 3
Examines the connections among inequality, conflict, social justice, and human rights in an age of globalization. Drawing from case studies from around the world, course examines institutional and structural violence and inequality as they relate to state, corporate, and military power; international law and order; welfare and social policy; global justice; regionalism, multilateralism, and transnationalism; environmental protection; gender inequality; ethnic conflict; resource wars; and national security policy before and after September 11, 2001.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 860 - Historical and Comparative Sociology
Seminar in theory and methods of historical and comparative sociology, primarily for students with background in sociological theory and methods. Examines basic approaches and research data of history and sociology, surveys development of field, and analyzes exemplary studies.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 870 - Directed Readings Sociology

Credits: 3
Intensive reading course to develop comprehensive understanding of specific field in sociology as agreed on with advisor.

Prerequisites
6 credits of 600-level SOCI courses.

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 880 - Independent Study in Sociology

Credits: 3
Reading and research on selected topic, resulting in a written project as agreed on with supervising faculty.

Prerequisites
6 credits of 600-level SOCI courses

Notes
Content varies. May be repeated.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOCI 998 - Doctoral Dissertation Proposal
Work on research proposal for doctoral dissertation.

Notes
May be repeated. A maximum of 9 credits of 998 may be applied to the degree. Students may enroll in 998 in their final year of coursework while preparing for comprehensive exams.

Hours of Lecture or Seminar per week: 0
Grading: S/NC

SOCI 999 - Doctoral Dissertation

Credits: 1-12
Doctoral dissertation research and writing on approved dissertation topic under direction of committee.

Prerequisites
Successful completion of SOCI 998.

Notes
Maximum of 12 credits may be applied toward degree.

Hours of Lecture or Seminar per week: 0
Grading: S/NC

Sociology and Anthropology

SOAN 500 - Communicating across the Disciplines

Credits: 3
Provides an introduction to the range of disciplinary perspectives and their combinations necessary for analyzing and acting on critical research policy needs in the global arena. Using case examples from recent and contemporary events, students will analyze data, assess alternative policy and program approaches, and evaluate the relative contributions of different disciplines and fields, including the way those disciplines and fields vary across different national traditions and between the national and international levels.

Prerequisites
Admission to MAIS concentration in global interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOAN 510 - Culture and Globalization
Credits: 3
Provides continuing exposure to the range of disciplinary perspectives necessary for understanding crucial issues in the global arena. Through case examples, focuses on the intersections of culture and globalization. Analyzes existing data and assesses alternative policy and program approaches, and illuminates interactions between globalization and culture.

Prerequisites
SOAN 500

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SOAN 670 - Special Topics in Sociology and Anthropology

Credits: 4-8
Provides cross-disciplinary, pedagogical format in Department of Sociology and Anthropology. Covers variety of pedagogical formats, such as combining ethnographic field techniques taught in anthropology with sociological-based urban issues, or providing archaeological laboratory analyses with grounding in statistical techniques proposed by department faculty.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 0-8
Hours of Lab or Studio per week: 0-8

Software Engineering

SWE 205 - Software Usability Analysis and Design

Credits: 3
Principles of user interface design. Concepts for objectively and quantitatively assessing the usability of software user interfaces. Outcomes include knowledge of quantitative engineering principles for designing usable software interfaces and an understanding that usability is more important than efficiency for almost all modern software projects, and often the primary factor that leads to product success. Major topics include cognitive models for human perceptions and needs, which are used as a basis for analytical and critical thinking about user interfaces; specific engineering principles for designing usable menus, forms, command languages, web sites, graphical user interfaces and web-based user interfaces. Assessments will include written analytical evaluations of existing user interfaces, exams, and HTML-based design projects.

Prerequisites
ENGL 101

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SWE 301 - Internship Preparation

Credits: 0
Preparation for Internship Educational Experience. Intended for, but not limited to, students planning internships in the Applied Computer Science Software Engineering Program. Internship employment opportunities. Basic interview skills. Techniques for applying academic knowledge to practical software development. Techniques for extracting knowledge from practical experience. Peer presentation from students who have completed internships.

Prerequisites
Limited to ACS or CS majors with junior standing or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SWE 332 - Object-Oriented Software Design and Implementation

Credits: 3
In-depth study of software design and implementation using a modern, object-oriented language with support for graphical user interfaces and complex data structures. Topics covered are specifications, design patterns, and abstraction techniques, including typing, access control, inheritance, and polymorphism. Students will learn the proper engineering use of techniques such as information hiding, classes, objects, inheritance, exception handling, event-based systems, and concurrency.

Equivalent to CS 332

Prerequisites
Grade of C or better in CS 211

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 401 - Internship Reflection

Credits: 1
Reflection on Internship Educational Experience. Intended for, but not limited to, students completing internships in the Applied Computer Science Software Engineering Program. Analysis of techniques for applying academic knowledge to practical software development. Analysis of techniques for extracting knowledge from practical experience. Student presentations summarizing internships relating them to academic program goals.

Prerequisites
SWE 301 and completion of internship

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

SWE 421 - Software Requirements and Design Modeling
Credits: 3
An introduction to concepts, methods, and tools for the creation of large-scale software systems. Methods, tools, notations, and validation techniques to analyze, specify, prototype, and maintain software requirements. Introduction to object-oriented requirements modeling, including use case modeling, static modeling, and dynamic modeling using the Unified Modeling Language (UML) notation. Concepts and methods for the design of large-scale software systems. Fundamental design concepts and design modeling using UML notation. Students participate in a group project on software requirements, specification, and object-oriented software design.

Equivalent to CS 421

Prerequisites
Grade C or better in CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 432 - Design and Implementation of Software for the Web

Credits: 3
Teaches how to develop software for web applications. Covers client-server computing, theories of usable graphical user interfaces, and models for web-based information retrieval and processing. Goals are to understand how to design usable software interfaces and implement them on web, learn how to build software that accepts information from users across web and returns data to user, and understand how to interact with database engines to store and retrieve information. Specific topics are HTML, CGI programming, Java, Java applets, Javascripts, and Java servlets.

Prerequisites
MATH 125 and CS 211.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 437 - Software Testing and Maintenance

Credits: 3
Concepts and techniques for testing and modifying software in evolving environments. Topics include software testing at the unit, module, subsystem, and system levels; developer testing; automatic and manual techniques for generating test data; testing concurrent and distributed software; designing and implementing software to increase maintainability and reuse; evaluating software for change; and validating software changes.

Prerequisites
CS 211 and MATH 125

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 443 - Software Architectures
Credits: 3
Teaches how to design, understand, and evaluate software systems at an architectural level of abstraction. By end of course, students will be able to recognize major architectural styles in existing software systems, describe a system's architecture accurately, generate architectural alternatives to address a problem and choose from among them, design a medium-size software system that satisfies a specification of requirements, use existing tools to expedite software design, and evaluate the suitability of a given architecture in meeting a set of system requirements.

Prerequisites
SWE 421

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 510 - Object-Oriented Programming in Java

Credits: 3
Introduces students to programming in the Java language. Topics include problem-solving methods and algorithm development, program structures, abstract data types, simple data and file structures and program development in a modular, object-oriented manner. Introductory use of OO language features, including data hiding, inheritance, polymorphism, and exception handling. Goals include design and development of Java classes and class type hierarchies. An introduction to Java servlets and applets is included. Emphasis on program development is reinforced through several programming projects.

Prerequisites
Undergraduate courses or equivalent knowledge in programming in a high-level language.

Notes
Credit cannot be applied to a graduate degree in the Volgenau School or the BS degree in computer science.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 521 - Software Engineering Essentials

Credits: 3
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. The course will also discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies. The course will discuss how these concepts are handled in various languages, but without requiring the students to program. Credit cannot be applied to any degree in the computer science department.

Equivalent to AIT 521

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
When Offered: S
SWE 619 - Object-Oriented Software Specification and Construction

Credits: 3
In-depth study of software construction using modern, object-oriented language with support for graphical user interfaces and complex data structures. Specifications, design patterns, and abstraction techniques, including procedural, data, iteration, type, and polymorphic. Information hiding, classes, objects, and inheritance. Exception handling, event-based systems, and concurrency.

Prerequisites
SWE foundation courses or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 620 - Software Requirements Analysis and Specification

Credits: 3
In-depth study of object-oriented requirements modeling, including use case modeling, static modeling and dynamic modeling with Unified Modeling Language (UML) notation. Students participate in group project on software requirements and specification using modern method.

Prerequisites
SWE foundation courses or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 621 - Software Modeling and Architectural Design

Credits: 3
Concepts and methods for the architectural design of large-scale software systems are presented. Fundamental design concepts and design notations are introduced. Concepts of requirements analysis and specification are taught. Several design methods are presented and compared. In-depth study of object-oriented analysis and design modeling using the Unified Modeling Language (UML) notation. Students participate in a group project on software requirements, analysis, and design modeling.

Prerequisites
SWE 619 or permission of instructor. MSCS students may substitute CS 540 and CS 571 for SWE 619.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 622 - Distributed Software Engineering

Credits: 3
Hands-on introduction to techniques and programming interfaces for distributed software engineering. Networking protocols at several layers. Construction of distributed and concurrent software using network protocol services. Applications of Internet and
web-based software.

**Prerequisites**
SWE foundation courses or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 623 - Formal Methods and Models in Software Engineering**

Credits: 3  
Formal mechanisms for specifying, validating, and verifying software systems. Program verification through Hoare's method and Dijkstra's weakest preconditions. Formal specification via algebraic specifications and abstract model specifications, including initial specification and refinement toward implementation. Integration of formal methods with existing programming languages, and the application of formal methods to requirements analysis, testing, safety analysis, and object-oriented approaches. Formal methods using the Object Constraint Language (OCL).

**Prerequisites**
SWE 619, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 625 - Software Project Management**

Credits: 3  
Lifecycle and process models; process metrics; planning for a software project; mechanisms for monitoring and controlling schedule, budget, quality, and productivity; and leadership, motivation, and team building.

**Prerequisites**
SWE foundation courses or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SWE 626 - Software Project Laboratory**

Credits: 3  
Covers requirements analysis, design, implementation, and management of software development project. Students work in teams to develop or modify software product, applying sound principles of software engineering. Uses both industrial and academic standards to assess quality of work products.

**Prerequisites**
SWE 619, 620, and 621; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 6
SWE 630 - Software Engineering Economics

Credits: 3
Covers quantitative models of software lifecycle, cost-effectiveness analysis in software engineering, multiple-goal decision analysis, uncertainty and risk analysis, software cost estimation, software engineering metrics, and quantitative lifecycle management techniques.

Prerequisites
SWE 625

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 631 - Object-Oriented Design Patterns

Credits: 3
Principles of object-oriented design through design patterns. Studies selection of appropriate object-oriented structure after system requirements or requirements specification of software system have been developed. Design patterns created in logic view of software system. Studies generalized design solutions for generalized software design problems, and reuse of design patterns. Once developed, design patterns may be specified in any object-oriented language.

Equivalent to CS 631

Prerequisites
SWE 619 or 621, or CS 540 or 571; or graduate course in object-oriented programming or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 632 - User Interface Design and Development

Credits: 3
Principles of user interface design, development, and programming. Includes user psychology and cognitive science, menu system design, command language design, icon and window design, graphical user interfaces, web-based user interfaces.

Prerequisites
SWE 619, or CS 540 and 571, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 637 - Software Testing
Credits: 3
Concepts and techniques for testing software and ensuring its quality. Topics cover software testing at the unit, module, subsystem, and system levels; automatic and manual techniques for generating and validating test data; testing process; static versus dynamic analysis; functional testing; inspections; and reliability assessment.

Prerequisites
SWE 619, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 641 - Systems Architecture for Large-Scale Systems

Credits: 3
See SYST 621.

Equivalent to SYST 621

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 642 - Software Engineering for the World Wide Web

Credits: 3
Detailed study of engineering methods and technologies for building highly interactive web sites for e-commerce and other web-based applications. Presents engineering principles for building web sites that exhibit high reliability, usability, security, availability, scalability, and maintainability. Teaches methods such as client-server programming, component-based software development, middleware, and reusable components.

Prerequisites
SWE 619, or CS 540 and 571, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 645 - Component-Based Software Development

Credits: 3
Introduces concepts and foundations of software component and component-based software. Detailed study of engineering principles of modeling, designing, implementing, testing, and deploying component-based software. Also explores state-of-the-art component technologies.

Prerequisites
SWE 619, or CS 540 and CS 571, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SWE 699 - Special Topics in Software Engineering

Credits: 3
Special topics not occurring in regular SWE sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit when semester topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 720 - Advanced Software Requirements

Credits: 3
State-of-the-art and state-of-the-practice in software requirements engineering. In-depth coverage of selected methods, tools, notations, or validation techniques for the analysis and specification of software requirements. Includes project investigating or applying approaches to requirements engineering.

Prerequisites
SWE 620 and 621.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 721 - Reusable Software Architectures

Credits: 3
Investigates software concepts that promote reuse of software architectures. Studies influence of object technology on software design and reuse. Investigates domain modeling methods, which model the application domain as a software product family from which target systems can be configured. Covers reusable software patterns including architecture patterns and design patterns, software components, and object-oriented frameworks.

Prerequisites
SWE 621

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 723 - Precise Modeling
Credits: 3
Discusses ongoing advances in modeling techniques for software design, including precision, performance, security and safety aspects, and UML, its meta-models, and proposed enhancements such as Object Security Constraint Language, Object Temporal Constraint Language, QoS Profiles and the theory behind them.

Prerequisites
SWE 621

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 727 - Quality of Service for Software Architectures

Credits: 3
Builds on acquired skills for modeling architectures, and focuses on the relationship between architectural patterns and qualities of service (QoS). By the end of the course, students will be able to elicit the QoS preferences of stakeholder; recognize major architectural styles and the QoS tradeoffs that each presents; design for and reconcile competing QoS requirements; and evaluate a given architecture with respect to a set of QoS requirements.

Prerequisites
SWE 621 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 763 - Software Engineering Experimentation

Credits: 3
Detailed study of scientific process, particularly using experimental method. Examines how empirical studies are carried out in software engineering. Reviews distinction between analytical techniques and empirical techniques. Other topics include experimentation required in software engineering, problems that can be solved using experimentation, methods used to control variables and eliminate bias in experimentation, and analysis and presentation of empirical data for decision making.

Prerequisites
SWE 621, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SWE 781 - Secure Software Design and Programming

Credits: 3
Theory and practice of software security, focusing in particular on some common software security risks, including buffer overflows, race conditions and random number generation, and on identification of potential threats and vulnerabilities early in design cycle. Emphasizes methodologies and tools for identifying and eliminating security vulnerabilities, techniques to prove absence of vulnerabilities, ways to avoid security holes in new software, and essential guidelines for building secure software: how to design software with security in mind from the ground up and integrate analysis and risk management throughout the
software life cycle.

**Prerequisites**
SWE 619, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SWE 795 - Advanced Topics in Software Engineering**

Credits: 3
Advanced topics not occurring in existing courses. Topics normally assume knowledge in one or more existing MS SWE courses.

**Prerequisites**
12 credits applicable toward MS program.

**Notes**
Repeatable within degree for credit when subject differs.

**SWE 796 - Directed Readings in Software Engineering**

Credits: 3
Analysis and investigation of contemporary problem in software engineering. Requires prior approval by faculty member who supervises student's work. Written report also required.

**Prerequisites**
Permission of instructor

**Notes**
Maximum 6 credits may be earned. To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SWE 798 - Research Project**

Credits: 3
Master's degree candidates undertake a project using knowledge gained in MS program. Topics chosen in consultation with a faculty sponsor. Research project is chosen under guidance of full-time graduate faculty member, resulting in written technical report.

**Prerequisites**
18 credits applicable toward MS.

**Notes**
Prior approval required by faculty sponsor who supervises student's work. To register, students must complete an independent
SWE 799 - Thesis

Credits: 1-6

Research project completed under supervision of faculty member, which results in technical report accepted by three-member faculty committee. Report must be defended in oral presentation.

Prerequisites
Permission of advisor.

Notes
To register, students must complete independent study form available in department office. It must be initialed by faculty sponsor and approved by department chair.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SWE 821 - Software Engineering Seminar

Credits: 3
Study of application of software engineering principles, design methods, and support tools through real-life problems extracted from faculty and industry projects.

Prerequisites
SWE 621

Notes
May be repeated with change in topic.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

SWE 823 - Software for Critical Systems

Credits: 3
Study of software for systems in which failure can be catastrophic. Presents techniques to construct and analyze software for critical applications and examination of inherent limitations of such techniques, and interaction between techniques used during development and behavior of software during operation. Topics include tolerance of software faults, design redundancy, data redundancy, software safety, formal methods, statistical testing, design for analyzability, and design for testability.
Prerequisites
SWE 620 and STAT 554.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

**SWE 824 - Program Analysis for Software Testing**

Credits: 3
Different methods for analyzing software, primarily for purpose of testing. Analysis techniques, specific algorithms, tools, and applications. Goals are to explore current research issues, learn how to build software analysis tools, and understand how these techniques can be applied to software development activities. Focuses on applications for testing software, including automatic test data generation, object oriented testing, and testing client-server applications. Also considers analysis techniques for other software-related activities such as maintenance, reuse, object-oriented development metrics and optimization.

Prerequisites
A compiler class (e.g., CS 540) or testing class (e.g., SWE 637) or permission of the instructor.

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

**SWE 825 - Special Topics in Web-Based Software**

Credits: 3
Advanced topics in specifying, designing, modeling, developing, deploying, testing and maintaining software written as web applications and web services. May be repeated with change in topic.

Prerequisites

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring

**SWE 860 - Software Analysis and Design of Real-Time Systems**

Credits: 3
Background for students who want to conduct research in software engineering of real-time systems. Provides understanding of key real-time software system analysis, design concepts and methods, and how they are used in developing large-scale, real-time software systems. Also explores potential impact of emerging technologies. Includes term project in design and analysis of complex, real-time software system.

Prerequisites
SWE 623

Hours of Lecture or Seminar per week: 3
When Offered: Fall, Spring
Spanish

See also FRLN course listings.

SPAN 101 - Elementary Spanish I

Credits: 3
For students with no knowledge of Spanish. Introduction to Spanish, including elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Lab work required.

Notes
Students may not receive credit for SPAN 101 and SPAN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 102 - Elementary Spanish II

Credits: 3
Continuation of SPAN 101. Lab work required.

Prerequisites
SPAN 101, appropriate placement score, or permission of department.

Notes
Students may not receive credit for SPAN 102 and SPAN 105, 109, or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 109 - Intensive Elementary Spanish

Credits: 6
Recommended for students who desire an intensive introduction to Spanish.

Prerequisites
Equivalent to SPAN 101 and 102 taught in a single semester.

Notes
Lab work required. Students may not receive credit for SPAN 109 and SPAN 101, 102, 105, or 110.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2
SPAN 110 - Elementary Spanish

Credits: 6
Introduces elements of grammar, vocabulary, oral skills, listening comprehension, and reading. Students may not receive credit for SPAN 110 if they have received credit for SPAN 101, 102, or 109.

Notes
Lab work required. Students may not receive credit for SPAN 110 and SPAN 101, 102, 105, or 109.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 1

SPAN 115 - Review of Elementary Spanish

Credits: 3
Reviews elements for students who have studied Spanish previously.

Prerequisites
Appropriate placement score or permission of the department.

Notes
Lab work required. Students may not receive credit for SPAN 115 and also SPAN 105, 102, 109 or 110.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 201 - Intermediate Spanish I

Credits: 3
Further development of skills in listening, speaking, reading, and writing. SPAN 201 and 202 must be taken in sequence. Lab work required.

Prerequisites
SPAN 102, 105, 109, appropriate placement score, or permission of department.

Notes
Students may not receive credit for SPAN 201 and SPAN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 202 - Intermediate Spanish II

Credits: 3
Application of skills to reading, composition, and discussion. Lab work required.
Prerequisites
SPAN 201, appropriate placement score, or permission of department.

Notes
Students may not receive credit for SPAN 202 and SPAN 209 or 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 209 - Intensive Intermediate Spanish

Credits: 6
Equivalent to SPAN 201 and 202 taught in a single semester.

Prerequisites
SPAN 102, 105, 109, appropriate placement score, or permission of department.

Notes
Lab work required. Students may not receive credit for SPAN 209 and SPAN 201, 202, or 210.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 2

SPAN 210 - Intermediate Spanish

Credits: 3

Continuation of the development of basic components of the language, with focus on listening, speaking, reading, and writing skills. Introduces students to the cultures and histories of Spanish-speaking regions.

Prerequisites
SPAN 110, 115, or appropriate placement score.

Notes
Lab work required. Students may not receive credit for SPAN 210 and SPAN 201, 202, or 209.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 1

SPAN 250 - Gateway to Advanced Spanish

Credits: 3
Integration of advanced intermediate-level Spanish reading, writing, listening, and speaking skills, as well as the development of
critical thinking about authentic texts from around the globe.

**Prerequisites**
SPAN 210, appropriate placement score, or permission of department.

**Notes**
Taught in Spanish.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 301 - Grammar and Syntax**

Credits: 3  
In-depth review of Spanish grammar and syntax. Extensive practice in controlled and free writing with emphasis on fundamental difficulties and points of interference that exist between English and Spanish.

**Prerequisites**
SPAN 202, 209, appropriate placement score, or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 305 - Spanish in Context I**

Credits: 3  
Integrated content-based approach to the study of Spanish, designed to promote oral and written abilities, as well as critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Includes vocabulary-building activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.

**Prerequisites**
SPAN 250 or equivalent, or permission of instructor.

**Notes**
Conducted in Spanish. Students cannot receive credit for SPAN 305 if they receive credit for SPAN 309 or 315.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 306 - Spanish in Context II**

Credits: 3  
Continuation of SPAN 305.
Prerequisites
SPAN 305 or equivalent, or permission of instructor.

Notes
Conducted in Spanish. Students cannot receive credit for SPAN 306 if they received credit for SPAN 309 or 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 309 - Intensive Spanish in Context

Credits: 6
Intensive content-based approach to the study of Spanish, designed to promote oral and written abilities, as well as critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Includes vocabulary-building activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.

Prerequisites
SPAN 250 or equivalent, or permission of instructor.

Notes
Conducted in Spanish. Students cannot receive credit for both SPAN 309 and SPAN 305, 306, or 315.

Hours of Lecture or Seminar per week: 6
Hours of Lab or Studio per week: 0

SPAN 315 - Spanish for Heritage Speakers

Credits: 3
Designed for students who have some communicative ability in Spanish, normally acquired in the home, who want to improve their reading and writing abilities while developing a critical understanding of Latin American, Latino, and/or Spanish histories and cultures. Course components include orthography and vocabulary activities, grammar review and practice, assigned readings in a variety of genres, critical cultural analysis, in-class discussions, written essays, and the viewing of films.

Prerequisites
Appropriate placement score or permission of instructor.

Notes
Students cannot receive credit for both SPAN 315 and SPAN 305, 306, or 309.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 321 - Introduction to Spanish Culture
Credits: 3
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Spain.

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Designed for nonmajors. Course work in English. Credit may be earned in either SPAN 321 or 461, but not in both.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 322 - Introduction to Latin American Culture**

Credits: 3
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Latin America.

Satisfies General Education Requirement: Global understanding

**Prerequisites**
ENGL 101 or equivalent, or permission of instructor.

**Notes**
Designed for nonmajors. Course work in English. Credit may be earned in either SPAN 322 or 466, but not in both.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SPAN 323 - Field Study in Hispanic Culture**

Credits: 1-3
History, culture, economic and social development, and scientific and artistic achievements that have contributed to the formation of modern Spain.

**Prerequisites**
60 credits or permission of instructor.

**Hours of Lecture or Seminar per week:** 6  
**Hours of Lab or Studio per week:** 0

---

**SPAN 324 - Study Abroad in Spanish**

Credits: 3
Study at an academic institution in a Spanish-speaking country including classroom studies with professors from the host country and field experiences.
Prerequisites
SPAN 250 (or equivalent) or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 325 - Major Hispanic Writers

Credits: 3
Study of the works of major Hispanic writers in translation. Writers studied vary.

Satisfies General Education Requirement: Literature

Prerequisites
ENGL 101 or equivalent.

Notes
Designed for non-majors. Course work in English. May be repeated once for credit when topic is different with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 326 - Treasures of Spanish American Literature

Credits: 3
Introduction to the major themes, trends, and cultural context of Latin American literature. Writers studied vary.

Prerequisites
Advanced oral and written proficiency in Spanish, to be determined by the instructor.

Notes
Conducted in Spanish. Designed for nonmajors. May be repeated for credit when topic is different with permission of the department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 329 - Special Topics in Spanish and Latin American Literature

Credits: 3
Course work in English. May be taken toward fulfillment of the humanities requirement in literature for baccalaureate degrees.

Prerequisites
ENGL 101, or permission of instructor.
Notes
Designed for nonmajors. May be repeated once for credit.

**SPAN 335 - Topics for Proficiency: The Americas**

Credits: 3
Integrated content-based approach to conversational Spanish. Designed to promote increased confidence and fluency in both formal and informal Spanish registers, as well as critical understanding of Latin American and/or Latino histories and cultures. Current events, films, literary texts, and popular culture reflecting issues of Latin Americans and/or Latinos serve as catalysts for class discussions, oral presentations, and debates.

**Prerequisites**
SPAN 250 (or equivalent) or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SPAN 336 - Topics for Proficiency: Spain**

Credits: 3
Integrated content-based approach to conversational Spanish. Designed to promote increased confidence and fluency in both formal and informal Spanish registers, as well as critical understanding of Spanish history and culture. Current events, films, literary texts and popular culture reflecting Spanish issues serve as catalysts for class discussions, oral presentations and debates.

**Prerequisites**
SPAN 250 (or equivalent) or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**SPAN 351 - Oral Spanish**

Credits: 3
Development of oral expression on topics of current interest and everyday situations, including written assignments.

**Prerequisites**
SPAN 250 or equivalent; appropriate placement score; or permission of instructor.
Notes
Conducted in Spanish. Not open to native speakers of Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 370 - Spanish Writing and Stylistics

Credits: 3
Improves writing skills by covering formal and stylistic concepts of the Spanish language. Includes practice and exposure to different textual genres in an interdisciplinary fashion. Equivalent to SPAN 452

Prerequisites
SPAN 306 or 309, or 315, or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 385 - Introduction to Spanish Linguistics

Credits: 3
Introduces the study of Spanish linguistics, including phonetics, phonology, morphology, syntax, pragmatics, historical linguistics, and sociolinguistics. Combines discussion of theoretical issues with linguistic analysis of Spanish.

Prerequisites
SPAN 370 or permission of instructor.

Corequisite
SPAN 370 or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 388 - Introduction to Latina/o Studies

Credits: 3
Interdisciplinary approach to the study of U.S. Latina/o cultural production, designed to promote critical thinking in understanding Latina/o histories, literatures, and cultures.
Satisfies General Education Requirement: Synthesis requirement

**Prerequisites**
Completion or concurrent enrollment in all other required general education courses. SPAN 370 or permission of instructor.

**Corequisite**
SPAN 370 or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SPAN 390 - Introduction to Hispanic Literary Analysis**

Credits: 3
Required course that prepares students for the study of Hispanic literatures. Introduces basic terminology of literary analysis and provides practice in the examination of texts in the major genres: poetry, narrative, and drama.

**Prerequisites**
SPAN 370 or permission of instructor.

**Corequisite**
SPAN 370 or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

---

**SPAN 400 - Spanish for the Professions**

Credits: 3
Advanced study of the language needed for use in a specific profession, such as translation, business, social service, or health professions.

**Prerequisites**
SPAN 385 or permission of instructor.

**Notes**
Conducted in Spanish.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
SPAN 425 - Independent Study

Credits: 1-3
Research and analysis of a selected problem in literature or linguistics in consultation with a department member.

Prerequisites
Spanish major with 90 credits, and permission of instructor.

Notes
Maximum of 6 credits of independent study may be applied to fulfillment of major requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SPAN 426 - Independent Study

Credits: 1-3
Research and analysis of a selected problem in literature or linguistics in consultation with a department member.

Prerequisites
Spanish major with 90 credits, and permission of instructor.

Notes
Maximum of 6 credits of independent study may be applied to fulfillment of major requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SPAN 430 - Spanish in the United States

Credits: 3
Covers both formal and sociolinguistic aspects of Spanish in the U.S. by discussing demographic aspects and a historical overview of the varieties of Spanish spoken in the United States. Gives a foundation in issues such as linguistic variation, language choice, the relationship among race, ethnicity, and language; official language policies; individual and societal bilingualism; and language diversity in education.

Prerequisites
SPAN 385, or advanced ability in Spanish or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 452 - Advanced Written Spanish
Credits: 3

Development of skills required in writing Spanish. Guided and original compositions. Grammatical structures reviewed and supplemented with individual corrections.

Equivalent to SPAN 370

Prerequisites
9 credits of SPAN at 300 level or above, or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 455 - Spanish-English Translation

Credits: 3
Introduction to the history, theory, analysis, and practice of Spanish-English and English-Spanish translation. Includes literal versus free translation; denotation and connotation; regional and social variation; intercultural pragmatic differences; interlanguage influence and calques; and genre and audience. Hands-on experience with literary works, newspaper articles, and advertisements, as well as legal, medical, and technical documents.

Prerequisites
SPAN 370 and ENGL 302; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 461 - Spanish Civilization and Culture

Credits: 3
Survey of Spanish culture and civilization from the pre-Roman era to the 20th century.

Prerequisites
SPAN 370 or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 466 - Latin American Civilization and Culture
Introduction to the study of Latin American civilization and culture from the pre-Columbian era to the 20th century.

Prerequisites
SPAN 370 or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 472 - Spanish Phonetics and Phonology

Credits: 3
Introduction to the analysis of the Spanish sound system, both phonetics and phonology. Topics include the articulatory system, sound production, the classification of vowels and consonants, phonetic transcription, the mental representation of sounds, variation and accent, and processes of sound change, among others.

Prerequisites
SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 474 - Spanish Syntax and Semantics

Credits: 3
Investigates the knowledge Spanish speakers possess that enables them to understand and create expressions they have not heard before. Studies the system unconsciously used by Spanish speakers and writers to connect situations in the real world to the words and sentences that express each situation. Provides opportunities to analyze samples of language in actual use.

Prerequisites
SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 476 - Teaching Spanish in the United States

Credits: 3
Introduction to second language acquisition theory and research, and the application to teaching Spanish as a second language and a heritage language. Includes a discussion of sociocultural and political issues surrounding the teaching of Spanish in the United States. Covers learning objectives, critical pedagogy, course design, grammar instruction, task-based language teaching, computer-assisted language learning, materials evaluation, and assessment.

Prerequisites
SPAN 385 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 480 - Special Topics in Spanish

Credits: 3
Study of a selected theme in Hispanic literature, culture, or linguistics.

Prerequisites
SPAN 385, 388 or 390, depending on topic, or permission of instructor.

Notes
Conducted in Spanish. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 481 - Special Topics in Spanish

Credits: 3
Study of a selected theme in Hispanic literature, culture, or linguistics.

Prerequisites
SPAN 385, 388 or 390, depending on topic, or permission of instructor.

Notes
Conducted in Spanish. May be repeated for credit when topic is different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 483 - The Literature of Spain I

Credits: 3
Examines the main periods, trends, genres, and most representative works of the Spanish peninsular literature from its beginnings to the end of the Golden Age.

Prerequisites
SPAN 390 or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 484 - The Literature of Spain II

Credits: 3
Examines the main periods, trends, genres, and most representative works of Spanish peninsular literature from the 18th century to the contemporary period.

Prerequisites
SPAN 390, 483, or permission of instructor.

Notes
Conducted in Spanish.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 486 - Topics in Latin American Literature

Credits: 3
An interdisciplinary examination and discussion of major topics in literary texts and cultural practices of Latin America from pre-colonial times to the mid-19th century.

Prerequisites
SPAN 390 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 487 - Topics in Latin American Literature II: Late 19th Century to the Present

Credits: 3
Interdisciplinary examination and discussion of major topics in literary texts and cultural practices of Latin America from the late 19th century to the present.

Prerequisites
SPAN 390 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 488 - The Literature of Spanish America

Credits: 3
Survey of the literature of Spanish America. Study of texts that are representative of the colonial, romantic, modernista, avant garde, and contemporary periods.
Prerequisites
SPAN 390 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 490 - Internship in Spanish

Credits: 1-6
Qualified students work with area schools, social service programs, government agencies, interest groups, museums, or corporations. Specific arrangements must be made with, and approved by, a member of the Spanish faculty during the semester prior to enrollment.

Prerequisites
9 credits in Spanish at the 300 level, or permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SPAN 497 - Senior Honors Tutorial

Credits: 3
First semester involves weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the Spanish faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the Spanish faculty are required.

Prerequisites
Spanish major with 90 credits, cumulative GPA of 3.00, and GPA of 3.00 in major field.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SPAN 498 - Senior Honors Tutorial

Credits: 3
Students meeting these requirements are admitted to candidacy on submission of a letter of application to the department Honors Committee in the second half of the junior year. A faculty recommendation and an interview by the Honors Committee are also required. First semester involves weekly meetings with a faculty member to discuss readings from a comprehensive list prepared by the Spanish faculty. In the second semester, independent research and completion of an honors essay under the supervision of a member of the Spanish faculty are required.

Prerequisites
Spanish major with 90 credits, cumulative GPA of 3.00, and GPA of 3.00 in major field.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
SPAN 500 - History of the Spanish Language

Credits: 3
Scientific study of the evolution of the Spanish language from its origin in Vulgar Latin to its present forms.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 501 - Applied Spanish Grammar

Credits: 3
Analysis of Spanish grammar as a basis for teaching language skills. Terminology and methodology for the teaching of syntax are stressed.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 502 - Hispanic Sociolinguistics

Credits: 3
Introduction to sociolinguistics with emphasis on bilingualism and language contact in the Spanish-speaking world including the United States.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 505 - Applied Spanish Stylistics

Credits: 3
Advanced study of the written language for students who want to develop their academic writing skills. Covers the most frequent challenges of writing through intensive practice in genres such as argumentation, narration, and description. Teaches students to identify and analyze best practices in academic writing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 510 - Introduction to the Graduate Study of Literature in Spanish

Credits: 3
Study of the nature of literary work and analysis of critical approaches to literature with an emphasis on texts written in Spanish. Course is a requirement for master's students of Spanish in their first year of study.
Prerequisites
Graduate standing in master's program in foreign languages, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 520 - Studies in Medieval Spanish Literature

Credits: 3
Study of a major work or a literary genre of this period.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 525 - Studies in Renaissance Literature

Credits: 3
Study of a literary movement or selected authors of the Spanish Renaissance.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 530 - Studies in the Literature of the Golden Age

Credits: 3
Study of a literary genre or a major author of Spanish literature of the Golden Age.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 540 - Studies in 20th-Century Literature

Credits: 3
Study of a writer, genre, theme, or movement of this period.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 545 - Studies in Hispanic Literature

Credits: 3
Study of major writers in a particular generation or movement.
SPAN 551 - Special Topics in Spanish

Credits: 3
Special studies in Spanish or Latin American language, literature, or culture. Specific topics are announced in advance.

Notes
May be repeated for credit with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 560 - Studies in Spanish American Poetry

Credits: 3
Study of major poets of a given period. Literary and social atmosphere of the period are emphasized.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 565 - Studies in Spanish American Drama

Credits: 3
Study of playwrights who have made a major contribution to the development of the genre.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 576 - Advanced Translation

Credits: 3
Advanced work in translation of selected texts from diverse fields. Comparative terminology, sight translation, and précis writing. Emphasis on the function and technique of documentation in translation. Translation from Spanish to English and from English to Spanish.

Prerequisites
Graduate standing or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPAN 580 - Contemporary Hispanic Institutions

Credits: 3
Study of 20th-century cultural, social, and political institutions in Spain and Spanish America with emphasis on language and terminology used to describe their functions, regulations, and conditions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 635 - Seminar in Don Quixote

Credits: 3
Study of Don Quixote and major critical approaches to the work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 650 - Seminar in Twentieth-Century Drama

Credits: 3
Study of major dramatists in the generation of 1898 and contemporary theater.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 655 - Seminar in Twentieth-Century Prose

Credits: 3
Study of major writer, theme, or movement in novel or essay.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 670 - Seminar in Spanish American Prose

Credits: 3
Study of a selected theme, movement, or author in the novel, short story, or essay.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPAN 675 - Seminar in Literature and Art
Credits: 3
Comparative analysis of a literary theme or style in relation to other media (painting, architecture, film) for an integral understanding of the arts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SPAN 680 - Seminar in Literature and Society**

Credits: 3
Study of a literary topic, a genre, or selected authors in relation to a given economic, social, or political system in Spain or Latin America.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SPAN 685 - Seminar in Literature and Ideas**

Credits: 3
Study of major ideological-philosophical themes and their artistic expression in literature.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

**SPAN 798 - Directed Reading and Research**

Credits: 3
Open only to degree students who have completed at least 18 credits. Reading and research on a specific project under the direction of a department member. Oral or written report required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

**SPAN 799 - Thesis**

Credits: 1-6
Students who take SPAN 798 and then elect thesis option receive 3 credits for SPAN 799 on completion of thesis. Students who do not take SPAN 798 receive 6 credits for SPAN 799 on completion of the thesis.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC
SPAN 800 - Studies for the Doctor of Philosophy in Education

Credits: 3-6
Studies designed by student's discipline director and approved by student's doctoral committee that prepare student for research and writing in area of interest in discipline.

Prerequisites
Admission to PhD in education program to study in Spanish.

Notes
Enrollment may be repeated.

Special Education

EDSE 401 - Introduction to Special Education

Credits: 3
Provides a survey of current knowledge on individuals with disabilities within the context of human growth and development across the life span. Content includes historical factors, legislation, etiology, characteristics, needs, educational strategies, assessment, and support services of and for individuals with disabilities ranging from mild and moderate to severe levels of varying disabilities. Includes the impact of disabilities on academic, social, and emotional performances. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 402 - Classroom Management and Applied Behavior Analysis

Credits: 3
Focuses on identifying, recording, evaluating, and changing social and academic behaviors of special and diverse populations. Explores theories of classroom management and various approaches to management, including use of technological advances. Emphasizes developing classroom and individual behavior management plans.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 403 - Language Development and Reading

Credits: 3
Identifies literacy skills for typical students, and describes reading, language, and writing instruction for students with mild disabilities who access the general curriculum. Topics include emergent literacy skills, phonemic awareness, vocabulary development, and comprehension.
Prerequisites
EDSE 401 and EDSE 440.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 405 - Introduction to Early Childhood Special Education

Credits: 3
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes factors and legislation affecting service delivery. Field experience required.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 411 - Characteristics of Students with Visual Impairments

Credits: 1
Provides an overview of the characteristics of and services to persons with visual impairments, including the impact of visual impairment on infants' and children's growth and development, child and adolescent emotional and social development, and family interaction patterns. Considers the educational, conceptual, psychosocial, and physical implications of a visual impairment.

Notes
Course delivered online.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 412 - Braille Code

Credits: 3
Provides understanding of the literary code of Braille and its implications for educational/literacy programs for students with a visual disability. Practice experiences will enable students to better understand the Braille code and how to teach it to students with a visual disability.

Prerequisites
EDSE 411.

Corequisite
EDSE 411.

Notes
Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 414 - Orientation and Mobility

Credits: 2
Provides the foundation for understanding the components and essence of orientation and mobility (O&M). Establishes how the need for independent travel in the blind population created the field of O&M. Explores the philosophy and history of orientation and mobility, including cane instruction, dog guides, and methods of travel. Addresses techniques in developing orientation skills and basic mobility instruction. Motor and concept skill development are emphasized.

Prerequisites
EDSE 411.

Corequisite
EDSE 411.

Notes
Delivered online.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 415 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3
Explores current public policy initiatives for coordinating services for infants and toddlers. Covers models of services delivery and approaches to family-centered service.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 418 - Curriculum and Assessment of Students with Visual Impairments

Credits: 3
Provides students with knowledge and understanding of the educational assessment of students with visual impairments and additional disabilities including deaf-blindness. Students practice assessing and planning educational programs for students with visual impairments. Addresses assessment of technology for students with visual impairments. Examines determination of learning needs and appropriate learning media, relationship of assessment, IEP development, and placement. Delivered online.

Prerequisites
EDSE 411

Notes
Delivered online.
EDSE 422 - Augmentative Communication

Credits: 2
Focuses on alternative language, literacy, and communication techniques for children with severe language and speech impairments.

EDSE 428 - Elementary Reading, Curriculum, and Strategies for Students Who Access the General Education Curriculum

Credits: 3
Applies research on instructional approaches in elementary curriculum for individuals with disabilities accessing general education curriculums. Includes curriculum and instructional strategies in reading, language arts, mathematics, science, social studies, and social skills; cognitive strategies in study skills, attention and memory, and peer-mediated instruction.

EDSE 429 - Secondary Curriculum and Strategies for Mild Disabilities

Credits: 3
Applies research on teacher effectiveness, teacher accountability, instructional approaches, and technological advances at the secondary level for individuals with emotional disturbance, learning disabilities, and mental retardation. Includes curriculum and instructional strategies in reading, language arts, math, science, social studies, and social skills; cognitive strategies in self-regulation, study skills, attention, memory, and motivation; peer-mediated instruction including cooperative learning and peer tutoring; and self-advocacy and strategies for facilitating transition to community, workplace, and post-secondary environments.

EDSE 431 - Transition and Community-Based Instruction

Credits: 3
Addresses issues in transition for youth with severe disabilities. Covers self-determination, development and implementation of a transition plan, post-secondary opportunities including education and community-based instruction, and vocational environments.
EDSE 432 - Positive Behavior Supports

Credits: 3
Focuses on employing concepts and skills to design, implement, and evaluate behavior support programs derived from functional assessment; using effective teaching strategies; addressing relevant replacement skills; facilitating generalization and maintenance of skills and incorporating individually designed crisis intervention procedures.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 434 - Communication and Severe Disabilities

Credits: 3
Introduces professionals to augmentative and alternative communication (AAC) for individuals with severe speech and language impairments. Addresses knowledge and skills needed to assess the potential AAC user, make team decisions, develop and implement instruction, and evaluate the effects of instruction aimed at motivating, building, and expanding communication, choice-making, and social interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 440 - Characteristics of Students with Disabilities Who Access the General Curriculum

Credits: 3
Covers theories and specific conditions in learning disabilities and emotional disorders. Includes the impact of these learning and behavioral differences on academic and social and emotional performances. Addresses diversity within student populations. Experiential, observational, and interactive strategies, including use of technological advances, are used to facilitate fulfillment of the outcomes established for the course.

Notes
May require field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 442 - Characteristics of Students with Mental Retardation

Credits: 3
Covers theories and specific conditions in mental retardation, and provides advanced study of persons with mental retardation, ranging in age from preschool to adult. Topics include historical development of the field of mental retardation; theoretical models of mental retardation; etiological factors; characteristics; models of assessment and intervention, including technological advances; and issues and trends, including legislation and litigation. Includes the study of the impact of mental retardation on academic and social and emotional performances. Field experience required.
EDSE 447 - Medical and Developmental Risk Factors for Children with Disabilities

Credits: 3
Examines nature and causes of disabling or special health conditions. Examines screening and evaluation techniques, characteristics, and educational implications.

EDSE 456 - Language Development and Communication for Diverse Infants and Toddlers

Credits: 3
Provides understanding of early language development in terms of each of the five major components of language. Speech, language, and communication are discussed, particularly in terms of their interrelatedness with cognitive and sociocultural development. Explores importance of adult-child interaction, and impact of bilingualism, cultural diversity, cognitive ability, and language disorder.

EDSE 457 - Foundations of Language and Literacy for Diverse Learners

Credits: 3
Addresses first and second language acquisition and its application in the various contexts in which children develop. Explores the impact of disability and second language acquisition, and the inter-relationship of speaking, listening, and writing. Includes review of characteristics and etiology of children with language disabilities. Also addresses the diversity of communication styles in families, communities, and cultures. Field experience required.

EDSE 458 - Medical Aspects of Physical and Sensory Disabilities in Young Children

Credits: 3
Focuses on physical, sensory, medical, and health aspects of child development, including etiology and symptomatology of developmental disabilities affecting physical development. Emphasizes positioning, handling, adaptive strategies, and understanding of assistive technology devices. Focuses on the understanding of roles of related disciplines in collaborative planning and service delivery. Field experience required.
EDSE 459 - Curriculum and Methods: Early Childhood Special Education

Credits: 3
Emphasizes planning, organizing, implementing, and evaluating programs for young children with special needs.

EDSE 460 - Introduction to Applied Behavior Analysis

Credits: 3
Students will master basic principles, procedures, and ethical concepts pertaining to applying behavior analysis in schools or in other educational or therapeutic settings developed to satisfy part of the educational requirements needed for sitting for the Board Certified Assistant Behavior Analyst examination.

EDSE 461 - Analysis and Intervention in Applied Behavior Analysis

Credits: 3
Teaches students basic data collection, presentation, and analysis as it pertains to applied behavior analysis; as well as procedures for determining intervention efficacy and selecting, developing, or modifying interventions based on data, in educational and other settings to satisfy part of the educational requirement to sit for the Board Certified Assistant Behavior Analyst (BCABA) examination.

Prerequisites
EDSE 460, or permission of instructor.

EDSE 462 - Applying Behavior Analysis in School and Community Settings

Credits: 3
Teaches a variety of procedural topics in applied behavior analysis pertaining to developing effective instruction and interventions for a variety of content areas, skills, and adaptive and problem behaviors. Additionally, provides instruction on gaining collaboration of those around the student in assuring the student's success, and ethical concerns in meaningfully applying behavior analysis. Course is developed to satisfy part of the educational requirement to sit for the Board Certified Assistant Behavior Analyst (BCABA) examination.
Corequisite
EDSE 460 or permission of instructor

Hours of Lecture or Seminar per week: 3
When Offered: Fall

EDSE 490 - Internship in Applied Behavior Analysis

Credits: 3-9
Provides hands-on experience implementing, evaluating, and participating in development and revision of behavior analytically based instruction and related procedures with children who are diagnosed with intellectual disabilities or behavioral difficulties, under supervision of a Board Certified Behavior Analyst. Individual and group, and on-site and off-site supervision modalities are used. Additional professional development instruction is provided. Satisfies part of the experiential requirements needed for sitting for the Board Certified Assistant Behavior Analyst examination.

Prerequisites
Admission to or prior completion of the undergraduate Applied Behavior Analysis minor, completion of an undergraduate course of study that has been approved by the Behavior Analyst Certification Board, or consent of the instructor.

Corequisite
EDSE 460, EDSE 461, EDSE 462, or permission of instructor.

Hours of Lecture or Seminar per week: 2-4
Grading: Satisfactory/No Credit
When Offered: Fall, Summer, Spring

EDSE 500 - In-Service Educational Development

Credits: 1-6
Offered at request of school division or other educational agency.

Prerequisites
Employment in professional capacity by sponsoring division or agency.

Notes
Content varies; may be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDSE 501 - Introduction to Special Education

Credits: 3
Survey of current knowledge on individuals with disabilities within the context of human growth and development across the life span. Includes historical factors, legislation, etiology, characteristics, needs, educational strategies, assessment, and support services for individuals with disabilities ranging from mild and moderate to severe. Includes the impact of disabilities on academic, social, and emotional performances. Field experience required.
EDSE 502 - Classroom Management and Applied Behavior Analysis

Credits: 3
Explores how to identify, record, evaluate, and change social and academic behaviors of special and diverse populations. Explores theories of classroom management and various approaches to management including use of technological advances. Emphasizes developing classroom and individual behavior-management plans.

EDSE 503 - Language Development and Reading

Credits: 3
In-depth coverage of reading instruction for students with special needs. Topics include language development and emergent literacy skills; reading subskills including auditory discrimination and phonemic awareness, decoding and word reading; reading comprehension; and use of technological advances in the teaching of reading.

EDSE 504 - Elementary Curriculum and Content for Special Educators

Credits: 2
Reviews elementary curriculum content and instructional approaches for the instruction of individuals with disabilities in language arts/reading, mathematics, science, and social studies. Addresses core knowledge for Elementary Praxis II.

EDSE 505 - Introduction to Early Childhood Special Education

Credits: 3
Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery.

Notes
Field experience required
EDSE 510 - Introduction to Assistive Technology

Credits: 3
Provides an understanding of assistive technology and application in instructional programs, career tasks, and life skills for persons with disabilities. Presentation and demonstration experiences enable students to better use assistive technology in education, work, community, and home environments. Knowledge and awareness components may be delivered via distance education.

Equivalent to EDIT 510

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 511 - Characteristics of Students with Visual Impairments

Credits: 1
Provides an overview of the characteristics of and services to persons with visual impairments, including the impact of visual impairment on infants' and children's growth and development, child and adolescent emotional and social development, and family interaction patterns. Considers the educational, conceptual, psychosocial, and physical implications of a visual impairment.

Notes
Course delivered online.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 512 - Braille Code

Credits: 3
Provides understanding of the literary code of Braille and its implications for educational/literacy programs for students with a visual disability. Practice experiences enable students to better understand the Braille code and how to teach it to students with a visual disability.

Prerequisites
EDSE 511 (may be taken concurrently).

Notes
Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 513 - Medical and Educational Implications of Visual Impairments
Credits: 3
Provides an introduction to anatomy and physiology of the visual system and the educational implications of visual pathology. Topics include anatomy of the human eye, normal visual development, pathology of the eye, examination procedures for the identification of visual pathology, and the effects of pathology on visual learning and development.

Prerequisites
EDSE 511 (may be taken concurrently).

Notes
Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 514 - Orientation and Mobility for Students with Visual Impairments

Credits: 2
Provides the foundation for understanding the components and essence of orientation and mobility (O&M). Establishes how the need for independent travel in the blind population created the field of O&M. Explores the philosophy and history of orientation and mobility, including cane instruction, dog guides, and methods of travel. Addresses techniques in developing orientation skills and basic mobility instruction. Motor and concept skill development are emphasized.

Prerequisites
EDSE 511 (may be taken concurrently).

Notes
Delivered online.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 517 - Computer Applications for Special Populations

Credits: 3
Lecture and laboratory course for teachers of special populations in applications of computer technology for instructional programs and computer skills. Students learn to use computer technology designed for special populations.

Prerequisites
Graduate standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 518 - Curriculum and Assessment of Students with Visual Impairments

Credits: 3
Provides students with knowledge and understanding of the educational assessment of students with visual impairments and
additional disabilities including deaf-blindness. Students practice assessing and planning educational programs for students with visual impairments. Addresses assessment of technology for students with visual impairments. Examines determination of learning needs and appropriate learning media, relationship of assessment, IEP development, and placement.

Prerequisites
EDSE 511 (may be taken concurrently).

Notes
Delivered online.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 522 - Assistive Technology for Individuals with Sensory Impairments

Credits: 2-3
Focuses on professionals or students interested in serving visually impaired/blind or hearing-impaired/deaf populations. Heightens awareness of participants to specific technology and resources available to enhance and improve ability of individuals with disabilities.

Hours of Lecture or Seminar per week: 2-3
Hours of Lab or Studio per week: 0

EDSE 523 - Accessibility/Input Modification

Credits: 1-3
Provides overview of accessibility/input modifications and strategies. Students explore various input devices and their application and use by individuals with disabilities.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

EDSE 524 - Assistive Technology for Individuals with Learning Disabilities

Credits: 2
Focuses on strategies and techniques for implementing software and other technologies in lives of individuals age three to adult with learning disabilities. Students develop and implement plans for assistive technology. Requires practicum.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 525 - Software for Individuals with Special Needs
EDSE 526 - Web Accessibility and Design

Credits: 3
Develops understanding of principles of universal web design. Students apply understanding by designing and developing accessible web site using web-authoring tools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 527 - Adapted Sports, Recreation, and Leisure

Credits: 1
Introduces tools for adapting sports, recreation, and leisure activities to promote the benefits of active participation, relaxation, health, and well-being for individuals with differing abilities. Students participate in simulations, research, and design. Knowledge and awareness components may be delivered via distance education.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 528 - Low-Tech Assistive Technology Solutions

Credits: 1
Focuses on functional applications of low-technology solutions within the areas of self-care; mobility and transfer communication; stability and support; sports, recreation, and leisure; and academic and work environments. Includes exploration and opportunities to design and create low-tech devices for children and adults. Knowledge and awareness components may be delivered via distance education.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

EDSE 529 - Internet as an Assistive Technology Tool

Credits: 2
Provides overview of the web and Internet as an educational tool for students with disabilities. Focuses on presentation of strategies, accommodations, assistive technology, and Internet resources for educators. Students review and evaluate web sites, and develop an accessible Internet lesson plan or web site.
Prerequisites
HTML experience.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 530 - Policy Perspectives Affecting Diverse Young Learners and Their Families

Credits: 3
Provides understanding of historical and current trends and issues involving legislation and policy in early childhood education, bilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff in the field of early childhood education.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 531 - Transition and Community-Based Instruction

Credits: 3
Addresses issues in transition for youth with severe disabilities. Covers self-determination, development, and implementation of a transition plan, post-secondary opportunities including education and community-based instruction, and vocational environments.

Notes
Course is equivalent to EDSE 544 for students in the severe disabilities program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 532 - Positive Behavior Supports

Credits: 3
Designed for professionals working with individuals with severe disabilities. Focuses on concepts and skills needed to design, implement, and evaluate behavior support programs derived from functional assessment. Covers effective teaching strategies; addresses relevant replacement skills; facilitates generalization and maintenance of skills; and incorporates individually designed crisis intervention procedures.

Notes
Course is equivalent to EDSE 620 for students in the severe disabilities program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 533 - Curriculum and Assessment in Severe Disabilities
EDSE 534 - Communication and Severe Disabilities

Credits: 3
Introduces professionals to augmentative and alternative communication (AAC) for individuals with severe speech and language impairments. Addresses the knowledge and skills needed to assess the potential AAC user, make team decisions, develop and implement instruction, and evaluate the effects of instruction, aimed at motivating, building, and expanding communication, choice-making, and social interaction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 540 - Characteristics of Students with Disabilities who Access the General Curriculum

Credits: 3
Examines the characteristics of students with mild disabilities. Emphasis on etiology, contributing factors, conditions that affect learning, the challenges of identifying students with disabilities, and the need for academic, social, and emotional accommodations and support.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 542 - Characteristics of Students with Mental Retardation

Credits: 3
Covers theories and specific conditions in mental retardation, and provides advanced study of persons with mental retardation, ranging from preschool to adult. Topics include historical development of the field of mental retardation; theoretical models; etiological factors; characteristics; models of assessment and intervention, including technological advances; and issues and trends, including legislation and litigation. Includes the study of impact of mental retardation on academic and social and emotional performances. Requires field experience.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 544 - Adapted Instructional Methods and Transition for Secondary Learners
Credits: 3
Provides strategies for teaching functional academics and social/life skills, facilitating the transition to postsecondary environments. Focuses on all aspects of transition and alternative assessments for secondary learners with disabilities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 547 - Medical and Developmental Risk Factors for Children with Disabilities

Credits: 3
Examines nature and causes of disabling or special health conditions. Covers screening and evaluation techniques, characteristics, and educational implications.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 553 - Teaching Mathematics to Students with Special Needs

Credits: 3
Covers techniques for assessing and remediating difficulties in mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 555 - Language Development and Emerging Literacy

Credits: 3

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 556 - Developing Language, Literacy, and Communication in Young Children

Credits: 3
Examines strategies to develop language, literacy, and communication in young children with varying abilities. Explores the importance of adult-child interaction and the effect of bilingualism, cultural diversity, cognitive ability, and language disorders.

Notes
Field Experience required
EDSE 557 - Foundations of Language and Literacy for Diverse Learners

Credits: 3

Examines complexity of language acquisition and literacy development. Focuses on typical and atypical language development, connections between language and literacy, and diversity of communication styles in families, and cultures. Emphasizes first and second language acquisition.

Prerequisites
Admission to a Mason graduate program

Notes
Field Experience required

EDSE 558 - Medical Aspects of Physical and Sensory Disabilities in Young Children

Credits: 3

Prerequisites
Admission to a Mason graduate program.

Notes
Field Experience required

EDSE 560 - Secondary Mathematics for Special Education Teachers

Credits: 3

Provides the necessary depth and breadth of mathematics content knowledge required for prospective secondary special education mathematics teachers. Specific content includes: Algebra and Number Theory; Geometry, Measurement and Trigonometry; Functions and Calculus; Probability, Data Analysis and Statistics; Matrix Algebra and Discrete Mathematics. Students design mathematics instruction for students with mild disabilities utilizing current evidence-based practices.
EDSE 561 - Secondary Science for Special Education Teachers

Credits: 3
Provides the necessary depth and breadth of science content knowledge required for prospective secondary special education science teachers. Prepares students for the Praxis Content Knowledge tests in five fields: Biology, Chemistry, Earth and Space Science, General Science and Physics. Design science content area instruction for students with mild disabilities utilizing current evidence-based practices.

EDSE 590 - Special Education Research

Credits: 3
Describes fundamental concepts and practices in educational research in special education. Covers specific applications of educational research methods to problems in special education. Emphasizes review and critique of special education research, and applied classroom research for teachers.

EDSE 597 - Special Topics in Education

Credits: 1-6
Provides advanced study on selected topic or emerging issue in Special Education.

Prerequisites
Admission to program in Graduate School of Education.

Corequisite
May be repeated for credit with GSE permission.

Notes
May be repeated for credit with GSE permission.

EDSE 600 - Workshop in Education
Credits: 1-6
Offers full-time workshops and weekend seminars on selected topics in education and education tour seminars.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

EDSE 610 - Designing Adaptive Environments

Credits: 2
Overview of environmental adaptations for people with disabilities to increase their access to community, workplace, and school activities. Covers legal issues within the ADA for adapting environments, and addresses programmatic and physical access issues. Knowledge and awareness components may be delivered via distance education.

Prerequisites
EDSE/EDIT 510.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 612 - Special Needs Students in International Schools

Credits: 3
Focuses on students with special learning needs at international schools in the regular classroom environment. Enhances understanding of current issues within the field of special education in the international schools in an increasingly global community.

Prerequisites
Admission to FAST TRAIN program and EDSE 501

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 613 - Teaching Methods for Students with Visual Impairments

Credits: 3
Emphasizes methods of teaching compensatory skills, the core curriculum, and technology for use by students who are blind and visually impaired. Addresses curriculum development, adaptations, and teaching methodology for individuals with visual impairments. Provides information on adaptations within various educational programs and adaptation of general education classroom materials and procedures for use with blind and low vision children and youth.

Prerequisites
EDSE 511 (may be taken concurrently).

Notes
EDSE 615 - Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

Credits: 3
Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Prerequisites
Admission to the Early Childhood Special Education program or permission of the instructor

EDSE 616 - Braille Reading and Writing

Credits: 3
Provides basic instruction on transcription of advanced Braille codes, including music, foreign language, chemistry, computer Braille, and Nemeth code (Braille math code). Introduces techniques for teaching skills in each code. Explores technology tools used to create Braille and tactile materials in addition to other assistive technologies used for instruction in math and science.

Prerequisites
EDSE 512; EDSE 511 (may be taken concurrently).

Notes
Delivered online.

EDSE 619 - Applied Behavior Analysis: Principles, Procedures, and Philosophy

Credits: 3
Focuses on basic principles and procedures of applied behavior analysis; identification of factors that contribute to behavioral problems and improved performance; and procedures that can be used to minimize behavioral problems, improve performance, teach new behaviors, and increase probability of behaviors occurring under appropriate circumstances.

Prerequisites
Admission to applied behavior analysis graduate certificate program.
EDSE 620 - Managing Severely Challenging Behaviors and Applied Behavior Analysis

Credits: 3
Focuses on applying behavior analysis principles and social learning theory to increase learning by students with special needs. Emphasizes single subject research designs.

Prerequisites
Graduate standing and permission of advisor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 621 - Applied Behavior Analysis: Empirical Bases

Credits: 3
Focuses on basic content of applied behavior analysis. Teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Prerequisites
EDSE 619

Corequisite
EDSE 619

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 622 - Augmentative Communication

Credits: 2
Focuses on alternative language, literacy, and communication techniques for children with severe language and speech impairments.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

EDSE 623 - Applied Behavior Analysis: Assessments and Interventions

Credits: 3
Further expands on basic content of applied behavior analysis and teaches how to implement behavioral procedures and develop behavioral programs for clients with fundamental behavioral needs.

Prerequisites
EDSE 619.
EDSE 624 - Applied Behavior Analysis: Applications

Credits: 3
Expands capability to deal with more complex behavioral situations, enabling ability to relate to more sophisticated professional issues and environments.

Prerequisites
EDSE 621 and 623

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 625 - Applied Behavior Analysis: Verbal Behavior

Credits: 3
Further expands capability to deal with more complex behavioral situations, and enables students to relate to more sophisticated professional issues and environments.

Prerequisites
EDSE 623.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 626 - The Inclusive Classroom

Credits: 3
Introduces participants to instructional procedures for facilitating inclusive instruction for students with disabilities in general education settings. Topics include research-based strategies for adapting curriculum materials, designing instructional procedures, and evaluating students with disabilities.

Prerequisites
None

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 627 - Assessment

Credits: 3
Offers knowledge and experiential learning activities related to assessment of students with mild disabilities. Includes statistical and psychometric concepts in assessment. Addresses norm-referenced, criterion-referenced, curriculum-based, and informal assessment for instructional and placement decisions.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 628 - Elementary Reading, Curriculum, and Strategies for Students who Access the General Education Curriculum

Credits: 3
Applies research on instructional approaches, in elementary curriculum for individuals with disabilities accessing general education curriculums. Includes curriculum/instructional strategies in reading, language arts, mathematics, science, social studies, cognitive strategies, study skills, attention/memory, and peer-mediated instruction.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 629 - Secondary Curriculum and Strategies for Students with Disabilities who Access the General Curriculum

Credits: 3
Applies research on teacher effectiveness, accountability, and instructional approaches at the secondary level for individuals with mild disabilities. Includes instructional methods necessary for teaching reading, writing, math, and other content areas across the curriculum.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 633 - Policy Perspectives Affecting Diverse Young Learners

Credits: 3
Provides understanding of historical and current trends and issues involving legislation and policy in early childhood education, bilingual education, early childhood special education, and multicultural education. Focuses on historical role of social advocacy, development of advocacy skills, and collaboration and consultation with other professionals and staff. Addresses continuum of services and the context of service delivery. Requires field experience.

Prerequisites
Admission to a Mason graduate program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**EDSE 634 - Characteristics of Students with Autism**

Credits: 3  
Describes varying characteristics of students labeled with a type of autism who receive special education services. Examines definitions, eligibility criteria, incidence rates, and etiology. Perspectives from students, families, educational, community, and career personnel are described.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 635 - Interventions for Students with Autism**

Credits: 3  
Research-based interventions that promote progress in the areas of communication, social, academic, behavior, and sensory motor skills for students with autism are described. Methods for monitoring the impact of interventions are identified and a variety of service delivery models are described.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 648 - Introduction to Psycho-Educational Assessment**

Credits: 3  
Introduces basic statistical procedures and test characteristics. Appropriate terminology and practices related to formal and informal assessment applied throughout the course. Students practice administering, scoring, and interpreting tests, including the impact of multicultural diversity on assessment.

**Prerequisites**  
EDSE 540.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**EDSE 649 - Advanced Clinical Psycho-Educational Assessment in Special Education**

Credits: 3  
Focuses on advanced issues in administering, scoring, and interpreting education evaluation instruments with emphasis on writing reports and developing the Individualized Education Program. Considers using assessment results for instructional and placement decisions.

**Prerequisites**  
EDSE 648 is required for ED/LD students.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
EDSE 655 - Curriculum Methods: Elementary ED/LD

Credits: 3
Applies research on teaching effectiveness, teaching accountability, and instructional approaches with specific attention to reading, language arts, social skills, and cooperative learning. May require field experience in public schools.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 656 - Assessment of Diverse Young Learners

Credits: 3

Examines types of assessment, including family-centered assessment, used for planning and implementing effective programs for children from diverse cultures and with varied learning needs. Addresses selection, administration, and interpretation of formal and informal assessments.

Prerequisites
Admission to the Early Childhood Special Education program or permission of the instructor

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 659 - Curriculum and Methods: Early Childhood Special Education

Credits: 3

Prerequisites
Admission to the Early Childhood Special Education program or permission of instructor

Notes
Field Experience required

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 661 - Curriculum and Methods: Severe Disabilities
Credits: 3
Focuses on current best practices in curriculum, and methods for students with severe disabilities, including specific strategies for teaching students with severe disabilities, general strategies for working with heterogeneous groups of students in inclusive settings, and methods for adapting the general education curriculum to include students with severe disabilities.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDSE 662 - Consultation and Collaboration**

Credits: 3
Provides professionals in special education, regular education, and related fields with knowledge and communications skills necessary for collaborative consultation and technical assistance to other educators and service providers.

**Prerequisites**
Teaching licensure, or enrollment in graduate degree program in education.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDSE 665 - Families of Children with Special Needs**

Credits: 3
Focuses on strategies for developing culturally appropriate family-professional partnerships to benefit children with special needs. Explores theories and research that support a family-centered approach. Includes family and professional rights and responsibilities in the special education process.

**Prerequisites**
Admission to the Early Childhood Special Education program or permission of the instructor

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

**EDSE 667 - Cognitive Development of Diverse Young Children**

Credits: 3
Explores conflicting views about how young children think and learn. Addresses cognitive theoretical approaches of leading researchers, and emphasizes their relevance to educational practice. Addresses characteristics of children with cognitive disabilities, children from multilingual and multicultural backgrounds, and those living in poverty, along with the educational implications of those characteristics. Requires field experience.

**Prerequisites**
Admission to Mason graduate program.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
EDSE 669 - Interdisciplinary Approach for Children with Sensory and Motor Disabilities

Credits: 3
Emphasizes positioning, handling, and adaptive strategies. Focuses on understanding the roles of related disciplines in collaborative planning and service delivery.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 701 - Legal Issues and Special Populations

Credits: 3
Offers a study of the impact of legislation and litigation on the education of special populations emphasizing IDEA and Section 504. Topics of study include emerging trends in special education based on interpretation of landmark court cases related to disability, legal updates on policies and procedures for exceptional learners, and discussion of the guiding principles of special education law when addressing the needs of special populations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 702 - Managing Resources for Special Education Programs

Credits: 3
Examines development and delivery of specialized programs for exceptional learners. Topics include implementation of Individualized Education Plans via Universal Design, financial and human resource allocation and management, effective supervision and evaluation, and student outcome documentation.

Prerequisites
None

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 703 - Creating a Collaborative Culture

Credits: 3
Provides leaders in school settings with an opportunity to gain the skills needed to facilitate collaborative environments supportive of all learners. Topics of study include the impact of diversity on educational settings, developing a vision effective communication teaming and coteaching techniques, family professional partnerships, implementing schoolwide change initiatives, alternative dispute resolution, and maintaining a positive school climate.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
EDSE 743 - Leadership in Special Education Administration

Credits: 3
Examines leadership issues and applies them to the administration of special education programs. Explores current challenges in the delivery of services for exceptional children through case studies and projects.

Prerequisites
None

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 744 - Current Issues in Special Education

Credits: 3
Helps students develop an understanding of the role of convergent research evidence in addressing current issues in special education practice and policy. Familiarizes students with current issues in special education and the group experimental, single subject, and qualitative research designs used to address these current issues. Students evaluate research studies in terms of their methodological strengths and weaknesses and their part in providing convergent bodies of evidence that can be used for defining practice and policy.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 782 - Comprehensive Topics in Special Education: Trends and Issues

Credits: 3
Focuses on current trends and issues in special education and disabilities. Students under the direction of instructor complete individually designed projects addressing major trends and issues in their emphasis area of special education.

Prerequisites
Majority of course work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 790 - Internship in Special Education

Credits: 1-6
Supervised internships that apply university course work to instruction of children and their families in school and community settings.

Prerequisites
Passing scores on Praxis I prior to final internship, and permission of advisor.
Notes
Students enroll in two separate internships appropriate to the area of study for a total of 6 credits. Applications for field internships are due on February 15 for fall; September 15 for spring; and March 1 for summer.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

EDSE 791 - Midpoint Portfolio

Credits: 1
Opportunity for students to develop their portfolio. Serves as the vehicle to assess whether they are meeting the standards of their professional organization, the Council for Exceptional Children.

Notes
Must be taken after completion of fourth EDSE prefix course or concurrently with fourth or fifth EDSE prefix course in program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit (S, NC, IP)

EDSE 792 - Final Portfolio

Credits: 1
Opportunity for students to develop their portfolio. Serves as the vehicle to assess whether they are meeting the standards of their professional organization, the Council for Exceptional Children.

Corequisite
Must be taken concurrently with last EDSE 790 internship or the last EDSE course in the program.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
Grading: Satisfactory/No Credit (S, NC, IP)

EDSE 793 - Internship in Early Childhood Special Education

Credits: 1-6
Supervised internships that apply university coursework to instruction of children and their families in school and community settings. Students enroll in both infant/toddler (3 credits) and pre-school (3 credits) internships.

Prerequisites
Admission to the Early Childhood Special Education Certificate or permission of instructor; passing Praxis I and VCLA scores.

When Offered: Fall, Spring
EDSE 794 - Special Topics

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

EDSE 797 - Advanced Topics in Education

Credits: 1-6
Advanced study of selected topics in education for students preparing for doctoral studies or who have been admitted to the PhD program in education.

**Notes**
May be repeated for credit with CEHD approval.

**Hours of Lecture or Seminar per week:** 1-6
**Hours of Lab or Studio per week:** 0

EDSE 841 - Intervention Research in Special Education

Credits: 3
Provides advanced graduate students with opportunities for in-depth study, analysis, and discussion of original intervention research in special education. Emphasizes analyzing research methodology, coding original intervention research, analyzing results, synthesizing findings, formulating future research questions relevant to individuals with disabilities, and gaining an understanding of the submission process for conferences and publications.

**Prerequisites**
Admission to PhD in education program, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0

EDSE 842 - Application of Research Methodology in Special Education

Credits: 3
Provides knowledge and skills in the application of research methodology in special education. Topics include methods for conducting survey research, experimental and quasi-experimental research, research involving correlation and regression, and qualitative research. Emphasizes application to specific issues in special education research.

**Prerequisites**
Admission to PhD in education program, or permission of instructor.
EDSE 843 - Leadership in Special Education Administration

Credits: 3
Examines leadership issues and applies them to the administration of special education programs. Explores current challenges in the delivery of services for exceptional children through case studies and projects.

Prerequisites
Admission to PhD in education program, or permission of instructor.

EDSE 844 - Current Issues in Special Education

Credits: 3
Develops understanding of the role of convergent research evidence in addressing current issues in special education practice and policy. Describes current issues in special education and the group experimental, single subject, and qualitative research designs used to address these current issues. Students evaluate research studies in terms of methodological strengths and weaknesses, and their part in providing convergent bodies of evidence that can be used for defining practice and policy.

Prerequisites
Admission to PhD in education program, or permission of instructor.

Sport Management

SPMT 201 - Introduction to Sport Management

Credits: 3
Introduces sport management profession. Primary focus is on sport industry, including professional sport entertainment, amateur sport entertainment, for-profit sport participation, nonprofit sport participation, sporting goods, and sport services.

Notes
Open to non majors.
SPMT 241 - Practicum

Credits: 3
Paid or voluntary experience in sport industry setting. Work sites chosen by students after receiving approval of faculty supervisors.

Prerequisites
SPMT 201

Notes
Open to majors and minors only.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3

SPMT 302 - Sport and Ethics

Credits: 3
Investigates moral issues in sport and judgments about right and wrong behavior among athletes, coaches, spectators, and others.

Prerequisites
SPMT 201 and 60 hours or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 304 - Sport, Culture, and Society

Credits: 3
Analyzes sport from educational, political, economic, and cultural perspectives.

Prerequisites
PHED 200 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 318 - Gender and Racial Issues in Sport

Credits: 3
Investigates dominant gender and racial ideologies, and their influence on sport.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SPMT 320 - Psychology of Sport**

Credits: 3  
Psychological theories of personality, motivation, and anxiety explored in sport environment. Examines social-psychological research on audience effects, team cohesion, leadership, and fan behavior.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SPMT 321 - America Through Baseball**

Credits: 3  
This course is designed for the student to gain an understanding of the past and present role of baseball in American culture. The course focuses on the development of professional baseball over the past 160 years and the ways in which the history of America as a nation and culture can be "read" through baseball.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SPMT 322 - Football and American Culture**

Credits: 3  
Designed for the student to gain an understanding of the past and present role of football in American culture. Focuses on the development of college, professional and high school football over the past 120 years and contemporary issues in football culture are analyzed such as debates over facial symbols and mascots, the question of professionalizing division one college football, and tailgating and televisual football cultures.

**Hours of Lecture or Seminar per week:** 3

**SPMT 323 - America and the Modern Olympics**

Credits: 3  
This course is designed to provide students an understanding of the role played by the United States in the modern Olympic movement. The primary focus is on the United States relationship with the modern Olympics from the earliest days of the games up through the Cold War period and beyond.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**SPMT 405 - Sport Operation and Planning**
Credits: 3
Principles and techniques of planning and operating sport facilities. Emphasizes principles and concepts of organization and administration including communication, personnel management, management of physical resources, and risk management. Examines variety of sport operations such as indoor stadiums, athletic field complexes, and managing recreation and intramural activities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 412 - Sport Marketing and Finance

Credits: 3
Investigates principles and processes in sport marketing and finance. Focuses on research and development, sport promotion, sport sponsorship, advertising, merchandising, and distribution of sporting goods.

Prerequisites
SPMT 201 and PRLS 411, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 420 - Economics and Finance in the Sport Industry

Credits: 3
Examines the principles of economics, budgeting, and finance as it applies to the sport industry.

Prerequisites
Completion of 60 hours, including SPMT 201, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 430 - Sport Communication

Credits: 3
Provides a senior-level exploration of the role of sport communication in contemporary cultures. Readings and discussions address questions about how communication about/in sports highlights the importance of sports, the cultural identities of those who engage in sport communication, and the pervasiveness of sport communication practices in industry.

Prerequisites
60 hours, including SPMT 201, PHED 200, and the general education communication requirement, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPMT 440 - Global Perspectives in Sport

Credits: 3
An interdisciplinary examination of sport as a global phenomenon. Historical, cultural, economic, and governance perspectives are considered.

Prerequisites
60 hours, including SPMT 304, or permission of instructor

Hours of Lecture or Seminar per week: 3

SPMT 455 - Governance and Policy in Sport Organizations

Credits: 3
Examines sport organizations focused on both professional and amateur governance structures and processes. The study of policy in educational, nonprofit, and professional sport venues is also addressed.

Prerequisites
60 hours, including SPMT 201, or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 475 - Sport Management Professional Development Seminar

Credits: 3
This is a seminar format in which students synthesize and apply theories, concepts, and practices in the leadership and management of sport organizations.

Prerequisites
90 hours, including SPMT 241 and PHED 200, and a minimum of 40 hours in SRHT

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SPMT 480 - Special Topics in Sport Management

Credits: 3
See course description in the Schedule of Classes. Selected topics reflecting interest in specialized areas of sport management. Announced in advance.

Prerequisites
60 credits

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
SPMT 490 - Internship

Credits: 9-12
Paid or voluntary work experience in sport industry settings. Requires minimum period of 10 to 12 weeks of full-time employment. Applies course work, theories, and research to work settings. Work sites chosen by students after approval of faculty supervisors. Includes meetings and assignments before and during the internship.

Prerequisites
90 hours (pass/fail), HEAL 323, PHED 200, PRLS 410, SPMT 304, and SPMT 405

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 12

SPMT 499 - Independent Study

Credits: 1-3
Faculty-directed independent study of approved topics in sport management.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

SPMT 551 - Sport in the Global Marketplace

Credits: 3
Explores sport business internationally including the production and consumption of professional and Olympic-linked sports and the impact of globalization on sport.

Prerequisites
Graduate status or permission of instructor

Hours of Lecture or Seminar per week: 3

SPMT 555 - The Australian Model of Sport

Credits: 3
Examines the Australian model of sport which has been adopted in many countries. Analyzes government sport policy and the organization and administration of Australian professional sports.

Prerequisites
SPMT 551 or permission of instructor

Hours of Lecture or Seminar per week: 3
SPMT 556 - The Global Soccer Industry

Credits: 3
Explores the international soccer industry focusing on major professional leagues, international federations, international movement of players, the production of soccer equipment, legal and social issues.

Prerequisites
SPMT 551 or permission of instructor

Hours of Lecture or Seminar per week: 3

SPMT 611 - Sport Marketing and Sales

Credits: 3
Investigates principles and processes in sport marketing. Focuses on research and development, sport promotion, sport sponsorship, advertising, merchandising, and distribution of sporting goods.

Hours of Lecture or Seminar per week: 3

SPMT 612 - Economics and Financial Management in the Sport Industry

Credits: 3
Examines principles of economics, budgeting, and finance as they apply to the sport industry.

Hours of Lecture or Seminar per week: 3

SPMT 613 - Strategic Leadership in Sport Organizations

Credits: 3
Examines the theoretical underpinnings and effective strategic processes of leadership in sport organizations. Leader behaviors, characteristics, situational influences, and the cognitive dimensions of leadership will be explored within the organizational context.

Hours of Lecture or Seminar per week: 3

SPMT 614 - Legal Issues in Sport

Credits: 3
Examines legal issues as they apply to the sports industry. Course content includes, but is not limited to: tort law, risk management procedures, product liability, constitutional/contract/administrative/statutory law, crowd control/security, personal/professional values, and situational analysis.

Hours of Lecture or Seminar per week: 3
SPMT 616 - Sport Operations, Venues, and Event Management

Credits: 3
Examines administrative functions and operations, strategic planning, governance structures, policy development, and effective practices in the strategic management of sport programs, including managerial principles for venues and events.

SPMT 631 - Theoretical Models of Sport Coaching

Credits: 3
Examines the scientific bases for coaching athletes. Emphasizes philosophical underpinnings and theoretical foundations in the psychological, physiological, pedagogical, and managerial bases of sport coaching.

Hours of Lecture or Seminar per week: 3

SPMT 651 - Sport and International Development

Credits: 3
Explores the roles of sport in international development with focus on Africa, Asia, and Latin America. Non-governmental organizations (NGOs), international federations, professional leagues and grassroots initiatives will be examined.

Prerequisites
SPMT 551 or permission of instructor

Hours of Lecture or Seminar per week: 3

SPMT 652 - Governance and Policy in International Sport

Credits: 3
Explores sport governance and policy in the international context with focus on international federations, professional leagues and comparative analyses of governmental sporting policies.

Prerequisites
SPMT 551 or permission of instructor

Hours of Lecture or Seminar per week: 3

Statistics
STAT 250 - Introductory Statistics I

Credits: 3
Elementary introduction to statistics. Topics include descriptive statistics, probability, and estimation and hypothesis testing for means and proportions. Statistical software used for assignments.

Satisfies General Education Requirement: Quantitative reasoning

Prerequisites
High school algebra.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

STAT 344 - Probability and Statistics for Engineers and Scientists I

Credits: 3
Introduction to probability and statistics with applications to computer science, engineering, operations research, and information technology. Basic concepts of probability, random variables and expectation, Poisson process, bivariate distributions, sums of independent random variables, correlation and least squares estimation, central limit theorem, sampling distributions, maximum likelihood and unbiased estimators, confidence interval construction, and hypothesis testing.

Prerequisites
MATH 114 or MATH 116.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall, Spring, Summer

STAT 346 - Probability for Engineers

Credits: 3
Introduction to probability with applications to electrical and computer engineering, operations research, information technology, and economics. Basic concepts of probability, conditional probability, random variables and moments, specific probability distributions, multivariate distributions, moment-generating functions, limit theorems, and sampling distributions.

Prerequisites
MATH 213

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

STAT 350 - Introductory Statistics II
Credits: 3
Emphasis on applications. Topics include analysis of variance, multiple regression, and nonparametric inference. A statistical computer package is used for data analysis.

Prerequisites
STAT 250.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

STAT 354 - Probability and Statistics for Engineers and Scientists II

Credits: 3
Continuation of STAT 344. Multivariate probability distributions, variable transformations, regression, analysis of variance, contingency tables, and nonparametric methods. Applications to quality control, acceptance sampling, and reliability.

Prerequisites
STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

STAT 362 - Introduction to Computer Statistical Packages

Credits: 3
Use of computer packages in statistical analysis of data. Topics include data entry, checking, and manipulation, and use of computer statistical packages for regression and analysis of variance.

Prerequisites
STAT 250 or equivalent

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

STAT 435 - Analysis of Experimental Data Using SPSS

Credits: 3
Statistical methods for analysis of experimental data, including ANOVA and regression. Parametric and nonparametric inference methods appropriate for a variety of experimental designs are presented along with data analysis using SPSS. Intended primarily for researchers in the natural, social, and life sciences.

Prerequisites
STAT 250 or equivalent.
STAT 455 - Experimental Design

Credits: 3
Principles of analysis of variance and experimental design. Topics include computation and interpretation of analysis of variance; multiple comparisons; orthogonal contrasts; and design of experiments, including factorial, hierarchical, and split plot designs. Optional topics may include analysis of covariance; partial hierarchical designs; incomplete block designs; principles of blocking and confounding in 2**n experiments; or estimation of variance components. Computer statistical packages are used to perform computations.

Prerequisites
STAT 350 or 354, and STAT 362 or 501.

STAT 457 - Applied Nonparametric Statistics

Credits: 3
Introduction to nonparametric methods with applications to the decision and information sciences and operations analysis. Topics covered are testing and estimation for one- and two-sample problems, independent and paired samples, location and dispersion problems, one- and two-way layouts, tests for independence, regression, and discussion of efficiency.

Prerequisites
STAT 350 or 354, or equivalent.

STAT 463 - Introduction to Exploratory Data Analysis

Credits: 3
Introduction to modern exploratory data analysis techniques. Topics include graphical techniques, such as box plots, parallel coordinate plots, and other graphical devices, re-expression and transformation of data, order statistics, influence and leverage, and dimensionality reduction methods such as projection pursuit.

Prerequisites
STAT 350 or 354, or equivalent.
STAT 474 - Introduction to Survey Sampling

Credits: 3
Introduction to design and analysis of sample surveys. Sample designs include simple random sampling; systematic sampling; and stratified, cluster, and multistage sampling. Analytical methods include sample size determination, ratio and regression estimation, imputation for missing data, and nonsampling error adjustment. Practical problems encountered in conducting a survey are discussed. Methods applied to case studies of actual surveys. Class project may be required.

Prerequisites
STAT 346 and a course in Statistics, or STAT 344.

Notes
Recommended for students of decision, information, social sciences, and mathematics.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 498 - Independent Study in Statistics

Credits: 1-3
Directed self-study of special topics of current interest in statistics.

Prerequisites
60 undergraduate credits; must be arranged with instructor and approved by the department chair before registering.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

STAT 499 - Special Topics in Statistics

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 undergraduate credits and permission of instructor; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics substantially differ.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**STAT 501 - SAS Language and Basic Procedures**

Credits: 1  
Introduction to the SAS Data Step and Base SAS Procedures. Preparation for graduate students in use of SAS for other graduate courses offered by department. Topics include observation and variable structures, data interfaces, formats, functions, and procedures for summarizing and displaying data.

**Prerequisites**  
Course in statistics and experience with Microsoft OS.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**STAT 502 - Introduction to SAS/GRAPH**

Credits: 1  
Introduction to SAS/GRAPH. Continued preparation beyond STAT 501 for graduate students in the use of SAS for other graduate courses offered by department. Topics include SAS/GRAPH and SAS/GRAPH procedures, SAS/GRAPH output options and in-depth coverage of the GOPTIONS, GDEVICE, GCHART, GPLOT, and GSLIDE procedures.

**Prerequisites**  
Working knowledge of SAS.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**STAT 503 - SAS Macro Language**

Credits: 1  
Introduction to SAS Macro Language. Continued preparation beyond STAT 501 for graduate students in use of SAS for other graduate courses offered by department. Topics include macro language processing, macro variables, defining and calling macro variables, macro quoting, macro facility error messages, and examples of efficient code using macros.

**Prerequisites**  
Working knowledge of SAS.

**Hours of Lecture or Seminar per week:** 1  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**STAT 535 - Analysis of Experimental Data Using SPSS**

Credits: 3  
Statistical methods for analysis of experimental data, including ANOVA and regression. Parametric and nonparametric inference
methods appropriate for a variety of experimental designs are presented along with data analysis using SPSS. Intended primarily for researchers in the natural, social, and life sciences.

**Prerequisites**
STAT 250 or equivalent.

**Notes**
Can be used to satisfy requirements for certificates in federal statistics and biostatistics, but not MS in statistical science. Certificate program students granted credit for only one of STAT 535 or 554.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
- **When Offered:** F

---

**STAT 544 - Applied Probability**

Credits: 3
Course in probability with applications in computer science, engineering, operations research, and statistics. Random variables and expectation, multivariate and conditional distributions, conditional expectation, order statistics, transformations, moment generating functions, special distributions, limit theorems.

**Prerequisites**
MATH 213 and STAT 346, or permission of instructor.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
- **When Offered:** F, S

---

**STAT 554 - Applied Statistics**

Credits: 3
Application of basic statistical techniques. Focus is on the problem (data analysis) rather than on the theory. Topics include one- and two-sample tests and confidence intervals for means and medians, descriptive statistics, goodness-of-fit tests, one- and two-way ANOVA, simultaneous inference, testing variances, regression analysis, and categorical data analysis. Normal theory is introduced first with discussion of what happens when assumptions break down. Alternative robust and nonparametric techniques are presented.

**Prerequisites**
STAT 346 or permission of instructor.

**Notes**
Certificate program students granted credit for only one of STAT 535 or 554.

- **Hours of Lecture or Seminar per week:** 3
- **Hours of Lab or Studio per week:** 0
- **When Offered:** F, S
STAT 574 - Survey Sampling I

Credits: 3
Design and implementation of sample surveys. Covers components of a survey; probability sampling designs to include simple random, systematic, Bernoulli, proportional to size, stratified, cluster and two-stage sampling; and ratio and regression estimators. Discusses practical problems in conducting a survey. Methods applied to case studies of actual surveys. Class project required.

Prerequisites
STAT 346 and a course in Statistics, or STAT 344

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 634 - Case Studies in Data Analysis

Credits: 3
Examination of a wide variety of case studies illustrating data-driven model building and statistical analysis. With each case study, various methods of data management, data presentation, statistical analysis, and report writing are compared.

Prerequisites
STAT 554 and working knowledge of SAS, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: IR

STAT 645 - Stochastic Processes

Credits: 3
Selected applied probability models, including Poisson processes, discrete- and continuous-time Markov chains, renewal and regenerative processes, semi-Markov processes, queuing and inventory systems, reliability theory, and stochastic networks. Emphasis on applications in practice, as well as analytical models.

Equivalent to OR 645

Prerequisites
OR 542 or STAT 544, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 652 - Statistical Inference
Credits: 3
Fundamental principles of estimation and hypothesis testing. Topics include limiting distributions and stochastic convergence, sufficient statistics, exponential families, statistical decision theory and optimality for point estimation, Bayesian methods, maximum likelihood, asymptotic results, interval estimation, optimal tests of statistical hypotheses, and likelihood ratio tests.

Equivalent to CSI 672

Prerequisites
STAT 544 and STAT 554

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Spring

STAT 655 - Analysis of Variance

Credits: 3
Single and multifactor analysis of variance, planning sample sizes, introduction to the design of experiments, random block and Latin square designs, and analysis of covariance.

Prerequisites
STAT 544, STAT 554, and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AS

STAT 656 - Regression Analysis

Credits: 3
Simple and multiple linear regression, polynomial regression, general linear models, subset selection, step-wise regression, and model selection. Also covered are multicollinearity, diagnostics, and model building as well as the theory and practice of regression analysis.

Equivalent to CSI 676

Prerequisites
STAT 544, STAT 554, matrix algebra, and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
When Offered: Fall

STAT 657 - Nonparametric Statistics

Credits: 3
Distribution-free procedures for making inferences about one or more samples. Tests for lack of independence, association or trend, and monotone alternatives are included. Measures of association in bivariate samples and multiple classifications are
discussed. Both theory and applications are covered. Students are introduced to appropriate statistical software.

**Prerequisites**
STAT 544 and 554.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** AF

---

**STAT 658 - Time Series Analysis and Forecasting**

Credits: 3
Modeling stationary and nonstationary processes, autoregressive, moving average and mixed model processes, autocovariance functions, autocorrelation functions, partial autocorrelation functions, spectral density functions, identification of models, estimation of model parameters, and forecasting techniques.

Equivalent to CSI 678

**Prerequisites**
STAT 544 or equivalent.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** AF

---

**STAT 660 - Biostatistical Methods**

Credits: 3
Focuses on biostatistical aspects of design and analysis of biomedical studies, including epidemiologic observational studies and randomized clinical trials. Topics include randomization principle, confounding, ethics in human experimentation, methods of randomization, stratification, primary outcome analyses, covariate-adjusted analyses, epidemiologic measures, and sample size and power computation.

**Prerequisites**
STAT 554 or STAT 535 and a working knowledge of a statistical software package, such as SAS or SPSS.

**Hours of Lecture or Seminar per week:** 3
**Hours of Lab or Studio per week:** 0
**When Offered:** S

---

**STAT 662 - Multivariate Statistical Methods**

Credits: 3
Standard techniques of applied multivariate analysis. Topics include review of matrices, T square tests, principle components, multiple regression and general linear models, analysis of variance and covariance, multivariate ANOVA, canonical correlation, discriminant analysis, classification, factor analysis, clustering, and multidimensional scaling. Computer implementation via a statistical package is an integral part of the course.
Prerequisites
STAT 544, STAT 554, matrix algebra, and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AS

STAT 663 - Statistical Graphics and Data Exploration I

Credits: 3
Introduces statistical graphics that show distribution features and functional relationships in the presence of noise. Introduces cognitive research guidance for graphics design and reasoning. Stresses quantitative comparisons from multiple perspectives. Features new micromaps designs for spatial and temporal comparisons. Introduces R, the grammar of graphics, and dynamic graphics software.

Equivalent to CSI 773

Prerequisites
A 300-level statistics course and a programming course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

STAT 664 - Bayesian Inference and Decision Theory

Credits: 3
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach a statistics problem from the Bayesian perspective and how to combine data with informed expert judgment in a sound way to derive useful and policy-relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods, and practical procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to SYST 664/CSI 674

Prerequisites
STAT 544 or 554, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S
STAT 665 - Categorical Data Analysis

Credits: 3
Analyzes cross-classified categorical data in two and higher dimensions. Familiarity with the basic test for two-way contingency tables and elementary regression and analysis of variance as presented in STAT 554 is presumed. Topics include association tests and measures of association in two- and three-dimensional contingency tables, logistic regression, and log linear models. Computer statistical package used extensively for data analysis.

Prerequisites
STAT 656 and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AS

STAT 668 - Survival Analysis

Credits: 3
Survival Analysis is a class of statistical methods for studying the occurrence and timing of events. In medical research, the events may be deaths, and the objective is to determine factors affecting survival times of patients following treatment, usually in the setting of clinical trials. Methods can also be applied to the social and natural sciences and engineering where they are known by other names (reliability, event history analysis). Concepts of censored data, time-dependent variables, and survivor and hazard functions are central. Nonparametric methods for comparing two or more groups of survival data are studied. The Cox regression model (proportional hazards model), Weibull model, and the accelerated failure time model are studied in detail. Concepts are applied to analysis of real data from major medical studies using SAS software.

Prerequisites
STAT 544, STAT 554, and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AF

STAT 673 - Statistical Methods for Longitudinal Data Analysis

Credits: 3
Presents modern statistical approaches to the analysis of longitudinal data, i.e., data collected repeatedly on experimental units over time (or other conditions). Topics include linear mixed effects models, generalized linear models for correlated data (including generalized estimating equations), and computational issues and methods for fitting models.

Prerequisites
STAT 656 and working knowledge of SAS.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AS
STAT 674 - Survey Sampling II

Credits: 3
Continuation of STAT 574. Regression estimators for complex sampling designs, domain estimation, two-phase sampling, weighting adjustments for nonresponse, imputation, nonresponse models, measurement error models, introduction to variance estimation. Applications to case studies of actual surveys.

Prerequisites
STAT 574

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

STAT 719 - Computational Models of Probabilistic Reasoning

Credits: 3
Introduces theory and methods for building computationally efficient software agents that reason, act, and learn environments characterized by noisy and uncertain information. Covers methods based on graphical probability and decision models. Students study approaches to representing knowledge about uncertain phenomena, and planning and acting under uncertainty. Topics include knowledge engineering, exact and approximate inference in graphical models, learning in graphical models, temporal reasoning, planning, and decision making. Practical model building experience is provided. Students apply what they learn to semester-long project of their choosing.

Equivalent to OR 719/CSI 775

Prerequisites
STAT 652 or SYST/STAT 664, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 751 - Computational Statistics

Credits: 3
Covers basic computationally intensive statistical methods and related methods, which would not be feasible without modern computational resources. Covers nonparametric density estimation including kernel methods, orthogonal series methods and multivariate methods, recursive methods, cross validation, nonparametric regression, penalized smoothing splines, the jackknife and bootstrapping, computational aspects of exploratory methods including the grand tour, projection pursuit, alternating conditional expectations, and inverse regression methods.

Equivalent to CSI 771

Prerequisites
STAT 544, STAT 554, and STAT 652.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AF
STAT 758 - Advanced Time Series Analysis

Credits: 3
Mathematical modeling and methods for model identification and forecasting of nonstationary and seasonal time series data (ARIMA models), multivariate time series, and state-space models.

Prerequisites
STAT 658.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: IR

STAT 760 - Advanced Biostatistical Methods

Credits: 3
Advanced statistical methods in the drug development process. Provides the theoretical statistical basis for the design and analysis of pharmaceutical clinical trials. Topics include the theory of randomization, randomization-based inference, restricted, response-adaptive, and covariate-adaptive randomization, the modern theory of group sequential monitoring, statistical aspects of determination of dose-response relationships.

Prerequisites
STAT 544, STAT 652, working knowledge of statistical programming language.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AF

STAT 763 - Statistical Graphics and Data Exploration II

Credits: 3
Addresses data set size and human comprehension challenges. Introduces case and variable reduction methods, and overview production. Incorporates cognitive science guidance. Utilizes data mining models and visual analytic algorithms to find patterns and prioritize graphics. Addresses applications from both information and scientific visualization. Tracks advances in web graphics including citizen science projects harnessing the visual power of thousands of people.

Prerequisites
STAT 663 or permission of instructor.

Hours of Lecture or Seminar per week: 3
When Offered: S

STAT 781 - Data Mining and Knowledge Discovery
Credits: 3
Statistical and computational methods and systems for deriving user-oriented knowledge from large databases and other information sources, and applying knowledge to support decision making. Information sources can be in numerical, textual, visual, or multimedia forms. Covers theoretical and practical aspects of current methods and selected systems for data mining, knowledge discovery, and knowledge management, including those for text mining, multimedia mining and web mining.

Equivalent to SYST 781

Prerequisites
One of the following courses: CS 687, CS 650, INFS 614, STAT 663, STAT 664, or permission of instructor.

Notes
Content may vary from semester to semester.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

STAT 799 - Advanced Topics in Statistics

Credits: 1-6
Topics in statistics not covered in regular statistics sequence.

Prerequisites
Permission of instructor.

Notes
May be repeated for credit.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0
When Offered: IR

STAT 796 - Directed Reading and Research

Credits: 1-3
Reading and research on specific topic in statistics under direction of faculty member.

Prerequisites
Admission to PhD in Statistical Science Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

STAT 797 - Directed Reading and Research

Credits: 1-3
Reading and research on specific topic in statistics under direction of faculty member.
Prerequisites
Admission to PhD in Statistical Science Program.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

STAT 798 - Master's Essay

Credits: 3
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report.

Prerequisites
9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

STAT 799 - Master's Thesis

Credits: 3
Project chosen and completed under guidance of graduate faculty member that results in acceptable technical report and oral defense.

Prerequisites
9 graduate credits, and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

STAT 871 - Statistical Data Mining

Credits: 3
Covers basic concepts, computational complexity, data preparation and compression, databases and SQL, rule-based machine learning and probability, density estimation, exploratory data analysis, cluster analysis and pattern recognition, artificial neural networks, classification and regression trees, correlation and nonparametric regression, time series, and visual data mining.

Prerequisites
STAT 554 or 663, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: IR

STAT 876 - Measure and Linear Spaces
Credits: 3
Measure theory and integration; convergence theorems; theory of linear spaces and functional analysis; and probability theory. The theory of linear spaces includes normed linear spaces, inner product spaces, Banach and Hilbert spaces, Sobolev spaces, and reproducing kernels. Topics include wavelets, applications to stochastic processes, and nonparametric functional inference.

Equivalent to CSI 876

Prerequisites
STAT 544 and MATH 315.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: AF

STAT 877 - Geometric Methods in Statistics

Credits: 3
Develops foundations of geometric methods for statistics. Topics include n-dimension Euclidian geometry; projective geometry; differential geometry, including curves, surfaces, and n-dimensional differentiable manifolds; and computational geometry, including computation of convex hulls, tessellations of two-, three-, and n-dimensional spaces, and finite element grid generation. Examples include applications to scientific visualization.

Equivalent to CSI 877

Prerequisites
STAT 751 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: IR

STAT 971 - Probability Theory

Credits: 3
A rigorous measure-theoretic treatment of probability. Includes expectation, distributions, laws of large numbers and central limit theorems for independent random variables, characteristic function methods, conditional expectations, martingales, strong and weak convergence, and Markov chains.

Equivalent to CSI 971

Prerequisites
STAT 544 and MATH 315

Hours of Lecture or Seminar per week: 3
When Offered: Spring

STAT 972 - Mathematical Statistics I
Credits: 3
Focuses on theory of estimation. Includes method of moments, least squares, maximum likelihood, and maximum entropy methods. Details methods of minimum variance unbiased estimation. Topics include sufficiency and completeness of statistics, Fisher information, Cramer-Rao bounds, Bhattacharyya bounds, asymptotic consistency and distributions, statistical decision theory, minimax and Bayesian decision rules, and applications to engineering and scientific problems.

Equivalent to CSI 972

**Prerequisites**
STAT 652/CSI 672 or equivalent, and either STAT 876/CSI 876 or STAT 971.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**STAT 973 - Mathematical Statistics II**

Credits: 3
Continuation of STAT 972/CSI 972. Concentrates on theory of hypothesis testing. Topics include characterizing decision process, simple versus simple hypothesis tests, Neyman-Pearson Lemma, uniformly most powerful tests, unbiasedness and invariance of tests, and randomized and sequential tests. Applications of testing principles made to situations in normal distribution family and other families of distributions.

Equivalent to CSI 973

**Prerequisites**
STAT 972/CSI 972.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**STAT 998 - Doctoral Dissertation Proposal**

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

**Notes**
May be repeated. No more than 24 credits of STAT 998 and 999 may be applied to doctoral degree requirements.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 0

---

**STAT 999 - Doctoral Dissertation**

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member in statistics.
Prerequisites
Admission to candidacy.

Notes
May be repeated as needed; no more than 24 credits of STAT 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

Systems Engineering

SYST 101 - Understanding Systems Engineering
Credits: 3
Introduces systems engineering and curriculum for BS in field. Introduces large and small systems, and explains them through some hands-on experiences. Key concepts include understanding requirements for system and translation of system-level requirements to component-level requirements. Several different kinds of example systems presented and discussed: objectives, major components, how system works, and major design issues. Each student gives similar presentation on system of choice. Students working in groups design, develop, and test system, and give oral presentation. Students responsible for writing several short papers on curriculum and presentations they have heard.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

SYST 198 - Independent Study in Systems Engineering
Credits: 1-3
Must be arranged with instructor and approved by department chair before registering. Directed self-study of special topics of current interest in systems engineering.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
When Offered: F, S, SUM

SYST 210 - Systems Design
Credits: 3
Systems engineering design and integration process, development of functional, physical, and operational architectures.
Emphasizes requirements engineering, functional modeling for design, and formulation and analysis of physical design alternatives. Introduces methods, software tools for systems engineering design.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

**SYST 220 - Dynamical Systems I**

Credits: 3  
Introduces modeling of dynamical systems. Formulation of mathematical models from system descriptions, including computer, biological, economic, transportation, and mechanical systems. Analytical and numerical methods for solving models and studying their behavior. Discrete-time and continuous time systems. Linear and nonlinear systems. Introduction to computer modeling using MATLAB.

**Prerequisites**  
MATH 114 and PHYS 160

**Corequisite**  
MATH 214, MATH 203, and SYST 221.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

**SYST 221 - Systems Modeling Laboratory**

Credits: 1  
Companion laboratory to SYST 220. Emphasizes system design and analysis using computer modeling environment MATLAB. Simulation and numerical solutions of continuous dynamic systems. Use of built-in functions and construction of macros. Graphical presentation of results.

**Corequisite**  
SYST 220.

**Hours of Lecture or Seminar per week:** 0  
**Hours of Lab or Studio per week:** 3  
**When Offered:** S

**SYST 320 - Dynamical Systems II**

Credits: 3  
Continuation of SYST 220 with emphasis in continuous-time systems. Translational, rotational, and electrical systems. Block diagrams and state variable models. Systems analysis in time domain and frequency domain. Analysis of control systems.

**Prerequisites**  
SYST 220, MATH 203, 214; PHYS 260, 261.
SYST 330 - Systems Methods

Credits: 3
Analysis methods of system engineering design and management. Decision analysis, economic models and evaluation, optimization in design and operations, probability and statistical methods, queueing theory and analysis, management control techniques, reliability and maintainability analysis, and economic and life-cycle cost analysis. Laboratory exercise with different software programs included.

Prerequisites
MATH 114

Corequisite
STAT 344 and SYST 221.

SYST 335 - Discrete Systems Modeling and Simulation

Credits: 3
Introduces basic concepts of modeling complex discrete systems by computer simulation. Topics include Monte-Carlo methods, discrete-event modeling, specialized simulation software, and statistics of input and output analysis.

Equivalent to OR 335

Prerequisites
CS 112 or grade of C or better in IT 103 and STAT 344, or STAT 346, or MATH 351, or grade of C or better in STAT 250.

Corequisite
None.

SYST 371 - Systems Engineering Management

Credits: 3
Study of basics of systems engineering management. Includes engineering economics, planning, organizing, staffing, monitoring, and controlling process of designing, developing, and producing system to meet stated need in effective and efficient manner. Discusses management tools, processes, and procedures, including various engineering documentation templates, managerial...
processes, and dealing with personnel issues.

**Prerequisites**
SYST 210

**Corequisite**
SYST 330.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**SYST 420 - Network Analysis**

Credits: 3  
Network nomenclature. Elementary graph theory. Linear and nonlinear network models: multicommodity flow, mathematical games and equilibria on networks, network design and control; dynamic network models; applications to transportation, telecommunications, data communications, and water resource systems.

**Prerequisites**
OR 441 and MATH 213.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**SYST 421 - Classical Systems and Control Theory**

Credits: 3  

Equivalent to ECE 421

**Prerequisites**
Grade of C or better in ECE 220.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F, S, SUM

---

**SYST 460 - Introduction to Air Traffic Control**

Credits: 3  
Introduction to Air Traffic Control (ATC) for those who plan professions in the air transportation industry. Surveys the entire field, presenting the history of ATC and how it came to be as it is, the technology on which the system is based, the procedures
used by controllers to meet the safety and efficiency goals of the system, the organizational structure of the FAA, challenges facing the system, and means under investigation to meet these challenges. Some fieldwork will be required to acquire and analyze airport operational data. A brief introduction to airport design will be discussed.

**Prerequisites**
Senior standing or graduate standing

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**SYST 461 - Air Transportation System Engineering**

Credits: 3  
Focuses on the theory and practice of system engineering in a national air transportation system. Stresses the application of mathematical techniques to analyze and design complex network transportation systems, airports, airspace, airline schedules, and traffic flow.

**Prerequisites**  
SYST 460 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**SYST 465 - Pricing in Optimization and Game Theory**

Credits: 3  
Allocation of limited resources among competing activities to maximize the outcome or minimization of expenses required to produce a given assortment of goods and services are two typical problems faced by any economic institution. Mathematical modeling of such problems and finding efficient mathematical tools for solving them are two main goals of modern optimization theory. Pricing limited resources, goods, and services is the key instrument for theoretical analysis of complex economical systems. Pricing theory can also give rise to numerical methods for finding optimal solutions and economic equilibrium. Fundamental tools in pricing theory are the classical Lagrangian and Lagrange multipliers for constrained optimization. Covers the basic ideas and methods of linear programming and matrix games. Particular emphasis to pricing for both theoretical analysis and numerical methods.

Equivalent to ECON 496/MATH 493

**Prerequisites**  
MATH 203 or 216, and OR 441, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**SYST 469 - Human Computer Interaction**
Credits: 3
Covers principles of human-computer interaction, including information processing design, cognitive models, ergonomics, and
design metaphors. Students learn to evaluate interface design in terms of effectiveness, efficiency, and cost.

Prerequisites
IT/STAT 250, IT 108.

Notes
Students who receive credit for SYST 470 may not receive credit for this course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

SYST 470 - Human Factors Engineering

Credits: 3
Human information processing, inferential analysis, biases and heuristics in human information processing, support systems to
aid in human information processing, human-system interaction, and software systems engineering considerations.

Prerequisites
 SYST 210 and STAT 344.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: Fall

SYST 473 - Decision and Risk Analysis

Credits: 3
Studies analytic techniques for rational decision making that address uncertainty, conflicting objectives, and risk attitudes. Covers
modeling uncertainty; rational decision making principles; representing decision problems with value trees, decision trees, and
influence diagrams; solving value hierarchies, decision trees and influence diagrams; defining and calculating the value of
information; incorporating risk attitudes into the analysis; and conducting sensitivity analyses.

Prerequisites
 STAT 344 or STAT 346 or MATH 351 or grade of C or better in STAT 250

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 480 - Economic Systems Design I: Principles and Experiments

Credits: 3
Introduces design principles used in developing systems used to allocate resources. Students required to participate in experiment
demonstrations of different allocation mechanisms. Students are also exposed to experimental methods in economics and market
design.
Equivalent to ECON 440

**Prerequisites**
OR 441

**Corequisite**
SYST 465.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SYST 489 - Senior Seminar**

Credits: 3  
Introduces several important topics in systems engineering, providing additional experience in writing and giving presentations, and obtaining feedback on curriculum for BS in systems engineering. Several lectures devoted to ethics; writing and making presentations also covered. Students attend technical lectures and write paper. Students also required to write long paper on new technology. Instructor and guest lecturers present material not part of required course load to expand horizons. Examples are "knowledge-based" design, enterprise-wide reengineering, electronic commerce, and optimization by "natural analogy" (simulated annealing, neural networks, genetic algorithms). In addition, students work in teams to critique and redesign curriculum. Each group delivers written product, and provides at least one briefing to class. Best critique and redesign presented to faculty.

**Corequisite**
SYST 490.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

**SYST 490 - Senior Design Project I**

Credits: 3  
First part of capstone course in systems engineering program. Students apply knowledge they have gained to group project. During first semester, students perform concept definition and requirements analysis. Plan for carrying out project is developed, culminating in proposal presented to faculty at end of semester.

**Prerequisites**
Grade of C or better in SYST 335, grade of C or better in SYST 371, and 90 satisfactory credits toward BS in systems engineering.

**Corequisite**
SYST 320, SYST 470, SYST 473, and OR 441.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 1  
**When Offered:** F
SYST 491 - Industrial Project

Credits: 1-3
Semester-long work experience in systems engineering in industrial or governmental organization. Work supervised jointly by systems engineer from sponsoring organization and department faculty member. Project and arrangements for supervision must be approved by student's faculty advisor. Periodic reports, written final report, and presentation are required.

Prerequisites
75 credits toward BS in systems engineering; SYST 330; GPA of at least 3.00; must be arranged with instructor and approved by department faculty chair before registering.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3-9

SYST 495 - Senior Design Project II

Credits: 3
Second part of capstone course. Design project plans formulated in SYST 490 are reviewed and modified. Additional instruction on documentation and project management is given. Design project completed; formal report prepared, presented, and evaluated. Students are strongly recommended to take STAT 354 before enrolling in STST 490/495.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Grade of C or better in SYST 490.

Corequisite
SYST 330, STAT 354.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 2
When Offered: Spring

SYST 498 - Independent Study in Systems Engineering

Credits: 1-3
Directed self-study of special topics of current interest in systems engineering.

Prerequisites
60 credits toward BS in systems engineering, and GPA of at least 3.00; must be arranged with instructor and approved by department chair before registering.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 0
SYST 499 - Special Topics in Systems Engineering

Credits: 3
Topics of special interest to undergraduates.

Prerequisites
60 credits toward BS in systems engineering; specific prerequisites vary with nature of topic.

Notes
May be repeated for maximum 6 credits if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 500 - Quantitative Foundations for Systems Engineering

Credits: 3
Provides quantitative foundations necessary for core courses in systems engineering and operations research master's program, and certificate program in C4I. Topics include vectors and matrices, infinite series, partial differentiation, multiple integrals, differential and difference equations; linear systems; Laplace and Z-transforms, and probability theory. Students receive graduate credit for this course, which, when used on plan of study, extends minimum credit requirements for degree.

Equivalent to CSI 600

Prerequisites
MATH 203, 213.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

SYST 505 - Introduction to Systems Engineering

Credits: 3
Introduction to systems engineering with a focus on information technology systems. Emphasize development of analytical, technical, management, and teamwork skills through exercises in planning, documentation, presentation, and the creative process of IT engineering design. Use SysML as the language for analyzing and describing case studies in systems engineering. This course cannot be counted toward the MSSE degree or the PhD IT degree.

Notes
This course was taught to students in the MS/AIT program in Spring 2009 as SYST 659 Topics in Systems Engineering. The course will become part of the MS/AIT curriculum.

Hours of Lecture or Seminar per week: 3
SYST 510 - Systems Definition and Cost Modeling

Credits: 3
Comprehensive examination of methods and processes for the identification and representation of system requirements. Investigation of the systems acquisition life cycle with emphasis on requirements definition, including functional problem analysis. Examination of the systems engineering definition phase including requirements, problem analysis, definition, and functional economics. Specification of functional and nonfunctional requirements, and associated requirements proto-typing. Functional economic analysis, including the use of prevailing cost estimation models and planning and control of common operating environments. Lecture and group project including creation of requirements and use of cost estimation model.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

SYST 512 - Systems Engineering for Design and Development

Credits: 3

Prerequisites
SYST 510 or equivalent.

When Offered: Spring

SYST 513 - Total Systems Engineering, Reengineering and Enterprise Integration

Credits: 3
Principles of strategic quality, including TQM. Quality standards including ISO9000 and 14000. Organizational leadership, cultures, and process maturity, reengineering. Quality, organization learning, and reengineering approaches to enable information integration and management and environment and framework integration in the systems engineering of knowledge intensive systems. Emphasis is placed on the role of integrated product and process design teams, standard and commercial off-the-shelf products in enterprise integration. Architecture-driven system characteristics are studied, as is transition management of legacy systems.

Prerequisites
SYST 510 or 520.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
**SYST 520 - System Engineering Design**

Credits: 3
System design and integration methods are studied and practiced, including structured analysis and object-oriented based techniques. Life cycle of systems is addressed, including definition and analysis of life cycle requirements. Software tools are introduced and used for the systems engineering cycle. Identification of preliminary architectures. Students are expected to develop a system design for a system of their choice using both the structured analysis and object-oriented techniques presented in class and they will make presentations on these designs.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F, S

**SYST 521 - Network Analysis**

Credits: 3

Equivalent to OR 643

**Prerequisites**
MATH 213 and 203 or equivalent; OR 441 or 541.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

**SYST 530 - System Management and Evaluation**

Credits: 3
Provides techniques for evaluating cost and operational effectiveness of system designs and systems management strategies. Discusses performance measurement, work breakdown structures, cost estimating, quality management, configuration management, standards, and case studies of systems from different application areas.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F, S
SYST 540 - Analysis for Systems Management

Credits: 3
Operations research techniques and their application to managerial decision making. Mathematical programming, Markov processes, queueing theory, inventory models, PERT, CPM, and computer simulation are covered, as well as use of contemporary computer software for problem solving. Case-study approach to problem solving is used.

Equivalent to OR 540

Prerequisites
MATH 108 and STAT 250 or DESC 210; or equivalent.

Notes
Students who have taken OR 541 or OR 542 and OR MS majors do not receive credit.

SYST 542 - Decision Support Systems Engineering

Credits: 3
Studies design of computerized systems to support individual or organizational decisions. Teaches systems engineering approach to decision support system (DSS) development. DSS is end product of development process, and process is key to successfully integrating DSS into organization. Any DSS is built on a theory (usually implicit) of what makes for successful decision support in given context. Empirical evaluation of specific DSS and the underlying theory should be carried on throughout development process. Course examines prevailing theories of decision support, considers issues in obtaining empirical validation for theory, and discusses empirical support that exists for theories considered. Students design decision support system for semester project.

Equivalent to EEP 602

Prerequisites
SYST 301 or graduate standing.

SYST 560 - Introduction to Air Traffic Control

Credits: 3
Introduction for those who plan professions in aviation industry. Surveys entire field, presenting history of ATC and how it came to be, technology on which system is based, procedures used by controllers to meet safety and efficiency goals, organizational structure of the FAA, challenges facing system, and means under investigation to meet these challenges. Involves some field work for data collection and analysis. Class project requiring system simulation required.

Prerequisites
Graduate standing.
SYST 563 - Research Methods in Systems Engineering and Information Technology

Credits: 3
Provides foundation for one of the most important activities in systems engineering: information gathering to support drawing conclusions and making decisions about design options and process improvements. Develops understanding of scientific process, use of empirical evidence to support and refute scientific hypotheses, and use of scientific information in decision-making. Covers different sources of scientific evidence: designed experiments, quasi-experiments, field studies, surveys, and case studies. Discusses process of formulating testable hypotheses, and methods of measurement including approaches to measuring soft, hard-to-quantify factors. Presentation of results is discussed. Students do project involving empirical research.

Prerequisites
STAT 344 and 354, or equivalent.

SYST 571 - Systems Engineering Management

Credits: 3
Study of more advanced topics in systems engineering management. Seminar style; students expected to read selections from current literature as well as make presentations and produce papers on engineering management topics. Examines issues such as multiproject management, quality programs, and the impacts of process change on the organization. Focuses strongly on the practical impacts of various system engineering management techniques and practices on projects, organizations, and personnel.

Prerequisites
SYST 471 or 530.

SYST 573 - Decision and Risk Analysis

Credits: 3
Study of analytic techniques for rational decision making that address uncertainty, conflicting objectives, and risk attitudes. Covers modeling uncertainty; rational decision-making principles; representing decision problems with value trees, decision trees, and influence diagrams; solving value hierarchies, decision trees, and influence diagrams; defining and calculating the value of information; incorporating risk attitudes into the analysis; and conducting sensitivity analysis.

Prerequisites
STAT 346 or equivalent.
Notes
Offered concurrently with SYST 473. Students may not receive credit for both SYST 473 and 573.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

SYST 574 - Quality Control and Process Management

Credits: 3
Provides fundamentals of quality control and process management methodologies that are applicable in manufacturing industries. Introduces the basic concepts of engineering process and product quality management techniques. Provides exposition of fundamentals of lean Six Sigma and total quality management and maintainability.

Equivalent to OR 574

Prerequisites
Graduate standing or permission of instructor.

SYST 576 - Manufacturing Systems Analysis

Credits: 3
Provides fundamentals of modeling and analysis of general manufacturing systems that are also applicable to semiconductor manufacturing. Introduces the basic concepts of scheduling, inventory control, and enterprise resource management.

Equivalent to OR 576

Prerequisites
Graduate standing or permission of instructor.

SYST 611 - System Methodology and Modeling

Credits: 3
Provides broad yet rigorous introduction to methodologies. Emphasizes systems modeling and performance. Topics include system model and behavior analysis linear and nonlinear systems, discretization and linearization, optimization, dynamic programming and optimal control. Methodologies address system performance issues, and assist in the evaluation of alternative system designs. Resource allocation for planning and control introduced.

Prerequisites
SYST 500 or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S
**SYST 619 - Introduction to Architecture Based Systems Engineering**

Credits: 3  

Equivalent to ECE 672

**Prerequisites**
SYST 510 or 520, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SYST 620 - Discrete Event Systems**

Credits: 3  
Introduces modeling and analysis of discrete event dynamical systems. Course covers elements of discrete mathematics and then focuses on Petri Net models and their basic properties. Relation to other discrete event models of dynamical systems.

Equivalent to ECE 673

**Prerequisites**
SYST 611 or ECE 521, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**SYST 621 - Systems Architecture Design**

Credits: 3  
Intensive study of relationships between different types of architecture representations and methodologies used to obtain them. Approaches based on systems engineering constructs, such as structured analysis and software engineering constructs, including object orientation, are used to develop architecture representations or views and to derive an executable model of the information architecture. Executable model is then used for behavior analysis and performance evaluation. Roles of systems architect and systems engineer are discussed. Examples from current practice including the C4ISR architectures are used.

Equivalent to ECE 674

**Prerequisites**
SYST 619/ECE 672 and SYST 620/ECE 673 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SYST 622 - System Integration and Architecture Evaluation.

Credits: 3

Equivalent to ECE 675

Prerequisites
SYST 620/ECE 673 and SYST 621/ECE 674 or permission of instructor.

Corequisite
SYST 621/ECE 674.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 631 - Systems Engineering of Information Architectures

Credits: 3
An intensive study of the relationships between different types of architecture representations and the methodologies used to obtain them. Approaches based on systems and software engineering constructs, such as object orientation and structured analysis are used to develop architecture representations or views. The roles of the systems architect and the systems engineer are discussed. The function of executable model of the information architecture in deriving requirements is presented. Examples from current practice including C4ISR architectures are included.

Equivalent to ECE 678

Prerequisites
SYST 520 and SYST 619/ECE 672.

Notes
This course does not meet the requirements for the MS/SE degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 632 - System Integration and Architecture Evaluation

Credits: 3

Equivalent to ECE 679

Prerequisites
SYST 631/ECE 678.
Notes
This course does not meet the requirements for the MS SE degree.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 659 - Topics in Systems Engineering

Credits: 3
Topics not covered in department's regular systems engineering offerings. Course content may vary each semester depending on instructor and the perception of students' needs.

Prerequisites
Permission of instructor.

Notes
Course may be repeated once for credit.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F, S

SYST 660 - Air Transportation Systems Modeling

Credits: 3
Introduces wide range of current issues in air transportation. Issues include public policy toward industry, industry economics, system capacity, current system modeling capability, human factors considerations, safety analysis and surveillance systems, and new technological developments. Develops broad understanding of contemporary and future issues. Knowledge evaluated through class discussions, take-home midterm exam, and term project to be completed by end of semester.

Equivalent to OR 660

Prerequisites
SYST 460/560 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: S

SYST 664 - Bayesian Inference and Decision Theory

Credits: 3
Introduces decision theory and relationship to Bayesian statistical inference. Teaches commonalities, differences between Bayesian and frequentist approaches to statistical inference, how to approach statistics problem from Bayesian perspective, and how to combine data with informed expert judgment in a sound way to derive useful and policy relevant conclusions. Teaches necessary theory to develop firm understanding of when and how to apply Bayesian and frequentist methods; and practical
procedures for inference, hypothesis testing, and developing statistical models for phenomena. Teaches fundamentals of Bayesian theory of inference, including probability as a representation for degrees of belief, likelihood principle, use of Bayes Rule to revise beliefs based on evidence, conjugate prior distributions for common statistical models, and methods for approximating the posterior distribution. Introduces graphical models for constructing complex probability and decision models from modular components.

Equivalent to STAT 664 and CSI 674

**Prerequisites**
STAT 544 or 554, or equivalent.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** S

---

**SYST 671 - Judgment and Choice Processing and Decision Making**

Credits: 3  
How do people make judgments and decisions? Course presents initial review of scientific literature directed toward answering this question, and emphasizes importance when performing decision analysis and designing systems to support judgment and decision processes.

Equivalent to OR 671

**Prerequisites**
STAT 510 or equivalent, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F

---

**SYST 674 - Dynamic Programming**

Credits: 3  
Theory and practice of dynamic programming, i.e., optimal sequential decision making over time in the presence of uncertainties is covered. Stresses intuition, the mathematical foundations being for the most part elementary. It will introduce the theory, applications (finance, engineering, and biology), and computational aspects of dynamic programming for deterministic and stochastic problems.

Equivalent to OR 674

**Prerequisites**
OR 442 or OR 542 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
SYST 675 - Reliability Analysis

Credits: 3
Introduction to component and system reliability, their relationship, and problems of inference. Topics include component lifetime distributions and hazard functions, parameter estimation and hypothesis testing, life testing, accelerated life testing, system structural functions, and system maintainability.

Prerequisites
OR 675/STAT 654

SYST 677 - Statistical Process Control

Credits: 3
Introduces concepts of quality control and reliability. Acceptance sampling, control charts, and economic design of quality control systems are discussed, as are system reliability, fault-free analysis, life testing, repairable systems, and role of reliability, quality control, and maintainability in life-cycle costing. Role of MIL and ANSI standards in reliability and quality programs considered.

Equivalent to OR 677/STAT 677

Prerequisites
STAT 554 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 680 - Principles of Command, Control, Communications, Computing, and Intelligence (C4I)

Credits: 3
Broad introduction to fundamental principles of command, control, communications, computers, and intelligence (C4I). Principles and techniques applicable to wide range of civilian and military situations. Discusses modeling and simulation of combat operations. Studies in detail sensing, fusion, and situation assessment processes. Derives optimal decision-making rules; discusses concepts of C4 architectures; and develops tools to evaluate and design C4 systems such as queuing theory.

Equivalent to ECE 670/OR 683

Prerequisites
ECE 528, SYST 611, or OR 542; or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
When Offered: F

SYST 683 - Modeling, Simulation, and Gaming
Develops methods for designing combat models and games. Existing combat models critical to the C4I process. Exercises and games demonstrate value of properly developed C4I modules in a combat simulation.

**Prerequisites**
MATH 213, SYST 500 or equivalent, and graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SYST 684 - Sensor Data Fusion**

Credits: 3  
Examines design issues in multisensor fusion systems. Studies use of probability, evidence, and possibility theories for object identification. Studies Bayesian networks, blackboard architectures, and spatial and temporal reasoning for situation assessment.

**Prerequisites**
SYST 680 or ECE 670.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**SYST 698 - Independent Study and Research**

Credits: 3  
Study of a selected area in systems engineering or C3I under the supervision of a faculty member. Written report required.

**Prerequisites**
Graduate standing, completion of at least two core courses, permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0  
**When Offered:** F, S, SUM

**SYST 735 - Advanced Stochastic Simulation**

Credits: 3  
Special topics and recent developments in Monte Carlo simulation methodology for discrete-event stochastic systems. Contents vary; possible topics include statistical analysis of simulation output data, random number and random variate generation, variance reduction techniques, sensitivity analysis and optimization of simulation models, distributed and parallel simulation, object-oriented simulation, and specialized applications.

Equivalent to OR 735

**Prerequisites**
OR 635 or permission of instructor.
Notes
May be repeated for credit when topics are distinctly different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 760 - Special Topics in Command, Control, Communications, Computing, and Intelligence Systems Engineering

Credits: 3
Special topics in the C4I area, with different content in different terms. Representative areas include quantitative evaluation of C4 systems, applications of artificial intelligence in C4 systems, and military communications systems.

Prerequisites
SYST 680.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 763 - Research Methods in Systems Engineering and Information Technology

Credits: 3
Examines alternative paradigms of scientific research and their applicability to research in information technology. Topics include fundamental elements of scientific investigation, basic principles of experimental design and statistical induction, philosophy of science and its relation to the information technology sciences, and case studies of information technology research.

Equivalent to IT 763/OR 763

Prerequisites
STAT 554.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 781 - Data Mining and Knowledge Discovery

Credits: 3
Statistical and computational methods and systems for deriving user-oriented knowledge from large databases and other information sources, and applying knowledge to support decision making. Information sources can be in numerical, textual, visual, or multimedia forms. Covers theoretical and practical aspects of current methods and selected systems for data mining, knowledge discovery, and knowledge management, including those for text mining, multimedia mining, and web mining.

Equivalent to STAT 781

Prerequisites
One of the following courses: CS 687, CS 650, INFS 614, STAT 663, STAT 664, or permission of the instructor.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 798 - Systems Engineering Project

Credits: 3
Capstone project course for MS/SE program. Key activity is completion of major applied team project resulting in an acceptable technical report, and oral briefing. Students should plan to take course in last semester of studies.

Prerequisites
21 graduate credits, including SYST 611.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SYST 799 - Master's Thesis

Credits: 1-6
Research project chosen and completed under the guidance of a graduate faculty member, which results in a technical report acceptable to a three-member faculty committee, and an oral defense.

Prerequisites
21 graduate credits and permission of instructor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SYST 842 - Models of Probabilistic Reasoning

Credits: 3
Survey of alternative views about how incomplete, inconclusive, and possibly unreliable evidence might be evaluated and combined. Discusses Bayesian, Baconian, Shafer-Dempster, and Fuzzy systems for probabilistic reasoning.

Equivalent to IT 842/OR 842

Prerequisites
STAT 544 or OR 681, or permission of the instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 850 - Topics in Systems Integration Engineering
Credits: 3
Covers lifecycles; large systems comprising heterogeneous components; human, organizational, and technological basis for integration; societal and cultural basis; conceptual frameworks; structure, function, and purpose of industry; risk management; user requirements and functional specifications; bid and proposal process; systems integration and federal government; standards; integration of systems and federations of systems; integrated process and product development; architectures; systems management and cost estimation; reengineering; quality management; increasing returns to scale, network effects, and path dependency issues; and systems integration ecology and evolutionary systems integration

Prerequisites
SYST 510 or 520.

Notes
May be repeatable for a maximum of six credits within the degree if topics are substantially different.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 888 - Distributed Estimation and Multisensor Tracking and Fusion

Credits: 3
Centralized and distributed estimation theory, hierarchical estimation, tracking and data association, multisensor multitarget tracking and fusion, distributed tracking in distributed sensor networks, track-to-track association and fusion, and Bayesian networks for fusion.

Equivalent to ECE 753/IT 888/OR 888

Prerequisites
ECE 734 or SYST 611.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

SYST 944 - The Process of Discovery and Its Enhancement in Engineering Applications

Credits: 3
Studies ingredients of imaginative reasoning as they concern efficient discovery of new ideas and valid evidential test of them. Topics include different interpretations of Peirce's theory of abductive reasoning and other forms of reasoning, Hintikka's analysis of process of inquiry, and current attempts to design systems that provide assistance in discovery-related or investigative activities.

Equivalent to OR 944/ IT 944

Prerequisites
SYST 842 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
Systems Engineering and Operations Research

SEOR 796 - Directed Reading and Research

Credits: 1-3
Reading and research on specific topic in systems engineering or operations research under direction of faculty member.

SEOR 998 - Doctoral Dissertation Proposal

Credits: 1-12
Work on research proposal that forms basis for doctoral dissertation.

Notes
May be repeated. No more than 24 credits of SEOR 998 and 999 may be applied to doctoral degree requirements.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

SEOR 999 - Doctoral Dissertation

Credits: 1-12
Formal record of commitment to doctoral dissertation research under direction of faculty member approved by SEOR Department.

Prerequisites
Admission to doctoral candidacy.

Notes
May be repeated as needed.

Taxation

TAX 700 - Federal Income Taxation

Credits: 3
Federal income tax concepts and procedures related to individual taxpayers and business entities. Emphasis on research and planning based on the Internal Revenue Code, Treasury Regulations, and administrative and judicial sources of tax law.
Prerequisites
Graduate degree status

Hours of Lecture or Seminar per week: 3

TAX 701 - Accounting Methods and Periods

Credits: 1.5
Tax accounting methods including the cash and accrual methods, inventory accounting, installment sales, accounting changes, and various book-tax difference. The accounting periods are also studied.

Prerequisites
Graduate degree status

Corequisite
TAX 700

Hours of Lecture or Seminar per week: 1.5

TAX 702 - Tax Practice and Procedures

Credits: 1.5
Professional responsibilities and ethics, tax research, tax penalties, practice before the IRS, tax policy, and other issues.

Prerequisites
Graduate degree status

Corequisite
TAX 700

Hours of Lecture or Seminar per week: 1.5

TAX 703 - Corporate Taxation

Credits: 3
Concepts and principles that relate to federal income taxation of corporations and their shareholders. Emphasis on research of fact situations. Coverage includes the organization and capitalization of a corporation, nonliquidated and liquidated distributions, penalty taxes, collapsible corporations, and determinants of the income tax base of corporations.

Prerequisites
Graduate degree status

Corequisite
TAX 700

Hours of Lecture or Seminar per week: 3
TAX 704 - Corporate Mergers and Acquisitions

Credits: 1.5
Introduces taxable and tax-deferred methods of combining, dividing, and recapitalizing existing corporations. Analyzes the effects on the corporation(s), its attributes, and its shareholders.

Prerequisites
TAX 703

Hours of Lecture or Seminar per week: 1.5

TAX 705 - Affiliated Corporations

Credits: 1.5
Studies consolidated tax return regulations and filing requirements for affiliated corporations.

Prerequisites
TAX 703

Hours of Lecture or Seminar per week: 1.5

TAX 706 - Partnership Taxation

Credits: 3
Major aspects of taxation affecting partners and partnerships. Emphasis on tax planning and detailed study of the Internal Revenue Code, Treasury Regulations, and case law governing these areas.

Prerequisites
Graduate degree status

Corequisite
TAX 700

Hours of Lecture or Seminar per week: 3

TAX 710 - Federal Estate and Gift Taxation

Credits: 3
Concepts and principles that relate to federal estate and gift taxation and the federal income taxation of estates, trusts, and beneficiaries. Emphasis on estate tax planning and a detailed study of the Internal Revenue Code, Treasury Regulations, and case law governing these areas.

Prerequisites
TAX 700
Hours of Lecture or Seminar per week: 3

TAX 711 - International Taxation

Credits: 3
Taxation of individuals and corporations with foreign-source income and tax liability to the United States.

Prerequisites
TAX 700

Hours of Lecture or Seminar per week: 3

TAX 712 - Seminar in Advanced Tax Policies

Credits: 3
Selective analysis of current tax topics addressing important issues in contemporary tax practice. Discussion of two or three major topics. Consult the Schedule of Classes. Course may be repeated for credit with different topics.

Prerequisites
TAX 700

Hours of Lecture or Seminar per week: 3

TAX 713 - State and Local Taxation

Credits: 3
Detailed analysis of the principal forms of state and local taxation.

Prerequisites
TAX 700

Hours of Lecture or Seminar per week: 3

TAX 714 - Pensions and Deferred Compensation

Credits: 3
Analysis of the structure, operation, and requirements for obtaining and maintaining IRS approval of tax-qualified pensions, profit sharing, and deferred compensation plans.

Prerequisites
TAX 700

Hours of Lecture or Seminar per week: 3
TAX 792 - Management of Professional Service Organizations

Credits: 3
This course addresses the management of the modern professional services organizations with special emphasis on the strategic, marketing, human resources, risk management, and ethical and technological issues vital to management.

Prerequisites
Admission to the MS Tax program or permission of the director. Completion of 18 hours of MSA or MST required coursework.

Hours of Lab or Studio per week: 3

Technology Management

TECM 610 - Communications and Leadership

Credits: 2
Distinguishes between leadership and management, and focuses on the critical roles and functions of leadership, including communication ability, use of power and influence, providing direction, aligning an organization's systems, motivating a workforce, and creating a culture for effectiveness. It also focuses on strategies for developing oneself as an effective leader.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 615 - Decision Making Using Accounting and Financial Data

Credits: 3
Provides managers with an overview of the purpose and importance of accounting within the organization and the financial valuation of information technology companies, projects, and product line. Students focus on the economics and analysis of business transactions and their related financial reporting issues from internal and external stakeholder perspectives. Students improve their skills in analyzing financial issues and presenting results in a case analysis framework.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TECM 620 - Economics of Technology Management
Credits: 2-3
Enables students to build and evaluate economic and business models that can be used to analyze real managerial questions that affect all types of institutions, especially firms in the information technology industry. Students develop a better understanding of the operation of markets in general and the use of various quantitative and qualitative methods when making decisions within the firm. The use of economic analysis allows students to identify and evaluate decision alternatives, the competitive environments of firms, and the factors that influence firm performance, especially in the information technology industry.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 635 - Metrics and Statistics for Quality and Project Management

Credits: 2-3
Explores current metrics and metric development for quality, intangible assets, and project management as required within information technology companies. Applies statistical tools of best use with these metrics.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 640 - Management of Consulting and Technical Professionals

Credits: 3
Students gain insight into conflict resolution, teamwork, communication, power and influence, career development, and ethics. Helps students understand themselves and those they manage, as they work to be as effective as possible in modern organizations.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 3

TECM 660 - Negotiation, Conflict Resolution, and Group Decision Making

Credits: 2-3
Techniques for making group decisions and resolving internal team conflicts, as well as negotiating effectively with outside parties. Applications include technology assessments, outsourcing decisions, project bidding, and contract negotiations.

Prerequisites
Admission to Technology Management Program.
**TECM 700 - Business Engineering and Change Management**

Credits: 2
Visualizing, planning, and implementing transitions in an organization or business unit is fast becoming a key source of competitive advantage. Course provides theory and practice of change management and strategic planning including organizational development and organizational transformation.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 2  
**Hours of Lab or Studio per week:** 0

**TECM 702 - Interpersonal Dynamics and Teamwork**

Credits: 3
Develops behavioral skills integral to effective teamwork and interpersonal relationships in work environments. Covers techniques for making group decisions and resolving internal team conflicts, as well as negotiating effectively with outside parties.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TECM 703 - Technology Assessment, Evaluation, and Investment**

Credits: 3
Prepares students to be educated consumers of information technology to maximize strategic advantage of IT to an organization. Information technologies, architectures, and products are categorized and analyzed with a view to develop and maintain the most favorable IT asset portfolio to successfully carry out business goals and strategies. Techniques for making group technology assessments, outsourcing decisions, project bidding, and contract negotiations.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TECM 704 - Planning and Control of Projects**
Credits: 3
Examines advanced topics in project and program management, with specific attention to the issues that managers face to effectively manage programs. This involves managing resources (both internal and external to the organization) and managing within an existing organizational structure. Specific program management topics include advanced topics for project management, program alignment with strategic objective, management of stakeholders, and development and organization of the program office. Strategic and operational tools and metrics also are discussed.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TECM 720 - Analysis of IT Industries

Credits: 2-4
Provides students with an understanding of the impact of information technology on firms and industries and equips them to develop and execute appropriate strategies. Although the emphasis is on information technology firms and industries, a key goal of the course is to better prepare students to respond to a diverse array of information technology challenges. Course work covers the demand and the supply side of information technology, as well as the development of frameworks and analytical tools to help put events, behaviors, and processes into understandable contexts.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

TECM 735 - Technology Management Capstone Project

Credits: 2
Teams undertake a strategic evaluation and plan for IT-driven business initiatives. Presentation includes analysis of competitive forces and the value chain; recommendations, including changes in goals and organizational design; plan of action integrating marketing, human resource development, organizational design, finance, and information technology; and implementation plan using theories of communication and change management, to include business case and business plan.

Prerequisites
Admission to Technology Management Program.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0
Grading: Special graduate.

TECM 740 - Management of Client Relationships

Credits: 2-4
Proposal development, bidding, legal issues of contracts and agreements, formation of commercial partnerships, and new
business development. Methods and practices for conducting client need assessment and managing deviations of scope. Application of principles of marketing information systems and technology to internal and external customers.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TECM 745 - Business Functions and Operations: Client Industries**

Credits: 3  
Explores best practices in the IT industry. Students analyze practices in terms of gaining competitive advantage in an industry where the scarcity economic model for products no longer applies. Course work focuses on leading an organization with the IT function.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TECM 750 - Global IT Management**

Credits: 2-4  
Students spend a week in an international residency. Emphasizes dealing with technological changes across international markets and amid global developments, virtual organizations, and project management across cultures. Corporate site visits combined with presentations by professors from universities outside the United States and relevant practitioners.

**Prerequisites**
Admission to Technology Management Program.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**Telecommunications**

**TCOM 500 - Modern Telecommunications**

Credits: 3  
Comprehensive overview of telecommunications, including current status and future directions. Topics include review of evolution of telecommunications; voice and data services; basics of signals and noise, digital transmission, network architecture and protocols; local area, metropolitan and wide area networks and narrow band ISDN; asynchronous transfer mode and
broadband ISDN; and satellite systems, optical communications, cellular radio, personal communication systems, and multimedia services. Examples of real-life networks illustrate basic concepts and offer further insight.

Equivalent to ECE 540

Prerequisites
TCOM 575, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 501 - Data Communications and Local Area Networks

Credits: 1.5
Network concepts; Open Systems Interconnection (OSI) reference model and layering; data coding; analog/digital communications review; physical layer and data link control; switching and multiplexing; commercial digital link standards; Data Link Layer Control (DLC) functions. DLC protocols; flow control; error control; link management; common link protocols. Local area networks (LANs); basics, definitions, media access control; LAN performance; LAN standards, rings and buses; bridging and frame relay.

Prerequisites
Graduate standing

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 502 - Wide Area Networks and Internet

Credits: 1.5
OSI reference model review; packet network layer functions; connection-oriented and connectionless packet switching; X.25 and X.75 standards; SONET and Packet-over SONET; circuit-switched networks and control signaling; congestion control and traffic management; virtual private networks; introduction to network management; routing methods; Internet working; introduction to Internet protocol concepts; OSI transport layer clientserver model; domain name systems; and telnet.

Prerequisites
Graduate standing

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 503 - Fiber Optic Communications

Credits: 1.5
Introduction and overview of optical fiber communications systems. Course covers basic elements of fiber optic networks: semiconductor light sources (light emitting diodes and laser diodes), fiber optic waveguides, network system design issues, link budget analysis, and component requirements. Additional topics may include wave length division multiplexed and Time-Division Multiplexed networks and optical switching systems.
Prerequisites
TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 504 - Asynchronous Transfer Mode Networks

Credits: 1.5
Asynchronous Transfer Mode (ATM) concept, protocols, services, and applications. The emphasis is on the standards and technology of ATM for local and wide area networks. Relation to broadband ISDN; ATM switching, multiplexing and transport; user-network and network-network interface aspects; ATM Adaptation layer; access switching; ATM wide area network switches; design and practice of networks based on ATM technology.

Prerequisites
TCOM 500, 501, 502, or equivalent.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 505 - Networked Multicomputer Systems

Credits: 1.5
Introduces systems engineering of a networked multicomputer system. Studies distributed multicomputer architectures, architecture of a network operating system, and key system components. The focus of this course is on the development of a thin client/server system, requirements analysis of a client/server web computing, system planning and implementation. Includes a study of example multicomputer systems and a discussion of future directions.

Prerequisites
TCOM 500, 501, or equivalent.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 506 - Personal Communication Systems (PCS)

Credits: 1.5
Introduces Personal Communication Systems (PCS). Topics include multiple technical layers of the PCS systems; data link level and network layer protocols, including implementation; mobile station operation and base station operation; and how voice and data services work. Also discusses vital issues of user authentication, privacy, and data or voice encryption.

Prerequisites
TCOM 500, 501, 551, and 552 or equivalent.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0
TCOM 509 - Internet Protocols

Credits: 1.5
The Internet Protocol (IP) Suite: principles, protocols, and architecture; Internet working: Internet addressing; IP; routing protocols (RIP, OSPF, BGP); Internet Control Message Protocol; Internet Group Management Protocol; User Datagram Protocol; Transmission Control Protocol; Client-Server Model; Domain Name System; Socket Interface; Internet applications (TELNET, FTP, SNMP, HTTP); Internet security; Internet multicasting; quality-of-service in the Internet (RSVP, DiffServ, MPLS); Mobile IP; Next Generation Internet (Ipv6)

Prerequisites
TCOM 501 and 502

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 510 - Client-Server Architectures and Applications

Credits: 1.5
Fundamentals of application engineering for Client/Server (C/S) Internet environments. Review of C/S application architectures and system perspective on C/S middleware. Study of web-based middleware, distributed data managers and SQL middleware, distributed transaction processing middleware, and C/S object technology.

Prerequisites
TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 513 - Optical Communications Networks

Credits: 1.5
Introduction and overview of current developments in Optical Communication Networks. Emphasizes underlying technologies that make all-optical networks possible. Specific topics include components needed for Wavelength Division Multiplexed Systems and Dense Wavelength Division Multiplexed Systems; tunable wavelength lasers, wavelength add/drop multiplexers, space division switching, and wavelength-routing networks; optical LAN, MAN, and WAN concepts; passive and active wavelength filters, switches and routers; free-space optical networks.

Prerequisites
TCOM 503

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 514 - Basic Switching: Lecture and Laboratory Course
Credits: 3
Basic switching techniques and protocols for low and high-speed digital packet networks (Ethernet, Frame Relay, ATM, X.25) are taught within a half semester lecture series, followed by hands-on laboratory for remainder of semester. Real-life scenarios taught in the laboratory element through exercises that involve configuring switches and routers.

Prerequisites
TCOM 501 and 502

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 1.5

TCOM 515 - Internet Protocol Routing: Lecture and Laboratory Course

Credits: 3
Internet Protocol (IP) routing overview; static routing; dynamic routing; default routing; access lists; route redistribution; RIP, OSPF, IGRP, EIGRP, IS-IS, and BGP protocols submitted for comment. Real-life scenarios taught in laboratory element through exercises that involve configuring routers as network elements.

Prerequisites
TCOM 501, 502, and 509

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 1.5

TCOM 516 - Global Positioning System (GPS)

Credits: 1.5
Background in long-range navigation developments; early global systems; space-based systems; GPS and GLONASS systems; system architecture; spacecraft and Earth station characteristics; design concepts of the CA and P GPS signal modes; frequencies, modulation, and other design aspects; clock issues; range and accuracy calculations and limitations; advanced concepts.

Prerequisites
TCOM 500

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 518 - Third Generation Cellular Telephony

Credits: 1.5
Introduction to post-second generation cellular systems; benefits and features of third generation (3G) systems; review of air interface standards currently approved for 3G; review of 3G technologies; analysis of competing multiple access methods; transition plans and backward compatibility between 2G, 21/2G, and 3G systems; possible fallback plans.

Prerequisites
TCOM 506, 551, and 552.
**TCOM 519 - Voice over IP**

Credits: 1.5
Concept of transporting voice over Packet Switched Network; typical VoIP network scenarios (campus, multisite private network, calling nationwide and international; communications protocols for VoIP (RTP, RTCP, RFC 1889, H.323); conferencing and security issues; quality issues (delay, mean opinion scores); VoIP network design.

**Prerequisites**
TCOM 501, 502, and 509

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

**TCOM 520 - Economics of Telecommunications**

Credits: 3
Management of telecommunications networks; economic concepts in changing climate of telecommunications ownership, deregulation, and privatization; resource allocation fundamentals based on internal rate-of-return, net present value, opportunity costs; valuation of potential acquisitions in broad telecommunications market; financial modeling techniques.

**Prerequisites**
Graduate standing; TCOM 500

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 521 - Systems Engineering for Telecommunications Management**

Credits: 3
Advanced software principles, techniques, and processes for designing and implementing complex telecommunication systems. Planning and implementation of telecommunications systems from strategic planning through requirements, initial analysis, general feasibility study, structured analysis, detailed analysis, logical design, and implementation. Current system documentation through use of classical and structured tools and techniques for describing flows, data flows, data structures, file designs, input and output designs, and program specifications. Practical experience gained through project.

**Prerequisites**
TCOM 500

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 526 - Advanced Global Positioning System (GPS)**
Advanced concepts in global navigation satellite systems (GNSS) such as the American GPS (global positioning system), the European Galileo and the Russian GLONASS (GLObal Navigation Satellite System) System-level description, architecture and design of a wide area augmentation system (WAAS) comprising geostationary satellites overlaying GPS satellites and its vast network of monitoring and control ground stations. The equivalent EGNOS (European Geostationary Navigation Overlay Service), a precursor to Galileo and the Japanese MSAS (Multitransport Satellite-based Augmentation System) Updates on evolving GNSS technology and GNSS backup alternatives.

**Prerequisites**
TCOM 516

**Hours of Lecture or Seminar per week:** 1.5
**Hours of Lab or Studio per week:** 0

---

**TCOM 529 - Advanced Internet Protocols**

Credits: 1.5

Presents Link-State Routing Protocols (OSPF, IS-IS): functionality, features, design criteria; TCP Performance Tuning; Routing Architectures: routing vs. forwarding tables, shortest path routing algorithms, Internet architecture; Routing Between Peers: BGP/IGP interactions; Internet Security: IPSec, SSL protocols; Internet Multicasting: Layer 2 and 3 Multicast, functionality and features, IGMP and multicast routing protocols; Mobile IP: mobility, routing and addressing; Next Generation Internet (IPv6): functionality and features, pros and cons; Internet Applications: DNS, TELNET, FTP, SNMP, HTTP, etc.)

**Prerequisites**
TCOM 509 or a strong background in networking protocols.

**Hours of Lecture or Seminar per week:** 1.5
**Hours of Lab or Studio per week:** 0

---

**TCOM 539 - Advanced Voice over IP**

Credits: 1.5

Presents VoIP applications using Softswitches: Softswitch paradigm, advanced functionality and features. Different use of Softswitch architecture; VoIP QoS: QoS components, protocols, trade-offs. VoIP Security: Aspects of VoIP vulnerabilities, industry-standard remedies; VoIP network design considerations, traffic forecasting, product and vendor selection criteria; case studies: Enterprise and service provider implementations. Vonage example; Advanced topics (e.g., vendor interoperability issues, business case analysis, and future of VoIP).

**Prerequisites**
TCOM 519

**Hours of Lecture or Seminar per week:** 1.5
**Hours of Lab or Studio per week:** 0

---

**TCOM 540 - Telecommunications Network Optimization: Routing, Flow Management, and Capacity Modeling**
Provides state-of-the-art knowledge and techniques to apply operations research knowledge to optimal dimensioning, design and use of telecommunication networks. Includes review of traffic models in telecommunication networks including models for particular streams and multiplexing, as well as multirate and multihour models. Theory, algorithms and computational aspects of linear, network, and integer programming; formulation of telecommunication problems as optimization models, and review of solution strategies. Topics include maximum flow, shortest paths, minimum cost flows; data structure for trees and graphs; applications, modeling, theory and algorithms for optimal location of service facilities (concentrators, multiplexers) in telecommunication networks.

**Prerequisites**
TCOM 500

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

---

**TCOM 541 - Network Design and Pricing**

Credits: 1.5  
Capacity planning, capital budgeting and reliability modeling for determining optimal design. Economic models of pricing alternative telecommunications systems, project selection evaluation, and mechanisms for determining reliability of complex networks. Concentrates on modeling and evaluation. Software tools provided and tested throughout course.

**Prerequisites**
TCOM 500

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

---

**TCOM 542 - Stochastic Models in Telecommunications**

Credits: 1.5  

**Prerequisites**
TCOM 500.

**Hours of Lecture or Seminar per week:** 1.5  
**Hours of Lab or Studio per week:** 0

---

**TCOM 545 - Reliability and Maintainability of Networks**

Credits: 3  
Stochastic modeling of network reliability, simulation modeling, modeling replacement strategies. Introduces quality control, sampling for acceptance, economic design of quality control systems, and system reliability. Also covers faulty tree analysis, life testing, repairable systems and role of reliability, quality, and maintainability in life-cycle costing.
Prerequisites
TCOM 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 546 - Financial Models of Telecommunications Systems

Credits: 3
Telecommunication properties and systems. Broadcast, cable, and common carrier capitalization. Pricing, acquisition criteria, and forecasting techniques. Economic analysis of regulations and policies affecting telecommunications. Compares policy objectives with actual effects of policies, emphasizing economic principles. Determining appropriate discount and hurdle rates, life-cycle costing, evaluating technology horizons, and depreciation concerns will be discussed. Studies the economic analysis of regulations and policies affecting the mass media. Compares policy objectives with actual effects of policies, emphasizing economic principles. Uses economic and sociological theories to analyze impact of information technologies on economic organizations, markets, competitive strategies, and communication policy design.

Prerequisites
TCOM 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 547 - Project Management in Telecommunications

Credits: 3
Develops integrated approach to managing major telecommunications project; evaluates and uses tools and software for project management, with specific goals of containing costs and time overruns; introduces elements for resolving conflict resolution and applying motivation within project team, and gaining the ability to monitor and control projects in changing environment; develops understanding of unique attributes of major telecommunications systems such as interoperability requirements and international technical standards.

Prerequisites
Graduate standing.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 548 - Security and Privacy Issues in Telecommunications

Credits: 1.5
Introduces philosophy of secure data and voice communications. Topics include cryptography, cipher systems, practical security schemes, confidentiality, authentication, integrity, access control, nonrepudiation, and their integration across telecommunications network. Reviews threats and vulnerabilities in distributed systems.

Prerequisites
Graduate standing.
TCOM 551 - Digital Communication Systems

Credits: 3
Digital transmission of data, voice, and video. Covers signal digitization; modulation and demodulation; error correction coding; multiple access methods; multiplexing; synchronization; channel equalization; frequency spreading; encryption; transmission codes; digital transmission using bandwidth compression techniques; elements of information theory; and development of link budget evaluation such as system noise temperature, Nyquist filter concepts, antenna gain, and filter bandwidth.

Prerequisites
TCOM 500.

TCOM 552 - Introduction to Mobile Communications Systems

Credits: 3
Introduces mobile communication system design and analysis. Topics include mobile communication channel, access and mobility control, mobile network architectures, connection to fixed network, and signaling protocols for mobile communication systems. Offers examples of mobile communication systems including panEuropean GSM system, North American DAMPS system, and Personal Communication Systems.

Prerequisites
TCOM 500 and 551.

TCOM 555 - Network Management Foundations and Applications

Credits: 3
Defines and explains techniques that network managers utilize to maintain and improve performance of telecommunications network; network management system; five tasks traditionally involved with network management (fault management, configuration management, performance management, security management, and accounting management); theoretical background in transmission systems sufficient to understand network parameters such as capacity and response times; and specific network management products. Also explores how network performance data should be used for management and when considering upgrades in network architecture.

Prerequisites
TCOM 500, 501, and 502.
TCOM 556 - Cryptography and Network Security

Credits: 1.5
Broad overview of cryptographic algorithms and mechanisms, and application in today's communication networks. Discusses modern cryptographic techniques such as public key cryptography, digital signatures, secret sharing, key management, key escrow, public key certificates, and public key infrastructure. Covers cryptography on Internet including secure electronic mail, secure WWW, and electronic commerce. Compares, analyzes software implementations of cryptographic algorithms.

Prerequisites
TCOM 500 and 548.

Hours of Lecture or Seminar per week: 1.5
Hours of Lab or Studio per week: 0

TCOM 562 - Network Security Fundamentals

Credits: 3
Introduces full spectrum of network security. Topics include taxonomy such as language commonality in incident handling, national strategy to secure cyberspace, and cybersecurity organizations; organizational structure for network defense; best practices, security policy, and threats; actors and tools, countermeasures, vulnerability identification/correction, intrusion detection, and impact assessment; firewalls and intrusion detection systems; antivirus software; active defense; disaster recovery; and law enforcement and privacy issues. Reviews threats and vulnerabilities in network systems based on reports, case studies available in the literature, and actual experience.

Prerequisites
TCOM 500.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 575 - Quantitative Foundations for Telecommunications

Credits: 3
Provides quantitative foundations in mathematical and electrical concepts to permit registration for courses in telecommunications MS degree and certificate programs. Topics include polynomials, exponentials, linear and quadratic equations, graphs and functions, trigonometric functions, radial measure and sine/cosine functions, exponentials and logarithms, basic probability and statistics, fundamentals of matrix algebra and vectors, basic Boolean logic; circuit elements (resistor, capacitor, inductor), basic electrical circuits, units, Ohm's law, Kirchhoff's law, decibel notation.

Prerequisites
Graduate standing

Notes
Course cannot be used for credit in any IT&E graduate degree program.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TCOM 590 - Selected Topics in Telecommunications

Credits: 1.5-3.0
Selected topics from recent developments and applications in various engineering disciplines within specialty modules 1, 2, and 3 of the TCOM program. The course is designed to help the professional engineering community keep abreast of current developments.

Prerequisites
Permission of instructor; specific prerequisites vary with the subject of the topic.

Notes
The 1.5-credit course lasts for one-half semester (approximately seven weeks) while the 3-credit course lasts for the full semester.

Hours of Lecture or Seminar per week: 1.5, 3.0
Hours of Lab or Studio per week: 0

TCOM 591 - Selected Topics in Telecommunications

Credits: 1.5-3.0
Selected topics from recent developments and applications in various engineering disciplines in specialty modules 4 and 5 of TCOM program. Designed to help professional engineering community keep abreast of current developments.

Prerequisites
Permission of instructor; specific prerequisites vary with subject of topic.

Notes
The 1.5-credit course lasts for one-half semester (approximately seven weeks); the 3-credit course lasts for full semester.

Hours of Lecture or Seminar per week: 1.5, 3.0
Hours of Lab or Studio per week: 0

TCOM 598 - Independent Study in Telecommunications

Credits: 1.5-3.0
Directed self-study of special topics in telecommunications that relate to specialty modules 1, 2, and 3. Topics must be arranged with instructor and approved by program director before registering.

Prerequisites
Graduate standing; approval of program director.

Notes
May be taken for either 1.5 credits or 3.0 credits in fall and spring semesters. No more than total 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 courses for credit in TCOM program.

Hours of Lecture or Seminar per week: 1.5, 3.0
Hours of Lab or Studio per week: 0
TCOM 599 - Independent Study in Telecommunications

Credits: 1.5-3.0
Directed self-study of special topics in telecommunications that relate to specialty modules 4 and 5. Topics must be arranged with instructor and approved by program director before registering.

Prerequisites
Graduate standing; approval of program director.

Notes
May be taken for either 1.5 credits or 3 credits in fall and spring semesters. No more than total 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 for credit in TCOM program.

Hours of Lecture or Seminar per week: 1.5, 3.0
Hours of Lab or Studio per week: 0

TCOM 603 - Standards for Advanced Optical Networks

Credits: 3
Introduces current and upcoming global optical networking standards. Introduces currently deployed optical networking standards, primarily SONET, and proceeds with evolution of next generation optical networks as envisioned by various standards body. Covers standard work on Automatic Switched Optical Networks being worked on at ITU and Generalized Multi-Protocol Label Switching being worked on at IETF. Also covers evolution of Ethernet from local area networking to wide area networking, specifically the G.Etna standard that is being developed by ITU, and T1.X1 committee and 802.xxx developed by IEEE.

Prerequisites
TCOM 503 and 513

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 606 - Advanced Mobile Communications Systems

Credits: 3
Introduction to post-second generation cellular systems; benefits and features of third-generation (3G) systems and personal communications services (PCS); review of air interface standards and transmission technologies for mobile and quasi-stationary wireless systems, including cellular networks, satellite networks, indoor systems (Wi-Fi, Personal Local Area Networks, Orthogonal Frequency Multiplexing, Ultra Wide Band technologies); review of network control strategies; investigation of user authentication, privacy, and data and voice encryption aspects. Evolving technology, analysis of competing multiple access methods, transition plans, and backward compatibility between 2G, 21/2 G, 3G, and future systems, with possible fallback plans.

Prerequisites
TCOM 552

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TCOM 607 - Satellite Communications

Credits: 3
Topics include introduction to satellite communications systems; historical aspects; orbital mechanics and launchers; satellite components such as payload, orbital maneuvering systems, cooling systems, and antennas; look angle predictions; link budget; overall link design; multiple access such as TDMA, CDMA, ALOHA, TDMA, and MFTDMA; error control for digital satellite links; propagation effects on satellite links; elements of VSAT systems and non-geostationary satellite systems; and direct broadcast satellite services.

Prerequisites
TCOM 551.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 609 - Interior Gateway Protocol (IGP) Routing

Credits: 3
Discusses development of Interior Gateway Protocols, including standards documents; interaction between various interior and exterior gateway protocols; design procedures and implementation aspects; field trial issues; and analysis of latest RFC information posted on IETF web site.

Prerequisites
TCOM 509 and 515, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 610 - Border Gateway Protocol (BGP) Routing

Credits: 3
Discusses development of Border Gateway Protocol and its application in today's Internet routing architecture. Covers evolution of Internet, BGP routing standard specifications (RFCs), interaction between various routing protocols, network BGP routing design principals and procedures for enterprise and ISP networks, BGP's real-world implementation and configuration syntax, network scalability and convergence issues, and the latest extension and proposals for new standards.

Prerequisites
TCOM 509 and 515, or equivalent.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TCOM 611 - Multi-Protocol Label Switching (MPLS)
Develops full understanding of Multi-Protocol Label Switching (MPLS) theory, technology, and implementation aspects through detailed analysis of MPLS routing concepts and protocol stacks, and completion of major project to reinforce understanding of MPLS.

**Prerequisites**
TCOM 609 or 610

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 660 - Network Forensics**

Credits: 3  
Deals with collection, preservation, and analysis of network-generated digital evidence so it can be successfully presented in civil or criminal court of law. Examines relevant federal laws and private sector applications. Examines capture/intercept of digital evidence, analysis of audit trails, recordation of running processes, and reporting of such information.

Equivalent to CFRS 660

**Prerequisites**
TCOM 509, and working knowledge of computer programming.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 661 - Digital Media Forensics**

Credits: 3  
Deals with collection, preservation, and analysis of digital media so this evidence can be successfully presented in civil or criminal court of law. Examines relevant federal laws and private sector applications. Examines seizure, preservation, and analysis of digital media.

Equivalent to CFRS 661

**Prerequisites**
TCOM 548 and 556, or TCOM 562, and working knowledge of computer operating systems; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TCOM 662 - Advanced Secure Networking**

Credits: 3  
Advanced technologies in network security that can be applied to enhance enterprise and ISP's network security. Covers network perimeter defense concept and various components for complete layered defense system. Examines each component and its technologies, including TCP/IP protocol vulnerabilities, router access control list (ACL), dynamic ACL, firewall, network
address translation (NAT), virtual private network (VPN), IPSec tunnels, intrusion detection system (IDS), routing protocol security, denial-of-service (DOS) attack, DOS detection and mitigation techniques.

**Prerequisites**
TCOM 509 and 562, and a working knowledge of network routing protocols.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 663 - Operations of Intrusion Detection and Forensics**

Credits: 3  
Introduces students to network and computer intrusion detection and its relation to forensics. It addresses intrusion detection architecture, system types, packet analysis, and products. It also presents advanced intrusion detection topics such as intrusion prevention and active response, decoy systems, alert correlation, data mining, and proactive forensics.

Equivalent to CFRS 663

**Prerequisites**
TCOM 509 and 529 and a working knowledge of computer programming.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 664 - Incident Response Forensics**

Credits: 3

This course addresses incident detection, response, and those aspects of computer forensics pertinent to the investigation of trade secret theft, economic espionage, copyright infringement, piracy, and fraud. Procedures for gathering, preserving, and analyzing forensic evidence are discussed in detail and are applied to both computer and network incident response forensics.

Equivalent to CFRS 664

**Prerequisites**
TCOM 509 and TCOM 529.

**When Offered:** Spring

**TCOM 690 - Advanced Topics in Telecommunications**

Credits: 3  
Advanced topics from recent developments and applications in various engineering disciplines in specialty modules 1, 2, and 3 of TCOM program. Advanced topics chosen so that they do not duplicate existing TCOM courses. Active participation of students encouraged in form of writing and presenting papers in various research areas of advanced topic. Enhances professional
engineering community's understanding of breakthrough developments in specific areas.

**Prerequisites**
Permission of instructor; specific prerequisites vary.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 691 - Advanced Topics in Telecommunications**

Credits: 3  
Advanced topics from recent developments and applications in various engineering disciplines in specialty modules 4 and 5 of TCOM program. Advanced topics are chosen in such a way that they do not duplicate existing TCOM courses. Active participation of students encouraged in form of writing and presenting papers in various research areas of advanced topic. Enhances professional engineering community's understanding of breakthrough developments in specific areas.

**Prerequisites**
Permission of instructor; specific prerequisites vary.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TCOM 696 - Independent Reading and Research**

Credits: 1.5-3.0  
Study of selected area in specialty modules 1, 2, or 3 under supervision of faculty member. Written report required.

**Prerequisites**
Graduate standing; approval of program director.

**Notes**
No more than total of 6 credits may be taken from combination of TCOM 598, 599, 696, and 697 for credit in TCOM program.

**Hours of Lecture or Seminar per week:** 1.5, 3.0  
**Hours of Lab or Studio per week:** 0

**TCOM 698 - Telecommunications Projects Course**

Credits: 3  
To be taken toward end of degree program within any of modules 1, 2, or 3. Primary activity is completing major applied project, preferably with group of two to three people. Secondary goal is consolidating training before graduation so that, in some cases, it may act as capstone course. Students and outside telecommunication industry managers present ideas for projects and, through grouping of students, new skills and approaches may be learned. Some class time used for discussion of projects, either to monitor progress or explore alternative approaches. Readings, class-time discussion of current trends, difficulties, and new opportunities for industry most relevant to module. Concludes with presentations of projects to department faculty.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### TCOM 699 - Telecommunications Project Course

Credits: 3  
Capstone of degree program under the specialty modules 4 or 5. To be taken toward end of degree program. Primary activity is completion of major applied project, preferably as two- to three-person group. Secondary goal is consolidation of training before graduation. Students, outside telecommunication industry managers present ideas for projects. From these ideas, group projects selected. Some classroom time used to discuss projects, to either monitor progress or explore alternative approaches. Readings, class time discussion of current trends, difficulties, and new opportunities for the industry. Projects presented to department faculty at end of semester.

**Prerequisites**  
Graduate standing

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### TCOM 707 - Advanced Link Design

Credits: 3  
Topics include advanced satellite link design such as VSAT optimization, intersatellite systems, and propagation mitigation trade-offs; radar link design such as primary and secondary radars, range ambiguities, false alarms, Doppler radar, FM radar, radar tracking, radar transmitters and receivers, and phased array radars; terrestrial wireless link design including line of sight, LMDS, and nonlinear of sight; optical link design including laser options, diffraction limits, lidar and communications links, tracking limitations, and GEO and LEO intersatellite link design; Wi-Fi link design; and directed energy systems.

**Prerequisites**  
TCOM 551

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

### TCOM 750 - Coordinating Seminar

Credits: 3  
Open only to students in MA or MS in telecommunications programs with at least 18 credits of course work prior to registration. Topics include specific telecommunications problems in management, law, engineering, education, and communications. Focuses on ways a problem in one area can create or solve a problem in other areas.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
**TELE 694 - Telecommunications Internship**

Credits: 3-6  
Students work in approved professional-level telecommunications position, meeting regularly with agency and university internship supervisors. Paper and journal are required, as well as minimum 60 hours work for each credit of enrollment. Usually, students enroll in internships at end of program of study.

**Prerequisites**  
Graduate standing, and permission of MA in telecommunications program director.

**Hours of Lecture or Seminar per week:** 1-2  
**Hours of Lab or Studio per week:** 0

**TELE 730 - Telecommunications Management**

Credits: 3  
Surveys strategic and organizational issues in field of telecommunications management. Focuses on strategic management; oriented toward executive management level of telecommunications firms.

**Prerequisites**  
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TELE 750 - Coordinating Seminar**

Credits: 3  
Topics include specific telecommunications problems in management, law, engineering, education, and communication. Focuses on ways a problem in one area can create or solve a problem in other areas.

**Prerequisites**  
Open only to students in MA or MS in telecommunications programs with at least 18 credits of course work.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**TELE 798 - Directed Readings and Research**

Credits: 1-3  
Specialized course designed for students who seek to explore telecommunications topic in greater depth than through current course work provided in curriculum. Written report required; oral or written exam may also be required.

**Prerequisites**  
Graduate standing in telecommunications, 15 graduate credits completed, and permission of department.
**TELE 799 - Thesis**

Credits: 1-6
Individualized section form required. Original research related to student's concentration in telecommunications. Research must result in document meeting university standards.

**Prerequisites**
Degree candidacy in MA in telecommunications, completion of 24 credits of graduate course work, and approval of thesis proposal by faculty advisor and telecommunications director.

**Theater**

**THR 101 - Theatrical Medium**

Credits: 3
Introduces medium of theatrical performance and its role in contemporary society, and investigates components of production from conception through performance to ensuing criticism. Lectures, demonstrations by theater professionals. Students required to attend theatrical performances on- and off-campus, and submit a written report on each.

Satisfies General Education Requirement: Arts

**THR 150 - Drama, Stage, and Society I**

Credits: 3
Covers development of Western drama and theater from its beginnings through Shakespeare. Considers readings in dramatic literature and history of theater in social context.

Satisfies General Education Requirement: Arts
THR 151 - Drama, Stage, and Society II

Credits: 3
Covers development of Western drama and theater post-Shakespeare to present day. Considers readings in dramatic literature and history of theater in social context.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 190 - Special Topics

Credits: 1-3
Rotating topic. Introductory seminar in areas of special interest.

Notes
May be repeated for maximum 12 credits.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

THR 196 - Performance and Design Practicum

Credits: 1
Academic credit awarded for satisfactory completion of assignment on departmental productions. Examples include acting; design of sets, lights, costumes, or sound; and stage management.

Notes
Minimum 30 hours participation.

Hours of Lecture or Seminar per week: 0
Grading: S/NC

THR 197 - Management/Literary Practicum

Credits: 1
Academic credit awarded for satisfactory completion of a variety of assignments in the development and presentation of a live theatrical event. Examples include director, playwright, dramaturg, technical director, master electrician, and publicist.

Notes
Minimum 30 hours of participation.

Hours of Lecture or Seminar per week: 0
Grading: S/NC
THR 198 - Theatrical Construction Practicum

Credits: 1
Academic credit awarded for satisfactory completion of a theatrical construction assignment on departmental production. Examples include scenery construction, scene painting, electrician, and costume construction.

Notes
Minimum 30 hours of participation.

Hours of Lecture or Seminar per week: 0
Grading: S/NC

THR 199 - Production Run Crew Practicum

Credits: 1
Academic credit awarded for satisfactory completion of run crew assignment on departmental production. Examples of assignments include stage crew, light board operator, sound board operator, wardrobe, and fly crew.

Notes
Minimum of 30 hours of participation required.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

THR 200 - Play Production Practicum

Credits: 1
Academic credit is awarded for satisfactory participation in departmental (GMU Players) or Theater of the First Amendment productions.

Notes
May be repeated for total 4 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
Grading: S/NC

THR 201 - Stage Management

Credits: 1
Theory and technique of stage management for theater. Special emphasis on problem-solving skills.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
THR 202 - Literary Management

Credits: 1
Principles of literary management and dramaturgy for regional/resident theater. Directed primarily toward developing new work.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

THR 203 - Production/Company Management

Credits: 1
Techniques of production and company management applied to university and professional theater productions.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

THR 210 - Acting I

Credits: 3
Reviews and analyzes the history and development of acting theory from various cultural contexts; introduces contemporary acting techniques through individual and group exercises, incorporating tools such as observation, sense and emotion memory, and improvisation, thus expanding the student's awareness of human behavior, thought, and language. Students develop appreciation of theater and its basic elements through attendance of live performances on- or off-campus, in-class critical evaluation, and oral and written reflection.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 230 - Introduction to Technical Theater

Credits: 3
Reviews and analyzes theory, practice, and historical context of physical production component of theater; studies current trends in technical theater, and explains how they developed from earlier technology; collaborative work demonstrating the responsibilities of group problem solving to complete tasks; and provides a foundation for the appreciation of the theatrical medium whether as a member of the production or audience.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 235 - Fundamentals of Costume Construction
Basic flat pattern development, theatrical sewing techniques, and organization of the costume construction process. Includes lab study and practical experience in garment construction and related costume crafts as used in theater costume design.

**THR 300 - Voice and Speech Fundamentals**

Credits: 3
Basic techniques in breathing, vocal production, and articulation for the actor.

**Prerequisites**
THR 210 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 301 - Voice and Speech for the Performer**

Credits: 3
Integration of text and performance problems with voice and speech fundamentals begun in THR 300. Advanced work in vocal production and character-specific sounds.

**Prerequisites**
THR 300 or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 303 - Movement for the Actor I**

Credits: 3
Develops physical side of actor's instrument emphasizing free and responsive expression of impulse and intention.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 304 - Movement for the Actor II**

Credits: 3
Advanced work in techniques established in THR 303.
THR 305 - Stage Combat

Credits: 3
Studies safe, effective techniques for performing unarmed stage fights, falls, and rolls. Emphasizes acting the fight, safety, and storytelling.

Prerequisites
THR 210 and 310, or permission of instructor.

THR 310 - Acting II

Credits: 3
Extends principles begun in THR 210 through scene study, audition technique, and work in analysis, characterization, and relationships.

Prerequisites
THR 210 or permission of instructor.

THR 314 - Lighting Stagecraft

Credits: 3
Practical and theoretical instruction on becoming theatrical electrician. Includes ideas on workplace safety, basic electrical procedures, theatrical electrical production, integrating with other theater professionals, and professionalism.

Prerequisites
THR 230 or permission of instructor

Corequisite
Must be concurrently enrolled in THR 200

THR 315 - Sound Engineering
Credits: 3
Theoretical and practical study of audio production for theater and the entertainment industry. Students will have the opportunity to apply course material to live productions.

**Prerequisites**
THR 230 or permission of instructor

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**THR 320 - Beginning Modern Acting**

Credits: 3
Builds on existing skills in observation, sense memory, relaxation, and improvisation. Students learn variety of methods for scene preparation to apply to their own acting process.

**Prerequisites**
THR 210 and 310, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**THR 321 - Acting Shakespeare**

Credits: 3
Develops understanding of challenges of performing Shakespeare by building on body of acting skills and knowledge. Focuses on how structure of language in plays reflects, reveals, and expresses character's emotional life. Students use detailed script analysis, expansion of vocal range, and use of actions and objectives to achieve experience of transforming Shakespeare's language into powerful theatrical expressions.

**Prerequisites**
THR 210 and 310, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**THR 329 - Directing I**

Credits: 3
Introduces text analysis, rehearsal procedure, staging techniques, and development of production idea. Students direct exercises and short scenes, and prepare written production notes.

**Prerequisites**
THR 150-151, 210, or 350; or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
THR 330 - Seminar in Technical Theater

Credits: 3
Offered periodically; addresses selected topic in design or technical theater on advanced level.

Prerequisites
THR 230 or permission of instructor. Rotating topic.

Notes
May be repeated for total 24 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 331 - Drafting and Model Making

Credits: 3
Studies conventions and techniques of drafting and model making as methods of communication in the theatrical production process.

Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 332 - Seminar in Costume History

Credits: 3
Explores evolution of fashion and styles of dress. Students study silhouette, color, fabric, accessories, and make-up appropriate to development of clothing during specific historical era. Offers broader understanding of context relating to sociological and psychological factors influencing Western dress. Historical era studied will rotate.

Notes
May be repeated for total 9 credits if specific course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 333 - Stage Design

Credits: 3
Fundamentals of creating, developing, and communicating design idea through sketches, plans, rendering, or models. Analysis of text from designer's perspective.
Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 334 - Lighting Design

Credits: 3
Study of lighting design as art that defines space and reveals form. Introduces tools, equipment, and process of lighting design. Analyzes text from designer's perspective.

Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 335 - Costume Design

Credits: 3
Project-oriented class emphasizing process of designing and building. Costume design studied in relation to historical periods and artistic demands of script. Includes lecture, lab in fundamentals of costume design for stage.

Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 336 - Advanced Theater Technology

Credits: 3
Continuation of work begun in THR 230, stressing contributions of costumes, sound, and props to theatrical production. Intensive work in drafting for theater. Participation in theater division productions required.

Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 337 - Sound Design
Credits: 3
Project-oriented class explores theory and practice of sound design including history, technology, script analysis, and auditory aesthetics.

Prerequisites
THR 230 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 339 - Theatrical Design Concepts

Credits: 3
Introduction to the principles of theatrical design. Course explores various design responsibilities and methods to create visual images for the stage through script analysis, research, and production team collaboration.

Prerequisites
THR 230 or permission of instructor

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 340 - Directing II

Credits: 3
With techniques developed in THR 329, students analyze and stage extended scenes or one-act plays. Emphasizes collaborative process and production organization.

Prerequisites
THR 329 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 342 - Makeup Design

Credits: 3
Project-oriented class emphasizing makeup for different performance spaces, character age analysis, facial anatomy, and specialized application for theater, opera, dance, film, and television.

Prerequisites
THR 230 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 343 - Costume Draping and Drafting

Credits: 3
Pattern development through draping and drafting. Laboratory study and practical experience in construction of stage costumes.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 345 - Puppetry: History and Technique

Credits: 2-4
In context of comprehensive and intensive exploration of world puppetry, course experiments with building and performance styles. Emphasizes hand and rod puppets, shadow work, toy theater, and bunraku-style figures. Students develop, build, and present original work.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 4

THR 350 - Script Analysis

Credits: 3
Critical analysis of dramatic literature as preparation for production and performance. Examination of plot, character, theme, audience impact, and cultural context, and the transformation of intellectual ideas into physical theatrical production elements.

Notes
Writing intensive course.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 351 - Dramatic Theory and Criticism

Credits: 3
Chronological study of development of dramatic theory and criticism from Plato and Aristotle through modern movements. Students read plays, theoretical works, and critical responses, and write original criticism of performances or texts.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 352 - Dramatic Literature Seminar

Credits: 3
Rotating topic. Intensive study of particular topic, period, or genre in dramatic literature.
Notes
May be repeated for a total of 9 credits if specific course content differs.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 355 - Moral Vision in American Theater

Credits: 3
Examines vision of American society created and presented in contemporary American theater. Subject defined as "moral" vision because focus is on how we perceive ourselves in relation to others and society's value standards. Perspectives include sociology, theory of culture, practical theater craft, and literary criticism. Features plays by range of American playwrights.

Prerequisites
THR 101, theater major, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 359 - World Stages

Credits: 3
Introduces variety of theatrical traditions and performance theories from around the world, with special emphasis on those not covered in introductory Western drama survey courses, 150 and 151. Students read and discuss dramatic texts, performance theory, and video clips to understand variety of theatrical traditions in cultural and historical contexts. Requirements include two team presentations (taking turns as writer and presenter), one midterm paper, and one solo presentation with accompanying paper.

Satisfies General Education Requirement: Global understanding

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 365 - Characterization

Credits: 3
Explores method and approach of understanding and creating characters for theater modeled on people from personal experience and observation, imagination, dreams, and other media. Transforms that information into detailed, specific, and vivid physical manifestations. Through presentations of characters drawn from personal experience, students shift understanding of characterization from "outward directed" physical adjustments to physical characteristics and personality character traits that are immediate, familiar, and completely realized from "inner driven" connections to their own lives.

Prerequisites
THR 210.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 380 - Playwriting I

Credits: 3
Exposure to principles of dramatic writing, including character, plot, dramatic structure, dialogue, exposition, setting, and creating theatrical images using examples from plays, screenplays, and students' own work.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 381 - Playwriting II

Credits: 3
Intensive continuation of work begun in THR 380.

Prerequisites
THR 380 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 382 - Screenplay Workshop

Credits: 3
Studies screenwriting as dramatic form of 20th, 21st centuries. Explores story, plot structure, three act-structures, mythic structures, fundamental story patterns, character, thinking, and writing visually.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 395 - Theater as the Life of the Mind

Credits: 3
Traces four subjects (battle of the sexes, good gifts, cyclical tragedy, and eschatology) from ancient theater to contemporary plays, television, and movies, using literary criticism, history, political theory, comparative religion, sociology, and anthropology.

Satisfies General Education Requirement: Arts

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 420 - Advanced Modern Acting
Credits: 3
Advanced scene study to build on skills from previous acting courses. Students assigned actor's approach, midterm sonnet presentation, and final scene.

Prerequisites
THR 210 and 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 421 - One-Person Show

Credits: 3
Students work with designated faculty in creative writing, staging, and performance culminating in the successful writing, rehearsing, and performing of a one-person show.

Prerequisites
THR 210 and THR 310 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 423 - Audition Techniques: Stage and Camera

Credits: 3
Professional directors, coaches, and casting directors offer perspectives on what makes an effective and honest audition. Students prepare a repertoire of pieces for stage and camera auditions.

Prerequisites
THR 310 or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 424 - Contemporary Women Playwrights

Credits: 3
Explores identity and culture, sexuality and gender, work, relationships, and power through the eyes of female dramatists and performance artists. Analyzes texts and issues through readings, video, and live performances.

Prerequisites
Junior standing, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
THR 425 - Verse Speaking

Credits: 3
Explores verse literature and mechanics of verse structure through reading, discussing, and reciting major verse plays of Western drama from the Middle Ages through the 20th century. Focuses on various verse forms, paying particular attention to vocal clues within verse structure, the meaning of rhythm, and practicing vocal techniques used in speaking texts in class. Students also prepare weekly presentations of playwrights, and historical backgrounds of plays and their periods.

Prerequisites
THR 210 and 310, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 434 - Advanced Lighting Design

Credits: 3
In-depth study of lighting design. Work with lighting distribution, composition, and color to create compelling visual pictures and moods. Extensive work with script analysis as related to lighting, drafting of light plots, and the generating associated paper work used by lighting designer.

Prerequisites
THR 230 and 334, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 440 - Advanced Studies in Directing/Dramaturgy

Credits: 3
Examines theory and practice of collaborative development of production ideas by director and dramaturg teams. Students draw from extensive study in field to support production ideas from classical and modern repertoire to be presented as written and oral projects before faculty panel.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Junior or senior standing; completion of or concurrent enrollment in all general education courses; THR 150 or THR 151, and THR 329; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 480 - Advanced Playwriting
Advanced playwriting workshop in which students explore their own voice in theatrical writing.

**Prerequisites**
THR 381, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 482 - Advanced Screenplay Workshop**

Credits: 3  
Screenwriting workshop emphasizing student development in screenplay form, structure, and storytelling with emphasis on craft, character, and story culminating in a screenplay.

**Prerequisites**
THR 382 or permission of the instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 484 - Translation & Adaptation for Stage & Screen**

Credits: 3  
This interdisciplinary course will introduce students to the arts of translation and adaptation for the stage and screen. Students will read examples of translations and adaptations, identify challenges in each, and discuss them with professionals who translate or adapt works for theater, film and/or opera. Students are also expected to apply their skills to one short and one long translation/adaptation project, and present their work to the class.

**Prerequisites**
Junior standing

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

**THR 490 - Special Topics in Drama**

Credits: 1-6  
Rotating topic. Advanced seminar in topics of special interest, including dramatic writing or other media, and feminism in contemporary theater.

**Notes**
May be repeated for a total of 24 credits, provided specific course content differs.

**Hours of Lecture or Seminar per week:** 1-6  
**Hours of Lab or Studio per week:** 0
THR 491 - Major's Seminar on the Profession

Credits: 3  
Acquaints upper-division majors with realities of living and working in the theater. Features guest speakers from the profession and intensive development of students' portfolio materials specific to the demands of their field.

Prerequisites
Junior theater major.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

THR 494 - Field Experience

Credits: 1-6  
Experience in a theatrical organization to provide opportunity to apply classroom training, knowledge, skills, and theory in a professional situation. Activity must be approved by department chair.

Notes
May be repeated for a total of 12 credits.

Hours of Lecture or Seminar per week: 0  
Hours of Lab or Studio per week: 0  
Grading: S/NC

THR 495 - Senior Capstone Project

Credits: 3  
Advanced-level project, with supervision of faculty advisor representing culmination of study in student's area of concentration. Examples include dramaturgy, design, playwriting, directing, acting, assistant directing, technical direction, and stage management. Project will include intellectual component and public presentation to a faculty panel demonstrating ability to communicate effectively in written, oral, and graphic forms as appropriate to the project.

Prerequisites
Junior standing or higher and declared concentration or permission of department chair.

Notes
Student must maintain a minimum grade of C or better to fulfill concentration requirements. May be repeated for a total of 6 credits provided course content is different.

Hours of Lecture or Seminar per week: 3  
Hours of Lab or Studio per week: 0

THR 496 - Text in Production
Credits: 3
In-depth investigation of collaborative nature of theatrical arts. Examines discrete creative disciplines; acting, directing, dramaturgy, and design as discussed by distinguished professionals and scholars. In-depth exploration of one selected playscript for the entire semester. Students will work collaboratively in small groups to research, design, direct, and perform scenes from selected text.

Satisfies General Education Requirement: Synthesis requirement

Prerequisites
Completion or concurrent enrollment in all theater core courses and all other required general education courses, and junior standing; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 497 - Independent Study

Credits: 1-6
Individual research and creative project in close consultation with instructor. Selection from projects in performance, directing, technical theater and design, playwriting, or theater history and criticism.

Prerequisites
Open only to theater majors with 90 credits and special permission of department chair

Notes
May be repeated for a total of 24 credits, provided suffix citing specific course content is different

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

THR 571 - Advanced Playwriting Workshop

Credits: 3
Advanced playwriting workshop in which students explore their own voice in theatrical writing.

Prerequisites
Undergraduate degree or equivalent, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

THR 599 - Independent Study

Credits: 1-6
Independent reading, performance, or research on a specific project under direction of selected faculty member. May include attendance in a parallel undergraduate course.
Prerequisites
Undergraduate degree or equivalent, or permission of instructor.

Notes
May be repeated for a total of 6 credits.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

Tourism and Events Management

TOUR 110 - Professionalism and Civility
Credits: 1
Focuses on developing competencies in the areas of professionalism and civility in a variety of settings including professional image, conduct at work, telephone, written, oral, and electronic etiquette, table manners, and social networking with an emphasis on the cultural needs for honoring commitments and obligation.

TOUR 190 - Wedding Planning
Credits: 3
Introduction to the planning and management of weddings. Explores social, political, economic, cultural, religious, and historical influences on wedding planning decision-making and business strategies. Reviews practices relevant to successful wedding planning, and consultancy for diverse clients and settings.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 200 - Introduction to Travel and Tourism
Credits: 3
Introduction to travel and tourism from local to international levels. Overview of the scale, scope, and organization of the industry, with emphasis on the development of natural, cultural, heritage, and recreational resources of tourism. Identifies issues related to the economic, technological, legal, and political aspects of tourism.

Notes
Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TOUR 210 - Global Understanding through Travel and Tourism

Credits: 3
Examines tourism as a global industry and human activity that promotes and facilitates understanding of historical and cultural values, and of international institutions that characterize the broader global system.

Satisfies General Education Requirement: Global understanding

Notes
Open to nonmajors.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 220 - Introduction to Event Management

Credits: 3
Explores principles and practices of managing medium- and large scale events including festivals, conventions, concerts, shows, sporting events, and ceremonies. Emphasizes organization, site preparation, communications, personnel, and security as well as evaluation and innovation.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 221 - Event Implementation and Evaluation

Credits: 3
Introduction to event implementation and evaluation through involvement in on-site event delivery and analysis. Studies participant motivation and economic, social, environmental, and cultural impacts in relation to an event's products and services.

Prerequisites
TOUR 220

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 230 - Introduction to Hospitality Management

Credits: 3
This course is an introduction to hospitality management, including an overview of management in the hospitality industry and professional opportunities. The concepts and practices of hospitality management are examined and discussed. The scope and forms of hospitality organizations are reviewed, as well as trends within these organizations.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
TOUR 241 - Practicum

Credits: 3
Provides practical experience in the travel and tourism environment through selective fieldwork, job placement, and seminar or conference attendance.

Prerequisites
TOUR 200 and TOUR 220

Notes
TEM majors only

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 3
Grading: PASS/FAIL

TOUR 311 - Women and Tourism

Credits: 3
Open to nonmajors. Approved general education requirement. Focuses on women as hosts and guests. Using social theory, explores issues regarding the history and evolution of tourism as a gendered system. Addresses family, solo and business travel, and employment, taking into consideration issues related to more and lesser developed countries as they relate to the roles of women in international tourism.

Satisfies General Education Requirement: Social and behavioral science

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 312 - Ecotourism

Credits: 3
Analyzes tourism that is nature-based and entails a learning component while striving for environmental and sociocultural sustainability within the context of financial viability. Considers markets, role of protected areas, impacts, business aspects, external environments, organizations and policies, and research trends and needs.

Prerequisites
TOUR 200

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 330 - Resort Management

Credits: 3
Surveys effective practices in the management of resort recreation enterprises. Examines basic resort operations, including front
desk, food and beverage, amenities, and housekeeping. Covers management of a variety of resort types, such as ski resorts, beach resorts, dude ranches, business retreats, adventure camps, health spas, and golf resorts.

**Prerequisites**
TOUR 200 and TOUR 220

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TOUR 340 - Sustainable Tourism**

Credits: 3  
Considers the characteristics of environmentally, economically, and socioculturally sustainable tourism, and assesses the possibilities and limitations for its implementation in a variety of destination and product settings. Emphasizes conventional "mass" tourism as well as small-scale "alternative" tourism.

**Prerequisites**
TOUR 200 and TOUR 220

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TOUR 352 - Heritage and Cultural Tourism**

Credits: 3  
Analyzes historical and cultural attractions, including museums, canals, monuments, pilgrimage sites, military sites, and cultural and heritage landscapes. Covers presentation and interpretation, African-American and Native American heritage, management and operational considerations, and marketing.

**Prerequisites**
TOUR 200 and TOUR 220

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**TOUR 362 - Cultural and Environmental Interpretation**

Credits: 3  
Focuses on communication processes and practices used by professionals to explain and interpret special characteristics of cultural and environmental resource sites for visitors. Discusses conceptual principles for planning interpretive programs, as well as techniques for analyzing and disseminating information and entertainment through various media. Examines delivery of interpretive messages across a variety of audiences, strategies for programming interpretive services, and the administration and evaluation of interpretive services at tourism, event, and recreation sites.

**Prerequisites**
PRLS 300, or PRLS 328, or TOUR 352
TOUR 412 - Tourism and Events Marketing

Credits: 3
Provides understanding and tools for marketing and management of financial resources in entrepreneurial tourism enterprises. Includes market planning, business planning, feasibility assessment, investment analysis, basic accounting, and operational control.

Prerequisites
TOUR 200, TOUR 220, PRLS 310, and PRLS 410

TOUR 414 - Tourism and Events Finance

Credits: 3
Develops skills and competencies for the management of financial resources in tourism and events management enterprises. Students learn about business planning, feasibility assessment, investment analysis, and basic accounting and operational control, with special emphasis on application to this unique industry.

Prerequisites
TOUR 200, TOUR 220, PRLS 310, and PRLS 410

TOUR 420 - Tourism Planning/Policy

Credits: 3
Principles of planning and policy that apply to integrated and sustainable tourism development at the international, national, state, regional, local, and site scale. Considers government, industry, and community perspectives.

Prerequisites
PRLS 310 and TOUR 340

TOUR 440 - Meetings and Conventions
Credits: 3
Analyzes meetings, incentives, conventions, and exhibitions with respect to business environment and structure, industry suppliers, site and facility selection, human resource management, legal and financial issues, marketing and promotion, and event organization.

Prerequisites
TOUR 200 and PRLS 310

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

TOUR 470 - Senior Seminar

Credits: 1
Capstone educational experience focuses on current issues in tourism and event management, and career development strategies.

Prerequisites
TOUR 241, HEAL 323, TOUR 340, TOUR 440, and PRLS 410

Notes
Only for TEM majors with senior status.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

TOUR 480 - Special Topics

Credits: 1-3
Selected topics reflect interest in specialized area of tourism and events management. Announced in advance.

Prerequisites
60 credits

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

TOUR 490 - Internship

Credits: 12
Supervised professional experience provides a continuous and structured opportunity to apply principles and skills developed in the classroom to the solution of practical problems in the tourism and events management industry. Provides a paid or voluntary full-time work experience in an approved tourism or event management setting for a minimum of 10 to 12 weeks. Includes meetings and assignments before and during the internship.

Prerequisites
Open to majors only. 90 credits, TOUR 241, HEAL 323, TOUR 340, TOUR 440, and PRLS 410
TOUR 499 - Independent Study

Credits: 1-3
Faculty directed independent study of approved topics in tourism and events management.

Prerequisites
TOUR 200 and 220, and 90 credits

Notes
TEM majors only.

TOUR 540 - Sustainable Tourism Management

Credits: 3
Examines components and interrelationships within tourism systems and assesses the potential economic, sociocultural, and environmental impacts associated with this sector. Considers managerial strategies that minimize the negative impacts and maximize the positive impacts, thereby attaining sustainable tourism.

University/Interdisciplinary Studies

UNIV 101 - Freshman Academic Transition

Credits: 1-2
This seminar focuses on academic transition and development issues for second semester freshmen. A special emphasis is placed on resources and techniques to assist students with assessing and improving their academic performance. Students will work closely with their instructor to track their academic progress over the course of the semester.

UNIV 110 - Special Topics
Credits: 1-3
Selected topics reflecting interest in specialized areas.

Hours of Lecture or Seminar per week: 1-3
When Offered: Summer

UNIV 190 - Freshman Seminar

Credits: 3
Broad interdisciplinary subjects taught by Robinson Professors; topics vary.

Prerequisites
Freshman standing; enrollment is by minimum 3.30 cumulative high school GPA and invitation.

Notes
Courses may be repeated for up to 12 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

UNIV 301 - Great Ideas in Science

Credits: 3
Nontechnical introduction to ideas that have shaped the growth of science, from the building of Stonehenge to modern theories of the Big Bang. The idea behind each major advance is treated in its historical context, with special attention to its importance in mankind’s understanding of the nature of the universe. Intended for nonscience majors; uses little mathematics.

Satisfies General Education Requirement: Natural science Nonlab

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

UNIV 342 - The George Mason Debates in Current Affairs

Credits: 3
In-depth investigation of one or more contemporary public policy issues. Examines the selected topics as discussed by scholars, public interest groups and think tanks, government officials, and the news media. Texts and guest lecturers presenting a wide range of perspectives are an important feature.

Satisfies General Education Requirement: Synthesis requirement

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

UNIV 442 - Krasnow Seminar
Credits: 3
Interdisciplinary seminar offering a window on the latest advances and research related to cognitive science, an interdisciplinary field of inquiry that seeks to understand the nature, basis, and origins of human consciousness, thinking, and cognition.

Satisfies General Education Requirement: Synthesis requirement

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

University Transition

UNIV 100 - University: Freshman Transition

Credits: 1-2
Helps freshmen transition to college life, focusing on adjusting academically, developing decision-making skills, and learning about services and opportunities for involvement. Although all classes have a core body of knowledge, each class specializes in a particular aspect of college life. Team development at Hemlock Overlook is a component of most sections.

Hours of Lecture or Seminar per week: 1-2
Hours of Lab or Studio per week: 0

UNIV 200 - University: Sophomore Transition

Credits: 1-2
Focuses on transition issues for students at second-semester freshman standing or higher. Main focus is career exploration and choosing a major. Section topics include self-assessment, values clarification, skill development, career and major research, and options for experiential learning.

Hours of Lecture or Seminar per week: 2
Hours of Lab or Studio per week: 0

UNIV 300 - University: Junior Transition

Credits: 1-2
Focuses on transition issues for students at second-semester sophomore standing or higher. Features three tracks: assisting new transfer students with first-semester academic and transition issues, career readiness for internships and research assistantships, and peer leadership.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0
UNIV 400 - University: Senior Transition

Credits: 1-2
Transition issues for students at second-semester junior standing or higher. Focuses on development for the professional workplace, skills for graduate school preparation, and readiness for life responsibilities. Includes skill preparation for work, development of field-of-study expertise, resume and portfolio development, job-search strategies, money management, career and alumni networks, interview strategies, and final year planning.

Hours of Lecture or Seminar per week: 1
Hours of Lab or Studio per week: 0

Urban and Suburban Studies

USST 301 - Urban Growth in a Shrinking World

Credits: 3
Examines process of urbanization historically and comparatively. For major world regions, attention is given to the political economy of urbanization and its impact on social and economic relations. Examines growing globalization of the world economy, implications for urban life, and urban political economy of the future.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

USST 390 - Special Topics in Urban and Suburban Studies

Credits: 3
Subject varies according to specialization of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

USST 401 - Seminar: The Future of Metropolitan America

Credits: 3
Examines trends in the development of American metropolis, including impact of information economy and technological developments on metropolitan form and life, continuing outward growth and increasing decentralization of metropolitan areas, changing functional organization of urban space, and continued social segregation in metropolitan areas. Analyzes contemporary predictions about future of metropolitan life in America, and explores how alternative public policies can shape that future. Students work on research projects in metro area.

Prerequisites
12 credits of USST-approved courses, including USST 301.
USST 490 - Internship

Credits: 3
Approved work-study programs that focus on urban and suburban issues with an approved agency or firm. Placement depends on student qualifications and availability of positions. Students work with onsite supervisor and coordinator of urban and suburban studies.

Prerequisites
Open only to students with 12 credits of USST; see USST coordinator

Women and Gender Studies

WMST 100 - Representations of Women

Credits: 3
Explores ways women are portrayed in advertising, television, film, photographs, cartoons, performance arts, literature, religious texts, and news media from various worldwide sources. Through interdisciplinary study students will evaluate the powerful effects these representations have on the political, economic, and social lives of women throughout the world.

Satisfies General Education Requirement: Global understanding

WMST 200 - Introduction to Women and Gender Studies

Credits: 3
Interdisciplinary introduction to women's studies, encompassing key concepts in the field, history of women's movements and women's studies in America, cross-cultural constructions of gender, and a thematic emphasis on the diversity of women's experience across class, race, and cultural lines.

Satisfies General Education Requirement: Social and behavioral science

Prerequisites
30 credits.
Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 300 - Current Issues in Women and Gender Studies

Credits: 1-6
Study of selected topics central to contemporary women's studies. Topics vary but include subjects such as women and violence, women and international development, women's myth and ritual, the history and politics of sexuality, psychoanalysis, and religion.

Hours of Lecture or Seminar per week: 1-6
Hours of Lab or Studio per week: 0

WMST 301 - Sex and Gender in Contemporary Society

Credits: 3
Changing conceptions of sex roles, both female and male, in contemporary society. Using historical and comparative data, course considers the differential socialization of males and females in relation to the changing social structure in which it takes place.

Prerequisites
60 credits, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 302 - Cultural Constructions of Sexualities

Credits: 3
Introductory survey of cultural, literary, and theoretical constructions of sexuality that seeks to complicate traditionally fixed categories of identity. Examination of various representatives of human sexuality, with particular attention to its intersections with gender, race, ethnicity, nationality, and class.

Prerequisites
6 credits of 200-level English courses.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 303 - Psychology of Women

Credits: 3
Behavior and attitudes of women, influence of sex chromosomes and sex hormones on behavior, influence of culture on sex role differentiation, and theories of sex role development.
Prerequisites
PSYC 100, and BIOL 103 and 104; or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 304 - Women and Media

Credits: 3
Introduction to the concepts of the power and influence of the mass media. Allows students to see themselves as products of media influence and gives them a sense of women's roles as media professionals, as well as consumers.

Prerequisites
COMM 302 or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 305 - Women and Literature

Credits: 3
An exploration of the experience of women as both authors of and subjects in imaginative literature.

Prerequisites
6 credits of 200-level English courses.

Notes
May be repeated once for credit when subtitle is different, with permission of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 306 - Topics in Communication and Gender

Credits: 3
Exploration of selected topics involving gender and communication. Topics may include women in media, women as rhetors, male/female communication, and communication and sex roles. Specific interests are examined in a seminar setting.

Prerequisites
60 credits.

Notes
Course may be repeated with approval of department.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0
WMST 307 - Women and Work

Credits: 3
Historical and contemporary accounts of women's participation in paid and unpaid labor. Analyzes the nature of women's work through the divisions in the labor market due to gender, race, nationality, ethnicity, and class. Provides a detailed look at occupational sex segregation, sexual harassment, the glass ceiling, and the role of religion, culture, and education in determining women's opportunities and their value as workers and as family providers.

Prerequisites
30 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 308 - Introduction to Lesbian, Gay, Bisexual, Transgender, Transsexual, and Queer Studies

Credits: 3
Explores major events in lesbian, gay, bisexual, transgender, transsexual, and queer culture and history in the United States and throughout the world to understand how identities, experiences, and movements have been socially constructed and have changed in different times and places, often as a result of race, class, and gender-inequities.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 309 - Early 20th Century Black Social Movements

Credits: 3
Examines racialized gendered conceptions of popular culture, violence, and the legal system and their role in structuring systems of segregation, discrimination and exclusion. Looks at the gendered strategies and conflicts of organizations that arose to combat racial violence and overturn legal and social barriers to equal opportunity and citizenship rights.

Hours of Lecture or Seminar per week: 3

WMST 310 - Women, Sex, and Psyche

Credits: 3
Explores the changing concepts of women's psychology, sexuality, and relationships in different social and cultural contexts. Demonstrates the ways women's "psychological self" has been the source of humor, malignment and curiosity throughout history. Discussion-based classroom explores the intersections of self, race, gender and relationship.

Hours of Lecture or Seminar per week: 3
When Offered: Fall
WMST 311 - The Erotic and the Sacred

Credits: 3
Explores the complex relationship between the body, sexuality and the spirit. Investigates sacred texts, novels, short stories, poetry and film that engage with a variety of cultural embodiments of sexualities and of the sacred, international in scope. Teaches students to formulate critical perspectives at the intersection of the erotic and sacred.

Hours of Lecture or Seminar per week: 3

WMST 312 - Gender, Trauma, and Recovery

Credits: 3
Explores the experience of emotional trauma, the process of recovery and the etiology of healing in contemporary North American culture. Investigates memoir, poetry, film, and novel as case studies of trauma and examines the effect of gender on traumatic experiences. Applies psychological and feminist theoretical perspectives.

WMST 330 - Theoretical Perspectives in Women and Gender Studies

Credits: 3
Examination of feminist and queer critiques and transformations of the theories, methods, and methodologies of the sciences and humanities.

Prerequisites
WMST 200, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 390 - Study Abroad

Credits: 1-3
Study abroad under supervision of George Mason University faculty. Course topics, content and locations vary.

Hours of Lecture or Seminar per week: 1-3
Hours of Lab or Studio per week: 0

WMST 400 - Internship in Women and Gender Studies

Credits: 1-3
Community- or campus-based service or experiential learning related to women's or gender issues. Independent course in which students develop, in consultation with a faculty member, individual contracts defining the learning and competencies they plan to gain from the experience.
Prerequisites
Completion of 60 credits, including WMST 200, or permission of instructor.

Notes
May be repeated for credit, up to 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

WMST 401 - Experiential Learning in Women and Gender Studies

Credits: 1-3
Community- or campus-based service or experiential learning as it relates to a specific WMST course, taken at the same time. Students develop, in consultation with faculty member, individual contracts defining learning and competencies they plan to gain from the experience.

Prerequisites
Concurrent enrollment in women's studies course.

Notes
May be repeated for credit up to total 6 credits, but only 3 credits of WMST 400 or 401 may be applied toward the women's studies interdisciplinary minor.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

WMST 410 - Feminist Approaches to Social Research

Credits: 3
Introduction to feminist approaches to social research for advanced undergraduate students. Students learn the techniques for collecting, analyzing, and writing-up research data as they examine many of the central methodological issues and questions raised by feminist scholars undertaking social research. Because an understanding of how to conduct social research is best gained through experience in the social world, this course emphasizes a learning-by-doing approach.

Prerequisites
60 credits, including 9 credits of WMST course work, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 411 - Gender Research Project

Credits: 3
Students work as part of a research team and undertake a semester-long project investigating the significance of gender to the social and academic life of students at Mason. Enhances understanding of techniques for collecting, analyzing, and writing up empirical material. Involves in-depth investigation of and critical engagement with ethical, interpretive, and representational
considerations relating to feminist research.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 427 - Feminist Political Thought

Credits: 3
Explores feminist political thought in historical context. Topics include feminist political movements, feminist critiques of political philosophy, and feminist contributions to political theory.

Prerequisites
GOVT 101, WMST 200, 3 credits of philosophy, or permission of instructor.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 490 - Independent Study in Women and Gender Studies

Credits: 1-3
Reading or research on a specific topic related to women and/or gender issues, under the direction of a faculty member. May involve a combination of reading assignments, tutorials, papers, presentations, or off-campus activities.

Prerequisites
9 WMST credits including WMST 200, or permission of instructor.

Notes
May be repeated for credit up to a total of 6 credits.

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0

WMST 600 - Special Topics

Credits: 3
Study of selected topics central to contemporary women's studies. Topics vary but include representation and images, violence, public policy, international development, transmigration of labor, myth and ritual, history and politics of sexuality, psychoanalysis, and religion.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 0

WMST 610 - Feminist Approaches to Social Research
Credits: 3
Provides an introduction to feminist approaches to social research. Students collect, analyze, and write-up research data as they examine many of the central methodological issues and questions raised by feminist scholars. These include feminist critiques of positivism, feminist standpoint theory, social action research models, and feminist engagements with ethical concerns in doing research with human subjects. Emphasizes a learning-by-doing approach to prepare students to conduct research.

**Prerequisites**
Graduate standing and 3 credits of 600-level WMST course work, or permission of instructor.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**WMST 611 - Gender Research Project**

Credits: 3  
Students work as part of a research team and undertake a semester-long project investigating the significance of gender to the social and academic life of students at Mason. Enhances understanding of techniques for collecting, analyzing, and writing up empirical material. Involves in-depth investigation of and critical engagement with ethical, interpretive, and representational considerations relating to feminist research.

**Prerequisites**
WMST 610 or SOCI 634.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**WMST 630 - Feminist Theories across the Disciplines**

Credits: 3  
Multidisciplinary course examines the central issues of feminist theory and explores the various strategies of feminist theorists. Analyzes the ways in which feminist theories have challenged established disciplinary boundaries and contested the traditional assumptions of the humanities, the social sciences, and the sciences.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0

---

**WMST 640 - Women and Global Issues**

Credits: 3  
Multidisciplinary course explores the complex issues women face in different regions of the world. Addresses women's diverse and shared global concerns and provides students with the tools to analyze and understand women in a global context.

**Prerequisites**
Graduate standing.

**Hours of Lecture or Seminar per week:** 3  
**Hours of Lab or Studio per week:** 0
WMST 690 - Directed Readings and Research in Women and Gender Studies

Credits: 3
Advanced individualized study of gender through readings, discussion, research, and/or projects under the direction and supervision of a member of the women's studies faculty.

Prerequisites
Permission of instructor.

Notes
May be repeated for a maximum of 9 credits.

Hours of Lecture or Seminar per week: 3
Hours of Lab or Studio per week: 3-6

WMST 699 - Capstone Portfolio

Credits: 0
Prior to graduation and in consultation with their advisor, students will reflect on and synthesize their work in the women's studies certificate program by selecting three items taken from their work in the program and discussing these items in a 7-10 page essay. Work selected may include course papers, videos of their performances, exhibit photos, music recordings, and other items as agreed upon by student and advisor.

Prerequisites
Students must have completed their course work for women's studies certificate, or be in the last semester of their course work

Hours of Lecture or Seminar per week: 0
Hours of Lab or Studio per week: 0
